## Arts and Humanities

### Majors
- African American and African Studies
- American Studies
- Art History
- Art Studio
- Asian American Studies (Humanities emphasis)
- Chicana/Chicano Studies (Cultural emphasis)
- Chinese
- Classical Civilization
- Comparative Literature
- Design
- Dramatic Art
- English
- French
- German
- Greek
- History
- Italian
- Japanese
- Landscape Architecture
- Latin
- Medieval Studies
- Music
- Native American Studies
- Philosophy
- Religious Studies
- Russian
- Spanish
- Women's Studies

### Minors
- African American and African Studies
- American Studies
- Art History
- Art Studio
- Asian American Studies
- Chicana/Chicano Studies
- Chinese
- Classical Civilization
- Comparative Literature
- Dramatic Art
- English
- Film Studies
- French
- German
- Global and International Studies (Arts and Humanities emphasis)
- Greek
- History
- Italian
- Japanese
- Jewish Studies
- Latin
- Medieval Studies
- Music
- Native American Studies
- Philosophy
- Religious Studies
- Russian
- Social and Ethnic Relations
- Spanish
- Women's Studies

## Science and Engineering

### Majors
- Agricultural Management and Rangeland Resources
- Animal Biology
- Animal Science
- Animal Science and Management
- Anthropology (B.S. degree only)
- Applied Physics
- Atmospheric Science
- Avian Sciences
- Biochemistry and Molecular Biology
- Biological Sciences
- Biotechnology
- Cell Biology
- Chemistry
- Clinical Nutrition
- Computer Science
- Crop Science and Management
- Engineering (all majors)
- Entomology
- Environmental Biology and Management
- Environmental Horticulture and Urban Forestry
- Environmental and Resource Sciences
- Environmental Toxicology
- Evolution and Ecology
- Exercise Biology
- Fermentation Science
- Fiber and Polymer Science
- Food Biochemistry
- Food Science
- Genetics
- Geology
- Hydrology
- Mathematics
- Microbiology
- Natural Sciences
- Nature and Culture
- Neurobiology, Physiology, and Behavior
- Nutrition Science
- Physics
- Plant Biology
- Psychology (B.S. degree)
- Range and Wildlands Science
- Soil and Water Science
- Statistics
- Viticulture and Enology
- Wildlife, Fish and Conservation Biology
- Geophysics
- Hydrology
- Insect Ecology
- Landscape Restoration
- Mathematics
- Medical-Veterinary Entomology
- Nature and Culture
- Nematology
- Nutrition and Food
- Nutrition Science
- Physics
- Plant Biology
- Precision Agriculture
- Science and Society
- Soil Science
- Statistics

### Social Sciences

### Majors
- Anthropology (A.B. degree)
- Asian American Studies (Social Sciences emphasis)
- Chicana/Chicano Studies (Social Policy Studies emphasis)
- Communication
- Community and Regional Development
- East Asian Studies
- Economics
- Environmental Policy Analysis and Planning
- Human Development
- International Agricultural Development
- International Relations
- Linguistics
- Managerial Economics
- Political Science
- Political Science–Public Service
- Psychology (A.B. degree)
- Sociology
- Sociology–Organizational Studies
- Textiles and Clothing

### Minors
- Aging and Adult Development
- Agricultural and Managerial Economics
- Anthropology (Social–Cultural Emphasis)
- Anthropology (General Emphasis)
- Communication
- Community Development
- Contemporary Leadership
- East Asian Studies
- Economics
- Economy, Justice and Society
- Education
- Energy Policy
- Environmental Policy Analysis
- Global and International Studies (Social Science emphasis)
- History and Philosophy of Science
- Human Development
- International Agricultural Development
- Linguistics
- Political Science
- Psychology
- Science and Society
- Sociology
- Textiles and Clothing
- War–Peace Studies

* This course may not be used to satisfy a college or university composition requirement and GE writing experience simultaneously.
† Also assigned to another area of topical breadth. † Credit for writing experience allowed if co-course taken concurrently (see Writing Experience list).
Social-Cultural Diversity

These courses satisfy the GE requirement for social-cultural diversity. Many of these courses also provide GE credit for topical breadth or writing experience. Refer to the topical breadth and writing experience course lists to determine if any additional GE credit applies.

* This course may not be used to satisfy a college or university composition requirement and GE writing experience simultaneously.
† Also assigned to another area of topical breadth. ‡ Credit for writing experience allowed if co-course taken concurrently (see Writing Experience list).
These courses satisfy the GE requirement for writing experience, provided you have previously satisfied the Subject A requirement. Many of these courses also provide GE credit for topical breadth or social-cultural diversity. Refer to the topical breadth and social-cultural diversity course lists to determine if any additional GE credit applies. Molecular and Cellular Biology 10, 162

* This course may not be used to satisfy a college or university composition requirement and GE writing experience simultaneously.
† Also assigned to another area of topical breadth. ‡ Credit for writing experience allowed if co-course taken concurrently (see Writing Experience list).
GENERAL EDUCATION THEME OPTIONS

General Education theme options are sets of GE courses sharing a common intellectual theme. These GE theme options are not a separate element of the GE requirement, but a way of selecting your GE courses so that you may benefit from a coherent focus of study while completing the GE requirement. Completion of a theme satisfies the GE requirement for students with majors assigned to the GE topical breadth area of Arts and Humanities. Students with majors assigned to the topical breadth area of either Science and Engineering or Social Science will need to complete additional GE courses in Arts and Humanities to satisfy the campus GE requirement.

Global Population and Environmental Issues
For centuries, there have been concerns and predictions about population growth and its potential effects on the environment and the quality of life. Perspectives on population and environmental issues often vary based on such factors as gender, social class, culture, nation, race/ethnicity, and religion. In this group of courses, students will learn about the complex interplay among environmental, economic, and ethical issues through the study of global population patterns. They will learn how science addresses the use of natural resources by humans, along with the fundamentals of environmental impacts such as global warming. This option group of courses explores diverse perspectives on global population and environmental issues by examining biological, physical, and social processes that influence the everyday lives of people around the world.

Topics might include the social, economic, and environmental challenges of population growth; and the ethics and dilemmas of natural resource use.

Food and Fiber
This option focuses on food and fiber systems, from their plant, animal, or synthetic sources to their ultimate use by humans for health, safety, communication, and pleasure. Understanding these systems enables students to see the connections between the food and clothes that are part of our everyday lives and the scientific, social, and cultural issues that make them so significant to society as a whole.

Topics might include food and clothing safety, quality, and availability; media and consumer perceptions; and cultural histories, values, and meanings.

Changing Agriculture
Changing demographics, environmental issues, and social-political trends in California all play a role in public perceptions and policies related to our food and fiber systems, natural resources, and community values. These perceptions, policies, and values need to be critically examined in the context of larger global economic trends and environmental health and safety. In this option group of courses, students can explore a range of challenging issues related to the complex interplay between rural and urban needs and values.

Topics might include holistic approaches to agriculture; international migration and agricultural development; and how plants and animals influence the course of history.
