2018-2019 General Catalog

Published April 30, 2018; Volume 49 | Content Effective: April 30, 2018-April 28, 2019, unless otherwise noted.

The official version of the 2018-2019 UC Davis General Catalog is this web version prepared by the Office of the University Registrar.

Changes for the 2018-2019 General Catalog, and on:

- The catalog now encompasses one academic year.
- Printed catalogs are no longer produced; to download a printable catalog, see General Catalog Downloads.
- The General Catalog Course Supplement and Policies & Requirements Addendum is no longer produced. Courses are updated and published with effective terms as they are approved. Programs (majors & minors) are updated for fall term only; once a year.
- To understand course descriptions better, see the expanded About Courses.
- For best viewing, use the latest Firefox or Chrome browsers.

Printing the Catalog

To print the entire 2018-2019 General Catalog, see General Catalog Downloads.

To print a single section, like Animal Science or Introduction, use Export PDF in the upper right corner of your browser.

The provisions of this general catalog reflect information as of the date of publication. Content is subject to change without notice.

It is the responsibility of the individual student to become familiar with the announcements and regulations of the university contained in this general catalog.

Office of the University Registrar, 3100 Dutton Hall, One Shields Avenue, Davis, CA 95616-8692

Editorial and production coordination: Randall Larson-Maynard, Senior Editor; Office of the University Registrar.

The University of California, Davis, will provide assistance to the visually impaired regarding the information contained in this catalog. Questions should be directed to the office or department concerned.

DISCLAIMER NOTICE: This General Catalog is not a contract nor an offer to enter into a contract. While every effort is made to ensure the accuracy of the information provided in this General Catalog, it must be understood that all courses, course descriptions, designations of instructors, curricular and degree requirements and other academic information described herein are subject to change or elimination at any time without notice or published amendment to this catalog. In addition, The University of California reserves the right to make changes at any time, without prior notice, to other programs, policies, procedures and information, which are described in this General Catalog only as a convenience to its readers. Fees and all other charges are subject to change at any time without notice. Students should consult the appropriate academic or administrative department, school, college, graduate division or other service provider for currently accurate information on any matters described in this General Catalog; contact information is available at http://ucdavis.edu.
Welcome to UC Davis

From the Chancellor

Welcome to UC Davis. We’re entering an exciting new era of excellence and opportunity, and I’m delighted that you’ve chosen to be part of our thriving community. All of us – faculty, staff and alumni – are committed to helping you reach your academic goals and make the most of your college experience.

Your journey at UC Davis will set a foundation for success that can be carried throughout your life. You have an opportunity to learn from world-class faculty and earn a degree that commands respect in graduate schools and the workplace.

The diversity of our campus community is a tremendous asset as our students seek success in a global workforce that demands a range of backgrounds and skill sets. You are surrounded by some of the best and brightest students from around the globe, and my hope is that your own world opens up like never before at this dynamic university.

For over a century, our alumni have made significant, lasting contributions to society and provided leadership in government, technology, business, the arts and much more. Our students have an incredible opportunity to learn from acclaimed faculty, some of whom have won MacArthur “genius” grants or been inducted into the National Academies.

Our research and innovations improve the world as we address such critical issues as climate change, food and water shortages, and poverty. We are driven by curiosity and thrive on self-expression and artistry that values all voices.

The Manetti Shrem Museum of Art, the renovation of the Memorial Union and the expansion of our Activities and Recreation Center (ARC) are a few of the new developments that reflect our commitment to providing the best educational experience possible as we plan for future growth.

The intellectual curiosity, social engagement and passion for learning you bring to our campus elevates the university as a whole. Together, we build a thriving community dedicated to academic excellence, public service and upward social mobility for students of all backgrounds.

Thank you for the personal touch that you bring to UC Davis. I wish you much success in your studies and the best of times in your college life.

Gary S. May, Chancellor
Academic Calendars

All UC Davis Academic Calendars are now maintained by the Office of the University Registrar; see Academic Calendars.
Introduction

UC Davis

For the full UC Davis story, see About UC Davis.

Visiting the Campus

UC Davis Welcome Center; 530-752-8111
Monday-Friday 8:00 a.m.-5:00 p.m. (PT) | Saturdays 9:00 a.m.-3:00 p.m. (PT) | Closed Sundays except for Apr 1-Apr 30.
Campus tours. Monday-Friday 9:00 a.m. & 1 p.m. (PT) | Saturdays 11:00 a.m. & Sundays April 1-Apr 30 11:00 a.m. (PT).
Register at http://visit.ucdavis.edu or 530-752-8111.

Accreditation

The University of California, Davis is accredited by WASC Senior College and University Commission (WSCUC).

UC Davis is also accredited by the Accreditation Board for Engineering and Technology, Accreditation Council for Graduate Medical Education, Accreditation Review Commission on Education for the Physician Assistant (ARC-PA), American Association for Accreditation of Laboratory Animal Care, American Bar Association, American Chemical Society, American Dietetic Association, American Psychological Association, American Society of Crime Lab Directors Laboratory Accreditation Board (ASCLD/LAB); American Society of Landscape Architects, Association of American Law Schools, Association of American Medical Colleges, Association to Advance Collegiate Schools of Business; Commission on Collegiate Nursing Education; Commission on Teacher Credentialing, Computer Science Accreditation Commission, Council on Education and Public Health, the Council on Education of the American Veterinary Medical Association, Intersocietal Commission for the Accreditation of Vascular Laboratories (ICAVL), and the Liaison Committee on Medical Education.

UC Davis Principles of Community

The University of California, Davis, is first and foremost an institution of learning and teaching, committed to serving the needs of society. Our campus community reflects and is a part of a society comprising all races, creeds, and social circumstances. The successful conduct of the University's affairs requires that every member of the University community acknowledge and practice the following basic principles:

We affirm the dignity inherent in all of us, and we strive to maintain a climate of justice marked by respect for each other. We acknowledge that our society carries within it historical and deep-rooted misunderstandings and biases, and therefore we will endeavor to foster mutual understanding among the many parts of our whole.

We affirm the right of freedom of expression within our community and also affirm our commitment to the highest standards of civility and decency towards all. We recognize the right of every individual to think and speak as dictated by personal belief, to express any idea, and to disagree with or counter another's point of view, limited only by University regulations governing time, place, and manner. We promote open expression of our individuality and our diversity within the bounds of courtesy, sensitivity, and respect.

We confront and reject all manifestations of discrimination, including those based on race, ethnicity, gender, age, disability, sexual orientation, religious or political beliefs, status within or outside the University, or any of the other differences among people which have been excuses for misunderstanding, dissension, or hatred. We recognize and cherish the richness contributed to our lives by our diversity. We take pride in our various achievements, and we celebrate our differences.

We recognize that each of us has an obligation to the community of which we have chosen to be a part. We will strive to build a true community of spirit and purpose based on mutual respect and caring.

The "Principles of Community" were prepared and adopted after extensive discussion within the campus community about the need for a statement that reflects UC Davis' commitment to a learning environment characterized by diversity, understanding and the acceptance of all people. This statement of common principles was published on April 20, 1990, carrying the endorsement of Chancellor Theodore L. Hullar and the leadership of the Davis Division of the Academic Senate, the Academic Staff Organization, the UCD Staff Assembly, the UCDMC Staff Assembly, the Associated Students of UC Davis (ASUCD), and the Graduate Student Association.
Educational Objectives for Students

The Educational Objectives for Students were adopted by the Academic Senate in April 2002. They articulate our aspirations for student learning; help to establish campus priorities and guide decision making related to student development; and guide academic programs in the review of how their classes and course requirements interact with the goals to demonstrate educational effectiveness.

Develop effective communication skills:
  - Written, oral, interpersonal, group

Develop higher cognitive skills:
  - Critical thinking, creativity, analytical ability

Cultivate the virtues:
  - Ethics, responsibility, honor, tolerance, respect for others, empathy

Develop focus and depth in one or more disciplines.

Develop leadership skills:
  - Ability to stimulate and direct collaborative learning and collaborative action

Develop a global perspective:
  - Broad intellectual and cultural experience through active engagement, an understanding of the interactions among the individual, society, and the natural world

Prepare for lifelong learning:
  - Independent thinking and learning, learning to find information, asking the right questions

Mission Statement | Philosophy of Purpose

UC Davis is dedicated to academic excellence and serving the public good. As a major research institution, UC Davis takes a holistic approach in addressing the most critical issues faced by the region, state and the world. The university embraces the principles of diversity, inclusion and equity to sustain a culture of mutual respect.

Colleges & Schools

College of:
  - Agricultural & Environmental Sciences
  - Biological Sciences
  - Engineering
  - Letters & Science

Schools:
  - Graduate Study
  - Betty Irene Moore School of Nursing
  - Graduate School of Management
  - School of Education
  - School of Law
  - School of Medicine
  - School of Veterinary Medicine

Academic Resources

Degrees Offered by UC Davis

Undergraduate majors are administered by the colleges of Agricultural & Environmental Sciences (A&ES), Biological Sciences (CBS), Letters & Science (L&S), and Engineering. All graduate programs are administered by Graduate Studies. Professional studies are administered by the schools indicated. The list below indicates the major or discipline, the degree(s) offered and the college or school offering the major. Minor Programs are listed, below the majors. The legend is at the bottom of this page.

Aerospace Science and Engineering, B.S., Engineering
African American and African Studies, A.B., L&S
Agricultural and Environmental Chemistry, M.S., Ph.D., A&ES
Agricultural and Environmental Education, B.S., A&ES
Agricultural and Resource Economics, M.S., M.S./M.B.A., Ph.D., A&ES
American Studies, A.B., L&S
Animal Behavior, M.S.*, Ph.D., CBS
Animal Biology, B.S., M.S., Ph.D., A&ES
Animal Science, B.S., A&ES
Animal Science and Management, B.S., A&ES
Anthropology, A.B. or B.S., M.A., Ph.D., L&S
Applied Mathematics, B.S., M.S., Ph.D., L&S
Applied Physics, B.S., L&S
Art History, A.B., M.A., L&S
Art Studio, A.B., M.F.A., L&S
Asian American Studies, A.B., L&S
Atmospheric Science, B.S., M.S., Ph.D., A&ES
Avian Sciences, M.S., A&ES
Biochemical Engineering, B.S., Engineering
Biochemistry, Molecular, Cellular, and Developmental Biology, M.S.*, Ph.D., CBS
Biochemistry and Molecular Biology, B.S., CBS
Biological Sciences, A.B. or B.S., CBS
Biomedical Engineering, B.S., M.S., Ph.D., Engineering
Biophysics, Ph.D., CBS
Biostatistics, M.S., Ph.D., L & S
Biotechnology, B.S., A&ES
Cell Biology, B.S., CBS
Chemical Engineering, B.S., M.S., Ph.D., Engineering
Chemical Physics, B.S., L&S
Chemistry, A.B., B.S., M.S.*, Ph.D., L&S
Chicana/Chicano Studies, A.B., L&S
Child Development, M.S., A&ES
Chinese, A.B., L&S
Cinema and Digital Media, A.B, L&S
Civil and Environmental Engineering, M.S., Ph.D., Certificate, Engineering
Civil Engineering, B.S., Engineering
Classical Civilization, A.B., L&S
Clinical Nutrition, B.S., A&ES
Clinical Research, M.A.S., School of Medicine
Cognitive Science, A.B., B.S., L&S
Communication, A.B., M.A., Ph.D., L&S
Community and Regional Development, B.S., A&ES
Community Development, M.S., A&ES
Comparative Literature, A.B., M.A., Ph.D., L&S
Computer Engineering, B.S., Engineering
Computer Science, B.S., L&S
Computer Science, M.S., Ph.D., Engineering
Computer Science and Engineering, B.S., Engineering
Conservation Management, Certificate, Graduate Studies
Creative Writing, M.F.A., L&S
Cultural Studies, M.A.*, Ph.D., L&S
Design, A.B., M.F.A., L&S
Dramatic Art, M.F.A., L&S
East Asian Studies, A.B., L&S
Ecological Management and Restoration, B.S., A&ES
Ecology, M.S., Ph.D., A&ES
Ecology (Joint Doctorate with San Diego State University), Ph.D., A&ES
Economics, A.B., M.A.*, Ph.D., L&S
Education, M.A., Ph.D., Ed.D., Credential, School of Education
Electrical and Computer Engineering, B.S./M.S., M.S., Ph.D., Engineering
Electrical Engineering, B.S., Engineering
Energy Systems, M.S, Ph.D., GSM
English, A.B., M.A.*, Ph.D., L&S
Entomology, B.S., M.S., Ph.D., A&ES

Fees, Expenses, & Financial Aid

Give careful consideration to the total financing of your university education. If you need funds beyond those that you and your family can provide, you should apply for financial aid well in advance of enrollment. There are deadlines for applying for financial aid; grants, loans, Work Study and scholarships.

For current student fee information, see Tuition and Fees. Every student must pay the quarterly fees, and any amounts charged to the student account, in full by the fee payment deadlines in the Fees and Billing calendar. A Deferred Payment Plan (DPP) is available, allowing students to pay quarterly student and housing fees in three monthly installments, or semester fees in four monthly installments.

Course Materials & Service Fees

Students may be charged fees in some courses for the use, rental or consumption of materials, tools or equipment, or for the costs of materials or services necessary to provide a special supplemental educational experience. For example, course materials fees may cover the purchase of chemicals and glassware for a science laboratory or art supplies for an art studio class. They might also cover film rentals, field trips, or the purchase or rental of specific equipment. Courses that may be subject to the course materials fee are listed in the Class Schedule. See the current course materials fees list.

Part-Time Students Fees

Students approved for enrollment on a part-time basis pay the same fees as full-time students, but pay only one-half of Tuition. Nonresident part-time students pay one-half the Nonresident Supplemental Tuition. For full information, see Part Time.

UC Employee-Student Fees

Reduced fees are available to UC career employees and certain UC retirees who are qualified for admission to the university. For full information, see Career Staff Reduced Fee.

Vehicle Parking Permit & Bicycle Licensing Fees

Parking permit information and rates or 530-752-8277.

A California State bicycle license sticker is required on all bicycles operated on campus; full information or 530-752-2453.

Costs for a Year at UC Davis

For the most recent Cost of Attendance figures, see undergraduate; graduate; professional.

International Student Expenses

International students are responsible for all of their expenses while studying at UC Davis. The expenses include nonresident supplemental tuition, systemwide tuition and fees, campus-based fees, room and board, books and a modest amount for personal expenses. For the latest costs, see Cost of Attendance. It is extremely important that students arrive on campus with sufficient funds for the entire academic year to cover all fees, tuition and expenses such as room and board, health insurance, books, supplies, transportation and other miscellaneous expenses. Careful budgeting is essential for international students.

During the admission process, most international undergraduate students are required to complete the "Confidential Financial Statement" form certifying that support funds are available for nine months. Students need to have adequate, reliable and continuing financial support for the whole time they are here. After students arrive in the United States, it is extremely difficult to obtain additional funding. The university does not offer grants or financial aid to international undergraduate students.

Fee Refunds

Schedule of Refunds

Cancel registration and withdrawal from the university.
Residence for Tuition Information

For complete information for determination of residence for tuition, see Tuition & Residence.

Financial Aid

The Financial Aid and Scholarships Office provides financial assistance in the form of grants, scholarships, loans, and work-study employment. To apply, undergraduates and graduate students are required to annually file the Free Application for Federal Student Aid (FAFSA), or the California Dream Act Application.

Satisfactory Academic Progress

Federal regulations require that undergraduate and graduate student financial aid recipients meet the published Standards for Satisfactory Academic Progress (SAP) for Financial Aid concerning units and maximum quarters of attendance allowed to obtain a degree; see Satisfactory Academic Progress (SAP).

Financial Aid Types

Grants. A grant is an award that does not have to be repaid as long as the student remains eligible. Whenever criteria and funding levels permit, a student's financial aid award includes grants; see Available Grant Awards.

Loans. Financial aid almost always includes a long-term loan; see Undergraduate Student Loans.

Work-Study

Undergraduate Work-Study allows students to earn part of their financial aid through part-time employment; see Work-Study for Undergraduate Students.

Community Service Work-Study. A wide variety of community service jobs are available for students who apply for Work-Study funding; see Work-Study for Undergraduate Students.

Work-Study for Graduate. Work-Study funds for graduate students are allocated directly to the chairpersons of the graduate programs; see Work-Study for Graduate Student Researchers.

Undergraduate Scholarships and Awards

Undergraduates with outstanding academic records are encouraged to apply for scholarships. For information about scholarship application process, see Undergraduate and Prestigious Scholarships.
Student Life

As a UC Davis student, you're part of a creative, innovative community. Located in a classic college town where bicycles predominate and students make up half the population, UC Davis offers resources to create your unique path whether you have established academic and career goals or want to explore. Living-learning communities and vibrant student centers are spaces for exploring and affirming diverse identities. The campus's multiple advising, tutoring, leadership and career resources will help you excel and achieve your aspirations, and the array of UC Davis professional schools—business, law, veterinary medicine and medicine—offer unique opportunities for undergraduates. With over 750 student organizations, you will find welcoming, supportive groups that share your interests and passions, and when it's time to recreate, options at UC Davis encompass everything from arts and crafts to indoor rock climbing.

Living at Davis

On-Campus Housing

Student Housing and Dining Services

Living on campus adds a measure of convenience to your life and helps familiarize students with the campus. All incoming fall quarter freshmen and transfer students are guaranteed housing in Student Housing, provided they meet eligibility requirements and all Student Housing and university deadlines. Freshmen and Transfer students are guaranteed one year of housing. For more information about the housing guarantee; see Prospective Residents. All other students should contact Student Housing to inquire about their housing options.

For more information on the following housing, see Housing Areas.

- Residence Halls
- Apartments
- Student Housing Apartments (SHA)—Transfer Student Communities
- Apartments (UC Davis)
- Public-Private Partnerships
- Capital Projects

Off-Campus Housing

The majority of UC Davis students live off campus. The City of Davis has ample apartments for rent, from one-person studio apartments to five- or six-person suites. Townhouses, duplexes and houses throughout the city are also available for student rental. ASUCD maintains a list of available community housing and, early every year, hosts "Housing Day," an event that brings dozens of local housing managers to campus to introduce their communities to UC Davis students.

Transportation and Parking

Transportation Services

Transportation Services (TAPS)

The restricted central campus is closed to unauthorized motor vehicles. Walking and bicycling are the most common ways to traverse the campus. For complete information, see Transportation Services (TAPS).

- Bicycles I Parking I Motorist Assistance
- Alternative Transportation
  - goClub
  - UC Davis/UC Davis Medical Center Shuttle
  - Davis/Berkeley Shuttle
Buses

Unitrans provides year round public transit service on 18 lines on the UC Davis campus and the City of Davis. Unlimited access is provided to undergraduate students with a valid UC Davis registration card; others may ride by paying the single-ride cash fare or by purchasing discounted multi-ride passes from TAPS or at the Unitrans business office.

Student Employment

Student Employment is a resource for UC Davis students seeking employment opportunities to fund their educational expenses. For resources, eligibility, and available jobs, see the Internship and Career Center.

WorkLife and Wellness

Heitman Staff Learning Center; worklife@ucdavis.edu

WorkLife and Wellness is the principal resource on campus for referrals, outreach, education and programming that enable students, faculty and staff to meet commitments and pursue interests both in and outside of the university. For services addressing child care, elder care, breastfeeding support, health and wellness, community involvement, and workplace flexibility, see WorkLife and Wellness. See also, the UC Davis Student Parent Child Care Funding Program and Community Child Care Programs.

Health and Counseling Services

Student Health and Counseling Services (SHCS)

Student Health and Wellness Center; Appointments: 530-752-2349; General information: 530-752-2300

Student Health and Counseling Services (SHCS) provides wellness resources and cost-sensitive medical care tailored to the unique and diverse needs of UC Davis students. All registered students are assigned a primary care provider (PCP) who coordinates their wellness care and treatment needs. SHCS staff include physicians, nurse practitioners, registered nurses, physical therapists, dietitians and health educators. Pharmacy, lab, and x-ray services are available. Medical care is provided at the Student Health and Wellness Center. Services are available to all registered students regardless of insurance coverage. After hours, students can speak with an advice nurse at 530-752-2349. To read about services and fees, make an appointment, get urgent care information, or contact an advice nurse after hours, see Medical Services.

Student Health Insurance

The University of California (UC) requires that all students have health insurance. To ensure this requirement is met, all UC students are automatically enrolled in UC Student Health Insurance Plan (UC SHIP) and fees for coverage are charged to your student account each term. UC SHIP includes medical, dental and vision benefits. Students with comparable health insurance can apply for a UC SHIP waiver. Students may apply for a student health insurance waiver. For complete information, see Insurance Services.

Immunizations

The University of California (UC) is committed to protecting the health and well-being of our students. Therefore, all of the UC campuses are implementing procedures to ensure that students are educated about and receive vaccinations to prevent potentially serious and contagious diseases.

To meet the UC Davis entrance requirements, you must complete BOTH the Immunization and TB Screening Questionnaire Forms.

- Health History Form
- Immunizations
- TB Risk Screening

Students who have not completed this requirement may have a hold on their registration. Students submit their information through HEM or MyAdmissions
Counseling Services

Student Health and Counseling Services (SHCS); 219 North Hall; Appointments: 530-752-0871; General information: 530-752-2300

SHCS Counseling Services offers short term counseling services to all registered students with liaison to off-campus community resources. To make a counseling appointment or for consultations, call 530-752-0871, any time. Those concerned about a student or who desire consultation or assistance in making a referral are encouraged to call 530-752-2349.

Mind Spa

Mind Spa; 132 North Hall and Student Health and Wellness Center

Health Education and Promotion

Health Education and Promotion (HEP) helps students stay healthy, thrive and enhance their academic and personal success through the creation of health-promoting campus and community environments and student-centered health education. HEP focuses on promotion of healthy eating, physical activity, hydration, sexual health and communication, mental well-being, bike helmet use, sleep, and risk reduction related to alcohol, tobacco, other drug use.

Extracurricular Activities

By participating in extracurricular activities at UC Davis, students benefit from numerous opportunities for educational, personal, cultural and social enrichment. In general, registered and enrolled UC Davis students may participate in extracurricular activities sponsored by the campus. Some activities have additional eligibility criteria, so you are encouraged to inquire about the particular requirements of the groups and programs that interest you.

Campus Recreation And Unions

Department of Campus Recreation; Activities and Recreation Center (ARC) | Memorial Union

The UC Davis Department of Campus Recreation and Memorial Union manage the following programs and facilities, creating opportunities to build community, cultivate friendships and enhance learning; complementing the academic mission of the university and enhancing the quality of life for the campus:

- Activities and Recreation Center (ARC)
- Cal Aggie Marching Band
- Craft Center
- Equestrian Center
- Games Area
- Hickey Pool
- Intramural Sports
- Memorial Union
- Outdoor Adventures Center
- Pavilion
- Putah Creek Lodge
- Recreation Fields
- Recreation Pool
- Sport Clubs
- The Buzz
- UCDHS Student Fitness Center

UC Davis Stores

The UC Davis Stores are full-service stores owned and operated by the university.
Silo Union
The Silo Union houses food services, meeting/conference facilities, lounges and the campus pub.

Intercollegiate Athletics
The Intercollegiate Athletics (ICA) program is an integral part of the total educational process and a vital part of the human development of young men and women.

Arts
Robert and Margrit Mondavi Center for the Performing Arts | UC Davis
The Mondavi Center is the premier performance venue in Northern California and the regional destination for the best in music, dance, distinguished speakers, jazz, theater, and world music.

Campus Security, Crime Awareness, and Alcohol and Drug Abuse Prevention

In accordance with federal laws, Crime Awareness and Campus Security Act of 1990, and the Drug Free Schools and Communities Act of 1989, UC Davis annually makes information available to students and employees regarding campus security, crime statistics, and alcohol and drug abuse prevention. Also see, victim support services.
Academic Advising & Student Services

To help you get the most from your education, UC Davis offers many different types of academic advising. College advisors assist you in meeting degree requirements and taking maximum advantage of available university resources. A conference at least once a quarter with your faculty or staff advisor is especially desirable during your first year and during your final quarters preceding graduation. A meeting with a faculty or staff advisor is required each year for students in the College of:

- Engineering
- Letters and Science

College of Biological Sciences matriculating students in their first-year at UC Davis are required to meet with a BASC advisor in the Biology Academic Success Center (BASC).

For complete information on academic advising, see the College of:

- Agricultural and Environmental Sciences
- Biological Sciences
- Engineering
- Letters and Science

Academic Advising Services

**Educational Opportunity Program (EOP),** 530-752-9366, offers an array of services to support students both academically and socially. EOP provides a caring and supportive environment for students to meet with peer and staff advisors for help with course selection, registration procedures, campus processes and resources, choosing a major, social challenges and other general advising questions.

**Student Disability Center,** 530-752-3184, is committed to ensuring equal educational access and opportunities for students with disabilities. An integral part of that commitment is the coordination of specialized academic accommodations and support services. Additionally, the center advises students on their rights and responsibilities, as well as strategies and tools for managing their disabilities. Current and prospective students, faculty, and staff are encouraged to contact the center for information regarding available services, resources, and the accommodation process.

Student Housing

**The First-Year Experience Program,** 530-752-5566, is one component of the New Student Academic Services unit in Student Housing & Dining Services, which includes the new student Orientation program and the academic year First-Year Experience Peer Advising program. The Residence Hall Advising Team (RHAT) is a collaboration between NSAS, the four colleges and Study Skills Assistance to provide drop-in academic peer advising and tutoring within the residence halls.

**New Student Orientation,** 530-752-4443, assists new students and their families with the transition to UC Davis. Orientation includes assistance with academic advising, course registration, information for campus resources and social integration.

Student Conduct and Grievances

**Office of Student Support and Judicial Affairs,** 530-752-1128

The Office of Student Support and Judicial Affairs (OSSJA) upholds campus standards of academic honesty and student conduct by resolving alleged violations of university policies or campus regulations. OSSJA Case Managers serve students in distress by coordinating campus resources for assistance and care. OSSJA also provides conflict resolution services and general problem solving for students.

Code of Academic Conduct

A long tradition at UC Davis, students are expected to uphold high standards of honesty and fairness in their academic work. The Code and additional information may be found at the Office of Student Support & Judicial Affairs.
Student Responsibilities

Students are responsible for complying with the announcements and regulations in this catalog and with all policies, rules and regulations of the university and this campus. Students will not be able to register or receive transcripts of record or diplomas until they have met all university obligations.

Discrimination & Sexual Harassment/Sexual Violence

Discrimination | Sexual Harassment/Sexual Violence

If students believe that they have been subjected to prohibited discrimination, harassment, sexual harassment, and/or sexual violence, they may contact the Harassment and Discrimination Assistance and Prevention Program (HDAPP) at 530-747-3864. HDAPP also offers an Anonymous Call Line at 530-747-3865. Concerns related to sexual harassment and/or sexual violence can also be filed at http://sexualviolence.ucdavis.edu/report/report-form.cfm. Concerns related to Hate and Bias incidents on campus can be reported at http://reportthatandbias.ucdavis.edu/.

For more information about resources available on campus, including confidential resources, for students experiencing prohibited discrimination, harassment, sexual harassment, and/or sexual violence, please see https://hdapp.ucdavis.edu/resources/index.html.

Resolving Academic Problems

Grade Changes

Students who believe they received an incorrect grade due to a clerical or procedural error should ask their instructor to file a Request for Grade Change form with the Office of the University Registrar; for complete information, see Grade Changes and the guidelines for the Committee on Grade Changes.

Associated Students, University of California at Davis (ASUCD)

The Associated Students, University of California, Davis (ASUCD), 530-752-1990, is constituted to represent its membership in the University of California and in the greater community and to increase the role and impact of its members on those decisions affecting their lives.

ASUCD is run by a three-branch, federal model government with some city council-style modifications. It consists of an executive branch, a legislative branch, and a judicial branch, as well as administrative support units. ASUCD is one of the largest student employers on campus and offers a variety of services that provide resources for UC Davis students and create a great environment for academics as well as for entertainment.

The Association aims to create and provide services and activities which its membership shall consider important to fulfilling the experience of being a student attending the University of California, Davis.

Student Academic Success Center

The Student Academic Success Center, 530-752-3000 530-752-2013, is a large, multi-program Student Affairs department providing essential services, programs, and information for UC Davis students. Programs include: academic support services in math, science, and writing, Educational Opportunity Program (EOP), Guardian Scholars Program (GSP), Mathematics Diagnostic Testing Project, Reentry and Transfer Student Services, Veterans Success Center, TRiO Scholars Program, MURALS, Study Skills and Success Coaching, and Pre-Professional and Pre-Graduate Advising. For complete information, see Student Academic Success Center.

Academic Assistance and Tutoring (AAT)

Academic Assistance and Tutoring (AAT), 530-752-2013, provides academic support to undergraduate students enrolled in Biology, Chemistry, Economics, Mathematics, Physics, Statistics, and Writing Across the Disciplines. Our instructional professional staff offers classes, workshops, and office hours. To support our professional staff and our services, AAT undergraduate tutors provide drop-in tutoring for students enrolled in math and science courses and in writing across the disciplines. For complete information, Academic Assistance and Tutoring.
Educational Opportunity Program (EOP) Services

Educational Opportunity Program (EOP), 530-752-9366, offers an array of services to help students adapt both academically and socially to the University setting and successfully achieve their educational goals. EOP provides a caring and supportive environment for students to meet with peer and staff advisors and network with other students. For complete information, see Educational Opportunity Program (EOP).

Guardian Scholars Program (GSP)

The mission of the Guardian Scholars Program (GSP), 530-752-1211, is to empower foster youth at UC Davis to reach their potential by providing a community network that supports their academic progress and personal growth. For complete information, see Guardian Scholars Program (GSP).

Mentorships for Undergraduate Research in Agriculture, Letters and Science (MURALS)

Mentorships for Undergraduate Research in Agriculture, Letters and Science (MURALS), 530-752-9931, is designed to enrich the research experience of students situationally disadvantaged in their access to graduate school. For complete information, see MURALS.

Transfer and Reentry Center

If you transferred to UC Davis, are a reentry student, the Transfer and Reentry Center, 530-752-2200, is here to serve you. Reentry refers to undergraduate students who are 25 years-old or older, graduate students who are 30 years-old or older, married students or student parents. If you or your parent(s) served in the U.S. military and you are unsure of what benefits you may be eligible for, the Transfer and Reentry Center can help. For complete information, see Transfer and Reentry Center.

Pre-Graduate/Pre-Professional Services

Pre-Professional/Pre-Graduate School Advising, 530-752-4475, offers individualized advice and information to students interested in admission to professional and graduate schools (law, Masters and Ph.D. programs, etc.) including prerequisite course planning, exam preparation, evaluation of competitiveness and assistance with all aspects of the application process such as writing the personal statement, getting good letters of recommendation, selecting schools/programs and strategies for becoming the most competitive applicant possible. In addition, the program offers small group advising and informative workshops, and hosts visits from admissions officers from various professional schools. For complete information, see Pre-Professional/Pre-Graduate School Advising.

Special Transitional Enrichment Program (STEP)

Freshman EOP students are invited to participate in the Special Transitional Enrichment Program (STEP), 530-752-2013. The program begins in summer and continues through the first two academic years. STEP offers preparatory course work, academic assistance and advising to help students adjust academically and socially to the campus by strengthening their learning skills and study habits, and by providing an extensive orientation to campus life. For complete information, see Special Transitional Enrichment Program (STEP).

Study Skills Assistance

Advising and workshops are offered to help students strengthen skills that have significant impact on college achievement and academic success. Students may attend a scheduled workshop or meet with an advisor to get help with time management, test preparation, success strategies, note taking and other study skills. For complete information, see Study Skills Assistance, 530-752-4475.

Success Coaching

The Success Coaching Program is designed to help undergraduate students at UC Davis take control of their academic, personal, and professional success. Coaches use a strengths-based approach to support the student's exploration of the habits, priorities, values, and challenges that may be impacting their college experience. Coaching incorporates elements of self-assessment, reflection, skill-building, goal-setting, and accountability. Through one-on-one meetings with a coach, students will gain an increased sense of self-awareness in order to
develop practical strategies for solving problems and eliminating barriers to maximum performance. For complete information, see Success Coaching Program.

Veterans Success Center

The Veterans Success Center provides students a welcoming space, professional and peer advising, guidance with educational benefits and engagement opportunities that span the university and the larger Davis community. For complete information, see Veterans Success Center.

Internship and Career Services

Internship Programs

Gain practical skills that will transfer to the workplace. Apply your coursework. Launch your career. Take advantage of hundreds of internships organized through the Internship and Career Center (ICC) or initiate your own. There is literally something for everyone. An internship may be full time or part time, credit or non-credit, voluntary or paid, depending on your skills, needs and interests and the availability of openings. Internship experiences must emphasize learning and be supervised by a professional. Academic credit is awarded for experiences planned and approved in advance by a sponsoring faculty member.

The Internship and Career Center (ICC)

The Internship and Career Center (ICC) works with undergraduate, masters, and Ph.D students, postdoctoral scholars and recent alumni. The ICC can help you identify your abilities and interests and relate them to career options; gain access to practical experience to increase your competitiveness in the job market; and find out how and where to look for employment. Attend ICC workshops on finding an internship or part time job, beginning a job search, developing a resume, networking and preparing for an interview.

Masters, Ph.D.s, and Postdoc Services

The Internship and Career Center, located in South Hall, provides comprehensive career services for UC Davis Master’s and Ph.D. students, and Postdoctoral scholars (MPP). Career advisors can assist you with all aspects of your career search either within or beyond academia, or both. Our career services include confidential one-to-one advising with individualized review of curriculum vitae (CV), resumes, and cover letters; workshops and panel discussions; recruiting and networking events; and employer information sessions, all specifically designed for advanced degree holders.

Community Service Resource Center

If you are interested in providing community service, visit the Community Service Resource Center (CSRC) coordinated through the ICC. Volunteering can be a rewarding and satisfying experience that may also improve your qualifications for the job market. The CSRC has a database with information about non-profit agencies and volunteer opportunities locally, nationally and world-wide.

Academic Resources

UC Davis Study Abroad

UC Davis Study Abroad, 530-752-5763, is one of the richest educational experiences a student can have. When students return from study abroad in places like Italy or Hong Kong, they describe their time abroad as an experience that changed their lives and prepared them to learn, work, and engage in a globally interconnected world. UC Davis Study Abroad is home to UC Davis Quarter Abroad, UC Davis Summer Abroad, UC Davis Internships Abroad, UC Davis Seminars Abroad, UC Davis Exchanges, and the University of California Education Abroad Program (UCEAP). For complete information, see UC Davis Study Abroad.

First-Year Seminar Program

The UC Davis First-Year Seminar Program gives first-year students the opportunity to study with faculty members in small groups, meeting in settings more informal than the ordinary classroom. For complete information, see UC Davis First-Year Seminar Program.
CalTeach/Mathematics and Science Teaching Program (MAST)

The UC Davis CalTeach/Mathematics and Science Teaching Program (MAST), 530-754-1056, provides students with opportunities to explore careers in mathematics and science education. For complete information, see Mathematics and Science Teaching Program (CalTeach/MAST).

Undergraduate Research Center

The Undergraduate Research Center, 530-752-3390, serves as central hub to inspire and facilitate UC Davis undergraduates to engage in faculty-sponsored undergraduate research, scholarship, design and creative activities. For complete information, see Undergraduate Research Center.

UC Washington Program

The University of California hosts a system-wide academic internship and residential program for undergraduate students attending from each of the UC campuses. The programs provide undergraduates an opportunity to enrich their education while in residence for one quarter in the nation's capital. Students also have unparalleled access to a wide range of internship opportunities. For complete information, see UC Washington Program, 530-752-6652.

Student Resource and Information Centers

Center for Advocacy, Resources & Education (CARE)

The UC Davis Center of Advocacy, Resources & Education (CARE) is committed to reducing the incidence and the impact of sexual harassment and all forms of sexual violence, including sexual assault, dating and domestic violence, and stalking, within the UC Davis and UC Davis Health communities. CARE staff work to broaden public awareness about the nature of sexual violence and its impact on people of all genders, to reinforce the necessity of healthy communication, including healthy sexual communication and consent, and to mitigate the trauma of the survivor. For complete information, see Center for Advocacy, Resources & Education (CARE), 530-752-3299 or 916-734-3799.

Center for Leadership Learning

The Center for Leadership Learning (CLL), 530-752-6908, offers a unique space for undergraduates to engage in the study of leadership through a variety of interactive, experiential learning environments, including quarterly workshops, certificate programs, a speaker series, and annual conference. CLL programs are open to the undergraduate community and welcome students from all majors, class levels, and degrees of leadership experience. For complete information, see Center for Leadership Learning.

Cross-Cultural Center

Born out of student activism and political struggle, the Cross Cultural Center (CCC) provides a culturally relevant community space where student voices can be expressed and respected. The CCC cultivates critical consciousness and cultural competency by providing learning opportunities at the crossroads of the many aspects of our identities and experiences. By embracing our cultural and intellectual heritage, the CCC supports student leadership in advancing our collective vision for community empowerment and social justice. For complete information, see Cross Cultural Center or call 530-752-4287.

Lesbian Gay Bisexual Transgender Queer Intersex Asexual Resource Center

The Lesbian, Gay, Bisexual, Transgender, Queer, Intersex, Asexual Resource Center (LGBTQIARC), 530-752-2452, provides an open and inclusive space and community that is committed to challenging sexism, cis-sexism, genderism, homophobia, biphobia, transphobia and heterosexism. For complete information, see Lesbian, Gay, Bisexual, Transgender, Queer, Intersex, Asexual Resource Center.
Services for International Students and Scholars (SISS)

Services for International Students and Scholars (SISS), 530-752-0864, assists international students, faculty and researchers in gaining and maintaining an appropriate immigration status while at UC Davis. SISS provides orientation and other information and assistance as part of its mission to build a campus community that is fully inclusive of international students and scholars. For complete information, see Services for International Students and Scholars.

Women's Resources and Research Center (WRRC)

The Women's Resources and Research Center (WRRC), 530-752-3372, promotes gender equity and aspires for a campus where students, faculty, and staff of all genders can thrive. All are welcome to visit the WRRC and learn about gender equity, connect with community, and find resources and support. For complete information, see Women's Resources and Research Center.
Academic Information

Registration

Office of the University Registrar; 530-752-3639

Registration includes the process of enrolling in classes, the financial obligation to pay tuition, fees and all other charges, filing current address (mailing, permanent, and emergency) information with the Office of the University Registrar, and completing and submitting any forms pertaining to your registration status. To be a continuing student at the university, you must enroll in classes each academic term. To be considered a registered student, you must also pay all tuition, fees and any outstanding balance due.

If you are a new student, your acceptance letter will direct you to all of the required next steps to obtain student status at the university. Graduate students who have previously attended UC Davis as undergraduates are considered to be new students. If you do not enroll in classes for a future academic term or did not take an approved leave of absence, you must apply for Readmission to return to the university and resume student status.

For complete information, see Registration.

Honors & Prizes

Deans' Honors Lists
According to UC Davis Academic Senate Regulation 551 (ASR 551.A), the quarterly Dean's Honors List includes names of students who have completed, for a letter grade, a minimum of 12 units in a specific quarter with a grade point average equal to or higher than the minimum grade point average attained by the upper 16 percent of those registered in the same class level and college during that quarter. Honors lists will be posted quarterly on deans' office websites or made available by other means and a notation of these honors will be placed on each student's permanent record by the Office of the University Registrar.

College of:
- Agricultural & Environmental Sciences
- Biological Sciences
- Engineering
- Letters & Science

Graduation Honors
Honors at graduation are awarded to students who have a grade point average in the top percent of their college as shown in the table below. The College of Letters & Science requires that additional criteria be met for high and highest honors.

<table>
<thead>
<tr>
<th>Total Quarter Units at UC</th>

An honors notation is made on students' diplomas and on their permanent records in the Office of the University Registrar.

University Honors Program
The University Honors Program (UHP), 530-752-9797, is a four-year, interdisciplinary, campus-wide program for highly achieving, high potential and socially conscious undergraduate students interested in enhancing their
educational experience through special courses, close faculty contact, dynamic peer interaction and positive social change.

**Prizes & Awards**

The **University Medal** is the highest campus honor awarded to a graduating senior in recognition of superior scholarship and achievement. A College or School Medal is also given to the outstanding graduating student in each of the colleges and professional schools.

Departmental citations, special awards and prizes are also awarded to students for superior achievement and scholarship.

Prizes & awards for, College of:
- Agricultural & Environmental Sciences
- Biological Sciences
- Engineering
- Letters & Science

**Chancellor's Award for Excellence in Mentoring Undergraduate Research**

These prestigious awards recognize a graduating senior who has distinguished him/herself through their excellence in undergraduate research; and faculty, postdocs or graduate students who have excelled in mentoring undergraduate researchers. For complete information, see [Chancellor's Award for Excellence in Undergraduate Research](#).

**Leaving UC Davis**

To graduate, undergraduate students must file an Application for Graduation with the Office of the University Registrar by the stated deadline. To participate in the Commencement Ceremony, a student must register with their college by the stated deadline. **These are separate actions.**

**Graduation | Commencement Ceremony**

**Leave of Absence: Planned Educational Leave Program (PELP)**

The **Planned Educational Leave Program** (PELP) allows any continuing undergraduate or graduate level student to temporarily suspend academic work at UC Davis.

**Withdrawal**

**Withdrawal | Retroactive Withdrawal**

**Returning to UC Davis**

**Undergraduate Readmission**

For any term a student does not register and is not an approved leave of absence, the student is considered non-continuing and must apply for readmission to return to registered status.
Undergraduate Education

UC Davis offers the Bachelor of Arts (A.B.) and Bachelor of Science (B.S.) degrees in over 100 major programs, as well as over 110 minors in a variety of disciplines; see Degrees Offered by UC Davis. For complete program information; see Colleges of:

- Agricultural and Environmental Sciences
- Biological Sciences
- Engineering
- Letters and Science

University Requirements

To earn a Bachelor's Degree, all students must fulfill the following University of California requirements; see Bachelor's Degree Requirements.

- Entry Level Writing Requirement (ELWR)
- American History and Institutions Requirement
- Unit Requirement
- Residence Requirements
- Scholarship Requirement
- General Education Requirement
- College Requirements
- Major Requirements

General Education (GE) Requirement

For complete information, see General Education Requirements. For a list of courses that contain GE attributes and GE search tools, see General Education (GE) Requirements.

College Requirements

In addition to the University, General Education, and Major requirements, each college has requirements:

- Agricultural and Environmental Sciences
- Biological Sciences
- Engineering
- Letters and Science
Advanced Academic Studies

Graduate Studies; 530-752-0650
School of Education; 530-752-0757
School of Law; 530-752-6477
Graduate School of Management; 530-752-7658
School of Medicine; 916-734-7055
Betty Irene Moore School of Nursing; 916-734-2145
School of Veterinary Medicine; 530-752-1360
The UC Davis Graduate School of Management’s Undergraduate Accounting Minor gives you the opportunity to enhance your coursework with a carefully crafted series of five upper-division courses. These courses are designed to prepare you for accounting-related careers or advanced study in accounting. All five courses, 20 units total, must be completed to receive the minor certification.

The accounting minor courses are open to all undergraduate and graduate majors at UC Davis. All minor courses must be taken at UC Davis.

Prerequisites for minor courses are required and you should plan accordingly.

To complete the minor, students must complete the 20 units of coursework in the minor with a GPA of 2.000 or better. Students may petition to have the minor noted on your transcript by following the process designated by your college, which allows the Graduate School of Management to approve the minor electronically. Contact your college’s academic advisor for more information. Most prerequisites could be used to partially satisfy the University’s General Education requirements. No grade lower than a C- will be accepted in any prerequisite course.
Objectives. The objectives of the programs offered in Mechanical and Aerospace Engineering include the following: to prepare its graduates to practice mechanical and/or aerospace engineering in a broad range of industries, to enable interested graduates to pursue graduate education, to prepare its graduates to participate in research and development, and in other creative and innovative efforts in science, engineering, and technology and to allow interested graduates to pursue entrepreneurial endeavors.

Objectives. The objectives of the Mechanical Engineering and Aerospace Science and Engineering programs are to produce graduates who do one or more of the following: a. Practice mechanical engineering and/or aerospace engineering in a broad range of agencies, industries, and institutes; b. Pursue graduate education; c. Participate in research and development, and other creative and innovative efforts in science, engineering, and technology; d. Pursue entrepreneurial endeavors.

Division of Aerospace Science and Engineering

The Division of Aerospace Science and Engineering administers the Aerospace Science and Engineering Program within the Department of Mechanical and Aerospace Engineering.

The Aerospace Science & Engineering Undergraduate Program

The Aerospace Science and Engineering program is accredited by the Engineering Accreditation Commission of ABET; http://www.abet.org.

Aerospace Science and Engineering majors learn to apply the principles of the physical sciences and engineering to the design of aerospace vehicles. Specific objectives include the design, development and manufacture of aerospace vehicles and other transportation systems through the integration of disciplines associated with aerodynamics, propulsion, structures and guidance/control.

Our Bachelor of Science degree in Aerospace Science and Engineering provides a broad background and fundamental education in mathematics, the physical sciences, and the engineering sciences. These fundamentals, when complemented by the required technical courses, prepare students for employment in government or industry, while simultaneously establishing an excellent foundation for graduate studies.

Students are encouraged to adhere carefully to all prerequisite requirements. The instructor is authorized to drop students from a course for which stated prerequisites have not been completed.

Exclusive of General Education units, the minimum number of units required for the Aerospace Science and Engineering major is 160.

- UWP 101 Advanced Composition 4
- UWP 102E Writing in the Disciplines: Engineering 4
- UWP 104A Writing in the Professions: Business Writing 4
- UWP 104E Writing in the Professions: Science 4
- UWP 104T Writing in the Professions: Technical Writing 4
- Passing the Upper-Division Composition Exam. 0

Total: 160

### Aerospace Science & Engineering; Engineering | EAE Courses

**Courses in EAE:**

**EAE 001—Introduction to Aerospace Science Engineering (1)**
Lecture—1 hour. Description of the field of aerospace engineering with examples from industry, government, and research. Aerospace engineering principles, ethics, and responsibilities. (P/NP grading only.) Effective: 2002 Fall Quarter.

**EAE 010—From the Wright Brothers to Drones and Quadcopters (2)**
Lecture—2 hours. History of aircraft and its influence on society. Topics covered will include Unmanned Aerial Vehicles, safety considerations, economics and privacy issues. Aerodynamics, stability and control will also be introduced. GE credit: SE, SS. Effective: 2015 Summer Session 1.

**EAE 099—Special Study for Undergraduates (1-5)**
Variable. Prerequisite(s): Consent of Instructor. Lower division standing. (P/NP grading only.) Effective: 1997 Winter Quarter.

**EAE 126—Theoretical and Computational Aerodynamics (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ENG 180 C- or better or EAD 115 C- or better or MAT 128C C- or better or EME 115 C- or better); EAE 127 C- or better Development of general equations of fluid motion. Study of flow field kinematics and dynamics. Flow about a body. Thin airfoil theory. Viscous effects. Applications of numerical methods to wing analysis and design. GE credit: SE. Effective: 2013 Fall Quarter.

**EAE 127—Applied Aircraft Aerodynamics (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EME 106 C- or better Principles, governing equations, and predictive theories for aircraft aerodynamics. Lift and drag of 2D airfoils, 3D wings, and high-lift devices. GE credit: SE, WE. Effective: 2013 Fall Quarter.

**EAE 129—Stability and Control of Aerospace Vehicles (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ENG 102 C- or better Restricted to upper division standing. Aircraft and spacecraft stability and control. Derivation of fundamental equations of motion for aircraft/ spacecraft. Fundamentals of feedback. Aircraft flight control systems. Spacecraft attitude control systems. GE credit: SE. Effective: 2017 Fall Quarter.

**EAE 130A—Aircraft Performance and Design (4)**
Discussion—1 hour; Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): EAE 127 C- or better; EAE 129 C- or better (can be concurrent) Major aircraft design experience with multiple realistic constraints including aerodynamics, performance analysis, weight estimation, stability and control, and appropriate engineering standards. GE credit: SE. Effective: 2017 Fall Quarter.

**EAE 130B—Aircraft Performance and Design (4)**
Discussion—1 hour; Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): EAE 130A C- or better Restricted to upper division standing. Major aircraft design experience including detailed design, cost analysis, analysis of
aircraft structure, propulsion system, aerodynamics, aircraft handling qualities, manufacturing, or meeting relevant engineering standards. GE credit: OL, SE. Effective: 2017 Fall Quarter.

**EAE 133—Finite Element Methods in Structures (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ENG 104 C- or better Open to College of Engineering Students. Introduction to the aerospace structural design process. History of aircraft and spacecraft materials. Effects of loading beyond elastic limit. Deflections and stresses due to combined loading. Virtual work principles, and finite element methods. Applications to aerospace structures. GE credit: SE. Effective: 2011 Fall Quarter.

**EAE 135—Aerospace Structures (4)**
Lecture—4 hours. Prerequisite(s): ENG 104 C- or better; EAE 126 or EAE 127 recommended. Analysis and design methods used in aerospace structures. Shear flow in open, closed and multicell beam cross-sections, buckling of flat and curved sheets, tension field beams, local buckling. GE credit: SE. Effective: 2017 Fall Quarter.

**EAE 137—Structural Composites (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ENG 104 C- or better Overview of materials and technology for creating structures from fiber reinforced resin matrix composite material systems. Elementary design analysis and case studies emphasizing aeronautical applications. GE credit: SE. Effective: 2017 Fall Quarter.

**EAE 138—Aircraft Propulsion (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EME 106 C- or better Analysis/design of modern aircraft gas turbine engines. Development/application of cycle performance prediction techniques. Introduction to design of inlets, compressors, burners, turbines, and nozzles. Cycle design for specific applications. GE credit: SE. Effective: 2010 Fall Quarter.

**EAE 140—Rocket Propulsion (4)**
Lecture—4 hours. Prerequisite(s): EME 106 C- or better Restricted to upper division standing. Fluid and thermodynamics of rocket engines, liquid and solid rocket propulsion. Space propulsion concepts and space mission requirements. Not open for credit to students who have taken identical EAE 189A prior to Fall Quarter 2013. GE credit: SE. Effective: 2016 Winter Quarter.

**EAE 141—Space Systems Design (4)**
Discussion—2 hours; Lecture—2 hours. Prerequisite(s): ENG 102 C- or better; EME 106 C- or better Introduction to space systems design including space project organization, requirements definition and specification, concepts formulation, system tradeoffs, subsystem design. Prototype space mission concepts are presented and a multidisciplinary mission design is developed that considers all relevant architecture elements. GE credit: SE. Effective: 2013 Fall Quarter.

**EAE 142—Orbital Mechanics (4)**
Lecture—4 hours. Prerequisite(s): ENG 102 C- or better Restricted to upper division standing. Satellite orbits, multistage rockets, current global boosters, and new technologies. Design application problems include satellites, trajectory optimizations, and interplanetary trajectories. Not open for credit to students who have completed EAE 189B prior to Fall Quarter 2013. GE credit: SE. Effective: 2013 Fall Quarter.

**EAE 189C—Flight Simulation and Testing in Design of Aircraft and Spacecraft (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ENG 102; and Consent of Instructor. Teaches flight test techniques together with data analysis methods to prepare students for any type of flight testing including fixed wing, rotary wing and launch vehicles. GE credit: SE. Effective: 2013 Fall Quarter.

**EAE 198—Directed Group Study (1-5)**
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

**EAE 199—Special Study for Advanced Undergraduates (1-5)**
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

Department Office. 2201 Hart Hall; 530-752-1548; http://aas.ucdavis.edu

Faculty. http://aas.ucdavis.edu/people/faculty

The Major Program

African American and African Studies is an interdisciplinary field of study in the humanities, arts, and social sciences. This major introduces students to the social cultural, historical and artistic dimensions of global African Diaspora and Black communities in the United States, Africa, Europe, Asia, Caribbean, Latin America and Pacific regions of the world. The instructors are creative, accessible and highly qualified, with specializations across a range of disciplines. Students are exposed to and trained to think critically about the conditions and demands of global societies. Students may choose to enrich their education studying for a summer, a quarter, or a year in Africa, or by studying for a quarter in the Caribbean. Majors and Minors are also encouraged to take advantage of relevant internship opportunities.

The Program. The purpose of this program is to give students a sense of the individual characteristics and common concerns of Black communities in Africa, the United States, and in the wider Diaspora. The African American emphasis includes courses on history, culture, and the impact of developments in politics and the economy on the social organization of Black people in the United States. The African Diaspora emphasis enables students to study the way Black communities outside Africa and the United States have dealt with questions of race and ethnicity. It also considers how they have defined their identity in the political arena as well as by using religion, theater and dance, literature and film. The African emphasis allows students to focus on Africa's recent history, social issues, and contemporary culture.

Career Alternatives. Students majoring in African American and African Studies gain knowledge and strong critical thinking and analytical skills, problem-solving skills and communication skills, all suited for advanced studies in the social sciences, law, education and professional schools. Graduates in the major have pursued careers in education, the private and public sectors, the non-profit sector, international development agencies and in human service. The interdisciplinary nature of African American and African Studies is excellent preparation for professions in community organizations such as the Urban League, NAACP and the Office of Economic Opportunity.

Major Advisor. Dionica Bell; dbbell@ucdavis.edu

American History and Institutions. This University requirement can be satisfied by completion of AAS 010, AAS 100; listed in University Requirements.

Note: Although a course may be listed more than once, such a course may satisfy only one requirement.

A coordinated program of upper division courses, selected and approved in consultation with the major advisor and chosen to reflect the student's major emphasis. Possible areas of emphasis include the following:

Creative arts in the black community worldwide, social and political trends in the global black community, African American society and culture, Africa, African Diasporas. These areas of emphasis are offered as guidelines for students in the major. They are not the only areas of emphasis that students may choose for the major.

**African American & African Studies | AAS Minor**

*(College of Letters and Science)*

**Department Office.** 2201 Hart Hall; 530-752-1548; [http://aas.ucdavis.edu](http://aas.ucdavis.edu)

**Faculty.** [http://aas.ucdavis.edu/people/faculty](http://aas.ucdavis.edu/people/faculty)

**The Major Program**

African American and African Studies is an interdisciplinary field of study in the humanities, arts, and social sciences. This major introduces students to the social cultural, historical and artistic dimensions of global African Diaspora and Black communities in the United States, Africa, Europe, Asia, Caribbean, Latin America and Pacific regions of the world. The instructors are creative, accessible and highly qualified, with specializations across a range of disciplines. Students are exposed to and trained to think critically about the conditions and demands of global societies. Students may choose to enrich their education studying for a summer, a quarter, or a year in Africa, or by studying for a quarter in the Caribbean. Majors and Minors are also encouraged to take advantage of relevant internship opportunities.

**The Program.** The purpose of this program is to give students a sense of the individual characteristics and common concerns of Black communities in Africa, the United States, and in the wider Diaspora. The African American emphasis includes courses on history, culture, and the impact of developments in politics and the economy on the social organization of Black people in the United States. The African Diaspora emphasis enables students to study the way Black communities outside Africa and the United States have dealt with questions of race and ethnicity. It also considers how they have defined their identity in the political arena as well as by using religion, theater and dance, literature and film. The African emphasis allows students to focus on Africa's recent history, social issues, and contemporary culture.

**Career Alternatives.** Students majoring in African American and African Studies gain knowledge and strong critical thinking and analytical skills, problem-solving skills and communication skills, all suited for advanced studies in the social sciences, law, education and professional schools. Graduates in the major have pursued careers in education, the private and public sectors, the non-profit sector, international development agencies and in human service. The interdisciplinary nature of African American and African Studies is excellent preparation for professions in community organizations such as the Urban League, NAACP and the Office of Economic Opportunity.

**Minor Advisor.** Dionica Bell; ddbell@ucdavis.edu
**American History and Institutions.** This University requirement can be satisfied by completion of African American Studies 10, 100; listed in University Requirements.

**Note:** Although a course may be listed more than once, such a course may satisfy only one requirement.

### Choose one:

- **AAS 010** African-American Culture and Society 4
- **AAS 012** Introduction to African Studies 4
- **AAS 015** Introduction to African American Humanities 4
- **AAS 017** Women in African Societies 4
- **AAS 018** Introduction to Caribbean Studies 4
- **AAS 080** Introduction to Black Politics 4

Select any five upper division courses offered in African American and African Studies, but not including AAS 154.

**Total: 24**

### African American & African Studies | AAS Courses

#### Courses in AAS:

- **AAS 010—African-American Culture and Society (4)**
  Discussion—1 hour; Lecture—3 hours. Critical examination of the historical, political, social, and economic factors that have affected the development and status of African-American people in contemporary society. GE credit: ACGH, DD, SS, WE. Effective: 2012 Winter Quarter.

- **AAS 012—Introduction to African Studies (4)**
  Discussion—1 hour; Lecture—3 hours. Introduction to African Studies which will focus on the various disciplinary perspectives through which African society and culture are generally studied. A survey of methods, resources and conceptual tools for the study of Africa. GE credit: AH, SS, WC, WE. Effective: 2017 Fall Quarter.

- **AAS 015—Introduction to African American Humanities (4)**
  Class size limited to 165 students. Introduction to the humanist tradition developed by writers, philosophers, and artists of African descent in the West. Attention also given to African sources, as well as European, Caribbean, Latin-American, and North American variations on this tradition. GE credit: ACGH, AH, DD. Effective: 2012 Winter Quarter.

- **AAS 016—Verbal and Performance Arts in Africa (4)**

- **AAS 017—Women in African Societies (4)**
  Lecture/Discussion—4 hours. Gender relations in traditional and contemporary African society. Involvement of African women in politics, religion, the economy, the arts. African responses to feminist theory. Images of women in African literature. GE credit: SS, WC, WE. Effective: 2012 Winter Quarter.

- **AAS 018—Introduction to Caribbean Studies (4)**
  Discussion—1 hour; Lecture—3 hours. Introduction to the contemporary culture, peoples, politics, and societies of the Caribbean. Topics include movements of people, goods and ideas across the Atlantic world and creative productions within the Caribbean. GE credit: AH, SS, WC. Effective: 2011 Fall Quarter.

- **AAS 050—Black Popular Culture (4)**

- **AAS 051—History of Afro American Dance (4)**
  Lecture—4 hours. Evolution of African-American dance, tracing its history and development from West and Central Africa to the United States. Investigates the social and cultural relevance of African American dance and its artistic merits through contributions from its choreographers and performers. GE credit: AH, DD, VL. Effective: 2012 Spring Quarter.
AAS 052—African Traditional Religion (4)
Discussion—2 hours; Lecture—2 hours. Introduction to traditional religions of the sub-Saharan African peoples: emphasis on myths, rituals and symbols in West, East, Central and South African indigenous religions. Examines themes: sacred kingship, divination system, women, prophecy, conversion and adaptation to Islam and Christianity. GE credit: AH, WC. Effective: 2012 Winter Quarter.

AAS 080—Introduction to Black Politics (4)

AAS 099—Special Study for Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

AAS 100—Survey of Ethnicity in the US (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Upper division standing or consent of instructor. Limited enrollment. Sociological and historical analysis of the experience, culture, and relations of and between groups considered racial and/or ethnic minorities in the United States. GE credit: ACGH, AH, DD. Effective: 2012 Winter Quarter.

AAS 101—Introduction to Research in the Afro-American Community (4)
Lecture—4 hours. Prerequisite(s): AAS 010; or Consent of Instructor. Introductory survey of Afro-American Studies methods and techniques; problems and methodology in Afro-American Studies. Effective: 1997 Winter Quarter.

AAS 107A—African Descent Communities and Culture in the Caribbean and Latin America (4)
Lecture/Discussion—4 hours. Prerequisite(s): Upper division standing. Origin and development of African descent communities and cultures in the Caribbean, and Latin America. The similarities and differences among African descent communities and cultures in terms of religious practices, music, and national identity. GE credit: WC. Effective: 2011 Fall Quarter.

AAS 107B—African Descent Communities and Culture in North America (4)
Lecture/Discussion—4 hours. Prerequisite(s): Upper division standing. Study of the origin and development of African descent communities and cultures in the U.S.A., Canada, and Mexico. GE credit: AH, DD, SS. Effective: 2017 Winter Quarter.

AAS 107C—African Descent Communities and Culture in Asia (4)

AAS 107D—African Descent Communities and Cultures in Europe (4)

AAS 110—West African Social Organization (4)
Lecture—4 hours. Ecology, population, social and political organization, and culture of West Africa in the precolonial, colonial, and post-colonial periods. GE credit: SS, WC. Effective: 2012 Winter Quarter.

AAS 111—Cultural Politics in Contemporary Africa (4)
Lecture/Discussion—4 hours. Prerequisite(s): AAS 012; Or upper division standing. Themes and style of new cultural forms in Africa as displayed in art, music, film and writing, especially in regard to blending of indigenous and foreign influences. Social and political forces shaping contemporary cultural expression. GE credit: AH, SS, WC. Effective: 2012 Winter Quarter.

AAS 123—Black Female Experience in Contemporary Society (4)
Lecture—4 hours. Prerequisite(s): Upper division standing or consent of instructor. Black female social, intellectual, and psychological development. Black women's contributions in history, literature, and social science; life experiences of Black women and philosophical underpinnings of the feminist movement. GE credit: ACGH, DD, SS. Effective: 2012 Winter Quarter.

AAS 130—Education in the African-American Community (4)
Discussion—1 hour; Fieldwork—3 hours; Lecture—2 hours. Examination of the history of the education of African Americans in the United States. Examination and critique of contemporary theories concerning the schooling of African Americans. (Former course AAS 140.) GE credit: DD, SS. Effective: 2011 Fall Quarter.

AAS 133—The Black Family In America (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Upper division standing or consent of instructor. Analysis of
social science research to examine relationship between black (African-descent) family structures, patterns of functioning, and political, economic, and social conditions in the U.S. GE credit: ACGH, DD, SS. Effective: 2012 Winter Quarter.

AAS 141—Psychology of the African American Experience (3) Review all entries
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): AAS 010; or Consent of Instructor. Introduction to the psychological issues faced by African Americans. Analysis of issues from European/Western and Afrocentric frame of reference. Emphasis on Optimal Theory, a psychological theory based on an Afrocentric world view. Effective: 1997 Winter Quarter.

AAS 141—Psychology of the African American Experience (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): AAS 010; or Consent of Instructor. Upper division status. Introduction to the psychological issues faced by African Americans. Description of any disparities in mental health care experienced by African American and Diaspora populations in the United States. Analysis of issues from European/Western and Afrocentric frame of reference. Emphasis on Optimal Theory, a psychological theory based on an Afrocentric world view. Effective: 2019 Winter Quarter.

AAS 145A—Black Social and Political Thought (4)
Lecture—4 hours. Prerequisite(s): AAS 010 or AAS 080; or Consent of Instructor. Exploration and analysis of Black social and political thought in the Americas. GE credit: SS. Effective: 2012 Winter Quarter.

AAS 145B—Black Intellectuals (4)
Lecture—4 hours. Prerequisite(s): (AAS 010, AAS 080, AAS 145A); or Consent of Instructor. Exposition and critical analysis of selected theoretical writings of Black intellectuals, and especially political and social thinkers, in the Americas. GE credit: DD, SS, WE. Effective: 1997 Winter Quarter.

AAS 150A—Afro-American Visual Arts Tradition: A Historical and Cultural Study (4)
Lecture—4 hours. Prerequisite(s): Upper division standing. Afro-American visual arts tradition, folk and formal, in historical and cultural context, from 1600 through Reconstruction. Effective: 1997 Winter Quarter.

AAS 150B—Afro-American Visual Arts Tradition: A Historical and Cultural Study (4)
Lecture—4 hours. Prerequisite(s): Upper division standing. Afro-American visual arts tradition, folk and formal, in historical and cultural context, from Reconstruction to the present. Effective: 1997 Winter Quarter.

AAS 151—Afro-American Vernacular Music and Verbal Arts (4)
Discussion—2 hours; Lecture—2 hours. Socio-political dimensions of Afro-American musical forms like spiritual, work song, minstrelsy blues, rhythm and blues, jazz, gospel, soul and contemporary pop, and related verbal arts like preaching, toasting, rapping. Effective: 1997 Winter Quarter.

AAS 152—Major Voices in Black World Literature (4)
Discussion—1 hour; Lecture—2 hours; Term Paper. Prerequisite(s): AAS 010 or AAS 012 or AAS 018; Upper division standing. Recurrence of cultural tropes in the works of major black world authors and formation of an African-oriented canon. Principal activities include critical reading and discovery of literature as a cultural resource. GE credit: AH, DD, WC, WE. Effective: 2012 Winter Quarter.

AAS 153—African Literature (4)
Lecture—3 hours; Term Paper. Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR). Colonial and post-colonial sub-Saharan African literature and the African oral traditions from which it emerged. Genres and themes of African literature from the nineteenth century to the present. (Same course as COM 154.) GE credit: AH, WC, WE. Effective: 2012 Spring Quarter.

AAS 155A—African-American Dance and Culture in the United States, Brazil and the Caribbean (4)
Lecture/Discussion—4 hours. Comparative study of the African American dance forms in the U.S.A., Brazil, Haiti, Cuba, Jamaica, Barbados, and Trinidad. Examination of ritual, folk, and popular dance forms and the socio/historical factors that have influenced these forms. (Same course as DRA 155A.) GE credit: AH, VL, WC. Effective: 2012 Fall Quarter.

AAS 156—Language and Identity in Africa and the African Diaspora (4)
Lecture/Discussion—4 hours. Prerequisite(s): AAS 012; Or upper division standing. Relationship between language and identity in literature from Africa and the African Diaspora. Use of pidgins, Creoles, translation from African languages and impact of language policies. GE credit: AH, DD, WC. Effective: 2012 Winter Quarter.

AAS 157—Literature and Society in South Africa (4)
Lecture/Discussion—4 hours. Prerequisite(s): Upper division standing. Political and social developments in 20th-
century South Africa as illustrated by a range of South African writing. Response of different writers to race relations, impact of government policy on types and context of writing. GE credit: AH, WC, WE. Effective: 2012 Winter Quarter.

**AAS 160—African-American Folklore (4)**
Discussion—1 hour; Fieldwork—3 hours; Lecture—2 hours. Prerequisite(s): AAS 010 Theory and history of African American folklore and folklife, including music, material culture, oral narrative, proverbs, and humor. African and Caribbean cultural influences on New World folk genres will be probed. Effective: 1997 Winter Quarter.

**AAS 162—Islam in Africa and the Americas (4)**
Lecture/Discussion—4 hours. Prerequisite(s): RST 060 or AAS 012 or AAS 110 Comparative and historical survey of Islam in the regional and cultural settings of Sub-Saharan Africa and the Americas. GE credit: AH, WC, WE. Effective: 2012 Winter Quarter.

**AAS 163—African Religions in the Americas (4)**
Lecture/Discussion—4 hours. Prerequisite(s): AAS 010; AAS 015; or Consent of Instructor. Comparative study of African religious heritage in the Americas: Jamaica, Trinidad, Cuba, U.S.A., Haiti, and Brazil. Emphasis on the origins and development of Candomble, Santeria, Shango, Vodun, and Rastafarianism in the New World. GE credit: AH, WC, WE. Effective: 2012 Winter Quarter.

**AAS 165—Afro-Christianity and the Black Church (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): AAS 010; AAS 015; or Consent of Instructor. Upper division standing. Examination of the historical role of Christian belief and practice as well as the institution of the Black Church in the experience of African Americans, from slavery to the present. GE credit: ACGH, DD, SS. Effective: 2012 Winter Quarter.

**AAS 168—Black Documentary: History and Practice (4)**
Laboratory—5 hours; Lecture—3 hours. Prerequisite(s): FMS 001; AAS 170; and Consent of Instructor. AAS 050 recommended. Study of Black documentary history and understanding of the use of the documentary form for political purposes. A discussion of documentary theory. Each student, singly or in a team, will create and carefully edit a documentary project. GE credit: AH, DD, VL, WC. Effective: 2011 Summer Session 1.

**AAS 169—History of African American Television (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): AAS 050 recommended. History of the representation of African Americans in television; how the representations reflect social and political forces in American society. Role of African Americans in actively shaping their representation. GE credit: AH, DD, VL, WE. Effective: 2012 Winter Quarter.

**AAS 170—African-American Film and Video (4)**
Film Viewing—3 hours; Lecture—3 hours. Prerequisite(s): FMS 001; AAS 170; and Consent of Instructor. AAS 050 recommended. Comparative approach in the study of fictional film and video dealing with the African American experience drawing on film and cultural studies to examine and discuss selected works. GE credit: AH, DD, VL, WE. Effective: 2011 Fall Quarter.

**AAS 171—Black African and Black European Film and Video (4)**
Film Viewing—3 hours; Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): AAS 015 or AAS 050 or ENL 160 or ENL 162; or Consent of Instructor. Comparative approach in the study of dramatic films and videos that treat black life in Africa and Europe. Critical attention will focus on the imaginative construction of ethnicity, race, nationality, gender, and sexuality in each particular work. GE credit: AH, VL, WC. Effective: 2012 Spring Quarter.

**AAS 172—Diaspora and New Black Identities (4)**
Lecture/Discussion—3 hours; Term Paper. Critical analysis about what it means to be Black/African American in the United States today. Topics include old and new diasporas, immigration, national origin, language, religion, class, education, politics, identity and cultural heritage. GE credit: ACGH, DD, SS, WE. Effective: 2011 Fall Quarter.

**AAS 175A—Black Documentary: History and Theory (4)**
Film Viewing—3 hours; Lecture—3 hours. Prerequisite(s): FMS 001; AAS 170; AAS 050 recommended. Black documentary history and documentary theory. Use of black documentary for political purposes. GE credit: AH, DD, VL, WE. Effective: 2011 Fall Quarter.

**AAS 175B—Black Documentary Practicum (4)**
Laboratory—6 hours; Lecture—2 hours. Prerequisite(s): AAS 175A; and Consent of Instructor. Creation of documentary projects, with students working in production crews. GE credit: AH, DD. Effective: 2012 Winter Quarter.
AAS 176—The Politics of Resources (4)
Lecture/Discussion—4 hours. Prerequisite(s): AAS 012 or AAS 110 Limited enrollment. Examination of the ways in which the processes of the extraction, purification and use of natural resources and the complex regimes of valuation and commodification they (re)produce lead to cooperation and conflict in contemporary Africa and beyond. GE credit: SS, WC. Effective: 2012 Winter Quarter.

AAS 177—Politics of Life in Africa (4)
Lecture/Discussion—4 hours. Existing (in)capacities in the structures of state and society in Africa for people to live well. Topics include institutions and practices that define state and civil society encounters in Africa; democracy, ethnicity, economic crisis, religion, citizenship, etc. GE credit: AH, SS, WC. Effective: 2012 Winter Quarter.

AAS 178—African Modernity and Globalization (4)
Lecture—4 hours. Prerequisite(s): AAS 012; or Consent of Instructor. Class size limited to 80 students. Exploration of modernity and globalization and their dimensions and impacts in/on Africa. Examination of modern necessities and constrains in Africa in relation to (neo)colonialism, transnational encounters, technology, gender, risk, ritual, identity, culture, etc. GE credit: AH, SS, WC. Effective: 2015 Winter Quarter.

AAS 179—African Modernity and Globalization (4)
Lecture—4 hours. Prerequisite(s): AAS 012; or Consent of Instructor. Class size limited to 80 students. Exploration of modernity and globalization and their dimensions and impacts in/on Africa. Examination of modern necessities and constrains in Africa in relation to (neo)colonialism, transnational encounters, technology, gender, risk, ritual, identity, culture, etc. GE credit: AH, SS, WC. Effective: 2015 Winter Quarter.

AAS 180—Race and Ethnicity in Latin America (4)
Lecture/Discussion—4 hours. The social and political effects of racial and ethnic categorization in Latin America, including issues of economic production, citizenship, national belonging, and access to resources. Emphasis is on peoples of African, Indigenous, and Asian descent. GE credit: SS, WC, WE. Effective: 2012 Winter Quarter.

AAS 181—Hip Hop in Urban America (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Upper division standing or consent of instructor. Must have Junior or Senior level standing. History, aesthetics, urban context, and economics of hip-hop in the US, and its globalization. Hip-hop's four artistic elements-rap, deejaying, breakdance, and aerosol art-allow the examination of issues of race, ethnicity, and gender in youth culture and American society. GE credit: AH, DD, VL. Effective: 2012 Spring Quarter.

AAS 182—Hip Hop Culture & Globalization (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): AAS 181 preferable, not required. Investigation of hip-hop youth cultures outside the United States using globalization and Cultural Studies theories. Analysis of international hip-hop sites in Africa, Asia, Europe, South America, and the Middle East through reading, discussion, and visiting virtual sites. GE credit: AH, WC. Effective: 2014 Spring Quarter.

AAS 185—Topics in African American Film (4)
Film Viewing—3 hours; Lecture—3 hours. Prerequisite(s): AAS 170; AAS 050 recommended. Intensive study of special topics in African American film. May be repeated up to 1 time(s). GE credit: AH, DD, VL, WE. Effective: 2011 Fall Quarter.

AAS 190—Topics in African and African-Diaspora Studies (4)
Lecture/Discussion—3 hours; Term Paper—1 hour. Prerequisite(s): Upper division standing in African American and African Studies courses or consent of instructor. Intensive treatment of a special topic or problem in African or African Diaspora Studies. May be repeated once for credit when topic differs. May be repeated up to 1 time(s) topic differs. Effective: 1997 Winter Quarter.

AAS 192—Internship in African-American and African Studies (1-8)
Internship—3-24 hours. Prerequisite(s): Consent of Instructor. Completion of 12 units of upper division study in African American and African Studies courses; upper division standing. Restricted to African American and African Studies majors and minors. Supervised internship in community, government, or private institutions, in all subject areas offered by the African American and African Studies Program. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 1997 Winter Quarter.

AAS 197T—Tutoring in Afro-American Studies (1-5)
Tutorial—1-5 hours. Prerequisite(s): Consent of major committee; upper division standing with major in African American and African Studies. Leading of small voluntary discussion groups affiliated with one of the department's regular courses. May be repeated up to 6 unit(s). (P/NP grading only.) Effective: 1997 Winter Quarter.

AAS 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

AAS 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

Cort Anastasio, Ph.D., Chairperson of the Group

**Group Office.** 4139 Meyer Hall; 530-752-4516; [http://agchem.ucdavis.edu/](http://agchem.ucdavis.edu/)

**Faculty.** The more than 50 faculty in the graduate group represent at least 13 academic departments within the College of Agricultural and Environmental Sciences, the College of Letters and Science, the College of Engineering, the School of Medicine, and the School of Veterinary Medicine.

**Graduate Study.** The Graduate Group in Agricultural and Environmental Chemistry offers programs of study and research leading to the M.S. and Ph.D. degrees in four areas: (1) Environmental & Analytical Chemistry, (2) Biological & Toxicological Chemistry, (3) Food & Wine Chemistry, and (4) Fiber & Polymer Chemistry. Detailed information regarding graduate study may be obtained at [http://agchem.ucdavis.edu/](http://agchem.ucdavis.edu/).

**Graduate Advisors.** C. Anastasio (Land, Air and Water Resources), P. G. Green (Civil and Environmental Engineering), M. Hengel (Environmental Toxicology), H. Heymann (Viticulture and Enology), Y.-L. Hsieh (Textiles and Clothing), A.E. Mitchell (Food Science and Technology), S. Parikh (Land, Air and Water Resources)

Agricultural & Environmental Chemistry (Graduate Group) | AGC Courses

**Courses in AGC:**

**AGC 290—Seminar (1)**

Seminar—1 hour. Selected topics in agricultural and environmental chemistry, presented by students. (S/U grading only.) Effective: 1997 Winter Quarter.
AGC 298—Group Study (1-5)
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. The chemistry and biochemistry of foods, nutritional chemicals, pesticides, and other special topics as they apply to agricultural and environmental chemistry. Effective: 1997 Fall Quarter.

AGC 299—Research (1-12)
Variable. Arrangements should be made well in advance with a faculty member of the Group in Agricultural and Environmental Chemistry. (S/U grading only.) Effective: 1997 Winter Quarter.

Agricultural & Environmental Education

Agricultural & Environmental Education | AEE B.S.

(College of Agricultural and Environmental Sciences and School of Education)

Undergraduate Advising Center (including peer advising) is located in the Animal Science Advising Center in 1202 Meyer Hall; 530-754-7915; http://asac.ucdavis.edu/.

The Major Program

The major serves those interested in teaching agricultural and environmental sciences in K through 12 classrooms or in non-formal settings such as food production and distribution systems, nature preserves, environmental camps, or other venues. This major prepares graduates to direct programs in the agricultural and environmental sciences as well as provide them with a skill set necessary to work within social science careers related to these fields. This program of study meets state and federal requirements for entry into teacher preparation in agriculture and science, as well as requirements in Career Technical Education (CTE).

The Program

The program is designed to provide students with a broad background in various agricultural and environmental science disciplines, e.g., animal science, environmental science, plant and soil science, agricultural engineering, business management, agro ecology, and horticulture. The program also focuses on the social sciences related to human resource development. The program provides students with practical experiences through fieldwork, school, and non-formal learning sites placements, or placement in sites related to a student's focus of study. Through this major students will have the opportunity to explore and then incorporate agricultural and environmental issues into educational and development settings.

Career Alternatives. The need for scientists, technicians and educators to assist in domestic and international agricultural development and environmental programs has created a continuing demand for qualified instructors and supervisory personnel. This major also provides general preparation for positions in banking, sales and service, rural recreation and related agricultural and environmental sectors. Students interested in obtaining breadth in both agricultural and environmental sciences will appreciate the scope and flexibility the major provides.

Master Advisor. Deanne Meyer, Cooperative Extension Specialist/Lecturer

Major Advisors. Lynn Martindale, Lecturer/Supervisor School of Education; Cary J. Trexler, Associate Professor; Deanne Meyer, Cooperative Extension Specialist/Lecturer

Restricted Electives

Choose at least four additional upper division courses (minimum 16 units; duplicate from Depth specialization courses not counted) selected with approval of an advisor to supplement or expand depth subject matter courses chosen from Animal Biology, Animal Genetics, Animal Science, Agricultural and Resource Economics, Avian Sciences, Environmental Horticulture, Environmental and Resource Sciences, Environmental Science and Policy, Food Science and Technology, International Agricultural Development, Nature and Culture, Neurobiology, Physiology, and Behavior, Nutrition, Plant Sciences, Plant Biology, or Viticulture and Enology.

Total: 149-151

Agricultural & Environmental Education | AED Courses

Questions pertaining to the following courses should be directed to the instructor or Lynn Martindale; 530-754-6655.

Courses in AED:

AED 092—Internship (1-12)
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Lower division standing. Supervised internship off and on campus in areas of agricultural education. (P/NP grading only.) Effective: 1997 Winter Quarter.

AED 098—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

AED 099—Special Study for Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

AED 100—Concepts in Agricultural and Environmental Education (3)
Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): Upper division standing. Philosophy and nature of formal and non-formal agricultural and environmental education programs. Emphasis on understanding the role of the teacher and observing a variety of programs. Effective: 1997 Winter Quarter.

AED 160—Vocational Education (3)
Lecture—3 hours. Philosophy and organization of vocational education, with particular reference to educational principles for agriculture commerce, home economics, and industry. Effective: 1997 Winter Quarter.

AED 171—Audiovisual Communications (2)
Laboratory—3 hours; Lecture—1 hour. Prerequisite(s): Upper division standing. Theory and principles of audiovisual communications. Comparison of audiovisual materials such as transparencies, slides, computer-generated graphics, and videos. Operation and use of audiovisual equipment is stressed. Effective: 1997 Winter Quarter.

AED 172—Multimedia Productions (3)
Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): AED 171 recommended. Design and production of educational, technical, and professional multimedia presentations. Instructional or professional presentations using a variety of media, including slides, video, transparencies, and computer-generated graphics. Effective: 1997 Winter Quarter.
AED 190—Seminar in Agricultural Education (2)
Seminar—2 hours. Discussion of selected critical issues in agricultural education. May be repeated for credit with consent of instructor. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

AED 192—Internship (1-12)
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Upper division standing. Supervised internship off and on campus in areas of agricultural education. (P/NP grading only.) Effective: 1997 Winter Quarter.

AED 198—Directed Group Study (1-5)
Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

AED 199—Special Study for Advanced Undergraduates (1-5)
Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

AED 300—Directed Field Experience in Teaching (2)
Discussion—1 hour; Fieldwork—3 hours. Prerequisite(s): AED 100 Experience as teaching assistant in agriculture or home economics programs in public schools. May be repeated once for credit. May be repeated up to 1 time(s). (S/U grading only.) Effective: 1997 Winter Quarter.

AED 301—Planning for Instructional Programs (3)
Lecture—3 hours. Prerequisite(s): AED 100; AED 300 (can be concurrent) Major paradigms in program planning and development. Emphasis on key steps in curriculum development, including selection and organization of educational objectives, learning experiences and teaching materials and resources. Effective: 1997 Winter Quarter.

AED 302—Teaching Methods in Agricultural Education (3)
Laboratory—2 hours; Lecture—2 hours. Prerequisite(s): AED 100; AED 300 (can be concurrent) Development of teaching strategies with special emphasis on the designing of learning experiences, instructional execution, and use of teaching aids in agricultural education. Effective: 1998 Fall Quarter.

AED 306A—Field Experience with Future Farmers of America and Supervised Experience Programs (4)
Fieldwork—6 hours; Lecture/Discussion—2 hours. Prerequisite(s): AED 306B (can be concurrent); Acceptance into a teacher education program. Develop an understanding of the Future Farmers of America and supervised occupational experience programs through planning, conducting, and evaluating actual programs. Effective: 1997 Winter Quarter.

AED 306B—Field Experience in Teaching Agriculture (5-18)
Variable. Prerequisite(s): AED 306A (can be concurrent); AED 100; AED 300; AED 301; AED 302; and Consent of Instructor. Acceptance into a teacher education program. Directed teaching including supervision of occupational experience programs and youth activities in secondary schools or community colleges. May be repeated for credit for maximum of 18 units. May be repeated up to 18 unit(s). Effective: 1997 Winter Quarter.

AED 323—Resource Development: Agricultural Education (3)
Lecture—3 hours. Prerequisite(s): AED 306A; AED 306B Selection and implementation of community resources in teaching. Effective: 1997 Winter Quarter.

AED 390—Seminar: Issues in Agricultural Education (2)
Discussion/Laboratory—4 hours. Prerequisite(s): AED 306A; AED 306B; Acceptance into a teacher education program. Discussion and evaluation of current issues, theories and research in agricultural education. (S/U grading only.) Effective: 1997 Winter Quarter.

Agricultural & Resource Economics

Agricultural & Resource Economics | ARE Information

(College of Agricultural and Environmental Sciences)

The program combines a course of study similar to the regular M.S. program with a complementary regime of M.B.A. courses similar to the regular M.B.A. program but with some savings in requirements and some synergy. This dual-degree program prepares students for a range of employment opportunities in business-oriented industries.

Graduate Student Information. 1171 Social Sciences and Humanities Building; 530-752-6185; https://are.ucdavis.edu/graduate/

The Ph.D. program provides intensive training in modern economic theory, econometrics, and mathematical programming, with elective fields such as natural resource and environmental economics, development economics, agricultural economics, and econometrics. Complementary fields in other areas of economics and management are also available. It is typically a four or five year course of study that prepares graduates for jobs in academia, government, near-government organizations, and the private sector.

Agricultural & Resource Economics | ARE Courses

Courses in ARE:

ARE 001—Economic Basis of the Agricultural Industry (4)
Lecture—4 hours. Agriculture and man; the agricultural industry in U.S. and world economies; production and supply, marketing and demand; agricultural land, capital and labor markets; economic and social problems of agriculture in an urban and industrialized economy emphasizing California. GE credit: SS. Effective: 1997 Winter Quarter.

ARE 001S—Economic Basis of the Agricultural Industry (4)
Lecture—4 hours. Agriculture and man; the agricultural industry in Australia and world economies; production and supply, marketing and demand; agricultural land, capital and labor markets; economic and social problems of agriculture in an urban and industrialized economy emphasizing Australia. Taught in Australia under the supervision of a UC Davis faculty member. Not open for credit to students who have taken ARE 001. GE credit: SS, WC. Effective: 2004 Fall Quarter.

ARE 015—Population, Environment and World Agriculture (4)
Discussion—1 hour; Lecture—3 hours. Economic analysis of interactions among population, environment, natural resources and development of world agriculture. Introduces students to economic thinking about population growth, its causes and consequences for world food demand, and environmental and technological limits to increasing food supplies. GE credit: SS, WC, WE. Effective: 1997 Winter Quarter.

ARE 018—Business Law (4)
Lecture—4 hours. Prerequisite(s): Sophomore standing. General principles of business law in the areas of contracts, business organization, real property, uniform commercial code, sales, commercial paper, employment relations, and creditor-debtor against a background of the history and functioning of our present legal system. GE credit: SS. Effective: 1997 Winter Quarter.

ARE 098—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Restricted to lower division students. (P/NP grading only.) GE credit: SS. Effective: 1997 Winter Quarter.

ARE 099—Special Study for Undergraduates (1-5)
Prerequisite(s): Consent of Instructor. (P/NP grading only.) GE credit: SS. Effective: 1997 Winter Quarter.

ARE 100A—Intermediate Microeconomics: Theory of Production and Consumption (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ((ECN 001A C- or better or ECN 001AV C- or better); ECN 001B C- or better); ((MAT 016A C- or better, MAT 016B C- or better, MAT 016C C- or better) or (MAT 017A C- or better, MAT 017B C- or better) or (MAT 021A C- or better, MAT 021B C- or better)) Pass One open to Managerial Economics (AMGE), Animal Science and Management (AANM), and Textiles and Clothing (ATXC) Majors and Agricultural and Resource Economics (GARE), International Agricultural Development (GIAD), Viticulture and Enology (GVEN) and Transportation Technology and Policy (GTTP) Graduate Majors. Theory of individual consumer and market demand; theory of production and supply of agricultural products, with particular reference to the individual firm; price determination, and employment of resources under pure competition. Not open for credit to students who have completed ECN 100. GE credit: QL, SS. Effective: 2018 Winter Quarter.

ARE 100B—Intermediate Microeconomics: Imperfect Competition, Markets and Welfare Economics (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ARE 100A C- or better Pass One open to Managerial Economics Majors (AMGE) and Agricultural and Resource Economics (GARE) Graduate Majors. Price determination, and employment of resources under conditions of monopoly, oligopoly, and monopolistic competition. GE credit: QL, SS. Effective: 2017 Spring Quarter.
(MAT 017A C- or better, MAT 017B C- or better) or (MAT 021A C- or better, MAT 021B C- or better) Pass One open to Managerial Economics Majors (AMGE) and Agricultural and Resource Economics (GARE) Graduate Majors. Price determination, and employment of resources under conditions of monopoly, oligopoly, and monopolistic competition. GE credit: QL, SS. Effective: 2018 Summer Session 1.

ARE 106—Econometric Theory and Applications (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ARE 100A C- or better; STA 103 C- or better Pass One open to Managerial Economics Majors (AMGE) and Agricultural and Resource Economics (GARE) Graduate Majors. Statistical methods for analyzing data to solve problems in managerial economics. Topics include the linear regression model, methods to resolve data problems, and the economic interpretation of results. Not open for credit to students who have enrolled in or completed Economics 140. GE credit: QL, SS. Effective: 2018 Summer Session 1.

ARE 107—Econometrics for Business Decisions (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ARE 106; ARE 100A C- or better; (STA 013 C- or better or STA 013Y C- or better); STA 103 C- or better Pass One open to Managerial Economics majors; Pass Two open to majors in the College of Agricultural and Environmental Sciences. Covers state-of-the-art econometric and statistical methods for causal and predictive modeling with applications to finance and marketing. GE credit: SS. Effective: 2015 Fall Quarter.

ARE 112—Fundamentals of Organization Management (4) Review all entries
Lecture—4 hours. Prerequisite(s): Upper-division standing recommended. Pass One restricted to Managerial Economics (AMGE) Majors and Agricultural and Resource Economics (GARE) Graduate Majors. Role of organizational design and behavior in business and public agencies. Principles of planning, decision making, individual behavior, management, leadership, informal groups, conflict and change in the organization. GE credit: SS. Effective: 2017 Fall Quarter.

ARE 113—Fundamentals of Marketing Management (4)
Lecture—4 hours. Prerequisite(s): ECN 001A or ECN 001AV; For non-majors only. Nature of product marketing by the business firm. Customer-product relationships, pricing and demand; new product development and marketing strategy; promotion and advertising; product life cycles; the distribution system; manufacturing, wholesaling, retailing. Government regulation and restraints. Not open for credit to students who have completed ARE 136. GE credit: SS. Effective: 2018 Winter Quarter.

ARE 115A—Economic Development (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECN 001A or ECN 001AV); ECN 001B Major issues encountered in emerging from international poverty, problems of growth and structural change, human welfare, population growth and health, labor markets and internal migration. Important issues of policy concerning international trade and industrialization. (Same course as ECN 115A.) GE credit: SS, WC. Effective: 2018 Winter Quarter.
ARE 115B—Economic Development (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECN 001A or ECN 001AV); ECN 001B Macroeconomic issues of developing countries. Issues include problems in generating capital, conduct of monetary and fiscal policies, foreign aid and investment. Important issues of policy concerning international borrowing and external debt of developing countries. (Same course as ECN 115B.) GE credit: SS, WC. Effective: 2018 Spring Quarter.

ARE 118—Tax Accounting (4)
Lecture—4 hours. Prerequisite(s): MGT 011A; MGT 011B; ARE 018 recommended. Development and application of a framework to understand the tax effects of typical management decisions on both entities and their owners. Impacts that different methods of taxation have on business entities with emphasis on tax planning, using income and deduction strategies, retirement plans, and choice of business entity for tax minimization. Effective: 2000 Spring Quarter.

ARE 119—Intermediate Managerial Accounting (4)
Extensive Problem Solving—8 hours; Lecture—4 hours. Prerequisite(s): MGT 011A; MGT 011B Pass One open to Managerial Economics (AMGE) Majors and Agricultural and Resource Economics (GARE) Graduate Majors. Use of accounting information by managers in decision making, planning, directing and controlling operations. Focuses on managerial/cost accounting theory and practice. Covers costing systems, budgeting, and financial statement analysis. GE credit: SS. Effective: 2016 Fall Quarter.

ARE 120—Agricultural Policy (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ARE 100A C- or better Pass One open to Managerial Economics (AMGE), Animal Science and Management (AANM) Majors and Agricultural and Resource Economics (GARE) Graduate Majors. Analytical treatment of historical and current economic problems and governmental policies influencing American agriculture. Uses of economic theory to develop historical and conceptual understanding of the economics of agriculture; how public policy influences the nature and performance of American agriculture. GE credit: SS. Effective: 2018 Spring Quarter.

ARE 120S—Agricultural Policy (4)
Lecture—4 hours. Prerequisite(s): ARE 100A; or Consent of Instructor. Analytical treatment of historical and current economic problems and governmental policies influencing agriculture. Uses of economic theory to develop historical and conceptual understanding of the economics of agriculture; how public policy influences the nature and performance of agriculture. Taught in Australia under the supervision of a UC Davis faculty member. Not open for credit to students who have taken ARE 120. GE credit: SS, WC. Effective: 2004 Fall Quarter.

ARE 121—Economics of Agricultural Sustainability (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECN 001A or ECN 001AV); MAT 012; Or equivalent of MAT 012. Pass One open to Majors in the College of Agricultural and Environmental Sciences and Graduate Majors. Application of economic concepts to agro-environmental issues relevant to agricultural sustainability. Topics include market efficiency, production externalities, government policies, agricultural trade, product differentiation, all linked to sustainability issues. Case studies include biofuels, genetically modified foods and geographically differentiated products. GE credit: SS. Effective: 2018 Winter Quarter.

ARE 130—Agricultural Markets (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECN 001A C- or better or ECN 001AV C- or better Pass One open to Majors in the College of Agricultural and Environmental Sciences and Graduate Majors. Application of economic concepts to agro-environmental issues relevant to agricultural sustainability. Topics include market efficiency, production externalities, government policies, agricultural trade, product differentiation, all linked to sustainability issues. Case studies include biofuels, genetically modified foods and geographically differentiated products. GE credit: SS. Effective: 2018 Fall Quarter.

ARE 130—Agricultural Markets (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ARE 106 Pass One open to Managerial Economics (AMGE), Animal Science and Management (AANM) Majors and Agricultural and Resource Economics (GARE) Graduate Majors. Nature, function, organizational structure, and operation of agricultural markets; prices, costs, and margins; market information, regulation, and controls; cooperative marketing. GE credit: SS. Effective: 2016 Fall Quarter.

ARE 130—Agricultural Markets (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ARE 106; ARE 100A C- or better; STA 013 C- or better or STA 013Y C- or better); STA 103 C- or better Pass One open to Managerial Economics (AMGE), Animal Science and Management (AANM) Majors and Agricultural and Resource Economics (GARE) Graduate Majors. Nature, function,
organizational structure, and operation of agricultural markets; prices, costs, and margins; market information, regulation, and controls; cooperative marketing. GE credit: SS. Effective: 2018 Fall Quarter.

ARE 132—Cooperative Business Enterprises (3) Review all entries
Lecture—3 hours. Prerequisite(s): ECN 001A Pass One open to Managerial Economics (AMGE) Majors and Agricultural and Resource Economics (GARE) Graduate Majors. Study of cooperative business enterprise in the United States and elsewhere; economic theories of behavior, principles of operation, finance, decision-making, and taxation. GE credit: SS. Effective: 2016 Fall Quarter.

ARE 132—Cooperative Business Enterprises (4) Review all entries
Lecture—4 hours. Prerequisite(s): (ECN 001A C- or better or ECN 001AV C- or better); (UWP 104A or UWP 104AY or UWP 101) Pass One open to Managerial Economics (AMGE) and Animal Science and Management Majors (AANM) and Agricultural and Resource Economics (GARE) Graduate Majors. Study of cooperative business enterprise in the United States and elsewhere; economic theories of behavior, principles of operation, finance, decision-making, and taxation. GE credit: SS. Effective: 2018 Fall Quarter.

ARE 133—Introduction to Behavioral Economics (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECN 001A C- or better or ECN 001AV C- or better); (STA 013 C- or better or STA 013Y C- or better) Pass One open to Managerial Economics majors. Inclusion of non-economic factors such as psychological principles in economic decisions and model predictions. Emphasis on behavioral principles, resulting strategies and implications for diverse market settings. Effective: 2018 Fall Quarter.

ARE 135—Agribusiness Marketing Plan Development (2)
Lecture/Discussion—2 hours. Prerequisite(s): Upper division standing. Fundamental components required to develop a marketing plan. Appreciation of the concept of marketing plans, appropriate research required, including the use of library, Internet, survey and interview instruments, government documents, market analysis, business proposition, action planning, financial evaluation and monitoring. (P/NP grading only.) GE credit: SS. Effective: 1999 Fall Quarter.

ARE 136—Managerial Marketing (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ARE 100B; ARE 106 Pass One open to Managerial Economics (AMGE), Animal Science and Management (AANM) Majors and Agricultural and Resource Economics (GARE) Graduate Majors. Application of economic theory and econometrics to the study of marketing and consumer research. Emphasis on industry structure, history, regulatory aspects, integrated brand promotion, market segmentation, optimal product mix, message placement. GE credit: SS. Effective: 2017 Fall Quarter.

ARE 136—Managerial Marketing (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ARE 100B; ARE 106; ARE 100A C- or better; (STA 013 C- or better or STA 013Y C- or better); STA 103 C- or better Pass One open to Managerial Economics (AMGE), Animal Science and Management (AANM) Majors and Agricultural and Resource Economics (GARE) Graduate Majors. Application of economic theory and econometrics to the study of marketing and consumer research. Emphasis on industry structure, history, regulatory aspects, integrated brand promotion, market segmentation, optimal product mix, message placement. GE credit: SS. Effective: 2018 Summer Session 1.

ARE 138—International Commodity and Resource Markets (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ARE 100B Pass One open to Managerial Economics (AMGE), Animal Science and Management (AANM) Majors and Agricultural and Resource Economics (GARE) Graduate Majors. Basic nature and scope of international trade in agricultural commodities, agricultural inputs, and natural resources. Market dimensions and policy institutions. Case studies to illustrate import and export problems associated with different regions and commodities. GE credit: SS. Effective: 2016 Fall Quarter.

ARE 138—International Commodity and Resource Markets (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ARE 100B; ARE 100A C- or better Pass One open to Managerial Economics (AMGE), Animal Science and Management (AANM) Majors and Agricultural and Resource Economics (GARE) Graduate Majors. Basic nature and scope of international trade in agricultural commodities, agricultural inputs, and natural resources. Market dimensions and policy institutions. Case studies to illustrate import and export problems associated with different regions and commodities. GE credit: SS. Effective: 2018 Fall Quarter.

ARE 138—International Commodity & Resource Markets (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ARE 100A C- or better; ARE 100B C- or better Pass One open to Managerial Economics (AMGE), Animal Science and Management (AANM) Majors and Agricultural and Resource
Economics (GARE) Graduate Majors. Basic nature and scope of international trade in agricultural commodities, agricultural inputs, and natural resources. Market dimensions and policy institutions. Case studies to illustrate import and export problems associated with different regions and commodities. GE credit: SS. Effective: 2019 Fall Quarter.

**ARE 139—Futures and Options Markets (4)** Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ARE 100A C- or better; STA 103 C- or better Pass One open to Managerial Economics (AMGE) Majors and Agricultural and Resource Economics (GARE) Graduate Majors. History, mechanics, and economic functions of futures and options markets; hedging; theory of inter-temporal price formation and behavior of futures and options prices; price forecasting; futures and options as policy tools. GE credit: SS. Effective: 2018 Winter Quarter.

**ARE 139—Futures and Options Markets (4)** Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ARE 100A C- or better; (STA 013 C- or better or STA 013Y C- or better); STA 103 C- or better Pass One open to Managerial Economics (AMGE) Majors and Agricultural and Resource Economics (GARE) Graduate Majors. History, mechanics, and economic functions of futures and options markets; hedging; theory of inter-temporal price formation and behavior of futures and options prices; price forecasting; futures and options as policy tools. GE credit: SS. Effective: 2018 Fall Quarter.

**ARE 140—Farm Management (4)** Review all entries
Lecture—4 hours. Prerequisite(s): ECN 001A or ECN 001AV Pass One open to Managerial Economics majors. Farm organization and resources; economic and technological principles in decision making; analytical techniques and management control; problems in organizing and managing the farm business. GE credit: SS. Effective: 2018 Winter Quarter.

**ARE 140—Farm Management (4)** Review all entries
Lecture—4 hours. Prerequisite(s): ECN 001A C- or better or ECN 001AV C- or better Pass One open to Managerial Economics majors. Farm organization and resources; economic and technological principles in decision making; analytical techniques and management control; problems in organizing and managing the farm business. GE credit: SS. Effective: 2018 Fall Quarter.

**ARE 142—Personal Finance (3)**
Lecture—3 hours. Prerequisite(s): ECN 001B Management of income and expenditures by the household. Use of consumer credit, savings, and insurance by households. Principles of tax, retirement, and estate planning. GE credit: SS. Effective: 1997 Winter Quarter.

**ARE 143—Investments (4)** Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Consent of Instructor. Pass One open to Managerial Economics (AMGE) Majors and Agricultural and Resource Economics (GARE) Graduate Majors. Survey of investment institutions, sources of investment information, and portfolio theory. Analysis of the stock, bond and real estate markets from the perspective of the investor. GE credit: SS. Effective: 2017 Winter Quarter.

**ARE 143—Investments (4)** Review all entries
Lecture—4 hours. Pass One open to upper-division Managerial Economics (AMGE) Majors and Agricultural and Resource Economics (GARE) Graduate Majors. Survey of investment institutions, sources of investment information, and portfolio theory. Analysis of the stock, bond and real estate markets from the perspective of the investor. Not open for credit to students who completed ARE 171 or ARE 171A. GE credit: SS. Effective: 2018 Summer Session 1.

**ARE 143—Investments (4)** Review all entries
Lecture—4 hours. Pass One open to upper-division Managerial Economics (AMGE) Majors and Agricultural and Resource Economics (GARE) Graduate Majors. Survey of investment institutions, sources of investment information, and portfolio theory. Analysis of the stock, bond and real estate markets from the perspective of the investor. Not open for credit to students who are concurrently enrolled in or have completed ARE 171 or ARE 171A. GE credit: SS. Effective: 2019 Winter Quarter.

**ARE 144—Real Estate Economics (4)**
Lecture—4 hours. Prerequisite(s): ARE 100A C- or better Pass One open to Managerial Economics (AMGE) Majors and Agricultural and Resource Economics (GARE) Graduate Majors. Economic theory, analysis, and institutions of real estate markets and related financial markets. Techniques for appraising property values. Cases drawn from the raw land, single family, multifamily, industrial and office real estate markets. GE credit: SS. Effective: 2018 Spring Quarter.
ARE 145—Farm and Rural Resources Appraisal (4)
Lecture/Discussion—4 hours. Pass One open to Managerial Economics (AMGE), Animal Science and Management (AANM) Majors and Agricultural and Resource Economics (GARE) Graduate Majors. Principles and procedures of the valuation process with emphasis placed on rural real estate. Course includes identification of the major physical and economic determinants of value, the three primary appraisal approaches to valuation, discussion of appraisal activity and practice. GE credit: SS. Effective: 2016 Fall Quarter.

ARE 146—Business, Government Regulation, and Society (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ARE 100B Pass One open to Managerial Economics (AMGE) Majors and Agricultural and Resource Economics (GARE) Graduate Majors. Variety, nature and impact of government regulation: anti-trust laws and economic and social regulation. Nature of the legislative process, promulgation of regulations, and their impact, especially as analyzed by economists. GE credit: ACGH, SS. Effective: 2016 Fall Quarter.

ARE 146—Business, Government Regulation, and Society (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ARE 100B; ARE 100A C- or better Pass One open to Managerial Economics (AMGE) Majors and Agricultural and Resource Economics (GARE) Graduate Majors. Variety, nature and impact of government regulation: anti-trust laws and economic and social regulation. Nature of the legislative process, promulgation of regulations, and their impact, especially as analyzed by economists. GE credit: ACGH, SS. Effective: 2018 Fall Quarter.

ARE 146—Business, Government Regulation, & Society (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ARE 100A C- or better; ARE 100B C- or better Pass One open to Managerial Economics (AMGE) Majors and Agricultural and Resource Economics (GARE) Graduate Majors. Variety, nature and impact of government regulation: anti-trust laws and economic and social regulation. Nature of the legislative process, promulgation of regulations, and their impact, especially as analyzed by economists. GE credit: ACGH, SS. Effective: 2019 Fall Quarter.

ARE 147—Resource and Environment Policy Analysis (3)
Lecture—3 hours. Prerequisite(s): ECN 001A or ECN 001AV Open to non-majors only. Natural resource use problems with emphasis on past and current policies and institutions affecting resource use; determinants, principles, and patterns of natural resource use; property rights; conservation; private and public resource use problems; and public issues. Students who have had or are taking ARE 100A, ECN 100, or the equivalent, may receive only 2 units of credit, so must enroll in ARE 147M instead. GE credit: SS. Effective: 2018 Spring Quarter.

ARE 147M—Resource and Environmental Policy Analysis (2)
Lecture—3 hours. Prerequisite(s): ECN 001A or ECN 001AV Open to non-majors only. Natural resource use problems with emphasis on past and current policies and institutions affecting resource use; determinants, principles, and patterns of natural resource use; property rights; conservation; private and public resource use problems; and public issues. Students who have had or are taking ARE 100A, ECN 100, or the equivalent, must enroll in this course for 2 units rather than ARE 147. GE credit: SS. Effective: 2018 Spring Quarter.

ARE 150—Agricultural Labor (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ARE 100A C- or better Pass One open to Managerial Economics (AMGE) Majors and Agricultural and Resource Economics (GARE) Graduate Majors. Analysis of labor markets with focus on U.S. and world agriculture. Labor supply, demand, market equilibrium; why farm labor markets are different; global trends in farm labor; U.S. farm labor history; unions and collective bargaining; immigration policy. GE credit: SS. Effective: 2018 Spring Quarter.

ARE 155—Operations Research and Management Science (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ARE 100A C- or better; STA 103 C- or better Pass One open to Managerial Economics (AMGE) and Animal Science and Management (AANM) Majors and Agricultural and Resource Economics (GARE) Graduate Majors. Introduction to quantitative methods used to analyze business and economic processes: decision analysis for management, mathematical programming, competitive analysis, and other methods. GE credit: QL, SS. Effective: 2017 Spring Quarter.

ARE 155—Operations Research and Management Science (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ARE 100A C- or better; (STA 013 C- or better or STA 013Y C- or better); STA 103 C- or better Pass One open to Managerial Economics (AMGE) and Animal Science and Management (AANM) Majors and Agricultural and Resource Economics (GARE) Graduate Majors. Introduction to quantitative methods used to analyze business and economic processes: decision analysis for management,
mathematical programming, competitive analysis, and other methods. GE credit: QL, SS. Effective: 2018 Summer Session 1.

ALE 156—Introduction to Mathematical Economics (4) Review all entries
Lecture—4 hours. Prerequisite(s): ARE 100B; ARE 155; ARE 100A C- or better; (STA 013 C- or better or STA 013Y C- or better); STA 103 C- or better Pass One open to Managerial Economics (AMGE) Majors and Agricultural and Resource Economics (GARE) Graduate Majors. Linear algebra for economists; necessary and sufficient conditions in static optimization problems; implicit function theorem; economic methodology and mathematics; comparative statics; envelope theorem; Le Chatelier principle; applications to production and consumer models. GE credit: QL, SS. Effective: 2016 Fall Quarter.

ALE 156—Introduction to Mathematical Economics (4) Review all entries
Lecture—4 hours. Prerequisite(s): ARE 100B; ARE 155; ARE 100A C- or better; (STA 013 C- or better or STA 013Y C- or better); STA 103 C- or better Pass One open to Managerial Economics (AMGE) Majors and Agricultural and Resource Economics (GARE) Graduate Majors. Linear algebra for economists; necessary and sufficient conditions in static optimization problems; implicit function theorem; economic methodology and mathematics; comparative statics; envelope theorem; Le Chatelier principle; applications to production and consumer models. GE credit: QL, SS. Effective: 2018 Fall Quarter.

ALE 157—Analysis for Operations and Production Management (4) Review all entries
Lecture—4 hours. Prerequisite(s): ARE 155; ARE 100A C- or better; (STA 013 C- or better or STA 013Y C- or better); STA 103 C- or better Pass One open to Managerial Economics (AMGE), Animal Science and Management (AANM) Majors and Agricultural and Resource Economics (GARE) Graduate Majors. Application of economic theory and quantitative methods to analyze operations and production management problems including process strategy, quality management, location and plant layout, and inventory management. GE credit: SS. Effective: 2016 Fall Quarter.

ALE 157—Analysis for Operations and Production Management (4) Review all entries
Lecture—4 hours. Prerequisite(s): ARE 155; ARE 100A C- or better; (STA 013 C- or better or STA 013Y C- or better); STA 103 C- or better Pass One open to Managerial Economics (AMGE), Animal Science and Management (AANM) Majors and Agricultural and Resource Economics (GARE) Graduate Majors. Application of economic theory and quantitative methods to analyze operations and production management problems including process strategy, quality management, location and plant layout, and inventory management. GE credit: SS. Effective: 2018 Fall Quarter.

ALE 165—Emerging Economies and Globalization (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ARE 100A C- or better; ARE 115A; ARE 115B; Completion of ARE 106 and ECN 162 strongly recommended. Pass One open to Managerial Economics and graduate majors. Economic drivers and policy challenges in the major emerging markets, with an emphasis on the effects of rising incomes, population growth, urbanization, and relative wages on world markets and natural resources. GE credit: SS. Effective: 2018 Spring Quarter.

ALE 166—The Economics of Global Poverty Reduction: What Works and Why (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ARE 100B or ECN 100; ARE 106 or ECN 140; ARE 115A or ECN 115A Pass One open to Managerial Economics (AMGE) and Economics (LECN) majors only. Application of microeconomic theory and econometrics to understand causes of poverty and critically evaluate poverty alleviation policies in low income countries. Effective: 2017 Spring Quarter.

ALE 166—The Economics of Global Poverty Reduction: What Works and Why (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ARE 100B or ECN 100 or ECN 100B); (ARE 106 or ECN 140); (ARE 115A or ECN 115A) Pass One open to Managerial Economics (AMGE) and Economics (LECN) majors only. Application of microeconomic theory and econometrics to understand causes of poverty and critically evaluate poverty alleviation policies in low income countries. Effective: 2018 Fall Quarter.

ALE 171—Principles of Finance (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ARE 100A C- or better; ARE 106; MGT 011A; MGT 011B Pass One open to Managerial Economics Majors and Agricultural and Resource Economics Graduate Majors. Principles of corporate financial management. Time value of money, interest rates, principles of valuation, NPV, risk and return, and cost of capital. Not open for credit to students who have completed ECN 134. Effective: 2018 Summer Session 1.

ALE 171A—Financial Management of the Firm (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ARE 106; MGT 011A; MGT 011B Pass One open to Managerial Economics (AMGE) Majors and Agricultural and Resource Economics (GARE) Graduate Majors. Financial analysis at
the firm level: methods of depreciation; influence of the tax structure; inventory, cash, and accounts receivable management; sources of short-term and long-term financing, and financial problem solving using a computer spreadsheet program. Not open for credit to students who have completed Economics 134. GE credit: QL, SS. Effective: 2017 Winter Quarter.

ARE 171A—Financial Management of the Firm (4) Review all entries Discontinued
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ARE 106; MGT 011A; MGT 011B Pass One open to Managerial Economics (AMGE) Majors and Agricultural and Resource Economics (GARE) Graduate Majors. Financial analysis at the firm level: methods of depreciation; influence of the tax structure; inventory, cash, and accounts receivable management; sources of short-term and long-term financing, and financial problem solving using a computer spreadsheet program. Not open for credit to students who have completed Economics 134. GE credit: QL, SS. Effective: 2017 Winter Quarter.

ARE 171B—Financial Management of the Firm (4) Review all entries Discontinued
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ARE 171A Pass One open to Managerial Economics (AMGE) Majors and Agricultural and Resource Economics (GARE) Graduate Majors. Financial analysis at the firm level: methods of capital budgeting; calculating the cost of capital; dividend policies; mergers and acquisitions; and special current topics in finance. GE credit: QL, SS. Effective: 2017 Winter Quarter.

ARE 172—Financial Management of the Firm (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ARE 171A or ARE 171); ARE 106; ARE 100A C- or better; MGT 011A; MGT 011B Pass One open to Managerial Economics Majors and Agricultural and Resource Economics Graduate Majors. Financial analysis at the firm level: optimizing capital structure; minimizing the cost of capital; dividend policies; mergers and acquisitions; real options; and risk management. Effective: 2018 Summer Session 1.

ARE 173—Capital Markets (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ARE 171 or ARE 171A Pass One Open to Managerial Economics majors and Agricultural and Resource Economics graduate majors. Introduction to asset pricing. Valuation and risk characteristics of financial assets, including stocks, bonds, futures, and options. Investors’ attitudes toward risk, capital allocation, portfolio selection, the capital asset pricing model, and the efficient market hypothesis. Effective: 2018 Spring Quarter.

ARE 173—Capital Markets (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ARE 171A or ARE 171); ARE 106; ARE 100A C- or better; MGT 011A; MGT 011B Pass One open to Managerial Economics majors and Agricultural and Resource Economics graduate majors. Introduction to asset pricing. Valuation and risk characteristics of financial assets, including stocks, bonds, futures, and options. Investors’ attitudes toward risk, capital allocation, portfolio selection, the capital asset pricing model, and the efficient market hypothesis. Effective: 2018 Fall Quarter.

ARE 175—Natural Resource Economics (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ARE 100B or ECN 100; Or the equivalent. Pass One open to Managerial Economics (AMGE) and Environmental Policy Analysis and Planning (AEPP) Majors and Agricultural and Resource Economics (GARE) Graduate Majors. Economic concepts and policy issues associated with natural resources, renewable resources (ground water, forests, fisheries, and wildlife populations) and non-renewable resources (minerals and energy resources, soil). (Same course as Environmental Science and Policy 175) GE credit: SS. Effective: 2017 Winter Quarter.

ARE 175—Natural Resource Economics (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ARE 100A C- or better or ECN 100A C- or better or ECN 100 C- or better Pass One open to Managerial Economics (AMGE) and Environmental Policy Analysis and Planning (AEPP) Majors and Agricultural and Resource Economics (GARE) Graduate Majors. Economic concepts and policy issues associated with natural resources, renewable resources (ground water, forests, fisheries, and wildlife populations) and non-renewable resources (minerals and energy resources, soil). (Same course as ESP 175.) GE credit: SS. Effective: 2018 Fall Quarter.
ARE 176—Environmental Economics (4) **Review all entries**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ARE 100B or ECN 100 Pass One open to Managerial Economics (AMGE) Majors and Agricultural and Resource Economics (GARE) Graduate Majors. Role of the environment in economic activity and methods for protecting and enhancing environmental quality; implications of market failures for public policy; design of environmental policy; theory of welfare measurement; measuring the benefits of environmental improvement. GE credit: SS. Effective: 2017 Winter Quarter.

ARE 176—Environmental Economics (4) **Review all entries**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ARE 100A C- or better or ECN 100A C- or better or ECN 100 C- or better Pass One open to Managerial Economics (AMGE) Majors and Agricultural and Resource Economics (GARE) Graduate Majors. Role of the environment in economic activity and methods for protecting and enhancing environmental quality; implications of market failures for public policy; design of environmental policy; theory of welfare measurement; measuring the benefits of environmental improvement. GE credit: SS. Effective: 2018 Fall Quarter.

ARE 190—Topics in Managerial Economics (3)
Lecture—3 hours. Prerequisite(s): ARE 100A; STA 103; and Consent of Instructor. Selected topics in managerial economics, focusing on current research. May be repeated up to 4 time(s) when the topic differs. GE credit: SS. Effective: 2012 Fall Quarter.

ARE 192—Internship (1-6)
Internship—3-18 hours. Internship experience off and on campus in all subject areas offered in the Department of Agricultural and Resource Economics. Internships are supervised by a member of the staff. (P/NP grading only.) GE credit: SS. Effective: 1997 Winter Quarter.

ARE 194HA—Special Study for Honors Students (4)
Independent Study—3 hours; Seminar—1 hour. Prerequisite(s): ARE 100B; ARE 106; ARE 155 (can be concurrent); and Consent of Instructor. Minimum GPA of 3.500; major in Agricultural and Managerial Economics or Managerial Economics; senior standing. A program of research culminating in the writing of a senior honors thesis under the direction of a faculty adviser. GE credit: QL, SS, WE. Effective: 2000 Winter Quarter.

ARE 194HB—Special Study for Honors Students (4)
Independent Study—3 hours; Seminar—1 hour. Prerequisite(s): ARE 100B; ARE 106; ARE 155 (can be concurrent); Minimum GPA of 3.500; major in Agricultural and Managerial Economics or Managerial Economics; senior standing. A program of research culminating in the writing of a senior honors thesis under the direction of a faculty adviser. GE credit: QL, SS, WE. Effective: 2000 Winter Quarter.

ARE 197T—Tutoring in Managerial Economics (1-3)
Variable. Prerequisite(s): Senior standing in Managerial Economics and consent of Department Chairperson. Undergraduates assist the instructor by tutoring students in one of the department's regularly scheduled courses. (P/NP grading only.) GE credit: SS. Effective: 2012 Fall Quarter.

ARE 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) GE credit: SS. Effective: 1997 Winter Quarter.

ARE 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) GE credit: SS. Effective: 1997 Winter Quarter.

ARE 200A—Microeconomic Theory (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Graduate standing. Linear and non-linear optimization theory applied to develop the theory of the profit-maximizing firm and the utility-maximizing consumer. (Same course as ECN 200A.) Effective: 2018 Winter Quarter.

ARE 200B—Microeconomic Theory (5) **Review all entries**
Discussion—1 hour; Lecture—4 hours. Prerequisite(s): ARE 200A Characteristics of market equilibrium under perfect competition, simple monopoly and monopsony. Emphasis on general equilibrium and welfare economics; the sources of market success and market failures. (Same course as Economics 200B) Effective: 1997 Winter Quarter.

ARE 200B—Microeconomic Theory (4) **Review all entries**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ARE 200A Characteristics of market equilibrium under perfect competition, simple monopoly and monopsony. Emphasis on general equilibrium and welfare economics; the sources of market success and market failure. (Same course as ECN 200B.) Effective: 2018 Fall Quarter.
ARE 200C—Microeconomic Theory (5) Review all entries
Discussion—1 hour; Lecture—4 hours. Prerequisite(s): ARE 200B Uncertainty and information economics. Individual decision making under uncertainty. Introduction to game theory, with emphasis on applications to markets with firms that are imperfect competitors or consumers that are imperfectly informed. (Same course as Economics 200C) Effective: 1997 Winter Quarter.

ARE 200C—Microeconomic Theory (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ARE 200B Uncertainty and information economics. Individual decision making under uncertainty. Introduction to game theory, with emphasis on applications to markets with firms that are imperfect competitors or consumers that are imperfectly informed. (Same course as ECN 200C.) Effective: 2018 Fall Quarter.

ARE 202A—Introduction to Applied Research Methods (3) Review all entries
Lecture/Discussion—3 hours. Prerequisite(s): ARE 204A; ARE 256; ARE 200A (can be concurrent); Or the equivalent of ARE 204A and ARE 256. Study of philosophy and methodology of applied research in agricultural economics. Methods of conceptualization of researchable topics. Method of communication and constructive criticism. Effective: 1997 Winter Quarter.

ARE 202A—Introduction to Applied Research Methods (3) Review all entries
Lecture/Discussion—3 hours. Prerequisite(s): ARE 204A; ARE 200A (can be concurrent); ARE 256A Study of philosophy and methodology of applied research in agricultural economics. Methods of conceptualization of researchable topics. Method of communication and constructive criticism. Effective: 1997 Winter Quarter.

ARE 202B—Applied Microeconomics I: Consumer and Producer Behavior (3)
Lecture/Discussion—3 hours. Prerequisite(s): ARE 200A; ARE 202A; ARE 200B (can be concurrent) Application of consumer and producer theory in models of individual behavior and market-level phenomena. Implications of consumer and producer theory for specification of empirical models of supply and demand for inputs and outputs and market equilibrium displacement models. Effective: 1997 Winter Quarter.

ARE 202C—Research Design for Applied Microeconomics (3)
Lecture/Discussion—3 hours. Prerequisite(s): ARE 240A; ARE 202B Third of three courses in the Ph.D. level applied microeconomics sequence. Examines the design of empirical research and the application of econometric theory. Effective: 2014 Fall Quarter.

ARE 204A—Microeconomic Analysis I (4)
Lecture—4 hours. Prerequisite(s): ARE 100B or ECN 100; Advanced undergraduates with consent of instructor. Behavior of consumers and producers and their interactions; tools and methods needed to analyze economic behavior in the marketplace. Application of those methods to real-world problems. Effective: 2006 Fall Quarter.

ARE 204B—Microeconomic Analysis II (4)
Lecture—4 hours. Prerequisite(s): ARE 204A; or Consent of Instructor. Behavior in imperfectly competitive markets—monopoly and price discrimination; oligopoly. Introduction to noncooperative game theory. Analysis of decisions made under risk and uncertainty and imperfect information. The economics of externalities and public goods. Effective: 2006 Fall Quarter.

ARE 214—Development Economics (4)
Lecture—4 hours. Prerequisite(s): ARE 100A; ARE 100B; ECN 101; ARE 204A and ECN 160A, ECN 160B recommended. Review of the principal theoretical and empirical issues whose analysis has formed development economics. Analysis of economic development theories and development strategies and their application to specific policy issues in developing country contexts. (Same course as ECN 214.) Effective: 1997 Winter Quarter.

ARE 215A—Microdevelopment Theory and Methods I (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ARE 200A or ARE 204A; ARE 240A recommended. Agricultural development theory, with a focus on microeconomics. Agricultural household behavior with and without imperfections and uncertainty. Analysis of rural land, labor, credit and insurance markets, institutions, and contracts. (Same course as ECN 215A.) Effective: 1999 Fall Quarter.

ARE 215B—Open Macroeconomics of Development (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ARE 200A or ARE 204A); (ARE 214 or ARE 215A); (ARE 200D or ARE 205) Models and policy approaches regarding trade,monetary and fiscal issues, capital flows and debt are discussed in the macroeconomic framework of an open developing country. The basic analytical focus is real exchange rate and its impact on sectoral allocation of resources. (Same course as ECN 215B.) Effective: 1997 Winter Quarter.
ARE 215C—Microdevelopment Theory and Methods II (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ARE 215A Extension of development theory and microeconomic methods. Agricultural growth and technological change; poverty and income inequality; multisectoral, including village and regional models. Computable general equilibrium methods and applications. (Same course as ECN 215C.) Effective: 1999 Fall Quarter.

ARE 215D—Environmental and Economic Development (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ARE 200A; (ARE 204A or ARE 275) Interdisciplinary course drawing on theoretical and empirical research on interactions between environmental resource use and economic development processes. Analysis of issues emerging at the interface of environmental and development economics. (Same course as ECN 215D.) Effective: 1998 Spring Quarter.

ARE 222—International Agricultural Trade and Policy (4)
Lecture—4 hours. Prerequisite(s): (ARE 100B or ARE 204A); ECN 160A; Or the equivalent of ECN 160A. Analysis of country interdependence through world agricultural markets. Partial equilibrium analysis is used to study the impacts of national intervention on world markets, national policy choice in an open economy and multinational policy issues. Effective: 2014 Fall Quarter.

ARE 223—Economics of Agriculture (4)
Lecture—4 hours. Prerequisite(s): ARE 204A (can be concurrent); ARE 256A (can be concurrent); Or equivalent course(s) completed or concurrent required. Open to MS students in Agricultural and Resource Economics, Ph.D. students in Agricultural and Resource Economics and qualified students from other UC Davis graduate groups/programs. Analytic treatment of the historical development and contemporary role of agriculture in the global, U.S. and California economies. Uses economic reasoning and evidence to develop historical and conceptual understanding of the economics of agriculture, agricultural issues, and related government policies. Effective: 2015 Fall Quarter.

ARE 231—Supply and Demand for Agricultural Products (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ARE 200A; ARE 202A; ARE 240A; or Consent of Instructor. Analysis of supply and demand for agricultural commodities emphasizing the effective use of microeconomic theory with econometric methods, and other empirical procedures, in conducting applied analysis of supply and demand at the firm and industry level. Effective: 1999 Fall Quarter.

ARE 232—Agricultural Commodity Markets (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ARE 200A; ARE 202A; ARE 240A; or Consent of Instructor. Economic analysis of industries that produce, market, transport, store, and process basic commodities. Analysis of market equilibrium under perfect and imperfect competition, with and without government involvement. Effective: 1999 Fall Quarter.

ARE 233—Agricultural Policy (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ARE 200A; ARE 202A; ARE 240A; or Consent of Instructor. Nature, formation, evolution, and institutions of economic policy applied to food, agricultural, and rural issues. Examples for detailed consideration include food security, commodity issues, and trade policy. Analytical approaches include static and dynamic welfare analysis, policy design, and political-economic analysis. Effective: 1999 Fall Quarter.

ARE 239—Econometric Foundations (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Graduate standing or consent of instructor. Course will prepare students for econometric theory and empirical work by examining the statistical foundation of econometrics. Special attention is paid to problems specific to non-experimental data common to social sciences. Topics from matrix algebra are also covered. (Same course as ECN 239.) Effective: 2016 Fall Quarter.

ARE 240A—Econometric Methods (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ARE 239; or Consent of Instructor. Least squares, instrumental variables, and maximum likelihood estimation and inference for single equation linear regression model; linear restrictions; heteroskedasticity; autocorrelation; lagged dependent variables. (Same course as ECN 240A.) Effective: 2017 Fall Quarter.

ARE 240B—Econometric Methods (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ARE 240A Topics include asymptotic theory and instrumental variables, pooled time-series cross-section estimation, seemingly unrelated regression, classical hypothesis tests,
identification and estimation of simultaneous equation models, cointegration, error-correction models, and qualitative and limited dependent variable models. (Same course as ECN 240B.) Effective: 2000 Spring Quarter.

**ARE 240C—Time Series Econometrics (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ARE 240B; or Consent of Instructor. Probability theory; estimation, inference and forecasting of time series models; trends and non-standard asymptotic theory; vector time series methods and cointegration; time series models for higher order moments and transition data; state-space modeling; the Kalman filter. (Same course as ECN 240C.) Effective: 2016 Fall Quarter.

**ARE 240D—Cross Section Econometrics (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ARE 240B; or Consent of Instructor. Estimation and inference for nonlinear regression models for cross-section data; models for discrete data and for limited dependent variables; models for panel data; additional topics such as bootstrap and semiparametric regression. (Same course as Economics 240D) (Same course as ECN 240D.) Effective: 2016 Fall Quarter.

**ARE 240E—Topics in Time Series Econometrics (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ARE 240C; or Consent of Instructor. Modern econometric techniques for time series data. Expand on topics covered in Economics 240A, 240B and 240C. Contents may vary from year to year. (Same course as ECN 240E.) Effective: 2016 Fall Quarter.

**ARE 240F—Topics in Cross Section Econometrics (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ARE 240D; or Consent of Instructor. Modern econometrics techniques for cross-section data. Expand on topics covered in Economics 240A, 240B and 240D. Contents may vary from year to year. (Same course as ECN 240F.) Effective: 2016 Fall Quarter.

**ARE 252—Optimization with Economic Applications (4)**
Discussion—1 hour; Lecture—3 hours. Microeconomic topics in the framework of mathematical programming. Effective: 2013 Winter Quarter.

**ARE 254—Dynamic Optimization Techniques with Economic Applications (4)**
Lecture—4 hours. Prerequisite(s): ARE 253; And elementary knowledge of ordinary differential equations. Necessary and sufficient conditions in the calculus of variations and optimal control, economic interpretations, the dynamic envelope theorem and transversality conditions, infinite horizon problems and phase diagrams, local stability and comparative statics of the steady state, comparative dynamics. Effective: 1997 Winter Quarter.

**ARE 254—Dynamic Optimization Techniques with Economic Applications (4)**
Review all entries
Lecture—4 hours. Prerequisite(s): Elementary knowledge of ordinary differential equations. Necessary and sufficient conditions in the calculus of variations and optimal control, economic interpretations, the dynamic envelope theorem and transversality conditions, infinite horizon problems and phase diagrams, local stability and comparative statics of the steady state, comparative dynamics. Effective: 2018 Fall Quarter.

**ARE 255—Applied Dynamic Structural Econometric Modeling (4)**
Lecture—4 hours. Prerequisite(s): ARE 254 Course covers structural econometric models of static games of incomplete information, single-agent dynamic optimization problems and multi-agent dynamic games, with a focus on applications to issues relevant to the environment, energy, natural resources, agriculture, and development. Effective: 2014 Fall Quarter.

**ARE 256A—Applied Econometrics I (4)**
Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ARE 106 or ECN 140; or Consent of Instructor. First of two courses in the Masters-level econometrics sequence. The linear regression model and generalizations are applied to topics in agricultural and resource economics. Tools for empirical research for problems requiring more sophisticated tools than standard regression models are emphasized. Effective: 2015 Spring Quarter.

**ARE 256A—Applied Econometrics I (4)**
Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ARE 106 or ECN 140; or Consent of Instructor. First of two courses in the Masters-level econometrics sequence. The linear regression model and generalizations are applied to topics in applied economics. Tools for empirical research for problems requiring more sophisticated tools than standard regression models are emphasized. Effective: 2019 Winter Quarter.

**ARE 256B—Applied Econometrics II (4)**
Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ARE 256A; or Consent of Instructor. Second of two courses in the Masters-level econometrics sequence. The linear regression model and generalizations are applied to topics in agricultural and resource economics. Tools for empirical research for problems requiring more sophisticated tools than standard regression models are emphasized. Effective: 2015 Spring Quarter.
ARE 256B—Applied Econometrics II (4) **Review all entries**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ARE 256A; or Consent of Instructor. Second of two courses in the Masters-level econometrics sequence. The linear regression model and generalizations are applied to a variety of topics in applied economics. Tools for empirical research for problems requiring more sophisticated tools than standard regression models are emphasized. Effective: 2019 Winter Quarter.

ARE 258—Demand and Market Analysis (4) **Review all entries**
Lecture—4 hours. Prerequisite(s): ARE 204B; ARE 256; or Consent of Instructor. Application of theoretical material covered in 204A/B, with particular focus on production theory/factor demand and imperfect competition/market power. Use of theoretical models as a foundation for empirical economic analysis, and empirical exercises. Independent research on chosen topics, with empirical application. Effective: 2011 Fall Quarter.

ARE 258—Demand and Market Analysis (4) **Review all entries**
Lecture—4 hours. Prerequisite(s): ARE 204B; ARE 256B; or Consent of Instructor. Application of theoretical material covered in 204A/B, with particular focus on production theory/factor demand and imperfect competition/market power. Use of theoretical models as a foundation for empirical economic analysis, and empirical exercises. Independent research on chosen topics, with empirical application. Effective: 2016 Fall Quarter.

ARE 275—Economic Analysis of Resource and Environmental Policies (4)
Lecture/Discussion—4 hours. Prerequisite(s): ARE 204A Development of externality theory, market failure concepts, welfare economics, theory of renewable and non-renewable resource use, and political economic models. Applications to policy issues regarding the agricultural/environment interface and managing resources in the public domain. (Same course as ESP 275.) Effective: 1999 Spring Quarter.

ARE 276A—Environmental Economics: Externalities (4)
Lecture—4 hours. Prerequisite(s): Students should have completed the first year graduate level sequence in microeconomics and econometrics. Course introduces fundamental and recent research in environmental economics, focusing on the design, implementation and evaluation of environmental policy instruments to correct market failures. It will expose students to economic theories and empirical techniques frequently used in this field. Effective: 2014 Fall Quarter.

ARE 276B—Environmental Economics: Non-Market Valuation (4)
Lecture—4 hours. Prerequisite(s): Students should have completed the first year graduate level sequence in microeconomics and econometrics. Second PhD field course in environmental economics, covering theory and econometrics of methods for valuing nonmarket goods and environmental quality changes. Topics include revealed preference (travel cost, hedonics, sorting equilibrium) and stated preference (contingent valuation, choice experiments, conjoint analysis) techniques. Effective: 2014 Fall Quarter.

ARE 277—Natural Resource Economics (4)
Lecture—4 hours. Prerequisite(s): ARE 254; or Consent of Instructor. Application of capital theory and dynamic methods to issues of optimal use of renewable and nonrenewable resources. Examination of policy issues associated with forests, fisheries, groundwater, energy resources, watersheds, soil, global climate, and wildlife. Effective: 1999 Spring Quarter.

ARE 290—Topics in Agricultural and Resource Economics (3)
Lecture—3 hours. Selected topics in agricultural and resource economics, focusing on current research. May be repeated up to 4 time(s) for credit. Effective: 2002 Fall Quarter.

ARE 293—Analysis of California Agriculture and Resources (3)
Fieldwork—45 hours; Lecture—1.5 hours. Review and analysis of production, marketing, and resource issues facing agricultural firms in California. Application of economic theory and measurement to individual firm and industry decisions in an applied setting. Fieldwork-45 hours total, including one 5-day summer field trip. (S/U grading only.) Effective: 1997 Winter Quarter.

ARE 298—Directed Group Study (1-5)
Variable. Advanced study through special seminars, informal group studies, or group research on problems for analysis and experimentation. Sections:(1) Managerial Economics; (2) Agricultural Policy; (3) Community and Regional Development; (4) Natural Resources; (5) Human Resources; (6) Research Methods and Quantitative Analysis. Effective: 1997 Winter Quarter.

ARE 299—Individual Study (1-12)
Variable. Sections: (1) Managerial Economics; (2) Agricultural Policy; (3) Community and Regional Development; (4)
Natural Resources; (5) Human Resources; (6) Research Methods and Quantitative Analysis; and (7) Dissertation Research Prospectus. (S/U grading only.) Effective: 1997 Winter Quarter.

ARE 299D—Special Study for Doctoral Dissertation (1-12)
Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

ARE 396—Teaching Assistant Training Practicum (1-4)
Variable—3-36 hours. Prerequisite(s): Graduate standing. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

Agricultural Pest Management Minor; Entomology & Nematology

Formerly the departments of Entomology and Nematology

(College of Agricultural and Environmental Sciences)

Steve Nadler, Ph.D., Chairperson of the Department
Joanna Chiu, Ph.D., Vice Chairperson of the Department

Department Office. 367 Briggs Hall; 530-752-0492; http://entomology.ucdavis.edu

Faculty. http://entomology.ucdavis.edu/Faculty/

Minor Requirements:

The Department of Entomology has five minor programs open to students in other disciplines who are interested in rounding out their academic study with a concentration in the area of entomology.

Minor Adviser. S. Lawler, S. Nadler

The Department

American Studies explores the cultures of the United States, as well as their transnational exchanges and impact. The discipline’s practitioners seek to understand the historical origins of particular cultures and practices held by individuals and groups within the United States and how those values and beliefs shape social and political realities within and beyond U.S. borders. The approach that American Studies takes is interdisciplinary, meaning that in American Studies we answer these questions using tools developed by numerous disciplines including history, sociology, anthropology, literary criticism, folklore, media and science and technology studies.

American Studies takes as its subject American cultures and provides an excellent, broad education in the liberal arts. Our aim is to make each student a culture critic, a person capable of bringing a thoughtful and humane approach to bear upon our understanding of the varieties of American experiences. Making connections is the way we like to characterize our work in American Studies. American Studies majors are good critical thinkers, develop excellent writing skills, and most importantly “learn how to learn,” that is, you learn to figure out what intellectual tools and specialized knowledge you will need to perform a task or solve a problem. These intellectual and communication skills will prepare majors for a broad array of careers.

The Major. American Studies majors create an emphasis devoted to the close study of major issues crucial to the practice of American Studies. Advanced work in at least two other departments or programs allows each student to study areas tailored to his or her own individual education goals. Sample emphases include: Culture and Consumption, Youth Education, Social Identities, Nature, Culture and Environment, Marketing, Advertising and Business, and Food and Health, for example. Students have the option of writing a senior thesis within this emphasis.

Career Alternatives. As an interdisciplinary department, American Studies provides a good liberal arts and sciences undergraduate education. American Studies maximizes a student’s contact with a variety of subject matter and approaches. Graduates have moved into a broad range of career settings, including journalism, law, teaching, marketing, non-profit and community organizations, government, social work, environmental planning, library science, museum curatorship, and business. Students discover new career possibilities through their internships in American institutions.

Faculty Advisor. R. Cartwright

**American Studies Electives:**

Three additional upper-division American Studies courses  12

**Emphasis:**

In consultation with the American Studies Undergraduate Advisor, the student designs a program of 20 units (typically five courses) of upper division course work around a unifying theme, period, or subject matter in American cultures. The courses should come from two or more departments or programs and can include up to 8 units of American Studies courses. Only 4 units of course 192 (internship) can be included in the emphasis. The student may choose the senior thesis option (190A-190B) for 8 units of the emphasis and take the remaining 12 units outside the program.

**Recommended**

Completion of the college requirement in English composition before enrollment in American Studies 190A.

**Total: 64**

No more than 8 units of course 192 may be counted toward this total.

**Total: 20**

**American Studies | AMS Courses**

**Courses in AMS:**

**AMS 001A—Science and American Culture (4)**

Discussion—1 hour; Lecture—3 hours. American science as a cultural system. Mutual influence and interaction of that system with other cultural systems including religion, social thought, art, architecture, literature, music, and common sense. GE credit: ACGH, DD, WE. Effective: 2002 Spring Quarter.

**AMS 001B—Religion in American Lives (4)**

Discussion—1 hour; Lecture—3 hours. Religions and spiritual practices in the United States, and their interrelationships with other aspects of U.S. history, society and culture; indigenous and imported faiths, and the
impact of immigration, colonization and culture contact on religious systems. GE credit: ACGH, AH, DD, SS, WE. Effective: 1997 Winter Quarter.

AMS 001C—American Lives Through Autobiography (4)
Discussion—1 hour; Lecture—3 hours. American culture as understood through the individual life stories told by Americans, with attention to the roles of gender, race, ethnicity, social class, and sexual orientation in the individual's life course. GE credit: ACGH, AH, DD, SS, WE. Effective: 2003 Winter Quarter.

AMS 001E—Nature and Culture in America (4)
Discussion—1 hour; Lecture—3 hours. Uses and abuses of nature in America; patterns of inhabitation, exploitation, appreciation, and neglect; attention to California; emphasis on metaphor as a key to understanding ourselves and the natural world; attention to models of healing: stewardship, ecology, the "rights" movement. GE credit: ACGH, AH, DD, SS, WE. Effective: 2012 Spring Quarter.

AMS 004—Freshman Seminar (2)
Seminar—2 hours. Prerequisite(s): Open only to students who have completed fewer than 40 quarter units. Class size limited to 25 students. Investigation of a special topic in American Studies through shared readings, discussions, written assignments, and special activities (such as fieldwork, site visits). Emphasis on student participation in learning. Effective: 1997 Winter Quarter.

AMS 005—Technology in American Lives (4)
Discussion—2 hours; Lecture—2 hours. Technology as both a material cultural force and a symbol in American culture; the lives of engineers at work and play; images of the engineer and technology in popular culture; social political and ethical issues raised by technology. GE credit: AH, SS, WE. Effective: 2016 Fall Quarter.

AMS 010—Introduction to American Studies (4) Review all entries
Discussion—1 hour; Lecture—3 hours. United States history, culture and society. Examination of cultural objects and social practices. Topics include popular culture (film, TV, Internet), cultural diversity, social activism, play, and communication. GE credit: ACGH, AH, DD, SS, WE. Effective: 2003 Spring Quarter.

AMS 010—Introduction to American Studies (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Ideals, conflicts, and realities defining American Cultures through study of popular music, advertising, and other media. Themes include Imagining America, Citizenship and Belonging, and Cultural/Spatial Practices. GE credit: ACGH, AH, DD, SS, WE. Effective: 2019 Winter Quarter.

AMS 021—Objects and Everyday Life (4)
Discussion—1 hour; Lecture—3 hours; Term Paper. Material culture (objects and artifacts ranging from everyday objects like toys and furnishings to buildings and constructed landscapes) as evidence for understanding the everyday (vernacular) lives (gender, social class, ethnicity, region, age, and other factors; collecting and displaying material. GE credit: ACGH, AH, DD, WE. Effective: 2016 Fall Quarter.

AMS 025—United States as a Business Culture (4)
Discussion—1 hour; Lecture—3 hours. Business as a cultural system and its relation to religion, politics, arts, science, technology, and material culture; business themes of success, creativity, invention, and competition in American autobiographies, fiction, advice literature, film, and television; cultures of the workplace; multinational business. GE credit: ACGH, AH, DD, SS, WE. Effective: 2016 Fall Quarter.

AMS 030—Images of America and Americans in Popular Culture (4)
Discussion—1 hour; Lecture—3 hours. Investigation of verbal and visual discourses about American identity in various popular culture products, including film, television, radio, music, fiction, art, advertising, and commercial experiences; discourses about the United States in the popular culture of other societies. GE credit: ACGH, AH, DD, SS, WE. Effective: 1997 Winter Quarter.

AMS 055—Food in American Culture (4)
Discussion—1 hour; Lecture—3 hours. Relationship between food and culture; relationship between food and the social order; influences on eating habits and the tensions between them including identity, convenience, and responsibility; multiple disciplines and genres. (Same course as FST 055.) GE credit: ACGH, AH, DD, SS, WE. Effective: 2018 Winter Quarter.

AMS 059—Music and American Culture (4)
Discussion—1 hour; Lecture—3 hours. Examination of music and American culture. Studies will explore music in its cultural contexts, which may include examinations of recording and broadcasting, of race, class, and gender, the role of technology, and relationships between musical production, consumption and listening. GE credit: ACGH, AH, DD, SS, WE. Effective: 2016 Fall Quarter.
AMS 095—Careers and Identity in American Culture (2)
Discussion—1 hour; Lecture—1 hour. Defining one's identity through the career. The life course, preparation, and choices. Personality and career. Ethics. Gender, ethnicity, sexuality, and social class in the workplace. The transnational workplace. Conflicts between the career and other social roles. Effective: 2007 Summer Quarter.

AMS 098—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

AMS 099—Individual Study for Undergraduates (1-5)
Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

AMS 100—Methods in American Studies (4)
Lecture/Discussion—3 hours; Term Paper. Design and implementation of interdisciplinary research, analysis and writing for American Studies and other cultural studies fields. Library and Internet research skills, project/problem definition, methods for study of texts, individuals, communities. Hand-on, skill-building, focused reading, discussion. Effective: 2008 Fall Quarter.

AMS 101A—Special Topics: Popular Culture Studies (4)
Seminar—3 hours. Intensive reading, writing, and special projects. Interdisciplinary group study of special topics in American Culture Studies, designed for non-majors as well as majors. May be repeated for credit. Effective: 1997 Winter Quarter.

AMS 101B—Special Topics: Women's Studies (4)
Seminar—3 hours. Intensive reading, writing, and special projects. Interdisciplinary group study of special topics in American Culture Studies, designed for non-majors as well as majors. May be repeated for credit. Effective: 1997 Winter Quarter.

AMS 101C—Special Topics: Material Aspects of American Culture (4)
Seminar—3 hours. Intensive reading, writing, and special projects. Interdisciplinary group study of special topics in American Culture Studies, designed for non-majors as well as majors. May be repeated for credit. Effective: 1997 Winter Quarter.

AMS 101E—Special Topics: American Lives Through Autobiography (4)
Seminar—3 hours. Intensive reading, writing, and special projects. Interdisciplinary group study of special topics in American Culture Studies, designed for non-majors as well as majors. May be repeated for credit. Effective: 1997 Winter Quarter.

AMS 101F—Special Topics: Interrelationship Between Arts and Ideas (4)
Seminar—3 hours. Intensive reading, writing, and special projects. Interdisciplinary group study of special topics in American Culture Studies, designed for non-majors as well as majors. May be repeated for credit. Effective: 1997 Winter Quarter.

AMS 101G—Special Topics: New Directions in American Culture Studies (4)
Seminar—3 hours. Intensive reading, writing, and special projects. Interdisciplinary group study of special topics in American Culture Studies, designed for non-majors as well as majors. May be repeated for credit. Effective: 1997 Winter Quarter.

AMS 101H—Special Topics: Problems in Cross-Cultural American Studies (4)
Seminar—3 hours. Intensive reading, writing, and special projects. Interdisciplinary group study of special topics in American Culture Studies, designed for non-majors as well as majors. May be repeated for credit. Effective: 1997 Winter Quarter.

AMS 110—A Decade in American Civilization (4)
Discussion—2 hours; Lecture—2 hours. Close examination of a single decade in American civilization; the connections between the history, literature, arts, customs, and ideas of Americans living in the decade. Issues and representations of race, class, gender, age, and sexuality in the decade. May be repeated for credit if decades studied are different. GE credit: ACGH, AH, DD, SS, WE. Effective: 2016 Spring Quarter.

AMS 125—Corporate Cultures (4)
Discussion—1 hour; Fieldwork—1 hour; Lecture—2 hours. Prerequisite(s): Consent of Instructor. Exploration of the small group cultures of American corporate workplaces, including the role of environment, stories, jokes, rituals, ceremonies, personal style, and play. The effects of cultural diversity upon corporate cultures, both from within and in contact with foreign corporations. Effective: 2016 Spring Quarter.
AMS 130—American Popular Culture (4)
Fieldwork—1 hour; Lecture/Discussion—3 hours. American popular expression and experience as a cultural system, and the relationship between this system and elite and folk cultures. Exploration of theories and methods for discovering and interpreting patterns of meaning in American popular culture. GE credit: ACGH, AH, DD, SS, WE. Effective: 2016 Spring Quarter.

AMS 139—Feminist Cultural Studies (4)
Lecture/Discussion—4 hours. Histories, theories, and practices of feminist traditions within cultural studies. (Same course as WMS 139.) GE credit: ACGH, AH, DD, SS, VL, WE. Effective: 2016 Fall Quarter.

AMS 151—American Landscapes and Places (4)
Discussion—1 hour; Fieldwork—3 hours; Lecture—2 hours. Comparative study of several American cultural populations inhabiting a region, including their relationship to a shared biological, physical, and social environment, their intercultural relations, and their relationships to the dominant American popular and elite culture and folk traditions. GE credit: ACGH, AH, DD, SS, WE. Effective: 2016 Spring Quarter.

AMS 152—The Lives of Children in America (4)
Discussion—2 hours; Lecture—2 hours. Experience of childhood and adolescence in American culture, as understood through historical, literary, artistic, and social scientific approaches. GE credit: ACGH, AH, DD, SS, WE. Effective: 1997 Winter Quarter.

AMS 153—The Individual and Community in America (4)
Discussion—2 hours; Lecture—2 hours. Interdisciplinary examination of past and present tensions between the individual and the community in American experience, as those tensions are expressed in such cultural systems as folklore, public ritual, popular entertainment, literature, fine arts, architecture, and social thought. GE credit: ACGH, AH, DD, SS, WE. Effective: 1997 Winter Quarter.

AMS 154—The Lives of Men in America (4)
Discussion—2 hours; Lecture—2 hours. Interdisciplinary examination of the lives of boys and men in America, toward understanding cultural definitions of masculinity, the ways individuals have accepted or resisted these definitions, and the broader consequences of the struggle over the social construction of gender. GE credit: ACGH, AH, DD, SS, WE. Effective: 1997 Winter Quarter.

AMS 155—Eating in America (4)
Fieldwork; Lecture—3 hours. Interdisciplinary examination of the culture of food in America. Exploration of eating as a richly symbolic event integral to how Americans express and negotiate values, politics and identity. GE credit: ACGH, AH, DD, SS, WE. Effective: 2016 Fall Quarter.

AMS 156—Race, Culture and Society in the United States (4)
Discussion—2 hours; Lecture—2 hours. Interdisciplinary examination of the significance of race in the making of America; how race shapes culture, identities and social processes in the United States; the interweaving of race with gender, class and nationhood in self and community. GE credit: ACGH, AH, DD, SS, WE. Effective: 2016 Spring Quarter.

AMS 157—Animals in American Culture (4)
Discussion—1 hour; Lecture—3 hours. Animals as symbols in American thought, as found in folklore, popular culture, literature, and art; customs and stories around human-animal interactions, including hunting, religion, foodways, pets, zoos, circuses, rodeos, theme parks, and scientific research on animals. GE credit: ACGH, AH, DD, SS, WE. Effective: 2000 Fall Quarter.

AMS 158—Technology and the Modern American Body (4) Review all entries
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): TCS 001; (AMS 001A or AMS 005) The history and analysis of the relationships between human bodies and technologies in modern society. Dominant and eccentric examples of how human bodies and technologies influence one another and reveal underlying cultural assumptions. (Same course as TCS 158.) GE credit: ACGH, AH, WE. Effective: 2003 Fall Quarter.

AMS 158—Technology and the Modern American Body (4) Review all entries
Lecture/Discussion—3 hours; Term Paper. History and analysis of relationships between human bodies and technologies in modern society. Dominant and eccentric examples of how human bodies and technologies influence one another and reveal underlying cultural assumptions. Not open for credit to students who have taken TCS 158. (Same course as CDM 158.) GE credit: ACGH, AH, WE. Effective: 2019 Winter Quarter.

AMS 160—Undergraduate Seminar in American Studies (4)
Seminar—3 hours; Term Paper. Pass One restricted to American Studies majors; limited enrollment. Intensive
reading, discussion, research, and writing by small groups in selected topics of American Studies scholarship; emphasis on theory and its application to American material. May be repeated up to 1 time(s) when content differs. Effective: 2017 Winter Quarter.

**AMS 190A—Senior Thesis Research Seminar (4)**
Extensive Writing; Seminar—2 hours. Research and prospectus writing for senior thesis. Effective: 2016 Spring Quarter.

**AMS 190B—Senior Thesis (4)**
Independent Study—12 hours. Prerequisite(s): AMS 190A; Consent of Instructor. In consultation with advisor, student writes an extended research paper on a topic proposed in course 190A. Effective: 2016 Fall Quarter.

**AMS 192—Internship in American Institutions (1-12)**
Internship—1-12 hours. Prerequisite(s): Consent of Instructor. Enrollment dependent on availability of intern positions, with priority to American Studies majors. Supervised internship and study within and about key organizations in American civilization at archives, museums, schools, historical societies, governmental and social agencies, etc., with attention to the techniques of participant observation and the collection of ethnographical data. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 1997 Winter Quarter.

**AMS 197T—Tutoring in American Studies (1-5)**
Tutorial—1-5 hours. Prerequisite(s): Consent of Chairperson of American Studies Program. Tutoring in lower division American Studies courses, usually in small discussion groups. Periodic meetings with the instructor in charge; reports and readings. May be repeated for credit when the tutoring is for a different course. (P/NP grading only.) Effective: 1997 Winter Quarter.

**AMS 198—Directed Group Study (1-5)**
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

**AMS 199—Special Study for Advanced Undergraduates (1-5)**
Variable. Prerequisite(s): Consent of instructor and chairperson of American Studies Program. (P/NP grading only.) Effective: 1997 Winter Quarter.

**AMS 220—American Folklore and Folklife (4)**
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Theory and methods for the study of the folklore and the folk customary behavior of Americans; contributions of folklore studies to scholarship in humanities and social science disciplines. Effective: 1997 Winter Quarter.

**AMS 250—Cultural Study of Masculinities (4)**
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Interdisciplinary approaches to understanding the social and cultural construction of masculinities; attention to the effects of biology, gender, race, class, sexual and national identities; criticism of oral, printed, visual, and mass mediated texts, and of sicial relations and structure. (Same course as WMS 250.) Effective: 1997 Winter Quarter.

**AMS 255—Food in American Culture (4)**
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Graduate standing or advanced undergraduate with consent of instructor. Interdisciplinary theories and methods for the study of food in American culture; food studies in relation to issues of identity (age, gender, ethnicity, religion, region, etc.), social relations, systems of production, and cultures of consumption. Effective: 2007 Fall Quarter.

**Animal Behavior (Graduate Group)**

Gail L. Patricelli, Ph.D., Chairperson of the Group

**Group Office.** 227D Life Sciences 530-752-2981; Fax 530-752-8822; animalbehavior@biosci.ucdavis.edu; http://anb.ucdavis.edu/
Appropriate preparation is a bachelor's or master's degree in a discipline relevant to the biology of behavior. In addition, at least one course from each of the following areas must be taken before admission into the program or before the end of the first year in the program.

**Ecology, e.g.:**
- EVE 101 Introduction to Ecology 4
- ESP 100 General Ecology 4

**Genetics, e.g.:**
- BIS 101 Genes and Gene Expression 4

**Statistics, e.g.:**
- STA 102 Introduction to Probability Modeling and Statistical Inference (Discontinued) 4
- ANT 119 World Writing Systems (Discontinued) 4

**Evolution, e.g.:**
- EVE 100 Introduction to Evolution 4

**Animal Behavior, e.g.:**
- NPB 102 Animal Behavior 3

**Physiology, e.g.:**
- NPB 101 Systemic Physiology 5

**Core Requirements**

Students take two “breadth” courses, at least one course in statistics, a methodology and grant writing course, and a graduate seminar.

**Required courses:**
- Fundamentals of Animal Behavior
  - ANB 218A Fundamentals of Animal Behavior 5
  - ANB 218B Fundamentals of Animal Behavior 5

Faculty. The Group includes faculty from 12 departments in five schools and college.

Animal Behavior (Graduate Group) | ANB Information

Gail L. Patricelli, Ph.D., Chairperson of the Group

**Group Office.** 227D Life Sciences 530-752-2981; Fax 530-752-8822; animalbehavior@biosci.ucdavis.edu; http://anb.ucdavis.edu/

Faculty. The Group includes faculty from 12 departments in five schools and college.

Animal Behavior (Graduate Group) | ANB M.S.

Gail L. Patricelli, Ph.D., Chairperson of the Group

**Group Office.** 227D Life Sciences 530-752-2981; Fax 530-752-8822; animalbehavior@biosci.ucdavis.edu; http://anb.ucdavis.edu/

Faculty. The Group includes faculty from 12 departments in five schools and college.

Graduate Study. The Ph.D. program in Animal Behavior is an interdepartmental program focusing on the mechanisms underlying and evolution of behavior, and applications of animal behavior to current problems in conservation biology and animal welfare. The program trains students for teaching and research in a variety of areas, including anthropology, animal science, ecology, entomology, neurobiology, psychology, physiology, veterinary science, wildlife biology, and zoology. Resources available to students, in addition to various departmental facilities, include those of the California National Primate Research Center, Bodega Marine Laboratory, and the UC Natural Reserve System.

The Master of Science degree is offered only en route to the Ph.D.

There is an application deadline of Dec 1 for fall quarter.
ANB 201 Scientific Approaches to Animal Behavior Research 3

Advanced Statistics
PSC 204A Statistical Analysis of Psychological Experiments 5
PSC 204B Causal Modeling of Correlational Data 5
PSC 204C Applied Psychometrics and Measurement Theory (Discontinued) 4
PSC 204D Advanced Statistical Inference from Psychological Experiments 5
STA 106 Applied Statistical Methods: Analysis of Variance 4
STA 108 Applied Statistical Methods: Regression Analysis 4
STA 138 Analysis of Categorical Data 4
STA 205 Statistical Methods for Research with SAS 4
AGR 204 (Nonexistent) 4

Graduate Seminars
ANB 290 Seminar in Animal Behavior 1-3

Strongly recommended:
A course on teaching science:
BIS 310 Effective Teaching of College Biology (Discontinued) 2
PSC 390A The Teaching of Psychology 6
PSC 390B The Teaching of Psychology 4

Electives:
Students also take two additional courses (of at least 3 units each) in the student’s area of specialization, chosen in consultation with and approved by the Course Guidance Committee.

Strongly recommended:
At least one additional course in statistics or modeling. In addition to the above listed courses, modeling courses include:
PBG 231 Mathematical Methods in Population Biology 3
PSC 120 Agent-Based Modeling 4

Animal Behavior (Graduate Group) | ANB Ph.D.

Gail L. Patricelli, Ph.D., Chairperson of the Group

Group Office. 227D Life Sciences 530-752-2981; Fax 530-752-8822; animalbehavior@biosci.ucdavis.edu; http://anb.ucdavis.edu/

At least one additional course in statistics or modeling. In addition to the above listed courses, modeling courses include:
- PBG 231 Mathematical Methods in Population Biology 3
- PSC 120 Agent-Based Modeling 4

**Animal Behavior (Graduate Group) | ANB Courses**
Courses in ANB:

ANB 201—Scientific Approaches to Animal Behavior Research (3)
Lecture—3 hours. Prerequisite(s): Consent of Instructor. Philosophical issues, goals, strategies and tools in field and laboratory research. May be repeated for credit. Effective: 1997 Winter Quarter.

ANB 210—History of Animal Behavior (1)
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Classic, seminal papers in animal behavior. Discussion of readings and broader historical context in which papers were written. (S/U grading only.) Effective: 2002 Fall Quarter.

ANB 218A—Fundamentals of Animal Behavior (5)
Discussion—1 hour; Lecture/Discussion—4 hours. Prerequisite(s): Consent of Instructor. Upper-division undergraduate introduction to the biology of behavior, such as PSC 101, PSC 122, PSC 123, NPB 102, NPB 150, NPB 152, WFC 141, ENT 104, or ANS 105. Survey of the phenomena and theory of animal behavior from the perspectives of multiple biological disciplines, including evolution, ecology, psychology, genetics, neurobiology, endocrinology, and animal science. (Same course as PSC 218A.) Effective: 2007 Fall Quarter.

ANB 218B—Fundamentals of Animal Behavior (5)
Discussion—1 hour; Lecture/Discussion—4 hours. Prerequisite(s): ANB 218A or PSC 218A; or ECL 218A; consent of instructor. Survey of the phenomena and theory of animal behavior from the perspectives of multiple biological disciplines, including evolution, ecology, psychology, genetics, neurobiology, endocrinology, and animal science. (Same course as PSC 218B.) Effective: 2007 Fall Quarter.

ANB 221—Animal Behavior, Ecology and Evolution (3)
Lecture—3 hours. Prerequisite(s): NPB 102; EVE 100; EVE 101; and Consent of Instructor. Or the equivalent, graduate standing. Interface between animal behavior, ecology and evolution. New developments in behavioral ecology development and testing of hypotheses in this discipline. (Same course as PBG 221.) Effective: 2002 Winter Quarter.

ANB 230A—Interdisciplinary Approaches to Animal Behavior (3)
Seminar—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. Analysis of literature in behavior and an allied discipline or disciplines that offer the potential, in combination, to advance the understanding of a topic in animal behavior conceptually and empirically. Topics will vary from year to year. Effective: 1997 Winter Quarter.

ANB 230B—Interdisciplinary Approaches to Animal Behavior (5)
Discussion—3 hours; Term Paper—1 hour; Workshop—4 hours. Prerequisite(s): ANB 230A; Taken the previous quarter. Development of an empirical or theoretical interdisciplinary approach to research on a current topic in animal behavior. Effective: 1997 Winter Quarter.

ANB 270—Research Conference in Behavioral Ecology (1)
Conference—1 hour. Prerequisite(s): Consent of Instructor. Graduate standing. Critical presentation and evaluation of current literature and ongoing research in behavioral ecology. Limited enrollment. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 1997 Fall Quarter.

ANB 287—Advanced Animal Behavior (2)
Seminar—2 hours. Prerequisite(s): NPB 102; (EVE 100 or EVE 101); and Consent of Instructor. Or the equivalents; graduate standing. Reading, reports and discussion on current topics in animal behavior, with a focus on topics that lie at the interface between animal behavior, ecology and evolution. May be repeated up to 2 time(s). (Same course as PBG 287.) Effective: 2002 Spring Quarter.

ANB 290—Seminar in Animal Behavior (1-3)
Seminar—1-3 hours. Prerequisite(s): Consent of Instructor. Selected topics in animal behavior. (S/U grading only.) Effective: 1997 Winter Quarter.

ANB 294—Seminar in Behavioral Ecology of Predators and Prey (3)
Seminar—2 hours. Prerequisite(s): Graduate standing. Presentation and analysis of research papers on social and foraging behavior of predatory animals, antipredator strategies of prey species, co-evolution of predators and prey, and ecology of predator prey interactions. May be repeated up to 2 time(s). (Same course as WFC 294.) Effective: 2003 Winter Quarter.

ANB 298—Group Study (1-5)
Discussion—1-5 hours; Laboratory—5-15 hours. Prerequisite(s): Consent of Instructor. Graduate standing. Lectures and/or discussion of current issues, problems, or techniques in animal behavior. Effective: 1997 Winter Quarter.
ANB 299—Research (1-12)
Laboratory—3-36 hours. Advanced research in one of the specialty areas in animal behavior (S/U grading only.)
Effective: 1997 Winter Quarter.

ANB 396—Teaching Assistant Training Practicum (1-4)
Variable. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

Animal Biology

Animal Biology | ABI B.S

(College of Agricultural and Environmental Sciences)

Department, Entomology and Nematology

The Major, https://abi.ucdavis.edu/

Faculty, http://entomology.ucdavis.edu/Faculty/

The Major Program

The Animal Biology major offers students training in the biological and natural sciences as they apply to animals. The major covers the basic biological sciences that explain animal evolution, systematics, ecology, physiology and molecular biology. Students in the Animal Biology major are encouraged to think beyond particular groups of animals in which they are interested and to consider science as a process and a way of advancing society. Emphasis is on biological principles that can be used in research or in solving societal problems associated with animals in agriculture, urban areas, or natural environments.

The Program. The Animal Biology major consists of core courses in the biological sciences that build an understanding of animal biology from the molecular to the ecological and evolutionary levels of organization. After completing these core courses, students have the option of specializing in various interdisciplinary aspects of animal biology, and plan their chosen emphasis of study as part of a required discussion course and in consultation with their advisor. The Animal Biology major emphasizes courses on biological principles as opposed to courses on animal care and husbandry. This program includes a senior thesis, which each student designs to bridge the disciplines of the major.

Internships and Career Alternatives. The program and interests of each student in solving societal problems guides him or her to logical internship and career choices. On- and off-campus internship opportunities are available in research laboratories, in field situations, with governmental agencies, with private industry, and in international programs. A degree in Animal Biology prepares students for careers in research, teaching, governmental regulation, health, or agriculture as each relates to the integrative biology or ecology of animals. Careers in veterinary medicine, animal husbandry and animal management are open to Animal Biology majors, however, other preparation may be required. Students in the major gain research experience and may choose to continue their training at the graduate or professional level in a variety of biological disciplines.

Master Advisor, R. Kimsey

Major Advisor, E. Galvan Hack

Advising Center for the major, including peer advising, is located in 150 and 152 Hutchison Hall 530-754-7277; abi-advising@ucdavis.edu.

Focused specialty upper division courses as outlined in the student's major proposal (from course 187) with approval of an advisor.

**Animal Biology | ABI Courses**

**Courses in ABI:**

**ABI 050A—Animal Biology Laboratory (2)**
Lecture/Lab—4 hours. Scientific methods for answering questions in animal biology by doing exercises to demonstrate hypothesis testing and reporting, short laboratory, population and field experiments. Maintain notebooks, analyze data, interpret results and write reports. Effective: 2018 Winter Quarter.

**ABI 050B—Animal Biology (3)**
Lecture—3 hours. Prerequisite(s): BIS 001A; BIS 001B (can be concurrent) Basic biological disciplines important to an understanding of practical animal biology issues including the evolution of animal groups, genetic mechanisms, animal physiology as it relates to maintenance and production, and aspects of comparative anatomy, behavior and ecology. Effective: 2018 Winter Quarter.

**ABI 050C—Animal Biology (3)**
Lecture—3 hours. Prerequisite(s): BIS 001B; BIS 001C; ABI 050A; ABI 050B Animal management and conservation. Societal concerns arising from management and conservation issues, including economics, aesthetics, regulations, safety, public perspectives and advocacy Effective: 2018 Winter Quarter.

**ABI 092—Internship in Animal Biology (1-12)**
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Office, laboratory or fieldwork off or on campus in research, governmental regulation, policy making, and private enterprise dealing with animal related issues of production, welfare, pest management, biodiversity and the environment. All requirements of Internship Approval Request form must be met. (P/NP grading only.) Effective: 2018 Winter Quarter.

**ABI 098—Directed Group Study (1-5)**
Variable—1-5 hours. (P/NP grading only.) Effective: 2018 Winter Quarter.

**ABI 099—Special Study for Undergraduate (1-5)**
Variable—1-5 hours. (P/NP grading only.) Effective: 2018 Winter Quarter.

**ABI 102—Animal Biochemistry and Metabolism (5)**
Discussion—1 hour; Lecture—4 hours. Prerequisite(s): (CHE 002A, CHE 002B, CHE 008A, CHE 008B) or (CHE 118A, CHE 118B) Water and biological buffers; thermodynamics of metabolism; structure and function of biomolecules; enzyme kinetics and function; membrane biology; digestion and absorption; carbohydrate metabolism. Not open for credit to students who have completed BIS 102. Effective: 2018 Winter Quarter.

**ABI 103—Animal Biochemistry and Metabolism (5)**
Discussion—1 hour; Lecture—4 hours. Prerequisite(s): ABI 102 or BIS 102 Physiological function and metabolism of lipids and amino acids; integrative metabolism; biochemical basis for nutrient requirements; structure and function of vitamins; mineral metabolism and requirements. Not open for credit to students who have completed BIS 103. Effective: 2018 Winter Quarter.

**ABI 187—Animal Biology Seminar (2)**
Discussion—1 hour; Seminar—1 hour. Junior standing. Seminar leading to development of the Major Proposal for the Animal Biology major. Effective: 2018 Fall Quarter.

**ABI 189—Senior Practicum (2)**
Independent Study—6 hours. Prerequisite(s): ABI 050A; ABI 050B; ABI 050C; ABI 187; Junior standing. The practicum may be an experimental research project, a library research project or some other creative activity that will serve as a capstone experience for the Animal Biology major. May be repeated once for credit. May be repeated up to 1 time(s). (P/NP grading only.) Effective: 2018 Winter Quarter.

**ABI 189D—Senior Practicum Discussion (1)**
Discussion—1 hour. Prerequisite(s): ABI 050A; ABI 050B; ABI 050C; ABI 187; ABI 189 (can be concurrent); Junior standing. Course helps prevent or solve problems during the students’ senior practicum activity. (P/NP grading only.) Effective: 2018 Winter Quarter.
ABI 192—Internship in Animal Biology (1-12)
Variable. Prerequisite(s): Consent of Instructor. Completion of 84 units. Office, laboratory or fieldwork off or on campus in research, governmental regulations, policy making, and private enterprise dealing with animal related issues of production, welfare, pest management, biodiversity and the environment. All requirements of Internship Approval Request form must be met. (P/NP grading only.) Effective: 2018 Winter Quarter.

ABI 198—Directed Group Study (1-5)
Variable—1-5 hours. (P/NP grading only.) Effective: 2018 Winter Quarter.

ABI 199—Special Study for Advanced Undergraduate (1-5)
Variable—1-5 hours. (P/NP grading only.) Effective: 2018 Winter Quarter.

Animal Biology (Graduate Group)

Animal Biology (Graduate Group) | ABG M.S.
(College of Agricultural and Environmental Sciences)
James W. Oltjen, Ph.D., Chairperson of the Group

Group Office. 1249 Meyer Hall; 530-752-2382; Fax 530-752-0175; http://animalbiology.ucdavis.edu

Faculty. http://animalbiology.ucdavis.edu/people/

Graduate Study. The Graduate Group in Animal Biology offers programs of study and research leading to the M.S. and the Ph.D. degrees. The Animal Biology Graduate Group focuses on integrated animal biology. Each student individually tailors his/her program of study to meet individual needs. The Animal Biology Graduate Group is unique in encouraging a multidisciplinary or interdisciplinary approach involving physiology, nutrition, genetics, ecology and/or behavior within the context of organismal animal biology.

Preparation. Applicants should have undergraduate preparation in a field appropriate to the course of study selected, including upper division coursework in most of the following subjects: biochemistry, genetics, nutrition, physiology, and integrative animal biology such as animal management.

Graduate Advisors. R.C. Hovey, E.A. Maga, C.B. Tucker, J.D. Murray, E.Kebreab, P.J. Ross, S. Meyers, A. Todgham, R. Bellone

Animal Biology (Graduate Group) | ABG Courses

Courses in ABG:

ABG 200A—Integrated Animal Biology I (3)
Lecture/Discussion—3 hours. Prerequisite(s): BIS 101; or Consent of Instructor. Or equivalent of course; graduate standing. Class size limited to 20 students; Pass One restricted to Animal Biology Graduate Group students. Natural
history, management, historical and current uses, and specialized disciplinary features of model and novel animal systems used in research. Development of conceptual approaches in organismal biology to improve experimental design and interpretation of interdisciplinary research studies. Effective: 2005 Fall Quarter.

**ABG 200B—Integrated Animal Biology II (3)**
Lecture/Discussion—3 hours. Prerequisite(s): ABG 200A Limited enrollment; Pass One restricted to Animal Biology Graduate Group students. Natural history, management, historical and current uses, and specialized disciplinary features of model and novel animal systems used in research. Development of conceptual approaches in organismal biology to improve experimental design and interpretation of interdisciplinary research studies. Effective: 2006 Winter Quarter.

**ABG 202—Grant Procurement and Administration (2)**
Discussion/Laboratory—1 hour; Lecture—1 hour. Prerequisite(s): ABG 200B Class size limited to 12 graduate students; Pass One restricted to Animal Biology Graduate Group students. Topics include: structure of grants, attention to specifications, concise persuasive writing, and grant budgeting. Identify grant opportunities, write a persuasive research grant proposal, and administer grants. Effective: 2009 Fall Quarter.

**ABG 203—Advanced Animal Welfare (3)**
Lecture—3 hours. Advanced animal welfare. Key concepts used when evaluating and understanding the welfare of animals kept by humans. Topics include animal pain, stress, cognition, motivation and emotions. Critical discussion of primary literature. May be repeated up to 1 time(s) It is offered every other year and the topics are adjusted (as well as updated) so it would be a different course. Effective: 2016 Spring Quarter.

**ABG 205—Advanced Nutritional Energetics (3)**
Discussion/Laboratory—1 hour; Lecture—2 hours. Prerequisite(s): (ABI 102, ABI 103, NPB 101); or the equivalent courses. Class size limited to 30 students. History of nutritional energetics. Evaluation of energy transformations associated with food utilization. Energy expenditures at cellular, tissue, and animal levels as affected by diet and physiological state. Current and future feeding systems. Effective: 2017 Spring Quarter.

**ABG 211—Advances in Animal Biotechnology and Genetics (3)**
Lecture/Discussion—3 hours. Prerequisite(s): NPB 121; BIS 101; or Consent of Instructor. Pass One restricted to graduate students. Introduction to advanced techniques used for assisted reproductive technologies in mammals and birds, genetic engineering, gene editing, stem cell biology. Offered in alternate years. Effective: 2017 Spring Quarter.

**ABG 250—Mathematical Modeling in Biological Systems (4)**
Lecture/Discussion—4 hours. Prerequisite(s): MAT 016A; MAT 016B; STA 100; Or equivalents required; graduate standing; MAT 016C or equivalent recommended; more than one course in statistics recommended; ABI 102 or BIS 102 recommended or equivalent course in biochemistry. Limited enrollment. Model development and evaluation including sensitivity analyses using R. Four principle modeling methodologies included: algebraic functions of biological processes, physiological-based compartmental models, linear programming and meta-analysis. Fundamental background and understanding of mathematical modeling principles in biological systems. Effective: 2012 Winter Quarter.

**ABG 255—Physiology of the Stress Response (2)**
Lecture/Discussion—2 hours. Prerequisite(s): Graduate standing. Definition of Stress; Physiological mechanisms of adaptation to stress; Hormonal control of the systemic stress response; Mechanisms of the cellular stress response; Discussion of current trends in stress physiology and current methods for studying the stress response. (Same course as MCP 255.) Effective: 2006 Summer Session 2.

**ABG 290—Seminar in Animal Biology (1)**
Seminar—1 hour. Prerequisite(s): Graduate standing. Seminar on advanced topics in animal biology. Presentations by members of the Animal Biology Graduate Group and guest speakers. May be repeated for credit for credit. (S/U grading only.) Effective: 2005 Spring Quarter.

**ABG 290C—Research Conference (1)**
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Graduate standing. Student presentations of research in Animal Biology and discussions among participating students and Animal Biology faculty. May be repeated for credit for credit. (S/U grading only.) Effective: 2005 Spring Quarter.

**ABG 298—Group Study in Animal Biology (1-5)**
Lecture. Prerequisite(s): Consent of Instructor. Graduate standing. May be repeated up to 2 time(s). Effective: 2006 Fall Quarter.
ABG 299—Research (1-11)
Discussion/Laboratory—3-33 hours. Prerequisite(s): Consent of Instructor. Graduate standing. Research with a
classmate member in Animal Biology Graduate Group. May be repeated for credit for credit. (S/U grading only.)
Effective: 2005 Winter Quarter.

ABG 300—Methods in Teaching Animal Biology (2)
Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Graduate standing. Practical experience in the
methods and problems of teaching animal biology. Includes analysis of laboratory exercises, discussion of teaching
techniques, grading scientific essays, preparing for and conducting discussion or laboratory sections, formulating
quiz and exam questions under instructor supervision. May be repeated up to 3 time(s). (S/U grading only.)
Effective: 2005 Spring Quarter.

ABG 396—Teaching Assistant Training Practicum (1-4)
Variable—3-12 hours. Prerequisite(s): Consent of Instructor. Graduate standing. May be repeated for credit. (S/U
grading only.) Effective: 2005 Spring Quarter.

ABG 401—Ethics and Professionalism in Animal Biology (2)
Discussion—2 hours. Restricted to graduate standing; Pass One restricted to Animal Biology graduate group
students. Case studies and discussion of ethical and professional issues for animal biologists, including the use of
animals in research and teaching, patenting and intellectual property, consulting and conflict of interest, scientific
integrity, dealing with the media, and mentoring relationships. Effective: 2005 Spring Quarter.

Animal Genetics | ANG Courses

Questions pertaining to the following courses should be directed to the instructor or to the Animal Science
Advising Center in 1202 Meyer Hall; 530-754-7915.

Courses in ANG:
ANG 101—Animal Cytogenetics (3)
Discussion/Laboratory—1 hour; Laboratory—6 hours. Prerequisite(s): BIS 101; BIS 102; Or equivalent of BIS 102. Principles and techniques of cytogenetics applied to animal systems; chromosome harvest techniques, analysis of mitosis and meiosis, karyotyping, chromosome banding, cytogenetic mapping, chromosome structure and function, comparative cytogenetics. GE credit: SE. Effective: 2003 Spring Quarter.

ANG 105—Horse Genetics (2)  (Review all entries)
Lecture—2 hours. Prerequisite(s): ANS 015; BIS 101 Coat color, parentage testing, medical genetics, pedigrees, breeds, the gene map and genus Equus. Emphasis on understanding horse genetics based on the unity of mammalian genetics and making breeding decisions based on fundamental genetic concepts. GE credit: SE, SL. Effective: 2017 Winter Quarter.

ANG 105—Horse Genetics (3)  (Review all entries)
Lecture—3 hours. Prerequisite(s): ANS 015; BIS 101 Coat color, parentage testing, medical genetics, pedigrees, breeds, the gene map and genus Equus. Emphasis on understanding horse genetics based on the unity of mammalian genetics and making breeding decisions based on fundamental genetic concepts. GE credit: SE, SL. Effective: 2019 Winter Quarter.

ANG 107—Genetics and Animal Breeding (5)
Laboratory—3 hours; Lecture—4 hours. Prerequisite(s): BIS 101 Principles of quantitative genetics applied to improvement of livestock and poultry. Effects of mating systems and selection methods are emphasized with illustration from current breeding practices. GE credit: SE. Effective: 1997 Winter Quarter.

ANG 111—Molecular Biology Laboratory Techniques (4)
Laboratory—6 hours; Lecture—2 hours. Prerequisite(s): BIS 002C; BIS 101; (BIS 102 or ABI 102); (BIS 103 or ABI 103) Introduction to the concepts and techniques used in molecular biology; the role of this technology in both basic and applied animal research, and participation in laboratories using some of the most common techniques in molecular biology. GE credit: SE, SL, VL, WE. Effective: 2017 Winter Quarter.

ANG 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Selected topics relating to animal genetics. (P/NP grading only.) Effective: 1997 Winter Quarter.

ANG 199—Special Study for Advanced Undergraduates (1-5)
Independent Study. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

ANG 204—Theory of Quantitative Genetics (3)
Lecture—3 hours. Prerequisite(s): ANG 107; Or the equivalent. Theoretical basis of quantitative genetics and the consequences of Mendelian inheritance. Concepts used to estimate quantitative genetic differences and basis for partitioning the phenotypic variance. Effective: 1997 Winter Quarter.

ANG 206—Advanced Domestic Animal Breeding (3)
Lecture—3 hours. Prerequisite(s): ANG 107; ANS 205; ANG 204 recommended. Procedures for the genetic evaluation of individuals to include selection indices and mixed model evaluation for single and multiple traits. Methods of estimating genetic trends. Effective: 1997 Winter Quarter.

ANG 208—Estimation of Genetic Parameters (3)
Lecture—3 hours. Prerequisite(s): ANG 107; ANS 205; ANG 204 and ANG 108 recommended. General methods for the estimation of components of variance and covariance and their application to the estimation of heritability, repeatability and genetic correlations are considered. Specific emphasis is given to procedures applicable to livestock populations under selection. Effective: 1997 Winter Quarter.

ANG 211—Genetic Engineering of Animals (2)
Lecture—1 hour; Lecture/Discussion—1 hour. Review of techniques for the genetic engineering of animals and their limitations and applications. Student-led discussions of recent papers in the field and possible future applications of genetically engineered animals in basic research and applied agricultural and medical research. (S/U grading only.) Effective: 1997 Winter Quarter.

ANG 212—Sequence Analysis in Molecular Genetics (2)
Lecture/Lab—2 hours. Prerequisite(s): BIS 101; Or the equivalent; graduate standing or consent of instructor. Use of computer algorithms and on-line databases to analyze nucleic acid and protein sequences in molecular genetics research. Effective: 2005 Winter Quarter.
ANG 298—Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Lectures and discussions of advanced topics in animal genetics. (S/U grading only.) Effective: 1997 Winter Quarter.

ANG 299—Research in Animal Genetics (1-12)
Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

The Major Program
The Animal Science major is devoted to the sciences central to understanding biological function of domestic and captive animals, their care, management, and utilization by people for food, fiber, companionship and recreation. Advances in science and technology, and an ever-growing human population, have increased the complexity of issues surrounding the care and management of animals. Specializations within the major allow students to develop a scientific appreciation of animals and their relationship to their environment. Graduates in Animal Science are able to advance the science and technology of animal care and management in an objective and effective manner for the betterment of animals and society.

The Program. The curriculum provides depth in the biological and physiological sciences and allows students to specialize within the broad field of applied animal science. Study begins with introductory courses in animal science, biology, chemistry, mathematics, and statistics. Students undertake advanced courses in animal behavior, biochemistry, genetics, nutrition, and physiology and the integration of these sciences to animal function, growth, reproduction, and lactation. Students complete the curriculum by choosing a specialization in either an animal science discipline (behavior, biochemistry, genetics, nutrition, or physiology) or in the sciences particular to a class of animals (aquatic, avian, companion and captive, equine, laboratory, livestock and dairy, or poultry).
**Career Alternatives.** A wide range of career opportunities are available to graduates. The primary goal of the major is to prepare students for graduate study leading to the M.S. and Ph.D. degrees; for continued study in a professional school such as veterinary medicine, human medicine or dentistry; for careers in research, agricultural production, farm and ranch management, or positions in business, sales, financial services, health care, agricultural extension, consulting services, teaching, journalism, or laboratory technology.

**Graduate Study.** The Animal Biology Graduate Group offers a program of study and research leading to the M.S. or Ph.D., degree in Animal Biology. See Animal Biology (Graduate Group); see also Graduate Studies.

Area of Specialization

Choose one area of specialization below; the program of study must be approved in advance by your faculty advisor. Courses must be taken for a letter grade.

**Animal Science with a Disciplinary Focus**

Select 20 upper division units, with approval from your faculty advisor, to form a coherent series of courses in one of the following disciplines: animal behavior, biochemistry, genetics, nutrition, or physiology.

**Aquatic Animals**

Select additional upper division units from any Animal Genetics or Animal Science course, or other courses approved by your faculty advisor. Students in this specialization must take Animal Science 136 to meet their Laboratory Depth Subject Matter requirement. Students in this specialization may elect to substitute any of Biological Sciences 104, Evolution and Ecology 112, or Wildlife, Fish, and Conservation Biology 120 and 121 for the 12-unit requirement under Integrative Animal Biology, with approval of your faculty advisor.

**Avian Sciences**

Select additional upper division units from any Animal Genetics, Animal Science, or Avian Sciences courses or other courses approved by your advisor. Students in this specialization must substitute Avian Sciences 103, 121, and Neurobiology, Physiology, and Behavior 117 for the Animal Science 124 and Neurobiology, Physiology, and Behavior 121 and 121L requirement under Integrative Animal Biology.

**Companion and Captive Animals**

Select additional upper division units from any Animal Genetics, Companion Animal Care and Management, Ethics of Animal Use, Animal Nutrition, Ruminant Nutrition and Digestive Physiology, Comparative Animal Nutrition, or other courses approved by your advisor. Students in this specialization must substitute Companion Animal Biology and Management, Ethics of Animal Use, Animal Nutrition, Ruminant Nutrition and Digestive Physiology, Comparative Animal Nutrition, or other courses approved by your advisor. Students in this specialization must substitute Companion Animal Biology and Management, Ethics of Animal Use, Animal Nutrition, Ruminant Nutrition and Digestive Physiology, Comparative Animal Nutrition, or other courses approved by your advisor.

Units: 20-23
Select additional upper division units from any Animal Genetics, Animal Science or Avian Sciences course, or from Nutrition 115, 122, 123, 123L or other courses approved by your faculty advisor.

### Equine Science

Animal Science | ANS Minor

(College of Agricultural and Environmental Sciences)

James Murray Ph.D., Chairperson of the Department

Department Office. 2223 Meyer Hall; 530-752-1250; http://animalscience.ucdavis.edu/

The Department of Animal Science offers five minor programs open to students majoring in other disciplines who wish to complement their study programs with a minor in Animal Science. Some courses have required prerequisites not included as part of the minor, and students should plan accordingly.

Minor Advisor. E.J. DePeters

Undergraduate Advising. 1202 Meyer Hall; 530-754-7915; http://asac.ucdavis.edu

Advising Center for the major, minors, and course offerings (including peer advising) is located in the Animal Science Advising Center in 1202 Meyer Hall; 530-754-7915. Each student will be assigned a faculty advisor through this office upon entering the major.

**Total: 20-21**

**Animal Science | ANS Courses**

**Courses in ANS:**

**ANS 001—Domestic Animals and People (4)**
Laboratory—3 hours; Lecture—3 hours. Animal domestication and factors affecting their characteristics and distribution. Animal use for food, fiber, work, drugs, research and recreation; present and future roles in society. Laboratory exercises with beef and dairy cattle, poultry, sheep, swine, laboratory animals, fish, horses, meat and dairy products. GE credit: SE, WE. Effective: 1997 Winter Quarter.

**ANS 002—Introductory Animal Science (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ANS 001 and BIS 002A recommended. Open to students in Animal Science, Animal Science and Management, Agricultural and Environmental Education, and Sustainable Agriculture and Food Systems majors. Growth, reproduction, lactation, inheritance, nutrition, and disease control in domesticated animals and species used in aquaculture; the application of sciences to animal production. GE credit: SE, SL, VL, WE. Effective: 2016 Fall Quarter.

**ANS 012—Animal Science: Basic Principles and Application (3)**
Lecture—3 hours. Overview of domestic and global animal industries. Exploration of production systems, animal biology, genetics, anatomy, physiology, reproduction, health, behavior, research, biotechnology and welfare. GE credit: SE. Effective: 2014 Fall Quarter.

**ANS 015—Introductory Horse Husbandry (3)**
Lecture—3 hours. Introduction to care and use of light horses emphasizing the basic principles for selection of...
horses, responsibilities of ownership, recreational use and raising of foals. GE credit: QL, SE, VL. Effective: 2016 Fall Quarter.

ANS 017—Canine Behavior: Learning and Cognition (3)
Lecture—3 hours. Domestic dog behavior from basic principles of learning to complex cognitive behaviors; interaction between learning and cognition including how these processes contribute to interactions with humans; basic genetic correlates of learning and cognition. Effective: 2012 Summer Session 1.

ANS 018—Introductory Aquaculture (4)

ANS 021—Livestock and Dairy Cattle Judging (2)
Laboratory—6 hours. Prerequisite(s): ANS 001 or ANS 002 recommended. Evaluation of type as presently applied to light horses, meat animals and dairy cattle. Relationship between form and function, form and carcass quality, and form and milk production. GE credit: OL, SE. Effective: 1997 Winter Quarter.

ANS 022A—Animal Evaluation (2)
Fieldwork—30 hours; Laboratory—3 hours. Prerequisite(s): ANS 021; Or equivalent. Attendance at 3 one-day weekend field trips required. Domestic livestock species with emphasis on visual appraisal, carcass evaluation, and application of performance information. Emphasis on accurate written and oral descriptions of evaluations. Prerequisite to intercollegiate judging competition. (P/NP grading only.) GE credit: OL, SE. Effective: 1999 Fall Quarter.

ANS 022B—Animal Evaluation (2)
Fieldwork—30 hours; Laboratory—3 hours. Prerequisite(s): ANS 022A; Or equivalent. Attendance at 3 one-day weekend field trips required. Continuation of course 22A with emphasis on specific species: swine, beef cattle and sheep. Application of animal science principles to selection and management problem-solving scenarios. Prerequisite to intercollegiate judging competition. (P/NP grading only,) GE credit: OL, SE. Effective: 2000 Winter Quarter.

ANS 041—Domestic Animal Production (2)

ANS 041L—Domestic Animal Production Laboratory (2)
Discussion—1 hour; Laboratory—3 hours. Prerequisite(s): ANS 041 (can be concurrent) Animal production principles and practices, including five field trips to dairy cattle, beef cattle, sheep, and swine operations and campus labs. (P/NP grading only.) GE credit: QL, SE, SL, VL, WE. Effective: 2016 Fall Quarter.

ANS 042—Introductory Companion Animal Biology (4)

ANS 049A—Animal Management Practices: Aquaculture (2)
Discussion—1 hour; Laboratory—3 hours. Application of the principles of elementary biology to the management of a specific animal species. Up to four different topics may be taken. (P/NP grading only,) Effective: 1998 Fall Quarter.

ANS 049B—Animal Management Practices: Beef (2)
Discussion—1 hour; Laboratory—3 hours. Application of the principles of elementary biology to the management of a specific animal species. Up to four different topics may be taken. (P/NP grading only,) Effective: 1998 Fall Quarter.

ANS 049C—Animal Management Practices: Dairy (2)
Discussion—1 hour; Laboratory—3 hours. Application of the principles of elementary biology to the management of a specific animal species. Up to four different topics may be taken. (P/NP grading only,) Effective: 1998 Fall Quarter.

ANS 049D—Animal Management Practices: Goats (2)
Discussion—1 hour; Laboratory—3 hours. Application of the principles of elementary biology to the management of a specific animal species. Up to four different topics may be taken. (P/NP grading only,) Effective: 1998 Fall Quarter.
ANS 049E—Animal Management Practices: Horses (2)
Discussion—1 hour; Laboratory—3 hours. Application of the principles of elementary biology to the management of a specific animal species. Up to four different topics may be taken. (P/NP grading only.) Effective: 1998 Fall Quarter.

ANS 049F—Animal Management Practices: Laboratory Animals (2)
Discussion—1 hour; Laboratory—3 hours. Application of the principles of elementary biology to the management of a specific animal species. Up to four different topics may be taken. (P/NP grading only.) Effective: 1998 Fall Quarter.

ANS 049G—Animal Management Practices: Meats (2)
Discussion—1 hour; Laboratory—3 hours. Application of the principles of elementary biology to the management of a specific animal species. Up to four different topics may be taken. (P/NP grading only.) Effective: 1998 Fall Quarter.

ANS 049H—Animal Management Practices: Poultry (2)
Discussion—1 hour; Laboratory—3 hours. Application of the principles of elementary biology to the management of a specific animal species. Up to four different topics may be taken. (P/NP grading only.) Effective: 1998 Fall Quarter.

ANS 049I—Animal Management Practices: Sheep (2)
Discussion—1 hour; Laboratory—3 hours. Application of the principles of elementary biology to the management of a specific animal species. Up to four different topics may be taken. (P/NP grading only.) Effective: 1998 Fall Quarter.

ANS 049J—Animal Management Practices: Swine (2)
Discussion—1 hour; Laboratory—3 hours. Application of the principles of elementary biology to the management of a specific animal species. Up to four different topics may be taken. (P/NP grading only.) Effective: 1998 Fall Quarter.

ANS 049K—Animal Management Practices: Captive and Companion Avian (2)
Discussion—1 hour; Laboratory—3 hours. Application of the principles of elementary biology to the management of a specific animal species. Up to four different topics may be taken. (P/NP grading only.) Effective: 2013 Winter Quarter.

ANS 090C—Research Group Conference (1)
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Restricted to lower division standing. Weekly conference on research problems, progress and techniques in the animal sciences. May be repeated for credit. (P/NP grading only.) Effective: 2016 Fall Quarter.

ANS 092—Internship in Animal Science (1-12)
Internship—3-18 hours. Prerequisite(s): Consent of Instructor. Restricted to lower division standing. Internship off and on campus in dairy, livestock, and aquaculture production, research and management; or in a business, industry, or agency associated with these or other animal enterprises. All requirements of Internship Approval form must be met. (P/NP grading only.) Effective: 2016 Fall Quarter.

ANS 098—Directed Group Study (1-5)
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. Restricted to lower division standing. (P/NP grading only.) Effective: 2016 Fall Quarter.

ANS 099—Special Study for Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. Restricted to lower division standing. (P/NP grading only.) Effective: 2016 Fall Quarter.

ANS 100—Animal Physiology (5)
Discussion—1 hour; Lecture—4 hours. Prerequisite(s): BIS 002A; CHE 002B Pass One restricted to students in the Animal Science and Animal Science and Management majors. Basic principles of animal physiology in domesticated and captive animals with a comparative approach. Molecular, biochemical, chemical and physical aspects and their influences on function of physiological systems in animals. Not open for credit to students who have taken NPB 101. GE credit: SE. Effective: 2016 Spring Quarter.

ANS 103—Animal Welfare (4)
Discussion—2 hours; Lecture—2 hours. Prerequisite(s): ANS 104 or NPB 102 or WFC 141; or Consent of Instructor. Restricted to upper division standing. Application of principles of animal behavior and physiology to assessment and improvement of the welfare of wild, captive, and domestic animals. Topics include animal pain, stress, cognition, motivation, emotions, and preferences, as well as environmental enrichment methods. GE credit: SE, SL. Effective: 2016 Fall Quarter.

ANS 104—Principles and Applications of Domestic Animal Behavior (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ANS 002 or BIS 002B Basic principles of animal behavior as
applied to domesticated species. Emphasis placed on application of the principles of animal behavior. GE credit: SE. Effective: 2014 Fall Quarter.

ANS 106—Domestic Animal Behavior Laboratory (2)
Laboratory—6 hours. Prerequisite(s): ANS 104 or NPB 102; or Consent of Instructor. Research experience with the behavior of large domestic animals. Experimental design, methods of data collection and analysis, and reporting of experimental results. GE credit: QL, SE, SL, VL, WE. Effective: 2016 Fall Quarter.

ANS 107—Zoo Biology and Research (3)
Lecture/Discussion—5 hours. Prerequisite(s): BIS 002B Introduction to the modern zoo, including history, staffing structure, aspects of animal care such as housing, social management, and enrichment, research in genetics, health, nutrition, behavior, cognition, and guest perceptions. Requires a visit to the Sacramento Zoo and development of a project research proposal based on a specific exhibit at the zoo. GE credit: SE. Effective: 2018 Summer Session 2.

ANS 112—Sustainable Animal Agriculture (3)
Lecture/Discussion—3 hours. Prerequisite(s): BIS 002B or ANS 001; STA 100 or PLS 120 recommended. Current applications of sustainable animal agriculture including the challenges of animal production, animal needs, animal well-being, and protection of the environment and resources for future food supply systems. Various scenarios for meeting sustainability objectives are evaluated using computing modeling. GE credit: OL, QL, SE, SS. Effective: 2016 Fall Quarter.

ANS 115—Advanced Horse Production (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ANS 015; BIS 101; NUT 115; (ANS 100 or NPB 101); or Consent of Instructor. Feeding, breeding, and management of horses; application of the basic principles of animal science to problems of production of all types of horses. Designed for students who wish to become professionally involved in the horse industry. GE credit: QL, SE, SL, WE. Effective: 2016 Fall Quarter.

ANS 118—Fish Production (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): WFC 120 Current practices in fish production; relationship between the biological aspects of a species and the production systems, husbandry, management, and marketing practices utilized. Emphasis on species currently reared in California. GE credit: SE. Effective: 2016 Fall Quarter.

ANS 119—Invertebrate Aquaculture (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): BIS 002B Management, breeding and feeding of aquatic invertebrates; application of basic principles of physiology, reproduction, and nutrition to production of mollusks and crustaceans for human food; emphasis on interaction of species biology and managerial techniques on production efficiencies. GE credit: SE. Effective: 2016 Fall Quarter.

ANS 120—Principles of Meat Science (3)
Lecture—3 hours. Prerequisite(s): ANS 002 Restricted to upper division standing. Anatomical, physiological, developmental, and biochemical aspects of muscle underlying the conversion of muscle to meat. Includes meat processing, preservation, microbiology, and public health issues associated with meat products. GE credit: SE. Effective: 2016 Fall Quarter.

ANS 120L—Meat Science Laboratory (2)
Discussion—1 hour; Laboratory—3 hours. Prerequisite(s): ANS 002; ANS 120 (can be concurrent) Restricted to upper division standing. Laboratory exercises and student participation in transformation of live animal to carcass and meat, structural and biochemical changes related to meat quality, chemical and sensory evaluation of meat, and field trips to packing plant and processing plant. GE credit: SE. Effective: 2016 Fall Quarter.

ANS 123—Animal Growth and Development (4)
Lecture—3 hours; Lecture/Discussion—1 hour. Prerequisite(s): (ABI 103 or BIS 103); (ANS 100 or NPB 101) Growth and development of animals from conception to maturity, viewed from practical and biological perspectives; includes genetic, metabolic, nutritional control of cell and organism function. GE credit: OL, QL, SE, VL, WE. Effective: 2016 Fall Quarter.

ANS 124—Lactation (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): (NPB 101 or ANS 100); (ABI 103 (can be concurrent) or BIS 103 (can be concurrent)) Consideration of the biochemical, genetic, physiological, nutritional, and structural factors relating to mammary gland development, the initiation of lactation, the composition of milk and lactational performance. GE credit: SE, SL. Effective: 2016 Fall Quarter.
ANS 125—Equine Exercise Physiology (3)
Lecture—3 hours. Prerequisite(s): (NPB 101 or ANS 100); ANS 015 Basic and applied physiology of the exercising horse. Includes physiological systems, gait analysis, lameness, pharmacology, sports medicine; sport horse performance evaluation and conditioning. GE credit: SE. Effective: 2016 Fall Quarter.

ANS 126—Equine Nutrition (3)
Lecture—3 hours. Prerequisite(s): ANS 015; NUT 115 Equine digestion, digestive physiology, diet development and evaluation, and the relationship of the topics to recommended feeding practices and nutritional portfolios. GE credit: SE. Effective: 2014 Fall Quarter.

ANS 127—Advanced Equine Reproduction (3)
Lecture—3 hours. Prerequisite(s): ANS 115; (ANS 100 or NPB 101) Reproductive physiology, anatomy and endocrinology of the mare and stallion. Emphasis on structure/function relationships as they are applied to improving equine reproductive management and efficiency. GE credit: SE, WE. Effective: 2016 Fall Quarter.

ANS 128—Agricultural Applications of Linear Programming (4)
Discussion—1 hour; Laboratory—2 hours; Lecture—2 hours. Prerequisite(s): PLS 021 or ECS 015; or Consent of Instructor. Restricted to upper division standing. Applications of linear programming in agriculture, emphasizing resource allocation problems and decision making. Problems include crop production, ration formulation, and farm management. Hands-on experience in developing linear programs and interpreting the results. GE credit: QL, SE, SL. Effective: 2016 Fall Quarter.

ANS 129—Environmental Stewardship in Animal Production Systems (3)
Lecture—3 hours. Prerequisite(s): (BIS 010 or (BIS 002A, BIS 002B)), CHE 002A, CHE 002B, (CHE 008A, CHE 008B) or (CHE 118A, CHE 118B); and Consent of Instructor. Management principles of environmental stewardship for grazing lands, animal feeding, operations and aquaculture operations; existing regulations, sample analyses, interpretation and utilization of data, evaluation of alternative practices, and policy development. GE credit: SE, SL. Effective: 2017 Winter Quarter.

ANS 131—Reproduction and Early Development in Aquatic Animals (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): MCB 150; WFC 120; or Consent of Instructor. Physiological and developmental functions related to reproduction, breeding efficiency and fertility of animals commonly used in aquaculture. GE credit: SE, WE. Effective: 2017 Winter Quarter.

ANS 135—Production Animal Laboratory (3)
Fieldwork; Laboratory—3 hours; Lecture/Discussion—1 hour. Prerequisite(s): ABI 102; ABI 103; (NPB 101 or ANS 100) Pass One restricted to Animal Science and Animal Science and Management students. Biochemical methods for developing and conducting research with production animals, and interpreting and presenting data. Laboratory focus course which uses sheep as model. There may be one or two mandatory all day Saturday field trips. GE credit: SE. Effective: 2017 Winter Quarter.

ANS 136—Techniques and Practices of Fish Culture (3)
Laboratory—6 hours; Lecture—1 hour. Prerequisite(s): ANS 002; BIS 002A; BIS 002B; BIS 002C; (CHE 008A, CHE 008B) or (CHE 118A, CHE 118B)) Restricted to upper division standing. Daily care and maintenance of fish in residential aquariums, research and commercial facilities. Biological and environmental factors important to sound management of fish. Laboratories focus on fish culture including growth trials and biochemical assays. Not open for credit to students who have previously completed ANS 136A or ANS 137. GE credit: QL, SE, SL, VL, WE. Effective: 2017 Winter Quarter.

ANS 137—Techniques and Practices of Avian Culture (3)
Laboratory—6 hours; Lecture—1 hour. Prerequisite(s): ANS 002; BIS 002A; BIS 002B; BIS 002C; (CHE 008A, CHE 008B) or (CHE 118A, CHE 118B)) Restricted to upper division standing. Daily care and maintenance of birds for research, commercial production and companion or hobby uses. Biological and environmental factors important to sound management of birds. Laboratories focus on bird husbandry, management and care and include growth trials and biochemical assays. Not open for credit to students who have previously completed ANS 136B or ANS 137. GE credit: QL, SE, SL, VL, WE. Effective: 2017 Winter Quarter.

ANS 139—Experimental Animal Physiology (3)
Fieldwork—3 hours; Laboratory—3 hours; Lecture—1 hour. Prerequisite(s): ABI 102; BIS 101; or Consent of Instructor. Restricted to seniors in the Animal Science and Animal Science and Management majors. Combination of theory and hands-on experiences in animal physiology using various experimental techniques. Practical laboratory skill
development from cellular level to whole animal, in areas such as genetics, endocrinology, histology and physiological function. GE credit: SE, WE. Effective: 2016 Spring Quarter.

**ANS 140—Management of Laboratory Animals (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): NPB 101 or ANS 100 Laboratory animal management procedures in view of animal physiology, health and welfare, government regulations, and experimental needs. Clinical techniques using rodents and rabbits as models. GE credit: SE. Effective: 2017 Winter Quarter.

**ANS 141—Equine Enterprise Management (4)**
Lecture/Discussion—4 hours. Prerequisite(s): ANS 115; ECN 001A and ECN 001B recommended. Examination of the concepts and principles involved in the operation of an equine enterprise. Essential aspects of equine enterprise management, including equine law, marketing, cash flow analysis, and impact of state and federal regulations. GE credit: SS. Effective: 1997 Winter Quarter.

**ANS 142—Companion Animal Care and Management (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ANS 042; BIS 101; (NPB 101 or ANS 100); ABI 102 or BIS 102 and ABI 103 or BIS 103 recommended. Management and production of companion animals. Integration of the disciplinary principles of behavior, genetics, nutrition, and physiology as related to the care of companion animals. GE credit: OL, QL, SE, SL, VL, WE. Effective: 2017 Winter Quarter.

**ANS 143—Pig and Poultry Care and Management (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): NUT 115; (NPB 101 or ANS 100); ANS 041; or Consent of Instructor. Care and management of swine, broilers and turkeys as related to environmental physiology, nutrition and metabolism, disease management and reproduction. Saturday field trips. GE credit: SE, SL. Effective: 2017 Winter Quarter.

**ANS 144—Beef Cattle and Sheep Production (4)**
Fieldwork—2 hours; Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ANS 041; NUT 115; or Consent of Instructor. ANG 107 recommended. Genetics, physiology, nutrition, economics and business in beef cattle and sheep production. Resources used, species differences, range and feedlot operations. Emphasis on integration and information needed in methods for management of livestock enterprises. One or two Saturday field trips. GE credit: OL, QL, SE, SL, VL, WE. Effective: 2017 Winter Quarter.

**ANS 145—Meat Processing and Marketing (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ANS 002; Consent of Instructor. Distribution, processing and marketing of meat and meat products. Meat and meat animal grading and pricing. Government regulations and social/consumer concerns. Future trends and impact on production management practices. Includes poultry. GE credit: SE. Effective: 2017 Winter Quarter.

**ANS 146—Dairy Cattle Production (5)**
Discussion—1 hour; Fieldwork—1 hour; Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): NUT 115; or Consent of Instructor. ANG 107 recommended. Scientific principles from genetics, nutrition, physiology, and related fields applied to conversion of animal feed to human food through dairy animals. Management and economic decisions are related to animal biology considering the environment and animal well-being. Mandatory Saturday field-trip. GE credit: OL, QL, SE, SL, VL, WE. Effective: 2017 Winter Quarter.

**ANS 147—Dairy Processing and Marketing (3)**
Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): ANS 002; or Consent of Instructor. Restricted to upper division standing. Examination of distribution systems, processing practices, product quality, impact of government policy (domestic and foreign), marketing alternatives, and product development. GE credit: SE. Effective: 2017 Winter Quarter.

**ANS 148—Enterprise Analysis in Animal Industries (4)**
Lecture/Discussion—4 hours. Prerequisite(s): Consent of Instructor. Restricted to students with upper division standing. Examination and application of decision making and problem solving in the production enterprise. The areas of production analysis, problem solving, risk analysis and cost-benefit analysis will be examined in terms of the total enterprise. GE credit: OL, QL, SS, WE. Effective: 2016 Fall Quarter.

**ANS 149—Farrier Science (3)**
Lecture—3 hours. Prerequisite(s): ANS 115 In-depth examination of the structure-function relationship of the equine hoof and how it relates to conformation, injury and performance. GE credit: SE. Effective: 2015 Winter Quarter.

**ANS 149L—Farrier Science Laboratory (1)**
Laboratory—3 hours. Prerequisite(s): ANS 149 (can be concurrent); or Consent of Instructor. Art and science of
horseshoeing in equine related fields. Proper use of the tools, materials and techniques in the fabrication of shoes and safe preparation of the hoof for application of shoes. (P/NP grading only.) Effective: 1999 Spring Quarter.

**ANS 170—Ethics of Animal Use (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Any basic course in composition or speech, or completion of college English requirement. Ethical issues relating to animal use in contemporary society. Integration of philosophical theories with scientific evidence relating to animal behavior, mentality, and welfare. Uses of animals in agriculture, research, and as companions. Ethical responsibilities regarding wildlife and the environment. GE credit: SL, SS, WE. Effective: 2016 Fall Quarter.

**ANS 190C—Research Group Conference (1)**
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Advanced standing. Weekly conference on research problems, progress and techniques in the animal sciences. May be repeated for credit. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

**ANS 192—Internship in Animal Science (1-12)**
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Completion of 84 units. Internship off and on campus in dairy, livestock and aquaculture production, research and management; or in a business, industry, or agency associated with these or other animal enterprises. All requirements of Internship Approval Form must be met. (P/NP grading only.) Effective: 1997 Winter Quarter.

**ANS 194—Research in Animal Science (3)**
Discussion—1 hour; Laboratory—6 hours. Prerequisite(s): ANS 106 or ANS 135 or ANS 136 or ANS 137 or ANS 139 or ANG 111; or ANS 133; and Consent of Instructor. Research with a faculty mentor. Weekly discussion and laboratory on specific research topic. May include a seminar to research group. Choose from sections: (1) Animal Behavior; (2) Animal Genetics; (3) Animal Nutrition; (4) Animal Physiology. May be repeated up to 4 time(s). Effective: 2016 Fall Quarter.

**ANS 194HA—Undergraduate Honors Thesis in Animal Science (4)**
Laboratory—9 hours; Lecture—1 hour. Prerequisite(s): (NPB 101 or ANS 100); (ABI 103 or BIS 103); and Consent of Instructor. Minimum cumulative GPA of 3.200 and selection by the Honors Selection Committee. Students will carry out a research project (chosen from faculty-suggested or approved proposals) during the academic year under the guidance of a faculty member. Upon completion, student will write a thesis and present a public seminar describing his/her research. GE credit: OL, SE. Effective: 2016 Fall Quarter.

**ANS 194HB—Undergraduate Honors Thesis in Animal Science (4)**
Laboratory—9 hours; Lecture—1 hour. Prerequisite(s): (NPB 101 or ANS 100); (ABI 103 or BIS 103); and Consent of Instructor. Minimum cumulative GPA of 3.200 and selection by the Honors Selection Committee. Students will carry out a research project (chosen from faculty-suggested or approved proposals) during the academic year under the guidance of a faculty member. Upon completion, student will write a thesis and present a public seminar describing his/her research. GE credit: SE, VL. Effective: 2016 Fall Quarter.

**ANS 194HC—Undergraduate Honors Thesis in Animal Science (4)**
Laboratory—9 hours; Lecture—1 hour. Prerequisite(s): (NPB 101 or ANS 100); (ABI 103 or BIS 103); and Consent of Instructor. Minimum cumulative GPA of 3.200 and selection by the Honors Selection Committee. Students will carry out a research project (chosen from faculty-suggested or approved proposals) during the academic year under the guidance of a faculty member. Upon completion, student will write a thesis and present a public seminar describing his/her research. GE credit: SE, WE. Effective: 2016 Fall Quarter.

**ANS 197T—Tutoring in Animal Science (1-2)**
Tutorial—1-2 hours. Prerequisite(s): Consent of Instructor. Animal Science or related major; upper division standing. Tutoring of students in lower division animal science courses; weekly conference with instructors in charge of courses; written critiques of teaching procedures. May be repeated up to 1 time(s). (P/NP grading only.) Effective: 2016 Fall Quarter.

**ANS 198—Directed Group Study (1-5)**
Variable. Prerequisite(s): Consent of Instructor. Selected topics relating to the animal sciences. (P/NP grading only.) Effective: 1997 Winter Quarter.

**ANS 199—Special Study for Advanced Undergraduates (1-5)**
Variable. Prerequisite(s): Consent of Instructor. Restricted to students with upper division standing. (P/NP grading only.) Effective: 2016 Fall Quarter.
ANS 200—Strategies in Animal Production (4)
Lecture/Discussion—4 hours. Prerequisite(s): Consent of Instructor. Examines the forces and issues in animal agriculture through the strategic management process. Effective: 1997 Winter Quarter.

ANS 206—Models in Agriculture and Nutrition (3)
Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): MAT 016B; STA 108 Basic model building principles and techniques for statistical and systems simulation models. Optimization techniques for non-linear experimental designs and management models are presented. Quantitative analysis and evaluation of linear and non-linear equations used in agriculture and nutrition. Effective: 1997 Winter Quarter.

ANS 259—Literature in Animal Science (1)
Seminar—1 hour. Prerequisite(s): Graduate standing. Critical presentation and analysis of recent journal articles in animal science. May be repeated up to 9 time(s). (S/U grading only.) Effective: 2004 Fall Quarter.

ANS 290—Seminar (1)
Seminar—1 hour. Reports and discussions of topics of interest in genetics, nutrition, and physiology as they apply to animal science. (S/U grading only.) Effective: 1997 Winter Quarter.

ANS 290C—Research Group Conference (1)
Discussion—1 hour. Prerequisite(s): Graduate standing. Weekly conference on research problems, progress and techniques in the animal sciences. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

ANS 291—Current Research in Animal Science (1)
Seminar—1 hour. Prerequisite(s): Graduate standing. Current research in animal science explored at weekly seminars presented by guest lecturers. Discussion of research presented. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

ANS 297—Supervised Teaching in Animal Science (2)
Variable—6 hours. Practical experience in teaching Animal Science at University level; curriculum design and evaluation; preparation and presentation of material. Assistance in laboratories, discussion sections, and evaluation of student work. Evaluation letter sent to the graduate advisor with copy to the student. (S/U grading only.) Effective: 1997 Winter Quarter.

Animal Science & Management

Animal Science & Management | Animal Science & Management B.S.

(College of Agricultural and Environmental Sciences)

http://asac.ucdavis.edu

Master Advisor. J.G. Fadel

Advising Center for the major (including peer advising) is located in 1202 Meyer Hall; 530-754-7915. Each student will be assigned a faculty advisor through this office upon entering the major.

The Major Program

The Animal Science and Management major combines a thorough education in the basic biology of domestic animal species with a strong background in agricultural economics. Graduates of this interdisciplinary major will be well positioned to adjust to our rapidly changing world and job market.

The Program. The interdisciplinary program in Animal Science and Management combines a fundamental background in the natural sciences (chemistry, biology, physiology, nutrition, genetics, mathematics, and behavior), with an understanding of economics and humanities. After completing preparatory courses, students focus on both the animal species that interest them (horses, cattle, sheep, companion animals, goats, fish, crustaceans or
mollusks, among others) and principles of managerial economics (marketing, finance, business organization or systems analysis). Students preparing for medical or veterinary school can meet professional entrance requirements with those of this major if they plan ahead.

**Career Alternatives.** Job opportunities for successful graduates are plentiful and include positions with banking and financial institutions, agribusiness, Peace Corps, and farms of all scales. Most Animal Science and Management graduates are well prepared for professional study (medical, law, veterinary, and graduate business schools) as well as graduate research programs leading to the M.S. or Ph.D. degrees. Advanced degrees open doors to work as extension specialists, farm advisors, and teachers, and prepare students for international service.

Other courses in quantitative skills with prior approval of the Master Advisor. 4

Depth Subject Matter Units: 27-30

BIS 101 Genes and Gene Expression 4
NUT 115 Animal Nutrition 4
NPB 101 Systemic Physiology 5
OR
ANS 100 Animal Physiology 5

Business Management:
ARE 100A Intermediate Microeconomics: Theory of Production and Consumption 4

Choose one:
ARE 113 Fundamentals of Marketing Management 4
ARE 130 Agricultural Markets 4
ARE 136 Managerial Marketing 4
ARE 138 International Commodity & Resource Markets 4

Choose one:
ARE 120 Agricultural Policy 4
ARE 132 Cooperative Business Enterprises 4
ARE 140 Farm Management 4
ARE 145 Farm and Rural Resources Appraisal 4
ARE 157 Analysis for Operations and Production Management 4

Choose one:
ANS 128 Agricultural Applications of Linear Programming 4
ARE 155 Operations Research and Management Science 4

Area of Specializations Units: 14-16

Choose one area of specialization below:

Aquatic Animals 16
ANS 018 Introductory Aquaculture 4
ANS 118 Fish Production 4
OR
ANS 119 Invertebrate Aquaculture 4
ANS 131 Reproduction and Early Development in Aquatic Animals 4
ANS 148 Enterprise Analysis in Animal Industries 4

Companion Animals 16
ANS 042 Introductory Companion Animal Biology 4
ANS 140 Management of Laboratory Animals 4
ANS 142 Companion Animal Care and Management 4
ANS 148 Enterprise Analysis in Animal Industries 4

Dairy 15
ANS 041 Domestic Animal Production 2
ANS 041L Domestic Animal Production Laboratory 2
ANS 146 Dairy Cattle Production 5
Equine

ANS 147 Dairy Processing and Marketing 3
ANS 148 Enterprise Analysis in Animal Industries 4

Livestock

ANS 041 Domestic Animal Production 2
ANS 041L Domestic Animal Production Laboratory 2
ANS 143 Pig and Poultry Care and Management 4
OR
ANS 144 Beef Cattle and Sheep Production 4
ANS 145 Meat Processing and Marketing 4
ANS 148 Enterprise Analysis in Animal Industries 4

Poultry

AVS 011 Introduction to Poultry Science 3
ANS 143 Pig and Poultry Care and Management 4
ANS 145 Meat Processing and Marketing 4
ANS 148 Enterprise Analysis in Animal Industries 4

Individualized

Students may, with prior approval of their advisor and the Master Advisor, design their own individualized specialization within the major. The specialization will consist of 4 to 6 courses with one of the courses being ANS148. The other courses will include an introduction, care and management, and processing and/or marketing aspects of the animal of interest.

Restricted Electives Units: 8-10

Choose at least two additional courses with approval of advisor; minimum eight units; duplicate from Depth Subject Matter courses not counted:

ARE 018 Business Law 4
ARE 112 Fundamentals of Organization Management 4
ARE 113 Fundamentals of Marketing Management 4
ARE 118 Tax Accounting 4
ARE 120 Agricultural Policy 4
ARE 130 Agricultural Markets 4
ARE 132 Cooperative Business Enterprises 4
ARE 136 Managerial Marketing 4
ARE 138 International Commodity & Resource Markets 4
ARE 140 Farm Management 4
ARE 142 Personal Finance 3
ARE 143 Investments 4
ARE 144 Real Estate Economics 4
ARE 145 Farm and Rural Resources Appraisal 4
ARE 150 Agricultural Labor 4
ARE 155 Operations Research and Management Science 4
ARE 157 Analysis for Operations and Production Management 4
ARE 171A Financial Management of the Firm (Discontinued) 4
ARE 171B Financial Management of the Firm (Discontinued) 4
ARE 176 Environmental Economics 4
ANS 103 Animal Welfare 4
ANS 104 Principles and Applications of Domestic Animal Behavior 4
ANS 106 Domestic Animal Behavior Laboratory 2
ANS 115 Advanced Horse Production 4
ANS 118 Fish Production 4
ANS 119 Invertebrate Aquaculture 4

**Anthropology**
Anthropology | ANT A.B.

(College of Letters and Science)
Lynne A. Isbell, Ph.D., Chairperson of the Department

Department Office. 328 Young Hall; 530-752-0745; http://anthropology.ucdavis.edu

The A.B. Major

Anthropology is the systematic study of humans. The student of anthropology learns about human biology, ecology, and social life—past and present—and gains a broad understanding of humans and societies. It is a diverse field, and the courses, faculty, and degree programs at UC Davis are subdivided into two wings—Evolutionary and Sociocultural.

Evolutionary A.B. Evolutionary anthropologists are united by their common application of science and evolutionary theory to understand the behavior, ecology, history, and evolution of humans and non-human primates, as individuals and as societies. These topics may be approached through archaeology, human behavioral ecology, paleoanthropology, primatology, genetics, biogeography, and conservation biology. Archaeology is the study of history or prehistory by analysis of a people's artifacts, or their material culture, with the goal of reconstructing culture history and human behavior. Human behavioral ecology is the study of how variation in ecology and social organization can help us understand variation in human behavior. Paleoanthropology is the study of human evolution through the fossil and archaeological records, drawing on relevant studies in biological anthropology, Paleolithic archaeology, genetics, and geology. Primatology is the study of behavior, ecology, and morphology of primates to address questions about the evolution and function of behavioral and morphological patterns in nonhuman primates and to test models of the origins of human morphology and behavior. Genetic anthropology uses DNA to address anthropological questions about population histories, migrations, mixing, and adaptations to local contexts. Biogeography investigates the biology behind the geographic distribution of species and human cultures. Conservation biology explores the causes of loss of biological diversity—in this department, it focuses on threatened non-human primates and the conservation of natural resources by a rapidly growing population. A Bachelor of Arts degree provides broad training that includes all subfields of Anthropology.

Sociocultural. Sociocultural anthropologists study the varied ways in which people around the world organize their lives and interpret the circumstances in which they operate. Their main method is extended field research, which combines attention to global issues with the close study of human relations and culture. Among the themes addressed in the department's undergraduate courses are globalization and transnationalism; human ecology and environmental change; cultures of healing, health and medicine, the anthropology of law and global legal processes, the study of resistance, rebellion, and social control, the global spread of media and technology; migration, multiculturalism and urban life; colonialism and neocolonialism development and post-development; race, class and gender; politics and the political; cultures of everyday life; language use and discourse; and self, identity and family. The track in sociocultural anthropology thus offers a rich set of resources for understanding and engaging pressing issues in a globalizing world characterized by new forms of international culture and community as well as by increasing material inequality and political volatility.

The Program. The Bachelor of Arts program is divided into two tracks, Sociocultural and Evolutionary, which parallel the two wings described above. Students interested in the study of recent and contemporary human languages and societies should follow the Sociocultural Track. To obtain a A.B. degree in sociocultural anthropology, each student is required to complete courses that provide (1) foundational skills, (2) language and cultural skills, (3) comprehensive skills, and (4) specialized skills. Students interested in the study of archaeology; primate studies; or human biology, ecology or origins should follow the Evolutionary Track. The A.B. degree offered by the Evolutionary Track provides general training in anthropology from an evolutionary perspective. The
Evolutionary Track also offers a B.S. degree that requires lower division coursework in math and science and upper division coursework in biological anthropology and closely related disciplines. Students planning on pursuing jobs in medical fields after graduation may be especially interested in the B.S. degree.

Students in both tracks are encouraged to gain practical experience through courses taken while studying abroad (under the administration of the UC Davis Study Abroad) and through undergraduate research or internships performed for credit (under ANT 192, 198, or 199 units provided by the advising office). Students showing exceptional ability are welcome to seek permission from instructors to participate in graduate seminars offered by the department.

**Career Opportunities.** A Bachelor of Arts degree in Anthropology is suited for students seeking a solid liberal arts education. With its broad goal to facilitate understanding across lines of cultural difference, sociocultural anthropology prepares students for lives that are influenced by increasingly pervasive cultural exchange, as well as cultural conflict, around the world. The program serves as excellent preparation for careers in which inter-cultural skills are increasingly needed, including social and environmental activism, business, diplomacy and social administration, journalism, law, education and international relations. Students that focus on evolutionary processes will be well prepared to enter fields such as medical or health anthropology, museum studies, cultural resource management and wildlife conservation. A degree in anthropology with appropriate courses in education is good preparation for high school teaching in social, biological, and physical sciences. It also provides the foundation for advanced study leading to careers in college-level teaching and research.

**Major Advisor.** Consult Department advising office in 1282 Social Sciences and Humanities Building.

**Honors Program.** Candidates for high or highest honors in Anthropology must write a senior thesis under the direction of a faculty member. The thesis project will have a minimum duration of two quarters. Honors candidates must take at least six units of Anthropology 194H. Only students who, at the end of their junior year (135 units), have attained a cumulative grade point average of 3.500 in Anthropology courses will be eligible for the honors program. The quality of the thesis work will be the primary determinant for designating high or highest honors at graduation.

**Teaching Credential Subject Representative.** See the Teaching Credential/M.A. Program.

**Graduate Study**

The Department offers a program of study leading to the M.A. and Ph.D. degrees in Anthropology. Further information regarding graduate study may be obtained at the Department office and at Graduate Studies.

- ANT 148A Culture and Political Economy in Contemporary China | 4
- ANT 149A Traditional Japanese Society (Discontinued) | 4
- ANT 149B Contemporary Japanese Society (Discontinued) | 4

Choose one of the following two options in (see list below identifying upper division sociocultural courses; see list above identifying evolutionary track courses): | 30-32

- [List of courses for option 1]
(1) Eight additional upper division anthropology courses (two courses may be in the evolutionary track; and up to six units can be Anthropology 192, 194H, 198, or 199 units) 30-32

(2) Eight additional upper division courses that may combine six sociocultural track courses and either eight units of Study Abroad credit or two related courses in a single academic discipline (including but not limited to: African American and African Studies, American Studies, Art Studio, Art History, Asian American Studies, Chicana/o Studies, Communication, Community and Regional Development, Design, Economics, East Asian Studies, History, Linguistics, Middle East and South Asian Studies, Music, Native American Studies, Nature and Culture, Philosophy, Political Science, Psychology, Religious Studies, Science and Technology Studies, Sociology, Textiles and Clothing, Theatre and Dance, Women and Gender Studies) 30-32

### Sociocultural track upper division courses:

Note: Sociocultural track courses at the upper division level are those with numbers from 100 to 149B, with the exception of 101, 103, 105, 128A, and 141B. Area-focus sociocultural track courses are those that refer in their titles to one or more peoples or regions of the world.

Anthropology | ANT B.S.

(College of Letters and Science)

Lynne A. Isbell, Ph.D., Chairperson of the Department

Department Office. 328 Young Hall; 530-752-0745; http://anthropology.ucdavis.edu

The B.S. Major

Anthropology is the systematic study of humans. The student of anthropology learns about human biology, ecology, and social life—past and present—and gains a broad understanding of humans and societies. The Bachelor of Science degree in Anthropology is interdisciplinary in nature since it requires lower division coursework in math and science and upper division coursework in biological anthropology and closely related disciplines.

The Program. Evolutionary anthropologists are united by their common application of science and evolutionary theory to understand the behavior, ecology, history, and evolution of humans and non-human primates, as individuals and as societies. These topics may be approached through archaeology, human behavioral ecology, paleoanthropology, primatology, genetics, biogeography, and conservation biology. Archaeology is the study of history or prehistory by analysis of a people's artifacts, or their material culture, with the goal of reconstructing culture history and human behavior. Human behavioral ecology is the study of how variation in ecology and social organization can help us understand variation in human behavior. Paleoanthropology is the study of human evolution through the fossil and archaeological records, drawing on relevant studies in biological anthropology, Paleolithic archaeology, genetics, and geology. Primatology is the study of behavior, ecology, and morphology of primates to address questions about the evolution and function of behavioral and morphological patterns in nonhuman primates and to test models of the origins of human morphology and behavior. Genetic anthropology uses DNA to address anthropological questions about population histories, migrations, mixing, and adaptations to local contexts. Biogeography investigates the biology behind the geographic distribution of species and human cultures. Conservation biology explores the causes of loss of biological diversity—in this department, it focuses on threatened non-human primates and the conservation of natural resources by a rapidly growing population. A Bachelor of Science degree, in addition to core evolutionary anthropology courses, includes the introductory sequences of biology, chemistry, organic chemistry, and calculus, as well as genetics and ecology.

Students are encouraged to gain practical experience through undergraduate research or internships performed for credit (under ANT 192, 198, or 199 units provided by the advising office). Students showing exceptional ability are welcome to seek permission from instructors to participate in graduate seminars offered by the department.

Career Opportunities. A Bachelor of Science degree in Anthropology combines a solid liberal arts education with training in the life and physical sciences. Through its interdisciplinary nature, a Bachelor of Science degree in Anthropology provides the educational background for careers in the biological sciences and a variety of health professions including pre-medical, pre-dental, and pre-veterinary, fields which increasingly need professionals with training in the social and behavioral sciences. In addition, students will be well prepared to enter fields such as medical or health anthropology, forensic sciences, museum studies, cultural resource management, and wildlife conservation. A Bachelor of Science degree in Anthropology with appropriate courses in education is good preparation for high school teaching in social, biological, and physical sciences. It also provides the foundation for advanced study leading to careers in college-level teaching and research.

Major Advisor. Consult Department advising office in 1282 Social Sciences and Humanities Building.

Honors Program. Candidates for high or highest honors in Anthropology must write a senior thesis under the direction of a faculty member. The thesis project will have a minimum duration of two quarters. Honors candidates must take at least six units of Anthropology 194H. Only students who, at the end of their junior year (135 units), have attained a cumulative grade point average of 3.500 in Anthropology courses will be eligible for the honors一年一度
program. The quality of the thesis work will be the primary determinant for designating high or highest honors at graduation.

**Teaching Credential Subject Representative.** See the Teaching Credential/M.A. Program.

**Graduate Study**

The Department offers a program of study leading to the M.A. and Ph.D. degrees in Anthropology. Further information regarding graduate study may be obtained at the Department office and at Graduate Studies.

Anthropology | ANT Courses

Courses in ANT:

ANT 001—Human Evolutionary Biology (4)
Discussion—1 hour; Lecture—3 hours. Processes and course of human evolution; primatology; biological and social diversity within Homo sapiens; human paleontology. GE credit: SE, SL, WE. Effective: 1999 Fall Quarter.

ANT 001Y—Human Evolutionary Biology (Hybrid Version) (4)
Discussion/Laboratory—1 hour; Lecture/Discussion—1.5 hours; Web Virtual Lecture—1.5 hours. Evolutionary theory and mechanisms of evolution; basic population and quantitative genetics; primatology; biological and cultural diversity within Homo sapiens; paleoanthropology. Students may not take both ANT 1 and ANT 1Y for credit. GE credit: SE, SL, WE. Effective: 2017 Winter Quarter.

ANT 002—Cultural Anthropology (5) Review all entries
Discussion—1 hour; Lecture—3 hours; Term Paper. Introduction to cultural diversity in its many forms and methods used by anthropologists to account for it. Relational dynamic of culture, history, and power in constituting "social facts" and "realities." Critical thinking of contemporary concerns. GE credit: ACGH, DD, SS, WC, WE. Effective: 2017 Winter Quarter.

ANT 002—Cultural Anthropology (5) Review all entries
Discussion—1 hour; Lecture—3 hours; Term Paper. Introduction to cultural diversity in its many forms and methods used by anthropologists to account for it. Relational dynamic of culture, history, and power in constituting "social
facts” and "realities." Critical thinking of contemporary concerns. GE credit: DD, SS, WC, WE. Effective: 2019 Winter Quarter.

**ANT 003—Introduction to Archaeology (4)**
Discussion—1 hour; Lecture—3 hours. Development of archaeology as an anthropological study; objectives and methods of modern archaeology. GE credit: SE, SL, SS. Effective: 2015 Spring Quarter.

**ANT 004—Introduction to Anthropological Linguistics (4)**
Discussion—1 hour; Lecture—3 hours. Exploration of the role of language in social interaction and world view, minority languages and dialects, bilingualism, literacy, the social motivation of language change. Introduction of analytical techniques of linguistics and demonstration of their relevance to language in sociocultural issues. GE credit: SS, WC, WE. Effective: 1997 Winter Quarter.

**ANT 005—Proseminar in Biological Anthropology (4)**
Seminar—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. ANT 1 or ANT 1Y recommended. Course primarily for majors. Integration of related disciplines in the study of biological anthropology through discussion and research projects. Principal emphasis in human adaptation to the environment. GE credit: OL, SE, WE. Effective: 2016 Fall Quarter.

**ANT 013—Scientific Method in Physical Anthropology (4)**
Discussion/Laboratory—1 hour; Fieldwork—1 hour; Lecture—2 hours. Skills for scientific thinking; designing, implementing, analyzing, interpreting, presenting, and criticizing research. Collection and analysis of original data. Basic statistical methods. GE credit: OL, SE, VL, WE. Effective: 2004 Fall Quarter.

**ANT 015—From Birth to Death: The Evolution of the Human Life Cycle (5)**
Discussion—1 hour; Lecture—3 hours; Term Paper. Introduction to the biology of birth, childhood, marriage, the family, old age, and death. Examines comparative characteristics of nonhuman primates and other animals as well as cross-cultural variation in humans by study of selected cases. GE credit: SE, SL, WC, WE. Effective: 2018 Winter Quarter.

**ANT 020—Comparative Cultures (4)**
Discussion—1 hour; Lecture—3 hours. Introduction to the anthropological study of cultural diversity. Case studies of eight societies will be presented to illustrate and compare the distinctive features of major cultural regions of the world. Concludes with a discussion of modernization. GE credit: ACGH, AH, DD, SS, WC, WE. Effective: 1997 Winter Quarter.

**ANT 023—Introduction to World Prehistory (4)**
Discussion—1 hour; Lecture—3 hours. Broadly surveys patterns and changes in the human species' physical and cultural evolution from earliest evidence for "humanness" to recent development of large-scale complex societies or "civilizations." Lectures emphasize use of archaeology in reconstructing the past. GE credit: SS, WC, WE. Effective: 1997 Winter Quarter.

**ANT 024—Ancient Crops and People (4)**
Discussion—1 hour; Lecture—3 hours. The archaeological evidence for domestication of plants and the origins of agricultural societies. Anthropological context of agriculture and the effects on sexual division of labor, social inequality, wealth accumulation, warfare, human health, and sedentism. GE credit: SS, WC, WE. Effective: 2005 Spring Quarter.

**ANT 025—Ancient Animals and People (2)**
Lecture—2 hours. History of human and animal relationships and how animals have influenced social and economic structures of past societies. Why, when and how humans used animals in the context of hunting, domestication, secondary products, ritual, companionship, and conservation. GE credit: SS. Effective: 2015 Winter Quarter.

**ANT 026—Mummies of the Ancient World (2)**
Lecture—2 hours. Archaeological approaches for studying mummies and the process of mummification in the ancient world. Analytical techniques used, environmental factors promoting mummification, and archaeological conservation of mummified bodies. GE credit: SS, WC. Effective: 2014 Fall Quarter.

**ANT 027—Great Adaptations: Genetic and Cultural Evolution in the Spread of Humanity (2)**
Lecture—2 hours. How humans adapted to diverse ecologies through cultural and genetic changes. Illustrations include evolution in response to disease, dietary, social, and communication challenges. GE credit: SE, SL, SS, WC. Effective: 2019 Winter Quarter.
ANT 028—Prehistoric Origins of Art (2)
Lecture/Discussion—2 hours. Interdisciplinary look at the earliest evidence for art and symbolic behavior. Method and techniques to investigate Prehistoric art. Interpretative framework and relevance for understanding the role of symbolic activities in traditional societies. GE credit: SS. Effective: 2015 Winter Quarter.

ANT 029—Vikings (2)
Lecture—2 hours. History of the Vikings through the Slavic and Mediterranean regions in the East and across the vast North Atlantic region to the west. Emphasis on archaeology and sagas to understand Viking culture from the 8th to 11th centuries. GE credit: SS, WC. Effective: 2016 Spring Quarter.

ANT 030—Sexualities (4)
Lecture/Discussion—4 hours. Introduction to the study of sexuality, particularly to the meanings and social organization of same-sex sexual behavior across cultures and through time. Biological and cultural approaches will be compared, and current North American issues placed in a wider comparative context. GE credit: ACGH, AH, DD, SS, WC. Effective: 2005 Fall Quarter.

ANT 032—Drugs, Science and Culture (4)
Discussion—1 hour; Lecture—3 hours. Drugs, politics, science, society in a cultural perspective: emphasis on roles of science, government and the media in shifting attitudes toward alcohol, marijuana, Prozac and other pharmaceuticals; drug laws, war on drugs and global trade in sugar, opium, cocaine. (Same course as STS 032.) GE credit: SS, VL, WE. Effective: 2008 Fall Quarter.

ANT 034—Cultures of Consumerism (4)
Lecture/Discussion—4 hours; Term Paper. Aspects of modern consumer cultures in capitalist and socialist countries. Transformations of material cultures over the past century. Case studies on the intersections of gender, class, and culture in everyday consumption practices. GE credit: SS, WC. Effective: 2007 Fall Quarter.

ANT 036—Star Trek as Social Theory (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ANT 002 Introduction to core concepts in anthropological and social theory using Star Trek as a teaching vehicle. Emphasis on thinking anthropologically about everyday life and popular culture. GE credit: SS. Effective: 2019 Winter Quarter.

ANT 036—Star Trek as Social Theory (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ANT 002 recommended. Introduction to core concepts in anthropological and social theory using Star Trek as a teaching vehicle. Emphasis on thinking anthropologically about everyday life and popular culture. GE credit: SS. Effective: 2019 Fall Quarter.

ANT 050—Evolution and Human Nature (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Evolutionary analyses of human nature, beginning with Lamarck, Darwin, Spencer and contemporaries, and extending through social Darwinism controversies to contemporary evolutionary anthropology research on human diversity in economic, mating, life-history, and social behavior. GE credit: SE, SL, WE. Effective: 2004 Fall Quarter.

ANT 050—Evolution and Human Nature (4) Review all entries Discontinued
Discussion—1 hour; Lecture—3 hours. Evolutionary analyses of human nature, beginning with Lamarck, Darwin, Spencer and contemporaries, and extending through social Darwinism controversies to contemporary evolutionary anthropology research on human diversity in economic, mating, life-history, and social behavior. GE credit: SE, SL, WE. Effective: 2019 Winter Quarter.

ANT 054—Introduction to Primatology (4)
Lecture/Discussion—3 hours; Term Paper. Basic survey of the primates as a separate order of mammals; natural history and evolution of primates; consideration of hypotheses for their origin. GE credit: SE, SL, WE. Effective: 2007 Fall Quarter.

ANT 056—Introduction to Forensic Anthropology (3)
Discussion—1 hour; Lecture—2 hours. Survey of anthropological techniques as applied within the legal system, including scene documentation and recovery, human identification, and trauma analysis. Examination of error and uncertainty, ethics, and human rights in forensic anthropology. GE credit: SL, SS. Effective: 2020 Fall Quarter.

ANT 098—Directed Group Study (1-5)

ANT 099—Special Study for Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.
ANT 100—Theory in Social-Cultural Anthropology (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ANT 002 recommended. Discussion of the theoretical and philosophical developments in cultural anthropology from the 19th century to the present. No credit if taken ANT 137. GE credit: SS, WE. Effective: 2016 Fall Quarter.

ANT 100—Theory in Social-Cultural Anthropology (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ANT 002 recommended. Discussion of the theoretical and philosophical developments in cultural anthropology from the 19th century to the present. GE credit: SS, WE. Effective: 2019 Winter Quarter.

Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ANT 001 or ANT 002 or ESP 030 or EVE 100 or BIS 101 recommended. Interdisciplinary study of diversity and change in human societies, using frameworks from anthropology, evolutionary ecology, history, archaeology, psychology, and other fields. Topics include population dynamics, subsistence transitions, family organization, disease, economics, warfare, politics, and resource conservation. (Same course as ESP 101.) GE credit: SS, WC, WE. Effective: 2016 Fall Quarter.

ANT 103—Indigenous Peoples and Natural Resource Conservation (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ANT 002 or GEL 001 or ESP 030 recommended. Integration of the interests of resident and indigenous peoples with the conservation of natural resources and ecosystems, using case study examples from both the developing and developed world. Not open for credit for students who have completed ANT 121N. (Former ANT 121N.). GE credit: ACGH, DD, OL, SS, WC, WE. Effective: 2016 Fall Quarter.

ANT 104N—Cultural Politics of the Environment (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ANT 002 recommended. Political economy of environmental struggles. Relationship between social inequality (based on race, class and/or gender) and ecological degradation. Articulation of local peoples, national policy, and the international global economy in the contestation over the use of environmental resources. Not open for credit to students who have completed ANT 134N. (Former ANT 134N.). GE credit: ACGH, DD, SS, WC, WE. Effective: 2018 Fall Quarter.

ANT 105—Evolution of Societies and Cultures (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ANT 001 or ANT 002 or ESP 030 or EVE 100 or BIS 101 recommended. Interdisciplinary study of social and cultural evolution in humans. Culture as a system of inheritance, psychology of cultural learning, culture as an adaptive system, evolution of maladaptations, evolution of technology and institutions, evolutionary transitions in human history, coevolution of genetic and cultural variation. Only two units of credit for students who have completed ESP 101 or ANT 101 prior to fall 2004. (Same course as ESP 105.) GE credit: QL, SS, WC, WE. Effective: 2016 Fall Quarter.

ANT 105—Evolution of Societies and Cultures (4) Review all entries Discontinued
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ANT 001 or ANT 002 or ESP 030 or EVE 100 or BIS 101 recommended. Interdisciplinary study of social and cultural evolution in humans. Culture as a system of inheritance, psychology of cultural learning, culture as an adaptive system, evolution of maladaptations, evolution of technology and institutions, evolutionary transitions in human history, coevolution of genetic and cultural variation. Only two units of credit for students who have completed ESP 101 or ANT 101 prior to fall 2004. (Same course as ESP 105.) GE credit: QL, SS, WC, WE. Effective: 2018 Fall Quarter.

ANT 107—Law, Power, Violence (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ANT 002 recommended. Cultural dimensions of law and political power. Colonial and postcolonial legal regimes, bureaucratic reason, legalized violence, sovereign power, and human rights. GE credit: SS, WC, WE. Effective: 2018 Fall Quarter.

ANT 109—Visualization in Science: A Critical Introduction (4)
Extensive Writing/Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ANT 002 or STS 001 or STS 020 recommended. Anthropological approaches to scientific visualization techniques, informatics, simulations. Examination of different visualization techniques toward understanding the work involved in producing them, critical assessment of their power and limits, especially when visualizations are used socially to make claims. (Same course as STS 109.) GE credit: SS, VL, WE. Effective: 2016 Fall Quarter.

ANT 110—Language and Sociocultural Anthropology (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ANT 002 recommended. Role of language analysis and linguistic theory in the development of sociocultural anthropology. Language, culture, and thought; the linguistic
accomplishment of social action; language ideology; language and social power. Language as cultural mediator of politicoeconomic process. GE credit: SS, WC, WE. Effective: 2016 Fall Quarter.

**ANT 110—Language and Sociocultural Anthropology (4)**  
Review all entries Discontinued

Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ANT 002 recommended. Role of language analysis and linguistic theory in the development of sociocultural anthropology. Language, culture, and thought; the linguistic accomplishment of social action; language ideology; language and social power. Language as cultural mediator of politicoeconomic process. GE credit: SS, WC, WE. Effective: 2019 Winter Quarter.

**ANT 117—Language and Society (4)**  
Review all entries Discontinued

Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ANT 004 or LIN 001 recommended; ANT 002 recommended. Consideration of language in its social context. Methods of data collection and analysis; identification of socially significant linguistic variables. Contributions of the study of contextualized speech to linguistic theory. GE credit: SS, WC, WE. Effective: 2016 Fall Quarter.

**ANT 117—Language and Society (4)**  
Review all entries Discontinued

Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ANT 004 or LIN 001 recommended; ANT 002 recommended. Consideration of language in its social context. Methods of data collection and analysis; identification of socially significant linguistic variables. Contributions of the study of contextualized speech to linguistic theory. GE credit: SS, WC, WE. Effective: 2019 Winter Quarter.

**ANT 120—Language and Culture (4)**

Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ANT 004 or LIN 001 recommended; ANT 002 recommended. Culture, cognition, meaning, and interpretation; language and the classification of experience; communication and learning in crosscultural perspective. GE credit: ACGH, DD, SS, WC, WE. Effective: 2016 Fall Quarter.

**ANT 121—Special Topics in Medical Anthropology (4)**

Lecture/Discussion—4 hours. Prerequisite(s): ANT 002 recommended. Introduction to critical medical anthropology. Topics include anthropological analysis of bio-medicine, psychiatry, systems of knowledge and healing, the body, emotions, and clinical encounters in a cross-cultural perspective. (Same course as STS 121.) GE credit: SS, WC, WE. Effective: 2016 Fall Quarter.

**ANT 122A—Economic Anthropology (4)**

Discussion—1 hour; Lecture—3 hours. The varieties of production, exchange, and consumption behavior in precapitalist economies, their interaction with culture and social-political organization, and the theories that account for these phenomena. The effects of capitalism on precapitalist sectors. Not open for credit to students who have completed ANT 122. (Former ANT 122.). GE credit: ACGH, DD, SS, WC, WE. Effective: 2001 Winter Quarter.

**ANT 122B—Anthropology and Political Economy (4)**

Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ANT 002 recommended. Survey of anthropological approaches to the study of political organizations; inter-relationships among political institutions, economic infrastructures and cultural complexity. Not open for credit to students who have completed ANT 123A. (Former ANT 123A.). GE credit: SS, WC, WE. Effective: 2016 Fall Quarter.

**ANT 123AN—Resistance, Rebellion, and Popular Movements (4)**

Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ANT 002 recommended. Analysis of popular protest in Third World and indigenous societies ranging from covert resistance to national revolts. Comparative case studies and theories of peasant rebellions, millenarian movements, social bands, Indian "wars", ethnic and regional conflicts, gender and class conflicts. Not open for credit to students who have completed ANT 123B. (Former ANT 123B.). GE credit: SS, WC, WE. Effective: 2016 Fall Quarter.

**ANT 124—Religion in Society and Culture (4)**  
Review all entries

Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ANT 002 recommended. Discussion of anthropological theories of religion with emphasis on non-literate societies. Survey of shamanism, magic and witchcraft, ritual and symbols, and religious movements. Extensive discussion of ethnographic examples and analysis of social functions of religious institutions. GE credit: AH, WC, WE. Effective: 1997 Winter Quarter.

**ANT 124—Religion in Society and Culture (4)**  
Review all entries

Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ANT 002 recommended. Discussion of anthropological theories of religion with emphasis on non-literate societies. Survey of shamanism, magic and witchcraft, ritual and symbols, and religious movements. Extensive discussion of ethnographic examples and analysis of social functions of religious institutions. GE credit: AH, WC, WE. Effective: 2018 Fall Quarter.
ANT 125A—Structuralism and Symbolism (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ANT 002 recommended. Survey of anthropological approaches to understanding the logic of structuralism and symbolism in cultural analysis. Focus on how structural and symbolic interpretations relate to cultural and linguistic universals and to the philosophical basis of relativism in the social sciences. (Former course 125.) GE credit: SS, WC, WE. Effective: 2017 Winter Quarter.

ANT 125B—Postmodernism(s) and Culture (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ANT 002 recommended. U.S.-European postmodern condition. "Modernity" as an incomplete project for subordinated groups. The economic, social, technological and political conditions leading to postmodern aesthetics, in comparison with postcolonialism, feminism and minority discourse. GE credit: SS, WC, WE. Effective: 2016 Fall Quarter.

ANT 126A—Anthropology of Development (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ANT 002 recommended. Theories of development and current critiques. Colonial legacies and post-colonial realities. Roles of the state and NGOs, population migrations, changing gender identities, cash-earning strategies, and sustainability issues. Stresses importance of cultural understandings in development initiatives. Case studies emphasizing non-industrial societies. Not open for credit to students who have completed ANT 126. (Former ANT 126.). GE credit: SS, WC, WE. Effective: 2016 Fall Quarter.

ANT 126B—Women and Development (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ANT 002 recommended. Current Third World and Western development issues concerning women in agriculture, industry, international division of labor, political movements, revolutions, politics of health, education, family and reproduction. Impact of colonialism, capitalism, the world system, and international feminism on women and development. No credit if taken ANT 131. GE credit: SS, WC, WE. Effective: 2016 Fall Quarter.

ANT 127—Urban Anthropology (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ANT 002; or Consent of Instructor. Survey of approaches to urban living: political structures, organization of labor, class relations, world views. The evolution of urban life and its contemporary dilemmas. Cross-cultural comparisons discussed through case studies. GE credit: SS, WC, WE. Effective: 1997 Winter Quarter.

ANT 128A—Kinship and Social Organization (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ANT 002 recommended. Comparative examination of personal kinship, descent, marriage, household and family organizations; the theories that account for variation, and recent advances in the treatment of these data. Not open for credit to students who have completed ANT 128. (Former ANT 128.). GE credit: SS, WC, WE. Effective: 2016 Fall Quarter.

ANT 128B—Self, Identity, and Family (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ANT 001 and ANT 002 recommended. Comparative examination of personal kinship, descent, marriage, household and family organizations; the theories that account for variation, and recent advances in the treatment of these data. Not open for credit to students who have completed ANT 128. (Former course 128.). GE credit: SS, WC, WE. Effective: 2019 Spring Quarter.

ANT 129—Health and Medicine in a Global Context (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): ANT 002 recommended. Recent works in medical anthropology and the science studies of medicine dealing with social and cultural aspects of global health issues such as AIDS, pandemics, clinical trials, cultural differences in illnesses, diabetes, organ trafficking, medical technologies, illness narratives, and others. (Same course as STS 129.) GE credit: SS, WC, WE. Effective: 2016 Fall Quarter.

ANT 130A—Cultural Dimensions of Globalization (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ANT 002 recommended. Cultural dimensions of recent economic and political developments frequently termed "globalization." GE credit: SS, WC, WE. Effective: 2016 Fall Quarter.
ANT 130BN—Migration and the Politics of Place and Identity (4)
Lecture/Discussion—4 hours. Prerequisite(s): ANT 002 recommended. Internal and international migration from an anthropological perspective, including causes, processes, and political, economic, and cultural effects of spatial mobility and displacement. Emphasizes the interplay of identity, place, and power in diverse cultural and historical contexts. Not open for credit to students who have completed ANT 123D. (Former ANT 123D). GE credit: SS, WC, WE. Effective: 2016 Fall Quarter.

ANT 131—Ecology and Politics (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ANT 002 recommended. Analysis of the complex interactions between ecological dynamics and political processes employing the emerging approach of political ecology. Case studies of environmental degradation (e.g., desertification, logging, mineral extraction, petroleum, water) from various cultural and geographic regions. GE credit: SS. Effective: 2016 Fall Quarter.

ANT 132—Psychological Anthropology (4)
Extensive Writing/Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ANT 002 recommended. History of the relationship between anthropology and psychoanalysis. Exploration of anthropology of emotions, colonial psychology, contemporary ethno-psychiatry, studies on personhood, possession, magic, altered states, subjectivity, and definitions of the normal and the pathological in different contexts and cultures. GE credit: SS, WC, WE. Effective: 2016 Fall Quarter.

ANT 133—Anthropology of Ocean Worlds (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ANT 002 recommended. Exploration of various oceanic cultures and their engagement with the sea. Piracy, smuggling, exchange, maritime legal regimes, offshore policing, media infrastructures, and ocean ecologies. GE credit: SS, WC, WE. Effective: 2017 Winter Quarter.

ANT 134—Buddhism in Global Culture (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ANT 002 recommended. Class size limited to 50 students. Buddhist meditation and ritual as a cultural system that adapts to global and local forces of change. Anthropological theory and method in understanding global culture transmission, including Buddhist reform movements in Asia and Buddhist practice in the West. GE credit: AH, SS, WC, WE. Effective: 2016 Fall Quarter.

ANT 135—Media Anthropology (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Upper division standing. Examining human practices through their inscription in old and new media; evaluating the emergent fields of “cyber” and “digital” anthropology; and problematizing terms and concepts routinely deployed in studies of media worlds—platform, social media, hologram, algorithm, remediation, curation, animation. GE credit: AH, SS, VL, WC. Effective: 2017 Winter Quarter.

ANT 136—Ethnographic Film (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ANT 002 recommended. Overview of the use of film in anthropology and its advantages and limitations in comparison to written ethnographic descriptions. Essential features of ethnographic films. Film production in anthropological research and problems encountered in producing films in the field. GE credit: SS, VL, WC, WE. Effective: 2016 Fall Quarter.

ANT 137—Meditation and Culture (4)
Discussion—1 hour; Lecture/Discussion—3 hours. Prerequisite(s): ANT 002 recommended. Class size limited to 50 students. Study and practice of the relation between meditation and cultural conditioning; comparison of Buddhist practice with other cultural constructions of mind, body, brain, thought, emotion, and self. Effective: 2016 Fall Quarter.

ANT 138—Ethnographic Research Methods in Anthropology (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ANT 002 recommended. Basic concepts in and approaches to ethnographic field research. Problem formulation, research design, qualitative and quantitative data collection procedures, and techniques for organizing, retrieving, and analyzing information. Ethnographic description and constructed inference. Students will organize and conduct individual research projects. GE credit: SS, WC, WE. Effective: 2016 Fall Quarter.

ANT 139AN—Race, Class, Gender Systems (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ANT 002 recommended. Comparative analysis of class/race/gender inequality, concentrating on the ways in which beliefs about descent, “blood,” and biological difference interact with property and marital systems to affect the distribution of power in society. Not open for credit to students who have completed ANT 139. (Former ANT 139). GE credit: ACGH, DD, SS, WC, WE. Effective: 2016 Fall Quarter.
ANT 139BN—Gender and Sexuality (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ANT 002 recommended. Gender and sexuality in foraging bands, horticultural and pastoral tribes, agricultural and industrial states. Debates on cultural evolution and distribution of gender hierarchies. Impact of politics, economics, religion, social practices, women's movements on gender and sexuality. Culture, nature and sexuality. Not open for credit to students who have completed ANT 130. (Former ANT 130.) GE credit: ACGH, DD, SS, WE. Effective: 2016 Fall Quarter.

ANT 140A—Cultures and Societies of West and Central Africa (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ANT 002 recommended. Ethnographic survey of West Africa and Congo Basin with analyses of representative societies which illustrate problems of general theoretical concern. Major consideration will be the continuities and discontinuities between periods prior to European contact and the present. GE credit: SS, WE. Effective: 2016 Fall Quarter.

ANT 140B—Cultures and Societies of East and South Africa (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ANT 002 recommended. Ethnographic survey of Eastern and Southern Africa with analyses of selected societies which illustrate problems of interest to anthropologists. Major consideration will be given to continuities and discontinuities between periods prior to European contact and the present. GE credit: SS, WE. Effective: 2016 Fall Quarter.

ANT 141B—Ethnography of California and the Great Basin (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Consent of Instructor. ANT 002 recommended. Description and analysis of the native peoples of California and the Great Basin, and their lifeways at the time of European contact. (Former course 141C.) GE credit: ACGH, DD, SS, WE. Effective: 2016 Fall Quarter.

ANT 141B—Ethnography of California and the Great Basin (4) Review all entries Discontinued
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Consent of Instructor. ANT 002 recommended. Description and analysis of the native peoples of California and the Great Basin, and their lifeways at the time of European contact. (Former course 141C.) GE credit: ACGH, DD, SS, WE. Effective: 2019 Winter Quarter.

ANT 141C—People of the Arctic: Contemporary and Historic Cultures of the Circumpolar Region (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ANT 002 or ANT 003 recommended. Social, economic, political, and religious lives of Russian, American, Canadian, and Greenlandic Arctic people (Yup’ik, Inupiaq, Inuit). Topics include Arctic ecosystems, archaeological record of human occupation, ethnohistorical and ethnographic accounts, arctic people in popular culture, and contemporary issues. Effective: 2016 Fall Quarter.

ANT 142—Peoples of the Middle East (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ANT 002 recommended. Peoples of the Middle East (including North Africa). Discussions of class relations, kinship organization, sex/gender systems, religious beliefs and behavior, ethnic relations, political systems. Impact of world systems, political and religious movements and social change. (Former course 136.) GE credit: SS, WE. Effective: 2016 Fall Quarter.

ANT 143A—Ethnology of Southeast Asia (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ANT 002 recommended. Patterns of culture and social organization from prehistory to the present, in the context of historical, ecological, economic, and political settings. Emphasis on the relation of ethnic minorities to national states. GE credit: SS, WE. Effective: 2016 Fall Quarter.

ANT 144—Contemporary Societies and Cultures of Latin America (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ANT 002 recommended. Introduction to contemporary social structure of Latin America. Origins, maintenance and changes in inequality: economic responses to poverty, sociocultural responses to discrimination, and political responses to powerlessness. GE credit: SS, WE. Effective: 2017 Winter Quarter.

ANT 145—Performance, Embodiment, and Space in South Asia (4)
Lecture/Discussion—4 hours. Prerequisite(s): ANT 002; or Consent of Instructor. South Asian cultures and societies with a focus on performance, embodiment, and space from several disciplinary fields. Topics may include colonialism, nationalism, religious traditions, media, popular culture, cities, social movements, modernity, bodycultures, identity, gender, and diasporas. GE credit: AH, SS, WE. Effective: 2005 Winter Quarter.

ANT 146N—Topics in the Anthropology of Europe (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ANT 002 recommended. Recent ethnographies of different nation-states and socio-political spaces in Europe. Topics include the question of old and new boundaries, historical and contemporary constructions of Europe, migration and ethnicity, citizenship, belonging, multiculturalism, and post/socialisms. GE credit: SS, WE. Effective: 2016 Fall Quarter.
ANT 147—Modern South Asia Cinema (4)
Film Viewing—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): Upper-division standing or consent of instructor. South Asian cinema of last 100 years in the context of cultural, social, and political changes. South Asian history, Independence, Partition, urban life, class, migration, postcolonial identity, diaspora, gender, sexuality, religion, sport, performance, etc. (Same course as MSA 131B and CTS 146B.) GE credit: AH, SS, VL, WC, WE. Effective: 2017 Winter Quarter.

ANT 148A—Culture and Political Economy in Contemporary China (4)
Lecture/Discussion—4 hours. Prerequisite(s): ANT 002 recommended. Examining contemporary Chinese culture and political economy through reading ethnographic studies on recent transformations in rural and urban Chinese society. Special attention is given to state power, popular culture, spatial mobility, city space, and gender. GE credit: SS, WC, WE. Effective: 2016 Fall Quarter.

ANT 149A—Traditional Japanese Society (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ANT 002 recommended. Patterns of culture and social organization from prehistoric to early twentieth-century Japan. Origins, prehistory, and traditional religious and political systems, marriage and kinship, language and culture. Changes and continuities in traditional and contemporary Japanese culture are addressed. GE credit: SS, WC, WE. Effective: 2016 Fall Quarter.

ANT 149A—Traditional Japanese Society (4) Review all entries Discontinued
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ANT 002 recommended. Patterns of culture and social organization from prehistoric to early twentieth-century Japan. Origins, prehistory, and traditional religious and political systems, marriage and kinship, language and culture. Changes and continuities in traditional and contemporary Japanese culture are addressed. GE credit: SS, WC, WE. Effective: 2019 Winter Quarter.

ANT 149B—Contemporary Japanese Society (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Introduction to contemporary Japanese social structure, social organization, and patterns of culture. Analysis of ruralurban cultural continuities and contrasts, class relations, political and economic systems, kinship, sex/gender systems, contemporary religious beliefs and behavior, conflict, consensus, and cultural stereotypes. GE credit: SS, WC, WE. Effective: 1997 Winter Quarter.

ANT 149B—Contemporary Japanese Society (4) Review all entries Discontinued
Discussion—1 hour; Lecture—3 hours. Introduction to contemporary Japanese social structure, social organization, and patterns of culture. Analysis of ruralurban cultural continuities and contrasts, class relations, political and economic systems, kinship, sex/gender systems, contemporary religious beliefs and behavior, conflict, consensus, and cultural stereotypes. GE credit: SS, WC, WE. Effective: 2019 Winter Quarter.

ANT 151—Primate Evolution (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ANT 001 or BIS 002B or BIS 002C or EVE 010 recommended. Origin and relationships of the prosimians, monkeys, and apes. GE credit: SE, WE. Effective: 2016 Fall Quarter.

ANT 152—Human Evolution (5)
Discussion—1 hour; Lecture—3 hours; Term Paper. Prerequisite(s): ANT 001 recommended. Nature and results of the evolutionary processes involved in the formation and differentiation of humankind. GE credit: SE, WE. Effective: 2016 Fall Quarter.

ANT 153—Human Biological Variation (5) Review all entries
Discussion—1 hour; Lecture—3 hours; Term Paper. Prerequisite(s): ANT 001 or BIS 002B recommended. Origin, adaptive significance and methods of analysis of genetic differences among human populations. Special attention given to racial differences such as those in blood groups, plasma proteins, red cell enzymes, physiology, morphology, pigmentation and dermatoglyphics. GE credit: QL, SE, WE. Effective: 2016 Fall Quarter.

ANT 153—Human Genetics: Mutation and Migration (5) Review all entries
Discussion—1 hour; Lecture—3 hours; Term Paper. Prerequisite(s): (ANT 001, BIS 002B) or (ANT 001, MCB 010) or (BIS 002B, MCB 010) Introduction to human genetics. Principles of inheritance, the human genome, population genetics, mutation, genetic diversity, using DNA to study ancient human history, personal genomics. Human genetics as a tool to understand the patterns and processes of human migration. Introduction to the major concepts in human genetic and genomic research. GE credit: SE, SL, WE. Effective: 2016 Fall Quarter.

ANT 154A—The Evolution of Primate Behavior (5) Review all entries
Discussion—1 hour; Lecture—3 hours; Term Paper. Prerequisite(s): ANT 001 or ANT 054 or EVE 010 recommended. Examines ecological diversity and evolution of social systems of prosimians, monkeys, and apes, placing the social
behavior of the primates in the context of appropriate ecological and evolutionary theory. GE credit: SE, VL, WE. Effective: 2016 Fall Quarter.

ANT 154A—The Evolution of Primate Behavior (5) Review all entries
Discussion—1 hour; Lecture—3 hours; Term Paper. Prerequisite(s): ANT 001 or ANT 054 or EVE 010 recommended. Examines ecological diversity and evolution of social systems of prosimians, monkeys, and apes, placing the social behavior of the primates in the context of appropriate ecological and evolutionary theory. GE credit: SE, WE. Effective: 2018 Fall Quarter.

ANT 154B—Primate Evolutionary Ecology (5)
Discussion/Laboratory—1 hour; Lecture—3 hours; Term Paper. Prerequisite(s): ANT 001 or EVE 010 recommended. Examination of the ecology of primates within an evolutionary framework. Theoretical concepts in individual, population, and community ecology, illustrated with primate (and other vertebrate) examples, with additional discussion of primate and rainforest conservation. GE credit: QL, SE, WE. Effective: 2017 Winter Quarter.

ANT 154C—Primate Behavior: Methods & Experimental Design (2)
Lecture/Discussion—2 hours. Prerequisite(s): (ANT 054 or ANT 154A or ANT 154B or NPB 102); (STA 013 or STA 013Y or STA 032 or STA 100 or SOC 046B); ANT 154CL (can be concurrent) Pass One restricted to upper division ANT majors; concurrent enrollment in ANT 154CL required. Scientific methods of studying, describing and analyzing the behavior and ecology of primates. (P/NP grading only.) GE credit: QL, SE, SL. Effective: 2018 Spring Quarter.

ANT 154CL—Laboratory in Primate Behavior (4) Review all entries
Laboratory—6 hours; Term Paper. Prerequisite(s): (ANT 054 or ANT 154A or ANT 154BN); STA 013; Or equivalent of STA 013. Design and conduct of scientific “field studies” of the behavior of group-living primates at the California National Primate Research Center. GE credit: OL, SE, WE. Effective: 2008 Fall Quarter.

ANT 155—Primate Conservation Biology (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ANT 001 or ANT 054 recommended. Study of the taxonomic, ecological and cultural diversity of Primates and how human activities impact tropical ecosystems. Emphasis on case studies and applied research methods. Includes discussion about career opportunities in conservation. GE credit: QL, SL. Effective: 2018 Spring Quarter.

ANT 156A—Human Osteology (4)
Laboratory—4 hours; Lecture—2 hours. Prerequisite(s): ANT 001 or ANT 001Y recommended. Not open to students who have previously completed course 156. Human skeleton from archaeological, forensic, and paleontological perspectives, including anatomical nomenclature, variation with sex and age, function, evolution, growth, and development of bones and teeth. Hands-on study and identification of human skeletal remains. GE credit: SE. Effective: 2016 Fall Quarter.

ANT 156B—Advanced Human Osteology (4)
Laboratory—4 hours; Lecture—2 hours. Prerequisite(s): ANT 156A; Or equivalent. Human skeletons from archaeological, forensic, and paleontological contexts. Bone and tooth structure, growth, and development; measurement, statistics, and biomechanics; assessment of age, sex, weight, height, and ancestry; and indicators of illness, injuries, diet, and activities. GE credit: SE. Effective: 2009 Spring Quarter.

ANT 157—Anthropological Genetics (3)
Lecture—3 hours. Prerequisite(s): ANT 001 or BIS 002C recommended. Method and theory of genetic and genomic analysis of molecular evolution of human and non-human primate populations. Special attention to the molecular evolutionary transition to humans and genetic differences among extant human populations and their adaptive significance. GE credit: QL, SE. Effective: 2016 Fall Quarter.

ANT 157L—Laboratory in Anthropological Genetics (2)
Laboratory—3 hours; Lecture—1 hour. Prerequisite(s): ANT 157 (can be concurrent); ANT 001 or BIS 002C recommended; enrolled in ANT 157 concurrently or following. Methods for identifying genetic variation in human blood group antigens, serum proteins and red cell enzymes (hemaglutination), general electrophoresis on starch,
cellulose acetate and polyacrylamide, immunodiffusion and immunoelectrophoresis on agarase. (P/NP grading only.) GE credit: QL, SE. Effective: 2016 Fall Quarter.

**ANT 158—The Evolution of Females and Males: Biological Perspective (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ANT 001 recommended. Current theoretical frameworks for explaining the evolution of sex differences and for understanding the interrelationship between biological processes and cultural construction of gender roles. GE credit: QL, SE, WE. Effective: 2016 Fall Quarter.

**ANT 159—Molecular Anthropology of Native America (4) Review all entries**
Seminar—3 hours; Term Paper. Prerequisite(s): ANT 001 or ANT 001Y or BIS 002B; or Consent of Instructor. Use of DNA and other genetic polymorphisms to test hypotheses regarding genetic relationships among different Native American tribal groups and about prehistoric population replacements and migrations to and within the Americas. Integration with craniometric, archaeological, paleoenvironmental, linguistic and ethnohistorical evidence. GE credit: QL, SE. Effective: 2018 Spring Quarter.

**ANT 159—Molecular Anthropology of Native America (4) Review all entries Discontinued**
Seminar—3 hours; Term Paper. Prerequisite(s): ANT 001 or ANT 001Y or BIS 002B; or Consent of Instructor. Use of DNA and other genetic polymorphisms to test hypotheses regarding genetic relationships among different Native American tribal groups and about prehistoric population replacements and migrations to and within the Americas. Integration with craniometric, archaeological, paleoenvironmental, linguistic and ethnohistorical evidence. GE credit: QL, SE. Effective: 2019 Winter Quarter.

**ANT 160—Neandertals and Modern Human Origins (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ANT 001 or ANT 001Y or equivalent recommended. Origins, evolution, and disappearance of Neandertals. Emergence of humans like us in both anatomy and behavior. Interpretation of the fossil and archaeological records of Europe and Africa. Genetics of living and fossil humans. GE credit: SE. Effective: 2016 Fall Quarter.

**ANT 170—Archeological Theory and Method (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ANT 003 recommended. Introduction to history and development of archeological theory and method, with particular emphasis on the basic dependence of the latter on the former. Stress is on historical development of archaeology in the New World. GE credit: SS, WE. Effective: 2016 Fall Quarter.

**ANT 172—New World Prehistory: The First Arrivals (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ANT 003 recommended. Survey of data relating to the peopling of the New World. Cultural adaptation and development of early inhabitants of North and South America. GE credit: SS, WC, WE. Effective: 2016 Fall Quarter.

**ANT 173—New World Prehistory: Archaic Adaptations (4) Review all entries**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Consent of Instructor. ANT 003 recommended. Introduction to and survey of prehistoric hunting and gathering adaptations across North America with particular emphasis on the East, Southeast, Midwest, Plains, Southwest, and Northwest. GE credit: SS, WE. Effective: 2016 Fall Quarter.

**ANT 173—New World Prehistory: Archaic Adaptations (4) Review all entries Discontinued**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Consent of Instructor. ANT 003 recommended. Introduction to and survey of prehistoric hunting and gathering adaptations across North America with particular emphasis on the East, Southeast, Midwest, Plains, Southwest, and Northwest. GE credit: SS, WE. Effective: 2019 Winter Quarter.

**ANT 174—European Prehistory (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ANT 003 recommended. Survey of the prehistory of Europe from its earliest human inhabitants, to the Neandertals and first modern humans, and through early agricultural and complex societies. Analysis and interpretation of the European archaeological record for understanding human dispersals into Europe. GE credit: SS, WC, WE. Effective: 2016 Fall Quarter.

**ANT 175—Andean Prehistory: Archaeology of the Incas and their Ancestors (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ANT 003 recommended. Prehistory of the Andean region, especially Peru, from the earliest hunting and gathering societies through the Inca. Focus on the use of archaeological data to reconstruct ancient human adaptations to the varied Andean environments. GE credit: SS, WC, WE. Effective: 2016 Fall Quarter.

**ANT 176—Prehistory of California and the Great Basin (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Consent of Instructor. ANT 003 recommended. Description
and analysis of the prehistoric peoples of California and the Great Basin from earliest times to European contact. GE credit: ACGH, DD, SS, WE. Effective: 2016 Fall Quarter.

ANT 177—African Prehistory (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ANT 003 recommended. Survey of prehistory of Africa from early human ancestors, through modern human origins, and into early agricultural and complex societies and the Bantu expansion. Analysis and interpretation of the African archaeological record, incorporating human paleontology and genetics. GE credit: SS, WC, WE. Effective: 2016 Fall Quarter.

ANT 178—Hunter-Gatherers (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ANT 003 recommended. Study and interpretation of the ancient and modern lifeway in which peoples support themselves with primitive technologies and without benefit of domesticated plants and animals. GE credit: SS, WC, WE. Effective: 2016 Fall Quarter.

ANT 179—Asian Prehistory (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ANT 003 recommended. Survey of the prehistory of Asia from the earliest human occupations to the rise of complex societies. Special focus on fossil and archeological records. GE credit: SS. Effective: 2016 Fall Quarter.

ANT 180—Zooarchaeology (4)
Discussion/Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): ANT 001 or ANT 003 recommended. Restricted to junior or senior standing. Theories and methods for studying animal skeletal remains from archaeological sites. Identification and quantification of zooarchaeological material, cultural and natural processes affecting animal bones pre- and postburial, and use of faunal remains for determining past human diets and past environments. GE credit: SE. Effective: 2016 Fall Quarter.

ANT 181—Archaeological Field Methods (4)
Discussion/Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): ANT 003 Survey of archeological field methods and techniques. Strategies for survey and site location, mapping of artifacts and features, geophysical techniques, and hand excavation and analysis of stratigraphy. GE credit: DD, SE, SL, SS. Effective: 2017 Fall Quarter.

ANT 181L—Field Course in Archeological Methods (4)
Fieldwork—5 sessions; Lecture/Discussion—5 sessions. Prerequisite(s): ANT 181; or Consent of Instructor. On-site course using archaeological methods and techniques held at a field location in the western United States, generally California or Nevada. Incorporates basic methods of archaeological survey, mapping, and excavation. GE credit: SE. Effective: 2017 Summer Special Session.

ANT 182—Archaeometry (4)
Discussion/Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): ANT 003 recommended. Scientific techniques used to study the chemical and physical properties of archaeological materials. Types of anthropological questions that can be addressed with different methods. Preparation and analysis of archaeological materials. GE credit: QL, SE, VL, WE. Effective: 2016 Fall Quarter.

ANT 183—Laboratory in Archeological Analysis (4) Review all entries
Laboratory—6 hours; Lecture—2 hours. Prerequisite(s): Consent of Instructor. ANT 003 recommended. Limited enrollment. Museum preparation, advanced field investigation, and guidance in preparation of museum material for publication. May be repeated for credit with consent of instructor. GE credit: OL, QL, SE, WE. Effective: 2016 Fall Quarter.

ANT 183—Laboratory in Archeological Analysis (4) Review all entries
Laboratory—4 hours; Lecture—2 hours; Project (Term Project). Prerequisite(s): Consent of Instructor. ANT 003 recommended. Limited enrollment. Museum preparation, advanced field investigation, and guidance in preparation of museum material for publication. GE credit: QL, SE, WE. Effective: 2019 Winter Quarter.

ANT 184—Prehistoric Technology: The Material Aspects of Prehistoric Adaptation (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ANT 003 recommended. Examination of the role of lithic, ceramic, textile and wooden implements as elements in prehistoric survival and development. Emphasis is descriptive, but the significance of material resources as factors in prehistoric adaptation, settlement patterns, and culture change are discussed. GE credit: SS, WE. Effective: 2016 Fall Quarter.

ANT 185—Lithic Analysis (4)
Lecture/Lab—4 hours. Prerequisite(s): ANT 003 recommended. Basic concepts of lithic analysis. General introduction on the place of stone tool technology in the archeological record. Physics, terminology and
methodological concepts behind the study of stone tools. Review of the development of stone tool technology from its emergence. GE credit: SS. Effective: 2016 Fall Quarter.

**ANT 186A—Museum Studies: Analysis of Native American Basketry (4)**
Discussion/Laboratory—1 hour; Lecture/Lab—3 hours. Class size limited to 25 students. Study of ethnographic and prehistoric basketry from North America, especially California and Oregon, in a multidisciplinary anthropological context. Techniques for basketry attribution and textile analysis. GE credit: ACGH, AH, DD, OL, SS, VL, WE. Effective: 2015 Fall Quarter.

**ANT 191—Topics in Anthropology (4)**
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Upper division standing. Intensive treatment of a special anthropological topic or problem. May be repeated for credit. Effective: 2017 Fall Quarter.

**ANT 192—Internship in Anthropology (1-12)**
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Upper division standing. Work experience off and on campus in all subject areas offered in the Department of Anthropology under the supervision of a member of the faculty. Limited to Anthropology majors. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 1997 Winter Quarter.

**ANT 194H—Special Study for Honors Students (1-5)**
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. Open only to majors of senior standing who qualify for honors program. Independent study of an anthropological problem involving the writing of an honors thesis. May be repeated for a total of 12 units. May be repeated up to 12 unit(s). (P/NP grading only.) GE credit: WE. Effective: 1997 Winter Quarter.

**ANT 197T—Tutoring in Anthropology (1-5)**
Tutorial—1-5 hours. Prerequisite(s): Upper division standing with major in Anthropology and consent of Department Chairperson. Leading of small voluntary discussion groups affiliated with one of the department's regular courses. May be repeated for credit. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

**ANT 198—Directed Group Study (1-5)**
Discussion—3 hours. Prerequisite(s): Consent of Instructor. Directed reading and group discussion of selected anthropological problems. (P/NP grading only.) Effective: 1997 Winter Quarter.

**ANT 199—Special Study for Advanced Undergraduates (1-5)**
Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

**ANT 200—History of Anthropology (4)**
Lecture/Discussion—2 hours; Term Paper. Historical development of socio-cultural theory within anthropology, from mid-19th to mid-20th Centuries. Focus on original theory texts in context of historical developments in the field as a whole. Effective: 2007 Fall Quarter.

**ANT 201—Critical Readings in Ethnography (4)**
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate student in Anthropology or consent of instructor. Critical readings of selected ethnographies that examine a wide range of important topics and analytical issues in social and cultural anthropology. Emphasis on how and why ethnographic writing has changed over time and its relationship with contemporary theoretical explorations. Effective: 2005 Spring Quarter.

**ANT 202—History and Theory of Biological Anthropology (4)**
Seminar—3 hours; Term Paper. History of thought in biological anthropology and analysis of major theoretical problems in the field. Suggested for all first-year graduate students lacking intensive preparation in biological anthropology. Effective: 1997 Winter Quarter.

**ANT 203—History and Theory of Archaeology (4)**
Seminar—3 hours; Term Paper. Generally restricted to graduate students; outstanding undergraduates with extensive training in archaeology with consent of instructor. History of archaeology and archaeological theory and analysis of archaeological research methodology. Effective: 2005 Fall Quarter.

**ANT 204—Contemporary Issues in Anthropological Theory (4)**
Seminar—3 hours; Term Paper. Prerequisite(s): ANT 002; ANT 137; or Consent of Instructor. Advanced consideration of fundamental issues in anthropological theory. Emphasis on critical examination of major contemporary debates between proponents of competing theories. Effective: 1997 Winter Quarter.

**ANT 205—History and Theory in Anthropological Linguistics (4)**
Seminar—3 hours; Term Paper. History of thought in anthropological linguistics. Consideration of the historical
development of fundamental ideas in anthropological linguistics, of major theoretical issues, and of research methodology. Effective: 1997 Winter Quarter.

ANT 206—Research Design and Method in Social Anthropology (5)
Seminar—4 hours. Prerequisite(s): Consent of Instructor. Formulation of research problems and preparation of research proposals; relationships between theory and method, funding, pre-fieldwork preparations, entering the community, field research techniques, and problems of ethics; intensive work on proposal writing. May be repeated up to 1 time(s). Effective: 1997 Winter Quarter.

ANT 207—Ethnographic Writing (4)
Seminar—3 hours; Term Paper. Prerequisite(s): ANT 137; ANT 201; Or the equivalent. Relationship between conducting participant observation of others and writing it up, emphasizing the processual rift between the reality of fieldwork and its written representation. Study of various literary genres and textual strategies used in cultural anthropology. May be repeated for credit. Effective: 1997 Winter Quarter.

ANT 210—Aspects of Culture Structure (4)
Seminar—3 hours; Term Paper. Analysis of various phases of culture, such as religion, economics, law, and folklore. May be repeated for credit when topic differs. May be repeated for credit. Effective: 1997 Winter Quarter.

ANT 212—Political Ecology (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Interdisciplinary seminar evaluating contributions from ecological anthropology, political economy, cultural constructivism, postmodernism, and feminism towards development of theories of political ecology. Historical relationships between local/global power structures, environmental degradation, and resistance movements. Case studies of desertification, deforestation, mining, conservation, development. Effective: 1999 Spring Quarter.

ANT 216—Problems in Archeological Method (4)
Seminar—3 hours; Term Paper. Techniques for analyzing archeological data; application to various prehistoric cultures. May be repeated for credit with consent of instructor. May be repeated for credit. Effective: 1997 Winter Quarter.

ANT 217—Quantitative Modeling in Archaeology (4)
Lecture/Discussion—3 hours; Term Paper. Examination of the nature of archaeological data with a focus on the quantitative and statistical techniques available to model, analyze, display, and make sense of such data. Effective: 2007 Fall Quarter.

ANT 218—Topics in New World Prehistory (4)
Seminar—3 hours; Term Paper. Advanced study on current problems in New World Prehistory and archaeology. May be repeated for credit only if material is unique for that student and with consent of instructor. May be repeated for credit. Effective: 2008 Fall Quarter.

ANT 219—Topics in Old World Prehistory (4)
Seminar—3 hours; Term Paper. Advanced study on current problems in Old World prehistory and archaeology. May be repeated for credit only if material is unique for that student and with consent of instructor. Effective: 2008 Fall Quarter.

ANT 220—Field Course in Linguistics (4)
Laboratory—2 hours; Seminar—2 hours. Prerequisite(s): ANT 110; ANT 111 Techniques of eliciting, recording, and analyzing; work with a native speaker. Effective: 1997 Winter Quarter.

ANT 221—Rural Transformation in Postcolonial Societies (4)
Seminar—3 hours; Term Paper. Prerequisite(s): ANT 223; ANT 265; or Consent of Instructor. Problems of rural transformation arising out of political and economic interaction between national elites and rural regional and local populations under varying conditions of induced change in postcolonial societies. Attention will be given to the implications of this interaction for rapid economic growth. May be repeated for credit. Effective: 1997 Winter Quarter.

ANT 222—Cities and Citizenship (4)
Seminar—3 hours; Term Paper—1 hour. Prerequisite(s): Consent of Instructor. Graduate standing. Explores the nature of modern cities, urban socioeconomic life, and urban culture and politics from an anthropological perspective. Effective: 2000 Fall Quarter.
ANT 223—Economic Anthropology (4)
Seminar—3 hours; Term Paper. Prerequisite(s): ANT 122; or Consent of Instructor. Selected current methodological and theoretical problems in the analysis of nonindustrial economic systems. Effective: 1997 Winter Quarter.

ANT 224—Problems in Comparative Religion (4)

ANT 225—State and Nation in the Modern World (4)
Seminar—3 hours; Term Paper. A presentation of current anthropological theories of the origins and nature of the modern nation-state in both the First and Third Worlds, with special reference to state ideology (nationalism) and forms of control. Effective: 1997 Winter Quarter.

ANT 226—Consciousness and Resistance (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Completion of first-year graduate work or consent of instructor. Consideration of approaches to the study of social inequality, and responses of subordinated groups. Emphasis on situating approaches to contemporary social theory, concrete research problems, and political strategies. Topics: formation of consciousness and identity; collective action, accommodation to frontal resistance. Effective: 1997 Winter Quarter.

ANT 228—Culture and Power (4)
Extensive Writing; Seminar—3 hours. Prerequisite(s): Graduate standing or consent of instructor. Exploration of one of the core paradigms within contemporary anthropological inquiry, "culture and power." Focus on how distinct theoretical perspectives--Marxism, post-Marxism, structuralism, post-structuralism, and feminism--have examined the mutually constitutive nature of culture and power. Effective: 1999 Fall Quarter.

ANT 229—Gender, Identity, and Self (4)
Seminar—3 hours; Term Paper—1 hour. Intersections of gender, identity, and selfhood cross-culturally and historically. How the self is feminized and masculinized, and interfaces with sexual, race, class, work, national, minority, and majority identities under different historical, cultural, and social structural conditions. May be repeated for credit. Effective: 1997 Winter Quarter.

Lecture—1.5 hours; Seminar—1.5 hours; Term Paper. Prerequisite(s): Graduate standing in one of the social sciences including History. Comparative examination of family systems in historical context and of reproductive behaviors and strategizing. A major theme is how family-system norms specify the relative desirability of differently configured offspring sets. Cases are drawn from Western Europe and South and East Asia. Effective: 1997 Winter Quarter.

ANT 232—Political Movements (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Completion of first-year graduate work recommended. An interdisciplinary approach to political movements of protest, reform, and revolution emphasizing historical comparison and evaluation of major theoretical approaches including world systems, resource mobilization, state and culture, rational choice, moral economy, social class and gender. Effective: 1997 Winter Quarter.

ANT 239—Problems in African Society and Culture (4)

ANT 241—Topics in North American Ethnology (4)
Seminar—3 hours; Term Paper. Advanced study on current problems in North American ethnography and culture history. May be repeated for credit with consent of instructor. May be repeated for credit. Effective: 1997 Winter Quarter.

ANT 245—Ethnology of Northern and Central Asia (4)
Seminar—3 hours; Term Paper. Prerequisite(s): A reading knowledge of German, Russian, Chinese, or Japanese. Lectures on the culture aboriginally found north of the Caucasus-Korea line. Supervised study of the primary and secondary sources. Work with informants when available. Effective: 1997 Winter Quarter.

ANT 246—Ethnology of Europe (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Reading knowledge of a European language other than English. Supervised study of the primary and secondary sources dealing with the ethnography and ethnology of the peoples of Europe. Emphasis upon folk, peasant, and minority groups. Effective: 1997 Winter Quarter.
ANT 248—Topics in Chinese Culture and Society (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing in the social sciences, history, or the humanities. 
Selected topics in the anthropology of Chinese society. Focus on one or more of the following topics: state-society 
 dynamics, family and gender, city formation and urban life, social movement, labor politics, and religion and 
 ideology in Chinese society. May be repeated for credit when topic differs. Effective: 1999 Fall Quarter.

ANT 250—Behavioral Ecology of Primates (4)
Seminar—3 hours; Term Paper. Prerequisite(s): ANT 154A (can be concurrent); Or the equivalent, graduate standing. 
Concepts, issues, and hypotheses in primate behavioral ecology, with emphasis on the social and ecological 
 determinants and consequences of variation in social organization for individuals. Effective: 2003 Fall Quarter.

ANT 252—Human Evolution Seminar (4)
Seminar—3 hours; Term Paper. Prerequisite(s): ANT 152; and Consent of Instructor. Or the equivalent of ANT 152. 
Study of selected topics in human evolutionary studies. Each year course will focus on one or more of the following: 
molecular evolution, primate evolutionary biology, Tertiary hominoids, Australopithecus, Homo erectus, archaic 
Homo sapiens, brain evolution. May be repeated for credit. May be repeated for credit. Effective: 1997 Winter 
Quarter.

ANT 253—Seminar in Human Biology (4)
Seminar—3 hours; Term Paper. Prerequisite(s): ANT 153; ANT 157; or Consent of Instructor. Study of selected topics 
in human biology. May be repeated for credit when topics vary. Effective: 1997 Winter Quarter.

ANT 254—Current Issues in Primate Sociobiology (4)
Seminar—3 hours; Term Paper. Prerequisite(s): ANT 154B; Or the equivalent. Analysis of primate behavior, with 
particular emphasis on preparation for field studies. May be repeated for credit when topic differs. May be repeated 
for credit. Effective: 1997 Winter Quarter.

ANT 256—Primate Conservation Biology (4)
Seminar—3 hours; Term Paper. Prerequisite(s): ANT 154; Graduate standing, or upper division undergraduates with 
consent of instructor. Class size limited to 10 students. Application of understanding of primate biology to 
conservation of primates and their habitat. Topics include evolutionary anthropology, behavioral ecology, 
biogeography, macroecology, population biology, and socio-ecology of primates. May be repeated up to 1 time(s) 
term paper differs. (S/U grading only.) Effective: 2003 Spring Quarter.

ANT 261—Modeling the evolution of social behavior (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): MAT 016C; or Consent of Instructor. Or equivalent of 
MAT 016C. Tools and topics in modeling the evolution of social behavior in humans and other animals. Game 
theory, basic population genetics, animal conflict, altruism, reciprocity, signaling, and group selection. Effective: 
2003 Spring Quarter.

ANT 262—Evolution and Human Behavior (4)
Discussion—3 hours; Term Paper. Prerequisite(s): Graduate standing, or consent of instructor. Exploration of the 
links between behavioral ecological theory and human cultural variation, focusing on reproduction, marriage, 
parental investment and family structure; implications of evolutionary theory for social organization in human 
communities, historical and contemporary. Effective: 2005 Spring Quarter.

ANT 263—Human Applications of Foraging Theory (4)
Discussion—3 hours; Laboratory—3 hours. Foraging theory models and their use in ethnographic and 
archaeological analyses of human behavior, with a focus on hunter-gatherers and resource selection, patch use, 
population and habitat, central places, sharing, stochastic processes, population dynamics, and conservation 
behavior. Not open for credit to students who have completed ANT 258. Effective: 2004 Fall Quarter.

ANT 265—Language, Performance, and Power (4)
Seminar—3 hours; Term Paper. Restricted to graduate standing or consent of instructor. Exploration of the 
intersection between linguistic and social theories in the language-state relation and the performance of identity. 
Ideological sources of language differentiation; nation-building and linguistic difference. Political economic, 
sociolinguistic, and ethnographic approaches to understanding linguistic inequality. (Same course as LIN 265.) 
Effective: 2003 Fall Quarter.

ANT 270—Anthropology Colloquium Seminar (1)
Seminar—1 hour. Reports and discussions of recent advances in the four subfields of anthropology. To be presented 
by guest speakers. May be repeated twice for credit. May be repeated up to 2 time(s). (S/U grading only.) Effective: 
1997 Winter Quarter.
ANT 280—Current Anthropology Journal Editorial Workshop (4)
Independent Study—3 hours; Workshop—1 hour. Prerequisite(s): Consent of Instructor. Students must enroll for all three quarters. Reading and offering workshop critiques of manuscripts submitted for publication, and reading and discussion of other relevant work in anthropology and human ecology. Track and edit published comments and authors’ replies that accompany major features. Participation in the development of new sections for the electronic edition of the journal, including a "news and views" section and a debate section. May be repeated up to 12 unit(s) with consent of instructor. (Same course as ECL 280.) (S/U grading only.) Effective: 2000 Fall Quarter.

ANT 291—Advanced Topics in Human Behavioral Ecology (4)
Discussion—3 hours; Term Paper. Prerequisite(s): ANT 261 or ANT 262 or ANT 263; and Consent of Instructor. Or comparable experience in anthropology or related disciplines. Topically focused, critical discussion of current and emerging research in the field of human behavioral ecology, giving special attention to theory, concepts, models, and methods for the evolutionary analysis of ethnographic and archaeological evidence. May be repeated up to 1 time(s) the topic differs and the material covered is substantially different. Effective: 2004 Fall Quarter.

ANT 292—Seminar in Linguistic Anthropology (4)
Seminar—3 hours; Term Paper—1 hour. Selected topics in linguistic anthropology. May be repeated for credit when topic differs. May be repeated for credit. Effective: 1997 Winter Quarter.

ANT 298—Group Study (1-4)
Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

ANT 299—Research (1-12)
Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

ANT 299D—Dissertation Research (1-12)
Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

ANT 390—Teaching Anthropology (4)
Practice—1 hour; Seminar—3 hours. Prerequisite(s): Graduate standing in Anthropology or closely related discipline. Intellectual and practical elements of college teaching in the field of Anthropology, from curriculum design and the syllabus through grading and course evaluations, including classroom and information technology methods, and problems and rewards of teaching in higher education. Effective: 2004 Fall Quarter.

ANT 396—Teaching Assistant Training Practicum (1-4)
Variable—3-36 hours. Prerequisite(s): Graduate standing. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

Applied Biological Systems Technology

Applied Biological Systems Technology | ABT Information
(College of Agricultural and Environmental Sciences)
Faculty. http://bae.engineering.ucdavis.edu/faculty-directory/

Applied Biological Systems Technology | ABT Courses

Courses in ABT:

ABT 015—Wood Properties and Fabrication (2)
Laboratory—3 hours; Lecture/Discussion—1 hour. Study of wood properties and techniques for fabrication with wood. Gain experience working with various woods and woodworking tools for specific applications. (P/NP grading only.) GE credit: OL, QL, SE, VL. Effective: 2010 Fall Quarter.

ABT 016—Metal Properties and Fabrication (2)
Laboratory—3 hours; Lecture—1 hour. Study of metal properties and of techniques for fabricating in metal. Physical principles, design considerations, effects of techniques on quality and appearance, and evaluation procedures. Experience in working with metal. (P/NP grading only.) GE credit: QL, SE, VL. Effective: 1997 Spring Quarter.

ABT 017—Plastic Properties and Fabrication (2)
Laboratory—3 hours; Lecture—1 hour. Study of the properties of plastic materials and the fundamentals of fabrication techniques. Experience in working with common plastics, with applications to biological systems. (P/NP grading only.) GE credit: QL, SE, VL. Effective: 1997 Winter Quarter.
ABT 049—Field Equipment Operation (2)
Laboratory—3 hours; Lecture—1 hour. Operation, adjustment, and troubleshooting of farm tractors and field equipment. Principles of operation, equipment terminology and uses of tilling, cultivating, thinning, and planting equipment. Typical sequences in cropping practices. (P/NP grading only.) GE credit: QL, SE, VL. Effective: 1997 Spring Quarter.

ABT 052—Field Equipment Welding (2)
Laboratory—3 hours; Lecture—1 hour. Prerequisite(s): ABT 016; or Consent of Instructor. Intermediate welding to include hardfacing and inert gas welding. Class projects on repair and fabrication by welding. Troubleshooting and major repair of field equipment. (P/NP grading only.) GE credit: QL, SE, VL. Effective: 2000 Winter Quarter.

ABT 098—Directed Group Study (1-5)
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

ABT 099—Special Study for Lower Division Students (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

ABT 101—Engine Technology (3)
Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): Upper division standing or consent of instructor. Principles of 2-stroke cycle, 4-stroke cycle gasoline and 4-stroke cycle diesel engine construction and operation. Engine systems, performance, troubleshooting, and overhaul. GE credit: QL, SE, VL. Effective: 2000 Winter Quarter.

ABT 110L—Experiments in Food Engineering (2)
Laboratory—6 hours. Prerequisite(s): FST 110B (can be concurrent) Use of temperature sensors; measurement of thermal conductivity and heat transfer in foods; refrigeration, freezing, concentration and dehydration of foods. GE credit: QL, SE, VL, WE. Effective: 1997 Spring Quarter.

ABT 121—Animal Housing and Environment Management (2)
Lecture—2 hours. Prerequisite(s): ANS 001 or ANS 002 Optimal structures and environments for animal growth and comfort; heat and moisture transfer principles; heating, cooling, ventilating principles and equipment; animal housing design; environmental regulations and waste management practices. GE credit: SE. Effective: 1997 Spring Quarter.

ABT 142—Equipment and Technology for Small Farms (2)
Laboratory—3 hours; Lecture—1 hour. Types and characteristics of agricultural equipment and technologies appropriate for small commercial farming. Adjustment and calibration of equipment. Selection of and budgeting for equipment. (Same course as IAD 142.) GE credit: QL, SE, VL. Effective: 1997 Spring Quarter.

ABT 150—Introduction to Geographic Information Systems (4)
Laboratory—3 hours; Lecture—3 hours. Pass One restricted to Landscape Architecture and Sustainable Environmental Design majors. Basic concepts, principles, and methods of GIS are presented. Data structures, database design, GIS data creation, GPS, and spatial analysis. Not open for credit to students who have completed ABT 180/PLS 180 or ABT 181N. (Same course as LDA 150.) GE credit: SE, VL. Effective: 2018 Winter Quarter.

ABT 161—Water Quality Management for Aquaculture (3)
Lecture—3 hours. Prerequisite(s): BIS 001B; MAT 016B; CHE 002B Basic principles of water chemistry and water treatment processes as they relate to aquacultural systems. GE credit: QL, SE, SL, VL. Effective: 1997 Spring Quarter.

ABT 163—Aquaculture Systems Engineering (3)
Lecture—3 hours. Prerequisite(s): ABT 161 Design of aquacultural systems: design methodology, principles of fluid mechanics, site selection and facility planning, management operations, computer modeling. GE credit: OL, QL, SE, SL, VL, WE. Effective: 1997 Spring Quarter.

ABT 165—Irrigation Practices for an Urban Environment (2)
Lecture—2 hours. Prerequisite(s): PHY 001A Basic design, installation, and operation principles of irrigation systems for turf and landscape: golf courses, parks, highways, public buildings, etc. Emphasis on hardware association with sprinkler and drip/trickle systems. GE credit: QL, SE, VL. Effective: 1997 Spring Quarter.

ABT 181N—Concepts and Methods in Geographic Information Systems (4)
Lecture/Lab—8 hours. Prerequisite(s): ABT 150; LDA 150; or Consent of Instructor. Data representation and analysis in geographic information systems (GIS). Creation of spatial data sets from analog and digital sources such as aerial
photography and maps; data structures, data management, database design, georeferencing, georectification, surface models, analysis, and spatial data visualization. GE credit: SE, SL, VL. Effective: 2018 Winter Quarter.

ABT 182—Environmental Analysis Using GIS (4)
Laboratory—4 hours; Lecture—2 hours. Prerequisite(s): ABT 150 or LDA 150; Or equivalent GIS experience and skills; general biology and/or ecology courses are recommended. Ecosystem and landscape modeling with emphasis on hydrology and solute transport. Spatial analysis of environmental risk analysis including ecological risk assessment, natural resource management. Spatial database structures, scripting, data models, and error analysis in GIS. (Same course as HYD 182.) GE credit: QL, SE, SL, VL. Effective: 2018 Winter Quarter.

ABT 190C—Research Conference for Advanced Undergraduates (1)
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Research conferences for specialized study in applied biological systems technology. May be repeated for credit. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

ABT 192—Internship in Applied Biological Systems Technology (1-5)
Internship—3-15 hours. Prerequisite(s): Consent of Instructor. Upper division standing; approval of project prior to period of internship. Supervised internship in applied biological systems technology. May be repeated for credit. May be repeated for credit. GE credit: SE. Effective: 1997 Winter Quarter.

ABT 197T—Tutoring in Applied Biological Systems Technology (1-5)
Tutorial. Prerequisite(s): Consent of Instructor. Upper division standing. Tutoring individual students, leading small voluntary discussion groups, or assisting the instructor in laboratories affiliated with one of the department's regular courses. May be repeated for credit if topic differs. (P/NP grading only.) GE credit: SE. Effective: 2004 Spring Quarter.

ABT 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

ABT 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

ABT 212—Path to Zero Net Energy (4)
Review all entries
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): EBS 216; or Consent of Instructor. Open to upper division or graduate students. Zero Net Energy concepts and social, technical, economic, and environmental considerations. Multidisciplinary research and analysis for clients. Effective: 2017 Fall Quarter.

ABT 212—Path to Zero Net Energy (4)
Review all entries
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): Consent of Instructor. Open to upper division or graduate students. Zero Net Energy concepts and social, technical, economic, and environmental considerations. Multidisciplinary research and analysis for clients. Effective: 2018 Fall Quarter.

ABT 233—Pest Control Practices (3)
Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): Graduate standing or consent of instructor. Practical and theoretical considerations of pest control systems and techniques. Design, selection, and use of mechanical systems for field, orchard, greenhouse, and vector control use. Biological, legal, and environmental considerations in pest control and pesticide application. Effective: 2001 Winter Quarter.

ABT 289A—Selected Topic in Applied Biological Systems Technology: Agricultural and Natural Resources (1-5)
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. Special topic. May be repeated for credit. Effective: 2015 Fall Quarter.

ABT 289B—Selected Topics in Applied Biological Systems Technology: Biotechnology (1-5)
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. Special topic. May be repeated for credit. Effective: 2015 Fall Quarter.

ABT 289C—Selected Topics in Applied Biological Systems Technology: Food Technology (1-5)
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. Special topic. May be repeated for credit. Effective: 2015 Fall Quarter.

ABT 290C—Graduate Research Conference (1)
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Research problems, progress, and techniques in applied biological systems technology. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.
ABT 298—Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

ABT 299—Research (1-12)
Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

ABT 317—Teaching Agricultural Mechanics (2)
Laboratory—3 hours; Lecture—1 hour. Prerequisite(s): A course in physics; 6 units related to agricultural mechanics; enrolled in Agricultural Education Teacher Credential Program. Preparation of the teacher to plan, organize, and conduct an agricultural mechanics program in secondary schools. Development of and presentation of lesson plans and teaching aids. Review of subject matter in metal fabrication, power and machinery and agricultural structures areas. Effective: 1997 Spring Quarter.

Applied Computing & Information Systems Minor; Plant Sciences

Applied Computing & Information Systems Minor; Plant Sciences | Applied Computing & Information Systems Minor

(College of Agricultural and Environmental Sciences)

Advising Center is located in 1220 Plant and Environmental Sciences; 530-752-1715.

This minor is for students interested in applying modern computer technology to management problems in agriculture, resource management, and other areas. Course work provides knowledge of the use of information technology and the methodology of applied quantitative and systems analysis. The minor is offered by the Department of Plant Sciences.

Minor Advisor. T. R. Famula (Animal Science)

Applied Computing and Information Systems

Choose two or three: With prior consultation with an advisor, students can petition in advance to accept other relevant courses toward the minor program.

- PLS 120 Applied Statistics in Agricultural Sciences 4
- ANS 128 Agricultural Applications of Linear Programming 4

The third course may be taken in substitution for a course from either of the elective groups. Remainder of the units to be made up of courses in one or both of the following elective groups:

- With prior consultation with an advisor, students can petition in advance to accept other relevant courses toward the minor program.

Computer Applications, Computer Assisted Analysis in Data Manipulation:

- ARE 106 Econometric Theory and Applications 4
- ARE 155 Operations Research and Management Science 4
- ABT 182 Environmental Analysis Using GIS 4
- ECN 102 Analysis of Economic Data 4
- ECS 124 Theory and Practice of Bioinformatics 4
- HYD 182 Environmental Analysis using GIS 4
- IAD 170 Program Development for International Agriculture 4

Communication and Business Organization:

- ARE 112 Fundamentals of Organization Management 4
- CMN 130 Group Communication 4
- CMN 136 Organizational Communication 4

Total: 18

Applied Mathematics (Graduate Group)

Applied Mathematics (Graduate Group) | Applied Mathematics (Graduate Group)

Information
Group Office. 1130 Mathematical Sciences Bldg.; 530-752-8130; studentservices@math.ucdavis.edu; http://appliedmath.ucdavis.edu/

Faculty. The Group includes approximately 90 faculty members, of whom about one-third are in the Department of Mathematics. Membership comprises chemists, biologists, physicists, geologists, statisticians, computer scientists, and engineers. Research interests include biology, atmospheric sciences, mechanics, solid and fluid dynamics, optimization and control, theoretical chemistry, computer and engineering sciences, mathematical physics, signal and image processing, harmonic analysis, numerical analysis and nonlinear partial differential equations. A complete list of faculty and their research areas are available at http://appliedmath.ucdavis.edu/people.

Applied Mathematics (Graduate Group) | Applied Mathematics M.S.

Group Office. 1130 Mathematical Sciences Bldg.; 530-752-8130; studentservices@math.ucdavis.edu; http://appliedmath.ucdavis.edu/

Faculty. The Group includes approximately 90 faculty members, of whom about one-third are in the Department of Mathematics. Membership comprises chemists, biologists, physicists, geologists, statisticians, computer scientists, and engineers. Research interests include biology, atmospheric sciences, mechanics, solid and fluid dynamics, optimization and control, theoretical chemistry, computer and engineering sciences, mathematical physics, signal and image processing, harmonic analysis, numerical analysis and nonlinear partial differential equations. A complete list of faculty and their research areas are available at http://appliedmath.ucdavis.edu/people.

Graduate Study. Students prepare for careers where mathematics is applied to problems in the physical and life sciences, engineering, and management. The degree requirements consist of rigorous training in applied mathematics, including course work and a research dissertation under the direction of a member of the Graduate Group in Applied Mathematics. The M.S. degree provides preparation for further study in applied mathematics or an application area, or for a career in industry or public service. The Ph.D. degree provides preparation for a career in research and/or teaching, or in industrial or national research laboratories. For further information, please contact studentservices@math.ucdavis.edu or 530-752-8130.

The Master of Science degree is offered only en route to the Ph.D.

New applicants are admitted to the fall quarter only.

Preparation. The program admits qualified students with a bachelor's degree in mathematics, physics, chemistry, engineering, economics, the life sciences and related fields. General and advanced mathematics GRE scores are required, and applicants should display evidence of strong quantitative skills. Undergraduate courses should include calculus (including vector calculus), linear algebra, and ordinary differential equations. Advanced calculus (introduction to real analysis) is strongly recommended. Additional background in probability, partial differential equations, and/or numerical analysis is a plus. The ability to program in a high-level computer programming language (e.g., C, Fortran, MATLAB, Python, R, etc.) is assumed.

Graduate Advisor. Contact the Student Services Office at 530-752-8130 or at studentservices@math.ucdavis.edu.

Courses. For a list of the courses in applied mathematics and mathematics, see Mathematics.

Applied Mathematics (Graduate Group) | Applied Mathematics Ph.D.

Group Office. 1130 Mathematical Sciences Bldg.; 530-752-8130; studentservices@math.ucdavis.edu; http://appliedmath.ucdavis.edu/

an application area, or for a career in industry or public service. The Ph.D. degree provides preparation for a career in research and/or teaching, or in industrial or national research laboratories. For further information, please contact studentservices@math.ucdavis.edu or 530-752-8130.

The Master of Science degree is offered only en route to the Ph.D.

New applicants are admitted to the fall quarter only.

**Preparation.** The program admits qualified students with a bachelor's degree in mathematics, physics, chemistry, engineering, economics, the life sciences and related fields. General and advanced mathematics GRE scores are required, and applicants should display evidence of strong quantitative skills. Undergraduate courses should include calculus (including vector calculus), linear algebra, and ordinary differential equations. Advanced calculus (introduction to real analysis) is strongly recommended. Additional background in probability, partial differential equations, and/or numerical analysis is a plus. The ability to program in a high-level computer programming language (e.g., C, Fortran, MATLAB, Python, R, etc.) is assumed.

**Graduate Advisor.** Contact the Student Services Office at 530-752-8130 or at studentservices@math.ucdavis.edu.

**Courses.** For a list of the courses in applied mathematics and mathematics, see Mathematics.

**Applied Mathematics; Mathematics**

**Applied Mathematics; Mathematics | Applied Mathematics B.S.**

(College of Letters and Science)

Abigail Thomspn, Ph.D., Chairperson

**Department Office.** 1130 Mathematical Sciences Bldg.; 530-752-0827; studentservices@math.ucdavis.edu; http://www.math.ucdavis.edu

**Faculty.** https://www.math.ucdavis.edu/people/faculty/

**The Major Programs**

Mathematics is the study of abstract structures, space, change, and the interrelations of these concepts. It also is the language of the exact sciences.

**The Program.** Students majoring in mathematics may follow a program leading to either the Bachelor of Arts or the Bachelor of Science degree. After completing basic introductory courses such as calculus and linear algebra, students plan an upper division program in consultation with a faculty advisor. Upper division courses include real analysis, probability, modern algebra, as well as a variety of other courses that allow students to further mathematical knowledge and skills that feature their research or career interests. This individualized program can lead to graduate study in pure or applied mathematics, elementary or secondary level teaching, or to other professional goals. It can also reflect a special interest such as computational and applied mathematics, computer science, or statistics, or may be combined with a major in some other field.

**Career Alternatives.** A degree in mathematics provides entry to many careers in industry in addition to teaching. For instance, operations research, data analysis, systems analysis, computing, actuarial work, insurance, and financial services are only a few such careers. Mathematics is also a sound basis for graduate work in a variety of fields, such as law, engineering, and economics.

**Recommended Language Preparation.** Bachelor of Science degree candidates are advised, but not required, to satisfy the same language requirement as that for a Bachelor of Arts degree candidate, and to fulfill it in French, German, or Russian.

**Major Advisors.** For a current list of faculty and staff advisors, see https://www.math.ucdavis.edu/undergrad/advising/advisers/ or contact the Student Services office at studentservices@math.ucdavis.edu.

**Depth Subject Matter Requirements.** The upper division course offering is grouped into core and enrichment courses. The core classes are intended to provide basic mathematical techniques, whereas the enrichment choices allow students to further mathematical knowledge and skills that feature their research or career interests. Certain mathematically oriented courses given by other departments are admissible in partial satisfaction of the depth subject matter requirements with prior departmental approval. Before graduating, students also complete a
mathematics capstone, which can be satisfied by completing an undergraduate thesis, an approved internship, or one of the approved capstone courses.

**Statement of Objectives.** As early as possible, but no later than the last quarter of the sophomore year or no later than the beginning of the first quarter of the junior year for transfer students, each prospective mathematics major, in consultation with an advisor, should file a formal program of study in one of the majors offered in mathematics. Forms to be used for this are available on OASIS (students.ucdavis.edu), our website or from the Department office. Failure to file a formal program could lead to a delay in graduation.

**Information for Undergraduates.** Assistance in planning an undergraduate major program in mathematics is available on our website, as well as by consulting an advisor. Information about the Department's advisors can be found on our website: https://www.math.ucdavis.edu/undergrad/advising/advisers/.

**Mathematics Placement Requirement.** Students who wish to enroll in MAT 012, 016A, 017A, 021A, 021AH, and 021M must satisfy the mathematics placement requirement by taking an online exam. Students who do not satisfy the requirement will be administratively dropped from these courses. For more information, including preparation tips and how to access the online exam, please see the Department of Mathematics' website, at http://www.math.ucdavis.edu/undergrad/math_placement, well in advance of enrolling.

**Department Honors.** Students who have completed at least 135 units with a minimum GPA of 3.500 in courses counted towards their major will be considered for Department Honors.

Students who meet the minimum GPA requirement for honors at graduation for the College of Letters and Science and who complete a senior project as part of MAT 194 or 199 units in consultation with their faculty adviser may also be recommended by the department for graduation with High Honors or Highest Honors. Recommendations will be based on evaluations of students' academic achievements in their major and the quality of their senior project. For complete details, see our website at https://www.math.ucdavis.edu/undergrad/honors/.

**Teaching Credential Subject Representative.** Dr. Ali Dad-del

**Graduate Study.** The Department offers programs of study and research leading to the M.A. and Ph.D. degrees in Mathematics. Information regarding graduate study may be obtained by consulting our website, and by sending an email to studentservices@math.ucdavis.edu.

Applied Mathematics; Mathematics | MAT Courses

Note: Mathematics 016A, 016B, and 016C are intended for students who will take no more Mathematics courses. Mathematics 017A, 017B, and 017C have the same level of rigor as 016A, 016B, and 016C, yet are much more broad mathematically (containing algebra, differential equations and probability, besides traditional calculus), and are intended for biology.

Courses in MAT:

MAT 000B—Elementary Algebra (no credit) (0)
Lecture—3 hours. Not open to Concurrent student enrollment. Basic concepts of algebra, including polynomials, factoring, equations, graphs, and inequalities. Offered only if sufficient number of students enroll. (P/NP grading only.) Effective: 1997 Winter Quarter.

MAT 000C—Trigonometry (no credit) (0)
Lecture—2 hours. Not open to Concurrent student enrollment. Basic concepts of trigonometry, including trigonometric functions, identities, inverse functions, and applications. Offered only if sufficient number of students enroll. (P/NP grading only.) Effective: 1997 Winter Quarter.

MAT 000D—Intermediate Algebra (no credit) (0)
Lecture—3 hours. Not open to Concurrent student enrollment. Basic concepts of algebra, prepares student for college work in mathematics, such as course 16A or 21A. Functions, equations, graphs, logarithms, and systems of equations. Offered only if sufficient number of students enroll. (P/NP grading only.) Effective: 1997 Winter Quarter.

MAT 012—Precalculus (3)
Lecture—3 hours. Prerequisite(s): Two years of high school algebra, plane geometry, plane trigonometry; and obtaining required score on the Precalculus Diagnostic Examination. Topics selected for their use in calculus, including functions and their graphs, slope, zeroes of polynomials, exponential, logarithmic and trigonometric functions, sketching surfaces and solids. Not open for credit to students who have completed any of courses MAT 016A, MAT 016B, MAT 016C, MAT 017A, MAT 017B, MAT 017C, MAT 021A, MAT 021B, or MAT 021C with a C- or better. GE credit: QL, SE, SL. Effective: 2012 Winter Quarter.

MAT 016A—Short Calculus (3)
Lecture—3 hours. Prerequisite(s): Two years of high school algebra, plane geometry, plane trigonometry, and satisfying the Mathematics Placement Requirement. Limits; differentiation of algebraic functions; analytic geometry; applications, in particular to maxima and minima problems. Not open for credit to students who have completed MAT 017B, MAT 017C, MAT 021A, MAT 021B, or MAT 021C; only 2 units of credit to students who have completed MAT 17A. GE credit: QL, SE, SL. Effective: 2012 Winter Quarter.

MAT 016B—Short Calculus (3)
Lecture—3 hours. Prerequisite(s): MAT 016A C- or better or MAT 017A C- or better or MAT 021A C- or better or MAT 021AH C- or better Integration; calculus for trigonometric, exponential, and logarithmic functions; applications. Not
open for credit to students who have completed MAT 017C, MAT 021B, or MAT 021C; only 2 units of credit to students who have completed MAT 017B. GE credit: QL, SE, SL. Effective: 2017 Winter Quarter.

MAT 016C—Short Calculus (3)
Lecture—3 hours. Prerequisite(s): MAT 016B C- or better or MAT 017B C- or better or MAT 021B C- or better or MAT 021BH C- or better Differential equations; partial derivatives; double integrals; applications; series. Not open for credit to students who have completed MAT 021C; only 2 units of credit to students who have completed MAT 017C. GE credit: QL, SE, SL. Effective: 2017 Winter Quarter.

MAT 017A—Calculus for Biology and Medicine (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Two years of high school algebra, plane geometry, plane trigonometry, and analytical geometry, and satisfying the Mathematics Placement Requirement. Introduction to differential calculus via applications in biology and medicine. Limits, derivatives of polynomials, trigonometric, and exponential functions, graphing, applications of the derivative to biology and medicine. Not open for credit to students who have completed MAT 016B, MAT 016C, MAT 021A, MAT 021B, or MAT 021C; only 2 units of credit to students who have completed MAT 016A. GE credit: QL, SE, SL. Effective: 2014 Fall Quarter.

MAT 017B—Calculus for Biology and Medicine (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MAT 016A C- or better or MAT 017A C- or better or MAT 021A C- or better or MAT 021AH C- or better Introduction to integral calculus and elementary differential equations via applications to biology and medicine. Fundamental theorem of calculus, techniques of integration including integral tables and numerical methods, improper integrals, elementary first order differential equations, applications in biology and medicine. Not open for credit to students who have completed MAT 016C, MAT 021B, or MAT 021C; only 2 units of credit for students who have completed MAT 016B. GE credit: QL, SE, SL. Effective: 2017 Winter Quarter.

MAT 017C—Calculus for Biology and Medicine (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MAT 017B C- or better Matrix algebra, functions of several variables, partial derivatives, systems of differential equations, and applications to biology and medicine. Not open for credit to students who have completed MAT 21C; only 2 units of credit to students who have completed MAT 16C. GE credit: SE, SL. Effective: 2016 Fall Quarter.

MAT 021A—Calculus (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Two years of high school algebra, plane geometry, plane trigonometry, and analytical geometry, and satisfying the Mathematics Placement Requirement. Functions, limits, continuity. Slope and derivative. Differentiation of algebraic and transcendental functions. Applications to motion, natural growth, graphing, extrema of a function. Differentials. L'Hopital's rule. Not open for credit to students who have completed MAT 016B, MAT 016C, MAT 017B, or MAT 017C; only 2 units of credit to students who have completed MAT 016A or MAT 017A. GE credit: QL, SE, SL. Effective: 2012 Winter Quarter.

MAT 021AH—Honors Calculus (4)
Lecture/Discussion—4 hours. Prerequisite(s): A Precalculus Diagnostic Examination score significantly higher than the minimum for MAT 021A is required. More intensive treatment of material covered in course 21A. GE credit: QL, SE. Effective: 1997 Winter Quarter.

MAT 021AL—Emerging Scholars Program Calculus Workshop (2)
Workshop—6 hours. Prerequisite(s): MAT 021A (can be concurrent); MAT 021A required concurrently. Functions, limits, continuity. Slope and derivative. Same course content as course 21A. Enrollment for students in the Emerging Scholars Program by instructor's invitation only. (P/NP grading only.) GE credit: SE. Effective: 2006 Fall Quarter.

MAT 021B—Calculus (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (MAT 021A C- or better or MAT 021AH C- or better) or MAT 017A B or better Continuation of course 21A. Definition of definite integral, fundamental theorem of calculus, techniques of integration. Application to area, volume, arc length, average of a function, improper integral, surface of revolution. Only 2 units of credit to students who have completed MAT 016B, MAT 016C, MAT 017B, or MAT 017C. GE credit: QL, SE. Effective: 2017 Winter Quarter.

MAT 021BH—Honors Calculus (4)
Lecture/Discussion—4 hours. Prerequisite(s): MAT 021A B or better or MAT 021AH B or better More intensive treatment of material covered in course 21B. Students completing 21BH can continue with course 21CH or the regular 21C. GE credit: SE. Effective: 1997 Winter Quarter.
MAT 021BL—Emerging Scholars Program Calculus Workshop (2)
Workshop—6 hours. Prerequisite(s): MAT 021B (can be concurrent); Concurrent enrollment in MAT 021B.
Continuation of course 21A. Same course content as 21B. Enrollment for students in the Emerging Scholars Program by instructor's invitation only. (P/NP grading only.) GE credit: SE. Effective: 2016 Fall Quarter.

MAT 021C—Calculus (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MAT 016C C- or better or MAT 017C C- or better or MAT 021B C- or better or MAT 021BH C- or better or MAT 017B B or better; Continuation of course 21B. Sequences, series, tests for convergence, Taylor expansions. Vector algebra, vector calculus, scalar and vector fields. Partial derivatives, total differentials. Applications to maximum and minimum problems in two or more variables. Applications to physical systems. GE credit: QL, SE. Effective: 2017 Winter Quarter.

MAT 021CH—Honors Calculus (4)
Lecture/Discussion—4 hours. Prerequisite(s): MAT 021B B or better or MAT 021BH B or better More intensive treatment of material covered in course 21C. GE credit: SE. Effective: 1997 Winter Quarter.

MAT 021CL—Emerging Scholars Program Calculus Workshop (2)
Workshop—6 hours. Prerequisite(s): MAT 021C (can be concurrent); Concurrent enrollment in MAT 021C.
Continuation of course 21B. Same course content as course 21C. Enrollment for students in the Emerging Scholars Program by instructor's invitation only. (P/NP grading only.) GE credit: SE. Effective: 2016 Fall Quarter.

MAT 021D—Vector Analysis (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (MAT 021C C- or better or MAT 021CH C- or better) or MAT 017C B or better Continuation of course 21C. Definite integrals over plane and solid regions in various coordinate systems. Line and surface integrals. Green's theorem, St.oke's theorem, divergence theorem. GE credit: QL, SE. Effective: 2017 Winter Quarter.

MAT 022A—Linear Algebra (3)
Lecture—3 hours. Prerequisite(s): MAT 016C C- or better or MAT 017C C- or better or MAT 021C C- or better or MAT 021CH C- or better; (ENG 006 or EME 005 or MAT 022AL (can be concurrent)) Matrices and linear transformations, determinants, eigenvalues, eigenvectors, diagonalization, factorization. Not open for credit to students who have completed course 021A or MAT 021B. GE credit: QL, SE. Effective: 1997 Winter Quarter.

MAT 022A—Linear Algebra (3) Review all entries
Lecture—3 hours. Prerequisite(s): MAT 016C C- or better or MAT 017C C- or better or MAT 021C C- or better or MAT 021CH C- or better; (ENG 006 or EME 005 or ECH 060 or MAT 022AL (can be concurrent)) Matrices and linear transformations, determinants, eigenvalues, eigenvectors, diagonalization, factorization. Not open for credit to students who have completed course 021A. GE credit: QL, SE. Effective: 2018 Summer Session 1.

MAT 022AL—Linear Algebra Computer Laboratory (1)
Laboratory—3 hours. Prerequisite(s): MAT 016C or MAT 017C or MAT 021C or MAT 021CH Introduction to Matlab and its use in linear algebra. (P/NP grading only.) GE credit: QL, SE. Effective: 2017 Winter Quarter.

MAT 022B—Differential Equations (3)
Lecture—3 hours. Prerequisite(s): (MAT 022A C- or better or MAT 067 C- or better) Solutions of elementary differential equations. GE credit: QL, SE. Effective: 2016 Fall Quarter.

MAT 025—Advanced Calculus (4)
Lecture/Discussion—4 hours. Prerequisite(s): MAT 021C C- or better or MAT 021CH C- or better Introduction to the rigorous treatment of abstract mathematical analysis. Proofs in mathematics, induction, sets, cardinality; real number system, theory of convergence of sequences. Not open for credit to students who have completed former MAT 127A. GE credit: SE. Effective: 2017 Spring Quarter.

MAT 027A—Linear Algebra with Applications to Biology (4)
Laboratory—2 hours; Lecture—3 hours. Prerequisite(s): MAT 017C C- or better or MAT 021C C- or better or MAT 021CH C- or better Introduction to linear algebra with biological, medical, and bioengineering applications. Matrix
algebra, vector spaces, orthogonality, determinants, eigenvalues, eigenvectors, principal component analysis, singular value decomposition, and linear transformations. Computer labs cover mathematical and computational techniques for modeling biological systems. Only one unit of credit for students who have completed MAT 022A. (Same course as BIS 027A.) GE credit: SE. Effective: 2019 Winter Quarter.

MAT 027B—Differential Equations with Applications to Biology (4)
Laboratory—2 hours; Lecture—3 hours. Prerequisite(s): MAT 027A C- or better or (MAT 022A C- or better, (MAT 022AL C- or better or ENG 006 C- or better or EME 005 C- or better)) Solutions of differential equations with biological, medical, and bioengineering applications. First and second order linear equations, phase plane analysis, nonlinear dynamics, Laplace transforms, and the diffusion equation. Computer labs cover mathematical and numerical techniques for modeling biological systems. Only one unit of credit for students who have completed MAT 022B. (Same course as Cross-listed with BIS 027B.) GE credit: SE. Effective: 2019 Spring Quarter.

MAT 036—Fundamentals of Mathematics (3)
Lecture—3 hours. Prerequisite(s): Satisfaction of the Mathematics Placement Requirement. Introduction to fundamental mathematical ideas selected from the principal areas of modern mathematics. Properties of the primes, the fundamental theorems of arithmetic, properties of the rationals and irrationals, binary and other number systems. Not open for credit to students who have taken MAT 108. Effective: 2001 Winter Quarter.

MAT 067—Modern Linear Algebra (4)
Lecture/Discussion—4 hours. Prerequisite(s): MAT 021C C- or better or MAT 021CH C- or better Rigorous treatment of linear algebra; topics include vector spaces, bases and dimensions, orthogonal projections, eigenvalues and eigenvectors, similarity transformations, singular value decomposition and positive definiteness. Only one unit of credit to students who have completed MAT 022A. GE credit: SE. Effective: 2017 Winter Quarter.

MAT 071A—Explorations in Elementary Mathematics (3)
Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): Two years of high school mathematics. Weekly explorations of mathematical ideas related to the elementary school curriculum will be carried out by cooperative learning groups. Lectures will provide background and synthesize the results of group exploration. Effective: 1997 Winter Quarter.

MAT 071B—Explorations in Elementary Mathematics (3)
Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): Two years of high school mathematics. Weekly explorations of mathematical ideas related to the elementary school curriculum will be carried out by cooperative learning groups. Lectures will provide background and synthesize the results of group exploration. Effective: 1997 Winter Quarter.

MAT 089—Elementary Problem Solving (1)
Lecture—1 hour. Prerequisite(s): High school mathematics through precalculus. Solve and present solutions to challenging and interesting problems in elementary mathematics. May be repeated up to 1 time(s). (P/NP grading only.) Effective: 2001 Winter Quarter.

MAT 098—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

MAT 099—Special Study for Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

MAT 107—Probability and Stochastic Processes with Applications to Biology (4)
Laboratory—2 hours; Lecture—3 hours. Prerequisite(s): (MAT 027A C- or better or BIS 027A C- or better) or (MAT 022A C- or better, (MAT 022AL C- or better or ENG 006 C- or better or EME 005 C- or better)) Introduction to probability theory and stochastic processes with biological, medical, and bioengineering applications. Combinatorics, discrete and continuous random variables, Bayes’ formula, conditional probability, Markov chains, Poisson processes, and Brownian motion. Computer labs cover mathematical and computational modeling techniques. Only 2 units of credit for students who have completed MAT 135A or STA 131A. (Same course as BIS 107) GE credit: SE. Effective: 2019 Spring Quarter.

MAT 108—Introduction to Abstract Mathematics (4)
Lecture/Discussion—4 hours. Prerequisite(s): MAT 021B A rigorous treatment of mathematical concepts with emphasis on developing the ability to understand abstract mathematical ideas, to read and write mathematical concepts, and to prove theorems. Designed to serve as preparation for the more rigorous upper division courses. GE credit: SE. Effective: 2008 Spring Quarter.
MAT 111—History of Mathematics (4) **Review all entries**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 025 or MAT 067 or MAT 108 or MAT 114 or MAT 115A or MAT 141 or MAT 145; One of the courses mentioned; eight units of upper division Mathematics. History of mathematics from ancient times through the development of calculus. Mathematics from Arab, Hindu, Chinese and other cultures. Selected topics from the history of modern mathematics. GE credit: SE. Effective: 2010 Fall Quarter.

MAT 111—History of Mathematics (4) **Review all entries**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 025 or MAT 127A or MAT 067 or MAT 108 or MAT 114 or MAT 115A or MAT 141 or MAT 145; Eight units of upper division Mathematics. History of mathematics from ancient times through the development of calculus. Mathematics from Arab, Hindu, Chinese and other cultures. Selected topics from the history of modern mathematics. GE credit: SE. Effective: 2018 Fall Quarter.

MAT 114—Convex Geometry (4)
Lecture/Discussion—4 hours. Prerequisite(s): MAT 021C; (MAT 022A or MAT 067) Topics selected from the theory of convex bodies, convex functions, geometric inequalities, combinatorial geometry, and integral geometry. Designed to serve as preparation for the more rigorous upper-division courses. GE credit: SE. Effective: 2007 Winter Quarter.

MAT 115A—Number Theory (4)
Lecture/Discussion—4 hours. Prerequisite(s): MAT 021B Divisibility and related topics, diophantine equations, selected topics from the theory of prime numbers. Designed to serve as preparation for the more rigorous upper division courses. GE credit: QL, SE. Effective: 2006 Fall Quarter.

MAT 115B—Number Theory (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): MAT 115A; (MAT 022A or MAT 067) Euler function, Moebius function, congruences, primitive roots, quadratic reciprocity law. GE credit: QL, SE, SL. Effective: 2016 Fall Quarter.

MAT 116—Differential Geometry (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): MAT 021D; MAT 022B; (MAT 022A or MAT 067) Vector analysis, curves, and surfaces in three dimensions. GE credit: SE. Effective: 2017 Winter Quarter.

MAT 118A—Partial Differential Equations: Elementary Methods (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): MAT 021D; MAT 022B; (MAT 022A or MAT 067) Derivation of partial differential equations; separation of variables; equilibrium solutions and Laplace's equation; Fourier series; method of characteristics for the one dimensional wave equation. Solution of nonhomogeneous equations. GE credit: QL, SE. Effective: 2000 Fall Quarter.

MAT 118B—Partial Differential Equations: Eigenfunction Expansions (4)
Lecture—3 hours. Prerequisite(s): MAT 118A Sturm-Liouville Theory; selfadjoint operators; mixed boundary conditions; partial differential equations in two and three dimensions; Eigenvalue problems in circular domains; nonhomogeneous problems and the method of eigenfunction expansions; Poisson's Equations. GE credit: QL, SE. Effective: 2000 Fall Quarter.

MAT 118C—Partial Differential Equations: Green's Functions and Transforms (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): MAT 118B Green's functions for one-dimensional problems and Poisson's equation; Fourier transforms; Green's Functions for time dependent problems; Laplace transform and solution of partial differential equations. GE credit: QL, SE. Effective: 2000 Fall Quarter.

MAT 119A—Ordinary Differential Equations (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): MAT 021D; MAT 022B; (MAT 022A or MAT 067) Scalar and planar autonomous systems; nonlinear systems and linearization; existence and uniqueness of solutions; matrix solution of linear systems; phase plane analysis; stability analysis; bifurcation theory; Liapunov's method; limit cycles; Poincare Bendixson theory. GE credit: QL, SE. Effective: 2007 Winter Quarter.

MAT 119B—Ordinary Differential Equations (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): MAT 119A Lorentz equations; Poincare maps; center manifolds and normal forms; scalar and planar maps; phase space analysis for iterated maps; period-doubling bifurcation; Lyapunov exponent; chaos and symbolic dynamics; strange attractors; fractals. GE credit: QL, SE. Effective: 2007 Spring Quarter.

MAT 124—Mathematical Biology (4)
Lecture—3 hours; Project (Term Project). Prerequisite(s): MAT 022B; (MAT 022A or MAT 067) Methods of mathematical modeling of biological systems including difference equations, ordinary differential equations,
stochastic and dynamic programming models. Computer simulation methods applied to biological systems. Applications to population growth, cell biology, physiology, evolutionary ecology and protein clustering. MATLAB programming required. GE credit: QL, SE. Effective: 2007 Spring Quarter.

MAT 125A—Real Analysis (4)
Lecture/Discussion—4 hours. Prerequisite(s): MAT 025 Functions, limits of functions, continuity and uniform continuity, sequences of functions, series of real numbers, series of functions, power series. Not open for credit to students who have completed former MAT 127B. GE credit: SE. Effective: 2006 Fall Quarter.

MAT 125B—Real Analysis (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MAT 125A; (MAT 067 or (MAT 022A, MAT 108)) Theory of the derivative, Taylor series, integration, partial derivatives, Implicit Function Theorem. Not open for credit to students who have completed former MAT 127C. GE credit: SE. Effective: 2017 Winter Quarter.

MAT 127A—Real Analysis (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (MAT 021C or MAT 021CH); (MAT 067 or (MAT 022A, MAT 108) Real numbers, sequences, series, and continuous functions. May be repeated for credit. Effective: 2017 Fall Quarter.

MAT 127B—Real Analysis (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MAT 127A Derivatives, integrals, sequences of functions, and power series. Effective: 2017 Fall Quarter.

MAT 127C—Real Analysis (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MAT 127B Metric spaces and multi-variable calculus. Effective: 2017 Fall Quarter.

MAT 128A—Numerical Analysis (4) Review all entries
Lecture—3 hours; Project (Term Project). Prerequisite(s): MAT 021C; ECS 030 Error analysis, approximation, interpolation, numerical differentiation and integration. Programming in language such as Pascal, Fortran, or BASIC required. GE credit: QL, SE. Effective: 2016 Fall Quarter.

MAT 128B—Numerical Analysis in Solution of Equations (4) Review all entries
Lecture—3 hours; Project (Term Project). Prerequisite(s): MAT 021C; (ECS 032A or ENG 006 or EME 005 or ECS 030) Solution of nonlinear equations and nonlinear systems. Minimization of functions of several variables. Simultaneous linear equations. Eigenvalue problems. Linear programming. Programming in language such as Pascal, Fortran, or BASIC required. GE credit: QL, SE. Effective: 2016 Fall Quarter.

MAT 128C—Numerical Analysis in Differential Equations (4) Review all entries
Lecture—3 hours; Project (Term Project). Prerequisite(s): (MAT 022A or MAT 067); (ECS 032A or ENG 006 or EME 005 or ECS 030) Solution of ordinary and partial differential equations. Programming in language such as Pascal, Fortran, or BASIC required. GE credit: QL, SE. Effective: 2016 Fall Quarter.

MAT 128D—Fourier Analysis (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): MAT 021D; MAT 022B; (MAT 022A or MAT 067); MAT 025 Fourier series and integrals, orthogonal sets of functions. Topics selected from trigonometric approximation, orthogonal polynomials, applications to signal and image processing, numerical analysis, and differential equations. GE credit: QL, SE. Effective: 2016 Fall Quarter.
MAT 133—Mathematical Finance (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): (MAT 067 or (MAT 022A, MAT 108)), MAT 135A Analysis and evaluation of deterministic and random cash flow streams, yield and pricing of basic financial instruments, interest rate theory, mean-variance portfolio theory, capital asset pricing models, utility functions and general principles. MATLAB programming required. GE credit: QL, SE, SL. Effective: 2016 Fall Quarter.

MAT 135A—Probability (4)
Lecture/Discussion—4 hours. Prerequisite(s): MAT 021C; (MAT 108 or MAT 025) Probability space; discrete probability, combinatorial analysis; independence, conditional probability; random variables, discrete and continuous distributions, probability mass function, joint and marginal density functions; expectation, moments, variance, Chebyshev inequality; sums of random variables, random walk, large number law, central limit theorem. Not open for credit to students who have completed former MAT 131. GE credit: QL, SE. Effective: 2018 Spring Quarter.

MAT 135B—Stochastic Processes (4)
Discussion/Laboratory—4 hours. Prerequisite(s): MAT 135A; (MAT 022A or MAT 067) Generating functions, branching processes, characteristic function; Markov chains; convergence of random variables, law of iterated logarithm; random processes, Brownian motion, stationary processes, renewal processes, queuing theory, martingales. Not open for credit to students who have completed former MAT 132A. GE credit: QL, SE. Effective: 2009 Spring Quarter.

MAT 141—Euclidean Geometry (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MAT 021B; (MAT 022A or MAT 067) Axiomatic and analytic examination of Euclidean geometry from an advanced point of view. In particular, a discussion of its relation to other geometries. Designed to serve as preparation for the more rigorous upper division courses. GE credit: SE. Effective: 2018 Winter Quarter.

MAT 145—Combinatorics (4)
Lecture/Discussion—4 hours. Prerequisite(s): MAT 021C Combinatorial methods using basic graph theory, counting methods, generating functions, and recurrence relations. Designed to serve as preparation for the more rigorous upper division courses. GE credit: QL, SE. Effective: 2016 Fall Quarter.

MAT 146—Algebraic Combinatorics (4) Review all entries
Lecture/Discussion—4 hours. Prerequisite(s): MAT 145; MAT 025; (MAT 022A or MAT 067) Enumeration, Polya theory, generating functions, current topics in algebraic combinatorics. Not open for credit to students who have completed former course 149A. GE credit: SE. Effective: 2007 Spring Quarter.

MAT 146—Algebraic Combinatorics (4) Review all entries
Lecture/Discussion—4 hours. Prerequisite(s): (MAT 022A, MAT 108) or MAT 067); MAT 145 Enumeration, Polya theory, generating functions, current topics in algebraic combinatorics. Not open for credit to students who have completed former MAT 149A. GE credit: SE. Effective: 2018 Fall Quarter.

MAT 147—Topology (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): MAT 025 Basic notions of point-set and combinatorial topology. GE credit: SE. Effective: 2016 Fall Quarter.

MAT 148—Discrete Mathematics (4)
Lecture/Discussion—4 hours. Prerequisite(s): MAT 067 or (MAT 022A, MAT 108) Coding theory, error correcting codes, finite fields and the algebraic concepts needed in their development. Not open for credit to students who have completed former MAT 149B. GE credit: QL, SE. Effective: 2016 Fall Quarter.

MAT 150A—Modern Algebra (4)
Lecture/Discussion—4 hours. Prerequisite(s): MAT 067 or (MAT 022A, MAT 108) Basic concepts of groups, symmetries of the plane. Emphasis on the techniques used in the proof of the ideas (Lemmas, Theorems, etc.) developing these concepts. Precise thinking, proof writing, and the ability to deal with abstraction. GE credit: SE. Effective: 2016 Fall Quarter.

MAT 150B—Modern Algebra (4)
Lecture/Discussion—4 hours. Prerequisite(s): MAT 150A Bilinear forms, rings, factorization, modules. GE credit: SE. Effective: 2007 Winter Quarter.

MAT 150C—Modern Algebra (4)
Lecture/Discussion—4 hours. Prerequisite(s): MAT 150B Group representations, fields, Galois theory. GE credit: SE. Effective: 2007 Spring Quarter.
MAT 160—Mathematics for Data Analytics and Decision Making (4)
Lecture—3 hours; Project (Term Project). Prerequisite(s): MAT 167 Relational model; relational algebra, relational calculus, normal forms, functional and multivalued dependencies, separability. Cost benefit analysis of physical database design and reorganization. Performance via analytical modeling, simulation, and queueing theory. Block accesses; buffering; operating system contention; CPU intensive operations. GE credit: SE. Effective: 2018 Spring Quarter.

MAT 165—Mathematics and Computers (4)
Lecture—3 hours; Project (Term Project). Prerequisite(s): MAT 022A or MAT 067; (MAT 025 or MAT 108 or MAT 114 or MAT 115A or MAT 145) Introduction to computational mathematics, symbolic computation, and computer generated/verified proofs in algebra, analysis and geometry. Investigation of rigorous new mathematics developed in conjunction with modern computational questions and the role that computers play in mathematical conjecture and experimentation. GE credit: QL, SE. Effective: 2016 Fall Quarter.

MAT 167—Applied Linear Algebra (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): MAT 022A or MAT 067 Applications of linear algebra; LU and QR matrix factorizations, eigenvalue and singular value matrix decompositions. GE credit: QL, SE. Effective: 2016 Fall Quarter.

MAT 168—Optimization (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): MAT 021C; ((MAT 022A, MAT 108) or MAT 067)) Linear programming, simplex method. Basic properties of unconstrained nonlinear problems, descent methods, conjugate direction method. Constrained minimization. Programming language required. GE credit: QL, SE. Effective: 2016 Fall Quarter.

MAT 180—Special Topics (3)
Lecture—3 hours. Prerequisite(s): MAT 025; (MAT 067 or (MAT 022A, MAT 108)) Special topics from various fields of modern, pure, and applied mathematics. Some recent topics include Knot Theory, General Relativity, and Fuzzy Sets. May be repeated for credit when topics differs. GE credit: SE. Effective: 2016 Fall Quarter.

MAT 185A—Complex Analysis (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): (MAT 067 or (MAT 022A, MAT 108)), MAT 125A Complex number system, analyticity and the Cauchy-Riemann equations, elementary functions, complex integration, power and Laurent series expansions, residue theory. GE credit: SE. Effective: 2007 Spring Quarter.

MAT 185B—Complex Analysis (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): MAT 185A Analytical functions, elementary functions and their mapping properties, applications of Cauchy's integral theorem, conformal mapping and applications to heat flow and fluid mechanics. GE credit: SE. Effective: 2016 Fall Quarter.

MAT 189—Advanced Problem Solving (3)
Lecture—3 hours. Prerequisite(s): MAT 025; ((MAT 022A, MAT 108) or MAT 067) Solution and presentation of advanced problem solving techniques. Solve and present interesting and challenging problems of all areas of mathematics. GE credit: OL, QL, SE, WE. Effective: 2016 Fall Quarter.

MAT 192—Internship in Applied Mathematics (1-3)
Internship. Prerequisite(s): Consent of Instructor. Supervised work experience in applied mathematics. Final report. May be repeated up to 10 unit(s). (P/NP grading only.) Effective: 2016 Fall Quarter.

MAT 194—Undergraduate Thesis (3)
Independent Study. Prerequisite(s): Consent of Instructor. Independent research under supervision of a faculty member. Student will submit written report in thesis form. May be repeated for credit with consent of Vice Chairperson. (P/NP grading only.) GE credit: SE. Effective: 2016 Fall Quarter.

MAT 197C—Tutoring Mathematics in the Community (1-5)
Laboratory—2-6 hours; Seminar—1-2 hours. Prerequisite(s): Consent of Instructor. Special projects in mathematical education developing techniques for mathematics instruction and tutoring on an individual or small group basis. May be repeated once for credit. May be repeated up to 1 time(s). (P/NP grading only.) GE credit: SE. Effective: 2016 Fall Quarter.

MAT 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 2016 Fall Quarter.

MAT 199—Special Study for Advanced Undergraduates (1-5)
Variable. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.
MAT 200A—Problem-Solving in Analysis (1)
Extensive Problem Solving; Lecture—1 hour. Prerequisite(s): MAT 201A; MAT 201B; MAT 201C Problem-solving in graduate analysis: continuous functions, metric spaces, Banach and Hilbert spaces, bounded linear operators, the spectral theorem, distributions, Fourier series and transforms, Lp spaces, Sobolev spaces. May be repeated up to 2 time(s). Effective: 2010 Spring Quarter.

MAT 200B—Problem-Solving in Analysis (2)
Extensive Problem Solving; Lecture—1 hour. Prerequisite(s): MAT 201A; MAT 201B; MAT 201C Problem-solving in graduate analysis: continuous functions, metric spaces, Banach and Hilbert spaces, bounded linear operators, the spectral theorem, distributions, Fourier series and transforms, Lp spaces, Sobolev spaces. May be repeated up to 2 time(s). Effective: 2010 Fall Quarter.

MAT 201A—Analysis (4)

MAT 201B—Analysis (4)

MAT 201C—Analysis (4)

MAT 202—Functional Analysis (4)

MAT 205—Complex Analysis (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 185A; Or equivalent to MAT 185A, or consent of instructor. Analytic continuation, Riemann surfaces, conformal mappings, Riemann mapping theorem, entire functions, special functions, elliptic functions. Effective: 2009 Spring Quarter.

MAT 205A—Complex Analysis (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 185A; Or equivalent to MAT 185A, or consent of instructor. Cauchy's theorem, Cauchy's integral formulas, meromorphic functions, complex logarithm, entire functions, Weierstrass infinite product formula, the gamma and zeta functions, and prime number theorem. No credit given to students who have completed MAT 205. Effective: 2011 Fall Quarter.

MAT 205B—Complex Analysis (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 205A; or Consent of Instructor. Conformal mappings, the Schwarz lemma, analytic automorphisms, the Riemann mapping theorem, elliptic functions, Eisenstein series, the Jacobi theta functions, asymptotics, Bessel functions, the Airy function, topics on special functions and Riemann surfaces. May be repeated up to 2 time(s) if topic varies. Effective: 2011 Spring Quarter.

MAT 206—Measure Theory (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): MAT 125B Introduction to measure theory. The study of lengths, surface areas, and volumes in general spaces, as related to integration theory. Effective: 2007 Spring Quarter.

MAT 207A—Methods of Applied Mathematics (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): Graduate standing or consent of instructor.

MAT 207B—Methods of Applied Mathematics (4)

MAT 207C—Methods of Applied Mathematics (4)

MAT 215A—Topology (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): Graduate standing or consent of instructor. Fundamental group and covering space theory. Homology and cohomology. Manifolds and duality. CW complexes. Fixed point theorems. Effective: 2002 Fall Quarter.

MAT 215B—Topology (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): Graduate standing or consent of instructor. Fundamental group and covering space theory. Homology and cohomology. Manifolds and duality. CW complexes. Fixed point theorems. Effective: 2002 Fall Quarter.

MAT 215C—Topology (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): Graduate standing or consent of instructor. Fundamental group and covering space theory. Homology and cohomology. Manifolds and duality. CW complexes. Fixed point theorems. Effective: 2002 Fall Quarter.

MAT 216—Geometric Topology (4)

MAT 218A—Partial Differential Equations (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 201A; MAT 201B; MAT 201C; or Consent of Instructor. Year-long sequence on PDEs which covers linear transport, Laplace, heat, and wave equations, maximum principles, method of characteristics, Sobolev and Hölder space theory, weak derivatives, semilinear, quasilinear, and fully nonlinear elliptic/parabolic equations, nonlinear hyperbolic equations, and compensated compactness. Effective: 2009 Fall Quarter.

MAT 218B—Partial Differential Equations (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 218A; or Consent of Instructor. Year-long sequence on PDEs which covers linear transport, Laplace, heat, and wave equations, maximum principles, method of characteristics, Sobolev and Hölder space theory, weak derivatives, semilinear, quasilinear, and fully nonlinear elliptic/parabolic equations, nonlinear hyperbolic equations, and compensated compactness. Effective: 2010 Winter Quarter.

MAT 218C—Partial Differential Equations (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 218B; or Consent of Instructor. Year-long sequence on PDEs which covers linear transport, Laplace, heat, and wave equations, maximum principles, method of characteristics, Sobolev and Hölder space theory, weak derivatives, semilinear, quasilinear, and fully nonlinear elliptic/parabolic equations, nonlinear hyperbolic equations, and compensated compactness. Effective: 2010 Spring Quarter.

MAT 221A—Mathematical Fluid Dynamics (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 118B; or Consent of Instructor. Kinematics

**MAT 221B—Mathematical Fluid Dynamics (4)**

**MAT 222A—Numerical Methods: Fundamentals (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 128A; MAT 128B; Or equivalent, or consent of instructor; familiarity with some programming language. Fundamental principles and methods in numerical analysis, including the concepts of stability of algorithms and conditioning of numerical problems, numerical methods for interpolation and integration, eigenvalue problems, singular value decomposition and its applications. Effective: 2009 Fall Quarter.

**MAT 222B—Numerical Methods: Large-Scale Matrix Computations (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 167; Or equivalent, or consent of instructor; familiarity with some programming language. Numerical methods for large-scale matrix computations, including direct and iterative methods for the solution of linear systems, the computation of eigenvalues and singular values, the solution of least-squares problems, matrix compression, methods for the solution of linear programs. Effective: 2010 Winter Quarter.

**MAT 222C—Numerical Methods: Ordinary Differential Equations (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 022B; Or equivalent, or consent of instructor; familiarity with some programming language. Numerical methods for the solution of ordinary differential equations, including methods for initial-value problems and two-point boundary-value problems, theory of and methods for differential algebraic equations, dimension reduction of large-scale dynamical systems. Effective: 2010 Spring Quarter.

**MAT 227—Mathematical Biology (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): Graduate standing or consent of instructor. Nonlinear ordinary and partial differential equations and stochastic processes of cell and molecular biology. Scaling, qualitative, and numerical analysis of mathematical models. Applications to nerve impulse, chemotaxis, muscle contraction, and morphogenesis. Effective: 2002 Fall Quarter.

**MAT 228A—Numerical Solution of Differential Equations (4)**

**MAT 228B—Numerical Solution of Differential Equations (4)**

**MAT 228C—Numerical Solution of Differential Equations (4)**

**MAT 235A—Probability Theory (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 125B; (MAT 135A or STA 131A); or Consent of Instructor. Measure-theoretic foundations, abstract integration, independence, laws of large numbers, characteristic functions, central limit theorems. Weak convergence in metric spaces, Brownian motion, invariance principle. Conditional expectation. Topics selected from: martingales, Markov chains, ergodic theory. (Same course as STA 235A.) Effective: 2007 Fall Quarter.

**MAT 235B—Probability Theory (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 235A or STA 235A; or Consent of Instructor. Measure-theoretic foundations, abstract integration, independence, laws of large numbers, characteristic functions, central limit theorems. Weak convergence in metric spaces, Brownian motion, invariance principle. Conditional
expectation. Topics selected from: martingales, Markov chains, ergodic theory. (Same course as STA 235B.) Effective: 2008 Spring Quarter.

MAT 235C—Probability Theory (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 235B or STA 235B; or Consent of Instructor. Measure-theoretic foundations, abstract integration, independence, laws of large numbers, characteristic functions, central limit theorems. Weak convergence in metric spaces, Brownian motion, invariance principle. Conditional expectation. Topics selected from: martingales, Markov chains, ergodic theory. (Same course as STA 235C.) Effective: 2008 Spring Quarter.

MAT 236A—Stochastic Dynamics and Applications (4)

MAT 236B—Stochastic Dynamics and Applications (4)

MAT 239—Differential Topology (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): MAT 201A; or Consent of Instructor. Vector calculus, point-set topology; MAT 250A and MAT 250B is highly recommended. Topics include: differentiable manifolds, vector fields, transversality, Sard's theorem, examples of differentiable manifolds; orientation, intersection theory, index of vector fields; differential forms, integration, Stokes' theorem, deRham cohomology; Morse functions, Morse lemma, index of critical points. Effective: 2007 Spring Quarter.

MAT 240A—Differential Geometry (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 201A; MAT 239; MAT 250A and MAT 250B highly recommended; intended primarily for second-year graduate students. Riemannian metrics, connections, geodesics, Gauss lemma, convex neighborhoods, curvature tensor, Ricci and scalar curvature, connections and curvature on vector bundles. Effective: 2007 Fall Quarter.

MAT 240B—Differential Geometry (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 240A; Intended primarily for second-year graduate students. Jacobi fields, conjugate points, completeness, Hopf-Rinow theorem, Cartan-Hadamard theorem, energy, variation theorems and their applications, Rauch comparison theorem and its applications. Effective: 2009 Winter Quarter.

MAT 245—Enumerative Combinatorics (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): MAT 145; MAT 150; or the equivalent, or consent of instructor. Introduction to modern combinatorics and its applications. Emphasis on enumerative aspects of combinatorial theory. Effective: 2004 Fall Quarter.

MAT 246—Algebraic Combinatorics (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): MAT 245; or Consent of Instructor. Algebraic and geometric aspects of combinatorics. The use of structures such as groups, polytopes, rings, and simplicial complexes to solve combinatorial problems. Effective: 2005 Winter Quarter.

MAT 248A—Algebraic Geometry (4)

MAT 248B—Algebraic Geometry (4)

MAT 249—Problem-Solving in Algebra (3)
Extensive Problem Solving; Lecture—1 hour. Prerequisite(s): MAT 250A (can be concurrent); MAT 250B (can be concurrent) Problem-solving in graduate algebra: groups, rings, modules, matrices, tensor products,
representations, Galois theory, ring extensions, commutative algebra and homological algebra. (S/U grading only.) Effective: 2019 Fall Quarter.

MAT 249A—Problem-Solving in Algebra (1) **Review all entries**
Extensive Problem Solving; Lecture—1 hour. Prerequisite(s): MAT 250A; MAT 250B Problem-solving in graduate algebra: groups, rings, modules, matrices, tensor products, representations, Galois theory, ring extensions, commutative algebra and homological algebra. May be repeated up to 2 time(s). Effective: 2011 Spring Quarter.

MAT 249A—Problem-Solving in Algebra (1) **Review all entries Discontinued**
Extensive Problem Solving; Lecture—1 hour. Prerequisite(s): MAT 250A; MAT 250B Problem-solving in graduate algebra: groups, rings, modules, matrices, tensor products, representations, Galois theory, ring extensions, commutative algebra and homological algebra. May be repeated up to 2 time(s). Effective: 2019 Spring Quarter.

MAT 249B—Problem-Solving in Algebra (2) **Review all entries**
Extensive Problem Solving; Lecture—1 hour. Prerequisite(s): MAT 250A; MAT 250B Problem-solving in graduate algebra: groups, rings, modules, matrices, tensor products, representations, Galois theory, ring extensions, commutative algebra and homological algebra. May be repeated up to 2 time(s). Effective: 2011 Fall Quarter.

MAT 249B—Problem-Solving in Algebra (2) **Review all entries Discontinued**
Extensive Problem Solving; Lecture—1 hour. Prerequisite(s): MAT 250A; MAT 250B Problem-solving in graduate algebra: groups, rings, modules, matrices, tensor products, representations, Galois theory, ring extensions, commutative algebra and homological algebra. May be repeated up to 2 time(s). Effective: 2019 Fall Quarter.

MAT 250A—Algebra (4)

MAT 250B—Algebra (4)

MAT 250C—Algebra (4)

MAT 258A—Numerical Optimization (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 025; MAT 167 Numerical methods for infinite dimensional optimization problems. Newton and Quasi-Newton methods, linear and sequential quadratic programming, barrier methods; large-scale optimization; theory of approximations; infinite and semi-infinite programming; applications to optimal control, stochastic optimization and distributed systems. Effective: 2007 Fall Quarter.

MAT 258B—Discrete and Mixed-Integer Optimization (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 025; MAT 167; or Consent of Instructor. Combinatorial, integer, and mixed-integer linear optimization problems. Ideal and strong formulations, cutting planes, branch and cut, decomposition methods. Effective: 2014 Fall Quarter.

MAT 261A—Lie groups and their representations (4)

MAT 261B—Lie groups and their representations (4)
MAT 265—Mathematical Quantum Mechanics (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 201; or Consent of Instructor. Mathematical foundations of quantum mechanics: the Hilbert space and Operator Algebra formulations; the Schrödinger and Heisenberg equations, symmetry in quantum mechanics, basics of spectral theory and perturbation theory. Applications to atoms and molecules. The Dirac equation. Effective: 2003 Fall Quarter.

MAT 266—Mathematical Statistical Mechanics and Quantum Field Theory (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 265; or Consent of Instructor. Mathematical principles of statistical mechanics and quantum field theory. Topics include classical and quantum lattice systems, variational principles, spontaneous symmetry breaking and phase transitions, second quantization and Fock space, and fundamentals of quantum field theory. May be repeated up to 1 time(s). Effective: 2010 Spring Quarter.

MAT 271—Applied and Computational Harmonic Analysis (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): (MAT 125B or MAT 201C); (MAT 128B or MAT 167); MAT 129; Or the equivalent, or consent of instructor. Introduction to mathematical basic building blocks (wavelets, local Fourier basis, and their relatives) useful for diverse fields (signal and image processing, numerical analysis, and statistics). Emphasis on the connection between the continuum and the discrete worlds. Effective: 2007 Fall Quarter.

MAT 280—Topics in Pure and Applied Mathematics (3)
Lecture—3 hours. Prerequisite(s): Graduate standing. Special topics in various fields of pure and applied mathematics. Topics selected based on the mutual interests of students and faculty. May be repeated for credit when topic differs. May be repeated for credit May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

MAT 290—Seminar (1-6)
Seminar—1-6 hours. Advanced study in various fields of mathematics, including analysis, applied mathematics, discrete mathematics, geometry, mathematical biology, mathematical physics, optimization, partial differential equations, probability, and topology. May be repeated for credit. (S/U grading only.) Effective: 2003 Spring Quarter.

MAT 298—Group Study (1-5)

MAT 299—Individual Study (1-12)
Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

MAT 299D—Dissertation Research (1-12)
Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

MAT 301A—Mathematics Teaching Practicum (3)
Discussion—1 hour; Fieldwork—5 hours. Prerequisite(s): MAT 302A (can be concurrent); MAT 303A (can be concurrent); MAT 302A and MAT 303A required concurrently or consent of instructor. Specialist training in mathematics teaching. Teaching, training, and cross observing classes taught using large group Socratic techniques, small group guided inquiry experiences, and/or other approaches to teaching at various grade levels. Required for advanced degrees in mathematics education. May be repeated up to 1 time(s). Effective: 2001 Fall Quarter.

MAT 301B—Mathematics Teaching Practicum (3)
Discussion—1 hour; Fieldwork—5 hours. Prerequisite(s): MAT 302B (can be concurrent); MAT 303B (can be concurrent); MAT 302B and MAT 303B required concurrently or consent of instructor. Specialist training in mathematics teaching. Teaching, training, and cross observing classes taught using large group Socratic techniques, small group guided inquiry experiences, and/or other approaches to teaching at various grade levels. Required for advanced degrees in mathematics education. May be repeated up to 1 time(s). Effective: 2002 Winter Quarter.

MAT 301C—Mathematics Teaching Practicum (3)
Discussion—1 hour; Fieldwork—5 hours. Prerequisite(s): MAT 302C (can be concurrent); MAT 303B (can be concurrent); MAT 302C and MAT 303C required concurrently or consent of instructor. Specialist training in mathematics teaching. Teaching, training, and cross observing classes taught using large group Socratic techniques, small group guided inquiry experiences, and/or other approaches to teaching at various grade levels. Required for advanced degrees in mathematics education. May be repeated up to 1 time(s). Effective: 2002 Spring Quarter.
MAT 302A—Curriculum Development in Mathematics (1)
Lecture/Discussion—1 hour. Prerequisite(s): MAT 303A (can be concurrent); MAT 303A required concurrently or consent of instructor. Mathematics curriculum development for all grade levels. Required for advanced degrees in mathematics education. May be repeated up to 1 time(s). Effective: 2001 Fall Quarter.

MAT 302B—Curriculum Development in Mathematics (1)
Lecture/Discussion—1 hour. Prerequisite(s): MAT 303B (can be concurrent); MAT 303B required concurrently or consent of instructor. Mathematics curriculum development for all grade levels. Required for advanced degrees in mathematics education. May be repeated up to 1 time(s). Effective: 2002 Winter Quarter.

MAT 302C—Curriculum Development in Mathematics (1)
Lecture/Discussion—1 hour. Prerequisite(s): MAT 303C (can be concurrent); MAT 303C required concurrently or consent of instructor. Mathematics curriculum development for all grade levels. Required for advanced degrees in mathematics education. May be repeated for credit. Effective: 2002 Spring Quarter.

MAT 303A—Mathematics Pedagogy (1)
Lecture/Discussion—1 hour. Prerequisite(s): MAT 302A (can be concurrent) or MAT 210AL (can be concurrent); MAT 302A or MAT 210AL required concurrently or consent of instructor. An investigation of the interplay of mathematical pedagogy and mathematical content, including a historical survey of past and present methods in view of some of the influences that shaped their development. May be repeated up to 1 time(s). Effective: 2001 Fall Quarter.

MAT 303B—Mathematics Pedagogy (1)
Lecture/Discussion—1 hour. Prerequisite(s): MAT 302B (can be concurrent) or MAT 210BL (can be concurrent); MAT 302A or MAT 210AL required concurrently or consent of instructor. An investigation of the interplay of mathematical pedagogy and mathematical content, including a historical survey of past and present methods in view of some of the influences that shaped their development. May be repeated up to 1 time(s). Effective: 2002 Winter Quarter.

MAT 303C—Mathematics Pedagogy (1)
Lecture/Discussion—1 hour. Prerequisite(s): MAT 302C (can be concurrent) or MAT 210CL (can be concurrent); MAT 302C or MAT 210CL required concurrently or consent of instructor. An investigation of the interplay of mathematical pedagogy and mathematical content, including a historical survey of past and present methods in view of some of the influences that shaped their development. May be repeated up to 1 time(s). Effective: 2002 Spring Quarter.

MAT 390—Teaching Assistantship Training (3)
Lecture—3 hours. Prerequisite(s): Graduate standing in the Department of Mathematics. Experience in methods of assisting and teaching of mathematics at the university level. Includes discussion of lecturing techniques, running discussion sessions, holding office hours, preparing and grading of examinations, student-teacher interaction, and related topics. Required of departmental teaching assistants. (S/U grading only.) Effective: 2008 Fall Quarter.

MAT 399—Individual Study (2-4)
Discussion—1 hour; Independent Study—2-3 hours. Individual study of some aspect of mathematics education or a focused work on a curriculum design project under supervision of a faculty member in mathematics. May be repeated up to 1 time(s). (S/U grading only.) Effective: 2002 Spring Quarter.

The Major Program

From the smallest subatomic particles to atoms, molecules, stars, and galaxies, the study of physics is the study of what makes the universe work. Knowledge gained using atomic-scale microscopes and high-energy particle
accelerators and nuclear reactors teaches us not only what holds the atomic nucleus together but also how proteins function and why stars shine.

The Program. The Department of Physics offers a Bachelor of Arts in Physics and two Bachelor of Science degree programs: in Physics (which also offers an emphasis in Astrophysics), and in Applied Physics. The A.B. degree provides a broad coverage of classical and modern physics while permitting a broader liberal arts education than is possible with the other two programs. The B.S. degree in either Physics or Applied Physics should be followed by the student who plans to enter physics as a profession, and also provides excellent training for a wide variety of technical career options. The B.S. in Applied Physics provides the student with a solid introduction to a particular applied physics specialty. For the student who plans to enter the job market upon completing a B.S. degree, the applied physics orientation would be an asset. Either B.S. program provides a solid foundation in physics for the student interested in graduate work in either pure or applied physics.

Career Alternatives. Careers in physics and applied physics include research and development, either in universities, government laboratories, or industry; teaching in high schools, junior colleges, and universities; management and administration in industrial laboratories and in government agencies; and in production and sales in industry. A major in physics also provides a strong base for graduate-level work in such interdisciplinary areas as chemical physics, biophysics and medical physics, geophysics and environmental physics, astrophysics and astronomy, computer science, and materials science.

Graduate Study. The Department of Physics offers programs of study and research leading to the M.S. and Ph.D. degrees. Further information regarding requirements for these three degrees, graduate research, teaching assistantships, and research assistantships may be obtained by writing to the Chairperson, Department of Physics, One Shields Avenue, University of California, Davis, CA 95616.

## Program Variance

Similar courses from other departments may be substituted for courses in the depth subject matter requirements by obtaining prior written permission from the Undergraduate Curriculum Committee Chairperson.

**Total: 108-114**
Physics 001 is a two-quarter sequence requiring some mathematics (trigonometry). Either 001A alone or both quarters may be taken. The sequence is not intended to satisfy entrance requirements of a year of physics for professional schools, but will satisfy requirements of 3 or 6 units of physics.

Physics 007 is a one-year (three-quarter) introductory physics course with laboratory intended for students majoring in the biological sciences. It has a calculus prerequisite. If you don't want a full year of introductory physics, you should take one or two quarters of Physics 1 instead. Read the following information carefully if you are using Physics 007 to complete an introductory course you have already begun.

The sequence of material in Physics 007 is different from that in most traditionally taught introductory physics courses. Physics 007B is most like the first quarter or semester of traditionally taught courses which treat classical mechanics. Physics 007C is most like the last quarter or semester which, in traditionally taught courses, treats optics, electricity and magnetism, and modern physics. The content and sequence of Physics 007A is unlike that of most other traditionally taught courses.

If you have completed one introductory quarter or semester of a traditionally taught physics course and want to continue with Physics 007, you should first take (and will receive full credit for) Physics 007A. Then, either skip 007B, but self-study the last three weeks of material, or take 007B and receive reduced credit. Finally, take 007C for full credit.

If you have taken two quarters of a year-long introductory physics course and have not had extensive work in optics, electricity and magnetism, and modern physics, you should take Physics 007C. In no case should you take Physics 007B without first taking Physics 007A. All other situations should be discussed directly with a Physics 007 instructor.

Students not intending to take the entire sequence should instead take Physics 001.

Physics 009 is a four-quarter sequence using calculus throughout and including laboratory work as an integral component. The course is primarily for students in the physical sciences and engineering.

Physics 009H is a five-quarter honors physics sequence, which may be taken instead of Physics 009. It is intended primarily for first-year students with a strong interest in physics and with advanced placement in mathematics to Mathematics 021B. Students who plan to major in physics, and also motivated non-majors, should take Physics 009H instead of Physics 009 if they are ready to begin Mathematics 021B in fall quarter. In course requirements and prerequisites, Physics 009HA-009HE can be substituted for Physics 009A-009D. Students may not switch between the 009H and 009 series beyond 009HA or 009A.

Physics 010 is primarily a concept-oriented one-quarter lecture/discussion course requiring relatively little mathematical background.

Courses in PHY:

PHY 001A—Principles of Physics (3)
Lecture—3 hours. Prerequisite(s): Trigonometry or consent of instructor. Mechanics. Introduction to general principles and analytical methods used in physics with emphasis on applications in applied agricultural and biological sciences and in physical education. Not open to students who have received credit for PHY 007B or PHY 009A. GE credit: SE. Effective: 1997 Winter Quarter.

PHY 001B—Principles of Physics (3)
Lecture—3 hours. Prerequisite(s): PHY 001A or PHY 009A Not open for credit to students who have received credit for course 7A, 7B, 7C, 9B, 9C, or 9D. Continuation of course 1A. Heat, optics, electricity, modern physics. Not open for credit to students who have received credit for course 7A, 7B, 7C, 9B, 9C, or 9D. GE credit: SE. Effective: 1997 Winter Quarter.

PHY 007A—General Physics (4)
Discussion/Laboratory—5 hours; Lecture—1.5 hours. Prerequisite(s): MAT 016B (can be concurrent) or MAT 017B (can be concurrent) or MAT 021B (can be concurrent); Completion or concurrent enrollment in MAT 016B or MAT 017B or MAT 021B. Introduction to general principles and analytical methods used in physics for students majoring in a biological science. Only two units of credit allowed to students who have completed PHY 001B or PHY 009B. GE credit: SE. Effective: 2010 Winter Quarter.

PHY 007B—General Physics (4)
Discussion/Laboratory—5 hours; Lecture—1.5 hours. Prerequisite(s): PHY 007A Continuation of course 7A. Only two
units of credit allowed to students who have completed course 9A, or 1A. GE credit: SE. Effective: 1997 Winter Quarter.

**PHY 007C—General Physics (4)**
Discussion/Laboratory—5 hours; Lecture—1.5 hours. Prerequisite(s): PHY 007B Continuation of course 7B. Only two units of credit allowed to students who have completed course 9C or 5C. GE credit: SE. Effective: 1997 Winter Quarter.

**PHY 009A—Classical Physics (5) Review all entries**
Discussion—1 hour; Laboratory—2.5 hours; Lecture—3 hours. Prerequisite(s): MAT 021B; MAT 021M Introduction to general principles and analytical methods used in physics for physical science and engineering majors. Classical mechanics. Only 2 units of credit for students who have completed 1A or 7B. Not open for credit to students who have completed course 9HA. GE credit: SE. Effective: 2018 Winter Quarter.

**PHY 009B—Classical Physics (5)**
Discussion—1 hour; Laboratory—2.5 hours; Lecture—3.5 hours. Prerequisite(s): PHY 009A; MAT 021C; MAT 021D (can be concurrent) Continuation of course 9A. Fluid mechanics, thermodynamics, wave phenomena, optics. Only two units of credit for students who have completed PHY 007A; not open for credit to students who have completed PHY 007B, PHY 009HA, or ENG 105. GE credit: SE. Effective: 2004 Fall Quarter.

**PHY 009C—Classical Physics (5)**
Discussion—1 hour; Laboratory—2.5 hours; Lecture—3 hours. Prerequisite(s): PHY 009B; MAT 021D; MAT 022A (can be concurrent) Electricity and magnetism including circuits and Maxwell's equations. Only 3 units of credit for students who have completed PHY 007C; not open for credit to students who have completed PHY 009HD. GE credit: SE. Effective: 2003 Fall Quarter.

**PHY 009D—Modern Physics (4)**
Discussion—1.5 hours; Lecture—3 hours. Prerequisite(s): PHY 009C; MAT 022A; MAT 022B recommended (may be taken concurrently). Not open for credit to students who have completed course 9B, 9HC, or 9HE. Introduction to physics concepts developed since 1900. Special relativity, quantum mechanics, atoms, molecules, condensed matter, nuclear and particle physics. Not open for credit to students who have completed course 9HB, 9HC, or 9HE. GE credit: SE. Effective: 1999 Spring Quarter.

**PHY 009HA—Honors Physics (5)**
Discussion/Laboratory—4 hours; Lecture—3 hours. Prerequisite(s): MAT 021B (can be concurrent); or Consent of Instructor. Classical mechanics. Same material as course 9A in greater depth. For students in physical sciences, mathematics, and engineering. Only 2 units of credit for students who have completed PHY 007B; not open for credit to students who have completed PHY 009A. GE credit: SE. Effective: 2003 Fall Quarter.

**PHY 009HB—Honors Physics (5)**
Discussion/Laboratory—4 hours; Lecture—3 hours. Prerequisite(s): (PHY 009HA or PHY 009A); MAT 021C (can be concurrent) Special relativity, thermal physics. Continuation of course 9HA. Only 2 units of credit for students who have completed PHY 007A; not open for credit to students who have completed PHY 009B or PHY 009D. GE credit: SE. Effective: 2004 Winter Quarter.

**PHY 009HC—Honors Physics (5)**
Discussion/Laboratory—4 hours; Lecture—3 hours. Prerequisite(s): PHY 009HB; MAT 021D (can be concurrent) Waves, sound, optics, quantum physics. Continuation of Physics 9HB. Only 2 units of credit for students who have completed PHY 007C; not open for credit to students who have completed PHY 009B or PHY 009D. GE credit: SE. Effective: 2004 Spring Quarter.

**PHY 009HD—Honors Physics (5)**
Discussion/Laboratory—4 hours; Lecture—3 hours. Prerequisite(s): PHY 009HC; MAT 021D Electricity and magnetism. Continuation of Physics 9HC. Not open for credit to students who have completed PHY 009C. GE credit: SE. Effective: 2003 Fall Quarter.
PHY 009HE—Honors Physics (5)
Discussion/Laboratory—4 hours; Lecture—3 hours. Prerequisite(s): PHY 009HD; MAT 022B (can be concurrent)
Application of quantum mechanics. Not open for credit to students who have completed PHY 009D. GE credit: SE.
Effective: 2004 Winter Quarter.

PHY 010—Topics in Physics for Nonscientists (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): High school algebra. Emphasis varies: survey of basic
principles or a deeper exploration of some particular branch. Past topics included black holes, space time, and
relativity; physics of music; history and philosophy; energy and the environment; and natural phenomena. No units
of credit allowed if taken after any other PHY course. GE credit: SE. Effective: 1997 Winter Quarter.

PHY 010C—Physics of California (3)
Lecture—3 hours. Atmospheric phenomena common in CA, local weather patterns and microclimes. Applications to
CA energy, water, and resource management policies. Physics underlying regional sports in CA. Not open for credit
to students who have completed any quarter of PHY 009 or PHY 009H, or any upper division PHY course. GE
credit: SE, SL, VL. Effective: 2014 Fall Quarter.

PHY 010CY—Physics of California (3)
Discussion—1.5 hours; Web Electronic Discussion—0.5 hours; Web Virtual Lecture—1 hour. Conceptual
understanding of the physics underlying regional sports in CA. Focus on skiing, surfing, and scuba diving.
Atmospheric phenomena common in CA, local weather patterns and microclimes, applications to CA energy, and
water are also discussed. Not open for credit to students who have completed PHY 010C, any quarter of PHY 09A,
PHY 09B, PHY 09C, PHY 09D, PHY 09HA, PHY 09HB, PHY 009HC, PHY 009HD, or PHY 009HE, or any
upper division PHY course. GE credit: SE, SL, VL. Effective: 2017 Winter Quarter.

PHY 012—Visualization in Science (3)
Lecture—3 hours. Production, interpretation, and use of images in physics, astronomy, biology, and chemistry as
scientific evidence and for communication of research results. GE credit: SE, SL, VL. Effective: 2017 Winter Quarter.

PHY 030—Fractals, Chaos and Complexity (3)
Lecture/Discussion—3 hours. Prerequisite(s): MAT 016A or MAT 021A Modern ideas about the unifying ideas of
fractal geometry, chaos and complexity. Basic theory and applications with examples from physics, earth sciences,
mathematics, population dynamics, ecology, history, economics, biology, computer science, art and architecture.
(Same course as GEL 030.) GE credit: QL, SE. Effective: 2017 Winter Quarter.

PHY 040—Introduction to Physics Computation (4)
Laboratory—4 hours; Lecture—2 hours. Introduction to programming using C++ with examples from computational
physics. Introduction to modern tools used for scientific analysis, including Scientific computing with Python. GE
credit: SE. Effective: 2010 Winter Quarter.

PHY 049—Supplementary Work in Lower Division Physics (1-3)
Variable. Students with partial credit in lower division physics courses may, with consent of instructor, complete the
credit under this heading. May be repeated for credit. May be repeated for credit. GE credit: SE. Effective: 1999 Fall
Quarter.

PHY 080—Experimental Techniques (4)
Laboratory—5 hours; Lecture—2 hours. Prerequisite(s): PHY 009D or PHY 009HD Open to Physics and Applied
Physics majors only. Experimental techniques. Design of circuits. Data analysis, sources of noise, statistical and
systematic uncertainties. Light sources, detection, and measurement in basic optical systems. Effective: 2017 Fall
Quarter.

PHY 090X—Lower Division Seminar (2)
Seminar—2 hours. Prerequisite(s): Consent of Instructor. Lower division standing. Limited enrollment. Examination of
a special topic in Physics through shared readings, discussions, written assignments, or special activities such as
laboratory work. May be repeated for credit. GE credit: SE. Effective: 1998 Fall Quarter.

PHY 098—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Primary for lower division students. (P/NP grading only.) GE credit:
SE. Effective: 1997 Winter Quarter.

PHY 099—Special Study for Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.
PHY 102—Computational Laboratory in Physics (1)
Laboratory—4 hours. Prerequisite(s): MAT 021D; ECS 030; (PHY 009D or PHY 009HD); PHY 104A (can be concurrent); MAT 22AB; PHY 104A required concurrently. Introduction to computational physics and to the computational resources in the physics department. Preparation for brief programming assignments required in other upper division physics classes. Not open to students who have completed PHY 104B or PHY 105AL. GE credit: SE. Effective: 2008 Summer Session 1.

PHY 104A—Introductory Methods of Mathematical Physics (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): (PHY 009B C- or better, PHY 009C C- or better, PHY 009D C- or better); (MAT 021D C- or better, MAT 022A C- or better, MAT 022B C- or better); or Consent of Instructor. Introduction to the mathematics used in upper-division physics courses, including applications of vector spaces, Fourier analysis, partial differential equations. Effective: 2000 Fall Quarter.

PHY 104B—Computational Methods of Mathematical Physics (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): PHY 104A C- or better; PHY 105AL; or Consent of Instructor. Introduction to the use of computational techniques to solve the mathematical problems that arise in advanced physics courses, complementing the analytical approaches emphasized in course 104A. GE credit: SE. Effective: 2000 Fall Quarter.

PHY 104C—Intermediate Methods of Mathematical Physics (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): PHY 104A C- or better; or Consent of Instructor. Applications of complex analysis, conditional probability, integral transformations and other advanced topics. Effective: 2000 Fall Quarter.

PHY 105A—Analytical Mechanics (4)
Lecture—3 hours. Prerequisite(s): (PHY 009B C or better, PHY 009C C or better, PHY 009D C or better); (MAT 021D C or better, MAT 022A C or better, MAT 022B C or better); Or consent of department for any of the courses. Principles and applications of Newtonian mechanics; introduction to Lagrange’s and Hamilton’s equations GE credit: SE. Effective: 1999 Fall Quarter.

PHY 105B—Analytical Mechanics (4)
Lecture—3 hours. Prerequisite(s): PHY 104A C or better; PHY 105A C or better; Or consent of department for any of the courses. Principles and applications of Newtonian mechanics; introduction to Lagrange’s and Hamilton’s equations GE credit: SE. Effective: 1999 Fall Quarter.

PHY 105C—Continuum Mechanics (4)
Lecture—3 hours. Prerequisite(s): PHY 104A C- or better; PHY 105A C- or better; or Consent of Instructor. The continuum hypothesis and limitations, tensors, isotropic constitutive equations, and wave propagation. Applications such as elastic solids, heat flow, aerodynamics, and ocean waves. GE credit: SE. Effective: 2006 Spring Quarter.

PHY 108—Optics (3)
Lecture—3 hours. Prerequisite(s): (PHY 009A, PHY 009B, PHY 009C, PHY 009D) or (PHY 007A, PHY 007B, PHY 007C); (MAT 021A, MAT 021B, MAT 021C, MAT 021D); or Consent of Instructor. The phenomena of diffraction, interference, and polarization of light, with applications to current problems in astrophysics, material science, and atmospheric science. Study of modern optical instrumentation. Open to non-majors. GE credit: SE. Effective: 1997 Winter Quarter.

PHY 108L—Optics Laboratory (1)
Laboratory—3 hours. Prerequisite(s): PHY 108 (can be concurrent); PHY 108 required concurrently. The laboratory will consist of one major project pursued throughout the quarter, based on modern applications of optical techniques. GE credit: SE. Effective: 1997 Winter Quarter.

PHY 110A—Electricity and Magnetism (4) Review all entries
Lecture—3 hours. Prerequisite(s): PHY 009B C- or better; PHY 009C C- or better; PHY 009D C- or better; MAT 021D C- or better; MAT 022A C- or better; MAT 022B C- or better; PHY 104A; PHY 105A; or consent of department. Theory of electrostatics, electromagnetism, Maxwell's equations, electromagnetic waves. GE credit: SE. Effective: 2018 Winter Quarter.

PHY 110A—Electricity & Magnetism (4) Review all entries
Lecture—3 hours. Prerequisite(s): (PHY 009B C- or better, PHY 009C C- or better, PHY 009D C- or better) or (PHY 009HB C- or better, PHY 009HC C- or better, PHY 009HD C- or better, PHY 009HE C- or better); MAT 021D C- or better; MAT 022A C- or better; MAT 022B C- or better; PHY 104A; PHY 105A; or consent of department. Theory of
electrostatics, electromagnetism, Maxwell's equations, electromagnetic waves. GE credit: SE. Effective: 2019 Spring Quarter.

**PHY 110B—Electricity and Magnetism (4)**
Lecture—3 hours. Prerequisite(s): PHY 110A C- or better; PHY 104A C- or better; Or consent of department. Theory of electrostatics, electromagnetism, Maxwell's equations, electromagnetic waves. GE credit: SE. Effective: 2010 Winter Quarter.

**PHY 110C—Electricity and Magnetism (4)**
Lecture—3 hours. Prerequisite(s): PHY 110B C- or better; Or consent of department. Theory of electrostatics, electromagnetism, Maxwell's equations, electromagnetic waves. GE credit: SE. Effective: 2010 Winter Quarter.

**PHY 112—Thermodynamics and Statistical Mechanics (4)**
Lecture—3 hours. Prerequisite(s): PHY 115A; Or the equivalent. Introduction to classical and quantum statistical mechanics and their connections with thermodynamics. The theory is developed for the ideal gas model and simple magnetic models and then extended to studies of solids, quantum fluids, and chemical equilibria. GE credit: SE. Effective: 2000 Winter Quarter.

**PHY 115A—Foundation of Quantum Mechanics (4)**
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): PHY 104A C- or better; PHY 105A C- or better; Or consent of department. Introduction to the methods of quantum mechanics with applications to atomic, molecular, solid state, nuclear and elementary particle physics. Extensive problem solving. GE credit: SE. Effective: 2007 Winter Quarter.

**PHY 115B—Applications of Quantum Mechanics (4)**
Lecture—3 hours. Prerequisite(s): PHY 115A C- or better; Or consent of department. Angular momentum and spin; hydrogen atom and atomic spectra; perturbation theory; scattering theory. GE credit: SE. Effective: 1999 Fall Quarter.

**PHY 116A—Electronic Instrumentation (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): PHY 009C; MAT 022B; or Consent of Instructor. Experimental and theoretical study of important analog electronic circuits. Linear circuits, transmission lines, input impedance, feedback, amplifiers, oscillators, noise. GE credit: SE, VL. Effective: 2008 Fall Quarter.

**PHY 116B—Electronic Instrumentation (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): PHY 009C or PHY 009HD; or Consent of Instructor. Continuation of course 116A. Introduction to the use of digital electronics and microcomputers in experimental physics. Nonlinear electronics, integrated circuits, analog-to-digital and digital-to-analog converters, transducers, actuators. GE credit: SE. Effective: 2008 Spring Quarter.

**PHY 116C—Introduction to Computer-Based Experiments in Physics (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): PHY 009D or PHY 009HD; PHY 116B; MAT 022B; or Consent of Instructor. Introduction to techniques for making physical measurements using computer-based instrumentation. GE credit: SE, WE. Effective: 2004 Spring Quarter.

**PHY 122A—Advanced Laboratory in Condensed Matter Physics (4)**
Laboratory—8 hours. Prerequisite(s): PHY 104A; PHY 105A; PHY 110B; PHY 115A; PHY 112 (can be concurrent); Or consent of the department. Registration by Permission to Add (PTA) number only; priority given to graduating PHY and APP majors. Experimental techniques and measurements in solid-state physics. Student performs three to six experiments depending on difficulty. Individual work is stressed. Thorough write-ups of the experiments are required. GE credit: SE, WE. Effective: 2018 Winter Quarter.

**PHY 122B—Advanced Laboratory in Condensed Matter Physics (4)**
Laboratory—8 hours. Prerequisite(s): PHY 104A; PHY 105A; PHY 110B; PHY 115A; PHY 112 (can be concurrent); PHY 080; Or consent of the department. Registration by Permission to Add (PTA) number only; priority given to graduating PHY and APP majors. Experimental techniques and measurements in solid-state physics. Three-six experiments performed depending on difficulty. Individual work is stressed. Thorough write-ups of the experiments are required. GE credit: SE, WE. Effective: 2019 Winter Quarter.

**PHY 122B—Advanced Laboratory in Particle Physics (4)**
Laboratory—8 hours. Prerequisite(s): PHY 104A; PHY 105A; PHY 110B; PHY 115A; PHY 112 (can be concurrent); Or consent of the department. Registration by Permission to Add (PTA) number only; priority given to graduating PHY and APP majors. Experimental techniques and measurements in nuclear and particle physics. Students perform
three to six experiments depending on difficulty. Individual work is stressed. Thorough write-ups of the experiments are required. GE credit: SE, WE. Effective: 2018 Winter Quarter.

**PHY 122B—Advanced Laboratory in Particle Physics (4)**
Laboratory—8 hours. Prerequisite(s): PHY 104A; PHY 105A; PHY 110B; PHY 115A; PHY 112 (can be concurrent); PHY 080; Or consent of the department. Registration by Permission to Add (PTA) number only; priority given to graduating PHY and APP majors. Experimental techniques and measurements in nuclear and particle physics. Students perform three to six experiments depending on difficulty. Individual work is stressed. Thorough write-ups of the experiments are required. GE credit: SE, WE. Effective: 2019 Winter Quarter.

**PHY 123—Signals and Noise in Physics (4)**
Lecture—3 hours; Project (Term Project)—1 hour. Prerequisite(s): PHY 009A; PHY 009B; PHY 009C; PHY 009D; PHY 104A; or Consent of Instructor. Not open to students who have taken this course previously as course 198. Techniques of measurement and analysis designed to avoid systematic error and maximize signal/noise ratio. Illustrative examples of optimal filters ranging from condensed matter to cosmology. GE credit: SE. Effective: 2007 Winter Quarter.

**PHY 129A—Introduction to Nuclear Physics (4)**
Lecture—3 hours. Prerequisite(s): PHY 115A C- or better; or Consent of Instructor. Survey of basic nuclear properties and concepts requiring introductory knowledge of quantum mechanics: nuclear models and forces, radioactive decay and detecting nuclear radiation and nuclear reaction products, alpha, beta and gamma decay. GE credit: SE. Effective: 2000 Winter Quarter.

**PHY 129B—Nuclear Physics, Extensions and Applications (4)**
Lecture—3 hours; Term Paper. Prerequisite(s): PHY 129A Continuation of course 129A. Nuclear reactions, neutrons, fission, fusion accelerators, introduction to meson and particle physics, nuclear astrophysics, and applications of nuclear physics and techniques to mass spectrometry, nuclear medicine, trace element analysis. GE credit: SE. Effective: 1997 Winter Quarter.

**PHY 130A—Elementary Particle Physics (4)**
Lecture—3 hours. Prerequisite(s): PHY 115A C- or better; or Consent of Instructor. Properties and classification of elementary particles and their interactions. Experimental techniques. Conservation laws and symmetries. Strong, electromagnetic, and weak interactions. Introduction to Feynman calculus. GE credit: SE. Effective: 2000 Winter Quarter.

**PHY 130B—Elementary Particle Physics (4)**
Lecture—3 hours. Prerequisite(s): PHY 115A C- or better; or Consent of Instructor. Properties and classification of elementary particles and their interactions. Experimental techniques. Conservation laws and symmetries. Strong, electromagnetic, and weak interactions. Introduction to Feynman calculus. GE credit: SE. Effective: 2000 Winter Quarter.

**PHY 140A—Introduction to Solid State Physics (4)**
Lecture—3 hours. Prerequisite(s): PHY 115A C- or better; or Consent of Instructor. Or equivalent course passed with C- or better. Survey of fundamental ideas in the physics of solids, with selected device applications. Crystal structure, x-ray and neutron diffraction, phonons, simple metals, energy bands and Fermi surfaces, semiconductors, optical properties, magnetism, superconductivity. GE credit: SE. Effective: 2000 Winter Quarter.

**PHY 140B—Introduction to Solid State Physics (4)**
Lecture—3 hours. Prerequisite(s): PHY 115A C- or better; or Consent of Instructor. Or equivalent course passed with C- or better. Survey of fundamental ideas in the physics of solids, with selected device applications. Crystal structure, x-ray and neutron diffraction, phonons, simple metals, energy bands and Fermi surfaces, semiconductors, optical properties, magnetism, superconductivity. GE credit: SE. Effective: 2000 Winter Quarter.

**PHY 150—Special Topics in Physics (4)**
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): (PHY 009A, PHY 009B, PHY 009C, PHY 009D) or (PHY 009HA, PHY 009HB, PHY 009HC, PHY 009HD, PHY 009HE); or Consent of Instructor. Topics vary, covering areas of contemporary research in physics. May be repeated for credit. GE credit: SE. Effective: 2007 Fall Quarter.

**PHY 151—Stellar Structure and Evolution (4)**
Lecture—3 hours; Project (Term Project). Prerequisite(s): PHY 009A; PHY 009B; PHY 009C; PHY 009D; or Consent of Instructor. The chemical composition, structure, energy sources and evolutionary history of stars, with equal emphasis on both the observational data and theoretical models, including black holes, neutron stars and white dwarfs and the formation of substellar masses. GE credit: SE. Effective: 2007 Fall Quarter.
PHY 152—Galactic Structure and the Interstellar Medium (4)
Lecture—3 hours; Project (Term Project). Prerequisite(s): PHY 009A; PHY 009B; PHY 009C; PHY 009D; PHY 105A (can be concurrent); or Consent of Instructor. PHY 105A required concurrently. The structure, contents, and formation of our Milky Way galaxy, viz. its shape and size, the nature of the interstellar medium, stellar populations, rotation curves, mass determination and evidence of dark matter. GE credit: SE. Effective: 2007 Spring Quarter.

PHY 153—Extragalactic Astrophysics (4)
Lecture—3 hours; Project (Term Project). Prerequisite(s): PHY 009A; PHY 009B; PHY 009C; PHY 009D; PHY 104A; PHY 105A; or Consent of Instructor. Structure and evolution of galaxies and clusters of galaxies, including distance and mass determination, galaxy types and environments, active galactic nuclei and quasars, gravitational lensing and dark matter, global cosmological properties. Not open to students who have taken PHY 127. GE credit: SE. Effective: 2007 Winter Quarter.

PHY 154—Astrophysical Applications of Physics (4)
Lecture—3 hours; Project (Term Project). Prerequisite(s): PHY 105A; PHY 105B; PHY 110B (can be concurrent); PHY 115A (can be concurrent); PHY 112; PHY 112 or consent of instructor; PHY 110B and 115A required concurrently. Not open to students who have taken this course previously as course 198. Applications of classical and quantum mechanics, thermodynamics, statistical mechanics, and electricity and magnetism to astrophysical settings such as the Big Bang, degenerate white dwarf and neutron stars, and solar neutrinos. GE credit: SE. Effective: 2007 Spring Quarter.

PHY 155—General Relativity (4)
Lecture—3 hours; Project (Term Project). Prerequisite(s): PHY 104A; PHY 105A; PHY 105B; PHY 110A; PHY 105B and PHY 110A or consent of instructor. Definition of the mathematical framework for the description of the gravitational field, introduction of the dynamical equations of Einstein governing its evolution and review of the key solutions, including black holes and expanding universes. GE credit: SE. Effective: 2007 Fall Quarter.

PHY 156—Introduction to Cosmology (4)
Lecture—3 hours; Project (Term Project). Prerequisite(s): PHY 009A; PHY 009B; PHY 009C; PHY 009D; PHY 105A (can be concurrent); or Consent of Instructor. PHY 105A required concurrently. Contemporary knowledge regarding the origin of the universe, including the Big Bang and nucleosynthesis, microwave background radiation, formation of cosmic structure, cosmic inflation, cosmic acceleration and dark energy. Not open to students who have completed PHY 126. GE credit: SE. Effective: 2007 Fall Quarter.

PHY 157—Astronomy Instrumentation and Data Analysis Laboratory (4) Review all entries
Laboratory—8 hours. Prerequisite(s): PHY 104A; PHY 105A; PHY 110A; PHY 115A (can be concurrent); and Consent of Instructor. Registration by Permission to Add (PTA) number only; priority given to graduating PHY astrophysics emphasis seniors. Experimental techniques, data acquisition and analysis involving laboratory astrophysics plus stellar, nebular and galaxy digital imaging, photometry and/or spectroscopy. Students perform three experiments. Individual work stressed. Minimum 10-15 page journal style articles of two experiments are required. GE credit: SE, WE. Effective: 2018 Winter Quarter.

PHY 157—Astronomy Instrumentation & Data Analysis Laboratory (4) Review all entries
Laboratory—8 hours. Prerequisite(s): PHY 080; PHY 104A; PHY 105A; PHY 110A; PHY 115A (can be concurrent); and consent of department. Registration by Permission to Add (PTA) number only; priority given to graduating PHY astrophysics emphasis seniors. Experimental techniques, data acquisition and analysis involving laboratory astrophysics plus stellar, nebular and galaxy digital imaging, photometry and/or spectroscopy. Students perform three experiments. Individual work stressed. Minimum 10-15 page journal style articles of two experiments are required. GE credit: SE, WE. Effective: 2020 Winter Quarter.

PHY 160—Environmental Physics and Society (3)
Lecture—3 hours. Prerequisite(s): (PHY 009D or PHY 007C); (PHY 010 or PHY 001B); MAT 016B; Or the equivalent. Impact of humankind on the environment will be discussed from the point of view of the physical sciences. Calculations based on physical principles will be made, and the resulting policy implications will be considered. (Same course as ENG 160.) GE credit: SE, SL. Effective: 1997 Winter Quarter.

PHY 185—Alumni Seminar Series (1)
Seminar—1 hour. Weekly guest speakers (usually a physics alumnus or alumna) tell students about their careers. Speakers use their experience to give students valuable perspectives on life after a degree in physics. May be repeated up to 2 time(s). (P/NP grading only.) GE credit: SE. Effective: 2013 Fall Quarter.
PHY 190—Careers in Physics (1)
Seminar—2 hours. Restricted to Physics and Applied Physics majors only. Overview of important research areas in physics, discussions of research opportunities and internships, strategies for graduate school and industrial careers, the fellowship and assistantship selection process, preparation of resumes, personal statements, and letters of recommendation. (P/NP grading only.) GE credit: SE. Effective: 2007 Fall Quarter.

PHY 192—Internship in Physics (1-12)
Internship—3-36 hours. Prerequisite(s): consent of instructor/Physics Internship Director. Enrollment dependent on availability of intern positions; open to Physics majors only. Supervised work experience requiring the application of physics principles and techniques in a professional setting, including but not limited to industry and national laboratories. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 2019 Fall Quarter.

PHY 194HA—Special Study for Honors Students (4)
Independent Study—12 hours. Prerequisite(s): Consent of Instructor. Open only to Physics and Applied Physics majors who satisfy the College of Letters and Science requirements for entrance into the Honors Program. Independent research project at a level significantly beyond that defined by the normal physics curriculum. GE credit: SE. Effective: 1997 Winter Quarter.

PHY 194HB—Special Study for Honors Students (4)
Independent Study—12 hours. Prerequisite(s): Consent of Instructor. Open only to Physics and Applied Physics majors who satisfy the College of Letters and Science requirements for entrance into the Honors Program. Independent research project at a level significantly beyond that defined by the normal physics curriculum. GE credit: SE. Effective: 1997 Winter Quarter.

PHY 195—Senior Thesis (5)
Independent Study—15 hours. Prerequisite(s): Consent of Instructor. Open only to Physics and Applied Physics majors with senior standing. Preparation of a senior thesis on a topic selected by the student with approval of the department. May be repeated for a total of 15 units. May be repeated up to 15 unit(s). GE credit: SE. Effective: 1997 Winter Quarter.

PHY 197T—Tutoring in Physics and Astronomy (1-5)
Tutorial. Tutoring of students in lower division courses. Leading of small voluntary discussion groups affiliated with one of the department's regular courses. Weekly meeting with instructor (P/NP grading only.) GE credit: SE. Effective: 2004 Spring Quarter.

PHY 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

PHY 199—Special Study for Advanced Undergraduates (1-5)
Variable. June 2012: GE2 Topical Breadth updated per Davis Division of the Academic Senate May 18th announcement of an administrative correction “To allow Topical Breadth designations of GE3 to apply to GE2.” (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

PHY 200A—Theory of Mechanics and Electromagnetics (4)
Independent Study—1 hour; Lecture—3 hours. Prerequisite(s): PHY 204A (can be concurrent); PHY 104B; PHY 105B; PHY 110C; Or equivalent to PHY 110C; PHY 204A required concurrently. Theoretical approaches in classical mechanics including the use of generalized coordinates and virtual work; variational calculus; Lagrange equations; symmetries, conservation laws, and Noether theorem; Lagrangian density; Hamilton formalism; canonical transformations; Poisson brackets; and Hamilton-Jacobi equations. Effective: 1997 Winter Quarter.

PHY 200B—Theory of Mechanics and Electromagnetics (4)
Independent Study—1 hour; Lecture—3 hours. Prerequisite(s): PHY 200A; PHY 204B (can be concurrent); PHY 204B concurrently. Theoretical approaches in electromagnetics including static electromagnetic fields; Maxwell's equations; plane waves in various media; magnetohydrodynamics; diffraction theory; radiating systems; and special relativity. Effective: 1997 Winter Quarter.

PHY 200C—Theory of Mechanics and Electromagnetics (4)
Independent Study—1 hour; Lecture—3 hours. Prerequisite(s): PHY 200A; PHY 204B (can be concurrent); PHY 204B concurrently. Theoretical approaches in electromagnetics including static electromagnetic fields; Maxwell's equations; plane waves in various media; magnetohydrodynamics; diffraction theory; radiating systems; and special relativity. Effective: 1997 Winter Quarter.

PHY 204A—Methods of Mathematical Physics (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): PHY 104A; Or the equivalent. Linear vector spaces,
operators and their spectral analysis, complete sets of functions, complex variables, functional analysis, Greens functions, calculus of variations, introduction to numerical analysis. Effective: 2016 Spring Quarter.

PHY 204B—Methods of Mathematical Physics (4)
Independent Study—1 hour; Lecture—3 hours. Prerequisite(s): PHY 104A; PHY 104B; Or the equivalent. Linear vector spaces, operators and their spectral analysis, complete sets of functions, complex variables, functional analysis, Green's functions, calculus of variations, introduction to numerical analysis. Effective: 1997 Winter Quarter.

PHY 210—Computation Physics (3)
Lecture—3 hours. Prerequisite(s): Knowledge of Fortran or C. Analytic techniques to solve differential equations and eigenvalue problems. Physics content of course will be self-contained, and adjusted according to background of students. Effective: 1999 Spring Quarter.

PHY 215A—Quantum Mechanics (4)
Independent Study—1 hour; Lecture—3 hours. Prerequisite(s): PHY 115B; Or the equivalent. Formal development and interpretation of non-relativistic quantum mechanics; its application to atomic, nuclear, molecular, and solid-state problems; brief introduction to relativistic quantum mechanics and the Dirac equation. Effective: 1997 Winter Quarter.

PHY 215B—Quantum Mechanics (4)
Independent Study—1 hour; Lecture—3 hours. Prerequisite(s): PHY 115B; Or the equivalent. Formal development and interpretation of non-relativistic quantum mechanics; its application to atomic, nuclear, molecular, and solid-state problems; brief introduction to relativistic quantum mechanics and the Dirac equation. Effective: 1997 Winter Quarter.

PHY 215C—Quantum Mechanics (4)
Independent Study—1 hour; Lecture—3 hours. Prerequisite(s): PHY 115B; Or the equivalent. Formal development and interpretation of non-relativistic quantum mechanics; its application to atomic, nuclear, molecular, and solid-state problems; brief introduction to relativistic quantum mechanics and the Dirac equation. Effective: 1997 Winter Quarter.

PHY 219A—Statistical Mechanics (4)
Extensive Problem Solving—1 hour; Lecture—3 hours. Prerequisite(s): PHY 215B; Or equivalent. Foundations of thermodynamics and classical and quantum statistical mechanics with simple applications to properties of solids, real gases, nuclear matter, etc. and a brief introduction to phase transitions. Effective: 2002 Winter Quarter.

PHY 219B—Statistical Mechanics (4)
Extensive Problem Solving—1 hour; Lecture—3 hours. Prerequisite(s): PHY 219A Further applications of thermodynamics and classical and quantum statistical mechanics. The modern theory of fluctuations about the equilibrium state, phase transitions and critical phenomena. Effective: 2002 Winter Quarter.

PHY 223A—Group Theoretical Methods of Physics-Condensed Matter (3)
Lecture—3 hours. Prerequisite(s): PHY 215A; PHY 215B; PHY 215C (can be concurrent); or Consent of Instructor. PHY 215C required concurrently. Theory of groups and their representations with applications in condensed matter. Effective: 1997 Winter Quarter.

PHY 223B—Group Theoretical Methods of Physics-Elementary Particles (3)
Lecture—3 hours. Prerequisite(s): PHY 215A; PHY 215B; PHY 215C (can be concurrent); or Consent of Instructor. PHY 215C required concurrently. Theory of groups and their representations with applications in elementary particle physics. Effective: 1997 Winter Quarter.

PHY 224A—Nuclear Physics (3)

PHY 224B—Nuclear Physics (3)
Lecture—3 hours. Prerequisite(s): PHY 224A Study of nuclear models, including shell model, collective model, unified model. Energy level spectra, static momenta, and electromagnetic transition rates. Effective: 1997 Winter Quarter.

PHY 224C—Nuclear Physics (3)
Lecture—3 hours. Prerequisite(s): PHY 224B Study of nuclear scattering and reactions including the optical model and direct interactions. Beta decay and an introduction to weak interactions. Effective: 1997 Winter Quarter.
PHY 229A—Advanced Nuclear Theory (3)
Lecture—3 hours. Prerequisite(s): PHY 224C Advanced topics in nuclear theory; theory of quantum-mechanical

PHY 229B—Advanced Nuclear Theory (3)
Lecture—3 hours. Prerequisite(s): PHY 229A Advanced topics in nuclear theory; theory of quantum-mechanical

PHY 230A—Quantum Theory of Fields (3)
Lecture—3 hours. Prerequisite(s): PHY 215C Relativistic quantum mechanics of particles; techniques and
applications of second quantization; Feynman diagrams; renormalization. Effective: 1997 Winter Quarter.

PHY 230B—Quantum Theory of Fields (3)
Lecture—3 hours. Prerequisite(s): PHY 230A Continuation of 230A, with selected advanced topics, such as S-matrix

PHY 230C—Quantum Theory of Fields (3)
Lecture—3 hours. Prerequisite(s): PHY 230A; PHY 230B; or Consent of Instructor. Renormalization theory and
applications, including dimensional regularization, Ward identities, renormalization group equations, coupling
constant unification, and precision electroweak calculations. May be repeated for credit with consent of instructor.
Effective: 2007 Winter Quarter.

PHY 232—Topics in String Theory (3)
Lecture—3 hours. Prerequisite(s): Graduate standing in Physics or consent of instructor. Courses PHY 230A, PHY
230B, PHY 230C and PHY 260 or equivalent are strongly recommended. Current research trends in string theory,
with topics ranging from perturbative worldsheet methods, nonperturbative aspects and dualities, AdS/CFT
correspondence, string field theory, etc. May be repeated for credit when topics differ. Effective: 2019 Spring
Quarter.

PHY 233—Advanced Topics in Geometry and Physics (3)
Lecture—3 hours. Prerequisite(s): PHY 230A, PHY 230B, PHY 230C, & PHY 260 or equivalent strongly
recommended. Graduate standing in Physics or consent of instructor required. Modern geometric methods in
theoretical physics, with topics ranging from from pseudo-Riemannian differential geometry and topology with
application to general relativity, black holes, and string theory. May be repeated for credit when topic differs.
Effective: 2019 Winter Quarter.

PHY 240A—Condensed Matter Physics A (3)
Lecture—3 hours. Prerequisite(s): PHY 215C; PHY 219A; PHY 140A and PHY 140B or equivalent recommended.
Topics in condensed matter physics: Crystal structure; one-electron theory; transport and optical properties of
semiconductors; phonons, electron-phonon scattering. Effective: 2007 Fall Quarter.

PHY 240B—Condensed Matter Physics B (3)
Lecture—3 hours. Prerequisite(s): PHY 240A Topics in condensed matter physics: transport and optical properties
of metals and quantum structures; experimental measurement the Fermi surface and of phonon spectra. Effective:
2008 Spring Quarter.

PHY 240C—Condensed Matter Physics (3)
Lecture—3 hours. Prerequisite(s): PHY 240A; PHY 240B Review of second quantization. Interacting electron gas,
electron-phonon interaction and effects, including instabilities of electronic systems. Topics in the theory of
superconductivity and magnetism. Effective: 2005 Spring Quarter.

PHY 241—Advanced Topics in Magnetism (3)
Lecture—3 hours. Prerequisite(s): PHY 240A; PHY 240B; PHY 240C; PHY 240D; or Consent of Instructor. Topics
chosen from areas of current research interest. Effective: 1997 Winter Quarter.

PHY 242—Advanced Topics in Superconductivity (3)
Lecture—3 hours. Prerequisite(s): PHY 240A; PHY 240B; PHY 240C; PHY 240D; or Consent of Instructor. Topics
chosen from areas of current research interest. Effective: 1997 Winter Quarter.

PHY 243A—Surface Physics of Materials (3)
Lecture—3 hours. Prerequisite(s): PHY 140A; PHY 140B; PHY 115A; PHY 115B; Or the equivalent to any; PHY 215A,
PHY 240A, or the equivalents recommended. Experimental and theoretical fundamentals of surface and interface
physics and chemistry, including electronic and magnetic structure, thermodynamics, adsorption kinetics, epitaxial
growth, and a discussion of various spectroscopic and structural probes based on photons, electrons, ions, and scanning probes. Effective: 1999 Winter Quarter.

**PHY 243B—Surface Physics of Materials (3)**
Lecture—3 hours. Prerequisite(s): PHY 140A; PHY 140B; PHY 115A; PHY 115B; Or the equivalent to any; PHY 215A, PHY 240A, or the equivalents recommended. Experimental and theoretical fundamentals of surface and interface physics and chemistry, including electronic and magnetic structure, thermodynamics, adsorption kinetics, epitaxial growth, and a discussion of various spectroscopic and structural probes based on photons, electrons, ions, and scanning probes. Effective: 1999 Winter Quarter.

**PHY 243C—Surface Physics of Materials (3)**
Lecture—3 hours. Prerequisite(s): PHY 140A; PHY 140B; PHY 115A; PHY 115B; Or the equivalent to any; PHY 215A, PHY 240A, or equivalents recommended. Experimental and theoretical fundamentals of surface and interface physics and chemistry, including electronic and magnetic structure, thermodynamics, adsorption kinetics, epitaxial growth, and a discussion of various spectroscopic and structural probes based on photons, electrons, ions, and scanning probes. Effective: 1999 Winter Quarter.

**PHY 245A—High-Energy Physics (3)**
Lecture—3 hours. Prerequisite(s): PHY 230A Phenomenology and systemsatics of strong, electromagnetic, and weak interactions of hadrons and leptons; determination of quantum numbers; quarks and quarkonia; deep inelastic scattering; the quark parton model; experiments at hadron colliders and electron-positron colliders. Effective: 1997 Winter Quarter.

**PHY 245B—High-Energy Physics (3)**
Lecture—3 hours. Prerequisite(s): PHY 245A Electroweak interactions; phenomenology of the Standard Model of SU(2)×U(1); weak interaction experiments; properties of and experiments with W and Z vector bosons; Glashow-Weinberg-Salam model and the Higgs boson; introduction to supersymmetry and other speculations. Effective: 1997 Winter Quarter.

**PHY 245C—Collider Physics (3)**
Lecture—3 hours. Prerequisite(s): PHY 245A; PHY 252B (can be concurrent); or Consent of Instructor. PHY 252B taken previously or concurrently. Collider physics. Topics include quark and gluon distribution functions and the computation of cross sections; Large Hadron Collider and International Linear Collider phenomenology; collider and detector characteristics; extracting models from data; software tools for analyzing experimental data. May be repeated for credit with consent of instructor. Effective: 2008 Spring Quarter.

**PHY 246—Supersymmetry: Theory and Phenomenology (3)**

**PHY 246A—Supersymmetry: Theory and Phenomenology (3)**
Lecture—3 hours. Prerequisite(s): PHY 230A; PHY 230B; PHY 245A, PHY 245B recommended or consent of instructor. Construction of supersymmetric models of particle physics; superfields; supersymmetry breaking the minimal supersymmetric standard model; supergravity. Collider phenomenology of supersymmetry. Dark matter phenomenology. Not offered every year. Effective: 2008 Spring Quarter.

**PHY 246B—Advanced Supersymmetry (3)**
Lecture—3 hours. Prerequisite(s): PHY 246A Advanced topics in supersymmetry. Topics include holomorphy, the Affleck-Dine-Seiberg superpotential, Seiberg duality for SUSY QCD, dynamical SUSY breaking, Seiberg-Witten theory, superconformal field theories, supergravity, anomaly and gaugino mediation, and the AdS/CFT correspondence. Effective: 2007 Fall Quarter.

**PHY 250—Special Topics in Physics (3)**
Lecture—3 hours. Prerequisite(s): Consent of Instructor. Topic varies. May be repeated for credit. Effective: 1997 Fall Quarter.

**PHY 252A—Techniques of Experimental Physics (3)**
Lecture—3 hours. Introduction to techniques and methods of designing and executing experiments. Problems and examples from condensed matter research will be utilized. Effective: 1997 Winter Quarter.
PHY 252B—Techniques of Experimental Physics (3)
Lecture—3 hours. Introduction to techniques and methods of designing and executing experiments. Problems and examples from nuclear and particle research will be utilized. Effective: 1997 Winter Quarter.

PHY 252C—Statistics and Data Analysis for Particle Physics (3)
Lecture—3 hours. Introduction to statistical data analysis methods in particle physics. Theoretical lectures combined with practical computer laboratory work. Effective: 2007 Spring Quarter.

PHY 253—Signals and Noise in Physics (3)

PHY 255—Econophysics (4)
Lecture/Discussion—3 hours; Project (Term Project). Prerequisite(s): Knowledge of Python, R, Excel, Matlab, or consent of instructor. Application of ideas from statistical mechanics to the financial markets. Market dynamics from a physics and systems perspective, including the statistical distributions of returns, the dynamics of prices, and models for the markets. Effective: 2019 Winter Quarter.

PHY 256A—Physics of Information (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): Consent of Instructor. Advanced undergraduate or introductory graduate differential equations, applied linear algebra, and probability theory; e.g., Mathematics 119A/B or 207A, 167 or 226A, and 135A/B or 235A, respectively; or in Physics 104A/C or 204A/B. Class size limited to 30 students. Nonlinear dynamics, deterministic chaos, bifurcations, pattern formation, symbolic dynamics, measurement theory, stochastic processes, elementary information theory, information in complex systems, computational laboratory. Effective: 2017 Spring Quarter.

PHY 256B—Physics of Computation (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): PHY 256A; Consent of Instructor. Advanced undergraduate or introductory graduate differential equations, applied linear algebra, and probability theory; e.g., Mathematics 119A/B or 207A, 167 or 226A, and 135A/B or 235A, respectively; or in Physics 104A/C or 204A/B. Class size limited to 30 students. Structural complexity, computational mechanics, information measures, causal inference, applications to complex materials, quantum dynamics, and nonequilibrium thermodynamics, computational laboratory. Effective: 2017 Spring Quarter.

PHY 260—Introduction to General Relativity (3)
Lecture—3 hours. Prerequisite(s): PHY 200A; PHY 200B An introduction to general relativity. Differential geometry and curved spacetime; the Einstein field equations; gravitational fields of stars and black holes; weak fields and gravitational radiation; experimental tests; Big Bang cosmology. Effective: 1999 Spring Quarter.

PHY 262—Early Universe Cosmology (3)
Lecture—3 hours. Prerequisite(s): Second year standing in Physics Graduate Program or consent of instructor. Introduction to early universe cosmology: the Big Bang, inflation, primordial nucleosynthesis, dark matter, dark energy, and other topics of current interest Effective: 2005 Spring Quarter.

PHY 263—Cosmic Structure Formation (3)
Lecture—3 hours. Prerequisite(s): PHY 260 Growth of structure from small density inhomogeneities in the early universe to the diverse structures observable today. Use of observable properties (cosmic microwave background, gravitational lensing, peculiar velocities, number density, etc.) to constrain models of structure formation and fundamental physics. Effective: 2005 Spring Quarter.

PHY 265—High Energy Astrophysics and Radiative Processes (3)
Lecture—3 hours. Prerequisite(s): Graduate standing in Physics or consent of instructor. Survey course covering galactic and extragalactic X-ray and gamma-ray astronomy, radiative processes, and techniques of high-energy astrophysics. Effective: 2004 Fall Quarter.

PHY 266—Data Analysis for Astrophysics (3)
Lecture—3 hours. Prerequisite(s): Graduate standing in Physics or consent of instructor. Survey course covering measurement and signal analysis techniques for astrophysics and cosmology throughout the electromagnetic spectrum. Effective: 2005 Winter Quarter.

PHY 267—Observational Extragalactic Astronomy & Cosmology (3)
Lecture—3 hours. Prerequisite(s): Graduate standing in Physics or consent of instructor. Survey course covering current areas of research on extragalactic objects, their physical properties, origin, evolution, and distribution in space. Effective: 2005 Spring Quarter.
PHY 268—Research Methods in Astrophysics (3)
Lecture—3 hours. Prerequisite(s): PHY 204A, PHY 204B and PHY 215A recommended. Graduate standing in Physics or consent of instructor. Introduction to research methods in astrophysics and cosmology. Problems and examples from observational and theoretical work will be included. Effective: 2019 Spring Quarter.

PHY 270—Current Topics in Physics Research (3)
Lecture/Discussion—3 hours. Prerequisite(s): Graduate standing in Physics or consent of instructor. Reading and discussion to help physics graduate students develop and maintain familiarity with the current and past literature in their immediate field of research and related areas. May be repeated for credit. (S/U grading only.) Effective: 2013 Fall Quarter.

PHY 285—Careers in Physics (1)
Seminar—1.5 hours. Prerequisite(s): Graduate standing in Physics. Designed to give Physics graduate students an in-depth appreciation of career opportunities with a graduate degree in physics. Professional physicists, mainly from outside academia, will give seminars describing both research and career insights. May be repeated for credit. (S/U grading only.) Effective: 2005 Winter Quarter.

PHY 290—Seminar in Physics (1)
Seminar. Prerequisite(s): Graduate standing in Physics or consent of instructor. Presentation and discussion of topics of current research interest in physics. Topics will vary weekly and will cover a broad spectrum of the active fields of physics research at a level accessible to all physics graduate students. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

PHY 291—Seminar in Nuclear Physics (1)
Seminar—1 hour. Prerequisite(s): Graduate standing in Physics or consent of instructor. Presentation and discussion of topics of current research interest in nuclear physics. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

PHY 292A—Seminar in Elementary Particle Physics (1)
Seminar—1 hour. Prerequisite(s): Graduate standing in Physics or consent of instructor. Presentation and discussion of topics of current research interest in elementary particle physics. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 2008 Fall Quarter.

PHY 292B—High Energy Frontier Initiative And Cosmology Theory Seminar (1)
Seminar—1 hour. Prerequisite(s): Graduate standing in Physics or consent of instructor. Presentation and discussion of topics of current research interest in Cosmology. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 1999 Winter Quarter.

PHY 293—Seminar in Condensed Matter Physics (1)
Seminar—1 hour. Prerequisite(s): Graduate standing in Physics or consent of instructor. Presentation and discussion of topics of current research interest in condensed matter physics. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

PHY 294—Seminar in Cosmology (1)
Seminar—1 hour. Prerequisite(s): Graduate standing in Physics or consent of instructor. Presentation and discussion of topics of current research interest in Cosmology. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 1999 Winter Quarter.

PHY 295—Introduction to Departmental Research (1)
Seminar—1 hour. Seminar to introduce first- and second-year physics graduate students to the fields of specialty and research of the Physics staff. (S/U grading only.) Effective: 1997 Winter Quarter.

PHY 296—Field, Strings, and Gravity Seminar (1)
Lecture—1.5 hours. Prerequisite(s): Consent of Instructor. Presentation and discussion of topics of current research interest in the areas of quantum field theory, string theory and gravity. May be repeated for credit. (S/U grading only.) Effective: 2018 Fall Quarter.

PHY 297—Research on the Teaching and Learning of Physics (3)
Seminar—3 hours. Prerequisite(s): Graduate standing in Physics or consent of instructor. Discussion and analysis of recent research in how students construct understanding of physics and other science concepts and the implications of this research for instruction. Effective: 1997 Winter Quarter.

PHY 298—Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.
PHY 299—Research (1-12)
Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

PHY 371—Teaching in an Active-Engagement Physics Discussion/Lab Setting (1)
Lecture/Discussion—1 hour. Prerequisite(s): PHY 009D; Or equivalent. Open to graduate students only. Analysis of recent research on science/physics teaching and learning and its implications for teaching labs, discussions, and discussion/labs with an emphasis on differences between conventional and active-engagement instructional settings. The appropriate role of the instructor in specific instructional settings. May be repeated up to 2 time(s). Effective: 2008 Summer Session 1.

PHY 390—Methods of Teaching Physics (1)
Lecture/Discussion—1 hour. Prerequisite(s): Consent of Instructor. Graduate standing in Physics. Practical experience in methods and problems related to teaching physics laboratories at the university level, including discussion of teaching techniques, analysis of quizzes and laboratory reports and related topics. Required of all Physics Teaching Assistants. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

PHY 396—Teaching Assistant Training Practicum (1-4)
Variable. Prerequisite(s): Graduate standing. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

(College of Engineering)
The Department of Applied Science is not accepting new graduate students.

Applied Science Engineering; Engineering | EAD Courses

Courses in EAD:

EAD 230—Topics in Computational Fluid Dynamics (3)
Lecture—3 hours. Prerequisite(s): EAD 210A; EAD 210B; or Consent of Instructor. Hands-on approach to numerical methods for compressible fluid flow. Readings and discussions of solution strategies will be complemented with programming exercises and projects to give first-hand experience with performance and accuracy of several computational methods; from upwind differencing to Godunov methods. Effective: 2000 Fall Quarter.

EAD 289A—Special Topics in Applied Science: Atomic, Molecular, and Optical Physics (1-5)
Variable. Prerequisite(s): Graduate standing or consent of instructor. Special topic in Atomic, Molecular, and Optical Physics. May be repeated up to 5 unit(s) per segment when topic differs. Effective: 2008 Fall Quarter.

EAD 289B—Special Topics in Applied Science: Chemical Physics (1-5)
Variable. Prerequisite(s): Graduate standing or consent of instructor. Special topic in Chemical Physics. May be repeated up to 5 unit(s) per segment when topic differs. Effective: 2008 Fall Quarter.

EAD 289C—Computational Physics: Computational Physics (1-5)
Variable. Prerequisite(s): Graduate standing or consent of instructor. Special topic in Computational Physics. May be repeated up to 5 unit(s) per segment when topic differs. Effective: 2008 Fall Quarter.
EAD 289D—Special Topics in Applied Science: Biophotonics/Biotechnology (1-5)
Variable. Prerequisite(s): Graduate standing or consent of instructor. Special topic in Biophotonics/Biotechnology. May be repeated up to 5 unit(s) per segment when topic differs. Effective: 2008 Fall Quarter.

EAD 289E—Special Topics in Applied Science: Materials Science (1-5)
Variable. Prerequisite(s): Graduate standing or consent of instructor. Special topic in Materials Science. May be repeated up to 5 unit(s) per segment when topic differs. Effective: 2008 Fall Quarter.

EAD 289F—Special Topics in Applied Science: Imaging Science and Photonics (1-5)
Variable. Prerequisite(s): Graduate standing or consent of instructor. Special topic in Imaging Science and Photonics. May be repeated up to 5 unit(s) per segment when topic differs. Effective: 2008 Fall Quarter.

EAD 289G—Special Topics in Applied Science: Nonlinear Optics (1-5)
Variable. Prerequisite(s): Graduate standing or consent of instructor. Special topic in Nonlinear Optics. May be repeated up to 5 unit(s) per segment when topic differs. Effective: 2008 Fall Quarter.

EAD 289H—Special Topics in Applied Science: Plasma/Fusion Energy Physics (1-5)
Variable. Prerequisite(s): Graduate standing or consent of instructor. Special topic in Plasma/Fusion Energy Physics. May be repeated up to 5 unit(s) per segment when topic differs. Effective: 2008 Fall Quarter.

EAD 289I—Special Topics in Applied Science: Quantum Electronics (1-5)
Variable. Prerequisite(s): Graduate standing or consent of instructor. Special topic in Quantum Electronics. May be repeated up to 5 unit(s) per segment when topic differs. Effective: 2008 Fall Quarter.

EAD 289J—Special Topics in Applied Science: Condensed Matter/Statistical Physics (1-5)
Variable. Prerequisite(s): Graduate standing or consent of instructor. Special topic in Condensed Matter/Statistical Physics. May be repeated up to 5 unit(s) per segment when topic differs. Effective: 2008 Fall Quarter.

EAD 289K—Special Topics in Applied Science: Classical Optics (1-5)
Variable. Prerequisite(s): Graduate standing or consent of instructor. Special topic in Classical Optics. May be repeated up to 5 unit(s) per segment when topic differs. Effective: 2008 Fall Quarter.

EAD 289L—Special Topics in Applied Science: Microwave and Millimeter-Wave Technology (1-5)
Variable. Prerequisite(s): Graduate standing or consent of instructor. Special topic in Microwave and Millimeter-Wave Technology. May be repeated up to 5 unit(s) per segment when topic differs. Effective: 2008 Fall Quarter.

EAD 289M—Special Topics in Applied Science: Synchrotron Radiation Science (1-5)
Variable. Prerequisite(s): Graduate standing or consent of instructor. Special topic in Synchrotron Radiation Science. May be repeated up to 5 unit(s) per segment when topic differs. Effective: 2008 Fall Quarter.

EAD 289N—Special Topics in Applied Science: Space Physics (1-5)
Variable. Prerequisite(s): Graduate standing or consent of instructor. Special topic in Space Physics. May be repeated up to 5 unit(s) per segment when topic differs. Effective: 2008 Fall Quarter.

EAD 290—Seminar (1-2)
Seminar—1-2 hours. (S/U grading only.) Effective: 1997 Winter Quarter.

EAD 290C—Graduate Research Group Conference (1)
Discussion—1 hour. Prerequisite(s): Consent of Instructor. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

EAD 298—Group Study (1-5)
Lecture—3-15 hours. (S/U grading only.) Effective: 1997 Winter Quarter.

EAD 299—Research (1-12)
Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

Applied Science Engineering; Engineering | BPT Courses

Courses in BPT:

BPT 201—Current Topics in Biophotonics and Bioimaging Research (1)
Lecture/Discussion—1 hour. Prerequisite(s): Consent of Instructor. Designed to help graduate students develop and maintain familiarity with the current and past literature in the field of Biophotonics and Bioimaging research and related areas. May be repeated up to 4 time(s) when subject differs. Effective: 2016 Fall Quarter.

Arab Studies Minor; Middle East/South Asia Studies
(College of Letters and Science)

Smriti Srinivas, Ph.D., Program Director

Program Office. 155 Kerr Hall; 530-754-4926; http://mesa.ucdavis.edu

The minor in Arab Studies covers an area of utmost historical, cultural, economic and geopolitical significance. Several key contemporary issues make the region as a whole a focus of interest for scholarly study. The Arab Studies minor is an interdisciplinary minor open to undergraduates in all four colleges.

Minor Advisor. Consult the Middle East/South Asia Studies Program in 155 Kerr Hall 530-754-4926 or the Middle East/South Asia Studies website at http://mesa.ucdavis.edu.

Total: 20-24

Arab Studies Minor; Middle East/South Asia Studies | MSA Courses

Courses in MSA:

MSA 092—ME/SA 92. Internship in Middle East/South Asia Studies (3-15)
Internship. Prerequisite(s): Consent of Instructor. Work experience on and off campus in all subject areas offered as part of the ME/SA Studies program. Internship supervised by a member of the ME/SA faculty. May be repeated up to 15 unit(s). (P/NP grading only.) Effective: 2007 Fall Quarter.

MSA 098—Directed Group Study (1-5)
Variable—3-15 hours. May be repeated for credit. (P/NP grading only.) Effective: 2006 Fall Quarter.

MSA 099—Special Study for Undergraduates (1-5)
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. May be repeated for credit. (P/NP grading only.) Effective: 2006 Fall Quarter.

MSA 100—Middle East and South Asia: Comparative Perspectives (4)
Extensive Writing; Lecture—3 hours. Ethnographic and historical points of intersection and divergence in various aspects of the Middle East and South Asia in precolonial, colonial, and postcolonial societies. Anthropological, historical, and theoretical debates surrounding the region. GE credit: AH, SS, WC, WE. Effective: 2004 Summer Session 1.

MSA 111A—Great Cities of Arab Middle East and South Asia (4)
Extensive Writing; Lecture—3 hours. Prerequisite(s): Consent of Instructor. Some knowledge of Islamic/Middle Eastern history is very useful. In-depth examination of the great cities of North Africa, the Middle East and South Asia as cultural and historical artifacts. Topics include: the concept of the Islamic city, processes of modernity, and representations that reinforce imagination, memory and personal identity. GE credit: AH, SS, WC, WE. Effective: 2013 Fall Quarter.

MSA 112—History of South Asian Islam (4)

MSA 121A—Shahnameh: The Persian Book of Kings (4)
Lecture/Discussion—3 hours; Term Paper. In-depth analysis of the Persian Book of Kings (Shahnameh) by Abu al-Qasim Ferdowsi (d. 1020 CE) in its historical context with a comparative perspective on the role of this work in Persian and world literature. (Same course as COM 175.) GE credit: AH, WC, WE. Effective: 2015 Winter Quarter.

MSA 121C—A Story for a Life: The Arabian Nights (4)
Lecture/Discussion—3 hours; Term Paper. In-depth exploration of The Arabian Nights, the best-known work of pre-modern Arabic literature and a major work of world literature. Analysis of the work in its historical context and in comparison to other frame tales in world literature. (Same course as COM 172 and ARB 140.) GE credit: AH, WC, WE. Effective: 2016 Winter Quarter.

MSA 122A—Themes in the Arabic Novel (4)
Extensive Writing; Independent Study; Lecture/Discussion—3 hours. Class size limited to 30 students. Select modern Arabic fiction (novels and short stories) in translation. Thematically connected readings supplemented by non-fictional writings when appropriate. May be repeated up to 2 time(s) if the texts/theme of required course readings sufficiently change. GE credit: AH, OL, WC, WE. Effective: 2013 Fall Quarter.

MSA 131A—Modern Iranian Cinema (4)
Film Viewing—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): Upper division standing, or consent of instructor. Iranian cinema of the 20th century in the context of profound cultural and social changes in Iran especially since the Iranian Revolution. Productions by representative directors such as Kiarostami, Makhmalbaf,
Bahram Beizaie are included. Knowledge of Persian not required. (Same course as CTS 146A.) GE credit: AH, OL, VL, WC, WE. Effective: 2013 Fall Quarter.

**MSA 131B—Modern South Asia Cinema (4)**
Film Viewing—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): Upper-division standing or consent of instructor. South Asian cinema of last 100 years in the context of cultural, social, and political changes. South Asian history, Independence, Partition, urban life, class, migration, postcolonial identity, diaspora, gender, sexuality, religion, sport, performance, etc (Same course as CTS 146B and ANT 147.) GE credit: AH, SS, VL, WC, WE. Effective: 2017 Winter Quarter.

**MSA 131C—Religion and Media in Arab World (4)**
Lecture—4 hours. Exploration of the role and experience of media technologies in the Arab world. Study of digital and electronic media as well as alternative media practices. Investigation of new trends in political activism and identity formation. (Same course as RST 166.) GE credit: OL, SS, VL, WC, WE. Effective: 2014 Fall Quarter.

**MSA 131D—Modern Turkish Cinema (4)**
Film Viewing—2 hours; Lecture/Discussion—2 hours. Prerequisite(s): Upper-division standing or consent of instructor. Turkish cinema of the 20th & 21st century in the context of cultural, social, & political changes. Issues covered include history, nationalism, political dissent, identity, migration, diaspora, gender, sexuality, religion, and incorporate viewpoints of Kurdish & other minority members. (Same course as CTS 146D and HIS 193E.) GE credit: AH, OL, SS, VL, WE. Effective: 2016 Winter Quarter.

**MSA 150—Women and Islamic Discourses (4)**
Lecture/Discussion—4 hours. Prerequisite(s): WMS 050; Or comparable course. Introduction to the debates/discourses about women and Islam. Transformations in debates/discourses in colonial and postcolonial periods in the Middle East & South Asia. Comparative study of debates/discourses on family, work, law, sexuality, religion, comportment, human rights, feminist and religious movements. (Same course as WMS 185.) GE credit: AH, SS, WC. Effective: 2008 Fall Quarter.

**MSA 151A—Iranian Society & Culture (4)**

**MSA 180—Topics in Middle East and South Asian Studies (4)**
Extensive Writing; Lecture—3 hours. Comparative perspective on the Middle East and South Asia. Topics may include: modernity, religious traditions, colonialism, subalternity and social movements, gender and sexuality, history and memory, science and development, ritual and performance, public culture, diasporas. May be repeated up to 1 time(s) topic varies. GE credit: AH, SS, WC, WE. Effective: 2004 Fall Quarter.

**MSA 181A—Topics in Regional ME/SA Studies (4)**
Lecture—3 hours; Term Paper. Iran & Persian topics for students specializing in region-specific Middle East and South Asia Studies. May be repeated up to 3 time(s). GE credit: AH, SS, WC, WE. Effective: 2015 Winter Quarter.

**MSA 181B—Topics in Regional ME/SA Studies (4)**
Lecture—3 hours; Term Paper. Indian/South Asia topics for students specializing in region-specific Middle East and South Asia Studies. May be repeated up to 3 time(s). GE credit: AH, SS, WC, WE. Effective: 2013 Fall Quarter.

**MSA 181C—Topics in Regional ME/SA Studies: Arab Studies (4)**
Lecture—3 hours; Term Paper. Arab Studies topics. May be repeated up to 3 time(s) when different topics and themes are studied. GE credit: AH, SS. Effective: 2013 Fall Quarter.

**MSA 182A—Undergraduate Proseminar in Middle East/South Asia (4)**
Seminar—3 hours; Term Paper. Prerequisite(s): MSA 100 recommended. Class size limited to 15 students. Seminar in Iran & Persian topics specializing in region-specific Middle East and South Asia studies. May be repeated up to 3 time(s). Effective: 2015 Winter Quarter.

**MSA 182B—Undergraduate Proseminar in Middle East/South Asia (4)**
Seminar—3 hours; Term Paper. Prerequisite(s): MSA 100 recommended. Class size limited to 15 students. Seminar in India/South Asia topics specializing in region-specific Middle East and South Asia studies. May be repeated up to 3 time(s) when different topics and themes are studied. Effective: 2012 Fall Quarter.
**MSA 182C—Undergraduate Proseminar in Middle East/South Asia: Arab Studies Seminar (4)**
Seminar—3 hours; Term Paper. Prerequisite(s): MSA 100 recommended. Class size limited to 15 students. Seminar in Arab Studies topics. May be repeated up to 3 time(s). GE credit: WE. Effective: 2013 Fall Quarter.

**MSA 192—Internship (1-12)**
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Supervised internship on and off campus in the area of Middle East and South Asia Studies. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 2013 Fall Quarter.

**MSA 194H—Special Study for Honors Students (1-5)**
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. Open only to majors of senior standing who qualify for honors program. Independent study of a problem in Middle East/South Asian studies involving the writing of an honors thesis. May be repeated up to 12 unit(s). Effective: 2018 Spring Quarter.

**MSA 198—Directed Group Study (1-5)**
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. May be repeated for credit. (P/NP grading only.) Effective: 2018 Spring Quarter.

**MSA 199—Special Study for Advanced Undergraduates (1-5)**
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. May be repeated for credit. (P/NP grading only.) Effective: 2018 Spring Quarter.

Arabic Minor; Classics | ARB Courses

Courses in ARB:

ARB 001—Elementary Arabic 1 (5)
Lecture/Discussion—5 hours. Introduction to basic Arabic. Interactive and integrated presentation of listening, speaking, reading, and writing skills, including the alphabet and basic syntax. Focus on standard Arabic with basic skills in spoken Egyptian and/or one other colloquial dialect. GE credit: AH, WC. Effective: 2018 Fall Quarter.

ARB 001A—Accelerated Intensive Elementary Arabic (15)
Lecture/Discussion—15 hours. Special 12-week accelerated, intensive summer session course that combines the work of courses ARB 1, 2, and 3. Introduction to Modern Standard Arabic through development of all language skills in a cultural context with emphasis on communicative proficiency. Not open for credit to students who have completed ARB 001, ARB 002, or ARB 003. GE credit: AH, WC. Effective: 2018 Fall Quarter.

ARB 002—Elementary Arabic 2 (5)
Lecture/Discussion—5 hours. Prerequisite(s): ARB 001; or Consent of Instructor. Continuation of basic Arabic from course 1. Interactive and integrated presentation of listening, speaking, reading, and writing skills, including syntax. Focus on standard Arabic and limited use of spoken Egyptian and/or one other colloquial dialect. GE credit: AH, WC. Effective: 2018 Fall Quarter.

ARB 003—Elementary Arabic 3 (5)
Lecture/Discussion—5 hours. Prerequisite(s): ARB 002; or Consent of Instructor. Continuation of introduction to basic Arabic from courses 1 and 2. Interactive and integrated presentation of listening, speaking, reading, and writing skills, including syntax. Focus on standard Arabic with limited use of spoken Egyptian and/or one other colloquial dialect. GE credit: AH, WC. Effective: 2018 Fall Quarter.

ARB 021—Intermediate Arabic 21 (4)
Lecture/Discussion—4 hours. Prerequisite(s): ARB 003; or Consent of Instructor. Builds on courses 1, 2, and 3. Interactive and integrated presentation of listening, speaking, reading, and writing skills, including idiomatic expression. Focus on standard Arabic with limited use of Egyptian and/or one other colloquial dialect. GE credit: AH, OL, WC. Effective: 2018 Fall Quarter.

ARB 021A—Accelerated Intensive Intermediate Arabic (15)
Lecture/Discussion—15 hours. Special 12-week accelerated, intensive summer session course that combines the work of courses ARB 21, 22, and 23. Modern Standard Arabic through development of all language skills in a
cultural context with emphasis on communicative proficiency. Not open for credit to students who have completed ARB 021, ARB 022, or ARB 023. GE credit: AH, WC. Effective: 2018 Fall Quarter.

**ARB 021C—Colloquial Egyptian Arabic (4)**
Lecture/Discussion—3 hours; Lecture/Lab—1 hour. Prerequisite(s): ARB 003; or Consent of Instructor. Continuation of the Colloquial Egyptian Arabic covered in the first year of Arabic; courses 1, 2, and 3. May be repeated up to 1 time(s) if instruction material changes. GE credit: AH, OL, WC. Effective: 2018 Fall Quarter.

**ARB 021L—Colloquial Levantine Arabic (4)**
Lecture/Discussion—4 hours. Prerequisite(s): ARB 003; or Consent of Instructor. Continuation of colloquial Levantine Arabic presented in Arabic 1,2 and 3. Integrated presentation of speaking and listening skills in colloquial Levantine Arabic, with reading and writing in Modern Standard Arabic that is related to Levantine cultural production and social life. GE credit: AH, OL, WC. Effective: 2018 Fall Quarter.

**ARB 022—Intermediate Arabic 22 (4)**
Lecture/Discussion—4 hours. Prerequisite(s): ARB 021; or Consent of Instructor. Continuation of course 21. Interactive and integrated presentation of listening, speaking, reading, and writing, including idiomatic expression. Focus on standard Arabic with limited use of Egyptian and/or one other colloquial dialect. GE credit: AH, OL, WC. Effective: 2018 Fall Quarter.

**ARB 022C—Colloquial Egyptian Arabic (4)**
Lecture/Discussion—3 hours; Lecture/Lab—1 hour. Prerequisite(s): ARB 021C; or Consent of Instructor. Continuation of the Colloquial Egyptian Arabic covered in first year of Arabic; courses 1, 2, and 3 and the first quarter of Colloquial Arabic course 21C. May be repeated up to 1 time(s) if instruction material changes. GE credit: AH, OL, WC. Effective: 2018 Fall Quarter.

**ARB 022L—Colloquial Levantine Arabic (4)**
Lecture/Discussion—4 hours. Prerequisite(s): ARB 021L; or Consent of Instructor. Continuation of colloquial Levantine Arabic presented in Arabic 021L. Integrated presentation of speaking and listening skills in colloquial Levantine Arabic; reading and writing in Modern Standard Arabic related to Levantine social life. GE credit: AH, OL, WC. Effective: 2018 Fall Quarter.

**ARB 023—Intermediate Arabic 23 (4)**
Lecture/Discussion—4 hours. Prerequisite(s): ARB 022; or Consent of Instructor. Continuation of courses 21 and 22. Interactive and integrated presentation of Arabic listening, speaking, reading, and writing skills, including idiomatic expression. GE credit: AH, OL, WC. Effective: 2018 Fall Quarter.

**ARB 023C—Colloquial Egyptian Arabic (4)**
Lecture/Discussion—3 hours; Lecture/Lab—1 hour. Prerequisite(s): ARB 022C; or Consent of Instructor. Continuation of Colloquial Egyptian Arabic covered in course 22C. May be repeated up to 1 time(s) if instruction material changes. GE credit: AH, OL, WC. Effective: 2018 Fall Quarter.

**ARB 023L—Colloquial Levantine Arabic (4)**
Lecture/Discussion—4 hours. Prerequisite(s): ARB 022L; or Consent of Instructor. Continuation of colloquial Levantine Arabic presented in Arabic 022L. Integrated presentation of speaking and listening skills in colloquial Levantine Arabic; reading and writing in Modern Standard Arabic related to Levantine social life. GE credit: AH, OL, WC. Effective: 2018 Fall Quarter.

**ARB 098—Directed Group Study (1-5)**
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. Directed group study. May be repeated for credit. (P/NP grading only.) Effective: 2018 Fall Quarter.

**ARB 099—Special Study for Undergraduates (1-5)**
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. Special study. May be repeated for credit. (P/NP grading only.) Effective: 2018 Fall Quarter.

**ARB 101A—Readings in Arabic: 600-1850 (4)**
Discussion—3 hours; Extensive Writing. Prerequisite(s): ARB 123; or Consent of Instructor. Readings in Arabic. Poetry, prose literature, and selections from texts on religion, history, politics, science, philosophy and mysticism. May be repeated up to 1 time(s) Students can repeat the course if the instructor decides that they would benefit from additional practice working on the different selections from the same texts or if 50% or more of the texts are different. GE credit: AH, OL, SS, WC, WE. Effective: 2018 Fall Quarter.
ARB 121—Advanced Arabic (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): ARB 023; or Consent of Instructor. Review, refinement, and development of skills learned in intermediate Arabic through work with texts, video, and audio on cultural and social issues. Integrated approach to reading, writing, listening, speaking primarily standard Arabic, with limited use of one colloquial dialect. May be repeated up to 2 time(s) based on different readings. GE credit: AH, WC. Effective: 2018 Fall Quarter.

ARB 122—Advanced Arabic (4)
Lecture/Discussion—3 hours. Prerequisite(s): ARB 121; or Consent of Instructor. Continuation of course 121. Further development of advanced skills in reading, listening, writing, and speaking standard Arabic through work with texts, video, and audio on cultural and social issues. Limited use of one colloquial dialect. GE credit: AH, WC. Effective: 2018 Fall Quarter.

ARB 123—Advanced Arabic (4)
Lecture/Discussion—3 hours. Prerequisite(s): ARB 122; or Consent of Instructor. Continuation of course 122. Further development of advanced skills in reading, listening, writing, and speaking standard Arabic through work with texts, video, and audio on cultural and social issues. Limited use of one colloquial dialect. GE credit: AH, WC. Effective: 2018 Fall Quarter.

ARB 140—A Story for a Life: The Arabian Nights (4)
Lecture/Discussion—3 hours; Term Paper. In-depth exploration of The Arabian Nights, the best-known work of pre-modern Arabic literature and a major work of world literature. Analysis of the work in its historical context and in comparison to other frame tales in world literature. (Same course as COM 172 and MSA 121C.) GE credit: AH, WC, WE. Effective: 2018 Fall Quarter.

ARB 141—Readings in Modern Arabic Literature (4)
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): ARB 123; or Consent of Instructor. Readings of modern Arabic poetry and fiction in original format, assisted by instructor-prepared glossaries and other supplementary material. Readings to be followed by class discussion and short writing assignments in Arabic. Open to students at advanced proficiency in Arabic. May be repeated up to 1 time(s) if reading material changes. GE credit: AH, WC. Effective: 2018 Fall Quarter.

ARB 198—Directed Group Study (1-5)
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. Development of reading, writing, speaking, and listening skills in advanced Arabic. Materials may include al-Kitaab Part Two or Three, news articles and broadcasts, short stories, poetry, novels, essays, scripture, prophetic traditions, audio recordings, and television and film. May be repeated up to 4 time(s) content differs. Effective: 2018 Fall Quarter.

ARB 297—Directed Independent Study (4)
Discussion—1 hour; Independent Study. Prerequisite(s): Graduate standing or consent of instructor. Restricted to graduate students. Directed Independent Study on a topic culminating in a term paper. Independent Study may only be arranged with consent of the instructor when graduate seminars are unavailable. Topic varies by instructor. May be repeated up to 5 time(s) when no graduate seminars are available and topic differs. Effective: 2018 Fall Quarter.

ARB 299—Individual Study (1-12)
Variable. Prerequisite(s): Consent of Instructor. Graduate standing. Restricted to graduate students. May be repeated for credit. (S/U grading only.) Effective: 2018 Fall Quarter.

ARB 396—Teaching Assistant Training Practicum (1-4)
Variable. Prerequisite(s): Consent of Instructor. Graduate standing. Restricted to graduate students. May be repeated up to 18 time(s). (S/U grading only.) Effective: 2018 Fall Quarter.

The Major Program

Art History studies the changing visual expression of values, beliefs and experiences across diverse cultures and over time. It provides training in historical, social and aesthetic understanding, critical thinking, scholarly research, and lucid, thoughtful analysis and writing. More than any other discipline art history sharpens its students’ visual acuity and deepens their visual literacy. In so doing, it prepares them to face the increasingly complex visual world we find ourselves in today.

The Program. The major begins with a series of courses that surveys major landmarks in the history of visual culture, art and architecture in Asia, Europe, and the United States. More advanced lecture courses and proseminars focus on particularly important periods and issues. Students are encouraged to personalize their training with internships, independent study, and focused upper-division study. Top students considering graduate study are encouraged to engage in more advanced study in the Honors program.

Career Options. A major in Art History develops critical thinking and the integration of research, interpretation and understanding. It provides an excellent liberal arts basis for professions as far ranging as advertising, law, medicine, politics and business. The major prepares students for advanced study in Art History, Architecture, Museum Studies and Cultural Studies. It also serves as the foundation for careers in teaching, arts, administration, museums, galleries, historic preservation, art libraries, publishing, journalism, advertising, art conservation, and art investment. As the world becomes increasingly flooded with images, the critical visual literacy gained through the study of art history becomes more important for a wide variety of careers.

Honors Program. The Honors Program is encouraged for Art History majors who are considering attending graduate school. To be eligible for the program, a student must have a grade point average of 3.700 in the major or consent of the major advisor. In addition to meeting the standard major requirements, the honors student completes one undergraduate seminar (course 100 or 190A-L), and writes an honors thesis (course 194H) after completing Art History 100 or equivalent, and after satisfactorily preparing a preliminary thesis draft through a preparatory special study (Art History 199), supervised by the prospective thesis advisor. Students participating in this Program are candidates for Departmental recommendation for graduation with High or Highest Honors. See the Academic Information chapter, Letters and Science honors section, of this catalog and consult the department website for more information.

Teaching Credential Subject Representative. Department Chairperson; see the Teacher Education program.

Graduate Study. The Program in Art History offers studies leading to the Master of Arts degree in History of Art as preparation for further graduate study or professional work. For more information, contact the Graduate Staff Advisor at 530-752-8710, or see http://arthistory.ucdavis.edu.

Preparatory Subject Matter

Choose four:

- AHI 001A Ancient Mediterranean Art 4
- AHI 001B Medieval and Renaissance Art 4
- AHI 001C Baroque to Modern Art 4
- AHI 001D Arts of Asia 4
- AHI 001DY Arts of Asia 5
- AHI 001E Islamic Art and Architecture 4
- AHI 005 Understanding Visual Culture 4
- AHI 025 Understanding Architecture 4

Any lower division Art Studio (ART) course except ART 010 or ART 030. 4

Units: 20

Depth Subject Matter

Units: 40
Choose four, one each in four of the following six areas; two must be from areas a, b, c; two must be from areas d, e, f.

(a) Ancient Mediterranean Art:
- AHI 172A Early Greek Art and Architecture 4
- AHI 172B Later Greek Art and Architecture 4
- AHI 173 Roman Art and Architecture 4
- AHI 175 Architecture and Urbanism in Mediterranean Antiquity 4

(b) East Asian Art:
- AHI 163A Early Chinese Art 4
- AHI 163B Chinese Painting 4
- AHI 163C Early Modern Chinese Painting 4
- AHI 163D Art from China 1900 to the Present 4
- AHI 164 The Arts of Japan 4

(c) Islamic Art:
- AHI 155 The Islamic City 4
- AHI 156 Arts of the Islamic Book 4

(d) European Art before 1700:
- AHI 110 Cultural History of Museums 4
- AHI 120A Art, Architecture, and Human Rights 4
- AHI 176A Art of the Middle Ages: Early Christian and Byzantine Art 4
- AHI 176B Art of the Middle Ages: Early Medieval and Romanesque Art 4
- AHI 176C Art of the Middle Ages: Gothic 4
- AHI 178B Early Italian Renaissance Art and Architecture 4
- AHI 178C High and Late Italian Renaissance Art and Architecture 4
- AHI 179B Baroque Art 4

(e) Western Art 1700-1900:
- AHI 110 Cultural History of Museums 4
- AHI 168 Great Cities 4
- AHI 182 British Art and Culture (1750-1900) 4
- AHI 183A Art in the Age of Revolution, 1750-1850 4
- AHI 183B Impressionism and Post-Impressionism: Manet to 1900 4
- AHI 183C Modernism in France, 1880-1940 4
- AHI 188A The American Home 4
- AHI 188B Architecture of the United States 4
- AHI 188C American Art to 1910 4

(f) Art after 1900:
- AHI 110 Cultural History of Museums 4
- AHI 148 Theory and Criticism: Painting & Sculpture 4
- AHI 163D Art from China 1900 to the Present 4
- AHI 183C Modernism in France, 1880-1940 4
- AHI 184 Twentieth Century Architecture 4
- AHI 185 Avant-Gardism and its Aftermath, 1917-1960 4
- AHI 186 Contemporary Art 1960-Present 4
- AHI 187 Contemporary Architecture 4
- AHI 189 Photography in History 4

Undergraduate Seminar in Art History:
- AHI 190A Undergraduate Seminar in Art History: Mediterranean Antiquity 4
- AHI 190B Undergraduate Seminar in Art History: Medieval 4
- AHI 190C Undergraduate Seminar in Art History: Renaissance 4
- AHI 190D Undergraduate Seminar in Art History: American 4
- AHI 190E Undergraduate Seminar in Art History: Gendering of Culture 4
- AHI 190F Undergraduate Seminar in Art History: Chinese 4
- AHI 190G Undergraduate Seminar in Art History: Japanese 4
**Electives**

Choose five additional upper-division Art History courses in consultation with the major advisor. Appropriate course substitutions may be made with the consent of the major advisor. Art History 401 and 402 may be counted among the elective units.

**Emphasis in Architectural History**

*Emphasis in Architectural History follows the same requirements as for the Art History major above, applying at least six of the following to their respective required areas or as electives:*

(College of Letters and Science)

**Department Office.** 101 Art Building 530-752-0105; [http://arthistory.ucdavis.edu](http://arthistory.ucdavis.edu)

**Faculty.** [http://arts.ucdavis.edu/art-history-people](http://arts.ucdavis.edu/art-history-people)
Art History studies the changing visual expression of values, beliefs and experiences across diverse cultures and over time. It provides training in historical, social and aesthetic understanding, critical thinking, scholarly research, and lucid, thoughtful analysis and writing. More than any other discipline art history sharpens its students' visual acuity and deepens their visual literacy. In so doing, it prepares them to face the increasingly complex visual world we find ourselves in today.

**Art History Minor**

Choose three from three of the following six areas with at least one in area a, b, or c, and one in area d, e, or f:

(a) *Ancient Mediterranean Art:*
- AHI 172A Early Greek Art and Architecture 4
- AHI 172B Later Greek Art and Architecture 4
- AHI 173 Roman Art and Architecture 4
- AHI 175 Architecture and Urbanism in Mediterranean Antiquity 4

(b) *East Asian Art:*
- AHI 163A Early Chinese Art 4
- AHI 163B Chinese Painting 4
- AHI 163C Early Modern Chinese Painting 4
- AHI 163D Art from China 1900 to the Present 4
- AHI 164 The Arts of Japan 4

(c) *Islamic Art:*
- AHI 120A Art, Architecture, and Human Rights 4
- AHI 155 The Islamic City 4
- AHI 156 Arts of the Islamic Book 4

(d) *European Art before 1700:*
- AHI 178B Early Italian Renaissance Art and Architecture 4
- AHI 178C High and Late Italian Renaissance Art and Architecture 4
- AHI 179B Baroque Art 4

(e) *Western Art 1700-1900:*
- AHI 110 Cultural History of Museums 4
- AHI 130 Landscape, Nature, and Art 4
- AHI 168 Great Cities 4
- AHI 182 British Art and Culture (1750-1900) 4
- AHI 183A Art in the Age of Revolution, 1750-1850 4
- AHI 183B Impressionism and Post-Impressionism: Manet to 1900 4
- AHI 188A The American Home 4
- AHI 188B Architecture of the United States 4
- AHI 188C American Art to 1910 4

(f) *Art after 1900:*
- AHI 148 Theory and Criticism: Painting & Sculpture 4
- AHI 163D Art from China 1900 to the Present 4
- AHI 183C Modernism in France, 1880-1940 4
- AHI 184 Twentieth Century Architecture 4
- AHI 185 Avant-Gardism and its Aftermath, 1917-1960 4
- AHI 186 Contemporary Art 1960-Present 4
- AHI 189 Photography in History 4

Choose two additional upper division art history courses which may include an Undergraduate Seminar. AHI 190A-H strongly recommended.

One lower division course may be substituted for upper-division study in any of these areas. Other appropriate substitutions may be made for the course options listed above with the prior consent of the major advisor.
Art History | AHI Courses

Courses in AHI:

**AHI 001A—Ancient Mediterranean Art (4)**
Discussion—1 hour; Lecture—3 hours. Introduction to the art and architecture of the ancient Mediterranean world, including Mesopotamia, Egypt, Greece, and Rome. GE credit: AH, VL, WC. Effective: 2002 Fall Quarter.

**AHI 001B—Medieval and Renaissance Art (4)**
Discussion—1 hour; Lecture—3 hours. Christian, Barbarian, Moslem, and Classical traditions in European Art from the fourth through the sixteenth centuries. GE credit: AH, VL, WC. Effective: 1997 Winter Quarter.

**AHI 001C—Baroque to Modern Art (4)**
Discussion—1 hour; Lecture—3 hours. Introduction to visual analysis through study of western art 1600-present, examining major artists and movements from Europe to North America. Study of the relationship of art and artists to political, religious, social change, and to changes in ideology, patronage, audience. GE credit: AH, VL, WC. Effective: 2016 Winter Quarter.

**AHI 001D—Arts of Asia (4)**
Discussion—1 hour; Lecture—3 hours. Introduction to major forms and trends in the arts, architecture, and material culture of Asia from the Neolithic to the contemporary emphasizing the visual manifestation of secular and religious ideas and ideals. Not open for credit to students who have completed AHI 1DV. GE credit: AH, VL, WC. Effective: 2015 Winter Quarter.

**AHI 001DY—Arts of Asia (5)**
Discussion—1 hour; Lecture/Discussion—1.5 hours; Web Virtual Lecture—2.5 hours. Introduction to major forms and trends in the arts and material culture of Asia from the Neolithic to the contemporary, emphasizing the visual manifestation of secular and religious ideas and ideals. Not open for credit to students who have completed AHI 1D. GE credit: AH, VL, WC, WE. Effective: 2014 Spring Quarter.

**AHI 001E—Islamic Art and Architecture (4)**
Discussion—1 hour; Lecture—3 hours. Introduction to the art and architecture of the Islamic world including the Middle East, Africa, Europe, and South Asia, from the 7th century CE to the 20th. GE credit: AH, VL, WC. Effective: 2006 Fall Quarter.

**AHI 005—Understanding Visual Culture (4)**
Discussion—1 hour; Lecture/Discussion—3 hours. Development of visual literacy for an increasingly visual world; critical analyses focusing on the widest variety of visual imagery: the fine arts across media and eras of world culture, television, film, and advertising. Intended for a diverse spectrum of audiences. GE credit: AH, VL, WC. Effective: 2015 Winter Quarter.

**AHI 025—Understanding Architecture (4)**
Discussion—1 hour; Lecture—3 hours. Development of architecture and urban design; how form, space, order are conceived and used across eras and cultures. Examines the function and organization of space, technological problems of construction, visual qualities of architecture, and social issues connected to architecture. GE credit: AH, DD, VL, WC. Effective: 2014 Fall Quarter.

**AHI 098—Directed Group Study (1-5)**
Discussion—1-5 hours. Prerequisite(s): Consent of Instructor. Restricted to lower division students. Directed Group Study (P/NP grading only.) Effective: 1997 Winter Quarter.

**AHI 099—Special Study for Undergraduates (1-5)**
Discussion—1-5 hours. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

**AHI 100—Methods of Art History (4)**
Extensive Writing/Discussion—3 hours; Term Paper. Prerequisite(s): Prior completion of two upper-division Art History courses recommended. Methods of art historical research and analysis, and general issues in critical thought. Writing skills appropriate to a range of art-historical exposition. GE credit: AH, VL. Effective: 2016 Fall Quarter.

**AHI 110—Cultural History of Museums (4)**
Lecture/Discussion—3 hours; Term Paper. Evolution of museums in the western world from the "cabinet of curiosities" of sixteenth-century Europe to the modern "art center." The changing motives behind collecting,
exhibiting, and interpretation of objects. Attention to museums' historical legacies and continuing philosophical
dilemmas. GE credit: AH, VL, WC, WE. Effective: 2014 Fall Quarter.

AHI 120A—Art, Architecture, and Human Rights (4)
Lecture/Discussion—4 hours. Study of human rights as they relate to art, architecture, and cultural heritage.
Examines museums, art collections, and cultural-heritage management, their relation to the cultural prerogatives of
communities and indigenous groups, and protection of cultural heritage during war and conflict. (Same course as
HMR 120A.) GE credit: AH, DD, SS, VL, WC, WE. Effective: 2014 Fall Quarter.

AHI 121—Politics of Public Art (4)
Lecture/Discussion—4 hours. Politics of public art. Role of contemporary artists, public monuments, urban spaces,
the movie industry, photography, propaganda art, and comics in construction of political ideologies and collective

AHI 122—Sex and Space (4)
Lecture/Discussion—4 hours. Relationship between space and sexuality. Sexual metaphors in art and architecture,
gender identity formation via images and space. Diverse intersections of sexuality and art history. GE credit: AH,
DD, VL, WE. Effective: 2016 Fall Quarter.

AHI 123—The Museum in the Age of Spectacle (4)
Lecture/Discussion—4 hours. The institution of the museum in the context of modernity, nationalism,
(post)colonialism, and the society of spectacle. Designed to bring art objects of the Manetti Shrem collection, global
art history, and foundational critical theory together in a meaningful and experimental way. GE credit: AH. Effective:
2019 Spring Quarter.

AHI 130—Landscape, Nature, and Art (4)
Lecture—3 hours; Term Paper. Interpretation of the natural world in the western world 1600-1900, with perspectives
on the present; landscape painting, ideology of picturesque and sublime, landscape art and travel, reshaping the
land as art; dialogues between art and science; nature as national identity. GE credit: AH, VL, WC, WE. Effective:
2014 Fall Quarter.

AHI 148—Theory and Criticism: Painting & Sculpture (4)
Lecture—3 hours; Term Paper. Prerequisite(s): ART 005 or 007 recommended. Study of forms and symbols in
historic and contemporary masterpieces. (Same course as ART 148.) GE credit: AH, VL, WE. Effective: 2017 Winter
Quarter.

AHI 150—Arts of Subsaharan Africa (4)
Lecture/Discussion—3 hours; Term Paper. Traditional arts and crafts of subsaharan Africa from prehistoric times to
the present; the relationships among art, nature, cycles of life, and religion; art as expression of power; sculpture
and culture in West and Central Africa; Colonialism and collecting. GE credit: AH, VL, WC. Effective: 2015 Winter
Quarter.

AHI 151—Arts of the Indians of the Americas (4)
Lecture/Discussion—3 hours; Term Paper. Development of art in North America, emphasizing ancient Mexico. South
American relationships and parallels. Recent and contemporary Indian arts and crafts from Alaska to Chile. GE
credit: AH, VL, WE. Effective: 2015 Spring Quarter.

AHI 152—Arts of Oceania and Prehistoric Europe (4)
Lecture—3 hours; Term Paper. Traditional arts of aboriginal Australia, Melanesia, Polynesia, and Micronesia, as seen
in their cultural contexts. Prehistoric art of Europe and the Near East. GE credit: AH, VL, WC. Effective: 1997 Winter
Quarter.

AHI 154—The Hindu Temple (4)
Lecture—3 hours; Term Paper. Comparative history of architecture and symbolism of the Hindu Temple in India,
Southeast Asia and the United States. Attention to the temple as expression of religious knowledge, political
authority, and cultural heritage through the lens of colonialism and postcolonialism. (Same course as REL 154.) GE
credit: AH, SS, VL, WC, WE. Effective: 2015 Fall Quarter.

AHI 155—The Islamic City (4)
Lecture—3 hours; Term Paper. Prerequisite(s): AHI 001E recommended. Introduction to the urban history of the
Islamic world. Critical study of the historiography of the Islamic city, development of urban form, institutions and
rituals, and analysis of selected themes. GE credit: AH, SS, VL, WC. Effective: 2016 Spring Quarter.
AHI 156—Arts of the Islamic Book (4)
Lecture—3 hours; Term Paper. Prerequisite(s): Prior completion of AHI 001E recommended. Critical study of the arts of the luxury book in the pre-modern Islamic world. Representation in Islam, the relationship of word and image, the discipline of calligraphy, aesthetics and representation in Persianate painting. GE credit: AH, VL, WC. Effective: 2016 Spring Quarter.

AHI 163A—Early Chinese Art (4)

AHI 163B—Chinese Painting (4)
Lecture/Discussion—4 hours. Thematic and chronological examination of Chinese painting and culture from the Tang Dynasty (7th c. CE) through the early 20th century. Issues considered include political art (made to support or protest regimes), art and the market, art and individual expression. GE credit: AH, VL, WC, WE. Effective: 2015 Winter Quarter.

AHI 163C—Early Modern Chinese Painting (4)
Lecture/Discussion—4 hours. Topics in Chinese Art History, 13th-19th century. Study of issues pertaining to self and society; gender and gendering; religion and philosophy; political engagement and protest; economy and the market; the effects created by periods of transition on visual expression. GE credit: AH, VL, WC, WE. Effective: 2014 Fall Quarter.

AHI 163D—Art from China 1900 to the Present (4)
Lecture/Discussion—4 hours. Forms of modern and avant-garde expression from China's industrialization to the 21st century. Interactions of art and politics, individual and state, art for the free market versus art for the state, expressions of modernity; China on the world stage. GE credit: AH, VL, WC, WE. Effective: 2014 Fall Quarter.

AHI 164—The Arts of Japan (4)
Lecture/Discussion—3 hours; Term Paper. Japan's painting, architecture, decorative arts, and print heritage, ancient times to the 20th century in literary, political, intellectual, and spiritual contexts; impact of Japanese art on the West and the West's transformative impact upon Japan's opening in the 19th century. GE credit: AH, VL, WC. Effective: 2016 Winter Quarter.

AHI 168—Great Cities (4)
Lecture—3 hours; Term Paper. Transformation in architecture and urban form in Paris, London, and Vienna in the context of varying social, political, and economic systems as well as very different cultural traditions, concentrating on the years 1830-1914. GE credit: AH, VL, WE. Effective: 1997 Winter Quarter.

AHI 172A—Early Greek Art and Architecture (4)
Lecture—3 hours; Term Paper. Examination of the origin and development of the major monuments of Greek art and architecture from the eighth century to the mid-fifth century B.C. (Same course as CLA 172A.) GE credit: AH, VL, WE. Effective: 2015 Fall Quarter.

AHI 172B—Later Greek Art and Architecture (4)
Lecture—3 hours; Term Paper. Study of the art and architecture of later Classical and Hellenistic Greece, from the mid-fifth century to the first century B.C. (Same course as CLA 172B.) GE credit: AH, VL, WE. Effective: 2015 Fall Quarter.

AHI 173—Roman Art and Architecture (4)
Lecture—3 hours; Term Paper. Art and architecture of Rome and the Roman Empire, from the founding of Rome through the fourth century C.E. (Same course as CLA 173.) GE credit: AH, VL, WE. Effective: 2014 Fall Quarter.

AHI 175—Architecture and Urbanism in Mediterranean Antiquity (4)
Extensive Writing; Lecture—3 hours. Architecture and urban development in the ancient Near East, Greece, and Rome. Special emphasis on the social structure of the ancient city as expressed in its architecture, and on the interaction between local traditions and the impact of Greco-Roman urbanism. (Same course as CLA 175.) GE credit: AH, VL, WC, WE. Effective: 2017 Spring Quarter.

AHI 176A—Art of the Middle Ages: Early Christian and Byzantine Art (4)
Lecture—3 hours. Term paper or gallery studies and review. Painting, sculpture and architecture of the early Christian era and Byzantine Empire: through the later Roman Empire in the West and to the final capture of Constantinople in the East. GE credit: AH, VL, WC, WE. Effective: 1997 Winter Quarter.
AHI 176B—Art of the Middle Ages: Early Medieval and Romanesque Art (4)  
Lecture—3 hours. Term paper or gallery studies and review. Painting, sculpture and architecture of western Europe in the early medieval era: from the rise of the barbarian kingdoms through the twelfth century. GE credit: AH, VL, WC, WE. Effective: 1997 Winter Quarter.

AHI 176C—Art of the Middle Ages: Gothic (4)  
Lecture—3 hours. Term paper or gallery studies and review. Painting, sculpture and architecture in northern Europe from the twelfth through the fifteenth centuries. GE credit: AH, VL, WC, WE. Effective: 1997 Winter Quarter.

AHI 177—Northern Renaissance Art (4)  
Lecture/Discussion—3 hours; Term Paper. Artistic culture of Western and Central Europe c. 1350-1600. Topics include the development of "realism" in portraiture and landscape, prints and print culture, urbanism, science and the exotic, anti-religious artworks, religious attacks on art, contacts with Renaissance Italy. GE credit: AH, VL, WC, WE. Effective: 2015 Spring Quarter.

AHI 178B—Early Italian Renaissance Art and Architecture (4)  
Lecture—3 hours; Term Paper. Fifteenth-century artists, with a focus on Florence; Donatello and Masaccio through Botticelli, in their artistic, architectural, and cultural setting; the impact of Humanism and the rebirth of classical learning. GE credit: AH, VL, WE. Effective: 2014 Fall Quarter.

AHI 178C—High and Late Italian Renaissance Art and Architecture (4)  

AHI 179B—Baroque Art (4)  
Lecture—3 hours; Term Paper. Seventeenth-century painting, sculpture and graphic arts, including such artists as Caravaggio, Rubens, Rembrandt, and Velázquez in their political and social context. GE credit: AH, VL, WE. Effective: 2015 Winter Quarter.

AHI 181—Latin American Art and Architecture (4)  
Discussion—1 hour; Lecture—3 hours. Pass One restricted to Art History Majors. Art and architecture of Latin America since Spanish arrival in the New World to the present. Visual, spatial, and material practices (painting, sculpture, urban form, cartography, and film, among others) from North and South America. How art and architecture shape and define colonial encounters and negotiations, religious and cultural exchange, conceptions of race and gender, and notions of nationalism and globalism. GE credit: AH, VL, WC. Effective: 2019 Spring Quarter.

AHI 182—British Art and Culture (1750-1900) (4)  
Lecture—3 hours; Term Paper. British painting in relation to the position of women in society and the rise of the middle-class art market. Topics covered Hogarth and popular culture, Queen Victoria and the female gaze, and Pre-Raphaelite artists and collectors. GE credit: AH, VL, WC, WE. Effective: 2019 Spring Quarter.

AHI 183A—Art in the Age of Revolution, 1750-1850 (4)  
Lecture—3 hours; Term Paper. Prerequisite(s): Prior completion of AHI 001C recommended. Emergence of modernism in Europe from the late 18th century to the middle of the 19th century. Major artistic events viewed against a revolutionary backdrop of changing attitudes toward identity, race, and gender. GE credit: AH, VL, WC, WE. Effective: 2016 Spring Quarter.

AHI 183B—Impressionism and Post-Impressionism: Manet to 1900 (4)  
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Prior completion of AHI 001C recommended. Innovations of Impressionists, Post-Impressionists, and Symbolists in relation to social changes. Assessment of role of dealers and critics, myth of the artist-genius, and gender relations in French art and culture of the late 1800s. GE credit: AH, VL, WC, WE. Effective: 2016 Spring Quarter.

AHI 183C—Modernism in France, 1880-1940 (4)  
Lecture—3 hours; Term Paper. Development of modern art in France, its social context, and its transnational aspects. Post-Impressionism, Fauvism, Cubism, Expressionism, and Surrealism are considered in relation to secessionist movements, the formation of other artistic groups, new forms of patronage, and new audiences. GE credit: AH, VL, WC, WE. Effective: 2015 Winter Quarter.

AHI 184—Twentieth Century Architecture (4)  
Lecture—3 hours; Term Paper. Prerequisite(s): Prior completion of AHI 025 recommended. Major movements in architecture of the twentieth century in Europe and America. Formal innovations are examined within the social,
political, and economic circumstances in which they emerged. GE credit: AH, VL, WE. Effective: 2016 Spring Quarter.

AHI 185—Avant-Gardism and its Aftermath, 1917-1960 (4)
Lecture/Discussion—4 hours. Social, cultural, aesthetic, and theoretical development for artists and their audiences in the context of larger issues like the Mexican, Russian and German revolutions, WWI, the Depression, WWII, etc., and a critical-theoretical inquiry into questions of modernism, modernity, and avant-gardism. GE credit: AH, VL, WC. Effective: 2016 Spring Quarter.

AHI 186—Contemporary Art 1960-Present (4)
Lecture/Discussion—4 hours; Term Paper. Development of new media and aesthetics in the context of such cultural and political phenomena as the New Left, feminism, and globalization; investigation of the critical-theoretical questions of neo avant-gardism, postmodernism, and postmodernity. GE credit: ACGH, AH, VL, WE. Effective: 2014 Fall Quarter.

AHI 187—Contemporary Architecture (4)
Lecture—3 hours; Term Paper. Introduction to world architecture and urban design since circa 1966. Relation of influential styles, buildings, and architects to postmodern debates and to cultural, economic, technological and environmental change. GE credit: AH, VL, WE. Effective: 2017 Spring Quarter.

AHI 188A—The American Home (4) Review all entries
Lecture/Discussion—4 hours; Term Paper. American domestic architecture and its responsiveness to changes in daily life from Colonial times to the 1960s. Vernacular developments, effects of different socioeconomic conditions, and women's role in shaping the home receive special attention. GE credit: ACGH, AH, DD, VL, WE. Effective: 2014 Fall Quarter.

AHI 188B—Architecture of the United States (4)
Lecture/Discussion—3 hours; Term Paper. Major movements from colonial times to the present. The role of buildings in a changing American society, the interplay of styles with technologies of construction, relationship between American and European developments and evolution of the architectural and planning professions. GE credit: ACGH, AH, VL, WE. Effective: 2015 Winter Quarter.

AHI 188C—American Art to 1910 (4)

AHI 189—Photography in History (4)
Lecture/Discussion—4 hours. Social, cultural, aesthetic and technical developments in the history of photography including patronage and reception, commercial, scientific, political and artistic applications, and a critical-theoretical inquiry into photography's impact on the social category "art" and the history of subjectivity. GE credit: AH, VL. Effective: 2016 Spring Quarter.

AHI 190A—Undergraduate Seminar in Art History: Mediterranean Antiquity (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Art History major, minor, or other significant training in Art History recommended. Class size limited to 25 students; for majors, minors, other advanced students. Study of a broad problem or theoretical issue in art, architecture, or material culture. Intensive reading, discussion, research, writing. May be repeated up to 2 time(s) when topic differs. GE credit: AH, OL, VL, WE. Effective: 2014 Fall Quarter.

AHI 190B—Undergraduate Seminar in Art History: Medieval (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Art History major, minor, or other significant training in Art History recommended. Class size limited to 25 students; for majors, minors, other advanced students. Study of a broad problem or theoretical issue in art, architecture, or material culture. Intensive reading, discussion, research, writing. May be repeated up to 2 time(s) when topic differs. GE credit: AH, OL, VL, WE. Effective: 2014 Fall Quarter.

AHI 190C—Undergraduate Seminar in Art History: Renaissance (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Art History major, minor, or other significant training in Art History recommended. Class size limited to 25 students; for majors, minors, other advanced students. Study of a broad problem or theoretical issue in art, architecture, or material culture. Intensive reading, discussion, research, writing. May be repeated up to 2 time(s) when topic differs. GE credit: AH, OL, VL, WE. Effective: 2014 Fall Quarter.
AHI 190D—Undergraduate Seminar in Art History: American (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Art History major, minor, or other significant training in Art History recommended. Class size limited to 25 students; for majors, minors, other advanced students. Study of a broad problem or theoretical issue in art, architecture, or material culture. Intensive reading, discussion, research, writing. May be repeated up to 2 time(s) when topic differs. GE credit: AH, OL, VL, WE. Effective: 2014 Fall Quarter.

AHI 190E—Undergraduate Seminar in Art History: Gendering of Culture (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Art History major, minor, or other significant training in Art History recommended. Class size limited to 25 students; for majors, minors, other advanced students. Study of a broad problem or theoretical issue in art, architecture, or material culture. Intensive reading, discussion, research, writing. May be repeated up to 2 time(s) when topic differs. GE credit: OL, VL, WE. Effective: 2014 Fall Quarter.

AHI 190F—Undergraduate Seminar in Art History: Chinese (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Art History major, minor, or other significant training in Art History recommended. Class size limited to 25 students; for majors, minors, other advanced students. Study of a broad problem or theoretical issue in art, architecture, or material culture. Intensive reading, discussion, research, writing. May be repeated up to 2 time(s) when topic differs. GE credit: AH, OL, VL, WE. Effective: 2014 Fall Quarter.

AHI 190G—Undergraduate Seminar in Art History: Japanese (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Art History major, minor, or other significant training in Art History recommended. Class size limited to 25 students; for majors, minors, other advanced students. Study of a broad problem or theoretical issue in art, architecture, or material culture. Intensive reading, discussion, research, writing. May be repeated up to 2 time(s) when topic differs. GE credit: AH, OL, VL, WE. Effective: 2014 Fall Quarter.

AHI 190H—Undergraduate Seminar in Art History: Modern-Contemporary (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Art History major, minor or other significant training recommended. Class size limited to 25 students; for majors, minors, other advanced students. Study of a broad problem or theoretical issue in art, architecture, or material culture. Intensive reading, discussion, research, writing. May be repeated up to 2 time(s) when topic differs. GE credit: AH, OL, VL, WE. Effective: 2014 Fall Quarter.

AHI 190I—Undergraduate Seminar in Art History: 17th-18th Century (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Art History major, minor, or other significant training in Art History recommended. Class size limited to 25 students; for majors, minors, other advanced students. Study of a broad problem or theoretical issue in art, architecture, or material culture. Intensive reading, discussion, research, writing. May be repeated up to 2 time(s) when topic differs. GE credit: AH, OL, VL, WE. Effective: 2014 Fall Quarter.

AHI 190J—Undergraduate Seminar in Art History: Islamic (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Art History major, minor, or other significant training in Art History recommended. Class size limited to 25 students; for majors, minors, other advanced students. Study of a broad problem or theoretical issue in art, architecture, or material culture. Intensive reading, discussion, research, writing. May be repeated up to 2 time(s) when topic differs. GE credit: AH, OL, VL, WE. Effective: 2014 Fall Quarter.

AHI 190K—Undergraduate Seminar in Art History: 19th Century (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Art History major, minor, or other significant training in Art History recommended. Class size limited to 25 students; for majors, minors, other advanced students. Study of a broad problem or theoretical issue in art, architecture, or material culture. Intensive reading, discussion, research, writing. May be repeated up to 2 time(s) when topic differs. GE credit: AH, OL, VL, WE. Effective: 2014 Fall Quarter.

AHI 190L—Undergraduate Seminar in Art History: Architecture & Heritage (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Art History major, minor, or other significant training in Art History recommended. Class size limited to 25 students; for majors, minors, other advanced students. Study of a broad problem or theoretical issue in art, architecture, or material culture. Intensive reading, discussion, research, writing. May be repeated up to 2 time(s) when topic differs. GE credit: AH, OL, VL, WE. Effective: 2014 Fall Quarter.

AHI 192—Internship (2-12)
Internship. Supervised program of internships at professional art institutions such as museums, galleries, and art archives including collections of slides and photographs. May be repeated up to 1 time(s). (P/NP grading only.) Effective: 1997 Winter Quarter.

AHI 192—Internship (1-6)
Internship. Prerequisite(s): Consent of Instructor. Supervised program of internships at professional art institutions such as museums, galleries, and art archives including collections of slides and photographs. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 2019 Spring Quarter.
AHI 194H—Special Study for Honor Students (4)
Independent Study—12 hours. Prerequisite(s): AHI 190; Or the equivalent, as determined by the major advisor. Open only to students in the Art History Honors Program. Independent study of an art historical problem culminating in the writing of an honors thesis under the supervision of a faculty guidance committee. Effective: 1997 Winter Quarter.

AHI 198—Directed Group Study (1-5)
Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

AHI 199—Special Study for Advanced Undergraduates (1-5)
Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

AHI 200A—Visual Theory and Interpretive Methods (4)
Discussion—3 hours; Extensive Writing—1 hour. Close study of selected recent developments in interpretive methodology used by art historians and other analysts of visual culture and the place of those developments within art history's history and in the larger field of social, cultural and historical analysis. May be repeated up to 1 time(s). Effective: 2000 Fall Quarter.

AHI 200B—Research and Writing Methods in Art History (4)
Discussion—3 hours; Term Paper. Restricted to graduate students in Art History. Development of the research, writing, and editing skills necessary for producing publishable work. Focus on reference tools used by art historians and the mechanics of scholarship, from question framing and organization of ideas to writing clear, effective prose. Effective: 2001 Winter Quarter.

AHI 200C—Thesis Writing Colloquium (1)
Auto Tutorial; Discussion—1.5 hours. Prerequisite(s): AHI 200B; Taken by all Art History M.A. students in their first year. Restricted to graduate students in Art History. Meeting concurrently with course 200B, the colloquium provides a structured, supportive environment for second-year Art History graduate students drafting masters' theses. Offers a forum for technical discussions, discussion of writing/editing procedures, and peer review of writing in progress. (S/U grading only.) Effective: 2008 Summer Session 1.

AHI 210—Museums, Art Exhibitions and Culture (4)
Extensive Writing/Discussion; Seminar—3 hours; Term Paper. Prerequisite(s): Graduate status in art history or an allied field. Class size limited to 20 students. Issues accompanying the evolution and function of museums from cabinets of curiosities in sixteenth-century Europe to modern art centers. Examination of divergent motives behind collecting, exhibiting, and interpretation of objects. Investigation of museums' historical legacies and continuing philosophical dilemmas. Effective: 2015 Winter Quarter.

AHI 250—Problems in Art Historical Research (4)
Seminar—3 hours; Term Paper. Major topics in art historical research, emphasizing special methods of investigation, and of historical and critical analysis. May be repeated for credit. Effective: 1997 Winter Quarter.

AHI 254—Seminar in Classical Art (4)
Seminar—3 hours; Term Paper. Selected areas of special study in classical art of the Greek and Roman tradition. Course may be repeated for credit with consent of instructor. May be repeated for credit / with consent of instructor. Effective: 1997 Winter Quarter.

AHI 263—Seminar in Chinese Art (4)
Seminar—3 hours; Term Paper. Selected areas of special study in Chinese Art. May be repeated for credit with consent of instructor. May be repeated for credit / with consent of instructor. Effective: 1997 Winter Quarter.

AHI 276—Seminar in Medieval Art (4)
Seminar—3 hours; Term Paper. Selected areas of special study in medieval art from Early Christian to late Gothic. May be repeated for credit with consent of instructor. May be repeated for credit /with consent of instructor. Effective: 1997 Winter Quarter.

AHI 278—Seminar in Italian Renaissance Art (4)
Seminar—3 hours; Term Paper. Selected areas of special study in Italian art from the fourteenth to the sixteenth century. May be repeated for credit with consent of instructor. Effective: 1997 Winter Quarter.

AHI 283—Seminar in Visual Culture and Gender (4)
Seminar—3 hours; Term Paper. Selected areas of special study in the relationship between visual culture and gender in Europe and America from 1750 to present. May be repeated for credit with consent of instructor. May be repeated for credit /with consent of instructor. Effective: 2000 Fall Quarter.
AHI 288—Seminar in European and American Architecture (4)
Seminar—3 hours; Term Paper. Exploration of selected topics in European and American architectural history with concentration on the Modern Period. May be repeated for credit with consent of instructor. May be repeated for credit /with consent of instructor. Effective: 1997 Winter Quarter.

AHI 290—Special topics in Art History (4)
Seminar—3 hours; Term Paper. Special research seminar in the theory or methods of Art History, or in a period of Art History. Topic will vary depending on the interests of the instructor or students. May be repeated for credit topic differs and with consent of instructor. Effective: 2002 Fall Quarter.

AHI 292—Internship (1-4)
Internship—3-12 hours. Prerequisite(s): Consent of Instructor. Graduate student. Restricted to graduate students in Art History only. Supervised internship at professional art or cultural institution including museum, galleries, archives, government offices, visual resources libraries, etc. May be repeated up to 8 unit(s). (S/U grading only.) Effective: 2007 Fall Quarter.

AHI 298—Directed Group Study (1-5)
Seminar. May be repeated for credit. (S/U grading only.) Effective: 2002 Winter Quarter.

AHI 299—Individual Study (1-6)
Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

AHI 390—Introduction to Teaching Art History for Teaching Assistants (1)
Discussion—1 hour. Designed for teaching assistants with emphasis on problems and procedures encountered by teachers of undergraduate art history. (S/U grading only.) Effective: 1997 Winter Quarter.

AHI 396—Teaching Assistant Training Practicum (1-4)
Practice; Seminar. Prerequisite(s): Graduate standing. May be repeated for credit. (S/U grading only.) Effective: 2008 Summer Session 1.

AHI 401—Museum Training: Curatorial Principles (4)

AHI 402—Museum Training: Exhibition Methods (4)

The Major Program
The Art Studio major provides the studio experience necessary for a broad understanding of the practice and interpretation of the visual arts.

**The Program.** The Art Studio program is designed to deliver a broad range of hands-on studio practices to the art major. Areas of focus include painting, sculpture, drawing, photography, ceramics, printmaking, and time-based media. Course choices/sequences are determined by the student according to major distribution requirements. Students are encouraged to explore a broad range of disciplines and are expected to take advantage of beginning classes which provide a critical introduction to the research possibilities within the major, across disciplines. In addition to studio classes, students are encouraged to participate in a distinguished visiting artist lecture series, professional practice seminars, student exhibitions/competitions, internships, and benefit from exposure to cultural events and exhibitions in Davis, Sacramento, and the Greater Bay Area.

**Major Advisor.** Information on the current Academic Advisor can be obtained by contacting the Art Department Main Office at 530-752-0105 or at http://arts.ucdavis.edu/arts-group-undergraduate-advising.

**Portfolios.** While portfolios are not required for admission to the art major, students at all levels are expected to maintain current portfolios of completed work in order to qualify and compete for the numerous internships, fellowships, grants, awards, and exhibitions the program has to offer, as well as to better prepare for the rigors of graduate school and/or an independent studio practice.

**Career Options.** Graduates of the Art Studio Program attend prestigious post-baccalaureate and graduate programs in studio art. Alumni often go on to develop professional studio practices. Commitment to the development of one's studio work leads to exhibition opportunities as well as accomplishments in the realm of fellowships, commissions, collaborations, and a host of other professional projects and opportunities. For the student wishing to explore additional arts-related trajectories, in the private or public sector, a studio arts education provides a strong foundation for careers and/or graduate work in K-12 art education, art therapy, arts administration, curatorial studies, set design, architecture, culinary arts, design, film, animation, art criticism/journalism among others.

**Teaching Credential Subject Representative.** See the Teacher Education program.

Faculty. http://arts.ucdavis.edu/art-studio-people

Graduate Study. The Department of Art offers programs of study and research leading to the M.F.A. degree in the practice of art. For more information contact the Graduate Staff Advisor at 530-752-8710 or at http://arts.ucdavis.edu/art-studio-graduate-program.

Art Studio | ART Minor
(College of Letters and Science)
Annabeth Rosen, M.F.A., Chairperson of the Department

Department Office. 101 Art Building 530-752-0105; http://art.ucdavis.edu
Faculty. http://arts.ucdavis.edu/art-studio-faculty

The Minor Program. The Art Studio program delivers a broad range of hands-on studio practices to the art minor. Areas of focus include painting, sculpture, drawing, photography, ceramics, printmaking, and time-based media. Course choices/sequences are determined by the student according to minor requirements. Students are encouraged to explore different areas of focus and are expected to take advantage of beginning classes which provide a critical introduction to the research possibilities within studio art. In addition to studio classes, students are encouraged to participate in the department’s distinguished visiting artist lecture series, professional practice seminars, student exhibitions/competitions, internships, and benefit from exposure to cultural events and exhibitions in Davis, Sacramento, and the Greater Bay Area.

Prerequisite courses must be taken prior to enrollment in upper division courses. Independent study courses are not applicable.

Art Studio

Upper division art studio courses in two of the following areas:
Area 1 (Painting, Drawing, Printmaking)
Area 2 (Sculpture and Ceramic Sculpture)
Area 3 (Photography and Video)
Note: One lower division substitute course permissible.

Total: 20

Art Studio | ART Courses
Various of the Professional courses (400+) are not offered each year.

Courses in ART:
ART 002—Beginning Drawing (4)
Studio—6 hours. Introduction to drawing using various black and white media to articulate forms and organize space, with reference to historical and contemporary works. GE credit: AH, VL. Effective: 2015 Winter Quarter.

ART 005—Beginning Sculpture (4)
Studio—6 hours. Basic sculpture techniques using a variety of media. Form in space using cardboard, plaster, and/or cement, wood and/or metal and other media. GE credit: AH, VL. Effective: 2015 Winter Quarter.

ART 007—Beginning Painting (4) Review all entries
Studio—6 hours. Introduction to techniques and concepts in the practice of painting. GE credit: AH, VL. Effective: 2016 Spring Quarter.

Total: 68
ART 007—Beginning Painting (4) **Review all entries**
Studio—6 hours. Prerequisite(s): ART 002; or Consent of Instructor. Introduction to techniques and concepts in the practice of painting. GE credit: AH, VL. Effective: 2019 Summer Session 1.

ART 008—Beginning Ceramic Sculpture (4)
Studio—6 hours. Introduction to ceramic sculpture construction and processes. Large scale hand-building, glazing, kilns and kiln firing technology. GE credit: AH, VL. Effective: 2016 Spring Quarter.

ART 009—Beginning Photography (4) **Review all entries**
Studio—6 hours. Introduction to the fundamental technical, aesthetic, and formal aspects of photography. Camera skills, film developing and printing in the black and white darkroom. GE credit: AH, VL. Effective: 2015 Winter Quarter.

ART 009—Beginning Photography (5) **Review all entries**
Studio—6 hours. Introduction to visual language of photographic art and technique. Manual camera operation and printing techniques. Concept and practice of photography as an art form and creating photographic projects. GE credit: AH, VL. Effective: 2019 Fall Quarter.

ART 010—Fine Art Appreciation (4)
Discussion—1 hour; Lecture—3 hours. Survey of contemporary artists since 1970. Topics explore contemporary thought within the visual arts using the forms and strategies of painting, sculpture, installation, performance, photography, and video in collaborative, ephemeral and multimedia approaches. Intended for Art and non-Art majors. GE credit: AH, VL. Effective: 2017 Winter Quarter.

ART 011—Beginning Printmaking (4)
Studio—6 hours. Introduction to printmaking techniques such as monography, relief, and intaglio. Investigation of personal imagery through use of these techniques. GE credit: AH, VL. Effective: 2015 Winter Quarter.

ART 012—Beginning Video (4)

ART 024—Introduction to Experimental Video and Film (4)

ART 030—Introduction to Contemporary Visual Culture (4)
Discussion/Laboratory—1 hour; Lecture—3 hours. Establishing visual literacy across the media of fine art, photography, advertising, television and film; media culture; focus on critical decoding of contemporary visual culture. GE credit: AH, VL. Effective: 1997 Winter Quarter.

ART 098—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Restricted to lower division students. (P/NP grading only.) Effective: 1997 Winter Quarter.

ART 099—Special Study for Undergraduates (1-5)
Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

ART 101—Intermediate Painting (4)
Studio—6 hours. Prerequisite(s): ART 002; ART 007 Individualized projects exploring color and space in a variety of subject matter and approaches. Builds on basic skills and concepts from beginning drawing and painting courses. Study of historical and contemporary art in relation to studio practice. May be repeated up to 1 time(s) when topic differs. GE credit: AH, VL. Effective: 2013 Fall Quarter.

ART 102A—Advanced Painting: Studio Projects (4)
Studio—6 hours. Prerequisite(s): ART 101 Pass One restricted to Art Studio majors. Sustained development of painting for advanced students. Approaches will vary according to the instructor. May be repeated up to 1 time(s). GE credit: AH, VL. Effective: 2007 Fall Quarter.

ART 102B—Advanced Painting: Figure (4)
Studio—6 hours. Prerequisite(s): ART 101 Pass One restricted to Art Studio majors. Advanced painting using the human figure as subject. May be repeated up to 1 time(s). GE credit: AH, VL. Effective: 2007 Fall Quarter.

ART 102C—Advanced Painting: Special Topics (4)
Studio—6 hours. Prerequisite(s): (ART 002, ART 007, ART 101); (ART 102A or ART 102B) Pass One restricted to Art
Studio majors. Special topics in painting for upper division students. Emphasis on development of a personal practice of painting informed by awareness of contemporary issues in painting and their historical background. Topics will vary with instructor. May be repeated up to 1 time(s). GE credit: AH, VL. Effective: 2007 Fall Quarter.

**ART 102D—Painting and Installation Art (4)**
Studio—6 hours. Prerequisite(s): ART 002 C or better; ART 007 C or better; ART 101 C or better; or Consent of Instructor. Upper division standing. Pass One restricted to Art Studio majors. Expanded fields of painting and installation art in the context of contemporary art practice. Painting’s possibilities in relation to space and pushing the boundaries of two-dimensional art. May be repeated up to 1 time(s) when content differs. Effective: 2019 Fall Quarter.

**ART 103A—Intermediate Drawing: Black and White (4)**
Studio—6 hours. Prerequisite(s): ART 002 Pass One restricted Art Studio majors. Advanced study of drawing composition using black and white media. GE credit: AH, VL. Effective: 2007 Fall Quarter.

**ART 103B—Intermediate Drawing: Color (4)**
Studio—6 hours. Prerequisite(s): ART 002 Pass One restricted Art Studio majors. Study of drawing composition in color media. GE credit: AH, VL. Effective: 2007 Fall Quarter.

**ART 103C—Intermediate Drawing: 3 Dimensions (4)**
Studio—6 hours. Prerequisite(s): ART 002 Pass One restricted to Art Studio Major. Intermediate study of drawing composition using three dimensional media. GE credit: AH, VL. Effective: 2017 Fall Quarter.

**ART 105A—Advanced Drawing: Studio Projects (4)**
Studio—6 hours. Prerequisite(s): ART 002; (ART 103A or ART 103B) Pass One restricted to Art Studio majors. Exploration of composition and process in drawing. Emphasis on the role of drawing in contemporary art and on drawing as an interdisciplinary practice. May be repeated up to 1 time(s). GE credit: AH, VL. Effective: 2007 Fall Quarter.

**ART 105B—Advanced Drawing: Figure (4)**
Studio—6 hours. Prerequisite(s): (ART 103A or ART 103B); ART 002 Pass One restricted Art Studio majors. Study of the figure through drawing of the model. Exploration of different methods and process of figure-drawing. May be repeated up to 1 time(s). GE credit: AH, VL. Effective: 2018 Winter Quarter.

**ART 110A—Intermediate Photography: Black and White Analog (4)**
Studio—6 hours. Prerequisite(s): ART 009 Pass One restricted to Art Studio majors. Introduction to 35mm and medium format camera. Development of personal aesthetic and portfolio of black and white prints. GE credit: AH, VL. Effective: 2007 Fall Quarter.

**ART 110B—Intermediate Photography: Digital Imaging (4)**
Studio—6 hours. Prerequisite(s): ART 009 Pass One restricted to Art Studio majors. Comprehensive introduction to all elements of digital photography, including scanning, imaging software and printing. GE credit: AH, VL. Effective: 2007 Fall Quarter.

**ART 111A—Advanced Photography: Special Topics (4)**
Studio—6 hours. Prerequisite(s): ART 009; (ART 110A or ART 110B) Pass One open to Art Studio majors. Special topics related to photography and contemporary art practice. Multiple projects in a variety of approaches. May be repeated up to 2 time(s) when topic differs. GE credit: AH, VL. Effective: 2013 Fall Quarter.

**ART 111B—Advanced Photography: Digital Imaging (4)**
Studio—6 hours. Prerequisite(s): ART 009; ART 110B Pass One restricted to Art Studio majors. In-depth exploration of digital photography, including refined digital imaging techniques. Theoretical issues involved in digital media. May be repeated up to 1 time(s). GE credit: AH, VL. Effective: 2007 Fall Quarter.

**ART 112—Sound for Vision (4)**
Studio—6 hours. Prerequisite(s): ART 012 or TCS 100 Pass One restricted to Art Studio majors. Sound composition and development of an audio databank. Study of repetition and phase shifts. Creation of descriptive acoustic space recordings in combination with other artistic media. Audio as stand alone or accompaniment. May be repeated up to 1 time(s). GE credit: AH. Effective: 2007 Fall Quarter.

**ART 112—Sound for Vision (4)**
Review all entries
Studio—6 hours. Prerequisite(s): ART 012 or CDM 020 or CTS 020 or TCS 100 Pass One restricted to Art Studio majors. Sound composition and development of an audio databank. Study of repetition and phase shifts. Creation
of descriptive acoustic space recordings in combination with other artistic media. Audio as stand alone or accompaniment. May be repeated up to 1 time(s). GE credit: AH. Effective: 2019 Winter Quarter.

ART 113—Interdisciplinary Art (4)
Studio—6 hours. Prerequisite(s): Upper division standing in Art Studio, Theater and Dance, Design, Technocultural Studies, or Music. Experimental interdisciplinary strategies. Use of various media in creation of collaborative or independent works. Production of participatory audio-visual works, installations, or two dimensional explorations. May be repeated up to 1 time(s). GE credit: AH, VL. Effective: 2007 Fall Quarter.

ART 114A—Intermediate Video: Animation (4) Review all entries
Studio—6 hours. Prerequisite(s): ART 012 or CTS 020; One drawing course. Pass One restricted to Art Studio majors. Exploration of animation. Relationship between drawing, digital stills, and multiple images. Animation using traditional drawing techniques, collage, and digital processes. May be repeated up to 1 time(s). GE credit: AH, VL. Effective: 2007 Fall Quarter.

ART 114A—Intermediate Video: Animation (4) Review all entries
Studio—6 hours. Prerequisite(s): ART 012 or CTS 020; One drawing course recommended. Pass One restricted to Art Studio majors. Exploration of animation. Relationship between drawing, digital stills, and multiple images. Animation using traditional drawing techniques, collage, and digital processes. May be repeated up to 1 time(s). GE credit: AH, VL. Effective: 2018 Winter Quarter.

ART 114A—Intermediate Video: Animation (4) Review all entries
Studio—6 hours. Prerequisite(s): ART 012 or CTS 020 or CDM 020 Pass One restricted to Art Studio majors. Exploration of animation. Relationship between drawing, digital stills, and multiple images. Animation using traditional drawing techniques, collage, and digital processes. May be repeated up to 1 time(s). GE credit: AH, VL. Effective: 2019 Winter Quarter.

ART 114B—Intermediate Video: Experimental Documentary (4) Review all entries
Studio—6 hours. Prerequisite(s): ART 012 or CTS 020 Pass One restricted to Art Studio majors. Experimental documentary practice. Use of interviews, voice-overs, and still and moving images. Production of alternative conceptual and visual projects. May be repeated up to 1 time(s). GE credit: AH, VL. Effective: 2018 Winter Quarter.

ART 114B—Intermediate Video: Experimental Documentary (4) Review all entries
Studio—6 hours. Prerequisite(s): ART 012 or CTS 020 or CDM 020 Pass One restricted to Art Studio majors. Experimental documentary practice. Use of interviews, voice-overs, and still and moving images. Production of alternative conceptual and visual projects. May be repeated up to 1 time(s). GE credit: AH, VL. Effective: 2019 Winter Quarter.

ART 114C—Intermediate Video: Performance Strategies (4) Review all entries
Studio—6 hours. Prerequisite(s): ART 012 or CTS 020 Pass One restricted to Art Studio majors. Use of video to expand performance art production. Exploration of improvisation, direction, projection, and image processing in real time. May be repeated up to 1 time(s). GE credit: AH, VL. Effective: 2018 Winter Quarter.

ART 114C—Intermediate Video: Performance Strategies (4) Review all entries
Studio—6 hours. Prerequisite(s): ART 012 or CTS 020 or CDM 020 Pass One restricted to Art Studio majors. Use of video to expand performance art production. Exploration of improvisation, direction, projection, and image processing in real time. May be repeated up to 1 time(s). GE credit: AH, VL. Effective: 2019 Winter Quarter.

ART 117—Advanced Video and Electronic Arts (4) Review all entries
Studio—6 hours. Prerequisite(s): ART 012 or TCS 100; (ART 112 or ART 114A or ART 114B or ART 114C); Upper division standing Art Studio majors. Pass One restricted to Art Studio majors; upper division standing. Independently driven video, digital, and/or performance projects. Further development in the electronic arts ranging from video installation to performance. May be repeated up to 1 time(s). GE credit: AH, VL. Effective: 2007 Fall Quarter.

ART 117—Advanced Video and Electronic Arts (4) Review all entries
Studio—6 hours. Prerequisite(s): ART 012 or CTS 020; (ART 112 or ART 114A or ART 114B or ART 114C or CDM 100 or CDM 104); (CDM 105 or TCS 100 or TCS 101 or TCS 104); Upper division standing Art Studio majors. Pass One restricted to Art Studio majors; upper division standing. Independently driven video, digital, and/or performance projects. Further development in the electronic arts ranging from video installation to performance. May be repeated up to 1 time(s). GE credit: AH, VL. Effective: 2019 Winter Quarter.

ART 121—Reinterpreting Landscape (4)
Studio—6 hours. Prerequisite(s): ART 002; ART 007 Pass One restricted to Art Studio majors. Interpretation of
landscape through painting, drawing, and related media. Emphasis on the integration of historical, cultural, natural, and artistic contexts. May be repeated up to 1 time(s). GE credit: AH, VL. Effective: 2007 Fall Quarter.

**ART 125A—Intermediate Printmaking: Relief (4)**
Studio—6 hours. Prerequisite(s): ART 011 Pass One restricted to Art Studio majors. Woodcut linocut, metal-plate, relief, and experimental uses of other materials for printmaking. Additive and reductive relief techniques. May be repeated up to 1 time(s). GE credit: AH, VL. Effective: 2007 Fall Quarter.

**ART 125B—Intermediate Printmaking: Intaglio (4)**
Studio—6 hours. Prerequisite(s): ART 011 Pass One restricted to Art Studio majors. Metal plate etching, aquatint, hard and soft ground, burin engraving and related printmaking techniques. May be repeated up to 1 time(s). GE credit: AH, VL. Effective: 2007 Fall Quarter.

**ART 125C—Intermediate Printmaking: Lithography (4)**
Studio—6 hours. Prerequisite(s): ART 011 restricted to Art Studio majors. Stone and metal-plate lithography and other planographic printmaking methods. Exploration of the basic chemistry and printing procedure inherent in stone lithography. May be repeated up to 1 time(s). GE credit: AH, VL. Effective: 2007 Fall Quarter.

**ART 125D—Intermediate Printmaking: Serigraphy (4)**
Studio—6 hours. Prerequisite(s): ART 011 restricted to Art Studio majors. Printmaking techniques in silk screen and related stencil methods. Development of visual imagery using the language of printmaking. May be repeated up to 1 time(s). GE credit: AH, VL. Effective: 2007 Fall Quarter.

**ART 129—Advanced Printmaking (4)**
Studio—6 hours. Prerequisite(s): ART 125A or ART 125B or ART 125C or ART 125D; Completion of two of the courses listed above. Pass One restricted to Art Studio majors. Development of intermedia printmaking. Advanced modes in print technologies: relief, serigraphy, intaglio, surface, as well as addition of digitized imagery. Production of prints using multi-plate prints and other methods. May be repeated up to 2 time(s). GE credit: AH, VL. Effective: 2007 Fall Quarter.

**ART 138—The Artist's Book (4)**
Studio—6 hours. Prerequisite(s): Completion of three upper division Art Studio courses. Pass One restricted to Art Studio majors. Creation of an artist's book in an edition of three. Use of a variety of media. May be repeated up to 1 time(s). GE credit: AH, VL. Effective: 2007 Fall Quarter.

**ART 142A—Intermediate Ceramic Sculpture: Industrial Production Methods (4)**
Studio—6 hours. Prerequisite(s): ART 008 Pass One restricted to Art Studio majors. Ceramic sculpture creation using two forms of industrial processes: plaster mold design, fabrication and casting; and extrusion with dies, including die fabrication. May be repeated up to 1 time(s). GE credit: AH, VL. Effective: 2016 Spring Quarter.

**ART 142B—Intermediate Ceramic Sculpture: Material Study (4)**
Studio—6 hours. Prerequisite(s): ART 008 Pass One restricted to Art Studio majors. Study of ceramic materials and processes. Areas studied include clay and clay bodies; glaze materials through temperature, color and texture; history and technology of kilns and kiln firing. Examination of material properties and characteristics through experimentation. May be repeated up to 1 time(s). GE credit: AH, VL. Effective: 2016 Spring Quarter.

**ART 142C—Intermediate Ceramic Sculpture: Special Topics (4)**
Studio—6 hours. Prerequisite(s): ART 008 Pass One restricted to Art Studio majors. Exploration of the ceramic surface for creative expression. Use of glazing techniques including china paint, decals, luster, and silkscreen with underglaze and overglaze as well as the use of common materials such as epoxy, paint, oil and wax. May be repeated up to 2 time(s). GE credit: AH, VL. Effective: 2016 Spring Quarter.

**ART 143—Advanced Ceramic Sculpture: Studio Projects (4)**
Studio—6 hours. Prerequisite(s): ART 008; ART 142A or ART 142B or ART 142C Pass One restricted to Art Studio majors. Experimentation with all techniques learned in prerequisite ceramics classes. Course will include class projects in consultation with faculty. May be repeated up to 2 time(s) Consent of instructor required for students taking the course a third time. GE credit: AH, VL. Effective: 2017 Spring Quarter.
ART 147—Theory and Criticism of Photography (4)
Lecture—3 hours; Term Paper. Prerequisite(s): ART 009 Development of camera vision, ideas, and aesthetics and their relationship to the fine arts from 1839 to the present. GE credit: AH, VL. Effective: 2012 Fall Quarter.

ART 148—Theory and Criticism: Painting & Sculpture (4)
Lecture—3 hours; Term Paper. Prerequisite(s): ART 005 or ART 007 recommended. Study of forms and symbols in historic and contemporary masterpieces. (Same course as AHI 148.) GE credit: AH, VL, WE. Effective: 2014 Fall Quarter.

ART 149—Introduction to Critical Theory (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): AHI 001B or AHI 001C; or AHI 183F; Two of the Art History courses listed above. An overview of 20th century critical theories of culture and their relation to visual art and mass media culture. GE credit: AH, VL. Effective: 1997 Winter Quarter.

ART 149—Introduction to Critical Theory (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Overview of 20th century critical theories of culture and their relation to visual art and mass media culture. GE credit: AH, VL. Effective: 2019 Winter Quarter.

ART 150—Theory and Criticism of Electronic Media (4)
Lecture—3 hours; Term Paper. Prerequisite(s): ART 024 recommended. Study of electronic media, focusing on critique, application, and relationship to art practice. Analysis of the conceptual basis of electronic media as an artistic mode of expression. GE credit: AH. Effective: 2007 Fall Quarter.

ART 151—Intermediate Sculpture (4)
Studio—6 hours. Prerequisite(s): ART 005 Individualized explorations through multiple projects in a variety of sculpture media and techniques. Builds upon technical skills and concepts covered in course 5. May be repeated up to 2 time(s) when topic differs. GE credit: AH, VL. Effective: 2013 Fall Quarter.

ART 152A—Advanced Sculpture: Studio Projects (4)
Studio—6 hours. Prerequisite(s): ART 005; ART 151 Pass One restricted to Art Studio majors. Sculpture for advanced students. Emphasis on concept, idea development and honing technical skills. Approaches and projects will vary according to the instructor. May be repeated up to 1 time(s) topic differs. GE credit: AH, VL. Effective: 2007 Fall Quarter.

ART 152B—Advanced Sculpture: Material Explorations (4)
Studio—6 hours. Prerequisite(s): ART 005; ART 151 Pass One restricted to Art Studio majors. Primary application and exploration of a single sculpture material chosen by the student. Examination of its properties, qualities, and characteristics for three-dimensional expression. May be repeated up to 1 time(s), GE credit: AH, VL. Effective: 2007 Fall Quarter.

ART 152C—Advanced Sculpture: Concepts (4)
Studio—6 hours. Prerequisite(s): ART 005; ART 151 Pass One restricted to Art Studio majors. Investigation of a specific idea chosen by the class. Relationship of idea to form and content. Individual development of conceptual awareness. May be repeated up to 1 time(s). GE credit: AH, VL. Effective: 2007 Fall Quarter.

ART 152D—Advanced Sculpture: Metals (4)
Studio—6 hours. Prerequisite(s): ART 005; ART 151 Pass One restricted to Art Studio majors. Technical aspects of the use of metals in contemporary art practice. Projects assigned to demonstrate the evolution of concepts and processes. May be repeated up to 1 time(s). GE credit: AH, VL. Effective: 2007 Fall Quarter.

ART 152E—Advanced Sculpture: Site Specific Public Sculpture (4)
Studio—6 hours. Prerequisite(s): ART 005; ART 151 Pass One restricted to Art Studio majors. Place and site specificity in contemporary sculpture. Individual and group work to conceive and fabricate sculpture in a public space. May be repeated up to 1 time(s). GE credit: AH, VL. Effective: 2007 Fall Quarter.

ART 152F—Advanced Sculpture: Figure (4)
Studio—6 hours. Prerequisite(s): ART 005; ART 151 Pass One restricted to Art Studio majors. Exploration of historical and contemporary approaches to the body in three-dimensions. Projects based on observational and conceptual strategies. Variety of media and techniques, including clay, wax, plaster, plastics, found objects, and others. May be repeated up to 1 time(s). GE credit: AH, VL. Effective: 2007 Fall Quarter.

ART 152G—Advanced Sculpture: The Miniature and Gigantic (4)
Studio—6 hours. Prerequisite(s): ART 005; ART 151 Pass One restricted to Art Studio majors. Exploration of scale,
from the very small to the very large in a series of projects in a variety of media. Tools and techniques of enlargement and miniaturization. May be repeated up to 1 time(s). GE credit: AH, VL. Effective: 2007 Fall Quarter.

**ART 171—Mexican and Chicano Mural Workshop (4)**

Independent Study—1 hour; Studio—8 hours. Prerequisite(s): CHI 070; and Consent of Instructor. The Mural: a collective art process that empowers students and people through design and execution of mural paintings in the tradition of the Mexican Mural Movement; introduces materials and techniques. May be repeated up to 1 time(s). (Same course as CHI 171) GE credit: AH, VL. Effective: 1997 Winter Quarter.

**ART 190—Seminar in Art Practice (4)**

**ART 192—Internship (2-12)**

Internship. Supervised program of internships in artists' studios and at professional art institutions such as museums, galleries, and art archives including collections of slides and photographs. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 1997 Fall Quarter.

**ART 195—Expanded Field: Artist Lecture Series (1)**

Lecture/Discussion—3 hours. Prerequisite(s): Consent of Instructor. Exploration of the expanded field of practice, theory and criticism in the visual arts. Presentations and discussions with professional practitioners in the field. May be repeated up to 12 unit(s) when topic differs. (P/NP grading only.) Effective: 2012 Fall Quarter.

**ART 198—Directed Group Study (1-5)**

Variable. Prerequisite(s): Consent of Instructor. Restricted to lower division students. (P/NP grading only.) Effective: 1997 Winter Quarter.

**ART 199—Special Study for Advanced Undergraduates (1-5)**

Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

**ART 220—Research Methods for Artists (4)**

Seminar—3 hours. Open to Art Studio graduate students only, or with prior written consent of faculty member. Research methods for artists through critical reading and writing, studio practice, presentations, site-visits, and professional engagement related to the field of visual art. May be repeated up to 1 time(s) when content differs. Effective: 2018 Fall Quarter.

**ART 221A—Critical Exploration & Collaboration (4)**

Seminar—3 hours. Open to Art Studio graduate students only, or with prior written consent of faculty member. During the first year of study, MFA graduate students take the Critical Exploration & Collaboration seminar. Explore and analyze a range of subjects in contemporary art and begin to define their relationship to these ideas through speaking, writing, research and presentation in ways that are relevant to their own art practice. May be repeated up to 1 time(s) when topic differs. Effective: 2018 Fall Quarter.

**ART 221B—Advanced Critical Exploration & Collaboration (4)**

Seminar—3 hours. Open to Art Studio graduate students only, or with prior written consent of faculty member. Advanced course for second-year graduate students. Explore and analyze a range of subjects in contemporary art and begin to define their relationship to these ideas through speaking, writing, research and presentation in ways that are relevant to their own art practice. May be repeated up to 1 time(s) when content differs. Effective: 2018 Fall Quarter.

**ART 223—Concepts & Critique (4)**

Seminar—3 hours. Open to Art Studio graduate students only, or with prior written consent of faculty member. Focuses on research methods for artists through critical reading and writing, studio practice, presentations, site-visits, and professional engagement related to the field of visual art. Faculty-moderated group critique course to
ART 225—Professional Practice in Contemporary Art (4)
Seminar—3 hours. Open to Art Studio graduate students only, or with prior written consent of faculty member. Fluctuating critical and cultural environment of the professional art world. New strategies to support the social and philosophical networks and frameworks that inform contemporary cultural production. Emphasis on new esthetics concepts, practices and technologies. May be repeated up to 1 time(s) when content differs. Effective: 2018 Fall Quarter.

ART 226—Exhibition Strategy & Thesis Seminar (4)
Seminar—3 hours. Open to Art Studio graduate students only, or with prior written consent of faculty member. Completion of a body of work and development of a thesis show. Curation, design, installation, documentation, contributing to catalog content and design, and promoting work in a public forum. May be repeated up to 1 time(s) when content differs. Effective: 2018 Fall Quarter.

ART 227—Collaboration and Interdisciplinarity (4)
Seminar—3 hours. Open to Art Studio graduate students only, or with prior written consent of faculty member. Explores methodologies in practice with emphasis on collaboration and interdisciplinarity. Artistic production and directed research supporting the development of site. Work across artistic mediums, academic disciplines, and social concerns. May be repeated up to 1 time(s) when content differs. Effective: 2018 Fall Quarter.

ART 290—Seminar (4)
Seminar—3 hours. Original works produced for group discussion and criticism; associated topics of a contemporary and historical nature. May be repeated for credit. Effective: 1997 Winter Quarter.

ART 290A—Critical Discourse in Contemporary Art (4)
Seminar—3 hours. Open to Art Studio graduate students only, or with prior written consent of faculty member. Critical discourse in contemporary art and application to practice. Exploration of concerns in broader artistic and contemporary context. How artists look to shift prevalent expectations through critical analysis. May be repeated up to 1 time(s) when content differs. Effective: 2018 Fall Quarter.

ART 290B—Critical Discourse in Studio Practice (4)
Seminar—3 hours. Open to Art Studio graduate students only, or with prior written consent of faculty member. Advanced course for second-year graduate students. Critical discussion and contemporary readings pertinent to studio practice and artwork, including video, installation, photography, interactive arts, performance, sculpture, painting, printmaking, ceramics, sound, and all other mediums. May be repeated up to 1 time(s) when content differs. Effective: 2018 Fall Quarter.

ART 290C—Critical Discourse in Materiality (4)
Seminar—3 hours. Open to Art Studio graduate students only, or with prior written consent of faculty member. Mid-year study focusing on individual work in the studio. Explores mediums, techniques, skill building, resourcing and problem solving. Defining the artists relationship to topics in contemporary art through speaking, writing, research and presentation. May be repeated up to 1 time(s) when content differs. Effective: 2018 Fall Quarter.

ART 290D—Critical Discourse in Context of Social Issues (4)
Seminar—3 hours. Open to Art Studio graduate students only, or with prior written consent of faculty member. Advanced course for second-year Graduate students. Discussion of social, political, cultural, and economic issues in a constantly changing world. How contemporary art practice are affected by global issues. May be repeated up to 1 time(s) when content differs. Effective: 2018 Fall Quarter.

ART 290E—Critical Discourse in Digital Media (4)
Seminar—3 hours. Open to Art Studio graduate students only, or with prior written consent of faculty member. Critical discussion and contemporary readings pertinent to artwork that uses digital media including video, installation, photography, interactive arts, performance, sculpture, painting, printmaking, ceramics, sound, and all other mediums. May be repeated up to 1 time(s) when content differs. Effective: 2018 Fall Quarter.
ART 290E—Critical Discourse on Media (4) Review all entries
Seminar—3 hours. Open to Art Studio graduate students only; or with prior written consent of faculty member. Critical discussion and contemporary readings pertinent to artwork that uses digital media including video, installation, photography, interactive arts, performance, sculpture, painting, printmaking, ceramics, sound, and all other mediums. May be repeated up to 1 time(s) when content differs. Effective: 2019 Fall Quarter.

ART 290F—Critical Discourse in Performance (4) Review all entries
Seminar—3 hours. Open to Art Studio graduate students only; or with prior written consent of faculty member. For 2nd year graduate students. Study focuses on individual performance work. Exploration extends into other mediums, techniques for props or sites, tapping the resources of peers, problem solving with the intention to deepen understanding and engagement with an audience. Exploration and analysis of subjects in cont. art and begin to define their relationship to these ideas through speaking, writing, research and presentation in ways that are relevant to their performance art practice. May be repeated up to 1 time(s) when content differs. Effective: 2018 Fall Quarter.

ART 290F—Critical Discourse in Presentation (4) Review all entries
Seminar—3 hours. Open to Art Studio graduate students only; or with prior written consent of faculty member. For second-year graduate students. Study focuses on individual performance work. Exploration extends into other mediums, techniques for props or sites, tapping the resources of peers, problem solving with the intention to deepen understanding and engagement with an audience. Exploration and analysis of subjects in cont. art and begin to define their relationship to these ideas through speaking, writing, research and presentation in ways that are relevant to their performance art practice. May be repeated up to 1 time(s) when content differs. Effective: 2019 Fall Quarter.

ART 291—Seminar: Critical Evaluation (1)
Seminar—1 hour. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

ART 292—Seminar: Comprehensive Qualifying (1)
Seminar—1 hour. Further critical evaluation of the student's work to determine his eligibility to begin the Comprehensive Project. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

ART 299—Individual Study (1-6)
Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

ART 299D—Comprehensive Project (9)
Variable. An original body of work accompanied by a catalog summarizing the student's aesthetic position. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

ART 401—Museum Training: Curatorial Principles (4)

ART 402—Museum Training: Exhibition Methods (4)

The Major Program

The Department of Asian American Studies offers an interdisciplinary major that examines the experiences of various Asian American groups in the United States. Pertinent to these experiences are the historical, cultural, legal, political, social-psychological, class, racial, and gender contexts for Asian Americans.

The Program. Majors take a prescribed set of lower division and upper division courses in Asian American Studies. These courses offer diverse theoretical and methodological tools to develop and encourage student critical thinking, creativity, initiative, and independent research about a complex, multiethnic and racialized society in the United States and in a global world.

Major Advisor. Joe Nguyen, Student Affairs Officer (SAO); 530-752-8617 or jovnguyen@ucdavis.edu.

Substitutions for disciplinary track courses will be considered by the Department Chair on a case by case basis. Likewise, any substitutions of Major/Minor criteria will be considered by the Department Chair.

Direct questions pertaining to the following courses to the instructor or to the Department of Asian American Studies in 3102 Hart Hall; 530-752-2069.

Career Alternatives. Asian American Studies prepares students for a variety of careers. Given the multicultural nature of society and the increasing relations with different societies, many occupations seek individuals with background and expertise in ethnic relations and cultural issues. Graduates often enter the fields of teaching, research, government service, law, social services, etc., as well as graduate schools for advanced degrees in various disciplines.

American History and Institutions. This university requirement can be satisfied by one of the following courses in Asian American Studies: 1, 2; see also under Bachelor's Degree Requirements.

Units: 32
ENL 110B  Introduction to Modern Literary and Critical Theory  4
HIS 101  Introduction to Historical Thought and Writing  5
HDE 120  Research Methods in Human Development  4
PHI 005  Critical Reasoning  4
POL 051  Scientific Study of Politics  4
PSC 041  Research Methods in Psychology  4
SOC 046A  Introduction to Social Research  4
SOC 046B  Introduction to Social Research  5
STA 013  Elementary Statistics  4
WMS 104  Feminist Research  4

Depth Subject Matter  Units: 36

ASA 192  Internships  4
ASA 192 Required.

Major Emphasis
As part of the depth subject matter requirement, all Asian American Studies majors must develop a major emphasis by choosing either a disciplinary or thematic specialization in consultation with the Student Affairs Officer (SAO) and/or faculty advisors. The major emphasis must include six Asian American Studies upper-division courses and two upper-division elective courses from other departments or programs.

Choose at least six upper-division Asian American Studies courses:

- ASA 100  Asian American Communities  4
- ASA 102  Theoretical Perspective in Asian American Studies  4
- ASA 112  Asian American Women  4
- ASA 113  Asian American Sexuality  4
- ASA 114  Asian Diasporas  4
- ASA 115  Multiracial Asian Pacific American Issues  4
- ASA 116  Asian American Youth  4
- ASA 121  Asian American Performance  4
- ASA 130  Asian American Literature  4
- ASA 131  Ethnicity, Culture, and the Self  4
- ASA 132  Health Issues Confronting Asian Americans and Pacific Islanders  4
- ASA 140  Asian Americans and Media  4
- ASA 141  Asian Americans and the Political Culture of Fashion in the U.S. and Asia  4
- ASA 150  Filipino American Experience  4
- ASA 150B  Japanese American Experience  4
- ASA 150C  Chinese American Experience  4
- ASA 150D  Korean American Experience  4
- ASA 150E  Southeast Asian American Experience  4
- ASA 150F  South Asian American History, Culture, & Politics  4
- ASA 155  Asian American Legal History  4
- ASA 189A  Topics in Asian American Studies: History  4
- ASA 189B  Topics in Asian American Studies: Culture  4
- ASA 189C  Topics in Asian American Studies: Physical and Mental Health  4
- ASA 189D  Topics in Asian American Studies: Policy and Community  4
- ASA 189E  Topics in Asian American Studies: Comparative Racial Studies  4
- ASA 189F  Topics in Asian American Studies: Asian Studies and Asian American Studies  4
- ASA 189G  Topics in Asian American Studies: Race, Class, Gender, and Sexuality  4

Asian American Studies | ASA Courses

Direct questions pertaining to the following courses to the instructor or to the Department of Asian American Studies in 3102 Hart Hall; 530-752-2069.

Courses in ASA:

ASA 001—Historical Experience of Asian Americans (4)
Discussion—1 hour; Lecture—3 hours. Introduction to Asian American Studies through an overview of the history of Asians in America from the 1840s to the present within the context of the development of the United States. GE credit: ACGH, AH, DD, SS, VL, WC, WE. Effective: 1997 Winter Quarter.

ASA 002—Contemporary Issues of Asian Americans (4)
Discussion—1 hour; Lecture—3 hours. Introduction to Asian American Studies through the critical analysis of the impact of race, racism, ethnicity, imperialism, militarism, and immigration since post-World War II on Asian Americans. Topics may include sexuality, criminality, class, hate crimes, and inter-ethnic relations. GE credit: ACGH, AH, DD, SS, VL, WC, WE. Effective: 2017 Spring Quarter.

ASA 003—Social and Psychological Perspectives of Asian Americans (4)
Discussion—1 hour; Lecture—3 hours. Major psychosocial issues of Asian Americans. Theories and empirical research that address cultural values, behavioral norms, ethnic stereotypes, racism, acculturation, ethnic identity development, family communication, stressors and social support systems, academic achievement, interpersonal effectiveness, and psychopathology. GE credit: ACGH, DD, SS. Effective: 2003 Fall Quarter.

ASA 004—Asian American Cultural Studies (4)
Discussion—1 hour; Lecture—3 hours. This interdisciplinary course examines the multiple ways in which race, class, sexuality and gender, as well as the recent turn to transnationalism and postcolonial theory, have changed the ways
we read Asian American literature and see art, theater and film. GE credit: ACGH, AH, DD, OL, VL, WE. Effective: 2006 Fall Quarter.

ASA 092—Internship (1-3)
Internship—3-9 hours. Prerequisite(s): Consent of Instructor. Enrollment dependent on availability of intern positions. Supervised internship in community and institutional settings related to Asian American concerns. (P/NP grading only.) Effective: 1997 Winter Quarter.

ASA 098—Directed Group Study (1-5)
Lecture—1-5 hours. Primarily intended for lower division students. (P/NP grading only.) Effective: 1997 Winter Quarter.

ASA 098F—Student Facilitated Course (1-4)
Variable—1-4 hours. Student-facilitated (taught) course intended for lower division students. (P/NP grading only.) Effective: 2016 Spring Quarter.

ASA 099—Special Study for Undergraduates (3-15)
Variable—3-15 hours. (P/NP grading only.) Effective: 1997 Winter Quarter.

ASA 100—Asian American Communities (4)
Lecture/Discussion—4 hours. Survey and analysis of Asian American communities within both historical and contemporary contexts. Presentation of the analytical skills, theories, and concepts needed to describe, explain, and understand the diversity of Asian American communities within the larger, dominant society. GE credit: ACGH, AH, DD, SS, WE. Effective: 2016 Fall Quarter.

ASA 102—Theoretical Perspective in Asian American Studies (4)
Lecture/Discussion—4 hours. Prerequisite(s): ASA 001 or ASA 002 or ASA 003 or ASA 004; or Consent of Instructor. Upper division standing. Explores major theories of race and its intersections with class, gender, and sexuality from interdisciplinary perspective. Introduces key theoretical developments, issues, debates. Through case studies, analyzes ways various theoretical frameworks and perspectives have been incorporated into range of scholarship. Effective: 2010 Winter Quarter.

ASA 112—Asian American Women (4)
Lecture/Discussion—4 hours. Experiences of Asian American women from major ethnic subgroups comparatively examined in their social, economic and historical contexts using theoretical perspectives from social sciences, humanities/arts: identity, racialization, immigration, gender, sexuality, labor, socialization, cultural expression, social movements and feminist theorizing. GE credit: ACGH, AH, DD, SS, VL, WC, WE. Effective: 2016 Fall Quarter.

ASA 113—Asian American Sexuality (4)
Discussion/Laboratory—4 hours. Restrictive US immigration laws, labor exploitation, race-based exclusionary laws, removal and internment, anti-miscegenation laws, and other examples of social control are surveyed to assess their role in shaping the sexuality of the different Asian American groups. GE credit: ACGH, AH, DD, SS, WC, WE. Effective: 2016 Fall Quarter.

ASA 114—Asian Diasporas (4)

ASA 115—Multiracial Asian Pacific American Issues (4)
Lecture/Discussion—4 hours. Introduction to the experiences of biracial and multiracial Asian Pacific people in the U.S., concentrating on theories of race, racial identity formation, culture, media, and anti-racist struggles. Critical approaches to the analysis of popular media and academic representations. GE credit: ACGH, DD, OL, SS, WC, WE. Effective: 2016 Fall Quarter.

ASA 116—Asian American Youth (4)
Lecture—3 hours; Term Paper. Social experiences of diverse groups of Asian American youth. Ways in which youth themselves actively create cultural expressions and political interventions. GE credit: ACGH, AH, DD, OL, SS, WE. Effective: 2016 Fall Quarter.

ASA 121—Asian American Performance (4)
Lecture/Discussion—4 hours. Performance work by, for, and/or about Asian Pacific Americans including dramatic literature, performance art, dance, and film. Ethnicity, gender and sexuality, class and age as they intersect with
Asian Pacific American identities in and through dramatic performance. GE credit: ACGH, AH, DD, OL, WE. Effective: 2016 Fall Quarter.

ASA 130—Asian American Literature (4)
Lecture/Discussion—4 hours. Works of Asian American literature by writers from the major ethnic subgroups, examined in their social, economic and historical contexts. Intertextual analysis of their thematic and formal elements to form an understanding of Asian American literary traditions. GE credit: ACGH, AH, DD, OL, WE. Effective: 2016 Fall Quarter.

ASA 131—Ethnicity, Culture, and the Self (4)
Discussion—1 hour; Lecture—3 hours. Cultural and social psychological influences on Asian Americans focusing on the individual. GE credit: ACGH, DD, SS. Effective: 2016 Fall Quarter.

ASA 132—Health Issues Confronting Asian Americans and Pacific Islanders (4)
Lecture/Discussion—4 hours. Health issues confronting Asian Americans and Pacific Islanders. (Same course as SPH 132.) GE credit: SS. Effective: 2009 Winter Quarter.

ASA 141—Asian Americans and the Political Culture of Fashion in the U.S. and Asia (4)
Lecture/Discussion—4 hours; Project (Term Project); Term Paper. Historical, cultural and sociopolitical development of fashion in Asia and the U.S. as it relates to the Asian Diasporas. Specific aspects of material culture: textiles, clothing and fashion. GE credit: ACGH, AH, DD, OL, SS, VL, WC, WE. Effective: 2016 Fall Quarter.

ASA 150—Filipino American Experience (4)
Discussion/Laboratory—4 hours. Examination of the relationship between the Filipino-American community, the Philippine home community and the larger American society through a critical evaluation of the historical and contemporary conditions, problems and prospects of Filipinos in the U.S. GE credit: ACGH, DD, SS, WC. Effective: 2016 Fall Quarter.

ASA 150B—Japanese American Experience (4)
Lecture—3 hours; Term Paper. Different analytical approaches to understand Japanese American history, culture and society. GE credit: ACGH, AH, DD, SS, VL, WE. Effective: 2016 Fall Quarter.

ASA 150C—Chinese American Experience (4)
Lecture/Discussion—4 hours. Survey of the historical and contemporary experiences of Chinese in the United States, starting with the gold rush era and concluding with the present-day phenomenon of Chinese transnational movement to the United States and its diasporic significance. GE credit: ACGH, AH, DD, SS, VL, WC. Effective: 2016 Fall Quarter.

ASA 150D—Korean American Experience (4)
Lecture/Discussion—4 hours. Interdisciplinary survey of the historical and contemporary experiences of Koreans in the United States from the late nineteenth century to the present. GE credit: ACGH, AH, DD, SS, WC. Effective: 2016 Fall Quarter.

ASA 150E—Southeast Asian American Experience (4)
Lecture/Discussion—4 hours. Historical survey of Southeast Asian experiences with special focus on United States involvement and post 1975 migrations. Defines international and transnational conditions that led up to the large exodus and resettlement of Southeast Asians. GE credit: ACGH, AH, DD, OL, SS, WC, WE. Effective: 2016 Fall Quarter.

ASA 150F—South Asian American History, Culture, & Politics (4)
Lecture/Discussion—4 hours. South Asian American experiences, focusing on the histories, cultures, and politics of Indian, Pakistani, Bangladeshi, and Sri Lankan communities in the U.S. Interdisciplinary approaches to migration, labor, gender, racialization, ethnicity, youth, community mobilization. GE credit: ACGH, AH, DD, OL, SS, WE. Effective: 2016 Fall Quarter.

ASA 155—Asian American Legal History (4)
Lecture/Discussion—4 hours. Legal history of Asian Americans, from the mid-19th century to present. Laws and administrative policies affecting Asian American communities, including those governing immigration, social and economic participation, WWII internment, and affirmative action. GE credit: ACGH, DD, SS. Effective: 2016 Fall Quarter.

ASA 189A—Topics in Asian American Studies: History (4)
Lecture—4 hours. Intensive treatment of a topic in Asian American Studies; history. May be repeated for credit when topic differs. GE credit: ACGH, DD, SS, WC. Effective: 2016 Fall Quarter.
ASA 189B—Topics in Asian American Studies: Culture (4)
Lecture—4 hours. Intensive treatment of a topic in Asian American Studies; culture. May be repeated for credit when topic differs. GE credit: AH, SS. Effective: 2016 Fall Quarter.

ASA 189C—Topics in Asian American Studies: Physical and Mental Health (4)
Lecture—4 hours. Intensive treatment of a topic in Asian American Studies; physical and mental health. May be repeated for credit when topic differs. GE credit: SS. Effective: 2016 Fall Quarter.

ASA 189D—Topics in Asian American Studies: Policy and Community (4)
Lecture—4 hours. Intensive treatment of a topic in Asian American Studies: policy and community. May be repeated for credit when topic differs. GE credit: ACGH, DD, SS. Effective: 2016 Fall Quarter.

ASA 189E—Topics in Asian American Studies: Comparative Racial Studies (4)

ASA 189F—Topics in Asian American Studies: Asian Studies and Asian American Studies (4)
Lecture—4 hours. Intensive treatment of a topic in Asian American Studies: asian studies and asian american studies. May be repeated for credit when topic differs. GE credit: SS. Effective: 2016 Fall Quarter.

ASA 189G—Topics in Asian American Studies: Race, Class, Gender, and Sexuality (4)
Lecture—4 hours. Intensive treatment of a topic in Asian American Studies: race, class, gender, and sexuality. May be repeated for credit when topic differs. GE credit: SS. Effective: 2016 Fall Quarter.

ASA 189H—Topics in Asian American Studies: Society and Institutions (4)
Lecture—4 hours. Intensive treatment of a topic in Asian American Studies: society and institutions. May be repeated for credit when topic differs. GE credit: AH, SS. Effective: 2016 Fall Quarter.

ASA 189I—Topics in Asian American Studies: Politics and Social Movements (4)

ASA 192—Internships (1-5)
Internship—3-15 hours. Prerequisite(s): Consent of Instructor. Enrollment dependent on availability of intern position with priority to Asian American Studies minors; consent of instructor. Supervised internship in community and institutional settings related to Asian American concerns. (P/NP grading only.) Effective: 1997 Winter Quarter.

ASA 194—Asian American Studies Capstone Course (4)
Extensive Writing; Lecture/Discussion—4 hours; Project (Term Project). Open to junior or senior level standing in Asian American Studies or consent of instructor. Synthesis of the approaches and methods learned by students in Asian American Studies and development of specialization in their areas of interest. Development of a research proposal for thesis project. Effective: 2017 Winter Quarter.

ASA 195—Asian American Studies Senior Thesis Seminar (4)
Extensive Writing; Lecture/Discussion—3 hours; Project (Term Project). Restricted to junior and senior level standing in Asian American Studies. Completion of ASA 194 required. Synthesis of the approaches and methods learned in Asian American Studies. Production of an original research paper on a topic of student's interest, building on the research proposal submitted in the capstone seminar. Effective: 2016 Fall Quarter.

ASA 197T—Tutoring in Asian American Studies (1-5)
Tutorial—1-5 hours. Prerequisite(s): Consent of Instructor. Tutoring in lower division Asian American Studies courses in small group discussion. Weekly meetings with instructor. May be repeated up to 1 time(s) for a given course and also for a different course. (P/NP grading only.) Effective: 2016 Fall Quarter.

ASA 198—Directed Group Study (1-5)
Lecture—1-5 hours. Prerequisite(s): Consent of Instructor. Primarily intended for upper division students. (P/NP grading only.) Effective: 2016 Fall Quarter.

ASA 198F—Student Facilitated Course (1-4)
Variable—1-4 hours. Student-facilitated (taught) course intended for upper division students. (P/NP grading only.) Effective: 2017 Fall Quarter.

ASA 199—Special Study for Advanced Undergraduates (1-5)
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. Special study for advanced undergraduates. (P/NP grading only.) Effective: 2016 Fall Quarter.
ASA 199FA—Student Facilitated Course Development (1-4)
Variable—1-4 hours. Under the supervision of a faculty member, an undergraduate student plans and develops the course they will offer under 98F/198F. (P/NP grading only.) Effective: 2016 Spring Quarter.

ASA 199FB—Student Facilitated Teaching (1-4)
Variable—1-4 hours. Prerequisite(s): ASA 199FA Student facilitated. Under the supervision of a faculty member, an undergraduate student teaches a course under 98F/198F. (P/NP grading only.) Effective: 2016 Spring Quarter.

Faculty. http://lawr.ucdavis.edu/people/faculty/atmospheric-science

The Major Program
Atmospheric science is the study of the air that surrounds the planet. It includes all weather phenomena and climate including global and regional climate change, the chemistry of trace constituents and cloud and particle formation, interactions between ecosystems and the atmosphere, as well as quantitative studies of climate extremes and severe weather, including droughts, floods, hurricanes and tornadoes. The study of the impacts of human and other biotic activity on the quality of the air we breathe are important topics in the major.

The Program. Modern atmospheric science is a quantitative science that is reflected in the major's curriculum. In addition to the study of daily weather events, the program deals with fundamental dynamical and physical processes that involve the general circulation of the atmosphere; turbulent mass and energy transfer at the planetary surface as well as within the free atmosphere; the transfer of solar and terrestrial radiation throughout the atmosphere; atmospheric interaction with the biosphere; climate variations; and developments in remote sensing using satellites with modern meteorological instrumentation. In addition, the program has significant expertise in the areas of air quality and its related atmospheric chemistry. As well as providing a broad background in meteorology, the major includes an informal minor area to be chosen from mathematics, computer science, environmental studies, resource management or a physical or biological science. For more information, see http://atm.ucdavis.edu.

Internships and Career Opportunities. Atmospheric science students have participated in internships with the California Air Resources Board, various county Air Pollution Control Districts, the National Weather Service, and performing research. Job opportunities include: national weather services, weather forecasting for broadcast media or private forecasting firms, environmental consulting firms (such as environmental impact reports, wind farm siting), government agencies at all levels from local (air quality districts, planning departments, etc.) to state (Air Resources Board) to national (NOAA), and companies whose operations are impacted by weather (such as airlines, futures markets). About half of our graduates continue their education by seeking the M.S. or Ph.D. degree in atmospheric science or related areas.
Note. Alternative options for students who are interested in atmospheric science are to minor in ATM or to major in ESM choosing the climate change and air quality track. However, both the ATM minor and the ESM climate change and air quality track do not meet the Federal civil service requirements for meteorologists.

Graduate Study. You can specialize in particular areas of atmospheric science through graduate study and research leading to the M.S. and Ph.D. degrees. For details, see Atmospheric Science (Graduate Group) and Graduate Studies.

Related Courses. See ESP 150A; PHY104A, 104B; ESM 131.

### Restricted Electives

Coordinated group of courses (informal minor area) to be chosen with advisor's approval from mathematics, computer science, environmental studies, communication, resource management, or a physical or biological science (at least 10 upper division units)

### Atmospheric Science | ATM Minor

(College of Agricultural and Environmental Sciences)

Randy Southard, Chairperson (Land, Air and Water Resources)

Cort Anastasio, Vice Chairperson (Atmospheric Science)

**Department Office.** 1110 Plant and Environmental Sciences Building; 530-752-1130; [http://lawr.ucdavis.edu](http://lawr.ucdavis.edu)

**Faculty.** [http://lawr.ucdavis.edu/people/faculty/atmospheric-science](http://lawr.ucdavis.edu/people/faculty/atmospheric-science)

**Minor Program.** The minor in Atmospheric Science provides a broad treatment of weather and climate, with the option to focus on such topics as climate change, meteorological instrumentation, and satellite remote sensing.
Students undertaking the minor should have completed minimum preparatory course work in calculus and physics (MAT 016A-016B, PHY 005A or 007A). Some upper division courses in Atmospheric Science have the MAT 021 and 022 series and the PHY 009 series as prerequisites.

**Minor Advisor.** Kyaw Tha Paw U

**Atmospheric Science**

**Units:** 20-24

Total: 20-24

**Atmospheric Science | ATM Courses**

Questions pertaining to the following courses should be directed to the instructor or to the Land, Air and Water Resources Teaching Center in 1150 Plant & Environmental Sciences Building; 530-752-1603.

**Courses in ATM:**

**ATM 005—Global Climate Change (3)**
Effective: 2007 Spring Quarter.

**ATM 006—Fundamentals of Atmospheric Pollution (3)**
Lecture—3 hours. Effects of human emissions on the atmosphere: smog, ozone pollution, and ozone depletion; indoor air pollution; global warming; acid rain. Impacts of these problems on the earth, ecosystems, and humans. Strategies to reduce atmospheric pollution. GE credit: SE, SL, VL.
Effective: 2003 Fall Quarter.

**ATM 010—Severe and Unusual Weather (3)**
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): High school physics. Introduction to physical principles of severe and unusual weather: flood, blizzards, thunderstorms, lightning, tornadoes, and hurricanes. Emphasis on scientific perspective and human context. Not open to students who have received credit for course 100. (Former course 100.) GE credit: QL, SE, SL, VL.
Effective: 1997 Spring Quarter.

**ATM 060—Introduction to Atmospheric Science (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (MAT 016A or MAT 021A); (PHY 007A or PHY 009A) Fundamental principles of the physics, chemistry, and fluid dynamics underlying weather and climate. Solar radiation, the greenhouse effect, and the thermal budget of the Earth. Clouds and their formation, convection, precipitation, mid-latitude storm systems. GE credit: QL, SE, SL, VL.
Effective: 2011 Fall Quarter.

**ATM 092—Atmospheric Science Internship (1-12)**
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Lower division standing. Internship off and on campus in atmospheric science. Internship supervised by a member of the faculty. (P/NP grading only.) Effective: 1997 Winter Quarter.

**ATM 098—Directed Group Study (1-5)**
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

**ATM 099—Special Study for Undergraduates (1-5)**
Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

**ATM 110—Weather Observation and Analysis (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ATM 060 Acquisition, distribution and analysis of meteorological data. Vertical sounding analysis, stability indices, probability of local severe weather, weather map

**ATM 111—Weather Analysis and Prediction (3)**
Lecture—3 hours. Prerequisite(s): ATM 110; ATM 121B; (ATM 111L can be concurrent) or ATM 111LY (can be concurrent); Knowledge of a programming language. Tools for analyzing observed properties of mid-latitude weather systems. The analysis-forecast system, including various weather forecast models. General structure and properties of mid-latitude weather systems. GE credit: QL, SE, VL. Effective: 2018 Winter Quarter.

**ATM 111LY—Weather Analysis and Prediction Laboratory (2)**
Laboratory—2 hours; Web Virtual Lecture—4 hours. Prerequisite(s): ATM 111 (can be concurrent) Subjective and objective analysis of weather data. Web-based learning of the analysis-forecast system and various weather forecasting situations. Weather map interpretation and forecast discussions. (P/NP grading only.) GE credit: OL, QL, SE, VL. Effective: 2013 Fall Quarter.

**ATM 112—Weather Forecasting Practice (2)**
Discussion—2 hours; Laboratory—1 hour. Prerequisite(s): ATM 110 Formal practice in preparing local weather forecasts. Analysis of current weather conditions and recent model performance. Verification and discussion of prior forecast. Interpretation of current forecast model guidance. Posting of forecast. May be repeated up to 3 times. (P/NP grading only.) Effective: 1999 Fall Quarter.

**ATM 115—Hydroclimatology (3)**
Lecture—3 hours. Prerequisite(s): ATM 060 Examination of climate as the forcing function for the hydrologic system. Emphasis on seasonal variations in the relationship between precipitation and evapotranspiration for meso-scale areas. Watershed modeling of floods and drought for evaluating the effects of climatic fluctuations. GE credit: SE, SL. Effective: 1997 Winter Quarter.

**ATM 116—Modern Climate Change (3)**
Lecture—3 hours. Factors that determine the Earth's climate, including natural and human-caused changes. Impacts of climate change. Possible future climates and policies to reduce human emissions of greenhouse gases. GE credit: QL, SE, SL, VL. Effective: 2017 Fall Quarter.

**ATM 120—Atmospheric Thermodynamics and Cloud Physics (4)**
Extensive Problem Solving—3 hours; Lecture—3 hours. Prerequisite(s): MAT 021C; PHY 009B; ATM 060 (can be concurrent) Atmospheric composition and structure, thermodynamics of atmospheric gases, thermal properties of dry and moist air, atmospheric stability; cloud nucleation, cloud growth by condensation and collision, cloud models. GE credit: QL, SE, VL. Effective: 2000 Fall Quarter.

**ATM 121A—Atmospheric Dynamics (4)**
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): ATM 120; MAT 021D; PHY 009B Fundamental forces of atmospheric flow; noninertial reference frames; development of the equations of motion for rotating stratified atmospheres; isobaric and natural coordinate systems; geostrophic flow; thermal wind; circulation and vorticity. GE credit: QL, SE. Effective: 2001 Winter Quarter.

**ATM 121B—Atmospheric Dynamics (4)**
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): ATM 121A Dynamics of fluid motion in geophysical systems; quasi-geostrophic theory; fundamentals of wave propagation in fluids; Rossby waves; gravity waves; fundamentals of hydrodynamic instability; two-level model; baroclinic instability and cyclogenesis. GE credit: QL, SE. Effective: 2001 Spring Quarter.

**ATM 124—Meteorological Instruments and Observations (3)**
Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): ATM 060 Modern meteorological instruments and their use in meteorological observations and measurements. Both standard and micrometeorological instruments are included. GE credit: QL, SE, SL, VL. Effective: 1997 Winter Quarter.

**ATM 128—Radiation and Satellite Meteorology (4)**
Discussion/Laboratory—3 hours; Extensive Problem Solving—1 hour. Prerequisite(s): ATM 060; PHY 009B; MAT 022B; MAT 021D Concepts of atmospheric radiation and the use of satellites in remote sensing. Emphasis on the modification of solar and infrared radiation by the atmosphere. Estimation from satellite data of atmospheric variables such as temperatures and cloudiness. GE credit: QL, SE, VL. Effective: 2011 Spring Quarter.

**ATM 133—Biometeorology (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MAT 016B; And one course in a biological discipline or consent of instructor. Atmospheric and biological interactions. Physical and biological basis for water vapor, carbon...
dioxide and energy exchanges with the atmosphere associated with plants and animals, including humans. Microclimate of plant canopies and microclimatic modification such as frost protection and windbreaks. GE credit: QL, SE, SL, VL. Effective: 2001 Winter Quarter.

ATM 149—Air Pollution (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MAT 021D; MAT 022B; CHE 002B C- or better; (ATM 121A or ENG 103 C- or better or ECI 100 C- or better) Physical and technical aspects of air pollution. Emphasis on geophysical processes and air pollution meteorology as well as physical and chemical properties of pollutants. (Same course as ECI 149.) GE credit: QL, SE, SL. Effective: 2018 Winter Quarter.

ATM 150—Introduction to Computer Methods in Physical Sciences (4)
Discussion/Laboratory—2 hours; Lecture—3 hours. Prerequisite(s): MAT 022B; PHY 009B; And a computer programming course such as ECS 030; additional courses in fluid dynamics (ATM 121A or ENG 103) and in Fourier transforms (MAT 118C or PHY 104A) are helpful but not required. Enrollment limited to 12, preference to Atmospheric Science majors. Computational techniques used in physical sciences. Integral and differential equation numerical solution: mainly finite differencing and spectral (Fourier transform) methods. Time series applications (time-permitting). Specific applications drawn from meteorology. Accelerated introduction to FORTRAN including programming assignments. (P/NP grading only.) GE credit: SE. Effective: 2005 Fall Quarter.

ATM 158—Boundary-Layer Meteorology (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ATM 121A Dynamics of the atmosphere nearest the Earth’s surface. Friction and heat transfer. Properties of turbulent flows; statistical and spectral techniques; use and interpretation of differential equations. Emphasis on the importance to weather, air pollution, and the world’s oceans. GE credit: QL, SE, VL. Effective: 2011 Spring Quarter.

ATM 160—Introduction to Atmospheric Chemistry (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): CHE 002B Quantitative examination of current local, regional and global problems in atmospheric chemistry (including photochemical smog, acid deposition, climate change, and stratospheric ozone depletion) using fundamental concepts from chemistry. Basic chemical modeling of atmospheric reaction systems. GE credit: QL, SE, SL, VL. Effective: 2000 Winter Quarter.

ATM 192—Atmospheric Science Internship (1-12)
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Completion of 84 units. Internship off and on campus in atmospheric science. Internship supervised by a member of the faculty. (P/NP grading only.) Effective: 1997 Winter Quarter.

ATM 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Three upper division units in Atmospheric Science. (P/NP grading only.) Effective: 1997 Winter Quarter.

ATM 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. Three upper division units in Atmospheric Science and at least an overall B average. (P/NP grading only.) Effective: 1997 Winter Quarter.

ATM 215—Advanced Hydroclimatology (3)
Lecture—3 hours. Prerequisite(s): ATM 115 Theoretical and applied aspects of energy and mass fluxes linking the earth’s surface, atmosphere, and hydrologic system. Emphasis on regional scale analysis and modeling, spatial data representation, and climate change influences on precipitation and its hydroclimatic expression. Effective: 1998 Spring Quarter.

ATM 221—Advanced Atmospheric Dynamics (3)
Lecture—3 hours. Prerequisite(s): ATM 121B Conditions for instability in stratified atmospheres; baroclinic instability; forced topographic Rossby Waves; wave-mean flow interaction theory; tropical dynamics; stratospheric dynamics. Effective: 1997 Winter Quarter.

ATM 223—Advanced Boundary-Layer Meteorology (3)

ATM 230—Atmospheric Turbulence (3)
Lecture—3 hours. Prerequisite(s): ATM 121B or ATM 158 Dynamics and energetics of turbulence in the atmosphere including vorticity dynamics. Statistical description of turbulence; Eulerian and Lagrangian scales, spectral analysis,

ATM 231—Advanced Air Pollution Meteorology (3)
Lecture—3 hours. Prerequisite(s): ATM 160; ATM 149A; One course in fluid dynamics. Processes determining transport and diffusion of primary and secondary pollutants. Models of chemical transformation, of the atmospheric boundary layer and of mesoscale wind fields, as applicable to pollutant dispersion problems. Effective: 1997 Spring Quarter.

ATM 233—Advanced Biometeorology (3)
Lecture/Discussion—3 hours. Prerequisite(s): ATM 133; or Consent of Instructor. Current topics in biometeorology. Physical and biological basis for water vapor, other gases, and energy exchange with the atmosphere. Topics include modeling and measuring turbulent transport from plant canopies, surface temperatures and energy budgets, bio-aerosol physics and aerobiology. Effective: 1997 Winter Quarter.

ATM 240—General Circulation of the Atmosphere (4)
Lecture/Discussion—4 hours. Prerequisite(s): ATM 121B Large-scale, observed atmospheric properties. Radiation, momentum, and energy balances derived and compared with observations. Lectures and homework synthesize observations and theories, then apply them to understand the large-scale circulations. Effective: 2000 Winter Quarter.

ATM 241—Climate Dynamics (3)
Lecture/Discussion—3 hours. Prerequisite(s): ATM 121B Dynamics of large-scale climatic variations over time periods from weeks to centuries. Description of the appropriate methods of analysis of atmospheric and oceanic observations. Conservation of mass, energy and momentum. Introduction to the range of climate simulations. Effective: 1997 Winter Quarter.

ATM 245—Climate Change, Water and Society (4)
Lecture—4 hours. Class size limited to 25 students. Integration of climate science and hydrology with policy to understand hydroclimatology and its impact upon natural and human systems. Assignments: readings, take-home examination on climate and hydrologic science, paper that integrates course concepts into a research prospectus or review article. (Same course as HYD 245 and ECL 245.) Effective: 2015 Spring Quarter.

ATM 250—Meso-Scale Meteorology (3)
Lecture—3 hours. Prerequisite(s): ATM 150; Graduate standing, a course in partial differential equations or consent of instructor. The study of weather phenomena with horizontal spatial dimensions between 2.5 and 2500 kilometers. Methods of observational study and numerical modeling of the structure and temporal behavior of these weather systems. Effective: 1997 Winter Quarter.

ATM 255—Numerical Modeling of the Atmosphere (4)
Laboratory—6 hours; Lecture—2 hours. Prerequisite(s): ATM 121B; ENG 005; ATM 150 recommended. Principles of numerical modeling of the dynamic, thermodynamic and physical processes of the atmosphere. Hands-on experiments on model development using the shallow water equations and the primitive equations. Operational forecast models. Effective: 1997 Winter Quarter.

ATM 260—Atmospheric Chemistry (3)
Lecture—3 hours. Prerequisite(s): ATM 160 Chemistry and photochemistry in tropospheric condensed phases (fog, cloud, and rain drops and aerosol particles). Gas-drop and gas-particle partitioning of compounds and effects of reactions in condensed phases on the fates and transformations of tropospheric chemical species. Effective: 1998 Spring Quarter.

ATM 265—The Art of Climate Modeling (3)
Laboratory—1 hour; Lecture—2 hours. Prerequisite(s): ATM 121A Over the past fifty years, global models have given us incredible insight into the Earth system. This course provides an introduction to these models, with a focus on their design and the science questions they have been built to address. Effective: 2016 Spring Quarter.

ATM 270A—Topics in Atmospheric Science: Meteorological Statistics (1-3)

ATM 270B—Topics in Atmospheric Science: Computer Modeling of the Atmosphere (1-3)
Discussion—1-3 hours. Applications and concepts in computer modeling of the atmosphere. Effective: 1997 Winter Quarter.
ATM 270C—Topics in Atmospheric Science: Design of Experiments and Field Studies in Meteorology (1-3)
Discussion—1-3 hours. Applications and concepts in design of experiments and field studies in meteorology. Effective: 1997 Winter Quarter.

ATM 270D—Topics in Atmospheric Science: Solar and Infrared Radiation in the Atmosphere (1-3)

ATM 270E—Topics in Atmospheric Science: Aerosol and Cloud Physics (1-3)
Discussion—1-3 hours. Applications and concepts in aerosol and cloud physics. Effective: 1997 Winter Quarter.

ATM 270F—Topics in Atmospheric Science: Atmospheric Chemistry (1-3)
Discussion—1-3 hours. Applications and concepts in atmospheric chemistry. Effective: 1997 Winter Quarter.

ATM 270G—Topics in Atmospheric Science: General Meteorology (1-3)
Discussion—1-3 hours. Applications and concepts in general meteorology. Effective: 1997 Winter Quarter.

ATM 280A—Air Quality Policy in the Real World (4)
Project (Term Project). Prerequisite(s): (ATM 149 or ECI 149); ECI 242; Consent of Instructor. Or equivalent of ECI 242. In-depth investigation of an air quality problem with a team and mentor from government or industry. Science, engineering and policy will be involved. Findings will be presented orally and in writing. (Deferred grading only, pending completion of sequence.) Effective: 2007 Winter Quarter.

ATM 280B—Air Quality Policy in the Real World (4)
Project (Term Project). Prerequisite(s): ATM 280A; and Consent of Instructor. In-depth investigation of an air quality problem with a team and mentor from government or industry. Science, engineering and policy will be involved. Findings will be presented orally and in writing. (Deferred grading only, pending completion of sequence.) Effective: 2007 Winter Quarter.

ATM 290—Seminar (1)
Seminar—1 hour. Prerequisite(s): Graduate standing in Atmospheric Science or related field. Current developments in selected areas of atmospheric research. Topics will vary according to student and faculty interests. (S/U grading only.) Effective: 1997 Winter Quarter.

ATM 291A—Research Conference in Atmospheric Science; Air Quality Meteorology (1-3)
Lecture/Discussion—1-3 hours. Prerequisite(s): Consent of instructor. Review and discussion of current literature and research in Air Quality Meteorology. May be repeated up to 6 unit(s). (S/U grading only.) Effective: 2010 Fall Quarter.

ATM 291B—Research Conference in Atmospheric Science; Biometeorology (1-3)
Lecture/Discussion—1-3 hours. Prerequisite(s): Consent of Instructor. Review and discussion of current literature and research in Biometeorology. May be repeated up to 6 unit(s). (S/U grading only.) Effective: 2010 Fall Quarter.

ATM 291C—Research Conference in Atmospheric Science; Boundary Layer Meteorology (1-3)
Lecture/Discussion—1-3 hours. Prerequisite(s): Consent of Instructor. Review and discussion of current literature and research in Boundary Layer Meteorology. May be repeated up to 6 unit(s). (S/U grading only.) Effective: 2010 Fall Quarter.

ATM 291D—Research Conference in Atmospheric Science; Climate Change (1-3)
Lecture/Discussion—1-3 hours. Prerequisite(s): Consent of Instructor. Review and discussion of current literature and research in Climate Change. May be repeated up to 6 unit(s). (S/U grading only.) Effective: 2010 Fall Quarter.

ATM 291E—Research Conference in Atmospheric Science; General Meteorology (1-3)
Lecture/Discussion—1-3 hours. Prerequisite(s): Consent of Instructor. Review and discussion of current literature and research in General Meteorology. May be repeated up to 6 unit(s). (S/U grading only.) Effective: 2010 Fall Quarter.

ATM 291F—Research Conference in Atmospheric Science; Atmospheric Chemistry (1-3)
Lecture/Discussion—1-3 hours. Prerequisite(s): Consent of Instructor. Review and discussion of current literature and research in Atmospheric Chemistry. May be repeated up to 6 unit(s). (S/U grading only.) Effective: 2010 Fall Quarter.

ATM 298—Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Graduate standing. (S/U grading only.) Effective: 1997 Winter Quarter.

ATM 299—Research (1-12)
Variable. Prerequisite(s): Consent of Instructor. Graduate standing. (S/U grading only.) Effective: 1997 Winter Quarter.
ATM 393—Teaching Assistant Training Practicum (1-4)
Variable. Prerequisite(s): Graduate standing. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

ATM 396—Teaching Assistant Training Practicum (1-4)
Variable. Prerequisite(s): Graduate standing. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

Atmospheric Science (Graduate Group)

Atmospheric Science (Graduate Group) | ATM Information
Shu-Hua Chen, Ph.D., Chairperson of the Group; 530-752-1822

Group Office. 1152 Plant and Environmental Sciences Building; 530-752-1669; http://atm.ucdavis.edu

Faculty. http://atm.ucdavis.edu/people/faculty/

Atmospheric Science (Graduate Group) | ATM M.S.
Shu-Hua Chen, Ph.D., Chairperson of the Group; 530-752-1822

Group Office. 1152 Plant and Environmental Sciences Building; 530-752-1669; http://atm.ucdavis.edu

Faculty. http://atm.ucdavis.edu/people/faculty/

Graduate Study. The Graduate Group in Atmospheric Science offers both the M.S. and Ph.D. degree programs. A student may place emphasis on graduate work in one or more of the following fields: air quality meteorology, atmospheric chemistry, cloud physical processes, biometeorology, micrometeorology, numerical weather prediction, remote sensing, climate dynamics, large-scale dynamics, and meso-scale and boundary-layer meteorology. The diverse and extensive backgrounds of the faculty allow opportunities for interdisciplinary training and research.

Preparation. The Group encourages applications from all interested students with backgrounds in the physical or natural sciences. Basic qualifications for students entering the Atmospheric Science graduate program include mathematics to the level of vector calculus and partial differential equations, and one year of college-level physics. Flexibility may be allowed for students with high academic potential, but it is expected that deficiencies in preparatory material and in key undergraduate atmospheric science courses be completed within the first year of graduate study.

Graduate Advisor. Paul Ullrich, Ph.D.
Graduate Admissions Officer. Ian Faloona, Ph.D.

Atmospheric Science (Graduate Group) | ATM Ph.D.
Shu-Hua Chen, Ph.D., Chairperson of the Group; 530-752-1822

Group Office. 1152 Plant and Environmental Sciences Building; 530-752-1669; http://atm.ucdavis.edu

Faculty. http://atm.ucdavis.edu/people/faculty/

**Graduate Advisor.** Paul Ullrich, Ph.D.

**Graduate Admissions Officer.** Ian Faloona, Ph.D.

### Atmospheric Science (Graduate Group) | ATM Courses

Questions pertaining to the following courses should be directed to the instructor or to the Land, Air and Water Resources Teaching Center in 1150 Plant & Environmental Sciences Building; 530-752-1603.

#### Courses in ATM:

**ATM 005—Global Climate Change (3)**

**ATM 006—Fundamentals of Atmospheric Pollution (3)**
Lecture—3 hours. Effects of human emissions on the atmosphere: smog, ozone pollution, and ozone depletion; indoor air pollution; global warming; acid rain. Impacts of these problems on the earth, ecosystems, and humans. Strategies to reduce atmospheric pollution. GE credit: SE, SL, VL. Effective: 2003 Fall Quarter.

**ATM 010—Severe and Unusual Weather (3)**
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): High school physics. Introduction to physical principles of severe and unusual weather: flood, blizzards, thunderstorms, lightning, tornadoes, and hurricanes. Emphasis on scientific perspective and human context. Not open to students who have received credit for course 100. (Former course 100.) GE credit: QL, SE, SL, VL. Effective: 1997 Spring Quarter.

**ATM 060—Introduction to Atmospheric Science (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (MAT 016A or MAT 021A); (PHY 007A or PHY 009A) Fundamental principles of the physics, chemistry, and fluid dynamics underlying weather and climate. Solar radiation, the greenhouse effect, and the thermal budget of the Earth. Clouds and their formation, convection, precipitation, mid-latitude storm systems. GE credit: QL, SE, VL. Effective: 2011 Fall Quarter.

**ATM 092—Atmospheric Science Internship (1-12)**
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Lower division standing. Internship off and on campus in atmospheric science. Internship supervised by a member of the faculty. (P/NP grading only.) Effective: 1997 Winter Quarter.

**ATM 098—Directed Group Study (1-5)**
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

**ATM 099—Special Study for Undergraduates (1-5)**
Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

**ATM 110—Weather Observation and Analysis (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ATM 060 Acquisition, distribution and analysis of meteorological data. Vertical sounding analysis, stability indices, probability of local severe weather, weather map analysis. Use of National Weather Service analyses and forecast products. Laboratory makes use of computer-generated analyses. GE credit: OL, QL, SE, VL. Effective: 1997 Winter Quarter.

**ATM 111—Weather Analysis and Prediction (3)**
Lecture—3 hours. Prerequisite(s): ATM 110; ATM 121B; (ATM 111L (can be concurrent) or ATM 111LY (can be concurrent)); Knowledge of a programming language. Tools for analyzing observed properties of mid-latitude weather systems. The analysis-forecast system, including various weather forecast models. General structure and properties of mid-latitude weather systems. GE credit: QL, SE, VL. Effective: 2018 Winter Quarter.

**ATM 111LY—Weather Analysis and Prediction Laboratory (2)**
Laboratory—2 hours; Web Virtual Lecture—4 hours. Prerequisite(s): ATM 111 (can be concurrent) Subjective and objective analysis of weather data. Web-based learning of the analysis-forecast system and various weather
forecasting situations. Weather map interpretation and forecast discussions. (P/NP grading only.) GE credit: OL, QL, SE, VL. Effective: 2013 Fall Quarter.

ATM 112—Weather Forecasting Practice (2)
Discussion—2 hours; Laboratory—1 hour. Prerequisite(s): ATM 110 Formal practice in preparing local weather forecasts. Analysis of current weather conditions and recent model performance. Verification and discussion of prior forecast. Interpretation of current forecast model guidance. Posting of forecast. May be repeated up to 3 times(s). (P/NP grading only.) Effective: 1999 Fall Quarter.

ATM 115—Hydroclimatology (3)
Lecture—3 hours. Prerequisite(s): ATM 060 Examination of climate as the forcing function for the hydrologic system. Emphasis on seasonal variations in the relationship between precipitation and evapotranspiration for meso-scale areas. Watershed modeling of floods and drought for evaluating the effects of climatic fluctuations. GE credit: SE, SL. Effective: 1997 Winter Quarter.

ATM 116—Modern Climate Change (3)
Lecture—3 hours. Factors that determine the Earth's climate, including natural and human-caused changes. Impacts of climate change. Possible future climates and policies to reduce human emissions of greenhouse gases. GE credit: QL, SE, SL. Effective: 2017 Fall Quarter.

ATM 120—Atmospheric Thermodynamics and Cloud Physics (4)
Extensive Problem Solving—3 hours; Lecture—3 hours. Prerequisite(s): MAT 021C; PHY 009B; ATM 060 (can be concurrent) Atmospheric composition and structure, thermodynamics of atmospheric gases, thermal properties of dry and moist air, atmospheric stability; cloud nucleation, cloud growth by condensation and collision, cloud models. GE credit: QL, SE, VL. Effective: 2000 Fall Quarter.

ATM 121A—Atmospheric Dynamics (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): ATM 120; MAT 021D; PHY 009B Fundamental forces of atmospheric flow; noninertial reference frames; development of the equations of motion for rotating stratified atmospheres; isobaric and natural coordinate systems; geostrophic flow; thermal wind; circulation and vorticity. GE credit: QL, SE. Effective: 2001 Winter Quarter.

ATM 121B—Atmospheric Dynamics (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): ATM 121A Dynamics of fluid motion in geophysical systems; quasi-geostrophic theory; fundamentals of wave propagation in fluids; Rossby waves; gravity waves; fundamentals of hydrodynamic instability; two-level model; baroclinic instability and cyclogenesis. GE credit: QL, SE. Effective: 2001 Spring Quarter.

ATM 124—Meteorological Instruments and Observations (3)
Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): ATM 060 Modern meteorological instruments and their use in meteorological observations and measurements. Both standard and micrometeorological instruments are included. GE credit: QL, SE, SL, VL. Effective: 1997 Winter Quarter.

ATM 128—Radiation and Satellite Meteorology (4)
Discussion/Laboratory—3 hours; Extensive Problem Solving—1 hour. Prerequisite(s): ATM 060; PHY 009B; MAT 022B; MAT 021D Concepts of atmospheric radiation and the use of satellites in remote sensing. Emphasis on the modification of solar and infrared radiation by the atmosphere. Estimation from satellite data of atmospheric variables such as temperatures and cloudiness. GE credit: QL, SE, VL. Effective: 2011 Spring Quarter.

ATM 133—Biometeorology (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MAT 016B; And one course in a biological discipline or consent of instructor. Atmospheric and biological interactions. Physical and biological basis for water vapor, carbon dioxide and energy exchanges with the atmosphere associated with plants and animals, including humans. Microclimate of plant canopies and microclimatic modification such as frost protection and windbreaks. GE credit: QL, SE, SL, VL. Effective: 2001 Winter Quarter.

ATM 149—Air Pollution (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MAT 021D; MAT 022B; CHE 002B C- or better; (ATM 121A or ENG 103 C- or better or ECI 100 C- or better) Physical and technical aspects of air pollution. Emphasis on geophysical processes and air pollution meteorology as well as physical and chemical properties of pollutants. (Same course as ECI 149.) GE credit: QL, SE, SL. Effective: 2018 Winter Quarter.

ATM 150—Introduction to Computer Methods in Physical Sciences (4)
Discussion/Laboratory—2 hours; Lecture—3 hours. Prerequisite(s): MAT 022B; PHY 009B; And a computer
programming course such as ECS 030; additional courses in fluid dynamics (ATM 121A or ENG 103) and in Fourier transforms (MAT 118C or PHY 104A) are helpful but not required. Enrollment limited to 12, preference to Atmospheric Science majors. Computational techniques used in physical sciences. Integral and differential equation numerical solution: mainly finite differencing and spectral (Fourier transform) methods. Time series applications (time-permitting). Specific applications drawn from meteorology. Accelerated introduction to FORTRAN including programming assignments. (P/NP grading only.) GE credit: SE. Effective: 2005 Fall Quarter.

ATM 158—Boundary-Layer Meteorology (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ATM 121A Dynamics of the atmosphere nearest the Earth's surface. Friction and heat transfer. Properties of turbulent flows; statistical and spectral techniques; use and interpretation of differential equations. Emphasis on the importance to weather, air pollution, and the world's oceans. GE credit: QL, SE, VL. Effective: 2011 Spring Quarter.

ATM 160—Introduction to Atmospheric Chemistry (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): CHE 002B Quantitative examination of current local, regional and global problems in atmospheric chemistry (including photochemical smog, acid deposition, climate change, and stratospheric ozone depletion) using fundamental concepts from chemistry. Basic chemical modeling of atmospheric reaction systems. GE credit: QL, SE, SL, VL. Effective: 2000 Winter Quarter.

ATM 192—Atmospheric Science Internship (1-12)
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Completion of 84 units. Internship off and on campus in atmospheric science. Internship supervised by a member of the faculty. (P/NP grading only.) Effective: 1997 Winter Quarter.

ATM 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Three upper division units in Atmospheric Science. (P/NP grading only.) Effective: 1997 Winter Quarter.

ATM 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. Three upper division units in Atmospheric Science and at least an overall B average. (P/NP grading only.) Effective: 1997 Winter Quarter.

ATM 215—Advanced Hydroclimatology (3)
Lecture—3 hours. Prerequisite(s): ATM 115 Theoretical and applied aspects of energy and mass fluxes linking the earth's surface, atmosphere, and hydrologic system. Emphasis on regional scale analysis and modeling, spatial data representation, and climate change influences on precipitation and its hydroclimatic expression. Effective: 1998 Spring Quarter.

ATM 221—Advanced Atmospheric Dynamics (3)
Lecture—3 hours. Prerequisite(s): ATM 121B Conditions for instability in stratified atmospheres; baroclinic instability; forced topographic Rossby Waves; wave-mean flow interaction theory; tropical dynamics; stratospheric dynamics. Effective: 1997 Winter Quarter.

ATM 223—Advanced Boundary-Layer Meteorology (3)

ATM 230—Atmospheric Turbulence (3)
Lecture—3 hours. Prerequisite(s): ATM 121B or ATM 158 Dynamics and energetics of turbulence in the atmosphere including vorticity dynamics. Statistical description of turbulence; Eulerian and Lagrangian scales, spectral analysis, conditional sampling techniques. Turbulent diffusion; the closure problem, gradient-diffusion and second-order methods. Effective: 1997 Winter Quarter.

ATM 231—Advanced Air Pollution Meteorology (3)
Lecture—3 hours. Prerequisite(s): ATM 160; ATM 149A; One course in fluid dynamics. Processes determining transport and diffusion of primary and secondary pollutants. Models of chemical transformation, of the atmospheric boundary layer and of mesoscale wind fields, as applicable to pollutant dispersion problems. Effective: 1997 Spring Quarter.

ATM 233—Advanced Biometeorology (3)
Lecture/Discussion—3 hours. Prerequisite(s): ATM 133; or Consent of Instructor. Current topics in biometeorology. Physical and biological basis for water vapor, other gases, and energy exchange with the atmosphere. Topics
include modeling and measuring turbulent transport from plant canopies, surface temperatures and energy budgets, bio-aerosol physics and aerobiology. Effective: 1997 Winter Quarter.

ATM 240—General Circulation of the Atmosphere (4)
Lecture/Discussion—4 hours. Prerequisite(s): ATM 121B Large-scale, observed atmospheric properties. Radiation, momentum, and energy balances derived and compared with observations. Lectures and homework synthesize observations and theories, then apply them to understand the large-scale circulations. Effective: 2000 Winter Quarter.

ATM 241—Climate Dynamics (3)
Lecture/Discussion—3 hours. Prerequisite(s): ATM 121B Dynamics of large-scale climatic variations over time periods from weeks to centuries. Description of the appropriate methods of analysis of atmospheric and oceanic observations. Conservation of mass, energy and momentum. Introduction to the range of climate simulations. Effective: 1997 Winter Quarter.

ATM 245—Climate Change, Water and Society (4)
Lecture—4 hours. Class size limited to 25 students. Integration of climate science and hydrology with policy to understand hydroclimatology and its impact upon natural and human systems. Assignments: readings, take-home examination on climate and hydrologic science, paper that integrates course concepts into a research prospectus or review article. (Same course as HYD 245 and ECL 245.) Effective: 2015 Spring Quarter.

ATM 250—Meso-Scale Meteorology (3)
Lecture—3 hours. Prerequisite(s): ATM 150; Graduate standing, a course in partial differential equations or consent of instructor. The study of weather phenomena with horizontal spatial dimensions between 2.5 and 2500 kilometers. Methods of observational study and numerical modeling of the structure and temporal behavior of these weather systems. Effective: 1997 Winter Quarter.

ATM 255—Numerical Modeling of the Atmosphere (4)
Laboratory—6 hours; Lecture—2 hours. Prerequisite(s): ATM 121B; ENG 005; ATM 150 recommended. Principles of numerical modeling of the dynamic, thermodynamic and physical processes of the atmosphere. Hands-on experiments on model development using the shallow water equations and the primitive equations. Operational forecast models. Effective: 1997 Winter Quarter.

ATM 260—Atmospheric Chemistry (3)
Lecture—3 hours. Prerequisite(s): ATM 160 Chemistry and photochemistry in tropospheric condensed phases (fog, cloud, and rain drops and aerosol particles). Gas-drop and gas-particle partitioning of compounds and effects of reactions in condensed phases on the fates and transformations of tropospheric chemical species. Effective: 1998 Spring Quarter.

ATM 265—The Art of Climate Modeling (3)
Laboratory—1 hour; Lecture—2 hours. Prerequisite(s): ATM 121A Over the past fifty years, global models have given us incredible insight into the Earth system. This course provides an introduction to these models, with a focus on their design and the science questions they have been built to address. Effective: 1997 Winter Quarter.

ATM 270A—Topics in Atmospheric Science: Meteorological Statistics (1-3)

ATM 270B—Topics in Atmospheric Science: Computer Modeling of the Atmosphere (1-3)
Discussion—1-3 hours. Applications and concepts in computer modeling of the atmosphere. Effective: 1997 Winter Quarter.

ATM 270C—Topics in Atmospheric Science: Design of Experiments and Field Studies in Meteorology (1-3)
Discussion—1-3 hours. Applications and concepts in design of experiments and field studies in meteorology. Effective: 1997 Winter Quarter.

ATM 270D—Topics in Atmospheric Science: Solar and Infrared Radiation in the Atmosphere (1-3)

ATM 270E—Topics in Atmospheric Science: Aerosol and Cloud Physics (1-3)
Discussion—1-3 hours. Applications and concepts in aerosol and cloud physics. Effective: 1997 Winter Quarter.

ATM 270F—Topics in Atmospheric Science: Atmospheric Chemistry (1-3)
Discussion—1-3 hours. Applications and concepts in atmospheric chemistry. Effective: 1997 Winter Quarter.
ATM 270G—Topics in Atmospheric Science: General Meteorology (1-3)
Discussion—1-3 hours. Applications and concepts in general meteorology. Effective: 1997 Winter Quarter.

ATM 280A—Air Quality Policy in the Real World (4)
Project (Term Project). Prerequisite(s): (ATM 149 or ECI 149); ECI 242; Consent of Instructor. Or equivalent of ECI 242. In-depth investigation of an air quality problem with a team and mentor from government or industry. Science, engineering and policy will be involved. Findings will be presented orally and in writing. (Deferred grading only, pending completion of sequence.) Effective: 2007 Winter Quarter.

ATM 280B—Air Quality Policy in the Real World (4)
Project (Term Project). Prerequisite(s): ATM 280A; and Consent of Instructor. In-depth investigation of an air quality problem with a team and mentor from government or industry. Science, engineering and policy will be involved. Findings will be presented orally and in writing. (Deferred grading only, pending completion of sequence.) Effective: 2007 Winter Quarter.

ATM 290—Seminar (1)
Seminar—1 hour. Prerequisite(s): Graduate standing in Atmospheric Science or related field. Current developments in selected areas of atmospheric research. Topics will vary according to student and faculty interests. (S/U grading only.) Effective: 1997 Winter Quarter.

ATM 291A—Research Conference in Atmospheric Science; Air Quality Meteorology (1-3)
Lecture/Discussion—1-3 hours. Prerequisite(s): Consent of Instructor. Review and discussion of current literature and research in Air Quality Meteorology. May be repeated up to 6 unit(s). (S/U grading only.) Effective: 2010 Fall Quarter.

ATM 291B—Research Conference in Atmospheric Science; Biometeorology (1-3)
Lecture/Discussion—1-3 hours. Prerequisite(s): Consent of Instructor. Review and discussion of current literature and research in Biometeorology. May be repeated up to 6 unit(s). (S/U grading only.) Effective: 2010 Fall Quarter.

ATM 291C—Research Conference in Atmospheric Science; Boundary Layer Meteorology (1-3)
Lecture/Discussion—1-3 hours. Prerequisite(s): Consent of Instructor. Review and discussion of current literature and research in Boundary Layer Meteorology. May be repeated up to 6 unit(s). (S/U grading only.) Effective: 2010 Fall Quarter.

ATM 291D—Research Conference in Atmospheric Science; Climate Change (1-3)
Lecture/Discussion—1-3 hours. Prerequisite(s): Consent of Instructor. Review and discussion of current literature and research in Climate Change. May be repeated up to 6 unit(s). (S/U grading only.) Effective: 2010 Fall Quarter.

ATM 291E—Research Conference in Atmospheric Science; General Meteorology (1-3)
Lecture/Discussion—1-3 hours. Prerequisite(s): Consent of Instructor. Review and discussion of current literature and research in General Meteorology. May be repeated up to 6 unit(s). (S/U grading only.) Effective: 2010 Fall Quarter.

ATM 291F—Research Conference in Atmospheric Science; Atmospheric Chemistry (1-3)
Lecture/Discussion—1-3 hours. Prerequisite(s): Consent of Instructor. Review and discussion of current literature and research in Atmospheric Chemistry. May be repeated up to 6 unit(s). (S/U grading only.) Effective: 2010 Fall Quarter.

ATM 298—Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Graduate standing. (S/U grading only.) Effective: 1997 Winter Quarter.

ATM 299—Research (1-12)
Variable. Prerequisite(s): Consent of Instructor. Graduate standing. (S/U grading only.) Effective: 1997 Winter Quarter.

ATM 393—Teaching Assistant Training Practicum (1-4)
Variable. Prerequisite(s): Graduate standing. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

ATM 396—Teaching Assistant Training Practicum (1-4)
Variable. Prerequisite(s): Graduate standing. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

Avian Sciences

Avian Sciences | AVS Minor
(College of Agricultural and Environmental Sciences)
James Murray Ph.D., Chairperson of the Department (Animal Science)
**Department Office.** 2223 Meyer Hall; 530-752-1250; [http://animalscience.ucdavis.edu/](http://animalscience.ucdavis.edu/)

**Faculty.** [http://animalscience.ucdavis.edu/faculty/index.html](http://animalscience.ucdavis.edu/faculty/index.html)

**The Program.** The flexibility of the program and the close personal interaction between students, faculty, and specialists in the field give students a large role in selecting and designing their own course work.

**Internships and Career Alternatives.** Independent study, undergraduate research, and internships are emphasized in the Avian Sciences program. Birds for laboratory or special study are housed within the main building as well as at the research farm and the experimental aviary.

**Advising Center** for the minor and course offerings is located in the Animal Science Advising Center in 1202 Meyer Hall; 530-754-7915; [http://asac.ucdavis.edu/](http://asac.ucdavis.edu/).

### Avian Sciences | AVS Courses

**Courses in AVS:**

**AVS 011—Introduction to Poultry Science (3)**

Lecture—3 hours. The mosaic of events that have tied poultry science to other scientific disciplines and poultry to humans. Poultry science techniques and production methods from the time of domestication to the present. One field trip required. GE credit: SE. Effective: 1997 Winter Quarter.

**AVS 013—Birds, Humans and the Environment (3)**

Discussion—1 hour; Lecture—2 hours. Restricted to students with lower division standing. Interrelationships of the worlds of birds and humans. Lectures, discussions, field trips and projects focus on ecology, avian evolution, physiology, reproduction, flight, behavior, folklore, identification, ecotoxicology and conservation. Current environmental issues are emphasized. Half-day field trip. GE credit: SE, SL. Effective: 2017 Winter Quarter.
AVS 014L—Management of Captive Birds (2)
Fieldwork—3 hours; Lecture/Discussion—1 hour. Prerequisite(s): Consent of Instructor. One weekly discussion and field trip to study practical captive management (housing, feeding, equipment, marketing, diseases). Visit facilities rearing birds such as commercial parrots, hobbyist exotics, ostrich, raptors, waterfowl, game birds, poultry and pigeons. GE credit: SE. Effective: 1997 Winter Quarter.

AVS 015L—Captive Raptor Management (2)
Independent Study—3 hours; Laboratory—3 hours. Hands-on experience handling birds of prey. Students are taught all of the skills required to handle and care for raptors, including husbandry, biology, habitat requirements, cage design, veterinary care, rehabilitation methods, research potential and long-term care requirements. One Saturday fieldtrip. GE credit: SE. Effective: 1997 Winter Quarter.

AVS 016LA—Raptor Migration and Population Fluctuations (2)
Discussion—1 hour; Fieldwork—3 hours. Prerequisite(s): Consent of Instructor. Identify raptors: study of effects of weather, crops, agricultural practices on fluctuations in raptor species and numbers. Familiarize with literature; design a project; survey study sites; collect, computerize, analyze data, compare with previous years. Species, observations, emphasis different each quarter. One Saturday field trip. GE credit: SE. Effective: 1997 Winter Quarter.

AVS 016LB—Raptor Migration and Population Fluctuations (2)
Discussion—1 hour; Fieldwork—3 hours. Prerequisite(s): Consent of Instructor. Identify raptors: study of effects of weather, crops, agricultural practices on fluctuations in raptor species and numbers. Familiarize with literature; design a project; survey study sites; collect, computerize, analyze data, compare with previous years. Species, observations, emphasis different each quarter. One Saturday field trip. GE credit: SE. Effective: 1997 Winter Quarter.

AVS 016LC—Raptor Migration and Population Fluctuations (2)
Discussion—1 hour; Fieldwork—3 hours. Prerequisite(s): Consent of Instructor. Identify raptors: study of effects of weather, crops, agricultural practices on fluctuations in raptor species and numbers. Familiarize with literature; design a project; survey study sites; collect, computerize, analyze data, compare with previous years. Species, observations, emphasis different each quarter. One Saturday field trip. GE credit: SE. Effective: 1997 Winter Quarter.

AVS 092—Internship in the Avian Sciences (1-12)
Variable—3-36 hours. Prerequisite(s): Consent of Instructor. Sophomore standing preferred. Internship on and off campus in poultry, game birds or exotic bird production, management and research; or in a business, industry, or agency concerned with these entities. Compliance with Internship Approval form essential. (P/NP grading only.) Effective: 1997 Winter Quarter.

AVS 098—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Fall Quarter.

AVS 099—Special Study for Undergraduates (1-5)
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

AVS 100—Avian Biology (3)
Lecture—3 hours. Prerequisite(s): BIS 002A; BIS 002B; ANS 002 preferred. Biology of domesticated poultry, specifically chickens and turkeys. Avian genetics, immunology, reproduction, growth and development, broiler and layer management. GE credit: SE. Effective: 2016 Spring Quarter.

AVS 103—Avian Development and Genomics (3)
Lecture—3 hours. Prerequisite(s): BIS 002A; BIS 002B Unique features of avian development and genomics: Incubation; Staging; Egg Structure/Function; Fertilization; Pre-oviposition; Oviposition, Cold Torpor; Post-oviposition Development; Organogenesis, Growth; Sexual Differentiation; Extraembryonic Membranes; Mortality/Hatching; Genome Organization; Comparative Avian Genomics; Telomere Biology; Sex Chromosomes/Sex Determination; Advanced Technologies; Genome Manipulation; Mutations. GE credit: SE. Effective: 2016 Fall Quarter.

AVS 115—Raptor Biology (3)
Lecture—3 hours. Prerequisite(s): BIS 002A; Or equivalent. Study of birds of prey: classification, distribution, habits, migration, unique anatomical and physiological adaptations, natural and captive breeding, health and diseases, environmental concerns, conservation, legal considerations, rehabilitation, and falconry. Includes two Saturday field trips. GE credit: SE. Effective: 2016 Fall Quarter.

AVS 121—Avian Reproduction (2)
Lecture—2 hours. Prerequisite(s): BIS 002A; BIS 002B Breeding cycles and reproductive strategies, egg and sperm formation, incubation, sexual development, imprinting, hormonal control of reproductive behavior and song.
Species coverage includes wild and companion birds. Course has a physiological orientation. GE credit: SE, SL. Effective: 2016 Fall Quarter.

**AVS 123—Management of Birds (3)**
Lecture—3 hours. Prerequisite(s): BIS 002A; BIS 002B Captive propagation of birds, including reproduction, genetic management, health, feeding, artificial incubation, artificial insemination, and related legal aspects, including trade and smuggling. Emphasis on exotic species and the role of captive propagation in conservation. GE credit: SE, SL, WE. Effective: 2016 Fall Quarter.

**AVS 149—Egg Production Management (2)**
Lecture—2 hours. Prerequisite(s): AVS 011; or Consent of Instructor. Management of commercial table egg flocks as related to environment, nutrition, disease control, economics, housing, equipment, egg processing and raising replacement pullets. Offered in alternate years. One Saturday field trip required. GE credit: SE. Effective: 2016 Fall Quarter.

**AVS 150—Nutrition of Birds (1)**
Lecture—1 hour. Prerequisite(s): ABI 103 (can be concurrent) or BIS 103 (can be concurrent) Principles of nutrition specific to avian species, including feedstuffs, feed additives, nutrient metabolism, energy systems, and nutritional support of egg production and growth. Use of computers for feed formulation to support production. GE credit: QL, SE. Effective: 2016 Fall Quarter.

**AVS 160—Designing and Performing Experiments in Avian Sciences (2)**
Laboratory—6 hours. Prerequisite(s): AVS 100 or WFC 111; or Consent of Instructor. Experiments in current problems in avian biology. Introduction to experimental design. Students choose a project, design a protocol, perform an experiment and report their findings. May be repeated for credit with consent of instructor. May be repeated for credit with consent of instructor. GE credit: SE. Effective: 2016 Fall Quarter.

**AVS 170—Advanced Avian Biology (4)**
Lecture/Discussion—3 hours; Project (Term Project)—1 hour. Prerequisite(s): AVS 100 or WFC 111 Ecology, behavior, functional morphology and lifethistory evolution of birds. Emphasis on the importance of body size as a principle determinant of most aspects of avian performance from lifespan to reproduction and species abundance. Analytical synthesis and critical thought emphasized. GE credit: SE. Effective: 2016 Fall Quarter.

**AVS 190—Seminar in Avian Sciences (1)**
Seminar—1 hour. Prerequisite(s): Consent of Instructor. May be repeated up to 3 time(s). (P/NP grading only.) Effective: 2016 Fall Quarter.

**AVS 192—Internship in Avian Sciences (1-12)**
Laboratory—3-36 hours. Prerequisite(s): Consent of Instructor. Internship on and off campus in poultry, game birds or exotic bird production, management and research; or in a business, industry, or agency concerned with these entities. Compliance with Internship Approval form essential. (P/NP grading only.) Effective: 2016 Fall Quarter.

**AVS 195—Topics in Current Research (1-3)**
Lecture/Discussion; Variable—1-3 hours. Prerequisite(s): Consent of Instructor. Discussion of topics of current interest in avian sciences. May be repeated three times for credit. May be repeated up to 3 time(s). Effective: 1997 Winter Quarter.

**AVS 197T—Tutoring in Avian Sciences (1-3)**
Tutorial—1-3 hours. Prerequisite(s): Consent of Instructor. Tutoring of students in lower division avian sciences courses; weekly conference with instructors in charge of courses; written critiques of teaching procedures. (P/NP grading only.) Effective: 2016 Fall Quarter.

**AVS 198—Directed Group Study (1-5)**
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. Restricted to upper division students. Directed group study. (P/NP grading only.) Effective: 2017 Winter Quarter.

**AVS 199—Special Study for Advanced Undergraduates (1-5)**
Variable—1-5 hours. (P/NP grading only.) Effective: 1997 Winter Quarter.

**AVS 203—Advanced Avian Development and Genomics (1)**
Discussion—1 hour. Prerequisite(s): AVS 103 (can be concurrent); Graduate standing. In consultation with the instructor, students develop a lecture and associated instructional materials, i.e., lesson plan, including justification, reading and presentation and evaluation aids. The topic must complement a topic covered in Avian Sciences 103. Effective: 2013 Fall Quarter.
AVS 290—Seminar (1)
Seminar—1 hour. Reports and discussions of recent advances and selected topics of current interest in avian genetics, physiology, nutrition, and poultry technology. Effective: 1997 Winter Quarter.

AVS 290C—Research Conference (1)
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Graduate standing. Major professors lead research discussions with their graduate students. Research papers are reviewed and project proposals presented and evaluated. Format will combine seminar and discussion. (S/U grading only.) Effective: 1997 Winter Quarter.

AVS 297T—Supervised Teaching in Avian Sciences (1-4)
Tutorial—1-4 hours. Prerequisite(s): Consent of Instructor. Graduate standing. Tutoring of students in lower, upper division, and graduate courses in Avian Sciences; weekly conference with instructor in charge of course; written critiques of teaching methods in lectures and laboratories. (S/U grading only.) Effective: 1997 Winter Quarter.

AVS 298—Group Study (1-5)
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. Effective: 1997 Winter Quarter.

AVS 299—Research (1-12)
Variable—1-12 hours. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

Avian Sciences (Graduate Group)

Avian Sciences (Graduate Group) | AVS M.S.
Annie King, Ph.D., Chairperson of the Group

Group Office. 1249 Meyer Hall; 530-752-2382; http://aviansciences.ucdavis.edu

Faculty. http://aviansciences.ucdavis.edu/people/faculty.html

Graduate Study. The Graduate Group in Avian Sciences offers the M.S. degree program to students who wish to pursue specialized advanced work on avian species. Specializations students may choose include behavior, nutrition, physiology, reproduction, pathology, immunology, toxicology, food chemistry, management, ecology, genetics, comparative incubation, environmental physiology, and cellular and developmental studies using wild and domestic birds as experimental animals. Both master’s degree plans, thesis and comprehensive examination, are available.

Preparation. Applicants should have undergraduate preparation in a field appropriate to the course of study selected, including courses in most of the following subjects: general biology, general and organic chemistry, biochemistry, avian biology, genetics, nutrition, physiology, and statistics.

Graduate Advisors. A.J. King, J.M. Eadie, K.C. Klasing

Total: 0

Avian Sciences (Graduate Group) | AVS Courses

Courses in AVS:

AVS 011—Introduction to Poultry Science (3)
Lecture—3 hours. The mosaic of events that have tied poultry science to other scientific disciplines and poultry to humans. Poultry science techniques and production methods from the time of domestication to the present. One field trip required. GE credit: SE. Effective: 1997 Winter Quarter.

AVS 013—Birds, Humans and the Environment (3)
Discussion—1 hour; Lecture—2 hours. Restricted to students with lower division standing. Interrelationships of the worlds of birds and humans. Lectures, discussions, field trips and projects focus on ecology, avian evolution, physiology, reproduction, flight, behavior, folklore, identification, ecotoxicology and conservation. Current environmental issues are emphasized. Half-day field trip. GE credit: SE, SL. Effective: 2017 Winter Quarter.

AVS 014L—Management of Captive Birds (2)
Fieldwork—3 hours; Lecture/Discussion—1 hour. Prerequisite(s): Consent of Instructor. One weekly discussion and field trip to study practical captive management (housing, feeding, equipment, marketing, diseases). Visit facilities rearing birds such as commercial parrots, hobbyist exotics, ostrich, raptors, waterfowl, game birds, poultry and pigeons. GE credit: SE. Effective: 1997 Winter Quarter.
AVS 015L—Captive Raptor Management (2)
Independent Study—3 hours; Laboratory—3 hours. Hands-on experience handling birds of prey. Students are taught all of the skills required to handle and care for raptors, including husbandry, biology, habitat requirements, cage design, veterinary care, rehabilitation methods, research potential and long-term care requirements. One Saturday fieldtrip. GE credit: SE. Effective: 1997 Winter Quarter.

AVS 016LA—Raptor Migration and Population Fluctuations (2)
Discussion—1 hour; Fieldwork—3 hours. Prerequisite(s): Consent of Instructor. Identify raptors: study of effects of weather, crops, agricultural practices on fluctuations in raptor species and numbers. Familiarize with literature; design a project; survey study sites; collect, computerize, analyze data, compare with previous years. Species, observations, emphasis different each quarter. One Saturday field trip. GE credit: SE. Effective: 1997 Winter Quarter.

AVS 016LB—Raptor Migration and Population Fluctuations (2)
Discussion—1 hour; Fieldwork—3 hours. Prerequisite(s): Consent of Instructor. Identify raptors: study of effects of weather, crops, agricultural practices on fluctuations in raptor species and numbers. Familiarize with literature; design a project; survey study sites; collect, computerize, analyze data, compare with previous years. Species, observations, emphasis different each quarter. One Saturday field trip. GE credit: SE. Effective: 1997 Winter Quarter.

AVS 016LC—Raptor Migration and Population Fluctuations (2)
Discussion—1 hour; Fieldwork—3 hours. Prerequisite(s): Consent of Instructor. Identify raptors: study of effects of weather, crops, agricultural practices on fluctuations in raptor species and numbers. Familiarize with literature; design a project; survey study sites; collect, computerize, analyze data, compare with previous years. Species, observations, emphasis different each quarter. One Saturday field trip. GE credit: SE. Effective: 1997 Winter Quarter.

AVS 092—Internship in the Avian Sciences (1-12)
Variable—3-36 hours. Prerequisite(s): Consent of Instructor. Sophomore standing preferred. Internship on and off campus in poultry, game birds or exotic bird production, management and research; or in a business, industry, or agency concerned with these entities. Compliance with Internship Approval form essential. (P/NP grading only.) Effective: 1997 Winter Quarter.

AVS 098—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Fall Quarter.

AVS 099—Special Study for Undergraduates (1-5)
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

AVS 100—Avian Biology (3)
Lecture—3 hours. Prerequisite(s): BIS 002A; BIS 002B; ANS 002 preferred. Biology of domesticated poultry, specifically chickens and turkeys. Avian genetics, immunology, reproduction, growth and development, broiler and layer management. GE credit: SE. Effective: 2016 Spring Quarter.

AVS 103—Avian Development and Genomics (3)
Lecture—3 hours. Prerequisite(s): BIS 002A; BIS 002B Unique features of avian development and genomics: Incubation; Staging; Egg Structure/Function; Fertilization; Pre-oviposital; Oviposition, Cold Torpor; Post-oviposital Development; Organogenesis, Growth; Sexual Differentiation; Extraembryonic Membranes; Mortality/Hatching; Genome Organization; Comparative Avian Genomics; Telomere Biology; Sex Chromosomes/Sex Determination; Advanced Technologies; Genome Manipulation; Mutations. GE credit: SE. Effective: 2016 Fall Quarter.

AVS 115—Raptor Biology (3)
Lecture—3 hours. Prerequisite(s): BIS 002A; Or equivalent. Study of birds of prey: classification, distribution, habits, migration, unique anatomical and physiological adaptations, natural and captive breeding, health and diseases, environmental concerns, conservation, legal considerations, rehabilitation, and falconry. Includes two Saturday field trips. GE credit: SE. Effective: 2016 Fall Quarter.

AVS 121—Avian Reproduction (2)
Lecture—2 hours. Prerequisite(s): BIS 002A; BIS 002B Breeding cycles and reproductive strategies, egg and sperm formation, incubation, sexual development, imprinting, hormonal control of reproductive behavior and song. Species coverage includes wild and companion birds. Course has a physiological orientation. GE credit: SE, SL. Effective: 2016 Fall Quarter.

AVS 123—Management of Birds (3)
Lecture—3 hours. Prerequisite(s): BIS 002A; BIS 002B Captive propagation of birds, including reproduction, genetic management, health, feeding, artificial incubation, artificial insemination, and related legal aspects, including trade

**AVS 149—Egg Production Management (2)**
Lecture—2 hours. Prerequisite(s): AVS 011; or Consent of Instructor. Management of commercial table egg flocks as related to environment, nutrition, disease control, economics, housing, equipment, egg processing and raising replacement pullets. Offered in alternate years. One Saturday field trip required. GE credit: SE. Effective: 2016 Fall Quarter.

**AVS 150—Nutrition of Birds (1)**
Lecture—1 hour. Prerequisite(s): ABI 103 (can be concurrent) or BIS 103 (can be concurrent) Principles of nutrition specific to avian species, including feedstuffs, feed additives, nutrient metabolism, energy systems, and nutritional support of egg production and growth. Use of computers for feed formulation to support production. GE credit: QL, SE. Effective: 2016 Fall Quarter.

**AVS 160—Designing and Performing Experiments in Avian Sciences (2)**
Laboratory—6 hours. Prerequisite(s): AVS 100 or WFC 111; or Consent of Instructor. Experiments in current problems in avian biology. Introduction to experimental design. Students choose a project, design a protocol, perform an experiment and report their findings. May be repeated for credit with consent of instructor. May be repeated for credit with consent of instructor. GE credit: SE. Effective: 2016 Fall Quarter.

**AVS 170—Advanced Avian Biology (4)**
Lecture/Discussion—3 hours; Project (Term Project)—1 hour. Prerequisite(s): AVS 100 or WFC 111 Ecology, behavior, functional morphology and lifehistory evolution of birds. Emphasis on the importance of body size as a principle determinant of most aspects of avian performance from lifespan to reproduction and species abundance. Analytical synthesis and critical thought emphasized. GE credit: SE. Effective: 2016 Fall Quarter.

**AVS 190—Seminar in Avian Sciences (1)**
Seminar—1 hour. Prerequisite(s): Consent of Instructor. May be repeated up to 3 time(s). (P/NP grading only.) Effective: 2016 Fall Quarter.

**AVS 192—Internship in Avian Sciences (1-12)**
Laboratory—3-36 hours. Prerequisite(s): Consent of Instructor. Internship on and off campus in poultry, game birds or exotic bird production, management and research; or in a business, industry, or agency concerned with these entities. Compliance with Internship Approval form essential. (P/NP grading only.) Effective: 2016 Fall Quarter.

**AVS 195—Topics in Current Research (1-3)**
Lecture/Discussion; Variable—1-3 hours. Prerequisite(s): Consent of Instructor. Discussion of topics of current interest in avian sciences. May be repeated three times for credit. May be repeated up to 3 time(s). Effective: 1997 Winter Quarter.

**AVS 197T—Tutoring in Avian Sciences (1-3)**
Tutorial—1-3 hours. Prerequisite(s): Consent of Instructor. Tutoring of students in lower division avian sciences courses; weekly conference with instructors in charge of courses; written critiques of teaching procedures. (P/NP grading only.) Effective: 2016 Fall Quarter.

**AVS 198—Directed Group Study (1-5)**
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. Restricted to upper division students. Directed group study. (P/NP grading only.) Effective: 2017 Winter Quarter.

**AVS 199—Special Study for Advanced Undergraduates (1-5)**
Variable—1-5 hours. (P/NP grading only.) Effective: 1997 Winter Quarter.

**AVS 203—Advanced Avian Development and Genomics (1)**
Discussion—1 hour. Prerequisite(s): AVS 103 (can be concurrent); Graduate standing. In consultation with the instructor, students develop a lecture and associated instructional materials, i.e., lesson plan, including justification, reading and presentation and evaluation aids. The topic must complement a topic covered in Avian Sciences 103. Effective: 2013 Fall Quarter.

**AVS 290—Seminar (1)**
Seminar—1 hour. Reports and discussions of recent advances and selected topics of current interest in avian genetics, physiology, nutrition, and poultry technology. Effective: 1997 Winter Quarter.

**AVS 290C—Research Conference (1)**
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Graduate standing. Major professors lead research
discussions with their graduate students. Research papers are reviewed and project proposals presented and evaluated. Format will combine seminar and discussion. (S/U grading only.) Effective: 1997 Winter Quarter.

AVS 297T—Supervised Teaching in Avian Sciences (1-4)
Tutorial—1-4 hours. Prerequisite(s): Consent of Instructor. Graduate standing. Tutoring of students in lower, upper division, and graduate courses in Avian Sciences; weekly conference with instructor in charge of course; written critiques of teaching methods in lectures and laboratories. (S/U grading only.) Effective: 1997 Winter Quarter.

AVS 298—Group Study (1-5)
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. Effective: 1997 Winter Quarter.

AVS 299—Research (1-12)
Variable—1-12 hours. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

Biochemical Engineering; Engineering

Biochemical Engineering; Engineering | Biochemical Engineering B.S.

(College of Engineering)

Roland Faller, Ph.D., Chairperson of the Department 530-752-6496; Fax 530-752-1031

Department Office. 3001 Ghausi Hall; Fax 530-752-1031; http://che.engineering.ucdavis.edu/

Faculty. https://che.engineering.ucdavis.edu/people/faculty/

The Department of Chemical Engineering offers two undergraduate programs: Chemical Engineering and Biochemical Engineering.

Mission Statement. To advance, through teaching and research programs, the frontiers of chemical and biochemical engineering; to educate students with a sense of professionalism and community; and to serve the public of California through outreach efforts.

Honors Program. An Honors Program is available to qualified students in the Chemical Engineering and Biochemical Engineering majors. It is a two-year program designed to challenge the most talented students in these majors. Students are invited to participate in their sophomore year. In the upper division, students will complete either an honors thesis or a project that might involve local industry. Students must maintain a grade point average of 3.500 to continue in the program. Successful completion of the Honors Program will be acknowledged on the student's transcript.

Biochemical Engineering Undergraduate Program

The Biochemical Engineering program is accredited by the Engineering Accreditation Commission of ABET; see http://www.abet.org.

As the biotechnology industry expands and matures, there is increasing need for engineers who can move products from the research stage to large-scale manufacturing. As they fill this need, engineers must also understand the production, purification, and regulatory issues surrounding biopharmaceutical manufacturing.

Biochemical engineers—with their strong foundations in chemistry, biological sciences, and chemical process engineering—are in a unique position to tackle these problems. Biochemical engineers apply the principles of cell and molecular biology, biochemistry, and engineering to develop, design, scale up, optimize, and operate processes that use living cells, organisms, or biological molecules for the production and purification of products (such as monoclonal antibodies, vaccines, therapeutic proteins, antibiotics, and industrial enzymes); for health and/or environmental monitoring (such as diagnostic kits, microarrays, biosensors); or for environmental improvement (such as bioremediation). An understanding of biological processes is also becoming increasingly important in the industries that traditionally employ chemical engineers, including the industries that process materials, chemicals, foods, energy, fuels, and semiconductors.

Objectives. We educate students in the fundamentals of chemical and biochemical engineering, balanced with the application of these principles to practical problems; educate students as independent, critical thinkers who can also function effectively in a team; prepare students with a sense of community, ethical responsibility, and professionalism; prepare students for careers in industry, government, and academia; teach students the necessity for continuing education and self-learning; and foster proficiency in written and oral communications.
Students are encouraged to adhere carefully to all prerequisite requirements. The instructor is authorized to drop students from a course for which stated prerequisites have not been completed.

Exclusive of General Education units, the minimum number of units required for the Biochemical Engineering major is 162.

**Biochemical Engineering Electives**

Choose at least one laboratory course from the Laboratory Elective list; additional courses may be chosen from either list. You may receive biochemical engineering elective credit up to a maximum of two units of an internship (192) or independent study (199), or Biotechnology 189L with the approval of a petition, provided that the course is a laboratory-based experimental project, related to the biological and/or biochemical engineering sciences, and you submit a written report that demonstrates proficiency in laboratory skills, techniques, or method. Research does not replace the required lab elective.

Biochemical Engineering; Engineering | ECH Courses

Courses in ECH:

**ECH 001—Design of Coffee—An Introduction to Chemical Engineering (3)**
Laboratory—2 hours; Lecture—1 hour; Project (Term Project)—1 hour. Non-mathematical introduction to how chemical engineers think, illustrated by elucidation of the process of roasting and brewing coffee. Qualitative overview of the basic principles of engineering analysis and design. Corresponding experiments testing design choices on the sensory qualities of coffee. Not open for credit to students who have completed ECM 1, ECM 5, or ECH 5. GE credit: SE, SL, VL. Effective: 2017 Spring Quarter.

**ECH 005—Introduction to Analysis and Design in Chemical Engineering (3)**
Laboratory—2 hours; Lecture—2 hours. Prerequisite(s): MAT 021A; MAT 021B (can be concurrent) Quantitative introduction to the engineering principles of analysis and design. Applications of differential and integral calculus. Laboratory experiments using coffee to illustrate chemical engineering concepts and to conduct an engineering design competition. Only two units of credit to students who have completed ECM 001 or ECH 001; not open for credit to students who have completed ECH 005. GE credit: QL, SE. Effective: 2017 Winter Quarter.

**ECH 051—Material Balances (4)**
Lecture—4 hours. Prerequisite(s): MAT 021C C- or better; MAT 021D (can be concurrent) Application of the principle of conservation of mass to single and multicomponent systems in chemical process calculations. Studies of batch, semi-batch, and continuous processes involving mass transfer, phase change, and reaction stoichiometry. Not open for credit to students who have completed ECH 151. GE credit: SE. Effective: 2017 Fall Quarter.

**ECH 060—Engineering Problem Solving Using MATLAB (4)**
Lecture/Discussion—4 hours. Prerequisite(s): MAT 021C Problem solving in chemical, biochemical and materials engineering using MATLAB. Programming styles, data structures, working with lists, functions and rules. Applications drawn from material balances, statistics, numerical methods, bioinformatics, transport phenomena, kinetics, and computational analysis. GE credit: QL. Effective: 2017 Spring Quarter.

**ECH 080—Chemical Engineering Profession (1)**
Lecture/Discussion—1 hour; Term Paper. Professional opportunities and professional responsibilities of chemical engineers. Opportunities and needs for post-baccalaureate education. Relationship of chemical engineering to contemporary issues. GE credit: SE, SS. Effective: 2017 Winter Quarter.

**ECH 090X—Honors Discussion Section (1)**
Discussion—1 hour. Open only to students in the Chemical Engineering or Biochemical Engineering Honors Programs. Examination of special topics covered in selected lower-division courses through additional readings,
discussions, collaborative work, or special activities which may include projects, laboratory experience or computer simulations. Repeat credit allowed if topic differs. May be repeated for credit when topic differs. Effective: 2017 Fall Quarter.

ECH 098—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Lower division standing. Directed Group Study. (P/NP grading only.) GE credit: SE. Effective: 2017 Winter Quarter.

ECH 099—Special Study for Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. Special Study for Undergraduates (P/NP grading only.) GE credit: SE. Effective: 2017 Winter Quarter.

ECH 140—Mathematical Methods in Biochemical and Chemical Engineering (4)
Laboratory—1 hour; Lecture/Discussion—3 hours. Prerequisite(s): MAT 022B; (ECH 060 or ENG 006); or equivalents of ECH 060 or ENG 006. Mathematical methods for solving problems in chemical and biochemical engineering, with emphasis on transport phenomena. Fourier series and separation of variables. Sturm-Liouville eigenvalue problems. Similarity transformations. Tensor analysis. Finite difference methods for solving time-dependent diffusion problems. Not open for credit to students who have completed ECH 159. GE credit: SE. Effective: 2017 Spring Quarter.

ECH 141—Fluid Mechanics for Biochemical and Chemical Engineers (4) Review all entries
Lecture/Discussion—4 hours. Prerequisite(s): ECH 140; ECH 051 (can be concurrent) Principles and applications of fluid mechanics in chemical and biochemical engineering. Hydrostatics. The stress tensor and Newton's law of viscosity. Not open for credit to students who have completed course 150B. GE credit: QL, SE. Effective: 2017 Winter Quarter.

ECH 142—Heat Transfer for Biochemical and Chemical Engineers (4) Review all entries
Lecture/Discussion—4 hours. Prerequisite(s): ECH 141 Conduction, convection, and radiation of thermal energy in applications to chemical and biochemical engineering. Derivation of thermal and mechanical energy equations. Thermal boundary layers. Macroscopic balances. Applications: heat transfer in tubes, channels, and integrated circuits, and analysis of heat exchangers. Not open for credit to students who have completed course 153. GE credit: QL, SE. Effective: 2017 Winter Quarter.

ECH 143—Mass Transfer for Biochemical and Chemical Engineers (4) Review all entries

ECH 144—Rheology and Polymer Processing (3)
Lecture/Discussion—3 hours. Prerequisite(s): ECH 141 Deformation in steady shear, unsteady shear, and elongational flows. Linear and non-linear viscoelastic constitutive models. The principle of material indifference and admissibility of constitutive equations. Introduction to the unit operations of polymer processing. Not open for credit to students who have completed ECH 150C. GE credit: SE. Effective: 2017 Winter Quarter.
ECH 145A—Chemical Engineering Thermodynamics Laboratory (3)
Discussion—2 hours; Extensive Writing; Laboratory—2 hours. Prerequisite(s): ECH 152A; ECH 152B (can be concurrent) Open to majors in Chemical Engineering, Chemical Engineering/Materials Science, & Biochemical Engineering. Laboratory experiments in chemical engineering thermodynamics. GE credit: SE, WE. Effective: 2017 Winter Quarter.

ECH 145B—Chemical Engineering Transport Lab (3)
Discussion—2 hours; Extensive Writing; Laboratory—2 hours. Prerequisite(s): ECH 141; ECH 145A Open to majors in Chemical Engineering, Chemical Engineering/Materials Science, & Biochemical Engineering. Laboratory experiments in chemical engineering transport phenomena. GE credit: SE, WE. Effective: 2017 Spring Quarter.

ECH 148A—Chemical Kinetics and Reaction Engineering (3)
Lecture—3 hours. Prerequisite(s): ECH 143; ECH 152B Ideal chemical reactors. Rate laws and stoichiometry. Design and analysis of isothermal reactors with multiple reactions. Not open for credit to students who have taken ECH 146. GE credit: SE. Effective: 2017 Winter Quarter.

ECH 148B—Chemical Kinetics and Reaction Engineering (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECH 148A Design and analysis of non-isothermal reactors. Reactions in packed beds with pressure drop. Adsorption and heterogeneous catalysis. Transport limitations. Not open for credit to students who have taken ECH 146. GE credit: SE. Effective: 2017 Winter Quarter.

ECH 152A—Chemical Engineering Thermodynamics (3)
Lecture—3 hours. Prerequisite(s): ECH 060 or ENG 006; or equivalents. Application of principles of thermodynamics to chemical processes. Not open for credit to students who have completed ENG 105 or ENG 105A. GE credit: SE. Effective: 2017 Spring Quarter.

ECH 152B—Chemical Engineering Thermodynamics (4)
Lecture/Discussion—4 hours. Prerequisite(s): ECH 152A Continuation of course 152A. GE credit: SE. Effective: 2017 Spring Quarter.

ECH 155—Chemical Engineering Kinetics and Reactor Design Laboratory (4)
Discussion—1 hour; Laboratory—6 hours; Term Paper. Prerequisite(s): ECH 145B; ECH 148A; ECH 148B (can be concurrent); ECH 157 (can be concurrent); Upper division English composition requirement (can be concurrent). Open to majors in Chemical Engineering, Chemical Engineering/Materials Science, and Biochemical Engineering. Laboratory experiments in chemical kinetics, reactor design and process control. Not open for credit to students who have taken ECH 155B. GE credit: OL, SE, VL, WE. Effective: 2017 Spring Quarter.

ECH 155A—Chemical Engineering Laboratory (4)
Discussion—1 hour; Laboratory—6 hours; Term Paper. Prerequisite(s): ECH 141 (can be concurrent); ECH 142 (can be concurrent); ECH 143 (can be concurrent); Satisfaction of the upper division English composition requirement. Open to majors in Chemical Engineering, Chemical Engineering/Materials Science, Biochemical Engineering, Biomedical Engineering, and Biological Systems Engineering. Laboratory experiments in transport phenomena, chemical kinetics, and thermodynamics. GE credit: OL, QL, SE, VL, WE. Effective: 2017 Winter Quarter.

ECH 155B—Chemical Engineering Laboratory (4)
Discussion—1 hour; Extensive Writing—1 hour; Laboratory—6 hours. Prerequisite(s): ECH 143 (can be concurrent); ECH 155A; Satisfaction of the upper division English composition requirement. Open to majors in Chemical Engineering, Chemical Engineering/Materials Science, Biochemical Engineering, Biomedical Engineering, Food Engineering, and Biosystems Engineering. Continuation of course 155A. Laboratory experiments in transport phenomena, chemical kinetics, and thermodynamics. GE credit: QL, SE, VL, WE. Effective: 2017 Winter Quarter.

ECH 157—Process Dynamics and Control (4)
Lecture/Discussion—4 hours. Prerequisite(s): ECH 140 Fundamentals of dynamics and modeling of chemical processes. Design and analysis of feedback control of chemical processes. GE credit: QL, SE. Effective: 2017 Winter Quarter.

ECH 158A—Process Economics and Green Design (4)

ECH 158B—Separations and Unit Operations (4)
Lecture—4 hours. Prerequisite(s): ECH 158A Senior design experience with multiple realistic constraints. Heuristic
and rigorous design of chemical process equipment. Separation by filtration, distillation and extraction. Synthesis of reactor and separation networks, heat and power integration. GE credit: QL, SE. Effective: 2017 Winter Quarter.

**ECH 158C—Plant Design Project (4)**
Discussion/Laboratory—2 hours; Project (Term Project)—2 hours. Prerequisite(s): ECH 158B or ECH 161C Senior design experience for chemical and biochemical processes. Impact of multiple realistic constraints. Design, costing and profitability analysis of complete plants. Use of computer-aided design techniques. GE credit: SE, SS, VL. Effective: 2018 Winter Quarter.

**ECH 160—Fundamentals of Biomanufacturing (3)**
Lecture—3 hours. Prerequisite(s): MIC 102 or BIS 102 or ABI 102 Principles of large scale bioreactor production of metabolites, enzymes, and recombinant proteins including the development of strains/cell lines, fermentor/ bioreactor design, monitoring and operation, product recovery and purification, and biomanufacturing economics. Not open for credit to students who have completed ECH 161C or both ECH 161A and ECH 161B; only two units of credit to students who have completed either ECH 161A or ECH 161B. GE credit: QL, SE, VL. Effective: 2017 Winter Quarter.

**ECH 161A—Biochemical Engineering Fundamentals (4)**
Lecture/Discussion—4 hours. Prerequisite(s): ECH 148A Biokinetics; bioreactor design and operation; transport phenomena in bioreactors; microbial, plant, and animal cell cultures. GE credit: QL, SE, VL. Effective: 2017 Winter Quarter.

**ECH 161B—Bioseparations (4)**
Lecture/Discussion—4 hours. Prerequisite(s): ECH 143 Product recovery and purification of biochemicals. Cell disruption, centrifugation, filtration, membrane separations, extraction, and chromatographic separation. GE credit: QL, SE. Effective: 2017 Winter Quarter.

**ECH 161C—Biotechnology Facility Design and Regulatory Compliance (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECH 161A (can be concurrent), ECH 161B (can be concurrent)) or MCB 263 (can be concurrent); Course(s) required concurrently. Design of biotechnology manufacturing facilities. Fermentation and purification equipment, and utility systems. Introduction to current good manufacturing practices, regulatory compliance, and documentation. GE credit: QL, SE, SL, SS, VL. Effective: 2017 Winter Quarter.

**ECH 161L—Bioprocess Engineering Laboratory (4)**
Discussion—1 hour; Laboratory—9 hours; Term Paper. Prerequisite(s): (ECH 161A, ECH 161B) or VEN 186 or (BIS 103, MCB 120L) Pass One restricted to chemical/biochemical engineering majors. Laboratory experiments in the operation and analysis of bioreactors; determination of oxygen mass transfer coefficients in bioreactors and ion exchange chromatography. GE credit: QL, SE, VL, WE. Effective: 2017 Winter Quarter.

**ECH 166—Catalysis (3)**
Lecture—3 hours. Prerequisite(s): ECH 148A; and Consent of Instructor. Principles of catalysis based on an integration of principles of physical, organic, and inorganic chemistry and chemical kinetics and chemical reaction engineering. Catalysis in solution; cata...
dispersed solids and emulsified oils. Corresponding laboratory experiments testing the effect of design choices on the sensory quality of cocktails. (P/NP grading only.) GE credit: SE. Effective: 2018 Spring Quarter.

**ECH 170—Introduction to Colloid and Surface Phenomena (3)**
Lecture—3 hours. Prerequisite(s): CHE 110A Introduction to the behavior of surfaces and disperse systems. Fundamentals will be applied to the solution of practical problems in colloid science. Course should be of value to engineers, chemists, biologists, soil scientists, and related disciplines. GE credit: SE. Effective: 2017 Winter Quarter.

**ECH 190C—Research Group Conference (1)**
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Upper division standing in Chemical Engineering. Research group conferences. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 2017 Winter Quarter.

**ECH 190X—Honors Discussion Section (1)**
Discussion—1 hour. Open only to students in the Chemical Engineering or Biochemical Engineering Honors Programs. Examination of special topics covered in selected upper division courses through additional readings, discussions, collaborative work, or special activities which may include projects, laboratory experience or computer simulations. May be repeated for credit when topic differs. Effective: 2017 Fall Quarter.

**ECH 192—Internship in Chemical or Biochemical Engineering (1-5)**
Internship—3-15 hours. Prerequisite(s): Consent of Instructor. Completion of a minimum of 84 units; project approval before period of internship. Supervised work experience in Chemical or Biochemical Engineering. May be repeated for credit when project differs. (P/NP grading only.) GE credit: SE. Effective: 2017 Winter Quarter.

**ECH 198—Group Study (1-5)**
Variable. Prerequisite(s): Consent of Instructor. Group study. (P/NP grading only.) GE credit: SE. Effective: 2017 Winter Quarter.

**ECH 199—Special Study for Advanced Undergraduates (1-5)**
Variable. Prerequisite(s): Consent of Instructor. Special study. (P/NP grading only.) GE credit: SE. Effective: 2017 Winter Quarter.

**ECH 200—Preparing for Graduate Student Success (1)**
Seminar—1.5 hours. Restricted to graduate students in Chemical Engineering. Introduction to the soft-skills and campus resources needed to succeed in graduate school. Emphasis on the student-mentor relationship and the process of selecting a research mentor. (Same course as EMS 200.) (S/U grading only.) Effective: 2017 Winter Quarter.

**ECH 206—Biochemical Engineering (3)**
Lecture—3 hours. Prerequisite(s): MIC 102; MIC 102L; BIS 101; BIS 102; BIS 103; MCB 120L; MCB 200A; or Consent of Instructor. FST 205 recommended. Interaction of chemical engineering, biochemistry, and microbiology. Mathematical representations of microbial systems. Kinetics of growth, death, and metabolism. Continuous fermentation, agitation, mass transfer and scale-up in fermentation systems, product recovery, enzyme technology. Effective: 2017 Winter Quarter.

**ECH 226—Enzyme Engineering (3)**
Lecture—3 hours. Prerequisite(s): MIC 102; MIC 102L; BIS 102; BIS 103; MCB 122; MCB 120L; MCB 200A; or Consent of Instructor. Application of basic biochemical and engineering principles of practical enzymatic processes. Lectures cover large scale production and separation of enzymes, immobilized enzyme systems, enzyme related biotechnology, reactor design and optimization, and new application of enzymes in genetic engineering. Effective: 2017 Winter Quarter.

**ECH 245—Micro- and Nano-Technology in Life Sciences (4)**
Lecture/Discussion—4 hours. Prerequisite(s): Graduate standing or consent of instructor. Survey of biomedical device design from the engineering and biological perspectives; micro-/nano-fabrication and characterization techniques; surface chemistry and mass transfer; essential biological processes and models; proposal development skills to merge aforementioned themes in a multidisciplinary project. (Same course as EEC 245 and EMS 245.) Effective: 2017 Winter Quarter.
ECH 246—Advanced Biochemical Engineering (2)
Lecture—2 hours. Prerequisite(s): ECH 206; or Consent of Instructor. Advances in the field of biotechnology including genetic engineering, enzyme engineering, fermentation science, and renewable resources development. The important results of original research will be evaluated for understanding of the fundamental principles and for potential practical application. Effective: 2017 Winter Quarter.

ECH 252—Statistical Thermodynamics (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECH 152B; ENG 105B or the equivalent. A treatment of the statistical basis of thermodynamics; introduction to statistical mechanics; discussion of the laws of thermodynamics; application of thermodynamic relationships to phase and chemical reaction equilibrium; introduction to molecular simulations and the evaluation of thermodynamic properties from molecular simulations. Effective: 2017 Winter Quarter.

ECH 253A—Advanced Fluid Mechanics (4)

ECH 253B—Advanced Heat Transport (4)
Lecture—4 hours. Prerequisite(s): ECH 142; ECH 259; Or the equivalent. Fundamental energy postulates and derivation of microscopic and macroscopic energy equations. Mechanisms of conduction. Isotropic, thermoelastic and anisotropic materials solution problems using Greens functions and perturbation theory. Effective: 2017 Winter Quarter.

ECH 253C—Advanced Mass Transfer (4)
Lecture—4 hours. Prerequisite(s): ECH 253A; Or the equivalent. Kinematics and basic conservation principles for multicomponent systems. Constitutive equations for momentum, heat and mass transfer, applications to binary and ternary systems. Details of diffusion with reaction, and the effects of concentration. Effective: 2017 Winter Quarter.

ECH 254—Colloid and Surface Phenomena (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Graduate standing in science or engineering or consent of instructor. Thermodynamics and rate processes at interfaces. These fundamental processes will be applied to determine the collective properties of thin films and membranes, self-assembled systems, liquid crystals and colloidal systems. Experimental techniques in surface analysis. Effective: 2017 Winter Quarter.

ECH 256—Chemical Kinetics and Reaction Engineering (4)
Lecture—4 hours. Prerequisite(s): ECH 146; Or the equivalent. Analysis of the performance of chemical reactors and design of chemical reactors based on the principles of chemical kinetics and transport phenomena. Consideration of noncatalytic/catalytic reactions in single fluid phases and emphasis on reactions in multiphase mixtures, especially gas-solid reactors. Effective: 2017 Winter Quarter.

ECH 259—Advanced Engineering Mathematics (4)
Lecture—4 hours. Prerequisite(s): MAT 021D; MAT 022A; MAT 022B Applications of methods of applied mathematics to the analytical and numerical solution of linear and nonlinear ordinary and partial differential equations arising in the study of transport phenomena. Effective: 2017 Winter Quarter.

ECH 261—Molecular Modelling of Soft and Biological Matter (4)
Lecture/Discussion—4 hours. Prerequisite(s): EMS 247 or ECH 252; or equivalent course in advanced thermodynamics/statistical mechanics. Modern molecular simulation techniques with a focus on soft matter like polymers, biologically relevant systems, and glasses. Effective: 2017 Winter Quarter.

ECH 262—Transport Phenomena in Multiphase Systems (3)
Discussion/Laboratory—3 hours. Prerequisite(s): ECH 253C Heat, mass and momentum transfer in multiphase, multicomponent systems with special emphasis on transport processes in porous media. Derivation of the averaging theorem and application of the method of volume averaging to multicomponent, reacting systems. Effective: 2017 Winter Quarter.

ECH 263—Rheology and Mechanics of Non-Newtonian Fluids (3)
Lecture—3 hours. Prerequisite(s): ECH 253A; ECH 259; or Consent of Instructor. Mechanics of polymer solutions and suspension, especially the development of properly invariant constitutive equations. Topics include: viscometry, linear and nonlinear viscoelasticity, continuum mechanics, kinetic theory. Effective: 2017 Winter Quarter.

ECH 265—Emulsions, Microemulsions and Bilayers (3)
Lecture—3 hours. Prerequisite(s): An undergraduate course in physical chemistry. Thermodynamic and mechanical

ECH 267—Advanced Process Control (3)
Lecture—3 hours. Prerequisite(s): ECH 157; Or the equivalent. Advanced course in analysis and synthesis of linear multivariable systems. Emphasis on frequency domain techniques and applications to chemical processes. Topics include singular value analysis, internal model control, robust controller design methods as well as self-tuning control techniques. Effective: 2017 Winter Quarter.

ECH 268—Polysaccharides Surface Interactions (3)
Lecture—3 hours. Prerequisite(s): Graduate students in science or engineering. Study of fundamental surface science theories as applied to physical and chemical interactions of carbohydrates and polysaccharides. (Same course as EBS 268.) Effective: 2017 Winter Quarter.

ECH 269—Cell and Molecular Biophysics for Bioengineers (4)
Lecture—4 hours. Prerequisite(s): BIM 284; or equivalent; graduate standing; undergraduate students by consent of instructor. Introduction to fundamental mechanisms governing the structure, function, and assembly of bio-macromolecules. Emphasis is on a quantitative understanding of the nano-to-microscale interactions between and within individual molecules, as well as of their assemblies, in particular membranes. Not open for credit to students who have completed BIM 162. (Same course as BIM 262.) Effective: 2017 Winter Quarter.

ECH 289A—Special Topics in Chemical Engineering; Fluid Mechanics (1-5)
Laboratory—1-5 hours; Lecture—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Fluid Mechanics. May be repeated for credit when topic differs. Effective: 2017 Winter Quarter.

ECH 289B—Special Topics in Chemical Engineering; Nonlinear Analysis and Numerical Methods (1-5)
Laboratory—1-5 hours; Lecture—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Nonlinear Analysis and Numerical Methods. May be repeated for credit when topic differs. Effective: 2017 Winter Quarter.

ECH 289C—Special Topics in Chemical Engineering; Process Control (1-5)
Laboratory—1-5 hours; Lecture—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Process Control. May be repeated for credit when topic differs. Effective: 2017 Winter Quarter.

ECH 289D—Special Topics in Chemical Engineering; Chemistry of Catalytic Processes (1-5)
Laboratory—1-5 hours; Lecture—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Chemistry of Catalytic Processes. May be repeated for credit when topic differs. Effective: 2017 Winter Quarter.

ECH 289E—Special Topics in Chemical Engineering; Biotechnology (1-5)
Laboratory—1-5 hours; Lecture—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Biotechnology. May be repeated for credit when topic differs. Effective: 2017 Winter Quarter.

ECH 289F—Special Topics in Chemical Engineering; Interfacial Engineering (1-5)
Laboratory—1-5 hours; Lecture—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Interfacial Engineering. May be repeated for credit when topic differs. Effective: 2017 Winter Quarter.

ECH 289G—Special Topics in Chemical Engineering; Molecular Thermodynamics (1-5)
Laboratory—1-5 hours; Lecture—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Molecular Thermodynamics. May be repeated for credit when topic differs. Effective: 2017 Winter Quarter.

ECH 289H—Special Topics in Chemical Engineering; Membrane Separations (1-5)
Laboratory—1-5 hours; Lecture—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Membrane Separations. May be repeated for credit when topic differs. Effective: 2017 Winter Quarter.

ECH 289I—Special Topics in Chemical Engineering; Advanced Materials Processing (1-5)
Laboratory—1-5 hours; Lecture—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Advanced Materials Processing. May be repeated for credit when topic differs. Effective: 2017 Winter Quarter.

ECH 289J—Special Topics in Chemical Engineering; Novel Experimental Methods (1-5)
Laboratory—1-5 hours; Lecture—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Novel Experimental Methods. May be repeated for credit when topic differs. Effective: 2017 Winter Quarter.

ECH 289K—Special Topics in Chemical Engineering; Advanced Transport Phenomena (1-5)
Laboratory—1-5 hours; Lecture—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Advanced Transport Phenomena. May be repeated for credit when topic differs. Effective: 2017 Winter Quarter.
ECH 289L—Special Topics in Chemical Engineering; Biomolecular Engineering (1-5)
Laboratory—1-5 hours; Lecture—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Biomolecular Engineering. May be repeated for credit when topic differs. Effective: 2017 Winter Quarter.

ECH 290—Seminar (1)
Seminar—1 hour. Seminar. (S/U grading only.) Effective: 2017 Winter Quarter.

ECH 290C—Graduate Research Group Conference (1)
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Research problems, progress and techniques in chemical engineering. May be repeated for credit. (S/U grading only.) Effective: 2017 Winter Quarter.

ECH 294—Current Progress in Biotechnology (1)
Seminar—1 hour. Prerequisite(s): Consent of Instructor. Research problems, progress and techniques in chemical engineering. May be repeated for credit. (Same course as DEB 294.) (S/U grading only.) Effective: 2018 Winter Quarter.

ECH 298—Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Group study. (S/U grading only.) Effective: 2017 Winter Quarter.

ECH 299—Research (1-12)
Variable. Research. (S/U grading only.) Effective: 2017 Winter Quarter.

ECH 390—Teaching of Chemical Engineering (1) Review all entries
Discussion—1 hour. Prerequisite(s): Qualifications and acceptance as teaching assistant and/or associate-in in chemical engineering. Participation as a teaching assistant or associate-in in a designated engineering course. Methods of leading discussion groups or laboratory sections, writing and grading quizzes, use of laboratory equipment, and grading laboratory reports. May be repeated up to 2 time(s). (S/U grading only.) Effective: 2017 Winter Quarter.

ECH 390—Teaching of Chemical Engineering (1) Review all entries
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Qualifications and acceptance as teaching assistant and/or associate-in in chemical engineering. Participation as a teaching assistant or associate-in in a designated engineering course. Methods of leading discussion groups or laboratory sections, writing and grading quizzes, use of laboratory equipment, and grading laboratory reports. May be repeated for credit. (S/U grading only.) Effective: 2018 Fall Quarter.

The Biochemistry and Molecular Biology Major Program

The Biochemistry and Molecular Biology major introduces students to the chemistry of living organisms and the experimental techniques that are used to probe the structures and functions of biologically important molecules. Students who enjoy both chemistry and biology and who are comfortable with quantitative approaches to problem solving will find this major a rewarding field of study.

The Program. The Biochemistry and Molecular Biology program begins with the four-course, upper division common curriculum that introduces the principles of biochemistry, genetics, and cell biology. Majors then take a comprehensive and rigorous laboratory course to familiarize them with the most important aspects of biochemical research. Additional upper division courses in biochemistry and molecular biology examine detailed aspects of these subjects. Students are also required to take courses in other biological sciences and a full year of physical chemistry.
Career Alternatives. The Biochemistry and Molecular Biology program provides a solid scientific background for students seeking a research, teaching, or service career in the life sciences. Positions are open to biochemists in bio-medical, bio-technological, pharmaceutical, agricultural research and chemical industries. Also, university-affiliated research laboratories, hospital laboratories, and government-sponsored research facilities provide employment opportunities. The major provides excellent preparation for advanced study in graduate or professional schools.

Master Advisor. Davis Wilson

Advising. Biology Academic Success Center (BASC); 1023 Sciences Laboratory Building; 530-752-0410; http://www.biosci.ucdavis.edu/BASC.

**Restricted Electives**

Six units of upper division courses in biological sciences or chemistry relevant to the student's interest chosen in consultation with the advisor. Students are encouraged to obtain additional laboratory experience; however, no more than 3 units of 192, 193 or 199 research may be counted toward restricted elective units.

**Total: 106-125**

### Biochemistry & Molecular Biology; Molecular & Cellular Biology | MCB Courses

**Courses in MCB:**

**MCB 010—Introduction to Human Heredity (4)**
Discussion—1 hour; Lecture—3 hours. Topics in human heredity and human gene structure and function, including the genetic basis of human development, causes of birth defects, mental retardation, genetic diseases, sexual determination, development, and behavior. GE credit: QL, SE, SL. Effective: 2004 Spring Quarter.

**MCB 023—Biography of Cancer: Past, Present and Future (3)**

**MCB 099—Special Study (1-5)**
Independent Study—3-15 hours. Prerequisite(s): Consent of Instructor. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

**MCB 110Y—iBioseminars in Cell and Molecular Biology (3)**
Lecture/Discussion—2 hours; Web Electronic Discussion—1.5 hours; Web Virtual Lecture—1.5 hours. Prerequisite(s): BIS 101; BIS 102; (BIS 103 or BIS 105); BIS 104 Hybrid course in Cell and Molecular Biology for senior level (1) Biochemistry/Molecular Biology; (2) Genetics; or (3) Cell Biology majors. Face-to-face instruction combined with online lectures available at iBioseminars website delivered by leading researchers in Cell and Molecular Biology. Students who have previously taken MCB 110V cannot receive credit for MCB 110Y. GE credit: SE, SL. Effective: 2014 Fall Quarter.
MCB 120—Molecular Biology and Biochemistry Laboratory Associated Lecture (3)
Discussion/Laboratory—1 hour; Lecture—2 hours. Prerequisite(s): BIS 102; or Consent of Instructor. Pass One restricted to upper division Biochemistry & Molecular Biology majors; concurrent enrollment in MCB 120L required; on-time attendance for first lecture is mandatory. Introduction to laboratory methods and procedures employed in studying molecular biology and biochemical processes. Lecture component for MCB 120L. GE credit: SE, SL. Effective: 2018 Winter Quarter.

MCB 120L—Molecular Biology and Biochemistry Laboratory (3)
Laboratory—10 hours. Prerequisite(s): BIS 102; or Consent of Instructor. Must be taken concurrently with MCB 120. Pass One restricted to upper division Biochemistry & Molecular Biology majors; concurrent enrollment in MCB 120 required; on-time attendance for first lab is mandatory. Introduction to laboratory methods and procedures employed in studying molecular biology and biochemical processes. Designed for students who need experience in use of molecular biology and biochemical techniques as research and analytical tools. GE credit: QL, SE, VL, WE. Effective: 2018 Winter Quarter.

MCB 121—Advanced Molecular Biology (3)
Lecture—3 hours. Prerequisite(s): BIS 101; (BIS 102 (can be concurrent) or BIS 105 (can be concurrent) or ABI 102 (can be concurrent)); BIS 102 or BIS 105 or ABI 102 can be concurrent although prior completion is recommended. Structure, expression, and regulation of eukaryotic genes. Chromosome structure and replication; gene structure, transcription, and RNA processing; protein synthesis and translation control; development, immune system, and oncogenes. Not open for credit to students who have completed MCB 161. GE credit: QL, SE, SL. Effective: 2014 Fall Quarter.

MCB 123—Behavior and Analysis of Enzyme and Receptor Systems (3)
Lecture—3 hours. Prerequisite(s): BIS 103 Introduction to the principles of enzyme kinetics and receptor-ligand interactions with emphasis on metabolic regulation and data analysis. Topics include simultaneous equilibria, chemical and steady-state kinetics, allosteric enzymes, multireactant systems, enzyme assays, membrane transport and computer-assisted simulations and analyses. GE credit: QL, SE. Effective: 1997 Winter Quarter.

MCB 124—Macromolecular Structure and Function (4)
Lecture—4 hours. Prerequisite(s): BIS 103; CHE 118C An in-depth investigation into protein and nucleic acid structure and thermodynamics and how these properties influence their biological functions. Key examples of important functional classes of these molecules will be examined. Not open for credit to students who have completed MCB 122 or CHE 108. GE credit: SE. Effective: 2012 Fall Quarter.

MCB 126—Plant Biochemistry (3)
Lecture—3 hours. Prerequisite(s): BIS 103 or BIS 105 The biochemistry of important plant processes and metabolic pathways. Discussion of methods used to understand plant processes, including use of transgenic plants. (Same course as PLB 126.) GE credit: SE, SL. Effective: 2008 Spring Quarter.

MCB 138—Undergraduate Seminar in Biochemistry (1)
Seminar—1 hour. Prerequisite(s): BIS 103 Discussion of the historical developments of modern biochemistry or current major research problems. May be repeated twice for credit when topic differs. May be repeated up to 2 times(s). (P/NP grading only.) GE credit: OL, SE. Effective: 1997 Winter Quarter.

MCB 139—Undergraduate Seminar in Biochemistry (2)
Seminar—2 hours. Prerequisite(s): BIS 103 Discussion of the historical developments of modern biochemistry or current major research problems. May be repeated up to 2 times(s) when topic differs. (P/NP grading only.) GE credit: OL, SE. Effective: 2015 Spring Quarter.

MCB 140—Cell Biology Laboratory Associated Lecture (3)
Discussion/Laboratory—1 hour; Lecture—2 hours. Prerequisite(s): BIS 104; or Consent of Instructor. Pass One restricted to upper division Cell Biology majors; concurrent enrollment in MCB 140L required; on-time attendance for first lecture is mandatory. Lectures illustrating the principles of cell biology with emphasis on light microscopy. Accompanies MCB 140L. GE credit: OL, SE, SL, WE. Effective: 2020 Winter Quarter.

MCB 140L—Cell Biology Laboratory (5)
Discussion—1 hour; Laboratory—6 hours; Lecture—2 hours. Prerequisite(s): BIS 104 (can be concurrent) Exercises illustrating the principles of cell biology with emphasis on light microscopy. GE credit: OL, QL, SE, SL, VL. Effective: 2009 Winter Quarter.

MCB 142—Advanced Cell Biology: Contractile and Motile Systems (4)
Lecture—3 hours; Term Paper. Prerequisite(s): BIS 102; BIS 104 (can be concurrent); MAT 016B Advanced cell
biology with emphasis on molecular, biophysical and cellular properties of contractile and motile systems. GE credit: SE. Effective: 1998 Spring Quarter.

**MCB 143—Cell and Molecular Biophysics (3)**
Lecture—3 hours. Prerequisite(s): BIS 101; BIS 102; BIS 103; BIS 104 Physical chemical principles by which molecules form living, moving, reproducing cells. Physical nature of cytoplasm; molecular structure/bonding in macromolecules, macromolecular assemblies and protein machines. Physical techniques and modeling of cytoskeletal polymer-motor dynamics and function during intracellular transport, mitosis and motility. GE credit: QL, SE. Effective: 2008 Fall Quarter.

**MCB 144—Mechanisms of Cell Division (3)**
Lecture—3 hours. Prerequisite(s): BIS 101; BIS 102; BIS 104 The molecules and mechanisms that allow eukaryotic cells to coordinate cell growth, DNA replication, segregation of chromosomes and cell division. GE credit: SE, WE. Effective: 2002 Winter Quarter.

**MCB 145—Assembly and Function of Cell Signaling Machinery (3)**
Lecture—3 hours. Prerequisite(s): BIS 101; BIS 102; BIS 104 Molecular basis of cell signaling, including positioning of cellular machinery, components of various signaling pathways, and downstream effects of signaling on cell adhesion, cell differentiation, and programmed cell death. GE credit: SE. Effective: 2002 Spring Quarter.

**MCB 148—Undergraduate Seminar in Cell Biology (2)**
Seminar—2 hours. Prerequisite(s): Upper division standing in the biological sciences or a related discipline. Student reports on current topics in cell biology with emphasis on integration of concepts, synthesis, and state-of-the-art research approaches. Reviews of literature and reports of undergraduate research may be included. May be repeated for credit. (P/NP grading only.) GE credit: OL, SE. Effective: 1997 Winter Quarter.

**MCB 150—Developmental Biology (4)**
Lecture—4 hours. Prerequisite(s): BIS 101 Analysis of the mechanistic basis for animal development with a focus on experimental evidence and the relevant fundamental experimental strategies. Fertilization and early development, morphogenesis and patterning, cell differentiation, regulation of cell proliferation and tissue growth. GE credit: SE, SL. Effective: 2012 Fall Quarter.

**MCB 158—Undergraduate Seminar in Developmental Biology (2)**
Seminar—2 hours. Prerequisite(s): Upper division standing in the biological sciences or a related discipline. Student reports on current topics in cell biology with emphasis on integration of concepts, synthesis, and state-of-the-art research approaches. Reviews of literature and reports of undergraduate research may be included. May be repeated for credit. May be repeated for credit. (P/NP grading only.) GE credit: OL, SE. Effective: 1997 Winter Quarter.

**MCB 160—Genetics Laboratory Associated Lecture (3)**
Discussion/Laboratory—1 hour; Lecture—2 hours. Prerequisite(s): BIS 101; or Consent of Instructor. Pass One restricted to upper division Genetics and Genomics majors; concurrent enrollment in MCB 160L required; on-time attendance for first lecture is mandatory. Lecture instruction in the theoretical basis of laboratory techniques in transmission and molecular genetics, discussion of lab results and experiment interpretation. GE credit: QL, SE, WE. Effective: 2019 Spring Quarter.

**MCB 160L—Principles of Genetics Laboratory (5)**
Discussion/Laboratory—1 hour; Laboratory—6 hours; Lecture—2 hours. Prerequisite(s): BIS 101 Laboratory work in basic and molecular genetics including gene mapping, isolation and characterization of mutants in eukaryotic model systems, reverse genetics, gel electrophoresis, recombinant DNA techniques, and PCR. GE credit: QL, SE, VL, WE. Effective: 2012 Fall Quarter.

**MCB 162—Human Genetics and Genomics (3)**
Lecture—3 hours. Prerequisite(s): BIS 101 The human genome and genetic variation in human populations, molecular and genomic approaches in the practice of human genetics, epigenetic gene regulation, personal genetics and genomic medicine. GE credit: QL, SE, SL. Effective: 2016 Fall Quarter.

**MCB 163—Developmental Genetics (3)**
Lecture—3 hours. Prerequisite(s): MCB 121 (can be concurrent) Current aspects of developmental genetics. Historical background and current genetic approaches to the study of development of higher animals. GE credit: SE. Effective: 2017 Fall Quarter.

**MCB 164—Advanced Eukaryotic Genetics (3)**
Lecture—3 hours. Prerequisite(s): MCB 121 Five basic operations of genetic analysis: mutation, segregation,
recombination, complementation, and regulation. Emphasis on the theory and practice of isolating and analyzing mutations, as well as understanding mechanisms underlying both Mendelian and epigenetic inheritance. GE credit: SE, SL. Effective: 2011 Fall Quarter.

**MCB 178—Undergraduate Seminar in Molecular Genetics (1)**
Seminar—1 hour. Prerequisite(s): BIS 101; MCB 121 (can be concurrent); Upper division standing, and completion or concurrent enrollment in MCB 121. Discussion of current topics in molecular genetics to show advanced applications of basic principles and to highlight professional career opportunities. May be repeated up to 1 time(s) when topic differs. (P/NP grading only.) GE credit: OL, SE. Effective: 2011 Fall Quarter.

**MCB 182—Principles of Genomics (3)**
Lecture—3 hours. Prerequisite(s): BIS 101 Fundamentals of genomics, including structural genomics, functional genomics, proteomics, and bioinformatics, focusing on the impact of these disciplines on research in the biological sciences. Social impacts of genomic research. GE credit: SE. Effective: 2017 Winter Quarter.

**MCB 190C—Undergraduate Research Conference (1)**
Discussion—1 hour. Prerequisite(s): MCB 193 (can be concurrent) or MCB 199 (can be concurrent); and Consent of Instructor. Upper division standing; MCB 193 or MCB 199 required concurrently. Presentation and discussion of current research by faculty and students. May be repeated for credit. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

**MCB 191—Introduction to Research (1)**
Seminar—1 hour. Prerequisite(s): BIS 102 (can be concurrent); or Consent of Instructor. Various topics in molecular and cellular biology including biochemistry, genetics, and cell biology will be discussed, along with ways undergraduates can participate in research projects of faculty members. May be repeated for credit. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

**MCB 192—Internship (1-12)**
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Completion of 84 units. Technical and/or practical experience on and off campus, supervised by a member of the Section of Molecular and Cellular Biology faculty. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

**MCB 193—Advanced Research (3)**
Discussion—1 hour; Laboratory—6 hours. Prerequisite(s): Consent of Instructor. Upper division standing, completion of an upper division Molecular and Cellular Biology laboratory course. Research project carried out under the supervision of a faculty sponsor. Discussion and analysis of results and proposed experiments on a weekly basis with faculty sponsor. May include presentation of a seminar to a research group. May be repeated for credit. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

**MCB 194—Thesis Research (3)**
Independent Study—9 hours. Prerequisite(s): Consent of Instructor. 6 units of course 193 and/or 199 with faculty director; senior standing. Continuation of an intensive, individual laboratory research project in biochemistry, genetics, or cell biology culminating with the presentation of the work in a written thesis and in a seminar. (P/NP grading only.) GE credit: OL, SE, WE. Effective: 2015 Fall Quarter.

**MCB 194H—Research Honors (3)**
Independent Study—9 hours. Prerequisite(s): Consent of Instructor. 6 units of MCB 193 and/or MCB 199 with faculty director; senior standing; GPA of at least 3.250. Honors project. Continuation of an intensive, individual laboratory research project in biochemistry, genetics, or cell biology culminating with the presentation of the work in a written thesis and in a seminar. (P/NP grading only.) GE credit: OL, SE, WE. Effective: 1997 Winter Quarter.

**MCB 197T—Tutoring in Molecular and Cellular Biology (1-5)**
Tutorial—2-6 hours. Prerequisite(s): Consent of Instructor. Upper division standing, completion of course to be tutored. Assisting the instructor in one of the section's regular courses by tutoring individual or small groups of students in a laboratory, in voluntary discussion groups, or other voluntary course activities. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 2004 Fall Quarter.

**MCB 198—Directed Group Study (1-5)**
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

**MCB 199—Special Study for Advanced Undergraduates (1-5)**
Independent Study—3-15 hours. Prerequisite(s): Consent of Instructor. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.
MCB 248—Seminar in Cell Biology (2)
Seminar—2 hours. Prerequisite(s): Consent of Instructor. Discussion of recent literature on the physical and chemical aspects of organization and function of living systems, topics of current interest in ultrastructure and function of cells. Organizational and functional properties of the molecular and cellular levels of biological systems. May be repeated for credit. Effective: 1997 Winter Quarter.

MCB 258—Seminar in Development (2)
Seminar—2 hours. Prerequisite(s): Consent of Instructor. Reports and discussion on embryology, morphogenesis, and developmental mechanisms. May be repeated for credit. May be repeated for credit. Effective: 1997 Winter Quarter.

MCB 259—Literature in Developmental Biology (1)
Seminar—1 hour. Prerequisite(s): Consent of Instructor. Critical presentation and analysis of recent journal articles in developmental biology. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

MCB 282—Biotechnology Internship (7-12)
Internship—21-36 hours. Prerequisite(s): Consent of Instructor. Graduate standing. Open only to students participating in the Designated Emphasis in Biotechnology program. Research at a biotechnology company or interdisciplinary cross-college lab for a minimum of 3 months as part of the Designated Emphasis in Biotechnology Program. (S/U grading only.) Effective: 2004 Winter Quarter.

MCB 290C—Research Conference (1)
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Graduate standing. Presentations and critical discussions of faculty and graduate student research in molecular and cellular biology including biochemistry, genetics, and cell biology. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

MCB 291—Current Progress in Molecular and Cellular Biology (1)
Seminar—1 hour. Prerequisite(s): Graduate standing or consent of instructor. Seminars presented by guest lecturers on subject of their own research activities. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

MCB 295—Literature in Molecular and Cellular Biology (1)
Seminar—1 hour. Prerequisite(s): Consent of Instructor. Graduate standing. Critical reading and evaluation of current literature in molecular and cellular biology disciplines. Papers will be presented and discussed in detail. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

MCB 298—Group Study (1-5)
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

MCB 299—Research (1-12)
Independent Study—3-36 hours. (S/U grading only.) Effective: 1997 Winter Quarter.

MCB 390—Methods of Teaching (1)
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Graduate standing. Practical experience in the methods and problems of teaching biochemistry/genetics/cell biology. Includes analysis of texts and supporting material, discussion of teaching techniques, preparing for and conducting discussion and laboratory sections, formulating examinations under supervision of instructor. Participating in the teaching program required for Ph.D. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

Biochemistry, Molecular, Cellular & Developmental Biology (Graduate Group)

Biochemistry, Molecular, Cellular & Developmental Biology (Graduate Group) | BMC&D (Graduate Group) Information

Bruce Draper, Ph.D., Chairperson of the Group; 530-752-0833

Group Office. 227B Life Sciences; 530-752-9091; http://bmcdb.ucdavis.edu/

Biology M.S.

Bruce Draper, Ph.D., Chairperson of the Group; 530-752-0833

Group Office. 227B Life Sciences; 530-752-9091; http://bmcdb.ucdavis.edu/

Faculty. http://bmcdb.ucdavis.edu/faculty/

Graduate Study. The Graduate Group in Biochemistry, Molecular, Cellular, and Developmental Biology offers programs of study and research leading to the M.S. and Ph.D. degrees. While an M.S. may be obtained while pursuing a Ph.D., only Ph.D. applications will be accepted. Biochemistry, Molecular, Cellular, and Developmental Biology is a broad interdepartmental program.

Master's degree offered only en route to Ph.D.

Preparation. Appropriate preparation is an undergraduate degree in a biological or physical science. Preparation should include a year of calculus, physics, general chemistry and organic chemistry, and courses in statistics, biochemistry, genetics and cell biology.

Graduate Advisors. F. McNally (Molecular and Cellular Biology), E. Diaz (Pharmacology), R. Tucker (Med: Cell Biology), R. Fairclough (Neurology), T. Powers (Molecular and Cellular Biology), L. Rose (Molecular and Cellular Biology), J. Engebrecht (Molecular and Cellular Biology), C. Fraser (Molecular and Cellular Biology), E. Baldwin (Molecular and Cellular Biology), P. Knoepfler (Med: Cell Biology), K. Carraway (Med: Biochem and Molecular Medicine), K. Zito (Center for Neuroscience), D. Genetos (Vet. Anatomy & Cell Biology), M. Singer (Microbiology and Molecular Genetics), B. Draper (Molecular and Cellular Biology)

Biological & Agricultural Engineering; Agricultural & Environmental Sciences, Engineering

Biological & Agricultural Engineering; Agricultural & Environmental Sciences, Engineering l Biological & Agricultural Engineering Information

(College of Agricultural and Environmental Sciences and College of Engineering)

Bryan M. Jenkins, Ph.D., Chair of the Department
The Biological Sciences Major

Departments of Evolution and Ecology; Microbiology and Molecular Genetics; Molecular and Cellular Biology; Neurobiology, Physiology, and Behavior; and Plant Biology

The Program. The Biological Sciences major is broad in concept, spanning the numerous core disciplines of biology. The Bachelor of Science (B.S.) and Bachelor of Arts (A.B.) programs includes preparatory work in mathematics, general and organic chemistry, physics, and introductory level biology, as well as upper division core classes emphasizing the breadth of biological sciences. Students in the B.S. degree program complete additional upper division biology coursework, for which they can choose classes from a variety of different areas such as molecular biology and genetics, animal behavior, plant growth and development, bioinformatics, marine biology, forensics, and microbiology. Students in the Bachelor of Arts (A.B.) program can pursue upper division coursework outside of the biological sciences. Research and internships are encouraged in both programs.

Career Alternatives. Both degree programs prepare students for admission to graduate schools or professional schools, leading to either a variety of professional health careers or further study in basic and applied areas of biology. They provide suitable preparation for careers in teaching, biological and biotechnological research with various governmental agencies or private companies, government regulatory agencies, environmental consulting, biological illustration and writing, pharmaceutical sales, biological/environmental law, and biomedical engineering.
**Advisors and Advising.** Information on the Biological Sciences major or minor can be obtained at the Biology Academic Success Center (BASC) in 1023 Sciences Laboratory Building; 530-752-0410; [http://basc.ucdavis.edu/](http://basc.ucdavis.edu/).

**Citation for Outstanding Performance.** The College of Biological Sciences confers Citations for Outstanding Performance on undergraduates majoring in Biological Sciences who have demonstrated superior academic performance and individual achievement in research. Students who wish to be considered for a citation must first meet or exceed a specified grade point average and participate in an appropriate research project.

**Teaching Credential Subject Representative.** Associate Director of Teacher Education (School of Education); see the [Teaching Credential/M.A. Program](http://teachingcredential.ucdavis.edu/).

Biological Sciences | BIS B.S.
(College of Biological Sciences)

Biology Academic Success Center (BASC). 1023 Sciences Laboratory Building; 530-752-0410; http://biosci.ucdavis.edu; http://basc.ucdavis.edu/

Faculty. https://biology.ucdavis.edu/faculty

The Biological Sciences Major

Departments of Evolution and Ecology; Microbiology and Molecular Genetics; Molecular and Cellular Biology; Neurobiology, Physiology, and Behavior; and Plant Biology

The Program. The Biological Sciences major is broad in concept, spanning the numerous core disciplines of biology. The Bachelor of Science (B.S.) and Bachelor of Arts (A.B.) programs includes preparatory work in mathematics, general and organic chemistry, physics, and introductory level biology, as well as upper division core classes emphasizing the breadth of biological sciences. Students in the B.S. degree program complete additional upper division biology coursework, for which they can choose classes from a variety of different areas such as molecular biology and genetics, animal behavior, plant growth and development, bioinformatics, marine biology, forensics, and microbiology. Students in the Bachelor of Arts (A.B.) program can pursue upper division coursework outside of the biological sciences. Research and internships are encouraged in both programs.

Career Alternatives. Both degree programs prepare students for admission to graduate schools or professional schools, leading to either a variety of professional health careers or further study in basic and applied areas of biology. They provide suitable preparation for careers in teaching, biological and biotechnological research with various governmental agencies or private companies, government regulatory agencies, environmental consulting, biological illustration and writing, pharmaceutical sales, biological/environmental law, and biomedical engineering.

Advisors and Advising. Information on the Biological Sciences major or minor can be obtained at the Biology Academic Success Center (BASC) in 1023 Sciences Laboratory Building; 530-752-0410; http://basc.ucdavis.edu/.

Citation for Outstanding Performance. The College of Biological Sciences confers Citations for Outstanding Performance on undergraduates majoring in Biological Sciences who have demonstrated superior academic performance and individual achievement in research. Students who wish to be considered for a citation must first meet or exceed a specified grade point average and participate in an appropriate research project.

**Section 1: Common Curriculum**

**Section 2: Depth Subject Topics**

- STA 100  | Applied Statistics for Biological Sciences                           | 4     |
- EVE 100  | Introduction to Evolution                                           | 4     |

**Choose one course from each topic:**

- **Evolution:**
  - EVE 101  | Introduction to Ecology                                             | 4     |

**Teaching Credential Subject Representative:** Associate Director of Teacher Education (School of Education); see the Teaching Credential/M.A. Program.

**Bodega Marine Laboratory Program:** Students interested in Marine Biology should visit Marine and Coastal Science Major and http://bml.ucdavis.edu/.
ESP 100 General Ecology 4

Microbiology: 3-4
- MIC 102 Introductory Microbiology 3
- MIC 162 General Virology 4
- MIC 170 Yeast Molecular Genetics 3
- FST 104 Food Microbiology 3

Plant Physiology or Development: 3-5
- PLB 105 Developmental Plant Anatomy 5
- PLB 111 Plant Physiology 3
- PLB 112 Plant Growth and Development 3
- PLB 113 Molecular and Cellular Biology of Plants 3
- PLB 116 Plant Morphology and Evolution 5
- PLB 126 Plant Biochemistry 3

Animal Physiology, Behavior or Development: 3-5
- NPB 100 Neurobiology 4
- NPB 101 Systemic Physiology 5
- NPB 102 Animal Behavior 3
- NPB 141 Physiological Adaptation of Marine Organisms 3
- MCB 150 Developmental Biology 4

Section 3: Laboratory Requirement

Course(s) selected to fulfill the laboratory requirement may also satisfy restricted elective or depth subject matter units (but not both).

Choose course(s) for a minimum total of six hours/week of laboratory or field work from the list of courses below:

Choose two with three hours lab or field work/week:
- EVE 110 Running, Swimming and Flying 3
- EVE 117 Plant Ecology 4
- EVE 119 Population Biology of Invasive Plants and Weeds 3
- EVE 140 Paleobotany 4
- EVE 180A Experimental Ecology and Evolution in the Field 4
- EVE 180B Experimental Ecology and Evolution in the Field 4
- EXB 104L Exercise Biology Laboratory 3
- EXB 115 Biomechanical Bases of Movement 3
- MIC 103L Introductory Microbiology Laboratory 2
- NPB 100L Neurobiology Laboratory 3
- NPB 101L Systemic Physiology Laboratory 3
- NPB 121L Physiology of Reproduction Laboratory 1
- NPB 123 Comparative Vertebrate Organology 4
- PLB 119 Population Biology of Invasive Plants and Weeds 3

Other courses with approval of the Master Advisor.

Choose one course with six hours lab or field work/week:
- BIS 180L Genomics Laboratory 5
- EVE 105 Phylogenetic Analysis of Vertebrate Structure 4
- EVE 106 Mechanical Design in Organisms 3
- EVE 108 Systematics and Evolution of Angiosperms 5
- EVE 112L Biology of Invertebrates Laboratory 2
- EVE 114 Experimental Invertebrate Biology 3
- EXB 106L Human Gross Anatomy Laboratory 3
- FST 104L Food Microbiology Laboratory 4
- MIC 104L General Microbiology Laboratory 3
- MIC 105L Microbial Diversity Laboratory 3
- MCB 120L Molecular Biology and Biochemistry Laboratory 3
- MCB 140L Cell Biology Laboratory 5
- MCB 160L Principles of Genetics Laboratory 5
- NPB 111L Advanced Systemic Physiology Laboratory 4
### Section 4: Restricted Electives

Choose at least three or more courses for a minimum of 11 units from the list of Approved Upper Division Restrictive Electives and/or laboratory courses. No class or laboratory used to satisfy a section 1 or a section 2 course requirement may be used as a restricted elective.

Students may choose any combination of approved courses that align with their academic or career objectives, or choose courses from a list of sample themes available on the BASC website at http://basc.ucdavis.edu. Up to three of the 11 units may be fulfilled by approved seminar or research courses.

**Approved Upper Division Restricted Electives:**

**Biological Sciences | BIS Minor**

*(College of Biological Sciences)*

**Biology Academic Success Center (BASC),** 1023 Sciences Laboratory Building; 530-752-0410; http://biosci.ucdavis.edu; http://basc.ucdavis.edu/

**Faculty.** https://biology.ucdavis.edu/faculty

Departments of Evolution and Ecology; Microbiology and Molecular Genetics; Molecular and Cellular Biology; Neurobiology, Physiology, and Behavior; and Plant Biology

**The Program.** The Biological Sciences minor provides an opportunity for students in programs outside of the College of Biological Sciences to complement their studies with a concentration in biology. Students in the minor experience the breadth of biology by taking courses in five core areas: molecular biology/biochemistry, animal biology, plant biology, microbiology, and ecology/evolution.

**Advisors and Advising.** Information on the Biological Sciences major or minor can be obtained at the Biology Academic Success Center (BASC) in 1023 Sciences Laboratory Building; 530-752-0410; http://basc.ucdavis.edu/.

**Biological Sciences**  
*Units: 18*

Complete at least three units from each of the five numbered groups to total at least 18 units. Appropriate alternative courses may be used with approval of an advisor.

(1) **Cell and Molecular Biology:**
- BIS 101 Genes and Gene Expression  
- BIS 102 Structure and Function of Biomolecules  
- BIS 105 Biomolecules and Metabolism  

(2) **Animal Biology:**
- ANT 151 Primate Evolution  
- APC 100 Comparative Vertebrate Organology  
- OR  
- NPB 123 Comparative Vertebrate Organology  
- ENT 100 General Entomology  
- EVE 105 Phylogenetic Analysis of Vertebrate Structure  
- EVE 112 Biology of Invertebrates  
- AND  
- EVE 112L Biology of Invertebrates Laboratory  
- NEM 100 General Plant Nematology  
- NEM 110 Introduction to Nematology  
- NPB 100 Neurobiology  

Total: 98-117
NPB 101  Systemic Physiology 5
NPB 102  Animal Behavior 3
NPB 117  Avian Physiology 3
WFC 110  Biology and Conservation of Wild Mammals 3
WFC 111  Biology and Conservation of Wild Birds 3
WFC 120  Biology and Conservation of Fishes 3

(3) **Microbiology:**
- MIC 101  Introductory Microbiology 5
- MIC 102  Introductory Microbiology 3
- MIC 162  General Virology 4
- PMI 128  Biology of Animal Viruses 3
- PLB 148  Introductory Mycology 4
- OR
  - PLP 148  Introductory Mycology 4

(4) **Plant Biology:**
- PLS 144  Trees and Forests 4
- PLB 105  Developmental Plant Anatomy 5
- PLB 111  Plant Physiology 3
- PLB 112  Plant Growth and Development 3
- PLB 116  Plant Morphology and Evolution 5
- PLB 126  Plant Biochemistry 3
- PLB 148  Introductory Mycology 4
- OR
  - PLP 148  Introductory Mycology 4
- PLS 141  Ethnobotany 4
- PLS 171  Principles and Practices of Plant Propagation 4

(5) **Evolution and Ecology:**
- ANT 151  Primate Evolution 4
- ANT 152  Human Evolution 5
- ANT154  (Nonexistent)
- ENT 100  General Entomology 4
- EVE 100  Introduction to Evolution 4
- EVE 101  Introduction to Ecology 4
- EVE 108  Systematics and Evolution of Angiosperms 5
- EVE 115  Marine Ecology 4
- EVE 117  Plant Ecology 4
- EVE 119  Population Biology of Invasive Plants and Weeds 3
- EVE 138  Ecology of Tropical Latitudes 5
- EVE 140  Paleobotany 4
- EVE 147  Biogeography 4
- PLB 102  California Floristics 5
- PLB 108  Systematics and Evolution of Angiosperms 5
- PLB 117  Plant Ecology 4
- PLB 119  Population Biology of Invasive Plants and Weeds 3
- PLB 143  Evolution of Crop Plants 4
- PLP 150  Fungal Ecology 3
- WFC 151  Wildlife Ecology 4

Additional courses (if necessary) from above numbered groups to reach 18 units.

**Total: 18**

**Biological Sciences | BIS Courses**

**Courses in BIS:**

**BIS 002A—Introduction to Biology: Essentials of Life on Earth (5)**
Discussion—2 hours; Lecture—3 hours. Essentials of life including sources and use of energy, information storage, responsiveness to natural selection and cellularity. Origin of life and influence of living things on the chemistry of
the Earth. Not open for credit to students who have completed BIS 001A with a grade of C- or better. GE credit: SE. Effective: 2013 Winter Quarter.

**BIS 002B—Introduction to Biology: Principles of Ecology and Evolution (5)**
Discussion—1 hour; Laboratory—3 hours; Lecture—3 hours. Introduction to basic principles of ecology and evolutionary biology, focusing on the fundamental mechanisms that generate and maintain biological diversity across scales ranging from molecules and genes to global processes and patterns. Not open for credit to students who have completed BIS 001B with a grade of C- or better. GE credit: SE. Effective: 2017 Fall Quarter.

**BIS 002C—Introduction to Biology: Biodiversity and the Tree of Life (5)**
Laboratory—3 hours; Lecture—4 hours. Prerequisite(s): BIS 001B C- or better or BIS 002B C- or better. Introduction to organismal diversity, using the phylogenetic tree of life as an organizing theme. Lectures and laboratories cover methods of phylogenetic reconstruction, current knowledge of the tree of life, and the evolution of life’s most important and interesting innovations. Not open for credit to students who have completed BIS 001C with a grade of C- or better. GE credit: QL, SE, SL, VL. Effective: 2010 Fall Quarter.

**BIS 005—Exploring Biological Sciences (1)**
Seminar—1 hour. Prerequisite(s): Consent of Instructor. Enrollment limited to first year CBS students. Introduction to biology at UC Davis through discussions with faculty and speakers from industry and medicine. (P/NP grading only.) Effective: 2015 Fall Quarter.

**BIS 010—Everyday Biology (4)**
Discussion—1 hour; Lecture—3 hours. Everyday biological concepts using contemporary readings for non-scientists. Key topics include: personal genomics; food and health; climate and evolution; brain biology and the law. Innovative projects apply biological concepts to current events. For students not specializing in biology. Not open for credit to students who have completed BIS 002A, or 002B, or 002C, or 010V or NEM 010V or equivalent. GE credit: SE, SL, WE. Effective: 2016 Winter Quarter.

**BIS 011—Issues in the Life Sciences (2)**
Discussion—1 hour; Lecture—1 hour. Prerequisite(s): Consent of Instructor. Enrollment limited to BUSP students. The range of subjects and approaches in the field of biology, including both basic and applied research topics. Effective: 2002 Fall Quarter.

**BIS 011L—Basic Life Sciences Laboratory (1)**
Laboratory—3 hours. Prerequisite(s): Consent of Instructor. Limited to Biology Undergraduate Scholars Program (BUSP) students. Basic laboratory skills in life sciences research, including microbiology, molecular biology, and genetics. Effective: 2018 Winter Quarter.

**BIS 020Q—Modeling in Biology (2)**
Discussion—1 hour; Lecture—1 hour. Prerequisite(s): MAT 016B (can be concurrent) Introduction to the application of quantitative methods to biological problems. Students will use a mathematical software package to tackle problems drawn from all aspects of biology. Effective: 2005 Spring Quarter.

**BIS 020Q—Modeling in Biology (2)**
Discussion—1 hour; Lecture—1 hour. Prerequisite(s): MAT 016B C- or better (can be concurrent) or MAT 017B C- or better (can be concurrent) or MAT 021B C- or better (can be concurrent) or MAT 021BH C- or better (can be concurrent) Introduction to the application of quantitative methods to biological problems. Use a mathematical software package to tackle problems drawn from all aspects of biology. Effective: 2020 Winter Quarter.

**BIS 023A—Genome Hunters (3)**
Extensive Problem Solving; Laboratory—3 hours; Lecture—1 hour. Prerequisite(s): MAT 017A (can be concurrent) or MAT 021A (can be concurrent) Hands-on, project-based introduction to genome-centric biology with specific focus on quantitative elements of associated experimental approaches. Measurement error and error estimation, experimental design, data analysis, model generation and fitting, and model-guided hypothesis generation and testing. Course content covered through quarter-long interactive experiment to isolate an organism, quantitatively characterize its behavior, and sequence its genome. GE credit: SE. Effective: 2018 Fall Quarter.

**BIS 023B—Genome Hunters (3)**
Extensive Problem Solving; Laboratory—3 hours; Lecture—1 hour. Prerequisite(s): BIS 023A; (MAT 017C (can be concurrent) or MAT 021C (can be concurrent)) Hands-on, project-based introduction to modern computational and bioinformatics analyses using genome sequence data generated in course 023A. Genome sequence assembly and alignment, genome annotation, and genetic correlates of behavior. Additional topics may include scientific and
societal implications of the availability and usage of genome information and genome manipulation, and real-life applications of genome analysis. GE credit: SE. Effective: 2019 Spring Quarter.

**BIS 027A—Linear Algebra with Applications to Biology (4)**
Laboratory—2 hours; Lecture—3 hours. Prerequisite(s): MAT 017C C- or better or MAT 021C C- or better or MAT 021CH C- or better Introduction to linear algebra with biological, medical, and bioengineering applications. Matrix algebra, vector spaces, orthogonality, determinants, eigenvalues, eigenvectors, principal component analysis, singular value decomposition, and linear transformations. Computer labs cover mathematical and computational techniques for modeling biological systems. Only one unit of credit for students who have completed MAT 022A. (Same course as MAT 027A.) GE credit: SE. Effective: 2019 Spring Quarter.

**BIS 027B—Differential Equations with Applications to Biology (4)**
Laboratory—2 hours; Lecture—3 hours. Prerequisite(s): BIS 027A C- or better or (MAT 022A C- or better, (MAT 022AL C- or better or ENG 006 C- or better or EME 005 C- or better)) Solutions of differential equations with biological, medical, and bioengineering applications. First and second order linear equations, phase plane analysis, nonlinear dynamics, Laplace transforms, and the diffusion equation. Computer labs cover mathematical and numerical techniques for modeling biological systems. Only one unit of credit for students who have completed MAT 022B. (Same course as MAT 027B.) GE credit: SE. Effective: 2019 Spring Quarter.

**BIS 092—Internship in Biological Sciences (1-12)**
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Lower division standing. Restricted to lower division standing. (P/NP grading only.) Effective: 1997 Winter Quarter.

**BIS 098—Directed Group Study (1-5)**
Variable. Prerequisite(s): Consent of Instructor. Primarily for lower division students (P/NP grading only.) Effective: 1997 Winter Quarter.

**BIS 099—Special Study for Undergraduates (1-5)**
Independent Study—3-15 hours. Prerequisite(s): Consent of Instructor. Lower division standing. Restricted to lower division standing. (P/NP grading only.) Effective: 1997 Winter Quarter.

**BIS 101—Genes and Gene Expression (4)**
Lecture—4 hours. Prerequisite(s): (BIS 002A C- or better, BIS 002B C- or better); (CHE 008A or CHE 118A or CHE 128A); ((STA 013 or STA 013Y) or STA 100 or STA 102 or STA 130A); STA 100 preferred. Nucleic acid structure and function; gene expression and its regulation; replication; transcription and translation; transmission genetics; molecular evolution. GE credit: QL, SE, SL. Effective: 2018 Winter Quarter.

**BIS 101D—Genes and Gene Expression Discussion (1)**
Discussion—1 hour. Prerequisite(s): BIS 101 (can be concurrent); and Consent of Instructor. Discussion and problem solving related to fundamental principles of classical and molecular genetics as presented in course 101. (P/NP grading only.) Effective: 2000 Fall Quarter.

**BIS 102—Structure and Function of Biomolecules (3)**
Lecture—3 hours. Prerequisite(s): (BIS 001A or BIS 002A); (CHE 008B or CHE 118B or CHE 128B) Structure and function of macromolecules with emphasis on proteins, catalysis, enzyme kinetics, lipids, membranes, and proteins as machines. Only one unit of credit for students who have completed ABI 102 & 1.5 units of credit for students who have completed BIS 105. GE credit: QL, SE. Effective: 2014 Winter Quarter.

**BIS 102Q—Quantitative Biomolecule Concepts (1)**
Auto Tutorial; Extensive Problem Solving—1 hour. Prerequisite(s): BIS 102 (can be concurrent) Study of the quantitative concepts and mathematical models fundamental to biochemistry. GE credit: QL, SE. Effective: 2008 Spring Quarter.

**BIS 103—Bioenergetics and Metabolism (3)**
Lecture—3 hours. Prerequisite(s): BIS 102 Fundamentals of the carbon, nitrogen, and sulfur cycles in nature, including key reactions of biomolecules such as carbohydrates, amino acids, lipids, and nucleotides, and of energy production and use in different types of organisms. Principles of metabolic regulation. 1.5 units of credit for students who have completed BIS 105; 1 unit of credit if students who have completed ABI 103. GE credit: SE. Effective: 2013 Winter Quarter.

**BIS 104—Cell Biology (3)**
Lecture—3 hours. Prerequisite(s): BIS 101; (BIS 102 or BIS 105) Membrane receptors and signal transduction; cell trafficking; cell cycle; cell growth and division; extracellular matrix and cell-cell junctions; cell development; immune system. GE credit: SE. Effective: 2011 Spring Quarter.
BIS 105—Biomolecules and Metabolism (3)
Lecture—3 hours. Prerequisite(s): ((BIS 001A, BIS 001B, BIS 001C) or (BIS 002A, BIS 002B, BIS 002C); (CHE 008B or CHE 118B or CHE 128B) Fundamentals of biochemical processes, with emphasis on protein structure and activity; energy metabolism; catabolism of sugars, amino acids, and lipids; and gluconeogenesis. 1.5 units of credit for students who have completed BIS 102 or BIS 103; no credit for students who have completed both BIS 102 and BIS 103; 1 unit of credit for students who have completed ABI 102 or ABI 103; no credit for students who have completed both ABI 102 and ABI 103. GE credit: QL, SE. Effective: 2014 Fall Quarter.

BIS 107—Probability and Stochastic Processes with Applications to Biology (4)
Laboratory—2 hours; Lecture—3 hours. Prerequisite(s): (BIS 027A C- or better or MAT 027A C- or better) or (MAT 022A C- or better, (MAT 022AL C- or better or ENG 006 C- or better or EME 005 C- or better)) Introduction to probability theory and stochastic processes with biological, medical, and bioengineering applications. Combinatorics, discrete and continuous random variables, Bayes’ formula, conditional probability, Markov chains, Poisson processes, and Brownian motion. Computer labs cover mathematical and computational modeling techniques. Only 2 units of credit for students who have completed MAT 135A or STA 131A. (Same course as MAT 107.) GE credit: SE. Effective: 2019 Spring Quarter.

BIS 122—Population Biology and Ecology (3)
Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): (BIS 001A, BIS 001B, BIS 001C) or (BIS 002A, BIS 002B, BIS 002C); Residence at Bodega Marine Laboratory required. Biological and physical processes affecting plant and animal populations in the rich array of habitats at the Bodega Marine Laboratory ecological preserve. Emphasis on field experience, with complementing lectures to address population and community processes. (See Bodega Marine Laboratory Program) GE credit: OL, QL, SE, SL, VL, WE. Effective: 2008 Spring Quarter.

BIS 122P—Population Biology and Ecology/Advanced Laboratory Topics (5)
Discussion—1 hour; Laboratory—12 hours. Prerequisite(s): BIS 122 (can be concurrent) Residence at Bodega Marine Laboratory required. Training in scientific research, from hypothesis testing to publication, including methods of library research. Research will be related to a topic covered in course 122. Final presentation both oral and written. See Bodega Marine Laboratory Program. GE credit: OL, QL, SE, VL, WE. Effective: 2000 Spring Quarter.

BIS 123—Undergraduate Colloquium in Marine Science (1)
Seminar—1 hour. Prerequisite(s): Enrolled student at the Bodega Marine Laboratory. Series of weekly seminars by recognized authorities in various disciplines of marine science from within and outside the UC system. Includes informal discussion with speaker. Course will be held at Bodega Marine Laboratory. (See above description for Bodega Marine Laboratory Program.) (P/NP grading only.) Effective: 1997 Winter Quarter.

BIS 124—Coastal Marine Research (3) Review all entries
Discussion/Laboratory—1 hour; Fieldwork—6 hours; Laboratory—6 hours. Prerequisite(s): (ESP 124 (can be concurrent), ESP 152 (can be concurrent), EVE 106 (can be concurrent), EVE 110 (can be concurrent), EVE 114 (can be concurrent)); Concurrent enrollment in at least one of the above listed courses; upper division standing or consent of instructor; residence at or near Bodega Marine Lab required. Student must complete the application at http://www.bml.ucdavis.edu. Independent research on topics related to the accompanying core Bodega Marine Laboratory summer courses. Students will select one instructor to be primary mentor, but integrative topics that draw on the expertise of several BML faculty members will be encouraged. May be repeated up to 2 time(s). GE credit: OL, QL, SL, VL, WE. Effective: 2006 Summer Session 1.

BIS 124—Coastal Marine Research (6) Review all entries
Discussion/Laboratory—2 hours; Fieldwork—12 hours; Laboratory—12 hours. Prerequisite(s): (EVE 114 (can be concurrent) or EVE 106 (can be concurrent) or ESP 152 (can be concurrent) or ESP 124 (can be concurrent)); Concurrent enrollment in one of the above listed courses required; upper division standing or consent of instructor. Student must complete the application at http://www.bml.ucdavis.edu. Independent research on topics related to an accompanying core Bodega Marine Laboratory summer course. Students will receive training in generating hypotheses, designing experiments, collecting and analyzing data, and scientific communication. May be repeated up to 2 time(s). GE credit: OL, QL, SE, VL, WE. Effective: 2018 Summer Session 1.

BIS 132—Introduction to Dynamic Models in Modern Biology (4)
Laboratory—2 hours; Lecture—3 hours. Prerequisite(s): MAT 016C; (STA 013 or STA 013Y); Or equivalents and one lower division course in biology or equivalent. Dynamic modeling in the biological sciences, including matrix models, difference equations, differential equations, and complex dynamics. Examples include classic models in ecology, cell biology, physiology, and neuroscience. Emphasis on understanding models, their assumptions, and implications for modern biology. GE credit: QL, SE, SL, VL, WE. Effective: 2018 Spring Quarter.
BIS 133—Collaborative Studies in Mathematical Biology (3)
Lecture/Discussion—3 hours. Prerequisite(s): MAT 016A; MAT 016B; MAT 016C; (BIS 001A or BIS 001B or BIS 001C or BIS 002A or BIS 002B or BIS 002C or BIS 010); and Consent of Instructor. Or equivalents. Interdisciplinary research and training that uses mathematics and computation to solve current problems in biology. May be repeated up to 6 time(s). GE credit: QL, SE, SL, VL, WE. Effective: 2008 Fall Quarter.

BIS 134—Systems Biology: From Biological Circuits to Biological Systems (2)
Lecture/Discussion—2 hours; Term Paper. Prerequisite(s): BIS 101; (MCB 121 or MCB 161 or PLB 113); (MAT 016A, MAT 016B, MAT 016C) or (MAT 017A, MAT 017B, MAT 017C); or Consent of Instructor. Applying systems theory to understand the properties of biological networks in a variety of model organisms. Emphasis on both local biological circuits, and genome-scale biological networks. Topics include network motifs, robustness, modeling, emergent properties and integration of networks. GE credit: OL, QL, SE, VL. Effective: 2011 Winter Quarter.

BIS 180L—Genomics Laboratory (5)
Discussion—1 hour; Laboratory—6 hours; Lecture—2 hours. Prerequisite(s): BIS 181; BIS 183 (can be concurrent); MCB 182 Computational approaches to model and analyze biological information about genomes, transcriptomes, and proteomes. Topics include genome assembly and annotation, mRNA and small RNA profiling, proteomics, protein-DNA and protein-protein interactions, network analysis, and comparative genomics. Computer programming experience not required. Students who have received credit for taking ECS 124 or BIT 150 will receive 3 units for completing course 180L. GE credit: QL, SE, VL. Effective: 2013 Spring Quarter.

BIS 181—Comparative Genomics (3)
Lecture—3 hours. Comparison of genomes at the population and species level. Genomic techniques for mapping disease (and other) genes, reconstruction of evolutionary history and migration patterns, determination of gene function, prediction of organismal traits, and metagenomics: determination of community composition and function. GE credit: QL, SE, SL. Effective: 2012 Fall Quarter.

BIS 183—Functional Genomics (3)
Lecture—3 hours. Prerequisite(s): BIS 101 C- or better; or Consent of Instructor. Overview of genomic methodologies and key biological findings obtained using genome-wide analyses. RNA profiling, small RNAs, epigenomics, chromatin immunoprecipitation, protein-DNA interactions, proteomics and network analysis. GE credit: QL, SE, VL. Effective: 2012 Spring Quarter.
limited to 24 students. Basic teaching techniques including lesson planning, classroom management, and presentation skills. Interns spend time in K-12 science classrooms working with a master teacher observing, assisting with labs and activities, managing students, and teaching lessons. (P/NP grading only.) Effective: 2002 Spring Quarter.

**BIS 195B—Science Teaching Internship (1-5)**
Internship—1-5 hours. Prerequisite(s): BIS 195A Reinforcement of teaching techniques learned in 195A with additional classroom experience in K-12 science classrooms working with a master teacher observing, assisting with labs and activities, managing students and teaching lessons. May be repeated up to 1 time(s) with consent of instructor. (P/NP grading only.) Effective: 2002 Spring Quarter.

**BIS 197T—Tutoring in Biological Sciences (1-5)**
Discussion—2-6 hours. Prerequisite(s): Consent of Instructor. Upper division standing. Assisting the instructor by tutoring students in one of the Biological Sciences' regular courses. May be repeated for credit. (P/NP grading only.) Effective: 2004 Spring Quarter.

**BIS 198—Directed Group Study (1-5)**
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

**BIS 199—Special Study in Biological Sciences (1-5)**
Independent Study—3-15 hours. Prerequisite(s): Consent of Instructor. Upper division standing. (P/NP grading only.) Effective: 1997 Winter Quarter.

**BIS 298—Group Study (1-5)**
Variable. Prerequisite(s): Consent of Instructor. College of Biological Sciences staff members may offer group study courses under this number. Effective: 1997 Winter Quarter.

**Biological Systems Engineering; Agricultural & Environmental Sciences, Engineering | EBS B.S.**

(College of Engineering and College of Agricultural and Environmental Sciences)

Bryan M. Jenkins, Ph.D., Chairperson of the Department

**Department Office.** 2030 Bainer Hall 530-752-0102; http://bae.engineering.ucdavis.edu

**Mission.** The Department of Biological and Agricultural Engineering is dedicated to the advancement of the discipline of biological engineering and to the conduct of research under its many diverse areas of application. Biological engineering or biological systems engineering is the biology-based engineering discipline that integrates life sciences with engineering in the advancement and application of fundamental concepts of biological systems from molecular to ecosystem levels. Within this discipline, our faculty members work in a range of research areas including biotechnology engineering, agricultural and natural resources engineering, and food engineering.

The mission of the Department of Biological and Agricultural Engineering is to discover, develop, apply, and disseminate knowledge for the sustainable production, management, and use of biological materials, and to educate students for this work.

**Objectives.** We educate students in the fundamentals of mathematics, physical and biological sciences, and engineering, balanced with the application of principles to practical problems. We teach students to develop skills for solving engineering problems in biological systems through use of appropriate analysis, synthesis, and engineering design techniques. We prepare students for entry into engineering practice and graduate education, as well as for engagement in life-long learning. We foster the ability of our students to collaborate and
communicate effectively, and provide an awareness of the importance of economics, professional responsibility, and the environment.

Students graduating with a B.S. degree in Biological Systems Engineering from UC Davis are prepared to:

- Apply life sciences in engineering at the biochemical, cellular, organism, and ecosystem levels,
- Solve biological systems engineering problems while employed in the private or public sector,
- Consider the environmental and social consequences of their engineering activities,
- Communicate effectively with professional colleagues and public constituencies,
- Act in an ethical manner, and
- Continue their education in a changing professional world.

The Biological Systems Engineering Undergraduate Program

Biological Systems Engineering is an engineering major that uses biology as its main scientific base. With rapid advances in biology and biotechnology, engineers are needed to work side by side with life scientists to bring laboratory developments into commercial production or field application. Industries in bioenergy, bioprocessing, biotechnology, food processing, aquaculture, agriculture, plant production, animal production, and forest production all need engineers with strong training in biology. The heightened concern for environmental resources and their preservation generates many engineering opportunities as society strives to maintain balance within the biosphere.

In the freshman and sophomore years, the Biological Systems Engineering major requires sequences of courses in mathematics, physics, chemistry, engineering science, and humanities, similar to all accredited engineering programs. In addition to these course sequences, the Biological Systems Engineering major also requires courses in the biological sciences. Exclusive of General Education units, the Biological Systems Engineering major requires a minimum of 161 units (90 units in the lower division; 71 units in the upper division).

Biological Systems Engineering graduates take jobs in the biotechnology, energy, food, and medical industries; work for state and federal agencies; or pursue graduate work. Students also can use the program as a pathway to professional schools in medicine, veterinary medicine, dentistry, or business.

The Biological Systems Engineering program is accredited by the Engineering Accreditation Commission of ABET; see http://www.abet.org.

Students are encouraged to adhere carefully to all prerequisite requirements. The instructor is authorized to drop students from a course for which stated prerequisites have not been completed.

Lower Division Required Courses

See the Degree Requirements section, below.

Upper Division Requirements

If your career objective is a professional degree in the health sciences (e.g., medicine, veterinary medicine, or dentistry), you should consult with advisors from the appropriate school to plan for successful admission and to ensure that you take specific courses that may be required and that you have the necessary experience. The upper division requirements are listed following the areas of specialization:

- Biotechnology Engineering
- Agricultural and Natural Resources Engineering
- Food Engineering

Areas of Specialization

Biotechnology Engineering. Biotechnology involves the handling and manipulation of living organisms or their components to produce useful products. Students specializing in biotechnology engineering integrate analysis and design with applied biology to solve problems in renewable energy production, large-scale biotechnical production, control of biological systems, and bio-based materials production.

Students may focus on the mechanisms and processes for the sustainable production and use of energy from renewable biological sources. Students may also focus on the challenges in scaling up laboratory developments to industrial production, including production, packaging, and application of biocontrol agents for plant pests and diseases; genetically altered plants; plant materials and food products; and microbial production of biological
products, tissue culture, and bioremediation. Students may also focus on the development of biosensors to detect microorganisms and specific substances, useful in the development of products based on biological processes and materials.

Biotechnical engineers work in the biotech industries on process design and operation, scale-up, and instrumentation and control.

Recommended biological science electives:

- Biological Sciences 101, 102, 103
- Microbiology 102
- Molecular and Cellular Biology 120L
- Plant Biology 113

Recommended engineering electives:

- Biological Systems Engineering 161
- Chemical Engineering 161B, 161C, 161L
- Civil and Environmental Engineering 143, 148A, 149, 150, 153
- Engineering 180
- Mechanical Engineering 161, 162, 163

**Agricultural and Natural Resources Engineering.** With the world population expected to grow over the next several decades, major concerns lie with meeting the needs of agriculture and with the sustainable use of limited natural resources. Students specializing in agricultural and natural resources engineering combine analysis and design with applied biology to solve problems in producing, transporting, and processing biological products leading to food, fiber, energy, pharmaceuticals, and other human needs.

Students may focus on automation and control of field operations and engineered systems, robotics, and on the biomechanics of humans and animals. They may also focus on engineering issues related to the sustainable use of natural resources, particularly energy and water, but also land and air. Agricultural and natural resources engineers design machinery, processes, and systems for productive plant and animal culture, while improving overall sustainability.

Agricultural and natural resources engineers are employed as practicing professionals and managers with agricultural producers, equipment manufacturers, irrigation districts, food processors, consulting engineering firms, start-up companies, and government agencies. Graduates with interest in biomechanics work in industry on the design, evaluation, and application of human-centered devices and systems, as well as on improving worker health and safety.

Recommended biological science electives:

**Animal Emphasis**

- Avian Sciences 100
- Animal Science 143, 144, 146
- Neurobiology, Physiology and Behavior 101
- Soil Science 100

**Aquaculture Emphasis**

- Animal Science 118, 131, 136A
- Applied Biological Systems Technology 163
- Wildlife, Fish, and Conservation Biology 120, 121

**Biomechanics Emphasis**

- Biological Sciences 102
- Neurobiology, Physiology and Behavior 101
- Exercise Biology 103
- Cell Biology and Human Anatomy 101
Plant Emphasis

- Entomology 100
- Environmental Horticulture 102
- Environmental Science and Policy 100
- Environmental Toxicology 101
- Hydrologic Sciences 124
- Microbiology 120
- Plant Biology 111
- Soil Science 100
- Plant Sciences 101, 110A, 114, 142

Recommended engineering electives:

- Biological Systems Engineering 128, 145
- Biomedical Engineering 109, 116, 126
- Civil and Environmental Engineering 140, 141, 142, 144, 145, 148A, 171
- Engineering 111, 121, 180

Additional recommended electives:

- Applied Biological Systems Technology 150, 161, 165

Food Engineering. Producing the food we eat every day constitutes the largest industrial sector of the U.S. economy, and this production involves the work of engineers in a wide variety of food industries, both at home and around the world. Students specializing in food engineering design food processes and operate equipment and facilities for production of high quality, safe, and nutritious food with minimal impact of these operations on the environment.

Students learn to apply engineering principles and concepts to handle, store, process, package, and distribute food and related products. In addition to engineering principles, the food engineering specialization provides an understanding of the chemical, biochemical, microbiological, and physical characteristics of food. Students study concepts of food refrigeration, freezing, thermal processing, drying, and other food operations, food digestion, and health and nutrition in food system design.

Food engineers work as practicing engineers, scientists, and managers in the food industry.

Recommended biological science electives:

- Biological Sciences 101, 102, 103
- Environmental Science and Policy 110
- Environmental Toxicology 101
- Food Science and Technology 104, 104L, 119, 128
- Plant Sciences 172

Recommended engineering electives:

- Biological Systems Engineering 161
- Chemical Engineering 157
- Mechanical Engineering 171, 172

Suggested Advisors. G. Bornhorst, J. de Moura Bell, T. Jeoh, M. McCarthy, N. Nitin, Z. Pan, D. Slaughter

Master Undergraduate Advisor. T. Jeoh

279
Choose a minimum of four units from all upper division Biological Systems Engineering courses not otherwise required, with the exception of:

- EBS 189 series 1-5
- EBS 199 Special Study for Advanced Undergraduates 1-5

Engineering Electives
Choose a minimum of three units; all upper division courses offered by the College of Engineering may be taken as engineering electives with the exception of the following:

- ECI 123 Urban Systems and Sustainability 4
- ECS 188 Ethics in an Age of Technology 4
- ENG 103 Fluid Mechanics 4
- ENG 160 Environmental Physics and Society 3

All courses 190-197, 199; except ENG 190, may be taken for 2 units of engineering elective credit.

Biological Science Electives
All upper division courses in the College of Biological Sciences may be used as biological science electives; with the exception of:

- BIS 132 Introduction to Dynamic Models in Modern Biology 4
- EVE 175 Computational Genetics 3
- EXB 102 Introduction to Motor Learning and the Psychology of Sport and Exercise 4
- EXB 112 Clinical Exercise Physiology 4
- EXB 115 Biomechanical Bases of Movement 3
- EXB 120 Sport in American Society 3
- EXB 121 Advanced Sport Psychology 3
- EXB 124 Physiology of Maximal Human Performance 4
- EXB 125 Neuromuscular and Behavioral Aspects of Motor Control 3
- EXB 148 Theory and Practice of Exercise Testing 1

All 190-199.

May also be taken as biological science electives:

- ABT 161 Water Quality Management for Aquaculture 3
- ANS 118 Fish Production 4
- ANS 143 Pig and Poultry Care and Management 4
- ANS 144 Beef Cattle and Sheep Production 4
- ANS 146 Dairy Cattle Production 5
- ATM 133 Biometeorology 4
- AVS 100 Avian Biology 3
- CHA 101 Human Gross Anatomy 4
- CHA 101L Human Gross Anatomy Laboratory 3
- ENT 100 General Entomology 4
- ENH 102 Physiological Principles in Environmental Horticulture 4
- ESM 120 Global Environmental Interactions 4
- ESP 100 General Ecology 4
- ESP 110 Principles of Environmental Science 4
- ESP 155 Wetland Ecology 4
- ETX 101 Principles of Environmental Toxicology 4
- ETX 131 Environmental Toxicology of Air Pollutants 3
- FST 102A Malting and Brewing Science 4
- FST 104L Food Microbiology Laboratory 4
- FST 119 Chemistry and Technology of Milk and Dairy Products 4
- FST 128 Food Toxicology 3
- FST 159 New Food Product Ideas 3
- IDI 141 Infectious Diseases of Humans 1
- SSC 100 Principles of Soil Science 5
- WFC 121 Physiology of Fishes 4
Students may choose other upper division courses with substantial biological content offered by the College of Agricultural and Environmental Sciences; consultation with a faculty advisor and approval by petition is required.

**Upper Division Composition Requirement**

**Choose one; a grade of C- or better is required:**

- UWP 101 Advanced Composition 4
- UWP 102B Writing in the Disciplines: Biology 4
- UWP 102E Writing in the Disciplines: Engineering 4
- UWP 102F Writing in the Disciplines: Food Science and Technology 4
- UWP 102G Writing in the Disciplines: Environmental Writing 4
- UWP 104A Writing in the Professions: Business Writing 4
- UWP 104E Writing in the Professions: Science 4
- UWP 104F Writing in the Professions: Health 4
- UWP 104T Writing in the Professions: Technical Writing 4

The Upper-Division composition exam administered by the College of Letters and Sciences cannot be used to satisfy the upper-division composition requirement for students in the Biological Systems Engineering program.

Total: 147-149

**Biological Systems Engineering; Agricultural & Environmental Sciences, Engineering | EBS B.S./M.S. Integrated**

**The Graduate Program in Biological Systems Engineering**

Integrated B.S./M.S., M.Engr., D.Engr., and Ph.D. in Biological Systems Engineering  
Designated Ph.D. emphasis available in Biotechnology  
[http://bae.engineering.ucdavis.edu](http://bae.engineering.ucdavis.edu); 530-752-0102

Graduate students in Biological Systems Engineering focus on finding economically and environmentally sustainable solutions to many of the most important global issues of our time—the safety, security and abundance of our food, detection of pathogens, development of bioenergy and other sustainable energy systems, control of insect-borne disease and damage, as well as the preservation of our land, air and water resources.

We enjoy the strategic advantage of being located in California, the national leader in agricultural production and crop diversity, and a major center for biotechnology. With the unique status of belonging to both the College of Engineering and the College of Agricultural and Environmental Sciences, the program benefits from a wide diversity of collaborations across multiple disciplines. We interact with colleagues in both engineering and the life sciences to create multidisciplinary approaches to our teaching and research. Students benefit from this dynamic environment that combines the strengths of nationally ranked engineering, agricultural and environmental programs.

Financial support is available in the form of research assistantships, teaching assistantships, fellowships and financial aid.

**Research Highlights:**

- Automation and Control
- Bioenvironmental engineering
- Renewable energy
- Industrial biotechnology
- Food safety
- Biosensors
- Bioprocess engineering
- Bioinstrumentation
- Ergonomics, health and safety
- Aquacultural engineering
• Ecological systems engineering
• Food engineering
• Forest and fiber engineering
• Postharvest engineering
• Remote sensing
• Robotics and autonomous systems
• Soil and water engineering
• Machine systems and precision agriculture

Research Facilities and Partnerships:
• Agricultural Ergonomics Research Center
• Fish Conservation and Culture Laboratory
• GIS Visualization Lab
• Energy Institute
• Bodega Marine Lab
• Western Center for Agricultural Equipment

Complete information is available on the departmental website.

**Biological Systems Engineering; Agricultural & Environmental Sciences, Engineering**

**EBS Courses**

**Courses in EBS:**

**EBS 001—Foundations of Biological Systems Engineering (4)**
Laboratory—6 hours; Lecture—2 hours; Project (Term Project). Open only to students in Biological Systems Engineering. Introduction to engineering and the engineering design process with examples drawn from the field of biological systems engineering. Introduction to computer-aided design and mechanical fabrication of designs. Students work on a quarter-long group design project. GE credit: OL, QL, SE, SL, VL. Effective: 2009 Fall Quarter.

**EBS 075—Properties of Materials in Biological Systems (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): BIS 002A; PHY 009C (can be concurrent) Properties of typical biological materials; composition and structure with emphasis on the effects of physical and biochemical properties on design of engineered systems; interactions of biological materials with typical engineering materials. GE credit: QL, SE, SL, VL, WE. Effective: 2016 Fall Quarter.

**EBS 090C—Research Group Conference in Biological Systems Engineering (1)**
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Lower division standing in Biological Systems Engineering or Food Engineering. Research group conference. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

**EBS 092—Internship in Biological Systems Engineering (1-5)**
Internship. Prerequisite(s): Consent of Instructor. Lower division standing; project approval prior to period of internship. Supervised work experience in biological systems engineering. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

**EBS 098—Directed Group Study (1-5)**
Variable. Prerequisite(s): Consent of Instructor. Group study of selected topics; restricted to lower division students. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

**EBS 099—Special Study for Lower Division Students (1-5)**
Variable. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

**EBS 103—Fluid Mechanics Fundamentals (4)**
Lecture—4 hours. Prerequisite(s): PHY 009B Fluid mechanics axioms, fluid statics, kinematics, velocity fields for one-dimensional incompressible flow and boundary layers, turbulent flow time averaging, potential flow, dimensional analysis, and macroscopic balances to solve a range of practical problems. (Same course as HYD 103N.) GE credit: QL, SE, VL. Effective: 2005 Spring Quarter.

**EBS 114—Principles of Field Machinery Design (3)**
Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): ENG 102; ENG 104 Traction and stability of vehicles with wheels or tracks. Operating principles of field machines and basic mechanisms used in their design. GE credit: QL, SE, VL, WE. Effective: 1998 Spring Quarter.

**EBS 115—Forest Engineering (3)**
Lecture—3 hours. Prerequisite(s): ENG 104 Applications of engineering principles to problems in forestry including those in forest regeneration, harvesting, residue utilization, and transportation. GE credit: QL, SE, WE. Effective: 2016 Fall Quarter.

**EBS 120—Power Systems Design (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ENG 017; ENG 102; ENG 103; ENG 105 Design and performance of power devices and systems including combustion engines, electric generators and motors, fluid power systems, fuels, and emerging technologies. Selection of units for power matching and optimum performance. GE credit: QL, SE, SL, VL, WE. Effective: 2002 Fall Quarter.

**EBS 125—Heat Transfer in Biological Systems (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): EBS 075; ENG 105; BIS 002A; BIS 002B; BIS 002C Fundamentals of heat transfer with application to biological systems. Steady and transient heat transfer. Analysis and simulation of heat conduction, convection and radiation. Heat transfer operations. GE credit: OL, QL, SE, VL, WE. Effective: 2009 Spring Quarter.
EBS 127—Mass Transfer and Kinetics in Biological Systems (4)

EBS 128—Biomechanics and Ergonomics (4)

EBS 130—Modeling of Dynamic Processes in Biological Systems (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EBS 075; (ENG 006 or ECS 030); MAT 022B C- or better Techniques for modeling processes through mass and energy balance, rate equations, and equations of state. Computer problem solution of models. Example models include package design, evaporation, respiration heating, thermal processing of foods, and plant growth. GE credit: QL, SE, SL, VL. Effective: 2011 Fall Quarter.

EBS 135—Bioenvironmental Engineering (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): EBS 125; EBS 130 Biological responses to environmental conditions. Principles and engineering design of environmental control systems. Overview of environmental pollution problems and legal restrictions for biological systems, introduction of environmental quality assessment techniques, and environmental pollution control technologies. GE credit: QL, SE, SL, VL, WE. Effective: 1998 Spring Quarter.

EBS 144—Groundwater Hydrology (4)

EBS 145—Irrigation and Drainage Systems (4)
Lecture—4 hours. Prerequisite(s): EBS 103 or HYD 103N Engineering and scientific principles applied to the design of surface, sprinkle and micro irrigation systems and drainage systems within economic, biological, and environmental constraints. Interaction between irrigation and drainage. GE credit: QL, SE, SL, VL. Effective: 2016 Fall Quarter.

EBS 147—Runoff, Erosion and Water Quality Management (3)
Fieldwork; Lecture/Lab—3 hours. Prerequisite(s): (PHY 007B or PHY 009B); (MAT 016C or MAT 017C or MAT 021C); (ECI 142 or HYD 141 or ESM 100); or equivalent. Practical hydrology and runoff water quality management from disturbed watersheds. Development of hillslope and soils restoration concepts and practice, modeling and application. (Same course as HYD 147.) GE credit: SE. Effective: 2018 Spring Quarter.

EBS 161—Kinetics and Bioreactor Design (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EBS 127 Provide the basic principles of reactor design for bioprocess applications. This course covers the following topics: 1) kinetics and reactor engineering principles; 2) bio-reaction kinetics; and 3) bioreactor design. GE credit: QL, SE, VL. Effective: 2012 Spring Quarter.

EBS 165—Bioinstrumentation and Control (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ENG 100 Instrumentation and control for biological production systems. Measurement system concepts, instrumentation and transducers for sensing physical and biological parameters, data acquisition and control. GE credit: QL, SE, SL, VL, WE. Effective: 1998 Fall Quarter.

EBS 170A—Engineering Design and Professional Responsibilities (3)
Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): EBS 001; ENG 102; ENG 104 Engineering design including professional responsibilities. Emphasis on project selection, data sources, specifications, human factors, biological materials, safety systems, and professionalism. Detailed design proposals will be developed for courses 170B and 170BL. GE credit: QL, QL, SE, SL, VL, WE. Effective: 1998 Spring Quarter.

EBS 170B—Engineering Projects: Design (2)
Discussion—2 hours. Prerequisite(s): EBS 170A; EBS 170BL (can be concurrent); EBS 170BL required concurrently.
Individual or group projects involving the design of devices, structures, or systems to solve specific engineering problems in biological systems. Project for study is jointly selected by student and instructor. GE credit: OL, QL, SE, SL, VL, WE. Effective: 2006 Spring Quarter.

**EBS 170BL—Engineering Projects: Design Laboratory (1)**
Laboratory—3 hours. Prerequisite(s): EBS 170B (can be concurrent); EBS 170B required concurrently. Individual or group projects involving the design of devices, structures, or systems to solve specific engineering problems in biological systems. GE credit: OL, QL, SE, SL, VL, WE. Effective: 2006 Spring Quarter.

**EBS 170C—Engineering Projects: Design Evaluation (1)**
Discussion—1 hour. Prerequisite(s): EBS 170B; EBS 170CL (can be concurrent); EBS 170CL required concurrently. Individual or group projects involving the fabrication, assembly and testing of components, devices, structures, or systems designed to solve specific engineering problems in biological systems. Project for study previously selected by student and instructor in course 170B. GE credit: OL, QL, SE, SL, VL, WE. Effective: 1999 Winter Quarter.

**EBS 175—Rheology of Biological Materials (3)**
Lecture—3 hours. Prerequisite(s): EBS 103 or ENG 103 Fluid and solid rheology, viscoelastic behavior of foods and other biological materials, and application of rheological properties to food and biological systems (i.e., pipeline design, extrusion, mixing, coating). GE credit: QL, SE, VL. Effective: 2016 Fall Quarter.

**EBS 189A—Special Topics in Biological Systems Engineering; Agricultural Engineering (1-5)**
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. Upper division standing in Engineering. Special topics in Agricultural Engineering. May be repeated for credit when topic differs. GE credit: SE. Effective: 1998 Fall Quarter.

**EBS 189B—Special Topics in Biological Systems Engineering; Aquacultural Engineering (1-5)**
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. Upper division standing in Engineering. Special topics in Aquacultural Engineering. May be repeated for credit when topic differs. GE credit: SE. Effective: 1998 Fall Quarter.

**EBS 189C—Special Topics in Biological Systems Engineering; Biomedical Engineering (1-5)**
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. Upper division standing in Engineering. Special topics in Biomedical Engineering. May be repeated for credit when topic differs. GE credit: SE. Effective: 1998 Fall Quarter.

**EBS 189D—Special Topics in Biological Systems Engineering; Biotechnical Engineering (1-5)**
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. Upper division standing in Engineering. Special topics in Biotechnical Engineering. May be repeated for credit when topic differs. GE credit: SE. Effective: 1998 Fall Quarter.

**EBS 189E—Special Topics in Biological Systems Engineering; Ecological Systems Engineering (1-5)**
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. Upper division standing in Engineering. Special topics in Ecological Systems Engineering. May be repeated for credit when topic differs. GE credit: SE. Effective: 1998 Fall Quarter.

**EBS 189F—Special Topics in Biological Systems Engineering; Food Engineering (1-5)**
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. Upper division standing in Engineering. Special topics in Food Engineering. May be repeated for credit when topic differs. GE credit: SE. Effective: 1998 Fall Quarter.

**EBS 189G—Special Topics in Biological Systems Engineering; Forest Engineering (1-5)**
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. Upper division standing in Engineering. Special topics in Forest Engineering. May be repeated for credit when topic differs. GE credit: SE. Effective: 1998 Fall Quarter.

**EBS 190C—Research Group Conference in Biological Systems Engineering (1)**
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Upper division standing in Biological Systems Engineering of Food Engineering. Research group conference. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

**EBS 192—Internship in Biological Systems Engineering (1-5)**
Internship. Prerequisite(s): Consent of Instructor. Upper division standing; approval of project prior to period of internship. Supervised work experience in biological systems engineering. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.
EBS 197T—Tutoring in Biological Systems Engineering (1-5)
Tutorial—3-15 hours. Prerequisite(s): Consent of Instructor. Upper division standing. Tutoring individual students, leading small voluntary discussion groups, or assisting the instructor in laboratories affiliated with one of the department's regular courses. May be repeated for credit topic differs. (P/NP grading only.) GE credit: SE. Effective: 2004 Winter Quarter.

EBS 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

EBS 199—Special Study for Advanced Undergraduates (1-5)
Variable. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

EBS 200—Research Methods in Biological Systems Engineering (2)
Lecture—2 hours. Prerequisite(s): Graduate standing. Planning, execution and reporting of research projects. Literature review techniques and proposal preparation. Record keeping and patents. Uncertainty analysis in experiments and computations. Graphic analysis. Oral and written presentation of research results, manuscript preparation, submission and review. Effective: 1997 Spring Quarter.

EBS 205—Continuum Mechanics of Natural Systems (4)
Lecture/Discussion—4 hours. Prerequisite(s): MAT 021D; MAT 022B; PHY 009B Continuum mechanics of static and dynamic air, water, earth and biological systems using hydraulic, heat and electrical conductivity; diffusivity; dispersion; strain; stress; deformation gradient; velocity gradient; stretch and spin tensors. (Same course as HYD 205.) Effective: 2002 Fall Quarter.

EBS 215—Soil-Machine Relations in Tillage and Traction (3)
Lecture—3 hours. Prerequisite(s): EBS 114 Mechanics of interactions between agricultural soils and tillage and traction devices; determination of relevant physical properties of soil; analyses of stress and strains in soil due to machine-applied loads; experimental and analytical methods for synthesizing characteristics of overall systems. Effective: 1997 Winter Quarter.

EBS 216—Energy Systems (4)
Lecture/Discussion—4 hours. Prerequisite(s): ENG 105; or equivalent. Theory and application of energy systems. Systems analysis, energy conversion technologies, environmental considerations, economics and system optimization. (Same course as EGG 200.) Effective: 2018 Spring Quarter.

EBS 218—Solar Thermal Engineering (4)

EBS 220—Pilot Plant Operations in Aquacultural Engineering (3)
Laboratory—6 hours; Lecture—1 hour. Prerequisite(s): (ECI 243A, ECI 243B) or (ABT 161, ABT 163) Topics in water treatment as they apply to aquaculture operations. Laboratory study of unit operations in aquaculture. Effective: 1997 Winter Quarter.

EBS 228—Occupational Musculoskeletal Disorders (3)
Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): Consent of Instructor. Graduate standing. Epidemiology and etiology of occupational musculoskeletal disorders (MSDs) with focus on low back and upper extremities disorders; anatomical and biomechanical functions of lower back and upper extremities; MSDs risk factors assessment and control; research opportunities related to MSDs. Effective: 2002 Spring Quarter.

EBS 231—Mass Transfer in Food and Biological Systems (3)
Lecture/Discussion—3 hours. Prerequisite(s): Graduate standing. Application of mass transfer principles to food and biological systems. Study of mass transfer affecting food quality and shelf life. Analysis of mass transfer in polymer films used for coating and packaging foods and controlling release of biologically active compounds. Effective: 1997 Spring Quarter.

EBS 233—Analysis of Processing Operations: Drying and Evaporation (3)
Lecture—3 hours. Prerequisite(s): Course in food or process engineering, familiarity with FORTRAN. Diffusion theory in drying of solids. Analysis of fixed-bed and continuous-flow dryers. Steady-state and dynamic models to predict performance evaporators: multiple effects, mechanical and thermal recompression, control systems. Effective: 1997 Winter Quarter.
EBS 235—Advanced Analysis of Unit Operations in Food and Biological Engineering (3)
Lecture—3 hours. Prerequisite(s): EBS 132 Analysis and design of food processing operations. Steady state and
dynamic heat and mass transfer models for operations involving phase change such as freezing and frying.
Separation processes including membrane applications in food and fermentation systems. Effective: 1997 Winter
Quarter.

EBS 237—Thermal Process Design (3)
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): Course in heat transfer. Heat transfer and biological basis for
design of heat sterilization of foods and other biological materials in containers or in bulk. Effective: 1997 Spring
Quarter.

EBS 239—Magnetic Resonance Imaging in Biological Systems (3)
Lecture—3 hours. Prerequisite(s): Graduate standing. Theory and applications of magnetic resonance imaging to
biological systems. Classical Bloch model of magnetic resonance. Applications to be studied are drying of fruits,

EBS 240—Infiltration and Drainage (3)
Lecture—3 hours. Prerequisite(s): SSC 107; ENG 103 Aspects of multi-phase flow in soils and their application to
infiltration and immiscible displacement problems. Gas phase transport and entrainment during infiltration, and oil-
water-gas displacement will be considered. Effective: 1999 Fall Quarter.

EBS 241—Sprinkle and Trickle Irrigation Systems (3)
Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): EBS 145; HYD 115 Computerized design of sprinkle and
trickle irrigation systems. Consideration of emitter mechanics, distribution functions and water yield functions.
Effective: 1997 Winter Quarter.

EBS 242—Hydraulics of Surface Irrigation (3)
Lecture—3 hours. Prerequisite(s): EBS 145; HYD 115 Mathematical models of surface irrigation systems for prediction
of the ultimate disposition of water flowing onto a field. Quantity of runoff and distribution of infiltrated water over
field length as a function of slope, roughness, infiltration and inflow rates. Effective: 1997 Winter Quarter.

EBS 243—Water Resource Planning and Management (3)
Lecture—3 hours. Prerequisite(s): HYD 141; Or equivalent. Applications of deterministic and stochastic mathematical
programming techniques to water resource planning, analysis, design, and management. Water allocation, capacity
expansion, and reservoir operation. Conjunctive use of surface water and groundwater. Water quality management.
Irrigation planning and operation models. (Same course as HYD 243.) Effective: 1997 Fall Quarter.

EBS 245—Waste Management for Biological Production Systems (3)
Lecture—3 hours. Prerequisite(s): Graduate standing or consent of instructor. Characterization of solid and liquid
wastes from animal, crop, and food production systems. Study of methods and system design for handling,
treatment, and disposal/utilization of these materials. Effective: 1997 Spring Quarter.

EBS 260—Analog Instrumentation (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ENG 100 Instrument characteristics: generalized instrument
models, calibration, and frequency response. Signal conditioning: operational amplifier circuits, filtering, and noise.

EBS 262—Computer Interfacing and Control (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ENG 100; EBS 165 Procedural and object-oriented
programming in C++, analog and digital signal conversion, data acquisition and computer control. Effective: 2000
Winter Quarter.

EBS 265—Design and Analysis of Engineering Experiments (5)
Lecture—3 hours; Lecture/Discussion—2 hours. Prerequisite(s): STA 100; ASE 120; or an introductory course in
statistics. Simple linear, multiple, and polynomial regression, correlation, residuals, model selection, one-way
ANOVA, fixed and random effect models, sample size, multiple comparisons, randomized block, repeated
measures, and Latin square designs, factorial experiments, nested design and subsampling, split-plot design,
statistical software packages. Effective: 2000 Spring Quarter.

EBS 267—Renewable Bioprocessing (3)
Lecture—3 hours. Prerequisite(s): EBS 160; (BIS 101 or MIC 102) Applications of biotechnology and bioprocess
engineering toward the use of agricultural and renewable feedstocks for the production of biochemicals. Design
and modeling of microbial- and plant-based production systems including associated fermentation, extraction, and
EBS 268—Polysaccharides Surface Interactions (3)
Lecture—3 hours. Prerequisite(s): Graduate students in science or engineering. Study of fundamental surface
science theories as applied to physical and chemical interactions of carbohydrates and polysaccharides. (Same
course as ECH 268.) Effective: 2017 Winter Quarter.

EBS 270—Modeling and Analysis of Biological and Physical Systems (3)
Lecture—3 hours. Prerequisite(s): Familiarity with a programming language. Mathematical modeling of biological
systems: model development; analytical and numerical solutions. Case studies from various specializations within
Biological and Agricultural Engineering. Effective: 2001 Spring Quarter.

EBS 275—Physical Properties of Biological Materials (3)
Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): Consent of Instructor. Selected topics on physical
properties, such as mechanical, optical, rheological, and aerodynamic properties, as related to the design of
harvesting, handling, sorting, and processing equipment. Techniques for measuring and recording physical

EBS 289A—Selected Topics in Biological Systems Engineering; Animal Systems Engineering (1-5)
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Animal Systems Engineering. May be
repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EBS 289B—Selected Topics in Biological Systems Engineering; Aquacultural Engineering (1-5)
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Aquacultural Engineering. May be
repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EBS 289C—Selected Topics in Biological Systems Engineering; Biological Engineering (1-5)
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Biological Engineering. May be repeated
for credit when topic differs. Effective: 1997 Winter Quarter.

EBS 289D—Selected Topics in Biological Systems Engineering; Energy Systems (1-5)
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Energy Systems. May be repeated for
credit when topic differs. Effective: 1997 Winter Quarter.

EBS 289E—Selected Topics in Biological Systems Engineering; Environmental Quality (1-5)
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. Special topic in Environmental Quality. May be repeated
for credit when topic differs. Effective: 1997 Winter Quarter.

EBS 289F—Selected Topics in Biological Systems Engineering; Food Engineering (1-5)
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Food Engineering. May be repeated for
credit when topic differs. Effective: 1997 Winter Quarter.

EBS 289G—Selected Topics in Biological Systems Engineering; Forest Engineering (1-5)
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Forest Engineering. May be repeated for
credit when topic differs. Effective: 1997 Winter Quarter.

EBS 289H—Selected Topics in Biological Systems Engineering; Irrigation and Drainage (1-5)
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Irrigation and Drainage. May be
repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EBS 289I—Selected Topics in Biological Systems Engineering; Plant Production and Harvest (1-5)
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Plant Production and Harvest. May be
repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EBS 289J—Selected Topics in Biological Systems Engineering; Postharvest Engineering (1-5)
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Postharvest Engineering. May be
repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EBS 289K—Selected Topics in Biological Systems Engineering; Sensors and Actuators (1-5)
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Sensors and Actuators. May be repeated
for credit when topic differs. Effective: 1997 Winter Quarter.

EBS 290—Seminar (1)
Seminar—1 hour. Prerequisite(s): Graduate standing. Weekly seminars on recent advances and selected topics in
biological systems engineering. Course theme will change from quarter to quarter. May be repeated for credit. (S/U
grading only.) Effective: 1997 Winter Quarter.
EBS 290C—Graduate Research Conference (1)
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Research problems, progress and techniques in biological systems engineering. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

EBS 298—Group Study (1-5)
Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

EBS 299—Research (1-12)
Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

EBS 390—Supervised Teaching in Biological and Agricultural Engineering (1-3)
Laboratory—3 hours; Tutorial—3-9 hours. Prerequisite(s): Consent of Instructor. Graduate standing. Tutoring and teaching students in undergraduate courses offered in the Department of Biological and Agricultural Engineering. Weekly conferences with instructor; evaluation of teaching. Preparing for and conducting demonstrations, laboratories and discussions. Preparing and grading exams. May be repeated up to 6 unit(s). (S/U grading only.) Effective: 1997 Winter Quarter.

The Biomedical Engineering Undergraduate Major

The Biomedical Engineering program is accredited by the Engineering Accreditation Commission of ABET; see http://www.abet.org.

Biomedical engineering is an interdisciplinary area of study that integrates knowledge of engineering principles with the biomedical sciences. It is a very diverse field, with biomedical engineers working in areas ranging from medical imaging to regenerative medicine. Some major contributions of biomedical engineering include the left ventricular assist device (LVAD), artificial joints, hemodialysis, bioengineered skin, coronary stents, computed tomography (CT), and flexible endoscopes. Students who choose biomedical engineering are interested in contributing to human health but do not routinely interact directly with patients, as do physicians. Due to the need to complete additional coursework beyond BME degree requirements, this major is not a primary route for pre-medical studies.

The mission of the BS degree program of the Department of Biomedical Engineering is to combine exceptional teaching with state-of-the-art research for the advancement of technologies and computational techniques that meet medical and societal challenges.

The educational objectives of our program are that our graduates be successfully engaged in their chosen career through engineering practice, academic or clinical research, healthcare, education, service, or related activities, or through pursuit of graduate or professional degrees; and contribute effectively to society through responsible professional practice, fostering of cross-disciplinary collaboration, generation of innovative solutions to problems, and continuous pursuit of knowledge for personal and technological advancement.
The biomedical engineering curriculum has been designed to provide a solid foundation in mathematics, life and physical sciences, and engineering, and to provide sufficient flexibility in the upper division requirements to encourage students to explore specializations within the field. Our instructional program is designed to impart knowledge of contemporary issues at the forefront of biomedical engineering research. Employment opportunities exist in industry, hospitals, academic research and teaching institutes, national laboratories, or government regulatory agencies. The major also provides excellent grounding in the skills necessary for professional or graduate-level studies in biological and health sciences. Exclusive of General Education units, the minimum number of units required for the Biomedical Engineering degree is 157.

For information about graduate degree options, see Biomedical Engineering (Graduate Group).

Areas of Specialization

As Biomedical engineering is defined so broadly, specializing in a subfield of engineering can provide more in-depth expertise in a focus area. Through the judicious selection of upper division engineering and science electives, students can create this depth in one of our suggested areas of specialization or in an area of the student's choosing. One of the strengths of the UC Davis program is the flexibility to design one's own emphasis of study. These specializations are neither required nor degree-notated.

**Biomechanics.** This is a broad subfield that includes orthopedic/rehabilitation engineering (including the design of wheelchairs and prosthetics) as well as the study of mechanical forces produced by biological systems. Biomechanics allows a better understanding of the fluid dynamics of blood flow and the forces acting on tissue in the artery to allow the design of better cardiovascular interventions. This field involves more intensive study of mechanics, dynamics and thermodynamics.

**Cellular and Tissue.** This focus area applies biomedical engineering principles to control behavior at the gene, protein, cell, and tissue level. Scientists in this area can work in diverse areas including cellular therapies, protein production, gene therapy, tissue engineering and regeneration, and biomaterials development. This field can require study in biomedical transport, natural or synthetic biomaterials, pharmacokinetics and pharmacodynamics. It draws heavily from knowledge in the chemical and biological sciences.

**Imaging.** The visualization of anatomical structure, physiological processes, metabolic activity and molecular expression in living tissues is important to accomplish goals that include the diagnosis of disease, the development of new therapeutics, the evaluation of the response to therapeutics, and the guidance of interventional procedures. Our program has a particular strength in molecular imaging, in which molecular-scale events are detected within living systems. An imaging bioengineer can work in areas ranging from developing instruments for imaging, to creating algorithms for three-dimensional reconstruction of imaging data, to generating new contrast agents for enhancing image quality. Depending upon the area of interest, this field can require further study in electronics signal processing, chemistry or computer programming.

**Medical Devices.** This is a diverse area that can include the development of instruments, apparatuses, machines, implants, or in-vitro reagents intended for use in the diagnosis, treatment or prevention of disease. Biomedical engineers have begun to combine technologies including pharmaceuticals, electronics and mechanical devices in the development of combination medical treatments.

**Systems & Synthetic Biology.** In this area, concepts, principles and techniques from engineering are applied to understand and build biological processes and systems at a fundamental level. Engineers describe biochemical, genetic and mechanical processes mathematically and integrate this information into models of natural and synthetic systems. These models are studied analytically, computationally and statistically to uncover design principles of natural systems and to guide development of methods capable of redirecting normal expression for biotechnological purposes or correcting pathological expression for therapeutic purposes.

**Pre-Medical Student.** Engineering is playing an increasing role in the practice of medicine, and students interested in medicine can focus on the intersection of engineering and medicine. To meet admission requirements for medical school, students must complete extra course work. These courses are in addition to the listed Department of Biomedical Engineering curricular requirements.

**The Graduate Program in Biomedical Engineering.** Doctoral and master's degrees in Biomedical Engineering are offered through the interdisciplinary Graduate Group in Biomedical Engineering. Please see http://www.bme.ucdavis.edu and Biomedical Engineering (Graduate Group).
Students are encouraged to adhere carefully to all prerequisite requirements. The instructor is authorized to drop students from a course for which stated prerequisites have not been completed.

Science and Engineering electives are to be selected in consultation with a staff or faculty advisor.

Science Electives

To be chosen according to specialization.

- BIS 002B Introduction to Biology: Principles of Ecology and Evolution 5
- BIS 002C Introduction to Biology: Biodiversity and the Tree of Life 5
- ECS 030 Programming and Problem Solving (Discontinued) 4
- ECS 040 Software Development and Object-Oriented Programming (Discontinued) 4
- PHY 009D Modern Physics 4
- BIM 102 Cellular Dynamics 4
- BIM 161A Biomolecular Engineering 4
- BIM 161L Biomolecular Engineering Laboratory 3
- BIM 161S Biomolecular Engineering: Brief Course 1
- CHE 118C Organic Chemistry for Health and Life Sciences 4

OR

Any graded upper division course in the Biological Sciences, Chemistry or Physics that is designated as Science and Engineering topical breadth.

With the approval of the Biomedical Engineering Undergraduate Committee; four units:

- BIM 192 Internship in Biomedical Engineering 1-12

Engineering Electives

Any graded upper division Biomedical Engineering course; except:

- BIM 102 Cellular Dynamics 4
- BIM 161A Biomolecular Engineering 4
- BIM 161L Biomolecular Engineering Laboratory 3
- BIM 161S Biomolecular Engineering: Brief Course 1

With the approval of the Biomedical Engineering Undergraduate Committee; four units:

- BIM 192 Internship in Biomedical Engineering 1-12

Upper Division Composition Requirement 0-4

Choose one; grade of C- or better is required:
UWP 101 Advanced Composition 4
UWP 102B Writing in the Disciplines: Biology 4
UWP 102E Writing in the Disciplines: Engineering 4
UWP 104A Writing in the Professions: Business Writing 4
UWP 104E Writing in the Professions: Science 4
UWP 104F Writing in the Professions: Health 4
UWP 104I Writing in the Professions: Internships 4
UWP 104T Writing in the Professions: Technical Writing 4

Passing the Upper Division Composition Exam offered by the College of Letters & Science.

Additional upper division elective policies:
Two units from Chemistry 118A may be applied towards Science electives if 118A is also used to satisfy lower division subject credit. Two units from Electrical and Computer Engineering 100 may be applied towards Engineering electives if Electrical and Computer Engineering 100 is taken to satisfy upper division subject credit.

Total: 157-161

Biomedical Engineering; Engineering | BIM Minor

(College of Engineering)

Alyssa Panitch, Ph.D., Chairperson of the Department

Department Office. 2303 Genome and Biomedical Sciences Facility 530-752-1033; https://bme.ucdavis.edu

The minor in Biomedical Engineering is restricted to enrolled College of Engineering students. The intent is to build upon their existing core strengths and add expertise in biomedical applications. This additional training would make students more attractive to employers in the medical device industry, and would also position students for graduate training in health related applications of engineering. The minor requires two life sciences courses not typically required for engineering students, one at the cellular level (Biomedical Engineering 102) and the other at the physiological level (Neurobiology, Physiology, and Behavior 101 or Biomedical Engineering 116). The remaining 12 units are to be selected in consultation with an advisor from the list of upper division Biomedical Engineering courses. Students will be advised to select additional courses to complement their existing curricula. Examples of relevant coursework for different majors are provided as a reference. These listings classify the upper division Biomedical Engineering courses into categories and provide a suggested subset of coursework for the majors most likely to have students interested in health-related applications.

Minor Requirements

All courses must be taken for a letter grade. A grade of C- or better is required for all courses used to satisfy minor requirements with an overall GPA of 2.000 or better in courses required for the minor. No more than one course can be counted towards both the student's major and the minor.

Minor Advisors. Rosalind Christian, Anthony Passerini

BIM 189C Topics in Biomedical Engineering; Biomedical Engineering 1-5

Total: 21
BIM 089B—Topics in Biomedical Engineering (1-5)
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. Restricted to lower division students. Topics in Biomedical Engineering. (B) Biomedical Imaging. May be repeated for credit when topic differs. GE credit: SE. Effective: 2012 Spring Quarter.

BIM 089C—Topics in Biomedical Engineering (1-5)
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. Restricted to lower division students. Topics in Biomedical Engineering. (C) Biomedical Engineering. May be repeated for credit when topic differs. GE credit: SE. Effective: 2012 Spring Quarter.

BIM 099—Special Study for Undergraduates (1-5)
Variable. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 2003 Winter Quarter.

BIM 102—Cellular Dynamics (4)
Lecture/Discussion—4 hours. Prerequisite(s): BIS 002A; CHE 008B or CHE 118B Open to College of Engineering students only. Fundamental cell biology for bioengineers. Emphasis on physical concepts underlying cellular processes including protein trafficking, cell motility, cell division and cell adhesion. Current topics including cell biology of cancer and stem cells will be discussed. Only two units of credit for students who have completed BIS 104. GE credit: SE. Effective: 2017 Spring Quarter.

BIM 105—Probability and Statistics for Biomedical Engineers (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MAT 021D C- or better; ENG 006 (can be concurrent) Concepts of probability, random variables and processes, and statistical analysis with applications to engineering problems in biomedical sciences. Includes discrete and continuous random variables, probability distributions and models, hypothesis testing, statistical inference and Matlab applications. Emphasis on BME applications. GE credit: QL, SE, VL. Effective: 2013 Fall Quarter.

BIM 106—Biotransport Phenomena (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): BIM 020 C- or better; (BIM 116 or NPB 101); PHY 009B; MAT 022B Open to Biomedical Engineering majors only. Principles of momentum and mass transfer with applications to biomedical systems; emphasis on basic fluid transport related to blood flow, mass transfer across cell membranes, and the design and analysis of artificial human organs. GE credit: QL, SE, SL, VL. Effective: 2015 Winter Quarter.

BIM 107—Mathematical Methods for Biological Systems (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ENG 006 C- or better; BIM 020; MAT 022B Restricted to Biomedical Engineering majors only. Mathematical and computational modeling to solve biomedical problems. Topics include stochastic processes and Monte Carlo simulations, and partial differential equations. Introduced to numerical techniques in MATLAB. GE credit: QL, SE, VL. Effective: 2013 Fall Quarter.

BIM 108—Biomedical Signals and Control (4)
Lecture—4 hours. Prerequisite(s): MAT 022B C- or better; ENG 006; ENG 017 Restricted to Biomedical Engineering majors only. Systems and control theory applied to biomedical engineering problems. Time-domain and frequency-domain analyses of signals and systems, convolution, Laplace and Fourier transforms, transfer function, dynamic behavior of first and second order processes, and design of control systems for biomedical applications. No credit for students who have taken EEC 150A; two units of credit for students who have taken EME 171. GE credit: QL, SE. Effective: 2012 Fall Quarter.

BIM 109—Biomaterials (4) Review all entries
Lecture—4 hours. Prerequisite(s): BIM 106; BIS 002A; CHE 002C Restricted to upper-division Engineering majors. Introduce important concepts for design, selection and application of biomaterials. Given the interdisciplinary nature of the subject, principles of polymer science, surface science, materials science and biology will be integrated into the course. GE credit: SE, SL, VL. Effective: 2013 Fall Quarter.

BIM 109—Biomaterials (4) Review all entries
Lecture—4 hours. Prerequisite(s): BIS 002A; CHE 002C or CHE 002CH; BIM 106 Restricted to upper-division Engineering majors. Introduce important concepts for design, selection and application of biomaterials. Given the interdisciplinary nature of the subject, principles of polymer science, surface science, materials science and biology will be integrated into the course. GE credit: SE, SL, VL. Effective: 2018 Fall Quarter.

BIM 110A—Biomedical Engineering Senior Design Experience (3)
Lecture/Discussion—1 hour; Project (Term Project)—6 hours. Prerequisite(s): BIM 110L (can be concurrent); BIM 111 (can be concurrent) Restricted to senior Biomedical Engineering majors (or by consent of instructor). Application of bioengineering theory and experimental analysis to a design project culminating in the design of a unique solution
to a problem. Design may be geared towards current applications in biotechnology or medical technology. Continues in course 110B. GE credit: OL, SE, SL, VL. Effective: 2017 Spring Quarter.

**BIM 110B—Biomedical Engineering Senior Design Experience (3)**
Lecture/Discussion—1 hour; Project (Term Project)—6 hours. Prerequisite(s): BIM 110A Application of bioengineering theory and experimental analysis to a design project culminating in the design of a unique solution to a problem. Design may be geared towards current applications in biotechnology or medical technology. GE credit: OL, SE, SL, VL. Effective: 2014 Spring Quarter.

**BIM 110L—Biomedical Engineering Senior Design Lab (2)**
Discussion/Laboratory—2 hours; Laboratory—3 hours. Prerequisite(s): BIM 105; BIM 108; BIM 109 Restricted to Biomedical Engineering majors. Manufacturing processes, safety, computer-aided design techniques applied to fabrication of biomedical devices. Application of engineering principles & design theory to build a functional prototype to solve a biomedical problem. Continues in 110AB. GE credit: SE. Effective: 2017 Fall Quarter.

**BIM 110L—Biomedical Engineering Senior Design Lab (2)**
Discussion/Laboratory—2 hours; Laboratory—3 hours. Prerequisite(s): BIM 105; BIM 106; BIM 108; BIM 109; BIM 116 or NPB 101 Restricted to Biomedical Engineering majors. Manufacturing processes, safety, computer-aided design techniques applied to fabrication of biomedical devices. Application of engineering principles & design theory to build a functional prototype to solve a biomedical problem. Continues in 110AB. GE credit: SE. Effective: 2019 Winter Quarter.

**BIM 111—Biomedical Instrumentation Laboratory (6)**
Discussion/Laboratory—4 hours; Lecture—4 hours. Prerequisite(s): BIM 105; BIM 108; (ENG 100 or EEC 100); (BIM 116 or NPB 101) Open to Biomedical Engineering majors only. Basic biomedical signals and sensors. Topics include analog and digital records using electronic, hydrodynamic, and optical sensors, and measurements made at cellular, tissue and whole organism level. GE credit: SE. Effective: 2015 Fall Quarter.

**BIM 116—Physiology for Biomedical Engineers (5)**
Discussion—3 hours; Lecture—2 hours. Prerequisite(s): BIS 002A C- or better; PHY 009C; MAT 022B recommended. Basic human physiology for the nervous, musculoskeletal, cardiovascular, respiratory, gastrointestinal, renal, and endocrine systems. Emphasis on small group design projects and presentations in interdisciplinary topics relating biomedical engineering to medical diagnostic and therapeutic applications. GE credit: OL, SE, SL, VL, WE. Effective: 2013 Fall Quarter.

**BIM 117—Modeling Strategies for Biomedical Engineering (4)**
Lecture—2 hours; Lecture/Discussion—2 hours. Prerequisite(s): BIS 002A C- or better; MAT 022A C- or better Restricted to upper division standing. Non-simulation strategies for modeling biomedical engineering systems, including natural and synthetic systems at the cell and molecular level. Formulating and testing hypotheses by translating real-world problems into appropriate mathematical models, translating mathematical results into real-world understanding, and gaining appreciation for how models contribute to the development cycle of biomedical engineering applications. GE credit: SE. Effective: 2018 Spring Quarter.

**BIM 118—Microelectromechanical Systems (4)**
Discussion—1 hour; Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): CHE 002A; ENG 017 Pass One restricted to upper division standing in Biomedical Engineering. Introduction to the theory and practice of micro-electromechanical systems (MEMS), including fundamentals of micro-nanofabrication, microscale sensing and actuation, self assembly, microfluidics and lab-on-a-chip. Weekly hands-on laboratory sections are emphasized on implementation and utilization of MEMS technologies. GE credit: SE. Effective: 2017 Winter Quarter.

**BIM 120—Introduction to Materials Science for Biomedical Engineers (4)**
Lecture—4 hours. Prerequisite(s): BIM 020 C- or better or ENG 105 C- or better; PHY 009C; MAT 022B recommended. Open to upper division BME students only. Historical perspective on materials usage in the body. Fundamental properties of materials and key considerations needed for material selection in the context of biomedical applications. Case studies of commonly used biomaterials spanning a range of material types. GE credit: SE. Effective: 2019 Winter Quarter.

**BIM 125—Introduction to Design and Analysis of Experiments for BME (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): BIM 105 or STA 100 Basic concepts and methods in design of experiments with biomedical engineering applications. Statistical concepts and methods to study strategies to design efficient industrial experiments that can improve data quality and simplify data analysis. GE credit: SE. Effective: 2018 Winter Quarter.
BIM 126—Tissue Mechanics (3)
Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): EXB 103 or ENG 045 or ENG 045Y Structural and mechanical properties of biological tissues, including bone, cartilage, ligaments, tendons, nerves, and skeletal muscle. GE credit: SE. Effective: 2018 Spring Quarter.

BIM 140—Protein Engineering (4)

BIM 140L—Protein Engineering Laboratory (2)
Discussion—1 hour; Laboratory—3 hours. Prerequisite(s): BIM 140 (can be concurrent); Concurrent enrollment in BIM 140 required. Optional hands-on laboratory for BIM 140. Students use the engineering design process to design, build, and test a solution to a practical problem in the field of protein engineering. Problems change each offering. GE credit: SE. Effective: 2017 Spring Quarter.

BIM 141—Cell and Tissue Mechanics (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): PHY 009B; ENG 006; ENG 035 Mechanical properties that govern blood flow in the microcirculation. Concepts in blood rheology and cell and tissue viscoelasticity, biophysical aspects of cell migration, adhesion, and motility. GE credit: QL, SE, VL. Effective: 2013 Fall Quarter.

BIM 142—Principles and Practices of Biomedical Imaging (4)
Lecture—4 hours. Prerequisite(s): BIM 108 (can be concurrent); MAT 022B Basic physics, engineering principles, and applications of biomedical imaging techniques including x-ray imaging, computed tomography, magnetic resonance imaging, ultrasound and nuclear imaging. GE credit: SE. Effective: 2018 Spring Quarter.

BIM 143—Biomolecular Systems Engineering: Synthetic Biology (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): BIS 002A; (MAT 016C or MAT 017C or MAT 021C) Includes analysis, design, construction and characterization of molecular systems. Process and biological parts standardization, computer aided design, gene synthesis, directed evolution, protein engineering, issues of human practice, biological safety, security, innovation, and ethics are covered. GE credit: SE. Effective: 2014 Fall Quarter.

BIM 143L—Synthetic Biology Laboratory (2)
Discussion—1 hour; Laboratory—3 hours. Prerequisite(s): BIM 143 (can be concurrent); Concurrent enrollment in BIM 143 required. Optional hands-on laboratory for BIM 143. Students solve a practical problem in the field of synthetic biology by designing, building, and testing an appropriate solution or product. Problems change each offering. GE credit: SE. Effective: 2017 Spring Quarter.

BIM 144—Fundamentals of Biophotonics and Bioimaging (4)
Lecture/Discussion—4 hours. Prerequisite(s): MAT 022B; PHY 009B; or Consent of Instructor. BIM 108 or equivalent helpful; Biology or Physiology course recommended. Biophotonics and bioimaging, emphasizing quantitative description of light propagation & light tissue interactions. Key technologies and illustrative applications in basic research, clinical diagnostics and therapy. GE credit: SE. Effective: 2017 Winter Quarter.

BIM 145—Immu-Engineering (4)
Lecture—4 hours. Prerequisite(s): BIM 161A or BIS 102 Basic immunology and immunological tools. Survey of current immuno-therapeutic strategies. Ongoing research efforts to engineer the immune system for positive diagnostic and therapeutic outcomes. GE credit: SE. Effective: 2018 Fall Quarter.

BIM 151—Mechanics of DNA (3)
Lecture—3 hours. Prerequisite(s): BIS 002A; MAT 022B Structural, mechanical and dynamic properties of DNA. Topics include DNA structures and their mechanical properties, in vivo topological constraints on DNA, mechanical and thermodynamic equilibria, DNA dynamics, and their roles in normal and pathological biological processes. GE credit: OL, QL, SE. Effective: 2012 Fall Quarter.

BIM 152—Molecular Control of Biosystems (4)
Lecture—3 hours; Lecture/Discussion—1 hour. Prerequisite(s): BIS 002A; PHY 009B; MAT 022B Fundamentals of molecular biomedicine covering state-of-the-art methods for quantitative understanding of gene regulation and signal transduction networks at different levels of organization in health and disease. Topics include classic genetic systems, synthetic circuits, networks disrupted in disease and cancer. GE credit: OL, SE. Effective: 2012 Fall Quarter.
BIM 161A—Biomolecular Engineering (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): BIS 002A; CHE 008B or CHE 118B Restricted to upper division standing. Introduction to the basic concepts and techniques of biomolecular engineering such as recombinant DNA technology, protein engineering, and molecular diagnostics. Three units of credit for students who have taken BIM 161S. GE credit: QL, SE. Effective: 2017 Spring Quarter.

BIM 161L—Biomolecular Engineering Laboratory (3)
Laboratory—4.5 hours; Lecture/Discussion—1.5 hours. Prerequisite(s): BIM 161A or BIS 101 Introduction to the basic techniques in biomolecular engineering. Lectures, laboratory, and discussion sessions will cover basic techniques in DNA cloning, bacterial cell culture, gene regulation, protein expression, and data analysis. GE credit: QL, SE, SL. Effective: 2013 Fall Quarter.

BIM 161S—Biomolecular Engineering: Brief Course (1)
Lecture—1 hour. Prerequisite(s): BIS 002A; CHE 008B; BIM 161L (can be concurrent) Basic concepts and techniques in biomolecular analysis, recombinant DNA technology, and protein purification and analysis. Not open for credit to students who have taken BIM 161A. GE credit: QL, SE. Effective: 2012 Summer Session 2.

BIM 162—Introduction to the Biophysics of Molecules and Cells (4)
Lecture—4 hours. Prerequisite(s): MAT 022B C- or better; PHY 009C C- or better Introduction to fundamental physical mechanisms governing structure and function of bio-macromolecules. Emphasis on a quantitative understanding of the nano- to microscale biomechanics of interactions between and within individual molecules, as well as of their assemblies, in particular membranes. GE credit: QL, SE, SL. Effective: 2013 Fall Quarter.

BIM 163—Bioelectricity, Biomechanics, and Signaling Systems (4)
Lecture—3 hours; Lecture/Discussion—1 hour. Prerequisite(s): MAT 022B C- or better; (BIM 116 or NPB 101) Fundamentals of bioelectricity in cells, the calcium signaling system, and mechanical force generation in muscle. Combination of lecture and projects to promote learning of important concepts in hands-on projects using neurons and muscle as microcosms. GE credit: QL, SE. Effective: 2014 Fall Quarter.

BIM 167—Biomedical Fluid Mechanics (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): BIM 106 C- or better; NPB 101 or BIM 116 Theories of fluid mechanics, including Navier Stokes Equation and Conservation Laws, will be presented to understand dynamics of human circulatory systems. Fluid dynamics will be analyzed using partial differential equations. GE credit: SE. Effective: 2014 Fall Quarter.

BIM 169—Introduction to the Biophysics of Molecules and Cells (4)
Lecture—4 hours. Prerequisite(s): MAT 022B C- or better; PHY 009C C- or better Introduction to fundamental physical mechanisms governing structure and function of bio-macromolecules. Emphasis on a quantitative understanding of the nano- to microscale biomechanics of interactions between and within individual molecules, as well as of their assemblies, in particular membranes. GE credit: QL, SE, SL. Effective: 2013 Fall Quarter.

BIM 170—Aspects of Medical Device Design and Manufacturing (2)
Lecture—2 hours. Prerequisite(s): Consent of Instructor. Open to upper division Biomedical Engineering majors only. Survey of medical device design & impact on manufacturing operations. Introduction to medical device design process & product lifecycle. Principles of Design for Manufacturability, Design for Lean Manufacturing, and quality management systems. GE credit: SE. Effective: 2017 Winter Quarter.

BIM 171—Clinical Applications for Biomedical Device Design (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): BIM 116 C- or better or NPB 101 C- or better; NPB 101 recommended. Restricted to Biomedical Engineering majors only. Clinical applications for biomedical devices with emphasis in the pathophysiology of common diseases as it relates to the biodesign process, biosensors principles, in vitro diagnostics, needs assessment, and regulatory considerations. GE credit: SE. Effective: 2017 Fall Quarter.

BIM 173—Cell and Tissue Engineering (4)
Lecture/Discussion—4 hours. Prerequisite(s): BIM 106 C- or better; BIM 109 C- or better Engineering principles to direct cell and tissue behavior and formation. Cell sourcing, controlled delivery of macromolecules, transport within and around biomaterials, bioreactor design, tissue design criteria and outcomes assessment. GE credit: OL, SE, SL, WE. Effective: 2012 Fall Quarter.

BIM 174—Microcontroller Applications Lab (2)
Laboratory—3 hours; Lecture—1 hour. Prerequisite(s): ENG 017 C- or better Restricted to upper division BME students. Hands-on design module to introduce microcontroller platforms, e.g., Arduino; programming microcontroller development board, use of external programs to support development of controlled systems, design of simple control systems. No credit for students who have previously taken EEC 010. GE credit: SE. Effective: 2019 Winter Quarter.

BIM 176—Microfluidic Lab (2)
Laboratory—3 hours; Lecture—1 hour. Prerequisite(s): CHE 002A; ENG 017 Upper division standing. Theory and practice of microfluidic and lab-on-a-chip (LOC) systems. Microfluidic theories, microfluidic functions and operations,
microfluidic sensing, and organ-on-a-chip development. Laboratory sections emphasize implementation and utilization of modern microfluidic devices, interfacial phenomena, and digital and droplet microfluidics. GE credit: SE. Effective: 2019 Winter Quarter.

**BIM 189A—Topics in Biomedical Engineering; Cellular and Molecular Engineering (1-5)**
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. Topics in Biomedical Engineering; Cellular and Molecular Engineering. May be repeated for credit topic differs. GE credit: SE. Effective: 2004 Fall Quarter.

**BIM 189B—Topics in Biomedical Engineering; Biomedical Imaging (1-5)**
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. Topics in Biomedical Engineering; Biomedical Imaging. May be repeated for credit topic differs. GE credit: SE. Effective: 2004 Fall Quarter.

**BIM 189C—Topics in Biomedical Engineering; Biomedical Engineering (1-5)**
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. Topics in Biomedical Engineering; Biomedical Engineering. May be repeated for credit topic differs. GE credit: SE. Effective: 2004 Fall Quarter.

**BIM 190A—Upper Division Seminar in Biomedical Engineering (1)**
Seminar—1 hour. Restricted to upper division standing. In depth examination of research topics in a small group setting. Question and answer session with faculty members. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 2006 Spring Quarter.

**BIM 192—Internship in Biomedical Engineering (1-12)**
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Restricted to upper division majors. Supervised work experience in the Biomedical Engineering field. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 2012 Fall Quarter.

**BIM 198—Directed Group Study (1-5)**
Variable—3-15 hours. May be repeated up to 3 time(s) content changes. (P/NP grading only.) GE credit: SE. Effective: 2005 Fall Quarter.

**BIM 199—Special Study for Advanced Undergraduates (1-5)**
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. Special study for advanced undergraduates. (P/NP grading only.) GE credit: SE. Effective: 2012 Fall Quarter.

**BIM 201—Scientific Communication for Biomedical Engineers (1)**
Lecture/Discussion—1 hour. Prerequisite(s): Consent of Instructor. Course is designed to improve the written and oral communication skills of first-year graduate students through writing fellowship proposals, analyzing data, and critically reviewing research papers. (S/U grading only.) Effective: 2016 Fall Quarter.

**BIM 202—Cell and Molecular Biology for Engineers (4)**
Lecture/Discussion—4 hours. Prerequisite(s): BIS 104 or MCB 121 Preparation for research and critical review in the field of cell and molecular biology for biomedical or applied science engineers Emphasis on biophysical and engineering concepts intrinsic to specific topics including receptor-ligand dynamics in cell signaling and function, cell motility, DNA replication and RNA processing, cellular energetics and protein sorting. Modern topics in bioinformatics and proteomics. Effective: 2000 Fall Quarter.

**BIM 204—Physiology for Bioengineers (5)**
Lecture—4 hours. Prerequisite(s): BIS 001A; Or equivalent; graduate standing or consent of instructor. Basic human physiology of the nervous, muscular, cardiovascular, respiratory, and renal systems and their interactions; Emphasis on the physical and engineering principles governing these systems, including control and transport processes, fluid dynamics, and electrochemistry. Effective: 2007 Fall Quarter.

**BIM 209—Scientific Integrity for Biomedical Engineers (2)**
Discussion—1 hour; Lecture—1 hour. Open to Biomedical Engineering majors only. Scientific integrity and ethics for biomedical engineers, with emphasis and discussion on mentoring, authorship and peer review, use of humans and animals in biomedical research, conflict of interest, intellectual property, genetic technology and scientific record keeping. (S/U grading only.) Effective: 2006 Spring Quarter.

**BIM 210—Introduction to Biomaterials (4)**
Lecture—4 hours. Prerequisite(s): ENG 045 or ENG 045Y; or Consent of Instructor. Mechanical and atomic properties of metallic, ceramic, and polymeric implant materials of metallic, ceramic, and polymeric implant materials; corrosion, degradation, and failure of implants; inflammation, wound and fracture healing, blood coagulation; properties of bones, joints, and blood vessels; biocompatibility of orthopaedic and cardiovascular materials. Effective: 2018 Spring Quarter.
BIM 211—Design of Polymeric Biomaterials and Biological Interfaces (4)
Lecture—4 hours. Prerequisite(s): ENG 045 or ENG 045Y; or Consent of Instructor. Open to upper division undergraduates or graduate students. Design, selection and application of polymeric biomaterials. Integration of the principles of polymer science, surface science, materials science and biology. Effective: 2018 Spring Quarter.

BIM 212—Biomedical Heat and Mass Transport Processes (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EME 165; EBS 125; ECH 153; Or equivalent. Application of principles of heat and mass transfer to biomedical systems related to heat exchange between the biomedical system and its environment, mass transfer across cell membranes and the design and analysis of artificial human organs. (Same course as MAE 212.) Effective: 2000 Winter Quarter.

BIM 213—Principles and Applications of Biological Sensors (4)
Lecture—4 hours. Prerequisite(s): CHE 002C Biological sensors based on principles of electrochemical, optical and affinity detection. Methods for integration of sensing elements (e.g. enzymes) into biosensors and miniaturization of biosensors. Effective: 2007 Fall Quarter.

BIM 214—Continuum Biomechanics (4)
Lecture—4 hours. Prerequisite(s): BIM 141; ENG 102; Or equivalent. Continuum mechanics relevant to bioengineering. Concepts in tensor calculus, kinematics, stress and strain, and constitutive theories of continua. Selected topics in bone, articular cartilage, blood/circulation, and cell biomechanics will illustrate the derivation of appropriate continuum mechanics theories. Effective: 2007 Fall Quarter.

BIM 215—Advanced topics in Cellular Engineering (4)
Lecture—4 hours. Prerequisite(s): BIM 214; or Consent of Instructor. Advanced research strategies and technologies used in the study of immune function and inflammation. Static and dynamic measurements of stress, strain, and molecular scale forces in blood and vascular cells, as well as genetic approaches to the study of disease. Effective: 2000 Spring Quarter.

BIM 216—Mechanobiology in Health and Disease (4)
Lecture/Discussion—4 hours. Prerequisite(s): BIM 106; BIS 101; NPB 101; Or equivalents. Principles by which biomechanical forces affect cell and tissue function to impact human health and disease. Emphasis on cardiovascular system: structure and function, biofluid mechanics and mechanotransduction, disease mechanisms and research methods. Cartilage, bone and other systems; current topics discussed. Effective: 2008 Spring Quarter.

BIM 217—Microsciences (4)
Lecture/Discussion—4 hours. Introduction to the theory of physical and chemical principles at the microscale. Scale effects, surface tension, microfluidic mechanics, micromechanical properties, intermolecular interactions and microtribology. (Same course as EEC 244B.) Effective: 2011 Fall Quarter.

BIM 218—Drug Delivery Systems (4)
Lecture/Discussion—4 hours. Prerequisite(s): BIM 204 recommended but not required. Fundamental engineering and biotechnology principles critical for the formulation and delivery of therapeutic agents, including peptide/protein drugs and small molecules. Effective: 2017 Winter Quarter.

BIM 220—Cytoskeletal Mechanics (4)
Lecture/Discussion—4 hours. Prerequisite(s): BIM 202 Current topics in cytoskeletal mechanics including physical properties of the cytoskeleton and motor proteins, molecular force sensor and generator, cytoskeletal regulation of cell motility and adhesion. Effective: 2010 Fall Quarter.

BIM 222—Multibody Dynamics (4)
Lecture—4 hours. Prerequisite(s): ENG 102 Coupled rigid-body kinematics/dynamics; reference frames; vector differentiation; configuration and motion constraints; holonomicity; generalized speeds; partial velocities; mass; inertia tensor/theorems; angular momentum; generalized forces; comparing Newton/Euler, Lagrange’s, Kane’s methods; computer-aided equation derivation; orientation; Euler; Rodrigues parameters. (Same course as MAE 223.) Effective: 2000 Winter Quarter.

BIM 225—Spatial Kinematics and Robotics (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): BIM 222; C Language. Spatial kinematics, screw theory, spatial mechanisms analysis and synthesis, robot kinematics and dynamics, robot workspace, path planning, robot programming, real-time architecture and software implementation. (Same course as MAE 225.) Effective: 2000 Winter Quarter.
BIM 228—Skeletal Muscle Mechanics: Form, Function, Adaptability (4)
Lecture—4 hours. Prerequisite(s): ENG 035; (ENG 045 or ENG 045Y); MAT 021D; Basic background in biology, physiology, and engineering; NPB 101 recommended. Basic structure and function of skeletal muscle examined at the microscopic and macroscopic level. Muscle adaptation in response to aging, disease, injury, exercise, and disuse. Analytic models of muscle function are discussed. Effective: 2018 Spring Quarter.

BIM 232—Skeletal Tissue Mechanics (3)
Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): Engineering 104B. Overview of the mechanical properties of the various tissues in the musculoskeletal system, the relationship of these properties to anatomic and histologic structure, and the changes in these properties caused by aging and disuse. (Same course as MAE 232.) Effective: 1997 Winter Quarter.

BIM 233—Soft Tissue Mechanics (4)
Lecture—4 hours. Presentation of structure and function of musculoskeletal soft tissues: cartilage, tendon, ligament, meniscus, and intervertebral disc. Instruction in engineering principals governing the mechanical behavior of these tissues: viscoelasticity, quasilinear viscoelasticity, and biphasic theory. Effective: 2013 Fall Quarter.

BIM 239—Advanced Finite Elements and Optimization (4)
Lecture—4 hours. Prerequisite(s): ENG 180 or MAT 128C or EAD 115 Introduction to advanced finite elements and design optimization methods, with application to modeling of complex mechanical, aerospace and biomedical systems. Application of states of the art in finite elements in optimum design of components under realistic loading conditions and constraints. (Same course as EME 239.) Effective: 2007 Fall Quarter.

BIM 240—Computational Methods in Nonlinear Mechanics (4)
Lecture—4 hours. Prerequisite(s): MAT 128B or ENG 180 or EAD 115 Deformation of solids and the motion of fluids treated with state-of-the-art computational methods. Numerical treatment of nonlinear dynamics; classification of coupled problems; applications of finite element methods to mechanical, aeronautical, and biological systems. (Same course as MAE 240.) Effective: 1999 Winter Quarter.

BIM 241—Introduction to Magnetic Resonance Imaging (3)
Lecture—3 hours. Prerequisite(s): PHY 009D; MAT 022B Equipment, methods, medical applications of MRI. Lectures review basic, advanced pulse sequences, image reconstruction, display and technology and how these are applied clinically. Lecture complements a more technical course. (course 246 can be taken concurrently.) Effective: 1999 Fall Quarter.

BIM 242—Introduction to Biomedical Imaging (4)
Lecture—4 hours. Prerequisite(s): PHY 009D; Electrical and Computer Engineering 106 or consent of instructor. Basic physics and engineering principles of image science. Emphasis on ionizing and nonionizing radiation production and interactions with the body and detectors. Major imaging systems: radiography, computed tomography, magnetic resonance, ultrasound, and optical microscopy. Effective: 2004 Fall Quarter.

BIM 243—Radiation Detectors for Biomedical Applications (4)
Lecture/Discussion—4 hours. Prerequisite(s): PHY 009D; MAT 021D; MAT 022B Radiation detectors and sensors used for biomedical applications. Emphasis on radiation interactions, detection, measurement and use of radiation sensors for imaging. Operating principles of gas, semiconductor, and scintillation detectors. Effective: 2005 Winter Quarter.

BIM 246—Magnetic Resonance Technology (3)
Lecture—3 hours. Prerequisite(s): PHY 009D; MAT 022B Course covers MRI technology at an advanced level with emphasis on mathematical descriptions and problem solving. Topics include spin dynamics, signal generation, image reconstruction, pulse sequences, biophysical basis of T1, T2, RF, gradient coil design, signal to noise, image artifacts. Effective: 1997 Winter Quarter.

BIM 251—Medical Image Analysis (4)
Lecture—4 hours. Prerequisite(s): EEC 106 Techniques for assessing the performance of medical imaging systems. Principles of digital image formation and processing. Measurements that summarize diagnostic image quality and the performance of human observers viewing those images. Definition of ideal observer and other mathematical observers that may be used to predict performance from system design features. Students will obtain hands-on experience in computer vision by completing individual Matlab assignments that they select from topics in the course. Effective: 2001 Spring Quarter.

BIM 252—Computational Methods in Biomedical Imaging (4)
Lecture—4 hours. Prerequisite(s): (BIM 105 or STA 120); (BIM 108 or EEC 150A) Analytic tomographic reconstruction
from projections in 2D and 3D; model-based image reconstruction methods; maximum likelihood and Bayesian methods; applications to CT, PET, and SPECT. (Same course as EEC 205.) Effective: 2011 Fall Quarter.

**BIM 254—Statistical Methods in Genomics (4)**
Lecture—4 hours. Statistical approaches to problems in computational molecular biology and genomics; formulation of questions via probabilistic modeling, statistical inference methods for parameter estimation, and interpretation of results to address biological questions; application to high-impact problems in functional genomics and molecular biology. Effective: 2017 Winter Quarter.

**BIM 255—Nanoscale Imaging for Molecular Medicine (3)**
Lecture/Discussion—3 hours. Prerequisite(s): BIM 202 highly recommended; graduate standing. Current and emerging technologies to visualize biological structures and processes at size scales ≥ 100 nanometers – and their application towards the advancement of molecular medicine. Technologies include superresolution optical microscopy, electron microscopy and tomography. Emphasis on quantitative imaging. (Same course as BPH 255.) Effective: 2017 Spring Quarter.

**BIM 257—Fundamentals of Tissue Optics and Biomedical Applications (5)**
Discussion—1 hour; Laboratory—3 hours; Lecture—3 hours. Fundamentals of optical properties of tissue. Range of optical technologies and their applications to tissue characterization and diagnostics. Effective: 2011 Fall Quarter.

**BIM 258—Advanced Biophotonics and Bioimaging (4)**
Lecture—4 hours. Prerequisite(s): BIM 108; PHY 108; Or an equivalent undergraduate optics course to PHY 108. Quantitative basis for biophotonics and bioimaging, with an emphasis on the physical and mathematical description of optics, light propagation, and light-tissue interactions. Advantages and limitations of various optical imaging and sensing technologies. Illustrative applications in diagnostics, basic research, and therapy. Effective: 2017 Winter Quarter.

**BIM 262—Cell and Molecular Biophysics for Bioengineers (4)**
Lecture—4 hours. Prerequisite(s): BIM 284; Or equivalent; graduate standing; undergraduate students by consent of instructor. Introduction to fundamental mechanisms governing the structure, function, and assembly of biomacromolecules. Emphasis is on a quantitative understanding of the nano-to-microscale interactions between and within individual molecules, as well as of their assemblies, in particular membranes. Not open for credit to students who have completed BIM 162. (Same course as ECH 269.) Effective: 2017 Winter Quarter.

**BIM 263—Optical Microscopy Hands-On (4)**
Laboratory—4 hours; Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Informed use of an optical research microscope. Analysis of digitized images. Optical image formation and its limitations. Laboratories on modern microscope usage and videomicroscopy techniques including optimization of recorded images and quantification of microscopic distances and displacements. Effective: 2018 Fall Quarter.

**BIM 264—Synthetic and Systems Engineering of Cells (4)**
Lecture—4 hours. Introduction to the design, engineering, and control of biological systems for biotechnological applications and biological studies. Effective: 2016 Fall Quarter.

**BIM 270—Biochemical Systems Theory (4)**
Lecture—4 hours. Prerequisite(s): BIM 202 (can be concurrent); or Consent of Instructor. Systems biology at the biochemical level. Mathematical and computational methods emphasizing nonlinear representation, dynamics, robustness, and optimization. Case studies of signal-transduction cascades, metabolic networks and regulatory mechanisms. Focus on formulating and answering fundamental questions concerning network function, design, and evolution. Effective: 2004 Winter Quarter.

**BIM 271—Gene Circuit Theory (4)**
Lecture—4 hours. Prerequisite(s): BIM 270 or BIM 202; and Consent of Instructor. Analysis, design, and construction of gene circuits. Modeling strategies, elements of design, and methods for studying variations in design. Case studies involving prokaryotic gene circuits to illustrate natural selection, discovery of design principles, and construction of circuits for engineering objectives. Effective: 2004 Winter Quarter.

**BIM 272—Tissue Engineering (3)**
Lecture/Discussion—3 hours. Prerequisite(s): BIS 104 or MCB 121 Based on morphogenetic signals, responding stem cells and extracellular matrix scaffolding. Design and development of tissues for functional restoration of various organs damaged/lost due to cancer, disease and trauma. Fundamentals of morphogenetic signals, responding stem cells and extracellular matrix scaffolding. Effective: 2007 Winter Quarter.
BIM 273—Integrative Tissue Engineering and Technologies (4)
Lecture/Discussion—4 hours. Prerequisite(s): BIM 202; BIM 204; Or equivalent; strongly encourage completion of BIM 272 although not a prerequisite. Restricted to graduate standing. Engineering principles to direct cell and tissue behavior and formation. Contents include controlled delivery of macromolecules, transport within and around biomaterials, examination of mechanical forces of engineered constructs, and current experimental techniques used in the field. Effective: 2007 Spring Quarter.

BIM 281—Acquisition and Analysis of Biomedical Signals (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ENG 100; STA 130A Restricted to upper division engineering. Basic concepts of digital signal recording and analysis; sampling; empirical modeling; Fourier analysis, random processes, spectral analysis, and correlation applied to biomedical signals. Effective: 2002 Fall Quarter.

BIM 283—Advanced Design of Experiments for Biomedical Engineers (4)
Lecture—4 hours. Open to graduate students only. Provides biomedical engineering graduate students with the tools to properly design experiments, collect and analyze data, and extract, communicate and act on information generated. Not open for credit to students who have taken EBS 265. Effective: 2017 Spring Quarter.

BIM 284—Mathematical Methods for Biomedical Engineers (4)
Lecture/Discussion—4 hours. Prerequisite(s): MAT 022B; STA 130A; Or consent of instructor; upper division biomedical engineering majors, and graduate students in sciences and engineering; priority given to Biomedical Engineering graduate students. Theoretical applications of linear systems, ordinary and partial differential equations, and probability theory and random processes that describe biological systems and instruments that measure them. Students will be introduced to numerical solution techniques in MATLAB. Effective: 2007 Fall Quarter.

BIM 286—Nuclear Imaging in Medicine and Biology (4)
Lecture/Discussion—4 hours. Prerequisite(s): BIM 243; or Consent of Instructor. Radioactive decay, interaction of radiation with matter, radionuclide production, radiation detection, digital autoradiography, gamma camera imaging, single photon emission computed tomography, positron emission tomography and applications of these techniques in biology and medicine. Effective: 2005 Spring Quarter.

BIM 287—Concepts in Molecular Imaging (4)
Lecture—2 hours; Lecture/Discussion—2 hours; Term Paper. Prerequisite(s): CHE 002C; MAT 021C; PHY 009D; and Consent of Instructor. Current techniques and tools for molecular imaging. Emphasis on learning to apply principles from the physical sciences to imaging problems in medicine and biology. Effective: 2004 Spring Quarter.

BIM 288—Living Matter: Physical Biology of the Cell (3)
Lecture—3 hours. Open to any student possessing general background in any disciplines of physical or biological sciences and engineering. Introduction to the origin, maintenance, and regulation of the dynamic architecture of the cell, including cellular modes of organization, dynamics and energy dissipation, molecular transport, motility, regulation, and adaptability. (Same course as EMS 288 and BPH 288.) Effective: 2017 Winter Quarter.

BIM 289A—Selected Topics in Biomedical Engineering; Cellular and Molecular Systems Engineering (1-5)
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. Selected topics in Cellular and Molecular Systems Engineering. May be repeated for credit when topic differs. Effective: 2011 Fall Quarter.

BIM 289B—Selected Topics in Biomedical Engineering; Biomedical Imaging (1-5)
Variable. Prerequisite(s): Consent of Instructor. Selected topics in Biomedical Imaging. May be repeated for credit when topic differs. Effective: 2011 Fall Quarter.

BIM 289C—Selected Topics in Biomedical Engineering; Computational Bioengineering (1-5)
Variable. Prerequisite(s): Consent of Instructor. Selected topics in Computational Bioengineering. May be repeated for credit when topic differs. Effective: 2011 Fall Quarter.

BIM 289D—Selected Topics in Biomedical Engineering; Cell and Tissue Biomechanics (1-5)
Variable. Prerequisite(s): Consent of Instructor. Selected topics in Cell and Tissue Biomechanics. May be repeated for credit when topic differs. Effective: 2011 Fall Quarter.

BIM 289E—Selected Topics in Biomedical Engineering; Analysis of Human Movement (1-5)
Variable. Prerequisite(s): Consent of Instructor. Selected topics in Analysis of Human Movement. May be repeated for credit when topic differs. Effective: 2011 Fall Quarter.

BIM 290—Seminar (1)
Seminar—1 hour. Seminar in biomedical engineering (S/U grading only.) Effective: 1997 Winter Quarter.
BIM 290C—Graduate Research Conference (1)
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Individual and/or group conference on problems, progress, and techniques in biomedical engineering research. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

BIM 295—Literature in Neuroengineering (2)
Seminar—2 hours. Open to graduate students only. Critical presentation and discussion of current literature in neuroengineering. May be repeated for credit. (Same course as NSC 295.) (S/U grading only.) Effective: 2018 Fall Quarter.

BIM 298—Directed Group Study (1-5)
Variable—1-5 hours. Open to graduate students in the Biomedical Engineering Graduate Group, or consent of instructor. Directed group study in Biomedical Engineering. May be repeated for credit. (S/U grading only.) Effective: 2011 Fall Quarter.

BIM 299—Research (1-12)
Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

BIM 396—Teaching Assistant Training Practicum (1-4)
Variable. Prerequisite(s): Graduate standing. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

Biomedical Engineering (Graduate Group)

Biomedical Engineering (Graduate Group) | Biomedical Engineering Information
David Hawkins, Ph.D., Chairperson of the Group 530-752-2748
Group Office. 2306B Genome and Biomedical Sciences Facility; 530-752-2611; https://bmegg.ucdavis.edu/
Faculty. https://bmegg.ucdavis.edu/contacts/graduate-group-faculty/

Biomedical Engineering (Graduate Group) | Biomedical Engineering M.S.
David Hawkins, Ph.D., Chairperson of the Group 530-752-2748
Group Office. 2306B Genome and Biomedical Sciences Facility; 530-752-2611; https://bmegg.ucdavis.edu/
Faculty. https://bmegg.ucdavis.edu/contacts/graduate-group-faculty/

Graduate Study. The Graduate Group in Biomedical Engineering offers programs of study and research leading to the M.S. and Ph.D. degrees. The programs of study prepare students for professional work in the effective integration of engineering with medical and biological sciences. Research strengths lie in the areas of imaging, tissue engineering and regenerative medicine, sensor and MEMs systems, cellular and molecular mechanics, computational modeling, targeted therapeutics, orthopedic biomechanics, biofluids and transport, and human movement. This broad interdepartmental program is best suited for students who are capable of and comfortable with considerable independence. Each student, together with an adviser, defines a specific course of study suited to individual goals.

Preparation. The Group regards strong competence in mathematics and engineering as necessary for successful completion of study. Prior course work in these areas is emphasized in the evaluation of applications. Some undergraduate training can be acquired after admission to the Group, but it may require an additional year of study.

Courses. See Engineering: Biomedical.

Biomedical Engineering (Graduate Group) | Biomedical Engineering Ph.D.
David Hawkins, Ph.D., Chairperson of the Group 530-752-2748
Group Office. 2306B Genome and Biomedical Sciences Facility; 530-752-2611; https://bmegg.ucdavis.edu/

Biophysics (Graduate Group)

Biophysics (Graduate Group) | BPH Ph.D.

John Voss, Ph.D., Chairperson of the Group

Group Office. 227A Life Sciences; 530-752-4863; http://bph.ucdavis.edu/

Faculty. http://bph.ucdavis.edu/faculty/

Graduate Study. The Biophysics Graduate Group offers a program leading to a Ph.D. degree in biophysics. The interdisciplinary program prepares students to conduct independent research at the interface of physics, chemistry, and biology. Faculty members have particular research interests in structural biology, membrane dynamics, mechanisms of catalysis and energy transduction, computational biology, theory, neuroscience, and imaging. Students choose from the broad biophysics research venues a research laboratory that matches their interests and career goals.

The Master of Sciences degree is offered only en route to the Ph.D.

Biophysics (Graduate Group) | BPH Courses

Courses in BPH:

BPH 200A—Current Techniques in Biophysics (3)
Lecture—3 hours. Prerequisite(s): BIS 102; CHE 110A; Or equivalents. Current Techniques in Biophysics. Topics in 200A include mathematical methods, modeling, mass spectrometry, stochastic process, scanning probe microscopy, electron microscopy, fluorescence, membrane diffusion/mechanics, and single particle tracking. (S/U grading only.) Effective: 2009 Winter Quarter.

BPH 200B—Current Techniques in Biophysics (3)
Lecture—3 hours. Prerequisite(s): CHE 110A; BIS 102; Or equivalent of BIS 102. Current Techniques in Biophysics. Topics include protein folding, membrane structure and dynamics, Raman spectroscopy, fluorescence resonance energy transfer, time resolved fluorescence, quantum dot, fluorescence imaging,esr, high resolution nmr, and in vivo nmr. (S/U grading only.) Effective: 2007 Spring Quarter.

BPH 200LA—Biophysics Laboratory (3)
Laboratory—18 hours. Prerequisite(s): BPH 200 (can be concurrent) One five-week laboratory assignment in the research laboratory of a Biophysics Graduate Group faculty member. Individual research problems with emphasis on methodological/procedural experience and experimental design. May be repeated up to 4 time(s). Effective: 1997 Winter Quarter.

BPH 200LB—Biophysics Laboratory (6)
Laboratory. Prerequisite(s): BPH 200 (can be concurrent) Two fiveweek laboratory assignments in the research laboratories of Biophysics Graduate Group faculty members. Individual research problems with emphasis on methodological/procedural experience and experimental design. May be repeated up to 2 time(s). Effective: 1997 Winter Quarter.

BPH 231—Biological Nuclear Magnetic Resonance (3)
Lecture—3 hours. Prerequisite(s): MCB 221A; or Consent of Instructor. Or the equivalent. Principles and applications
of magnetic resonance in biomedicine. Fundamental concepts and the biophysical basis for magnetic resonance applications in areas of tissue characterization/imaging, metabolic regulation, and cellular bioenergetics. (Same course as BCM 231.) Effective: 1997 Winter Quarter.

**BPH 241—Membrane Biology (3)**
Lecture—3 hours. Prerequisite(s): BIS 102; BIS 103; BIS 104; or Consent of Instructor. Advanced topics on membrane biochemistry and biophysics. Relationship of the unique properties of biomembranes to their roles in cell biology and physiology. Effective: 2017 Winter Quarter.

**BPH 255—Nanoscale Imaging for Molecular Medicine (3)**
Lecture/Discussion—3 hours. Prerequisite(s): BIM 202 highly recommended; graduate standing. Current and emerging technologies to visualize biological structures and processes at size scales = 100 nanometers – and their application towards the advancement of molecular medicine. Technologies include superresolution optical microscopy electron microscopy and tomography. Emphasis on quantitative imaging. (Same course as BIM 255.) Effective: 2017 Spring Quarter.

**BPH 271—Optical Methods in Biophysics (4)**
Discussion/Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): BIS 102; EAD 108B; CHE 110A; Or equivalents. Principal optical techniques used to study biological structures and their related functions. Specific optical techniques useful in the studies of protein-nucleic acid, protein-membrane and protein-protein interactions. Biomedical applications of optical techniques. Effective: 2017 Spring Quarter.

**BPH 288—Living Matter: Physical Biology of the Cell (3)**
Lecture—3 hours. Open to any student possessing general background in any disciplines of physical or biological sciences and engineering. Introduction to the origin, maintenance, and regulation of the dynamic architecture of the cell, including cellular modes of organization, dynamics and energy dissipation, molecular transport, motility, regulation, and adaptability. (Same course as BIM 288 and EMS 288.) Effective: 2017 Winter Quarter.

**BPH 290—Biophysics Seminar (1)**
Seminar—1 hour. Prerequisite(s): Graduate standing or consent of instructor. Presentation of current research by experts in biophysics. May be repeated for credit. (S/U grading only.) Effective: 2004 Winter Quarter.

**BPH 290C—Research Conference in Biophysics (1)**
Discussion—1 hour. Prerequisite(s): BPH 299 (can be concurrent); Graduate standing in Biophysics and/or consent of instructor. Presentation and discussion of faculty and graduate-student research in biophysics. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

**BPH 293—Introduction to Research Topics (1)**
Seminar—1 hour. Presentation of current research activities of the Biophysics Graduate Group faculty. Facilitation of students in developing their research interest, and promoting collegial interactions. May be repeated up to 1 time(s) if topics differ. (S/U grading only.) Effective: 2003 Fall Quarter.

**BPH 298—Group Study (1-5)**
Variable—1-5 hours. (S/U grading only.) Effective: 1997 Winter Quarter.

**BPH 299—Research (1-12)**
Variable—3-36 hours. (S/U grading only.) Effective: 1997 Winter Quarter.

**Biostatistics (Graduate Group)**

**Biostatistics (Graduate Group) | BST Information**

Kyoungmi Kim, Ph.D. (Public Health Sciences), Chairperson of the Group

**Group Office.** 4118 Mathematical Sciences Building; 530-341-2987; [http://biostat.ucdavis.edu/](http://biostat.ucdavis.edu/)

**Faculty.** [http://biostat.ucdavis.edu/about/faculty.html](http://biostat.ucdavis.edu/about/faculty.html)

**Biostatistics (Graduate Group) | BST M.S.**

Kyoungmi Kim, Ph.D. (Public Health Sciences), Chairperson of the Group

**Group Office.** 4118 Mathematical Sciences Building; 530-341-2987; [http://biostat.ucdavis.edu/](http://biostat.ucdavis.edu/)
Biostatistics is a field of science that uses quantitative methods to study life sciences related problems that arise in a broad array of fields. The program provides students with, first, solid training in the biostatistical core disciplines and theory; second, with state-of-the-art knowledge and skills for biostatistical data analysis; third, substantial exposure to the biological and epidemiological sciences; and fourth, with a strong background in theoretical modeling, statistical techniques and quantitative as well as computational methods. Programs of study and research are offered leading to the M.S. and Ph.D. degrees. The program prepares students for interdisciplinary careers ranging from bioinformatics, environmental toxicology and stochastic modeling in biology and medicine to clinical trials, drug development, epidemiological and medical statistics. The program draws on the strengths of the Biostatistics faculty at UC Davis.

Preparation. Students should have one year of calculus; a course in linear algebra or one year of biological course work; facility with a programming language; and upper-division work in at least one of Mathematics, Statistics and Biology.

Graduate Advisor. Ana-Maria Iosif (Public Health Sciences)

Biostatistics (Graduate Group) | BST Ph.D.

Kyoungmi Kim, Ph.D. (Public Health Sciences), Chairperson of the Group

Group Office. 4118 Mathematical Sciences Building; 530-341-2987; http://biostat.ucdavis.edu/

Faculty. http://biostat.ucdavis.edu/about/faculty.html

Biostatistics (Graduate Group) | BST Courses

Courses in BST:

BST 222—Biostatistics: Survival Analysis (4)
Discussion/Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): STA 131C Incomplete data; life tables; nonparametric methods; parametric methods; accelerated failure time models; proportional hazards models; partial likelihood; advanced topics. (Same course as STA 222.) Effective: 2002 Fall Quarter.

BST 223—Biostatistics: Generalized Linear Models (4)
Discussion/Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): STA 131C Likelihood and linear regression; generalized linear model; Binomial regression; case-control studies; dose-response and bioassay; Poisson regression; Gamma regression; quasi-likelihood models; estimating equations; multivariate GLMs. (Same course as STA 223.) Effective: 2002 Fall Quarter.

BST 224—Analysis of Longitudinal Data (4)
Discussion/Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): (BST 222 or STA 222); (BST 223 or STA 223); STA 232B; or Consent of Instructor. Standard and advanced methodology, theory, algorithms, and applications relevant
for analysis of repeated measurements and longitudinal data in biostatistical and statistical settings. (Same course as STA 224.) Effective: 2005 Spring Quarter.

**BST 225—Clinical Trials (4)**
Discussion/Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): BST 223 or STA 223; or Consent of Instructor. Basic statistical principles of clinical designs, including bias, randomization, blocking, and masking. Practical applications of widely-used designs, including dose-finding, comparative and cluster randomization designs. Advanced statistical procedures for analysis of data collected in clinical trials. (Same course as STA 225.) Effective: 2005 Spring Quarter.

**BST 226—Statistical Methods for Bioinformatics (4)**
Discussion/Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): BST 131C or Consent of Instructor; Data analysis experience recommended. Standard and advanced statistical methodology, theory, algorithms, and applications relevant to the analysis of -omics data. (Same course as STA 226.) Effective: 2007 Winter Quarter.

**BST 227—Machine Learning in Genomics (4)**
Lecture/Discussion—3 hours; Project (Term Project). Prerequisite(s): STA 208 or ECS 171; or Consent of Instructor. Emerging problems in molecular biology and current machine learning-based solutions to those problem. How deep learning, kernel methods, graphical models, feature selection, non-parametric models and other techniques can be applied to application areas such as gene editing, gene network inference and analysis, chromatin state inference, cancer genomics and single cell genomics. Effective: 2019 Spring Quarter.

**BST 252—Advanced Topics in Biostatistics (4)**
Discussion/Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): BST 222; BST 223 Biostatistical methods and models selected from the following: genetics, bioinformatics and genomics; longitudinal or functional data; clinical trials and experimental design; analysis of environmental data; dose-response, nutrition and toxicology; survival analysis; observational studies and epidemiology; computer-intensive or Bayesian methods in biostatistics. May be repeated for credit with consent of advisor when topic differs. (Same course as STA 252.) Effective: 2002 Fall Quarter.

**BST 290—Seminar in Biostatistics (1)**
Seminar—1 hour. Restricted to graduate standing. Seminar on advanced topics in the field of biostatistics. Presented by members of the Biostatistics Graduate Group and other guest speakers. May be repeated up to 12 time(s). (S/U grading only.) Effective: 2002 Fall Quarter.

**BST 298—Directed Group Study (1-5)**
Variable—3-15 hours. Special topics in Biostatistics appropriate for group study at the graduate level. May be repeated for credit. Effective: 2004 Spring Quarter.

**BST 299—Special Study for Biostat Graduate Students (1-12)**
Variable—3-36 hours. Special topics in Biostatistics appropriate for directed individual study on advanced topics not otherwise covered in the Biostatistics curriculum. May be repeated for credit. (S/U grading only.) Effective: 2004 Spring Quarter.

**BST 299D—Dissertation Research (1-12)**
Variable—3-36 hours. Prerequisite(s): and Consent of Instructor. Advancement to Candidacy for Ph.D. Research in Biostatistics under the supervision of major professor. May be repeated for credit. (S/U grading only.) Effective: 2004 Spring Quarter.

**Biotechnology**

**Biotechnology | BIT Information**

(College of Agricultural and Environmental Sciences)

**Faculty.** Faculty includes members of the Departments of Animal Science; Engineering: Chemical Engineering and Materials Science; Computer Science; Engineering: Biological and Agricultural; Food Science and Technology; Land, Air, and Water Resources; Plant Pathology; Plant Sciences; Viticulture and Enology; and the College of Biological Sciences.

**Biotechnology | BIT B.S.**
Preparatory Subject Matter Units: 57-69

BIS 002A, 002B, 002C  15
CHE 002A, 002B, 002C  15
Mathematics, one of the following groups:
   MAT 016A, 016B; or MAT 017A, 017B; or MAT 021A, 021B  6-8

The Major Program

Every living organism, from the smallest and most primitive bacteria to every plant, insect, animal or human being, contains DNA as the primary genetic material. DNA directs all cellular processes, creating the incredible variety and diversity of living organisms in the biosphere. Biotechnology focuses on the mechanics of life processes and their application. Biotechnology means "life technology" and represents an integrated, multidisciplinary field, with a profound impact today on almost every aspect of human endeavor.

Preparatory Requirements. UC Davis students who wish to change their major to Biotechnology must complete the following courses (representing the subject areas of Biological Sciences, Chemistry, and Mathematics) with a grade point average of at least 2.500 in each subject area. All of these courses must be taken for a letter grade:

The Program. In the first two years, students develop a strong and general background in biological science with an emphasis on fundamental concepts and basic principles of genetics, molecular biology and cell biology. Four options, Animal Biotechnology, Plant Biotechnology, Fermentation/Microbial Biotechnology, and Bioinformatics, provide in-depth training and specialized knowledge in an aspect of biotechnology. Each option has a strong laboratory component to reinforce the theoretical concepts. Students also do an internship in a biotechnology company or university or government laboratory.

Internships and Career Opportunities. In the last decade, more industries are turning to biotechnology to solve problems and improve products, creating a growing job market for individuals trained in biotechnology in the agricultural, food and beverage, health care, chemical, pharmaceutical and biochemical, and environmental and bioremediation industries.

Graduates trained in the technologies designed for biotechnology will find their training applicable to advanced research in molecular biology, genetics, biochemistry, and the plant and animal sciences.

Major Advisor. J.I. Yoder (Plant Sciences) in 101 Asmundson Hall.

Advising Center for the major is located in 1220 Plant and Environmental Sciences; 530-752-1715.

**Total: 110-135**

### Biotechnology | BIT Courses

#### Courses in BIT:

- **BIT 001Y—Introduction to Biotechnology (4)**
  - Discussion—1 hour; Lecture—2 hours; Web Virtual Lecture—1 hour. Principles and technologies of biotechnology as applied to agriculture, the environment, and medicine. Business plans and presentation pitches for new biotechnology products. Bioinformatics approaches exploring genomic databases and DNA manipulations in silica. (Same course as BIT 001.) GE credit: SE. Effective: 2014 Spring Quarter.

- **BIT 091—Undergraduate Seminars in Biotechnology (1)**
  - Seminar—1 hour. Undergraduate oriented seminar series focused on biotechnology research and product development. Speakers from campus and the private sectors discuss ongoing research, product development and biotechnology careers. (P/NP grading only.) Effective: 2017 Winter Quarter.

- **BIT 092—Internship in Biotechnology (1-12)**
  - Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Work experience on or off campus in subject area pertaining to biotechnology or in a business, industry or agency associated with biotechnology. Internship supervised by faculty member in the animal or plant sciences. (P/NP grading only.) Effective: 1998 Fall Quarter.

- **BIT 098—Directed Group Study (1-5)**
  - Variable—1-15 hours. Prerequisite(s): Consent of Instructor. Directed group study. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 2016 Fall Quarter.

- **BIT 099—Special Study for Undergraduates (1-5)**
  - Independent Study—3-15 hours. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1998 Fall Quarter.

- **BIT 150—Applied Bioinformatics (4)**
  - Discussion/Laboratory—2 hours; Lecture—2 hours. Prerequisite(s): BIS 101; (ECS 010 or ECS 015 or PLS 021); (PLS 120 or STA 013 or STA 013Y or STA 100); or Consent of Instructor. Limited enrollment. Concepts and programs needed to apply bioinformatics in biotechnology research. Sequence analysis and annotation and use of plant and animal databases for students in biological and agricultural sciences. Two units of credit for students who have completed ECS 124. GE credit: SE, VL. Effective: 2018 Spring Quarter.

- **BIT 160—Principles of Plant Biotechnology (3)**
  - Lecture—3 hours. Prerequisite(s): (BIS 001A or BIS 002A); (BIS 101 or PLS 152) Principles and concepts of plant biotechnology including recombinant DNA technology, molecular biology, genomics, cell and tissue culture, gene transfer and crop improvement strategies using transgenic crops. Not open for credit to students who have completed PLB 160. (Former course PLB 160.) GE credit: SE. Effective: 2008 Winter Quarter.

- **BIT 161A—Genetics and Biotechnology Laboratory (6)**
  - Laboratory—9 hours; Lecture—3 hours. Prerequisite(s): PLS 152 or BIS 101; and Consent of Instructor. Techniques of
genetic analysis at the molecular level including recombinant DNA, gene mapping and basic computational biology. Not open for credit to students who have completed PLB 161A. GE credit: SE. Effective: 2010 Winter Quarter.

**BIT 161B—Plant Genetics and Biotechnology Laboratory (4)**
Laboratory—8 hours; Lecture—1 hour. Prerequisite(s): PLS 152 or BIS 101; and Consent of Instructor. Advanced techniques of genetic analysis at the molecular and cellular levels, including transformation, gene expression and analysis of transgenic plants. Not open for credit to students who have taken PLB 161B. (Former course PLB 161B). GE credit: SE, SL. Effective: 2011 Fall Quarter.

**BIT 171—Professionalism and Ethics in Genomics and Biotechnology (3)**
Discussion—2 hours; Lecture—1 hour. Prerequisite(s): Upper division standing in a natural science major. Real and hypothetical case studies to illustrate ethical issues in genomics and biotechnology. Training and practice in difficult ethical situations and evaluating personal and social consequences. GE credit: SE, SL, WE. Effective: 2005 Winter Quarter.

**BIT 188—Undergraduate Research Proposal (3)**
Lecture/Discussion—3 hours. Prerequisite(s): Upper division standing. Preparation and review of a scientific proposal. Problem definition, identification of objectives, literature survey, hypothesis generation, design of experiments, data analysis planning, proposal outline and preparation. (Same course as PLS 188.) GE credit: OL, SE, WE. Effective: 2009 Spring Quarter.

**BIT 189L—Laboratory Research in Genomics and Biotechnology (2-5)**
Discussion—1 hour; Laboratory—3-12 hours. Prerequisite(s): BIT 188; and Consent of Instructor. Formulating experimental approaches to current questions in biotechnology; performance of proposed experiments. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 2000 Spring Quarter.

**BIT 192—Internship in Biotechnology (1-12)**
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Work experience on or off campus in a subject area pertaining to biotechnology or in a business, industry or agency associated with biotechnology. Internship supervised by faculty member in the animal or plant sciences. (P/NP grading only.) Effective: 1998 Fall Quarter.

**BIT 194H—Honors Thesis in Biotechnology (1-2)**
Independent Study—3-6 hours. Prerequisite(s): BIT 188; BIT 189L; Consent of Instructor. Senior standing in Biotechnology with 3.250 GPA or higher. Independent study of selected topics under the direction of a member or members of the staff. Completion will involve the writing of a senior thesis. (P/NP grading only.) GE credit: SE, WE. Effective: 2016 Winter Quarter.

**BIT 198—Directed Group Study (1-5)**
Variable—1-15 hours. Prerequisite(s): Consent of Instructor. Directed group study. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 2016 Fall Quarter.

**BIT 199—Special Study for Advanced Undergraduates (1-5)**
Independent Study—3-15 hours. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1998 Fall Quarter.

### Biotechnology | DEB Courses

**Courses in DEB:**

**DEB 263—Biotechnology Fundamentals and Application (2)**
Lecture—2 hours. Prerequisite(s): BIS 101; BIS 102; MIC 102; or Consent of Instructor. Must be a graduate student in good standing. Fundamentals of molecular biology and chemical engineering involved in recombinant DNA technology. Topics: principles of rate processes of biological systems, optimization of bioreactors, and issues related to overexpression and production of recombinant molecules. Participation in student-directed team projects. Effective: 2016 Winter Quarter.

**DEB 282—Biotechnology Internship (7-12)**
Internship—21-36 hours. Prerequisite(s): Graduate standing and Consent of Instructor. Open only to students participating in the Designated Emphasis in Biotechnology program. Research at a biotechnology company or interdisciplinary cross-college lab for a minimum of 3 months as part of the Designated Emphasis in Biotechnology Program. (S/U grading only.) Effective: 2017 Winter Quarter.

**DEB 294—Current Progress in Biotechnology (1)**
Seminar—1 hour. Prerequisite(s): Graduate standing. Seminars presented by guest lecturers on subjects of their own
Bodega Marine Laboratory Program

Bodega Marine Laboratory Program | BML Program Information

http://bml.ucdavis.edu/

See also Biological Sciences, Bodega Marine Laboratory Program.

Integrative marine science courses at BML offer a multidisciplinary understanding of coastal systems through hands-on research, lab and field based courses. The program includes courses during spring quarter, Summer Sessions One and Two.

Spring Quarter Program

The spring quarter curriculum is currently under revision and a new integrated curriculum will be in place in the near future that is 12-15 units. For updates, please check http://bml.ucdavis.edu/. Scholarships will be available to defray the costs of housing at BML.

For more details, follow developments of the spring quarter curriculum on the BML website at http://bml.ucdavis.edu/.

Summer Session Courses

This integrated program offers students a multidisciplinary understanding of coastal ecosystems and oceanography through intensive, hands on lab and field courses taught at Bodega Marine Laboratory. Students can take up to 10 units in each Summer Session. Applications are due in Spring of each year. Scholarships are available to defray the costs of housing at BML.

For more course detail, see full description under appropriate academic department listing or http://bml.ucdavis.edu/.

Offerings include:

Summer Session One

*Coastal Marine Research and Experimental Invertebrate Biology. BIS 124, EVE 114*

*Effects of Coastal Pollution on Marine Organisms. ETX/NUT 127*

Summer Session Two

*Biological Oceanography. GEL/ESP 150C*

*Coastal Oceanography. ESP 152*

*Global Change Ecology. ESP 120*

*Marine and Coastal Field Ecology. ESP 124*

Course offerings, sequence structure and instructors may vary from year to year.

Bodega Marine Laboratory spring and summer programs are residential, with students housed on the laboratory grounds. Participants are assessed a room and board fee in addition to standard campus registration fees. Financial aid may be available to eligible students from campus. Scholarships are available from Bodega Marine Laboratory. Applications and consent of instructors are required.

Additional information is available directly from:

The UC Davis Master of Science in Business Analytics program is designed to prepare you to thrive as an innovative leader in the digital economy.

Capital Area North Doctorate in Education Leadership (CANDEL) Education (Graduate Group)

Capital Area North Doctorate in Education Leadership (CANDEL) Education (Graduate Group) | CANDEL Ed.D.

(School of Education)
School of Education Building; 530-752-0757; http://education.ucdavis.edu
Faculty. https://education.ucdavis.edu/candel-program-faculty

The Capital Area North Doctorate in Educational Leadership (CANDEL) program leading to a Doctor of Education (Ed.D.) degree, is intended primarily for working professionals in schools, community colleges, and related educational capacities that reside in the greater Sacramento Valley, Bay Area, and Northern California. Graduates of this program will be prepared to lead in educational environments that promote learning, equity and achievement for all students. Armed with both real-world, problem-based learning, and scholarship skills, program graduates will be uniquely ready to manage the complexities of educational organizations, effect school change processes and shape the educational policies that bear on the practice of education in the public setting.

The Cell Biology Major Program

The Cell Biology major provides students with a comprehensive understanding of the cell, the basic structural and functional unit of all living organisms.

The Program. To understand living organisms, the biologist must understand the cell. Hence, cell biology lies at the core of the biological sciences. Students taking this major gain a solid foundation in biological principles. The major emphasizes how cellular organization and function contribute to the development, maintenance and reproduction of adult organisms. The major illustrates the ways in which principles derived from the physical sciences, genetics, biochemistry, molecular biology and physiology are integrated in the study of living cells and emphasizes the experimental nature of the study of cell biology.

Career Alternatives. The major provides an excellent background for students wishing to enter postgraduate and professional programs in biological, health sciences or veterinary sciences; for students pursuing careers involving
teaching or research in the biological sciences; for students interested in careers in the biotechnological or pharmaceutical industries; or for students interested in careers related to the administrative, legal or commercial aspects of biomedical science.

**Master Advisor.** F.J. McNally

**Advising.** Biology Academic Success Center (BASC); 1023 Sciences Laboratory Building; 530-752-0410; http://www.biosci.ucdavis.edu/BASC.

No more than four units of research (193, 194H, 199) may be used for credit in this category.

Total: 100-115
Courses in MCB:

**MCB 010—Introduction to Human Heredity (4)**
Discussion—1 hour; Lecture—3 hours. Topics in human heredity and human gene structure and function, including the genetic basis of human development, causes of birth defects, mental retardation, genetic diseases, sexual determination, development, and behavior. GE credit: QL, SE, SL. Effective: 2004 Spring Quarter.

**MCB 023—Biography of Cancer: Past, Present and Future (3)**

**MCB 099—Special Study (1-5)**
Independent Study—3-15 hours. Prerequisite(s): Consent of Instructor. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

**MCB 110Y—iBioseminars in Cell and Molecular Biology (3)**
Lecture/Discussion—2 hours; Web Electronic Discussion—1.5 hours; Web Virtual Lecture—1.5 hours. Prerequisite(s): BIS 101; BIS 102; (BIS 103 or BIS 105); BIS 104 Hybrid course in Cell and Molecular Biology for senior level (1) Biochemistry/Molecular Biology; (2) Genetics; or (3) Cell Biology majors. Face-to-face instruction combined with online lectures available at iBioseminars website delivered by leading researchers in Cell and Molecular Biology. Students who have previously taken MCB 110V cannot receive credit for MCB 110Y. GE credit: SE, SL. Effective: 2014 Fall Quarter.

**MCB 120—Molecular Biology and Biochemistry Laboratory Associated Lecture (3)**
Discussion/Laboratory—1 hour; Lecture—2 hours. Prerequisite(s): BIS 102; or Consent of Instructor. Pass One restricted to upper division Biochemistry & Molecular Biology majors; concurrent enrollment in MCB 120L required; on-time attendance for first lecture is mandatory. Introduction to laboratory methods and procedures employed in studying molecular biology and biochemical processes. Lecture component for MCB 120L. GE credit: SE, SL. Effective: 2018 Winter Quarter.

**MCB 120L—Molecular Biology and Biochemistry Laboratory (3)**
Laboratory—10 hours. Prerequisite(s): BIS 102; or Consent of Instructor. Must be taken concurrently with MCB 120. Pass One restricted to upper division Biochemistry & Molecular Biology majors; concurrent enrollment in MCB 120 required; on-time attendance for first lab is mandatory. Introduction to laboratory methods and procedures employed in studying molecular biology and biochemical processes. Designed for students who need experience in use of molecular biology and biochemical techniques as research and analytical tools. GE credit: QL, SE, VL, WE. Effective: 2018 Winter Quarter.

**MCB 121—Advanced Molecular Biology (3)**
Lecture—3 hours. Prerequisite(s): BIS 101; (BIS 102 (can be concurrent) or BIS 105 (can be concurrent) or ABI 102 (can be concurrent)); BIS 102 or BIS 105 or ABI 102 can be concurrent although prior completion is recommended. Structure, expression, and regulation of eukaryotic genes. Chromosome structure and replication; gene structure, transcription, and RNA processing; protein synthesis and translation control; development, immune system, and oncogenes. Not open for credit to students who have completed MCB 161. GE credit: QL, SE, SL. Effective: 2014 Fall Quarter.

**MCB 123—Behavior and Analysis of Enzyme and Receptor Systems (3)**
Lecture—3 hours. Prerequisite(s): BIS 103 Introduction to the principles of enzyme kinetics and receptor-ligand interactions with emphasis on metabolic regulation and data analysis. Topics include simultaneous equilibria, chemical and steady-state kinetics, allosteric enzymes, multireactant systems, enzyme assays, membrane transport and computer-assisted simulations and analyses. GE credit: QL, SE. Effective: 1997 Winter Quarter.

**MCB 124—Macromolecular Structure and Function (4)**
Lecture—4 hours. Prerequisite(s): BIS 103; CHE 118C An in-depth investigation into protein and nucleic acid structure and thermodynamics and how these properties influence their biological functions. Key examples of important functional classes of these molecules will be examined. Not open for credit to students who have completed MCB 122 or CHE 108. GE credit: SE. Effective: 2012 Fall Quarter.

**MCB 126—Plant Biochemistry (3)**
Lecture—3 hours. Prerequisite(s): BIS 103 or BIS 105 The biochemistry of important plant processes and metabolic pathways. Discussion of methods used to understand plant processes, including use of transgenic plants. (Same course as PLB 126.) GE credit: SE, SL. Effective: 2008 Spring Quarter.
MCB 138—Undergraduate Seminar in Biochemistry (1)
Seminar—1 hour. Prerequisite(s): BIS 103 Discussion of the historical developments of modern biochemistry or current major research problems. May be repeated twice for credit when topic differs. May be repeated up to 2 time(s). (P/NP grading only.) GE credit: OL, SE. Effective: 1997 Winter Quarter.

MCB 139—Undergraduate Seminar in Biochemistry (2)
Seminar—2 hours. Prerequisite(s): BIS 103 Discussion of the historical developments of modern biochemistry or current major research problems. May be repeated up to 2 time(s) when topic differs. (P/NP grading only.) GE credit: OL, SE. Effective: 2015 Spring Quarter.

MCB 140—Cell Biology Laboratory Associated Lecture (3)
Discussion/Laboratory—1 hour; Lecture—2 hours. Prerequisite(s): BIS 104; or Consent of Instructor. Pass One restricted to upper division Cell Biology majors; concurrent enrollment in MCB 140L required; on-time attendance for first lecture is mandatory. Lectures illustrating the principles of cell biology with emphasis on light microscopy. Accompanies MCB 140L. GE credit: OL, SE, SL, WE. Effective: 2020 Winter Quarter.

MCB 140L—Cell Biology Laboratory (5)
Discussion—1 hour; Laboratory—6 hours; Lecture—2 hours. Prerequisite(s): BIS 104 (can be concurrent) Exercises illustrating the principles of cell biology with emphasis on light microscopy. GE credit: OL, QL, SE, SL, VL. Effective: 2009 Winter Quarter.

MCB 142—Advanced Cell Biology: Contractile and Motile Systems (4)
Lecture—3 hours; Term Paper. Prerequisite(s): BIS 102; BIS 104 (can be concurrent); MAT 016B Advanced cell biology with emphasis on molecular, biophysical and cellular properties of contractile and motile systems. GE credit: SE. Effective: 1998 Spring Quarter.

MCB 143—Cell and Molecular Biophysics (3)
Lecture—3 hours. Prerequisite(s): BIS 101; BIS 102; BIS 103; BIS 104 Physical chemical principles by which molecules form living, moving, reproducing cells. Physical nature of cytoplasm; molecular structure/bonding in macromolecules, macromolecular assemblies and protein machines. Physical techniques and modeling of cytoskeletal polymer-motor dynamics and function during intracellular transport, mitosis and motility. GE credit: QL, SE. Effective: 2008 Fall Quarter.

MCB 144—Mechanisms of Cell Division (3)
Lecture—3 hours. Prerequisite(s): BIS 101; BIS 102; BIS 104 The molecules and mechanisms that allow eukaryotic cells to coordinate cell growth, DNA replication, segregation of chromosomes and cell division. GE credit: SE, WE. Effective: 2002 Winter Quarter.

MCB 145—Assembly and Function of Cell Signaling Machinery (3)
Lecture—3 hours. Prerequisite(s): BIS 101; BIS 102; BIS 104 Molecular basis of cell signaling, including positioning of cellular machinery, components of various signaling pathways, and downstream effects of signaling on cell adhesion, cell differentiation, and programmed cell death. GE credit: SE. Effective: 2002 Spring Quarter.

MCB 148—Undergraduate Seminar in Cell Biology (2)
Seminar—2 hours. Prerequisite(s): Upper division standing in the biological sciences or a related discipline. Student reports on current topics in cell biology with emphasis on integration of concepts, synthesis, and state-of-the-art research approaches. Reviews of literature and reports of undergraduate research may be included. May be repeated for credit. (P/NP grading only.) GE credit: OL, SE. Effective: 1997 Winter Quarter.

MCB 150—Developmental Biology (4)
Lecture—4 hours. Prerequisite(s): BIS 101 Analysis of the mechanistic basis for animal development with a focus on experimental evidence and the relevant fundamental experimental strategies. Fertilization and early development, morphogenesis and patterning, cell differentiation, regulation of cell proliferation and tissue growth. GE credit: SE, SL. Effective: 2012 Fall Quarter.

MCB 158—Undergraduate Seminar in Developmental Biology (2)
Seminar—2 hours. Prerequisite(s): Upper division standing in the biological sciences or a related discipline. Student reports on current topics in cell biology with emphasis on integration of concepts, synthesis, and state-of-the-art research approaches. Reviews of literature and reports of undergraduate research may be included. May be repeated for credit. May be repeated for credit. (P/NP grading only.) GE credit: OL, SE. Effective: 1997 Winter Quarter.

MCB 160—Genetics Laboratory Associated Lecture (3)
Discussion/Laboratory—1 hour; Lecture—2 hours. Prerequisite(s): BIS 101; or Consent of Instructor. Pass One
restricted to upper division Genetics and Genomics majors; concurrent enrollment in MCB 160L required; on-time attendance for first lecture is mandatory. Lecture instruction in the theoretical basis of laboratory techniques in transmission and molecular genetics, discussion of lab results and experiment interpretation. GE credit: QL, SE, WE. Effective: 2019 Spring Quarter.

MCB 160L—Principles of Genetics Laboratory (5)
Discussion/Laboratory—1 hour; Laboratory—6 hours; Lecture—2 hours. Prerequisite(s): BIS 101 Laboratory work in basic and molecular genetics including gene mapping, isolation and characterization of mutants in eukaryotic model systems, reverse genetics, gel electrophoresis, recombinant DNA techniques, and PCR. GE credit: QL, SE, VL, WE. Effective: 2012 Fall Quarter.

MCB 162—Human Genetics and Genomics (3)
Lecture—3 hours. Prerequisite(s): BIS 101 The human genome and genetic variation in human populations, molecular and genomic approaches in the practice of human genetics, epigenetic gene regulation, personal genetics and genomic medicine. GE credit: QL, SE, SL. Effective: 2016 Fall Quarter.

MCB 163—Developmental Genetics (3)
Lecture—3 hours. Prerequisite(s): MCB 121 (can be concurrent) Current aspects of developmental genetics. Historical background and current genetic approaches to the study of development of higher animals. GE credit: SE, SL. Effective: 2017 Fall Quarter.

MCB 164—Advanced Eukaryotic Genetics (3)
Lecture—3 hours. Prerequisite(s): MCB 121 Five basic operations of genetic analysis: mutation, segregation, recombination, complementation, and regulation. Emphasis on the theory and practice of isolating and analyzing mutations, as well as understanding mechanisms underlying both Mendelian and epigenetic inheritance. GE credit: SE, SL. Effective: 2017 Winter Quarter.

MCB 178—Undergraduate Seminar in Molecular Genetics (1)
Seminar—1 hour. Prerequisite(s): BIS 101; MCB 121 (can be concurrent); Upper division standing, and completion or concurrent enrollment in MCB 121. Discussion of current topics in molecular genetics to show advanced applications of basic principles and to highlight professional career opportunities. May be repeated up to 1 time(s) when topic differs. (P/NP grading only.) GE credit: OL, SE. Effective: 2011 Fall Quarter.

MCB 182—Principles of Genomics (3)
Lecture—3 hours. Prerequisite(s): BIS 101 Fundamentals of genomics, including structural genomics, functional genomics, proteomics, and bioinformatics, focusing on the impact of these disciplines on research in the biological sciences. Social impacts of genomic research. GE credit: SE. Effective: 2017 Winter Quarter.

MCB 190C—Undergraduate Research Conference (1)
Discussion—1 hour. Prerequisite(s): MCB 193 (can be concurrent) or MCB 199 (can be concurrent); and Consent of Instructor. Upper division standing; MCB 193 or MCB 199 required concurrently. Presentation and discussion of current research by faculty and students. May be repeated for credit. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

MCB 191—Introduction to Research (1)
Seminar—1 hour. Prerequisite(s): BIS 102 (can be concurrent); or Consent of Instructor. Various topics in molecular and cellular biology including biochemistry, genetics, and cell biology will be discussed, along with ways undergraduates can participate in research projects of faculty members. May be repeated for credit. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

MCB 192—Internship (1-12)
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Completion of 84 units. Technical and/or practical experience on and off campus, supervised by a member of the Section of Molecular and Cellular Biology faculty. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

MCB 193—Advanced Research (3)
Discussion—1 hour; Laboratory—6 hours. Prerequisite(s): Consent of Instructor. Upper division standing, completion of an upper division Molecular and Cellular Biology laboratory course. Research project carried out under the supervision of a faculty sponsor. Discussion and analysis of results and proposed experiments on a weekly basis with faculty sponsor. May include presentation of a seminar to a research group. May be repeated for credit. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

MCB 194—Thesis Research (3)
Independent Study—9 hours. Prerequisite(s): Consent of Instructor. 6 units of course 193 and/or 199 with faculty
director; senior standing. Continuation of an intensive, individual laboratory research project in biochemistry, genetics, or cell biology culminating with the presentation of the work in a written thesis and in a seminar. (P/NP grading only.) GE credit: OL, SE, WE. Effective: 2015 Fall Quarter.

**MCB 194H—Research Honors (3)**
Independent Study—9 hours. Prerequisite(s): Consent of Instructor. 6 units of MCB 193 and/or MCB 199 with faculty director; senior standing; GPA of at least 3.250. Honors project. Continuation of an intensive, individual laboratory research project in biochemistry, genetics, or cell biology culminating with the presentation of the work in a written thesis and in a seminar. (P/NP grading only.) GE credit: OL, SE, WE. Effective: 1997 Winter Quarter.

**MCB 197T—Tutoring in Molecular and Cellular Biology (1-5)**
Tutorial—2-6 hours. Prerequisite(s): Consent of Instructor. Upper division standing, completion of course to be tutored. Assisting the instructor in one of the section's regular courses by tutoring individual or small groups of students in a laboratory, in voluntary discussion groups, or other voluntary course activities. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 2004 Fall Quarter.

**MCB 198—Directed Group Study (1-5)**
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

**MCB 199—Special Study for Advanced Undergraduates (1-5)**
Independent Study—3-15 hours. Prerequisite(s): Consent of Instructor. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

**MCB 248—Seminar in Cell Biology (2)**
Seminar—2 hours. Prerequisite(s): Consent of Instructor. Discussion of recent literature on the physical and chemical aspects of organization and function of living systems, topics of current interest in ultrastructure and function of cells. Organizational and functional properties of the molecular and cellular levels of biological systems. May be repeated for credit. Effective: 1997 Winter Quarter.

**MCB 258—Seminar in Development (2)**
Seminar—2 hours. Prerequisite(s): Consent of Instructor. Reports and discussion on embryology, morphogenesis, and developmental mechanisms. May be repeated for credit. May be repeated for credit. Effective: 1997 Winter Quarter.

**MCB 259—Literature in Developmental Biology (1)**
Seminar—1 hour. Prerequisite(s): Consent of Instructor. Critical presentation and analysis of recent journal articles in developmental biology. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

**MCB 282—Biotechnology Internship (7-12)**
Internship—21-36 hours. Prerequisite(s): Consent of Instructor. Graduate standing. Open only to students participating in the Designated Emphasis in Biotechnology program. Research at a biotechnology company or interdisciplinary cross-college lab for a minimum of 3 months as part of the Designated Emphasis in Biotechnology Program. (S/U grading only.) Effective: 2004 Winter Quarter.

**MCB 290C—Research Conference (1)**
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Graduate standing. Presentations and critical discussions of faculty and graduate student research in molecular and cellular biology including biochemistry, genetics, and cell biology. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

**MCB 291—Current Progress in Molecular and Cellular Biology (1)**
Seminar—1 hour. Prerequisite(s): Graduate standing or consent of instructor. Seminars presented by guest lecturers on subject of their own research activities. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

**MCB 295—Literature in Molecular and Cellular Biology (1)**
Seminar—1 hour. Prerequisite(s): Consent of Instructor. Graduate standing. Critical reading and evaluation of current literature in molecular and cellular biology disciplines. Papers will be presented and discussed in detail. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

**MCB 298—Group Study (1-5)**
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.
MCB 299—Research (1-12)
Independent Study—3-36 hours. (S/U grading only.) Effective: 1997 Winter Quarter.

MCB 390—Methods of Teaching (1)
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Graduate standing. Practical experience in the methods and problems of teaching biochemistry/genetics/cell biology. Includes analysis of texts and supporting material, discussion of teaching techniques, preparing for and conducting discussion and laboratory sections, formulating examinations under supervision of instructor. Participating in the teaching program required for Ph.D. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

The Department of Chemical Engineering offers two undergraduate programs: Chemical Engineering and Biochemical Engineering.

Mission Statement. To advance, through teaching and research programs, the frontiers of chemical and biochemical engineering; to educate students with a sense of professionalism and community; and to serve the public of California through outreach efforts.

Honors Program. An Honors Program is available to qualified students in the Chemical Engineering and Biochemical Engineering majors. It is a two-year program designed to challenge the most talented students in these majors. Students are invited to participate in their sophomore year. In the upper division, students will complete either an honors thesis or a project that might involve local industry. Students must maintain a grade point average of 3.500 to continue in the program. Successful completion of the Honors Program will be acknowledged on the student's transcript.

Chemical Engineering Undergraduate Program

The Chemical Engineering program is accredited by the Engineering Accreditation Commission of ABET; see http://www.abet.org.

Chemical engineers apply the principles of chemistry and engineering to produce useful commodities, ranging from fuels to polymers. Chemical engineers are increasingly concerned with chemical and engineering processes related to the environment and food production. They work in diverse areas ranging from integrated circuits to integrated waste management. Preparation for a career in chemical engineering requires an understanding of both engineering and chemical principles to develop proficiency in conceiving, designing, and operating new processes.

The chemical engineering curriculum has been planned to provide a sound knowledge of engineering and chemical sciences so that you may achieve competence in addressing current and future technical problems.

Objectives. The objectives of the program in Chemical Engineering are to educate students in the fundamentals of chemical engineering, balanced with the application of these principles to practical problems; to train them as independent, critical thinkers who can also function effectively in teams; to foster a sense of community, ethical responsibility, and professionalism; to prepare them for careers in industry, government, and academia; to illustrate the necessity for continuing education and self-learning; and to help students to learn to communicate proficiently in written and oral form.

Students are encouraged to adhere carefully to all prerequisite requirements. The instructor is authorized to drop students from a course for which stated prerequisites have not been completed.

Exclusive of General Education units, the minimum number of units required for the Chemical Engineering major is 156.

Options for Junior and Senior Year. The focus in the junior year is on fundamentals such as thermodynamics, fluid mechanics, energy transfer, and mass transfer phenomena. In the senior year, students draw these fundamentals together and apply them in a study of kinetics, process design, and process dynamics and control. The program's requirement of eight chemical engineering elective units allow students to strengthen specific areas in chemical engineering, explore new areas, or pursue new areas of specialization.
ECH 140  Mathematical Methods in Biochemical and Chemical Engineering 4

CHE 128B  Organic Chemistry 3
CHE 129A  Organic Chemistry Laboratory 2

Chemical Engineering and Materials Science Electives
Choose any upper division courses in the areas of Chemistry (CHE), Chemical Engineering (ECH) or Materials Science and Engineering (EMS). You may receive elective credit up to a maximum of four units for any combination of engineering courses numbered 190C, 192, 198, and 199.
Courses may also be selected from the following:

- BIS 102  Structure and Function of Biomolecules 3
- FST 100A  Food Chemistry 4
- FST 102A  Malting and Brewing Science 4
- FST 102B  Practical Malting and Brewing 4
- FPS 150  Polymer Syntheses and Reactions 3

Upper Division Composition Requirement
Choose one; a grade of C- or better is required:

- UWP 102E  Writing in the Disciplines: Engineering 4
- UWP 102F  Writing in the Disciplines: Food Science and Technology 4
- UWP 104A  Writing in the Professions: Business Writing 4
- UWP 104E  Writing in the Professions: Science 4
- UWP 104T  Writing in the Professions: Technical Writing 4
- Passing the Upper Division Composition Exam. 0

Total: 156-161

Chemical Engineering; Engineering | ECH M.S.
(College of Engineering)
Roland Faller, Ph.D., Chairperson of the Department; 530-752-6496; Fax 530-752-1031
Department Office. 3001 Ghausi Hall; Fax 530-752-1031; http://che.engineering.ucdavis.edu/
Faculty. https://che.engineering.ucdavis.edu/people/faculty/
Graduate Program in the Department of Chemical Engineering
The Department of Chemical Engineering is home to a top-20 ranked graduate program in Chemical Engineering. We offer a unique environment for graduate studies, we are large enough to boast world-renowned faculty and state-of-the-art research facilities, yet small enough to give every graduate student personal attention.
The Graduate Program in Chemical Engineering
M.S. and Ph.D.
Ph.D. designated emphases are available as specializations in biotechnology, biophysics, and nuclear science. [http://che.engineering.ucdavis.edu; 530-752-7952](http://che.engineering.ucdavis.edu; 530-752-7952)

The Chemical Engineering Graduate Program provides students with a strong grounding in the fundamentals and explores critical applications in a wide range of process systems.

Doctoral students are typically offered competitive four-year financial offers of fellowships and research/teaching assistantships which include tuition, fees, and a stipend. Financial offers are subject to satisfactory progress towards completion of degree requirements.

Research areas include biochemistry, biomaterials, biotechnology, biomedical engineering, catalysis, colloids and surface science, electrochemical properties and devices, fluid mechanics and rheology, green engineering and design, interfaces, mathematical modeling, molecular modeling, nanotechnology, polymers, process control, reaction engineering, renewable energy, thermochemistry, thin films, and transport phenomena.

**Chemical Engineering; Engineering | ECH Courses**

Courses in ECH:

**ECH 001—Design of Coffee—An Introduction to Chemical Engineering (3)**
Laboratory—2 hours; Lecture—1 hour; Project (Term Project)—1 hour. Non-mathematical introduction to how chemical engineers think, illustrated by elucidation of the process of roasting and brewing coffee. Qualitative overview of the basic principles of engineering analysis and design. Corresponding experiments testing design choices on the sensory qualities of coffee. Not open for credit to students who have completed ECM 1, ECM 5, or ECH 5. GE credit: SE, SL, VL. Effective: 2017 Spring Quarter.

**ECH 005—Introduction to Analysis and Design in Chemical Engineering (3)**
Laboratory—2 hours; Lecture—2 hours. Prerequisite(s): MAT 021A; MAT 021B (can be concurrent) Quantitative introduction to the engineering principles of analysis and design. Applications of differential and integral calculus. Laboratory experiments using coffee to illustrate chemical engineering concepts and to conduct an engineering
design competition. Only two units of credit to students who have completed ECM 001 or ECH 001; not open for credit to students who have completed ECM 005. GE credit: QL, SE. Effective: 2017 Winter Quarter.

**ECH 051—Material Balances (4)**
Lecture—4 hours. Prerequisite(s): MAT 021C C- or better; MAT 021D (can be concurrent) Application of the principle of conservation of mass to single and multicomponent systems in chemical process calculations. Studies of batch, semi-batch, and continuous processes involving mass transfer, phase change, and reaction stoichiometry. Not open for credit to students who have completed ECH 151. GE credit: SE. Effective: 2017 Fall Quarter.

**ECH 060—Engineering Problem Solving Using MATLAB (4)**
Lecture/Discussion—4 hours. Prerequisite(s): MAT 021C Problem solving in chemical, biochemical and materials engineering using MATLAB. Programming styles, data structures, working with lists, functions and rules. Applications drawn from material balances, statistics, numerical methods, bioinformatics, transport phenomena, kinetics, and computational analysis. GE credit: QL, SE. Effective: 2017 Spring Quarter.

**ECH 080—Chemical Engineering Profession (1)**
Lecture/Discussion—1 hour; Term Paper. Professional opportunities and professional responsibilities of chemical engineers. Opportunities and needs for post-baccalaureate education. Relationship of chemical engineering to contemporary issues. GE credit: SE, SS. Effective: 2017 Winter Quarter.

**ECH 090X—Honors Discussion Section (1)**
Discussion—1 hour. Open only to students in the Chemical Engineering or Biochemical Engineering Honors Programs. Examination of special topics covered in selected lower-division courses through additional readings, discussions, collaborative work, or special activities which may include projects, laboratory experience or computer simulations. Repeat credit allowed if topic differs. May be repeated for credit. When topic differs. Effective: 2017 Fall Quarter.

**ECH 098—Directed Group Study (1-5)**
Variable. Prerequisite(s): Consent of Instructor. Lower division standing. Directed Group Study. (P/NP grading only.) GE credit: SE. Effective: 2017 Winter Quarter.

**ECH 099—Special Study for Undergraduates (1-5)**
Variable. Prerequisite(s): Consent of Instructor. Special Study for Undergraduates (P/NP grading only.) GE credit: SE. Effective: 2017 Winter Quarter.

**ECH 140—Mathematical Methods in Biochemical and Chemical Engineering (4)**
Laboratory—1 hour; Lecture/Discussion—3 hours. Prerequisite(s): MAT 022B; (ECH 060 or ENG 006); or equivalents of ECH 060 or ENG 006. Mathematical methods for solving problems in chemical and biochemical engineering, with emphasis on transport phenomena. Fourier series and separation of variables. Sturm-Liouville eigenvalue problems. Similarity transformations. Tensor analysis. Finite difference methods for solving time-dependent diffusion problems. Not open for credit to students who have completed ECH 159. GE credit: SE. Effective: 2017 Spring Quarter.

**ECH 141—Fluid Mechanics for Biochemical and Chemical Engineers (4)**
Lecture/Discussion—4 hours. Prerequisite(s): ECH 140; ECH 051 (can be concurrent) Principles and applications of fluid mechanics in chemical and biochemical engineering. Hydrostatics. The stress tensor and Newton's law of viscosity. Not open for credit to students who have completed course 150B. GE credit: QL, SE. Effective: 2017 Winter Quarter.

**ECH 142—Heat Transfer for Biochemical and Chemical Engineers (4)**
Lecture/Discussion—4 hours. Prerequisite(s): ECH 051 C- or better; ECH 140 Principles and applications of fluid mechanics in chemical and biochemical engineering. Hydrostatics. The stress tensor and Newton's law of viscosity. Not open for credit to students who have completed course 153. GE credit: QL, SE. Effective: 2017 Winter Quarter.

**ECH 143—Mass Transfer for Biochemical and Chemical Engineers (4)**

Review all entries

Lecture/Discussion—4 hours. Prerequisite(s): ECH 051 C- or better; ECH 141 Derivation of species conservation equations describing convective and diffusive mass transfer. Fick's law and the Stefan-Maxwell constitutive equations. Mass transfer coefficients. Multicomponent mass transfer across gas/liquid interfaces. Applications include drying, heterogeneous chemical reactions, and membrane separations. GE credit: SE. Effective: 2017 Winter Quarter.

**ECH 144—Rheology and Polymer Processing (3)**

Lecture/Discussion—3 hours. Prerequisite(s): ECH 141 Deformation in steady shear, unsteady shear, and elongational flows. Linear and non-linear viscoelastic constitutive models. The principle of material indifference and admissibility of constitutive equations. Introduction to the unit operations of polymer processing. Not open for credit to students who have completed ECH 150C. GE credit: SE. Effective: 2017 Winter Quarter.

**ECH 145A—Chemical Engineering Thermodynamics Laboratory (3)**

Discussion—2 hours; Extensive Writing; Laboratory—2 hours. Prerequisite(s): ECH 152A; ECH 152B (can be concurrent) Open to majors in Chemical Engineering, Chemical Engineering/Materials Science, & Biochemical Engineering. Laboratory experiments in chemical engineering thermodynamics. GE credit: SE, WE. Effective: 2017 Winter Quarter.

**ECH 145B—Chemical Engineering Transport Lab (3)**

Discussion—2 hours; Extensive Writing; Laboratory—2 hours. Prerequisite(s): ECH 141; ECH 145A Open to majors in Chemical Engineering, Chemical Engineering/Materials Science, & Biochemical Engineering. Laboratory experiments in chemical engineering transport phenomena. GE credit: SE, WE. Effective: 2017 Spring Quarter.

**ECH 148A—Chemical Kinetics and Reaction Engineering (3)**

Lecture—3 hours. Prerequisite(s): ECH 143; ECH 152B Ideal chemical reactors. Rate laws and stoichiometry. Design and analysis of isothermal reactors with multiple reactions. Not open for credit to students who have taken ECH 146. GE credit: SE. Effective: 2017 Winter Quarter.

**ECH 148B—Chemical Kinetics and Reaction Engineering (4)**

Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECH 148A Design and analysis of non-isothermal reactors. Reactions in packed beds with pressure drop. Adsorption and heterogeneous catalysis. Transport limitations. Not open for credit to students who have taken ECH 146. GE credit: SE. Effective: 2017 Winter Quarter.

**ECH 152A—Chemical Engineering Thermodynamics (3)**

Lecture—3 hours. Prerequisite(s): ECH 060 or ENG 006; or equivalents. Application of principles of thermodynamics to chemical processes. Not open for credit to students who have completed ENG 105 or ENG 105A. GE credit: SE. Effective: 2017 Spring Quarter.

**ECH 152B—Chemical Engineering Thermodynamics (4)**

Lecture/Discussion—4 hours. Prerequisite(s): ECH 152A Continuation of course 152A. GE credit: SE. Effective: 2017 Spring Quarter.

**ECH 155—Chemical Engineering Kinetics and Reactor Design Laboratory (4)**

Discussion—1 hour; Laboratory—6 hours; Term Paper. Prerequisite(s): ECH 145B; ECH 148A; ECH 148B (can be concurrent); ECH 157 (can be concurrent); Upper division English composition requirement (can be concurrent). Open to majors in Chemical Engineering, Chemical Engineering/Materials Science, and Biochemical Engineering. Laboratory experiments in chemical kinetics, reactor design and process control. Not open for credit to students who have taken ECH 155B. GE credit: OL, SE, VL, WE. Effective: 2017 Spring Quarter.

**ECH 155A—Chemical Engineering Laboratory (4)**

Discussion—1 hour; Laboratory—6 hours; Term Paper. Prerequisite(s): ECH 141 (can be concurrent); ECH 142 (can be concurrent); ECH 143 (can be concurrent); Satisfaction of the upper division English composition requirement. Open to majors in Chemical Engineering, Chemical Engineering/Materials Science, Biochemical Engineering, Biomedical
Engineering, and Biological Systems Engineering. Laboratory experiments in transport phenomena, chemical kinetics, and thermodynamics. GE credit: OL, QL, SE, VL, WE. Effective: 2017 Winter Quarter.

**ECH 155B—Chemical Engineering Laboratory (4)**
Discussion—1 hour; Extensive Writing—1 hour; Laboratory—6 hours. Prerequisite(s): ECH 143 (can be concurrent); ECH 155A; Satisfaction of the upper division English composition requirement. Open to majors in Chemical Engineering, Chemical Engineering/Materials Science, Biochemical Engineering, Biomedical Engineering, Food Engineering, and Biosystems Engineering. Continuation of course 155A. Laboratory experiments in transport phenomena, chemical kinetics, and thermodynamics. GE credit: QL, SE, VL, WE. Effective: 2017 Winter Quarter.

**ECH 157—Process Dynamics and Control (4)**
Lecture/Discussion—4 hours. Prerequisite(s): ECH 140 Fundamentals of dynamics and modeling of chemical processes. Design and analysis of feedback control of chemical processes. GE credit: QL, SE. Effective: 2017 Winter Quarter.

**ECH 158A—Process Economics and Green Design (4)**

**ECH 158B—Separations and Unit Operations (4)**
Lecture—4 hours. Prerequisite(s): ECH 158A Senior design experience with multiple realistic constraints. Heuristic and rigorous design of chemical process equipment. Separation by filtration, distillation and extraction. Synthesis of reactor and separation networks, heat and power integration. GE credit: QL, SE. Effective: 2018 Winter Quarter.

**ECH 160—Fundamentals of Biomanufacturing (3)**
Lecture—3 hours. Prerequisite(s): MIC 102 or BIS 102 or ABI 102 Principles of large scale bioreactor production of metabolites, enzymes, and recombinant proteins including the development of strains/cell lines, fermentor/bioreactor design, monitoring and operation, product recovery and purification, and biomanufacturing economics. Not open for credit to students who have completed ECH 161C or both ECH 161A and ECH 161B; only two units of credit to students who have completed either ECH 161A or ECH 161B. GE credit: QL, SE, VL. Effective: 2017 Winter Quarter.

**ECH 161A—Biochemical Engineering Fundamentals (4)**
Lecture/Discussion—4 hours. Prerequisite(s): ECH 148A Biokinetics; bioreactor design and operation; transport phenomena in bioreactors; microbial, plant, and animal cell cultures. GE credit: QL, SE, VL. Effective: 2017 Winter Quarter.

**ECH 161B—Bioseparations (4)**
Lecture/Discussion—4 hours. Prerequisite(s): ECH 143 Product recovery and purification of biochemicals. Cell disruption, centrifugation, filtration, membrane separations, extraction, and chromatographic separation. GE credit: QL, SE. Effective: 2017 Winter Quarter.

**ECH 161C—Biotechnology Facility Design and Regulatory Compliance (4)**
Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECH 161A (can be concurrent), ECH 161B (can be concurrent)) or MCB 263 (can be concurrent); Course(s) required concurrently. Design of biotechnology manufacturing facilities. Fermentation and purification equipment, and utility systems. Introduction to current good manufacturing practices, regulatory compliance, and documentation. GE credit: QL, SE, SL, SS, VL. Effective: 2017 Winter Quarter.

**ECH 161C—Biotechnology Facility Design & Regulatory Compliance (4)**
Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECH 158A, ECH 161A (can be concurrent), ECH 161B (can be concurrent)) or DEB 263 (can be concurrent) Design of biotechnology manufacturing facilities. Fermentation and purification equipment, and utility systems. Introduction to current good manufacturing practices, regulatory compliance, and documentation. GE credit: QL, SE, SL, SS, VL. Effective: 2020 Winter Quarter.

**ECH 161L—Bioprocess Engineering Laboratory (4)**
Discussion—1 hour; Laboratory—9 hours; Term Paper. Prerequisite(s): (ECH 161A, ECH 161B) or VEN 186 or (BIS 103,
MCB 120L) Pass One restricted to chemical/biochemical engineering majors. Laboratory experiments in the operation and analysis of bioreactors; determination of oxygen mass transfer coefficients in bioreactors and ion exchange chromatography. GE credit: QL, SE, VL, WE. Effective: 2017 Winter Quarter.

**ECH 161L—Bioprocess Engineering Laboratory (4) Review all entries**

Discussion—1 hour; Laboratory—9 hours; Term Paper. Prerequisite(s): (ECH 145B, ECH 161A, ECH 161B) or VEN 186 or (BIS 103, MCB 120L) Pass One restricted to chemical/biochemical engineering majors. Laboratory experiments in the operation and analysis of bioreactors; determination of oxygen mass transfer coefficients in bioreactors and ion exchange chromatography. GE credit: QL, SE, VL, WE. Effective: 2019 Spring Quarter.

**ECH 166—Catalysis (3)**

Lecture—3 hours. Prerequisite(s): ECH 148A; and Consent of Instructor. Principles of catalysis based on an integration of principles of physical, organic, and inorganic chemistry and chemical kinetics and chemical reaction engineering. Catalysis in solution; catalysis by enzymes; catalysis in swellable polymers; catalysis in microscopic cages (zeolites); catalysis on surfaces. GE credit: SE. Effective: 2017 Winter Quarter.

**ECH 169—The Design of Cocktails: Applied Thermodynamics and Transport Phenomena in Mixed Drinks (1)**

Discussion/Laboratory—1 hour. Prerequisite(s): ECH 145B; ECH 152B; and Consent of Instructor. Enrollment by permission of instructors only; limited to students over 21 years old. Scientific and engineering principles underlying the preparation of mixed drinks. Thermodynamics and kinetics of ice crystallization; phase diagram of ethanol-water-ice mixtures; mass transfer of aromatics; solubility of sucrose and carbon dioxide; colloidal behavior of dispersed solids and emulsified oils. Corresponding laboratory experiments testing the effect of design choices on the sensory quality of cocktails. (P/NP grading only.) GE credit: SE. Effective: 2018 Spring Quarter.

**ECH 170—Introduction to Colloid and Surface Phenomena (3)**

Lecture—3 hours. Prerequisite(s): CHE 110A Introduction to the behavior of surfaces and disperse systems. Fundamentals will be applied to the solution of practical problems in colloid science. Course should be of value to engineers, chemists, biologists, soil scientists, and related disciplines. GE credit: SE. Effective: 2017 Winter Quarter.

**ECH 190C—Research Group Conference (1)**

Discussion—1 hour. Prerequisite(s): Consent of Instructor. Upper division standing in Chemical Engineering. Research group conferences. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 2017 Winter Quarter.

**ECH 190X—Honors Discussion Section (1)**

Discussion—1 hour. Open only to students in the Chemical Engineering or Biochemical Engineering Honors Programs. Examination of special topics covered in selected upper division courses through additional readings, discussions, collaborative work, or special activities which may include projects, laboratory experience or computer simulations. May be repeated for credit when topic differs. Effective: 2017 Fall Quarter.

**ECH 192—Internship in Chemical or Biochemical Engineering (1-5)**

Internship—3-15 hours. Prerequisite(s): Consent of Instructor. Completion of a minimum of 84 units; project approval before period of internship. Supervised work experience in Chemical or Biochemical Engineering. May be repeated for credit when project differs. (P/NP grading only.) GE credit: SE. Effective: 2017 Winter Quarter.

**ECH 198—Group Study (1-5)**

Variable. Prerequisite(s): Consent of Instructor. Group study. (P/NP grading only.) GE credit: SE. Effective: 2017 Winter Quarter.

**ECH 199—Special Study for Advanced Undergraduates (1-5)**

Variable. Prerequisite(s): Consent of Instructor. Special study. (P/NP grading only.) GE credit: SE. Effective: 2017 Winter Quarter.

**ECH 200—Preparing for Graduate Student Success (1)**

Seminar—1.5 hours. Restricted to graduate students in Chemical Engineering. Introduction to the soft-skills and campus resources needed to succeed in graduate school. Emphasis on the student-mentor relationship and the process of selecting a research mentor. (Same course as EMS 200.) (S/U grading only.) Effective: 2018 Fall Quarter.

**ECH 206—Biochemical Engineering (3)**

Lecture—3 hours. Prerequisite(s): MIC 102; MIC 102L; BIS 101; BIS 102; BIS 103; MCB 120L; MCB 200A; or Consent of Instructor. FST 205 recommended. Interaction of chemical engineering, biochemistry, and microbiology. Mathematical representations of microbial systems. Kinetics of growth, death, and metabolism. Continuous fermentation, agitation, mass transfer and scale-up in fermentation systems, product recovery, enzyme technology. Effective: 2017 Winter Quarter.
ECH 226—Enzyme Engineering (3)
Lecture—3 hours. Prerequisite(s): MIC 102; MIC 102L; BIS 103; MCB 122; MCB 120L; MCB 200A; or Consent of Instructor. Application of basic biochemical and engineering principles of practical enzymatic processes. Lectures cover large scale production and separation of enzymes, immobilized enzyme systems, enzyme related biotechnology, reactor design and optimization, and new application of enzymes in genetic engineering. Effective: 2017 Winter Quarter.

ECH 245—Micro- and Nano-Technology in Life Sciences (4) Review all entries
Lecture/Discussion—4 hours. Prerequisite(s): Graduate standing or consent of instructor. Survey of biomedical device design from the engineering and biological perspectives; micro-/nano-fabrication and characterization techniques; surface chemistry and mass transfer; essential biological processes and models; proposal development skills to merge aforementioned themes in a multidisciplinary project. (Same course as EEC 245 and EMS 245.) Effective: 2017 Winter Quarter.

ECH 245—Micro- and Nano-Technology in Life Sciences (4) Review all entries
Lecture/Discussion—4 hours. Prerequisite(s): Graduate standing or consent of instructor. Survey of biodevice design from engineering and biological perspectives; micro-/nano-fabrication techniques; surface science and mass transport; essential biological processes and models; proposal development skills on merging aforementioned themes. (Same course as EEC 245, EMS 245, and MAE 245.) Effective: 2019 Winter Quarter.

ECH 246—Advanced Biochemical Engineering (2)
Lecture—2 hours. Prerequisite(s): ECH 206; or Consent of Instructor. Advances in the field of biotechnology including genetic engineering, enzyme engineering, fermentation science, and renewable resources development. The important results of original research will be evaluated for understanding of the fundamental principles and for potential practical application. Effective: 2017 Winter Quarter.

ECH 252—Statistical Thermodynamics (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECH 152B; ENG 105B or the equivalent. A treatment of the statistical basis of thermodynamics; introduction to statistical mechanics; discussion of the laws of thermodynamics; application of thermodynamic relationships to phase and chemical reaction equilibrium; introduction to molecular simulations and the evaluation of thermodynamic properties from molecular simulations. Effective: 2017 Winter Quarter.

ECH 253A—Advanced Fluid Mechanics (4)

ECH 253B—Advanced Heat Transport (4)
Lecture—4 hours. Prerequisite(s): ECH 142; ECH 259; Or the equivalent. Fundamental energy postulates and derivation of microscopic and macroscopic energy equations. Mechanisms of conduction. Isotropic, thermoelastic and anisotropic materials solution problems using Greens functions and perturbation theory. Effective: 2017 Winter Quarter.

ECH 253C—Advanced Mass Transfer (4)
Lecture—4 hours. Prerequisite(s): ECH 253A; Or the equivalent. Kinematics and basic conservation principles for multicomponent systems. Constitutive equations for momentum, heat and mass transfer, applications to binary and ternary systems. Details of diffusion with reaction, and the effects of concentration. Effective: 2017 Winter Quarter.

ECH 254—Colloid and Surface Phenomena (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Graduate standing in science or engineering or consent of instructor. Thermodynamics and rate processes at interfaces. These fundamental processes will be applied to determine the collective properties of thin films and membranes, self-assembled systems, liquid crystals and colloidal systems. Experimental techniques in surface analysis. Effective: 2017 Winter Quarter.

ECH 256—Chemical Kinetics and Reaction Engineering (4)
Lecture—4 hours. Prerequisite(s): ECH 146; Or the equivalent. Analysis of the performance of chemical reactors and design of chemical reactors based on the principles of chemical kinetics and transport phenomena. Consideration of noncatalytic/catalytic reactions in single fluid phases and emphasis on reactions in multiphase mixtures, especially gas-solid reactors. Effective: 2017 Winter Quarter.

ECH 259—Advanced Engineering Mathematics (4)
Lecture—4 hours. Prerequisite(s): MAT 021D; MAT 022A; MAT 022B Applications of methods of applied
mathematics to the analytical and numerical solution of linear and nonlinear ordinary and partial differential equations arising in the study of transport phenomena. Effective: 2017 Winter Quarter.

**ECH 261—Molecular Modelling of Soft and Biological Matter (4)**
Lecture/Discussion—4 hours. Prerequisite(s): EMS 247 or ECH 252; or equivalent course in advanced thermodynamics/statistical mechanics. Modern molecular simulation techniques with a focus on soft matter like polymers, biologically relevant systems, and glasses. Effective: 2017 Winter Quarter.

**ECH 262—Transport Phenomena in Multiphase Systems (3)**
Discussion/Laboratory—3 hours. Prerequisite(s): ECH 253C Heat, mass and momentum transfer in multiphase, multicomponent systems with special emphasis on transport processes in porous media. Derivation of the averaging theorem and application of the method of volume averaging to multicomponent, reacting systems. Effective: 2017 Winter Quarter.

**ECH 263—Rheology and Mechanics of Non-Newtonian Fluids (3)**
Lecture—3 hours. Prerequisite(s): ECH 253A; ECH 259; or Consent of Instructor. Mechanics of polymer solutions and suspension, especially the development of properly invariant constitutive equations. Topics include: viscometry, linear and nonlinear viscoelasticity, continuum mechanics, kinetic theory. Effective: 2017 Winter Quarter.

**ECH 265—Emulsions, Microemulsions and Bilayers (3)**

**ECH 267—Advanced Process Control (3)**
Lecture—3 hours. Prerequisite(s): ECH 157; Or the equivalent. Advanced course in analysis and synthesis of linear multivariable systems. Emphasis on frequency domain techniques and applications to chemical processes. Topics include singular value analysis, internal model control, robust controller design methods as well as self-tuning control techniques. Effective: 2017 Winter Quarter.

**ECH 268—Polysaccharides Surface Interactions (3)**
Lecture—3 hours. Prerequisite(s): Graduate students in science or engineering. Study of fundamental surface science theories as applied to physical and chemical interactions of carbohydrates and polysaccharides. (Same course as EBS 268.) Effective: 2017 Winter Quarter.

**ECH 269—Cell and Molecular Biophysics for Bioengineers (4)**
Lecture—4 hours. Prerequisite(s): BIM 284; or equivalent; graduate standing; undergraduate students by consent of instructor. Introduction to fundamental mechanisms governing the structure, function, and assembly of biomolecules. Emphasis is on a quantitative understanding of the nano-to-microscale interactions between and within individual molecules, as well as of their assemblies, in particular membranes. Not open for credit to students who have completed BIM 162. (Same course as BIM 262.) Effective: 2017 Winter Quarter.

**ECH 289A—Special Topics in Chemical Engineering; Fluid Mechanics (1-5)**
Laboratory—1-5 hours; Lecture—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Fluid Mechanics. May be repeated for credit when topic differs. Effective: 2017 Winter Quarter.

**ECH 289B—Special Topics in Chemical Engineering; Nonlinear Analysis and Numerical Methods (1-5)**
Laboratory—1-5 hours; Lecture—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Nonlinear Analysis and Numerical Methods. May be repeated for credit when topic differs. Effective: 2017 Winter Quarter.

**ECH 289C—Special Topics in Chemical Engineering; Process Control (1-5)**
Laboratory—1-5 hours; Lecture—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Process Control. May be repeated for credit when topic differs. Effective: 2017 Winter Quarter.

**ECH 289D—Special Topics in Chemical Engineering; Chemistry of Catalytic Processes (1-5)**
Laboratory—1-5 hours; Lecture—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Chemistry of Catalytic Processes. May be repeated for credit when topic differs. Effective: 2017 Winter Quarter.

**ECH 289E—Special Topics in Chemical Engineering; Biotechnology (1-5)**
Laboratory—1-5 hours; Lecture—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Biotechnology. May be repeated for credit when topic differs. Effective: 2017 Winter Quarter.
ECH 289F—Special Topics in Chemical Engineering; Interfacial Engineering (1-5)
Laboratory—1-5 hours; Lecture—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Interfacial Engineering. May be repeated for credit when topic differs. Effective: 2017 Winter Quarter.

ECH 289G—Special Topics in Chemical Engineering; Molecular Thermodynamics (1-5)
Laboratory—1-5 hours; Lecture—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Molecular Thermodynamics. May be repeated for credit when topic differs. Effective: 2017 Winter Quarter.

ECH 289H—Special Topics in Chemical Engineering; Membrane Separations (1-5)
Laboratory—1-5 hours; Lecture—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Membrane Separations. May be repeated for credit when topic differs. Effective: 2017 Winter Quarter.

ECH 289I—Special Topics in Chemical Engineering; Advanced Materials Processing (1-5)
Laboratory—1-5 hours; Lecture—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Advanced Materials Processing. May be repeated for credit when topic differs. Effective: 2017 Winter Quarter.

ECH 289J—Special Topics in Chemical Engineering; Novel Experimental Methods (1-5)
Laboratory—1-5 hours; Lecture—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Novel Experimental Methods. May be repeated for credit when topic differs. Effective: 2017 Winter Quarter.

ECH 289K—Special Topics in Chemical Engineering; Advanced Transport Phenomena (1-5)
Laboratory—1-5 hours; Lecture—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Advanced Transport Phenomena. May be repeated for credit when topic differs. Effective: 2017 Winter Quarter.

ECH 289L—Special Topics in Chemical Engineering; Biomolecular Engineering (1-5)
Laboratory—1-5 hours; Lecture—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Biomolecular Engineering. May be repeated for credit when topic differs. Effective: 2017 Winter Quarter.

ECH 290—Seminar (1)
Seminar—1 hour. Seminar. (S/U grading only.) Effective: 2017 Winter Quarter.

ECH 290C—Graduate Research Group Conference (1)
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Research problems, progress and techniques in chemical engineering. May be repeated for credit. (S/U grading only.) Effective: 2017 Winter Quarter.

ECH 294—Current Progress in Biotechnology (1)
Seminar—1 hour. Prerequisite(s): Graduate standing. Seminars presented by guest lecturers on subjects of their own research activities. May be repeated for credit. (Same course as DEB 294.) (S/U grading only.) Effective: 2018 Winter Quarter.

ECH 298—Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Group study. (S/U grading only.) Effective: 2017 Winter Quarter.

ECH 299—Research (1-12)
Variable. Research. (S/U grading only.) Effective: 2017 Winter Quarter.

ECH 390—Teaching of Chemical Engineering (1) Review all entries
Discussion—1 hour. Prerequisite(s): Qualifications and acceptance as teaching assistant and/or associate-in in chemical engineering. Participation as a teaching assistant or associate-in in a designated engineering course. Methods of leading discussion groups or laboratory sections, writing and grading quizzes, use of laboratory equipment, and grading laboratory reports. May be repeated up to 2 time(s). (S/U grading only.) Effective: 2017 Winter Quarter.

ECH 390—Teaching of Chemical Engineering (1) Review all entries
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Qualifications and acceptance as teaching assistant and/or associate-in in chemical engineering. Participation as a teaching assistant or associate-in in a designated engineering course. Methods of leading discussion groups or laboratory sections, writing and grading quizzes, use of laboratory equipment, and grading laboratory reports. May be repeated for credit. (S/U grading only.) Effective: 2018 Fall Quarter.

Chemical Engineering; Engineering | EMS Courses

Courses in EMS:

EMS 002—Materials Marvels: The Science of Superheroes (3)
Discussion—1 hour; Lecture—2 hours. Introduction to science and technology of materials as key engineering
ingredients. Explores the relationship between art and materials, and how superheroes are both products and resources of ideas for new materials' technologies. GE credit: SE, SL, WE. Effective: 2018 Winter Quarter.

EMS 006H—Honors Materials Science Computer Applications (1)
Discussion—1 hour. Prerequisite(s): ENG 006 (can be concurrent); Enrollment in the Materials Science and Engineering Honors Program; ENG 006 required concurrently. Restricted to students in the Materials Science and Engineering Honors Program. Examination of materials science computer applications through additional readings, discussions, collaborative work, or special activities which may include projects or computer simulations. Effective: 2017 Winter Quarter.

EMS 009H—Honors Solid-State Materials Science (1)
Discussion—1 hour. Prerequisite(s): PHY 009D (can be concurrent); Enrollment in the Materials Science and Engineering Honors Program; PHY 009D required concurrently. Restricted to students in the Materials Science and Engineering Honors Program. Examination of solid-state materials science and modern physics topics through additional readings, discussions, collaborative work, or special activities which may include projects, laboratory experience or computer simulations. Effective: 2017 Winter Quarter.

EMS 147—Principles of Polymer Materials Science (3)
Lecture—3 hours. Prerequisite(s): CHE 002A; CHE 002B; ((CHE 008A, CHE 008B) or (ENG 045 or ENG 045Y)); introductory physics. Basic principles of polymer science presented including polymer structure and synthesis; polymerization mechanisms, polymer classes, properties, and reactions; polymer morphology, rheology, and characterization; polymer processing. (Same course as FPS 100.) GE credit: QL, SE. Effective: 2018 Spring Quarter.

EMS 160—Thermodynamics of Materials Processes and Phase Stability (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ENG 045 C- or better; PHY 009B C- or better; MAT 022B C- or better; CHE 002C recommended. Review of thermodynamic principles of interest to materials scientists and engineers. Application of thermodynamics to material processing, phase stability, corrosion. GE credit: QL, SE, SL, VL. Effective: 2018 Fall Quarter.

EMS 160—Thermodynamics of Materials Processes and Phase Stability (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ENG 045 C- or better or ENG 045Y C- or better; PHY 009B C- or better; MAT 022B C- or better; CHE 002C recommended. Review of thermodynamic principles of interest to materials scientists and engineers. Application of thermodynamics to material processing, phase stability, corrosion. GE credit: QL, SE, SL, VL. Effective: 2018 Fall Quarter.

EMS 160—Thermodynamics of Materials (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ENG 045 C- or better or ENG 045Y C- or better; PHY 009B C- or better; MAT 022B C- or better; CHE 002C recommended. Review of thermodynamic principles of interest to materials scientists and engineers. Application of thermodynamics to material processing, phase stability, corrosion. GE credit: SE, SL. Effective: 2019 Fall Quarter.

EMS 162—Structure and Characterization of Engineering Materials (4)
Lecture—4 hours. Prerequisite(s): (ENG 045 C- or better or ENG 045Y C- or better); MAT 022A C- or better; PHY 009B C- or better Description of the structure of engineering materials on the atomic scale by exploring the fundamentals of crystallography. The importance of this structure to materials’ properties. Description of experimental determination using x-ray diffraction techniques. GE credit: QL, SE. Effective: 2018 Winter Quarter.

EMS 162L—Structure and Characterization of Materials Laboratory (2) Review all entries
Discussion—1 hour; Laboratory—3 hours. Prerequisite(s): EMS 162 (can be concurrent); Concurrent enrollment recommended. Experimental investigations of structure of solid materials are combined with techniques for characterization of materials. Laboratory exercises emphasize methods used to study structure of solids at the atomic and microstructural levels. Methods focus on optical, x-ray and electron techniques. Not open for credit to those who have completed EMS 132; can be taken for 2 units of credit by those who have completed EMS 132L and EMS 134L. GE credit: QL, SE, SL, VL, WE. Effective: 2017 Winter Quarter.

EMS 162L—Structure and Characterization of Materials Laboratory (3) Review all entries
Discussion—1 hour; Extensive Writing; Laboratory—3 hours. Prerequisite(s): EMS 162 (can be concurrent); Concurrent enrollment in EMS 162 recommended. Experimental investigations of structure of solid materials are combined with techniques for characterization of materials. Laboratory exercises emphasize methods used to study structure of solids at the atomic and microstructural levels. Methods focus on optical, x-ray and electron techniques. GE credit: SE, WE. Effective: 2020 Winter Quarter.
EMS 164—Rate Processes in Materials Science (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ENG 045 C- or better or ENG 045Y C- or better); EMS 160
Basic kinetic laws and the principles governing phase transformations. Applications in diffusion, oxidation,

EMS 164—Kinetics of Materials (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ENG 045 C- or better or ENG 045Y C- or better); EMS 160
Basic kinetic laws and the principles governing phase transformations. Applications in diffusion, oxidation,
nucleation, growth and spinodal transformations. GE credit: QL, SE, SL, VL. Effective: 2019 Fall Quarter.

EMS 170—Sustainable Energy Technologies: Batteries, Fuel Cells, and Photovoltaic Cells (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ENG 045 or ENG 045Y Open to students in Engineering or
related fields. Basic principles of future energy devices such as lithium batteries, fuel cells, and photovoltaic cells.
Examines the current status of these energy technologies and analyze challenges that still must be overcome. GE
credit: SE. Effective: 2018 Winter Quarter.

EMS 170L—Sustainable Energy Technologies Laboratory (3)
Discussion—1 hour; Extensive Writing; Laboratory—3 hours. Prerequisite(s): ENG 045; EMS 170 (can be concurrent);
EMS 172 (recommended) Fundaments of manufacturing and characterization of energy devices, such as lithium
batteries, fuel cells and photovoltaic cells. Discussion on limiting factors in the performance of the devices. GE
credit: SE. Effective: 2019 Fall Quarter.

EMS 172—Electronic, Optical and Magnetic Properties of Materials (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): CHE 110A or PHY 009D; ENG 006 or ECM 006 or equivalent
recommended. Electronic, optical, and magnetic properties of materials as related to structure and processing of
solid state materials. Physical principles for understanding the properties of metals, semiconductors, ceramics, and
amorphous solids and the applications of these materials in engineering. GE credit: QL, SE, SL, VL. Effective: 2017
Winter Quarter.

EMS 172—Smart Materials (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): CHE 110A or PHY 009D; ENG 006 or ECH 060 or equivalent
recommended. Electronic, optical, and magnetic properties of materials as related to structure and processing of
solid state materials. Physical principles for understanding the properties of metals, semiconductors, ceramics, and
amorphous solids and the applications of these materials in engineering. GE credit: SE, VL. Effective: 2017
Winter Quarter.

EMS 172L—Electronic, Optical and Magnetic Properties Laboratory (2) Review all entries
Laboratory—3 hours; Lecture/Lab—1 hour. Prerequisite(s): EMS 172 (can be concurrent); Concurrent enrollment
recommended. Experimental investigation of electronic, optical and magnetic properties of engineering materials,
emphasizing the fundamental relationship between microstructure and properties as well as the influence of rate
processes on the evolution of the microstructure and properties. GE credit: QL, SE, SL, VL, WE. Effective: 2017
Winter Quarter.

EMS 172L—Smart Materials Laboratory (3) Review all entries
Discussion—1 hour; Extensive Writing; Laboratory—3 hours. Prerequisite(s): EMS 172 (can be concurrent);
Concurrent enrollment in EMS 172 recommended. Experimental investigation of electronic, optical and magnetic
properties of engineering materials, emphasizing the fundamental relationship between microstructure and properties as well as the influence of rate processes on the evolution of the microstructure and properties. GE credit: SE, WE. Effective: 2017
Fall Quarter.

EMS 174—Mechanical Behavior of Materials (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ENG 045 C- or better or ENG 045Y C- or better); EMS 162
recommended. Microscopic and macroscopic aspects of the mechanical behavior of engineering materials, with
emphasis on recent development in materials characterization by nondestructive testing. Fundamental aspects of
plasticity in engineering materials, strengthening mechanisms and mechanical failure modes of materials systems.
GE credit: QL, SE, SL, VL. Effective: 2018 Spring Quarter.

EMS 174L—Mechanical Behavior Laboratory (2) Review all entries
Laboratory—3 hours; Lecture/Lab—1 hour. Prerequisite(s): EMS 174 (can be concurrent); Concurrent enrollment
recommended. Experimental investigation of mechanical behavior of engineering materials. Laboratory exercises
emphasize the fundamental relationship between microstructure and mechanical properties, and the evolution of
the microstructure as a consequence of rate process. Not open for credit to those who have taken EMS 138L; not
open for credit to those who have taken both EMS 134L and EMS 138L. GE credit: QL, SE, SL, VL, WE. Effective: 2016 Winter Quarter.

**EMS 174L—Mechanical Behavior Laboratory (3) Review all entries**
Discussion—1 hour; Extensive Writing; Laboratory—3 hours. Prerequisite(s): EMS 174 (can be concurrent); Concurrent enrollment recommended. Experimental investigation of mechanical behavior of engineering materials. Laboratory exercises emphasize the fundamental relationship between microstructure and mechanical properties, and the evolution of the microstructure as a consequence of rate process. GE credit: SE, WE. Effective: 2016 Winter Quarter.

**EMS 180—Materials in Engineering Design (4)**
Lecture—3 hours; Lecture/Discussion—1 hour. Prerequisite(s): ENG 045 C- or better or ENG 045Y C- or better Restricted to students with upper division standing. Quantitative treatment of materials selection for engineering applications. Discussion of design and material selection strategy; process and process selection strategy; process economics; life-cycle thinking and eco-design. Use of materials selection software. GE credit: OL, SE, SL, VL, WE. Effective: 2020 Winter Quarter.

**EMS 181—Materials Processing (4) Review all entries**
Lecture—3 hours; Lecture/Discussion—1 hour. Prerequisite(s): (ENG 045 C- or better or ENG 045Y C- or better); (ENG 105 or ECH 152B or EEC 140A or EMS 164) Principles of phase equilibria, thermodynamics and reaction kinetics applied to materials processing. Effects of processing variables on the structure-property relationship. Fundamentals of the manufacturing processes for electronic, optical, functional and structural materials. GE credit: OL, SE, VL, WE. Effective: 2018 Spring Quarter.

**EMS 181—Manufacturing of 3D & Composite Materials (4) Review all entries**
Lecture—3 hours; Lecture/Discussion—1 hour. Prerequisite(s): (ENG 045 C- or better or ENG 045Y C- or better); (ENG 105 or ECH 152B or EEC 140A or EMS 164) Fundamental physical and chemical principles underlying various processing techniques, used in manufacturing processes for bulk (3D) and composite structural and functional materials. Effects of processing variables on structure-property relationships. GE credit: SE. Effective: 2020 Winter Quarter.

**EMS 182—Failure Analysis (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ENG 045 C- or better or ENG 045Y C- or better; EMS 174 recommended. Analysis of the way materials fail. Effects of temperature, mechanical deformation and corrosion on the properties of materials. Forensics and methodologies for investigating failures of materials including optical microscopy, x-ray analysis and scanning electron microscopy. Investigation of practical problems. GE credit: QL, SE, VL, WE. Effective: 2018 Spring Quarter.

**EMS 183—Processing of 2D & Nanomaterials (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ENG 045 C- or better or ENG 045Y C- or better); (ENG 105 or ECH 152B or EEC 140A or EMS 164) Fundamentals of processing methods for two-dimensional materials, including thin films and graphene-like materials; as well as nanomaterials, including nanoparticles, nanowires, and quantum dots. GE credit: SE. Effective: 2019 Fall Quarter.

**EMS 188A—Materials Design Project (4)**
Discussion—1 hour; Laboratory—4 hours. Prerequisite(s): EMS 160; EMS 162; EMS 164; EMS 172; EMS 174 Major materials design experience involving analysis of real materials synthesis/processing/fabrication and technological applications including critical assessments of economic, manufacturing, and ethical constraints. Various principles of materials science are integrated into a culminating team design project. GE credit: OL, SE, SL, VL, WE. Effective: 2017 Winter Quarter.

**EMS 188AH—Honors Materials Design (1)**
Discussion—1 hour. Prerequisite(s): Enrollment in the Materials Science and Engineering Honors Program. Open only to students in the Materials Science and Engineering Honors Program. Examination of special topics covered in the materials design course through additional readings, discussions, collaborative work, or special activities which may include projects, laboratory experience or computer simulations. Effective: 2017 Winter Quarter.

**EMS 188B—Materials Design Project (4)**
Discussion—1 hour; Laboratory—4 hours. Prerequisite(s): EMS 188A Major materials design experience involving analysis of real materials synthesis/processing/fabrication and technological applications including critical assessments of economic, manufacturing, and ethical constraints. Various principles of materials science are integrated into a culminating team design project. GE credit: OL, SE, SL, VL, WE. Effective: 2017 Winter Quarter.
EMS 188BH—Honors Materials Design (1)
Discussion—1 hour. Prerequisite(s): Enrollment in the Materials Science and Engineering Honors Program. Open only to students in the Materials Science and Engineering Honors Program. Examination of special topics covered in the materials design course through additional readings, discussions, collaborative work, or special activities which may include projects, laboratory experience or computer simulations. Effective: 2017 Winter Quarter.

EMS 190C—Research Group Conference (1)
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Upper division standing. Individual and/or group conference on problems, progress and techniques in materials research. May be repeated for credit. May be repeated for credit. (P/NP grading only.) Effective: 2017 Winter Quarter.

EMS 198—Directed Group Study (1-5)
Lecture—1-5 hours. Prerequisite(s): Consent of Instructor. Group study of selected topics. (P/NP grading only.) Effective: 2017 Winter Quarter.

EMS 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. Special study for advanced undergraduates. (P/NP grading only.) Effective: 2017 Winter Quarter.

EMS 200—Preparing for Graduate Student Success (1)
Seminar—1.5 hours. Restricted to graduate students in Materials Science and Engineering. Introduction to the soft-skills and campus resources needed to succeed in graduate school. Emphasis on the student-mentor relationship and the process of selecting a research mentor. (Same course as ECH 200.) (S/U grading only.) Effective: 2018 Fall Quarter.

EMS 230—Fundamentals of Electron Microscopy (3)
Lecture—2 hours; Lecture/Discussion—1 hour. Prerequisite(s): EMS 162 Principles and techniques of scanning and transmission of electron microscopy used in the study of materials will be described. Emphasis upon practical applications. Effective: 2017 Winter Quarter.

EMS 230L—Laboratory for Electron Microscopy (2)
Laboratory—6 hours. Prerequisite(s): EMS 230 (can be concurrent); EMS 230 required concurrently. Practical application of techniques of electron scanning and transmission microscopy including x-ray microanalysis. Effective: 2017 Winter Quarter.

EMS 232—Advanced Topics in Transmission Electron Microscopy (3) Review all entries
Discussion—2 hours; Lecture—1 hour. Prerequisite(s): EMS 230 Advanced course in the techniques of electron microscopy including analytical techniques, probe diffraction methods, and high resolution imaging. Effective: 2017 Winter Quarter.

EMS 232—Advanced Topics in Transmission Electron Microscopy (3) Review all entries Discontinued
Discussion—2 hours; Lecture—1 hour. Prerequisite(s): EMS 230 Advanced course in the techniques of electron microscopy including analytical techniques, probe diffraction methods, and high resolution imaging. Effective: 2018 Fall Quarter.

EMS 232L—Laboratory for Advanced Transmission Electron Microscopy (2) Review all entries
Discussion—1 hour; Laboratory—3 hours. Prerequisite(s): EMS 230L Laboratory in advanced transmission electron microscopy techniques relevant to specific graduate research projects in materials science. Effective: 2017 Winter Quarter.

EMS 232L—Laboratory for Advanced Transmission Electron Microscopy (2) Review all entries Discontinued
Discussion—1 hour; Laboratory—3 hours. Prerequisite(s): EMS 230L Laboratory in advanced transmission electron microscopy techniques relevant to specific graduate research projects in materials science. Effective: 2018 Fall Quarter.

EMS 241—Principles and Applications of Dislocation Mechanics (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Consent of Instructor. Graduate standing in Engineering. Concepts in dislocation theory are applied to explain plasticity of crystalline solids. Glide and climb of dislocations, strain hardening, recrystallization, theories of creep processes and interaction of dislocation with solute atoms, precipitates and impurity clouds are discussed. Effective: 2017 Winter Quarter.

EMS 241—Principles and Applications of Dislocation Mechanics (4) Review all entries Discontinued
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Consent of Instructor. Graduate standing in Engineering. Concepts in dislocation theory are applied to explain plasticity of crystalline solids. Glide and climb of dislocations,
strain hardening, recrystallization, theories of creep processes and interaction of dislocation with solute atoms, precipitates and impurity clouds are discussed. Effective: 2018 Fall Quarter.

EMS 243—Kinetics of Phase Transformation in Engineering Materials (3) Review all entries
Lecture—3 hours. Prerequisite(s): Consent of Instructor. Graduate standing in Engineering; EMS 160 recommended. Theory of alloying, kinetics of phase changes, homogenous and heterogeneous transformation, transformation by shear, order-disorder reactions. Effective: 2017 Winter Quarter.

EMS 243—Kinetics of Phase Transformation in Engineering Materials (3) Review all entries Discontinued
Lecture—3 hours. Prerequisite(s): Consent of Instructor. Graduate standing in Engineering; EMS 160 recommended. Theory of alloying, kinetics of phase changes, homogenous and heterogeneous transformation, transformation by shear, order-disorder reactions. Effective: 2018 Fall Quarter.

EMS 244—Interaction of Materials and their Environment (3)
Lecture—3 hours. Prerequisite(s): (ENG 045 or ENG 045Y); ENG 105A recommended; or consent of instructor. Thermodynamic and kinetic foundations of the corrosion and oxidation processes. Practical aspects of corrosion control and prevention. Stress-corrosion and gas-embrittlement phenomena. Special topics in corrosion; microbiological and atmospheric corrosion. Effective: 2018 Spring Quarter.

EMS 245—Micro- and Nano-Technology in Life Sciences (4) Review all entries
Lecture/Discussion—4 hours. Prerequisite(s): Graduate standing or consent of instructor. Survey of biomedical device design from the engineering and biological perspectives; micro-/nano-fabrication and characterization techniques; surface chemistry and mass transfer; essential biological processes and models; proposal development skills to merge aforementioned themes in a multidisciplinary project. (Same course as EEC 245 and ECH 245.) Effective: 2017 Winter Quarter.

EMS 245—Micro- and Nano-Technology in Life Sciences (4) Review all entries
Lecture/Discussion—4 hours. Prerequisite(s): Graduate standing or consent of instructor. Survey of biodevice design from engineering and biological perspectives; micro-/nano-fabrication techniques; surface science and mass transport; essential biological processes and models; proposal development skills on merging aforementioned themes. (Same course as EEC 245, ECH 245, and MAE 245.) Effective: 2019 Winter Quarter.

EMS 246—Photovoltaics and Solar Cells (3)
Lecture—3 hours. Prerequisite(s): EEC 140B; or Consent of Instructor. Or equivalent. Physics and application of photovoltaics and solar cells, including design, fabrication technology, and grid incorporation. Mono and microcrystalline silicon devices; thin-film technologies, heterojunction and organic-semiconductor technologies. Collectors, electrical inverters and infrastructure issues. Challenges and concerns. (Same course as EEC 248.) Effective: 2017 Winter Quarter.

EMS 248—Fracture of Engineering Materials (3)
Lecture—3 hours. Prerequisite(s): EMS 174 Description of the failure of materials by crack propagation. Topics include the stress fields about elastic cracks, the Griffith-Irwin analysis, descriptions of plastic zones, fracture toughness testing, microstructural aspects of fracture and failure at elevated temperatures. Effective: 2017 Winter Quarter.

EMS 249—Mechanisms of Fatigue (3)
Lecture—3 hours. Prerequisite(s): EMS 174; or Consent of Instructor. EMS 248 recommended. Microstructural description of the mechanisms of fatigue in metals. Topics include a phenomenological treatment of cyclic deformation, dislocation processes in cyclic deformation, fatigue crack nucleation, Stage I growth, threshold effects and high temperature cyclic deformation. Effective: 2017 Winter Quarter.

EMS 250A—Special Topics in Polymer and Fiber Science (3)
Lecture—3 hours. Prerequisite(s): EMS 147; or Consent of Instructor. Selected topics of current interest in polymer and fiber sciences. Topics will vary each time the course is offered. (Same course as FPS 250A.) Effective: 2017 Winter Quarter.

EMS 250B—Special Topics in Polymer and Fiber Science (3)
Lecture—3 hours. Prerequisite(s): EMS 147; or Consent of Instructor. Selected topics of current interest in polymer and fiber sciences. Topics will vary each time the course is offered. (Same course as FPS 250B.) Effective: 2017 Winter Quarter.

EMS 250C—Special Topics in Polymer and Fiber Science (3) Review all entries
Lecture—3 hours. Prerequisite(s): EMS 147; or Consent of Instructor. Selected topics of current interest in polymer
and fiber sciences. Topics will vary each time the course is offered. (Same course as FPS 250C.) Effective: 2017 Winter Quarter.

EMS 250C—Special Topics in Polymer and Fiber Science (3) Review all entries Discontinued
Lecture—3 hours. Prerequisite(s): EMS 147; or Consent of Instructor. Selected topics of current interest in polymer and fiber sciences. Topics will vary each time the course is offered. (Same course as FPS 250C.) Effective: 2019 Fall Quarter.

EMS 250D—Special Topics in Polymer and Fiber Science (3) Review all entries
Lecture—3 hours. Prerequisite(s): EMS 147; or Consent of Instructor. Selected topics of current interest in polymer and fiber sciences. Topics will vary each time the course is offered. (Same course as FPS 250D.) Effective: 2017 Winter Quarter.

EMS 250D—Special Topics in Polymer and Fiber Science (3) Review all entries Discontinued
Lecture—3 hours. Prerequisite(s): EMS 147; or Consent of Instructor. Selected topics of current interest in polymer and fiber sciences. Topics will vary each time the course is offered. (Same course as FPS 250D.) Effective: 2019 Fall Quarter.

EMS 250E—Special Topics in Polymer and Fiber Science (3)
Lecture—3 hours. Prerequisite(s): EMS 147; or Consent of Instructor. Selected topics of current interest in polymer and fiber sciences. Topics will vary each time the course is offered. (Same course as FPS 250E.) Effective: 2017 Winter Quarter.

EMS 250F—Special Topics in Polymer and Fiber Science (3) Review all entries
Lecture—3 hours. Prerequisite(s): EMS 147; or Consent of Instructor. Selected topics of current interest in polymer and fiber sciences. Topics will vary each time the course is offered. (Same course as FPS 250F.) Effective: 2017 Winter Quarter.

EMS 250F—Special Topics in Polymer and Fiber Science (3) Review all entries Discontinued
Lecture—3 hours. Prerequisite(s): EMS 147; or Consent of Instructor. Selected topics of current interest in polymer and fiber sciences. Topics will vary each time the course is offered. (Same course as FPS 250F.) Effective: 2019 Fall Quarter.

EMS 251—Applications of Solid State Nuclear Magnetic Resonance Spectroscopy (3) Review all entries
Lecture—3 hours. Prerequisite(s): Graduate standing in chemistry, physics or engineering, or consent of instructor. Fundamentals of solid state NMR spectroscopy and principles of advanced NMR techniques for analyzing structure of solid materials. Effective: 2017 Winter Quarter.

EMS 251—Applications of Solid State Nuclear Magnetic Resonance Spectroscopy (3) Review all entries Discontinued
Lecture—3 hours. Prerequisite(s): Graduate standing in chemistry, physics or engineering, or consent of instructor. Fundamentals of solid state NMR spectroscopy and principles of advanced NMR techniques for analyzing structure of solid materials. Effective: 2018 Fall Quarter.

EMS 260—Advanced Thermodynamics of Solids (4) Review all entries
Lecture/Discussion—4 hours. Prerequisite(s): EMS 160 Thermodynamic principles, formalism and their application to solid materials. Specific examples from ceramic and solid state systems. Use of thermodynamic approach in developing understanding of and constraints for processes in real systems. Effective: 2017 Winter Quarter.

EMS 260—Advanced Thermodynamics of Solids (4) Review all entries

EMS 262—Advanced Topics in Structure of Materials (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EMS 162; EMS 174 recommended; graduate standing in Engineering or consent of instructor. Nature of microstructure in engineering materials. Crystalline and non-crystalline structures, with special emphasis on grain boundary segregation in the development of polycrystalline microstructure and the radial distribution function of amorphous materials. Not open for credit to students who previously completed (cancelled) EMS 245. Effective: 2017 Winter Quarter.

EMS 264—Transport Phenomena in Materials Processes (4)
Lecture/Discussion—4 hours. Prerequisite(s): Graduate standing in Engineering. Thermodynamic driving forces and atomic-scale mechanisms underlying diffusive mass transport and interface motion in materials. Nucleation, growth
and coarsening dynamics of phase transformations. Not open for credit to students who previously completed EMS 240. Effective: 2017 Winter Quarter.

EMS 268—Advanced Materials Characterization (4)
Lecture/Discussion—4 hours. Open to graduate students in Chemistry, Physics, and Engineering. Fundamental working principles for characterization methods used in structural and compositional analysis of engineering materials. Topics include x-ray, electron, ion, and neutron interactions with materials and techniques include diffraction, spectroscopy, and imaging methods. Effective: 2019 Spring Quarter.

EMS 272—Advanced Functional Properties of Materials (4)
Lecture/Discussion—4 hours. Prerequisite(s): Graduate standing in Physics, Chemistry, and Engineering. Fundamental physical properties of solid materials important to solid state devices, specifically electronic, magnetic, and optical properties. Topics include band structures, metals, superconductors, semiconductors, dielectrics, optical properties, and magnetic properties and implementation of these properties into devices. Effective: 2017 Winter Quarter.

EMS 274—Advanced Mechanical Properties of Materials (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EMS 174 Comprehensive study of mechanical properties of materials, with special attention to dislocations and deformation and fracture control mechanisms. Mechanical properties of conventional engineering materials as well as advanced materials such as nanocrystalline solids and thin films are considered. Effective: 2017 Winter Quarter.

EMS 280A—Graduate Capstone Project (4)
Discussion—1 hour; Laboratory—4 hours. Prerequisite(s): Graduate standing in an engineering discipline. Advanced materials design experience involving analysis of engineering applications of materials, including synthesis, processing, and fabrication. Additional consideration of critical assessments of economics, manufacturing, and ethical constraints. Fundamental principles of materials science are integrated into a culminating capstone project. Effective: 2019 Fall Quarter.

EMS 280B—Graduate Capstone Project (4)
Discussion—1 hour; Laboratory—4 hours. Prerequisite(s): EMS 280A Advanced materials design experience involving analysis of engineering applications of materials, including synthesis, processing and fabrication. Additional consideration of critical assessments of economics, manufacturing, and ethical constraints. Fundamental principles of materials science are integrated into a culminating capstone project. Effective: 2019 Fall Quarter.

EMS 282—Glass: Science and Technology (3)
Extensive Writing—1 hour; Lecture—2 hours. Prerequisite(s): Graduate standing in Chemistry, Physics or Engineering, or consent of instructor. Modern paradigms in glass science and their applications to technologies. Relation of macroscopic properties of glasses and glass-forming liquids to atomic-level structures, including principles of formation, relaxation, transport phenomena, nucleation, crystallization and phase separation in glasses. Effective: 2017 Winter Quarter.

EMS 288—Living Matter: Physical Biology of the Cell (3)
Lecture—3 hours. Open to any student possessing general background in any disciplines of physical or biological sciences and engineering. Introduction to the origin, maintenance, and regulation of the dynamic architecture of the cell, including cellular modes of organization, dynamics and energy dissipation, molecular transport, motility, regulation, and adaptability. (Same course as BIM 288 and BPH 288.) Effective: 2016 Fall Quarter.

EMS 289A—Special Topics in Materials Science; Electronic Materials (1-5) Review all entries
Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Electronic Materials. May be repeated for credit when topic differs. Effective: 2017 Winter Quarter.

EMS 289A—Special Topics in Materials Science (1-5) Review all entries
Lecture/Discussion—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in the discipline of Materials Science & Engineering. Topics will vary by instructor. May be repeated for credit When topic differs. Effective: 2019 Fall Quarter.

EMS 289B—Special Topics in Materials Science; Ceramics and Minerals (1-5) Review all entries
Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Ceramics and Minerals. May be repeated for credit when topic differs. Effective: 2017 Winter Quarter.

EMS 289B—Special Topics in Materials Science; Ceramics and Minerals (1-5) Review all entries Discontinued
Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Ceramics and Minerals. May be repeated for credit when topic differs. Effective: 2019 Fall Quarter.
EMS 289C—Special Topics in Materials Science; Physics and Chemistry of Materials (1-5)  Review all entries
Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Physics and Chemistry of Materials. May be repeated for credit when topic differs. Effective: 2017 Winter Quarter.

EMS 289C—Special Topics in Materials Science; Physics and Chemistry of Materials (1-5)  Discontinued
Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Physics and Chemistry of Materials. May be repeated for credit when topic differs. Effective: 2019 Fall Quarter.

EMS 289D—Special Topics in Materials Science; Materials Processing (1-5)  Review all entries
Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Materials Processing. May be repeated for credit when topic differs. Effective: 2017 Winter Quarter.

EMS 289D—Special Topics in Materials Science; Materials Processing (1-5)  Discontinued
Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Materials Processing. May be repeated for credit when topic differs. Effective: 2019 Fall Quarter.

EMS 289E—Special Topics in Materials Science; Materials Science and Forensics (1-5)  Review all entries
Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Materials Science and Forensics. May be repeated for credit when topic differs. Effective: 2017 Winter Quarter.

EMS 289E—Special Topics in Materials Science; Materials Science and Forensics (1-5)  Discontinued
Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Materials Science and Forensics. May be repeated for credit when topic differs. Effective: 2019 Fall Quarter.

EMS 289F—Special Topics in Materials Science; Biomaterials (1-5)  Review all entries
Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Biomaterials. May be repeated for credit when topic differs. Effective: 2017 Winter Quarter.

EMS 289F—Special Topics in Materials Science; Biomaterials (1-5)  Discontinued
Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Biomaterials. May be repeated for credit when topic differs. Effective: 2019 Fall Quarter.

EMS 289G—Special Topics in Materials Science; Surface Chemistry of Metal Oxides (1-5)  Review all entries
Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Surface Chemistry of Metal Oxides. May be repeated for credit when topic differs. Effective: 2017 Winter Quarter.

EMS 289G—Special Topics in Materials Science; Surface Chemistry of Metal Oxides (1-5)  Discontinued
Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Surface Chemistry of Metal Oxides. May be repeated for credit when topic differs. Effective: 2019 Fall Quarter.

EMS 290—Materials Science and Engineering Seminar (1)
Seminar—1 hour. Prerequisite(s): Graduate standing or consent of instructor. Selected topics of current interest in Materials Science and Engineering. The subjects covered will vary from year to year and will be announced at the beginning of each quarter. May be repeated for credit. (S/U grading only.) Effective: 2017 Fall Quarter.

EMS 290C—Graduate Research Conference (1)
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Individual and/or group conference on problems, progress, and techniques in materials science and engineering research. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 2017 Winter Quarter.

EMS 292—Materials Science & Engineering Internship (1-12)
Internship. Prerequisite(s): Consent of Instructor. Graduate level standing. Work or lab experience in industry or off-campus lab focusing on Materials Science & Engineering applications at the graduate level. May be repeated up to 1 time(s). (S/U grading only.) Effective: 2019 Fall Quarter.

EMS 294—Materials Science Seminar (1)
Seminar—1 hour. Current literature and developments in materials science with presentations by individual students. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 2017 Winter Quarter.

EMS 298—Group Study (1-5)
EMS 299—Research (1-12)
Variable. Prerequisite(s): Consent of Instructor. Research. (S/U grading only.) Effective: 2017 Winter Quarter.

EMS 390—The Teaching of Materials Science (1)
Discussion—1 hour. Prerequisite(s): Meet qualifications for teaching assistant and/or associate-in in materials science and engineering. Participation as a teaching assistant or associate-in in a designated engineering course. Methods of leading discussion groups or laboratory sections, writing and grading quizzes, use of laboratory equipment, and grading laboratory reports. May be repeated for credit. (S/U grading only.) Effective: 2017 Winter Quarter.

Chemical Physics; Chemistry

Chemical Physics; Chemistry | Chemical Physics B.S.

(College of Letters and Science)

Department Administration. For a complete list of department administration, see https://chemistry.ucdavis.edu/people.

Department Office. 108 Chemistry Building; 530-752-8900; Fax 530-752-8995; https://chemistry.ucdavis.edu/

Faculty. https://chemistry.ucdavis.edu/people

The Major Programs

Chemistry studies the composition of matter, its structure, and the means by which it is converted from one form to another.

The Program. We offer several degree programs leading to the Bachelor of Arts (A.B.) and the Bachelor of Science (B.S.). To meet and discuss these programs with our staff advisors, see https://chemistry.ucdavis.edu/undergraduate/academic-advising.

The B.S. degree in Chemical Physics provides students with an in-depth understanding of the fundamentals of chemistry, focusing on areas at the interface of chemistry and physics. These include, for example, the experimental measurement and theoretical calculation of the detailed properties and behavior of atoms and molecules. An important experimental tool in chemical physics is spectroscopy, which uses conventional or laser light to probe the atomic and molecular properties of matter.

Career Alternatives. Graduates in Chemical Physics will be prepared for employment in technology, energy, laser science, material science, solid-state chemistry and other fields requiring a strong background in both chemistry and physics. They will also be well-suited for graduate study in a range of areas including chemistry, chemical physics, computational chemistry, material science, nanomaterials and laser science.

Major Advisor. To contact a major advisor in the Department of Chemistry, see https://chemistry.ucdavis.edu/undergraduate/academic-advising.

Honors and Honors Program. The student must take courses 194HA, 194HB, and 194HC.

Graduate Study. The Department of Chemistry offers programs of study and research leading to the M.S. and Ph.D. degrees in Chemistry. Detailed information regarding graduate study may be obtained by contacting the Graduate Advisor, Department of Chemistry. See also Graduate Studies.

At least two additional upper division units in chemistry; except CHE 107A, 107B.

**Total: 110**

**Chemical Physics; Chemistry | CHE Courses**

**Chemistry Placement Requirement.** Students who enroll in Chemistry 002A, 002AH or Workload Chemistry 041C must satisfy the Chemistry Placement Requirement. Students who do not meet the placement requirements will be administratively dropped from these Chemistry courses. For more information about the placement requirements, see https://chemistry.ucdavis.edu/undergraduate/general-chemistry-series/chemistry-placement-requirements.

**The Student Academic Success Center (SASC) provides** review materials, workshops, drop-in and group tutoring, and additional resources.

**Chemistry Graduate Students Tutors** are also listed on the Department of Chemistry website at https://chemistry.ucdavis.edu/undergraduate/tutors-chemistry.

**Courses in CHE:**

**CHE 002A—General Chemistry (5)**
Discussion/Laboratory—4 hours; Lecture—3 hours. Prerequisite(s): High school chemistry and physics, and concurrent enrollment in mathematics at or above the level of MAT 012 strongly recommended; any one of the following: (A) SAT Mathematics score = 600+; (B) ACT Mathematics score = 27+; (C) AP Chemistry exam score of = 3+; (D) SAT Chemistry subject test score = 700+; (E) UC Davis Chemistry Placement Examination score = 24+ on first attempt; in lieu of A-E, either completion of ALEKS online Preparatory Chemistry course with 100% Pie Mastery or completion of Workload 41C with a grade of C or better (Workload 41C offered in fall quarter only to students who
do not meet A-E). Periodic table, stoichiometry, chemical equations, physical properties and kinetic theory of gases, atomic and molecular structure and chemical bonding. Laboratory experiments in stoichiometric relations, properties and collection of gases, atomic spectroscopy, and introductory quantitative analysis. Not open for credit to students who have taken CHE 002AH. GE credit: QL, SE, SL. Effective: 2016 Fall Quarter.

CHE 002AH—Honors General Chemistry (5)
Discussion/Laboratory—4 hours; Lecture—3 hours. Prerequisite(s): Consent of Instructor. High school chemistry and physics. Any ONE of the following: (A) SAT Mathematics score = 670+; (B) ACT Mathematics score = 30+; (C) AP Chemistry exam score = 4+; (D) SAT Chemistry subject test score = 700+; (E) UC Davis Chemistry Placement Examination score = 33+ on first attempt; (F) UC Davis Chemistry Placement Examination score = 45+, both on first attempts; consent of instructor. Limited enrollment course with a more rigorous treatment of material covered in course 2A. Students completing course 2AH can continue with course 2BH or 2B. Not open for credit to students who have taken CHE 002A. GE credit: QL, SE, SL. Effective: 2016 Fall Quarter.

CHE 002B—General Chemistry (5)
Discussion/Laboratory—4 hours; Lecture—3 hours. Prerequisite(s): CHE 002A C- or better or CHE 002AH C- or better Continuation of course 2A. Condensed phases and intermolecular forces, chemical thermodynamics, chemical equilibria, acids and bases, solubility. Laboratory experiments in thermochemistry, equilibria, and quantitative analysis using volumetric methods. Not open for credit to students who have taken CHE 002BH. GE credit: QL, SE, SL. Effective: 2016 Fall Quarter.

CHE 002BH—Honors General Chemistry (5)
Discussion/Laboratory—4 hours; Lecture—3 hours. Prerequisite(s): CHE 002A or CHE 002AH C or better; MAT 021B (can be concurrent); or Consent of Instructor. CHE 2A with consent of instructor. Limited enrollment course with a more rigorous treatment of material covered in course 2B. Students completing course 2BH can continue with course 2CH or 2C. Not open for credit to students who have taken CHE 002B. GE credit: QL, SE, SL. Effective: 2016 Fall Quarter.

CHE 002C—General Chemistry (5)
Discussion/Laboratory—4 hours; Lecture—3 hours. Prerequisite(s): CHE 002B C- or better or CHE 002BH C- or better Continuation of course 2B. Kinetics, electrochemistry, spectroscopy, structure and bonding in transition metal compounds, application of principles to chemical reactions. Laboratory experiments in selected analytical methods and syntheses. Not open for credit to students who have taken CHE 002CH. GE credit: QL, SE, SL. Effective: 2016 Fall Quarter.

CHE 002CH—Honors General Chemistry (5)
Discussion/Laboratory—6 hours; Lecture—3 hours. Prerequisite(s): CHE 002B or CHE 002BH C or better; MAT 021C (can be concurrent); or Consent of Instructor. CHE 002B with consent of instructor Limited enrollment course with a more rigorous treatment of material covered in course 2C. Not open for credit to students who have taken CHE 002C. GE credit: QL, SE, SL. Effective: 2016 Fall Quarter.

CHE 003A—Chemistry for Life Sciences: Determining Structure and Predicting Properties (5)
Discussion—1 hour; Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): High school chemistry and physics strongly recommended; satisfactory score on the Chemistry and Mathematics Placement Examinations or satisfactory completion of the ALEKS Summer Chemistry Prep Course; a satisfactory grade in WKL 041C (‘P’ or ‘C’ or better) will suffice in lieu of a satisfactory Chemistry Placement Examination score. Concurrent enrollment with course 2A, 2B, 2C, 2AH, 2BH, 2CH prohibited; not open for enrollment to students who have completed CHE 2C or 2CH with a C- or better. Integrated General and Organic Chemistry intended for majors in the life sciences. Core concepts of chemical composition, structure and properties. Includes phase changes, separation methods, composition, spectroscopy, atomic and molecular structure, periodicity, bonding, charge distribution, intermolecular forces, and physical properties. Only 3 units credit for students who have completed CHE 002A or CHE 002AH with a C- or better; only 1 unit of credit to students who have completed CHE 002B or CHE 002BH with a C- or better. GE credit: QL, SE, SL. Effective: 2016 Fall Quarter.

CHE 003B—Chemistry for Life Sciences: Predicting and Characterizing Chemical Change (5)
Discussion—1 hour; Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): CHE 003A C- or better; Note: C- or better in CHE 002A or 002AH does not satisfy the prerequisite requirement. Concurrent enrollment with course 2A, 2B, 2C, 2AH, 2BH, 2CH prohibited. Continuation of course 3A covering core concepts of characterization of chemical processes and predicting chemical changes. Includes modeling chemical reactions, understanding proportions/stoichiometry, tracking energy, activation energy, reaction kinetics, thermodynamics, and equilibrium.
Only 3 units credit for students who have completed CHE 002B or CHE 002BH with a C- or better. GE credit: QL, SE, SL. Effective: 2017 Winter Quarter.

**CHE 003C—Chemistry for Life Sciences: Controlling Processes and Synthetic Pathways (5)**
Discussion—1 hour; Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): CHE 003B C- or better; Note: C- or better in CHE 002B or 002BH does not satisfy the prerequisite requirement. Concurrent enrollment with course 2A, 2B, 2C, 2AH, 2BH, 2CH prohibited. Continuation of course 3B covering core concepts of harnessing energy, controlling reaction extent, and organic chemistry synthetic pathways. Includes acids and bases, thermodynamics, chemical equilibria, organic chemistry terminology and mechanisms. Only 3 units credit for students who have completed CHE 002C or CHE 002CH with a C- or better. GE credit: QL, SE, SL. Effective: 2017 Spring Quarter.

**CHE 008A—Organic Chemistry: Brief Course (2)**
Lecture—2 hours. Prerequisite(s): CHE 002B C- or better or CHE 002BH C- or better With course 8B, an introduction to the nomenclature, structure, chemistry, and reaction mechanisms of organic compounds. Intended for students majoring in areas other than organic chemistry. No credit to students who have completed CHE 118A or 128A. GE credit: SE. Effective: 2016 Fall Quarter.

**CHE 008B—Organic Chemistry: Brief Course (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): CHE 008A or CHE 118A or CHE 128A Laboratory concerned primarily with organic laboratory techniques and the chemistry of the common classes of organic compounds. Lecture portion a continuation of course 8A. Varying credit hours according to courses taken previously and corresponding expected workload for this course; full credit to students who complete CHE 118A or 128A; 3 units credit to students who have completed CHE 128A and CHE 129A (students who have completed CHE 129A are exempt from the laboratory portion of CHE 008B); 2 units credit to students who have completed CHE 128B; 1 unit credit to students who have completed CHE 118B or CHE 128B and CHE 129A (students who have completed CHE 118B are exempt from the laboratory portion of CHE 008B). GE credit: SE. Effective: 2016 Fall Quarter.

**CHE 010—Concept of Chemistry (4)**
Lecture—4 hours. Survey of basic concepts and contemporary applications of chemistry. Designed for non-science majors and not as preparation for Chemistry 2A. Not open for credit to students who have had CHE 002A; but students with credit for CHE 010 may take CHE 002A for full credit. GE credit: SE, SL. Effective: 1997 Winter Quarter.

**CHE 098—Directed Group Study (1-5)**
Variable. Prerequisite(s): Consent of Instructor. Primarily for lower division students. (P/NP grading only.) Effective: 1997 Winter Quarter.

**CHE 099—Special Study for Undergraduates (1-5)**
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

**CHE 100—Environmental Water Chemistry (3)**
Lecture—3 hours. Prerequisite(s): CHE 002C or CHE 002CH Practical aspects of water chemistry in the environment, including thermodynamic relations, coordination chemistry, solubility calculations, redox reactions and rate laws. Computer modeling of the evolution in water chemistry from contact with minerals and gases. Effective: 2016 Winter Quarter.

**CHE 103A—Chemistry for Life Sciences: Determining Organic Structures and Properties (5)**
Discussion—1 hour; Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): CHE 002C C- or better or CHE 002CH C- or better; (CHE 008A or CHE 118A or CHE 128A) Not open for enrollment to students who have completed course 008B, 118B, 118C, 128B, 128C with a C- or better. Continuation of course 3C. Core concepts of organic structure, nomenclature, functional groups, organic acids and bases, resonance and delocalization, aromaticity, intermolecular forces, three-dimensional structure and conformational analysis, spectroscopy. Only 3 Units of credit for students who have completed CHE 008A with a C- or better; only 2 units of credit for students who have completed CHE 118A or CHE 128A with a C- or better; not open for credit to students who have completed CHE 008B, CHE 118B, CHE 118C, CHE 128B, CHE 128C with a C- or better. GE credit: SE, SL. Effective: 2017 Fall Quarter.

**CHE 103B—Chemistry for Life Sciences: Predicting and Controlling Organic Pathways (5)**
Discussion—1 hour; Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): CHE 103A C- or better Not open for enrollment to students who have completed course 008B, 118B, 118C, 128B, or 128C with a C- or better. Continuation of course 103A. Core concepts of functional group transformations, synthesis, mechanisms, sustainable chemistry, structure and function of biomolecules, organic reactions in biological systems, molecular design, detection, separation, and identification of organic molecules. Not open for credit to students who have

**CHE 104—Forensic Applications of Analytical Chemistry (3)**
Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): CHE 002C or CHE 002CH Theory and application of standard methods of chemical analysis to evidentiary samples. Use and evaluation of results from screening tests, FTIR, GC and GCMS to various sample types encountered in forensics. Effective: 2016 Winter Quarter.

**CHE 105—Analytical and Physical Chemical Methods (4)**
Laboratory—6 hours; Lecture—2 hours. Prerequisite(s): CHE 110A (can be concurrent) or CHE 107B (can be concurrent) Fundamental theory and laboratory techniques in; analytical and physical chemistry, errors and data analysis methods, basic electrical circuits in instruments, advanced solution equilibria, potentiometric analysis, chromatographic separations, UV-visible spectroscopy, lasers. GE credit: QL, SE, SL. Effective: 2016 Spring Quarter.

**CHE 107A—Physical Chemistry for the Life Sciences (3)**
Lecture—3 hours. Prerequisite(s): CHE 002C or CHE 002CH; (MAT 016C or MAT 017C or MAT 021C); (PHY 007C or PHY 009C or PHY 009HC) Physical chemistry intended for majors in the life science area. Introductory development of classical and statistical thermodynamics including equilibrium processes and solutions of both non-electrolytes and electrolytes. The thermodynamic basis of electrochemistry and membrane potentials. GE credit: SE. Effective: 2017 Spring Quarter.

**CHE 107B—Physical Chemistry for the Life Sciences (3)**
Lecture—3 hours. Prerequisite(s): CHE 107A Continuation of course 107A. Kinetic theory of gases and transport processes in liquids. Chemical kinetics, enzyme kinetics and theories of reaction rates. Introduction to quantum theory, atomic and molecular structure, and spectroscopy. Application to problems in the biological sciences. GE credit: SE. Effective: 2016 Fall Quarter.

**CHE 108—Molecular Biochemistry (3)**
Lecture—3 hours. Prerequisite(s): CHE 128C or CHE 118C Pass One open to Chemistry majors. Chemical principles and experimental methods applied to the biological sciences to understand the molecular structure and function of proteins, nucleic acids, carbohydrates, and membrane lipids. Effective: 2016 Winter Quarter.

**CHE 110A—Physical Chemistry: Introduction to Quantum Mechanics (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (PHY 007C or PHY 009C or PHY 009HC); (CHE 002C or CHE 002CH); (MAT 016C or MAT 017C or MAT 021C); Completion of Mathematics 21D, 22A, and 22AL, and Physics 9C or 9HC, strongly recommended. Introduction to the postulates and general principles of quantum mechanics. Approximations based on variational method and time independent perturbation theory. Application to harmonic oscillator, rigid rotor, one-electron and many-electron atoms, and homo-and hetero-nuclear diatomic molecules. GE credit: QL, SE. Effective: 2017 Spring Quarter.

**CHE 110B—Physical Chemistry: Properties of Atoms and Molecules (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): CHE 110A Group theory. Application of quantum mechanics to polyatomic molecules and molecular spectroscopy. Intermolecular forces and the gas, liquid and solid states. Distributions, ensembles and partition functions. Transport properties. Effective: 1999 Fall Quarter.

**CHE 110C—Physical Chemistry: Thermodynamics, Equilibria and Kinetics (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): CHE 110B Development and application of the general principles of thermodynamics and statistical thermodynamics. Chemical kinetics, rate laws for chemical reactions and reaction mechanisms. Effective: 1999 Fall Quarter.

**CHE 115—Instrumental Analysis (4)**
Laboratory—6 hours; Lecture—2 hours. Prerequisite(s): CHE 105; (CHE 110B can be concurrent) or (CHE 107A, CHE 107B) Intermediate theory and laboratory techniques in analytical and physical chemistry. Advanced data analysis methods and goodness-of-fit criteria. Fourier-transform spectroscopic methods and instrumentation. Mass spectrometry. Electrochemistry. Liquid chromatography. GE credit: QL, SE, WE. Effective: 2006 Fall Quarter.

**CHE 118A—Organic Chemistry for Health and Life Sciences (4)**
Discussion/Laboratory—1.5 hours; Lecture—3 hours. Prerequisite(s): CHE 002C C- or better or CHE 002CH C- or better The 118A, 118B, 118C series is for students planning professional school studies in health and life sciences. A rigorous, in-depth presentation of basic principles with emphasis on stereochemistry and spectroscopy and preparations and reactions of nonaromatic hydrocarbons, haloalkanes, alcohols and ethers. Only 2 units credit for students who have completed course CHE 008A; not open for credit to students who have completed CHE 008B or CHE 128A. GE credit: SE, SL. Effective: 2017 Spring Quarter.
CHE 118B—Organic Chemistry for Health and Life Sciences (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): CHE 118A or CHE 128A Continuation of course 118A, with emphasis on spectroscopy and the preparation and reactions of aromatic hydrocarbons, organometallic compounds, aldehydes and ketones. Only one unit of credit to students who completed course CHE 128B.; not open for credit to students who have completed 8 or more units of CHE 128 and CHE 129 courses. GE credit: SE, SL. Effective: 2017 Fall Quarter.

CHE 118C—Organic Chemistry for Health and Life Sciences (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): CHE 118B or (CHE 128B, CHE 129A) Open to students changing from the CHE 128 course sequence only if they have completed prior organic laboratory work (at least course CHE 129A). Continuation of course 118B, with emphasis on the preparation, reactions and identification of carboxylic acids and their derivatives, alkyl and acyl amines, ß-dicarbonyl compounds, and various classes of naturally occurring, biologically important compounds. Not open for credit to students who have completed course CHE 128C. GE credit: SE, SL. Effective: 2018 Winter Quarter.

CHE 121—Introduction to Molecular Structure and Spectra (4)
Lecture—4 hours. Prerequisite(s): CHE 110B Modern theoretical and experimental methods used to study problems of molecular structure and bonding; emphasis on spectroscopic techniques. Effective: 1997 Winter Quarter.

CHE 122—Chemistry of Nanoparticles (3)
Lecture—3 hours. Prerequisite(s): CHE 110C (can be concurrent) or CHE 107B (can be concurrent) Chemical and physical aspects of inorganic nanoparticles. Topics include synthesis, structure, colloidal behavior, catalytic activity, size and shape dependency of physical properties, analytical methods and applications. Effective: 2016 Winter Quarter.

CHE 124A—Inorganic Chemistry: Fundamentals (3)
Lecture—3 hours. Prerequisite(s): CHE 002C or CHE 002CH Symmetry, molecular geometry and structure, molecular orbital theory of bonding (polyatomic molecules and transition metals), solid state chemistry, energetics and spectroscopy of inorganic compounds. GE credit: SE. Effective: 2016 Fall Quarter.

CHE 124B—Inorganic Chemistry: Main Group Elements (3)
Lecture—3 hours. Prerequisite(s): CHE 124A Synthesis, structure and reactivity of inorganic and heteroorganic molecules containing the main group elements. Effective: 1997 Winter Quarter.

CHE 124C—Inorganic Chemistry: d and f Block Elements (3)
Lecture—3 hours. Prerequisite(s): CHE 124A Synthesis, structure and reactivity of transition metal complexes, organometallic and bioinorganic chemistry, the lanthanides and actinides. Effective: 1997 Winter Quarter.

CHE 124L—Laboratory Methods in Inorganic Chemistry (2)
Laboratory—6 hours. Prerequisite(s): CHE 124B or CHE 124C (can be concurrent) The preparation, purification and characterization of main group and transition metal inorganic and organometallic compounds. Effective: 2000 Spring Quarter.

CHE 125—Advanced Methods in Physical Chemistry (4)
Laboratory—6 hours; Lecture—2 hours. Prerequisite(s): CHE 110C (can be concurrent); CHE 115 Advanced theory and laboratory techniques in analytical and physical chemistry. Advanced spectroscopic methods. Thermodynamics. Kinetics. Chemical literature. Digital electronics and computer interfacing. Laboratory measurements and vacuum techniques. GE credit: QL, SE, WE. Effective: 2000 Spring Quarter.

CHE 128A—Organic Chemistry (3)
Lecture—3 hours. Prerequisite(s): CHE 002C C or better or CHE 002CH C or better Introduction to the basic concepts of organic chemistry with emphasis on stereochemistry and the chemistry of hydrocarbons. Designed primarily for majors in chemistry. Chemistry majors should enroll in course 129A concurrently. Only two units credit allowed for students who have completed CHE 008A; not open for credit to students who have completed courses CHE 008B or 118A. GE credit: SE. Effective: 2017 Winter Quarter.

CHE 128B—Organic Chemistry (3)
Lecture—3 hours. Prerequisite(s): CHE 128A; or Consent of Instructor. Continuation of course 128A with emphasis on the chemistry of alcohols, ethers, their sulfur analogs, and carbonyl compounds. Introduction to the application of spectroscopic methods to organic chemistry. Introduction to synthesis of moderately complex organic molecules. Full credit to students who completed CHE 008B or CHE 118A; not open for credit to students who have completed CHE 118B. GE credit: SE. Effective: 2017 Winter Quarter.
CHE 128C—Organic Chemistry (3)
Lecture—3 hours. Prerequisite(s): CHE 128B Continuation of course 128B with emphasis on enolate condensations and the chemistry of amines, phenols, and sugars; selected biologically important compounds. Full credit to students who completed CHE 118B; Not open for credit to students who have completed CHE 118C. GE credit: SE. Effective: 2017 Winter Quarter.

CHE 128A—Organic Chemistry Laboratory (2)
Laboratory—3 hours; Lecture—1 hour. Prerequisite(s): CHE 128C Prerequisite(s): CHE 002C C or better or CHE 002CH C or better; CHE 128A (can be concurrent) Introduction to laboratory techniques of organic chemistry. Emphasis on methods used for separation and purification of organic compounds. Full credit to students who completed CHE 008B; not open for credit to students who have completed CHE 118C. GE credit: SE. Effective: 2017 Winter Quarter.

CHE 129B—Organic Chemistry Laboratory (2)
Laboratory—6 hours. Prerequisite(s): CHE 129A; CHE 128B (can be concurrent) Continuation of course 129A. Emphasis on methods used for synthesis and isolation of organic compounds. Not open for credit to students who have completed CHE 118C. GE credit: SE. Effective: 2017 Winter Quarter.

CHE 129A—Organic Chemistry Laboratory (2)
Laboratory—6 hours. Prerequisite(s): CHE 129C (can be concurrent); CHE 129B continuation of course 129B Effective: 1997 Winter Quarter.

CHE 130A—Pharmaceutical Chemistry (3)
Lecture—3 hours. Prerequisite(s): CHE 118C or CHE 128C Examination of the design principles and experimental methods used in pharmaceutical and medicinal chemistry. Effective: 2006 Fall Quarter.

CHE 130B—Pharmaceutical Chemistry (3)
Lecture—2 hours; Lecture/Lab—1 hour. Prerequisite(s): CHE 130A (can be concurrent) Continuation of course 130A with emphasis on case studies of various drugs and the use of computational methods in drug design. Effective: 2017 Spring Quarter.

CHE 130C—Case Studies in Pharmaceutical Chemistry (1)
Independent Study; Seminar—2 hours. Prerequisite(s): CHE 130A (can be concurrent); CHE 130B (can be concurrent) Seminar. Exploration of medicinal and pharmaceutical chemistry topics through seminars presented by professional chemists (and allied professionals). Designed to highlight career opportunities for students with a degree in pharmaceutical chemistry. (P/NP grading only) Effective: 2017 Spring Quarter.

CHE 131—Modern Methods of Organic Synthesis (3)
Lecture—3 hours. Prerequisite(s): CHE 128C or CHE 118C Introduction to modern synthetic methodology in organic chemistry with emphasis on retrosynthetic analysis, reaction mechanisms, and application to multistep syntheses of pharmaceuticals and natural products. GE credit: SE. Effective: 2016 Fall Quarter.

CHE 135—Advanced Bio-organic Chemistry Laboratory (3)
Laboratory—6 hours; Lecture—1 hour. Prerequisite(s): CHE 130B (can be concurrent) Separation, purification, identification and biological evaluation of organic compounds using modern methods of synthesis, computational chemistry and instrumentation. Emphasis on pharmaceutical and medicinal substances. Effective: 2017 Fall Quarter.

CHE 145—Good Quality Practices (3)
Discussion—1 hour; Laboratory—6 hours. Prerequisite(s): CHE 118B or CHE 129B Open to Chemistry and science majors. Preparation for work in GQP laboratories in both research and industry. Context within GQP Good Quality Practices (GMP Good Manufacturing Practice, GCP Good Clinical Practices). Lab practice in GQP skills. GE credit: SE. Effective: 2016 Winter Quarter.

CHE 150—Chemistry of Natural Products (3)
Lecture—3 hours. Prerequisite(s): CHE 118C or CHE 128C Chemistry of terpenes, steroids, acetogenins, and alkaloids: isolation, structure determination, biosynthesis, chemical transformations, and total synthesis. GE credit: SE. Effective: 2017 Winter Quarter.

CHE 155—Scientific Programming for Chemistry (3)

354
CHE 192—Internship in Chemistry (1-6)
Internship—3-18 hours. Prerequisite(s): Upper division standing; project approval by faculty sponsor prior to enrollment. Supervised internship in chemistry; requires a final written report. May be repeated up to 6 unit(s). (P/NP grading only.) Effective: 1997 Winter Quarter.

CHE 194HA—Undergraduate Honors Research (2)
Independent Study—2 hours. Prerequisite(s): Open only to chemistry majors who have completed 135 units and who qualify for the honors program. Original research under the guidance of a faculty advisor, culminating in the writing of an extensive report. Effective: 2001 Fall Quarter.

CHE 194HB—Undergraduate Honors Research (2)
Independent Study—2 hours. Prerequisite(s): Open only to chemistry majors who have completed 135 units and who qualify for the honors program. Original research under the guidance of a faculty advisor, culminating in the writing of an extensive report. Effective: 1997 Winter Quarter.

CHE 194HC—Undergraduate Honors Research (2)
Independent Study—2 hours. Prerequisite(s): Open only to chemistry majors who have completed 135 units and who qualify for the honors program. Original research under the guidance of a faculty advisor, culminating in the writing of an extensive report. Effective: 2005 Fall Quarter.

CHE 195—Careers in Chemistry (1)
Seminar—2 hours. Prerequisite(s): Junior or senior standing in Chemistry. Designed to give Chemistry undergraduate students an in-depth appreciation of career opportunities with a bachelor's degree in chemistry. Professional chemists (and allied professionals) describe research and provide career insights. (P/NP grading only.) Effective: 2001 Fall Quarter.

CHE 197—Projects in Chemical Education (1-4)
Discussion/Laboratory. Prerequisite(s): Consent of Instructor. Participation may include development of laboratory experiments, lecture demonstrations, autotutorial modules or assistance with laboratory sessions. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 1997 Winter Quarter.

CHE 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of instructor based upon adequate preparation in chemistry, mathematics and physics. (P/NP grading only.) Effective: 1997 Winter Quarter.

CHE 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of instructor based upon adequate preparation in chemistry, mathematics, and physics. (P/NP grading only.) Effective: 1997 Winter Quarter.

CHE 201—Chemical Uses of Symmetry and Group Theory (3)
Lecture—3 hours. Prerequisite(s): CHE 124A; CHE 110B; or Consent of Instructor. Symmetry elements and operations, point groups, representations of groups. Applications to molecular orbital theory, ligand field theory, molecular vibrations, and angular momentum. Crystallographic symmetry. Effective: 1997 Winter Quarter.

CHE 204—Mathematical Methods in Chemistry (3)

CHE 205—Symmetry, Spectroscopy, and Structure (3)
Lecture—3 hours. Prerequisite(s): CHE 201; Or equivalent. Vibrational and rotational spectra; electronic spectra and photoelectron spectroscopy; magnetism; electron spin and nuclear quadrupole resonance spectroscopy; nuclear magnetic resonance spectroscopy; other spectroscopic methods. Effective: 1997 Winter Quarter.

CHE 209—Special Topics in Physical Chemistry (3)
Lecture—3 hours. Prerequisite(s): CHE 210A; CHE 211A Graduate standing in Chemistry. Advanced topics in physical chemistry, biophysical chemistry or chemical physics chosen from areas of current research interest. May be repeated for credit when topics differ. Effective: 2005 Fall Quarter.

CHE 210A—Quantum Chemistry: Introduction and Stationary-State Properties (3)
CHE 210B—Quantum Chemistry: Time-Dependent Systems (3)

CHE 210C—Quantum Chemistry: Molecular Spectroscopy (3)
Lecture—3 hours. Prerequisite(s): CHE 210B Molecular spectroscopy: Born-Oppenheimer approximation, rotational, vibrational and electronic spectroscopy, spin systems, and molecular photophysics. Effective: 1997 Winter Quarter.

CHE 211A—Advanced Physical Chemistry: Statistical Thermodynamics (3)
Lecture—3 hours. Prerequisite(s): Consent of Instructor. Principles and applications of statistical mechanics; ensemble theory; statistical thermodynamics of gases, solids, liquids, electrolyte solutions and polymers; chemical equilibrium. Effective: 1997 Winter Quarter.

CHE 211B—Statistical Mechanics (3)
Lecture—3 hours. Prerequisite(s): CHE 211A Statistical mechanics of nonequilibrium systems, including the rigorous kinetic theory of gases, continuum mechanics transport in dense fluids, stochastic processes, brownian motion and linear response theory. Effective: 1997 Winter Quarter.

CHE 212—Chemical Dynamics (3)
Lecture—3 hours. Prerequisite(s): Consent of Instructor. Introduction to modern concepts in chemical reaction dynamics for graduate students in chemistry. Emphasis will be placed on experimental techniques as well as emerging physical models for characterizing chemical reactivity at a microscopic level. Effective: 1997 Winter Quarter.

CHE 215—Theoretical and Computational Chemistry (3)
Lecture—3 hours. Prerequisite(s): CHE 211A; CHE 210B; or Consent of Instructor. Mathematics of wide utility in chemistry, computational methods for guidance or alternative to experiment, and modern formulations of chemical theory. Emphasis will vary in successive years. May be repeated for credit. Effective: 1997 Winter Quarter.

CHE 216—Magnetic Resonance Spectroscopy (3)
Lecture—3 hours. Prerequisite(s): CHE 210A; CHE 210B (can be concurrent) Quantum mechanics of spin and orbital angular momentum, nuclear magnetic resonance, theory of chemical shift and multiplet structures, electron spin resonance, theory of g tensor in organic and transition ions, spin Hamiltonians, nuclear quadrupolar resonance, spin relaxation processes. Effective: 1997 Winter Quarter.

CHE 217—X-Ray Structure Determination (3)
Lecture—3 hours. Prerequisite(s): Consent of Instructor. Introduction to x-ray structure determination; crystals, symmetry, diffraction geometry, sample preparation and handling, diffraction apparatus and data collection, methods of structure solution and refinement, presentation of results, text, tables and graphics, crystallographic literature. Effective: 1997 Winter Quarter.

CHE 218—Macromolecules: Physical Principles (3)
Lecture—3 hours. Prerequisite(s): CHE 110A; CHE 110B; CHE 110C; Or equivalent. Relationship of higher order macromolecular structure to subunit composition; equilibrium properties and macromolecular dynamics; physical chemical determination of macromolecular structure. Effective: 2001 Winter Quarter.

CHE 219—Spectroscopy of Organic Compounds (4)
Laboratory—2.5 hours; Lecture—3 hours. Prerequisite(s): CHE 128C; Or equivalent. Identification of organic compounds and investigation of stereochemical and reaction mechanism phenomena using spectroscopic methods--principally NMR, IR and MS. Effective: 2006 Fall Quarter.

CHE 219L—Laboratory in Spectroscopy of Organic Compounds (1)
Laboratory—2.5 hours. Prerequisite(s): CHE 219 (can be concurrent) Restricted to Chemistry graduate students only or consent of instructor Practical application of NMR, IR and MS techniques for organic molecules. Effective: 2009 Summer Session 1.

CHE 221A—Special Topics in Organic Chemistry (3)
Lecture—3 hours. Selected topics of current interest in organic chemistry. Topics will vary each time the course is offered, and in general will emphasize the research interests of the staff member giving the course. Effective: 1997 Winter Quarter.

CHE 221B—Special Topics in Organic Chemistry (3)
Lecture—3 hours. Selected topics of current interest in organic chemistry. Topics will vary each time the course is
CHE 221C—Special Topics in Organic Chemistry (3)
Lecture—3 hours. Selected topics of current interest in organic chemistry. Topics will vary each time the course is
offered, and in general will emphasize the research interests of the staff member giving the course. Effective: 1997
Winter Quarter.

CHE 221D—Special Topics in Organic Chemistry (3)
Lecture—3 hours. Selected topics of current interest in organic chemistry. Topics will vary each time the course is
offered, and in general will emphasize the research interests of the staff member giving the course. Effective: 1997
Winter Quarter.

CHE 221E—Special Topics in Organic Chemistry (3)
Lecture—3 hours. Selected topics of current interest in organic chemistry. Topics will vary each time the course is
offered, and in general will emphasize the research interests of the staff member giving the course. Effective: 1997
Winter Quarter.

CHE 221F—Special Topics in Organic Chemistry (3)
Lecture—3 hours. Selected topics of current interest in organic chemistry. Topics will vary each time the course is
offered, and in general will emphasize the research interests of the staff member giving the course. Effective: 1997
Winter Quarter.

CHE 221G—Special Topics in Organic Chemistry (3)
Lecture—3 hours. Selected topics of current interest in organic chemistry. Topics will vary each time the course is
offered, and in general will emphasize the research interests of the staff member giving the course. Effective: 1997
Winter Quarter.

CHE 221H—Special Topics in Organic Chemistry (3)
Lecture—3 hours. Selected topics of current interest in organic chemistry. Topics will vary each time the course is
offered, and in general will emphasize the research interests of the staff member giving the course. Effective: 1997
Winter Quarter.

CHE 222—Chemistry of Nanoparticles (3)
Lecture/Discussion—3 hours. Prerequisite(s): CHE 110C; Or equivalent. Chemical and physical aspects of inorganic
nanoparticles, including synthesis, purification, reactivity, characterization, and applications for technology.
Emphasis is on problems from the current literature. Not open for credit to students who have taken CHE 122.
Effective: 2009 Winter Quarter.

CHE 226—Principles of Transition Metal Chemistry (3)
Lecture—3 hours. Prerequisite(s): CHE 124A; or equivalent. Electronic structures, bonding, and reactivity of
transition metal compounds. Effective: 1997 Winter Quarter.

CHE 228A—Bio-inorganic Chemistry (3)
Lecture—3 hours. Prerequisite(s): CHE 226; or Consent of Instructor. Defines role of inorganic chemistry in the
functioning of biological systems by identifying the functions of metal ions and main group compounds in biological
systems and discussing the chemistry of model and isolated biological compounds. Offered every third year.
Effective: 1997 Winter Quarter.

CHE 228B—Main Group Chemistry (3)
Lecture—3 hours. Prerequisite(s): CHE 226; or Consent of Instructor. Synthesis, physical properties, reactions and
bonding of main group compounds; Discussions of concepts of electron deficiency, hypervalency, and non-classical
bonding. Chemistry of the main group elements will be treated systematically. Offered every third year. Effective:
1997 Winter Quarter.

CHE 228C—Solid-State Chemistry (3)
Lecture—3 hours. Prerequisite(s): CHE 124A; CHE 110B; CHE 226; Or equivalent. Design and synthesis, structure
and bonding of solid-state compounds; physical properties and characterization of solids; topics of current interest
such as low-dimensional materials, inorganic polymers, materials for catalysis. Offered every third year. Effective:
1997 Winter Quarter.

CHE 228D—Homogeneous Catalysis (3)
Lecture—3 hours. Prerequisite(s): CHE 226 Overview of homogeneous catalysis and related methods, with
emphasis on kinetics, mechanisms, and applications for organic synthesis. The related methods may include
cluster, colloid, phase transfer, enzymatic, heterogeneous and polymer-supported catalysis. Offered every third year. Effective: 2001 Fall Quarter.

**CHE 228E—Magnetochemistry (3)**
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): CHE 124A or CHE 201; Or an equivalent class from either Physics or Chemical Engineering and Materials Science. Covers the basic principles and concepts of magnetism, methods used for characterization of magnetic properties, as well as specific state-of-the-art magnetic materials and topics from the recent chemistry literature. Effective: 2016 Winter Quarter.

**CHE 231A—Organic Synthesis: Methods and Strategies (4)**
Discussion/Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): CHE 128C; Or equivalent. Current strategies and methods in synthetic organic chemistry. Focus on construction of carbon frameworks, control of relative and absolute stereochemistry and retrosynthetic strategies. Use of databases and molecular modeling software in multistep strategies. Effective: 2017 Winter Quarter.

**CHE 231B—Advanced Organic Synthesis (3)**

**CHE 233—Physical-Organic Chemistry (3)**
Lecture—3 hours. Prerequisite(s): CHE 128A; CHE 128B; CHE 128C; CHE 110A; CHE 110B; CHE 110C; Or equivalent. Introduction to elementary concepts in physical organic chemistry including the application of simple numerical techniques in characterizing and modeling organic reactions. Effective: 1997 Winter Quarter.

**CHE 235—Organometallic Chemistry in Organic Synthesis (3)**
Lecture—3 hours. Prerequisite(s): CHE 128C Current trends in use of organometallics for organic synthesis; preparations, properties, applications, and limitations of organometallic reagents derived from transition and/or main group metals. Effective: 1997 Winter Quarter.

**CHE 236—Chemistry of Natural Products (3)**
Lecture—3 hours. Prerequisite(s): CHE 128C Or equivalent. Advanced treatment of chemistry of naturally occurring compounds isolated from a variety of sources. Topics will include isolation, structure determination, chemical transformations, total synthesis, biological activity, and biosynthesis. Biosynthetic origin will be used as a unifying theme. Effective: 1997 Winter Quarter.

**CHE 237—Bio-organic Chemistry (3)**
Lecture—3 hours. Prerequisite(s): CHE 128C; Or equivalent. Structure and function of biomolecules; molecular recognition; enzyme reaction mechanisms; design of suicide substrates for enzymes; enzyme engineering; design of artificial enzymes and application of enzymes in organic synthesis. Effective: 1997 Winter Quarter.

**CHE 238—Introduction to Chemical Biology (3)**
Lecture—3 hours. Prerequisite(s): CHE 118C or CHE 128C; Or equivalent; CHE 130A, CHE 130B and BIS 102, BIS 103, and BIS 104, or the equivalents recommended. Synthesis of complex molecules in nature. Use of biosynthetic pathways in synthesis of new chemical entities. Applications of small molecules in chemical genetics and structural biology. Solving biological problems using synthetic biomolecules. Effective: 2009 Winter Quarter.

**CHE 240—Advanced Analytical Chemistry (3)**
Lecture—3 hours. Prerequisite(s): CHE 110A; CHE 115; Or equivalent. Numerical treatment of experimental data; thermodynamics of electrolyte and non-electrolyte solutions; complex equilibria in aqueous and non-aqueous solutions; potentiometry and specific ion electrodes; mass transfer in liquid solutions; fundamentals of separation science, including column, gas and liquid chromatography. Effective: 1997 Winter Quarter.

**CHE 241A—Surface Analytical Chemistry (3)**
Lecture—3 hours. Prerequisite(s): CHE 110C; Or equivalent. Concepts of surfaces and interfaces: physical properties, unique chemistry and electronic effects. Focus on gas-solid interfaces, with some discussion of liquid-solid interfaces. Effective: 2002 Fall Quarter.

**CHE 241B—Laser and X-ray Spectroscopy (3)**
Lecture—3 hours. Prerequisite(s): CHE 110B; Or equivalent. Concepts and mechanisms of light-matter interactions. Chemical applications of modern spectroscopic methods, including multiphoton spectroscopy, time-resolved laser and x-ray photolysis, and phase-contrast x-ray imaging. Effective: 2002 Fall Quarter.
CHE 241C—Mass Spectrometry (3)
Lecture—3 hours. Prerequisite(s): CHE 110C; CHE 115; Or equivalent. Mass spectrometry and related methods with emphasis on ionization methods, mass analyzers, and detectors. Related methods may include ion-molecule reactions, unimolecular dissociation of organic and bio-organic compounds, and applications in biological and environmental analysis. Effective: 2002 Winter Quarter.

CHE 241D—Electroanalytical Chemistry (3)
Lecture—3 hours. Prerequisite(s): CHE 110C; CHE 115; Or equivalent. Electroanalytical chemistry with consideration of mass transfer and electrode kinetics for polarizable electrodes. Current-potential curves for a variety of conditions, including both potentiostatic and galvanostatic control, and their application in chemical analysis. Effective: 2002 Winter Quarter.

CHE 241E—Microscopy and Imaging Techniques (3)
Lecture—3 hours. Prerequisite(s): CHE 110C; CHE 115; Or equivalent. Introduction to modern microscopy and imaging techniques: scanning tunneling, atomic force, far-field optical, fluorescence, scanning near-field optical, and scanning electron microscopy. Application to nanoscience and analytical and bioanalytical chemistry. Some laboratory demonstrations. Effective: 2002 Fall Quarter.

CHE 245—Mechanistic Enzymology (3)
Lecture—3 hours. Advanced topics in chemical kinetics relevant to enzymes, enzyme kinetics, theory of enzyme catalysis, and the analysis of a selection of organic enzyme reaction mechanisms by the tools introduced in the first part of the course. Effective: 2013 Fall Quarter.

CHE 261—Current Topics in Chemical Research (2)
Lecture—2 hours. Prerequisite(s): Graduate standing in Chemistry or consent of instructor. Designed to help chemistry graduate students develop and maintain familiarity with the current and past literature in their immediate field of research and related areas. May be repeated for credit when topics differ. Effective: 1997 Winter Quarter.

CHE 263—Introduction to Chemical Research Methodology (3)
Discussion/Laboratory—9 hours. Prerequisite(s): CHE 293; and Consent of Instructor. Graduate student standing in Chemistry. Introduction to identification, formulation, and solution of meaningful scientific problems including experimental design and/or theoretical analyses of new and prevailing techniques, theories and hypotheses. May be repeated for credit when topic differs. (S/U grading only.) Effective: 1997 Winter Quarter.

CHE 264—Advanced Chemical Research Methodology (6)
Discussion/Laboratory—18 hours. Prerequisite(s): CHE 263; or Consent of Instructor. Applications of the methodology developed in course 263 to experimental and theoretical studies. Advanced methods of interpretation of results are developed. Includes the preparation of manuscripts for publication. May be repeated for credit when topic differs. (S/U grading only.) Effective: 1997 Winter Quarter.

CHE 290—Seminar (2)
Seminar—2 hours. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

CHE 293—Introduction to Chemistry Research (1)
Discussion—2 hours. Designed for incoming graduate students preparing for higher degrees in chemistry. Group and individual discussion of research activities in the Department and research topic selection. (S/U grading only.) Effective: 1997 Winter Quarter.

CHE 294—Presentation of Chemistry Research (1)
Seminar—2 hours. Prerequisite(s): Graduate standing. Restricted to graduate students in Chemistry who have not yet given their departmental presentation. Introduces first- and second-year Chemistry graduate students to the process of giving an effective research presentation. Advanced Ph.D. students give formal seminars describing the design and execution of their research projects. May be repeated up to 3 time(s). (S/U grading only.) Effective: 2009 Winter Quarter.

CHE 295—Careers in Chemistry (1)
Seminar—2 hours. Prerequisite(s): Graduate standing in Chemistry. Designed to give Chemistry graduate students an in-depth appreciation of career opportunities with a M.S. or Ph.D. degree in chemistry. Professional chemists (and allied professionals) give seminars describing both research and career insights. May be repeated up to 3 time(s). (S/U grading only.) Effective: 2001 Fall Quarter.

CHE 296—Research in Pharmaceutical Chemistry (6)
Laboratory—18 hours. Prerequisite(s): CHE 130A; CHE 130B; CHE 135; CHE 233 (can be concurrent); and Consent of Instructor. Restricted to students in the Integrated B.S./M.S. Program in Chemistry. Laboratory provides qualified
graduate students with the opportunity to pursue original investigation in Pharmaceutical Chemistry and allied fields in order to fulfill the letter-graded research requirement of the Integrated B.S./M.S. Program in Chemistry (Pharmaceutical Chemistry Emphasis). May be repeated up to 3 time(s) when topic differs. Effective: 2009 Fall Quarter.

CHE 298—Group Study (1-5)

CHE 299—Research (1-12)
Variable. The laboratory is open to qualified graduate students who wish to pursue original investigation. Students wishing to enroll should communicate with the department well in advance of the quarter in which the work is to be undertaken. (S/U grading only.) Effective: 1997 Winter Quarter.

CHE 390—Methods of Teaching Chemistry (2)
Discussion—1 hour; Lecture—1 hour. Prerequisite(s): Consent of Instructor. Graduate student standing in Chemistry. Practical experience in methods and problems of teaching chemistry. Includes analyses of texts and supporting material, discussion of teaching techniques, preparing for and conducting of discussion sessions and student laboratories. Participation in the teaching program required for Ph.D. in chemistry. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

CHE 392—Advanced Methods of Teaching Chemistry (2)
Lecture—2 hours. Prerequisite(s): CHE 390 Advanced topics in teaching chemistry. Analysis and discussion of curricular design, curricula materials, teaching methods and evaluation. For students who are planning a career in teaching chemistry. (S/U grading only.) Effective: 1997 Winter Quarter.

The Major Programs

Chemistry studies the composition of matter, its structure, and the means by which it is converted from one form to another.

The Program. We offer several degree programs leading to the Bachelor of Arts (A.B.) and the Bachelor of Science (B.S.). To meet and discuss these programs with our staff advisors, see https://chemistry.ucdavis.edu/undergraduate/academic-advising.

The curriculum leading to the A.B. degree offers a substantive program in chemistry, while allowing students the freedom to take more courses in other disciplines and pursue a broad liberal arts education. Students with a deeper interest in chemistry should choose one of the several programs leading to the B.S. degree.

Career Alternatives. Chemistry graduates with bachelor's degrees are employed extensively throughout various industries in quality control, research and development, production supervision, technical marketing, and other
areas. The types of industries employing these graduates include chemical, energy, pharmaceutical, genetic engineering, biotechnology, food and beverage, petroleum and petrochemical, paper and textile, electronics and computer, and environmental and regulatory agencies. The bachelor’s programs also provide chemistry graduates with the rigorous preparation needed for an advanced degree in chemistry and various professional schools in the health sciences.

**Major Advisor.** To contact a major advisor in the Department of Chemistry, see https://chemistry.ucdavis.edu/undergraduate/academic-advising.

**Honors and Honors Program.** The student must take courses 194HA, 194HB, and 194HC.

**Graduate Study.** The Department of Chemistry offers programs of study and research leading to the M.S. and Ph.D. degrees in Chemistry. Detailed information regarding graduate study may be obtained by contacting the Graduate Advisor, Department of Chemistry. See also Graduate Studies.

At least 11 additional upper division units in chemistry (except CHE 107A or 107B) or related areas, including one course with formal lectures. Courses in related areas must be approved in advance by the major advisor.

Total: 79-85

Chemistry | CHE B.S.
(College of Letters and Science)

Department Administration. For a complete list of department administration, see https://chemistry.ucdavis.edu/people.

Department Office. 108 Chemistry Building; 530-752-8900; Fax 530-752-8995; https://chemistry.ucdavis.edu/

Faculty. https://chemistry.ucdavis.edu/people

The Major Programs
Chemistry studies the composition of matter, its structure, and the means by which it is converted from one form to another.

The Program. We offer several degree programs leading to the Bachelor of Arts (A.B.) and the Bachelor of Science (B.S.). To meet and discuss these programs with our staff advisors, see https://chemistry.ucdavis.edu/undergraduate/academic-advising.

The general B.S. degree program, which is accredited by the American Chemical Society, is well-suited for students interested in chemistry as a profession. The other B.S. programs focus on a specific area of applied chemistry: Environmental Chemistry and Forensic Chemistry. These programs are a little less intensive in chemistry and draw on significant course material from areas relevant to their particular field, but fall outside of a classical chemistry degree.

Career Alternatives. Chemistry graduates with bachelor's degrees are employed extensively throughout various industries in quality control, research and development, production supervision, technical marketing, and other areas. The types of industries employing these graduates include chemical, energy, pharmaceutical, genetic engineering, biotechnology, food and beverage, petroleum and petrochemical, paper and textile, electronics and computer, and environmental and regulatory agencies. The bachelor's programs also provide chemistry graduates with the rigorous preparation needed for an advanced degree in chemistry and various professional schools in the health sciences.

Major Advisor. To contact a major advisor in the Department of Chemistry, see https://chemistry.ucdavis.edu/undergraduate/academic-advising.

Honors and Honors Program. The student must take courses 194HA, 194HB, and 194HC.

Graduate Study. The Department of Chemistry offers programs of study and research leading to the M.S. and Ph.D. degrees in Chemistry. Detailed information regarding graduate study may be obtained by contacting the Graduate Advisor, Department of Chemistry. See also Graduate Studies.

Chemistry | CHE Courses

Chemistry Placement Requirement. Students who enroll in Chemistry 002A, 002AH or Workload Chemistry 041C must satisfy the Chemistry Placement Requirement. Students who do not meet the placement requirements will be administratively dropped from these Chemistry courses. For more information about the placement requirements, see https://chemistry.ucdavis.edu/undergraduate/general-chemistry-series/chemistry-placement-requirements.

The Student Academic Success Center (SASC) provides review materials, workshops, drop-in and group tutoring, and additional resources.

Chemistry Graduate Students Tutors are also listed on the Department of Chemistry website at https://chemistry.ucdavis.edu/undergraduate/tutors-chemistry.

Courses in CHE:

CHE 002A—General Chemistry (5)
Discussion/Laboratory—4 hours; Lecture—3 hours. Prerequisite(s): High school chemistry and physics, and concurrent enrollment in mathematics at or above the level of MAT 012 strongly recommended; any one of the following: (A) SAT Mathematics score = 600+; (B) ACT Mathematics score = 27+; (C) AP Chemistry exam score of = 3+; (D) SAT Chemistry subject test score = 700+; (E) UC Davis Chemistry Placement Examination score = 24+ on first attempt; in lieu of A-E, either completion of ALEKS online Preparatory Chemistry course with 100% Pie Mastery or completion of Workload 41C with a grade of C or better (Workload 41C offered in fall quarter only to students who do not meet A-E). Periodic table, stoichiometry, chemical equations, physical properties and kinetic theory of gases, atomic and molecular structure and chemical bonding. Laboratory experiments in stoichiometric relations, properties and collection of gases, atomic spectroscopy, and introductory quantitative analysis. Not open for credit to students who have taken CHE 002AH. GE credit: QL, SE, SL. Effective: 2016 Fall Quarter.

CHE 002AH—Honors General Chemistry (5)
Discussion/Laboratory—4 hours; Lecture—3 hours. Prerequisite(s): Consent of Instructor. High school chemistry and physics. Any ONE of the following: (A) SAT Mathematics score = 670+; (B) ACT Mathematics score = 30+; (C) AP Chemistry exam score = 4+; (D) SAT Chemistry subject test score = 700+; (E) UC Davis Chemistry Placement Examination score = 33+ on first attempt; (F) UC Davis Chemistry Placement Examination score = 30+ AND UC Davis Mathematics Placement Examination score = 45+, both on first attempts; consent of instructor. Limited enrollment course with a more rigorous treatment of material covered in course 2A. Students completing course 2AH can continue with course 2BH or 2B. Not open for credit to students who have taken CHE 002A. GE credit: QL, SE, SL. Effective: 2016 Fall Quarter.

CHE 002B—General Chemistry (5)
Discussion/Laboratory—4 hours; Lecture—3 hours. Prerequisite(s): CHE 002A C- or better or CHE 002AH C- or better Continuation of course 2A. Condensed phases and intermolecular forces, chemical thermodynamics, chemical equilibria, acids and bases, solubility. Laboratory experiments in thermochemistry, equilibria, and quantitative analysis using volumetric methods. Not open for credit to students who have taken CHE 002BH. GE credit: QL, SE, SL. Effective: 2016 Fall Quarter.

CHE 002BH—Honors General Chemistry (5)
Discussion/Laboratory—4 hours; Lecture—3 hours. Prerequisite(s): CHE 002A or CHE 002AH C or better; MAT 021B
(can be concurrent); or Consent of Instructor. CHE 2A with consent of instructor. Limited enrollment course with a more rigorous treatment of material covered in course 2B. Students completing course 2BH can continue with course 2CH or 2C. Not open for credit to students who have taken CHE 002B. GE credit: QL, SE, SL. Effective: 2016 Fall Quarter.

**CHE 002C—General Chemistry (5)**
Discussion/Laboratory—4 hours; Lecture—3 hours. Prerequisite(s): CHE 002B C- or better or CHE 002BH C- or better Continuation of course 2B. Kinetics, electrochemistry, spectroscopy, structure and bonding in transition metal compounds, application of principles to chemical reactions. Laboratory experiments in selected analytical methods and syntheses. Not open for credit to students who have taken CHE 002CH. GE credit: QL, SE, SL. Effective: 2016 Fall Quarter.

**CHE 002CH—Honors General Chemistry (5)**
Discussion/Laboratory—6 hours; Lecture—3 hours. Prerequisite(s): CHE 002B or CHE 002BH C or better; MAT 021C (can be concurrent); or Consent of Instructor. CHE 002B with consent of instructor Limited enrollment course with a more rigorous treatment of material covered in course 2C. Not open for credit to students who have taken CHE 002C. GE credit: QL, SE, SL. Effective: 2016 Fall Quarter.

**CHE 003A—Chemistry for Life Sciences: Determining Structure and Predicting Properties (5)**
Discussion—1 hour; Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): High high school chemistry and physics strongly recommended; satisfactory score on the Chemistry and Mathematics Placement Examinations or satisfactory completion of the ALEKS Summer Chemistry Prep Course; a satisfactory grade in WKL 041C ('P' or 'C' or better) will suffice in lieu of a satisfactory Chemistry Placement Examination score. Concurrent enrollment with course 2A, 2B, 2C, 2AH, 2BH, 2CH prohibited; not open for enrollment to students who have completed CHE 2C or 2CH with a C- or better. Integrated General and Organic Chemistry intended for majors in the life sciences. Core concepts of chemical composition, structure and properties. Includes phase changes, separation methods, composition, spectroscopy, atomic and molecular structure, periodicity, bonding, charge distribution, intermolecular forces, and physical properties. Only 3 units credit for students who have completed CHE 002A or CHE 002AH with a C- or better; only 1 unit of credit to students who have completed CHE 002B or CHE 002BH with a C- or better. GE credit: QL, SE, SL. Effective: 2016 Fall Quarter.

**CHE 003B—Chemistry for Life Sciences: Predicting and Characterizing Chemical Change (5)**
Discussion—1 hour; Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): CHE 003A C- or better; Note: C- or better in CHE 002B or 002BH does not satisfy the prerequisite requirement. Concurrent enrollment with course 2A, 2B, 2C, 2AH, 2BH, 2CH prohibited. Continuation of course 3A covering core concepts of characterization of chemical processes and predicting chemical changes. Includes modeling chemical reactions, understanding proportions/stoichiometry, tracking energy, activation energy, reaction kinetics, thermodynamics, and equilibrium. Only 3 units credit for students who have completed CHE 002B or CHE 002BH with a C- or better. GE credit: QL, SE, SL. Effective: 2016 Fall Quarter.

**CHE 003C—Chemistry for Life Sciences: Controlling Processes and Synthetic Pathways (5)**
Discussion—1 hour; Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): CHE 003B C- or better; Note: C- or better in CHE 002B or 002BH does not satisfy the prerequisite requirement. Concurrent enrollment with course 2A, 2B, 2C, 2AH, 2BH, 2CH prohibited. Continuation of course 3B covering core concepts of harnessing energy, controlling reaction extent, and organic chemistry synthetic pathways. Includes acids and bases, thermodynamics, chemical equilibria, organic chemistry terminology and mechanisms. Only 3 units credit for students who have completed CHE 002C or CHE 002CH with a C- or better. GE credit: QL, SE, SL. Effective: 2017 Winter Quarter.

**CHE 008A—Organic Chemistry: Brief Course (2)**
Lecture—2 hours. Prerequisite(s): CHE 002B C- or better or CHE 002BH C- or better With course 8B, an introduction to the nomenclature, structure, chemistry, and reaction mechanisms of organic compounds. Intended for students majoring in areas other than organic chemistry. No credit to students who have completed CHE 118A or 128A. GE credit: SE. Effective: 2017 Spring Quarter.

**CHE 008B—Organic Chemistry: Brief Course (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): CHE 008A or CHE 118A or CHE 128A Laboratory concerned primarily with organic laboratory techniques and the chemistry of the common classes of organic compounds. Lecture portion a continuation of course 8A. Varying credit hours according to courses taken previously and corresponding expected workload for this course; full credit to students who complete CHE 118A or 128A; 3 units credit to students who have completed CHE 128A and CHE 129A (students who have completed CHE 129A are exempt from the laboratory portion of CHE 008B); 2 units credit to students who have completed CHE 128B; 1 unit
credit to students who have completed CHE 118B or CHE 128B and CHE 129A (students who have completed CHE 118B are exempt from the laboratory portion of CHE 008B). GE credit: SE. Effective: 2016 Fall Quarter.

CHE 010—Concept of Chemistry (4)
Lecture—4 hours. Survey of basic concepts and contemporary applications of chemistry. Designed for non-science majors and not as preparation for Chemistry 2A. Not open for credit to students who have had CHE 002A; but students with credit for CHE 010 may take CHE 002A for full credit. GE credit: SE, SL. Effective: 1997 Winter Quarter.

CHE 098—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Primarily for lower division students. (P/NP grading only.) Effective: 1997 Winter Quarter.

CHE 099—Special Study for Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

CHE 100—Environmental Water Chemistry (3)
Lecture—3 hours. Prerequisite(s): CHE 002C or CHE 002CH Practical aspects of water chemistry in the environment, including thermodynamic relations, coordination chemistry, solubility calculations, redox reactions and rate laws. Computer modeling of the evolution in water chemistry from contact with minerals and gases. Effective: 2016 Winter Quarter.

CHE 103A—Chemistry for Life Sciences: Determining Organic Structures and Properties (5)
Discussion—1 hour; Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): CHE 002C or CHE 002CH C- or better or CHE 002CH C- or better; (CHE 008A or CHE 118A or CHE 128A) Not open for enrollment to students who have completed course 008B, 118B, 118C, 128B, 128C with a C- or better. Continuation of course 3C. Core concepts of organic structure, nomenclature, functional groups, organic acids and bases, resonance and delocalization, aromaticity, intermolecular forces, three-dimensional structure and conformational analysis, spectroscopy. Only 3 Units of credit for students who have completed CHE 008A with a C- or better; only 2 units of credit for students who have completed CHE 118A or CHE 128A with a C- or better; not open for credit to students who have completed CHE 008B, CHE 118B, CHE 118C, CHE 128B, CHE 128C with a C- or better. GE credit: SE, SL. Effective: 2017 Fall Quarter.

CHE 103B—Chemistry for Life Sciences: Predicting and Controlling Organic Pathways (5)
Discussion—1 hour; Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): CHE 103A C- or better Not open for enrollment to students who have completed course 008B, 118B, 118C, 128B, or 128C with a C- or better. Continuation of course 103A. Core concepts of functional group transformations, synthesis, mechanisms, sustainable chemistry, structure and function of biomolecules, organic reactions in biological systems, molecular design, detection, separation, and identification of organic molecules. Not open for credit to students who have completed CHE 008B, CHE 118B, CHE 118C, CHE 128B, or CHE 128C. GE credit: SE, SL. Effective: 2018 Winter Quarter.

CHE 104—Forensic Applications of Analytical Chemistry (3)
Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): CHE 002C or CHE 002CH Theory and application of standard methods of chemical analysis to evidentiary samples. Use and evaluation of results from screening tests, FTIR, GC and GCMS to various sample types encountered in forensics. Effective: 2016 Winter Quarter.

CHE 105—Analytical and Physical Chemical Methods (4)
Laboratory—6 hours; Lecture—2 hours. Prerequisite(s): CHE 110A (can be concurrent) or CHE 107B (can be concurrent) Fundamental theory and laboratory techniques in; analytical and physical chemistry, errors and data analysis methods, basic electrical circuits in instruments, advanced solution equilibria, potentiometric analysis, chromatographic separations, UV-visible spectroscopy, lasers. GE credit: QL, SE, SL. Effective: 2016 Spring Quarter.

CHE 107A—Physical Chemistry for the Life Sciences (3)
Lecture—3 hours. Prerequisite(s): CHE 002C or CHE 002CH; (MAT 016C or MAT 017C or MAT 021C); (PHY 007C or PHY 009C or PHY 009HC) Physical chemistry intended for majors in the life science area. Introductory development of classical and statistical thermodynamics including equilibrium processes and solutions of both non-electrolytes and electrolytes. The thermodynamic basis of electrochemistry and membrane potentials. GE credit: SE. Effective: 2017 Spring Quarter.

CHE 107B—Physical Chemistry for the Life Sciences (3)
Lecture—3 hours. Prerequisite(s): CHE 107A Continuation of course 107A. Kinetic theory of gases and transport processes in liquids. Chemical kinetics, enzyme kinetics and theories of reaction rates. Introduction to quantum theory, atomic and molecular structure, and spectroscopy. Application to problems in the biological sciences. GE credit: SE. Effective: 2016 Fall Quarter.
CHE 108—Molecular Biochemistry (3)
Lecture—3 hours. Prerequisite(s): CHE 128C or CHE 118C Pass One open to Chemistry majors. Chemical principles and experimental methods applied to the biological sciences to understand the molecular structure and function of proteins, nucleic acids, carbohydrates, and membrane lipids. Effective: 2016 Winter Quarter.

CHE 110A—Physical Chemistry: Introduction to Quantum Mechanics (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (PHY 007C or PHY 009C or PHY 009HC); (CHE 002C or CHE 002CH); (MAT 016C or MAT 017C or MAT 021C); Completion of Mathematics 21D, 22A, and 22AL, and Physics 9C or 9HC, strongly recommended. Introduction to the postulates and general principles of quantum mechanics. Approximations based on variational method and time independent perturbation theory. Application to harmonic oscillator, rigid rotor, one-electron and many-electron atoms, and homo-and hetero-nuclear diatomic molecules. GE credit: QL, SE. Effective: 2017 Spring Quarter.

CHE 110B—Physical Chemistry: Properties of Atoms and Molecules (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): CHE 110A Group theory. Application of quantum mechanics to polyatomic molecules and molecular spectroscopy. Intermolecular forces and the gas, liquid and solid states. Distributions, ensembles and partition functions. Transport properties. Effective: 1999 Fall Quarter.

CHE 110C—Physical Chemistry: Thermodynamics, Equilibria and Kinetics (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): CHE 110B Development and application of the general principles of thermodynamics and statistical thermodynamics. Chemical kinetics, rate laws for chemical reactions and reaction mechanisms. Effective: 1999 Fall Quarter.

CHE 115—Instrumental Analysis (4)
Laboratory—6 hours; Lecture—2 hours. Prerequisite(s): CHE 105; (CHE 110B can be concurrent) or (CHE 107A, CHE 107B) Intermediate theory and laboratory techniques in analytical and physical chemistry. Advanced data analysis methods and goodness-of-fit criteria. Fourier-transform spectroscopic methods and instrumentation. Mass spectrometry. Electrochemistry. Liquid chromatography. GE credit: QL, SE, WE. Effective: 2006 Fall Quarter.

CHE 118A—Organic Chemistry for Health and Life Sciences (4)
Discussion/Laboratory—1.5 hours; Lecture—3 hours. Prerequisite(s): CHE 002C C- or better or CHE 002CH C- or better The 118A, 118B, 118C series is for students planning professional school studies in health and life sciences. A rigorous, in-depth presentation of basic principles with emphasis on stereochemistry and spectroscopy and preparations and reactions of nonaromatic hydrocarbons, haloalkanes, alcohols and ethers. Only 2 units credit for students who have completed course CHE 008A; not open for credit to students who have completed CHE 008B or CHE 128A. GE credit: SE, SL. Effective: 2017 Spring Quarter.

CHE 118B—Organic Chemistry for Health and Life Sciences (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): CHE 118A or CHE 128A Continuation of course 118A, with emphasis on spectroscopy and the preparation and reactions of aromatic hydrocarbons, organometallic compounds, aldehydes and ketones. Only one unit of credit to students who completed course CHE 128B.; not open for credit to students who have completed 8 or more units of CHE 128 and CHE 129 courses. GE credit: SE, SL. Effective: 2017 Fall Quarter.

CHE 118C—Organic Chemistry for Health and Life Sciences (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): CHE 118B or (CHE 128B, CHE 129A) Open to students changing from the CHE 128 course sequence only if they have completed prior organic laboratory work (at least course CHE 129A). Continuation of course 118B, with emphasis on the preparation, reactions and identification of carboxylic acids and their derivatives, alkyl and acyl amines, ß-dicarbonyl compounds, and various classes of naturally occurring, biologically important compounds. Not open for credit to students who have completed course CHE 128C. GE credit: SE, SL. Effective: 2018 Winter Quarter.

CHE 121—Introduction to Molecular Structure and Spectra (4)
Lecture—4 hours. Prerequisite(s): CHE 110B Modern theoretical and experimental methods used to study problems of molecular structure and bonding; emphasis on spectroscopic techniques. Effective: 1997 Winter Quarter.

CHE 122—Chemistry of Nanoparticles (3)
Lecture—3 hours. Prerequisite(s): CHE 110C (can be concurrent) or CHE 107B (can be concurrent) Chemical and physical aspects of inorganic nanoparticles. Topics include synthesis, structure, colloidal behavior, catalytic activity, size and shape dependency of physical properties, analytical methods and applications. Effective: 2016 Winter Quarter.
CHE 124A—Inorganic Chemistry: Fundamentals (3)
Lecture—3 hours. Prerequisite(s): CHE 002C or CHE 002CH Symmetry, molecular geometry and structure, molecular orbital theory of bonding (polyatomic molecules and transition metals), solid state chemistry, energetics and spectroscopy of inorganic compounds. GE credit: SE. Effective: 2016 Fall Quarter.

CHE 124B—Inorganic Chemistry: Main Group Elements (3)
Lecture—3 hours. Prerequisite(s): CHE 124A Synthesis, structure and reactivity of inorganic and heteroorganic molecules containing the main group elements. Effective: 1997 Winter Quarter.

CHE 124C—Inorganic Chemistry: d and f Block Elements (3)
Lecture—3 hours. Prerequisite(s): CHE 124A Synthesis, structure and reactivity of transition metal complexes, organometallic and bioinorganic chemistry, the lanthanides and actinides. Effective: 1997 Winter Quarter.

CHE 124L—Laboratory Methods in Inorganic Chemistry (2)
Laboratory—6 hours. Prerequisite(s): CHE 124B or CHE 124C (can be concurrent) The preparation, purification and characterization of main group and transition metal inorganic and organometallic compounds. Effective: 2000 Spring Quarter.

CHE 125—Advanced Methods in Physical Chemistry (4)
Laboratory—6 hours; Lecture—2 hours. Prerequisite(s): CHE 110C (can be concurrent); CHE 115 Advanced theory and laboratory techniques in analytical and physical chemistry. Advanced spectroscopic methods. Thermodynamics. Kinetics. Chemical literature. Digital electronics and computer interfacing. Laboratory measurements and vacuum techniques. GE credit: QL, SE, WE. Effective: 2000 Spring Quarter.

CHE 128A—Organic Chemistry (3)
Lecture—3 hours. Prerequisite(s): CHE 002C C or better or CHE 002CH C or better Introduction to the basic concepts of organic chemistry with emphasis on stereochemistry and the chemistry of hydrocarbons. Designed primarily for majors in chemistry. Chemistry majors should enroll in course 129A concurrently. Only two units credit allowed for students who have completed CHE 008A; not open for credit to students who have completed courses CHE 008B or 118A. GE credit: SE. Effective: 2017 Winter Quarter.

CHE 128B—Organic Chemistry (3)
Lecture—3 hours. Prerequisite(s): CHE 128A; or Consent of Instructor. Continuation of course 128A with emphasis on the chemistry of alcohols, ethers, their sulfur analogs, and carbonyl compounds. Introduction to the application of spectroscopic methods to organic chemistry. Introduction to synthesis of moderately complex organic molecules. Full credit to students who completed CHE 008B or CHE 118A; not open for credit to students who have completed CHE 118B. GE credit: SE. Effective: 2017 Winter Quarter.

CHE 128C—Organic Chemistry (3)
Lecture—3 hours. Prerequisite(s): CHE 128B Continuation of course 128B with emphasis on enolate condensations and the chemistry of amines, phenols, and sugars; selected biologically important compounds. Full credit to students who completed CHE 118B; Not open for credit to students who have completed CHE 118C. GE credit: SE. Effective: 2017 Winter Quarter.

CHE 129A—Organic Chemistry Laboratory (2)
Laboratory—3 hours; Lecture—1 hour. Prerequisite(s): (CHE 002C C or better or CHE 002CH C or better); CHE 128A (can be concurrent) Introduction to laboratory techniques of organic chemistry. Emphasis on methods used for separation and purification of organic compounds. Full credit to students who completed CHE 008B; not open for credit to students who have completed CHE 118B. GE credit: SE. Effective: 2017 Winter Quarter.

CHE 129B—Organic Chemistry Laboratory (2)
Laboratory—6 hours. Prerequisite(s): CHE 129A; CHE 128B (can be concurrent) Continuation of course 129A. Emphasis on methods used for synthesis and isolation of organic compounds. Not open for credit to students who have completed CHE 008B; not open for credit to students who have completed CHE 118C. GE credit: SE. Effective: 2017 Winter Quarter.

CHE 129C—Organic Chemistry Laboratory (2)
Laboratory—6 hours. Prerequisite(s): CHE 128C (can be concurrent); CHE 129B continuation of course 129B Effective: 1997 Winter Quarter.

CHE 130A—Pharmaceutical Chemistry (3)
Lecture—3 hours. Prerequisite(s): CHE 118C or CHE 128C Examination of the design principles and experimental methods used in pharmaceutical and medicinal chemistry. Effective: 2006 Fall Quarter.
CHE 130B—Pharmaceutical Chemistry (3)
Lecture—2 hours; Lecture/Lab—1 hour. Prerequisite(s): CHE 130A (can be concurrent) Continuation of course 130A with emphasis on case studies of various drugs and the use of computational methods in drug design. Effective: 2017 Spring Quarter.

CHE 130C—Case Studies in Pharmaceutical Chemistry (1)
Independent Study; Seminar—2 hours. Prerequisite(s): CHE 130A (can be concurrent); CHE 130B (can be concurrent) Seminar. Exploration of medicinal and pharmaceutical chemistry topics through seminars presented by professional chemists (and allied professionals). Designed to highlight career opportunities for students with a degree in pharmaceutical chemistry. (P/NP grading only.) Effective: 2017 Spring Quarter.

CHE 131—Modern Methods of Organic Synthesis (3)
Lecture—3 hours. Prerequisite(s): CHE 128C or CHE 118C Introduction to modern synthetic methodology in organic chemistry with emphasis on retrosynthetic analysis, reaction mechanisms, and application to multistep syntheses of pharmaceuticals and natural products. GE credit: SE. Effective: 2016 Fall Quarter.

CHE 135—Advanced Bio-organic Chemistry Laboratory (3)
Laboratory—6 hours; Lecture—1 hour. Prerequisite(s): CHE 130B (can be concurrent) Separation, purification, identification and biological evaluation of organic compounds using modern methods of synthesis, computational chemistry and instrumentation. Emphasis on pharmaceutical and medicinal substances. Effective: 2017 Fall Quarter.

CHE 145—Good Quality Practices (3)
Discussion—1 hour; Laboratory—6 hours. Prerequisite(s): CHE 118B or CHE 129B Open to Chemistry and science majors. Preparation for work in GQP laboratories in both research and industry. Context within GQP-Good Quality Practices (GMP Good Manufacturing Practice, GCP Good Clinical Practices). Lab practice in GQP skills. GE credit: SE. Effective: 2016 Winter Quarter.

CHE 150—Chemistry of Natural Products (3)
Lecture—3 hours. Prerequisite(s): CHE 118C or CHE 128C Chemistry of terpenes, steroids, acetogenins, and alkaloids: isolation, structure determination, biosynthesis, chemical transformations, and total synthesis. GE credit: SE. Effective: 2017 Winter Quarter.

CHE 155—Scientific Programming for Chemistry (3)

CHE 192—Internship in Chemistry (1-6)
Internship—3-18 hours. Prerequisite(s): Upper division standing; project approval by faculty sponsor prior to enrollment. Supervised internship in chemistry; requires a final written report. May be repeated up to 6 unit(s). (P/NP grading only.) Effective: 1997 Winter Quarter.

CHE 194HA—Undergraduate Honors Research (2)
Independent Study—2 hours. Prerequisite(s): Open only to chemistry majors who have completed 135 units and who qualify for the honors program. Original research under the guidance of a faculty advisor, culminating in the writing of an extensive report. Effective: 1997 Winter Quarter.

CHE 194HB—Undergraduate Honors Research (2)
Independent Study—2 hours. Prerequisite(s): Open only to chemistry majors who have completed 135 units and who qualify for the honors program. Original research under the guidance of a faculty advisor, culminating in the writing of an extensive report. Effective: 1997 Winter Quarter.

CHE 194HC—Undergraduate Honors Research (2)
Independent Study—2 hours. Prerequisite(s): Open only to chemistry majors who have completed 135 units and who qualify for the honors program. Original research under the guidance of a faculty advisor, culminating in the writing of an extensive report. Effective: 2005 Fall Quarter.

CHE 195—Careers in Chemistry (1)
Seminar—2 hours. Prerequisite(s): Junior or senior standing in Chemistry. Designed to give Chemistry undergraduate students an in-depth appreciation of career opportunities with a bachelors degree in chemistry. Professional chemists (and allied professionals) describe research and provide career insights. (P/NP grading only.) Effective: 2001 Fall Quarter.
CHE 197—Projects in Chemical Education (1-4)
Discussion/Laboratory. Prerequisite(s): Consent of Instructor. Participation may include development of laboratory experiments, lecture demonstrations, autotutorial modules or assistance with laboratory sessions. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 1997 Winter Quarter.

CHE 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of instructor based upon adequate preparation in chemistry, mathematics and physics. (P/NP grading only.) Effective: 1997 Winter Quarter.

CHE 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of instructor based upon adequate preparation in chemistry, mathematics, and physics. (P/NP grading only.) Effective: 1997 Winter Quarter.

CHE 201—Chemical Uses of Symmetry and Group Theory (3)
Lecture—3 hours. Prerequisite(s): CHE 124A; CHE 110B; or Consent of Instructor. Symmetry elements and operations, point groups, representations of groups. Applications to molecular orbital theory, ligand field theory, molecular vibrations, and angular momentum. Crystallographic symmetry. Effective: 1997 Winter Quarter.

CHE 204—Mathematical Methods in Chemistry (3)

CHE 205—Symmetry, Spectroscopy, and Structure (3)
Lecture—3 hours. Prerequisite(s): CHE 201; Or equivalent. Vibrational and rotational spectra; electronic spectra and photoelectron spectroscopy; magnetism; electron spin and nuclear quadrupole resonance spectroscopy; nuclear magnetic resonance spectroscopy; other spectroscopic methods. Effective: 1997 Winter Quarter.

CHE 209—Special Topics in Physical Chemistry (3)
Lecture—3 hours. Prerequisite(s): CHE 210A; CHE 211A Graduate standing in Chemistry. Advanced topics in physical chemistry, biophysical chemistry or chemical physics chosen from areas of current research interest. May be repeated for credit when topics differ. Effective: 2005 Fall Quarter.

CHE 210A—Quantum Chemistry: Introduction and Stationary-State Properties (3)

CHE 210B—Quantum Chemistry: Time-Dependent Systems (3)

CHE 210C—Quantum Chemistry: Molecular Spectroscopy (3)
Lecture—3 hours. Prerequisite(s): CHE 210B Molecular spectroscopy: Born-Oppenheimer approximation, rotational, vibrational and electronic spectroscopy, spin systems, and molecular photophysics. Effective: 1997 Winter Quarter.

CHE 211A—Advanced Physical Chemistry: Statistical Thermodynamics (3)
Lecture—3 hours. Prerequisite(s): Consent of Instructor. Principles and applications of statistical mechanics; ensemble theory; statistical thermodynamics of gases, solids, liquids, electrolyte solutions and polymers; chemical equilibrium. Effective: 1997 Winter Quarter.

CHE 211B—Statistical Mechanics (3)
Lecture—3 hours. Prerequisite(s): CHE 211A Statistical mechanics of nonequilibrium systems, including the rigorous kinetic theory of gases, continuum mechanics transport in dense fluids, stochastic processes, brownian motion and linear response theory. Effective: 1997 Winter Quarter.

CHE 212—Chemical Dynamics (3)
Lecture—3 hours. Prerequisite(s): Consent of Instructor. Introduction to modern concepts in chemical reaction dynamics for graduate students in chemistry. Emphasis will be placed on experimental techniques as well as emerging physical models for characterizing chemical reactivity at a microscopic level. Effective: 1997 Winter Quarter.

CHE 215—Theoretical and Computational Chemistry (3)
Lecture—3 hours. Prerequisite(s): CHE 211A; CHE 210B; or Consent of Instructor. Mathematics of wide utility in
chemistry, computational methods for guidance or alternative to experiment, and modern formulations of chemical
theory. Emphasis will vary in successive years. May be repeated for credit. Effective: 1997 Winter Quarter.

CHE 216—Magnetic Resonance Spectroscopy (3)
Lecture—3 hours. Prerequisite(s): CHE 210A; CHE 210B (can be concurrent) Quantum mechanics of spin and orbital
angular momentum, nuclear magnetic resonance, theory of chemical shift and multiplet structures, electron spin
resonance, theory of g-tensor in organic and transition ions, spin Hamiltonians, nuclear quadrupolar resonance, spin

CHE 217—X-Ray Structure Determination (3)
Lecture—3 hours. Prerequisite(s): Consent of Instructor. Introduction to x-ray structure determination; crystals,
symmetry, diffraction geometry, sample preparation and handling, diffraction apparatus and data collection,
methods of structure solution and refinement, presentation of results, text, tables and graphics, crystallographic

CHE 218—Macromolecules: Physical Principles (3)
Lecture—3 hours. Prerequisite(s): CHE 110A; CHE 110B; CHE 110C; Or equivalent. Relationship of higher order
macromolecular structure to subunit composition; equilibrium properties and macromolecular dynamics; physical
chemical determination of macromolecular structure. Effective: 2001 Winter Quarter.

CHE 219—Spectroscopy of Organic Compounds (4)
Laboratory—2.5 hours; Lecture—3 hours. Prerequisite(s): CHE 128C; Or equivalent. Identification of organic
compounds and investigation of stereochemical and reaction mechanism phenomena using spectroscopic
methods—principally NMR, IR and MS. Effective: 2006 Fall Quarter.

CHE 219L—Laboratory in Spectroscopy of Organic Compounds (1)
Laboratory—2.5 hours. Prerequisite(s): CHE 219 (can be concurrent) Restricted to Chemistry graduate students only
or consent of instructor Practical application of NMR, IR and MS techniques for organic molecules. Effective: 2009
Summer Session 1.

CHE 221A—Special Topics in Organic Chemistry (3)
Lecture—3 hours. Selected topics of current interest in organic chemistry. Topics will vary each time the course is
offered, and in general will emphasize the research interests of the staff member giving the course. Effective: 1997
Winter Quarter.

CHE 221B—Special Topics in Organic Chemistry (3)
Lecture—3 hours. Selected topics of current interest in organic chemistry. Topics will vary each time the course is
offered, and in general will emphasize the research interests of the staff member giving the course. Effective: 1997
Winter Quarter.

CHE 221C—Special Topics in Organic Chemistry (3)
Lecture—3 hours. Selected topics of current interest in organic chemistry. Topics will vary each time the course is
offered, and in general will emphasize the research interests of the staff member giving the course. Effective: 1997
Winter Quarter.

CHE 221D—Special Topics in Organic Chemistry (3)
Lecture—3 hours. Selected topics of current interest in organic chemistry. Topics will vary each time the course is
offered, and in general will emphasize the research interests of the staff member giving the course. Effective: 1997
Winter Quarter.

CHE 221E—Special Topics in Organic Chemistry (3)
Lecture—3 hours. Selected topics of current interest in organic chemistry. Topics will vary each time the course is
offered, and in general will emphasize the research interests of the staff member giving the course. Effective: 1997
Winter Quarter.

CHE 221F—Special Topics in Organic Chemistry (3)
Lecture—3 hours. Selected topics of current interest in organic chemistry. Topics will vary each time the course is
offered, and in general will emphasize the research interests of the staff member giving the course. Effective: 1997
Winter Quarter.

CHE 221G—Special Topics in Organic Chemistry (3)
Lecture—3 hours. Selected topics of current interest in organic chemistry. Topics will vary each time the course is
offered, and in general will emphasize the research interests of the staff member giving the course. Effective: 1997
Winter Quarter.
CHE 221H—Special Topics in Organic Chemistry (3)
Lecture—3 hours. Selected topics of current interest in organic chemistry. Topics will vary each time the course is offered, and in general will emphasize the research interests of the staff member giving the course. Effective: 1997 Winter Quarter.

CHE 222—Chemistry of Nanoparticles (3)
Lecture/Discussion—3 hours. Prerequisite(s): CHE 110C; Or equivalent. Chemical and physical aspects of inorganic nanoparticles, including synthesis, purification, reactivity, characterization, and applications for technology. Emphasis is on problems from the current literature. Not open for credit to students who have taken CHE 122. Effective: 2009 Winter Quarter.

CHE 226—Principles of Transition Metal Chemistry (3)
Lecture—3 hours. Prerequisite(s): CHE 124A; or equivalent. Electronic structures, bonding, and reactivity of transition metal compounds. Effective: 1997 Winter Quarter.

CHE 228A—Bio-inorganic Chemistry (3)
Lecture—3 hours. Prerequisite(s): CHE 226; or Consent of Instructor. Defines role of inorganic chemistry in the functioning of biological systems by identifying the functions of metal ions and main group compounds in biological systems and discussing the chemistry of model and isolated biological compounds. Offered every third year. Effective: 1997 Winter Quarter.

CHE 228B—Main Group Chemistry (3)
Lecture—3 hours. Prerequisite(s): CHE 226; or Consent of Instructor. Synthesis, physical properties, reactions and bonding of main group compounds. Discussions of concepts of electron deficiency, hypervalency, and non-classical bonding. Chemistry of the main group elements will be treated systematically. Offered every third year. Effective: 1997 Winter Quarter.

CHE 228C—Solid-State Chemistry (3)
Lecture—3 hours. Prerequisite(s): CHE 124A; CHE 110B; CHE 226; Or equivalent. Design and synthesis, structure and bonding of solid-state compounds; physical properties and characterization of solids; topics of current interest such as low-dimensional materials, inorganic polymers, materials for catalysis. Offered every third year. Effective: 1997 Winter Quarter.

CHE 228D—Homogeneous Catalysis (3)
Lecture—3 hours. Prerequisite(s): CHE 226 Overview of homogeneous catalysis and related methods, with emphasis on kinetics, mechanisms, and applications for organic synthesis. The related methods may include cluster, colloid, phase transfer, enzymatic, heterogeneous and polymer-supported catalysis. Offered every third year. Effective: 2001 Fall Quarter.

CHE 228E—Magnetochemistry (3)
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): CHE 124A or CHE 201; Or an equivalent class from either Physics or Chemical Engineering and Materials Science. Covers the basic principles and concepts of magnetism, methods used for characterization of magnetic properties, as well as specific state-of-the-art magnetic materials and topics from the recent chemistry literature. Effective: 2016 Winter Quarter.

CHE 231A—Organic Synthesis: Methods and Strategies (4)
Discussion/Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): CHE 128C; Or equivalent. Current strategies and methods in synthetic organic chemistry. Focus on construction of carbon frameworks, control of relative and absolute stereochemistry and retrosynthetic strategies. Use of databases and molecular modeling software in multistep strategies. Effective: 2017 Winter Quarter.

CHE 231B—Advanced Organic Synthesis (3)

CHE 233—Physical-Organic Chemistry (3)
Lecture—3 hours. Prerequisite(s): CHE 128A; CHE 128B; CHE 128C; CHE 110A; CHE 110B; CHE 110C; Or equivalent. Introduction to elementary concepts in physicalorganic chemistry including the application of simple numerical techniques in characterizing and modeling organic reactions. Effective: 1997 Winter Quarter.

CHE 235—Organometallic Chemistry in Organic Synthesis (3)
Lecture—3 hours. Prerequisite(s): CHE 128C Current trends in use of organometallics for organic synthesis;
preparations, properties, applications, and limitations of organometallic reagents derived from transition and/or main group metals. Effective: 1997 Winter Quarter.

**CHE 236—Chemistry of Natural Products (3)**
Lecture—3 hours. Prerequisite(s): CHE 128C; Or equivalent. Advanced treatment of chemistry of naturally occurring compounds isolated from a variety of sources. Topics will include isolation, structure determination, chemical transformations, total synthesis, biological activity, and biosynthesis. Biosynthetic origin will be used as a unifying theme. Effective: 1997 Winter Quarter.

**CHE 237—Bio-organic Chemistry (3)**
Lecture—3 hours. Prerequisite(s): CHE 128C; Or equivalent. Structure and function of biomolecules; molecular recognition; enzyme reaction mechanisms; design of suicide substrates for enzymes; enzyme engineering; design of artificial enzymes and application of enzymes in organic synthesis. Effective: 1997 Winter Quarter.

**CHE 238—Introduction to Chemical Biology (3)**
Lecture—3 hours. Prerequisite(s): CHE 118C or CHE 128C; Or equivalent; CHE 130A, CHE 130B and BIS 102, BIS 103, and BIS 104, or the equivalents recommended. Synthesis of complex molecules in nature. Use of biosynthetic pathways in synthesis of new chemical entities. Applications of small molecules in chemical genetics and structural biology. Solving biological problems using synthetic biomolecules. Effective: 2009 Winter Quarter.

**CHE 240—Advanced Analytical Chemistry (3)**
Lecture—3 hours. Prerequisite(s): CHE 110A; CHE 115; Or equivalent. Numerical treatment of experimental data; thermodynamics of electrolyte and non-electrolyte solutions; complex equilibria in aqueous and non-aqueous solutions; potentiometry and specific ion electrodes; mass transfer in liquid solutions; fundamentals of separation science, including column, gas and liquid chromatography. Effective: 1997 Winter Quarter.

**CHE 241A—Surface Analytical Chemistry (3)**
Lecture—3 hours. Prerequisite(s): CHE 110C; Or equivalent. Concepts of surfaces and interfaces: physical properties, unique chemistry and electronic effects. Focus on gas-solid interfaces, with some discussion of liquid-solid interfaces. Effective: 2002 Fall Quarter.

**CHE 241B—Laser and X-ray Spectroscopy (3)**
Lecture—3 hours. Prerequisite(s): CHE 110B; Or equivalent. Concepts and mechanisms of light-matter interactions. Chemical applications of modern spectroscopic methods, including multiphoton spectroscopy, time-resolved laser and x-ray photolysis, and phase-contrast x-ray imaging. Effective: 2002 Fall Quarter.

**CHE 241C—Mass Spectrometry (3)**
Lecture—3 hours. Prerequisite(s): CHE 110C; CHE 115; Or equivalent. Mass spectrometry and related methods with emphasis on ionization methods, mass analyzers, and detectors. Related methods may include ion-molecule reactions, unimolecular dissociation of organic and bio-organic compounds, and applications in biological and environmental analysis. Effective: 2002 Winter Quarter.

**CHE 241D—Electroanalytical Chemistry (3)**
Lecture—3 hours. Prerequisite(s): CHE 110C; CHE 115; Or equivalent. Electroanalytical chemistry with consideration of mass transfer and electrode kinetics for polarizable electrodes. Current-potential curves for a variety of conditions, including both potentiostatic and galvanostatic control, and their application in chemical analysis. Effective: 2002 Winter Quarter.

**CHE 241E—Microscopy and Imaging Techniques (3)**
Lecture—3 hours. Prerequisite(s): CHE 110C; CHE 115; Or equivalent. Introduction to modern microscopy and imaging techniques: scanning tunneling, atomic force, far-field optical, fluorescence, scanning near-field optical, and scanning electron microscopy. Application to nanoscience and analytical and bioanalytical chemistry. Some laboratory demonstrations. Effective: 2002 Fall Quarter.

**CHE 245—Mechanistic Enzymology (3)**
Lecture—3 hours. Advanced topics in chemical kinetics relevant to enzymes, enzyme kinetics, theory of enzyme catalysis, and the analysis of a selection of organic enzyme reaction mechanisms by the tools introduced in the first part of the course. Effective: 2013 Fall Quarter.

**CHE 261—Current Topics in Chemical Research (2)**
Lecture—2 hours. Prerequisite(s): Graduate standing in Chemistry or consent of instructor. Designed to help chemistry graduate students develop and maintain familiarity with the current and past literature in their immediate field of research and related areas. May be repeated for credit when topics differ. Effective: 1997 Winter Quarter.
CHE 263—Introduction to Chemical Research Methodology (3)
Discussion/Laboratory—9 hours. Prerequisite(s): CHE 293; and Consent of Instructor. Graduate student standing in Chemistry. Introduction to identification, formulation, and solution of meaningful scientific problems including experimental design and/or theoretical analyses of new and prevailing techniques, theories and hypotheses. May be repeated for credit when topic differs. (S/U grading only.) Effective: 1997 Winter Quarter.

CHE 264—Advanced Chemical Research Methodology (6)
Discussion/Laboratory—18 hours. Prerequisite(s): CHE 263; or Consent of Instructor. Applications of the methodology developed in course 263 to experimental and theoretical studies. Advanced methods of interpretation of results are developed. Includes the preparation of manuscripts for publication. May be repeated for credit when topic differs. (S/U grading only.) Effective: 1997 Winter Quarter.

CHE 290—Seminar (2)
Seminar—2 hours. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

CHE 293—Introduction to Chemistry Research (1)
Discussion—2 hours. Designed for incoming graduate students preparing for higher degrees in chemistry. Group and individual discussion of research activities in the Department and research topic selection. (S/U grading only.) Effective: 1997 Winter Quarter.

CHE 294—Presentation of Chemistry Research (1)
Seminar—2 hours. Prerequisite(s): Graduate standing. Restricted to graduate students in Chemistry who have not yet given their departmental presentation. Introduces first- and second-year Chemistry graduate students to the process of giving an effective research presentation. Advanced Ph.D. students give formal seminars describing the design and execution of their research projects. May be repeated up to 3 time(s). (S/U grading only.) Effective: 2009 Winter Quarter.

CHE 295—Careers in Chemistry (1)
Seminar—2 hours. Prerequisite(s): Graduate standing in Chemistry. Designed to give Chemistry graduate students an in-depth appreciation of career opportunities with a M.S. or Ph.D. degree in chemistry. Professional chemists (and allied professionals) give seminars describing both research and career insights. May be repeated up to 3 time(s). (S/U grading only.) Effective: 2001 Fall Quarter.

CHE 296—Research in Pharmaceutical Chemistry (6)
Laboratory—18 hours. Prerequisite(s): CHE 130A; CHE 130B; CHE 135; CHE 233 (can be concurrent); and Consent of Instructor. Restricted to students in the Integrated B.S./M.S. Program in Chemistry. Laboratory provides qualified graduate students with the opportunity to pursue original investigation in Pharmaceutical Chemistry and allied fields in order to fulfill the letter-graded research requirement of the Integrated B.S./M.S. Program in Chemistry (Pharmaceutical Chemistry Emphasis). May be repeated up to 3 time(s) when topic differs. Effective: 2009 Fall Quarter.

CHE 298—Group Study (1-5)

CHE 299—Research (1-12)
Variable. The laboratory is open to qualified graduate students who wish to pursue original investigation. Students wishing to enroll should communicate with the department well in advance of the quarter in which the work is to be undertaken. (S/U grading only.) Effective: 1997 Winter Quarter.

CHE 390—Methods of Teaching Chemistry (2)
Discussion—1 hour; Lecture—1 hour. Prerequisite(s): Consent of Instructor. Graduate student standing in Chemistry. Practical experience in methods and problems of teaching chemistry. Includes analyses of texts and supporting material, discussion of teaching techniques, preparing for and conducting of discussion sessions and student laboratories. Participation in the teaching program required for Ph.D. in chemistry. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

CHE 392—Advanced Methods of Teaching Chemistry (2)
Lecture—2 hours. Prerequisite(s): CHE 390 Advanced topics in teaching chemistry. Analysis and discussion of curricular design, curricula materials, teaching methods and evaluation. For students who are planning a career in teaching chemistry. (S/U grading only.) Effective: 1997 Winter Quarter.

Chicana/Chicano Studies
The Department of Chicana/Chicano Studies offers an interdisciplinary curriculum focusing on the Chicana/Chicano experience through an analysis of class, race, ethnicity, gender and sexuality, and cultural expression. The department offers a major leading to the Bachelor of Arts degree and a minor that can satisfy breadth requirements for the College of Letters and Science. Both the major and minor frame an analysis within the historical and contemporary experiences of Chicanas/os in the Americas. The major gives students an opportunity to specialize in one of two emphases: Cultural Studies or Social/Policy Studies. Students in the major are expected to read, write, and speak Spanish at a level suitable for future study and work in Chicana/o and Latina/o settings. There are no language requirements for the minor, and all Chicana/Chicano Studies courses are open to students in any major.

The Program. At the lower division level, the major curriculum provides an interdisciplinary overview of various topics. Students are advised to take courses that serve as prerequisites for certain upper division courses. At the upper division level, majors pursue advanced interdisciplinary course work in both the humanities/arts and the social sciences. At this level, students will find courses in Chicana/Chicano history, theory, health and several courses taught from a variety of disciplinary perspectives. Majors may specialize in one of two emphases for the A.B. degree. The Cultural Studies emphasis integrates literature, culture, and artistic expression. Social/Policy Studies emphasizes social theory, research methods, area studies in community/political economy, family, societal and health issues.

Career Alternatives. The Cultural Studies emphasis prepares students for professional work in cross-cultural education, cultural/art centers, artistic expression and communications. The Social/Policy Studies emphasis orients students towards professional work in human service delivery, community development, legal services assistance, health services, social welfare and education. Both emphases in the major prepare students for advanced graduate and/or professional studies in related fields.

Major Advisor. Alma Martinez, M.A.

### Chicana/Chicano Studies | CHI Minor

(College of Letters and Science)

Carlos F. Jackson, M.F.A., Chairperson of the Department

**Department Office.** 2102 Hart Hall; 530-752-2421; Fax 530-752-8814; [http://chi.ucdavis.edu](http://chi.ucdavis.edu)

**Faculty.** [http://chi.ucdavis.edu/faculty](http://chi.ucdavis.edu/faculty)

This minor provides a broad overview of the historical, social, political, economic, ideological and cultural forces that shape the Chicana/o and Latina/o experience. The minor is open to all students with or without course work in Spanish. Students should contact the master advisor for a plan approval and verification of the minor.

**Minor Advisor.** Alma Martinez, M.A.

### Courses in CHI:

#### CHI 010—Introduction to Chicana/o Studies (4)
Discussion—1 hour; Lecture—3 hours. Analysis of the situation of the Chicana/o (Mexican-American) people, emphasizing their history, literature, political movements, education and related areas. GE credit: ACGH, AH, DD, OL, SS, WE. Effective: 1997 Winter Quarter.

#### CHI 021—Chicana/o and Latina/o Health Care Issues (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): CHI 010 Overview of health issues of Chicanas/os and Latinas/os in the State of California; role of poverty/lack of education in limited access to health care. GE credit: OL, WE. Effective: 1997 Winter Quarter.

#### CHI 021S—Chicana/o and Latina/o Health Care Issues (4)
Lecture—4 hours. Prerequisite(s): SPA 003 or SPA 003V or SPA 003Y; Or equivalent. Overview of health issues of Chicanas/os and Latinas/os in the State of California; role of poverty/lack of education and limited access to health care. All course instruction for this course will be in Spanish. This course is taught abroad. Not open for credit to students who have completed CHI 021. GE credit: OL, WC, WE. Effective: 2018 Spring Quarter.

#### CHI 023—Qualitative Research Methods (4)
Discussion—1 hour; Lecture/Discussion—3 hours. Dominant models of qualitative inquiry in educational and social science research as well as mestizo approaches to research with latinos. Emphasis given to choosing and designing culturally appropriate strategies to investigate latino health, education, social context, and policy issues. GE credit: AH, OL, SS, WE. Effective: 2005 Spring Quarter.

#### CHI 030—United States Political Institutions and Chicanas/ os (4)
Discussion/Laboratory—3 hours; Term Paper. Overview of the major political institutions and ideologies of the United States and the Chicana/o people's historical and contemporary role in, effects from, and responses to them. Theory, method and critical analysis. GE credit: ACGH, DD, OL, SS, WE. Effective: 1997 Winter Quarter.

#### CHI 040—Comparative Health: Top Leading Causes of Death (4)
Discussion—1 hour; Lecture/Discussion—3 hours. Prerequisite(s): STA 013 or STA 013Y; or Consent of Instructor. Introduction to the epidemiology of the leading causes of death for ethnic/racial minorities. Assessment of disproportionate rates at which ethnic/racial minorities suffer and die from chronic and infectious diseases and injuries and statistical methods used to calculate these rates. Not open for credit to students who have completed CHI 040S. GE credit: QL, SE, WE. Effective: 2018 Spring Quarter.

#### CHI 040S—Comparative Health: Leading Causes of Death (4)
Lecture—4 hours. Prerequisite(s): STA 013 or STA 013Y; or Consent of Instructor. Introduction to epidemiology of leading causes of death for ethnic/racial minorities. Assessment of disproportionate rates at which ethnic/racial minorities suffer & die from chronic and infectious diseases & injuries & statistical methods used to calculate these rates. Offered abroad. Not open for credit to students who have completed CHI 040. GE credit: QL, SE, WC, WE. Effective: 2018 Spring Quarter.

#### CHI 042—Food Justice: Chicana/o & Indigenous Communities (4)
Lecture/Discussion—4 hours. Issues surrounding food justice in Chicana/o and Indigenous Communities. Emphasis on discourses and practices of growing a food justice movement centered on the ecological care of the earth and decolonized environmental methodologies. GE credit: ACGH, SL, SS, VL. Effective: 2019 Spring Quarter.

#### CHI 050—Chicana and Chicano Culture (4)
Discussion—1 hour; Lecture—3 hours. Interdisciplinary survey of Chicana/o cultural representation in the 20th century. Examines Chicana/o culture within a national and transnational context. Explores how Chicano cultural forms and practices intersect with social/material forces, intellectual formations and cultural discourses. (Former course 20.) GE credit: ACGH, AH, DD, WC, WE. Effective: 1997 Winter Quarter.
CHI 060—Chicana and Chicano Representation in Cinema (4)
Discussion—1 hour; Film Viewing—2 hours; Lecture—3 hours. Introductory-level study of Chicana and Chicano representation in cinema. Depiction of Chicana and Chicano experience by Chicana/o filmmakers, as well as by non-Chicanos, including independent filmmakers and the commercial industry. GE credit: ACGH, AH, DD, VL, WE. Effective: 2005 Spring Quarter.

CHI 065—New Latin American Cinema (4)
Discussion—1 hour; Film Viewing—3 hours; Lecture/Discussion—2 hours. Historical, critical, and theoretical survey of the cinemas of Latin America and their relationship to the emergence of U.S. Latino cinema. Emphasis on representation and social identity including gender, sexuality, class, race and ethnicity GE credit: AH, VL, WC, WE. Effective: 2005 Spring Quarter.

CHI 070—Survey of Chicana/o Art (4)
Lecture—4 hours. Survey of contemporary Chicana/o art in context of the social turmoil from which it springs. Includes political use of the poster and the mural, the influence of the Mexican mural and graphic movement, and social responsibility of the artist. GE credit: ACGH, AH, DD, VL, WC, WE. Effective: 1997 Winter Quarter.

CHI 073—Chicana/o Art Expression Through Silk Screen (4)
Laboratory—4 hours; Studio—8 hours. Introductory level studio course using silk screen and basic printing techniques to explore and develop images of Chicana/o cultural themes and expressions. Students will experiment with images and symbols from their immediate environment/culture. Integrated approach to Chicana/o philosophy of art. GE credit: ACGH, AH, DD, OL, VL, WE. Effective: 1997 Winter Quarter.

CHI 092—Internship (1-12)
Internship—3-36 hours. Prerequisite(s): CHI 010; or Consent of Instructor. Academic guidance combined with internship in community agencies serving Mexican/Latina/Latino/Chicana/Chicano clients. Students will use their bilingual skills and knowledge of history, culture, economics, politics and social issues. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 2004 Fall Quarter.

CHI 098—Directed Group Study (1-5)
Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

CHI 099—Special Study for Undergraduates (1-5)
Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

CHI 100—Chicana/Chicano Theoretical Perspective (4)

CHI 102A—Chicana/o Feminist Theoretical Understandings of K-20 Educational Disparities (4)
Fieldwork; Lecture/Discussion—3 hours. Examination of educational disparities of the K-20 educational system. Chicana/o education theory and analysis with a specific emphasis on feminist frameworks and analytical tools used to guide and inform educational policy-making. Effective: 2018 Fall Quarter.

CHI 102B—Grassroots Community Activism & Mobilization Efforts Challenging Educational Inequity (4)
Fieldwork; Lecture/Discussion—3 hours. Exploration and research on effective grassroots community activism and mobilization efforts by Chicana/o students, along with their teachers, families, and other allies to protest structured inequality of the U.S. educational system. Mentoring and tutoring in a school under the supervision of a faculty member is required. Effective: 2018 Fall Quarter.

CHI 102C—Policy and Law Challenging Segregation and Educational Inequity (4)
Fieldwork; Lecture/Discussion—3 hours. Focus on successful lawsuits against school segregation of Mexican-origin children in the United States. Mentoring and tutoring in a school under the supervision of a faculty member is required. Effective: 2018 Fall Quarter.

CHI 110—Sociology of the Chicana/o Experience (4)
Lecture/Discussion—4 hours. Prerequisite(s): CHI 010 or SOC 001 The Chicana/o experience in the American society and economy viewed from theoretical perspectives. Immigration, history of integration of Chicana/o labor into American class structure, education inequality, ethnicity, the family and Chicana/o politics. (Former course Sociology 110.) GE credit: ACGH, DD, OL, SS, WE. Effective: 1997 Winter Quarter.
CHI 111—Chicanas/Mexicanas in Contemporary Society (4)
Lecture/Discussion—4 hours. Prerequisite(s): CHI 010 or CHI 050; (WMS 050 or HIS 169B) Analysis of the role and status of Chicanas/Mexicanas in contemporary society. Special emphasis on their historical role, the political, economic and social institutions that have affected their status, and their contributions to society and their community. (Former course 102.) GE credit: ACGH, DD, SS, WE. Effective: 1997 Winter Quarter.

CHI 112—Globalization, Transnational Migration, and Chica/o and Latina/o Communities (4)
Lecture—4 hours. Prerequisite(s): CHI 010 Chica/o and Latina/o migration experiences within a global context. Topics include national and/or transnational migration in Mexico, Central America, and the United States. GE credit: ACGH, DD, OL, SS, WE. Effective: 2005 Winter Quarter.

CHI 113—Latin American Women's Engagement in Social Movements (4)
Lecture/Discussion—3 hours; Term Paper. Examination of how women of different racial/ethnic and class backgrounds in Latin America challenge their marginalization. Exploration of US foreign policy, its effects on Latin American's institutions and on Latin American citizens. Using Chicana feminist perspective. GE credit: ACGH, DD, SS, WC, WE. Effective: 2013 Fall Quarter.

CHI 114—Women of Color Reproductive Health and Reproductive Politics in a Global Perspective (4)
Lecture/Discussion—3 hours; Term Paper. Study contemporary issues in reproductive health and reproductive politics, both globally and in the U.S., for women of color. GE credit: ACGH, DD, SS, WC, WE. Effective: 2013 Fall Quarter.

CHI 114S—Women of Color Reproductive Health and Gender Politics in Cuba and the US (4)
Lecture/Discussion—3 hours; Term Paper. Study of contemporary issues in reproductive health, reproductive politics, and gender politics both in Cuba and in the U.S., for women of color. GE credit: ACGH, DD, SS, WC, WE. Effective: 2015 Spring Quarter.

CHI 120—Chicana/o Psychology (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): CHI 021; Introductory psychology course recommended. Introduction to the field of Chicana/o psychology. Analysis of socio-cultural context of Chicanas/os and Latinas/os. Special attention to issues of ethnic identity development, bilingualism, and development of self esteem. Impact of minority experience, migration, acculturation are examined. GE credit: ACGH, DD, OL, SS, WE. Effective: 1997 Winter Quarter.

CHI 121—Chicana/o Community Mental Health (4)
Lecture—3 hours; Term Paper. Prerequisite(s): CHI 010 or CHI 020. Mental health needs, problems, and service utilization patterns of Chicanas/os and Latinas/os will be analyzed. An analysis of social service policy, and the economic context of mental health programs. GE credit: ACGH, DD, OL, SS, WE. Effective: 1997 Winter Quarter.

CHI 122—Psychology Perspectives Chicana/o and Latina/o Family (4)
Lecture—4 hours. Prerequisite(s): CHI 010; and Consent of Instructor. Introductory psychology course highly recommended. Role of migration and acculturation on family structure and functioning. From a psychological and Chicana/o Studies perspective, contemporary gender roles and variations in family structures are examined. Special topics include family violence, addiction, family resilience and coping strategies. GE credit: SS, WE. Effective: 1997 Winter Quarter.

CHI 122S—Psychology Perspectives Chicana/o and Latina/o Family (4)
Lecture—4 hours. Role of migration and acculturation on family structure and functioning. From a psychological and Chicana/o Studies perspective, contemporary gender roles and variations in family structures are examined. Special topics include family violence, addiction, family resilience and coping strategies. This course is taught abroad. Not open for credit to students who have completed CHI 122. GE credit: OL, SS, WC, WE. Effective: 2006 Spring Quarter.

CHI 123—Psychological perspectives on Chicana/o and Latina/o Children and Adolescents (4)
Lecture—3 hours; Term Paper. Prerequisite(s): CHI 010 or CHI 021 Restricted to upper division standing. Psychological and educational development of Chicano/Latino children and adolescents, with particular attention to the formation of ethnic, gender, class, race, and sexual identities. GE credit: ACGH, DD, OL, SS, WE. Effective: 2005 Spring Quarter.

CHI 125S—Latino Families in the Age of Globalization: Migration and Transculturation (4)
Lecture/Discussion—4 hours. Prerequisite(s): SPA 003 or the equivalent highly recommended. Impact of globalization on Latino families in the American continent. Relationships of political structure, economics and family.
Intimate partner violence, child maltreatment and alcohol/drug abuse in contemporary Latino families. Offered in a Spanish speaking country GE credit: OL, SS, WC, WE. Effective: 2007 Spring Quarter.

CHI 130—United States-Mexican Border Relations (4)
Lecture—3 hours; Term Paper. Prerequisite(s): Upper division standing. Theories of U.S.-Mexican border relations, with an overview of the political, economic, and social relationships and an in-depth analysis of immigration issues, border industrialization, women's organizations, economic crises, and legal issues. GE credit: ACGH, DD, OL, SS, WE. Effective: 1997 Winter Quarter.

CHI 131—Chicanas in Politics and Public Policy (4)
Lecture/Discussion—4 hours. Prerequisite(s): CHI 030 or POL 001 Historical and political analysis of Chicana/Latina political involvement and activities in the general political system, women's movement, Chicano movement, and Chicana movement. Course also examines the public policy process and the relationship of Chicanas/Latinas to public policy formation. GE credit: ACGH, DD, OL, SS, WE. Effective: 1997 Winter Quarter.

CHI 131S—Chicanas in Politics and Public Policy (4)
Lecture/Discussion—4 hours. Historical and political analysis of Chicano/Latina political involvement and activities in the general political system, women's movement, Chicano/a movement. Course also examines the public policy process and the relationship of Chicanas/Latinas to public policy formation. Offered Abroad. Not open for credit to students who have completed CHE 131. GE credit: OL, SS, WC, WE. Effective: 2006 Spring Quarter.

CHI 132—Political Economy of Chicana/o Communities (4)
Lecture—3 hours; Term Paper. Prerequisite(s): Upper division standing; lower division Chicana/o Studies course recommended. Historical and contemporary study of political and economic forces which define and influence the development of Chicana/o communities. Includes critiques of traditional and Marxian theories and concepts applicable to Chicana/o communities, case studies of Chicana/o communities, especially in California and Texas. GE credit: ACGH, DD, OL, WE. Effective: 1997 Winter Quarter.

CHI 135S—Transnational Latina/o Political Economy (4)
Lecture—3 hours; Term Paper. Prerequisite(s): SPA 003 or SPA 003V or SPA 003Y; or Consent of Instructor. Or equivalent; ECN 001A and ECN 001B recommended. Intensive reading, discussion and research on selected topics from Latin America and the US with regard to immigrant and native communities. Topics include comparative immigration and macroeconomic policies in the US and Latin America. Offered in a Spanish speaking country. GE credit: OL, WC, WE. Effective: 2018 Spring Quarter.

CHI 140A—Quantitative Methods: Chicano/Latino Health Research (4)
Discussion/Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): Two years of high school algebra or the equivalent in college. Focuses on measuring Latino/Chicano health outcomes using a quantitative approach. Assesses main types of study designs and addresses measurement of disease frequency and health effects. GE credit: ACGH, DD, QL, SE. Effective: 2006 Spring Quarter.

CHI 141—Community-Based Participatory Research and Chicana/o and Latina/o Health (4)
Lecture/Discussion—3 hours; Term Paper. Overview of CBPR, as well as methodological CBPR considerations in building community partnerships, community assessment, issue analysis, research planning, data gathering, and data sharing with Chicana/o and Latina/o communities in particular. GE credit: DD, WE. Effective: 2015 Spring Quarter.

CHI 145S—Bi-National Health (5)
Lecture—5 hours. Prerequisite(s): BIS 001A; BIS 001B; BIS 001C; (SPA 021 or SPA 021V or SPA 021Y or SPA 031); or Consent of Instructor. Upper division standing only. Examination of health status and intervention strategies presented in public health care settings, private clinics and by indigenous healers in Mexico. Analysis of impact of high risk diseases. Offered in a Spanish speaking country under supervision of UC Davis faculty/lecturer. GE credit: OL, WC, WE. Effective: 2018 Spring Quarter.

CHI 146S—Public Health in Latin America (5)

CHI 147S—Indigenous Healing and Biodiversity in Latin America (5)
Lecture—4 hours; Term Paper. Contrast between western and traditional healing practices in Latin America and the role of the natural environment in creating sustainable health delivery systems. Questions of health status attributable to public health and environmental risk factors. GE credit: OL, WC, WE. Effective: 2011 Fall Quarter.
CHI 148—Decolonizing Spirit (4)
Lecture—3 hours; Term Paper. Legacies of colonization and decolonization; indigenous forms of spirituality and sacredness. Emphasis on remembering traditions, practices, relations, and forms of indigenous knowledge. GE credit: AH, WC, WE. Effective: 2018 Fall Quarter.

CHI 150—The Chicana and Chicano Movement (4)

CHI 154—The Chicana/o Novel (4)
Lecture—4 hours. Prerequisite(s): Intermediate Spanish or consent of instructor. Introduction to the forms and themes of the Chicana/o novel with special attention to the construction of gender, nationality, sexuality, social class, and the family by contemporary Chicana/o novelists. Bilingual readings, lectures, discussions, and writing in Spanish. (Former course Spanish 126A.) GE credit: ACGH, AH, DD, OL, WC, WE. Effective: 1997 Winter Quarter.

CHI 155—Chicana/o Theater (4)
Lecture—4 hours. Prerequisite(s): Intermediate Spanish or consent of instructor. Examination of the formal and thematic dimensions of Chicana/o theater in the contemporary period with special emphasis on El Teatro Campesino and Chicana Feminist Theater. Bilingual readings, lectures, discussions, and writing in Spanish. (Former course Spanish 126B.) GE credit: ACGH, AH, DD, OL, VL, WC, WE. Effective: 1997 Winter Quarter.

CHI 156—Chicana/o Poetry (4)
Lecture—4 hours. Prerequisite(s): Intermediate Spanish or consent of instructor. Survey of Chicana/o poetry with special emphasis on its thematic and formal dimensions. Bilingual readings, lectures, discussions, and writing in Spanish. (Former course Spanish 126C.) GE credit: ACGH, AH, DD, OL, WC, WE. Effective: 1997 Winter Quarter.

CHI 157—Chicana and Chicano Narrative (4)
Lecture/Discussion—3 hours; Term Paper. Exploration of contemporary forms of the Chicana and Chicano narrative, encompassing visual art, fiction, poetry, film, theater, and creative nonfiction. Exposure to a variety of artists and scholars whose work shapes our evolving understanding of the Chicana/o experience GE credit: ACGH, AH, DD, VL, WC, WE. Effective: 2013 Fall Quarter.

CHI 160—Mexican Film and Greater Mexican Identity (4)
Film Viewing—1 hour; Lecture/Discussion—4 hours. Prerequisite(s): Intermediate Spanish. Survey of the role Mexican cinema plays in consolidation and contestation of post-revolutionary Mexican state and in the formation of a Greater Mexican cultural identity including Chicana/o identity. Showcases genres, periods, auteurs, movements and emphasis on gendered and sexualized narratives. GE credit: AH, VL, WC, WE. Effective: 2001 Winter Quarter.

CHI 161—Queer Latinidad (4)
Lecture/Discussion—3 hours; Term Paper/Discussion. Introduction to queer Latina and Latino studies with a focus on Chicana and Chicano theory and cultural production. GE credit: ACGH, AH, DD, SS, WE. Effective: 2015 Fall Quarter.

CHI 165—Chicanas, Latinas and Mexicanas in Commercial Media (4)
Laboratory—2 hours; Lecture/Discussion—4 hours. Prerequisite(s): CHI 060; Or other film or feminist theory course; conversational fluency in Spanish. The portrayal of Chicanas, Latinas and Mexicanas in commercial media. The relation between the representation of Chicana, Latina, and Mexicana women in commercial television and cinema and the role of women in Mexican and U.S. societies. GE credit: AH, VL, WC, WE. Effective: 1997 Winter Quarter.

CHI 170—Contemporary Issues in Chicano Art (4)

CHI 171—Mexican and Chicano Mural Workshop (4)
Independent Study—1 hour; Studio—8 hours. Prerequisite(s): CHI 070; and Consent of Instructor. The Mural: a collective art process that empowers students and people through design and execution of mural paintings in the tradition of the Mexican Mural Movement; introduces materials and techniques. May be repeated up to 1 time(s). (Same course as ART 171.) GE credit: AH, VL. Effective: 1997 Winter Quarter.

CHI 172—Chicana/o Voice/Poster Silk Screen Workshop (4)
Independent Study—1 hour; Studio—8 hours. Prerequisite(s): CHI 070 or CHI 073; and Consent of Instructor. The poster as a voice art form used by Chicanas/os and other people of color to point to the defects of social and
political existence and the possibility for change, from the Chicana/o artists' perspective. May be repeated up to 1 time(s). GE credit: AH, OL, VL, WC. Effective: 1997 Winter Quarter.

CHI 180—Grant Writing in the Chicana/o/Latina/o Community (4)
Lecture—4 hours. Prerequisite(s): CHI 010 or CHI 023; or Consent of Instructor. Upper division standing. Overview of key elements for grant writing. Topics include community needs assessments, development of human subjects protocols, data collection, methods, evaluation designs and community based methodologies for grant development applications in the Latino community. Effective: 2006 Spring Quarter.

CHI 181—Chicanas and Latinas in the U.S.: Historical Perspectives (4)
Lecture/Discussion—4 hours. Prerequisite(s): CHI 010 or WMS 050. Historical issues in the lives of Chicanas and Latinas in the U.S. and their diverse countries of origin. GE credit: ACGH, AH, DD, SS, WE. Effective: 2017 Fall Quarter.

CHI 182—Race and Juvenile Justice (4)
Lecture—4 hours. Prerequisite(s): CHI 010; Or equivalent. Individual and institutional responses to "troublesome" youth of color through history and in contemporary society. Emphasis on how race, as well as ethnicity, class, and gender have informed the treatment of "delinquent" youth. GE credit: ACGH, DD, OL, SS, WE. Effective: 2007 Winter Quarter.

CHI 184—Latino Youth Gangs in Global Perspective (4)
Lecture—3 hours; Term Paper. Comparative analysis of Latino youth gangs in Europe, Latin America, and the United States. Social, economic, political, and cultural factors leading to youth gangs as well as the responses are considered within a global perspective. Not open for credit to students who have completed CHI 184S. GE credit: ACGH, DD, OL, SS, WC, WE. Effective: 2013 Fall Quarter.

CHI 184S—Latino Youth Gangs in Global Perspective (4)
Lecture/Discussion—12 hours. Comparative analysis of Latino youth gangs in Europe, Latin America, and the United States. Social, economic, political, and cultural factors leading to youth gangs as well as the responses to the youths are considered within a global perspective. Not open for credit to students who have completed CHI 184. GE credit: ACGH, DD, OL, SS, WC, WE. Effective: 2013 Fall Quarter.

CHI 192—Internship in the Chicana/Chicano/Latina/Latino Community (1-12)
Internship—3-36 hours. Prerequisite(s): (CHI 010 or CHI 021 or CHI 050); (SPA 003 or SPA 003V); Or equivalent of SPA 003. Academic guidance combined with internship in community agencies serving Mexican/Latina/Latino/Chicana/Chicano clients. Use of bilingual skills and knowledge of history, culture, economics, politics and social issues. Internship project required. May be repeated up to 12 unit(s). (P/NP grading only.) GE credit: OL. Effective: 2018 Winter Quarter.

CHI 192S—Internship (1-12)
Internship. Prerequisite(s): (CHI 010 or CHI 021 or CHI 050); (SPA 003 or SPA 003V or SPA 003Y); and Consent of Instructor. Or equivalent of SPA 003, SPA 003V, SPA 003Y. Internship May be repeated for credit. (P/NP grading only.) Effective: 2018 Spring Quarter.

CHI 194HA—Senior Honors Research Project (2-5)
Independent Study—6-15 hours. Prerequisite(s): Consent of Instructor. Senior standing in Chicana/o Studies major. Student is required to read, research, and write Honors Thesis on Chicana/o Studies topics. GE credit: OL, WE. Effective: 1997 Winter Quarter.

CHI 194HB—Senior Honors Research Project (2-5)
Independent Study—6-15 hours. Prerequisite(s): Consent of Instructor. Senior standing in Chicana/o Studies major. Student is required to read, research, and write Honors Thesis on Chicana/o Studies topics. GE credit: OL, WE. Effective: 1997 Winter Quarter.

CHI 194HC—Senior Honors Research Project (2-5)
Independent Study—6-15 hours. Prerequisite(s): Consent of Instructor. Senior standing in Chicana/o Studies major. Student is required to read, research, and write Honors Thesis on Chicana/o Studies topics. GE credit: OL, WE. Effective: 1997 Winter Quarter.

CHI 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Upper division standing and consent of Program Chairperson. (P/NP grading only.) Effective: 1997 Winter Quarter.
CHI 198S—Directed Group Study (1-5)
Prerequisite(s): Consent of Instructor. May be repeated for credit. (P/NP grading only.) Effective: 2006 Winter Quarter.

CHI 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Upper division standing and consent of Program Chairperson. (P/NP grading only.) Effective: 1997 Winter Quarter.

CHI 199S—Special Study for Advanced Undergraduates (1-5)
Prerequisite(s): Consent of Instructor. May be repeated for credit. (P/NP grading only.) Effective: 2006 Winter Quarter.

CHI 230—Chicano/Latino Hispanic Politics (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Two undergraduate courses in Chicana/o Studies or consent of instructor. Examination of Chicano/Latino political experiences. Evaluate theories, ideology, and practice of Chicano politics. Brief history of Chicano/Latino/Hispanic political activity, comparisons among political modes, gendered politics, and understanding relationships among Chicanos, Mexican, American and world politics. Effective: 1997 Spring Quarter.

CHI 241—Community Based Health Research (4)
Lecture/Discussion—3 hours; Term Paper. Provides knowledge and skills to plan and implement public health projects that highlight the intersection of social determinants of health within a community empowerment framework. (S/U grading only.) Effective: 2017 Fall Quarter.

CHI 298—Group Study for Graduate Students (1-5)
Prerequisite(s): Consent of Instructor. Graduate standing. May be repeated for credit when topics differs. May be repeated for credit. (S/U grading only.) Effective: 2017 Fall Quarter.

CHI 299—Special Study for Graduate Students (1-12)
Prerequisite(s): Consent of Instructor. Graduate standing. (S/U grading only.) Effective: 1997 Winter Quarter.

CHI 396—Teaching Assistant Training Practicum (1-4)
Prerequisite(s): Consent of Instructor. Graduate standing. May be repeated for credit. (S/U grading only.) Effective: 2004 Spring Quarter.

Child Development (Graduate Group)

Child Development (Graduate Group) | Child Development M.S.
Amanda Guyer, Ph.D., Group Chairperson

Group Office. 1315 Hart Hall; 530-754-4109; http://humandevelopment.ucdavis.edu/

Faculty. http://humanecology.ucdavis.edu/hdfs-faculty

Graduate Study. The Graduate Group in Child Development offers a multidisciplinary program leading to an M.S. degree. The program provides students with an opportunity to pursue a coordinated course of postgraduate study in the field of child development which cuts across departmental boundaries. Students may work with children and families in the community, as well as the University’s Center for Child and Family Studies. Recipients of the degree gain sufficient background to engage in professions that directly (e.g., preschool, 4-H) or indirectly (e.g., social policy) involve children and families, obtain positions in teaching or research settings, or pursue further study leading to a doctorate in child development, human development, clinical psychology, or related fields.

Applicants seeking admissions and fellowships consideration must submit all materials by our priority December 15 deadline. The final admissions deadline is March 1. For more details, see http://humandevelopment.ucdavis.edu/.

Graduate Advisor. Contact Group office.

Chinese; East Asian Languages & Cultures

Chinese; East Asian Languages & Cultures | CHN Information
The department offers a core language program in Chinese, and courses in literature and culture. The core language program has two tracks: one for students who have no background whatsoever and one for students with prior language background.

**The Program.** Practical language skills are taught using the most modern methods so that upon entering the upper division a student will have attained substantial fluency in the spoken language (hearing and speaking) and the written language (reading and writing). Upper-division courses balance the need to further language skills with the need to understand and appreciate the cultural richness of Chinese civilization. All students are encouraged to combine their study of language and literature with courses in related fields, and to study abroad through the Education Abroad Program, the UC Davis Study Abroad Program or through internships in China or Taiwan.

**Career Opportunities.** UC Davis graduates have learned that a major in Chinese is a genuine, earned distinction that facilitates entrance to graduate programs and professional schools. In addition, job opportunities abound in virtually all career paths, especially for those who have completed study abroad.

**Honors Program.** To be eligible to receive high or highest honors in the Chinese major, students must complete a senior thesis project. A student interested in pursuing a senior thesis project must enroll in CHN 194H and complete a scholarly paper or similar research project under the direction of a senate faculty member. The thesis project will have a minimum duration of two quarters and carry a minimum of 6 units of credit. To qualify to undertake the senior thesis project, a student must have completed at least 135 units with a minimum GPA of 3.500 in courses counted toward the major. Interested students should consult with faculty in their field of interest by the quarter before they hope to commence work on the project (in most cases this will be the Spring Quarter of their junior year). Students who complete the senior thesis project and have an overall GPA that qualifies them for honors may be recommended by the faculty for honors, high honors, or highest honors at graduation.

**Education Abroad Program.** The university maintains study abroad programs in China, Hong Kong, and Taiwan. They offer excellent opportunities for students to polish their language skills and experience Asian cultures firsthand. Students are encouraged to participate. Appropriate courses taken abroad can be applied toward the major or the minor. For details, see the department's undergraduate advisor, the Education Abroad Program office or the UC Davis Study Abroad Office.

**Related Courses.** See East Asian Studies course list.

**Prerequisite Credit.** No student may repeat a course if that course is a prerequisite for a course that has already been completed with a grade of C– or better.

**Placement.** Chinese 1 is intended for beginning students with no prior knowledge of the Chinese language. Students who do have some knowledge but wish to improve their skills should meet with an advisor to discuss appropriate placement. Students must follow departmental guidelines for placement in all language courses and instructor approval is required for enrollment.

**Backtracking.** Satisfactory completion of a language course is evidence that a student’s language skills are beyond the level of those expected in its prerequisite courses. Accordingly, students who have completed a language course cannot go back and take its prerequisites. If the prerequisite courses are required for the major, students may substitute other courses. Students who are not sure how this requirement applies to them should speak to the undergraduate advisor.

**Waived Language Courses.** Students with exceptional language ability may waive required language courses. If lower division courses have been waived, students will not have to take courses in their place. If upper division
courses have been waived, students can use other appropriate courses to earn the units they need to complete the major. Consult the undergraduate advisor regarding selection of appropriate courses.

**Grading.** Students may take up to two and no more than two (regular, letter-graded) courses for the major on a P/NP basis. Courses which are only offered on a P/NP basis do not count toward these limits.

OR

Other advanced literature and culture courses selected in consultation with the undergraduate advisor.

391
A minor is offered in Chinese for students wishing to follow a formally recognized program of study in Chinese language and literature. For the minor, students may take one (regular, letter-graded) course on a P/NP basis. Courses which are only offered on a P/NP basis do not count toward these limits.

### Chinese

All upper division courses, including both language courses and literature in translation courses, may be used to meet this requirement. One approved lower division course (CHN 010, 011, 050) may also be used. In addition, students must demonstrate their language proficiency, normally through completion of CHN 003BL or 006. Only four units from 192, 197T, 198, and 199 may be applied to the minor. For details, consult the undergraduate advisor.

### Total: 20

### CHN 120, 130, 133, 140 and 150 can be repeated when content differs.

---

**CHN 120, 130, 133, 140 and 150 can be repeated when content differs.**

---

**Total: 40-70**
ability to understand or speak Mandarin Chinese. Emphases on standard Mandarin pronunciation, Chinese characters, and discourse level conversations. Not open for credit to students who have completed CHN 018. GE credit: AH, OL, WC. Effective: 2016 Spring Quarter.

**CHN 002CN—Mandarin for Cantonese Speakers II (5)**
Lecture—5 hours. Prerequisite(s): CHN 001CN; Or placement exam or consent of instructor. Continuation of course 1CN. Training in spoken Mandarin for students who can already read and write Chinese. Not open for credit to students who have completed CHN 017. GE credit: AH, OL, WC. Effective: 2016 Spring Quarter.

**CHN 003—Elementary Chinese (5)**
Lecture/Discussion—5 hours. Prerequisite(s): CHN 002; Or placement exam or consent of instructor. Continuation of elementary level skill development in listening, speaking, reading and writing Mandarin Chinese in everyday communication settings. Continued introduction of basic vocabulary and characters as well as core grammar, and further train pronunciation. GE credit: AH, OL, WC. Effective: 2016 Spring Quarter.

**CHN 003BL—Accelerated Written Chinese III (5)**
Lecture—5 hours. Prerequisite(s): CHN 002BL; Or placement exam or consent of instructor. Continuation of course 2BL with further trainings on all the communicative skills of listening, speaking, reading, and writing with emphases on standard Mandarin pronunciation, Chinese characters, and discourse level conversations in more communication settings. Not open for credit to students who have completed CHN 028. GE credit: AH, OL, WC. Effective: 2016 Spring Quarter.

**CHN 003CN—Mandarin for Cantonese Speakers III (5)**
Lecture—5 hours. Prerequisite(s): CHN 002CN; Or placement exam or consent of instructor. Continuation of course 2CN. Prepares students for entering upper division courses in Chinese. Not open for credit to students who have completed CHN 027. GE credit: AH, OL, WC. Effective: 2016 Spring Quarter.

**CHN 004—Intermediate Chinese (5)**
Lecture/Discussion—5 hours. Prerequisite(s): CHN 003 or placement exam or consent of instructor. Continuation of intermediate-level communication skills in spoken and written Mandarin, based on language skills developed in course 3. GE credit: AH, OL, WC. Effective: 2016 Spring Quarter.

**CHN 004A—Accelerated Intensive Intermediate Chinese (15)**
Lecture/Discussion—15 hours. Prerequisite(s): CHN 003 or CHN 001A or placement exam or consent of instructor. Special nine-week accelerated, intensive summer session course that combines the work of courses 4, 5, and 6. Intermediate-level training in spoken and written Chinese in cultural and communicative contexts, based on language skills developed in course 3 or 1A. Not open to students who have completed CHN 004, CHN 005, or CHN 006. GE credit: AH, OL, WC. Effective: 2016 Spring Quarter.

**CHN 005—Intermediate Chinese (5)**
Lecture/Discussion—5 hours. Prerequisite(s): CHN 004 or placement exam or consent of instructor. Training continues at intermediate-level in spoken and written Chinese in cultural contexts, based on language skills developed in course 4. GE credit: AH, OL, WC. Effective: 2016 Spring Quarter.

**CHN 006—Intermediate Chinese (5)**
Lecture/Discussion—5 hours. Prerequisite(s): CHN 005; CHN 005 or placement exam or consent of instructor. Intermediate-level training in spoken and written Chinese in cultural contexts, based on language skills developed in course 5. GE credit: AH, OL, WC. Effective: 2016 Spring Quarter.

**CHN 007—Chinese Business Culture (4)**
Lecture/Discussion—4 hours. Prerequisite(s): Consent of Instructor. Open to non-heritage students who have no prior knowledge of, or background in, the Chinese language; anyone who has taken Chinese language classes before or after being enrolled at UC Davis, or anyone who is currently enrolled in a Chinese language class, or who speaks any Mandarin or Chinese dialect (e.g., Cantonese), cannot take the course for credit without the instructor’s permission. Introduction to business culture of China. Basic conversation and Romanization of Chinese words. GE credit: AH, OL, SS, WC. Effective: 2015 Winter Quarter.

**CHN 010—Modern Chinese Literature (In English) (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Introductory course requiring no knowledge of Chinese language or history. Reading and discussion of short stories and novels and viewing of two films. Designed to convey a feeling for what China has experienced in the twentieth century. Not open for credit to students who have already taken, or are taking concurrently, CHN 104. GE credit: AH, WC. Effective: 2008 Spring Quarter.
CHN 011—Great Books of China (in English) (4)
Discussion—1 hour; Lecture—3 hours. Selected readings in English translation are supplemented with background information on periods, authors and the interrelationships of culture, literature and social change. Methods of analysis are introduced and applied in class discussions. GE credit: AH, WC. Effective: 1997 Winter Quarter.

CHN 050—Introduction to the Literature of China and Japan (4)
Lecture/Discussion—4 hours. Methods of literary analysis and their application to major works from the various genres of Chinese and Japanese literature (in translation), including film. East Asian cultural traditions will also be introduced. (Same course as JPN 050.) GE credit: AH, WC. Effective: 2012 Fall Quarter.

CHN 098—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

CHN 099—Special Study for Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

CHN 100A—Chinese Intellectual Traditions: Daoist Traditions (4)
Lecture/Discussion—4 hours. Prerequisite(s): A course in Chinese history recommended. English-language survey of key Daoist texts and scholarship. Topics include Daoist concepts of the cosmos, the natural world, scripture, the body, and immortality; Daoist divinities; Daoism and the state. (Same course as RST 175A.) GE credit: AH, WC. Effective: 2016 Spring Quarter.

CHN 100B—Confucian Traditions (4)
Lecture/Discussion—4 hours. Key aspects of the Confucian tradition in dynastic China. Major themes addressed include ritual, classical studies, and Confucian influences on the Chinese family and state. GE credit: AH, WC. Effective: 2014 Fall Quarter.

CHN 101—Chinese Film (4)
Film Viewing—3 hours; Lecture/Discussion—3 hours. English language survey of Chinese film, from its inception to the end of the twentieth century. Chinese films as important texts for understanding national, transnational, racial, gender, and class politics of modern China. (Same course as CTS 147A.) GE credit: AH, VL, WC. Effective: 2016 Spring Quarter.

CHN 102—Chinese American Literature (In English) (4)

CHN 103—Modern Chinese Drama (4)

CHN 104—Modern Chinese Fiction (in English) (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. English language survey of Chinese fiction as it evolved amidst the great historical, social and cultural changes of the twentieth century. Thorough study of the most influential writers and genres. GE credit: AH, WC. Effective: 2016 Fall Quarter.

CHN 105—Western Influences on Twentieth-Century Chinese Literature (in English) (4)
Discussion—1 hour; Lecture—3 hours. Introduction of Western literary thought into modern China, the experimentation with Western literary forms and techniques, and the development of Marxism in contemporary literary writing. GE credit: AH, WC. Effective: 2016 Spring Quarter.

CHN 106—Chinese Poetry (in English) (4)
Discussion—1 hour; Lecture—3 hours. Organized topically and chronologically, the lyric tradition is explored from the dawn of folk songs down to modern expressions of social protest. Topics include friendship, love, oppression, war, parting, death, ecstasy and beauty. All readings are in English. GE credit: AH, WC. Effective: 2016 Spring Quarter.

CHN 107—Traditional Chinese Fiction (in English) (4)
Discussion—1 hour; Lecture—3 hours. English-language course studying the dawn of Chinese fiction and its development down to modern times. Combines survey history with close reading of representative works such as The Story of the Stone and famous Ming-Qing short stories. GE credit: AH, WC. Effective: 2016 Spring Quarter.
CHN 108—Poetry of China and Japan (in English) (4)
Discussion—1 hour; Lecture—3 hours. A comparative approach to Chinese and Japanese poetry, examining poetic practice in the two cultures; includes a general outline of the two traditions, plus study of poetic forms, techniques, and distinct treatments of universal themes: love, nature, war, etc. (Same course as JPN 108.) GE credit: AH, WC. Effective: 1997 Winter Quarter.

CHN 109A—Topics in Chinese Literature; Crime and Punishment (4)
Discussion—1 hour; Lecture—3 hours. Topics in Chinese literature; crime and punishment. GE credit: AH, WC. Effective: 2016 Spring Quarter.

CHN 109C—Topics in Chinese Literature; Women Writers (in English) (4)
Discussion—1 hour; Lecture—3 hours. Topics in Chinese literature; women writers. GE credit: AH, WC. Effective: 2016 Spring Quarter.

CHN 109D—Topics in Chinese Literature; The Knight-Errant (in English) (4)
Discussion—1 hour; Lecture—3 hours. Topics in Chinese literature; the knight-errant. GE credit: AH, WC. Effective: 2016 Spring Quarter.

CHN 109E—Topics in Chinese Literature; The City in Fiction (in English) (4)
Discussion—1 hour; Lecture—3 hours. Topics in Chinese literature; the city in fiction. GE credit: AH, WC. Effective: 2016 Spring Quarter.

CHN 109G—Topics in Chinese Literature; The Literature of Twentieth-Century Taiwan (in English) (4)
Discussion—1 hour; Lecture—3 hours. Topics in Chinese literature; the literature of twentieth-century Taiwan. GE credit: AH, WC. Effective: 2016 Spring Quarter.

CHN 109H—Topics in Chinese Literature; Popular Literature (in English) (4)
Discussion—1 hour; Lecture—3 hours. Topics in Chinese literature; popular literature. GE credit: AH, WC. Effective: 2016 Spring Quarter.

CHN 109I—Topics in Chinese Literature; Scholar & The Courtesan (in English) (4)
Discussion—1 hour; Lecture—3 hours. Topics in Chinese literature; the scholar and the courtesan. GE credit: AH, WC. Effective: 2016 Spring Quarter.

CHN 110—Great Writers of China: Texts and Context (in English) (4)
Discussion—1 hour; Lecture—3 hours. Examination of major theoretical concepts and interpretive methods in the study of literature by using examples from the Chinese tradition; discussions of classical and modern works with an emphasis on the relations between literature, author, society, and culture. GE credit: AH, WC. Effective: 2017 Spring Quarter.

CHN 111—Modern Chinese: Reading and Discussion (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): CHN 006 C- or better or CHN 003BL C- or better or CHN 004A C- or better; Or placement exam or consent of instructor. Building on Chinese 6/3BL, further development of communication skills in Modern Standard Mandarin-speaking environments. Reading of dialogues/articles pertaining to contemporary China. GE credit: AH, OL, WC. Effective: 2017 Spring Quarter.

CHN 111A—Intensive Third-Year Chinese (12)
Lecture/Discussion—13.3 hours. Prerequisite(s): CHN 006 or CHN 003BL or CHN 004A; Or placement exam or consent of instructor. Not open to students who have completed course 111, 112, or 113. Nine-week intensive summer course combines courses 111, 112, and 113. Training at intermediate-high and advanced-low level in spoken and written Chinese in cultural and communicative contexts based on language skills developed in course 6. GE credit: AH, OL, WC. Effective: 2017 Spring Quarter.

CHN 112—Modern Chinese: Reading and Discussion (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): CHN 111; Or placement exam or consent of instructor. Further development of communication skills from course 111 in Modern Standard Mandarin-speaking environments. Reading dialogues/articles pertaining to contemporary China issues and discussing ethical, moral, aesthetic, social, and cultural concerns. GE credit: AH, OL, WC. Effective: 2018 Winter Quarter.

CHN 113—Modern Chinese: Reading and Discussion (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): CHN 112; Or placement exam or consent of instructor. Continuation of course 112, further developing communication skills in Modern Standard Mandarin-speaking environments. Read dialogues/articles pertaining to contemporary China issues and discuss ethical, moral,
aesthetic, social, and cultural concerns. Study strategies for moving between simplified and traditional Chinese characters. GE credit: AH, OL, WC. Effective: 2016 Spring Quarter.

CHN 114—Introduction to Classical Chinese (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): CHN 112; Consent of Instructor. Or equivalent language proficiency. Introduction to the language in which, until the twentieth century, most official, documentary, scholarly, and belle-lettristic Chinese literature was written. GE credit: AH, WC. Effective: 2016 Spring Quarter.

CHN 115—Introduction to Classical Chinese II (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): CHN 114; or Consent of Instructor. Continuation of enhancing classical Chinese reading skills with literature ranging from the prose found in Han dynasty historical works, Six Dynasties anecdotal literature, and Tang occasional texts, as well as the poetic shi and fu genres. GE credit: AH, WC. Effective: 2016 Spring Quarter.

CHN 116—Introduction to Classical Chinese III (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): CHN 115; or Consent of Instructor. Translations of extended readings in the original sources and brief analyses of syntax. These sources will include texts written by well-known figures from the eighth through fifteenth centuries, composing in a wide variety of genres. GE credit: AH, WC. Effective: 2016 Spring Quarter.

CHN 120—Advanced Chinese (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): CHN 113; Or placement exam or consent of instructor. Evaluation of readings from various genres (literature, newspapers, TV and movies, etc.) develop advanced reading, writing, aural comprehension, and formal/professional speech skills in Mandarin Chinese. Chinese society/cultural studies, especially those sociocultural issues reflected in the language used in learning materials. May be repeated up to 1 time(s) Course material is different for each quarter of an academic year. Students may repeat course one time but repeat class cannot be for the same quarter taken in a previous academic year. GE credit: AH, OL, WC. Effective: 2016 Spring Quarter.

CHN 130—Readings in Traditional Chinese Fiction (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): CHN 111; Or equivalent language proficiency. Examination of representative works of traditional Chinese fiction popular from the 12th Century until the 17th and 18th centuries. Translations in English of the Chinese texts will be available to students as reference. May be repeated up to 1 time(s). GE credit: AH, VL, WC. Effective: 2016 Spring Quarter.

CHN 131—Readings in Traditional Chinese Poetry (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): CHN 111; Consent of Instructor. Or equivalent language proficiency. Traditional Chinese poetry from its beginnings to the golden ages of Tang and Song, surveying forms and poets that best reveal the Chinese poetic sensibility and the genius of the language of Chinese poetry. GE credit: AH. Effective: 2016 Spring Quarter.

CHN 132—Readings in Modern Chinese Poetry (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): CHN 111; Consent of Instructor. Or equivalent language proficiency. Chinese poetry from the Literary Revolution of 1917 to the present, surveying works that embody exciting innovations and reflect the modernity of twentieth-century Chinese society and culture. GE credit: AH, WC. Effective: 2016 Spring Quarter.

CHN 133—Readings in Modern Chinese Prose and Drama (4)
Lecture—4 hours. Prerequisite(s): CHN 111; Or equivalent language proficiency. Literary works and scholarly essays on selected topics of Chinese prose and drama, development of a deep understanding of Chinese culture and society through sophisticated reading materials of these two important genres of the modern period. Conducted in Chinese. May be repeated up to 2 unit(s) when topic differs. GE credit: AH, WC. Effective: 2016 Spring Quarter.

CHN 134—Chinese Film in Chinese Language (4)
Film Viewing—3 hours; Lecture—3 hours. Prerequisite(s): CHN 111; Or equivalent language proficiency. Chinese film and scholarly essays on Chinese cinema and film history. Develop a deep understanding of Chinese culture and society through viewing and studying Chinese films in the Chinese language. GE credit: AH, OL, SS, VL, WC. Effective: 2016 Spring Quarter.

CHN 140—Readings in Classical Chinese (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. Study and philological analysis of selected texts from the first millennium of Imperial China. May be repeated up to 2 time(s). GE credit: AH. Effective: 1997 Winter Quarter.
CHN 150—Fifth-Year Chinese: Selected Topics in Chinese Language, Literature, and Culture (4)
Lecture/Discussion—4 hours. Prerequisite(s): CHN 120; Or placement exam or consent of instructor. Examination of literary works and scholarly essays on selected topics of Chinese culture and society. Development of a deep understanding of Chinese culture and society through sophisticated Chinese speaking and writing exercises. May be repeated up to 3 time(s) when topic differs. GE credit: AH, OL, WC, WE. Effective: 2016 Spring Quarter.

CHN 160—The Chinese Language (4)
Review all entries
Lecture/Discussion—4 hours. Prerequisite(s): CHN 006 (can be concurrent) or CHN 003BL (can be concurrent) or CHN 003CN (can be concurrent) or CHN 004A (can be concurrent); Or placement exam or consent of instructor. LIN 001 recommended. Evaluation of the Chinese language viewed in its linguistic context, synchronically and diachronically. Historical phonology, classical and literary language, rise of written vernacular, descriptive grammar of modern standard Chinese, dialectal variation, and sociolinguistic factors. GE credit: AH, WC. Effective: 2016 Spring Quarter.

CHN 192—Chinese Internship (1-12)
Internship—3-36 hours. Prerequisite(s): Upper division standing and consent of instructor. Work experience in the Chinese language, with analytical term paper on a topic approved by instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

CHN 194H—Senior Thesis Honors Project (1-5)
Independent Study—3-15 hours. Prerequisite(s): Consent of Instructor. Senior standing and qualification for the Chinese honors program. Guided research, under the direction of a faculty member, leading to a senior honors thesis on a topic in Chinese literature, civilization, or language studies. May be repeated up to 8 unit(s). (P/NP grading only.) GE credit: AH, WC, WE. Effective: 2017 Fall Quarter.

CHN 197T—Tutoring in Chinese (1-4)
Tutorial—1-4 hours. Prerequisite(s): Consent of Department. Leading of small voluntary discussion groups affiliated with one of the Department's regular courses. May be repeated up to 4 unit(s). (P/NP grading only.) Effective: 2016 Summer Session 1.

CHN 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Summer Session 1.

CHN 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

CHN 297—Directed Independent Study (4)
Conference—1 hour; Independent Study; Term Paper. Prerequisite(s): Consent of Instructor. Restricted to graduate students. Directed independent study on a topic culminating in a term paper. Independent studies may only be arranged with consent of the instructor and when graduate seminars are unavailable. May be repeated up to 5 time(s). Effective: 2017 Winter Quarter.

CHN 299—Research (1-12)
Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

CHN 396—Teaching Assistant Training Practicum (1-4)
Variable—1-4 hours. Prerequisite(s): Consent of Instructor. Graduate standing. Any course taught by a graduate student under the direction of the Director. May be repeated for credit. (S/U grading only.) Effective: 2016 Spring Quarter.

ART 114C Intermediate Video: Performance Strategies 4
ART 117 Advanced Video and Electronic Arts 4
CTS 116 Design on Screen 4
CTS 124E Costume Design for Film 4
CTS 174 Acting for Camera 4
TCS 100 Experimental Digital Cinema I (Discontinued) 4
TCS 101 Experimental Digital Cinema II (Discontinued) 4
TCS 103 Interactivity and Animation 4
TCS 104 Documentary Production 4
TCS 111 Community Media Production 4
TCS 112 New Radio Features and Documentary 4
TCS 113 Community Networks (Discontinued) 4
TCS 115 Electronics for Artists (Discontinued) 4
TCS 121 Introduction to Electronic Sound (Discontinued) 4
TCS 122 Intermediate Sonic Arts (Discontinued) 4
TCS 123 Sight and Soundtrack (Discontinued) 4
TCS 125 Advanced Sound: Performance and Improvisation (Discontinued) 4
TCS 130 Fundamentals of 3D Computer Graphics (Discontinued) 4
TCS 131 Character Animation (Discontinued) 4
TCS 170A Advanced Technocultural Workshop 1
TCS 170B Advanced Technocultural Workshop 1
TCS 170C Advanced Technocultural Workshop 1
TCS 170D Advanced Technocultural Workshop 1
TCS 170E Advanced Technocultural Workshop 1
TCS 175 Small Scale Film Production 4
TCS 192 Internship (Discontinued) 1-4
TCS 198 Directed Group Study (Discontinued) 1-5
TCS 199 Special study for advanced undergraduates (Discontinued) 1-5

CTS 146A Modern Iranian Cinema 4
CTS 147A Chinese Film 4
CTS 150 Media Theory 5
FMS 120 Italian-American Cinema 4
FMS 121 New Italian Cinema 4
FMS 121S New Italian Cinema 4
FMS 124 Topics in U.S. Film History 4
FMS 125 Topics in Film Genres 4
FMS 127 Film Theory 4
FMS 129 Russian Film 4
FMS 142 New German Cinema 4
FMS 176A Classic Weimar Cinema 4
FMS 189 Special Topics in Film Studies 4
FMS 194H Special Study for Honors Students 1-5
FMS 195H Honors Thesis 1-5
FMS 198 Directed Group Study (Discontinued) 1-5
FMS 199 Special Study for Advanced Undergraduates (Discontinued) 1-5
STS 160 Ghosts of the Machine: How Technology Rewires our Senses 4
TCS 151 Topics in Virtuality 4
TCS 152 New Trends in Technocultural Arts 4
TCS 155 Introduction to Documentary Studies 4
TCS 158 Technology and the Modern American Body (Discontinued) 4
TCS 159 Media Subcultures 4

Some courses are identified as fulfilling more than one requirement; a given course can only fulfill one such requirement.
Choose four additional courses, chosen from the lists above, for a total of at least 16 units.

Total: 62-63

Cinema & Digital Media | CDM Courses

Courses in CDM:

CDM 002—Introduction to Technocultural Studies (4)
Discussion—1 hour; Lecture—3 hours. Contemporary developments in the fine and performing arts, media arts, digital arts, and literature as they relate to technological and scientific practices. Not open for credit to students who have taken TCS 001. GE credit: AH, VL, WE. Effective: 2019 Winter Quarter.

CDM 003—Media Archaeology (4)
Lecture—3 hours; Term Paper. Evolution of media technologies and practices beginning in the 19th Century as they relate to contemporary digital arts practices. Special focus on the reconstruction of the social and artistic possibilities of lost and obsolete media technologies. Not open for credit to students who have taken TCS 005. GE credit: AH, SE, VL, WE. Effective: 2019 Summer Session 1.

CDM 020—Filmmaking Foundations (5)
Film Viewing—2 hours; Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): CDM 001 and/or CDM 003 recommended. Introduction to filmmaking concepts, principles, and methods. Emphasis on form, content and historical dialectic between classical narrative filmmaking conventions and artists' challenges to these conventions. Not open for credit to students who have taken CTS 020. GE credit: AH, VL. Effective: 2019 Winter Quarter.

CDM 041A—History of Cinema from 1895-1945 (4)
Discussion—1 hour; Film Viewing—3 hours; Lecture—2 hours. Prerequisite(s): CDM 001 recommended. Examination of the cultural context of the emergence of cinema. Discussion of cinema as a product of the age of industrialization and conquest, as well as an element of urban culture, and mass transportation. Not open for credit to students who have taken CTS 041A. GE credit: AH, OL, VL, WC, WE. Effective: 2018 Summer Session 1.

CDM 072—Introduction to Games (4)
Extensive Writing/Discussion—1 hour; Lecture—3 hours. Introduction to the history, theory, and practice of play. Survey of both analog and digital games. Overview of gaming cultures, aesthetics, industries, and technologies. (Same course as ENL 072.) GE credit: AH, VL. Effective: 2017 Fall Quarter.

CDM 092—Internship (1-12)
Internship—1-12 hours. Prerequisite(s): Consent of Instructor. Supervised internship, on or off campus, in the area of cinema and digital media. May be repeated for credit. (P/NP grading only.) Effective: 2018 Fall Quarter.

CDM 098—Directed Group Study (1-5)
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. Directed group study in cinema and digital media. May be repeated for credit when topics differ. (P/NP grading only.) Effective: 2018 Fall Quarter.

CDM 099—Special Study for Undergraduates (1-5)
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. Special study for undergraduates in cinema and digital media. May be repeated for credit. (P/NP grading only.) Effective: 2018 Fall Quarter.

CDM 100—Experimental Digital Cinema I (4)
Laboratory—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): CDM 020 or ART 012; or Consent of Instructor. Experimental approaches to the making of film and video in the age of digital technologies. Builds upon the foundation provided by course 020. Instruction in technical, conceptual, creative, and critical skills for taking a project from idea to fruition. GE credit: AH, OL, VL. Effective: 2019 Winter Quarter.

CDM 101—Experimental Digital Cinema II (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): CDM 100; Consent of Instructor. Continuation of course 100 with further exploration of digital cinema creation. Additional topics include new modes of distribution, streaming, installation and exhibition. GE credit: AH, VL. Effective: 2018 Summer Session 1.

CDM 105—Feminist Media Production (6) Review all entries
Fieldwork—6 hours; Laboratory—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): CTS 020; or equivalent and one course in Women and Gender Studies, or consent of instructor. Media production as a mode of cultural criticism, furthering feminist and social justice goals. Fundamentals of camera, editing and distribution via a social
engagement model. Study and hands-on response to key historic and contemporary feminist and social justice media discourses. (Same course as WMS 165) GE credit: ACGH, AH, DD, SS, VL. Effective: 2017 Winter Quarter.

**CDM 105—Feminist Media Production (6)** Review all entries
Fieldwork—6 hours; Laboratory—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): CTS 020 or CDM 020; or two WMS courses Media production as a mode of cultural criticism, furthering feminist and social justice goals. Fundamentals of camera, editing and distribution via a social engagement model. Study and hands-on response to key historic and contemporary feminist and social justice media discourses. (Same course as WMS 165.) GE credit: ACGH, AH, DD, SS, VL. Effective: 2018 Fall Quarter.

**CDM 111—Community Media Production (4)**
Laboratory—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): CDM 020 recommended. Use of video and new media tools to address social issues among neighborhood and community groups. Use basic video, sound, and lighting techniques while working with local groups in a group video project. GE credit: AH, VL. Effective: 2018 Summer Session 1.

**CDM 113—Community Networks & Social Media (4)**
Laboratory—3 hours; Lecture/Discussion—3 hours. Impact and implications of computer-based networks in community, civic, and social life. Subjects may include community-access computer sites, neighborhood wireless networks, the digital divide, open-source software, and citizen action. Effective: 2018 Summer Session 1.

**CDM 121—Introduction to Sonic Arts (4)**
Laboratory—3 hours; Lecture/Discussion—3 hours. Introduction to the use of sound within the arts. Techniques and aesthetics of experimental contemporary practices. Creation of original sound works. Effective: 2018 Summer Session 1.

**CDM 122—Intermediate Sonic Arts (4)**
Laboratory—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): CDM 121; or Consent of Instructor. Techniques of recording, editing, mixing, and synthesis to combine voice, field recordings, and electronic signals. Incorporating live, recorded, found sounds to create multidimensional stories. Presentation of live performances, etc. Effective: 2018 Summer Session 1.

**CDM 123—Sight and Soundtrack (4)**
Laboratory—3 hours; Lecture/Discussion—3 hours. Use of sound to articulate, lend mood or subconsciously underscore visual, environmental, or performative situations, combining music, voice, sound effects and other noises to create sound designs that enhance, alter or support action and movement. GE credit: AH. Effective: 2018 Fall Quarter.

**CDM 125—Advanced Sound: Performance and Improvisation (4)**
Practice—3 hours; Workshop—3 hours. Prerequisite(s): CDM 121; CDM 122; or Consent of Instructor. Culmination of CDM sound courses. Focuses on performance and improvisation, culminating in a final public performance. Expectation of extensive reading and rehearsal outside of class time. GE credit: AH. Effective: 2018 Summer Session 1.

**CDM 130—Fundamentals of Computer Graphics (4)**
Laboratory—3 hours; Lecture—3 hours. Foundation course that teaches students the theory of three dimensional computer graphics, including modeling, rendering and animation. Development of practical skills through the use of professional software to create computer graphics. Not open for credit to students who have taken TCS 130. GE credit: VL. Effective: 2018 Fall Quarter.

**CDM 131—Character Animation (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): CDM 130 or TCS 130 The art of character animation in three dimensional computer animation. Movement theory, principles of animation, animation timing. Development of technical and practical skills. Not open for credit to students who have taken TCS 131. GE credit: AH, VL. Effective: 2018 Fall Quarter.

**CDM 135—Object-Oriented Programming for Artists (4)**
Laboratory—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): CDM 002 recommended. Introduction to object-oriented programming for artists. Focus on understanding the metaphors and potential of object-oriented programming for sound, video, performance, and interactive installations. GE credit: VL. Effective: 2018 Fall Quarter.

**CDM 136—Electronics for Artists (4)**
Laboratory—3 hours; Lecture—3 hours. Creative application of electronic technology relevant to media and fine arts involving both electronic principles and hands-on application. Effective: 2019 Spring Quarter.
CDM 137—Topics in Virtuality (4)
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): CDM 002 recommended. Social, political, economic, and aesthetic factors in virtual reality. Artificial environments, telepresence, and simulated experience. Focus on contemporary artists’ work and writing. GE credit: AH. Effective: 2019 Summer Session 1.

CDM 156—Epic Television: The Golden Age of TV? Sopranos, Wire, Girls, Walking Dead (4)
Discussion—1 hour; Film Viewing—3 hours; Lecture—2 hours. Critically celebrated scripted television since the mid-1990s. Key themes including class, ethnicity, race, violence, and US politics. Major developments in the medium’s history as context for recent wave of epic television. GE credit: AH, OL, VL, WE. Effective: 2018 Fall Quarter.

CDM 158—Technology and the Modern American Body (4)
Lecture/Discussion—3 hours; Term Paper. History and analysis of relationships between human bodies and technologies in modern society. Dominant and eccentric examples of how human bodies and technologies influence one another and reveal underlying cultural assumptions. Not open for credit to students who have taken TCS 158. (Same course as AMS 158.) GE credit: ACGH, AH, WE. Effective: 2019 Winter Quarter.

CDM 163—Art & Cinema: Between the White Cube and the Black Box (4)
Film Viewing—3 hours; Lecture—3 hours. Current debates between cinema studies and contemporary art. Issues covered include, experimental modes of filming, montaging, installing, screening, and displaying images between the White Cube (gallery/museum) and the Black Box (cinema). GE credit: AH, OL, VL, WE. Effective: 2017 Winter Quarter.

CDM 165E—Nazi and Fascist Cinema: Film and other Visual Media (4)
Discussion—1 hour; Film Viewing; Lecture—2 hours. Analysis of nefarious and noxious cultural products in history: films made under the Nazis and other fascists, 1933-1945. Questions at heart of humanistic studies: relationship of culture to propaganda, politics, and even unfathomable crime. (Same course as GER 165E.) GE credit: OL, VL, WC, WE. Effective: 2018 Fall Quarter.

CDM 192—Internship (1-12)
Internship—1-12 hours. Prerequisite(s): Consent of Instructor. Upper division standing Supervised internship, on or off campus, in the area of cinema and digital media. May be repeated for credit. (P/NP grading only.) Effective: 2018 Fall Quarter.

CDM 197T—Tutoring in Cinema and Digital Media (1-5)
Tutorial—1-5 hours. Prerequisite(s): Consent of Instructor. Consent of Department Chair. Leading small voluntary discussion groups affiliated with departmental courses under the supervision of the course instructor. May be repeated up to 10 unit(s). (P/NP grading only.) Effective: 2018 Summer Session 1.

CDM 198—Directed Group Study (1-5)
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. Directed group study in cinema and digital media. For students with upper division standing. May be repeated for credit when topic differs. (P/NP grading only.) Effective: 2018 Fall Quarter.

CDM 199—Special Study for Advanced Undergraduates (1-5)
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. Special study in cinema and digital media. For advanced undergraduates with upper division standing. May be repeated for credit. (P/NP grading only.) Effective: 2018 Fall Quarter.

CDM 396—Teaching Assistant Training Practicum (1-4)
Variable—3-12 hours. Prerequisite(s): Consent of Instructor. Graduate standing. Teaching assistant training practicum. May be repeated for credit. (S/U grading only.) Effective: 2018 Fall Quarter.

Cinema & Digital Media | CTS Courses

Courses in CTS:

CTS 012—Introduction to Media Computation (4)
Discussion/Laboratory—1 hour; Lecture—3 hours. Introduction to key computational ideas necessary to understand and produce digital media. Fundamentals of programming are covered as well as analysis of how media are represented and transmitted in digital form. Aimed primarily at non-computer science students. (Same course as ECS 012.) GE credit: AH, SE, VL. Effective: 2013 Fall Quarter.
CTS 020—Filmmaking Foundations (5) Review all entries
Film Viewing—2 hours; Laboratory—3 hours; Lecture—3 hours; Project (Term Project). Prerequisite(s): CTS 005 or TCS 005 and/or FMS 001 recommended. Introduction to filmmaking concepts, principles, and methods. Hands-on exercises build critical and creative capacities. Emphasis on form, content and the historical dialectic between classical narrative filmmaking conventions and artists’ challenges to these conventions. Weekly Lab, Lab Preparation, and Evening Screening. GE credit: AH, VL. Effective: 2013 Fall Quarter.

CTS 020—Filmmaking Foundations (5) Review all entries Discontinued
Film Viewing—2 hours; Laboratory—3 hours; Lecture—3 hours; Project (Term Project). Prerequisite(s): CTS 005 or TCS 005 and/or FMS 001 recommended. Introduction to filmmaking concepts, principles, and methods. Hands-on exercises build critical and creative capacities. Emphasis on form, content and the historical dialectic between classical narrative filmmaking conventions and artists’ challenges to these conventions. Weekly Lab, Lab Preparation, and Evening Screening. GE credit: AH, VL. Effective: 2019 Winter Quarter.

CTS 040A—Media History 1, Guttenberg to Oppenheimer (4)
Discussion—1 hour; Extensive Writing; Film Viewing—2 hours; Lecture—3 hours. History of Media to 1945, with particular focus on mechanically reproduced mass media technologies including the printing press, the newspaper, photography, cinema, radio and early computing technology. Analysis of inter-related cultural and political topics. (Same course as STS 040A.) GE credit: AH, OL, SS, VL, WE. Effective: 2014 Fall Quarter.

CTS 040B—Media History 2 1945-Present (4)
Discussion—1 hour; Extensive Writing; Film Viewing—2 hours; Lecture—3 hours. Prerequisite(s): CTS 040A History of media from 1945 to present, with particular focus on the development of the computer, digital network and internet technologies in the context of other media infrastructures like radio, television and satellite networks. Analysis of inter-related cultural/political topics. (Same course as STS 040B.) GE credit: AH, OL, SS, VL, WE. Effective: 2015 Winter Quarter.

CTS 041A—History of Cinema from 1895 to 1945 (4) Review all entries
Discussion—1 hour; Extensive Writing; Film Viewing—3 hours; Lecture—2 hours. Examination of the cultural context of the emergence of cinema. Discussion of cinema as a product of the age of industrialization and conquest, as well as an element of urban culture, and mass transportation. GE credit: AH, OL, VL, WC, WE. Effective: 2014 Fall Quarter.

CTS 041A—History of Cinema from 1895 to 1945 (4) Review all entries Discontinued
Discussion—1 hour; Extensive Writing; Film Viewing—3 hours; Lecture—2 hours. Examination of the cultural context of the emergence of cinema. Discussion of cinema as a product of the age of industrialization and conquest, as well as an element of urban culture, and mass transportation. GE credit: AH, OL, VL, WC, WE. Effective: 2018 Summer Session 1.

CTS 041B—History of Cinema from 1945 to the present (4)
Discussion—1 hour; Extensive Writing; Film Viewing—3 hours; Lecture—2 hours. Examination of cinema in the postwar period. Study of world cinema trends and the economic and socio-political conditions enabling innovative work in the film industry. GE credit: AH, OL, VL, WC, WE. Effective: 2014 Fall Quarter.

CTS 116—Design on Screen (4)
Film Viewing—3 hours; Lecture/Discussion—3 hours. Analysis of the contribution of outstanding designers for cinema, television and filmed entertainment. Study of diverse aesthetic theories of production design and art direction, costume design, or cinematography. Introductory principles and practice, history. May be repeated up to 2 time(s) when topic differs. (Same course as DRA 116.) GE credit: AH, VL. Effective: 2013 Fall Quarter.

CTS 124E—Costume Design for Film (4)
Lecture/Discussion—4 hours. Prerequisite(s): DRA 024; or Consent of Instructor. Pass One restricted to Theatre and Dance majors. Theory and practice of the art and business of film costume design. Script analysis, costume research, developing design concepts, budgeting, and current production practices and methods. Execution of designs for period and contemporary films. Viewing of current films. (Same course as DRA 124E.) GE credit: AH, OL, VL. Effective: 2017 Spring Quarter.

CTS 146A—Modern Iranian Cinema (4)
Film Viewing—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): Upper division standing, or consent of instructor. Iranian cinema of the 20th century in the context of profound cultural and social changes in Iran especially since the Iranian Revolution. Productions by representative directors such as Kiarostami, Makhmalbaf,
Bahram Beizaie are included. Knowledge of Persian not required. (Same course as MSA 131A.) GE credit: AH, OL, VL, WC, WE. Effective: 2013 Fall Quarter.

CTS 146B—Modern South Asia Cinema (4)
Film Viewing—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): Upper-division standing or consent of instructor. South Asian cinema of last 100 years in the context of cultural, social, and political changes. South Asian history, Independence, Partition, urban life, class, migration, postcolonial identity, diaspora, gender, sexuality, religion, sport, performance, etc. (Same course as MSA 131B and ANT 147.) GE credit: AH, SS, VL, WC, WE. Effective: 2017 Winter Quarter.

CTS 147A—Chinese Film (4)
Film Viewing—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): HIS 009A; Or any course on traditional China; upper division standing. English language survey of Chinese film, from its inception to the end of the twentieth century. Chinese films as important texts for understanding national, transnational, racial, gender, and class politics of modern China. (Same course as CHN 101.) GE credit: AH, VL, WC. Effective: 2014 Winter Quarter.

CTS 148B—Japanese Literature on Film (4)
Film Viewing—3 hours; Lecture/Discussion—3 hours. Survey of films based on works of Japanese literature, emphasis on pre-modern and early modern texts. Introduction to major directors of Japan, with a focus on cinematic adaptation. Lectures and readings in English. Films in Japanese with English subtitles. (Same course as JPN 156.) GE credit: AH, VL, WC, WE. Effective: 2016 Winter Quarter.

CTS 150—Media Theory (5)
Discussion—1 hour; Extensive Writing; Film Viewing—3 hours; Lecture—2 hours. Critical and theoretical approaches to the emergence of new technologies since the invention of photography. Examine various approaches to media (formalist, semiotic, structuralist, Frankfurt School, cybernetics, visual and gamer theory). (Same course as STS 151.) GE credit: AH, OL, SS, VL, WE. Effective: 2014 Fall Quarter.

CTS 162—Surveillance Technologies and Social Media (4)
Film Viewing—3 hours; Lecture—3 hours; Term Paper. Prerequisite(s): TCS 001 or STS 020 Study of the ubiquitous presence of CCTV, face recognition software, global tracking systems, biosensors, and data mining practices that have made surveillance part of our daily life. Study boundaries between security and control, information and spying. (Same course as STS 162.) GE credit: ACGH, AH, OL, SS, VL, WE. Effective: 2015 Winter Quarter.

CTS 172—Video Games and Culture (4)
Extensive Writing/Discussion—1 hour; Lecture—3 hours. Prerequisite(s): TCS 001 or ENL 003 or STS 001; Or equivalent of courses listed above. Critical approaches to the study of video games, focusing on formal, historical, and cultural modes of analysis. History of software and hardware in North American and global contexts. Relations of games to society, politics, economics, literature, media, and the arts. (Same course as STS 172 and ENL 172.) GE credit: ACGH, AH, SS, VL. Effective: 2014 Fall Quarter.

CTS 174—Acting for Camera (4)
Lecture/Lab—6 hours. Prerequisite(s): Consent of Instructor. Analysis and practice of acting skills required for camera work and digital media. May be repeated up to 8 unit(s) when instructor differs. (Same course as DRA 174.) Effective: 2013 Spring Quarter.

Cinema & Digital Media | FMS Courses

Courses in FMS:

FMS 001—Introduction to Film Studies (4)
Discussion—1 hour; Film Viewing—3 hours; Lecture—2 hours. Analysis of film form and narrative, including cinematography, editing, and sound. Issues in film studies, including authorship, stardom, race, gender, class, and cultural identity. Includes introduction to selected cinemtic movements and national film traditions. Not open for credit to students who have taken HUM 010. GE credit: AH, OL, VL, WC, WE. Effective: 2012 Fall Quarter.

FMS 045—Vampires and Other Horrors in Film and Media (4)
Discussion—1 hour; Film Viewing—3 hours; Lecture—2 hours. History of representations of vampires and horror generally from the 19th through 21st centuries. Emphasis on transnational history of the horror genre; psychologies of horror effects; issues of race, gender, and class; intersections with prejudice, medicine, modernity. (Same course as GER 045.) GE credit: ACGH, AH, DD, OL, VL, WC, WE. Effective: 2012 Fall Quarter.

FMS 090X—Lower Division Seminar (4)
Seminar—4 hours. Prerequisite(s): Consent of Instructor. Lower division standing. Study of a special topic in Film
Studies in a small class setting. May be repeated for credit if topics differs. (P/NP grading only.) Effective: 2012 Fall Quarter.

**FMS 092—Internship (1-12)** Review all entries
Internship—3-36 hours. Supervised internship off and on campus in areas of Film Studies. May be repeated for credit. (P/NP grading only.) Effective: 2012 Fall Quarter.

**FMS 092—Internship (1-12)** Review all entries Discontinued
Internship—3-36 hours. Supervised internship off and on campus in areas of Film Studies. May be repeated for credit. (P/NP grading only.) Effective: 2012 Fall Quarter.

**FMS 092—Internship (1-12)** Review all entries Discontinued
Internship—3-36 hours. Supervised internship off and on campus in areas of Film Studies. May be repeated for credit. (P/NP grading only.) Effective: 2018 Fall Quarter.

**FMS 098—Directed Group Study (1-5)** Review all entries
Variable—3-15 hours. Directed Group Study (P/NP grading only.) Effective: 2012 Fall Quarter.

**FMS 098—Directed Group Study (1-5)** Review all entries Discontinued
Variable—3-15 hours. Directed Group Study (P/NP grading only.) Effective: 2012 Fall Quarter.

**FMS 098—Directed Group Study (1-5)** Review all entries Discontinued
Variable—3-15 hours. Directed Group Study (P/NP grading only.) Effective: 2018 Summer Session 1.

**FMS 099—Special Study for Undergraduates (1-5)** Review all entries
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. Special Study for Undergraduates (P/NP grading only.) Effective: 2012 Fall Quarter.

**FMS 099—Special Study for Undergraduates (1-5)** Review all entries Discontinued
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. Special Study for Undergraduates (P/NP grading only.) Effective: 2012 Fall Quarter.

**FMS 099—Special Study for Undergraduates (1-5)** Review all entries Discontinued
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. Special Study for Undergraduates (P/NP grading only.) Effective: 2018 Summer Session 1.

**FMS 120—Italian-American Cinema (4)**
Film Viewing—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): FMS 001 Exploration of representations of Italian-American identity in American (U.S.) cinema. Analysis of both Hollywood and independently produced films, especially as they represent ethnicity, gender, and social class of Italian Americans. Not open for credit to students who have taken HUM 120. GE credit: ACGH, AH, DD, OL, VL, WE. Effective: 2012 Fall Quarter.

**FMS 121—New Italian Cinema (4)**
Film Viewing—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): FMS 001; And upper-division standing, or consent of instructor. Italian cinema of the 21st century in the context of profound cultural and social changes in Italy since World War II. Productions by representative directors such as Amelio, Giordana, Moretti, Muccino are included. Knowledge of Italian not required. (Same course as ITA 121.) GE credit: AH, OL, VL, WC, WE. Effective: 2012 Fall Quarter.

**FMS 121S—New Italian Cinema (4)**
Film Viewing—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): FMS 001; And upper-division standing or consent of instructor. Italian cinema of the 21st century in the context of profound cultural and social changes in Italy since World War II. Productions by representative directors such as Amelio, Giordana, Moretti, Muccino are included. Knowledge of Italian not required. (Same course as ITA 121S.) GE credit: AH, OL, VL, WC, WE. Effective: 2012 Fall Quarter.

**FMS 124—Topics in U.S. Film History (4)**
Film Viewing—3 hours; Lecture—3 hours. Prerequisite(s): FMS 001 Study of an aspect of American film history (such as the silent era; the studio system; U.S. avant-garde cinema), including the influences of technological, economic, regulatory, cultural, and artistic forces. May be repeated up to 2 time(s) when topic differs. Not open for credit to students who have completed HUM 124, unless topic differs. GE credit: ACGH, AH, DD, OL, VL, WE. Effective: 2012 Fall Quarter.

**FMS 125—Topics in Film Genres (4)**
Film Viewing—3 hours; Lecture—3 hours. Prerequisite(s): FMS 001 A study of one or more of the film genres (such as the documentary, the musical, film noir, screwball comedy, or the western), including genre theory and the relationship of the genre(s) to culture, history, and film industry practices. May be repeated up to 2 time(s) when topic differs. Not open for credit to students who have completed HUM 125, unless topic differs. GE credit: AH, OL, VL, WE. Effective: 2012 Fall Quarter.

**FMS 127—Film Theory (4)**
Film Viewing—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): FMS 001; or Consent of Instructor. Survey of the conceptual frameworks used to study film (including semiotics, psychoanalysis, spectatorship, auteur, genre and narrative theories). Historical survey of major film theorists. GE credit: AH, OL, VL, WC, WE. Effective: 2012 Fall Quarter.
FMS 129—Russian Film (4)
Film Viewing—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): Completion of Subject A requirement. History of Russian film; film and social revolution, the cult of Stalin, dissident visions; film and the collapse of the Soviet empire; gender and the nation in Russian film. Course taught in English; films are in Russian with English subtitles. (Same course as RUS 129.) GE credit: AH, VL, WC, WE. Effective: 2012 Fall Quarter.

FMS 142—New German Cinema (4)
Extensive Writing; Lecture/Discussion—3 hours. German filmmakers of the 1960s-1980s such as Fassbinder, Herzog, Syberberg, Brückner, Schlöndorf, Kluge, Wenders. Knowledge of German is not required. May be repeated for credit with consent of instructor. (Same course as GER 142.) GE credit: AH, OL, VL, WC, WE. Effective: 2012 Fall Quarter.

FMS 176A—Classic Weimar Cinema (4)
Film Viewing—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): HUM 001 German Weimar (1919-1933) cinema. Fritz Lang, F.W. Murnau, and G.W. Pabst among others. Influence on world-wide (esp. Hollywood) film genres such as film noir, horror, science fiction, and melodrama. Not open for credit to students who have taken HUM 176. (Same course as GER 176A.) GE credit: AH, OL, VL, WC, WE. Effective: 2012 Fall Quarter.

FMS 176B—Postwar German Cinema (4)
Film Viewing—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): FMS 001 Exploration of German cinema from 1945 to 1980, when the Nazi past was a central theme. Includes study of postwar "rubble films," escapist "homeland films," and New German Cinema of the 1970s (including films by Fassbinder, Kluge, Syberberg, and Herzog). Not open for credit to students who have taken HUM 177. GE credit: AH, OL, VL, WC, WE. Effective: 2012 Fall Quarter.

FMS 189—Special Topics in Film Studies (4)
Film Viewing—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): FMS 001; or Consent of Instructor. Upper division standing. Group study of a special topic in film, focusing on a national tradition, a major filmmaker, or a specific era. May be repeated up to 3 time(s). GE credit: AH, OL, VL, WE. Effective: 2012 Fall Quarter.

FMS 190X—Upper Division Seminar (4)
Seminar—4 hours. Prerequisite(s): Upper division standing or consent of instructor. Study of a special topic in film studies in a small class setting. May be repeated for credit if topic differs. (P/NP grading only.) Effective: 2012 Fall Quarter.

FMS 192—Internship (1-12) Review all entries
Variable—3-36 hours. Prerequisite(s): Consent of Instructor. Supervised internship off and on campus in areas of film studies. May be repeated for credit. (P/NP grading only.) Effective: 2012 Fall Quarter.

FMS 192—Internship (1-12) Review all entries Discontinued
Variable—3-36 hours. Prerequisite(s): Consent of Instructor. Supervised internship off and on campus in areas of film studies. May be repeated for credit. (P/NP grading only.) Effective: 2018 Fall Quarter.

FMS 194H—Special Study for Honors Students (1-5)
Independent Study—3-15 hours. Prerequisite(s): Consent of Instructor. Senior standing; GPA of at least 3.500. Guided research on a topic in Film Studies in preparation for the writing of an honors thesis in course 195H or the creation of an honors project in course 196H. May be repeated up to 2 time(s). (P/NP grading only.) Effective: 2012 Fall Quarter.

FMS 195H—Honors Thesis (1-5)
Independent Study—3-15 hours. Prerequisite(s): FMS 194H; and Consent of Instructor. GPA of at least 3.500; senior standing. Writing of an honors thesis on a topic in Film Studies under the direction of a faculty member. May be repeated up to 2 time(s). (P/NP grading only.) GE credit: AH, VL, WE. Effective: 2012 Fall Quarter.

FMS 196H—Honors Project (1-5)
Project (Term Project)—3-15 hours. Prerequisite(s): FMS 194H; and Consent of Instructor. Senior standing, GPA of at least 3.500. Creation of an honors film, video, or mixed-media project under the direction of a faculty member. May be repeated up to 2 time(s). (P/NP grading only.) GE credit: AH, VL, WE. Effective: 2012 Fall Quarter.

FMS 197T—Tutoring in Film Studies (1-5) Review all entries
Tutorial—3-15 hours. Prerequisite(s): Consent of program director. Leading of small voluntary discussion groups affiliated with one of the program's regular courses. May be repeated for credit. (P/NP grading only.) Effective: 2012 Fall Quarter.
FMS 197T—Tutoring in Film Studies (1-5) **Review all entries Discontinued**
Tutorial—3-15 hours. Prerequisite(s): Consent of program director. Leading of small voluntary discussion groups affiliated with one of the program's regular courses. May be repeated for credit. (P/NP grading only.) Effective: 2018 Summer Session 1.

FMS 198—Directed Group Study (1-5) **Review all entries**
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. Directed Group Study (P/NP grading only.) Effective: 2012 Fall Quarter.

FMS 199—Special Study for Advanced Undergraduates (1-5) **Review all entries Discontinued**
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. Special Study for Advanced Undergraduates (P/NP grading only.) Effective: 2018 Fall Quarter.

FMS 396—Teaching Assistant Training Practicum (1-4) **Review all entries**
Variable—3-12 hours. Prerequisite(s): Consent of Instructor. Graduate standing. Teaching Assistant Training Practicum May be repeated for credit. (S/U grading only.) Effective: 2012 Fall Quarter.

FMS 396—Teaching Assistant Training Practicum (1-4) **Review all entries Discontinued**
Variable—3-12 hours. Prerequisite(s): Consent of Instructor. Graduate standing. Teaching Assistant Training Practicum May be repeated for credit. (S/U grading only.) Effective: 2018 Summer Session 1.

Cinema & Digital Media | TCS Courses

Courses in TCS:
TCS 001—Introduction to Technocultural Studies (4) **Review all entries**
Extensive Writing; Lecture—3 hours. Contemporary developments in the fine and performing arts, media arts, digital arts, and literature as they relate to technological and scientific practices. GE credit: AH, VL, WE. Effective: 2012 Fall Quarter.

TCS 001—Introduction to Technocultural Studies (4) **Review all entries Discontinued**
Extensive Writing; Lecture—3 hours. Contemporary developments in the fine and performing arts, media arts, digital arts, and literature as they relate to technological and scientific practices. GE credit: AH, VL, WE. Effective: 2019 Winter Quarter.

TCS 005—Media Archaeology (4) **Review all entries**
Lecture/Discussion—3 hours; Term Paper. Evolution of media technologies and practices beginning in the 19th Century as they relate to contemporary digital arts practices. Special focus on the reconstruction of the social and artistic possibilities of lost and obsolete media technologies. GE credit: AH, SE, VL, WE. Effective: 2012 Fall Quarter.

TCS 005—Media Archaeology (4) **Review all entries Discontinued**
Lecture/Discussion—3 hours; Term Paper. Evolution of media technologies and practices beginning in the 19th Century as they relate to contemporary digital arts practices. Special focus on the reconstruction of the social and artistic possibilities of lost and obsolete media technologies. GE credit: AH, SE, VL, WE. Effective: 2019 Summer Session 1.

TCS 007A—Technocultural Workshop; Digital Imaging (1)
Seminar—1 hour. Workshops in technocultural digital skills; Digital Imaging. GE credit: VL. Effective: 2012 Fall Quarter.

TCS 007B—Technocultural Workshop; Digital Video (1)
Seminar—1 hour. Workshops in technocultural digital skills; Digital Video. GE credit: VL. Effective: 2012 Fall Quarter.

TCS 007C—Technocultural Workshop; Digital Sound (1)
Seminar—1 hour. Workshops in technocultural digital skills; Digital Sound. GE credit: VL. Effective: 2012 Fall Quarter.

TCS 007D—Technocultural Workshop; Web Design (1)
Seminar—1 hour. Workshops in technocultural digital skills; Web Design. GE credit: VL. Effective: 2012 Fall Quarter.
TCS 007E—Technocultural Workshop; Topics in Digital Production (1)
Seminar—1 hour. Workshops in technocultural digital skills; Topics in Digital Production. May be repeated for credit. GE credit: VL. Effective: 2012 Fall Quarter.

TCS 100—Experimental Digital Cinema I (4) Review all entries
Laboratory—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): CTS 020 or ART 012 or TCS 007B; TCS 170B; or equivalent with consent of instructor. Class size limited to 20 students. Experimental approaches to the making of film and video in the age of digital technologies. Builds upon foundation provided by course 20. Instruction in technical, conceptual, creative, and critical skills for taking a project from idea to fruition. GE credit: AH, OL, VL. Effective: 2017 Spring Quarter.

TCS 100—Experimental Digital Cinema I (4) Review all entries Discontinued
Laboratory—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): CTS 020 or ART 012 or TCS 007B; TCS 170B; or equivalent with consent of instructor. Class size limited to 20 students. Experimental approaches to the making of film and video in the age of digital technologies. Builds upon foundation provided by course 20. Instruction in technical, conceptual, creative, and critical skills for taking a project from idea to fruition. GE credit: AH, OL, VL. Effective: 2019 Winter Quarter.

TCS 101—Experimental Digital Cinema II (4) Review all entries
Laboratory—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): TCS 100 Continuation of course 100 with further exploration of digital cinema creation. Additional topics include new modes of distribution, streaming, installation and exhibition. GE credit: VL. Effective: 2012 Fall Quarter.

TCS 101—Experimental Digital Cinema II (4) Review all entries Discontinued
Laboratory—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): TCS 100 Continuation of course 100 with further exploration of digital cinema creation. Additional topics include new modes of distribution, streaming, installation and exhibition. GE credit: VL. Effective: 2019 Winter Quarter.

TCS 103—Interactivity and Animation (4)
Laboratory—3 hours; Lecture/Discussion—3 hours. Fundamentals of creating interactive screen-based work. Theories of interactivity, linear versus non-linear structures and audience involvement and participation. Use of digital production tools to produce class projects. GE credit: VL. Effective: 2012 Fall Quarter.

TCS 104—Documentary Production (4)
Lecture/Discussion—3 hours; Project (Term Project). Prerequisite(s): TCS 007B; TCS 155; Or equivalent proficiency to TCS 007B. Traditional and new forms of documentary, with focus on technocultural issues. Skills and strategies for producing work in various media. Progression through all stages of production, from conception through post-production to critique. GE credit: VL. Effective: 2012 Fall Quarter.

TCS 110—Object-Oriented Programming for Artists (4) Review all entries
Laboratory—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): TCS 001 Introduction to object-oriented programming for artists. Focus on understanding the metaphors and potential of object-oriented programming for sound, video, performance, and interactive installations. GE credit: VL. Effective: 2012 Fall Quarter.

TCS 110—Object-Oriented Programming for Artists (4) Review all entries Discontinued
Laboratory—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): TCS 001 Introduction to object-oriented programming for artists. Focus on understanding the metaphors and potential of object-oriented programming for sound, video, performance, and interactive installations. GE credit: VL. Effective: 2018 Fall Quarter.

TCS 111—Community Media Production (4) Review all entries
Laboratory—3 hours; Lecture/Discussion—3 hours. Use of video and new media tools to address social issues among neighborhood and community groups. Students will use basic video, sound, and lighting techniques as they work with local groups in a group video project. GE credit: VL. Effective: 2012 Fall Quarter.

TCS 111—Community Media Production (4) Review all entries Discontinued
Laboratory—3 hours; Lecture/Discussion—3 hours. Use of video and new media tools to address social issues among neighborhood and community groups. Students will use basic video, sound, and lighting techniques as they work with local groups in a group video project. GE credit: VL. Effective: 2012 Fall Quarter.

TCS 112—New Radio Features and Documentary (4)
Laboratory—3 hours; Lecture/Discussion—3 hours. New feature and documentary production for radio and other audiophonic media, including audio streaming websites and installation. Emphasis on new and experimental approaches to audio production for broadcast on community radio and in international arts programming. Effective: 2012 Fall Quarter.
TCS 113—Community Networks (4) Review all entries
Laboratory—3 hours; Lecture/Discussion—3 hours. Impact and implications of computer-based networks in community, civic, and social life. Subjects may include community-access computer sites, neighborhood wireless networks, the digital divide, open-source software, and citizen action. Effective: 2012 Fall Quarter.

TCS 113—Community Networks (4) Review all entries Discontinued
Laboratory—3 hours; Lecture/Discussion—3 hours. Impact and implications of computer-based networks in community, civic, and social life. Subjects may include community-access computer sites, neighborhood wireless networks, the digital divide, open-source software, and citizen action. Effective: 2018 Summer Session 1.

TCS 115—Electronics for Artists (4) Review all entries
Laboratory—3 hours; Lecture—3 hours. Creative application of electronic technology relevant to media and fine arts involving both electronic principles and hands-on application. Effective: 2012 Fall Quarter.

TCS 115—Electronics for Artists (4) Review all entries Discontinued
Laboratory—3 hours; Lecture—3 hours. Creative application of electronic technology relevant to media and fine arts involving both electronic principles and hands-on application. Effective: 2018 Spring Quarter.

TCS 120—History of Sound in the Arts (4)
Lecture—3 hours; Term Paper. Prerequisite(s): TCS 001 A survey of the use of sound, voice, noise, and modes of listening in the modernist, avant-garde, and experimental arts, from the late 19th Century to the present. Focus on audiophonic and audiovisuel technologies. Effective: 2012 Fall Quarter.

TCS 121—Introduction to Electronic Sound (4) Review all entries
Laboratory—3 hours; Lecture/Discussion—3 hours. Introduction to the use of electronic sound within the arts. Techniques and aesthetics of experimental contemporary practices. Creation of original sound works. Effective: 2018 Winter Quarter.

TCS 121—Introduction to Electronic Sound (4) Review all entries Discontinued
Laboratory—3 hours; Lecture/Discussion—3 hours. Introduction to the use of electronic sound within the arts. Techniques and aesthetics of experimental contemporary practices. Creation of original sound works. Effective: 2018 Summer Session 1.

TCS 122—Intermediate Sonic Arts (4) Review all entries
Laboratory—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): TCS 121; TCS 170C Techniques of recording, editing, mixing, and synthesis to combine voice, field recordings, and electronic signals. Incorporating live, recorded, and found sounds to create multidimensional stories. Presentation of live performances, audio recordings, and sound installations. Effective: 2012 Fall Quarter.

TCS 122—Intermediate Sonic Arts (4) Review all entries Discontinued
Laboratory—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): TCS 121; TCS 170C Techniques of recording, editing, mixing, and synthesis to combine voice, field recordings, and electronic signals. Incorporating live, recorded, and found sounds to create multidimensional stories. Presentation of live performances, audio recordings, and sound installations. Effective: 2018 Summer Session 1.

TCS 123—Sight and Soundtrack (4) Review all entries
Laboratory—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): TCS 007C; TCS 170C The use of sound to articulate, lend mood or subconsciously underscore visual, environmental or performative situations, combining music, voice, sound effects and other noises to create sound designs that enhance, alter or support action and movement. Effective: 2012 Fall Quarter.

TCS 123—Sight and Soundtrack (4) Review all entries Discontinued
Laboratory—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): TCS 007C; TCS 170C The use of sound to articulate, lend mood or subconsciously underscore visual, environmental or performative situations, combining music, voice, sound effects and other noises to create sound designs that enhance, alter or support action and movement. Effective: 2018 Fall Quarter.

TCS 125—Advanced Sound: Performance and Improvisation (4) Review all entries
Practice—3 hours; Workshop—3 hours. Prerequisite(s): TCS 121; TCS 122; or Consent of Instructor. Culmination of TCS sound courses. Class will focus on performance and improvisation, culminating in a final public performance. Students will be expected to do extensive reading and rehearsal outside of class time. Effective: 2012 Fall Quarter.

TCS 125—Advanced Sound: Performance and Improvisation (4) Review all entries Discontinued
Practice—3 hours; Workshop—3 hours. Prerequisite(s): TCS 121; TCS 122; or Consent of Instructor. Culmination of
TCS sound courses. Class will focus on performance and improvisation, culminating in a final public performance. Students will be expected to do extensive reading and rehearsal outside of class time. Effective: 2018 Summer Session 1.

Review all entries  
Laboratory—3 hours; Lecture—3 hours. A foundation course that teaches students the theory of three dimensional computer graphics, including modeling, rendering and animation. Development of practical skills through the use of professional software to create computer graphics Effective: 2012 Fall Quarter.  

Review all entries Discontinued  
Laboratory—3 hours; Lecture—3 hours. A foundation course that teaches students the theory of three dimensional computer graphics, including modeling, rendering and animation. Development of practical skills through the use of professional software to create computer graphics Effective: 2018 Fall Quarter.

**TCS 131—Character Animation (4)**  
Review all entries  
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): TCS 130; or Consent of Instructor. The art of character animation in three dimensional computer animation. Movement theory, principles of animation, animation timing. Development of technical and practical skills. Effective: 2012 Fall Quarter.  

**TCS 131—Character Animation (4)**  
Review all entries Discontinued  
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): TCS 130; or Consent of Instructor. The art of character animation in three dimensional computer animation. Movement theory, principles of animation, animation timing. Development of technical and practical skills. Effective: 2018 Fall Quarter.

**TCS 150—Introduction to Theories of the Technoculture (4)**  
Extensive Writing; Lecture/Discussion—3 hours. Major cultural theories of technology with emphasis on media, communications, and the arts. Changing relationships between technologies, humans, and culture. Focus on the evolution of modern technologies and their reception within popular and applied contexts. GE credit: VL. Effective: 2012 Fall Quarter.

**TCS 151—Topics in Virtuality (4)**  
Review all entries  
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): TCS 001 Social, political, economic, and aesthetic factors in virtual reality. Artificial environments, telepresence, and simulated experience. Focus on contemporary artists' work and writing. GE credit: VL. Effective: 2012 Fall Quarter.  

**TCS 151—Topics in Virtuality (4)**  
Review all entries Discontinued  
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): TCS 001 Social, political, economic, and aesthetic factors in virtual reality. Artificial environments, telepresence, and simulated experience. Focus on contemporary artists' work and writing. GE credit: VL. Effective: 2019 Summer Session 1.

**TCS 152—New Trends in Technocultural Arts (4)**  
Lecture/Discussion—3 hours; Term Paper. Current work at the intersection of the arts, culture, science, and technology including biological and medical sciences, computer science and communications, and artificial intelligence and digital media. GE credit: VL. Effective: 2012 Fall Quarter.

**TCS 153—Concepts of Innovative Soundtracks (4)**  
Lecture/Discussion—3 hours; Term Paper. Innovative and unconventional soundtracks in cinema, media arts, and fine arts. Introduction to basic analytical skills for understanding sound-image relationships. Effective: 2012 Fall Quarter.

**TCS 154—Outsider Machines (4)**  
Lecture/Discussion—3 hours; Term Paper. Invention, adaptation and use of technologies outside the mainstream, commonsense, and the possible. Topics include machines as metaphor and embodied thought, eccentric customizing and and fictional technologies. GE credit: VL. Effective: 2012 Fall Quarter.

**TCS 155—Introduction to Documentary Studies (4)**  
Lecture/Discussion—3 hours; Term Paper. Recent evolution of the documentary. The personal essay film; found-footage/appropriation work; non-linear, multi-media forms; spoken word; storytelling; oral history recordings; and other examples of documentary expression. GE credit: ACGH, AH, DD, VL. Effective: 2012 Fall Quarter.

**TCS 158—Technology and the Modern American Body (4)**  
Review all entries  
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): TCS 001; (AMS 001A or AMS 005) The history and analysis of the relationships between human bodies and technologies in modern society. Dominant and eccentric
examples of how human bodies and technologies influence one another and reveal underlying cultural assumptions. (Same course as AMS 158.) GE credit: ACGH, AH, WE. Effective: 2012 Fall Quarter.

TCS 158—Technology and the Modern American Body (4) Review all entries Discontinued
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): TCS 001; (AMS 001A or AMS 005) The history and analysis of the relationships between human bodies and technologies in modern society. Dominant and eccentric examples of how human bodies and technologies influence one another and reveal underlying cultural assumptions. (Same course as American Studies 158.) GE credit: ACGH, AH, WE. Effective: 2019 Winter Quarter.

TCS 159—Media Subcultures (4)
Lecture/Discussion—3 hours; Term Paper. Relationships between subcultural groups and media technologies. Media as the cohesive and persuasive force of subcultural activities. List-servs, websites, free radio, fan 'zines, and hip-hop culture. GE credit: ACGH, VL. Effective: 2012 Fall Quarter.

TCS 160—Ghosts of the Machine: How Technology Rewires our Senses (4)
Extensive Writing/Discussion—1 hour; Lecture—3 hours. Historical, aesthetic and critical approaches to how information technologies produced ghost effects or a sense of terror in response to new media like the photograph, gramophone, film, typewriter, computer, Turing Machine. Focus on technological media transforms sense perception. (Same course as STS 160.) GE credit: ACGH, AH, SS, VL, WE. Effective: 2013 Fall Quarter.

TCS 170A—Advanced Technocultural Workshop (1)
Seminar—1 hour. Prerequisite(s): TCS 007A; Or equivalent. Workshop in advanced technocultural digital skills: Digital Imaging. GE credit: VL. Effective: 2012 Fall Quarter.

TCS 170B—Advanced Technocultural Workshop (1)
Seminar—1 hour. Prerequisite(s): TCS 007B; Or equivalent. Workshop in advanced technocultural digital skills: Digital Video. GE credit: VL. Effective: 2012 Fall Quarter.

TCS 170C—Advanced Technocultural Workshop (1)
Seminar—1 hour. Prerequisite(s): TCS 007C Workshop in advanced technocultural digital skills: Digital Sound. GE credit: VL. Effective: 2012 Fall Quarter.

TCS 170D—Advanced Technocultural Workshop (1)
Seminar—1 hour. Prerequisite(s): TCS 007D Workshop in advanced technocultural digital skills: Web Design. GE credit: VL. Effective: 2012 Fall Quarter.

TCS 170E—Advanced Technocultural Workshop (1)
Seminar—1 hour. Prerequisite(s): Consent of Instructor. Workshop in advanced technocultural digital skills: Topics in Digital Production. GE credit: VL. Effective: 2012 Fall Quarter.

TCS 175—Small Scale Film Production (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): Consent of Instructor. Lecture and intensive workshop teaching small-scale film production. Appointments as a(n) director, director of photography, actor, writer, lighting designer, sound designer and other critical positions are used to produce and submit a short film to a film festival. May be repeated up to 2 time(s). (Same course as DRA 175.) Effective: 2012 Fall Quarter.

TCS 190—Research Methods in Technocultural Studies (4)
Lecture/Discussion—3 hours; Project (Term Project). Introduction to basic research methods for Technocultural Studies: electronic and archived images, sounds and data, satellite downlinking, radiowave scanning, and oral histories. GE credit: VL, WE. Effective: 2012 Fall Quarter.

TCS 191—Writing Across Media (4)
Extensive Writing; Lecture/Discussion—3 hours. Introduction to experimental approaches to writing for different media and artistic practices. How written texts relate to the images, sounds, and performances in digital and media production. GE credit: WE. Effective: 2012 Fall Quarter.

TCS 192—Internship (1-4) Review all entries
Internship—3-12 hours. Supervised internship on or off campus in area relevant to Technocultural Studies. May be repeated up to 2 time(s). (P/NP grading only.) Effective: 2012 Fall Quarter.

TCS 197T—Tutoring in Technocultural Studies (1-5)
Tutorial—3-15 hours. Prerequisite(s): Consent of Instructor. Undergraduates assist the instructor by tutoring students
in one of the department’s regularly scheduled courses. May be repeated up to 8 unit(s). (P/NP grading only.)
Effective: 2012 Fall Quarter.

**TCS 198—Directed Group Study (1-5)**  
*Review all entries*

Variable—3-15 hours. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 2012 Fall Quarter.

**TCS 198—Directed Group Study (1-5) Discontinued**  
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 2018 Fall Quarter.

**TCS 199—Special study for advanced undergraduates (1-5)**  
*Review all entries*

Variable—3-15 hours. Prerequisite(s): Consent of Instructor. Guided study with faculty member in independent scholarly activity. May be repeated up to 8 unit(s). (P/NP grading only.) Effective: 2012 Fall Quarter.

**TCS 199—Special study for advanced undergraduates (1-5) Discontinued**  
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. Guided study with faculty member in independent scholarly activity. May be repeated up to 8 unit(s). (P/NP grading only.) Effective: 2018 Fall Quarter.

### Civil & Environmental Engineering; Engineering

**Civil & Environmental Engineering; Engineering | ECI Information**

Faculty. [http://cee.engr.ucdavis.edu/people/faculty-directory/](http://cee.engr.ucdavis.edu/people/faculty-directory/)

**Civil & Environmental Engineering; Engineering | ECI M.S.**

(College of Engineering)

Amit M. Kanvinde, Ph.D., Chairperson of the Department; 530-754-9471

Department Office. 2001 Ghausi Hall; 530-752-0586; [http://cee.engr.ucdavis.edu](http://cee.engr.ucdavis.edu)

Faculty. [http://cee.engr.ucdavis.edu/people/faculty-directory/](http://cee.engr.ucdavis.edu/people/faculty-directory/)

M.S.  
[http://cee.engr.ucdavis.edu/graduate; 530-752-1441](http://cee.engr.ucdavis.edu/graduate; 530-752-1441)

With over forty faculty members, over $20 million in annual research expenditures and over 200 graduate students, the Department of Civil and Environmental Engineering integrates research, education and professional service in areas related to civil infrastructure and the environment. Graduate students benefit from close working relationships with professors who are the leading international experts in their field. Students pursuing their M.S. degrees have the opportunity to follow a more coursework-focused track or research-focused track. Graduate students pursuing their M.S. will specialize in one of five core areas: environmental, geotechnical, structural/structural mechanics, transportation or water resources engineering. Our graduates go on to serve the profession and academia by advancing the leading edge of fundamental knowledge, as well as engineering practice.

Generous financial support is available in the form of research assistantships, teaching assistantships, fellowships and financial aid. Over 70% of the graduate students in our program are either fully or partially supported through one or more of these paths.

Research Area Highlights:

- Alternative fuel transportation infrastructure
- Earthquake engineering
- Environmental engineering
- Environmental planning and management
- Geotechnical engineering
- Hydraulics and fluid mechanics
- Hydrology
- Structural engineering
• Structural health monitoring
• Structural mechanics
• Systems planning and design
• Transportation engineering
• Transportation planning and design
• Water resources engineering

Research Facilities and Partnerships:
• Pavement Research Center & Advanced Transportation Infrastructure Research Center
• Center for Bio-mediated & Bio-inspired Geotechnics
• Center for Geotechnical Modeling
• Center for Watershed Sciences
• Center for Water-Energy Efficiency
• Institute of Transportation Studies
• J. Amorcoho Hydraulics Laboratory (JAHL)
• John Muir Institute of the Environment
• Tahoe Environmental Research Center
• Western Cooling Efficiency Center

Complete Information is on our website.

Civil & Environmental Engineering; Engineering | ECI Ph.D.

(College of Engineering)
Amit M. Kanvinde, Ph.D., Chairperson of the Department; 530-754-9471

Department Office. 2001 Ghausi Hall; 530-752-0586; http://cee.engr.ucdavis.edu

Faculty. http://cee.engr.ucdavis.edu/people/faculty-directory/

Ph.D.; Designated Ph.D. emphasis available in Biotechnology
http://cee.engr.ucdavis.edu/graduate; 530-752-1441

With over forty faculty members, over $20 million in annual research expenditures and over 200 graduate students, the Department of Civil and Environmental Engineering integrates research, education and professional service in areas related to civil infrastructure and the environment. Graduate students benefit from close working relationships with professors who are the leading international experts in their field. They are supported in their study and research by robust funding, and they have access to state-of-the-art research facilities within the program and in interdisciplinary CEE faculty-led centers across campus. Our graduates go on to serve the profession and academia by advancing the leading edge of fundamental knowledge, as well as engineering practice.

Generous financial support is available in the form of research assistantships, teaching assistantships, fellowships and financial aid. Over 70% of the graduate students in our program, and nearly all Ph.D. students, are either fully or partially supported through one or more of these paths.

Research Area Highlights:
• Alternative fuel transportation infrastructure
• Earthquake engineering
• Environmental engineering
• Environmental planning and management
• Geotechnical engineering
• Hydraulics and fluid mechanics
• Hydrology
• Structural engineering
• Structural health monitoring
• Structural mechanics
• Systems planning and design
• Transportation engineering
• Transportation planning and design
• Water resources engineering

Research Facilities and Partnerships:
• Pavement Research Center & Advanced Transportation Infrastructure Research Center
• Center for Bio-mediated & Bio-inspired Geotechnics
• Center for Geotechnical Modeling
• Center for Watershed Sciences
• Center for Water-Energy Efficiency
• Institute of Transportation Studies
• J. Amorocho Hydraulics Laboratory (JAHL)
• John Muir Institute of the Environment
• Tahoe Environmental Research Center
• Western Cooling Efficiency Center

Civil & Environmental Engineering; Engineering | ECI Courses

Courses in ECI:

ECI 003—Civil Infrastructure and Society (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): MAT 021A (can be concurrent) Pass One restricted to lower division students; Civil Engineering majors. Introduction to civil infrastructure and its relationship with society and the natural environment. Exposure to innovative research on civil engineering and environmental systems. Participation in laboratory experiments illustrative of the solution of representative but simplified engineering problems. Not open for credit to upper division students. GE credit: OL, SE, SS. Effective: 2016 Winter Quarter.

ECI 016—Spatial Data Analysis (2)
Laboratory—3 hours; Lecture—1 hour. Restricted to Civil Engineering and Biological Systems Engineering majors; non-majors accommodated on a space-available basis. Computer-aided design and geographic information systems in civil engineering practice. GE credit: QL, SE. Effective: 2010 Spring Quarter.

ECI 019—C Programming for Civil and Environmental Engineers (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): MAT 021A (can be concurrent) Pass One open to Civil Engineering majors and Optical Science and Engineering majors. Computational problem solving techniques for Civil and Environmental Engineering applications using structured C programming. Algorithm design applied to realistic problems. GE credit: SE. Effective: 2011 Winter Quarter.

ECI 040—Introduction to Environmental Engineering (4)
Lecture—4 hours. Prerequisite(s): CHE 002B Pass One open to students in the College of Engineering. Introduction to topics in environmental engineering; discussion on influence of literary work, art, and media on the evolution of environmental engineering practice, relevant laws, and regulations; presentations of historical case studies. GE credit: AH. Effective: 2017 Winter Quarter.

ECI 090X—Lower Division Seminar (1-4)
Seminar—1-4 hours. Prerequisite(s): Consent of Instructor. Examination of a special topic in a small group setting. May be repeated for credit. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 092—Internship for Engineering (1-5)
Internship. Prerequisite(s): Lower division standing; approval of project prior to period of internship. Supervised work experience in civil engineering. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

ECI 098—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Lower division standing. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.
ECI 099—Special Study for Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. Lower division standing. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

ECI 100—Introduction to Fluid Mechanics for Civil and Environmental Engineers (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ENG 035 C- or better; MAT 022B C- or better; PHY 009B C- or better Pass One restricted to Civil Engineering, Environmental Engineering and Hydrology majors. Fluid flow in civil & environmental engineering, basis for design, buoyancy, hydrostatics, gravity dams, hydraulic modeling: similarity & scaling, conservation laws, flow in bends, nozzles, pipes, pumps, turbines, complimentary lab experiments. Not open for credit to students who have taken ENG 103. GE credit: SE. Effective: 2017 Fall Quarter.

ECI 114—Probabilistic Systems Analysis for Civil Engineers (4)
Lecture—4 hours. Prerequisite(s): MAT 021C C- or better Probabilistic concepts and models in engineering. Statistical analysis of engineering experimental and field data. Introduction to stochastic processes and models of engineering systems. Not open for credit to students who have completed STA 120. GE credit: QL, SE. Effective: 2013 Fall Quarter.

ECI 115—Computer Methods in Civil & Environmental Engineering (4) Review all entries
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): (ENG 006 or ECS 030); MAT 022B Open to Civil Engineering majors only. Presentation, implementation and application of numerical algorithms and computer models for the solution of practical problems in Civil and Environmental Engineering. GE credit: SE. Effective: 2013 Fall Quarter.

ECI 119—Parallel Processing for Engineering Applications. (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): C programming or consent of instructor. Fundamental skills in parallel computing for engineering applications; emphasis on structured parallel programming for distributed memory parallel clusters. No credit allowed for students who have taken ECI 119B. GE credit: SE. Effective: 2020 Winter Quarter.

ECI 123—Urban Systems and Sustainability (4)
Lecture—4 hours. Prerequisite(s): Upper division standing. Systems-level approach of how to evaluate and then modify sustainability of urban systems based on interaction with natural environments. Topics include: definition/metrics of urban sustainability; system analyses of urban systems; enabling technology, policies, legislation; measures and modification of ecological footprints. GE credit: ACGH, DD, SE, SL, SS, WE. Effective: 2006 Fall Quarter.

ECI 125—Building Energy Performance (4)
Lecture—4 hours. Prerequisite(s): Upper division standing in Engineering. Open to students in the College of Engineering. Mechanisms of energy consumption in buildings including end uses, thermal loads, ventilation, air infiltration, thermal energy distribution, and HVAC systems; energy performance simulation; methods and strategies of energy efficiency. GE credit: SE. Effective: 2011 Winter Quarter.

ECI 130—Structural Analysis (4)
Lecture—4 hours. Prerequisite(s): ENG 104 C- or better; MAT 022A Open to Civil Engineering majors. Elastic structural analysis of determinate and indeterminate trusses, beams and frames. Plastic bending and limit analysis. GE credit: QL, SE. Effective: 2014 Winter Quarter.

ECI 131—Matrix Structural Analysis (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ENG 104 C- or better; ENG 006 Open to Engineering majors only. Matrix formulation and computer analysis of statically indeterminate structures. Stiffness and flexibility formulations for elastic structures. Finite element methods for elasticity and bending problems. GE credit: SE. Effective: 2013 Fall Quarter.

ECI 132—Structural Design: Metallic Elements (4) Review all entries
Lecture—4 hours. Prerequisite(s): ECI 130 Design of metallic beams, columns, and other members for various types of loading and boundary conditions; design of connections between members; member performance within structural systems. GE credit: SE, VL. Effective: 2013 Fall Quarter.
ECI 132—Structural Design: Metallic Elements (4) Review all entries
Lecture—4 hours. Prerequisite(s): ECI 130 C- or better Design of metallic beams, columns, and other members for various types of loading and boundary conditions; design of connections between members; member performance within structural systems. GE credit: SE, VL. Effective: 2019 Winter Quarter.

ECI 135—Structural Design: Concrete Elements (4) Review all entries
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ECI 130 Restricted to Civil Engineering, Civil Engineering/Materials Science and Engineering, and Materials Science and Engineering majors only. Strength design procedures for columns, rectangular beams, T-beams and beams of general cross-section. Building code requirements for bending, shear, axial load, combined stresses and bond. Introduction to prestressed concrete. GE credit: QL, SE. Effective: 2013 Fall Quarter.

ECI 135—Structural Design: Concrete Elements (4) Review all entries
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ECI 130 C- or better Restricted to Civil Engineering, Civil Engineering/Materials Science and Engineering, and Materials Science and Engineering majors only. Strength design procedures for columns, rectangular beams, T-beams and beams of general cross-section. Building code requirements for bending, shear, axial load, combined stresses and bond. Introduction to prestressed concrete. GE credit: QL, SE. Effective: 2019 Winter Quarter.

ECI 136—Building Design (4) Review all entries
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): (ECI 130 or ECI 131); (ECI 135 or ECI 132) Design of a building structure for a specific need under the multiple constraints of safety, serviceability, cost and aesthetics. GE credit: SE. Effective: 2017 Fall Quarter.

ECI 138—Earthquake Loads on Structures (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECI 130 or ECI 131 Determination of loads on structures due to earthquakes. Methods of estimating equivalent static lateral forces; response spectrum and time history analysis. Concepts of mass, damping and stiffness for typical structures. Design for inelastic behavior. Numerical solutions and Code requirements. GE credit: SE. Effective: 2013 Fall Quarter.

ECI 138—Earthquake Loads on Structures (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECI 130 C- or better or ECI 131 C- or better); (ECI 135 or ECI 132) Design of a building structure for a specific need under the multiple constraints of safety, serviceability, cost and aesthetics. GE credit: SE. Effective: 2019 Winter Quarter.

ECI 139—Advanced Structural Mechanics (4)
Lecture—4 hours. Prerequisite(s): ENG 104 C- or better Review of stress, strain, equilibrium, compatibility, and elastic material behavior. Plane stress and plane strain problems in elasticity; energy methods. Theories for unsymmetric bending, straight and curved beams. Beams on elastic foundations; stresses in plates and shells; elastic stability. GE credit: QL, SE. Effective: 2019 Winter Quarter.

ECI 140A—Environmental Analysis of Aqueous Systems (4) Review all entries
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): CHE 002B C- or better Pass One restricted to Environmental Engineering majors. Introduction to "wet chemical" and instrumental techniques commonly used in the examination of water and wastewater and associated data analysis. Not open for credit to students who have taken ECH 140 or CHE 100. GE credit: SE. Effective: 2018 Winter Quarter.

ECI 140A—Environmental Analysis of Aqueous Systems (4) Review all entries
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): CHE 002B C- or better; ECI 040 (can be concurrent) Pass One restricted to Environmental Engineering majors. Introduction to "wet chemical" and instrumental techniques...
commonly used in the examination of water and wastewater and associated data analysis. Not open for credit to students who have taken ECH 140 or CHE 100. GE credit: SE. Effective: 2020 Winter Quarter.

**ECI 140B—Chemical Principles for Environmental Engineers (4)**
Lecture—4 hours. Prerequisite(s): CHE 002B C- or better Aqueous chemistry; equilibrium relationships; carbonate system; thermodynamics; kinetics & rate laws; precipitation, adsorption, & volatilization phenomenon; oxidation & reduction reactions; pH, pE and predominance diagrams; organic chemicals. Not open for credit to students who have taken ECI 140. GE credit: SE. Effective: 2017 Fall Quarter.

**ECI 140C—Biological Principles for Environmental Engineering (4) Review all entries**
Lecture—4 hours. Prerequisite(s): ECI 140A C- or better or ECI 140B C- or better Fundamental microbiology concepts for environmental engineers; provides background needed for the application of water and wastewater treatment, remediation, air pollution control and biotransformations in environmental engineered systems. Only two units of credit for students who have taken MIC 101 or MIC 102. GE credit: SE. Effective: 2018 Winter Quarter.

**ECI 140C—Biological Principles for Environmental Engineering (4) Review all entries**
Lecture—4 hours. Prerequisite(s): (ECI 140A C- or better or ECI 140B C- or better); ECI 040 Fundamental microbiology concepts for environmental engineers; provides background needed for the application of water and wastewater treatment, remediation, air pollution control and biotransformations in environmental engineered systems. Only two units of credit for students who have taken MIC 101 or MIC 102. GE credit: SE. Effective: 2020 Winter Quarter.

**ECI 140D—Water and Wastewater Treatment System Design (4) Review all entries**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): (ENG 103 C- or better or ECI 100 C- or better); (ECI 140 C- or better or ECI 140A C- or better or ECI 140B C- or better or ECI 140C C- or better or ECI 148A C- or better) Evaluation and design of water and wastewater treatment systems. Not open for credit to students who have taken ECI 148B. GE credit: SE. Effective: 2020 Winter Quarter.

**ECI 140D—Water & Wastewater Treatment System Design (4) Review all entries**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): (ENG 103 C- or better or ECI 100 C- or better); (ECI 140 C- or better or ECI 140A C- or better or ECI 140B C- or better or ECI 140C C- or better or ECI 148A C- or better); ECI 040 Evaluation and design of water and wastewater treatment systems. Not open for credit to students who have taken ECI 148B. GE credit: SE. Effective: 2020 Winter Quarter.

**ECI 141—Engineering Hydraulics (3)**
Lecture—3 hours. Prerequisite(s): ENG 103 C- or better or ECI 100 C- or better Nature of flow of a real fluid; flow in pipes; open channel flow; turbomachinery; fluid forces on objects: boundary layers, lift and drag. GE credit: SE. Effective: 2018 Winter Quarter.

**ECI 141L—Engineering Hydraulics Laboratory (1)**
Laboratory—3 hours. Prerequisite(s): ECI 141 (can be concurrent) Open to Engineering students only. Laboratory experiments and demonstrations on flow measurements, sluice gates, hydraulic jump, flow characteristics, and centrifugal pumps. GE credit: SE. Effective: 1997 Winter Quarter.

**ECI 142—Engineering Hydrology (4)**
Lecture—4 hours. Prerequisite(s): ECI 141 (can be concurrent) Restricted to students in the College of Engineering. The hydrologic cycle. Evapotranspiration, interception, depression storage and infiltration. Streamflow analysis and modeling. Flood routing through channels and reservoirs. Frequency analysis of hydrologic variables. Precipitation analysis for hydrologic design. Hydrologic design. GE credit: QL, SE. Effective: 2013 Fall Quarter.

**ECI 143—Green Engineering Design and Sustainability (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Upper division standing. Restricted to upper division standing; Pass One restricted to Civil Engineering majors. Application of concepts, goals and metrics of sustainability, green engineering and industrial ecology to engineering design. Other course topics include life-cycle assessments, analysis of environmental management systems, and economics of pollution prevention and sustainability. GE credit: QL, SE, SL, SS. Effective: 2017 Winter Quarter.

**ECI 144—Groundwater Systems Design (4)**
Lecture—4 hours. Prerequisite(s): ECI 141 Groundwater occurrence, distribution, and movement; groundwater flow systems; radial flow to wells and aquifer testing; aquifer management; groundwater contamination; solute transport by groundwater; fate and transport of subsurface contaminants. Groundwater supply and transport modeling. GE credit: SE. Effective: 2005 Spring Quarter.
ECI 144L—Groundwater Systems Design Laboratory (1)
Laboratory—3 hours. Prerequisite(s): ECI 144 (can be concurrent); ECI 144 required concurrently. Computer modeling of groundwater flow under regional gradient, well injection/withdrawal, and natural and engineered boundary conditions. Use of Groundwater Vistas computer program. Effective: 2010 Fall Quarter.

ECI 145—Hydraulic Structure Design (4)
Discussion—1 hour; Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): ECI 141 C- or better Project-based course on the design of an integrated urban drainage system with focus on consideration of design alternatives, multiple realistic constraints, quantification of uncertainty, codes and standards, technical drawing and cost analysis. GE credit: SE. Effective: 2017 Fall Quarter.

ECI 146—Water Resources Simulation (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ENG 103 C- or better or ECI 100 C- or better Computer simulation techniques in the analysis, design and operation of surface water systems; modeling concepts and practices with application to surface runoff; water quality in rivers and streams and dispersion of contaminants in water bodies. GE credit: SE. Effective: 2018 Winter Quarter.

ECI 148A—Water Quality Management (4)
Lecture—4 hours. Prerequisite(s): CHE 002B C- or better Basic concepts of water quality measurements and regulations. Introduction to physical, biological and chemical processes in natural waters. Fundamentals of mass balances in water and wastewater treatment. GE credit: SE. Effective: 2013 Fall Quarter.

ECI 149—Air Pollution (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MAT 021D; MAT 022B; CHE 002B C- or better; (ATM 121A or ENG 103 C- or better or ECI 100 C- or better) Physical and technical aspects of air pollution. Emphasis on geophysical processes and air pollution meteorology as well as physical and chemical properties of pollutants. (Same course as ATM 149.) GE credit: QL, SE, SL. Effective: 2018 Winter Quarter.

ECI 150—Air Pollution Control System Design (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECI 149 C- or better or ATM 149 C- or better Design and evaluation of air pollution control devices and systems. GE credit: SE. Effective: 2017 Fall Quarter.

ECI 153—Deterministic Optimization and Design (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): MAT 021C; MAT 022A; Computer programming course. Operations research. Optimization techniques such as linear programming, dynamic programming, and non-linear programming. Applications in civil engineering disciplines, including multiple realistic constraints, through computer-based course projects. GE credit: QL, SE, SL, WE. Effective: 2013 Fall Quarter.

ECI 155—Water Resources Engineering Planning (4)
Lecture—4 hours. Prerequisite(s): (ENG 106 or ECN 001A or ECN 001AV); ECI 114 Basic engineering planning concepts; role of engineering, economic, environmental and social information and analysis; institutional, political and legal aspects. Case studies and computer models illustrate the planning of water resource systems. GE credit: QL, SE, SL, SS, WE. Effective: 2018 Winter Quarter.

ECI 161—Transportation System Operations (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MAT 021C C- or better; PHY 009A C- or better Principles of transportation system operations; traffic characteristics and methods of measurement; models of transportation operations and congestion applied to urban streets and freeways. GE credit: QL, SE. Effective: 2016 Fall Quarter.

ECI 163—Energy and Environmental Aspects of Transportation (4)
Extensive Writing; Lecture—3 hours. Prerequisite(s): ECN 001A or ECN 001AV or ENG 106 Engineering, economic, and systems planning concepts. Analysis and evaluation of energy, air quality and selected environmental attributes of transportation technologies. Strategies for reducing pollution and petroleum consumption in light of institutional and political constraints. Evaluation of vehicle emission models. (Same course as ESP 163.) GE credit: SE, SL, SS, WE. Effective: 2018 Spring Quarter.

ECI 165—Transportation Policy (3)
Lecture—3 hours. Transportation and associated environmental problems confronting urban areas, and prospective technological and institutional solutions. Draws upon concepts and methods from economics, engineering, political science and environmental studies. GE credit: QL, SE, SS. Effective: 2013 Fall Quarter.

ECI 171—Soil Mechanics (4)
Lecture—4 hours. Prerequisite(s): (ENG 103 (can be concurrent) or ECI 100 (can be concurrent)); ENG 104 C- or better; ECI 171L (can be concurrent); ECI 171L required concurrently. Restricted to Civil Engineering and
Environmental Engineering majors only. Soil formations, mass-volume relationships, soil classification, effective stress, soil-water-void relationships, compaction, seepage, capillarity, compressibility, consolidation, strength, states of stress and failure, lateral earth pressures, and slope stability. GE credit: SE. Effective: 2018 Spring Quarter.

ECI 171L—Soil Mechanics Laboratory (1)
Laboratory—3 hours. Prerequisite(s): ECI 171 (can be concurrent); ECI 171 required concurrently. Laboratory studies utilizing standard testing methods to determine physical, mechanical and hydraulic properties of soil and demonstration of basic principles of soil behavior. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 173—Foundation Design (4)
Lecture—4 hours. Prerequisite(s): ECI 171 Foundation analysis and design, including site characterization, evaluation of shallow and deep foundation alternatives, evaluation of bearing capacity and settlements, design of retaining structures, and case-based design experiences. GE credit: SE. Effective: 2018 Winter Quarter.

ECI 175—Geotechnical Earthquake Engineering (4)
Lecture—4 hours. Prerequisite(s): ECI 171 C- or better Tectonics, faults, site response, and probabilistic ground motion prediction equations. Cyclic loading and liquefaction of soil elements and layers. Empirical procedures and field tests for evaluation of triggering and consequences, of liquefaction. GE credit: SE. Effective: 2017 Fall Quarter.

ECI 179—Pavement Engineering (4)
Discussion/Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ENG 104 C- or better Pavement types (rigid, flexible, unsurfaced, rail), their applications (roads, airfields, ports, rail) and distress mechanisms. Materials, traffic and environment characterization. Empirical and mechanistic-empirical design procedures. Maintenance, rehabilitation and reconstruction; construction quality; asphalt concrete mix design. GE credit: QL, SE, SL, VL. Effective: 2013 Fall Quarter.

ECI 189A—Selected Topics in Civil Engineering; Environmental Engineering (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Environmental Engineering. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 189B—Selected Topics in Civil Engineering; Hydraulics and Hydrologic Engineering (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Hydraulics and Hydrologic Engineering. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 189C—Selected Topics in Civil Engineering; Engineering Planning (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Engineering Planning. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 189D—Selected Topics in Civil Engineering; Geotechnical Engineering (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Geotechnical Engineering. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 189E—Selected Topics in Civil Engineering; Structural Engineering (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Structural Engineering. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 189F—Selected Topics in Civil Engineering; Structural Mechanics (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Structural Mechanics. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 189G—Selected Topics in Civil Engineering; Transportation Engineering (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Transportation Engineering. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 189H—Selected Topics in Civil Engineering; Transportation Planning (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Transportation Planning. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 189I—Selected Topics in Civil Engineering; Water Resources Engineering (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Water Resources Engineering. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 189J—Selected Topics in Civil Engineering; Water Resources Planning (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Water Resources Planning. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.
ECI 190C—Research Group Conferences in Civil and Environmental Engineering (1)
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Upper division standing in Civil and Environmental Engineering. Research group conferences. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

ECI 192—Internship in Engineering (1-5)
Internship. Prerequisite(s): Upper division standing; approval of project prior to the period of the internship. Supervised work experience in civil engineering. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

ECI 193A—Civil and Environmental Engineering Senior Design (4) Review all entries
Laboratory—2 hours; Lecture—2 hours. Prerequisite(s): (ECI 140D C- or better) or (ECI 171 C- or better, ECI 171L C- or better) or (ECI 132 C- or better or ECI 135 C- or better) or (ECI 161 C- or better or ECI 163 C- or better) or (ECI 141 C- or better, ECI 141L C- or better); and Consent of Instructor. And one ECI major depth course with a C- or better. Students must be in their final year of study. Open to seniors in Civil Engineering and Environmental Engineering only; students must be in their final year of study. Culminating design experience for civil engineering and environmental engineering majors. Student teams work closely with faculty, city officials or consulting clients to propose, implement and validate a unique solution to a real-world problem. GE credit: OL, SE, WE. Effective: 2018 Winter Quarter.

ECI 193B—Civil and Environmental Engineering Senior Design (4)
Laboratory—3 hours; Lecture—1 hour. Prerequisite(s): ECI 193A Open to seniors in Civil Engineering and Environmental Engineering only. Culminating design experience for civil engineering and environmental engineering majors. Student teams work closely with faculty, city officials or consulting clients to propose, implement and validate a unique solution to a real-world problem. GE credit: OL, SE, VL, WE. Effective: 2017 Fall Quarter.

ECI 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

ECI 199—Special Study for Advanced Undergraduates (1-5)
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. Special study. (P/NP grading only.) GE credit: SE. Effective: 2016 Fall Quarter.

ECI 201—Introduction to Theory of Elasticity (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ENG 104 Fundamental equations of elasticity in three dimensions; plane stress and plane strain; flexure and torsion of bars of various shapes. Introduction to variational and approximate methods. Effective: 1997 Winter Quarter.

ECI 203—Inelastic Behavior of Solids (3)
Lecture—3 hours. Prerequisite(s): ECI 201 Fundamentals of theories of plasticity, viscoelasticity and viscoplasticity for solids. Macroscopic constitutive modelling for engineering materials, e.g., metals, polymers, soils, etc., and microscopic motivation. Effective: 1997 Winter Quarter.

ECI 205—Continuum Mechanics (3)
Lecture—3 hours. Prerequisite(s): ECI 201 Tensor formulation of the field equations for continuum mechanics, including large deformation effects. Invariance and symmetry requirements. Introduction to nonlinear thermoelasticity and thermodynamics. Solution of three-dimensional problems. Selected topics. Effective: 1998 Winter Quarter.

ECI 206—Fracture Mechanics (4)
Lecture—4 hours. Prerequisite(s): ECI 201; ENG 104 Linear and nonlinear fracture mechanics, stress analysis, energy concepts, brittle fracture criteria, path independent integrals, Dugdale-Barenblatt model, general cohesive zone

ECI 211—Advanced Matrix Structural Analysis (4)
Lecture—4 hours. Prerequisite(s): ECI 131 Analysis of complex frameworks by the displacement method; treatment of tapered beams, curved beams, and beams on elastic foundations; partially rigid connections; geometric and material nonlinearities; buckling; flexibility-based formulations; FEM-software for nonlinear analysis of structures. Effective: 2006 Winter Quarter.

ECI 212A—Finite Element Procedures in Applied Mechanics (4)
Lecture—4 hours. Prerequisite(s): EAD 115 or (MAT 128A, MAT 128B (can be concurrent)) Weighted-residual and Rayleigh-Ritz methods. Weak/variational formulation and development of discrete equations using finite element approximations. Application to one- and two-dimensional problems (heat conduction). Effective: 2003 Winter Quarter.

ECI 212B—Finite Elements: Application to Linear and Non-Linear Structural Mechanics Problems (4)

ECI 213—Analysis of Structures Subjected to Dynamic Loads (4)
Lecture—4 hours. Prerequisite(s): ECI 211 (can be concurrent) Analysis of structures subjected to earthquake, wind and blast loading; distributed, consistent and lumped mass techniques; computer implementation; nonlinear response spectrum; frequency and time domain analysis; seismic protection of structures; numerical methods in linear and nonlinear structural dynamics. Effective: 2003 Winter Quarter.

ECI 214—Probabilistic Seismic Hazard Analysis and Design Ground Motions (4)
Lecture—4 hours. Probabilistic seismic hazard analysis for use in developing design spectra and for seismic risk analyses, including the development of earthquake ground motion time series for use in dynamic analyses of structures. Effective: 2012 Fall Quarter.

ECI 216—Meshfree Methods and Partition of Unity Finite Elements (4)
Lecture—4 hours. Prerequisite(s): ECI 201; ECI 212A Advanced discretization techniques such as meshfree methods and partition of unity finite elements for the Galerkin solution of boundary-value problems in solid and structural mechanics. Application of meshfree and extended finite element methods in computational fracture. Effective: 2016 Winter Quarter.

ECI 221—Theory of Plates and Introduction to Shells (3)

ECI 223—Advanced Dynamics, Signal Processing, and Smart Structures Technology (4)
Lecture—4 hours. Prerequisite(s): ECI 213; Or equivalent. Signal processing and system identification of structures under dynamic excitations; Fourier and Laplace transforms; data acquisition and sensor design fundamentals; sensor technologies/techniques for nondestructive evaluation; structural control; actuators and dampers for smart structures; piezoelectrics and acoustic emissions; micro- and nano-fabrication. Effective: 2011 Winter Quarter.

ECI 232—Advanced Topics in Concrete Structures (4)
Lecture—4 hours. Prerequisite(s): ECI 130; ECI 135; ECI 138; Graduate standing. Ductility of reinforced concrete; strength of two-way slabs; modified compression field theory. Effective: 2001 Fall Quarter.

ECI 233—Advanced Design of Steel Structures (4)
Lecture—4 hours. Prerequisite(s): (ECI 130 or ECI 131); ECI 132 Review of Load and Resistance Factor Design (LRFD); steel-plate girder design; plastic design of indeterminate systems; moment frames and bracing systems; connection design; seismic design of steel structures; vibration of flooring systems; steel-concrete composite design. Effective: 2004 Winter Quarter.

ECI 234—Prestressed Concrete (4)
Lecture—4 hours. Prerequisite(s): ECI 135; (ECI 130 or ECI 131) Survey of methods and applications; prestressing materials and systems; prestress losses; flexural design; design for shear and torsion; deflection computation and control; continuous beams and indeterminate structures; floor systems; partial prestressing; design of compression members; strut-and-tie models. Effective: 2003 Fall Quarter.
ECI 235—Cement Composites (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ENG 104 Applications of cement composites; materials selection and proportioning; component and composite properties; hydration reactions and microstructure development; mechanisms of failure; nondestructive test methods; fiber reinforcement; concrete durability; novel reinforcing materials; ferrocement; repair and retrofit technologies; applications to structural design. Effective: 2002 Fall Quarter.

ECI 236—Design of Fiber Reinforced Polymer Composite Structures (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ECI 135 Basics of mechanics and design of polymer matrix composites: composite classification, manufacturing process, micromechanical property determination, classical lamination theory, strength theories, first-ply-failure, test methods, design practice, strengthening and retrofitting of existing reinforced concrete structures. Effective: 2008 Winter Quarter.

ECI 237—Bridge Design (4)
Lecture—4 hours. Prerequisite(s): ECI 130; ECI 135; ECI 234 recommended. Open to Graduate Students only. Bridge types, behavior and construction characteristics; design philosophy, details according to Caltrans and American Association of State Highway and Transportation Officials codes, principles; seismic design and retrofit of concrete bridges; modern bridges using advanced fiber reinforced polymer composites; fieldtrip required. Effective: 2007 Fall Quarter.

ECI 238—Performance-Based Seismic Engineering (4)

ECI 240—Water Quality (4)
Lecture—4 hours. Prerequisite(s): ECI 141; ECI 142 Quality requirements for beneficial uses of water. Hydrologic cycle of quality. Hydromechanics in relation to quality of surface and groundwaters; transport and fate of waterborne pollutants. Heat budget for surface waters; predictive methods; introduction to water quality modeling. Effective: 2000 Fall Quarter.

ECI 241—Environmental Reactive Chemical Transport Modeling (4)
Lecture—4 hours. Prerequisite(s): CHE 002A or CHE 002B or ECI 149; Or equivalent. Modeling of reactive chemical transport in air and water including kinetic reactions, equilibrium reactions, and phase partitioning. Emphasis on numerical solution schemes and programming techniques to provide deeper insight into model performance and limitations. Effective: 2014 Fall Quarter.

ECI 242—Air Quality (4)
Lecture—4 hours. Prerequisite(s): ENG 105; ECI 141; ECI 149; Or equivalents. Factors determining air quality. Effects of air pollutants. Physical and chemical fundamentals of atmospheric transport and reaction. Introduction to dispersion modeling. Effective: 2002 Fall Quarter.

ECI 243A—Water and Waste Treatment (4) Review all entries
Lecture—4 hours. Prerequisite(s): ECI 148A; Or the equivalent. Characteristics of water and airborne wastes; treatment processes and process kinetics; treatment system design. Effective: 1999 Fall Quarter.

ECI 243A—Water and Waste Treatment (4) Review all entries
Lecture—4 hours. Prerequisite(s): ECI 148A; Or the equivalent. Open to Graduate majors only. Characteristics of water and airborne wastes; treatment processes and process kinetics; treatment system design. Effective: 2019 Spring Quarter.

ECI 243B—Water and Waste Treatment (4) Review all entries
Lecture—4 hours. Prerequisite(s): ECI 243A Continuation of course 243A. Aeration, thickening, biological processes, design of biological treatment systems. Effective: 2000 Winter Quarter.

ECI 243B—Water and Waste Treatment (4) Review all entries
Lecture—4 hours. Prerequisite(s): ECI 243A Open to graduate majors only. Continuation of course 243A. Aeration, thickening, biological processes, design of biological treatment systems. Effective: 2019 Spring Quarter.

ECI 243L—Pilot Plant Laboratory (4) Review all entries
Discussion—1 hour; Laboratory—6 hours; Lecture—1 hour. Prerequisite(s): ECI 243A; ECI 243B (can be concurrent); or Consent of Instructor. Graduate standing. Laboratory investigation of physical, chemical, and biological processes for water and wastewater treatment. Effective: 2016 Winter Quarter.
ECI 243L—Pilot Plant Laboratory (4) **Review all entries**
Discussion—1 hour; Laboratory—6 hours; Lecture—1 hour. Prerequisite(s): ECI 243A; ECI 243B (can be concurrent); or Consent of Instructor. Graduate standing. Open to graduate majors only. Laboratory investigation of physical, chemical, and biological processes for water and wastewater treatment. Effective: 2019 Spring Quarter.

ECI 244—Life Cycle Assessment for Sustainable Engineering (4) **Review all entries**
Lecture—4 hours. Prerequisite(s): Graduate standing. Life cycle assessment methodology is taught emphasizing applications to infrastructure and energy systems. Life cycle design, life cycle cost methods, other tools from industrial ecology, and links to policy are covered as well. Effective: 2011 Fall Quarter.

ECI 244—Life Cycle Assessment for Sustainable Engineering (4) **Review all entries Discontinued**
Lecture—4 hours. Prerequisite(s): Graduate standing. Life cycle assessment methodology is taught emphasizing applications to infrastructure and energy systems. Life cycle design, life cycle cost methods, other tools from industrial ecology, and links to policy are covered as well. Effective: 2019 Winter Quarter.

ECI 244A—Life Cycle Assessment for Sustainable Engineering (4)
Lecture—4 hours. Enrollment restricted to graduate students. Life cycle assessment methodology. Emphasis on applications to infrastructure and energy systems. Life cycle design, life cycle cost methods, other tools from industrial ecology, and links to policy. Not open to students who have taken ECI 244. (Same course as EGG 201.) Effective: 2019 Winter Quarter.

ECI 245A—Applied Environmental Chemistry: Inorganic (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ENG 105; ECI 140; CHE 002B; Or the equivalent of CHE 002B; CHE 002C or CHE 107A recommended. Chemistry of natural and polluted waters. Topics include chemical, kinetic and equilibrium principles, redox reactions, gas solution and solid-solution equilibria, thermodynamics, carbonate systems, coordination chemistry, interfacial phenomena. Effective: 2000 Spring Quarter.

ECI 245B—Applied Environmental Chemistry: Organic (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): CHE 128A; CHE 128B; CHE 128C; Or the equivalent; CHE 002C or CHE 107A recommended. Transport and transformation of organic chemicals in the environment. Topics include application of thermodynamics to predict solubility and activity coefficients; distribution of organic chemicals between the aqueous phase and air, solvent, or solid phases; chemical, photochemical and biological transformation reactions. Effective: 2001 Spring Quarter.

ECI 246N—Understanding Climate Change: Causes and Consequences (4)
Lecture—4 hours. Open to graduate students. Diverse physical processes that govern climate and drive climate change. Observational, experimental and modeling techniques and methods used in the development of our scientific understanding of the Earth system. Effective: 2016 Spring Quarter.

ECI 247—Aerosols (4)
Lecture—4 hours. Prerequisite(s): ENG 103; ENG 105; ECI 141; ECI 149 Behavior of airborne particles including particle formation, modification, and removal processes. Effective: 2002 Fall Quarter.

ECI 247L—Aerosols Laboratory (4)
Laboratory—6 hours; Lecture—2 hours. Prerequisite(s): ECI 247 Methods of generation and characterization of aerosols. Detailed topics may include flow rate measurement, aerosol generation, aerosol collection, ions measurement, metals measurement, and carbon measurement. May be repeated up to 1 time(s). Effective: 2002 Fall Quarter.

ECI 248—Biofilm Processes (4)
Lecture—4 hours. Prerequisite(s): SSC 111 or SSC 211 or ECI 243B; or Consent of Instructor. Calculus and basic cell molecular biology are recommended. Natural and engineered biofilms, including biofilm occurrence and development, spatial structure, microbial processes, fundamental and applied research tools, biofilm reactors, beneficial uses, and detrimental effects. Effective: 2004 Spring Quarter.

ECI 249—Probabilistic Design and Optimization (4)
Lecture—4 hours. Prerequisite(s): ECI 114; ECI 153; ENG 106; Or equivalents. Design by optimization for probabilistic systems, decision theory, the value of information, probabilistic linear programming, probabilistic dynamic programming, nonlinear probabilistic optimization. Applications in civil engineering design, project evaluation, and risk management. Effective: 2006 Winter Quarter.

ECI 250—Civil Infrastructure System Optimization and Identification (4)
Lecture—4 hours. Prerequisite(s): MAT 021C; MAT 022A; Programming course; EAD 115 and mathematical modeling course recommended. Restricted to graduate standing. Applied mathematics with a focus on modeling, identifying,
and controlling dynamic, stochastic, and underdetermined systems. Applications in transportation networks, water resource planning, and other civil infrastructure systems. Effective: 2005 Spring Quarter.

**ECI 251—Transportation Demand Analysis (4)**

**ECI 252—Sustainable Transportation Technology and Policy (3) Review all entries**
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): ECI 165 Role of technical fixes and demand management in creating a sustainable transportation system. Emphasis on technology options, including alternative fuels, electric propulsion, and IVHS. Analysis of market demand and travel behavior, environmental impacts, economics and politics. (Same course as ESP 252.) Effective: 2000 Fall Quarter.

**ECI 252—Sustainable Transportation Technology and Policy (3) Review all entries Discontinued**
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): ECI 165 Role of technical fixes and demand management in creating a sustainable transportation system. Emphasis on technology options, including alternative fuels, electric propulsion, and IVHS. Analysis of market demand and travel behavior, environmental impacts, economics and politics. (Same course as ESP 252.) Effective: 2018 Fall Quarter.

**ECI 253—Dynamic Programming and Multistage Decision Processes (4)**
Lecture—4 hours. Prerequisite(s): MAT 021C; MAT 022A; Programming course; EAD 115 recommended. Operations research. Optimization techniques with a focus on dynamic programming in treating deterministic, stochastic, and adaptive multistage decision processes. Brief review of linear programming and non-linear programming. Applications in transportation networks and other civil infrastructure systems. Effective: 2005 Spring Quarter.

**ECI 254—Exploring Data from Built Environment Using R (4)**
Laboratory—3 hours; Lecture—3 hours. Introduction to modern data science, specifically data acquisition, exploratory data analysis, visualization, and beginning data analysis using R. Emphasizes computational reasoning and working with tabular and non-standard data. Focus will be on data generated in the built environment. (Same course as GEO 279.) Effective: 2017 Fall Quarter.

**ECI 256—Urban Traffic Management and Control (4)**
Lecture—4 hours. Prerequisite(s): ECI 114 Basic concepts, models, and methods related to the branch of traffic science that deals with the movement of vehicles on a road network, including travel speed, travel time, congestion concepts, car-following and hydrodynamic traffic models. Effective: 2000 Fall Quarter.

**ECI 257—Flow in Transportation Networks (4)**
Lecture—4 hours. Prerequisite(s): ECI 153; ECI 161 or ECI 256 recommended. Elements of graph theory, a survey of pertinent optimization techniques, extremal principles in network flow problems, deterministic equilibrium assignment, stochastic equilibrium assignment, extensions of equilibrium assignments and dynamic transportation network assignment. Effective: 2000 Winter Quarter.

**ECI 259—Asphalt and Asphalt Mixes (4)**
Lecture—4 hours. Prerequisite(s): ECI 179; or Consent of Instructor. Asphalts and asphalt mix types and their use in civil engineering structures, with primary emphasis on pavements. Asphalt, aggregate properties and effects on mix properties. Design, construction, recycling. Recent developments and research. Effective: 2006 Winter Quarter.

**ECI 260—Sediment Transport (4)**
Lecture—4 hours. Prerequisite(s): ECI 141; Or equivalent. Sediment transport in hydrologic systems. Process-oriented course which will emphasize how sediment moves and the physical processes that affect sediment transport. Field trip. Effective: 2006 Winter Quarter.

**ECI 261—Cohesive Particle Transportation (3) Review all entries Discontinued**

**ECI 261—Colloids in Soil and Water (4) Review all entries**
Lecture—4 hours. Prerequisite(s): CHE 002B; (ENG 103 or ECI 100); Upper division or graduate standing. Pass One restricted to graduate standing; Pass Two restricted to upper division standing or graduate standing. Colloid occurrence, properties, behavior in different environments, and transport mechanisms in water and soils. Emphasis on their role in water contamination. Effective: 2018 Fall Quarter.
ECI 264A—Transport, Mixing and Water Quality in River and Lakes (4)
Lecture—4 hours. Prerequisite(s): ECI 141; ECI 240 Principal causes of mixing and transport in rivers, lakes and reservoirs, and their impacts on water quality. Case studies of specific lakes and rivers. Effective: 2000 Fall Quarter.

ECI 264B—Transport, Mixing and Water Quality in Estuaries and Wetlands (4)
Lecture—4 hours. Prerequisite(s): ECI 141; ECI 240 Principal causes of mixing and transport in estuaries and wetlands, and their impacts on water quality. Topics include advection/diffusion; tides; transverse mixing; longitudinal dispersion; sediment transport; nutrient cycling; computer modeling of estuaries. Case studies of specific systems. Effective: 2000 Spring Quarter.

ECI 265—Stochastic Hydrology and Hydraulics (4)
Lecture—4 hours. Prerequisite(s): ECI 266; or Consent of Instructor. Physics-based stochastic methods in modeling hydrologic and hydraulic processes; theory for modeling hydrologic-hydraulic governing equations as stochastic partial differential equations applied to various hydrologic-hydraulic processes under uncertainty, including transport, open channel flow, overland flow, soil water flow, and groundwater. Effective: 2015 Winter Quarter.

ECI 266—Applied Stochastic Methods in Engineering (4)
Lecture—4 hours. Prerequisite(s): ECI 114 or MAT 131 or STA 130A or STA 131A or MAT 118A (can be concurrent) Stochastic processes classification; Gaussian random fields; stochastic calculus in mean square; Ito and Stratonovich stochastic differential equations; Fokker-Planck equation; stochastic differential equations with random coefficients. Effective: 1999 Fall Quarter.

ECI 267—Water Resource Management (3)
Lecture—3 hours. Prerequisite(s): ECI 114; ECI 141; ECI 142; ECI 153 recommended. Engineering, institutional, economic, and social basis for managing local and regional water resources. Examples in the context of California's water development and management. Uses of computer modeling to improve water management. (Same course as GEO 212.) Effective: 2013 Fall Quarter.

ECI 268—Infrastructure Economics (3)
Lecture—3 hours. Prerequisite(s): (ECN 001A or ECN 001AV); ENG 106; Or the equivalent. Economics applied to infrastructure engineering planning, operations, maintenance, and management problems; microeconomic and macroeconomic theories; benefit-cost analysis; effect of uncertainty; optimization economics; non-classical economics; public finance. Effective: 2018 Spring Quarter.

ECI 269—Transportation-Air Quality: Theory and Practice (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ECI 149; Or the equivalent. Health and regulatory aspects of airborne pollutants. Principles of modeling vehicle emissions. Conformity issues and the regulatory framework. Regional and micro-scale modeling. Effective: 1999 Fall Quarter.

ECI 270—Advanced Water Resources Management (3)
Lecture—3 hours. Prerequisite(s): ECI 153; ECI 267; Or the equivalent. Discussion of technical papers related to planning theory, system maintenance, regionalization, multi-objective methods, risk analysis, institutional issues, pricing model application, economic development, forecasting, operations, and other topics. Effective: 1997 Winter Quarter.

ECI 271—Inverse Problems (4)
Lecture—4 hours. Prerequisite(s): ECI 114; ECI 144; Or equivalents. Inverse calibration of distributed parameter models, using data representing model outputs. Forward and inverse mappings, stability, uniqueness, identifiability. Optimization formulation of inverse problems, maximum likelihood and other objective functions, indirect and direct approaches, solution by UCODE in hands-on project format. Effective: 2010 Fall Quarter.

ECI 272A—Advanced Hydrogeology (4)

ECI 272B—Advanced Hydrogeology (4)
ECI 272C—Multiphase Reactive Transport (4)
Lecture—4 hours. Prerequisite(s): ECI 142; ECI 144; ECI 148A Multicomponent reactive transport including multiple phases. Advective/dispersive transport, chemical equilibria, and mass transformation kinetics. Natural chemical/microbiological processes including sorption, complexation, biodegradation, and diffusive mass transfer. Eulerian and Lagrangean averaging methods. Applications to contaminant remediation problems in river and subsurface hydrology. Effective: 2004 Fall Quarter.

ECI 273—Water Resources Systems Engineering (4)
Lecture—4 hours. Prerequisite(s): ECI 114; ECI 153; Or the equivalent. Planning and management of water resource systems. Deterministic and stochastic simulation and optimization techniques. Capacity design and operation of reservoir systems for water supply, hydropower, flood control, and environmental objectives. Effective: 2018 Winter Quarter.

ECI 275—Hydrologic Time-Series Analysis (4)
Lecture—4 hours. Prerequisite(s): ECI 114; ECI 142 Application of statistical methods for analysis and modeling of hydrologic series. Statistical simulation and prediction of hydrologic sequences using time series methodology. Effective: 2003 Fall Quarter.

ECI 276—Watershed Hydrology (4)

ECI 277A—Computational River Mechanics I (4)
Lecture—4 hours. Prerequisite(s): EAD 115 (can be concurrent); ECI 141 (can be concurrent) Unsteady open channel flows, computation of water surface profiles, shallow water equations, St. Venant equations, method of characteristics, finite difference methods, stability and accuracy of explicit and implicit schemes, flood routing in simple and compound channels, advection of plumes. Not open for credit to students who have taken ECI 277. Effective: 2004 Fall Quarter.

ECI 277B—Computational River Mechanics II (4)
Lecture—4 hours. Prerequisite(s): ECI 277A Open channel flows, physical aspects of river mechanics, formulation of depth-averaged equations, boundary conditions, coordinates transformation and grid generation, finite-difference solution techniques, applications to two-dimensional momentum and pollutant transport in rivers. Effective: 2004 Fall Quarter.

ECI 277C—Turbulence and Mixing Processes (4)
Lecture—4 hours. Prerequisite(s): Graduate standing. Nature of turbulent flows, conservation equations, momentum, heat and mass transport in free and wall-bounded flows, body forces and mixing, roughness effects, turbulence modeling and simulation. Effective: 2004 Fall Quarter.

ECI 278—Hydrodynamics (3)

ECI 279—Advanced Mechanics of Fluids (4)

ECI 280A—Nonlinear Finite Elements for Elastic-Plastic Problems (4)
Lecture—4 hours. Prerequisite(s): Consent of Instructor. State of the art finite element methods and tools for elastic-plastic problems, including computational techniques based on the finite element method and the theory of elastoplasticity. Effective: 2008 Spring Quarter.

ECI 280B—Nonlinear Dynamic Finite Elements (4)
Lecture—4 hours. Prerequisite(s): Consent of Instructor. State of the art computational methods and tools for analyzing linear and nonlinear dynamics problems. Effective: 2009 Spring Quarter.

ECI 281A—Advanced Soil Mechanics (4)
Lecture—4 hours. Prerequisite(s): ECI 171 Consolidation and secondary compression. Preloading and wick drains.

ECI 281B—Advanced Soil Mechanics (5)
Laboratory—3 hours; Lecture—4 hours. Prerequisite(s): ECI 281A Site investigation and soil characterization within the context of slope stability analysis. Effective: 2014 Spring Quarter.

ECI 282—Pavement Design and Rehabilitation (4)
Lecture—4 hours. Prerequisite(s): ECI 179; or Consent of Instructor. Advanced pavement design and structural/functional condition evaluation for concrete and asphalt pavements. Highways, airfields, port facilities; new facilities, rehabilitation, reconstruction. Mechanistic-empirical procedures, materials, climate and traffic characterization. Use of current design methods; recent developments and research. Effective: 2004 Winter Quarter.

ECI 283—Physico-Chemical Aspects of Soil Behavior (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ECI 171 Study of the geotechnical behavior of soils considering formation, transport, mineralogy, soil-fluid-electrolyte systems, surface tension, particle mechanics, shape, fabric, and structure. Laboratories demonstrate effects of fundamental interparticle forces (contact, Van Der Waals, capillarity and chemical). Effective: 2012 Fall Quarter.

ECI 284—Theoretical Geomechanics (4)

ECI 286—Advanced Foundation Design (4)
Lecture—4 hours. Prerequisite(s): ECI 173 Design and analysis of pile and pier foundations, including seismic effects; deep excavation systems; tie-back, nailing, and anchor systems; coffer dams; loads on buried conduits; ground modification techniques; and other related topics. Effective: 2004 Spring Quarter.

ECI 287—Geotechnical Earthquake Engineering (4)
Lecture—4 hours. Prerequisite(s): ECI 138; ECI 281A Characteristics and estimation of earthquake ground motions; wave propagation and local site response; liquefaction potential and remediation; residual strength and stability considerations; ground deformations; dynamic soil-structure interaction. Effective: 2004 Spring Quarter.

ECI 288—Earth and Rockfill Dams (4)
Lecture—4 hours. Prerequisite(s): ECI 281A; ECI 281B (can be concurrent) Site selection; design considerations; layout; seismic effects including considerations of fault movements; construction; environmental considerations, instrumentation; maintenance remediation and retrofit of existing dams. Effective: 2004 Winter Quarter.

ECI 289A—Selected Topics in Civil Engineering; Environmental Engineering (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Environmental Engineering. May be repeated for credit. Effective: 1997 Winter Quarter.

ECI 289B—Selected Topics in Civil Engineering; Hydraulics and Hydrologic Engineering (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Hydraulics and Hydrologic Engineering. May be repeated for credit. Effective: 1997 Winter Quarter.

ECI 289C—Selected Topics in Civil Engineering; Engineering Planning (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Engineering Planning. May be repeated for credit. Effective: 1997 Winter Quarter.

ECI 289D—Selected Topics in Civil Engineering; Geotechnical Engineering (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Geotechnical Engineering. May be repeated for credit. Effective: 1997 Winter Quarter.

ECI 289E—Selected Topics in Civil Engineering; Structural Engineering (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Structural Engineering. May be repeated for credit. Effective: 1997 Winter Quarter.

ECI 289F—Selected Topics in Civil Engineering; Structural Mechanics (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Structural Mechanics. May be repeated for credit. Effective: 1997 Winter Quarter.
ECI 289G—Selected Topics in Civil Engineering; Transportation Engineering (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Transportation Engineering. May be repeated for credit. Effective: 1997 Winter Quarter.

ECI 289H—Selected Topics in Civil Engineering; Transportation Planning (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Transportation Planning. May be repeated for credit. Effective: 1997 Winter Quarter.

ECI 289I—Selected Topics in Civil Engineering; Water Resources Engineering (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Directed group study in Water Resources Engineering. May be repeated for credit. Effective: 1997 Winter Quarter.

ECI 290—Seminar (1)
Seminar—1 hour. Discussion of current graduate research, and guest lectures on recent advances. Oral presentation of individual study. Course required of graduate degree candidates. (S/U grading only.) Effective: 1997 Winter Quarter.

ECI 290C—Graduate Research Group Conference (1)
Discussion—1 hour. Research problems, progress, and techniques in civil engineering. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

ECI 296—Topics in Water and Environmental Engineering (1)
Seminar—2 hours. Seminars presented by visiting lecturers, UC Davis faculty and, graduate students. May be repeated for credit. (S/U grading only.) Effective: 2000 Winter Quarter.

ECI 298—Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

ECI 299—Research (1-12)
Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

ECI 390—The Teaching of Civil Engineering (1)
Discussion—1 hour. Prerequisite(s): Meet qualifications for teaching assistant and/or associate-in in Civil Engineering. Participation as teaching assistant or associate-in in a designated engineering course. Methods of leading discussion groups or laboratory sections, writing and grading quizzes, use of laboratory equipment, and grading laboratory reports. May be repeated up to 9 unit(s). (S/U grading only.) Effective: 1997 Winter Quarter.

Civil Engineering; Engineering

Civil Engineering; Engineering | Civil Engineering B.S.

(College of Engineering)

Amit M. Kanvinde, Ph.D., Chairperson of the Department; 530-754-9471

Department Office. 2001 Ghausi Hall; 530-752-0586; http://cee.engr.ucdavis.edu

Faculty. http://cee.engr.ucdavis.edu/people/faculty-directory/

The civil engineering profession is responsible for designing, building, operating and maintaining the physical infrastructure and protecting the natural environment that together support human society in an economically and environmentally sustainable manner. The need to predict and mitigate the impact of complex human- and nature-induced stresses on large-scale, geographically-distributed systems has never been more evident than now. These challenges and inevitable societal changes result in a need to develop and adopt new technologies and improved efficiency into the infrastructure.

The Civil Engineering program is accredited by the Engineering Accreditation Commission of ABET; see http://www.abet.org.

Students are encouraged to adhere carefully to all prerequisite requirements. The instructor is authorized to drop students from a course for which stated prerequisites have not been completed. Exclusive of General Education units, the minimum number of units required for the Civil Engineering major is 152 (73 units in lower division and 79-85 units in upper division).

Areas of Specialization
Environmental Engineering. This area focuses on understanding and management of physical, chemical, and biological processes in natural and engineered systems. Areas of emphasis include improvement of air, land, and water quality in the face of increasing population, expanding industrialization, and global climate change. Examples of environmental engineering include innovative analysis and design of air, water, wastewater, and solid waste treatment systems; mathematical modeling of natural and engineered systems; life cycle analysis; sampling, analysis, transport and transformation of natural and anthropogenic pollutants; and modeling of air pollutant emissions.

Geotechnical Engineering. This area encompasses civil infrastructure and environmental problems that require the characterization and utilization of geologic materials (soils and rocks) to develop engineered solutions. This includes, but is not limited to, foundations for buildings and bridges, earthwork (e.g. dams, tunnels, highways), earthquake hazards (e.g. ground motions, liquefaction, soil-structure interaction), and geo-environmental problems (ground water flow, subsurface contaminant transport and remediation).

Suggested Advisors. R.W. Boulanger, Y.F. Dafalias, J.T. DeJong, J.T. Harvey, B. Jeremic, B.L. Kutter, P.C. Lucia, A. Martinez, K. Ziotopoulou

Structural Engineering and Structural Mechanics. Structural Engineering addresses the conception, design, analysis, construction, and modeling of all types of civil infrastructure, including buildings, bridges, dams, ports, highways, and industrial facilities subject to loadings ranging from gravity and earthquakes, to extreme environmental events, with consideration of optimal and sustainable outcomes over the entire life-cycle. Structural Mechanics encompasses the theory of solid structures, and the associated methods of analysis and computation used in the practice of Structural Engineering. For both disciplines, materials of particular interest include steel, concrete, timber, advanced composites and particulate media.

Transportation Planning and Engineering. This area deals with the movement of people and goods in a manner consistent with society's environmental and socio-economic goals. Transportation engineering applies engineering, physical and mathematical sciences, economics, and behavioral social science principles to plan, analyze, design, and operate resilient and sustainable transportation systems, such as highways, transit, airfields and ports. Transportation planning involves the formulation and analysis of transportation policy, program, and project alternatives. Societal goals, budgetary constraints, socio-economic (such as safety, equity and mobility) and environmental (such as air and water quality, climate change, and clean energy) objectives, and technological feasibilities (such as vehicle, infrastructure, and information technologies) are considered.

Water Resources Engineering. This area includes hydrology, hydraulics, fluid mechanics, and water resources systems planning and design. Hydrology deals with quantifying and understanding all aspects of the hydrologic cycle, including the relationships between precipitation, runoff, groundwater, and surface water. Water quality and contaminant transport issues are linked to hydrologic conditions. Hydraulics and fluid mechanics deal with flows in pipes, open-channel water-distribution systems, and natural systems, such as lakes and estuaries. Water resources systems planning and design deals with the comprehensive development of water resources to meet the multiple needs of industry, agriculture, municipalities, recreation, and other activities.

Additional information on areas of specialization and potential faculty advisors can be obtained from the departmental website.

Units: 79-85
ENG 105  Thermodynamics  4
ECI 114  Probabilistic Systems Analysis for Civil Engineers  4

Choose one:  4
ECI 115  Computer Methods in Civil & Environmental Engineering  4
ECI 153  Deterministic Optimization and Design  4
MAT 118A  Partial Differential Equations: Elementary Methods  4
STA 108  Applied Statistical Methods: Regression Analysis  4

Civil & Environmental Engineering Breadth  15-17
Choose one course from four of the following group options:

Environment:
ECI 140A  Environmental Analysis of Aqueous Systems  4
OR
ECI 140B  Chemical Principles for Environmental Engineers  4
OR
ECI 148A  Water Quality Management  4
OR
ECI 149  Air Pollution  4

Geotechnical:
ECI 171  Soil Mechanics  4
ECI 171L  Soil Mechanics Laboratory  1

Structures:
ECI 130  Structural Analysis  4

Transportation:
ECI 161  Transportation System Operations  4
OR
ECI 163  Energy and Environmental Aspects of Transportation  4
OR
ECI 165  Transportation Policy  3

Water Resources:
ECI 141  Engineering Hydraulics  3
ECI 141L  Engineering Hydraulics Laboratory  1

Civil & Environmental Engineering Depth  16
Choose two courses from two of the following group options selected from Civil and Environmental Engineering Breadth:

Environment:
ECI 140B  Chemical Principles for Environmental Engineers  4
ECI 140C  Biological Principles for Environmental Engineering  4
ECI 140D  Water & Wastewater Treatment System Design  4
ECI 149  Air Pollution  4
ECI 150  Air Pollution Control System Design  4

Geotechnical:
ECI 173  Foundation Design  4
ECI 175  Geotechnical Earthquake Engineering  4
ECI 179  Pavement Engineering  4

Structures:
ECI 131  Matrix Structural Analysis  4
ECI 132  Structural Design: Metallic Elements  4
ECI 135  Structural Design: Concrete Elements  4
ECI 136  Building Design  4

Transportation:
ECI 153  Deterministic Optimization and Design  4
ECI 161  Transportation System Operations  4
ECI 179  Pavement Engineering  4
Water Resources:

ECI 142  Engineering Hydrology  4
ECI 144  Groundwater Systems Design  4
ECI 145  Hydraulic Structure Design  4
ECI 146  Water Resources Simulation  4
ECI 155  Water Resources Engineering Planning  4

Civil & Environmental Engineering Electives

Civil & Environmental Engineering electives may include any upper division, letter-graded Civil & Environmental Engineering courses (i.e. not already used towards the ECI breadth, ECI depth and math analysis requirements) and may include ENG 102 or 105. If both ENG 102 and 105 are completed 4 units will be considered towards the ECI electives. Also can include, but not exceed, a combination of six units from ECI 198 and 199. A maximum of four units of upper-division courses outside of Civil & Environmental Engineering may be considered on a petition basis. Please consult with the undergraduate staff advisor. If ECI 3 was not completed 20 units of electives are required.

ECI 193A  Civil and Environmental Engineering Senior Design  4
ECI 193B  Civil and Environmental Engineering Senior Design  4

Upper Division Composition Requirement

Choose one: a grade of C- or better is required:

UWP 101  Advanced Composition  4
UWP 102E  Writing in the Disciplines: Engineering  4
UWP 102G  Writing in the Disciplines: Environmental Writing  4
UWP 104A  Writing in the Professions: Business Writing  4
UWP 104E  Writing in the Professions: Science  4
UWP 104T  Writing in the Professions: Technical Writing  4
Passing the Upper Division Composition Exam.  0

* Must also take ECI 171L
** Must also take ECI 141L

Total: 152-158

Civil Engineering; Engineering | ECI Courses

Courses in ECI:

ECI 003—Civil Infrastructure and Society (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): MAT 021A (can be concurrent) Pass One restricted to lower division students; Civil Engineering majors. Introduction to civil infrastructure and its relationship with society and the natural environment. Exposure to innovative research on civil engineering and environmental systems. Participation in laboratory experiments illustrative of the solution of representative but simplified engineering problems. Not open for credit to upper division students. GE credit: OL, SE, SS. Effective: 2016 Winter Quarter.

ECI 016—Spatial Data Analysis (2)
Laboratory—3 hours; Lecture—1 hour. Restricted to Civil Engineering and Biological Systems Engineering majors; non-majors accommodated on a space-available basis. Computer-aided design and geographic information systems in civil engineering practice. GE credit: QL, SE. Effective: 2010 Spring Quarter.

ECI 019—C Programming for Civil and Environmental Engineers (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): MAT 021A (can be concurrent) Pass One open to Civil Engineering majors and Optical Science and Engineering majors. Computational problem solving techniques for Civil and Environmental Engineering applications using structured C programming. Algorithm design applied to realistic problems. GE credit: SE. Effective: 2011 Winter Quarter.

ECI 040—Introduction to Environmental Engineering (4)
Lecture—4 hours. Prerequisite(s): CHE 002B Pass One open to students in the College of Engineering. Introduction to topics in environmental engineering; discussion on influence of literary work, art, and media on the evolution of
environmental engineering practice, relevant laws, and regulations; presentations of historical case studies. GE credit: AH. Effective: 2017 Winter Quarter.

ECI 090X—Lower Division Seminar (1-4)
Seminar—1-4 hours. Prerequisite(s): Consent of Instructor. Examination of a special topic in a small group setting. May be repeated for credit. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 092—Internship for Engineering (1-5)
Internship. Prerequisite(s): Lower division standing; approval of project prior to period of internship. Supervised work experience in civil engineering. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

ECI 098—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Lower division standing. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

ECI 099—Special Study for Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. Lower division standing. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

ECI 100—Introduction to Fluid Mechanics for Civil and Environmental Engineers (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ENG 035 C- or better; MAT 022B C- or better; PHY 009B C- or better Pass One restricted to Civil Engineering, Environmental Engineering and Hydrology majors. Fluid flow in civil & environmental engineering, basis for design, buoyancy, hydrostatics, gravity dams, hydraulic modeling: similarity & scaling, conservation laws, flow in bends, nozzles, pipes, pumps, turbines, complimentary lab experiments. Not open for credit to students who have taken ENG 103. GE credit: SE. Effective: 2017 Fall Quarter.

ECI 114—Probabilistic Systems Analysis for Civil Engineers (4)
Lecture—4 hours. Prerequisite(s): MAT 021C C- or better Probabilistic concepts and models in engineering. Statistical analysis of engineering experimental and field data. Introduction to stochastic processes and models of engineering systems. Not open for credit to students who have completed STA 120. GE credit: QL, SE. Effective: 2017 Fall Quarter.

ECI 115—Computer Methods in Civil & Environmental Engineering (4) Review all entries
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): (ENG 006 or ECS 030); MAT 022B Open to Civil Engineering majors only. Presentation, implementation and application of numerical algorithms and computer models for the solution of practical problems in Civil and Environmental Engineering. GE credit: SE. Effective: 2013 Fall Quarter.

ECI 115—Computer Methods in Civil & Environmental Engineering (4) Review all entries
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): (ENG 006 C- or better or ECS 030 C- or better or ECS 032A C- or better); MAT 022B C- or better Open to Civil Engineering majors only. Presentation, implementation and application of numerical algorithms and computer models for the solution of practical problems in Civil and Environmental Engineering. GE credit: SE. Effective: 2020 Winter Quarter.

ECI 119—Parallel Processing for Engineering Applications. (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): C programming or consent of instructor. Fundamental skills in parallel computing for engineering applications; emphasis on structured parallel programming for distributed memory parallel clusters. No credit allowed for students who have taken ECI 119B. GE credit: SE. Effective: 2005 Spring Quarter.

ECI 123—Urban Systems and Sustainability (4)
Lecture—4 hours. Prerequisite(s): Upper division standing. Systems-level approach of how to evaluate and then modify sustainability of urban systems based on interaction with natural environments. Topics include: definition/metrics of urban sustainability; system analyses of urban systems; enabling technology, policies, legislation; measures and modification of ecological footprints. GE credit: ACGH, DD, SE, SL, SS, WE. Effective: 2006 Fall Quarter.

ECI 125—Building Energy Performance (4)
Lecture—4 hours. Prerequisite(s): Upper division standing in Engineering. Open to students in the College of Engineering. Mechanisms of energy consumption in buildings including end uses, thermal loads, ventilation, air infiltration, thermal energy distribution, and HVAC systems; energy performance simulation; methods and strategies of energy efficiency. GE credit: SE. Effective: 2011 Winter Quarter.
ECI 130—Structural Analysis (4)
Lecture—4 hours. Prerequisite(s): ENG 104 C- or better; MAT 022A Open to Civil Engineering majors. Elastic structural analysis of determinate and indeterminate trusses, beams and frames. Plastic bending and limit analysis. GE credit: QL, SE. Effective: 2014 Winter Quarter.

ECI 131—Matrix Structural Analysis (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ENG 104 C- or better; ENG 006 Open to Engineering majors only. Matrix formulation and computer analysis of statically indeterminate structures. Stiffness and flexibility formulations for elastic structures. Finite element methods for elasticity and bending problems. GE credit: SE. Effective: 2013 Fall Quarter.

ECI 132—Structural Design: Metallic Elements (4) Review all entries
Lecture—4 hours. Prerequisite(s): ECI 130 Design of metallic beams, columns, and other members for various types of loading and boundary conditions; design of connections between members; member performance within structural systems. GE credit: SE, VL. Effective: 2019 Winter Quarter.

ECI 135—Structural Design: Concrete Elements (4) Review all entries
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ECI 130 Restricted to Civil Engineering, Civil Engineering/Materials Science and Engineering, and Materials Science and Engineering majors only. Strength design procedures for columns, rectangular beams, T-beams and beams of general cross-section. Building code requirements for bending, shear, axial load, combined stresses and bond. Introduction to prestressed concrete. GE credit: QL, SE. Effective: 2013 Fall Quarter.

ECI 136—Building Design (4) Review all entries
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): (ECI 130 or ECI 131); (ECI 135 or ECI 132) Design of a building structure for a specific need under the multiple constraints of safety, serviceability, cost and aesthetics. GE credit: SE. Effective: 2017 Fall Quarter.

ECI 137—Construction Principles and Project Management (4)
Laboratory—3 hours; Lecture—3 hours. Restricted to upper division standing in Engineering. Project management, with civil engineering construction and design applications, including project scope, schedule, resources, cost, quality, risk, and control. Construction industry overview. Interactions between planning, design, construction, operations. Construction operations analysis. Contract issues. Project management software, field trips, guest lectures. GE credit: ACGH, OL, QL, SE, SS, VL, WE. Effective: 2013 Fall Quarter.

ECI 138—Earthquake Loads on Structures (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECI 130 or ECI 131 Determination of loads on structures due to earthquakes. Methods of estimating equivalent static lateral forces; response spectrum and time history analysis. Concepts of mass, damping and stiffness for typical structures. Design for inelastic behavior. Numerical solutions and Code requirements. GE credit: SE. Effective: 2013 Fall Quarter.

ECI 138—Earthquake Loads on Structures (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECI 130 C- or better or ECI 131 C- or better Determination of loads on structures due to earthquakes. Methods of estimating equivalent static lateral forces; response spectrum and time history analysis. Concepts of mass, damping and stiffness for typical structures. Design for inelastic behavior. Numerical solutions and Code requirements. GE credit: SE. Effective: 2019 Winter Quarter.
ECI 139—Advanced Structural Mechanics (4)
Lecture—4 hours. Prerequisite(s): ENG 104 C- or better Review of stress, strain, equilibrium, compatibility, and elastic material behavior. Plane stress and plane strain problems in elasticity; energy methods. Theories for unsymmetric bending, straight and curved beams. Beams on elastic foundations; stresses in plates and shells; elastic stability. GE credit: QL, SE. Effective: 2013 Fall Quarter.

ECI 140A—Environmental Analysis of Aqueous Systems (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): CHE 002B C- or better Pass One restricted to Environmental Engineering majors. Introduction to "wet chemical" and instrumental techniques commonly used in the examination of water and wastewater and associated data analysis. Not open for credit to students who have taken ECH 140 or CHE 100. GE credit: SE. Effective: 2020 Winter Quarter.

ECI 140B—Chemical Principles for Environmental Engineers (4)
Lecture—4 hours. Prerequisite(s): CHE 002B C- or better Aqueous chemistry; equilibrium relationships; carbonate system; thermodynamics; kinetics & rate laws; precipitation, adsorption, & volatilization phenomenon; oxidation & reduction reactions; pH, pE and predominance diagrams; organic chemicals. Not open for credit to students who have taken ECI 140. GE credit: SE. Effective: 2017 Fall Quarter.

ECI 140C—Biological Principles for Environmental Engineering (4)
Lecture—4 hours. Prerequisite(s): ECI 140A C- or better or ECI 140B C- or better Fundamental microbiology concepts for environmental engineers; provides background needed for the application of water and wastewater treatment, bioremediation, air pollution control and biotransformations in environmental engineered systems. Only two units of credit for students who have taken MIC 101 or MIC 102. GE credit: SE. Effective: 2020 Winter Quarter.

ECI 140D—Water and Wastewater Treatment System Design (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): (ENG 103 C- or better or ECI 100 C- or better); (ECI 140 C- or better or ECI 140A C- or better or ECI 140B C- or better or ECI 140C C- or better or ECI 148A C- or better) Evaluation and design of water and wastewater treatment systems. Not open for credit to students who have taken ECI 148B. GE credit: SE. Effective: 2018 Winter Quarter.

ECI 141—Engineering Hydraulics (3)
Lecture—3 hours. Prerequisite(s): ENG 103 C- or better or ECI 100 C- or better Nature of flow of a real fluid; flow in pipes; open channel flow; turbomachinery; fluid forces on objects: boundary layers, lift and drag. GE credit: SE. Effective: 2018 Winter Quarter.

ECI 141L—Engineering Hydraulics Laboratory (1)
Laboratory—3 hours. Prerequisite(s): ECI 141 (can be concurrent) Open to Engineering students only. Laboratory experiments and demonstrations on flow measurements, sluice gates, hydraulic jump, flow characteristics, and centrifugal pumps. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 142—Engineering Hydrology (4)
Lecture—4 hours. Prerequisite(s): ECI 141 (can be concurrent) Restricted to students in the College of Engineering. The hydrologic cycle. Evapotranspiration, interception, depression storage and infiltration. Streamflow analysis and

ECI 143—Green Engineering Design and Sustainability (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Upper division standing. Restricted to upper division standing; Pass One restricted to Civil Engineering majors. Application of concepts, goals and metrics of sustainability, green engineering and industrial ecology to engineering design. Other course topics include life-cycle assessments, analysis of environmental management systems, and economics of pollution prevention and sustainability. GE credit: QL, SE, SL, SS. Effective: 2017 Winter Quarter.

ECI 144—Groundwater Systems Design (4)
Lecture—4 hours. Prerequisite(s): ECI 141 Groundwater occurrence, distribution, and movement; groundwater flow systems; radial flow to wells and aquifer testing; aquifer management; groundwater contamination; solute transport by groundwater; fate and transport of subsurface contaminants. Groundwater supply and transport modeling. GE credit: SE. Effective: 2005 Spring Quarter.

ECI 144L—Groundwater Systems Design Laboratory (1)
Laboratory—3 hours. Prerequisite(s): ECI 144 (can be concurrent); ECI 144 required concurrently. Computer modeling of groundwater flow under regional gradient, well injection/withdrawal, and natural and engineered boundary conditions. Use of Groundwater Vistas computer program. Effective: 2010 Fall Quarter.

ECI 145—Hydraulic Structure Design (4)
Discussion—1 hour; Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): ECI 141 C- or better Project-based course on the design of an integrated urban drainage system with focus on consideration of design alternatives, multiple realistic constraints, quantification of uncertainty, codes and standards, technical drawing and cost analysis. GE credit: SE. Effective: 2017 Fall Quarter.

ECI 146—Water Resources Simulation (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ENG 103 C- or better or ECI 100 C- or better Computer simulation techniques in the analysis, design and operation of surface water systems; modeling concepts and practices with application to surface runoff; water quality in rivers and streams and dispersion of contaminants in water bodies. GE credit: SE. Effective: 2018 Winter Quarter.

ECI 148A—Water Quality Management (4)
Lecture—4 hours. Prerequisite(s): CHE 002B C- or better Basic concepts of water quality measurements and regulations. Introduction to physical, biological and chemical processes in natural waters. Fundamentals of mass balances in water and wastewater treatment. GE credit: SE. Effective: 2013 Fall Quarter.

ECI 149—Air Pollution (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MAT 021D; MAT 022B; CHE 002B C- or better; (ATM 121A or ENG 103 C- or better or ECI 100 C- or better) Physical and technical aspects of air pollution. Emphasis on geophysical processes and air pollution meteorology as well as physical and chemical properties of pollutants. (Same course as ATM 149.) GE credit: QL, SE, SL. Effective: 2018 Winter Quarter.

ECI 150—Air Pollution Control System Design (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECI 149 C- or better or ATM 149 C- or better Design and evaluation of air pollution control devices and systems. GE credit: SE. Effective: 2017 Fall Quarter.

ECI 153—Deterministic Optimization and Design (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): MAT 021C; MAT 022A; Computer programming course. Operations research. Optimization techniques such as linear programming, dynamic programming, and non-linear programming. Applications in civil engineering disciplines, including multiple realistic constraints, through computer-based course projects. GE credit: QL, SE, SL. Effective: 2013 Fall Quarter.

ECI 155—Water Resources Engineering Planning (4)
Lecture—4 hours. Prerequisite(s): (ENG 106 or ECN 001A or ECN 001AV); ECI 114 Basic engineering planning concepts; role of engineering, economic, environmental and social information and analysis; institutional, political and legal aspects. Case studies and computer models illustrate the planning of water resource systems. GE credit: QL, SE, SL, SS, WE. Effective: 2018 Winter Quarter.

ECI 161—Transportation System Operations (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MAT 021C C- or better; PHY 009A C- or better Principles of transportation system operations; traffic characteristics and methods of measurement; models of transportation operations and congestion applied to urban streets and freeways. GE credit: QL, SE. Effective: 2016 Fall Quarter.
ECI 163—Energy and Environmental Aspects of Transportation (4)
Extensive Writing; Lecture—3 hours. Prerequisite(s): ECN 001A or ECN 001AV or ENG 106 Engineering, economic, and systems planning concepts. Analysis and evaluation of energy, air quality and selected environmental attributes of transportation technologies. Strategies for reducing pollution and petroleum consumption in light of institutional and political constraints. Evaluation of vehicle emission models. (Same course as ESP 163.) GE credit: SE, SL, SS, WE. Effective: 2018 Spring Quarter.

ECI 165—Transportation Policy (3)
Lecture—3 hours. Transportation and associated environmental problems confronting urban areas, and prospective technological and institutional solutions. Draws upon concepts and methods from economics, engineering, political science and environmental studies. GE credit: QL, SE, SS. Effective: 2013 Fall Quarter.

ECI 171—Soil Mechanics (4)
Lecture—4 hours. Prerequisite(s): (ENG 103 (can be concurrent) or ECI 100 (can be concurrent)); ENG 104 C- or better; ECI 171L (can be concurrent); ECI 171L required concurrently. Restricted to Civil Engineering and Environmental Engineering majors only. Soil formations, mass-volume relationships, soil classification, effective stress, soil-water-void relationships, compaction, seepage, capillarity, compressibility, consolidation, strength, states of stress and failure, lateral earth pressures, and slope stability. GE credit: SE. Effective: 2018 Spring Quarter.

ECI 171L—Soil Mechanics Laboratory (1)
Laboratory—3 hours. Prerequisite(s): ECI 171 (can be concurrent); ECI 171 required concurrently. Laboratory studies utilizing standard testing methods to determine physical, mechanical and hydraulic properties of soil and demonstration of basic principles of soil behavior. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 173—Foundation Design (4)
Lecture—4 hours. Prerequisite(s): ECI 171 Foundation analysis and design, including site characterization, evaluation of shallow and deep foundation alternatives, evaluation of bearing capacity and settlements, design of retaining structures, and case-based design experiences. GE credit: SE. Effective: 2018 Winter Quarter.

ECI 175—Geotechnical Earthquake Engineering (4)
Lecture—4 hours. Prerequisite(s): ECI 171 C- or better Tectonics, faults, site response, and probabilistic ground motion prediction equations. Cyclic loading and liquefaction of soil elements and layers. Empirical procedures and field tests for evaluation of triggering and consequences, of liquefaction. GE credit: SE. Effective: 2017 Fall Quarter.

ECI 179—Pavement Engineering (4)
Discussion/Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ENG 104 C- or better Pavement types (rigid, flexible, unsurfaced, rail), their applications (roads, airfields, ports, rail) and distress mechanisms. Materials, traffic and environment characterization. Empirical and mechanistic-empirical design procedures. Maintenance, rehabilitation and reconstruction; construction quality; asphalt concrete mix design. GE credit: QL, SE, SL, VL. Effective: 2013 Fall Quarter.

ECI 189A—Selected Topics in Civil Engineering; Environmental Engineering (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Environmental Engineering. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 189B—Selected Topics in Civil Engineering; Hydraulics and Hydrologic Engineering (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Hydraulics and Hydrologic Engineering. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 189C—Selected Topics in Civil Engineering; Engineering Planning (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Engineering Planning. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 189D—Selected Topics in Civil Engineering; Geotechnical Engineering (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Geotechnical Engineering. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 189E—Selected Topics in Civil Engineering; Structural Engineering (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Structural Engineering. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 189F—Selected Topics in Civil Engineering; Structural Mechanics (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Structural Mechanics. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.
ECI 189G—Selected Topics in Civil Engineering; Transportation Engineering (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Transportation Engineering. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 189H—Selected Topics in Civil Engineering; Transportation Planning (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Transportation Planning. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 189I—Selected Topics in Civil Engineering; Water Resources Engineering (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Water Resources Engineering. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 189J—Selected Topics in Civil Engineering; Water Resources Planning (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Water Resources Planning. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 190C—Research Group Conferences in Civil and Environmental Engineering (1)
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Upper division standing in Civil and Environmental Engineering. Research group conferences. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

ECI 192—Internship in Engineering (1-5)
Internship. Prerequisite(s): Upper division standing; approval of project prior to the period of the internship. Supervised work experience in civil engineering. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

ECI 193A—Civil and Environmental Engineering Senior Design (4) Review all entries
Laboratory—2 hours; Lecture—2 hours. Prerequisite(s): (ECI 140D C- or better) or (ECI 171 C- or better, ECI 171L C- or better) or (ECI 132 C- or better or ECI 135 C- or better) or (ECI 161 C- or better or ECI 163 C- or better) or (ECI 141 C- or better, ECI 141L C- or better); and Consent of Instructor. And one ECI major depth course with a C- or better. Students must be in their final year of study. Open to seniors in Civil Engineering and Environmental Engineering only; students must be in their final year of study. Culminating design experience for civil engineering and environmental engineering majors. Student teams work closely with faculty, city officials or consulting clients to propose, implement and validate a unique solution to a real-world problem. GE credit: OL, SE, WE. Effective: 2018 Winter Quarter.

ECI 193B—Civil and Environmental Engineering Senior Design (4)
Laboratory—3 hours; Lecture—1 hour. Prerequisite(s): ECI 193A Open to seniors in Civil Engineering and Environmental Engineering only. Culminating design experience for civil engineering and environmental engineering majors. Student teams work closely with faculty, city officials or consulting clients to propose, implement and validate a unique solution to a real-world problem. GE credit: OL, SE, VL, WE. Effective: 2017 Fall Quarter.

ECI 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

ECI 199—Special Study for Advanced Undergraduates (1-5)
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. Special study. (P/NP grading only.) GE credit: SE. Effective: 2016 Fall Quarter.

ECI 201—Introduction to Theory of Elasticity (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ENG 104 Fundamental equations of elasticity in three dimensions; plane stress and plane strain; flexure and torsion of bars of various shapes. Introduction to variational and approximate methods. Effective: 1997 Winter Quarter.
ECI 203—Inelastic Behavior of Solids (3)
Lecture—3 hours. Prerequisite(s): ECI 201 Fundamentals of theories of plasticity, viscoelasticity and viscoplasticity for solids. Macroscopic constitutive modelling for engineering materials, e.g., metals, polymers, soils, etc., and microscopic motivation. Effective: 1997 Winter Quarter.

ECI 205—Continuum Mechanics (3)
Lecture—3 hours. Prerequisite(s): ECI 201 Tensor formulation of the field equations for continuum mechanics, including large deformation effects. Invariance and symmetry requirements. Introduction to nonlinear thermoelasticity and thermodynamics. Solution of three-dimensional problems. Selected topics. Effective: 1998 Winter Quarter.

ECI 206—Fracture Mechanics (4)
Lecture—4 hours. Prerequisite(s): ECI 201; ENG 104 Linear and nonlinear fracture mechanics, stress analysis, energy concepts, brittle fracture criteria, path independent integrals, Dugdale-Barenblatt model, general cohesive zone models, ductile fracture criteria, crack tip fields for stationary and propagating cracks, fatigue. Application of numerical methods for fracture mechanics. Effective: 2006 Winter Quarter.

ECI 211—Advanced Matrix Structural Analysis (4)
Lecture—4 hours. Prerequisite(s): ECI 201; ENG 104 Linear and nonlinear fracture mechanics, stress analysis, energy concepts, brittle fracture criteria, path independent integrals, Dugdale-Barenblatt model, general cohesive zone models, ductile fracture criteria, crack tip fields for stationary and propagating cracks, fatigue. Application of numerical methods for fracture mechanics. Effective: 2006 Winter Quarter.

ECI 212A—Finite Element Procedures in Applied Mechanics (4)
Lecture—4 hours. Prerequisite(s): EAD 115 or (MAT 128A, MAT 128B (can be concurrent)) Weighted-residual and Rayleigh-Ritz methods. Weak/variational formulation and development of discrete equations using finite element approximations. Application to one- and two-dimensional problems (heat conduction). Effective: 2003 Winter Quarter.

ECI 212B—Finite Elements: Application to Linear and Non-Linear Structural Mechanics Problems (4)

ECI 213—Analysis of Structures Subjected to Dynamic Loads (4)
Lecture—4 hours. Prerequisite(s): ECI 211 (can be concurrent) Analysis of structures subjected to earthquake, wind and blast loading; distributed, consistent and lumped mass techniques; computer implementation; nonlinear response spectrum; frequency and time domain analysis; seismic protection of structures; numerical methods in linear and nonlinear structural dynamics. Effective: 2012 Fall Quarter.

ECI 214—Probabilistic Seismic Hazard Analysis and Design Ground Motions (4)
Lecture—4 hours. Probabilistic seismic hazard analysis for use in developing design spectra and for seismic risk analyses, including the development of earthquake ground motion time series for use in dynamic analyses of structures. Effective: 2016 Winter Quarter.

ECI 216—Meshfree Methods and Partition of Unity Finite Elements (4)
Lecture—4 hours. Prerequisite(s): ECI 201; ECI 212A Advanced discretization techniques such as meshfree methods and partition of unity finite elements for the Galerkin solution of boundary-value problems in solid and structural mechanics. Application of meshfree and extended finite element methods in computational fracture. Effective: 2016 Winter Quarter.

ECI 221—Theory of Plates and Introduction to Shells (3)

ECI 223—Advanced Dynamics, Signal Processing, and Smart Structures Technology (4)
Lecture—4 hours. Prerequisite(s): ECI 213; Or equivalent. Signal processing and system identification of structures under dynamic excitations; Fourier and Laplace transforms; data acquisition and sensor design fundamentals; sensor technologies/techniques for nondestructive evaluation; structural control; actuators and dampers for smart structures; piezoelectrics and acoustic emissions; micro- and nano-fabrication. Effective: 2011 Winter Quarter.

439
ECI 232—Advanced Topics in Concrete Structures (4)
Lecture—4 hours. Prerequisite(s): ECI 130; ECI 135; ECI 138; Graduate standing. Ductility of reinforced concrete; strength of two-way slabs; modified compression field theory. Effective: 2001 Fall Quarter.

ECI 233—Advanced Design of Steel Structures (4)
Lecture—4 hours. Prerequisite(s): (ECI 130 or ECI 131); ECI 132 Review of Load and Resistance Factor Design (LRFD); steel-plate girder design; plastic design of indeterminate systems; moment frames and bracing systems; connection design; seismic design of steel structures; vibration of flooring systems; steel-concrete composite design. Effective: 2004 Winter Quarter.

ECI 234—Prestressed Concrete (4)
Lecture—4 hours. Prerequisite(s): ECI 135; (ECI 130 or ECI 131) Survey of methods and applications; prestressing materials and systems; prestress losses; flexural design; design for shear and torsion; deflection computation and control; continuous beams and indeterminate structures; floor systems; partial prestressing; design of compression members; strut-and-tie models. Effective: 2003 Fall Quarter.

ECI 235—Cement Composites (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ENG 104 Applications of cement composites; materials selection and proportioning; component and composite properties; hydration reactions and microstructure development; mechanisms of failure; nondestructive test methods; fiber reinforcement; concrete durability; novel reinforcing materials; ferrocement; repair and retrofit technologies; applications to structural design. Effective: 2002 Fall Quarter.

ECI 236—Design of Fiber Reinforced Polymer Composite Structures (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ECI 135 Basics of mechanics and design of polymer matrix composites: composite classification, manufacturing process, micromechanical property determination, classical lamination theory, strength theories, first-ply-failure, test methods, design practice, strengthening and retrofitting of existing reinforced concrete structures. Effective: 2002 Fall Quarter.

ECI 237—Bridge Design (4)
Lecture—4 hours. Prerequisite(s): ECI 130; ECI 135; ECI 234 recommended. Open to Graduate Students only. Bridge types, behavior and construction characteristics; design philosophy, details according to Caltrans and American Association of State Highway and Transportation Officials codes, principles; seismic design and retrofit of concrete bridges; modern bridges using advanced fiber reinforced polymer composites; fieldtrip required. Effective: 2007 Fall Quarter.

ECI 238—Performance-Based Seismic Engineering (4)

ECI 240—Water Quality (4)
Lecture—4 hours. Prerequisite(s): ECI 141; ECI 142 Quality requirements for beneficial uses of water. Hydrologic cycle of quality. Hydromechanics in relation to quality of surface and groundwaters; transport and fate of waterborne pollutants. Heat budget for surface waters; predictive methods; introduction to water quality modeling. Effective: 2000 Fall Quarter.

ECI 241—Environmental Reactive Chemical Transport Modeling (4)
Lecture—4 hours. Prerequisite(s): CHE 002A or CHE 002B or ECI 149; Or equivalent. Modeling of reactive chemical transport in air and water including kinetic reactions, equilibrium reactions, and phase partitioning. Emphasis on numerical solution schemes and programming techniques to provide deeper insight into model performance and limitations. Effective: 2014 Fall Quarter.

ECI 242—Air Quality (4)
Lecture—4 hours. Prerequisite(s): ENG 105; ECI 141; ECI 149; Or equivalents. Factors determining air quality. Effects of air pollutants. Physical and chemical fundamentals of atmospheric transport and reaction. Introduction to dispersion modeling. Effective: 2002 Fall Quarter.

ECI 243A—Water and Waste Treatment (4) Review all entries
Lecture—4 hours. Prerequisite(s): ECI 148A; Or the equivalent. Characteristics of water and airborne wastes; treatment processes and process kinetics; treatment system design. Effective: 1999 Fall Quarter.
ECI 243A—Water and Waste Treatment (4) **Review all entries**
Lecture—4 hours. Prerequisite(s): ECI 148A; Or the equivalent. Open to Graduate majors only. Characteristics of water and airborne wastes; treatment processes and process kinetics; treatment system design. Effective: 2019 Spring Quarter.

ECI 243B—Water and Waste Treatment (4) **Review all entries**
Lecture—4 hours. Prerequisite(s): ECI 243A Continuation of course 243A. Aeration, thickening, biological processes, design of biological treatment systems. Effective: 2000 Winter Quarter.

ECI 243B—Water and Waste Treatment (4) **Review all entries**
Lecture—4 hours. Prerequisite(s): ECI 243A Open to graduate majors only. Continuation of course 243A. Aeration, thickening, biological processes, design of biological treatment systems. Effective: 2019 Spring Quarter.

ECI 243L—Pilot Plant Laboratory (4) **Review all entries**
Discussion—1 hour; Laboratory—6 hours; Lecture—1 hour. Prerequisite(s): ECI 243A; ECI 243B (can be concurrent); or Consent of Instructor. Graduate standing. Laboratory investigation of physical, chemical, and biological processes for water and wastewater treatment. Effective: 2016 Winter Quarter.

ECI 243L—Pilot Plant Laboratory (4) **Review all entries**
Discussion—1 hour; Laboratory—6 hours; Lecture—1 hour. Prerequisite(s): ECI 243A; ECI 243B (can be concurrent); or Consent of Instructor. Graduate standing. Open to graduate majors only. Laboratory investigation of physical, chemical, and biological processes for water and wastewater treatment. Effective: 2019 Spring Quarter.

ECI 244—Life Cycle Assessment for Sustainable Engineering (4) **Review all entries**
Lecture—4 hours. Prerequisite(s): Graduate standing. Life cycle assessment methodology is taught emphasizing applications to infrastructure and energy systems. Life cycle design, life cycle cost methods, other tools from industrial ecology, and links to policy are covered as well. Effective: 2011 Fall Quarter.

ECI 244—Life Cycle Assessment for Sustainable Engineering (4) **Review all entries Discontinued**
Lecture—4 hours. Prerequisite(s): Graduate standing. Life cycle assessment methodology is taught emphasizing applications to infrastructure and energy systems. Life cycle design, life cycle cost methods, other tools from industrial ecology, and links to policy are covered as well. Effective: 2019 Winter Quarter.

ECI 244A—Life Cycle Assessment for Sustainable Engineering (4)
Lecture—4 hours. Enrollment restricted to graduate students. Life cycle assessment methodology. Emphasis on applications to infrastructure and energy systems. Life cycle design, life cycle cost methods, other tools from industrial ecology, and links to policy. Not open to students who have taken ECI 244. (Same course as EGG 201.) Effective: 2019 Winter Quarter.

ECI 245A—Applied Environmental Chemistry: Inorganic (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ENG 105; ECI 140; CHE 002B; Or the equivalent of CHE 002B; CHE 002C or CHE 107A recommended. Chemistry of natural and polluted waters. Topics include chemical, kinetic and equilibrium principles, redox reactions, gas solution and solid-solution equilibria, thermodynamics, carbonate systems, coordination chemistry, interfacial phenomena. Effective: 2000 Spring Quarter.

ECI 245B—Applied Environmental Chemistry: Organic (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): CHE 128A; CHE 128B; CHE 128C; Or the equivalent; CHE 002C or CHE 107A recommended. Transport and transformation of organic chemicals in the environment. Topics include application of thermodynamics to predict solubility and activity coefficients; distribution of organic chemicals between the aqueous phase and air, solvent, or solid phases; chemical, photochemical and biological transformation reactions. Effective: 2001 Spring Quarter.

ECI 246N—Understanding Climate Change: Causes and Consequences (4)
Lecture—4 hours. Open to graduate students. Diverse physical processes that govern climate and drive climate change. Observational, experimental and modeling techniques and methods used in the development of our scientific understanding of the Earth system. Effective: 2016 Spring Quarter.

ECI 247—Aerosols (4)
Lecture—4 hours. Prerequisite(s): ENG 103; ENG 105; ECI 141; ECI 149 Behavior of airborne particles including particle formation, modification, and removal processes. Effective: 2002 Fall Quarter.

ECI 247L—Aerosols Laboratory (4)
Laboratory—6 hours; Lecture—2 hours. Prerequisite(s): ECI 247 Methods of generation and characterization of aerosols. Detailed topics may include flow rate measurement, aerosol generation, aerosol collection, ions
measurement, metals measurement, and carbon measurement. May be repeated up to 1 time(s). Effective: 2002 Fall Quarter.

ECI 248—Biofilm Processes (4)
Lecture—4 hours. Prerequisite(s): SSC 111 or SSC 211 or ECI 243B; or Consent of Instructor. Calculus and basic cell molecular biology are recommended. Natural and engineered biofilms, including biofilm occurrence and development, spatial structure, microbial processes, fundamental and applied research tools, biofilm reactors, beneficial uses, and detrimental effects. Effective: 2004 Spring Quarter.

ECI 249—Probabilistic Design and Optimization (4)
Lecture—4 hours. Prerequisite(s): ECI 114; ECI 153; ENG 106; Or equivalents. Design by optimization for probabilistic systems, decision theory, the value of information, probabilistic linear programming, probabilistic dynamic programming, nonlinear probabilistic optimization. Applications in civil engineering design, project evaluation, and risk management. Effective: 2006 Winter Quarter.

ECI 250—Civil Infrastructure System Optimization and Identification (4)
Lecture—4 hours. Prerequisite(s): MAT 021C; MAT 022A; Programming course; EAD 115 and mathematical modeling course recommended. Restricted to graduate standing. Applied mathematics with a focus on modeling, identifying, and controlling dynamic, stochastic, and underdetermined systems. Applications in transportation networks, water resource planning, and other civil infrastructure systems. Effective: 2005 Spring Quarter.

ECI 251—Transportation Demand Analysis (4)

ECI 252—Sustainable Transportation Technology and Policy (3) 
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): ECI 165 Role of technical fixes and demand management in creating a sustainable transportation system. Emphasis on technology options, including alternative fuels, electric propulsion, and IVHS. Analysis of market demand and travel behavior, environmental impacts, economics and politics. (Same course as ESP 252.) Effective: 2000 Fall Quarter.

ECI 252—Sustainable Transportation Technology and Policy (3) 
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): ECI 165 Role of technical fixes and demand management in creating a sustainable transportation system. Emphasis on technology options, including alternative fuels, electric propulsion, and IVHS. Analysis of market demand and travel behavior, environmental impacts, economics and politics. (Same course as ESP 252.) Effective: 2018 Fall Quarter.

ECI 253—Dynamic Programming and Multistage Decision Processes (4)
Lecture—4 hours. Prerequisite(s): MAT 021C; MAT 022A; Programming course; EAD 115 recommended. Operations research. Optimization techniques with a focus on dynamic programming in treating deterministic, stochastic, and adaptive multistage decision processes. Brief review of linear programming and non-linear programming. Applications in transportation networks and other civil infrastructure systems. Effective: 2005 Spring Quarter.

ECI 254—Exploring Data from Built Environment Using R (4)
Laboratory—3 hours; Lecture—3 hours. Introduction to modern data science, specifically data acquisition, exploratory data analysis, visualization, and beginning data analysis using R. Emphasizes computational reasoning and working with tabular and non-standard data. Focus will be on data generated in the built environment. (Same course as GEO 279,) Effective: 2017 Fall Quarter.

ECI 256—Urban Traffic Management and Control (4)
Lecture—4 hours. Prerequisite(s): ECI 114 Basic concepts, models, and methods related to the branch of traffic science that deals with the movement of vehicles on a road network, including travel speed, travel time, congestion concepts, car-following and hydrodynamic traffic models. Effective: 2000 Fall Quarter.

ECI 257—Flow in Transportation Networks (4)
Lecture—4 hours. Prerequisite(s): ECI 153; ECI 161 or ECI 256 recommended. Elements of graph theory, a survey of pertinent optimization techniques, extremal principles in network flow problems, deterministic equilibrium assignment, stochastic equilibrium assignment, extensions of equilibrium assignments and dynamic transportation network assignment. Effective: 2000 Winter Quarter.

ECI 259—Asphalt and Asphalt Mixes (4)
Lecture—4 hours. Prerequisite(s): ECI 179; or Consent of Instructor. Asphalts and asphalt mix types and their use in

ECI 260—Sediment Transport (4)
Lecture—4 hours. Prerequisite(s): ECI 141; Or equivalent. Sediment transport in hydrologic systems. Process-oriented course which will emphasize how sediment moves and the physical processes that affect sediment transport. Field trip. Effective: 2006 Winter Quarter.

ECI 261—Cohesive Particle Transportation (3) Review all entries Discontinued

ECI 261—Colloids in Soil and Water (4) Review all entries
Lecture—4 hours. Prerequisite(s): CHE 002B; (ENG 103 or ECI 100); Upper division or graduate standing. Pass One restricted to upper division standing; Pass Two restricted to upper division standing or graduate standing. Colloid occurrence, properties, behavior in different environments, and transport mechanisms in water and soils. Emphasis on their role in water contamination. Effective: 2018 Fall Quarter.

ECI 264A—Transport, Mixing and Water Quality in River and Lakes (4)
Lecture—4 hours. Prerequisite(s): ECI 141; ECI 240 Principal causes of mixing and transport in rivers, lakes and reservoirs, and their impacts on water quality. Case studies of specific lakes and rivers. Effective: 2000 Fall Quarter.

ECI 264B—Transport, Mixing and Water Quality in Estuaries and Wetlands (4)
Lecture—4 hours. Prerequisite(s): ECI 141; ECI 240 Principal causes of mixing and transport in estuaries and wetlands, and their impacts on water quality. Topics include advection/diffusion; tides; transverse mixing; longitudinal dispersion; sediment transport; nutrient cycling; computer modeling of estuaries. Case studies of specific systems. Effective: 2000 Spring Quarter.

ECI 265—Stochastic Hydrology and Hydraulics (4)
Lecture—4 hours. Prerequisite(s): ECI 266; or Consent of Instructor. Physics-based stochastic methods in modeling hydrologic and hydraulic processes; theory for modeling hydrologic-hydraulic governing equations as stochastic partial differential equations applied to various hydrologic-hydraulic processes under uncertainty, including transport, open channel flow, overland flow, soil water flow, and groundwater. Effective: 2015 Winter Quarter.

ECI 266—Applied Stochastic Methods in Engineering (4)
Lecture—4 hours. Prerequisite(s): ECI 114 or MAT 131 or STA 130A or STA 131A or MAT 118A (can be concurrent) Stochastic processes classification; Gaussian random fields; stochastic calculus in mean square; Ito and Stratonovich stochastic differential equations; Fokker-Planck equation; stochastic differential equations with random coefficients. Effective: 1999 Fall Quarter.

ECI 267—Water Resource Management (3)
Lecture—3 hours. Prerequisite(s): ECI 114; ECI 141; ECI 142; ECI 153 recommended. Engineering, institutional, economic, and social basis for managing local and regional water resources. Examples in the context of California's water development and management. Uses of computer modeling to improve water management. (Same course as GEO 212.) Effective: 2013 Fall Quarter.

ECI 268—Infrastructure Economics (3)
Lecture—3 hours. Prerequisite(s): (ECN 001A or ECN 001AV); ENG 106; Or the equivalent. Economics applied to infrastructure engineering planning, operations, maintenance, and management problems; microeconomic and macroeconomic theories; benefit-cost analysis; effect of uncertainty; optimization economics; non-classical economics; public finance. Effective: 2018 Spring Quarter.

ECI 269—Transportation-Air Quality: Theory and Practice (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ECI 149; Or the equivalent. Health and regulatory aspects of airborne pollutants. Principles of modeling vehicle emissions. Conformity issues and the regulatory framework. Regional and micro-scale modeling. Effective: 1999 Fall Quarter.

ECI 270—Advanced Water Resources Management (3)
Lecture—3 hours. Prerequisite(s): ECI 153; ECI 267; Or the equivalent. Discussion of technical papers related to planning theory, system maintenance, regionalization, multi-objective methods, risk analysis, institutional issues, pricing model application, economic development, forecasting, operations, and other topics. Effective: 1997 Winter Quarter.
ECI 271—Inverse Problems (4)
Lecture—4 hours. Prerequisite(s): ECI 114; ECI 144; Or equivalents. Inverse calibration of distributed parameter models, using data representing model outputs. Forward and inverse mappings, stability, uniqueness, identifiability. Optimization formulation of inverse problems, maximum likelihood and other objective functions, indirect and direct approaches, solution by UCODE in hands-on project format. Effective: 2010 Fall Quarter.

ECI 272A—Advanced Hydrogeology (4)

ECI 272B—Advanced Hydrogeology (4)

ECI 272C—Multiphase Reactive Transport (4)
Lecture—4 hours. Prerequisite(s): ECI 142; ECI 144; ECI 148A Multicomponent reactive transport including multiple phases. Advective/dispersive transport, chemical equilibria, and mass transformation kinetics. Natural chemical/microbiological processes including sorption, complexation, biodegradation, and diffusive mass transfer. Eulerian and Lagrangean averaging methods. Applications to contaminant remediation problems in river and subsurface hydrology. Effective: 2004 Fall Quarter.

ECI 273—Water Resources Systems Engineering (4)
Lecture—4 hours. Prerequisite(s): ECI 114; ECI 153; Or the equivalent. Planning and management of water resource systems. Deterministic and stochastic simulation and optimization techniques. Capacity design and operation of reservoir systems for water supply, hydropower, flood control, and environmental objectives. Effective: 2018 Winter Quarter.

ECI 275—Hydrologic Time-Series Analysis (4)
Lecture—4 hours. Prerequisite(s): ECI 114; ECI 142 Application of statistical methods for analysis and modeling of hydrologic series. Statistical simulation and prediction of hydrologic sequences using time series methodology. Effective: 2003 Fall Quarter.

ECI 276—Watershed Hydrology (4)

**ECI 279—Advanced Mechanics of Fluids (4)**

**ECI 280A—Nonlinear Finite Elements for Elastic-Plastic Problems (4)**
Lecture—4 hours. Prerequisite(s): Consent of Instructor. State of the art finite element methods and tools for elastoplastic problems, including computational techniques based on the finite element method and the theory of elastoplasticity. Effective: 2008 Spring Quarter.

**ECI 280B—Nonlinear Dynamic Finite Elements (4)**
Lecture—4 hours. Prerequisite(s): Consent of Instructor. State of the art computational methods and tools for analyzing linear and nonlinear dynamics problems. Effective: 2009 Spring Quarter.

**ECI 281A—Advanced Soil Mechanics (4)**

**ECI 281B—Advanced Soil Mechanics (5)**
Laboratory—3 hours; Lecture—4 hours. Prerequisite(s): ECI 281A Site investigation and soil characterization within the context of slope stability analysis. Effective: 2014 Spring Quarter.

**ECI 282—Pavement Design and Rehabilitation (4)**
Lecture—4 hours. Prerequisite(s): ECI 179; or Consent of Instructor. Advanced pavement design and structural/functional condition evaluation for concrete and asphalt pavements. Highways, airfields, port facilities; new facilities, rehabilitation, reconstruction. Mechanistic-empirical procedures, materials, climate and traffic characterization. Use of current design methods; recent developments and research. Effective: 2004 Winter Quarter.

**ECI 283—Physico-Chemical Aspects of Soil Behavior (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ECI 171 Study of the geotechnical behavior of soils considering formation, transport, mineralogy, soil-fluid-electrolyte systems, surface tension, particle mechanics, shape, fabric, and structure. Laboratories demonstrate effects of fundamental interparticle forces (contact, Van Der Waals, capillarity and chemical). Effective: 2012 Fall Quarter.

**ECI 284—Theoretical Geomechanics (4)**

**ECI 286—Advanced Foundation Design (4)**
Lecture—4 hours. Prerequisite(s): ECI 173 Design and analysis of pile and pier foundations, including seismic effects; deep excavation systems; tie-back, nailing, and anchor systems; coffer dams; loads on buried conduits; ground modification techniques; and other related topics. Effective: 2004 Spring Quarter.

**ECI 287—Geotechnical Earthquake Engineering (4)**
Lecture—4 hours. Prerequisite(s): ECI 138; ECI 281A Characteristics and estimation of earthquake ground motions; wave propagation and local site response; liquefaction potential and remediation; residual strength and stability considerations; ground deformations; dynamic soil-structure interaction. Effective: 2004 Spring Quarter.

**ECI 288—Earth and Rockfill Dams (4)**
Lecture—4 hours. Prerequisite(s): ECI 281A; ECI 281B (can be concurrent) Site selection; design considerations; layout; seismic effects including considerations of fault movements; construction; environmental considerations, instrumentation; maintenance remediation and retrofit of existing dams. Effective: 2004 Winter Quarter.

**ECI 289A—Selected Topics in Civil Engineering; Environmental Engineering (1-5)**
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Environmental Engineering. May be repeated for credit. Effective: 1997 Winter Quarter.
ECI 289B—Selected Topics in Civil Engineering; Hydraulics and Hydrologic Engineering (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Hydraulics and Hydrologic Engineering. May be repeated for credit. Effective: 1997 Winter Quarter.

ECI 289C—Selected Topics in Civil Engineering; Engineering Planning (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Engineering Planning. May be repeated for credit. Effective: 1997 Winter Quarter.

ECI 289D—Selected Topics in Civil Engineering; Geotechnical Engineering (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Geotechnical Engineering. May be repeated for credit. Effective: 1997 Winter Quarter.

ECI 289E—Selected Topics in Civil Engineering; Structural Engineering (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Structural Engineering. May be repeated for credit. Effective: 1997 Winter Quarter.

ECI 289F—Selected Topics in Civil Engineering; Structural Mechanics (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Structural Mechanics. May be repeated for credit. Effective: 1997 Winter Quarter.

ECI 289G—Selected Topics in Civil Engineering; Transportation Engineering (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Transportation Engineering. May be repeated for credit. Effective: 1997 Winter Quarter.

ECI 289H—Selected Topics in Civil Engineering; Transportation Planning (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Transportation Planning. May be repeated for credit. Effective: 1997 Winter Quarter.

ECI 289I—Selected Topics in Civil Engineering; Water Resources Engineering (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Directed group study in Water Resources Engineering. May be repeated for credit. Effective: 1997 Winter Quarter.

ECI 290—Seminar (1)
Seminar—1 hour. Discussion of current graduate research, and guest lectures on recent advances. Oral presentation of individual study. Course required of graduate degree candidates. (S/U grading only.) Effective: 1997 Winter Quarter.

ECI 290C—Graduate Research Group Conference (1)
Discussion—1 hour. Research problems, progress, and techniques in civil engineering. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

ECI 296—Topics in Water and Environmental Engineering (1)
Seminar—2 hours. Seminars presented by visiting lecturers, UC Davis faculty and, graduate students. May be repeated for credit. (S/U grading only.) Effective: 2000 Winter Quarter.

ECI 298—Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

ECI 299—Research (1-12)
Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

ECI 390—The Teaching of Civil Engineering (1)
Discussion—1 hour. Prerequisite(s): Meet qualifications for teaching assistant and/or associate-in in Civil Engineering. Participation as teaching assistant or associate-in in a designated engineering course. Methods of leading discussion groups or laboratory sections, writing and grading quizzes, use of laboratory equipment, and grading laboratory reports. May be repeated up to 9 unit(s). (S/U grading only.) Effective: 1997 Winter Quarter.

Department Office. Classics Program; 215 Sproul Hall; 530-752-0835; http://classics.ucdavis.edu
The Major Program

Classical Civilization is an interdisciplinary major that examines the ancient Mediterranean cultures of Greece, Rome and the Near East, with courses offered on the languages, history, literature, religions, myths, art and archaeology of these societies, their achievements in rhetoric and philosophy, and their political and social institutions. Minor programs in Classical Civilization, Greek, and Latin, and many General Education courses are also offered.

The Program. The major has two tracks: (1) Classical and Mediterranean Civilizations, and (2) Classical Languages and Literatures. The core of both major tracks consists of two years of Latin or Greek, the introductory sequence on the ancient Mediterranean world (CLA 001, 002, 003 or 004), the advanced seminar (CLA 190), and a number of electives. The Classical and Mediterranean Civilization track allows students to choose their electives from a broadly balanced program in history, art and archaeology, literature, philosophy and rhetoric. The Classical Languages and Literatures track focuses more intensively on language and literature, requiring the study of two languages and allowing fewer electives. Students planning to go on to graduate work in Classics should take Track 2 and study as much Latin and Greek as possible. They should make a point of talking to an advisor early in their undergraduate program. They are also advised to acquire a reading knowledge of French or German.

Career Opportunities. A degree in Classical Civilization represents a solid liberal arts education that provides an excellent foundation for a wide variety of careers. In the last twenty-five years, many majors have applied to law or medical schools and nearly all have been accepted. Additional career options include library and museum work, teaching, journalism, and graduate study in Classics, art, archaeology, history, literature, philosophy, and religion.

Major Advisors. E. Albu, V. Popescu, C. Seal, A. Uhlig

Honors Program. Candidates for high or highest honors in Classical Civilization must write a senior honors thesis under the direction of a faculty member in Classics. Potential candidates for the honors program must enroll in Classics 194HA and 194HB, normally during the first two quarters of the senior year. Enrollment is limited to upper division students with a minimum of 135 units, and a 3.500 grade point average in courses in the Classical Civilization major. For further information, students should consult with the major advisor or program director. The requirements for the honors program are in addition to the regular requirements for the major in Classical Civilization.

Graduate Study. The Department offers a master’s degree in Classics with emphasis on either Greek or Latin; however, admission into the graduate program has been suspended.

Prerequisite credit. Credit will not normally be given for a lower division course in Latin or Greek if it is the prerequisite of a course already successfully completed. Exceptions can be made by the Program Director only.

Faculty. http://classics.ucdavis.edu/people

The Department offers minors in Arabic, Classical Civilization, Greek and Latin for those wishing to follow a shorter but formally recognized program of study in Classics.

Classical Civilization Units: 20

Choose one: 4

CLA 001 Ancient Near East and Early Greece: 3000-500 B.C.E. 4
CLA 002 Ancient Greece and the Near East: 500 to 146 B.C.E. 4
CLA 003 Rome and the Mediterranean: 800 B.C.E. to 500 C.E. 4
CLA 004 Late Antiquity 4

Choose one upper division course in Latin or Greek. 4

Choose two additional upper division courses in Classics, Latin or Greek. 8

Choose one additional upper division course selected from either group (a) or (b) in the Classical Civilization major. 4

Total: 20

Classical Civilization; Classics | CLA Courses

Courses in CLA:

CLA 001—Ancient Near East and Early Greece: 3000-500 B.C.E. (4)
Discussion—1 hour; Lecture—3 hours. Introduction to the literature, art, and social and political institutions of ancient Mesopotamia, Egypt, Palestine, and early Greece from 3000 to 500 B.C.E. GE credit: AH, WC, WE. Effective: 2015 Fall Quarter.

CLA 002—Ancient Greece and the Near East: 500 to 146 B.C.E. (4)
Lecture—3 hours; Term Paper. Introduction to the literature, art and thought and the political and social institutions and values of Greece and its eastern Mediterranean neighbors-the Persians, Egyptians, and Judeans. GE credit: AH, WC, WE. Effective: 1997 Winter Quarter.

CLA 003—Rome and the Mediterranean: 800 B.C.E. to 500 C.E. (4)
Discussion—1 hour; Lecture—3 hours. Introduction to the history, literature, material culture, political and social institutions and values of Roman Civilization, with an emphasis on the development of the Roman Empire and the interactions of Roman culture with other Mediterranean cultures. GE credit: AH, WC, WE. Effective: 2008 Spring Quarter.

CLA 004—Late Antiquity (4)
Discussion—1 hour; Lecture—3 hours. History and culture of the Roman and Byzantine empires from the third to the eighth century. Transformation of the classical Mediterranean world through political and cultural interactions, rise of Christianity and Islam, beginning of the medieval period in Europe. GE credit: AH, WC, WE. Effective: 2016 Fall Quarter.

CLA 010—Greek, Roman, and Near Eastern Mythology (3)
Lecture—3 hours. Examination of major myths of Greece, Rome, and the Ancient Near East; their place in the religion, literature and art of the societies that produced them; their subsequent development, influence and interpretation. GE credit: AH, VL, WC. Effective: 1997 Winter Quarter.

CLA 010Y—Greek, Roman, and Near Eastern Mythology - Hybrid (3)
Lecture—2 hours; Web Virtual Lecture—1 hour. Examination of major myths of Greece, Rome, and the Ancient Near East; their place in the religion, literature and art of the societies that produced them; their subsequent development, influence and interpretation. GE credit: AH, VL, WC. Effective: 2016 Winter Quarter.

CLA 015—Women and Gender in Classical Antiquity (4)
Lecture/Discussion—3 hours; Term Paper. Lives and roles of women and men in ancient Greece and Rome.
Readings from history, philosophy, medical and legal documents, literature and myth. GE credit: AH, VL, WC, WE. Effective: 2011 Fall Quarter.

CLA 020—Pompeii AD 79 (4)
Lecture—3 hours; Term Paper. Roman life in an urban community at the time of the eruption of Vesuvius. Slide presentations of the archeological evidence will be supplemented by selected readings from Petronius' Satyricon and other ancient authors. GE credit: AH, VL, WC, WE. Effective: 1997 Winter Quarter.

CLA 025—The Classical Heritage in America (4)
Lecture/Discussion—3 hours; Term Paper. Classical heritage in the New World, with emphasis on the United States from its colonial past to the present day. The reception of Greco-Roman thought and values as expressed in art, architecture, education, law, government, literature, and film. GE credit: ACGH, AH, WE. Effective: 2011 Fall Quarter.

CLA 030—Greek and Latin Elements in English Vocabulary (3)
Lecture—3 hours. Knowledge of Latin and Greek not required. Elements of Greek and Latin vocabulary for increased understanding of English word formation and improved ability to understand and retain unfamiliar words. Emphasis on Greek and Latin elements but other languages not neglected. Not open for credit to students who have completed CLA 030F. GE credit: AH. Effective: 2014 Fall Quarter.

CLA 030F—Greek and Latin Elements in English Vocabulary (3)
Lecture—3 hours. Restricted to incoming freshmen. Knowledge of Latin and Greek not required. Elements of Greek and Latin vocabulary for increased understanding of English word formation and improved ability to understand and retain unfamiliar words. Emphasis on Greek and Latin elements but other languages not neglected. Not open for credit to students who have completed CLA 030. GE credit: AH. Effective: 2014 Fall Quarter.

CLA 031—Greek and Latin Elements in Technical Vocabulary (3)
Lecture—3 hours. Knowledge of Greek and Latin not required. Elements of Greek and Latin vocabulary to increase understanding of English word formation in medical, scientific and technical terminology and improve ability to understand and retain unfamiliar terms. GE credit: AH. Effective: 1997 Winter Quarter.

CLA 035—Food & Wine in the Ancient Mediterranean (3)
Lecture/Discussion—3 hours. Social, political, and economic history of food and wine in ancient Mediterranean cultures. Development of agriculture and technology, trade, empires. Representation of food and wine in literary and visual arts, religious significance. GE credit: AH, VL, WC. Effective: 2019 Fall Quarter.

CLA 040—Life and Economy in the Ancient Mediterranean World (4)

CLA 050—Ancient Science (4)
Discussion—1 hour; Lecture—3 hours. Study of science in ancient Greece and Rome; consideration of its social context; concentration on the basic concepts of physics, the world of medicine and biology, the history of mathematics, and the practices of astronomy, astrology and meteorology. (Same course as STS 050.) GE credit: AH, WC, WE. Effective: 2016 Fall Quarter.

CLA 051—Ancient Medicine (4)
Discussion—1 hour; Lecture—3 hours. Medicine in ancient Greece and Rome; physiological conceptions of the body within scientific and social frameworks; exploration of sanitation technology and health in antiquity; medical treatment of the female body; medicine and the economy. (Same course as STS 051.) GE credit: AH, WC, WE. Effective: 2016 Winter Quarter.

CLA 098—Directed Group Study (1-5)
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. May be repeated up to 2 time(s). (P/NP grading only.) Effective: 2007 Fall Quarter.

CLA 101A—Topics in Ancient Mediterranean Civilizations (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): A lower division Classics course or consent of instructor. Topics may be ordered by time or place (e.g. Hellenistic Egypt) or by theme or genre (e.g. slavery in the ancient world). May be repeated up to 2 time(s) when topic differs. GE credit: AH, WC, WE. Effective: 2016 Fall Quarter.

CLA 101B—Topics in Greek Civilization (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): A lower division Classics course or consent of instructor.
Topics may be ordered by time or place (e.g. the world of Homer) or by theme or genre (e.g. the Greek art of war). May be repeated up to 2 time(s) when topic differs. GE credit: AH, WC, WE. Effective: 2016 Fall Quarter.

CL A 101C—Topics in Roman Civilization (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): A lower division Classics course or consent of instructor. Topics may be ordered by time or place (e.g. Julius Caesar and his age) or by theme or genre (e.g. gladiators: blood in the arena). May be repeated up to 2 time(s) when topic differs. GE credit: AH, WC, WE. Effective: 2016 Fall Quarter.

CL A 101D—Topics in Classical Receptions (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): A lower division Classics course or consent of instructor. Topics in classical reception from late antiquity to the present. Topics may be ordered by time or place (e.g. the classical tradition in Washington, D.C.) or by theme or genre (e.g. cinematic representations of the ancient world). May be repeated up to 2 time(s) when topic differs. GE credit: AH, WC, WE. Effective: 2016 Fall Quarter.

CL A 101E—Topics in Ancient Science (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): CLA 050 or CLA 051; or Consent of Instructor. Topics may be ordered by discipline (e.g. ancient medicine), historical figure (e.g. Galen) or topic (e.g. science and the economy). May be repeated up to 2 time(s) when topic differs. GE credit: AH, WE. Effective: 2016 Spring Quarter.

CLA 102—Film and the Classical World (4)
Film Viewing—2.5 hours; Lecture—3 hours. Prerequisite(s): A lower division Classics course or consent of instructor. Classical World as portrayed in films. Viewings and discussions of modern versions of ancient dramas, modern dramas set in the Ancient Mediterranean world, and films imbued with classical themes and allusions. Supplementary readings in ancient literature and mythology. GE credit: AH, WE. Effective: 2016 Spring Quarter.

CLA 103—Love and Beauty in the Ancient World (4)
Extensive Writing; Lecture/Discussion—3 hours. Philosophical and literary traditions connecting love, beauty, and goodness in ancient thought. Moral and ethical implications, ideologies of sexuality and gender; transmission into the medieval and modern world. GE credit: AH, WC, WE. Effective: 2016 Fall Quarter.

CLA 105—Theory and Practice of Greek and Roman Mythology (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): A lower division Classics course or consent of instructor. Thematically focused study of mythological narratives. Emphasis on the historical development of myths and the variety of theoretical approaches for the study of myth. GE credit: AH, WE. Effective: 2016 Fall Quarter.

CLA 110—Origins of Rhetoric (4)
Lecture—3 hours; Term Paper. Prerequisite(s): A lower division Classics course or consent of instructor. Issues in the development of rhetoric from its origins in ancient Greece to A.D.430. Special attention to works of Plato, Aristotle, Cicero, and Quintilian. Role of grammar and rhetoric in schools of Roman Empire. The Christian rhetoric of Saint Augustine. Not open for credit to students who have completed RCM 110 or CMN 110. (Former course RCM 110.). GE credit: AH, WE. Effective: 2016 Spring Quarter.

CLA 111—Forms of Knowledge in the Ancient World (4)
Extensive Writing; Lecture/Discussion—3 hours. History of knowledge preservation and transfer in the ancient Mediterranean. Oral tradition, technology, innovations, forms of writing, libraries, ancient scholarship, cultural exchange and influence. GE credit: AH, VL, WC, WE. Effective: 2017 Fall Quarter.

CLA 120—Greek and Roman Historiography (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): A lower division Classics course or consent of instructor. Survey of Greek and Roman historical writing in English translation. Authors to be read may include Herodotus, Thucydides, Sallust, Livy, and Tacitus. Focus on the development of historical writing as a literary genre. GE credit: AH, WC, WE. Effective: 2016 Fall Quarter.

CLA 125—Roman Political Thought (4)
Lecture—3 hours; Term Paper. Prerequisite(s): A lower division Classics course or consent of instructor. Survey of Roman thinking about politics, as expressed both in formal theorizing and in a variety of other contexts, including oratory, historiography, and epic. Study of Roman political reflection in its historical, cultural, and literary context. GE credit: AH, WC, WE. Effective: 2016 Fall Quarter.

CLA 140—Homer and Ancient Epic (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): A lower division Classics course or consent of instructor. Reading of the classical epics of Homer (Iliad, Odyssey) and Virgil (Aeneid) in English. Discussion of techniques of
composition, the beliefs and values of their respective societies, and the generic tradition of ancient epic. GE credit: AH, WC, WE. Effective: 2016 Fall Quarter.

CLA 141—Greek and Roman Comedy (4)
Conference—1 hour; Lecture—3 hours. Prerequisite(s): A lower division Classics course or consent of instructor. Readings in Aristophanes, Menander, Plautus, and Terence; lectures on the development of ancient comedy. GE credit: AH, WE. Effective: 2016 Spring Quarter.

CLA 142—Greek and Roman Novel (4)
Lecture—3 hours; Term Paper. Prerequisite(s): A lower division Classics course or consent of instructor. Examination of the ancient Greek romances and their development into the grotesque realism of Petronius' Satyricon, and the religious mysticism of Apuleius' The Golden Ass. GE credit: AH, WC, WE. Effective: 2016 Spring Quarter.

CLA 143—Greek Tragedy (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): A lower division Classics course or consent of instructor. Reading in English of selected plays of Aeschylus, Sophocles, and Euripides. Discussion of the development and influence of Athenian tragedy. GE credit: AH, WE. Effective: 2016 Fall Quarter.

CLA 150—Socrates and Classical Athens (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): A lower division Classics course or consent of instructor. Study of the major sources of our knowledge of Socrates, assessment of his role in the politics and culture of ancient Athens, his method of teaching, and his place in Western thought. GE credit: AH, WC, WE. Effective: 2016 Fall Quarter.

CLA 170—Cultural Interactions in the Ancient Mediterranean World (4)
Lecture/Discussion—3 hours; Term Paper. Exploration of the role of colonial encounters in the spread of ideas throughout the ancient Mediterranean from an archaeological and artistic perspective. Emphasis on material and literary expressions of culture, trade routes, and theories pertaining to culture contact. GE credit: AH, VL, WC, WE. Effective: 2016 Fall Quarter.

CLA 171—Mediterranean Bronze Age Archaeology (4)
Extensive Writing; Lecture—3 hours. Prerequisite(s): A lower division Classics course or consent of instructor. Archaeological monuments of the ancient Near East, including Egypt and Mesopotamia, and of Greece and Crete during the Bronze Age. Special emphasis on the problems of state formation and on the co-existence and collapse of Bronze Age societies. GE credit: AH, VL, WC. Effective: 2016 Fall Quarter.

CLA 172A—Early Greek Art and Architecture (4)
Lecture—3 hours; Term Paper. Examination of the origin and development of the major monuments of Greek art and architecture from the eighth century to the mid-fifth century B.C. (Same course as AHI 172A.) GE credit: AH, VL, WE. Effective: 2015 Fall Quarter.

CLA 172B—Later Greek Art and Architecture (4)
Lecture—3 hours; Term Paper. Study of the art and architecture of later Classical and Hellenistic Greece, from the mid-fifth century to the first century B.C. (Same course as AHI 172B.) GE credit: AH, VL. Effective: 2015 Fall Quarter.

CLA 173—Roman Art and Architecture (4)
Lecture—3 hours; Term Paper. Art and architecture of Rome and the Roman Empire, from the founding of Rome through the fourth century C.E. (Same course as AHI 173.) GE credit: AH, VL, WE. Effective: 2014 Fall Quarter.

Lecture—3 hours; Term Paper. Prerequisite(s): A lower division Classics course or consent of instructor. Cults, festivals, and rituals of Greek religious practice and their relationship to Greek social and political institutions, and to Greek private life. Includes discussion of major sanctuaries at Olympia, Delphi, Athens, and others. GE credit: AH, WC. Effective: 2017 Winter Quarter.

CLA 175—Architecture and Urbanism in Mediterranean Antiquity (4)
Extensive Writing; Lecture—3 hours. Architecture and urban development in the ancient Near East, Greece, and Rome. Special emphasis on the social structure of the ancient city as expressed in its architecture, and on the interaction between local traditions and the impact of Greco-Roman urbanism. (Same course as AHI 175.) GE credit: AH, VL, WC, WE. Effective: 2017 Spring Quarter.

CLA 176—Roman Religions (4)
Extensive Writing; Lecture/Discussion—3 hours. Roman religion from republic to empire. Gods, rituals, and festivals
at Rome; sacrifice, sacred places, magic. Gender roles, social status, national identity. Influences from other cultures, especially Egypt and the eastern Mediterranean. GE credit: AH, WC, WE. Effective: 2017 Fall Quarter.

**CLA 190—Senior Seminar (4)**
Seminar—3 hours; Term Paper. Prerequisite(s): Completion of one upper division course in Latin, Greek or Hebrew or consent of instructor. Advanced interdisciplinary study of a problem in the ancient Mediterranean world using the techniques of history, archaeology, art history and philology. May be repeated for credit. GE credit: AH, WE. Effective: 1997 Winter Quarter.

**CLA 194HA—Special Study for Honors Students (3)**
Discussion—1 hour; Independent Study; Term Paper. Prerequisite(s): Admission to the Honors Program; consent of faculty member supervising honors thesis. Directed reading, research and writing culminating in the completion of a senior honors thesis under the direction of faculty advisor. (P/NP grading only.) GE credit: AH. Effective: 2003 Fall Quarter.

**CLA 194HB—Special Study for Honors Students (3)**
Discussion—1 hour; Independent Study; Term Paper. Prerequisite(s): Admission to the Honors Program and consent of faculty member supervising honors thesis. Directed reading, research, and writing culminating in the completion of a senior honors thesis under the direction of faculty advisor. (P/NP grading only.) GE credit: AH. Effective: 2004 Winter Quarter.

**CLA 197TC—Community Tutoring in Classical Languages (1-5)**
Tutorial—1-5 hours. Prerequisite(s): Consent of Instructor. Supervised instruction of Greek or Latin in nearby schools by qualified students in department. May be repeated up to 5 unit(s). (P/NP grading only.) Effective: 1997 Winter Quarter.

**CLA 198—Directed Group Study (1-5)**
Variable. Prerequisite(s): Consent of Instructor. Upper division standing. (P/NP grading only.) Effective: 1999 Fall Quarter.

**CLA 199—Special Study for Advanced Undergraduates (1-5)**
Variable. Prerequisite(s): Consent of Instructor. Upper division standing. (P/NP grading only.) Effective: 1999 Fall Quarter.

**CLA 200A—Approaches to the Classical Past (4)**
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate student status or consent of instructor. Survey of major areas of classical scholarship, with special emphasis on the continuing impact of Mediterranean antiquity on later literature, history, art, and culture. Effective: 2016 Fall Quarter.

**CLA 200B—Approaches to the Classics Past (4)**
Independent Study—4 hours. Prerequisite(s): CLA 200A; Graduate student status or consent of instructor. Restricted to graduate students. Research project on major area of Classical scholarship, with special emphasis on the continuing impact of Mediterranean antiquity on later literature, history, art, and culture. Effective: 2016 Fall Quarter.

**CLA 201—Introduction to Classical Philology (4)**
Seminar—3 hours; Term Paper. Survey of major contemporary areas of classical scholarship with special attention devoted to current problems in literary and textual criticism. Effective: 1997 Winter Quarter.

**CLA 202—Homer (4)**
Seminar—3 hours; Term Paper. Readings in the Iliad and Odyssey: the origins and transmission of the poems. Effective: 1997 Winter Quarter.

**CLA 203—Vergil (4)**
Seminar—3 hours; Term Paper. Reading of selected books of the Bucolics, Georgics, and Aeneid. Emphasis will be placed on the study of Vergilian poetic language. Effective: 1997 Winter Quarter.

**CLA 204—Greek and Roman Comedy (4)**
Seminar—3 hours; Term Paper. Historical and critical problems in Aristophanes or New Comedy. May be repeated for credit. Effective: 1997 Winter Quarter.

**CLA 205—Latin Lyric and Elegy (4)**
Seminar—3 hours; Term Paper. Critical examination of the works of Catullus, Horace, or Propertius. May be repeated for credit. Effective: 1997 Winter Quarter.
CLA 206—Greek Historiography (4)
Seminar—3 hours; Term Paper. Development of historical writing in Greece. May be repeated for credit. Effective: 1997 Winter Quarter.

CLA 207—Greek Drama (4)
Seminar—3 hours; Term Paper. Literary and philological analysis of the plays of Euripides, Sophocles, or Aeschylus. May be repeated for credit. Effective: 1997 Winter Quarter.

CLA 299—Research (1-12)
Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

CLA 396—Teaching Assistant Training Practicum (1-4)
Variable. Prerequisite(s): Graduate standing. May be repeated for credit. (S/U grading only.) Effective: 2012 Fall Quarter.

The Classics department offers a Classical Civilization B.S. and minors in Arabic, Classical Civilization, Greek, and Latin.

Classics | ARB Courses

Courses in ARB:
ARB 001—Elementary Arabic 1 (5)
Lecture/Discussion—5 hours. Introduction to basic Arabic. Interactive and integrated presentation of listening, speaking, reading, and writing skills, including the alphabet and basic syntax. Focus on standard Arabic with basic skills in spoken Egyptian and/or one other colloquial dialect. GE credit: AH, WC. Effective: 2018 Fall Quarter.

ARB 001A—Accelerated Intensive Elementary Arabic (15)
Lecture/Discussion—15 hours. Special 12-week accelerated, intensive summer session course that combines the work of courses ARB 1, 2, and 3. Introduction to Modern Standard Arabic through development of all language skills in a cultural context with emphasis on communicative proficiency. Not open for credit to students who have completed ARB 001, ARB 002, or ARB 003. GE credit: AH, WC. Effective: 2018 Fall Quarter.

ARB 002—Elementary Arabic 2 (5)
Lecture/Discussion—5 hours. Prerequisite(s): ARB 001; or Consent of Instructor. Continuation of basic Arabic from course 1. Interactive and integrated presentation of listening, speaking, reading, and writing skills, including syntax. Focus on standard Arabic and limited use of spoken Egyptian and/or one other colloquial dialect. GE credit: AH, WC. Effective: 2018 Fall Quarter.

ARB 003—Elementary Arabic 3 (5)
Lecture/Discussion—5 hours. Prerequisite(s): ARB 002; or Consent of Instructor. Continuation of introduction to basic Arabic from courses 1 and 2. Interactive and integrated presentation of listening, speaking, reading, and writing skills, including syntax. Focus on standard Arabic with limited use of spoken Egyptian and/or one other colloquial dialect. GE credit: AH, WC. Effective: 2018 Fall Quarter.

ARB 021—Intermediate Arabic 21 (5)
Lecture/Discussion—4 hours. Prerequisite(s): ARB 003; or Consent of Instructor. Builds on courses 1, 2, and 3. Interactive and integrated presentation of listening, speaking, reading, and writing skills, including idiomatic expression. Focus on standard Arabic with limited use of Egyptian and/or one other colloquial dialect. GE credit: AH, OL, WC. Effective: 2018 Fall Quarter.

ARB 021A—Accelerated Intensive Intermediate Arabic (15)
Lecture/Discussion—15 hours. Special 12-week accelerated, intensive summer session course that combines the work of courses ARB 21, 22, and 23. Modern Standard Arabic through development of all language skills in a
cultural context with emphasis on communicative proficiency. Not open for credit to students who have completed ARB 021, ARB 022, or ARB 023. GE credit: AH, WC. Effective: 2018 Fall Quarter.

ARB 021C—Colloquial Egyptian Arabic (4)
Lecture/Discussion—3 hours; Lecture/Lab—1 hour. Prerequisite(s): ARB 003; or Consent of Instructor. Continuation of the Colloquial Egyptian Arabic covered in the first year of Arabic; courses 1, 2, and 3. May be repeated up to 1 time(s) if instruction material changes. GE credit: AH, OL, WC. Effective: 2018 Fall Quarter.

ARB 021L—Colloquial Levantine Arabic (4)
Lecture/Discussion—4 hours. Prerequisite(s): ARB 003; or Consent of Instructor. Continuation of colloquial Levantine Arabic presented in Arabic 1, 2, and 3. Integrated presentation of speaking and listening skills in colloquial Levantine Arabic, with reading and writing in Modern Standard Arabic that is related to Levantine cultural production and social life. GE credit: AH, OL, WC. Effective: 2018 Fall Quarter.

ARB 022—Intermediate Arabic 22 (4)
Lecture/Discussion—4 hours. Prerequisite(s): ARB 021; or Consent of Instructor. Continuation of course 21. Interactive and integrated presentation of listening, speaking, reading, and writing, including idiomatic expression. Focus on standard Arabic with limited use of Egyptian and/or one other colloquial dialect. GE credit: AH, OL, WC. Effective: 2018 Fall Quarter.

ARB 022C—Colloquial Egyptian Arabic (4)
Lecture/Discussion—3 hours; Lecture/Lab—1 hour. Prerequisite(s): ARB 021C; or Consent of Instructor. Continuation of Colloquial Egyptian Arabic covered in course 21C. May be repeated up to 1 time(s) if instruction material changes. GE credit: AH, OL, WC. Effective: 2018 Fall Quarter.

ARB 022L—Colloquial Levantine Arabic (4)
Lecture/Discussion—4 hours. Prerequisite(s): ARB 021L; or Consent of Instructor. Continuation of colloquial Levantine Arabic presented in Arabic 021L. Integrated presentation of speaking and listening skills in colloquial Levantine Arabic; reading and writing in Modern Standard Arabic related to Levantine social life. GE credit: AH, OL, WC. Effective: 2018 Fall Quarter.

ARB 023—Intermediate Arabic 23 (4)
Lecture/Discussion—4 hours. Prerequisite(s): ARB 022; or Consent of Instructor. Continuation of courses 21 and 22. Interactive and integrated presentation of Arabic listening, speaking, reading, and writing skills, including idiomatic expression. GE credit: AH, OL, WC. Effective: 2018 Fall Quarter.

ARB 023C—Colloquial Egyptian Arabic (4)
Lecture/Discussion—3 hours; Lecture/Lab—1 hour. Prerequisite(s): ARB 022C; or Consent of Instructor. Continuation of Colloquial Egyptian Arabic covered in course 22C. May be repeated up to 1 time(s) if instruction material changes. GE credit: AH, OL, WC. Effective: 2018 Fall Quarter.

ARB 023L—Colloquial Levantine Arabic (4)
Lecture/Discussion—4 hours. Prerequisite(s): ARB 022L; or Consent of Instructor. Continuation of colloquial Levantine Arabic presented in Arabic 022L. Integrated presentation of speaking and listening skills in colloquial Levantine Arabic; reading and writing in Modern Standard Arabic related to Levantine social life. GE credit: AH, OL, WC. Effective: 2018 Fall Quarter.

ARB 098—Directed Group Study (1-5)
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. Directed group study. May be repeated for credit. (P/NP grading only.) Effective: 2018 Fall Quarter.

ARB 099—Special Study for Undergraduates (1-5)
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. Special study. May be repeated for credit. (P/NP grading only.) Effective: 2018 Fall Quarter.

ARB 101A—Readings in Arabic: 600-1850 (4)
Discussion—3 hours; Extensive Writing. Prerequisite(s): ARB 123; or Consent of Instructor. Readings in Arabic. Poetry, prose literature, and selections from texts on religion, history, politics, science, philosophy and mysticism. May be repeated up to 1 time(s) Students can repeat the course if the instructor decides that they would benefit from additional practice working on the different selections from the same texts or if 50% or more of the texts are different. GE credit: AH, OL, SS, WC, WE. Effective: 2018 Fall Quarter.
ARB 121—Advanced Arabic (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): ARB 023; or Consent of Instructor. Review, refinement, and development of skills learned in intermediate Arabic through work with texts, video, and audio on cultural and social issues. Integrated approach to reading, writing, listening, speaking primarily standard Arabic, with limited use of one colloquial dialect. May be repeated up to 2 time(s) based on different readings. GE credit: AH, WC. Effective: 2018 Fall Quarter.

ARB 122—Advanced Arabic (4)
Lecture/Discussion—3 hours. Prerequisite(s): ARB 121; or Consent of Instructor. Continuation of course 121. Further development of advanced skills in reading, listening, writing, and speaking standard Arabic through work with texts, video, and audio on cultural and social issues. Limited use of one colloquial dialect. GE credit: AH, WC. Effective: 2018 Fall Quarter.

ARB 123—Advanced Arabic (4)
Lecture/Discussion—3 hours. Prerequisite(s): ARB 122; or Consent of Instructor. Continuation of course 122. Further development of advanced skills in reading, listening, writing, and speaking standard Arabic through work with texts, video, and audio on cultural and social issues. Limited use of one colloquial dialect. GE credit: AH, WC. Effective: 2018 Fall Quarter.

ARB 140—A Story for a Life: The Arabian Nights (4)
Lecture/Discussion—3 hours; Term Paper. In-depth exploration of The Arabian Nights, the best-known work of pre-modern Arabic literature and a major work of world literature. Analysis of the work in its historical context and in comparison to other frame tales in world literature. (Same course as COM 172 and MSA 121C.) GE credit: AH, WC, WE. Effective: 2018 Fall Quarter.

ARB 141—Readings in Modern Arabic Literature (4)
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): ARB 123; or Consent of Instructor. Readings of modern Arabic poetry and fiction in original format, assisted by instructor-prepared glossaries and other supplementary material. Readings to be followed by class discussion and short writing assignments in Arabic. Open to students at advanced proficiency in Arabic. May be repeated up to 1 time(s) if reading material changes. GE credit: AH, WC. Effective: 2018 Fall Quarter.

ARB 198—Directed Group Study (1-5)
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. Development of reading, writing, speaking, and listening skills in advanced Arabic. Materials may include al-Kitaab Part Two or Three, news articles and broadcasts, short stories, poetry, novels, essays, scripture, prophetic traditions, audio recordings, and television and film. May be repeated up to 4 time(s) content differs. Effective: 2018 Fall Quarter.

ARB 297—Directed Independent Study (4)
Discussion—1 hour; Independent Study. Prerequisite(s): Graduate standing or consent of instructor. Restricted to graduate students. Directed Independent Study on a topic culminating in a term paper. Independent Study may only be arranged with consent of the instructor when graduate seminars are unavailable. Topic varies by instructor. May be repeated up to 5 time(s) when no graduate seminars are available and topic differs. Effective: 2018 Fall Quarter.

ARB 299—Individual Study (1-12)
Variable. Prerequisite(s): Consent of Instructor. Graduate standing. Restricted to graduate students. May be repeated for credit. (S/U grading only.) Effective: 2018 Fall Quarter.

ARB 396—Teaching Assistant Training Practicum (1-4)
Variable. Prerequisite(s): Consent of Instructor. Graduate standing. Restricted to graduate students. May be repeated up to 18 time(s). (S/U grading only.) Effective: 2018 Fall Quarter.

Classics | CLA Courses

Courses in CLA:

CLA 001—Ancient Near East and Early Greece: 3000-500 B.C.E. (4)
Discussion—1 hour; Lecture—3 hours. Introduction to the literature, art, and social and political institutions of ancient Mesopotamia, Egypt, Palestine, and early Greece from 3000 to 500 B.C.E. GE credit: AH, WC, WE. Effective: 2015 Fall Quarter.

**CLA 025—The Classical Heritage in America (4)**
Lecture/Discussion—3 hours; Term Paper. Classical heritage in the New World, with emphasis on the United States from its colonial past to the present day. The reception of Greco-Roman thought and values as expressed in art, architecture, education, law, government, literature, and film. GE credit: ACGH, AH, WE. Effective: 2011 Fall Quarter.

**CLA 030—Greek and Latin Elements in English Vocabulary (3)**
Lecture—3 hours. Knowledge of Latin and Greek not required. Elements of Greek and Latin vocabulary for increased understanding of English word formation and improved ability to understand and retain unfamiliar words. Emphasis on Greek and Latin elements but other languages not neglected. Not open for credit to students who have completed CLA 030F. GE credit: AH. Effective: 2014 Fall Quarter.

**CLA 030F—Greek and Latin Elements in English Vocabulary (3)**
Lecture—3 hours. Restricted to incoming freshmen. Knowledge of Latin and Greek not required. Elements of Greek and Latin vocabulary for increased understanding of English word formation and improved ability to understand and retain unfamiliar words. Emphasis on Greek and Latin elements but other languages not neglected. Not open for credit to students who have completed CLA 030. GE credit: AH. Effective: 2014 Fall Quarter.

**CLA 031—Greek and Latin Elements in Technical Vocabulary (3)**
Lecture—3 hours. Knowledge of Greek and Latin not required. Elements of Greek and Latin vocabulary to increase understanding of English word formation in medical, scientific and technical terminology and improve ability to understand and retain unfamiliar terms. GE credit: AH. Effective: 1997 Winter Quarter.

**CLA 035—Food & Wine in the Ancient Mediterranean (3)**
Lecture/Discussion—3 hours. Social, political, and economic history of food and wine in ancient Mediterranean cultures. Development of agriculture and technology, trade, empires. Representation of food and wine in literary and visual arts, religious significance. GE credit: AH, VL, WC. Effective: 2019 Fall Quarter.

**CLA 040—Life and Economy in the Ancient Mediterranean World (4)**
Lecture/Discussion—3 hours; Term Paper. Characterization of ancient Mediterranean economies, with emphasis on

CLA 050—Ancient Science (4)
Discussion—1 hour; Lecture—3 hours. Study of science in ancient Greece and Rome; consideration of its social context; concentration on the basic concepts of physics, the world of medicine and biology, the history of mathematics, and the practices of astronomy, astrology and meteorology. (Same course as STS 050.) GE credit: AH, WC, WE. Effective: 2016 Fall Quarter.

CLA 051—Ancient Medicine (4)
Discussion—1 hour; Lecture—3 hours. Medicine in ancient Greece and Rome; physiological conceptions of the body within scientific and social frameworks; exploration of sanitation technology and health in antiquity; medical treatment of the female body; medicine and the economy. (Same course as STS 051.) GE credit: AH, WC, WE. Effective: 2016 Winter Quarter.

CLA 098—Directed Group Study (1-5)
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. May be repeated up to 2 time(s). (P/NP grading only.) Effective: 2007 Fall Quarter.

CLA 101A—Topics in Ancient Mediterranean Civilizations (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): A lower division Classics course or consent of instructor. Topics may be ordered by time or place (e.g. Hellenistic Egypt) or by theme or genre (e.g. slavery in the ancient world). May be repeated up to 2 time(s) when topic differs. GE credit: AH, WC, WE. Effective: 2016 Fall Quarter.

CLA 101B—Topics in Greek Civilization (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): A lower division Classics course or consent of instructor. Topics may be ordered by time or place (e.g. the world of Homer) or by theme or genre (e.g. the Greek art of war). May be repeated up to 2 time(s) when topic differs. GE credit: AH, WC, WE. Effective: 2016 Fall Quarter.

CLA 101C—Topics in Roman Civilization (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): A lower division Classics course or consent of instructor. Topics may be ordered by time or place (e.g. Julius Caesar and his age) or by theme or genre (e.g. gladiators: blood in the arena). May be repeated up to 2 time(s) when topic differs. GE credit: AH, WC, WE. Effective: 2016 Fall Quarter.

CLA 101D—Topics in Classical Receptions (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): A lower division Classics course or consent of instructor. Topics in classical reception from late antiquity to the present. Topics may be ordered by time or place (e.g. the classical tradition in Washington, D.C.) or by theme or genre (e.g. cinematic representations of the ancient world). May be repeated up to 2 time(s) when topic differs. GE credit: AH, WC, WE. Effective: 2016 Fall Quarter.

CLA 101E—Topics in Ancient Science (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): CLA 050 or CLA 051; or Consent of Instructor. Topics may be ordered by discipline (e.g. ancient medicine), historical figure (e.g. Galen) or topic (e.g. science and the economy). May be repeated up to 2 time(s) when topic differs. GE credit: AH, WE. Effective: 2016 Spring Quarter.

CLA 102—Film and the Classical World (4)
Film Viewing—2.5 hours; Lecture—3 hours. Prerequisite(s): A lower division Classics course or consent of instructor. Classical World as portrayed in films. Viewings and discussions of modern versions of ancient dramas, modern dramas set in the Ancient Mediterranean world, and films imbued with classical themes and allusions. Supplementary readings in ancient literature and mythology. GE credit: AH, WE. Effective: 2016 Spring Quarter.

CLA 103—Love and Beauty in the Ancient World (4)
Extensive Writing; Lecture/Discussion—3 hours. Philosophical and literary traditions connecting love, beauty, and goodness in ancient thought. Moral and ethical implications, ideologies of sexuality and gender; transmission into the medieval and modern world. GE credit: AH, WC, WE. Effective: 2017 Fall Quarter.

CLA 105—Theory and Practice of Greek and Roman Mythology (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): A lower division Classics course or consent of instructor. Thematically focused study of mythological narratives. Emphasis on the historical development of myths and the variety of theoretical approaches for the study of myth. GE credit: AH, WE. Effective: 2016 Fall Quarter.
CLA 110—Origins of Rhetoric (4)
Lecture—3 hours; Term Paper. Prerequisite(s): A lower division Classics course or consent of instructor. Issues in the development of rhetoric from its origins in ancient Greece to A.D.430. Special attention to works of Plato, Aristotle, Cicero, and Quintilian. Role of grammar and rhetoric in schools of Roman Empire. The Christian rhetoric of Saint Augustine. Not open for credit to students who have completed RCM 110 or CMN 110. (Former course RCM 110.). GE credit: AH, WE. Effective: 2016 Spring Quarter.

CLA 111—Forms of Knowledge in the Ancient World (4)
Extensive Writing; Lecture/Discussion—3 hours. History of knowledge preservation and transfer in the ancient Mediterranean. Oral tradition, technology, innovations, forms of writing, libraries, ancient scholarship, cultural exchange and influence. GE credit: AH, VL, WC, WE. Effective: 2017 Fall Quarter.

CLA 120—Greek and Roman Historiography (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): A lower division Classics course or consent of instructor. Survey of Greek and Roman historical writing in English translation. Authors to be read may include Herodotus, Thucydides, Sallust, Livy, and Tacitus. Focus on the development of historical writing as a literary genre. GE credit: AH, WC, WE. Effective: 2016 Fall Quarter.

CLA 125—Roman Political Thought (4)
Lecture—3 hours; Term Paper. Prerequisite(s): A lower division Classics course or consent of instructor. Survey of Roman thinking about politics, as expressed both in formal theorizing and in a variety of other contexts, including oratory, historiography, and epic. Study of Roman political reflection in its historical, cultural, and literary context. GE credit: AH, WC, WE. Effective: 2016 Fall Quarter.

CLA 140—Homer and Ancient Epic (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): A lower division Classics course or consent of instructor. Reading of the classical epics of Homer (Iliad, Odyssey) and Virgil (Aeneid) in English. Discussion of techniques of composition, the beliefs and values of their respective societies, and the generic tradition of ancient epic. GE credit: AH, WC, WE. Effective: 2016 Fall Quarter.

CLA 141—Greek and Roman Comedy (4)
Conference—1 hour; Lecture—3 hours. Prerequisite(s): A lower division Classics course or consent of instructor. Readings in Aristophanes, Menander, Plautus, and Terence; lectures on the development of ancient comedy. GE credit: AH, WE. Effective: 2016 Spring Quarter.

CLA 142—Greek and Roman Novel (4)
Lecture—3 hours; Term Paper. Prerequisite(s): A lower division Classics course or consent of instructor. Examination of the ancient Greek romances and their development into the grotesque realism of Petronius' Satyricon, and the religious mysticism of Apuleius' The Golden Ass. GE credit: AH, WC, WE. Effective: 2016 Spring Quarter.

CLA 143—Greek Tragedy (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): A lower division Classics course or consent of instructor. Reading in English of selected plays of Aeschylus, Sophocles, and Euripides. Discussion of the development and influence of Athenian tragedy. GE credit: AH, WE. Effective: 2016 Fall Quarter.

CLA 150—Socrates and Classical Athens (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): A lower division Classics course or consent of instructor. Study of the major sources of our knowledge of Socrates, assessment of his role in the politics and culture of ancient Athens, his method of teaching, and his place in Western thought. GE credit: AH, WC, WE. Effective: 2016 Fall Quarter.

CLA 170—Cultural Interactions in the Ancient Mediterranean World (4)
Lecture/Discussion—3 hours; Term Paper. Exploration of the role of colonial encounters in the spread of ideas throughout the ancient Mediterranean from an archaeological and artistic perspective. Emphasis on material and literary expressions of culture, trade routes, and theories pertaining to culture contact. GE credit: AH, VL, WC, WE. Effective: 2016 Fall Quarter.

CLA 171—Mediterranean Bronze Age Archaeology (4)
Extensive Writing; Lecture—3 hours. Prerequisite(s): A lower division Classics course or consent of instructor. Archaeological monuments of the ancient Near East, including Egypt and Mesopotamia, and of Greece and Crete during the Bronze Age. Special emphasis on the problems of state formation and on the co-existence and collapse of Bronze Age societies. GE credit: AH, WC. Effective: 2016 Spring Quarter.
CLA 172A—Early Greek Art and Architecture (4)
Lecture—3 hours; Term Paper. Examination of the origin and development of the major monuments of Greek art and architecture from the eighth century to the mid-fifth century B.C. (Same course as AHI 172A.) GE credit: AH, VL, WE. Effective: 2015 Fall Quarter.

CLA 172B—Later Greek Art and Architecture (4)
Lecture—3 hours; Term Paper. Study of the art and architecture of later Classical and Hellenistic Greece, from the mid-fifth century to the first century B.C. (Same course as AHI 172B.) GE credit: AH, VL. Effective: 2015 Fall Quarter.

CLA 173—Roman Art and Architecture (4)
Lecture—3 hours; Term Paper. Art and architecture of Rome and the Roman Empire, from the founding of Rome through the fourth century C.E. (Same course as AHI 173.) GE credit: AH, VL, WE. Effective: 2014 Fall Quarter.

CLA 174—Greek Religion and Society (4)
Lecture—3 hours; Term Paper. Prerequisite(s): A lower division Classics course or consent of instructor. Cults, festivals, and rituals of Greek religious practice and their relationship to Greek social and political institutions, and to Greek private life. Includes discussion of major sanctuaries at Olympia, Delphi, Athens, and others. GE credit: AH, WC. Effective: 2017 Winter Quarter.

Extensive Writing; Lecture—3 hours. Architecture and urban development in the ancient Near East, Greece, and Rome. Special emphasis on the social structure of the ancient city as expressed in its architecture, and on the interaction between local traditions and the impact of Greco-Roman urbanism. (Same course as AHI 175.) GE credit: AH, VL, WC, WE. Effective: 2017 Spring Quarter.

CLA 176—Roman Religions (4)
Extensive Writing; Lecture/Discussion—3 hours. Roman religion from republic to empire. Gods, rituals, and festivals at Rome; sacrifice, sacred places, magic. Gender roles, social status, national identity. Influences from other cultures, especially Egypt and the eastern Mediterranean. GE credit: AH, WC, WE. Effective: 2017 Fall Quarter.

CLA 190—Senior Seminar (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Completion of one upper division course in Latin, Greek or Hebrew or consent of instructor. Advanced interdisciplinary study of a problem in the ancient Mediterranean world using the techniques of history, archaeology, art history and philology. May be repeated for credit. GE credit: AH, WE. Effective: 1997 Winter Quarter.

CLA 194HA—Special Study for Honors Students (3)
Discussion—1 hour; Independent Study; Term Paper. Prerequisite(s): Admission to the Honors Program; consent of faculty member supervising honors thesis. Directed reading, research and writing culminating in the completion of a senior honors thesis under the direction of faculty advisor. (P/NP grading only.) GE credit: AH. Effective: 2003 Fall Quarter.

CLA 194HB—Special Study for Honors Students (3)
Discussion—1 hour; Independent Study; Term Paper. Prerequisite(s): Admission to the Honors Program and consent of faculty member supervising honors thesis. Directed reading, research, and writing culminating in the completion of a senior honors thesis under the direction of faculty advisor. (P/NP grading only.) GE credit: AH. Effective: 2004 Winter Quarter.

CLA 197TC—Community Tutoring in Classical Languages (1-5)
Tutorial—1-5 hours. Prerequisite(s): Consent of Instructor. Supervised instruction of Greek or Latin in nearby schools by qualified students in department. May be repeated up to 5 unit(s). (P/NP grading only.) Effective: 1997 Winter Quarter.

CLA 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Upper division standing. (P/NP grading only.) Effective: 1999 Fall Quarter.

CLA 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. Upper division standing. (P/NP grading only.) Effective: 1999 Fall Quarter.

CLA 200A—Approaches to the Classical Past (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate student status or consent of instructor. Survey of major
areas of classical scholarship, with special emphasis on the continuing impact of Mediterranean antiquity on later literature, history, art, and culture. Effective: 2016 Fall Quarter.

**CLA 200B—Approaches to the Classics Past (4)**
Independent Study—4 hours. Prerequisite(s): CLA 200A; Graduate student status or consent of instructor. Restricted to graduate students. Research project on major area of Classical scholarship, with special emphasis on the continuing impact of Mediterranean antiquity on later literature, history, art, and culture. Effective: 2016 Fall Quarter.

**CLA 201—Introduction to Classical Philology (4)**
Seminar—3 hours; Term Paper. Survey of major contemporary areas of classical scholarship with special attention devoted to current problems in literary and textual criticism. Effective: 1997 Winter Quarter.

**CLA 202—Homer (4)**
Seminar—3 hours; Term Paper. Readings in the Iliad and Odyssey: the origins and transmission of the poems. Effective: 1997 Winter Quarter.

**CLA 203—Vergil (4)**
Seminar—3 hours; Term Paper. Reading of selected books of the Bucolics, Georgics, and Aeneid. Emphasis will be placed on the study of Vergilean poetic language. Effective: 1997 Winter Quarter.

**CLA 204—Greek and Roman Comedy (4)**
Seminar—3 hours; Term Paper. Historical and critical problems in Aristophanes or New Comedy. May be repeated for credit. Effective: 1997 Winter Quarter.

**CLA 205—Latin Lyric and Elegy (4)**
Seminar—3 hours; Term Paper. Critical examination of the works of Catullus, Horace, or Propertius. May be repeated for credit. Effective: 1997 Winter Quarter.

**CLA 206—Greek Historiography (4)**
Seminar—3 hours; Term Paper. Development of historical writing in Greece. May be repeated for credit. Effective: 1997 Winter Quarter.

**CLA 207—Greek Drama (4)**
Seminar—3 hours; Term Paper. Literary and philological analysis of the plays of Euripides, Sophocles, or Aeschylus. May be repeated for credit. Effective: 1997 Winter Quarter.

**CLA 299—Research (1-12)**
Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

**CLA 396—Teaching Assistant Training Practicum (1-4)**
Variable. Prerequisite(s): Graduate standing. May be repeated for credit. (S/U grading only.) Effective: 2012 Fall Quarter.

**Classics | GRK Courses**

**Courses in GRK:**

**GRK 001—Elementary Greek (5)**

**GRK 002—Elementary Greek (5)**
Lecture—5 hours. Prerequisite(s): GRK 001; Or the equivalent. Continuation of course 1. GE credit: AH. Effective: 2016 Spring Quarter.

**GRK 002NT—Elementary New Testament Greek (1)**
Lecture—1 hour. Prerequisite(s): GRK 002 (can be concurrent); Concurrent attendance required. Supplementary study of New Testament Greek. GE credit: AH. Effective: 2016 Spring Quarter.

**GRK 003—Intermediate Greek (5)**
Lecture—5 hours. Prerequisite(s): GRK 002; Or the equivalent. Continuation of course 2. Selected readings from Greek authors. GE credit: AH. Effective: 2016 Spring Quarter.

**GRK 003NT—Elementary New Testament Greek (1)**
Lecture—1 hour. Prerequisite(s): GRK 003 (can be concurrent); or Consent of Instructor. Concurrent attendance required. Supplementary study of New Testament Greek. GE credit: AH. Effective: 2016 Spring Quarter.
GRK 098—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

GRK 100—Readings in Greek Prose (4)
Lecture/Discussion—4 hours. Prerequisite(s): GRK 003; Or equivalent. Review of Greek morphology, syntax, and vocabulary. Readings in Greek prose authors, including Xenophon. GE credit: AH. Effective: 2015 Fall Quarter.

GRK 101—Plato (4)
Lecture—3 hours; Term Paper. Prerequisite(s): GRK 100; or Consent of Instructor. GE credit: AH, WE. Effective: 2016 Fall Quarter.

GRK 102—Euripides (4)
Lecture—3 hours; Term Paper. Prerequisite(s): GRK 100; or Consent of Instructor. GE credit: AH, WE. Effective: 2016 Spring Quarter.

GRK 103A—Homer: Iliad (4)
Recitation—3 hours; Term Paper. Prerequisite(s): GRK 003 GE credit: AH, WE. Effective: 1997 Winter Quarter.

GRK 103B—Homer: Odyssey (4)
Recitation—3 hours; Term Paper. Prerequisite(s): GRK 100; or Consent of Instructor. GE credit: AH, WE. Effective: 2016 Fall Quarter.

GRK 104—Menander (4)
Lecture—3 hours; Term Paper. Prerequisite(s): GRK 100; or Consent of Instructor. GE credit: AH, WE. Effective: 2016 Spring Quarter.

GRK 105—Attic Orators (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): GRK 100; or Consent of Instructor. Selected readings from the orators of 4th and 5th century Athens. May be repeated up to 1 time(s) if topic differs and with consent of instructor. GE credit: AH, WC, WE. Effective: 2016 Fall Quarter.

GRK 106—Greek Hexameter Poetry (4)
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): GRK 100; or Consent of Instructor. Selected readings from ancient Greek hexameter poetry. Wisdom poetry, hymns, epyllia, idylls, epic, natural history and other texts from the hexameter tradition. May be repeated for credit. May be repeated for credit when topic differs. GE credit: AH, WC, WE. Effective: 2017 Fall Quarter.

GRK 110—Readings in the Greek Novel (4)
Lecture—3 hours; Term Paper. Prerequisite(s): GRK 100; or Consent of Instructor. Selected readings from Greek prose fiction of the late classical, Hellenistic and imperial periods. May be repeated up to 2 time(s) with consent of instructor. GE credit: AH, WE. Effective: 2016 Fall Quarter.

GRK 111—Sophocles (4)
Lecture—3 hours; Term Paper. Prerequisite(s): GRK 100; or Consent of Instructor. GE credit: AH, WE. Effective: 2016 Fall Quarter.

GRK 112—Aristophanes (4)
Lecture—3 hours; Term Paper. Prerequisite(s): GRK 100; or Consent of Instructor. GE credit: AH, WE. Effective: 2016 Fall Quarter.

GRK 113—Thucydides (4)
Lecture—3 hours; Term Paper. Prerequisite(s): GRK 100; or Consent of Instructor. GE credit: AH, WE. Effective: 2016 Fall Quarter.

GRK 114—Lyric Poetry (4)
Lecture—3 hours; Term Paper. Prerequisite(s): GRK 100; or Consent of Instructor. GE credit: AH, WE. Effective: 2016 Spring Quarter.

GRK 115—Aeschylus (4)
Lecture—3 hours; Term Paper. Prerequisite(s): GRK 100; or Consent of Instructor. GE credit: AH, WE. Effective: 2016 Spring Quarter.

GRK 116—Herodotus (4)
Lecture—3 hours; Term Paper. Prerequisite(s): GRK 100; or Consent of Instructor. GE credit: AH, WE. Effective: 2016 Spring Quarter.
GRK 121—Greek Prose Composition (4)
Lecture/Discussion—4 hours. Prerequisite(s): GRK 100; or Consent of Instructor. Intensive grammar and vocabulary review through exercises in Greek prose composition. GE credit: AH. Effective: 2016 Fall Quarter.

GRK 130—Readings in Later Greek (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): GRK 100; or Consent of Instructor. Translation and discussion of selected readings from Hellenistic to Byzantine Greek literature. GE credit: AH, WE. Effective: 2016 Fall Quarter.

GRK 131—Readings in Ancient Greek Philosophy and Science (4)
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): GRK 100 (can be concurrent); or Consent of Instructor. Selected readings from ancient Greek philosophical and scientific writers. Texts on logical truth and empirical sense data, material and social contexts of ancient Greek philosophy and science. May be repeated for credit if topics differ. GE credit: AH, WC, WE. Effective: 2017 Fall Quarter.

GRK 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

GRK 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

Classics | HEB Courses

Courses in HEB:

HEB 001—Elementary Hebrew (5)
Laboratory—1 hour; Lecture/Discussion—4 hours. Speaking, listening, comprehension, reading and writing fundamentals of modern Hebrew. GE credit: AH. Effective: 1998 Fall Quarter.

HEB 001A—Accelerated Intensive Elementary Hebrew (15)
Lecture/Discussion—15 hours. Special 12 week accelerated, intensive summer session course that combines the work of courses 1, 2, and 3. Introduction to Hebrew grammar and development of language skills in a cultural context with emphasis on communication. Not open to students who have completed course HEB 001, HEB 002, or HEB 003. GE credit: AH, WC. Effective: 2008 Spring Quarter.

HEB 002—Elementary Hebrew (5)
Laboratory—1 hour; Lecture/Discussion—4 hours. Prerequisite(s): HEB 001; Or the equivalent. Speaking, listening, comprehension, reading and writing fundamentals of modern Hebrew. GE credit: AH, OL, WC. Effective: 2017 Fall Quarter.

HEB 003—Elementary Hebrew (5)
Laboratory—1 hour; Lecture/Discussion—4 hours. Prerequisite(s): HEB 002; Or the equivalent. Speaking, listening comprehension, reading and writing fundamentals of modern Hebrew. GE credit: AH, OL, WC. Effective: 2017 Fall Quarter.

HEB 010—Introduction to Biblical Hebrew (3)
Lecture/Discussion—3 hours. Introduction to the Hebrew Alphabet and basic grammar rules of the biblical language. Students will learn to read most any biblical text and learn how to find the meaning of words by their roots and morphological structure. GE credit: AH, WC. Effective: 2015 Winter Quarter.

HEB 011—Introduction to Biblical Hebrew (3)

HEB 012—Introduction to Biblical Hebrew (3)

HEB 021—Intermediate Modern Hebrew I (4)
Lecture/Discussion—4 hours. Prerequisite(s): HEB 003; Consent of Instructor. Development and refinement of grammar, composition, and language skills required for reading literary texts and conversing about contemporary topics at an advanced level. History of the Hebrew language. Not open to students who have taken course HEB 100 or HEB 100A. GE credit: AH, OL, WC. Effective: 2017 Fall Quarter.
HEB 022—Intermediate Modern Hebrew II (4)
Lecture/Discussion—4 hours. Prerequisite(s): HEB 021; Consent of Instructor. Continued development and refinement of grammar, composition, and language skills required for reading literary texts and conversing about contemporary topics at an advanced level. History of the Hebrew language. Not open to students who have taken HEB 101 or HEB 100B. GE credit: AH, OL, WC. Effective: 2017 Fall Quarter.

HEB 023—Intermediate Modern Hebrew III (4)
Lecture/Discussion—4 hours. Prerequisite(s): HEB 022; Consent of Instructor. Continued development of grammar, composition, language skills required for reading literary texts and conversing about contemporary topics at an advanced level. History of the Hebrew language. Further development of writing and translating skills. Not open to students who have taken HEB 100C or HEB 102. GE credit: AH, OL, WC. Effective: 2018 Spring Quarter.

HEB 098—Directed Group Study (1-5)
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. Directed group study. May be repeated for credit. (P/NP grading only.) Effective: 2017 Winter Quarter.

HEB 099—Special Study for Undergraduates (1-5)
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. Special study. May be repeated for credit. (P/NP grading only.) Effective: 2017 Winter Quarter.

HEB 100AN—Advanced Modern Hebrew I (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): HEB 023; or Consent of Instructor. Those who took course 100A as second-year Hebrew may take course 100AN. Third year Hebrew. Advanced grammar and composition. Focus on reading of literary texts, oral skills and accuracy in writing. GE credit: AH. Effective: 2006 Fall Quarter.

HEB 100BN—Advanced Modern Hebrew II (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): HEB 100AN; or Consent of Instructor. Those who took course 100B as second-year Hebrew may take course 100BN. Third year Hebrew. Advanced grammar and composition. Focus on reading of literary texts, oral skills and accuracy in writing. GE credit: AH. Effective: 2006 Winter Quarter.

HEB 100CN—Advanced Modern Hebrew III (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): HEB 100BN Third year Hebrew. Advanced grammar and composition. Focus on reading of literary texts, oral skills and accuracy in writing. Students who have taken course 100C as 2nd year Hebrew may take course 100CN. GE credit: AH. Effective: 2006 Spring Quarter.

Classics | HIN Courses

Courses in HIN:

HIN 001—Elementary Hindi/Urdu I (5)
Lecture/Discussion—5 hours. Introduction to Devanagari Script through development of all language skills in a cultural context with emphasis on communicative proficiency. GE credit: AH, WC. Effective: 2014 Fall Quarter.

HIN 001A—Accelerated Intensive Elementary Hindi (15)
Lecture/Discussion—15 hours. Special 12-week accelerated, intensive summer session course that combines the work of courses 1, 2, and 3. Introduction to Devnagari Script through development of all language skills in cultural context with emphasis on communicative proficiency. Not open for credit to students who have completed course HIN 001, HIN 002 or HIN 003. GE credit: AH, WC. Effective: 2014 Summer Special Session.

HIN 002—Elementary Hindi/Urdu II (5)
Lecture/Discussion—5 hours. Prerequisite(s): HIN 001 Continuation of course 1. Devanagari Script through development of all language skills in a cultural context with emphasis on communicative proficiency. GE credit: AH, WC. Effective: 2015 Winter Quarter.

HIN 003—Elementary Hindi/Urdu III (5) **Review all entries**
Lecture/Discussion—5 hours. Prerequisite(s): HIN 002 Introduction to Devanagari Script through development of all language skills in a cultural context with emphasis on communicative proficiency. GE credit: AH, WC. Effective: 2015 Spring Quarter.

HIN 003—Elementary Hindi/Urdu III (5) **Review all entries**
Lecture/Discussion—5 hours. Prerequisite(s): HIN 002 Introduction to listening, speaking, reading, and writing skills
in Hindi using the Devanagari script and brief introduction to basic literacy in Urdu using the Nasataiq script. GE credit: AH, WC. Effective: 2019 Winter Quarter.

**HIN 021—Intermediate Hindi/Urdu I (4)**
Lecture/Discussion—4 hours. Prerequisite(s): HIN 003 Intermediate level course for students who have completed Elementary Hindi/Urdu or the equivalent. Students will continue to practice their skills in listening, speaking, reading and writing in Hindi and Urdu. GE credit: AH, OL, WC. Effective: 2017 Fall Quarter.

**HIN 022—Intermediate Hindi/Urdu II (4)**
Lecture/Discussion—4 hours. Prerequisite(s): HIN 021 Intermediate level course where students will continue to practice their skills in listening, speaking, reading and writing in Hindi and Urdu. GE credit: AH, OL, WC. Effective: 2017 Fall Quarter.

**HIN 023—Intermediate Hindi/Urdu III (4)**
Lecture/Discussion—4 hours. Prerequisite(s): HIN 022 Intermediate level course where students will continue to practice their skills in listening, speaking, reading and writing in Hindi and Urdu. GE credit: AH, OL, WC. Effective: 2017 Fall Quarter.

**HIN 098—Directed Group Study (1-5)**
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. Directed group study. May be repeated for credit. (P/NP grading only.) Effective: 2017 Winter Quarter.

**HIN 099—Special Study for Undergraduates (1-5)**
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. Special study. May be repeated for credit. (P/NP grading only.) Effective: 2017 Winter Quarter.

**HIN 396—Teaching Assistant Training Practicum (1-4)**
Variable—1-4 hours. Prerequisite(s): Consent of Instructor. Restricted to graduate students. Teaching practicum. May be repeated up to 18 time(s). (S/U grading only.) Effective: 2017 Winter Quarter.

**Classics | LAT Courses**

**Courses in LAT:**

**LAT 001—Elementary Latin (5)**
Lecture—5 hours. Introduction to basic grammar and vocabulary and development of translation skills with emphasis on Latin to English. Students who have successfully completed LAT 002 or LAT 003 in the 10th grade or higher grade in high school may receive unit credit for this course on a P/NP grading basis only; although a passing grade will be charged to the student's P/NP option, no petition is required; all other students will receive a letter grade unless a P/NP petition is filed. GE credit: AH. Effective: 1997 Winter Quarter.

**LAT 002—Elementary Latin (5)**
Lecture—5 hours. Prerequisite(s): LAT 001; Or equivalent. Continuation of course 1. GE credit: AH. Effective: 2016 Spring Quarter.

**LAT 003—Intermediate Latin (5)**
Lecture—5 hours. Prerequisite(s): LAT 002; Or equivalent. Continuation of course 2. Selected readings from Latin authors. GE credit: AH. Effective: 2016 Spring Quarter.

**LAT 098—Directed Group Study (1-5)**
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

**LAT 100—Readings in Latin Prose (4)**
Lecture/Discussion—4 hours. Prerequisite(s): LAT 003; Or equivalent. Review of Latin morphology, grammar, and vocabulary. Readings in prose authors, including Julius Caesar. GE credit: AH. Effective: 2016 Fall Quarter.

**LAT 101—Livy (4)**
Lecture—3 hours; Term Paper. Prerequisite(s): LAT 100; or Consent of Instructor. Livy GE credit: AH, WE. Effective: 2016 Spring Quarter.

**LAT 102—Roman Comedy (5)**
Lecture—4 hours; Term Paper. Prerequisite(s): LAT 100; or Consent of Instructor. Roman comedy. GE credit: AH, WE. Effective: 2016 Spring Quarter.
LAT 103—Vergil: Aeneid (4)
Lecture—3 hours; Term Paper. Prerequisite(s): LAT 100; or Consent of Instructor. Vergil: Aeneid. GE credit: AH, WE. Effective: 2016 Spring Quarter.

LAT 104—Sallust (4)
Lecture—3 hours; Term Paper. Prerequisite(s): LAT 100; or Consent of Instructor. Sallust. GE credit: AH, WE. Effective: 2016 Spring Quarter.

LAT 105—Catullus (4)
Lecture—3 hours; Term Paper. Prerequisite(s): LAT 100; or Consent of Instructor. Catullus. GE credit: AH, WE. Effective: 2016 Spring Quarter.

LAT 106—Horace: Odes and Epodes (4)
Lecture—3 hours; Term Paper. Prerequisite(s): LAT 100; or Consent of Instructor. Horace: Odes and Epodes. GE credit: AH, WE. Effective: 2016 Spring Quarter.

LAT 108—Horace: Satires and Epistles (4)
Lecture—3 hours; Term Paper. Prerequisite(s): LAT 100; or Consent of Instructor. Horace: Satires and Epistles. GE credit: AH, WE. Effective: 2016 Spring Quarter.

LAT 109—Roman Elegy (4)
Lecture—3 hours; Term Paper. Prerequisite(s): LAT 100; or Consent of Instructor. Roman elegy. GE credit: AH, WE. Effective: 2016 Spring Quarter.

LAT 110—Ovid (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): LAT 100; or equivalent. Translation and discussion of selected readings from the works of Ovid. May be repeated up to 1 time(s) when topic differs and with consent of instructor. GE credit: AH, WC, WE. Effective: 2011 Fall Quarter.

LAT 112—Cicero (4)
Recitation—3 hours; Term Paper. Prerequisite(s): LAT 100; or equivalent. Translation and discussion of selected readings from the works of Cicero. May be repeated up to 1 time(s) if readings vary and with consent of instructor. GE credit: AH, WE. Effective: 2011 Fall Quarter.

LAT 115—Lucretius (4)
Lecture—3 hours; Term Paper. Prerequisite(s): LAT 100; or Consent of Instructor. Lucretius. GE credit: AH, WE. Effective: 2016 Spring Quarter.

LAT 116—Vergil: Eclogues and Georgics (4)
Lecture—3 hours; Term Paper. Prerequisite(s): LAT 100; or Consent of Instructor. Vergil: Eclogues and Georgics. GE credit: AH, WE. Effective: 2016 Spring Quarter.

LAT 118—Roman Historians (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): LAT 100; or equivalent. Readings in Latin from one or more of the major Roman historians and biographers. Authors may include Sallust, Nepos, Livy, Tacitus, Suetonius, and Ammianus Marcellinus. GE credit: AH, WC, WE. Effective: 2011 Fall Quarter.

LAT 119—Readings in Republican Latin Literature (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): LAT 100; or equivalent. Translation and discussion of selected readings from Republican Latin literature. May be repeated for credit when topics vary. GE credit: AH, WC, WE. Effective: 2012 Summer Session 2.

LAT 120—Readings in Imperial Latin Literature (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): LAT 100; or equivalent. Readings in Imperial Latin literature. May be repeated up to 2 time(s) when topic varies. GE credit: AH, WC, WE. Effective: 2014 Winter Quarter.

LAT 121—Latin Prose Composition (4)
Lecture/Discussion—4 hours. Prerequisite(s): LAT 100; Or equivalent. Intensive grammar and vocabulary review through exercises in Latin prose composition. GE credit: AH. Effective: 2015 Fall Quarter.

LAT 122—Early Christian Writers (4)
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): LAT 100 (can be concurrent); or Consent of Instructor. Latin style of selected early Christian writers. Topics may include: Latin translations of Greek and Hebrew scriptures, Christian Latin, with focus on North Africa, Palestine, or Spain; High literary Christian Latin; Christian Latin oratorical style. GE credit: AH, WC, WE. Effective: 2017 Fall Quarter.
LAT 125—Medieval Latin (4)
Lecture—3 hours; Term Paper. Prerequisite(s): LAT 100; or Consent of Instructor. Selected readings from the Vulgate and various medieval authors provide an introduction to the developments in the Latin Language and literature from the fourth to the fifteenth centuries. GE credit: AH, WE. Effective: 2016 Spring Quarter.

LAT 130—Readings in Late Latin (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): LAT 100; or Consent of Instructor. Translation and discussion of selected readings from late imperial-early medieval Christian and pagan literature. GE credit: AH, WC, WE. Effective: 2016 Fall Quarter.

LAT 135—Themes in Latin Literature (4)
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): LAT 100 (can be concurrent); or Consent of Instructor. Readings in Latin that trace a theme across times, genres, and authors. May be repeated for credit if topics differ. GE credit: AH, WC, WE. Effective: 2017 Fall Quarter.

LAT 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study. (P/NP grading only.) Effective: 2016 Spring Quarter.

LAT 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. Special study for advanced undergraduates. (P/NP grading only.) Effective: 2016 Fall Quarter.

Climate Science & Policy Minor; Environmental Science & Policy

Climate Science & Policy Minor; Environmental Science & Policy | Climate Science & Policy Minor

(College of Agricultural and Environmental Sciences)

Marcel Holyoak, Ph.D., Chairperson of the Department

Mark N. Lubell, Ph.D., Vice Chairperson

Department Office. 2132 Wickson Hall; 530-752-3026; http://desp.ucdavis.edu/

Faculty. http://desp.ucdavis.edu/faculty

The Climate Science and Policy minor provides students with basic background in climate change science as well as mitigation and adaptation strategies. Students will gain understanding of scientific, social, institutional, and economic dimensions of climate change.

Minor Advisor. M. Springborn (Environmental Science and Policy)

Units: 25
Climate Science & Policy Minor; Environmental Science & Policy | ESP Courses

Courses in ESP:

**ESP 001—Environmental Analysis (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): UWP 001 (can be concurrent) or UWP 001Y (can be concurrent) or UWP 001V (can be concurrent) or ENL 003 (can be concurrent); Or equivalent; sophomore standing; ECN 001A and BIS 002B recommended. Analysis of the physical, biological, and social interactions which constitute environmental problems. Emphasis on analysis of environmental problems, the consequences of proposed solutions, and the interaction of environmental science and public policy in creating solutions. GE credit: SE, SL, SS. Effective: 2018 Spring Quarter.

**ESP 010—Current Issues in the Environment (3)**
Lecture—3 hours. Prerequisite(s): Elementary biology recommended. The science behind environmental issues, and policies affecting our ability to solve domestic and international environmental problems. Resources, environmental quality, regulation, environmental perception and conservation. Integrative case studies. Not open for credit to students who have completed ESP 1. GE credit: SE, SL, SS, WE. Effective: 2004 Fall Quarter.

**ESP 030—World Ecosystems & Geography (3)**
Lecture—3 hours. Not open to students who have successfully completed Environmental and Resource Sciences 30. (Formerly Environmental and Resource Sciences 30.) Introduction to the earth's major geographic regions and associated ecosystems, such as deserts, temperate forests, and oceans with an examination of how climate, vegetation regimes, ecological processes, agriculture and other human activities interact in different regions of the world. (Same course as ESM 030.) GE credit: SE, SL, WC. Effective: 2011 Fall Quarter.

**ESP 092—Internship (1-12)**
Variable. Prerequisite(s): Consent of Instructor. Lower division standing. Work experience off and on campus in all subject areas offered in the College of Agricultural and Environmental Sciences. Internship supervised by member of the faculty. (P/NP grading only.) Effective: 1997 Winter Quarter.

**ESP 098—Directed Group Study (1-5)**
Variable. Prerequisite(s): Consent of Instructor. Primarily for lower division students. (P/NP grading only.) Effective: 1997 Winter Quarter.

**ESP 100—General Ecology (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (BIS 002A, BIS 002B, BIS 002C); ((MAT 016A, MAT 016B) or (MAT 017A, MAT 017B) or (MAT 021A, MAT 021B)); STA 013 recommended. Theoretical and experimental analysis of the distribution, growth and regulation of species populations; predator-prey and competitive interactions; and the organization of natural communities. Application of evolutionary and ecological principles to selected environmental problems. GE credit: SE, SL. Effective: 2016 Fall Quarter.

Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ANT 001 or ANT 002 or ESP 030 or EVE 100 or BIS 101 recommended. Interdisciplinary study of diversity and change in human societies, using frameworks from anthropology, evolutionary ecology, history, archaeology, psychology, and other fields. Topics include population dynamics, subsistence transitions, family organization, disease, economics, warfare, politics, and resource conservation. (Same course as ANT 101.) GE credit: SS, WC, WE. Effective: 2016 Fall Quarter.

**ESP 105—Evolution of Societies and Cultures (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ANT 001 or ANT 002 or ESP 030 or EVE 100 or BIS 101 recommended. Interdisciplinary study of diversity and change in human societies, using frameworks from anthropology, evolutionary ecology, history, archaeology, psychology, and other fields. Topics include population dynamics, subsistence transitions, family organization, disease, economics, warfare, politics, and resource conservation. (Same course as ANT 101.) GE credit: SS, WC, WE. Effective: 2016 Fall Quarter.
recommended. Interdisciplinary study of social and cultural evolution in humans. Culture as a system of inheritance, psychology of cultural learning, culture as an adaptive system, evolution of maladaptations, evolution of technology and institutions, evolutionary transitions in human history, coevolution of genetic and cultural variation. Only two units of credit for students who took ESP 101 or ANT 101 prior to fall 2004. (Same course as ANT 105.) GE credit: QL, SS, WC, WE. Effective: 2016 Fall Quarter.

ESP 105—Evolution of Societies and Cultures (4) Review all entries Discontinued
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ANT 001 or ANT 002 or ESP 030 or EVE 100 or BIS 101 recommended. Interdisciplinary study of social and cultural evolution in humans. Culture as a system of inheritance, psychology of cultural learning, culture as an adaptive system, evolution of maladaptations, evolution of technology and institutions, evolutionary transitions in human history, coevolution of genetic and cultural variation. Only two units of credit for students who took ESP 101 or ANT 101 prior to fall 2004. (Same course as ANT 105.) GE credit: QL, SS, WC, WE. Effective: 2019 Winter Quarter.

ESP 110—Principles of Environmental Science (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (PHY 001A or PHY 007A); (MAT 016B or MAT 017B or MAT 021B); BIS 002A or BIS 010 recommended; upper division standing. Application of physical and chemical principles, ecological concepts, and systems approach to policy analysis of atmospheric environments, freshwater and marine environments, land use, energy supplies and technology, and other resources. GE credit: QL, SE, SL. Effective: 2018 Winter Quarter.

ESP 111—Marine Environmental Issues (1)
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Examination of critical environmental issues occurring in coastal waters including the effects of climate change, overfishing, and other human impacts. Through readings and group discussions, students will develop an integrative understanding of the oceanographic and ecological processes. May be repeated up to 2 time(s) when topics differ. (Same course as EVE 111.) GE credit: SE, SL. Effective: 2015 Summer Session 1.

ESP 116N—Oceanography (3)
Fieldwork; Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): GEL 001 or GEL 002 or GEL 016 or GEL 050 Advanced oceanographic topics: Chemical, physical, geological, and biological processes; research methods and data analysis; marine resources, anthropogenic impacts, and climate change; integrated earth/ocean/atmosphere systems; weekly lab and one weekend field trip. (Same course as GEL 116N.) GE credit: SE, SL. Effective: 2017 Winter Quarter.

ESP 121—Population Ecology (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): BIS 002A; BIS 002B; BIS 002C; (MAT 016B or MAT 017B or MAT 021B or MAT 021BH) Development of exponential and logistic growth models for plant and animal populations, analysis of age structure and genetic structure, analysis of competition and predator-prey systems. Emphasis is on developing models and using them to make predictions and solve problems. GE credit: QL, SE, SL. Effective: 2016 Fall Quarter.

ESP 123—Introduction to Field and Laboratory Methods in Ecology (4)
Fieldwork—4 hours; Laboratory—2 hours; Lecture—2 hours. Prerequisite(s): (ESP 100 or EVE 101); STA 100; Or equivalent of EVE 101 and STA 100. Introduces students to methods used for collecting ecological data in field and laboratory situations. Methods used by population ecologists and community ecologists; emphasis on experimental design, scientific writing and data analysis. GE credit: SE, SL. Effective: 2015 Spring Quarter.

ESP 124—Marine and Coastal Field Ecology (3)
Discussion—1 hour; Fieldwork—3 hours; Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): Upper division standing or consent of instructor. Introductory animal biology (BIS 001B) recommended; residence at or near Bodega Marine Lab required. Enrollment restricted to application at http://www.bml.ucdavis.edu. Ecology of marine populations and communities living in diverse habitats along the California coast. Hands-on learning using scientific process and tools of the biological trade to address ecological questions arising during field trips. Critical thinking through discussing scientific literature. GE credit: SE, SL. Effective: 2006 Summer Session 1.

ESP 127—Plant Conservation Biology (4)
Discussion—1 hour; Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): ESP 100 or EVE 101; Or equivalent upper division general ecology. Principles governing the conservation of plant species and plant communities, including the roles of fire, exotic species, grazing, pollination, soils, and population genetics; analytic and practical techniques for plant conservation; and introduction to relevant legal, ethical, and policy issues. GE credit: SE, SL. Effective: 2016 Fall Quarter.
ESP 150A—Physical and Chemical Oceanography (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ESP 116N or GEL 116N); PHY 009B; MAT 021D; CHE 002C; and Consent of Instructor. Physical and chemical properties of seawater, fluid dynamics, air-sea interaction, currents, waves, tides, mixing, major oceanic geochemical cycles. (Same course as GEL 150A.) GE credit: QL, SE. Effective: 2017 Winter Quarter.

ESP 150B—Geological Oceanography (3)
Lecture—3 hours. Prerequisite(s): GEL 050 or (GEL 116N or ESP 116N) Introduction to the origin and geologic evolution of ocean basins. Composition and structure of oceanic crust; marine volcanism; and deposition of marine sediments. Interpretation of geologic history of the ocean floor in terms of sea-floor spreading theory. (Same course as GEL 150B.) GE credit: SE. Effective: 2017 Winter Quarter.

ESP 150C—Biological Oceanography (4)
Discussion—1 hour; Fieldwork; Lecture—3 hours. Prerequisite(s): BIS 002A; Consent of Instructor. A course in general ecology. Ecology of major marine habitats, including intertidal, shelf benthic, deep-sea and plankton communities. Existing knowledge and contemporary issues in research. Segment devoted to human use. One weekend field trip required. (Same course as GEL 150C.) GE credit: SE, SL. Effective: 2017 Winter Quarter.

ESP 151—Limnology (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): BIS 002A; BIS 002B; (BIS 002C and ESP 100 or EVE 101 recommended.) Biology and productivity of inland waters with emphasis on the physical and chemical environment. GE credit: SE. Effective: 2017 Spring Quarter.

ESP 151L—Limnology Laboratory (3)
Laboratory—6 hours. Prerequisite(s): ESP 151 (can be concurrent); Junior, senior, or graduate standing. Limnological studies of lakes, streams, and reservoirs with interpretation of aquatic ecology. GE credit: SE. Effective: 1997 Winter Quarter.

ESP 152—Coastal Oceanography (3)
Discussion—1 hour; Fieldwork—3 hours; Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): Upper division standing or consent of the instructor; physics (PHY 009B), calculus (MAT 021B) and exposure to physical and chemical oceanography (GEL 150A and ESP 150A) are recommended; residence at or near Bodega Marine Laboratory required. Enrollment restricted to application at http://www.bml.ucdavis.edu. Oceanography of coastal waters, including bays, river plumes, nearshore and estuaries; focus on transport patterns, how they are forced and implications for ecological and environmental problems. Pertinent for students in oceanography, ecology, environmental engineering, geology and hydrology. GE credit: SE, SL. Effective: 2006 Summer Special Session.

ESP 155—Wetland Ecology (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): BIS 002A; Or equivalent of BIS 002A; ESP 100 or EVE 101 recommended. Introduction to wetland ecology. The structure and function of major wetland types and principles that are common to wetlands and that distinguish them from terrestrial and aquatic ecosystems. GE credit: SE. Effective: 2016 Fall Quarter.

ESP 155L—Wetland Ecology Laboratory (3)
Fieldwork; Laboratory—6 hours; Lecture—1 hour. Prerequisite(s): ESP 155 (can be concurrent) Modern and classic techniques in wetland field ecology. Emphasis on sampling procedures, vegetation analysis, laboratory analytical procedures, and examples of successful wetland restoration techniques. GE credit: SE, SL. Effective: 1997 Winter Quarter.

ESP 160—The Policy Process (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): POL 001; ECN 001A and STA 013 recommended. Alternative models of public policymaking and application to case studies in the U.S. and California. GE credit: SS. Effective: 2016 Fall Quarter.

ESP 161—Environmental Law (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Upper division standing and one course in environmental science or political science recommended. Introduction for non-Law School students to some of the principal issues in environmental law and the judicial interpretation of some important environmental statutes, e.g., NEPA. GE credit: SS. Effective: 1997 Winter Quarter.

ESP 161—Environmental Law (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Upper division standing and one course in environmental science or political science recommended. Introduction for non-Law School students to some of the principal
issues in environmental law and the judicial interpretation of some important environmental statutes, e.g., NEPA. GE credit: SS, WE. Effective: 2019 Fall Quarter.

ESP 162—Environmental Policy (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECN 001A or ECN 001AV Compares economic with socio-cultural approaches to understanding the causes of environmental problems and strategies for addressing them. Includes different approaches to the policy process, policy instruments, and environmental behavior. Applies these principles to several problems. GE credit: SS. Effective: 2018 Winter Quarter.

ESP 163—Energy and Environmental Aspects of Transportation (4)
Extensive Writing; Lecture—3 hours. Prerequisite(s): ECN 001A or ECN 001AV or ENG 106 Engineering, economic, and systems planning concepts. Analysis and evaluation of energy, air quality and selected environmental attributes of transportation technologies. Strategies for reducing pollution and petroleum consumption in light of institutional and political constraints. Evaluation of vehicle emission models. (Same course as ECI 163.) GE credit: SE, SL, SS, WE. Effective: 2018 Spring Quarter.

ESP 164—Ethical Issues in Environmental Policy (3)
Lecture—3 hours. Prerequisite(s): ESP 160; ESP 168A; Seniors only in Environmental Policy Analysis and Planning or by consent of instructor. Basic modes of ethical reasoning and criteria of distributive justice applied to selected topics in environmental policymaking. GE credit: SS. Effective: 1997 Winter Quarter.

ESP 164—Ethical Issues in Environmental Policy (3) Review all entries
Lecture—3 hours. Prerequisite(s): ESP 160; ESP 168A; Seniors only in Environmental Policy Analysis and Planning or by consent of instructor. Basic modes of ethical reasoning and criteria of distributive justice applied to selected topics in environmental policymaking. GE credit: SS. Effective: 1997 Winter Quarter.

ESP 164—Ethical Issues in Environmental Policy (3) Review all entries Discontinued
Lecture—3 hours. Prerequisite(s): ESP 160; ESP 168A; Seniors only in Environmental Policy Analysis and Planning or by consent of instructor. Basic modes of ethical reasoning and criteria of distributive justice applied to selected topics in environmental policymaking. GE credit: SS. Effective: 2019 Winter Quarter.

ESP 165—Climate Policy (3)
Lecture—3 hours. Prerequisite(s): ESP 001 or ECN 001A or ECN 001AV; or Consent of Instructor. Models, data and assumptions behind competing arguments regarding societal response to the prospect of climate change at the state, national and international level from economic, ethical and policy science perspectives. Effective: 2018 Spring Quarter.

ESP 166—Ocean and Coastal Policy (3)
Lecture—3 hours. Prerequisite(s): ESP 001; or Consent of Instructor. Limited enrollment. Overview of U.S. and International ocean and coastal policy, including energy, coastal land-use and water quality, protected areas and species. GE credit: SS. Effective: 2017 Spring Quarter.

ESP 167—Energy Policy (4)
Lecture—4 hours; Term Paper. Prerequisite(s): (ECN 001A or ECN 001AV); (MAT 016B or MAT 017B or MAT 021B); or Consent of Instructor. Survey of primary energy resources (fossil, renewable, nuclear), energy conversion methods, future energy demand scenarios, and environmental impacts of energy. Overview of energy policy in the U.S. Analysis of policy alternatives for addressing energy-related environmental and national security issues. GE credit: SS. Effective: 2018 Spring Quarter.

ESP 168A—Methods of Environmental Policy Evaluation (5) Review all entries
Discussion—1 hour; Lecture—3 hours; Term Paper. Prerequisite(s): (ESP 001 or ESP 010); (STA 013 or STA 100); ECN 001A; ECN 100 recommended. Evaluation of alternatives for solution of complex environmental problems; impact analysis, benefitcost analysis, distributional analysis, decision making under uncertainty, and multi-objective evaluation. GE credit: SS. Effective: 2018 Spring Quarter.

ESP 168A—Methods of Environmental Policy Evaluation (5) Review all entries
Discussion—1 hour; Lecture—3 hours; Term Paper. Prerequisite(s): (ESP 001 or ESP 010); (STA 013 or STA 013Y or STA 100); (ECN 001A or ECN 001AV); ECN 100 recommended. Evaluation of alternatives for solution of complex environmental problems; impact analysis, benefitcost analysis, distributional analysis, decision making under uncertainty, and multi-objective evaluation. GE credit: SS. Effective: 2018 Summer Quarter.

ESP 168B—Methods of Environmental Policy Analysis (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ESP 168A Continuation of course 168A, with emphasis on examination of the literature for applications of research and evaluation techniques to problems of transportation, air and water pollution, land use, and energy policy. GE credit: SS. Effective: 1997 Winter Quarter.

ESP 169—Water Policy and Politics (3)
Lecture—3 hours. Prerequisite(s): ECN 001A or POL 001 recommended. Governance of water, including issues of water pollution/quality and water supply. The politics of water decision-making and effectiveness of water policy.
Broad focus on federal water policy, with case examples from nationally significant U.S. watersheds. GE credit: SS. Effective: 2016 Fall Quarter.

**ESP 170—Conservation Biology Policy (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): One course in environmental science (e.g., ESP 1), conservation (e.g., WFC 11 or WFC 154), or government (e.g., POL 1) recommended. Analysis of policies designed to conserve species and their habitats. Emphasis on how individual incentives affect the success of conservation policies. Valuation of endangered species and biodiversity. Criteria for deciding conservation priorities. GE credit: SE, SS. Effective: 2016 Fall Quarter.

**ESP 171—Urban and Regional Planning (4)**
Discussion—1 hour; Lecture—3 hours; Term Paper. Prerequisite(s): ESP 001 recommended. How cities plan for growth in ways that minimize environmental harm. Standard city planning tools (general plan, zoning ordinance) and innovative new approaches. Focus on planning requirements and practices in California. Relationships between local, regional, state, and federal policy. GE credit: SS, WE. Effective: 2016 Fall Quarter.

**ESP 172—Public Lands Management (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECN 001A recommended. Investigation of alternative approaches to public lands management by Federal and state agencies. The role each agency's legislation plays in determining the range of resource allocations. GE credit: ACGH, SS. Effective: 2016 Fall Quarter.

**ESP 173—Land Use and Growth Controls (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Upper division standing; one course in environmental policy. Exposes students to the economic, political, and legal factors affecting land use and growth controls, and helps students critically evaluate written materials in terms of their arguments and supporting data. GE credit: SS. Effective: 2016 Fall Quarter.

**ESP 175—Natural Resource Economics (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ARE 100B or ECN 100; Or the equivalent. Pass One open to Managerial Economics (AMGE) and Environmental Policy Analysis and Planning (AEPP) Majors and Agricultural and Resource Economics (GARE) Graduate Majors. Economic concepts and policy issues associated with natural resources, renewable resources (ground water, forests, fisheries, and wildlife populations) and non-renewable resources (minerals and energy resources, soil). (Same course as Agricultural and Resource Economics 175.) GE credit: SS. Effective: 2017 Winter Quarter.

**ESP 178—Applied Research Methods (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): STA 103 or STA 100 or STA 108 or SOC 106 or ARE 106; Or the equivalent. Research methods for analysis of urban and regional land use, transportation, and environmental problems. Survey research and other data collection techniques; demographic analysis; basic forecasting, air quality, and transportation models. Collection, interpretation, and critical evaluation of data. GE credit: QL, SS. Effective: 2016 Fall Quarter.

**ESP 179—Environmental Impact Assessment (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ESP 001; Or the equivalent. Introduction to the information resources and methods typically used in environmental impact analysis. Emphasis on how environmental information is applied to planning, environmental regulation, and public policymaking, with case studies from California land use and natural resource policy. GE credit: SS. Effective: 2016 Fall Quarter.
ESP 179L—Environmental Impact Reporting Using Geographic Information (2)
Discussion/Laboratory—2 hours; Laboratory—4 hours. Prerequisite(s): ESP 179 (can be concurrent); ESP 179 required concurrently. Introduction to Geographic Information Systems (GIS) by using ArcView for assessment and environmental planning. Not open for credit to students who have completed ABT 180, ABT 181, or ASE 132. GE credit: SE. Effective: 2002 Fall Quarter.

ESP 190—Workshops on Environmental Problems (1-8)
Laboratory—2-16 hours. Prerequisite(s): Consent of Instructor. Open to all upper division and graduate students on application. Workshops featuring empirical analyses of contemporary environmental problems by multidisciplinary student teams. Guided by faculty and lay professionals, the teams seek to develop an integrated view of a problem and outline a series of alternative solutions. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

ESP 191A—Workshop on Food System Sustainability (3)
Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): ESP 191A Priority enrollment for seniors in the sustainable agriculture and food systems major; limited to 25 students per section. Continuation of course 191A. Student teams conduct analyses of a specific issue in sustainable agriculture or food systems, prepare a critical assessment of technological, economic, environmental, and social dimensions of options for action and present their results to stakeholders. GE credit: SE. Effective: 2009 Fall Quarter.

ESP 191B—Workshop on Food System Sustainability (3)
Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): ESP 191A Priority enrollment for seniors in the sustainable agriculture and food systems major; limited to 25 students per section. Continuation of course 191A. Student teams conduct analyses of a specific issue in sustainable agriculture or food systems, prepare a critical assessment of technological, economic, environmental, and social dimensions of options for action and present their results to stakeholders. GE credit: SE. Effective: 2010 Winter Quarter.

ESP 192—Internship (1-12)
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Completion of 84 units. Work experience off and on campus in all subject areas offered in the College of Agricultural and Environmental Sciences. Internships supervised by a member of the faculty. (P/NP grading only.) Effective: 1997 Winter Quarter.

ESP 197T—Tutoring in Environmental Science and Policy (1-5)
Tutorial—2-6 hours. Prerequisite(s): Consent of Instructor. Upper division standing. Experience in teaching under guidance of faculty member. (P/NP grading only.) Effective: 2014 Winter Quarter.

ESP 198—Directed Group Study (1-5)
Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

ESP 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

ESP 212A—Environmental Policy Process (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Course in public policy (e.g., ESP 160); environmental law (e.g., ESP 161); course in statistics (e.g., SOC 106 or ARE 106). Introduction to selected theories of the policy process and applications to the field of environmental policy. Develops critical reading skills, understanding of policy theory, and an ability to apply multiple theories to the same phenomena. (Same course as ECL 212A and ENV 200C.) Effective: 2017 Fall Quarter.

ESP 212B—Environmental Policy Evaluation (4)
Discussion—1 hour; Lecture—2 hours; Seminar—2 hours. Prerequisite(s): (STA 108 or ARE 106); ARE 176; Intermediate microeconomics (e.g., ECN 100); policy analysis (e.g., ESP 168A or the equivalent). Method and practice, philosophical basis, and political role of policy analysis. Reviews basic concepts from economic theory; how and why environmental problems emerge in a market economy; and tools necessary for solving environmental problems. (Same course as ECL 212B and ENV 200B.) Effective: 2018 Winter Quarter.

ESP 220—Tropical Ecology (3)
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): ESP 100; EVE 101; EVE 117; EVE 138 recommended. Open to graduate and undergraduate students who meet requirement subject to consent of instructor. An overview of present status of knowledge on structure and processes of major tropical ecosystems. Differences and similarities among tropical and temperate systems stressed. Effective: 1997 Winter Quarter.

ESP 228—Advanced Simulation Modeling (3)
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): (STA 108 or ARE 106); (ESP 128 and ESP 128L) Advanced
techniques in simulation modeling; optimization and simulation, dynamic parameter estimation, linear models, error propagation, and sensitivity testing. Latter half of course will introduce model evaluation in ecological and social system models. Effective: 1997 Winter Quarter.

**ESP 252—Sustainable Transportation Technology and Policy (3)** [Review all entries]
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): ESP 160; Or the equivalent. Role of technical fixes and demand management in creating a sustainable transportation system. Emphasis on technology options, including alternative fuels, electric propulsion, and IVHS. Analysis of market demand and travel behavior, environmental impacts, economics and politics. (Same course as ECI 252.) Effective: 1997 Winter Quarter.

**ESP 252—Sustainable Transportation Technology and Policy (3)** [Review all entries Discontinued]
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): ESP 160; Or the equivalent. Role of technical fixes and demand management in creating a sustainable transportation system. Emphasis on technology options, including alternative fuels, electric propulsion, and IVHS. Analysis of market demand and travel behavior, environmental impacts, economics and politics. (Same course as ECI 252.) Effective: 2018 Fall Quarter.

**ESP 275—Economic Analysis of Resource and Environmental Policies (4)**
Lecture/Discussion—4 hours. Prerequisite(s): ARE 204 or ECN 204 Development of externality theory, market failure concepts, welfare economics, theory of renewable and non-renewable resource use, and political economic models. Applications to policy issues regarding the agricultural/environment interface and managing resources in the public domain. (Same course as ARE 275.) Effective: 1999 Spring Quarter.

**ESP 278—Research Methods in Environmental Policy (3)**
Lecture/Discussion—3 hours. Prerequisite(s): ARE 106; Or the equivalent. Introduction to scientific research in environmental policy. Major issues in the philosophy of the social sciences. How to design research that acknowledges theoretical assumptions and that is likely to produce evidence in an intersubjectively reliable fashion with explicit recognition of its uncertainties. Effective: 1998 Winter Quarter.

**ESP 298—Directed Group Study (1-5)**

**ESP 299—Research (1-12)**
Variable. Prerequisite(s): Consent of Instructor. Graduate standing. (S/U grading only.) Effective: 1997 Winter Quarter.

**ESP 396—Teaching Assistant Training Practicum (1-4)**
Variable—3-12 hours. Prerequisite(s): Consent of Instructor. Open to graduate students only. Teaching assistant training practicum. May be repeated for credit. (S/U grading only.) Effective: 2017 Spring Quarter.

### Clinical Nutrition

**Clinical Nutrition | Clinical Nutrition B.S.**

(College of Agricultural and Environmental Sciences)

**Faculty.** [http://nutrition.ucdavis.edu/people/faculty/index.html](http://nutrition.ucdavis.edu/people/faculty/index.html)

**The Major Program**

The Clinical Nutrition major provides students with training in normal and therapeutic nutrition, biological and social sciences, food science, communication, business management and food service management. This major fulfills the academic requirements for admission into a dietetics internship or the equivalent, which must be completed before qualifying for registration as a dietitian.

**The Program.** The Clinical Nutrition major (formerly Dietetics) includes the same basic core of nutrition classes as the Nutrition Science major, but includes additional courses such as food service management, education, sociology, and communication skills to prepare for work with the public. Clinical Nutrition students spend the first two years completing preparatory course work in the basic biological sciences, along with several of the social sciences. In the final two years, students take courses in normal and clinical nutrition, food science, biochemistry, and management techniques.

Entering freshman or transfer students are assumed to have basic computer skills and to demonstrate mathematics competency adequate to pass the Math Placement Exam with a minimum score of 25.

**Major Advisor.** Francene Steinberg (Nutrition)
Advising Center for the major is located in 3202 Meyer Hall; 530-752-2512.

Career Alternatives. The Clinical Nutrition major qualifies students to apply for a dietetic internship accredited by the Accreditation Council for Education in Nutrition and Dietetics enabling them to become a Registered Dietitian, the professional credential necessary to work in a clinical setting. Once dietitians are registered, they generally seek employment in administrative, therapeutic, teaching, research, or public health/public service positions in clinics, hospitals, schools, or other similar institutions. There is a growing role for dietitians working in settings outside of the traditional hospital (for example, in state and federal nutrition programs, nutrition education, Peace Corps and Cooperative Extension work). Students who complete the undergraduate preparation in clinical nutrition are also qualified to enter graduate programs in dietetics, nutrition science, public health nutrition, and food service management.

Clinical Research (Graduate Group)

Clinical Research (Graduate Group) | Clinical Research M.A.S.

David M. Rocke, Ph.D., Chairperson of the Group

Group Office. CTSC, 2921 Stockton Blvd., Sacramento, CA 95817; 916-703-9110

Faculty. [http://www.ucdmc.ucdavis.edu/ctsc/area/education/ClinicalResearchGraduateGroup/crgg_faculty.html](http://www.ucdmc.ucdavis.edu/ctsc/area/education/ClinicalResearchGraduateGroup/crgg_faculty.html)

Graduate Study. Graduate Group in Clinical Research (GGCR) is an interdisciplinary graduate group in clinical research with a Master of Advanced Study degree in Clinical Research. The GGCR provides a solid clinical/translational, patient-oriented research foundation for junior faculty, clinical and pre-clinical fellows, and post-doctoral scholars. The program centers around three core elements: didactic instruction, mentored research, and special experiences.

Mandatory course work includes biostatistics, epidemiology, patient-oriented research, health services research, data management/informatics, scientific communication, research management, research ethics and career development. The instruction includes a 6-8-week summer curriculum followed by a one- or two-year core curriculum and electives that can be tailored to best meet each scholar’s career development needs.

Degree Offered. M.A.S. Plan II

Degree Requirements can be found at [http://www.ucdmc.ucdavis.edu/ctsc/area/education/ClinicalResearchGraduateGroup/crgg_degree_curriculum.html](http://www.ucdmc.ucdavis.edu/ctsc/area/education/ClinicalResearchGraduateGroup/crgg_degree_curriculum.html).

Coaching Principles & Methods Minor; Physical Education

Coaching Principles & Methods Minor; Physical Education | Coaching Principles & Methods Minor

(College of Letters and Science)

The Coaching Principles and Methods minor is an interdisciplinary minor open to undergraduates in all four colleges. Students must complete a statement of interest to assist in placing them in future internships. This form is available in the Physical Education Program Office, in 264 Hickey Gym, and may be turned in at any time.

The Major Programs

The Cognitive Science major is designed to provide a broad interdisciplinary approach to the study of mind that includes courses from different departments and attracts students with a variety of interests. It emphasizes a multi-
faceted approach to the study of mind that integrates concepts and techniques from psychology, artificial intelligence, linguistics, neurology, philosophy and other relevant fields.

For students interested in the liberal arts the Cognitive Science major can be pursued as a Bachelor of Arts (A.B.) program. Alternatively, it can be pursued as a Bachelor of Science (B.S.) program for students with a stronger interest in the mathematical, neurological and computational foundations of the discipline. The main objective of both programs is to give the student a broad grounding in the integrated sciences of the mind and to connect approaches from different fields. Students must complete a number of core courses for the degree, as well as a number of specialty courses on such wide-ranging topics as logic for artificial intelligence, computational linguistics, cognitive neuroscience, animal cognition and the psychology of music.

**Career Alternatives.** A degree in cognitive science provides broad intellectual foundations useful for careers in a variety of areas, including teaching, business, social work/counseling and the information technology industry. An undergraduate education in cognitive science also prepares the student for graduate study in appropriate subfields of psychology, linguistics, philosophy and informatics. It is also suitable training for pre-medicine, pre-law, and pre-management students.

**Major Advisors.** Staff advisors are available in 101 Young Hall; 530 752 5104; cogsciadvising@ucdavis.edu; http://cogsci.ucdavis.edu/advising.html.

### Depth Subject Matter

**Units:** 45-47

**All from group A:** 13 units

**Group A: Core**

- One four-unit upper division course in Cognitive Science. 4 units
- NPB 100 Neurobiology 4 units
- PSC 103A Statistical Analysis of Psychological Data 5 units

**Choose one from group B:** 4-5 units

**Group B: Computation**

- LIN 177 Computational Linguistics 4 units
- NPB 167 Computational Neuroscience 5 units
  
  NPB 167 offered very irregularly.

**Choose 12-13 units from group C:** 12-13 units

**Group C: Neuroscience**

- NPB 152 Hormones and Behavior 3 units
- OR
- PSC 123 Hormones and Behavior 3 units
- NPB 161 Developmental Neurobiology 3 units
- NPB 162 Neural Mechanisms of Behavior 3 units
- NPB 163 Systems Neuroscience 4 units
Choose two from group D:

**Group D: Philosophy/Linguistics**
- LIN 103A Linguistic Analysis I: Phonetics, Phonology, Morphology 4
- LIN 103B Linguistic Analysis II: Morphology, Syntax, Semantics 4
- LIN 150 Languages of the World 4
- LIN 182 Multilingualism 4
- PHI 103 Philosophy on Mind 4
- PHI 104 The Evolution of Mind 4

Choose two courses from group E in addition to any taken to satisfy group C requirements:

**Group E: Psychology**
- NPB 122 Developmental Endocrinology 3
- NPB 124 Comparative Neuroanatomy 3
- PSC 100 Introduction to Cognitive Psychology 4
- PSC 101 Introduction to Biological Psychology 4
- PSC 113 Developmental Psychobiology 4
- PSC 121 Physiological Psychology 4
- PSC 122 Advanced Animal Behavior 4
- OR
- NPB 150 Advanced Animal Behavior 4
- PSC 124 Comparative Neuroanatomy 3
- PSC 130 Human Learning and Memory 4
- PSC 131 Perception 4
- PSC 132 Language and Cognition 4
- PSC 135 Cognitive Neuroscience: The Biological Foundations of the Mind 4
- PSC 137 Neurobiology of Learning & Memory 4

**Total: 108-112**

**Cognitive Science | CGS Courses**

**Courses in CGS:**

**CGS 001—Introduction to Cognitive Science (4)**
Lecture/Discussion—4 hours. Pass One open to Cognitive Science majors only. Introduction to the interdisciplinary cognitive scientific approach to the study of mind, drawing concepts and methods from psychology, philosophy, linguistics, artificial intelligence, and other disciplines. (Same course as PHI 010.) GE credit: SE, SL. Effective: 2017 Fall Quarter.

**CGS 098—Directed Group Study (0.5-5)**
Variable—1-15 hours. Prerequisite(s): Consent of Instructor. Directed group study in cognitive science. May be repeated for credit when topic differs. (P/NP grading only.) Effective: 2019 Winter Quarter.

**CGS 099—Special Study for Lower Division Students (1-5)**
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. Special study for lower division students. May be repeated for credit. (P/NP grading only.) Effective: 2019 Winter Quarter.

**CGS 107—Neuroeconomics/Reinforcement Learning and Decision Making (4)**
Lecture—3 hours; Term Paper. Prerequisite(s): (PSC 100 or PSC 100Y or PSC 135 or ECN 100A or ARE 100A or NPB 162 or NPB 163); (STA 013 or STA 013Y or STA 100 or PSC 103A); or Consent of Instructor. Theoretical and empirical approaches to neuroeconomics (neuroscience of decision making) from psychology, neuroscience, economics, and
computer science. Neuroscience of judgment and decision making, behavioral economics, and reinforcement learning. (Same course as ECN 107 and PSC 133.) GE credit: SL, SS. Effective: 2018 Spring Quarter.

**CGS 138—Consciousness and Cognition (4)**
Lecture—4 hours. Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041; (PSC 100 or PSC 100Y or PSC 135) Current theoretical and empirical evidence in the study of cognition and consciousness. Theories of consciousness, psychological and neural basis of conscious and unconscious processes such as attention, intentionality, and dreams. (Same course as PSC 138.) Effective: 2018 Spring Quarter.

**CGS 192—Fieldwork in Cognitive Science (1-5)**
Fieldwork—3-15 hours. Prerequisite(s): Consent of Instructor. Supervised internship off and on campus, in community and institutional settings. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 2019 Winter Quarter.

**CGS 194HA—Special Study for Honors Students (3)**
Independent Study—9 hours. Prerequisite(s): Consent of Instructor. Senior standing in Cognitive Science; qualifications for admission into college honors program. Directed research. Supervised reading, research and writing leading to submission of a Senior Honors thesis under the direction of faculty sponsor. Effective: 2019 Fall Quarter.

**CGS 194HB—Special Study for Honors Students (3)**
Independent Study—9 hours. Prerequisite(s): Consent of Instructor. Senior standing in Cognitive Science; qualifications for admission into college honors program. Directed research. Supervised reading, research and writing leading to submission of a Senior Honors thesis under the direction of faculty sponsor. Effective: 2020 Spring Quarter.

**CGS 198—Directed Group Study (0.5-5)**
Variable—1-15 hours. Prerequisite(s): Consent of Instructor. Directed group study in cognitive science. May be repeated for credit when topic differs. (P/NP grading only.) Effective: 2019 Winter Quarter.

**CGS 199—Special Study for Advanced Undergraduates (1-5)**
Variable. Prerequisite(s): Consent of Instructor. Special study for advanced undergraduates. May be repeated for credit. (P/NP grading only.) Effective: 2017 Winter Quarter.

**The Major Program**

The major in communication focuses upon human symbolic behavior in interpersonal and mediated contexts.

**The Program.** The program of study in communication examines communication processes at several different levels of analysis. Courses dealing with communication at the individual, interpersonal, organizational and societal levels of analysis are offered. The emphasis in the program reflects the changing focus in the discipline and society toward computer-mediated communication, quantitative behavioral science and cognitive science. Classes addressing such topics as communication and cognition, message systems, interpersonal communication, nonverbal communication, communication and persuasion, organizational communication, mass media effects,

Career Alternatives. Communication graduates have found careers in such fields as broadcast and print journalism, administration, sales, management, politics and government, education, social work, and public relations. A communication degree is also excellent preparation for law school or other graduate programs.

Grading recommendation. Although not required, it is recommended that all courses offered in satisfaction of the major, except variable-unit courses, be taken for a letter grade.

Graduate Study. The Department of Communication offers programs of study and research leading to M.A. and Ph.D. degrees in Communication. Detailed information may be obtained from the Graduate Advisor, Department of Communication.

Note: Many of the upper division courses offered by other College of Letters & Science departments have their own prerequisites not accounted for by lower division Communication courses. To the degree that students elect to take those courses having "hidden prerequisites," the number of units necessary to complete the major increases above the stated minimum.

Units: 24

Total: 24

Communication | CMN Courses
Students must have satisfied the Entry Level Writing requirement before taking any course in Communication.
Courses in CMN:

CMN 001—Introduction to Public Speaking (4)
Discussion—2 hours; Lecture—2 hours. Practice in the preparation and delivery of speeches based on principles and strategies of informing and persuading audiences drawn from the social sciences and humanities. GE credit: AH, OL, SS, WE. Effective: 2017 Winter Quarter.

CMN 003—Interpersonal Communication Competence (4)

CMN 003V—Interpersonal Communication Competence (4)

CMN 003Y—Interpersonal Communication Competence (4)

CMN 005—Global English and Communication (4)
Discussion—2 hours; Lecture—2 hours. English as a global language and its uses in intercultural communication. Cultural, historical, and political dimensions of varieties of English spoken around the world. Experiential grounding in strategies for increasing interpretive and verbal communicative competence for a globalized world. (Same course as LIN 005.) GE credit: AH, OL, SS, WC. Effective: 2012 Spring Quarter.

CMN 010V—Introduction to Communication (4)
Web Electronic Discussion—1 hour; Web Virtual Lecture—3 hours. Basic principles of communication and communication processes; models of communication; foundations of empirical research in communication; contexts of communication and communication research, including interpersonal, intercultural, news, entertainment, mediated, and others. Not open for credit to students who have taken CMN 010Y. GE credit: SS. Effective: 2016 Fall Quarter.

CMN 010Y—Introduction to Communication (4)
Discussion—1 hour; Web Virtual Lecture—3 hours. Basic principles of communication and communication processes; models of communication; foundations of empirical research in communication; contexts of communication and communication research including interpersonal, intercultural, news, entertainment, mediated, and others. Not open for credit to students who have taken CMN 010V. GE credit: SS. Effective: 2017 Winter Quarter.

CMN 012Y—Data Visualization in the Social Sciences (4)
Laboratory—1.5 hours; Lecture—2 hours; Web Virtual Lecture—1.5 hours. Introduction to quantitative data across the social sciences (Communications, Political Science, Psychology, Sociology, and other disciplines). Transforming data, describing data, producing graphs, visual reasoning, and interpretations. (Same course as SOC 012Y, POL 012Y, and PSC 012Y.) GE credit: QL, VL. Effective: 2016 Spring Quarter.

CMN 076—Video Games and Virtual Environments (4)
Discussion—1 hour; Lecture—3 hours. Impact of video games on players and society. Topics include motivations for playing games; cognitive, emotional, and behavioral effects, including violence and addiction; interpersonal and group processes in online games; virtual communities; and video games for education. GE credit: SS, VL. Effective: 2015 Winter Quarter.

CMN 099—Special Study for Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

CMN 101—Communication Theories (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Forms, functions, development, and testing of communication theory, with emphasis on social scientific approaches. Survey and comparison of significant micro and macro theories and
models of face-to-face and mediated communication. Application of theories to real world problems. GE credit: SS. Effective: 2011 Fall Quarter.

CMN 101—Communication Theories (4) **Review all entries**
Discussion—1 hour; Lecture—3 hours. Forms, functions, development, and testing of communication theory, with emphasis on social scientific approaches. Survey and comparison of significant micro and macro theories and models of face-to-face and mediated communication. Application of theories to real-world problems. Not open for credit to students who have taken CMN 101Y. GE credit: SS. Effective: 2018 Fall Quarter.

CMN 101Y—Communication Theories (4)
Discussion—1 hour; Web Virtual Lecture—3 hours. Forms, functions, development, and testing of communication theory, with emphasis on social scientific approaches. Survey and comparison of significant micro and macro theories and models of face-to-face and mediated communication. Application of theories to real-world problems. Not open for credit to students who have taken CMN 101. GE credit: SS. Effective: 2018 Fall Quarter.

CMN 102—Empirical Methods in Communication (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): STA 013 or STA 013Y; Or equivalent of STA 013. Social scientific research methods employed in Communication. Topics include research design, measurement, sampling, questionnaire construction, survey research, experimental design, content analysis and qualitative field methods. GE credit: SS. Effective: 2018 Winter Quarter.

CMN 110—Communication Networks (4)
Discussion/Laboratory—1 hour; Lecture/Discussion—3 hours. Theoretical approaches to communication networks, practical applications of network studies, and network analysis tools. Friendship, political discussion, social support, organizational, social media, and disease transmission networks are examined. Impact of emerging technologies on network creation, maintenance, and expansion. GE credit: SS. Effective: 2017 Fall Quarter.

CMN 111—Gender Differences in Communication (4)
Lecture—4 hours. Pass One open to Communication majors only. Examination of communication differences between men and women as sources of male/female stereotypes, misunderstandings, dilemmas, and difficulties (real and imagined). Treatment of genders as cultures. Topics include male/female differences in discursive practices and patterns, language attitudes, and relationship dynamics. Not open for credit to students who have taken CMN 103. GE credit: DD, SS. Effective: 2015 Fall Quarter.

CMN 112—Theories of Persuasion (4)
Lecture/Discussion—4 hours. Pass One open to Communication majors only. Theories and models of persuasion that account for the effects of source, channel and audience factors on message recipients. Examination of message strategies for altering attitudes and gaining compliance. Contexts of application include interpersonal relationships, advertising, politics, and health. Not open for credit to students who have taken CMN 152. GE credit: SS. Effective: 2015 Fall Quarter.

CMN 114—Communication and Cognition (4)
Lecture/Discussion—4 hours. Pass One open to Communication majors only. Relationship between communication and cognition in interpersonal and mediated contexts. Discourse comprehension and production, impact of language attitudes on social judgments, the effects of information processing on decision making. Not open for credit to students who have completed CMN 138. GE credit: SS, WE. Effective: 2018 Winter Quarter.

CMN 120—Interpersonal Communication (4)
Lecture—4 hours. Pass One open to Communication majors only. Theories and principles of interpersonal communication related to perception, verbal and nonverbal channels, mutual understanding, and relationship development. Communication processes in face-to-face and technology-mediated encounters. Consideration of different relationship contexts, including friendships, dating and family relationships, and the workplace. Not open for credit to students who have completed CMN 134. GE credit: SS. Effective: 2016 Winter Quarter.

CMN 121—Language Use in Conversation (4)
Lecture/Discussion—4 hours. Pass One open to Communication majors only. Examination of how people use language in social interaction, how they exchange meaning during conversation, and how their use of language plays a central role in turn-taking, speech acts, attitude formation, figurative speech, politeness, and other aspects of conversation. Not open for credit to students who have taken CMN 105. GE credit: SS. Effective: 2016 Spring Quarter.

CMN 122—Nonverbal Communication (4)
Lecture—4 hours. Pass One open to Communication majors only. Examination of the interaction between nonverbal
communication and verbal communication channels in influencing outcomes in interpersonal relationships. Underlying functions served by nonverbal communication are considered. Not open for credit to students who have completed CMN 135. GE credit: SS. Effective: 2015 Fall Quarter.

CMN 123—Intercultural Communication (4)
Seminar—3 hours; Term Paper. Major concepts and theories of intercultural communication. Topics include cultural similarities and differences in verbal and nonverbal communication; dimensions of cultural variations, barriers to intercultural communication, and intercultural communication competence. Not open for credit to students who have taken CMN 137. GE credit: DD, SS. Effective: 2016 Winter Quarter.

CMN 124—Family Communication (4)

CMN 130—Group Communication (4)
Discussion—1 hour; Lecture—3 hours. Communication processes in the development and maintenance of effective groups and teams in organizations. Examination of both face-to-face and computer-mediated group interaction. Topics include group development, power, norms, cohesion, decision making, problem solving, creativity, conflict management, working remotely, and leadership. GE credit: SS. Effective: 2014 Fall Quarter.

CMN 131—Strategic Communication in Public Relations (4) Review all entries
Lecture/Discussion—4 hours. Pass One open to Communication majors only. Principles, evolution, and professional practice of public relations. Planning and execution of effective, ethical communication strategies and campaigns. Distribution of messages through traditional and new media, including social media. Cultivation of relationships between organizations and their publics. Crisis communication management. GE credit: SS. Effective: 2015 Fall Quarter.

CMN 132—Social Media for Public Relations (4) Review all entries
Lecture/Discussion—4 hours. Prerequisite(s): CMN 131 Uses of social media technologies in contemporary public relations practice. Social and behavioral theories of social media processes and effects. Strategies and tools for authoring content that builds relationships and creates conversations with key publics. GE credit: SS. Effective: 2016 Fall Quarter.

CMN 136—Organizational Communication (4)
Lecture—4 hours. Pass One open to Communication majors only. Organizational communication theory and practice is examined with an emphasis on the use of effective communication strategies for achieving organizational goals. GE credit: SS. Effective: 2016 Spring Quarter.

CMN 139—Advanced Organizational Communication (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): CMN 136 Pass One open to Communication majors only. Communication processes within and among social organizations. Examines formal organizations as information processing systems. Topics include general systems theory, input-output analysis, structural-functionalism, cybernetics, organizational network analysis, organization environments, organizations as cultures, organizational learning, information technologies, and communication diagnostic/auditing strategies. GE credit: SS, WE. Effective: 2011 Fall Quarter.

CMN 140—Introduction to Mass Communication (4)
Discussion—1 hour; Lecture—3 hours. History of mass media and media research traditions. Organization and economics of the media industry. Media policy, law, regulation and ethics. Impact of the media on individuals and society. Traditional, new and emerging communication technologies. GE credit: SS. Effective: 2017 Fall Quarter.

CMN 141—Media Effects: Theory and Research (4)
Lecture/Discussion—4 hours. Pass One open to Communication majors only. Social scientific studies of the effects of mass media messages on audience members' actions, attitudes, beliefs, and emotions. Topics include the
cognitive processing of media messages, television violence, political socialization, cultivation of beliefs, agenda-setting, and the impact of new technologies. GE credit: SS. Effective: 2018 Winter Quarter.

CMN 142—Newsmaking (4)
Lecture/Discussion—4 hours. Pass One open to Communication majors only. The making of news. How journalists construct news and how consumers and newsmakers use it. Effects of news, technology's challenges to journalism, and the relationship of news to other institutions. GE credit: ACGH, SS. Effective: 2018 Winter Quarter.

CMN 143—Analysis of Media Messages (4)
Lecture/Discussion—3 hours; Term Paper. Pass One open to Communication majors only. Examination of alternative approaches to the analysis, interpretation, and evaluation of media messages, including those disseminated through broadcasting, print, and new technologies. GE credit: ACGH, SS, WE. Effective: 2018 Winter Quarter.

CMN 144—Media Entertainment (4)
Lecture/Discussion—3 hours; Term Paper. Pass One open to Communication majors only. Effects and appeal of media entertainment, emphasizing emotional reactions. Topics include key concepts of entertainment research such as mood management, and the respective features and emotional/social-psychological effects of genres such as comedy, mystery, thriller, sports, music, horror, and erotica. GE credit: SS, WE. Effective: 2017 Spring Quarter.

CMN 145—Political Communication (4)
Extensive Writing; Lecture/Discussion—3 hours. Pass One open to Communication majors only. Relationships among the mass media, citizens, and politics, production of political news, campaign strategies, and citizens’ attitudes and behaviors. Frameworks for mediated politics, the news, and elite discourse and campaign messages. GE credit: ACGH, SS, WE. Effective: 2018 Winter Quarter.

CMN 146—Communication Campaigns (4)
Lecture/Discussion—4 hours; Term Paper. Pass One open to Communication majors only. Strategic uses of media and interpersonal communication channels in health, environmental advocacy, and political campaigns. Emphasis on general principles relevant to most campaign types, including public information, social marketing, and media advocacy campaigns. GE credit: SS. Effective: 2017 Fall Quarter.

CMN 147—Children, Adolescents, and the Media (4)
Lecture/Discussion—4 hours. Open to Communication majors only on Pass 1. Research on the adaptive and maladaptive effects of media (e.g., television, movies, video games, social media) on the social, emotional, cognitive, and physical development of youth, considering the protective role of parents, teachers, ethics, and policy. GE credit: SS. Effective: 2016 Fall Quarter.

CMN 148—Contemporary Trends In Media (4)
Lecture/Discussion—4 hours. Pass One open to Communication majors only. Global trends in media, including media and globalization, impacts of the new media economy, media and security, and effects of ownership on media content and culture. GE credit: OL, SS, WC. Effective: 2017 Spring Quarter.

CMN 149—Race & Media (4)
Lecture/Discussion—4 hours. Examines how race and ethnicity as social categories are shaped by mass media. Focuses on the impact of race and ethnicity role portrayals in content and style of news, television and cinema. GE credit: DD, SS. Effective: 2019 Fall Quarter.

CMN 150V—Computational Social Science (4)
Web Electronic Discussion—2 hours; Web Virtual Lecture—2 hours. Nontechnical survey of modern computational research methods. Web scraping, artificial intelligence, visualizing social networks, and computer simulations. Hands-on use of diverse software applications. Professors from all ten UC campuses contribute. GE credit: QL, SS. Effective: 2017 Winter Quarter.

CMN 151—Simulating Communication Processes (4)
Lecture/Discussion—3 hours; Term Paper. Simulations of communication and sociality using agent-based models. Focus on strategic behavior, cooperation, coordination, self-organization, information diffusion, and other communication phenomena. No programming skills assumed. GE credit: QL, SS, WE. Effective: 2018 Fall Quarter.

CMN 152V—Social Science with Online Data (4)
Extensive Problem Solving; Web Electronic Discussion—1.5 hours; Web Virtual Lecture—1 hour. Prerequisite(s): Programming experience helpful, but not required. Survey of web-driven social science and its methods. Focus on web scraping and social media API's. Covers wrangling and analysis of data from social networks, online experiments, and other digital traces. Python programming skills helpful, but not assumed. GE credit: QL, SL, SS. Effective: 2019 Fall Quarter.
CMN 161—Health Communication (4)
Extensive Writing; Lecture/Discussion—3 hours. Health communication theories and research. Health literacy, social support and coping, doctor-patient interaction, health communication campaigns, media influences on health, and applications of new technologies in health promotion. GE credit: SS, WE. Effective: 2017 Fall Quarter.

CMN 165—Media and Health (4)
Lecture/Discussion—4 hours. Content and effects of health messages in the media. Topics include health news reporting; portrayals of disease, disability, death and health-related behaviors; promotion of drugs and other health products; and tobacco and alcohol advertising. GE credit: SS, WE. Effective: 2018 Winter Quarter.

CMN 170—Digital Technology and Social Change (4)
Lecture/Discussion—4 hours. Conceptual understanding of how digital communication technologies transform our lives through social media, mobile connectivity, globalization, and big data. Contexts of application include education, health, entrepreneurship, democracy, and poverty. Not open for credit to students who have completed CMN 170V. GE credit: SS. Effective: 2016 Spring Quarter.

CMN 170V—Digital Technology and Social Change (4)
Web Electronic Discussion—1 hour; Web Virtual Lecture—3 hours. Conceptual understanding of how digital technologies transform our lives, through social media, mobile connectivity, globalization, big data, and artificial intelligence. Context of course include education, health, entrepreneurship, democracy, among others. Not open for credit to students who have completed CMN 170. GE credit: SS. Effective: 2016 Winter Quarter.

CMN 172—Interpersonal Technologies (4)
Discussion—1 hour; Lecture—3 hours. Pass One open to Communication majors only. Theories and research findings on how people use technologies for interpersonal and relational purposes, including impression formation, self-presentation, deception, anonymity, friend maintenance, online dating, and emotional expression. GE credit: SS. Effective: 2017 Fall Quarter.

CMN 174—Social Media (4-6)
Lecture/Discussion—4 hours. Application of communication theories to the study and design of social media. Examination of social media in contexts such as political activism and collaboration. Topics include online credibility, participatory culture, viral media and privacy. GE credit: ACGH, SS, WE. Effective: 2018 Spring Quarter.

CMN 176—Video Games Theory and Research (4)
Discussion/Laboratory—2 hours; Lecture/Discussion—2 hours. Communication theory and research on the uses and effects of video games. Research methods available for investigating game use and the impact of games on behavior. Application of those methods in a research project. GE credit: SS. Effective: 2018 Winter Quarter.

CMN 178—Persuasive Technologies (4)
Lecture/Discussion—3 hours; Term Paper. Designing and testing ethical, technology-based communication interventions in the domains of health, marketing, education, and environment. Social media, mobile apps, wearable devices, recommendation systems, serious games, and augmented reality. GE credit: SS, WE. Effective: 2017 Fall Quarter.

CMN 180—Current Topics in Communication (4)
Lecture/Discussion—4 hours. Prerequisite(s): CMN 101; CMN 102; Or a research methods course equivalent to CMN 102. Pass One open to Communication majors only. Group study of a special topic in communication. May be repeated up to 1 time(s) when topic differs. GE credit: SS. Effective: 2011 Fall Quarter.

CMN 189A—Proseminar in Social Interaction (4)
Seminar—3 hours; Term Paper. Prerequisite(s): CMN 101; CMN 102; CMN 136; and Consent of Instructor. Open to Communication majors only. Reading, discussion, research, and writing on a selected topic in the specialty of social interaction. Potential topics include relationship initiation, maintenance, and deterioration; communication failure; nonverbal communication; conversational management; semantics and pragmatics of languages; and family/marital communication. May be repeated for credit when topic differs. GE credit: SS, WE. Effective: 2011 Fall Quarter.

CMN 189B—Proseminar in Mass Communication (4)
Seminar—3 hours; Term Paper. Prerequisite(s): CMN 101; CMN 102; CMN 140; and Consent of Instructor. Open to Communication majors only. Reading, discussion, research, and writing on a selected topic in the specialty of mass communication. Potential topics include, agenda-setting, the cultivation of beliefs, television violence, media portrayals of underprivileged groups, mediated political discourse, interactive technologies, and international/global communications. May be repeated for credit when topic differs. GE credit: SS, WE. Effective: 2011 Fall Quarter.
CMN 189C—Proseminar in Health Communication (4)
Seminar—3 hours; Term Paper. Prerequisite(s): CMN 101; CMN 102; (CMN 161 or CMN 165); and Consent of Instructor. Open to Communication majors only. Reading, discussion, research, and writing on a selected topic in health communication. Potential topics include health communication design and evaluation, media advocacy, physician-patient interaction, uses of communication technologies in health settings, and health-related advertising. May be repeated for credit when topic differs. GE credit: SS, WE. Effective: 2011 Fall Quarter.

CMN 189D—Proseminar in Organizational Communication (4)
Seminar—3 hours; Term Paper. Prerequisite(s): CMN 101; CMN 102; CMN 136; and Consent of Instructor. Open to Communication majors only. Reading, discussion, research, and writing on a selected topic in the specialty of organizational communication. Potential topics include organizational networks, organizational conflict and its resolution, mediation, bargaining and negotiation, superior-subordinate interaction, leadership styles, and inter-organizational communication. May be repeated for credit when topic differs. GE credit: SS, WE. Effective: 2011 Fall Quarter.

CMN 189E—Proseminar in Information and Communication Technologies (4)
Discussion—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. Reading, discussion, research and writing on a selected topic in information and communication technologies. Potential topics include the role played by digital technologies in social change, serious games for change, and virtual and offline worlds. May be repeated up to 2 time(s) when topic differs. GE credit: SS. Effective: 2011 Fall Quarter.

CMN 192—Internship in Communication (1-12)
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Communication majors who have completed 20 units of upper division communication courses. Open to Communication majors only. Supervised work experience requiring the application of communication principles and strategies or the evaluation of communication practices in a professional setting. Relevant experiences include public relations, advertising, sales, human resources, health promotion, political campaigns, journalism, and broadcasting. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 2016 Fall Quarter.

CMN 194H—Senior Honors Thesis (4)
Project (Term Project)—3 hours; Seminar—1 hour. Prerequisite(s): Senior standing and approval by Honors Committee. Directed reading, research, and writing culminating in the preparation of honors thesis under direction of faculty advisor. GE credit: SS, WE. Effective: 1997 Winter Quarter.

CMN 197T—Tutoring in Communication (2-4)
Laboratory—1-2 hours; Seminar—1-2 hours. Prerequisite(s): Upper division standing with major in Communication and consent of Department Chairperson. Tutoring in undergraduate Communication courses, including leadership of discussion groups affiliated with departmental courses. May be repeated up to 6 unit(s). (P/NP grading only.) Effective: 1997 Fall Quarter.

CMN 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

CMN 199—Special Study for Advanced Undergraduates (1-5)
Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

CMN 201—Theoretical Perspectives on Communication (4)
Lecture/Discussion—4 hours. Prerequisite(s): Consent of Instructor. Graduate standing in Communication. Open to Communication graduate students only. Social scientific study of Communication. Research on interpersonal, organizational, mass, political, and health communication; communication technologies (e.g., video games, social media, persuasive technologies); and communication network analysis. Effective: 2017 Fall Quarter.

CMN 202—Communication Theory Construction (4)

CMN 203—Scientific Methods for Communication (4)
Seminar—3 hours; Term Paper. Prerequisite(s): CMN 201; CMN 202; PSC 204A; PSC 204B; Or equivalents. Social scientific research methods commonly employed in Communication. Topics include research design measurement sampling questionnaire construction survey research experimental design evaluation research content analysis and qualitative field methods. Effective: 2014 Winter Quarter.
CMN 204—Biological Foundations of Communication (4)
Lecture/Discussion—3 hours; Term Paper. Communibiological, evolutionary, neuroscience, and neurophysiological perspectives on communication. Methodologies for examining human physiological responses to messages, such as heart rate, skin conductance, electromyography, and cortical activity. Effective: 2017 Fall Quarter.

CMN 210—Experimental Methods and Analysis in Communication (4)
Lecture—4 hours. Prerequisite(s): Consent of Instructor. Graduate standing; one course in inferential statistics. Experimental designs in communication. Topics include: causation; threats to validity; conceptualization, operationalization, and measurement; hypothesis testing; ethics; data analysis software focusing on the analysis of variance and planned contrasts; and the practical and effective implementation and writing of experiments. Effective: 2010 Fall Quarter.

CMN 211—Survey Research Methods in Communication (4)
Seminar—4 hours. Prerequisite(s): Consent of Instructor. Graduate standing; one course in inferential statistics. Methods for designing personal interview, phone, mail, and web-based surveys in communication. Topics include: sampling strategies, sources of error and bias in survey designs, questionnaire construction, cognitive interviewing, interviewer behavior, and analysis of complex survey data using standard software packages. Effective: 2011 Winter Quarter.

CMN 212—Web Science Research Methods (4)
Lecture/Discussion—4 hours. Prerequisite(s): Consent of Instructor. Applications of data science to web-based communication research. Design, implementation, analysis, and reporting of studies using online data. Use of Python to scrape, organize, analyze, and visualize web data. Effective: 2018 Spring Quarter.

CMN 213—Simulation Methods in Communication Research (4) Review all entries Discontinued
Lecture/Discussion—4 hours. Prerequisite(s): Consent of Instructor. Simulation methods for modeling human communication. Single and multiple agent approaches to developing process theories of cooperation, coordination, strategic behavior, information and innovation diffusion, and other aspects of sociality. Effective: 2018 Fall Quarter.

CMN 214—Mass Communication Theory and Research (4) Review all entries Discontinued
Seminar—4 hours. Effective: 2005 Fall Quarter.

CMN 220—Persuasion Theories and Message Design ()
Prerequisite(s): Consent of Instructor. Graduate standing. Major social scientific theories and perspectives on attitude change and persuasion. Application of persuasion theories and principles to persuasive message design in applied contexts. Effective: 2005 Fall Quarter.

CMN 221—Communication and Cognition (4)
Seminar—4 hours. Prerequisite(s): Consent of Instructor. Graduate standing. Explores the cognitive structures and processes that enable the production, comprehension and interpretation of messages in face-to-face and mediated communication contexts. Effective: 2005 Fall Quarter.

CMN 222—Risk Communication (4)
Seminar—4 hours. Prerequisite(s): Consent of Instructor. Graduate standing. Theories and models of individual risk information processing. Media depictions of threats and risk-related information and their potential effects on audiences. Implications for the design and implementation of messages concerning threat and risk. Effective: 2005 Fall Quarter.

CMN 230—Social Interaction Theory and Research (4)
Seminar—4 hours. Prerequisite(s): Consent of Instructor. Graduate standing. Survey of theories and research on social interaction and interpersonal communication. Covers communication codes, individual differences in communication, communication and relationship development, family communication, conflict, cognitive and emotional processes underlying social interaction, social influence, intercultural communication, and nonverbal behavior. Effective: 2005 Fall Quarter.
CMN 231—Tactics of Interpersonal Influence (4)
Seminar—4 hours. Prerequisite(s): Consent of Instructor. Graduate standing. Achievement of interpersonal goals in social interaction. Topics include message production; tactics, strategies and planning; anticipating potential obstacles; resisting and thwarting goals; plan recognition; and goal detection. Examined goals include compliance gaining, attitude change, ingratiation, information seeking, comforting, and deception. Effective: 2005 Fall Quarter.

CMN 232—Health Communication (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Health communication theories and research traditions. Topics include consumer health information seeking; physician-patient interaction; information, social marketing, “edutainment,” and media advocacy campaigns; social networks and coping; media influences on health; and new communication technologies in health promotion and healthcare delivery. (Same course as SPH 232.) Effective: 2011 Fall Quarter.

CMN 233—Persuasive Technologies for Health (4)
Lecture/Discussion—3 hours; Term Paper. Theorizing, designing and evaluating ethical technology-based health communication interventions. Uses of social media, mobile communication apps, wearable devices, computer-generated tailored messages, educational games, and computational approaches in health promotion and healthcare delivery. (Same course as SPH 233.) Effective: 2017 Fall Quarter.

CMN 234—Intercultural Communication (4)
Seminar—3 hours; Term Paper. Restricted to graduate standing. Theories and research on intercultural communication. Topics include national, racial, and ethnic similarities and differences in communication practices; cultural beliefs and values; identity and conflict; and technological influences on intercultural communication. Methodological issues in intercultural communication research are also examined. Effective: 2016 Spring Quarter.

CMN 235—Health Communication Campaigns (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. Restricted to graduate students. Principles of health communication campaign planning, implementation and evaluation. Strategies for changing health behaviors, shaping policy, and improving healthcare organizations’ relations with stakeholders. (Same course as SPH 235.) Effective: 2017 Fall Quarter.

CMN 243—Media and Health (4)
Seminar—3 hours; Term Paper. Restricted to graduate standing. Survey of research on media and health. Topics include health news coverage; depictions of health, illness and disability in entertainment; health campaigns; advertising of health products and services; and the influence of gaming and other new media on health behaviors. Effective: 2010 Fall Quarter.

CMN 244—Organizational Communication (4)
Seminar—4 hours. Prerequisite(s): Consent of Instructor. Graduate standing. Theory and research on communication processes in organizations. Effective: 1997 Winter Quarter.

CMN 250—Mediated Communication Theory and Research (4)
Seminar—4 hours. Prerequisite(s): Consent of Instructor. Graduate standing. Survey of major theories on the intended and unintended effects of mediated communication. Topics include media’s effects on learning, political behavior, interpersonal violence, sexual socialization, consumer behavior, race relations, gender socialization, and cultural processes. Effective: 2005 Fall Quarter.

CMN 251—Digital Technology and Social Change (4)
Seminar—3 hours; Term Paper. Conceptual, theoretical, and international consideration of how digital communication technologies transform social organization and development. Topics include social media, big data, political revolutions, e-democracy, digital divide, e-education, e-health, entrepreneurship, public policies, poverty reduction, technological innovations, microfinance, and entertainment. Not open to students who have taken CMN 251Y. Effective: 2017 Spring Quarter.

CMN 251Y—Digital Technology and Social Change (4)
Discussion—2 hours; Web Virtual Lecture—2 hours. Discussion and research on how digital technologies transform our lives through social media, mobility, big data, global connectivity, and artificial intelligence; changing business, health, democracy, globalization, families, dating, and education. Not open to students who have taken CMN 251. Effective: 2017 Fall Quarter.

CMN 252—Computer-Mediated Communication (4)
Seminar—4 hours. Prerequisite(s): Consent of Instructor. Graduate standing. Effective: 2005 Fall Quarter.
CMN 253—Children, Adolescents, and the Media (4)
Lecture/Discussion—3 hours; Term Paper. Theory and research on the uses and effects of traditional and new media on children and adolescents, emphasizing social, emotional, cognitive, and physical development. Methodological approaches and ethical issues in studies of underage populations. Parent and family mediation of effects. Effective: 2017 Winter Quarter.

CMN 254—Communication Campaigns (4)
Seminar—4 hours. Prerequisite(s): Consent of Instructor. Graduate standing. Strategic uses of media and interpersonal channels to promote social change through social marketing, information, and media advocacy campaigns. Focus on theory-based interventions in a variety of applied contexts. Effective: 2005 Fall Quarter.

CMN 255—Social Media (4)
Seminar—3 hours; Term Paper. Theoretical, conceptual and analytic issues pertaining to social media research. Topics include motivation, participation, virality, and social-technical capital. Examination of social media in various contexts. Introduction to online behavioral data collection and analysis methods. Effective: 2014 Fall Quarter.

CMN 256—Communication Perspective on Video Games (4)
Seminar—3 hours; Term Paper. Review of theory and research on the uses and effects of video games and virtual environments developed for entertainment and education. Study of the research methods available for documenting and measuring game use and effects on behavior. Effective: 2014 Fall Quarter.

CMN 259—Cognitive Approaches to Media (4)
Seminar—3 hours; Term Paper. Restricted to graduate standing. Interdisciplinary examination of cognitive approaches to mediated communication. Application of studies on mediated message processing, cognitive and emotional information processing, psychophysiology, and neuroscience to mass communication. Review of media research and methods on attention, memory, motivation, and limited capacity. Effective: 2014 Fall Quarter.

CMN 260—Political Communication (4)

CMN 270—Diffusion of Innovations (4)
Seminar—3 hours; Term Paper. Communication processes by which information and innovations spread through social systems. Models of diffusion, including spatial, network, time dependent, semantic and cognitive frameworks. Impact of communication technologies on diffusion. Practical application of diffusion models in a variety of contexts. Effective: 2015 Spring Quarter.

CMN 271—Communication Networks (4) Review all entries

CMN 271—Communication Networks (4) Review all entries Discontinued
Seminar—3 hours; Term Paper. Theoretical, conceptual, and analytic issues pertaining to network perspectives on communicating and organizing. Consideration of both structural and dynamic features of communication networks. Examination of the impact of emerging technologies on communication networks. Introduction to network analysis software. Effective: 2018 Fall Quarter.

CMN 280—Special Topics in Social Interaction (4)
Seminar—4 hours. Prerequisite(s): Consent of Instructor. Graduate standing. Reading, discussion, research, and writing on a selected topic in the specialty of social interaction. May be repeated for credit May be repeated when topics differ. Effective: 2005 Fall Quarter.

CMN 281—Special Topics in Mediated Communication (4)
Seminar—4 hours. Prerequisite(s): Consent of Instructor. Graduate standing. Reading, discussion, research, and writing on a selected topic in the specialty of mediated communication. May be repeated for credit May be repeated when topics differ. Effective: 2005 Fall Quarter.

CMN 282—Special Topics in Health Communication (4)
Seminar—4 hours. Prerequisite(s): Consent of Instructor. Graduate standing. Reading, discussion, research and
writing on a focused topic in health communication. May be repeated for credit when topics differ. Effective: 2016 Fall Quarter.

**CMN 283—Special Topics in Organizational Communication (4)**
Seminar—4 hours. Prerequisite(s): Consent of Instructor. Graduate standing. Reading, discussion, research, and writing on a selected topic in the specialty of organizational communication. May be repeated for credit. May be repeated when topics differ. Effective: 2005 Fall Quarter.

**CMN 284—Special Topics in Political Communication (4)**
Lecture/Discussion—4 hours. Reading, discussion, research, and writing on a selected topic in the specialty of political communication. May be repeated up to 4 time(s) when topic differs. Effective: 2018 Fall Quarter.

**CMN 298—Group Study (1-5)**
Lecture—3 hours. (S/U grading only.) Effective: 1997 Winter Quarter.

**CMN 299—Individual Study (1-12)**
Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

**CMN 299R—Thesis/Dissertation Research and Writing (1-12)**
Independent Study—3-36 hours. Prerequisite(s): Consent of Instructor. Graduate standing in Communication. Students in the Department of Communication graduate programs conduct dissertation research and writing under the supervision of a faculty member. May be repeated up to 21 time(s) Across campus, students use the course 299 numbers to reach the 12-unit requirement for full time student status. In saying that students may repeat this "course" 21 times, we assumed that students would complete their doctoral programs within seven years (five is the norm). The value 21 was based on the calculation 3 quarters * 7 years. (S/U grading only.) Effective: 2017 Winter Quarter.

**CMN 396—Teaching Assistant Training Practicum (1-4)**
Variable. Prerequisite(s): Graduate standing. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

---

**Community & Regional Development**

Community & Regional Development | CRD B.S.
(College of Agricultural and Environmental Sciences)

(Department of Human Ecology)
Luis E. Guarnizo, Ph.D., Community and Regional Development Program, Vice-Chairperson of the Department
Lisa Miller, Ph.D., Human Development and Family Studies Program, Vice-Chairperson of the Department

Department Advising Office. 1303 Hart Hall; 530-752-2244, 530-752-1805; 530-752-9322; http://hcd.ucdavis.edu

Faculty. http://humanecology.ucdavis.edu/crd-faculty

The Major Program
The Community and Regional Development major aims to provide a broad comparative understanding of theories, methodologies, and issues relevant to the study of communities and the people in them. The program focuses on the ways that economic, political and socio-cultural forces are transforming the world, countries, regions, and local communities, and it considers how knowledge can be used to improve the quality of community life.

The Program. Principal subjects of study within the major are community, regional, and organizational development; social change processes; the role of culture, gender, class, race and ethnicity in shaping social life; community and regional research methodologies; the impacts of innovation and technology on communities, and the effects of social, economic and political systems on regions. The major is organized to allow students to develop fields of concentration that meet their career goals.

Major Advisor. M. Kenney, mfkenney@ucdavis.edu

Internships and Career Alternatives. Community and Regional Development students are required to complete an internship in their field before graduation. Internships have been arranged with local, county, and state planning units, health departments, schools, housing offices, businesses, and education programs, among others. Community and Regional Development graduates are prepared for occupations in community development, social
research, program evaluation, organizational and educational consulting, city and regional planning, and for-profit organizations. The major also provides effective preparation for graduate or professional study in the social and behavioral sciences or for professional degrees.

**Honors Program.** An Honors Program is available to Human and Community Development majors who have demonstrated excellence in their field of study. Entrance into the honors program requires that a student have completed at least 135 units with a minimum grade point average of 3.500 in upper division courses counted toward the major. The program consists of a project whose specific nature is determined in consultation with the student’s Honors Adviser. It may involve completion of a research project, a scholarly paper, a senior thesis, or some comparable assignment. The project will have a minimum duration of two quarters and will be noted on the student’s record by a variable unit course number or special honors course designation. Successful completion of the honors program requires that a minimum of eight (8) units of credit be earned in course work for the project. It is expected that a student participating in the Honors Program of the Community and Regional Development major will participate in the Undergraduate Research, Scholarship and Creative Activities Conference. Additionally, students participating in the Honors Program will be required to give a public presentation of their work in a departmental seminar program.

**Honors Program Advisor.** M. Kenney, mfkenney@ucdavis.edu

**Areas of Specialization**

Units: 40

Choose 20 units from each of two options, including at least one Community and Regional Development course from each option, or 40 units from one option, including at least two Community and Regional Development courses. These courses cannot overlap with the depth subject. Up to four units of variable-unit course work may be counted toward this requirement; e.g., Community and Regional Development 192.

**Global Communities Option**

Students must consult with a faculty advisor to identify an emphasis within the option and to select suitable courses.

**Development Policy:**

The Upper Division Composition Exam does not satisfy the requirement.
Advanced Placement English score of 4 or 5 which satisfies English 3 and/or
University Writing Program 1 will satisfy one of the three required courses.

Total: 108-113

### Community & Regional Development | CRD Courses

#### Courses in CRD:

**CRD 001—The Community (4)**
Discussion—1 hour; Lecture—3 hours. Basic concepts of community analysis and planned social change. The dynamics of community change through case studies of communities including peasant, urban ghetto, suburban mainline, and California farm workers. GE credit: ACGH, DD, OL, SS, VL, WE. Effective: 2012 Fall Quarter.

**CRD 002—Ethnicity and American Communities (4)**
Discussion—1 hour; Lecture—3 hours. Historical and cultural survey of the role of various ethnic groups in the development of American communities. Examines ethnicity as a cultural factor, ethnicity as power and issues related to selected American ethnic groups. GE credit: ACGH, DD, SS, WE. Effective: 2012 Fall Quarter.

**CRD 020—Food Systems (4)**
Laboratory—3 hours; Lecture—3 hours. Social aspects of agri-food systems. Social science perspectives applied to food and agricultural sustainability in relation to ecology, knowledge, technology, power, governance, labor, social difference, and social movements. Social and environmental effects of commodity chains in comparative global context. GE credit: OL, SS, VL, WE. Effective: 2012 Fall Quarter.

**CRD 092—Internship (1-12)**
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Supervised internship, off and on campus, in community and institutional settings. (P/NP grading only.) Effective: 2012 Fall Quarter.

**CRD 098—Directed Group Study for Undergraduates (1-5)**
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 2012 Fall Quarter.

**CRD 099—Special Study for Undergraduates (1-5)**
Variable. (P/NP grading only.) Effective: 2012 Fall Quarter.

**CRD 118—Technology and Society (4)**
Discussion—1 hour; Extensive Writing; Lecture—3 hours; Term Paper. Prerequisite(s): CRD 001 or CRD 002 or SOC 001 or ANT 002 Impact of technology on labor relations, employment, industrial development and international relations. Internal relations of technology development and deployment. GE credit: SS, WC, WE. Effective: 2016 Fall Quarter.

**CRD 140—Dynamics of Regional Development (4)**
Extensive Writing; Lecture—4 hours; Project (Term Project); Term Paper. Prerequisite(s): CRD 001 or CRD 002 or SOC 001 or ANT 002 Industrial cluster formation and institutions. Technology, labor relations and interfirm linkages
in global value chains. California and other regions are used as case studies. GE credit: SS, WE. Effective: 2016 Fall Quarter.

CRD 141—Organization of Economic Space (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): CRD 001 or CRD 002 or SOC 001 or ANT 002 Globalization and technological restructuring of economic activity focusing on new spatial patterns of production and circulation and their implications for workers, communities and societies, both in the U.S. and around the globe. GE credit: SS, WC, WE. Effective: 2016 Fall Quarter.

CRD 142—Rural Change in the Industrialized World (4)
Discussion—1 hour; Extensive Writing; Lecture—3 hours; Term Paper. Prerequisite(s): SOC 001 or CRD 001 or CRD 002 or ANT 002 Geography of rural environment with emphasis on rural restructuring. Demographics, community, economy, governance, agriculture, and environmental conservation in rural areas of industrialized world. Case studies from and comparisons drawn between North America, Europe, Australia, New Zealand, and Japan. GE credit: SS, WE. Effective: 2016 Fall Quarter.

CRD 147—Community Youth Development (4)
Extensive Writing/Discussion; Lecture/Discussion—4 hours; Project (Term Project); Term Paper. Community influences on youth well-being, youth as agents of community change, and policies to support healthy communities for young people. Special emphasis on disparities in youth well-being related to race, class, immigration status, gender, sexual-orientation. GE credit: DD, OL, SS, VL, WE. Effective: 2016 Fall Quarter.

CRD 149—Community Development Perspectives on Environmental Justice (4)
Extensive Writing/Discussion; Lecture/Discussion—4 hours; Project (Term Project); Term Paper. Environmental justice social movements; inequitable distribution of pollution on low-income communities of color; histories, policies, and innovations associated environmental justice movements in the United States and around the world. GE credit: DD, OL, SS, VL, WE. Effective: 2016 Fall Quarter.

CRD 150—Quantitative Methods in Community Research (5)
Discussion/Laboratory—1 hour; Lecture—4 hours. Prerequisite(s): SOC 046B or STA 013 or STA 032; Consent of Instructor. Introduction to statistical analysis of social data relevant to community research, planning and assessment, emphasizing data sources and acquisition, descriptive and inferential analysis techniques, and data interpretation and presentation. Emphasis on spatial data and methods, focusing on the sources, processing, analysis, and presentation of spatial data in a community assessment context. GE credit: QL, SL, SS. Effective: 2018 Fall Quarter.

CRD 151—Community Field Research: Theory and Analysis (4) Review all entries
Extensive Writing; Lecture—4 hours; Project (Term Project). Prerequisite(s): CRD 001; STA 013 or STA 013Y or SOC 046B; Any upper division Community and Regional Development course is recommended. Emphasis on the design and analysis of community research considering the relationship between theory and practice. Study of community research methods, including structural analysis, elite interviewing, and ethnographic approaches. Course requires design and completion of field research project. GE credit: ACGH, DD, OL, SS, VL, WE. Effective: 2017 Fall Quarter.

CRD 151—Community Field Research: Theory and Analysis (5) Review all entries
Laboratory—2 hours; Lecture—4 hours. Prerequisite(s): CRD 001; (STA 013 or STA 013Y or SOC 046B); Any upper division Community and Regional Development course is recommended. Design and analysis of community research considering the relationship between theory and practice. Community research methods, including elite interviewing, ethnographic approaches, and statistical methods, descriptive statistics and OLS regression. Course requires design and completion of field research project. GE credit: ACGH, DD, OL, SS, VL, WE. Effective: 2019 Winter Quarter.

CRD 152—Community Development (4)
Extensive Writing; Lecture—4 hours; Project (Term Project); Term Paper. Prerequisite(s): CRD 001 or CRD 151 or SOC 002 or ANT 002 or ASA 100 or CHI 132 or AAS 101 Introduction to principles and strategies of community organizing and development. Examination of non-profit organizations, citizen participation, poverty reduction, community needs assessment, and regional development strategies. Comparison of community development approaches of the U.S.A./California with other western and non-western societies. GE credit: ACGH, DD, SS, WC, WE. Effective: 2016 Fall Quarter.

CRD 153A—International Community Development: Asia (4) Review all entries
Lecture—4 hours. Prerequisite(s): CRD 001 or ANT 002 or IAD 010 or SOC 001 or SOC 002 or POL 001 Examination and analysis of community development efforts in Japan and the impact of global forces in different settings.
Alternative strategies with emphasis on self-reliance and locally controlled development. Course is based in Kyoto, Japan, and includes field trips. GE credit: OL, SS, VL, WC, WE. Effective: 2016 Fall Quarter.

CRD 153A—International Community Development: Asia (4) Review all entries
Lecture/Discussion—3 hours; Project (Term Project)—3 hours. Prerequisite(s): Consent of Instructor. 2.000 GPA; good academic standing. For summer and quarter abroad versions, limited to 30 students; for the Seminar Abroad version, limited to 15 students; this allows for the small group learning methodology as well as the active collaboration with in-country university students; available for undergraduate and graduate students; applications through UC Davis Study Abroad accepted on a first-come, first-reserved basis for qualified applicants. Examination and analysis of community development efforts in a range of Asian countries and the impact of global forces in different settings. Includes classroom lectures, workshops, field trips, and collaborative action research projects. GE credit: OL, SS, WC, WE. Effective: 2018 Fall Quarter.

CRD 153B—International Community Development: Europe (4)
Lecture—4 hours. Prerequisite(s): ANT 002 or IAD 010 or CRD 001 or CRD 002 or SOC 001 or SOC 002 or POL 001 Examination and analysis of community development efforts in Europe and the impact of global forces in different settings. Alternative strategies with emphasis on self-reliance and locally controlled development. Based in Freiburg, Germany, including field trips to France and Switzerland. GE credit: SS, WC. Effective: 2016 Fall Quarter.

CRD 153C—International Community Development: Africa (4)
Fieldwork—2 hours; Lecture—2 hours. Prerequisite(s): CRD 001 or CRD 002 or ANT 002 or IAD 010 or SOC 001 or SOC 002 or POL 001 Examination and analysis of community development efforts in Africa and the impact of global forces in urban and rural settings. Focus on strategies that promote self-reliance and locally controlled development. Course based in South Africa, includes field trips. GE credit: SS, WC. Effective: 2016 Fall Quarter.

CRD 154—Social Theory and Community Change (4)
Extensive Writing; Lecture/Discussion—4 hours; Project (Term Project); Term Paper. Prerequisite(s): CRD 001 or SOC 001 or ANT 002 Comparative overview of the dominant social science paradigms for the study of community development and change. Among the paradigms discussed are functionalism, conflict theory/ Marxism, structuralism, methodological individualism, reflexive modernity. GE credit: ACGH, DD, OL, SS, VL, WC, WE. Effective: 2016 Fall Quarter.

CRD 156—Community Economic Development (5)
Laboratory—2 hours; Lecture—4 hours. Prerequisite(s): CRD 152 or PLS 021 or ECS 015; and Consent of Instructor. How government and community organizations help firms grow and create jobs through local economic development corporations, small business centers, revolving loan funds, incubators, and other programs. Techniques to analyze community economic potential and identification of appropriate intervention tools. Group project. GE credit: QL, SS, WE. Effective: 2016 Fall Quarter.

CRD 157—Politics and Community Development (4)
Lecture—4 hours. Analyzes political, economic and sociocultural forces shaping the form and function of local communities in the U.S. Considers theories of the state, the community and social change and case studies of actual community development in comparative historical perspective. GE credit: ACGH, DD, SS, WE. Effective: 2016 Fall Quarter.

CRD 158—Small Community Governance (4)
Fieldwork—30 hours; Lecture/Discussion—3 hours. Prerequisite(s): CRD 001 or SOC 001 or POL 001 Governing institutions and political processes in rural and small urban places. Local government organization, community autonomy, leadership, political change, policy development, and select policy issues including public finance. Field research on political processes or policy issues in select communities. Effective: 2016 Fall Quarter.

CRD 162—People, Work and Technology (4) Review all entries
Lecture—4 hours. Prerequisite(s): CRD 001 or SOC 001 or ANT 001; Upper division standing recommended. Restricted to upper division standing. Analysis of the relationship between work, technology, and human experience. Theories of the causes and consequences of labor process change; impacts of race/ethnicity, class, gender, and citizenship status on work; responses of workers, communities, and policy-makers to workplace changes. Effective: 2016 Fall Quarter.

CRD 162—People, Work and Technology (5) Review all entries
Discussion—1 hour; Lecture—4 hours. Prerequisite(s): CRD 001 or SOC 001 or ANT 001; Upper division standing recommended. Analysis of the relationship between work, technology, and the human experience. Theories of the causes and consequences of labor process, changes under capitalism and globalization, impacts of race/ethnicity,
class, gender, and citizenship status on work in the United States and globally; responses of workers, communities, and policy-makers to workplace changes. GE credit: ACGH, DD, SS, WE. Effective: 2018 Fall Quarter.

**CRD 164—Theories of Organizations and their Role in Community Change (5)**
Laboratory—2 hours; Lecture—4 hours. Prerequisite(s): (STA 013 or STA 013Y or SOC 046B); (CRD 001 or CRD 002 or SOC 001 or ANT 002) Planned change within and through community organizations. Private voluntary organizations, local community associations, and local government. Relationship between community organizations and social capital. Collaborative original data gathering and professional report writing. GE credit: ACGH, DD, OL, SS, VL, WE. Effective: 2018 Spring Quarter.

**CRD 171—Housing and Social Policy (4)**
Lecture—4 hours; Term Paper. Social impact, economics, and politics of housing in the United States. Special attention given to federal, state, and local policy and program strategies to produce and preserve affordable housing and inclusive neighborhoods. Effective: 2016 Fall Quarter.

**CRD 172—Social Inequality: Issues and Innovations (4)**
Extensive Writing; Lecture/Discussion—4 hours; Project (Term Project); Term Paper. Prerequisite(s): CRD 001 or CRD 002 or SOC 001 or ANT 002; Upper division standing recommended. Focus on the dimensions, causes, and means of alleviating social inequality in the U.S. Examination and analysis of major theories and forms (class, race/ethnicity, gender, and citizenship status) of inequality. Policy-based and grassroots approaches to change. Effective: 2016 Fall Quarter.

**CRD 176—Comparative Ethnicity (4)**
Lecture—4 hours; Term Paper. Prerequisite(s): CRD 001 or CRD 002 or SOC 001 or ANT 002; Upper division standing recommended. Role of ethnicity in shaping social systems and interaction. Analytical approaches to and issues arising from the study of ethnicity, through utilization of data from a range of different societies. GE credit: ACGH, DD, SS, WC, WE. Effective: 2016 Fall Quarter.

**CRD 180—Transnational Community Development (4)**
Extensive Writing; Lecture/Discussion—4 hours; Project (Term Project); Term Paper. Prerequisite(s): CRD 001 or ANT 002 or SOC 001 The effects of grassroots, non-state, non-corporate actors from abroad on local, national and international development. Socioeconomic, political, and cultural implications of transnational actions undertaken by international non-governmental organizations, individual migrants, and migrant grassroots civic organizations. GE credit: SS, WC, WE. Effective: 2012 Fall Quarter.

**CRD 192—Internship (1-12)**
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Completion of 84 units. Supervised internship, off and on campus, in community and institutional settings. (P/NP grading only.) Effective: 2012 Fall Quarter.

**CRD 194HA—Special Study for Honors Students (4)**
Independent Study—3 hours; Project (Term Project); Seminar—1 hour; Term Paper. Prerequisite(s): Consent of Instructor. Completion of 135 units at the time of enrollment; GPA 3.500 in the major; GPA 3.300 in overall standing; completion of at least four upper division courses; agreement of a faculty member to serve as thesis advisor. Community and Regional Development Honors is a program of direct reading, research and writing culminating in the preparation of a Senior Honors Thesis under the direction of a faculty advisor. Effective: 2012 Fall Quarter.

**CRD 194HB—Special Study for Honors Student (4)**
Independent Study—3 hours; Project (Term Project); Seminar—1 hour; Term Paper. Prerequisite(s): Consent of Instructor. Completion of 135 units at the time of enrollment; GPA 3.500 in the major; GPA 3.300 in overall standing; completion of at least four upper division courses; agreement of a faculty member to serve as thesis advisor. Community and Regional Development Honors is a program of direct reading, research and writing culminating in the preparation of a Senior Honors Thesis under the direction of a faculty advisor. Effective: 2012 Fall Quarter.

**CRD 197T—Tutoring in Community and Regional Development (1-5)**
Tutorial—3-15 hours. Prerequisite(s): Consent of Instructor. Upper division standing; completion of course to be tutored. Assisting instructor in one of the Community and Regional Development's regular courses by tutoring individual students or small groups of students in a laboratory, in voluntary discussion groups, or other voluntary activities. May be repeated up to 10 unit(s). (P/NP grading only.) Effective: 2013 Fall Quarter.

**CRD 198—Directed Group Study (1-5)**
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 2012 Fall Quarter.

**CRD 199—Special Study for Advanced Undergraduates (1-5)**
Variable. (P/NP grading only.) Effective: 2012 Fall Quarter.
CRD 200—Planning for Health (4)
Extensive Writing; Lecture/Discussion—2 hours; Project (Term Project)—1 hour. Focused on the intersection of city planning and public health. The health of an individual or community is determined not only by the health care they receive, but also by the natural, social, physical, economic, and political environment. Covers topics such as food access, air quality, water quality, waste and energy infrastructure, community engagement, and the planning process. Provides an overview of available public spatially explicit data. Effective: 2018 Fall Quarter.

CRD 230—Spatial Methods in Community Research (4)
Lecture—4 hours. Prerequisite(s): Graduate standing. Spatial analysis of social data relevant to community research, with focus on neighborhoods as units of analysis. Clustering, segregation, geodemographic modelling, spatial regression, multilevel models, spatial data management, accessibility. Effective: 2019 Spring Quarter.

CRD 240—Community Development Theory (4)
Lecture/Discussion—4 hours. Introduction to theories of community development and different concepts of community, poverty, and development. Emphasis on building theory, linking applied development techniques to theory, evaluating development policy, and examining case studies of community development organizations and projects. (Same course as GEO 240.) Effective: 2014 Winter Quarter.

CRD 241—the Economics of Community Development (4)
Seminar—4 hours. Prerequisite(s): Graduate standing. Economic theories and methods of planning for communities. Human resources, community services and infrastructure, industrialization and technological change, and regional growth. The community's role in the greater economy. (Same course as GEO 241.) Effective: 2015 Spring Quarter.

CRD 242—Community Development Organizations (4)
Seminar—4 hours. Prerequisite(s): CRD 240; and Consent of Instructor. Class size limited to 15 students. Theory and praxis of organizations with social change agendas at the community level. Emphasis on non-profit organizations and philanthropic foundations. Effective: 2012 Fall Quarter.

CRD 242S—Community Development Organizations (International) (4)
Fieldwork—10 hours; Lecture—5 hours; Workshop—5 hours. Prerequisite(s): CRD 240 Class size limited to 10 students. Theory and praxis of organizations with social change agendas at the community level. Emphasis on local governance, non-profit organizations and philanthropic foundations at an international level. Effective: 2012 Fall Quarter.

CRD 243—Critical Environmental Justice Studies (4)
Extensive Writing; Seminar—4 hours. Prerequisite(s): Consent of Instructor. Open to graduate students only. Application of social science theories of race, ethnicity, class, gender, and power to understand the production and contestation of environmental inequities. Effective: 2017 Fall Quarter.

CRD 244—Political Ecology of Community Development (4)
Lecture—4 hours. Prerequisite(s): Graduate standing. Community development from the perspective of geographical political ecology. Social and environmental outcomes of the dynamic relationship between communities and land-based resources, and between social groups. Cases of community conservation and development in developing and industrialized countries. (Same course as GEO 254.) Effective: 2014 Winter Quarter.

CRD 245—the Political Economy of Urban and Regional Development (4)
Lecture—4 hours. Prerequisite(s): CRD 157; CRD 244; Or equivalent. How global, political and economic restructuring and national and state policies are mediated by community politics; social production of urban form; role of the state in uneven development; dynamics of urban growth and decline; regional development in California. (Same course as GEO 245.) Effective: 2014 Spring Quarter.

CRD 246—the Political Economy of Transnational Migration (4)
Lecture—4 hours. Prerequisite(s): Graduate standing. Theoretical perspectives and empirical research on social, cultural, political, and economic processes of transnational migration to the U.S. Discussion of conventional theories will precede contemporary comparative perspectives on class, race, ethnicity, citizenship, and the ethnic economy. (Same course as GEO 246.) Effective: 2014 Winter Quarter.

CRD 247—Transformation of Work (4)
Lecture/Discussion—4 hours. Prerequisite(s): Graduate standing in history or social science degree program or consent of instructor. Exploration of the ways that the experience, organization, and systems of work are being reconfigured in the late twentieth century. The impacts of economic restructuring on local communities and workers. Effective: 2012 Fall Quarter.
CRD 248—Social Policy, Welfare Theories and Communities (4)
Seminar—4 hours. Prerequisite(s): Graduate standing. Theories and comparative histories of modern welfare states and social policy in relation to legal/normative, organizational, and administrative aspects. Analysis of specific social issues within the U.S./California context. Not open for credit to students having completed CRD 248A and CRD 248B. (Same course as GEO 248.) Effective: 2013 Fall Quarter.

CRD 248A—Social Policy, Welfare Theories and Communities I (2)
Seminar—2 hours. Prerequisite(s): Graduate standing. Theories and comparative histories of modern welfare states. Theories of welfare and social policy in relation to normative, organizational, and administrative aspects of welfare and social policy. Effective: 2017 Winter Quarter.

CRD 248B—Social Policy, Welfare Theories and Communities II (2)
Seminar—2 hours. Prerequisite(s): Graduate standing. Concurrent enrollment in course 248A. Analysis of a specific set of social issues within the US/California context. Issues may include poverty, hunger, housing, health, family, disability, economic opportunity, affirmative action orientations, gender, old age, or special social groups. Effective: 2017 Winter Quarter.

CRD 249—Media Innovation and Community Development (4)
Seminar—4 hours. Open to graduate students. Role of innovative media in communities and social change. Studies historical, practical and theoretical issues involving media in community organizing, social justice movements, democracy initiatives, and economic justice. Effective: 2014 Spring Quarter.

CRD 250—Professional Skills for Community Development (4)
Extensive Writing/Discussion; Fieldwork; Lecture/Discussion—2 hours; Project (Term Project)—2 hours. Prerequisite(s): CRD 240 Priority enrollment for Masters and Ph.D. students in Community and Regional Development. Help students develop the practical skills needed to work professionally in organizations that are involved in community development. Provides an overview of community development planning, project management, and consultation skills. Effective: 2016 Fall Quarter.

CRD 290—Seminar (1) Review all entries
Seminar—1 hour. Analysis of research in applied behavioral sciences. (S/U grading only.) Effective: 2016 Fall Quarter.

CRD 290—Community Development Seminar (1) Review all entries
Seminar—1 hour. Pass One restricted to graduate students in the CDGG masters program; open to other programs by consent of the instructor. Speaker series on key topics in community development. May be repeated for credit CDGG MS students must take four quarters to satisfy the MS degree requirements; may take course as many times as student chooses. (S/U grading only.) Effective: 2016 Fall Quarter.

CRD 292—Graduate Internship (1-12)
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Individually designed supervised internship, off campus, in community or institutional setting. Developed with advice of faculty mentor. May be repeated for credit Student may register in more than one internship section per term. (S/U grading only.) Effective: 2019 Winter Quarter.

CRD 293—Community Development Graduate Proseminar (1)
Lecture/Discussion—1 hour. Prerequisite(s): Enrollment in Community Development graduate group. Restricted to first year Community Development graduate students only. Introduction to graduate training in Community Development. Seminar designed to introduce students entering graduate work in the Community Development Graduate Group to its ongoing activities. (S/U grading only.) Effective: 2012 Fall Quarter.

CRD 298—Group Study (1-5)
Variable. Effective: 2012 Fall Quarter.

CRD 299—Research (1-12)
Variable. (S/U grading only.) Effective: 2012 Fall Quarter.

CRD 396—Teaching Assistant Training Practicum (1-4) Review all entries
Variable—3-12 hours. Prerequisite(s): Graduate Standing. May be repeated for credit. (S/U grading only.) Effective: 2012 Fall Quarter.

CRD 396—Teaching Assistant Training Practicum (1-4) Review all entries Discontinued
Variable—3-12 hours. Prerequisite(s): Graduate Standing. May be repeated for credit. (S/U grading only.) Effective: 2018 Fall Quarter.

Community Development (Graduate Group)
Community Development (Graduate Group) | Community Development M.S.

Jonathan K. London, Ph.D., Chairperson of the Group; jklondon@ucdavis.edu

Group Office. Carrie Armstrong-Ruport, Student Affairs Officer; 133 Hunt (Community Development Graduate Group); 530-752-4119; caruport@ucdavis.edu; http://communitydevelopment.ucdavis.edu

Graduate Study. The Graduate Group in Community Development offers an inter-disciplinary program of study which leads to the M.S. degree. The program emphasizes interdisciplinary, collaborative, and project-based learning, as well as community-engaged scholarship. The CDGG challenges students to integrate theory and practice, to develop constructive solutions to contemporary problems, and to lead in building a healthy, sustainable, and equitable society. Graduate study in the CDGG prepares individuals to work within government, for-profit and non-profit community development organizations in the realm of social and economic change, or to prepare them for further doctoral studies in related programs. Particular strengths of the program include: community economic development; community organizing and organizations in under-served communities; environmental justice and planning; education; ethnic studies; local impacts of globalization and trans-nationalism; rural and urban political development and change; sustainable agriculture and food systems; and women and gender studies.

Preparation. Applicants to this program can prepare themselves by enrolling for upper division courses in the social or behavioral sciences, e.g., anthropology, economics, sociology, psychology, geography, urban studies or political science, and courses in community studies.

Graduate Advisors. Natalia Deeb Sossa (ndeebsossa@ucdavis.edu); Michael Rios (mxrios@ucdavis.edu); Sheryl-Ann Simpson (ssimpson@ucdavis.edu); Stephen Wheeler (smwheeler@ucdavis.edu).

**Total: 24**

### Community Development Minor; Human Ecology | CRD Courses

**Courses in CRD:**

**CRD 001—The Community (4)**  
Discussion—1 hour; Lecture—3 hours. Basic concepts of community analysis and planned social change. The dynamics of community change through case studies of communities including peasant, urban ghetto, suburban mainline, and California farm workers. GE credit: ACGH, DD, OL, SS, VL, WE. Effective: 2012 Fall Quarter.

**CRD 002—Ethnicity and American Communities (4)**  
Discussion—1 hour; Lecture—3 hours. Historical and cultural survey of the role of various ethnic groups in the development of American communities. Examines ethnicity as a cultural factor, ethnicity as power and issues related to selected American ethnic groups. GE credit: ACGH, DD, SS, WE. Effective: 2012 Fall Quarter.

**CRD 020—Food Systems (4)**  
Laboratory—3 hours; Lecture—3 hours. Social aspects of agri-food systems. Social science perspectives applied to food and agricultural sustainability in relation to ecology, knowledge, technology, power, governance, labor, social difference, and social movements. Social and environmental effects of commodity chains in comparative global context. GE credit: OL, SS, VL, WE. Effective: 2012 Fall Quarter.

**CRD 092—Internship (1-12)**  
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Supervised internship, off and on campus, in community and institutional settings. (P/NP grading only.) Effective: 2012 Fall Quarter.

**CRD 098—Directed Group Study for Undergraduates (1-5)**  
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 2012 Fall Quarter.

**CRD 099—Special Study for Undergraduates (1-5)**  
Variable. (P/NP grading only.) Effective: 2012 Fall Quarter.

**CRD 118—Technology and Society (4)**  
Discussion—1 hour; Extensive Writing; Lecture—3 hours; Term Paper. Prerequisite(s): CRD 001 or CRD 002 or SOC 001 or ANT 002 Impact of technology on labor relations, employment, industrial development and international relations. Internal relations of technology development and deployment. GE credit: SS, WC, WE. Effective: 2016 Fall Quarter.

**CRD 140—Dynamics of Regional Development (4)**  
Extensive Writing; Lecture—4 hours; Project (Term Project); Term Paper. Prerequisite(s): CRD 001 or CRD 002 or SOC 001 or ANT 002 Industrial cluster formation and institutions. Technology, labor relations and interfirm linkages in global value chains. California and other regions are used as case studies. GE credit: SS, WE. Effective: 2016 Fall Quarter.

**CRD 141—Organization of Economic Space (4)**  
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): CRD 001 or CRD 002 or SOC 001 or ANT 002 Globalization and technological restructuring of economic activity focusing on new spatial patterns of production and circulation and their implications for workers, communities and societies, both in the U.S. and around the globe. GE credit: SS, WC, WE. Effective: 2016 Fall Quarter.
CRD 142—Rural Change in the Industrialized World (4)
Discussion—1 hour; Extensive Writing; Lecture—3 hours; Term Paper. Prerequisite(s): SOC 001 or CRD 001 or CRD 002 or ANT 002 Geography of rural environment with emphasis on rural restructuring. Demographics, community, economy, governance, agriculture, and environmental conservation in rural areas of industrialized world. Case studies from and comparisons drawn between North America, Europe, Australia, New Zealand, and Japan. GE credit: SS, WE. Effective: 2016 Fall Quarter.

CRD 147—Community Youth Development (4)
Extensive Writing/Discussion; Lecture/Discussion—4 hours; Project (Term Project); Term Paper. Community influences on youth well-being, youth as agents of community change, and policies to support healthy communities for young people. Special emphasis on disparities in youth well-being related to race, class, immigration status, gender, sexual-orientation. GE credit: DD, OL, SS, VL, WE. Effective: 2016 Fall Quarter.

CRD 149—Community Development Perspectives on Environmental Justice (4)
Extensive Writing/Discussion; Lecture/Discussion—4 hours; Project (Term Project); Term Paper. Environmental justice social movements; inequitable distribution of pollution on low-income communities of color; histories, policies, and innovations associated environmental justice movements in the United States and around the world. GE credit: DD, OL, SS, VL, WE. Effective: 2016 Fall Quarter.

CRD 150—Quantitative Methods in Community Research (5)
Discussion/Laboratory—1 hour; Lecture—4 hours. Prerequisite(s): SOC 046B or STA 013 or STA 032; Consent of Instructor. Introduction to statistical analysis of social data relevant to community research, planning and assessment, emphasizing data sources and acquisition, descriptive and inferential analysis techniques, and data interpretation and presentation. Emphasis on spatial data and methods, focusing on the sources, processing, analysis, and presentation of spatial data in a community assessment context. GE credit: QL, SL, SS. Effective: 2018 Fall Quarter.

CRD 151—Community Field Research: Theory and Analysis (4) Review all entries
Extensive Writing; Lecture—4 hours; Project (Term Project). Prerequisite(s): CRD 001; STA 013 or STA 013Y or SOC 046B; Any upper division Community and Regional Development course is recommended. Emphasis on the design and analysis of community research considering the relationship between theory and practice. Study of community research methods, including structural analysis, elite interviewing, and ethnographic approaches. Course requires design and completion of field research project. GE credit: ACGH, DD, OL, SS, VL, WE. Effective: 2017 Fall Quarter.

CRD 151—Community Field Research: Theory and Analysis (5) Review all entries
Laboratory—2 hours; Lecture—4 hours. Prerequisite(s): CRD 001; (STA 013 or STA 013Y or SOC 046B); Any upper division Community and Regional Development course is recommended. Design and analysis of community research considering the relationship between theory and practice. Community research methods, including elite interviewing, ethnographic approaches, and statistical methods, descriptive statistics and OLS regression. Course requires design and completion of field research project. GE credit: ACGH, DD, OL, SS, VL, WE. Effective: 2019 Winter Quarter.

CRD 152—Community Development (4)
Extensive Writing; Lecture—4 hours; Project (Term Project); Term Paper. Prerequisite(s): CRD 001 or CRD 151 or SOC 002 or ANT 002 or ASA 100 or CHI 132 or AAS 101 Introduction to principles and strategies of community organizing and development. Examination of non-profit organizations, citizen participation, poverty reduction, community needs assessment, and regional development strategies. Comparison of community development approaches of the U.S.A./California with other western and non-western societies. GE credit: ACGH, DD, OL, SS, WC, WE. Effective: 2016 Fall Quarter.

CRD 153A—International Community Development: Asia (4) Review all entries
Lecture—4 hours. Prerequisite(s): CRD 001 or ANT 002 or IAD 010 or SOC 001 or SOC 002 or POL 001 Examination and analysis of community development efforts in Japan and the impact of global forces in different settings, Alternative strategies with emphasis on self-reliance and locally controlled development. Course is based in Kyoto, Japan, and includes field trips. GE credit: OL, SS, VL, WC, WE. Effective: 2016 Fall Quarter.

CRD 153A—International Community Development: Asia (4) Review all entries
Lecture/Discussion—3 hours; Project (Term Project)—3 hours. Prerequisite(s): Consent of Instructor. 2.000 GPA; good academic standing. For summer and quarter abroad versions, limited to 30 students; for the Seminar Abroad version, limited to 15 students; this allows for the small group learning methodology as well as the active collaboration with in-country university students; available for undergraduate and graduate students; applications through UC Davis Study Abroad accepted on a first-come, first-reserved basis for qualified applicants. Examination
and analysis of community development efforts in a range of Asian countries and the impact of global forces in different settings. Includes classroom lectures, workshops, field trips, and collaborative action research projects. GE credit: OL, SS, WC, WE. Effective: 2018 Fall Quarter.

CRD 153B—International Community Development: Europe (4)
Lecture—4 hours. Prerequisite(s): ANT 002 or IAD 010 or CRD 001 or CRD 002 or SOC 001 or SOC 002 or POL 001 Examination and analysis of community development efforts in Europe and the impact of global forces in different settings. Alternative strategies with emphasis on self-reliance and locally controlled development. Based in Freiburg, Germany, including field trips to France and Switzerland. GE credit: SS, WC. Effective: 2016 Fall Quarter.

CRD 153C—International Community Development: Africa (4)
Fieldwork—2 hours; Lecture—2 hours. Prerequisite(s): CRD 001 or CRD 002 or ANT 002 or IAD 010 or SOC 001 or SOC 002 or POL 001 Examination and analysis of community development efforts in Africa and the impact of global forces in urban and rural settings. Focus on strategies that promote self-reliance and locally controlled development. Course based in South Africa, includes field trips. GE credit: SS, WC. Effective: 2016 Fall Quarter.

CRD 154—Social Theory and Community Change (4)
Extensive Writing; Lecture/Discussion—4 hours; Project (Term Project); Term Paper. Prerequisite(s): CRD 001 or SOC 001 or ANT 002 Comparative overview of the dominant social science paradigms for the study of community development and change. Among the paradigms discussed are functionalism, conflict theory/Marxism, structuralism, methodological individualism, reflexive modernity. GE credit: ACGH, DD, OL, SS, VL, WC, WE. Effective: 2016 Fall Quarter.

CRD 156—Community Economic Development (5)
Laboratory—2 hours; Lecture—4 hours. Prerequisite(s): CRD 152 or PLS 021 or ECS 015; and Consent of Instructor. How government and community organizations help firms grow and create jobs through local economic development corporations, small business centers, revolving loan funds, incubators, and other programs. Techniques to analyze community economic potential and identification of appropriate intervention tools. Group project. GE credit: QL, SS, WE. Effective: 2016 Fall Quarter.

CRD 157—Politics and Community Development (4)
Lecture—4 hours. Analyzes political, economic and sociocultural forces shaping the form and function of local communities in the U.S. Considers theories of the state, the community and social change and case studies of actual community development in comparative historical perspective. GE credit: ACGH, DD, SS, WE. Effective: 2016 Fall Quarter.

CRD 158—Small Community Governance (4)
Fieldwork—30 hours; Lecture/Discussion—3 hours. Prerequisite(s): CRD 001 or SOC 001 or POL 001 Governing institutions and political processes in rural and small urban places. Local government organization, community autonomy, leadership, political change, policy development, and select policy issues including public finance. Field research on political processes or policy issues in select communities. Effective: 2016 Fall Quarter.

CRD 162—People, Work and Technology (4) Review all entries
Lecture—4 hours. Prerequisite(s): CRD 001 or SOC 001 or ANT 001; Upper division standing recommended. Restricted to upper division standing. Analysis of the relationship between work, technology, and human experience. Theories of the causes and consequences of labor process change; impacts of race/ethnicity, class, gender, and citizenship status on work; responses of workers, communities, and policy-makers to workplace changes. Effective: 2016 Fall Quarter.

CRD 162—People, Work and Technology (5) Review all entries
Discussion—1 hour; Lecture—4 hours. Prerequisite(s): CRD 001 or SOC 001 or ANT 001; Upper division standing recommended. Analysis of the relationship between work, technology, and the human experience. Theories of the causes and consequences of labor process, changes under capitalism and globalization, impacts of race/ethnicity, class, gender, and citizenship status on work in the United States and globally; responses of workers, communities, and policy-makers to workplace changes. GE credit: ACGH, DD, SS, WE. Effective: 2018 Fall Quarter.

CRD 164—Theories of Organizations and their Role in Community Change (5)
Laboratory—2 hours; Lecture—4 hours. Prerequisite(s): (STA 013 or STA 013Y or SOC 046B); (CRD 001 or CRD 002 or SOC 001 or ANT 002) Planned change within and through community organizations. Private voluntary organizations, local community associations, and local government. Relationship between community organizations and social capital. Collaborative original data gathering and professional report writing. GE credit: ACGH, DD, OL, SS, VL, WE. Effective: 2018 Spring Quarter.
CRD 171—Housing and Social Policy (4)
Lecture—4 hours; Term Paper. Social impact, economics, and politics of housing in the United States. Special attention given to federal, state, and local policy and program strategies to produce and preserve affordable housing and inclusive neighborhoods. Effective: 2016 Fall Quarter.

CRD 172—Social Inequality: Issues and Innovations (4)
Extensive Writing; Lecture/Discussion—4 hours; Project (Term Project); Term Paper. Prerequisite(s): CRD 001 or CRD 002 or SOC 001 or ANT 002; Upper division standing recommended. Focus on the dimensions, causes, and means of alleviating social inequality in the U.S. Examination and analysis of major theories and forms (class, race/ethnicity, gender, and citizenship status) of inequality. Policy-based and grassroots approaches to change. Effective: 2016 Fall Quarter.

CRD 176—Comparative Ethnicity (4)
Lecture—4 hours; Term Paper. Prerequisite(s): CRD 001 or CRD 002 or SOC 001 or ANT 002; Upper division standing recommended. Role of ethnicity in shaping social systems and interaction. Analytical approaches to and issues arising from the study of ethnicity, through utilization of data from a range of different societies. GE credit: ACGH, DD, SS, WC, WE. Effective: 2016 Fall Quarter.

CRD 180—Transnational Community Development (4)
Extensive Writing; Lecture/Discussion—4 hours; Project (Term Project); Term Paper. Prerequisite(s): CRD 001 or ANT 002 or SOC 001 The effects of grassroots, non-state, non-corporate actors from abroad on local, national and international development. Socioeconomic, political, and cultural implications of transnational actions undertaken by international non-governmental organizations, individual migrants, and migrant grassroots civic organizations. GE credit: SS, WC, WE. Effective: 2012 Fall Quarter.

CRD 192—Internship (1-12)
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Completion of 84 units. Supervised internship, off and on campus, in community and institutional settings. (P/NP grading only.) Effective: 2012 Fall Quarter.

CRD 194HA—Special Study for Honors Students (4)
Independent Study—3 hours; Project (Term Project); Seminar—1 hour; Term Paper. Prerequisite(s): Consent of Instructor. Completion of 135 units at the time of enrollment; GPA 3.500 in the major; GPA 3.300 in overall standing; completion of at least four upper division courses; agreement of a faculty member to serve as thesis advisor. Community and Regional Development Honors is a program of direct reading, research and writing culminating in the preparation of a Senior Honors Thesis under the direction of a faculty advisor. Effective: 2012 Fall Quarter.

CRD 194HB—Special Study for Honors Student (4)
Independent Study—3 hours; Project (Term Project); Seminar—1 hour; Term Paper. Prerequisite(s): Consent of Instructor. Completion of 135 units at the time of enrollment; GPA 3.500 in the major; GPA 3.300 in overall standing; completion of at least four upper division courses; agreement of a faculty member to serve as thesis advisor. Community and Regional Development Honors is a program of direct reading, research and writing culminating in the preparation of a Senior Honors Thesis under the direction of a faculty advisor. Effective: 2012 Fall Quarter.

CRD 197T—Tutoring in Community and Regional Development (1-5)
Tutorial—3-15 hours. Prerequisite(s): Consent of Instructor. Upper division standing; completion of course to be tutored. Assisting instructor in one of the Community and Regional Development's regular courses by tutoring individual students or small groups of students in a laboratory, in voluntary discussion groups, or other voluntary activities. May be repeated up to 10 unit(s). (P/NP grading only.) Effective: 2013 Fall Quarter.

CRD 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 2012 Fall Quarter.

CRD 199—Special Study for Advanced Undergraduates (1-5)
Variable. (P/NP grading only.) Effective: 2012 Fall Quarter.

CRD 200—Planning for Health (4)
Extensive Writing; Lecture/Discussion—2 hours; Project (Term Project)—1 hour. Focused on the intersection of city planning and public health. The health of an individual or community is determined not only by the health care they receive, but also by the natural, social, physical, economic, and political environment. Covers topics such as food access, air quality, water quality, waste and energy infrastructure, community engagement, and the planning process. Provides an overview of available public spatially explicit data. Effective: 2018 Fall Quarter.

CRD 230—Spatial Methods in Community Research (4)
Lecture—4 hours. Prerequisite(s): Graduate standing. Spatial analysis of social data relevant to community research,
with focus on neighborhoods as units of analysis. Clustering, segregation, geodemographic modelling, spatial regression, multilevel models, spatial data management, accessibility. Effective: 2019 Spring Quarter.

CRD 240—Community Development Theory (4)
Lecture/Discussion—4 hours. Introduction to theories of community development and different concepts of community, poverty, and development. Emphasis on building theory, linking applied development techniques to theory, evaluating development policy, and examining case studies of community development organizations and projects. (Same course as GEO 240.) Effective: 2014 Winter Quarter.

CRD 241—The Economics of Community Development (4)
Seminar—4 hours. Prerequisite(s): Graduate standing. Economic theories and methods of planning for communities. Human resources, community services and infrastructure, industrialization and technological change, and regional growth. The community's role in the greater economy. (Same course as GEO 241.) Effective: 2015 Spring Quarter.

CRD 242—Community Development Organizations (4)
Seminar—4 hours. Prerequisite(s): CRD 240; and Consent of Instructor. Class size limited to 15 students. Theory and praxis of organizations with social change agendas at the community level. Emphasis on non-profit organizations and philanthropic foundations. Effective: 2012 Fall Quarter.

CRD 242S—Community Development Organizations (International) (4)
Fieldwork—10 hours; Lecture—5 hours; Workshop—5 hours. Prerequisite(s): CRD 240 Class size limited to 10 students. Theory and praxis of organizations with social change agendas at the community level. Emphasis on local governance, non-profit organizations and philanthropic foundations at an international level. Effective: 2012 Fall Quarter.

CRD 243—Critical Environmental Justice Studies (4)
Extensive Writing; Seminar—4 hours. Prerequisite(s): Consent of Instructor. Open to graduate students only. Application of social science theories of race, ethnicity, class, gender, and power to understand the production and contestation of environmental inequities. Effective: 2017 Fall Quarter.

CRD 244—Political Ecology of Community Development (4)
Lecture—4 hours. Prerequisite(s): Graduate standing. Community development from the perspective of geographical political ecology. Social and environmental outcomes of the dynamic relationship between communities and land-based resources, and between social groups. Cases of community conservation and development in developing and industrialized countries. (Same course as GEO 254.) Effective: 2014 Winter Quarter.

CRD 245—The Political Economy of Urban and Regional Development (4)
Lecture—4 hours. Prerequisite(s): CRD 157; CRD 244; Or equivalent. How global, political and economic restructuring and national and state policies are mediated by community politics; social production of urban form; role of the state in uneven development; dynamics of urban growth and decline; regional development in California. (Same course as GEO 245.) Effective: 2014 Spring Quarter.

CRD 246—The Political Economy of Transnational Migration (4)
Lecture—4 hours. Prerequisite(s): Graduate standing. Theoretical perspectives and empirical research on social, cultural, political, and economic processes of transnational migration to the U.S. Discussion of conventional theories will precede contemporary comparative perspectives on class, race, ethnicity, citizenship, and the ethnic economy. (Same course as GEO 246.) Effective: 2014 Winter Quarter.

CRD 247—Transformation of Work (4)
Lecture/Discussion—4 hours. Prerequisite(s): Graduate standing in history or social science degree program or consent of instructor. Exploration of the ways that the experience, organization, and systems of work are being reconfigured in the late twentieth century. The impacts of economic restructuring on local communities and workers. Effective: 2012 Fall Quarter.

CRD 248—Social Policy, Welfare Theories and Communities (4)
Seminar—4 hours. Prerequisite(s): Graduate standing. Theories and comparative histories of modern welfare states and social policy in relation to legal/normative, organizational, and administrative aspects. Analysis of specific social issues within the U.S./California context. Not open for credit to students having completed CRD 248A and CRD 248B. (Same course as GEO 248.) Effective: 2013 Fall Quarter.

CRD 248A—Social Policy, Welfare Theories and Communities I (2)
Seminar—2 hours. Prerequisite(s): Graduate standing. Theories and comparative histories of modern welfare states.
Theories of welfare and social policy in relation to normative, organizational, and administrative aspects of welfare and social policy. Effective: 2017 Winter Quarter.

**CRD 248B—Social Policy, Welfare Theories and Communities II (2)**
Seminar—2 hours. Prerequisite(s): Graduate standing. Concurrent enrollment in course 248A. Analysis of a specific set of social issues within the US/California context. Issues may include poverty, hunger, housing, health, family, disability, economic opportunity, affirmative action orientations, gender, old age, or special social groups. Effective: 2017 Winter Quarter.

**CRD 249—Media Innovation and Community Development (4)**
Seminar—4 hours. Open to graduate students. Role of innovative media in communities and social change. Studies historical, practical and theoretical issues involving media in community organizing, social justice movements, democracy initiatives, and economic justice. Effective: 2014 Spring Quarter.

**CRD 250—Professional Skills for Community Development (4)**
Extensive Writing/Discussion; Fieldwork; Lecture/Discussion—2 hours; Project (Term Project)—2 hours. Prerequisite(s): CRD 240 Priority enrollment for Masters and Ph.D. students in Community and Regional Development. Help students develop the practical skills needed to work professionally in organizations that are involved in community development. Provides an overview of community development planning, project management, and consultation skills. Effective: 2016 Fall Quarter.

**CRD 290—Seminar (1)**
Seminar—1 hour. Analysis of research in applied behavioral sciences. (S/U grading only.) Effective: 2016 Fall Quarter.

**CRD 290—Community Development Seminar (1)**
Seminar—1 hour. Pass One restricted to graduate students in the CDGG masters program; open to other programs by consent of the instructor. Speaker series on key topics in community development. May be repeated for credit CDGG MS students must take four quarters to satisfy the MS degree requirements; may take course as many times as student chooses. (S/U grading only.) Effective: 2019 Winter Quarter.

**CRD 292—Graduate Internship (1-12)**
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Individually designed supervised internship, off campus, in community or institutional setting. Developed with advice of faculty mentor. May be repeated for credit Student may register in more than one internship section per term. (S/U grading only.) Effective: 2012 Fall Quarter.

**CRD 293—Community Development Graduate Proseminar (1)**
Lecture/Discussion—1 hour. Prerequisite(s): Enrollment in Community Development graduate group. Restricted to first year Community Development graduate students only. Introduction to graduate training in Community Development. Seminar designed to introduce students entering graduate work in the Community Development Graduate Group to its ongoing activities. (S/U grading only.) Effective: 2012 Fall Quarter.

**CRD 298—Group Study (1-5)**
Variable. Effective: 2012 Fall Quarter.

**CRD 299—Research (1-12)**
Variable. (S/U grading only.) Effective: 2012 Fall Quarter.

**CRD 396—Teaching Assistant Training Practicum (1-4)**
Variable—3-12 hours. Prerequisite(s): Graduate Standing. May be repeated for credit. (S/U grading only.) Effective: 2012 Fall Quarter.

(College of Agricultural and Environmental Sciences)

Francene M. Steinberg, Ph.D., RD., Chair of the Department
Sheri Zidenberg-Cherr, Ph.D., Vice Chairperson of the Department

519
Department Office. 3135 Meyer Hall; 530-752-4630; http://nutrition.ucdavis.edu

Faculty. http://nutrition.ucdavis.edu/people/faculty/index.html

The Department of Nutrition offers four minor programs open to students majoring in other disciplines who wish to complement their study programs with a concentration in the area of food and nutrition.

Minor Advisor. 3202 Meyer Hall; 530-752-2512

Note: If the student's major program requires the same course in biochemistry and physiology, only one of the courses may duplicate credit toward the minor. Each program below lists replacement courses to fulfill the minimum unit requirement.

Community Nutrition Minor

Preparation. Plan in advance to include the required course prerequisites.

Community Nutrition Minor; Nutrition | NUT Courses

Courses in NUT:

NUT 010—Discoveries and Concepts in Nutrition (3)
Lecture—3 hours; Project (Term Project). Nutrition as a science; historical development of nutrition concepts; properties of nutrients and foods. Not open for credit to students who have taken an upper division course in nutrition. No credit will be granted to students who have completed NUT 010Y or NUT 010V or an upper-division nutrition course. GE credit: SE, SL. Effective: 2018 Winter Quarter.

NUT 010V—Discoveries and Concepts in Nutrition (3)
Project (Term Project); Web Virtual Lecture—3 hours. Nutrition as a science; historical development of nutrition concepts; properties of nutrients and foods. Not open for credit to students who have taken an upper division course in nutrition. No credit will be granted to students who have completed NUT 010 or NUT 010Y or an upper-division nutrition course. GE credit: SE, SL. Effective: 2018 Winter Quarter.

NUT 010Y—Discoveries and Concepts in Nutrition (3)
Project (Term Project); Web Virtual Lecture—3 hours. Nutrition as a science; historical development of nutrition concepts; properties of nutrients and foods. Not open for credit to students who have taken an upper division course in nutrition. No credit will be granted to students who have completed NUT 010 or NUT 010V or an upper-division nutrition course. GE credit: SE, SL. Effective: 2018 Winter Quarter.
NUT 011—Current Topics and Controversies in Nutrition (2)
Discussion—1.5 hours; Term Paper. Exploration of current applications and controversies in nutrition. Students read scientific journal articles and write summaries, as well as give brief oral presentations. Topics change to reflect current interests and issues. GE credit: OL, SE, WE. Effective: 2010 Winter Quarter.

NUT 099—Individual Study for Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only) GE credit: SE. Effective: 1997 Winter Quarter.

NUT 104—Environmental & Nutritional Factors in Cellular Regulation and Nutritional Toxicants (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): BIS 101; (BIS 103 or ABI 103) Cellular regulation from nutritional/toxicological perspective. Emphasis: role of biofactors on modulation of signal transduction pathways, role of specific organelles in organization/regulation of metabolic transformations, major cofactor functions, principles of pharmacology/toxicology important to understanding nutrient/toxicant metabolism. (Same course as ETX 104.) GE credit: OL, SE, SL. Effective: 2008 Fall Quarter.

NUT 105—Nutrition and Aging (3)
Lecture—3 hours. Prerequisite(s): (NUT 111AV or NUT 111AY); ABI 103; Or the equivalent course to ABI 103. Role of nutrition in the aging process from both an organismal/cell perspective, including demographics, theories of aging, nutrition and evolution, nutritional manipulation and life-span extension, and nutrition's impact on the diseases of aging. GE credit: SE. Effective: 2017 Spring Quarter.

NUT 106—Food Chemistry for Clinical Nutrition (5) Review all entries
Discussion—1 hour; Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): CHE 008B C or better or CHE 118C C or better or CHE 128C C or better; Concurrent with FST 100A recommended. Only open to Clinical Nutrition majors. Chemical and physical principles that influence functional properties, nutrient content, safety, and sensory aspects of food. Emphasis on the application of these concepts in clinical nutrition. Not open to students who have completed FST 101A and/or FST 101B. (Same course as FST 106.) GE credit: SE, SL, WE. Effective: 2018 Fall Quarter.

NUT 111AY—Introduction to Nutrition and Metabolism (3)
Lecture/Discussion—1 hour; Web Virtual Lecture—2 hours. Prerequisite(s): CHE 008B; NPB 101; Or the equivalent of NPB 101. Restricted to upper division or graduate level students only. Introduction to metabolism of protein, fat and carbohydrate: the biological role of vitamins and minerals; nutrient requirements during the life cycle; assessment of dietary intake and nutritional status. Not open for credit to students who have completed NUT 101 or NUT 111AV. GE credit: SE. Effective: 2016 Fall Quarter.

NUT 111B—Recommendations and Standards for Human Nutrition (2) Review all entries
Lecture—2 hours. Prerequisite(s): CHE 008B; NPB 101; (NUT 111AV or NUT 111AY); Or the equivalent of NPB 101. Critical analysis of the development of nutritional recommendations for humans. Topics include: history of modern recommendations, development of the Recommended Dietary Allowance (RDA) and other food guides; the Dietary Reference Intakes (DRI); administrative structure of regulatory agencies pertinent to nutrition recommendations; introduction to scientific methods used to determine the recommendations; food labeling laws; nutrition recommendations in other countries and cultures. Not open for credit to students who have completed NUT 111. Effective: 2017 Spring Quarter.

NUT 111B—Recommendations & Standards for Human Nutrition (2) Review all entries
Lecture—2 hours. Prerequisite(s): (CHE 008B or CHE 118B or CHE 128B); NUT 111AY; NPB 101 recommended Critical analysis of the development of nutritional recommendations for humans. Topics include: history of modern recommendations, development of the Recommended Dietary Allowance (RDA) and other food guides; the Dietary Reference Intakes (DRI); administrative structure of regulatory agencies pertinent to nutrition recommendations; introduction to scientific methods used to determine the recommendations; food labeling laws; nutrition recommendations in other countries and cultures. Not open for credit to students who have completed NUT 111. Effective: 2019 Fall Quarter.
NUT 112—Nutritional Assessment (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): (ABI 102, ABI 103) or (BIS 102, BIS 103); NUT 111AY, (STA 013 or STA 013Y or PLS 120) Restricted to upper division or graduate level Nutrition students only. Methods of human nutritional assessment, including dietary, anthropometric, biochemical methods. Principles of precision, accuracy, and interpretation of results for individuals and populations. GE credit: QL, SE. Effective: 2018 Spring Quarter.

NUT 113—Principles of Epidemiology in Nutrition (4) Review all entries
Lecture/Discussion—4 hours. Prerequisite(s): PLS 120; Or equivalent. Introduction to epidemiology as it relates to the field of nutrition, including study design, principles of epidemiologic inference, criteria for causality, and interpreting measures of disease risk. GE credit: QL, SE. Effective: 2014 Fall Quarter.

NUT 113—Principles of Epidemiology in Nutrition (4) Review all entries
Lecture/Discussion—4 hours. Prerequisite(s): STA 013 or STA 013Y or PLS 120 or STA 100 Introduction to epidemiology as it relates to the field of nutrition, including study design, principles of epidemiologic inference, criteria for causality, and interpreting measures of disease risk. GE credit: QL, SE. Effective: 2018 Fall Quarter.

NUT 114—Developmental Nutrition (4)
Lecture—4 hours. Prerequisite(s): ABI 102; ABI 103; (NUT 111AV or NUT 111AY); NUT 111B Role of nutritional factors in embryonic and postnatal development. GE credit: SE. Effective: 2017 Winter Quarter.

NUT 115—Animal Nutrition (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): CHE 008B or CHE 118B; or Consent of Instructor. Comparative differences among animals in digestion and metabolism of nutrients. Nutrient composition of feeds, digestive systems, digestion, absorption, feeding strategies. GE credit: OL, QL, SE, SL, VL, WE. Effective: 2017 Winter Quarter.

NUT 116A—Clinical Nutrition (3)
Lecture—3 hours. Prerequisite(s): (NUT 111AV or NUT 111AY); NUT 111B; NUT 112; NPB 101; Or the equivalent to NPB 101. Biochemical and physiological bases for therapeutic diets. Problems in planning diets for normal and pathological conditions. GE credit: SE. Effective: 1997 Fall Quarter.

NUT 116AL—Clinical Nutrition Practicum (3)
Discussion—1 hour; Laboratory—3 hours; Lecture—1 hour. Prerequisite(s): NUT 116A (can be concurrent) Fundamental principles of planning and evaluating therapeutic diets and patient education for pathological conditions covered in 116A. GE credit: SE. Effective: 2016 Fall Quarter.

NUT 116B—Clinical Nutrition (3)
Lecture—3 hours. Prerequisite(s): (NUT 111AV or NUT 111AY); NUT 111B; NUT 112; NPB 101; Or the equivalent to NPB 101. Biochemical and physiological bases for therapeutic diets. Problems in planning diets for normal and pathological conditions. GE credit: SE. Effective: 2017 Winter Quarter.

NUT 116BL—Clinical Nutrition Practicum (3)
Discussion—1 hour; Laboratory—3 hours; Lecture—1 hour. Prerequisite(s): NUT 116AL; NUT 116B (can be concurrent) Fundamental principles of planning and evaluating therapeutic diets and patient education for pathological conditions covered in 116B. Continuation of course 116AL. GE credit: SE. Effective: 2017 Winter Quarter.

NUT 117—Experimental Nutrition (6)
Extensive Writing; Laboratory—6 hours; Lecture—3 hours. Prerequisite(s): (NUT 111AV or NUT 111AY); NUT 111B; NUT 112; BIS 102; BIS 103; MCB 120L or other laboratory course in biochemistry is recommended. Methods of assessing nutritional status. Application of chemical, microbiological, chromatographic and enzymatic techniques to current problems in nutrition. GE credit: SE, WE. Effective: 2016 Fall Quarter.

NUT 118—Community Nutrition (4)
Lecture—4 hours. Prerequisite(s): NUT 116A; (NUT 111AV or NUT 111AY); NUT 111B Nutrition problems in contemporary communities and of selected target groups in the United States and in developing countries. Nutrition programs and policy, principles of nutrition education. GE credit: SE, SL. Effective: 2017 Winter Quarter.

NUT 119A—International, community-based nutritional assessment. (1)
Lecture/Discussion—1 hour. Prerequisite(s): NUT 112 (can be concurrent); and Consent of Instructor. Issues and problems related to community-based nutritional assessment in a low-income country, major nutritional problems in low-income countries; ethical issues in human investigation; survey design, data collection techniques, and data analysis; preparation for international travel; cross-cultural communication, health, and safety while living abroad. Effective: 2002 Spring Quarter.
NUT 119B—International, Community-Based Nutritional Assessment (6)
Fieldwork—12 hours; Lecture—2 hours. Prerequisite(s): NUT 119A; and Consent of Instructor. Restricted to upper division students in Clinical Nutrition, Community Nutrition, Dietetics, and Nutrition Science. A six-week summer course in Peru. Implementation of a community-based nutritional assessment survey, including development of the survey instrument, selection. Effective: 2002 Summer Special Session.

NUT 120AN—Nutritional Anthropology (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): NUT 010 and ANT 002 recommended. Nutritional anthropology from historical and contemporary perspectives; the anthropological approach to food and diet; field work methods; case histories that explore food patterns and their nutritional implications. GE credit: SE, SS. Effective: 2017 Spring Quarter.

NUT 120BN—Nutritional Geography (4)
Discussion—1 hour; Lecture—3 hours. Nutritional geography from historical and contemporary perspectives; the geographical approach to food and diet; cultural and environmental factors that influence dietary practices; food-related landscapes and patterns. GE credit: SE, SS. Effective: 2016 Fall Quarter.

NUT 122—Ruminant Nutrition and Digestive Physiology (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): (ABI 103 or BIS 103); BIS 002A; BIS 002B; BIS 002C; (ANS 100 or NPB 101); or Consent of Instructor. MAT 016B recommended. Study of nutrient utilization as influenced by the unique aspects of digestion and fermentation in ruminants, both domestic and wild. Laboratories include comparative anatomy, feed evaluation, digestion kinetics using fistulated cows, computer modeling, and microbial exercises. GE credit: QL, SE. Effective: 2017 Spring Quarter.

NUT 123—Comparative Animal Nutrition (3)
Lecture—3 hours. Prerequisite(s): ABI 103 or BIS 103 Restricted to upper division and graduate level students. Comparative nutrition of animals; including laboratory, companion, zoo, and wild, animals. Digestion and metabolic adaptations required for animal species to consume diverse diets. Relation of nutrition to metabolic adaptations and physiological states, including growth, reproduction, and diseases. GE credit: SE. Effective: 2017 Spring Quarter.

NUT 123L—Comparative Animal Nutrition Laboratory (1)
Laboratory—3 hours. Prerequisite(s): ABI 103 or BIS 103 Laboratory exercises leading to written reports on establishment of nutritional requirements and formulation of complete diets for laboratory, companion, zoo and wild animals. Effective: 2017 Spring Quarter.

NUT 124—Nutrition and Feeding of Finfishes (3)
Lecture—3 hours. Prerequisite(s): BIS 103 or ABI 103 Principles of nutrition and feeding of fishes under commercial situations; implication of fish nutrition to the environment and conservation of endangered species. GE credit: QL, SE, SL. Effective: 2016 Fall Quarter.

NUT 127—Environmental Stress and Development in Marine Organisms (10)
Discussion—2 hours; Laboratory—12 hours; Lecture—4 hours. Prerequisite(s): ETX 101 or BIS 102 or BIS 104; or equivalent course. ETX 114A or NUT 114 recommended. Course taught at Bodega Marine Laboratory. Effects of environmental and nutritional stress, including pollutants, on development and function in embryos and larvae of marine organisms. Emphasis on advanced experimental methods. (Same course as ETX 127.) GE credit: QL, OL, QL, SE, SL, VL, WE. Effective: 2002 Summer Session 1.

NUT 129—Journalistic Practicum in Nutrition (3)
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): (NUT 111AV or NUT 111AY); NUT 111B; or Consent of Instructor. A course in written or oral expression. Critical analysis and discussion of current, controversial issues in nutrition; use of journalistic techniques to interpret scientific findings for the lay public. Students required to write several articles for campus media. May be repeated up to 1 time(s). GE credit: OL, QL, SE, SL, VL, WE. Effective: 2017 Spring Quarter.

NUT 130—Experiments in Nutrition: Design and Execution (2)
Laboratory—6 hours. Prerequisite(s): Consent of Instructor. NUT 111AV, NUT 111AY, NUT 111B or NUT 114 recommended. Experiments in current nutritional problems. Experimental design: students choose project and, independently or in groups of two-three, design a protocol, complete the project, and report findings. May be repeated for credit up to six times(three times per instructor)with consent of instructor. May be repeated up to 6 time(s) three times per instructor with consent of instructor. GE credit: SE. Effective: 2016 Fall Quarter.
NUT 141—Comparative Animal Nutrition and Metabolism (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ABI 103; (NUT 115 or NUT 116A or NUT 116B); or Consent of Instructor. Foundational principles of nutrition, nutrient composition of feed ingredients, digestive systems of domestic and exotic animals, nutrient digestibility and absorption, nutrient metabolism. GE credit: SE, SL, WE. Effective: 2018 Fall Quarter.

NUT 190—Proseminar in Nutrition (1)
Seminar—1 hour. Prerequisite(s): (NUT 111AV or NUT 111AY); NUT 111B Restricted to senior standing. Discussion of human nutrition problems. Each term will involve a different emphasis among experimental, clinical, and dietetic problems of community, national and international scope. May be repeated twice for credit with consent of instructor. May be repeated up to 2 time(s). GE credit: OL, SE, VL. Effective: 2016 Fall Quarter.

NUT 190C—Nutrition Research Conference (1)
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Upper division standing in Nutrition or related biological science. Introduction to research findings and methods in nutrition. Presentation and discussion of research by faculty and students. May be repeated for credit. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

NUT 192—Internship (1-12)
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. One upper division course in nutrition. Work experience on or off campus in practical application of nutrition, supervised by a faculty member. (P/NP grading only.) Effective: 1997 Winter Quarter.

NUT 197T—Tutoring in Nutrition (1-2)
Discussion/Laboratory—3-6 hours. Prerequisite(s): Consent of Instructor. Nutrition Science, Clinical Nutrition or related major. Tutoring of students in nutrition courses, assistance with discussion groups or laboratory sections, weekly conference with instructor in charge of course: written evaluations. May be repeated if tutoring a different course. May be repeated for credit. (P/NP grading only.) Effective: 2016 Fall Quarter.

NUT 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

NUT 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

NUT 219A—International Nutrition (3)
Lecture—3 hours. Prerequisite(s): NUT 111AV; NUT 111AY; Graduate Standing; undergraduates only admitted with consent of instructor. Epidemiology, etiology, and consequences of undernutrition, with particular focus on the nutritional problems of children and women in low income populations. Effective: 2018 Spring Quarter.

NUT 219B—International Nutrition (3)
Lecture—3 hours. Prerequisite(s): NUT 219A Intervention programs to prevent or ameliorate nutritional problems in low-income populations. Planning, implementing, and evaluating nutrition intervention programs. Effective: 2004 Fall Quarter.

NUT 230—Experiments in Nutrition: Design and Execution (2)
Laboratory—6 hours. Prerequisite(s): Consent of Instructor. NUT 201, NUT 202, NUT 203, NUT 204, or the equivalent recommended. Student selected projects to enhance laboratory skills. Independently, or in groups of two-three students, design a protocol, carry out the project, analyze the results and report the findings. May be repeated up to 6 time(s) with consent of instructor (limit of three times per instructor). Effective: 1999 Fall Quarter.

NUT 250—Metabolic Homeostasis (3)
Discussion—1.5 hours; Lecture—2 hours. Prerequisite(s): Passing the Nutrition Graduate Group Preliminary Examination or consent of instructor. Preference given to students in advanced standing in the Nutrition Graduate Group. Regulatory mechanisms of carbohydrate, lipid, and protein homeostasis; mechanisms of metabolic enzyme regulation and of the metabolic hormones; homeostatic mechanisms and interactions; fuel-fuel interactions; nutrition-energy balance. Effective: 2001 Spring Quarter.

NUT 251—Nutrition and Immunity (2)
Lecture/Discussion—2 hours. Prerequisite(s): PMI 126; ABI 102; MMI 107; Or the equivalent to MMI 107. Cellular and molecular mechanisms underlying interactions of nutrition and immune function, including modulation of immunocompetence by diet and effects of immune responses on nutritional needs. Lectures and discussion explore implications for resistance to infection, autoimmunity and cancer. Effective: 2000 Winter Quarter.
NUT 252—Nutrition and Development (3)
Lecture—3 hours. Prerequisite(s): NUB 210A, NUB 210B, and NUB 210C recommended. Relationship of nutrition to prenatal and early postnatal development. Effective: 2018 Spring Quarter.

NUT 253—Control of Energy Balance and Body Weight (3)
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): Consent of Instructor. Comprehensive study of the biochemical, nutritional and physiological mechanisms controlling food intake, body composition and energy expenditure. Subject matter will be approached through lectures and discussions where students and staff will critically evaluate the literature. Effective: 2016 Spring Quarter.

NUT 254—Applications of Systems Analysis in Nutrition (3)
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): NUT 202; Or the equivalent. Quantitative aspects of digestion and metabolism; principles of systems analysis. Evolution of models of energy metabolism as applied in current feeding systems. Critical evaluations of mechanistic models used analytically in support of nutritional research. Effective: 1997 Winter Quarter.

NUT 258—Field Research Methods in International Nutrition (3)
Lecture/Discussion—3 hours. Prerequisite(s): Graduate standing or consent of instructor. Issues and problems related to implementation of nutrition field research in less-developed countries, including ethics; relationships with local governments, communities, and scientists; data collection techniques and quality assurance; field logistics; research budgets; and other administrative and personal issues. Effective: 1997 Winter Quarter.

NUT 259—Nutrition and Aging (2)
Lecture—2 hours. Prerequisite(s): NUT 201; NUT 202; NUT 203; NUT 204; Three courses. Interaction between nutrition and aging. Topics include physiological/biochemical basis of aging, age-related changes affecting nutritional requirements, nutrition and mortality rate, assessment of nutritional status in the elderly, and relationship between developmental nutrition and the rate of aging. Effective: 1997 Fall Quarter.

NUT 270—Scientific Ethics in Biomedical Studies: Emphasis on Nutrition (3)
Discussion—1 hour; Lecture—1 hour; Term Paper. Restricted to graduate standing or consent of instructor. Scientific ethics in biomedical studies, especially nutrition. Discussion and case study presentations on scientific integrity, fraud, misconduct, conflict of interest, human and animal research protections. Not open for credit to students who have completed NUT 492B. Effective: 2003 Spring Quarter.

NUT 290—Beginning Nutrition Seminar (2)
Lecture/Discussion—1 hour; Seminar—1 hour. Prerequisite(s): First-year graduate standing. Discussion and critical evaluation of topics in nutrition with emphasis on literature review and evaluation in this field. Students give oral presentations on relevant topics. Effective: 1997 Fall Quarter.

NUT 290C—Research Conference (1)
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Graduate standing. Major professors lead research discussions with their graduate students. Research papers are reviewed and project proposals presented and evaluated. Format will combine seminar and discussion style. (S/U grading only.) Effective: 1997 Winter Quarter.

NUT 291—Advanced Nutrition Seminar (1)
Seminar—1 hour. Prerequisite(s): Second-year graduate standing. Advanced topics in nutrition research. Multiple sections may be taken concurrently for credit. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

NUT 293A—Current Topics in Obesity, Food Intake and Energy Balance (3)
Discussion—1 hour; Lecture—1 hour; Seminar—1 hour. Prerequisite(s): NUT 129; Or undergraduate standing; Undergraduates with upper division standing with at least one writing course may enroll with consent of instructor. Current research and its evaluation. Principles of experimental design and scientific background for given article. Articles summarized for posting on Internet for use by healthcare professionals. May be repeated for credit with consent of instructor. May be repeated for credit. Effective: 1997 Fall Quarter.

NUT 293B—Current Topics in Obesity, Food Intake, and Energy Balance with Special Topics (3)
Discussion—1 hour; Lecture—1 hour; Seminar—1 hour. Prerequisite(s): NUT 129; Graduate standing. Undergraduates with upper division standing with at least one writing course may enroll with consent of instructor. A continuation of course 293A, with additional special topics. May be repeated for credit up to 3 times with consent of instructor. May be repeated up to 3 times. Effective: 1997 Fall Quarter.

NUT 294A—Current Topics in Developmental Nutrition (2)
Seminar—2 hours. Prerequisite(s): NUT 114 or NUT 252; or Consent of Instructor. Restricted to graduate standing or
consent of instructor. Effects of nutrition on embryology, morphogenesis, and developmental mechanisms. May be repeated for credit when topic differs. Effective: 2004 Winter Quarter.

NUT 297T—Supervised Teaching in Nutrition (1-3)
Variable. Prerequisite(s): Graduate standing in nutrition or consent of instructor. Practical experience in teaching nutrition at the university level; curriculum design and evaluation; preparation and presentation of material. Assistance in laboratories, discussion sections, and evaluation of student work. (S/U grading only.) Effective: 1997 Winter Quarter.

NUT 298—Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Effective: 1997 Winter Quarter.

NUT 299—Research (1-12)
Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

NUT 492A—Professionalism: An Academic Perspective (2)
Lecture/Discussion—2 hours. Prerequisite(s): Graduate standing. For graduate students in their initial quarter of residence. Professionalism topics are presented and examples drawn from both the biological and social sciences. Effective: 1997 Fall Quarter.

NUT 492C—Grant Writing (3)
Discussion—1.5 hours; Lecture—1.5 hours. Prerequisite(s): Graduate standing in Nutrition or consent of instructor. Preparation of grants for governmental agencies (particularly NIH and USDA) and private foundations. Students will write a research grant or fellowship application. May be repeated once for credit with consent of instructor. May be repeated up to 1 time(s). Effective: 1997 Fall Quarter.

The Major Program

Comparative Literature is a dynamic major whose own self-definition is constantly shifting. Once mostly limited to the study of western European literature and its Greco-Roman classical past, today Comparative Literature has become a global interdisciplinary study of literature in original languages and other media (including cinema, television, fine arts, and opera, for example). Thus, we can define Comparative Literature as the study of literature and culture across national boundaries and throughout historical time.

The Program. Both the major and the minor programs in Comparative Literature allow students to combine courses in one or more national literature departments with courses in Comparative Literature. The introductory course sequence (COM 001 - 004) provides both an overview of ancient to contemporary literature and film and offers intensive practice in analytical thought. In addition, any one of the courses in the sequence satisfies the university composition requirement. All readings in undergraduate Comparative Literature courses are in English, but majors take upper division courses in at least one foreign literature in the original language.

Students majoring in Comparative Literature choose a first and second literature of concentration, one of which may be English. After the introductory sequence, each student's major course work is divided between courses in the two literatures of concentration and Comparative Literature courses. These Comparative Literature courses
encourage students to take a broad view of a historical period, a theme, a genre, or a literary movement. The wide variety of options in the program permits great flexibility and encourages interdisciplinary connections among literature and philosophy, psychology, history, and the arts. Each student's plan of study must be approved by the major adviser at the beginning and end of each calendar year.

**Advising.** All Comparative Literature majors and minors must consult with their advisor, individually, at least once at the beginning and once at the end of each academic year.

**Major Advisor.** Consult the Department office.

**Career Alternatives.** A Comparative Literature major offers an excellent enhancement to pre-professional training, preparing students for graduate study in medicine, dentistry, veterinary medicine, and other science fields as well as law and business, besides of course journalism and publishing, teaching, or graduate study in literature.

**Honors and Honors Program.** Students, who meet the grade point requirement for graduation with honors and complete the requirements established by the College of Letters and Science, may be recommended by the department for graduation with high honors or highest honors on the basis of an evaluation of their academic achievements in the major and in the honors project in particular. Entrance into the honors program requires that a student have completed at least 135 units with a minimum grade point average of 3.500 in courses counted toward the major.

Candidates must write a senior thesis under the direction of a faculty member approved by the major adviser. For this purpose, in addition to fulfilling all other major requirements, honors candidates must enroll in 6 units of COM 194H during the first two quarters of the senior year.

**Teaching Credential Subject Representative.** See the **Teaching Credential/M.A. Program.**

**Education Abroad Options.** The department of Comparative Literature encourages students to study abroad, in the Summer Abroad program, the Quarter Abroad Program, or the Education Abroad Program. With the approval of a major adviser, applicable courses taken abroad may be accepted in the major or minor programs.

**Graduate Study.** The Comparative Literature Program offers the Ph.D. degree with a strong emphasis on individual research under the supervision of a faculty member. Candidates for the Ph.D., in addition to research of a comparative nature, study three literatures (one of which may be English and/or American) in the original languages, acquiring an extensive knowledge of the overall development of one. Students may choose to focus on a special topic instead of on a third literary tradition.

Within this framework, each student's program will be tailored to individual interests, and may center on a major historical period, such as the Renaissance or the modern age; a genre, such as lyric poetry, epic, drama, or the novel; or any other special emphasis approved by the Graduate Advisor.

**Preparation.** For admission to the Ph.D. Program candidates should have an undergraduate major in literature and reading ability in three foreign languages. The Group requires three letters of recommendation and a sample of recent written work, and it is recommended that students submit their GRE scores.

Units: 16-46
It is recommended that students who do not use a European language toward the major take one of the remaining required lower division courses in the 53 series, preferably the 53 course that relates to the region of the language the student is using to satisfy the upper division language requirement in the major.

**Foreign language:**
Sufficient preparation to ensure satisfactory performance at the upper division level.

**Depth Subject Matter**

**Units: 40**

Choose five upper division Comparative Literature courses including at least one course in a major period (such as 164A-164B-164C-164D), movement (such as 168A-168B, 169) or genre (such as 160A-160B, 161A-161B, 163, 166A-166B) and including the following required courses:

- COM 141 Introduction to Critical Theoretical Approaches to Literature and Culture

COM 141 recommended for the junior year.

- COM 195 Senior Seminar in Comparative Literature

COM 195 to be taken in the spring quarter before graduation.

Three upper division literature courses in a language other than English.

Two additional upper division literature courses in Comparative Literature or in any other program including English or literature in translation.

**Total: 56-86**

**Comparative Literature | COM Courses**

**Note.** Many courses in Comparative Literature require that students have met the Entry Level Writing Requirement (ELWR) for the University of California.
Courses in COM:

COM 001—Major Books of Western Culture: The Ancient World (4) Review all entries
Lecture/Discussion—4 hours. Prerequisite(s): Completion of Entry Level Writing Requirement. Introduction, through class discussion and frequent written assignments, to some of the major books of western civilization such as The Odyssey, Aeneid, Bible, and Augustine's Confessions. GE credit: AH, WC, WE. Effective: 2010 Spring Quarter.

COM 001—Major Works of the Ancient World (4) Review all entries
Lecture/Discussion—4 hours. Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR). Introduction, through class discussion and frequent written assignments, to some of the major works of the ancient world (up to 5th century CE) such as The Odyssey, the Bible, Augustine's Confessions, and works by Plato and Confucius. Examined genres include religious texts, the epic, philosophy, drama, poetry. GE credit: AH, WC, WE. Effective: 2019 Fall Quarter.

COM 002—Major Books of Western Culture: From the Middle Ages to the Enlightenment (4) Review all entries
Lecture/Discussion—4 hours. Prerequisite(s): Completion of Entry Level Writing Requirement. Introduction to the methods of inquiry applied to critical reading and the practice of writing. Focus on texts from the European Middle Ages to the eighteenth century; critical analysis of the historical-cultural developments in this period. GE credit: AH, WC, WE. Effective: 2010 Spring Quarter.

COM 002—Major Works of the Medieval and Early Modern World (4) Review all entries
Lecture/Discussion—4 hours. Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR). Introduction, through class discussion and frequent written assignments, to some of the major works of the medieval and early modern worlds (6th century to the mid 17th century) such as Dante's Comedy, 1001 Nights, The Tale of Genji, and Elizabethan/Jacobean plays. Examined genres include framed narratives, courtly literature, and early modern drama. GE credit: AH, WC, WE. Effective: 2019 Fall Quarter.

COM 003—Major Books of Western Culture: The Modern Crisis (4) Review all entries
Lecture/Discussion—4 hours. Prerequisite(s): Completion of Entry Level Writing Requirement. Introduction, through class discussion and frequent written assignments, to the major literature and thought of the late eighteenth to the mid-twentieth century. GE credit: AH, WC, WE. Effective: 2010 Spring Quarter.

COM 003—Major Works of the Modern World (4) Review all entries
Lecture/Discussion—4 hours. Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR). Introduction, through class discussion and frequent written assignments, to some of the major works of the modern world (mid 17th to the mid 20th centuries) such as those by Dostoevsky, Tolstoy, Flaubert, Woolf, Lu Xun, Borges and Yeats. Examined genres include realist fiction, modernist fiction, and modernist poetry. GE credit: AH, WC, WE. Effective: 2019 Fall Quarter.

COM 004—Major Books of the Contemporary World (4) Review all entries
Lecture/Discussion—4 hours. Prerequisite(s): Completion of entry level writing requirement. Comparative study of selected major Western and non-Western texts composed in the period from 1945 to the present. Intensive focus on writing about these texts, with frequent papers written about these works. GE credit: AH, VL, WC, WE. Effective: 2016 Spring Quarter.

COM 004—Major Works of the Contemporary World (4) Review all entries
Lecture/Discussion—4 hours. Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR). Comparative study of selected major Western and non-Western texts composed in the period from 1945 to the present. Intensive focus on writing about these texts, with frequent papers written about these works. GE credit: AH, VL, WC, WE. Effective: 2019 Fall Quarter.

COM 005—Fairy Tales, Fables, and Parables (4)
Discussion—1 hour; Lecture—3 hours.
