Lecture/Discussion—4 hours. Prerequisite(s): GRK 003; Or equivalent. Review of Greek morphology, syntax, and vocabulary. Readings in Greek prose authors, including Xenophon. GE credit: AH. Effective: 2015 Fall Quarter.
GRK 101—Plato (4)
Lecture—3 hours; Term Paper. Prerequisite(s): GRK 100; or Consent of Instructor. GE credit: AH, WE. Effective: 2016 Fall Quarter.

GRK 102—Euripides (4)
Lecture—3 hours; Term Paper. Prerequisite(s): GRK 100; or Consent of Instructor. GE credit: AH, WE. Effective: 2016 Spring Quarter.

GRK 103A—Homer: Iliad (4)
Recitation—3 hours; Term Paper. Prerequisite(s): GRK 003 GE credit: AH, WE. Effective: 1997 Winter Quarter.

GRK 103B—Homer: Odyssey (4)
Recitation—3 hours; Term Paper. Prerequisite(s): GRK 100; or Consent of Instructor. GE credit: AH, WE. Effective: 2016 Fall Quarter.

GRK 104—Menander (4)
Lecture—3 hours; Term Paper. Prerequisite(s): GRK 100; or Consent of Instructor. GE credit: AH, WE. Effective: 2016 Spring Quarter.

GRK 105—Attic Orators (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): GRK 100; or Consent of Instructor. Selected readings from the orators of 4th and 5th century Athens. May be repeated up to 1 time(s) if topic differs and with consent of instructor. GE credit: AH, WC, WE. Effective: 2016 Fall Quarter.

GRK 106—Greek Hexameter Poetry (4)
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): GRK 100; or Consent of Instructor. Selected readings from ancient Greek hexameter poetry. Wisdom poetry, hymns, epyllia, idylls, epic, natural history and other texts from the hexameter tradition. May be repeated for credit May be repeated for credit when topic differs. GE credit: AH, WC, WE. Effective: 2017 Fall Quarter.

GRK 110—Readings in the Greek Novel (4)
Lecture—3 hours; Term Paper. Prerequisite(s): GRK 100; or Consent of Instructor. Selected readings from Greek prose fiction of the late classical, Hellenistic and imperial periods. May be repeated up to 2 time(s) with consent of instructor. GE credit: AH, WE. Effective: 2016 Fall Quarter.

GRK 111—Sophocles (4)
Lecture—3 hours; Term Paper. Prerequisite(s): GRK 100; or Consent of Instructor. GE credit: AH, WE. Effective: 2016 Fall Quarter.

GRK 112—Aristophanes (4)
Lecture—3 hours; Term Paper. Prerequisite(s): GRK 100; or Consent of Instructor. GE credit: AH, WE. Effective: 2016 Fall Quarter.

GRK 113—Thucydides (4)
Lecture—3 hours; Term Paper. Prerequisite(s): GRK 100; or Consent of Instructor. GE credit: AH, WE. Effective: 2016 Fall Quarter.

GRK 114—Lyric Poetry (4)
Lecture—3 hours; Term Paper. Prerequisite(s): GRK 100; or Consent of Instructor. GE credit: AH, WE. Effective: 2016 Spring Quarter.

GRK 115—Aeschylus (4)
Lecture—3 hours; Term Paper. Prerequisite(s): GRK 100; or Consent of Instructor. GE credit: AH, WE. Effective: 2016 Spring Quarter.

GRK 116—Herodotus (4)
Lecture—3 hours; Term Paper. Prerequisite(s): GRK 100; or Consent of Instructor. GE credit: AH, WE. Effective: 2016 Spring Quarter.

GRK 121—Greek Prose Composition (4)
Lecture/Discussion—4 hours. Prerequisite(s): GRK 100; or Consent of Instructor. Intensive grammar and vocabulary review through exercises in Greek prose composition. GE credit: AH. Effective: 2016 Fall Quarter.

GRK 130—Readings in Later Greek (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): GRK 100; or Consent of Instructor. Translation and
discussion of selected readings from Hellenistic to Byzantine Greek literature. GE credit: AH, WE. Effective: 2016 Fall Quarter.

GRK 131—Readings in Ancient Greek Philosophy and Science (4)
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): GRK 100 (can be concurrent); or Consent of Instructor. Selected readings from ancient Greek philosophical and scientific writers. Texts on logical truth and empirical sense data, material and social contexts of ancient Greek philosophy and science. May be repeated for credit if topics differ. GE credit: AH, WC, WE. Effective: 2017 Fall Quarter.

GRK 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

GRK 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

Health Informatics (Graduate Group)

Health Informatics (Graduate Group) | Health Informatics M.S.

Formerly Medical Informatics (A Graduate Group)

Nicholas Anderson, Ph.D., Chair

Group Office, UC Davis Health System Health Informatics Program; 2450 48th St., Suite 2800, Sacramento, CA 95817; 916-734-8710; healthinformatics@ucdavis.edu

Faculty, http://www.ucdmc.ucdavis.edu/informatics/our_team/graduate_group_faculty/

Graduate Study. The Master's degree program seeks to train the next generation of researchers, clinicians and leaders to advance the science of Health Informatics. Successful applicants have backgrounds in health, technology or biology, and are enthused to develop new knowledge using health data and information systems.

The course of study provides research-oriented training that spans the use of computer systems in medicine today, including methods for clinical data acquisition, storage, and retrieval, the development, use and implementation of the electronic medical record, management of clinical data, and the use of medical decision support systems. A research project and thesis are mandatory degree requirements.

Preparation. The Group encourages applications from clinicians, healthcare IT professionals and researchers who have had some experience in the manipulation of healthcare data.

Clinicians (M.D., R.N., Pharm.D., others):
A. Successful completion of Clinical Education, at the Baccalaureate level or higher.
B. Working knowledge in technology, ideally computer science and programming.

Healthcare Information Technology Professionals:
A. Working experience in Healthcare IT, biotech or similar experience.
B. Knowledge of Human Disease and Conditions C. Knowledge of Medical Terminology.

Researchers:
A. Applied background (Baccalaureate or higher) in computer science, information science, biology or related field.
B. Domain experience in health information or biology.

Graduate Advisor. Mark Carroll (Public Health Sciences and Pathology and Laboratory Medicine)

Health Informatics (Graduate Group) | MHI Courses
Courses in MHI:

**MHI 202—Computer-Based Patient Records (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Current enrollment within the Health Informatics Graduate Program or consent of instructor. Introduction and overview of computer-based clinical record systems. Topics include data modeling, health system standards and terminologies; security, privacy and confidentiality; workflow modeling; data visualization; legal; decision support; public health; and evidence-based practice. Effective: 2009 Winter Quarter.

**MHI 207—Decision Support Systems (4)**
Lecture/Discussion—4 hours. Prerequisite(s): Consent of Instructor. Explores decision support systems for medical application. Topics include medical decision making, uncertainty, review of existing decision support systems, knowledge engineering, data mining, and knowledge based systems. Effective: 2010 Winter Quarter.

**MHI 208—Medical Informatics in Web-Based Enterprise Computing (4)**
Discussion—2 hours; Lecture—2 hours. Introduction to the decision making processes and technologies that are involved in developing web-based distributed enterprise applications in medicine. Focus on the Informatician's role as a team member. Effective: 2010 Spring Quarter.

**MHI 209—Data Acquisition and Analysis (4)**
Discussion—1 hour; Laboratory—3 hours; Lecture—2 hours. Examines the nature, acquisition, and analysis of medical data. Data ranges from signals of electrical potentials, sounds, text, images (still and motion), and data from nucleic acid and protein expression and sequencing instruments. Effective: 2010 Spring Quarter.

**MHI 210—Introduction to Health Informatics (4)**
Discussion—1 hour; Lecture—3 hours. Overview course to give the student a broad exposure to the field of Health Informatics. Topics covered include, but are not limited to, networking, information systems, coding, HL7, Security, and HIPPA. Effective: 2009 Winter Quarter.

**MHI 211V—Telemedicine (4)**
Web Electronic Discussion—1 hour; Web Virtual Lecture—3 hours. Issues for the development and maintenance of a successful telemedicine program with focus on strategic planning, clinical applications, project management, risk management and legal issues; reimbursement and contracting; human resources and program sustainability. Effective: 2013 Fall Quarter.

**MHI 212—Computer Security in Health Informatics (4)**
Lecture—3 hours; Project (Term Project). Prerequisite(s): MHI 210; MHI 202; MHI 209 Critical thinking about basic concepts in computer security and privacy. How the computer security and privacy impact health informatics, ranging from electronic health records to telemedicine to remote, virtual surgery. Effective: 2012 Fall Quarter.

**MHI 215—Beginning and Intermediate Programming in M (MUMPS) (3)**
Lecture—3 hours. Project-oriented approach to fundamentals of programming in ANSI Standard M (MUMPS) language. Basic syntax, Hierarchical file structure; arrays and string subscripts, indirection and extrinsic functions. (S/U grading only.) Effective: 2009 Winter Quarter.

**MHI 289A—Special Topics in Medical Informatics: Data Acquisition (1-5)**
Laboratory—1-5 hours; Lecture—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Data Acquisition. May be repeated for credit when topic differs. Effective: 2010 Fall Quarter.

**MHI 289B—Special Topics in Health Informatics; Seminars in Clinical Translational Informatics (1)**
Seminar—1 hour. Seminars in current clinical translational informatics research topics. Guest presenters and faculty led discussions. Effective: 2015 Spring Quarter.

**MHI 289E—Clinical Knowledge for the Health Informaticist (3)**
Laboratory—2 hours; Lecture—2 hours. Prerequisite(s): Consent of Instructor. Basic clinical knowledge for health informatics students. Human systems, disease states and conditions, treatments and prognosis. Effective: 2018 Winter Quarter.

**MHI 289F—Database and Knowledge Management (4)**
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. Course objectives include understanding the informatics techniques for data capture, information management, and knowledge generation that a student will use throughout their career. May be repeated for credit. Effective: 2010 Winter Quarter.

**MHI 289G—Special Topics in Health Informatics; Biostatistics (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): Consent of Instructor. Special topics in Biostatistics.

History | HIS A.B.

(College of Letters and Science)

Department Office. 2216 Social Sciences and Humanities Building; 530-752-9241; http://history.ucdavis.edu

Faculty. http://history.ucdavis.edu/directory-of-people/his-faculty

The Major Program

The History major develops critical intelligence and fosters an understanding of ourselves and our world through the study of the past—both the "deep past" and the more recent past.

The Program. A student electing a major in History will receive a broad education in histories of several geographic areas. Students preferring more active engagement in research and writing are encouraged to complete history seminars and/or the honors program.

Career Alternatives. A degree in history is excellent preparation for a professional career such as teaching, law, journalism, public administration, or business management. Professional schools in these and related fields (including the health professions) are looking for students who can weigh conflicting evidence, evaluate alternative courses of action or divergent points of view, and express conclusions logically in everyday language. These analytical skills are stressed in history classes, and their mastery gives the history student a solid preparation for subsequent training in a specialized career.

History and Philosophy of Science. Courses from the History and Philosophy of Science program may count toward the History major. History and Philosophy of Science 130A, 130B, 150, and 180 fulfill upper division requirements in either the U.S. or Europe concentration.

Consult the History and Philosophy of Science program for a more detailed description of course offerings this area and the minor in History and Philosophy of Science.

Honors and Honors Program. A student becomes eligible for graduation with honors by meeting the minimum GPA (usually 3.500) and course requirements established by the College of Letters and Science. To qualify for high or highest honors, students must also complete the History Department honors program with a GPA of 3.500 or
above and write a thesis that meets the criteria for high honors or highest honors. Students apply to participate in
the department honors program during the latter part of their junior year. Admission to the program is based on
GPA, a thesis proposal, examples of previous writing, and the recommendation of a faculty member who is willing
to sponsor the student's project, interviews, and faculty recommendations. Students admitted into the program
must complete the History 104A, 104B, 104C sequence of honors courses, which requires the completion of a
senior honors thesis. Students who anticipate seeking admission to the honors program are urged to complete at
least one History 102 (undergraduate seminar) before the end of their junior year. Interested students are urged to
consult with faculty in their field early in their junior year. Students may follow either Plan I or Plan II described
above, and may substitute History 104B and 104C for any courses in their program other than History 102.

Students who anticipate pursuing graduate work in history or a teaching credential, and who do not wish to opt for
the research emphasis embodied in the honors program, are encouraged to select Plan II of the major.

**Study Abroad and the History Major.** The department strongly encourages interested students to pursue their
studies abroad. While there are no specific required courses or prerequisites, students are urged to take at least
one history course that touches upon the geographic area where they plan to study abroad before departing. To
receive a history degree from UC Davis, students must complete at least 18 upper division units in the history major
at UC Davis (which can also include History 101, 102, 103). The remaining major requirements can be fulfilled abroad
provided that (a) the course should be evaluated as at least four UC Davis units, (b) the course should be
considered upper division by the standards set forth by the UC Davis Study Abroad Program, and (c) the course
should be in the field of History. Students may present copies of the course work, syllabus, and writing assignments
to the department’s liaison person with the Study Abroad office for approval.

Note: students who wish to receive credit for courses taken abroad under programs other than UC Davis Study
Abroad may petition the Undergraduate Program Committee to do so.

**Teaching Credential Subject Representative.** See the Teaching Credential/M.A. Program.

**Preparing for Careers in Teaching.** History majors can pursue rewarding careers in teaching. To ensure your
undergraduate coursework prepares you for a subject matter competency test, please contact the History Project

**Graduate Study.** The Department of History offers programs of study and research leading to the M.A. and Ph.D.
degrees in history. Detailed information may be obtained by contacting the Graduate Advisor.

**Graduate Advisor.** See the department’s website for updated information.

**American History and Institutions.** This University requirement can be satisfied by passing any one of the
176A, 176B, 177A, 177B, 178A, 178B, 180A, 180B, 181, 183A, 183B, 184, 189. The upper division courses may be used
only with the consent of the instructor; see also under University requirements.

**Major Advisors.** hisugadvisor@ucdavis.edu or see the department’s website for updated information.

**Preparatory Subject Matter**

*Choose five lower division courses from the following seven concentrations, including at least one course in three different concentrations. Additional units to reach 20.*

**Units: 20**

**Units: 20**

(a) **Africa:**
- HIS 015A Africa to 1900
- HIS 015B Africa Today

(b) **Asia:**
- HIS 008 History of Indian Civilization
- HIS 009A History of East Asian Civilization
- HIS 009B History of East Asian Civilization

(c) **Europe:**
- HIS 004A History of Western Civilization
- HIS 004B History of Western Civilization
- HIS 004C History of Western Civilization

(d) **Latin America:**
- HIS 007A History of Latin America to 1700
- HIS 007B History of Latin America, 1700-1900
### HIS 007C History of Latin America 1900-present

#### (e) Middle East:
- HIS 006 Introduction to the Middle East

#### (f) United States:
- HIS 017A History of the United States
- HIS 017B History of the United States
- HIS 018A Race in America to 1865
- HIS 072A Women and Gender in America, to 1865
- HIS 072B Women and Gender in America, 1865-Present
- HIS 080 The History of the United States in the Middle East
- HIS 080W The History of the United States in the Middle East
- HIS 085 Nature, Man, and the Machine in America

#### (g) World:
- HIS 001 Introduction to History
- HIS 002 Introduction to the History of Science and Technology
- HIS 003 Cities: A Survey of World Cultures
- HIS 010A World History to 1350
- HIS 010B World History, c. 1350-1850
- HIS 010C World History III
- HIS 011 History of the Jewish People in the Modern World
- HIS 012 Food and History
- HIS 013 Global Sexualities
- HIS 014 History of Global Capitalism
- HIS 020 The Vietnam War
- HIS 090 Research in History

History | HIS Minor

(College of Letters and Science)

Department Office. 2216 Social Sciences and Humanities Building; 530-752-9241; http://history.ucdavis.edu

Faculty. http://history.ucdavis.edu/directory-of-people/his-faculty

The minor in History consists of five upper division courses chosen so that at least three courses are in one field and at least one course is in another field. The two fields shall be chosen from among those defined in the catalog for the major. However, students may also, in consultation with and with the authorization of a faculty advisor, define other thematic fields.

Minor Advisor. hisugadvisor@ucdavis.edu or see the department's website for updated information.

History

Three courses in one concentration  12

Units: 20
History | HIS Courses

Courses in HIS:

HIS 001—Introduction to History (2)
Discussion—1 hour; Lecture—1 hour. Introduction to history, its key methodologies, writing tasks, and research practices. Examination of the development of history as an academic discipline; ethics in historical research. Topical focus changes regularly. GE credit: SS, WC, WE. Effective: 2016 Spring Quarter.

HIS 002—Introduction to the History of Science and Technology (4)
Discussion—1 hour; Lecture—3 hours. Introduction to topics and methods of the history of science and technology. Emphasis on understanding the role of science and technology in the modern world through a long-term historical perspective. (Same course as STS 002.) GE credit: AH, SL, SS, WC, WE. Effective: 2017 Fall Quarter.

HIS 003—Cities: A Survey of World Cultures (4)
Lecture—3 hours; Lecture/Discussion—1 hour. Survey of urban world cultures, focusing on up to ten cities selected by the instructor. GE credit: AH, SS, WC. Effective: 2017 Winter Quarter.

HIS 004A—History of Western Civilization (4)
Discussion—1 hour; Lecture—3 hours. Growth of western civilization from late antiquity to the Renaissance. GE credit: AH, SS, WC, WE. Effective: 1997 Winter Quarter.

HIS 004B—History of Western Civilization (4)

HIS 004C—History of Western Civilization (4)
Discussion—1 hour; Lecture—3 hours. Development of Western Civilization from the Eighteenth Century to the present. GE credit: AH, SS, WC, WE. Effective: 1997 Winter Quarter.

HIS 005—Modernist Culture (2)
Lecture/Discussion—2 hours. Modernist culture in global perspective. Introduction to early 20th century-innovations in visual arts, music, literature, film, and architecture in Europe, the Americas, Asia, and Africa. GE credit: AH, VL, WC. Effective: 2018 Fall Quarter.

HIS 006—Introduction to the Middle East (4)
Discussion—1 hour; Lecture—3 hours. Survey of the major social, economic, political and cultural transformations in the Middle East from the rise of Islam (c.600A.D.) to the present, emphasizing themes in religion and culture, politics and society. GE credit: AH, SS, WC, WE. Effective: 2003 Fall Quarter.

HIS 007A—History of Latin America to 1700 (4)
Discussion—1 hour; Lecture—3 hours. Introduction to the history of Spanish and Portuguese America from the late pre-Columbian period through the initial phase and consolidation of a colonial regime (circa 1700). Topics include conquest, colonialism, racial mixture, gender, and labor systems. GE credit: AH, SS, WC, WE. Effective: 2004 Fall Quarter.

HIS 007B—History of Latin America, 1700-1900 (4)
Discussion—1 hour; Lecture—3 hours. Latin America from colony to republic. The nature of Iberian colonialism, the causes for independence, the creation of nation states, the difficulties in consolidating these nations, and the rise of Liberalism and export economies in the nineteenth century. GE credit: AH, SS, WC, WE. Effective: 2004 Fall Quarter.

HIS 007C—History of Latin America 1900-present (4)
Discussion—1 hour; Lecture—3 hours. Latin America since the beginning of the 20th century. Themes include export economies, oligarchic rule, crises of depression and war, corporatism, populism, revolution and reform movements, cultural and ethnic issues, U.S.-Latin American relations, neo-liberal restructuring. GE credit: AH, SS, WC, WE. Effective: 2004 Fall Quarter.

HIS 008—History of Indian Civilization (4)
Discussion—1 hour; Lecture—3 hours. Survey of Indian civilization from the rise of cities (ca. 2000 B.C.) to the present, emphasizing themes in religion, social and political organization, and art and literature that reflect cultural interaction and change. GE credit: AH, SS, WC, WE. Effective: 1997 Winter Quarter.
HIS 009A—History of East Asian Civilization (4)
Discussion—1 hour; Lecture—3 hours. Surveys traditional Chinese civilization and its modern transformation. Emphasis is on thought and religion, political and social life, art and literature. Perspectives on contemporary China are provided. GE credit: AH, SS, WC, WE. Effective: 1997 Winter Quarter.

HIS 009B—History of East Asian Civilization (4)
Discussion—1 hour; Lecture—3 hours. Surveys traditional Japanese civilization and its modern transformation. Emphasis is on thought and religion, political and social life, art and literature. Perspectives on contemporary Japan are provided. GE credit: AH, SS, WC, WE. Effective: 1997 Winter Quarter.

HIS 009C—Korean Culture and Society: From Ancient Three Kingdoms to the Global K-Pop (4)
Lecture/Discussion—4 hours. Evolution of Korean society from Three Kingdoms period (B.C.E. 57 to C.E. 676) to the contemporary era emphasizing the perseverance and transformations of traditional social and cultural patterns. (Same course as EAS 088.) GE credit: AH, WC. Effective: 2019 Winter Quarter.

HIS 010A—World History to 1350 (4)
Discussion—1 hour; Lecture—3 hours. Historical examination of the changing relationship of human societies to one another and to their natural settings through the year 1350, with particular attention to long-term trends and to periodic crises that reshaped the links of culture and nature on a global scale. GE credit: AH, SS, WC, WE. Effective: 2003 Fall Quarter.

HIS 010B—World History, c. 1350-1850 (4)
Discussion—1 hour; Lecture—3 hours. Major topics in world history from the 14th century to the beginning of the 19th century. Topics will vary but may include: oceans as systems of human communication and conflict; the global consequences of "industrious revolutions" in Europe and Asia, etc. GE credit: AH, SS, WC, WE. Effective: 2001 Winter Quarter.

HIS 010C—World History III (4)
Discussion—1 hour; Lecture—3 hours. Major topics from world history of the 19th and 20th centuries, emphasizing the rise and fall of Western colonial empires; Cold War and the superpowers; the spread of the nation-states; and process of globalization. GE credit: AH, SS, WC, WE. Effective: 1998 Fall Quarter.

HIS 011—History of the Jewish People in the Modern World (4)
Discussion—1 hour; Lecture—3 hours. Histories and cultures of the Jews since 1492. Topics include: the making of Jewish diasporas, roots of antisemitism, the Holocaust in images and texts, changing ideas of the self, Jews in America, contemporary visions of the Jewish past. GE credit: AH, DD, VL, WC, WE. Effective: 2014 Winter Quarter.

HIS 012—Food and History (4)
Discussion—1 hour; Lecture—3 hours. Survey of the ways humans have fed themselves from the dawn of humanity to the present. Transformation of plants and animals into food, cooking into cuisine, and ceremony into etiquette. GE credit: AH, OL, SS, VL, WE. Effective: 2014 Fall Quarter.

HIS 013—Global Sexualities (4)
Discussion—1 hour; Lecture—3 hours. Global history of sexualities, including comparative study of gender, marriage, and fertility before 1800, followed by the modern history of sexualities worldwide as it intersects with imperialism, race, population control, law, and globalization. GE credit: AH, DD, SS, VL, WC. Effective: 2017 Fall Quarter.

HIS 014—History of Global Capitalism (4)
Discussion—1 hour; Lecture—3 hours. History of institutions, workers, commodity chains, and the social and cultural context of capitalism around the world from 1500-present. Emphasis on transnational and comparative histories of political economies and individual human lives. GE credit: AH, DD, SS, VL, WC. Effective: 2017 Fall Quarter.

HIS 015A—Africa to 1900 (4)
Discussion—1 hour; Lecture—3 hours. Introduction to African history to 1900. Origins and impact of early human history, precolonial states and societies, slavery and the slave trade, religious and cultural movements, and the foundations of European colonialism. GE credit: DD, SS, WC. Effective: 2018 Spring Quarter.

HIS 015B—Africa Today (4)
Discussion—1 hour; Lecture—3 hours. Survey of major themes in colonial and postcolonial sub-Saharan African history, including colonialism, decolonization, nationalism and politics, economic history and labor, urbanization, popular culture, gender, marriage, and family life. GE credit: AH, SS, WC. Effective: 2017 Fall Quarter.

HIS 016—Sex, Science, & Society (4)
Discussion—1 hour; Lecture—3 hours. Survey of the relationship between sex, science, and society in the history of
the modern world. Emphasis on the development of scientific ideas about the human body against broader social, cultural, and political trends and from a global viewpoint. (Same course as STS 016.) GE credit: AH, DD, SL, WC, WE. Effective: 2019 Fall Quarter.

**HIS 017A—History of the United States (4)**
Discussion—1 hour; Lecture—3 hours. The experience of the American people from the Colonial Era to the Civil War. GE credit: ACGH, AH, DD, SS, WE. Effective: 1997 Winter Quarter.

**HIS 017B—History of the United States (4)**
Discussion—1 hour; Lecture—3 hours. The experience of the American people from the Civil War to the end of the Cold War. Not open for credit to students who have completed course HIS 017C. GE credit: ACGH, AH, DD, SS, WE. Effective: 1997 Winter Quarter.

**HIS 018A—Race in America to 1865 (4)**
Discussion—1 hour; Lecture—3 hours. Introduction to history of race and racial formation in the United States to the Civil War through a comparative approach. Examines the experiences of African Americans, Asian Americans, Native American, Mexican Americans and other Latino/a groups. One unit of credit to students who have previously completed HIS 178A. GE credit: ACGH, AH, DD, SS. Effective: 2017 Fall Quarter.

**HIS 018B—Race in the United States Since 1865 (4)**
Discussion—1 hour; Lecture—3 hours. Introduction to the history of race and racial formation in America since 1865 though a comparative approach that examines the experiences of African Americans, Asian Americans, Native American and Mexican Americans and other Latino/a groups. GE credit: ACGH, AH, DD, SS. Effective: 2018 Spring Quarter.

**HIS 020—The Vietnam War (4)**
Extensive Writing; Lecture—3 hours. A history of the Vietnam War, including its origins, fighting, and repercussions. GE credit: ACGH, AH, DD, SS, VL, WC, WE. Effective: 2018 Spring Quarter.

**HIS 072A—Women and Gender in America, to 1865 (4)**
Discussion—1 hour; Lecture—3 hours. History of women and gender in America through 1865, emphasizing intersections of gender, race, class, and sexuality. Topics include interracial marriage, slavery, witchcraft, meanings of motherhood, war, domestic labor, moral reform, women's rights, migrations, the effects of commercialization and industrialization. GE credit: ACGH, AH, DD, SS. Effective: 2014 Fall Quarter.

**HIS 072B—Women and Gender in America, 1865-Present (4)**
Discussion—1 hour; Lecture—3 hours. History of women and gender in America since 1865, emphasizing intersections of gender, race, class, and sexuality. Covers emancipation, migration, immigration, war, media, same-sex and opposite-sex relationships, and the birth control, suffrage, labor, civil rights, feminist, and anti-feminist movements. GE credit: ACGH, AH, DD, SS. Effective: 2014 Fall Quarter.

**HIS 080—The History of the United States in the Middle East (2)**
Lecture—2 hours. History of the United States in the Middle East from 1900 to the present. Examination of U.S. foreign relations toward the Middle East, their regional ramifications and domestic repercussions. GE credit: ACGH, AH, SS, WC. Effective: 2018 Spring Quarter.

**HIS 080W—The History of the United States in the Middle East (2)**
Extensive Writing; Lecture/Discussion—1 hour. Must enroll in HIS 080 concurrently. History of the United States in the Middle East from 1900 to the present. Examination of U.S. foreign relations toward the Middle East, their regional ramifications and domestic repercussions with extensive writing. GE credit: AH, SS, WE. Effective: 2018 Spring Quarter.

Seminar—4 hours; Term Paper. Limited enrollment. History of the attitudes and behavior of Americans toward their natural environment and their technology, from colonial times to the present. No final examination. GE credit: AH, SS, WE. Effective: 2016 Spring Quarter.

**HIS 092—Internship in History (1-12)**
Internship—1-12 hours. Prerequisite(s): Consent of Instructor. Supervised internship and study as a historian, archivist, curator, or an in another history-related capacity, in an approved organization or institution. May be repeated for credit. (P/NP grading only.) Effective: 2017 Fall Quarter.
HIS 098—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Primarily for lower division students. (P/NP grading only.) Effective: 1997 Winter Quarter.

HIS 099—Special Study for Undergraduates (1-5)
Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

HIS 101—Introduction to Historical Thought and Writing (5)
Lecture/Discussion—4 hours; Term Paper. Study of the history of historical thought and writing, analysis of critical and speculative philosophies of history and evaluation of modes of organization, interpretation, and style in historical writing. GE credit: WE. Effective: 2016 Fall Quarter.

HIS 102A—Undergraduate Proseminar in History; Ancient (5)
Seminar—3 hours; Term Paper. Limited enrollment. Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. Ancient. May be repeated for credit. GE credit: WE. Effective: 1997 Winter Quarter.

HIS 102B—Undergraduate Proseminar in History; Medieval (5)
Seminar—3 hours; Term Paper. Limited enrollment. Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. Medieval. May be repeated for credit. GE credit: WE. Effective: 1997 Winter Quarter.

HIS 102D—Undergraduate Proseminar in History; Modern Europe to 1815 (5)
Seminar—3 hours; Term Paper. Limited enrollment. Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. Modern Europe to 1815. May be repeated for credit. GE credit: WE. Effective: 1997 Winter Quarter.

HIS 102E—Undergraduate Proseminar in History; Europe Since 1815 (5)
Seminar—3 hours; Term Paper. Limited enrollment. Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. Europe since 1815. May be repeated for credit. GE credit: WE. Effective: 1997 Winter Quarter.

HIS 102F—Undergraduate Proseminar in History; Russia (5)
Seminar—3 hours; Term Paper. Limited enrollment. Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. Russia. May be repeated for credit. GE credit: WE. Effective: 1997 Winter Quarter.

HIS 102G—Undergraduate Proseminar in History; China to 1800 (5)
Seminar—3 hours; Term Paper. Limited enrollment. Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. China to 1800. May be repeated for credit. GE credit: WE. Effective: 1997 Winter Quarter.

HIS 102H—Undergraduate Proseminar in History; China Since 1800 (5)
Seminar—3 hours; Term Paper. Limited enrollment. Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. China since 1800. May be repeated for credit. GE credit: WE. Effective: 1997 Winter Quarter.

HIS 102I—Undergraduate Proseminar in History; Britain (5)
Seminar—3 hours; Term Paper. Limited enrollment. Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. Britain. May be repeated for credit. GE credit: WE. Effective: 1997 Winter Quarter.

HIS 102J—Undergraduate Proseminar in History; Latin America Since 1810 (5)
Seminar—3 hours; Term Paper. Limited enrollment. Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. Latin America since 1810. May be repeated for credit. GE credit: WE. Effective: 1997 Winter Quarter.

HIS 102K—Undergraduate Proseminar in History; American History to 1787 (5)
Seminar—3 hours; Term Paper. Limited enrollment. Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. American History to 1787. May be repeated for credit. GE credit: WE. Effective: 1997 Winter Quarter.

HIS 102L—Undergraduate Proseminar in History; United States, 1787-1896 (5)
Seminar—3 hours; Term Paper. Limited enrollment. Designed primarily for history majors. Intensive reading,
discussion, research, and writing in selected topics in the various fields of history. United States, 1787-1896. May be repeated for credit. GE credit: WE. Effective: 1997 Winter Quarter.

HIS 102M—Undergraduate Proseminar in History; United States Since 1896 (5)
Seminar—3 hours; Term Paper. Limited enrollment. Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. United States since 1896. May be repeated for credit. GE credit: WE. Effective: 1997 Winter Quarter.

HIS 102N—Undergraduate Proseminar in History; Japan (5)
Seminar—3 hours; Term Paper. Limited enrollment. Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. Japan. May be repeated for credit. GE credit: WE. Effective: 1997 Winter Quarter.

HIS 102O—Undergraduate Proseminar in History; Africa (5)
Seminar—3 hours; Term Paper. Limited enrollment. Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. Africa. May be repeated for credit. GE credit: WE. Effective: 1997 Winter Quarter.

HIS 102P—Undergraduate Proseminar in History; Christianity and Culture in Europe, 50-1850 (5)
Seminar—3 hours; Term Paper. Limited enrollment. Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. Christianity and Culture in Europe, 50-1850. May be repeated for credit. GE credit: WE. Effective: 1997 Winter Quarter.

HIS 102Q—Undergraduate Proseminar in History; India (5)
Seminar—3 hours; Term Paper. Limited enrollment. Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. India. May be repeated for credit. GE credit: WE. Effective: 1997 Winter Quarter.

HIS 102R—Undergraduate Proseminar in History; Muslim Societies (5)
Seminar—3 hours; Term Paper. Limited enrollment. Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. Muslim Societies. May be repeated for credit. GE credit: WE. Effective: 1997 Winter Quarter.

HIS 102S—Undergraduate Proseminar in History; Education Abroad Program (5)
Seminar—3 hours; Term Paper. Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. Education Abroad Program. May be repeated for credit. GE credit: AH, SS, WE. Effective: 2006 Spring Quarter.

HIS 102X—Undergraduate Proseminar in History; Comparative History (5)
Seminar—3 hours; Term Paper. Limited enrollment. Designed primarily for history majors. Intensive reading, discussion, research, and writing in selected topics in the various fields of history. Comparative History, selected topics in cultural, political, economic, and social history that deal comparatively with more than one geographic field. GE credit: WE. Effective: 1997 Winter Quarter.

HIS 103—Topics in Historical Research (4)
Discussion—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. Individual research resulting in a research paper on a specific topic in one of various fields of history. May be repeated for credit. May be repeated for credit. GE credit: WE. Effective: 1997 Winter Quarter.

HIS 104A—Introduction to Historical Research and Interpretation (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Acceptance into History Department Honors Program. Directed reading and research aimed at preparing students to select appropriate topics and methodologies for a senior honors essay and to situate their topics within a meaningful, broad context of historical interpretations. GE credit: WE. Effective: 1997 Winter Quarter.

HIS 104B—Honors Thesis (4)
Tutorial—4 hours. Prerequisite(s): HIS 104A Research in preparation of a senior honors thesis under the direction of a faculty advisor. GE credit: WE. Effective: 2002 Winter Quarter.

HIS 104C—Honors Thesis (4)
Tutorial—4 hours. Prerequisite(s): HIS 104A; HIS 104B Completion of a senior honors thesis under the direction of a faculty advisor. GE credit: WE. Effective: 2002 Spring Quarter.

HIS 105—Teaching History (4)
Lecture—3 hours; Term Paper. Teaching of American and world history at the K-12 level. Emphasis on introducing
college students to the multiple ways in which history is taught, and on understanding how history education is
determined. GE credit: ACGH, AH, SS, WE. Effective: 2014 Fall Quarter.

HIS 107—Medicine's Histories: Human and Veterinary Medicine from the Ancient World to One Health (4)
Lecture/Discussion—3 hours; Project (Term Project). Global, comparative study of the related histories of human and
veterinary medicine from the ancient world to today's interdisciplinary One Health. Emphasis on reintegration of
human and veterinary medicine to meet the biggest health challenges today GE credit: AH, SS. Effective: 2017
Spring Quarter.

HIS 108—Global Environmental History (4)
Lecture/Discussion—3 hours; Project (Term Project). Global, comparative study of how environmental change,
human perceptions of nature, and manipulations of nature have changed over time. Primary focus post-1500,
emphasis on critically analyzing many common ideas of environmental change. Not open for credit to students who
have taken HIS 109A. GE credit: AH, SS. Effective: 2014 Fall Quarter.

HIS 109—Environmental Change, Disease and Public Health (4)
Lecture/Discussion—3 hours; Project (Term Project). Analysis of environmental changes from pre-history to the
present and their influence on disease distribution, virulence and public health. Focus on critical study of many
human-driven environmental changes and the accelerated transformation/spread of pathogens under globalization.
Not open for credit to students who have taken HIS 109B. (Same course as SAS 109.) GE credit: SE, SL, SS, WC.
Effective: 2016 Fall Quarter.

HIS 110—Themes in World History (4)
Lecture—3 hours; Term Paper. Prerequisite(s): Upper division standing recommended. Topics will emphasize the
interaction of diverse regions of the world as well as common patterns of historical change. May be repeated for
credit topic and/or instructor differs. GE credit: AH, SS, WC, WE. Effective: 2016 Fall Quarter.

HIS 110A—Colonialism and the Making of the Modern World (4)
Lecture—3 hours; Term Paper. History of the modern world, focusing on struggles between Europeans and
colonized peoples; the global formation of capitalism; the creation of nation-states; and the constitution of
bourgeois bodies and racial selves in modern societies. GE credit: AH, SS, VL, WC, WE. Effective: 2014 Fall Quarter.

HIS 111A—Ancient History (4)
Lecture—3 hours. History of ancient empires of the Near East and of their historical legacy to the Western world. GE

HIS 111B—Ancient History (4)
Lecture—3 hours. Political, cultural and intellectual study of the Greek world from Minoan-Mycenaean period to end

HIS 111C—Ancient History (4)
Lecture—3 hours. Development of Rome from earliest times. Rise and fall of the Roman Republic; the Empire to 476

HIS 112A—Topics in Pre-Modern Jewish History (4)
Lecture—3 hours; Term Paper. Topics in the history of Jews from the Biblical era to the eras of Jewish emancipation.
Topics can be framed chronologically (eg., medieval Jewry) or thematically (eg., trade and Jewish communities).
May be repeated once for credit. May be repeated up to 1 time(s). GE credit: AH, SS, WC, WE. Effective: 1997 Fall Quarter.

HIS 112B—Topics in Modern Jewish History (4)
Lecture—3 hours; Term Paper. Topics in the history of Jews from the era of Jewish emancipation to the present.
Topics can be framed chronologically or thematically (eg. Zionism, assimilation, the post Holocaust Diaspora). May
be repeated once for credit. May be repeated up to 1 time(s). GE credit: AH, SS, WC, WE. Effective: 1997 Fall Quarter.

HIS 112C—History of Jews in the Muslim World (4)
Lecture—3 hours; Term Paper. History of Jewish communities in the lands of Islam from the time of the Prophet
Muhammad to the present day. GE credit: SS, WC, WE. Effective: 2016 Fall Quarter.

HIS 113—History of Modern Israel (4)
Lecture—3 hours; Term Paper. Topics include the rise and fall of utopian Zionism, the century-long struggle between
Jews and Arabs, the development of modern Hebrew culture, the conflict between religious and secular Jews, and
the nature of Israel's multicultural society. GE credit: AH, SS, WC, WE. Effective: 2004 Spring Quarter.
HIS 115A—History of West Africa (4)
Lecture—3 hours; Term Paper. Prerequisite(s): HIS 015 recommended. West and Central Africa from 1500 to the present. Origins and impact of precolonial states and societies, the trans-Atlantic slave trade, colonialism, decolonization, nationalism, and changes in religions, politics, economics, gender, and culture. GE credit: AH, WC, WE. Effective: 2018 Winter Quarter.

HIS 115B—History of East Africa and the Indian Ocean (4)
Lecture—3 hours; Term Paper. Prerequisite(s): HIS 015 recommended. Eastern Africa and the Indian Ocean world from 1500 to the present. Origins and impact of precolonial states and societies, slavery, trade, colonialism, decolonization, nationalism, and changes in religions, politics, economics, gender, and culture GE credit: AH, WC, WE. Effective: 2018 Winter Quarter.

HIS 115C—History of Southern Africa from Exploration to the Rainbow Nation (4)
Lecture—3 hours; Term Paper. Prerequisite(s): HIS 015 recommended. Southern Africa from 1500 to the present. Origins and impact of precolonial states and societies, European colonization, industrialization, urbanization, nationalism, apartheid, and changes in religions, politics, economics, gender, and culture. GE credit: AH, WC, WE. Effective: 2018 Winter Quarter.

HIS 115D—Postcolonial Africa (4)
Lecture—3 hours; Term Paper. Prerequisite(s): HIS 015 recommended. Survey of social, political, cultural and economic change in African societies since the ending of European colonial rule in the twentieth century. Themes include development, health and medicine, war and conflict, urbanization, global and inter-continental migration, and family and gender. GE credit: AH, SS, WC, WE. Effective: 2017 Spring Quarter.

HIS 115E—Slavery, Africa, and the Atlantic World (4)
Lecture—3 hours; Term Paper. History of the African Slave trades, from the early Egyptian and Saharan trades in the pre-modern period to the trans-Atlantic trade (15th-19th century) and the contemporary trafficking of humans. GE credit: AH, SS, WC, WE. Effective: 2017 Fall Quarter.

HIS 115F—History of Modern North Africa, 1800 to the Present (4)
Lecture—3 hours; Term Paper. History of Morocco, Algeria, Tunisia and Libya (the Maghrib), 1800 to the present. Topics include conquest and pacification, reform movements, the rise of nationalism, decolonization, state capitalism, economic liberalization, Islamism, democratization and human rights, the interplay of history and memory. GE credit: AH, SS, WC, WE. Effective: 2011 Fall Quarter.

HIS 116—African History: Special Themes (4)
Lecture—3 hours; Term Paper. Prerequisite(s): HIS 015 recommended. Themes of African history, such as African states and empires, slave trade, relationship of Egypt to rest of Africa, Bantu origins and migrations, and French policy of Assimilation and Association. GE credit: AH, SS, WC, WE. Effective: 2016 Fall Quarter.

HIS 119—World War I (4)
Extensive Writing; Lecture—3 hours. The First World War and the settlement that followed from 1914-1919. Causes, conduct, and consequences of the war including military, political, economic, social, and cultural factors, with special emphasis on connections between the home front and the battlefield. GE credit: SS, WC, WE. Effective: 2016 Spring Quarter.

Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing. Fundamental issues and debates in the study of history. India. Readings, papers, and class reports. May be repeated for credit when a different subject area is studied. Effective: 1997 Winter Quarter.

**HIS 202E—Major Issues in Historical Interpretation; Africa (4)**
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing. Fundamental issues and debates in the study of history. Africa. Readings, papers, and class reports. May be repeated for credit when a different subject area is studied. Effective: 1997 Winter Quarter.

**HIS 202F—Major Issues in Historical Interpretation; China (4)**
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing. Fundamental issues and debates in the study of history. China. Readings, papers, and class reports. May be repeated for credit when a different subject area is studied. Effective: 1997 Winter Quarter.

**HIS 202G—Major Issues in Historical Interpretation; Japan (4)**
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing. Fundamental issues and debates in the study of history. Japan. Readings, papers, and class reports. May be repeated for credit when a different subject area is studied. Effective: 1997 Winter Quarter.

**HIS 202H—Major Issues in Historical Interpretation; United States (4)**
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing. Fundamental issues and debates in the study of history. United States. Readings, papers, and class reports. May be repeated for credit when a different subject area is studied. Effective: 1997 Winter Quarter.

**HIS 202I—Major Issues in Historical Interpretation; Latin America (4)**
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing. Fundamental issues and debates in the study of history. Latin America. Readings, papers, and class reports. May be repeated for credit when a different subject area is studied. Effective: 1997 Winter Quarter.

**HIS 203A—Research Seminar (4)**
Seminar—3 hours; Tutorial—1 hour. Designed for students preparing for higher degrees in history. Individual research and analysis resulting in a substantial research paper of publishable quality. Completion required of all Ph.D. candidates. The three courses must be taken in a continuous sequence, ordinarily during the second year. Effective: 2003 Fall Quarter.

**HIS 203B—Research Seminar (4)**
Seminar—3 hours; Tutorial—1 hour. Prerequisite(s): HIS 203A. Designed for students preparing for higher degrees in history. Individual research and analysis resulting in a substantial research paper of publishable quality. Completion required of all Ph.D. candidates. The three courses must be taken in continuous sequence, ordinarily during the second year. Effective: 2004 Winter Quarter.
HIS 203C—Research Seminar (4)
Seminar—3 hours; Tutorial—1 hour. Prerequisite(s): HIS 203A Designed for students preparing for higher degrees in History. Individual research and analysis resulting in substantial research paper of publishable quality. Completion required of all Ph.D. candidates. The three courses must be taken in continuous sequence, ordinarily during second year. Effective: 2004 Spring Quarter.

HIS 204—Historiography (4)
Seminar—3 hours; Term Paper. Major issues in the philosophy and methodology of history. Effective: 1997 Winter Quarter.

HIS 221—Medieval History (4)
Seminar—3 hours. Prerequisite(s): HIS 121A, HIS 121B, HIS 121C recommended. Topics in the history of medieval and early Renaissance Europe. Effective: 1997 Winter Quarter.

HIS 245—Modern European History (4)
Seminar—3 hours. Prerequisite(s): HIS 201E Primary sources and research methodologies in the history of modern France and Germany. May be repeated once for credit. May be repeated up to 1 time(s). Effective: 1997 Winter Quarter.

HIS 261—Latin American History (4)
Seminar—3 hours. Prerequisite(s): Two courses in Latin American history; reading knowledge of Spanish or Portuguese. Effective: 1997 Winter Quarter.

HIS 271A—United States History (4)
Seminar—3 hours; Term Paper. Prerequisite(s): (HIS 201J, HIS 201K, HIS 201L) or HIS 202H Research in literature, methods, and sources on aspects of United States history, culminating in each student completing a research paper in the field by the end of the second quarter. May be repeated for credit. Effective: 1998 Winter Quarter.

HIS 271B—United States History (4)
Seminar—3 hours; Term Paper. Prerequisite(s): (HIS 201J, HIS 201K, HIS 201L) or HIS 202H Research in literature, methods, and sources on aspects of United States history, culminating in each student completing a research paper in the field by the end of the second quarter. May be repeated for credit. Effective: 1998 Winter Quarter.

HIS 291A—Chinese History (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. Research on topics to be chosen by the students for the purpose of writing article-length papers. May be repeated for credit. May be repeated for credit. Effective: 1997 Winter Quarter.

HIS 291B—Chinese History (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. Completion of article-length papers on topics chosen by students. May be repeated for credit. May be repeated for credit. Effective: 1997 Winter Quarter.

HIS 291C—Methods and Issues in Chinese History (4)
Seminar—2 hours; Tutorial—1 hour. Prerequisite(s): Consent of Instructor. Reading knowledge of Chinese. Readings in Chinese historical materials. Training in the use of Chinese reference works (including on-line resources). May be repeated for credit. Effective: 2007 Fall Quarter.

HIS 292—College Teaching Internship (4)
Internship—4 hours. Prerequisite(s): HIS 300 (may be taken concurrently). Student prepares and teaches one lower division history course in a nearby community college under the supervision of a UC Davis instructor and a community college instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

HIS 298—Group Study (1-5)
Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

HIS 299—Research (1-12)
Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

HIS 299D—Research (1-12)
Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

HIS 389—Introductory Seminar for Teaching Assistants (1)
Seminar—1 hour. Prerequisite(s): HIS 390 (can be concurrent); HIS 390 required concurrently. An introduction to the broad comparative and theoretical issues of teaching methods and techniques in history. (S/U grading only.) Effective: 1997 Winter Quarter.
HIS 390—Teaching History in College (2)
Discussion—2 hours. Designed for teaching assistants with emphasis on problems and procedures encountered by teachers of lower division classes at the university. (S/U grading only.) Effective: 1997 Winter Quarter.

**History & Philosophy of Science Minor; Science & Technology Studies**

**History & Philosophy of Science Minor; Science & Technology Studies | History & Philosophy of Science Minor**

(College of Letters and Science)

Colin Milburn, Ph.D., Program Director

**Advising Office.** 101 Young Hall; stsadvising@ucdavis.edu

**Committee in Charge.** [http://sts.ucdavis.edu/undergraduate/minor](http://sts.ucdavis.edu/undergraduate/minor)

The interdisciplinary minor in the history and philosophy of science invites students to examine historical and contemporary problems in a variety of scientific disciplines, and to explore concepts and procedures basic to science and how they have evolved. The minor is sponsored by the Program in Science and Technology Studies.

**Minor Advisor.** 101 Young Hall, stsadvising@ucdavis.edu.

**Faculty Advisor.** The current Director of STS is also available for advising by appointment.

**History and Philosophy of Science**

**Horticulture & Agronomy (Graduate Group)**

**Horticulture & Agronomy (Graduate Group) | Horticulture & Agronomy Information**

Astrid Volder, Ph.D., Chairperson of the Group

**Group Office.** 1224 Plant and Environmental Sciences Building; 530-752-7738; [http://ggha.ucdavis.edu](http://ggha.ucdavis.edu)
Horticulture & Agronomy (Graduate Group) | Horticulture & Agronomy M.S.

Astrid Volder, Ph.D., Chairperson of the Group

Group Office. 1224 Plant and Environmental Sciences Building; 530-752-7738; http://ggha.ucdavis.edu

Faculty. http://ggha.ucdavis.edu/GGHAfaculty.htm

Graduate Study. The Graduate Group in Horticulture and Agronomy offers programs of study leading to the M.S. and Ph.D. degrees for students interested in the science and management of agricultural crops, including their ecology, physiology, genetics, and post-harvest management, as well as the interaction of agricultural crops with the environment. The M.S. program is designed to focus on a cropping system, such as agronomy, environmental horticulture, pomology, vegetable crops, viticulture and weed science. Within that cropping system, the student can specialize in one of a number of areas, including agroecology, biotechnology, breeding and crop improvement, crop physiology, crop production, floriculture, landscape horticulture, mineral nutrition, modeling, nursery production, pest management, plant growth and development, postharvest physiology, revegetation/restoration, and water relations. Research may be conducted within these areas with an applied or basic focus, but in association with a cropping system.

Preparation. For both the M.S. and Ph.D. programs, a level of competence equivalent to that of a sound undergraduate program in Plant Science is required. This includes coursework in general biology, chemistry, organic chemistry, physics, statistics, genetics, plant physiology, and soil science. A few limited deficiencies in any of these areas can be made up after admission to the graduate program. Specific requirements are outlined in detail on the group's website. The graduate advisor, the major professor, and the student will design a program of advanced courses to meet individual academic needs within one of the specializations.

Graduate Advisors. Consult the Group office.

Horticulture & Agronomy (Graduate Group) | Horticulture & Agronomy Ph.D.

Astrid Volder, Ph.D., Chairperson of the Group

Group Office. 1224 Plant and Environmental Sciences Building; 530-752-7738; http://ggha.ucdavis.edu

Faculty. http://ggha.ucdavis.edu/GGHAfaculty.htm

Graduate Study. The Graduate Group in Horticulture and Agronomy offers programs of study leading to the M.S. and Ph.D. degrees for students interested in the science and management of agricultural crops, including their ecology, physiology, genetics, and post-harvest management, as well as the interaction of agricultural crops with the environment. In the Ph.D. program, students focus on one of five areas of emphasis: agroecology, crop improvement/plant breeding, crop production systems, plant physiology, and post-harvest biology/physiology. Research may be conducted within these areas with an applied or basic focus, but in association with a cropping system such as agronomy, environmental horticulture, pomology, vegetable crops, viticulture and weed science.

Preparation. For both the M.S. and Ph.D. programs, a level of competence equivalent to that of a sound undergraduate program in Plant Science is required. This includes coursework in general biology, chemistry, organic chemistry, physics, statistics, genetics, plant physiology, and soil science. A few limited deficiencies in any of these areas can be made up after admission to the graduate program. Specific requirements are outlined in detail on the group's website. The graduate advisor, the major professor, and the student will design a program of advanced courses to meet individual academic needs within one of the specializations.

Graduate Advisors. Consult the Group office.

Horticulture & Agronomy (Graduate Group) | HRT Courses

Courses in HRT:

HRT 200A—Horticulture & Agronomy: Principles (4)
Lecture/Discussion—4 hours. Prerequisite(s): Graduate standing. Core course to introduce students to the
principles that are of general importance in horticultural and agronomic research, including agroecology, plant
developmental physiology, crop improvement, and biotechnology. Generally taken in the first year of the graduate
program. Effective: 2016 Winter Quarter.

**HRT 200B—Horticulture & Agronomy: Practices (4)**
Fieldwork—3 hours; Lecture/Discussion—2 hours; Seminar—3 hours. Prerequisite(s): HRT 200A recommended;
graduate standing. Introduction to horticultural and agronomic cropping systems. Covers current applied research
within agroecology, crop improvement, crop production, postharvest biology. Effective: 2016 Spring Quarter.

**HRT 203—Research Perspectives in Horticulture (3)**
Lecture—1 hour; Lecture/Discussion—2 hours. Prerequisite(s): Graduate standing. Following lectures/discussions of
scientific methodology, students develop research proposals aided by classroom discussions and individual
interactions with instructors. Lectures and critiques of classical papers provide a sense of the evolution of the

**HRT 251—Modeling Horticultural Systems (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): PLS 142; or Consent of Instructor. Calculus. Development
and application of models. Emphasis on physiological and ecological models, with examples from areas of interest
to class participants. Applications to horticultural systems. Effective: 2008 Fall Quarter.

**HRT 290—Seminar (1)**
Seminar—1 hour. Prerequisite(s): Graduate standing at UCD. Seminars presented by invited speakers, students, or
faculty on selected topics in horticulture. (S/U grading only.) Effective: 1997 Winter Quarter.

**HRT 298—Group Study (1-5)**
Variable. May be repeated for credit. Effective: 2007 Fall Quarter.

**HRT 299—Research (1-12)**
Variable—3-36 hours. Prerequisite(s): Consent of Instructor. Research. May be repeated for credit. (S/U grading
only.) Effective: 2016 Winter Quarter.

**Human Development**

**Human Development | HDE Information**
(College of Agricultural and Environmental Sciences)

**Advising Office.** 1303 Hart Hall; 530-752-1805, 530-752-2244, 530-752-9322; [http://hcd.ucdavis.edu](http://hcd.ucdavis.edu)

**Faculty.** [http://humanecology.ucdavis.edu/hdfs-faculty](http://humanecology.ucdavis.edu/hdfs-faculty)

**Human Development | HDE B.S.**
(College of Agricultural and Environmental Sciences)

**Advising Office.** 1303 Hart Hall; 530-752-1805, 530-752-2244, 530-752-9322; [http://hcd.ucdavis.edu](http://hcd.ucdavis.edu)

**Faculty.** [http://humanecology.ucdavis.edu/hdfs-faculty](http://humanecology.ucdavis.edu/hdfs-faculty)

**The Major Program**

Human development explores the developmental process in humans throughout the life cycle. Biological,
cognitive, and personality/sociocultural aspects of development are studied.

**The Program.** Human development majors complete a group of preparatory courses in anthropology, general
biology, genetics, history, philosophy, physiology, psychology, and statistics. Upper division students can design
their programs in consultation with a faculty member to emphasize a particular interest. For instance, students can
study the cognitive, social, and biological aspects of human development while emphasizing child or adult
development.

**Internships and Career Alternatives.** At least one practicum course is required. A second practicum or supervised
internship can be used to fulfill the restricted elective requirement for the major. In addition, students can intern in
schools, early childhood education or senior centers, hospitals, rehabilitation centers, probation offices, group
foster homes, mental health clinics, or as tutors for handicapped or bilingual students. Human development
Preparatory Subject Matter Units: 39-49

Choose two:
- **ANT 001 Human Evolutionary Biology** 4
- **ANT 001Y Human Evolutionary Biology (Hybrid Version)** 4
- **ANT 002 Cultural Anthropology** 5
- **ANT 015 From Birth to Death: The Evolution of the Human Life Cycle** 5

Choose one:
- **BIS 002A Introduction to Biology: Essentials of Life on Earth** 5
- **BIS 010 Everyday Biology** 4
- **MIC 010 Natural History of Infectious Diseases** 3
- **NPB 012 The Human Brain and Disease** 3

Choose one:
- **MCB 010 Introduction to Human Heredity** 4
- **BIS 101 Genes and Gene Expression** 4

Biological Sciences 101 cannot be used to satisfy both the Preparatory Subject Matter and the Depth Subject Matter Requirements.

Choose one:
- **HIS 017A History of the United States** 4
- **HIS 017B History of the United States** 4
- **HIS 072A Women and Gender in America, to 1865** 4
- **HIS 072B Women and Gender in America, 1865-Present** 4
- **POL 001 American National Government** 4

Choose two:
- **PHI 005 Critical Reasoning** 4
- **PHI 015 Introduction to Bioethics** 4
- **PHI 030 Introduction to Philosophy of Science** 4
- **PHI 031 Appraising Scientific Reasoning** 4
- **PHI 032 Understanding Scientific Change** 4
- **PHI 038 Introduction to Philosophy of Biology** 4

Choose one:
- **PSC 001**
  - Choose one: STA 010, 013, 013V; PSC 041; SOC 046A, 046B
  - Choose one: ANT 001, 002, 015
  - Choose one: BIS 002A, 010, 010V; MIC 010; MCB 010; NPB 010, 012, 101

Students must have achieved a 2.000 GPA in any required upper-division courses taken prior to declaring the major.

All courses satisfying the Preparatory Subject Matter, Depth Subject Matter, Restricted Electives and English requirement must be taken for a letter grade.

**Major Advisor.** Leah Hibel

**Graduate Study.** Graduate study is available through a Master of Science degree in child development, and a Ph.D. degree in human development. See also Graduate Studies.
NPB 010 Elementary Human Physiology 3
NPB 101 Systemic Physiology 5
PSC 101 Introduction to Biological Psychology 4
PSC 001 General Psychology 4

Choose one: 4-9
PSC 041 Research Methods in Psychology 4
STA 010 Statistical Thinking 4
STA 013 Elementary Statistics 4
OR
SOC 046A Introduction to Social Research 4
SOC 046B Introduction to Social Research 5

Depth Subject Matter Units: 50-54

Life Span:
HDE 100A Infancy and Early Childhood 4
HDE 100B Middle Childhood and Adolescence 4
HDE 100C Adulthood and Aging 4

Research Methods:
HDE 120 Research Methods in Human Development 4

Biological Processes:
Choose one:
BIS 101 Genes and Gene Expression 4
HDE 117 Longevity 4
NUT 111AY Introduction to Nutrition and Metabolism 3
PSC 121 Physiological Psychology 4

Social-Cultural Processes:
Choose one:
HDE 102 Social and Personality Development 4
HDE 110 Contemporary American Family 4
HDE 130 Developmental Psychopathology 4
HDE 160 Social Aspects of Aging 4

Cognitive Processes:
Choose one:
HDE 101 Cognitive Development 4
HDE 103 Cross-Cultural Study of Children 4
HDE 132 Individual Differences in Cognition 4
HDE 161 Applied Cognition and Aging 4
HDE 163 Cognitive Neuropsychology in Adulthood and Aging 4

Practicum: 4-6
Choose one:
HDE 140 Communication and Interaction with Young Children 2
AND
HDE 140L Laboratory in Early Childhood 3-5
HDE 141 Field Study With Children and Adolescents 4-6
HDE 142 Field Study with Emotionally Distressed Children and Adolescents 4-6
HDE 143 Field Studies of the Elderly 4-6

Restricted Electives 19-20
Choose five additional upper division courses (19-20 units) chosen from among Human Development courses or from a list of restricted electives in consultation with faculty advisor; may include only one practicum course. Choose at least one of the courses from the Depth Subject groups or Restricted Electives listed above must focus on childhood/adolescence (HDE 101, 102, 103, 110, 130, 132) and one on adulthood/aging (HDE 117, 143, 160, 161, 163).

**English Composition Requirement**

Units: 12

Choose three courses in English Composition:

- **ENL 003** Introduction to Literature  4
- **UWP 001** Introduction to Academic Literacies  4
- **UWP 018** Style in the Essay *(Discontinued)*  4
- **UWP 019** Writing Research Papers *(Discontinued)*  4
- **UWP 101** Advanced Composition  4
- **UWP 102A** Writing in the Disciplines: Special Topics  4
- **UWP 102B** Writing in the Disciplines: Biology  4
- **UWP 102C** Writing in the Disciplines: History  4
- **UWP 102D** Writing in the Disciplines: International Relations  4
- **UWP 102E** Writing in the Disciplines: Engineering  4
- **UWP 102F** Writing in the Disciplines: Food Science and Technology  4
- **UWP 102G** Writing in the Disciplines: Environmental Writing  4
- **UWP 102H** Writing in the Disciplines: Human Development and Psychology  4
- **UWP 102J** Writing in the Disciplines: Fine Arts  4
- **UWP 102K** Writing in the Disciplines: Sociology  4
- **UWP 102L** Writing in the Disciplines: Film Studies  4
- **UWP 104A** Writing in the Professions: Business Writing  4
- **UWP 104B** Writing in the Professions: Law  4
- **UWP 104C** Writing in the Professions: Journalism  4
- **UWP 104D** Writing in the Professions: Elementary and Secondary Education  4
- **UWP 104E** Writing in the Professions: Science  4
- **UWP 104F** Writing in the Professions: Health  4
- **UWP 104I** Writing in the Professions: Internships  4
- **CMN 001** Introduction to Public Speaking  4
- **COM 001** Major Works of the Ancient World  4
- **COM 002** Major Works of the Medieval and Early Modern World  4
- **COM 003** Major Works of the Modern World  4
- **COM 004** Major Works of the Contemporary World  4
- **NAS 005** Introduction to Native American Literature  4

At least one must be from UWP 101, 102A-H, 104A-F. The Upper Division Composition Exam does not satisfy the requirement. Advanced Placement English score of 4 or 5 which satisfies ENL 003 and/or UWP 001 will satisfy one of the three required courses.

**Total: 93-107**

**Human Development | HDE Minor**

(College of Agricultural and Environmental Sciences)

**Advising Office.** 1303 Hart Hall; 530-752-2244, 530-752-1805; [http://hcd.ucdavis.edu](http://hcd.ucdavis.edu)

**Faculty.** [http://humanecology.ucdavis.edu/hdfs-faculty/](http://humanecology.ucdavis.edu/hdfs-faculty/)

The Department of Human and Community Development offers two minors: Aging and Adult Development & Human Development.
Human Development || HDE Courses

Courses in HDE:

**HDE 012—Human Sexuality (3)**
Lecture—3 hours. Vocabulary, structure/function of reproductive system; sexual response; pre-natal development; pregnancy and childbirth; development of sexuality; rape and sexual assault; birth control; sexually transmitted diseases; homosexuality; establishing/maintaining intimacy; sexual dysfunctions; communication; enhancing sexual interaction, cultural differences in attitudes towards sexuality. GE credit: ACGH, DD, SS. Effective: 2012 Fall Quarter.

**HDE 092—Internship (1-12)**
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Field work experience or at least one course (e.g. HDE 100A, HDE 100B, HDE 140 or HDE 140L) related to fieldwork assignment. Supervised internship, off campus and on campus, in community and institutional setting. May be repeated up to 12 unit(s) involves progressively greater (supervised) participation in program delivery or assessment. (P/NP grading only.) Effective: 2012 Fall Quarter.

**HDE 098—Directed Group Study for Undergraduates (1-5)**
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 2012 Fall Quarter.

**HDE 099—Special Study for Undergraduates (1-5)**
Variable. (P/NP grading only.) Effective: 2012 Fall Quarter.

**HDE 100A—Infancy and Early Childhood (4)**
Lecture—4 hours. Prerequisite(s): (PSC 001 or PSC 001Y); (BIS 002A or BIS 010 or BIS 001A or BIS 010V) or MCB 010 or NPB 010 or NPB 012 or MIC 010 Pass One restricted to Human Development majors. Biological, social, and cultural influences in the psychological growth and development of children, prenatal through age six. Two observations of preschool children required. Effective: 2018 Winter Quarter.

**HDE 100B—Middle Childhood and Adolescence (4)**
Lecture—4 hours. Prerequisite(s): (HDE 100A or PSC 140); (PSC 001 or PSC 001Y) Interplay of biological and social-cultural factors in the emotional, cognitive and social development from middle childhood through adolescence. Effective: 2018 Winter Quarter.

**HDE 100C—Adulthood and Aging (4)**
Lecture—4 hours. Prerequisite(s): PSC 001 or PSC 001Y Development during early, middle, and late adulthood; biological, cognitive, and psycho-social aspects of adult development. Emphasis on normative patterns of development which characterize "successful aging." Effective: 2018 Spring Quarter.

**HDE 101—Cognitive Development (4)**
Lecture—3 hours; Term Paper—1 hour. Prerequisite(s): HDE 100A or HDE 100B or PSC 140 Pass One restricted to Human Development and Psychology majors. Theories, methods, evidence, and debates in the field of cognitive
development, such as nature/nurture, constraints on learning, and the role of plasticity. Topics include attention, memory, concepts about the physical and social world, and language. (Same course as PSC 141.) GE credit: WE. Effective: 2012 Fall Quarter.

HDE 102—Social and Personality Development (4)
Lecture—3 hours; Term Paper—1 hour. Prerequisite(s): HDE 100A or HDE 100B or PSC 140 Pass One open to Human Development or Psychology majors. Social and personality development of children, infancy through adolescence. Topics include the development of personality, achievement motivation, self-understanding, sex-role identity, and antisocial behavior. Emphasis on the interface between biological and social factors. (Same course as PSC 142.) GE credit: SS, WE. Effective: 2012 Fall Quarter.

HDE 103—Cross-Cultural Study of Children (4)
Lecture—4 hours. Prerequisite(s): HDE 100A or PSC 140; Consent of Instructor. Cross-cultural studies of children in developing countries and among minority groups in the U.S. GE credit: ACGH, DD, SS, WC. Effective: 2016 Fall Quarter.

HDE 110—Contemporary American Family (4)
Lecture—4 hours. Prerequisite(s): HDE 100A or PSC 100A or PSC 100B or SOC 100A or SOC 100B Factors currently influencing American families including changing economic conditions, changing sex roles, divorce, and parenthood; theories and research on family interaction. Effective: 2018 Winter Quarter.

HDE 117—Longevity (4)
Lecture—3 hours; Term Paper—1 hour. Prerequisite(s): Upper division standing or consent of instructor. Nature, origin, determinants, and limits of longevity with particular reference to humans; emphasis on implications of findings from non-human model systems including natural history, ecology and evolution of life span; description of basic demographic techniques including life table methods. (Same course as ENT 117.) GE credit: SE, SL, WE. Effective: 2012 Fall Quarter.

HDE 120—Research Methods in Human Development (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): STA 013 or STA 013V or STA 013Y or EDU 114 or PSC 041 or (SOC 046A, SOC 046B) Scientific process, research designs, and experimental controls; APA manuscript style and scientific writing; statistical analysis and interpretation of results. Laboratory exercises to collect data, analyze and interpret results, and write scientific papers. GE credit: SS, WE. Effective: 2018 Winter Quarter.

HDE 121—Psychological Assessment (4)
Lecture—4 hours. Prerequisite(s): (HDE 100A or HDE 100B); (STA 013 or STA 013Y or PSC 041 or (SOC 046A, SOC 046B)) Current issues and methodology related to the process of psychological assessment with children. Effective: 2018 Spring Quarter.

HDE 130—Developmental Psychopathology (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (HDE 100A, HDE 100B) or PSC 140; Consent of Instructor. Foundational principles and current issues in developmental psychopathology, the study of mental health problems and disorders that originate in childhood and adolescence (e.g., disruptive behavior, mood and anxiety disorders). Effective: 2018 Winter Quarter.

HDE 132—Individual Differences in Cognition (4)
Lecture—4 hours. Prerequisite(s): (PSC 101 or PSC 101Y); (HDE 100A or HDE 100B) Individual differences in cognition, including learning disabilities and giftedness. Education implications and neurodevelopmental substrates of individual differences in cognition. Effective: 2018 Spring Quarter.

HDE 140—Communication and Interaction with Young Children (2)
Lecture—2 hours. Prerequisite(s): HDE 100A; HDE 140L (can be concurrent); and Consent of Instructor. HDE 140L required concurrently. Enrollment requires sign up for laboratory time at the Child and Family Studies Center located at 244 First Street, Davis, CA. Integration of research, theory and practice in child development, emphasizing the role of relationships in creating a growth-promoting environment for young children. Includes: peer relationships, emotional understanding and self regulation, attachment, communication and school readiness. Effective: 2012 Fall Quarter.

HDE 140L—Laboratory in Early Childhood (3-5)
Discussion/Laboratory—3 hours; Laboratory—6-15 hours. Prerequisite(s): HDE 140 (can be concurrent); and Consent of Instructor. HDE 140 must be taken concurrently for first 3 units of credit; students must contact the Center for Child and Family Studies to enroll. Limited enrollment. Application of theories of learning and development to
interaction with infants, toddlers, and preschoolers at Early Childhood Laboratory. Applied skills in communication, guidance and curriculum. May be repeated up to 2 time(s). (P/NP grading only.) Effective: 2012 Fall Quarter.

HDE 141—Field Study With Children and Adolescents (4-6)
Fieldwork—6-12 hours; Lecture—2 hours. Prerequisite(s): HDE 100A or HDE 100B; and Consent of Instructor. Study of children's affective, cognitive and social development within the context of family/school environments, hospitals and foster group homes. May be repeated up to 12 unit(s). Effective: 2012 Fall Quarter.

HDE 142—Field Study with Emotionally Distressed Children and Adolescents (4-6)
Discussion—1.5 hours; Fieldwork—6-12 hours. Prerequisite(s): HDE 130 (can be concurrent); and Consent of Instructor. Field study with children who are identified as emotionally distressed, including those with internalizing and externalizing behavioral problems. May be repeated up to 12 unit(s). Effective: 2012 Fall Quarter.

HDE 143—Field Studies of the Elderly (4-6)
Discussion—2 hours; Fieldwork—6-12 hours; Variable. Prerequisite(s): HDE 100C or HDE 160 (can be concurrent); and Consent of Instructor. Apply theory and research on adult development and aging, work with older adults in a variety of settings, and develop skills relevant to that application. Develop a small research project. Effective: 2016 Fall Quarter.

HDE 160—Social Aspects of Aging (4)
Lecture—4 hours. Prerequisite(s): HDE 100C How the social context affects adult development and aging. Emphasis on demography, social policy, culture, and adaptation. Oral histories as class projects. Effective: 2016 Fall Quarter.

HDE 161—Applied Cognition and Aging (4)
Lecture/Discussion—4 hours. Prerequisite(s): (PSC 001 or PSC 001Y); HDE 100C Principles from cognition and aging and applies these to real-world concerns in areas including education, technology, job performance, and health. Considers physical and social changes in later life that impact functioning. GE credit: SS, WE. Effective: 2018 Spring Quarter.

HDE 163—Cognitive Neuropsychology in Adulthood and Aging (4)
Lecture/Discussion—4 hours. Prerequisite(s): (PSC 001 or PSC 001Y); HDE 100C recommended. Theories, methods, and findings concerning the relationship between cognitive processes and brain functioning. Readings, lectures, and in-class discussions cover research on normal younger and older adults, neuropsychological case studies, and selected patient groups (e.g., amnesia, schizophrenia, Alzheimer's disease). Effective: 2018 Spring Quarter.

HDE 190C—Introductory Research Conference (1)
Discussion—1 hour. Prerequisite(s): Involvement in ongoing research; consent of instructor. Instructors lead discussions with undergraduate students who involve themselves in a research project. Research papers are reviewed and aspects of project proposals developed out of class are presented and evaluated. May be repeated for credit. May be repeated for credit. (P/NP grading only.) Effective: 2016 Fall Quarter.

HDE 192—Internship (1-12)
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Upper division standing. Supervised internship off and on campus, in community, and institutional settings. (P/NP grading only.) Effective: 2012 Fall Quarter.

HDE 198—Directed Group Study (1-5)
Variable. (P/NP grading only.) Effective: 2012 Fall Quarter.

HDE 199—Special Study for Advanced Undergraduates (1-5)
Variable. (P/NP grading only.) Effective: 2012 Fall Quarter.

HDE 200A—Early Development (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Graduate standing; basic biology or physiology; one upper division course in psychology or a related field; one upper division or graduate course in developmental psychology (can be concurrent). Theory and research on the biological, social, cognitive, and cultural aspects of development from conception to the age of five years. Effective: 2012 Fall Quarter.

HDE 200B—Middle Childhood and Adolescence (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Graduate standing; basic biology or physiology, and at least two upper division or graduate level courses in psychology or related fields. Theory and research on biological, cognitive, social, and cultural influences on behavioral development from age five years until late adolescence. Effective: 2012 Fall Quarter.

HDE 200C—Development in Adulthood (4)
Lecture/Discussion—4 hours. Theory and research focusing on social, personality, cognitive, and biological
development from early to late adulthood. Emphasis is on theory development and continuity and change.
Effective: 2016 Fall Quarter.

HDE 203—Adolescent Behavioral and Emotional Development (4)
Lecture/Discussion—4 hours. Prerequisite(s): HDE 200B Analysis of recent theories, research methods, and major findings on adolescent behavioral and emotional development, including contextual and genetic influences on adolescence, pubertal transitions, and social/family contexts and processes. Emphasis on multi-level mechanisms underlying adolescent behavioral and emotional development. Effective: 2012 Fall Quarter.

HDE 204—Developmental Neuroscience and Adolescent Psychopathology (4)
Lecture—4 hours. Prerequisite(s): Graduate standing in Human Development, Psychology, Education, Neuroscience or consent of instructor. Introduction to human developmental neuroscience. Understanding of adolescence and its characterization as a time of risky and unhealthy behavior and vulnerability to onset of mental disorder as well as issues around plasticity of the adolescent brain and prevention/intervention. Effective: 2012 Fall Quarter.

HDE 205—Path Analysis, Factor Analysis, and Structural Equation Modeling (4) Review all entries
Lecture—4 hours. Prerequisite(s): PSC 204B; Or equivalent graduate courses in statistics or consent of instructor; familiarity with multiple regression and the basics of matrix algebra. Graduate standing in Human Development Graduate Group, Psychology, Sociology, Education, or a related social science. Introduction of basic concepts, principles, and applications of structural equation modeling including path analysis, confirmatory factor analysis, multiple-group modeling, and latent growth curve modeling. Effective: 2012 Fall Quarter.

HDE 205—Longitudinal Data Analysis (4) Review all entries
Lecture—3 hours; Term Paper. Prerequisite(s): PSC 204B; Or equivalent graduate courses in statistics or consent of instructor; familiarity with multiple regression and the basics of matrix algebra. Open to graduate students only. Introduction to longitudinal data manipulation, organization, description, and modeling in the multilevel modeling and structural equation modeling frameworks. Effective: 2019 Spring Quarter.

HDE 207—Topics in Applied Cognitive Aging (4)
Lecture/Discussion—4 hours. Prerequisite(s): Graduate standing in Human Development Graduate Group, Psychology, Education, or a related social science, or consent of instructor. Apply principles from cognitive aging to real-world concerns in areas such as education, technology, job performance, and health. Examine how physical and social changes occurring in later life impact functioning. Effective: 2012 Fall Quarter.

HDE 210—Theories of Behavioral Development (3)
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): Graduate standing in behavioral sciences. Consideration of enduring issues in theories of behavioral development; analysis of adequacy of major theoretical schools (e.g., social learning, Piagetian) as scientific theories. Effective: 2012 Fall Quarter.

HDE 211—Physiological Correlates of Behavioral Development (4)
Seminar—4 hours. Prerequisite(s): Consent of Instructor. An overview of mechanisms of organismic development and the implications of developmental biology for the analysis of behavioral ontogeny; consideration of parallels between processes of organismic development and behavioral development in children and infra-human mammals. Effective: 2012 Fall Quarter.

HDE 220—Research Methods in Human Growth and Development (4)
Lecture—4 hours. Prerequisite(s): STA 013 or STA 013Y; Or the equivalent and at least two upper division courses in Human Biology or Developmental Psychology. Overview of qualitative and quantitative approaches to empirical inquiry in the social sciences, with a focus on theory and research methods in biological growth and cognitive and social/emotional development from prenatal period to death. Effective: 2018 Winter Quarter.

HDE 232—Cognition and Aging (3)
Lecture/Discussion—3 hours. Prerequisite(s): HDE 200C The manner in which cognitive processes are affected by aging as well as an understanding of the changes in the central nervous system occurring with aging. Effective: 2012 Fall Quarter.

HDE 234—Children's Learning and Thinking (3)
Seminar—3 hours. Prerequisite(s): HDE 200A or PSC 212 recommended. Analysis of theories, research methods, and major findings of children's higher-order cognition, including origins of knowledge, development of problem-solving skills, reasoning strategies, and scientific concepts, with an emphasis on the underlying mechanism involved in children's thinking and learning processes. Effective: 2012 Fall Quarter.

HDE 238—The Context of Individual Development (3)
Lecture/Discussion—3 hours. Prerequisite(s): Graduate standing in Human Development, Child Development,
Education, Psychology, Anthropology, Sociology, or consent of instructor. Analysis of human development within the context of daily life. Contextualizing theories and methods of developmental psychology will be distinguished from contextual theories and methods. Developmental psychology models will be distinguished from child psychology models. Effective: 2012 Fall Quarter.

**HDE 239—Developmental Trajectories in Typical and Atypical Children; Birth to Five (4)**

Discussion/Laboratory—3 hours; Term Paper. Prerequisite(s): Graduate standing in Human Development, Psychology, Sociology, a related social science, or permission of the instructor. Discuss theories of development in typical and atypical children from birth to five from a socio-cultural perspective including parent-child interaction, peer interactions, cultural contexts of learning, as well as theoretical and empirical issues for understanding continuities and discontinuities in development. Effective: 2012 Fall Quarter.

**HDE 239—Developmental Psychopathology (4)**

Discussion/Laboratory—3 hours; Term Paper. Prerequisite(s): Graduate standing in Human Development, Psychology, Sociology, a related social science, or consent of instructor. Theories, current issues, and empirical studies of atypical development from infancy to adulthood that integrate multiple system levels from genes, neurobiology, cognition, emotion, family and peer dynamics to community and cultural contexts. Effective: 2019 Winter Quarter.

**HDE 240—Peer Relationships during Adolescence (4)**

Lecture/Discussion—4 hours. Graduate standing in Human Development, Psychology, Education, or consent of instructor. Course examines the role of peer relationships in adolescent development including forms and functions at the individual, dyadic and group levels. Ethnicity and cross cultural research will be discussed. Emphasis on methodology, including surveys, peer nominations/sociometrics, experimental, and observational designs. Effective: 2012 Fall Quarter.

**HDE 250—Current Research on Family Relationships (4)**

Discussion/Laboratory—3 hours; Term Paper. Graduate standing in Human Development Graduate Group, Psychology, Sociology, a related social science, or consent of instructor. Discussion of theories, methods, and current research on the nature and development of sibling, romantic, and parent-child relationships across the lifespan. Emphasis on interpersonal and family processes examined in ethnic/cultural contexts. Implications for individual development will be addressed. Effective: 2012 Fall Quarter.

**HDE 252—Family Research, Programs and Policy (4)**

Seminar—3 hours; Term Paper. Graduate standing in Human Development, Psychology, Sociology, related social sciences, or consent of instructor. Course examines the competing interests of research, policy, and service on current issues of family functioning and individual well being. The course considers communication barriers between researchers, practitioners, and policy makers. Effective: 2012 Fall Quarter.

**HDE 290—Seminar (3)**

Seminar—3 hours. Discussion and evaluation of theories, research, and issues in human development. Different topics each quarter. Effective: 2012 Fall Quarter.

**HDE 290C—Research Conference (1)**

Discussion—1 hour. Prerequisite(s): Consent of Instructor. Graduate standing. Supervising instructors lead research discussions with their graduate students. Research papers are reviewed and project proposals are presented and evaluated. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 2012 Fall Quarter.

**HDE 291—Research Issues in Human Development (4)**

Seminar—4 hours. Prerequisite(s): Graduate Standing in the behavioral sciences. In-depth presentations of research issues in particular areas of behavioral development. May be repeated for credit. Effective: 2012 Fall Quarter.

**HDE 292—Graduate Internship (1-12)**

Internship—3-36 hours. Prerequisite(s): Consent of faculty (internship sponsor) and satisfactory completion of placement relevant course work, for example: EDU 213, EDU 216; HDE 222, HDE 242; LAW 272, LAW 273. Individually designed supervised internship, off campus, in community or institutional setting. Developed with advice of faculty mentor. May be repeated up to 12 unit(s) justified skill acquisition and promise of informing evaluation research. (S/U grading only.) Effective: 2012 Fall Quarter.

**HDE 298—Group Study (1-5)**

Variable. Effective: 2012 Fall Quarter.

**HDE 299—Human Development (1-12)**

Variable. (S/U grading only.) Effective: 2012 Fall Quarter.
HDE 396—Teaching Assistant Training Practicum (1-4)
Variable. Prerequisite(s): Graduate standing. May be repeated for credit. (P/NP grading only.) Effective: 2012 Fall Quarter.

Human Development (Graduate Group)

Human Development (Graduate Group) | HDE Ph.D.

Amanda E. Guyer, Ph.D., Group Chairperson

Group Office. 1315 Hart Hall; 530-754-4109; http://humandevelopment.ucdavis.edu

Faculty. http://humanecology.ucdavis.edu/hdfs-faculty

Graduate Study. The interdisciplinary and interdepartmental Graduate Group in Human Development offers a program of study leading to the Ph.D. degree. The program provides lifespan study of human behavioral development, with a balance of emphasis on biological, cognitive, and socio-emotional development in context. Recipients of the degree will be prepared to teach, to conduct research, and to be actively involved in public service in human behavioral development.

Applicants seeking admissions and fellowships consideration must submit all materials by our priority December 15 deadline. The final admissions deadline is March 1. For more details, see our website.

Graduate Advisor. Contact the Group office.

Human Development (Graduate Group) | HDE Courses

Courses in HDE:

HDE 012—Human Sexuality (3)
Lecture—3 hours. Vocabulary, structure/function of reproductive system; sexual response; pre-natal development; pregnancy and childbirth; development of sexuality; rape and sexual assault; birth control; sexually transmitted diseases; homosexuality; establishing/maintaining intimacy; sexual dysfunctions; communication; enhancing sexual interaction, cultural differences in attitudes towards sexuality. GE credit: ACGH, DD, SS. Effective: 2012 Fall Quarter.

HDE 092—Internship (1-12)
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Field work experience or at least one course (e.g. HDE 100A, HDE 100B, HDE 140 or HDE 140L) related to fieldwork assignment. Supervised internship, off campus and on campus, in community and institutional setting. May be repeated up to 12 unit(s) involves progressively greater (supervised) participation in program delivery or assessment. (P/NP grading only.) Effective: 2012 Fall Quarter.

HDE 098—Directed Group Study for Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 2012 Fall Quarter.

HDE 099—Special Study for Undergraduates (1-5)
Variable. (P/NP grading only.) Effective: 2012 Fall Quarter.

HDE 100A—Infancy and Early Childhood (4)
Lecture—4 hours. Prerequisite(s): (PSC 001 or PSC 001Y); (BIS 002A or BIS 010 or BIS 001A or BIS 010V) or MCB 010 or NPB 010 or NPB 012 or MIC 010 Pass One restricted to Human Development majors. Biological, social, and cultural influences in the psychological growth and development of children, prenatal through age six. Two observations of preschool children required. Effective: 2018 Winter Quarter.

HDE 100B—Middle Childhood and Adolescence (4)
Lecture—4 hours. Prerequisite(s): (HDE 100A or PSC 140); (PSC 001 or PSC 001Y) Interplay of biological and social-cultural factors in the emotional, cognitive and social development from middle childhood through adolescence. Effective: 2018 Winter Quarter.

HDE 100C—Adulthood and Aging (4)
Lecture—4 hours. Prerequisite(s): PSC 001 or PSC 001Y Development during early, middle, and late adulthood; biological, cognitive, and psycho-social aspects of adult development. Emphasis on normative patterns of development which characterize "successful aging." Effective: 2018 Spring Quarter.

HDE 101—Cognitive Development (4)
Lecture—3 hours; Term Paper—1 hour. Prerequisite(s): HDE 100A or HDE 100B or PSC 140 Pass One restricted to
Human Development and Psychology majors. Theories, methods, evidence, and debates in the field of cognitive development, such as nature/nurture, constraints on learning, and the role of plasticity. Topics include attention, memory, concepts about the physical and social world, and language. (Same course as PSC 141.) GE credit: WE. Effective: 2012 Fall Quarter.

**HDE 102—Social and Personality Development (4)**
Lecture—3 hours; Term Paper—1 hour. Prerequisite(s): HDE 100A or HDE 100B or PSC 140 Pass One open to Human Development or Psychology majors. Social and personality development of children, infancy through adolescence. Topics include the development of personality, achievement motivation, self-understanding, sex-role identity, and antisocial behavior. Emphasis on the interface between biological and social factors. (Same course as PSC 142.) GE credit: SS, WE. Effective: 2012 Fall Quarter.

**HDE 103—Cross-Cultural Study of Children (4)**
Lecture—4 hours. Prerequisite(s): HDE 100A or PSC 140; Consent of Instructor. Cross-cultural studies of children in developing countries and among minority groups in the U.S. GE credit: ACGH, DD, SS, WC. Effective: 2016 Fall Quarter.

**HDE 110—Contemporary American Family (4)**
Lecture—4 hours. Prerequisite(s): HDE 100A or PSC 001 or SOC 001 or SOC 002 Factors currently influencing American families including changing economic conditions, changing sex roles, divorce, and parenthood; theories and research on family interaction. Effective: 2018 Winter Quarter.

**HDE 117—Longevity (4)**
Lecture—3 hours; Term Paper—1 hour. Prerequisite(s): Upper division standing or consent of instructor. Nature, origin, determinants, and limits of longevity with particular reference to humans; emphasis on implications of findings from non-human model systems including natural history, ecology and evolution of life span; description of basic demographic techniques including life table methods. (Same course as ENT 117.) GE credit: SE, SL, WE. Effective: 2012 Fall Quarter.

**HDE 120—Research Methods in Human Development (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): STA 013 or STA 013V or STA 013Y or EDU 114 or PSC 041 or (SOC 046A, SOC 046B) Scientific process, research designs, and experimental controls; APA manuscript style and scientific writing; statistical analysis and interpretation of results. Laboratory exercises to collect data, analyze and interpret results, and write scientific papers. GE credit: SS, WE. Effective: 2018 Winter Quarter.

**HDE 121—Psychological Assessment (4)**
Lecture—4 hours. Prerequisite(s): (HDE 100A or HDE 100B); (STA 013 or STA 013Y or PSC 041 or (SOC 046A, SOC 046B)) Current issues and methodology related to the process of psychological assessment with children. Effective: 2018 Spring Quarter.

**HDE 130—Developmental Psychopathology (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (HDE 100A, HDE 100B) or PSC 140; Consent of Instructor. Foundational principles and current issues in developmental psychopathology, the study of mental health problems and disorders that originate in childhood and adolescence (e.g., disruptive behavior, mood and anxiety disorders). Effective: 2018 Winter Quarter.

**HDE 132—Individual Differences in Cognition (4)**
Lecture—4 hours. Prerequisite(s): (PSC 001 or PSC 001Y); (HDE 100A or HDE 100B) Individual differences in cognition, including learning disabilities and giftedness. Education implications and neurodevelopmental substrates of individual differences in cognition. Effective: 2018 Spring Quarter.

**HDE 140—Communication and Interaction with Young Children (2)**
Lecture—2 hours. Prerequisite(s): HDE 100A; HDE 140L (can be concurrent); and Consent of Instructor. HDE 140L required concurrently. Enrollment requires sign up for laboratory time at the Child and Family Studies Center located at 244 First Street, Davis, CA. Integration of research, theory and practice in child development, emphasizing the role of relationships in creating a growth-promoting environment for young children. Includes: peer relationships, emotional understanding and self regulation, attachment, communication and school readiness. Effective: 2012 Fall Quarter.

**HDE 140L—Laboratory in Early Childhood (3-5)**
Discussion/Laboratory—3 hours; Laboratory—6-15 hours. Prerequisite(s): HDE 140 (can be concurrent); and Consent of Instructor. HDE 140 must be taken concurrently for first 3 units of credit; students must contact the Center for Child and Family Studies to enroll. Limited enrollment. Application of theories of learning and development to
interaction with infants, toddlers, and preschoolers at Early Childhood Laboratory. Applied skills in communication, guidance and curriculum. May be repeated up to 2 time(s). (P/NP grading only.) Effective: 2012 Fall Quarter.

**HDE 141—Field Study With Children and Adolescents (4-6)**
Fieldwork—6-12 hours; Lecture—2 hours. Prerequisite(s): HDE 100A or HDE 100B; and Consent of Instructor. Study of children's affective, cognitive and social development within the context of family/school environments, hospitals and foster group homes. May be repeated up to 12 unit(s). Effective: 2012 Fall Quarter.

**HDE 142—Field Study with Emotionally Distressed Children and Adolescents (4-6)**
Discussion—1.5 hours; Fieldwork—6-12 hours. Prerequisite(s): HDE 130 (can be concurrent); and Consent of Instructor. Field study with children who are identified as emotionally distressed, including those with internalizing and externalizing behavioral problems. May be repeated up to 12 unit(s). Effective: 2012 Fall Quarter.

**HDE 143—Field Studies of the Elderly (4-6)**
Discussion—2 hours; Fieldwork—6-12 hours; Variable. Prerequisite(s): HDE 100C or HDE 160 (can be concurrent); and Consent of Instructor. Apply theory and research on adult development and aging, work with older adults in a variety of settings, and develop skills relevant to that application. Develop a small research project. Effective: 2016 Fall Quarter.

**HDE 160—Social Aspects of Aging (4)**
Lecture—4 hours. Prerequisite(s): HDE 100C How the social context affects adult development and aging. Emphasis on demography, social policy, culture, and adaptation. Oral histories as class projects. Effective: 2016 Fall Quarter.

**HDE 161—Applied Cognition and Aging (4)**
Lecture/Discussion—4 hours. Prerequisite(s): (PSC 001 or PSC 001Y); HDE 100C Principles from cognition and aging and applies these to real-world concerns in areas including education, technology, job performance, and health. Considers physical and social changes in later life that impact functioning. GE credit: SS, WE. Effective: 2018 Spring Quarter.

**HDE 163—Cognitive Neuropsychology in Adulthood and Aging (4)**
Lecture/Discussion—4 hours. Prerequisite(s): (PSC 001 or PSC 001Y); HDE 100C recommended. Theories, methods, and findings concerning the relationship between cognitive processes and brain functioning. Readings, lectures, and in-class discussions cover research on normal younger and older adults, neuropsychological case studies, and selected patient groups (e.g., amnesia, schizophrenia, Alzheimer's disease). Effective: 2018 Spring Quarter.

**HDE 190C—Introductory Research Conference (1)**
Discussion—1 hour. Prerequisite(s): Involvement in ongoing research; consent of instructor. Instructors lead discussions with undergraduate students who involve themselves in a research project. Research papers are reviewed and aspects of project proposals developed out of class are presented and evaluated. May be repeated for credit. May be repeated for credit. (P/NP grading only.) Effective: 2016 Fall Quarter.

**HDE 192—Internship (1-12)**
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Upper division standing. Supervised internship off and on campus, in community, and institutional settings. (P/NP grading only.) Effective: 2012 Fall Quarter.

**HDE 198—Directed Group Study (1-5)**
Variable. (P/NP grading only.) Effective: 2012 Fall Quarter.

**HDE 199—Special Study for Advanced Undergraduates (1-5)**
Variable. (P/NP grading only.) Effective: 2012 Fall Quarter.

**HDE 200A—Early Development (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Graduate standing; basic biology or physiology; one upper division course in psychology or a related field; one upper division or graduate course in development psychology (can be concurrent). Theory and research on the biological, social, cognitive, and cultural aspects of development from conception to the age of five years. Effective: 2012 Fall Quarter.

**HDE 200B—Middle Childhood and Adolescence (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Graduate standing; basic biology or physiology, and at least two upper division or graduate level courses in psychology or related fields. Theory and research on biological, cognitive, social, and cultural influences on behavioral development from age five years until late adolescence. Effective: 2012 Fall Quarter.

**HDE 200C—Development in Adulthood (4)**
Lecture/Discussion—4 hours. Theory and research focusing on social, personality, cognitive, and biological
development from early to late adulthood. Emphasis is on theory development and continuity and change. Effective: 2016 Fall Quarter.

**HDE 203—Adolescent Behavioral and Emotional Development (4)**
Lecture/Discussion—4 hours. Prerequisite(s): HDE 200B Analysis of recent theories, research methods, and major findings on adolescent behavioral and emotional development, including contextual and genetic influences on adolescence, pubertal transitions, and social/family contexts and processes. Emphasis on multi-level mechanisms underlying adolescent behavioral and emotional development. Effective: 2012 Fall Quarter.

**HDE 204—Developmental Neuroscience and Adolescent Psychopathology (4)**
Lecture—4 hours. Prerequisite(s): Graduate standing in Human Development, Psychology, Education, Neuroscience or consent of instructor. Introduction to human developmental neuroscience. Understanding of adolescence and its characterization as a time of risky and unhealthy behavior and vulnerability to onset of mental disorder as well as issues around plasticity of the adolescent brain and prevention/intervention. Effective: 2012 Fall Quarter.

**HDE 205—Path Analysis, Factor Analysis, and Structural Equation Modeling (4)**
Review all entries
Lecture—4 hours. Prerequisite(s): PSC 204B; Or equivalent graduate courses in statistics or consent of instructor; familiarity with multiple regression and the basics of matrix algebra. Graduate standing in Human Development Graduate Group, Psychology, Sociology, Education, or a related social science. Introduction of basic concepts, principles, and applications of structural equation modeling including path analysis, confirmatory factor analysis, multiple-group modeling, and latent growth curve modeling. Effective: 2012 Fall Quarter.

**HDE 206—Longitudinal Data Analysis (4)**
Review all entries
Lecture—3 hours; Term Paper. Prerequisite(s): PSC 204B; Or equivalent graduate courses in statistics or consent of instructor; familiarity with multiple regression and the basics of matrix algebra. Open to graduate students only. Introduction to longitudinal data manipulation, organization, description, and modeling in the multilevel modeling and structural equation modeling frameworks. Effective: 2019 Spring Quarter.

**HDE 207—Topics in Applied Cognitive Aging (4)**
Lecture/Discussion—4 hours. Prerequisite(s): Graduate standing in Human Development Graduate Group, Psychology, Education, or a related social science, or consent of instructor. Apply principles from cognitive aging to real-world concerns in areas such as education, technology, job performance, and health. Examine how physical and social changes occurring in later life impact functioning. Effective: 2012 Fall Quarter.

**HDE 210—Theories of Behavioral Development (3)**
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): Graduate standing in behavioral sciences. Consideration of enduring issues in theories of behavioral development; analysis of adequacy of major theoretical schools (e.g., social learning, Piagetian) as scientific theories. Effective: 2012 Fall Quarter.

**HDE 211—Physiological Correlates of Behavioral Development (4)**
Seminar—4 hours. Prerequisite(s): Consent of Instructor. An overview of mechanisms of organismic development and the implications of developmental biology for the analysis of behavioral ontogeny; consideration of parallels between processes of organismic development and behavioral development in children and infra-human mammals. Effective: 2012 Fall Quarter.

**HDE 220—Research Methods in Human Growth and Development (4)**
Lecture—4 hours. Prerequisite(s): STA 013 or STA 013Y; Or the equivalent and at least two upper division courses in Human Biology or Developmental Psychology. Overview of qualitative and quantitative approaches to empirical inquiry in the social sciences, with a focus on theory and research methods in biological growth and cognitive and social/emotional development from prenatal period to death. Effective: 2018 Winter Quarter.

**HDE 232—Cognition and Aging (3)**
Lecture/Discussion—3 hours. Prerequisite(s): HDE 200C The manner in which cognitive processes are affected by aging as well as an understanding of the changes in the central nervous system occurring with aging. Effective: 2012 Fall Quarter.

**HDE 234—Children's Learning and Thinking (3)**
Seminar—3 hours. Prerequisite(s): HDE 200A or PSC 212 recommended. Analysis of theories, research methods, and major findings of children's higher-order cognition, including origins of knowledge, development of problem-solving skills, reasoning strategies, and scientific concepts, with an emphasis on the underlying mechanism involved in children's thinking and learning processes. Effective: 2012 Fall Quarter.

**HDE 238—The Context of Individual Development (3)**
Lecture/Discussion—3 hours. Prerequisite(s): Graduate standing in Human Development, Child Development,
Education, Psychology, Anthropology, Sociology, or consent of instructor. Analysis of human development within the context of daily life. Contextualizing theories and methods of developmental psychology will be distinguished from contextual theories and methods. Developmental psychology models will be distinguished from child psychology models. Effective: 2012 Fall Quarter.

HDE 239—Developmental Trajectories in Typical and Atypical Children; Birth to Five (4) [Review all entries]
Discussion/Laboratory—3 hours; Term Paper. Prerequisite(s): Graduate standing in Human Development, Psychology, Sociology, a related social science, or permission of the instructor. Discuss theories of development in typical and atypical children from birth to five from a socio-cultural perspective including parent-child interaction, peer interactions, cultural contexts of learning, as well as theoretical and empirical issues for understanding continuities and discontinuities in development. Effective: 2012 Fall Quarter.

HDE 239—Developmental Psychopathology (4) [Review all entries]
Discussion/Laboratory—3 hours; Term Paper. Prerequisite(s): Graduate standing in Human Development, Psychology, Sociology, a related social science, or consent of instructor. Theories, current issues, and empirical studies of atypical development from infancy to adulthood that integrate multiple system levels from genes, neurobiology, cognition, emotion, family and peer dynamics to community and cultural contexts. Effective: 2019 Winter Quarter.

HDE 240—Peer Relationships during Adolescence (4)
Lecture/Discussion—4 hours. Graduate standing in Human Development, Psychology, Education, or consent of instructor. Course examines the role of peer relationships in adolescent development including forms and functions at the individual, dyadic and group levels. Ethnicity and cross cultural research will be discussed. Emphasis on methodology, including surveys, peer nominations/sociometrics, experimental, and observational designs. Effective: 2012 Fall Quarter.

HDE 250—Current Research on Family Relationships (4)
Discussion/Laboratory—3 hours; Term Paper. Graduate standing in Human Development Graduate Group, Psychology, Sociology, a related social science, or consent of instructor. Discussion of theories, methods, and current research on the nature and development of sibling, romantic, and parent-child relationships across the lifespan. Emphasis on interpersonal and family processes examined in ethnic/cultural contexts. Implications for individual development will be addressed. Effective: 2012 Fall Quarter.

HDE 252—Family Research, Programs and Policy (4)
Seminar—3 hours; Term Paper. Graduate standing in Human Development, Psychology, Sociology, related social sciences, or consent of instructor. Course examines the competing interests of research, policy, and service on current issues of family functioning and individual well being. The course considers communication barriers between researchers, practitioners, and policy makers. Effective: 2012 Fall Quarter.

HDE 290—Seminar (3)
Seminar—3 hours. Discussion and evaluation of theories, research, and issues in human development. Different topics each quarter. Effective: 2012 Fall Quarter.

HDE 290C—Research Conference (1)
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Graduate standing. Supervising instructors lead research discussions with their graduate students. Research papers are reviewed and project proposals are presented and evaluated. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 2012 Fall Quarter.

HDE 291—Research Issues in Human Development (4)
Seminar—4 hours. Prerequisite(s): Graduate Standing in the behavioral sciences. In-depth presentations of research issues in particular areas of behavioral development. May be repeated for credit. Effective: 2012 Fall Quarter.

HDE 292—Graduate Internship (1-12)
Internship—3-36 hours. Prerequisite(s): Consent of faculty (internship sponsor) and satisfactory completion of placement relevant course work, for example: EDU 213, EDU 216; HDE 222, HDE 242; LAW 272, LAW 273. Individually designed supervised internship, off campus, in community or institutional setting. Developed with advice of faculty mentor. May be repeated up to 12 unit(s) justified skill acquisition and promise of informing evaluation research. (S/U grading only.) Effective: 2012 Fall Quarter.

HDE 298—Group Study (1-5)
Variable. Effective: 2012 Fall Quarter.

HDE 299—Human Development (1-12)
Variable. (S/U grading only.) Effective: 2012 Fall Quarter.
HDE 396—Teaching Assistant Training Practicum (1-4)
Variable. Prerequisite(s): Graduate standing. May be repeated for credit. (P/NP grading only.) Effective: 2012 Fall Quarter.

**Human Physiology Minor, Neurobiology, Physiology, & Behavior | EXB Courses**

**Courses in EXB:**

**EXB 010—Exercise and Fitness: Principles and Practice (3)**
*Review all entries*
Lecture—3 hours. Human movement from physiological, psychological, sociological, and historical perspectives. Biology and psychology of exercise across the human lifespan. Not open for credit to students who have taken an upper division EXB course. GE credit: SE, SL. Effective: 2004 Winter Quarter.

**EXB 010—Exercise and Fitness: Principles and Practice (3)**
*Review all entries Discontinued*
Lecture—3 hours. Human movement from physiological, psychological, sociological, and historical perspectives. Biology and psychology of exercise across the human lifespan. Not open for credit to students who have taken an upper division Exercise Biology course. GE credit: SE, SL. Effective: 2019 Fall Quarter.

**EXB 090C—Research Conference (1)**
Discussion—1 hour. Prerequisite(s): EXB 099 (can be concurrent); Lower division standing in Exercise Biology or related biological science and consent of instructor; EXB 099 required concurrently. Research findings and methods in exercise biology. Presentation and discussion of research by faculty and students. May be repeated for credit. (P/NP grading only.) Effective: 2006 Fall Quarter.

**EXB 090X—Lower Division Seminar (1-2)**
Lecture—1-2 hours. Prerequisite(s): Consent of Instructor. Lower division standing. Gives freshman or sophomore level students the opportunity to study a special topic in the general area of Exercise Biology in a small class setting. GE credit: SE. Effective: 1997 Winter Quarter.

**EXB 092—Exercise Biology Internship (1-5)**
Internship—3-15 hours. Prerequisite(s): Consent of Instructor. Enrollment dependent on availability of intern positions. Work experience in the application of physical activity programs to teaching, recreational, clinical or research situations under department faculty supervision. May be repeated up to 1 time(s). No internship units will be counted towards the Exercise Biology major. (P/NP grading only.) Effective: 2003 Spring Quarter.

**EXB 097T—Tutoring in Exercise Biology (1-5)**
Tutorial—3-15 hours. Prerequisite(s): Consent of instructor. Lower division standing. Assisting the professor by tutoring students in exercise biology course-related projects. May be repeated up to 10 unit(s) including courses EXB 097TC, EXB 197T and EXB 197TC. No tutorial units will be counted towards the Exercise Biology major. (P/NP grading only.) Effective: 2004 Fall Quarter.

**EXB 097TC—Tutoring Exercise Biology in the Community (1-5)**
Tutorial—3-15 hours. Prerequisite(s): Consent of instructor and chairperson. Tutoring in the community in exercise biology related projects under the guidance of the faculty. May be repeated up to 1 time(s). (P/NP grading only.) Effective: 2003 Spring Quarter.

**EXB 098—Directed Group Study (1-5)**
Variable. Prerequisite(s): Consent of instructor and chairperson. (P/NP grading only.) Effective: 1997 Winter Quarter.
EXB 099—Special Study for Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

EXB 101—Exercise Physiology (4) Review all entries
Lecture—4 hours. Prerequisite(s): NPB 101 or NPB 110C Physiologic responses to acute exercise, and physiologic adaptations to both chronic exercise (training) and selected environmental stresses. Emphasis is placed on the muscular, metabolic, cardiovascular, respiratory and renal responses and adaptations to exercise. Only 1 unit of credit allowed to students who have completed EXS 101; only 3 units of credit allowed to students who have completed EXS 102; not open for credit to students who have completed EXS 101 and EXS 102. GE credit: SE, SL. Effective: 2018 Winter Quarter.

EXB 102—Introduction to Motor Learning and the Psychology of Sport and Exercise (4)
Lecture—4 hours. Prerequisite(s): PSC 001 recommended. Theoretical and practical issues in motor learning, sport psychology, and exercise psychology are examined. Emphasis is placed on how motor skills are acquired and retained, and on the application of social psychology and human motivation studies to human performance. Only 2 units of credit allowed for students who have completed EXB 104; only 2 units of credit allowed for students who have completed EXB 105; not open for credit to students who have completed EXB 104 and EXB 105. GE credit: SS. Effective: 2002 Winter Quarter.

EXB 104L—Exercise Biology Laboratory (3)
Discussion—1 hour; Laboratory—3 hours; Lecture—1 hour. Prerequisite(s): EXB 101 (can be concurrent); EXB 102 (can be concurrent); EXB 103 (can be concurrent); The last taken of the three courses may be taken concurrently.
Principles and analytical procedures for assessing fundamental physiological, biomechanical, motor learning and motor control factors which underlie human movement and performance. Only 1 unit of credit allowed to students who have completed EXB 101L; only 1 unit of credit allowed to students who have completed EXB 103; not open for credit to students who have completed EXB 101L and EXB 103. (Former EXB 101L and EXB 103.). GE credit: SE, WE. Effective: 2004 Winter Quarter.

EXB 106—Human Gross Anatomy (4)
Lecture—4 hours. Prerequisite(s): BIS 002A; Concurrent enrollment in EXB 106L or CHA 101L strongly recommended. Upper division students only; Pass One open to upper division Exercise Biology or Anthropology majors only; Pass Two open to Seniors in any major; open enrollment at the start of the quarter for upper division students in any major. Detailed study of the gross anatomical structure of the human body, with emphasis on function and clinical relevance to students entering health care professions. (Same course as CHA 101.) GE credit: SS. Effective: 2010 Fall Quarter.

EXB 106L—Human Gross Anatomy Laboratory (3)
Laboratory—9 hours. Prerequisite(s): BIS 002A; EXB 106 (can be concurrent) or CHA 101 (can be concurrent); Must have completed EXB 106 or CHA 101 or required concurrently. Upper division students only; Pass One open to upper division Exercise Biology or Anthropology majors only; Pass Two open to Seniors in any major; open enrollment at the start of the quarter for upper division students in any major; mandatory attendance on first day of lab. Detailed study of prospected human cadavers in small group format with extensive hands-on experience. (Same course as CHA 101L.) GE credit: SE. Effective: 2010 Fall Quarter.

EXB 110—Exercise Metabolism (3)
Lecture—3 hours. Prerequisite(s): EXB 101 or NPB 101 or NPB 110C Exercise metabolism, with emphasis on skeletal muscle and cardiac muscle metabolism during activity and inactivity. Basics of bioenergetics, substrate utilization, and cell signaling; mechanisms that regulate these properties, and differences between skeletal muscle and cardiac muscle metabolism. GE credit: SE. Effective: 2010 Fall Quarter.

EXB 111—Environmental Effects on Physical Performance (3)
Discussion/Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): EXB 101; or Consent of Instructor. The effects of thermal, barometric and gravitational conditions on physiological function and physical performance of humans. Acute and chronic effects, emphasizing physiological adaptations and limitations, will be studied. GE credit: QL, SE. Effective: 2007 Winter Quarter.
EXB 112—Clinical Exercise Physiology (4)
Discussion/Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): EXB 101; or Consent of Instructor. Physical activity as a therapeutic modality in normal and diseased populations (cardiovascular, pulmonary, diabetic). Effects of exercise and inactivity in terms of normal physiology, pathophysiology, and therapeutic benefit. Exercise fitness and disease assessment methods. GE credit: SE, SL. Effective: 2009 Spring Quarter.

EXB 112—Clinical Exercise Physiology (4)
Discussion/Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): NPB 101 or NPB 110C; or Consent of Instructor. Physical activity as a therapeutic modality in normal and diseased populations (cardiovascular, pulmonary, diabetic). Effects of exercise and inactivity in terms of normal physiology, pathophysiology, and therapeutic benefit. Exercise fitness and disease assessment methods. GE credit: SE. Effective: 2019 Winter Quarter.

EXB 115—Biomechanical Bases of Movement (3)
Discussion—1 hour; Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): EXB 103; or Consent of Instructor. Biomechanical bases of human movement investigated; topics include musculo-skeletal mechanics, tissue mechanics, electromyography, and measurement and analysis techniques. Application made to sport, clinical, and work environments, including extensive analysis of locomotion. GE credit: QL, SE, VL, WE. Effective: 1997 Winter Quarter.

EXB 116—Nutrition for Physically Active Persons (3)
Lecture—3 hours. Prerequisite(s): EXB 101; NPB 101 The role of nutrition and exercise in modifying metabolism, body composition, performance and health of humans. GE credit: SE. Effective: 1997 Winter Quarter.

EXB 117—Exercise and Aging in Health and Disease (3)
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): EXB 101 or EXB 113 (can be concurrent) Etiology of and standard therapy for various diseases associated with aging (e.g., cardiovascular, pulmonary, and renal diseases, diabetes, obesity, lipemias, etc.). Exercise will then be considered as a protective and/or therapeutic modality. GE credit: SE. Effective: 2007 Spring Quarter.

EXB 117—Exercise & Aging in Health & Disease (3)
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): NPB 101 or NPB 110C; or Consent of Instructor. Etiology of and standard therapy for various diseases associated with inactivity and aging; e.g., cardiovascular, pulmonary, diabetes, obesity, lipemias, etc. Exercise will then be considered as a protective and/or therapeutic modality. GE credit: SE. Effective: 2019 Spring Quarter.

EXB 120—Sport in American Society (3)
Lecture—3 hours. Sociological approaches to the study of sport and contemporary American culture, including sport interaction with politics, economics, religion, gender, race, media and ethics. Socialization factors involving youth, scholastic, collegiate, and Olympic sport. (Same course as PHE 120.) GE credit: SS. Effective: 2009 Summer Session 1.

EXB 121—Advanced Sport Psychology (3)
Lecture—3 hours. Prerequisite(s): EXB 102; PSC 001 recommended. Advanced study and consideration of major theoretical and practical issues in sport psychology. Emphasis on practical application to sport and human performance. Effective: 2010 Winter Quarter.

EXB 122—Psychological Effects of Physical Activity (3)
Lecture—3 hours. Prerequisite(s): PSC 001 or PSC 001Y Upper division standing. Physical activity is evaluated in terms of its ability to enhance the quality of life. Topics studied include: individual factors (self concept, type A); special populations (elderly, cardiovascular); and mental health changes (depression, anxiety). Effective: 2018 Spring Quarter.

EXB 124—Physiology of Maximal Human Performance (4)
Lecture—3 hours; Practice—4 hours. Prerequisite(s): EXB 101; or Consent of Instructor. BIS 101, BIS 102, and BIS 103 recommended. Molecular mechanisms underlying adaptation to training. Learn how to exercise to maximize their own performance as well as learning how the frequency, intensity and timing of exercise and nutrition affect the molecular signals that underlie performance. GE credit: SE. Effective: 2011 Winter Quarter.

EXB 125—Neuromuscular and Behavioral Aspects of Motor Control (3)
Discussion/Laboratory—2 hours; Lecture—2 hours. Prerequisite(s): EXB 101 Factors which affect control of movement from neuropsychological, physiological, behavioral, and mechanical viewpoints. Topics include central vs. peripheral control mechanisms, open and closed loop theories, motor programming, cognitive learning strategies, and the effects of biochemical and biomechanical influences. GE credit: SE. Effective: 2006 Fall Quarter.
EXB 148—Theory and Practice of Exercise Testing (1)
Lecture/Discussion—1 hour. Prerequisite(s): EXB 112 (can be concurrent) Theory and practice of exercise testing applied to older adult populations. Physiological responses to and limitations of exercise testing. Application of exercise testing and training to healthy and diseased populations. (P/NP grading only.) GE credit: SE. Effective: 2006 Fall Quarter.

EXB 148L—Adult Fitness Testing Laboratory (1)
Laboratory—3 hours. Prerequisite(s): EXB 148 (can be concurrent); EXB 148 required concurrently. Testing symptomatic and asymptomatic older adults for functional aerobic capacity, body composition, blood lipids, pulmonary function, and cardiovascular disease risk. Counseling adults in appropriate exercise programs and lifestyle modifications. Two quarters minimum; third quarter permitted. (Former course Physical Education 148L). May be repeated up to 2 time(s). (P/NP grading only.) GE credit: QL, SE. Effective: 2006 Fall Quarter.

EXB 179—Frontiers in Exercise Biology (3)
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): EXB 101; EXB 102; EXB 103 (can be concurrent); EXB 104L recommended. Lectures by leading authorities and discussion of the latest research in newly emerging areas in exercise biology. Offered every fourth year. GE credit: SE. Effective: 2007 Spring Quarter.

EXB 189—International Perspectives in Exercise Biology (4)
Lecture—4 hours. Prerequisite(s): EXB 010; Or upper division standing in Exercise Biology; consent of instructor: students will be accepted based upon academic merit, personal experience, and academic discipline in order to provide multidisciplinary perspectives. Restricted to 22 students. Compare and contrast exercise science issues between the US and an international location. Identify political, economic, cultural, technological and environmental issues that impact human exercise, physical activity, wellness, and sport from a global perspective. Effective: 2009 Summer Session 1.

EXB 190C—Research Conference (1)
Discussion—1 hour. Prerequisite(s): EXB 099 (can be concurrent); Upper division standing in Exercise Biology or related biological science and consent of instructor; EXB 199 required concurrently. Restricted to upper division students. Research findings and methods in exercise biology. Presentation and discussion of research by faculty and students. May be repeated for credit. (P/NP grading only.) Effective: 2006 Fall Quarter.

EXB 192—Exercise Biology Internship (1-12)
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Enrollment dependent on availability of intern positions. Work experience in the application of physical activity programs to teaching, recreational, clinical or research situations under program faculty supervision. Written report required. May be repeated up to 15 unit(s) including course 92. (P/NP grading only.) Effective: 2003 Spring Quarter.

EXB 194H—Research Honors (2)
Independent Study—6 hours. Prerequisite(s): Senior standing, minimum of 6 units of EXB 199, 3.50 GPA or greater in major courses, consent of honors thesis advisor. Completion of individual honors research project in Exercise Biology, under the guidance of an Exercise Biology faculty advisor, culminating in written honors thesis. (P/NP grading only.) GE credit: SE. Effective: 2004 Fall Quarter.

EXB 197T—Tutoring in Exercise Biology (1-5)
Tutorial—3-15 hours. Prerequisite(s): Consent of Instructor. Upper division standing. Assisting the instructor by tutoring students in exercise biology course-related projects. May be repeated up to 10 unit(s) including courses EXB 097T, EXB 097TC and EXB 197TC. No tutorial units will be counted towards the Exercise Biology major. (P/NP grading only.) Effective: 2004 Fall Quarter.

EXB 197TC—Tutoring Exercise Biology in the Community (1-5)
Tutorial—3-15 hours. Prerequisite(s): Consent of instructor and chairperson. Tutoring in the community in exercise biology related projects under the guidance of the faculty. May be repeated up to 10 unit(s) including courses 97T, 97TC and 197T. (P/NP grading only.) Effective: 2003 Spring Quarter.

EXB 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of instructor and chairperson. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

EXB 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of chairperson. (P/NP grading only.) Effective: 1997 Winter Quarter.

Human Physiology Minor; Neurobiology, Physiology, & Behavior | NPB Courses
Courses in NPB:

NPB 010—Elementary Human Physiology (3)
Lecture—3 hours. Introduction to physiology for non-science majors. Includes basic cell physiology and survey of major organ systems and how they function in homeostasis and human health. Not open for credit to students who have completed NPB 101. GE credit: SE. Effective: 2016 Winter Quarter.

NPB 011—Exercise and Fitness: Principles and Practice (3)
Lecture—3 hours. Human movement from physiological, psychological, sociological, and historical perspectives. Biology and psychology of exercise across the human lifespan. Not open for credit to students who have taken EXB 010 or an upper division Exercise Biology or Neurology, Physiology & Behavior course. GE credit: SE, SL. Effective: 2019 Fall Quarter.

NPB 012—The Human Brain and Disease (3)
Lecture—3 hours. Normal function and diseases of the human brain and nervous system. Diseases discussed include Parkinson's, Alzheimer's, leprosy, amnesia and schizophrenia. Intended for non-science majors. Not open for credit for students who have completed NPB 100, NPB 101, NPB 112, or PSC 121. GE credit: SE, SL. Effective: 1997 Spring Quarter.

NPB 013—Extreme Animal Athletes (3)
Lecture—3 hours. Overview of biomechanics, focusing on animal locomotion. Physical principles underlying traits such as speed, maneuverability, endurance, and precision. Comparisons of animals and human athletes performing similar feats, with animals often outperforming humans by a wide margin. Biomechanical concepts through hands-on exercises, problem sets, and readings from the scientific literature. GE credit: QL, SE, SL. Effective: 2018 Fall Quarter.

NPB 014—Illusions: Fooling the Brain (3)
Lecture—3 hours. Introduction to perceptual processing in the human nervous system; illusions. GE credit: QL, SE, SL. Effective: 2012 Winter Quarter.

NPB 015—The Biology and Physiology of Aging (4)
Discussion—1 hour; Lecture—3 hours. Broad examination of age-associated changes in body functions. Includes basic cell physiology, a survey of major organ systems and the age-induced alterations in system function. Some age-associated diseases will also be examined. Intended for non-science majors. Not open for credit to students who have completed NPB 15V. GE credit: SE. Effective: 2012 Fall Quarter.

NPB 015V—The Biology and Physiology of Aging (4)
Web Electronic Discussion—1 hour; Web Virtual Lecture—3 hours. Broad examination of the biological and physiological basis of aging in animals and plants. Concepts in demographic, evolutionary, genetic, and cell aging. Major human organ systems, age-related alterations in system function, and age-related diseases. Intended for non-science majors. Not open for credit to students who have completed NPB 15. GE credit: SE, SL. Effective: 2012 Fall Quarter.

NPB 017—The Path to Cyborgs: Introduction to Prostheses and Human Machine Interfaces (3)

NPB 018—Biological Science for Social Justice (3)
Lecture—3 hours. Broad survey of the many ways one can use the biological sciences to better the lives of others and break down barriers that have restricted social mobility. GE credit: DD, SE, SL, SS. Effective: 2018 Spring Quarter.

NPB 068—Biology of Drug Addiction and Abuse (3)
Lecture—3 hours. Broad examination of addictive substances and their use/abuse. Topics include historical perspective, physiological effects, etiology, neurobiology of addiction and the impact of drugs on contemporary society. Intended for non-science majors. Not open for credit to students having completed NPB 168. Effective: 2008 Spring Quarter.

NPB 090A—Lower Division Seminar: Issues in Body Weight Regulation (2)
NBP 090B—Human Color Perception (2)
Seminar—2 hours; Term Paper. Prerequisite(s): Lower division standing. Class size limited to 15 students with lower division standing. Neural determinants of color appearance, and why we see the world in the way we do. Discussions center around demonstrations of color phenomena and what they tell us about the human brain. Effective: 2008 Spring Quarter.

NBP 090C—Current Issues in Animal Behavior (2)
Seminar—2 hours. Prerequisite(s): Lower division standing. Limited enrollment. The mechanisms and outcomes of sexual selection (mate choice and mate competition). Theory, current models and evidence that supports or refutes the models. Effective: 2003 Winter Quarter.

NBP 090D—Lower Division Seminar: Current Issues in Reproductive Endocrinology (2)
Seminar—2 hours. Prerequisite(s): Lower division standing. The integrative roles of reproductive hormones in mammalian reproduction and health. Current theory and models regarding hormone function and use in reproductive health and contraception, and evidence that supports or refutes the models. Effective: 2002 Fall Quarter.

NBP 090E—Biology of Aging (2)

NBP 090F—Visual Impairment and Blindness: A World Wide Problem (2)
Seminar—2 hours. Prerequisite(s): Lower division standing. Examination of various abnormalities of the eye and the important geographic and cultural factors that influence the epidemiology of those abnormalities. Effective: 2007 Winter Quarter.

NBP 091C—Research Conference (1)
Discussion—1 hour. Prerequisite(s): NPB 099 (can be concurrent); and Consent of Instructor. Lower division standing in Neurobiology, Physiology and Behavior or related biological science; NPB 099 required concurrently. Restricted to lower division students. Research findings and methods in neurobiology, physiology, and/or behavior. Presentation and discussion of research by faculty and students. May be repeated for credit. (P/NP grading only.) Effective: 2003 Fall Quarter.

NBP 092—Internship (1-12)
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Lower division standing. Work experience off and on campus in all subject areas offered in the Department of Neurobiology, Physiology, and Behavior. Internships supervised by a member of the faculty. May be repeated for credit. (P/NP grading only.) Effective: 2008 Fall Quarter.

NBP 098—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Lower division standing. (P/NP grading only.) Effective: 2000 Winter Quarter.

NBP 099—Special Study for Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. Lower division standing. (P/NP grading only.) Effective: 1999 Winter Quarter.

NBP 100—Neurobiology (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): BIS 002A; PHY 009A, PHY 009B or PHY 007A, PHY 007B recommended. Brains and nervous systems, neurons and neural circuits. Coordination of movement. Development of nervous systems. Vision, hearing, and feature extraction by the central nervous system. The cell biology of learning and memory. Perception, cognition, and disorders of the brain. Not open for credit to students who have completed NPB 110B, NPB 112, NPB 160, NPB 161 or NPB 162, or NSC 221 or NSC 222. GE credit: QL, SE. Effective: 2018 Spring Quarter.

NBP 100L—Neurobiology Laboratory (3)
Extensive Writing/Discussion; Laboratory—3 hours; Lecture—1 hour. Prerequisite(s): NPB 100 (can be concurrent) or NPB 110B (can be concurrent) Experimental basis of neurobiology principles discussed in course 100. Topics include neurophysiology, sensory systems, motor systems, cellular neuroscience, cognitive neuroscience, and quantitative data analysis and modeling techniques. GE credit: SE. Effective: 2017 Winter Quarter.

NBP 100Q—Quantitative Foundations of Neurobiology (1)
Auto Tutorial—1.5 hours; Extensive Problem Solving—1.5 hours. Prerequisite(s): NPB 100 (can be concurrent)
Computational methods and mathematical models used to study phenomena in neurobiology. GE credit: QL, VL. Effective: 2010 Spring Quarter.

NPB 101—Systemic Physiology (5) Review all entries
Lecture—5 hours. Prerequisite(s): BIS 001A or BIS 002A; CHE 002B; PHY 001B or PHY 007C strongly recommended. Systemic physiology with emphasis on aspects of human physiology. Functions of major organ systems, with the structure of those systems described as a basis for understanding the functions. Not open for credit to students who have completed NSC 110C. GE credit: SE. Effective: 2017 Winter Quarter.

NPB 101—Systemic Physiology (5) Review all entries
Lecture—5 hours. Prerequisite(s): BIS 002A; (CHE 002B or CHE 002BH); PHY 001B or PHY 007C strongly recommended. Systemic physiology with emphasis on aspects of human physiology. Functions of major organ systems, with the structure of those systems described as a basis for understanding the functions. Not open for credit to students who have completed NPB 110C. GE credit: SE. Effective: 2019 Winter Quarter.

NPB 101D—Systemic Physiology Discussion (1.5)
Discussion—1.5 hours. Prerequisite(s): NPB 101 (can be concurrent); Consent of Instructor. Discussion and problem solving related to fundamental principles of systemic physiology as presented in course 101. (P/NP grading only.) Effective: 2017 Spring Quarter.

NPB 101L—Systemic Physiology Laboratory (3)
Discussion—2 hours; Laboratory—3 hours; Term Paper. Prerequisite(s): NPB 101 or NPB 110C Selected experiments to illustrate functional characteristics of organ systems discussed in course 101. Effective: 2017 Winter Quarter.

NPB 102—Animal Behavior (3)
Lecture—3 hours. Prerequisite(s): (BIS 001A, BIS 001B, BIS 001C) or (BIS 002A, BIS 002B, BIS 002C) Basic principles of behavioral organization in vertebrate and invertebrate animals. Underlying physiological and ethological mechanisms. The evolution of behavior, with special emphasis on behavior under natural conditions. Not open for credit to students who have completed NPB 155. (Former NPB 155.). GE credit: SL. Effective: 2008 Fall Quarter.

NPB 102Q—Quantitative Topics in Animal Behavior (1)
Auto Tutorial—1.5 hours; Extensive Problem Solving—1.5 hours. Prerequisite(s): MAT 016B; NPB 102 (can be concurrent) Study of the quantitative concepts and exemplar models used in animal behavior. Effective: 2009 Spring Quarter.

NPB 103—Cellular Physiology/Neurobiology (3)
Lecture—3 hours. Prerequisite(s): (BIS 103 or BIS 105); BIS 104; PHY 007C recommended. Cellular physiology with emphasis on membrane transport processes and neuronal physiology. Fundamental physical-chemical and biological mechanisms of membrane transport will be considered in relation to cytoplasmic homeostasis, communication between cells, and the cellular mechanisms of sensory and motor transduction. Not open for credit to students who have completed NPB 100B. (Former NPB 100B.). Effective: 2008 Spring Quarter.

NPB 104L—Cellular Physiology/Neurobiology Laboratory (4)
Discussion—1 hour; Laboratory—3 hours; Lecture—1 hour; Term Paper/Discussion. Prerequisite(s): NPB 101L; (BIS 103 or BIS 105) Experiments in the physical and chemical processes of cells and tissues. Effective: 2018 Winter Quarter.

NPB 105—Introduction to Computer Models (4)
Lecture—3 hours; Lecture/Lab—1 hour. Prerequisite(s): CHE 002C; PHY 007C; (NPB 100 or NPB 101); MAT 016C; Or the equivalent to MAT 016C. Introduction to the ideas, mathematical techniques and computer tools required for developing models of cellular processes in physiology and neurobiology. Applications include membrane transport, ionic channels, action potentials, Ca²⁺ oscillations, respiration, and muscle contraction. Effective: 1997 Winter Quarter.

NPB 106—Experiments in Neurobiology, Physiology, and Behavior: Design and Execution (3)
Discussion—0.5 hours; Laboratory—7.5 hours. Prerequisite(s): (NPB 110A or NPB 100 or NPB 101 or NPB 102); NPB 199; and Consent of Instructor. Design and execution of experiments in neurobiology, physiology, and/or behavior. Students choose and design a project in consultation with the sponsoring faculty member. May be repeated once for credit to complete the project, with consent of instructor. May be repeated up to 1 time(s). (P/NP grading only.) GE credit: OL, QL, VL, WE. Effective: 2018 Winter Quarter.

NPB 107—Cell Signaling in Health and Disease (3)
Lecture—3 hours. Prerequisite(s): BIS 102 or BIS 105 Basics of cell signaling pathways, their disruption in disease, and their current utility and future potential as therapeutic targets. Focus is on signaling pathways specific to
nervous, endocrine and immune systems, and those fundamental to all cells. GE credit: SL. Effective: 2009 Winter Quarter.

NPB 108Y—Animal Behavior Laboratory (3)
Lecture—3 hours; Web Electronic Discussion—12 hours. Hybrid course, consisting of limited in-person lectures and the rest laboratory exercises. The laboratory exercises will be online, and will require students to view and score videos of animal behavior in order to test behavioral hypotheses. Effective: 2016 Summer Session 2.

NPB 109—Kinesiology—Analysis and Control of Human Movement (4)
Lecture—4 hours. Prerequisite(s): PHY 007A; PHY 007B; NPB 101 or NPB 110C recommended; CHA 101 and CHA 101L (same as EXB 106 and EXB 106L) or equivalent recommended. Functional anatomy, motor control, and biomechanics of human movement understood in the context of body structures, basic principles of physics, and functional characteristics of muscle. GE credit: SE. Effective: 2017 Winter Quarter.

NPB 109A—Foundations 1: From Molecules to Individuals (5)
Discussion—1 hour; Lecture—4 hours. Prerequisite(s): (BIS 002A, BIS 002B); (CHE 002B or CHE 003A); PHY 007A and PHY 007B recommended; BIS 002C recommended. Pass One restricted to majors in Neurobiology, Physiology and Behavior. Major concepts in cell biology with special emphasis on connections between cell biology and behavior. Includes: cellular metabolism, cellular sensing and signaling, membrane structure-function, molecular switches, electrical and chemical signaling, endocrine signaling, cell cycle and differentiation, cytoskeleton, and integrative examples. Credit limited to 3 units for students who have taken BIS 104. GE credit: SE. Effective: 2018 Winter Quarter.

NPB 109B—Foundations 2: Neurobiology (5)
Discussion—1 hour; Lecture—4 hours. Prerequisite(s): NPB 109A C- or better; PHY 007A and PHY 007B recommended. Open to declared NPB majors only. Core concepts of neurobiology including single-neuron biophysics, synapses and transmitters, neuronal development, motor systems, central pattern generation, neuronal circuits, intracellular signal transduction, sensory processing, multisensory integration, autonomic nervous system, neuromodulation, learning and memory, and higher cognition and disease. Credit limited to 2 units for students who have taken NPB 100. GE credit: SE. Effective: 2017 Winter Quarter.

NPB 109C—Foundations 3: Physiology (5) Review all entries
Discussion—1 hour; Lecture—4 hours. Prerequisite(s): NPB 109A C- or better; PHY 007A; PHY 007B and PHY 007C recommended. Open to declared NPB majors only. Focuses on the structure, function, and interactions of animal organ systems in homeostasis and reproduction, and the response to perturbations of homeostasis; neural and endocrine signaling; skeletal muscle and movement; cardiovascular and respiratory systems; renal, digestive, immune, and reproductive physiology. Credit limited to 2 units for students who have taken NPB 101. GE credit: SE. Effective: 2018 Winter Quarter.

NPB 111L—Advanced Systemic Physiology Laboratory (4)
Discussion—2 hours; Laboratory—6 hours; Lecture—1 hour; Term Paper. Prerequisite(s): NPB 101L Selected comprehensive experiments in the autonomic nervous system and the cardiovascular, respiratory, and neuromuscular systems. Emphasis on conceptual and methodological approaches in demonstrating the physiology of organ systems. Effective: 2018 Winter Quarter.

NPB 113—Cardiovascular, Respiratory, and Renal Physiology (4)
Lecture—4 hours. Prerequisite(s): (NPB 110C or NPB 101); CHE 008B, PHY 007B and PHY 007C recommended. An intense and advanced presentation of concepts in cardiovascular, respiratory, and renal physiology including discussion of acid-base balance. Effective: 2018 Winter Quarter.

NPB 114—Gastrointestinal Physiology (3)
Lecture—3 hours. Prerequisite(s): (NPB 110C or NPB 101); BIS 105 or BIS 103 recommended, BIS 105 preferred. Gastrointestinal anatomy and physiology. Digestion, secretion, absorption, motility, comparative physiology and

1094

NPB 116—Stress Physiology in Health and Disease (3)
Lecture—3 hours. Prerequisite(s): BIS 002A C- or better; or Consent of Instructor. Adaptive and maladaptive physiological responses to acute and chronic stress in mammals, with emphasis on humans. Role of endocrine and autonomic nervous system in stress response. Prenatal and postnatal effects of stress on cognitive and affective development. Wellness interventions. Effective: 2019 Winter Quarter.

NPB 117—Avian Physiology (3)
Lecture—3 hours. Prerequisite(s): (BIS 002A, BIS 002B); CHE 002B; NPB 101 or NPB 110C strongly recommended. Physiology of the various systems of birds with emphasis on digestion, respiration, excretion, and endocrine systems. Effective: 2018 Spring Quarter.

NPB 121—Physiology of Reproduction (4)
Lecture/Discussion—4 hours. Prerequisite(s): NPB 101 or NPB 110C or ANS 100 Physiological mechanisms related to reproduction, breeding efficiency and fertility, with special reference to domestic animals. GE credit: QL, SL. Effective: 2018 Spring Quarter.

NPB 121L—Physiology of Reproduction Laboratory (1)
Laboratory—3 hours. Prerequisite(s): NPB 121 (can be concurrent) Experiments on the reproductive systems of domestic animals including male and female gametes. (P/NP grading only.) Effective: 2017 Spring Quarter.

NPB 122—Developmental Endocrinology (3)
Lecture—3 hours. Prerequisite(s): NPB 101 Restricted to upper division standing. Hormonal control of development, maturation and senescence from the cellular to organismal level, with emphasis on the human. Prenatal and neonatal life, childhood and adolescence, adulthood and pregnancy, as well as the endocrinology of aging. Effective: 2003 Spring Quarter.

NPB 123—Comparative Vertebrate Organology (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): (BIS 001A, BIS 001B) or (BIS 002A, BIS 002B) Functional anatomy of major organ systems in vertebrates. Each system examined from cellular to gross level in fish, birds, and mammals. Emphasis on how differentiated cell types are integrated into tissues and organs to perform diverse physiological functions. (Same course as APC 100.) Effective: 2008 Winter Quarter.

NPB 124—Comparative Neuroanatomy (4) Review all entries
Laboratory—2 hours; Lecture—3 hours. Prerequisite(s): PSC 101 or NPB 100 or NPB 101 Overview of the neuroanatomy of the nervous system in a variety of mammalian and non-mammalian vertebrates. Examine changes or modifications to neural structures as a result of morphological or behavioral specializations. (Same course as Psychology 124) GE credit: SL. Effective: 1997 Fall Quarter.

NPB 124—Comparative Neuroanatomy (3) Review all entries
Lecture—3 hours. Prerequisite(s): NPB 101 or NPB 100 or NPB 110B or PSC 121 Overview of the neuroanatomy in mammalian vertebrates, focusing on the cerebral cortex and experimental techniques. Examine changes or modifications to neural structures as a result of morphological or behavioral specializations. (Same course as PSC 124.) Effective: 2018 Fall Quarter.

NPB 124L—Comparative Neuroanatomy Laboratory (2)
Laboratory—6 hours. Prerequisite(s): NPB 124 (can be concurrent) Pass One restricted to PSC and NPB majors; must be concurrently enrolled in NPB 124. Comparative neuroanatomy laboratory illustrating modern neuroanatomical techniques in determining neural connections within the mammalian brain. Includes experimentation and presentation of results. (Same course as PSC 124L.) Effective: 2018 Fall Quarter.

NPB 126—Comparative Physiology: Sensory Systems (3)
Lecture—3 hours. Prerequisite(s): NPB 100 or NPB 101 Basic physiological mechanisms involved in sensory systems. Comparative approach to considerations of mechanosensitive systems (audition, lateral lines, touch, echolocation, equilibrium), chemosensitive systems (olfaction, taste, pheromones), photosensitive systems (vision, infrared detection, UV detection), electoreception, and pain. Emphasis on receptors. Effective: 1997 Winter Quarter.

NPB 128—Comparative Physiology: Endocrinology (3)
Lecture—3 hours. Prerequisite(s): NPB 101 Comparison of physiological functions in the animal kingdom: animal hormones and their functions. Effective: 1997 Winter Quarter.
NPB 130—Physiology of the Endocrine Glands (4)
Lecture—4 hours. Prerequisite(s): NPB 110C or NPB 101. Advanced presentation of concepts in endocrinology with emphasis on the role of hormones in reproduction, metabolism, and disease. GE credit: VL. Effective: 2018 Winter Quarter.

NPB 132—Nature vs. Nurture: Physiological Interactions Among Genes, Nutrients and Health (3)
Lecture—3 hours. Prerequisite(s): BIS 001A or BIS 002A; or Consent of Instructor. Biochemical, physiological, genetic, and nutritional causes of important medical problems such as obesity, anorexia, heart disease and diabetes. One unit of credit allowed to students who have completed NPB 131. Effective: 2008 Fall Quarter.

NPB 133—Genes and the Brain (4)
Lecture—4 hours. Prerequisite(s): NPB 110B or NPB 100; or Consent of Instructor. BIS 101 recommended. Genetic contributions to brain evolution, development and disorders. Topics include evolution of genomic programs of neurodevelopment and the role of genetics in autism, intellectual disability, and schizophrenia. GE credit: SE. Effective: 2018 Fall Quarter.

NPB 134—General Immunology for Physiologists (3)
Lecture—2 hours; Lecture/Discussion—1 hour. Prerequisite(s): NPB 101 C- or better or NPB 110C C- or better; or Consent of Instructor. Immunology for undergrads interested in physiology aimed at understanding the physiological role of immune responses. Illustrated with examples of human diseases including diabetes, allergies and asthma, and emerging diseases such as Ebola and Zika. GE credit: SE. Effective: 2017 Fall Quarter.

NPB 139—Frontiers in Physiology (3)
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): NPB 100; NPB 101; NPB 102 (can be concurrent). Lectures by leading authorities and discussion of the latest research in newly emerging areas in physiology. Offered every fourth year. GE credit: QL, SE. Effective: 2010 Fall Quarter.

NPB 140—Principles of Environmental Physiology (3) Review all entries
Lecture—3 hours. Prerequisite(s): NPB 101; BIS 102 recommended. Physiological aspects of interactions of organisms and environmental, cellular, system, and organismal levels. Emphasis on regulatory responses/mechanisms to thermal, pressure, gravity and light environmental variables. Not open for credit to students who have completed course 148. (Former course 148.). GE credit: WE. Effective: 1997 Winter Quarter.

NPB 140—Principles of Environmental Physiology (3) Review all entries
Lecture—3 hours. Prerequisite(s): NPB 101 or NPB 110C; BIS 102 recommended. Physiological aspects of interactions of organisms and environmental, cellular, system, and organismal levels. Emphasis on regulatory responses/mechanisms to thermal, pressure, gravity and light environmental variables. Not open for credit to students who have completed NPB 148. (Former NPB 148.). GE credit: WE. Effective: 2018 Fall Quarter.

NPB 141—Physiological Adaptation of Marine Organisms (3)

NPB 141P—Physiological Adaptation of Marine Organisms/Advanced Laboratory Topics (5)
Discussion—1 hour; Laboratory—12 hours. Prerequisite(s): NPB 141 (can be concurrent); Residence at Bodega Marine Laboratory required; NPB 141 required concurrently. Students must submit application available at http://www.bml.ucdavis.edu. Training in scientific research from hypothesis to publication, including methods of library research. Research related to a topic covered in course 141. GE credit: VL, WE. Effective: 2006 Spring Quarter.

NPB 142—Environmental Endocrinology: Mechanisms for Life Cycles (3)
Lecture—3 hours. Prerequisite(s): BIS 002A; BIS 002B; BIS 002C. Effects of environmental factors on endocrine responses that affect vertebrate life history and fitness. Introduction to finite state machine theory and allostasis in life histories and coping strategies. Focus on life history stages including non-breeding, hibernation, reproduction, migration and moult. GE credit: SE, WE. Effective: 2015 Winter Quarter.

NPB 150—Advanced Animal Behavior (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): NPB 102 or PSC 101; or Consent of Instructor. Advanced integrative survey of biological principles of behavioral organization, emphasizing historical roots, current research directions, conceptual issues and controversies. Laboratory exercises on the description and analysis of the behavior of captive and free-living animals. (Same course as PSC 122.) Effective: 2018 Winter Quarter.
NPB 152—Hormones and Behavior (3)
Lecture—3 hours. Prerequisite(s): (NPB 101 or NPB 110C); (NPB 102 or PSC 101) Endocrine physiology with an emphasis on the principles of behavior. Fundamental relationships between hormones and various behaviors engaged in by the organism during its lifetime. Role of hormones in behavioral homeostasis, social behavior, reproductive behavior, parental behavior, adaptation to stress. (Same course as PSC 123.) Effective: 2018 Winter Quarter.

NPB 157—Advanced Physiology of Animal/Human Disease (3)
Lecture—1 hour; Lecture/Discussion—2 hours. Prerequisite(s): NPB 100; NPB 101; NPB 102 Lectures by leading authorities and discussion of the latest research in newly emerging areas in behavioral biology. Offered every fourth year. GE credit: QL, SE. Effective: 2019 Spring Quarter.

NPB 159—Frontiers in Behavior (3)
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): NPB 100; NPB 101; NPB 102 Lectures by leading authorities and discussion of the latest research in newly emerging areas in behavioral biology. Offered every fourth year. GE credit: QL, SE. Effective: 2010 Fall Quarter.

NPB 161—Developmental Neurobiology (3)
Lecture—3 hours. Prerequisite(s): NPB 100 or NPB 101 or NPB 110B Issues, theoretical concepts, and methodologies in developmental neurobiology. Topics include prenatal and postnatal differentiation of neurons, and plasticity in the mature and aging brain. Integration of neurochemical, structural, physiological and behavioral perspectives. GE credit: SE. Effective: 2018 Winter Quarter.

NPB 162—Neural Mechanisms of Behavior (3)
Lecture—3 hours. Prerequisite(s): NPB 100 or NPB 101 or NPB 110B Relationship between brain and behavior. Identification and analysis of the relevant neural circuits involved. Examples of systems to be considered are birdsong, locomotion, echolocation. Effective: 2018 Winter Quarter.

NPB 163—Systems Neuroscience (4)
Lecture—3 hours; Lecture/Discussion—1 hour. Prerequisite(s): NPB 100 or NPB 110B; Or equivalent basic neuroscience training with consent of instructor. Concepts and techniques in systems neuroscience: e.g., measuring and manipulating neural activity, structure of neocortex, sensory processing, motor control, storage of information, neural codes, neural mechanisms underlying cognitive functions. GE credit: SE. Effective: 2018 Winter Quarter.

NPB 164—Mammalian Vision (4)
Lecture—3 hours. Prerequisite(s): NPB 100 or NPB 110B or PSC 101 Structure and function of the mammalian visual system, from the formation of images on the retina through visually guided behavior and perception. Emphasis on biological mechanisms underlying vision. Effective: 2017 Spring Quarter.

NPB 165—Neurobiology of Speech Perception (3)
Lecture—3 hours. Prerequisite(s): NPB 110B or NPB 100 or NPB 101; or Consent of Instructor. Interdisciplinary approach to speech perception with emphasis on functional neuroanatomy and behavior. Topics include auditory processing in time and space, intelligibility in noisy environments, visual speech, evolution of vocal communication, models of speech perception, development, and hearing impairment. GE credit: SL. Effective: 2018 Winter Quarter.

NPB 166—Math Tools for Neuroscience (4)
Lecture—4 hours. Prerequisite(s): (NPB 100 or NPB 110B); (MAT 016A, MAT 016B, MAT 016C) or (MAT 017A, MAT 017B, MAT 017C) or (MAT 021A, MAT 021B, MAT 021C); or Consent of Instructor. Introduction to mathematics techniques used in neuroscience. Applications to neuroscience of differential equations, linear algebra, Fourier transforms, correlation and convolution, and probability theory. GE credit: QL. Effective: 2018 Winter Quarter.

NPB 167—Computational Neuroscience (5)
Lecture—4 hours; Lecture/Lab—3 hours. Prerequisite(s): (NPB 100 or NPB 110B); (MAT 016A, MAT 016B, MAT 016C) or (MAT 017A, MAT 017B, MAT 017C) or (MAT 021A, MAT 021B, MAT 021C); or Consent of Instructor. PHY 007A, PHY 007B or equivalent recommended. Mathematical models and data analysis techniques used to describe computations performed by nervous systems. Lecture topics include single neuron biophysics, neural coding,
network dynamics, memory, plasticity, and learning. Lab topics include programming mathematical models and data analysis techniques in MATLAB. GE credit: QL, SE. Effective: 2018 Winter Quarter.

NPB 168—Neurobiology of Addictive Drugs (4)
Lecture/Discussion—4 hours. Prerequisite(s): NPB 100 or NPB 110B or NPB 110C or NPB 101; Or equivalents. Neurobiological basis for the effects and mechanisms of action of drugs with addictive potential, including opiates (morphine, heroin, methadone), amphetamines, cocaine, nicotine, marijuana (cannabinoids), alcohol, caffeine, and mind-altering drugs such as LSD and antidepressants. GE credit: SL, VL. Effective: 2018 Winter Quarter.

NPB 169—Frontiers in Neurobiology (3)
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): NPB 100; NPB 101; NPB 102 (can be concurrent) Lectures by leading authorities and discussion of the latest research in newly emerging areas in neurobiology. Offered every fourth year. GE credit: QL. Effective: 2010 Fall Quarter.

NPB 171—Physiology of Neuroimmune Interactions (4)
Lecture—3 hours; Lecture/Discussion—1 hour. Prerequisite(s): BIS 002A; (NPB 012 (can be concurrent) or NPB 100 (can be concurrent) or NPB 110B (can be concurrent)); or Consent of Instructor. Completion of PMI 126 or MMI 188 recommended prior to this course. Explores the complex interactions of the nervous and immune systems, and examine how the systems function together to serve homeostasis, behavior, and disease (such as Alzheimer's, autism, and multiple sclerosis). GE credit: SL. Effective: 2017 Fall Quarter.

NPB 172—Map Formation in the Brain (3)
Lecture—3 hours. Prerequisite(s): NPB 100 C- or better or NPB 110B C- or better; or equivalent basic neuroscience training with consent of instructor. Topographic map connection is a fundamental principle for establishing neural network in the brain. This course will provide comprehensive understanding of the current concepts of map formation in various sensory and motor nervous systems. GE credit: SE. Effective: 2017 Spring Quarter.

NPB 173—Neurobiology of Brain Disorders (3)
Lecture—3 hours. Prerequisite(s): NPB 110B or NPB 100; or Consent of Instructor. Examination of brain disorders from a basic science perspective to gain insights into the mechanisms of their action. Genetic, molecular, cellular, circuit, and environmental basis of a variety of brain disorders. How insights about underlying mechanisms may lead to the development of improved therapies. Effective: 2018 Spring Quarter.

NPB 190C—Research Conference (1)
Discussion—1 hour. Prerequisite(s): NPB 199 (can be concurrent); and Consent of Instructor. Upper division standing in Neurobiology, Physiology, and Behavior or related biological science; NPB 199 required concurrently. Research findings and methods in neurobiology, physiology, and/or behavior. Presentation and discussion of research by faculty and students. May be repeated for credit. May be repeated for credit. (P/NP grading only.) Effective: 1999 Spring Quarter.

NPB 192—Internship (1-12)
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Completion of 84 units. Work experience off and on campus in all subject areas offered in neurobiology, physiology, & behavior. May be repeated for credit. (P/NP grading only.) Effective: 2008 Fall Quarter.

NPB 194HA—Neurobiology, Physiology, and Behavior—Honors (1)
Laboratory—12 hours. Prerequisite(s): Senior standing; minimum 3.500 GPA in courses counted toward major; approval by the master advisor. Honors project in Neurobiology, Physiology, and Behavior. Laboratory research on a specific question. The project is developed with the sponsoring faculty member and approved by the student's Honors Thesis Committee. Honors thesis to be submitted upon completion of the project. (P/NP grading only.) Effective: 1997 Winter Quarter.

NPB 194HB—Neurobiology, Physiology and Behavior—Honors (4)
Laboratory—12 hours. Prerequisite(s): Senior standing; minimum 3.500 GPA in courses counted toward major; approval by the master advisor. Honors project in Neurobiology, Physiology, and Behavior. Laboratory research on a specific question. The project is developed with the sponsoring faculty member and approved by the student's Honors Thesis Committee. Honors thesis to be submitted upon completion of the project. (P/NP grading only.) Effective: 2003 Spring Quarter.

NPB 194HC—Neurobiology, Physiology, and Behavior—Honors (2)
Laboratory—12 hours. Prerequisite(s): Senior standing; minimum 3.500 GPA in courses counted toward major; approval by the master advisor. Honors project in Neurobiology, Physiology, and Behavior. Laboratory research on a specific question. The project is developed with the sponsoring faculty member and approved by the student's
Honors Thesis Committee. Honors thesis to be submitted upon completion of the project. (P/NP grading only.) Effective: 1997 Winter Quarter.

NPB 197T—Tutoring in Neurobiology, Physiology, and Behavior (1-5)
Discussion—2-6 hours. Prerequisite(s): Consent of Instructor. Upper division standing. Assisting the instructor by tutoring students in one of the Department's regular courses. May be repeated for credit. (P/NP grading only.) Effective: 2008 Fall Quarter.

NPB 198—Directed Group Study (1-5)
Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

NPB 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

NPB 211—Advanced Topics in Neuroimaging (3)
Laboratory—1 hour; Seminar—2 hours. Prerequisite(s): PSC 210; or Consent of Instructor. Restricted to 16 students. Critical presentation and discussion of the most influential advanced issues in neuroimaging, emphasizing fMRI design/analysis and the integration of fMRI with EEG/MEG. May be repeated for credit Course may be repeated when topics differ. (Same course as NSC 211 and PSC 211.) (S/U grading only.) Effective: 2017 Spring Quarter.

NPB 212—Light and Fluorescence Microscopy (3)
Laboratory—1 hour; Lecture—2 hours. Prerequisite(s): Consent of Instructor. Restricted to maximum 16 students. Theory and practical application of light and fluorescence microscopy in the biological sciences. Laboratory component will focus on an optics bench, where we build simple compound and confocal microscopes on an optical rail. Effective: 2017 Spring Quarter.

NPB 217—Advanced Avian Physiology (1)
Project (Term Project)—1 hour. Prerequisite(s): NPB 117; and Consent of Instructor. Graduate standing; NPB 117 required concurrently. Study in depth of a topic in avian physiology through development of a lecture with associated instructional materials such as lesson plan, readings, presentation, and evaluation aids. Effective: 2009 Summer Session 1.

NPB 221—Cellular Neuroscience (4)
Discussion—1.5 hours; Lecture—3 hours. Advanced course on cellular and subcellular organization of the nervous system. Membrane channels, sensory transduction, synaptic transmission and cellular aspects of development and learning. Effective: 2015 Winter Quarter.

NPB 222—Systems Neuroscience (5)
Discussion—1 hour; Lecture—4 hours. Prerequisite(s): Graduate standing or consent of instructor. Integrative and information-processing aspects of nervous system organization. Topics include sensory systems, motor function, sensorimotor integration, the limbic system, and the neurobiology of learning and memory. (Same course as NSC 222.) Effective: 2002 Winter Quarter.

NPB 245—Computational Models of Cellular Signaling (3)
Lecture—3 hours. Prerequisite(s): Consent of Instructor. Computational and mathematical techniques in modeling of regulatory and signaling phenomena in neurobiology and cell physiology, focusing on linear and nonlinear ordinary differential equation models. Applications include ion channel kinetics, electrical activity, signal transduction, calcium oscillations, and simple neural circuits. Effective: 1997 Winter Quarter.

NPB 247—Topics in Functional Neurogenomics (2)
Discussion—1 hour; Lecture—1 hour. Prerequisite(s): Graduate standing or consent of instructor. The theory, methods and principles of functional neurogenomics with emphasis on the relationship to molecular mechanisms involved in development and disease of the nervous system. (Same course as NSC 247.) Effective: 2003 Spring Quarter.

NPB 261A—Topics in Vision: Eyes and Retinal Mechanisms (2)
Lecture/Discussion—2 hours. Prerequisite(s): NPB 100 or NPB 112; Or the equivalent; graduate standing. Structure and function of the visual system, with emphasis on the eye and retina, including optics, anatomy, transduction, retinal synapses, adaptation, and parallel processing. (Same course as NSC 261A and MCP 261A.) (S/U grading only.) Effective: 2004 Winter Quarter.

NPB 261B—Topics in Vision: Systems, Psychophysics, Computational Models (2)
Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. NPB 261A recommended. Functions of the central visual pathways and their underlying mechanisms. Recent research on aspects of anatomy, biochemistry,
electrophysiology, psychophysics, development, and genetics of the visual system. (Same course as NSC 261B and MCP 261B.) (S/U grading only.) Effective: 2004 Winter Quarter.

NPB 261C—Topics in Vision: Clinical Vision Science (2)
Lecture/Discussion—2 hours. Prerequisite(s): NPB 261A; NPB 261B; or Consent of Instructor. Causes and mechanistic bases of major blinding diseases. Recent research on aspects of anatomy, biochemistry, electrophysiology, psychophysics, development, and genetics of the visual system related to disease. (Same course as NSC 261C and MCP 261C.) (S/U grading only.) Effective: 2005 Spring Quarter.

NPB 263—Modeling in Systems Neuroscience (4)
Lecture—3 hours; Lecture/Lab—1 hour. Prerequisite(s): Consent of Instructor. Modeling as a tool in systems neuroscience. Mathematical techniques will be introduced and used to explore advanced topics in echolocation, sound localization, electrosensation, communications, and motor systems. Other topics include transforms, modeling assumptions, scales and linearity. Effective: 1997 Winter Quarter.

NPB 267—Computational Neuroscience (5)
Lecture—4 hours; Lecture/Lab—3 hours. Prerequisite(s): One course in general Neuroscience at the level of NPB 100 or NPB 110B; one year college-level Calculus at the level of MAT 016A, MAT 016B, MAT 016C or higher; one year Physics at the level of PHY 007A, PHY 007B, PHY 007C recommended; or Consent of Instructor. Mathematical models and data analysis techniques used to describe computations performed by nervous systems. Lecture topics include single-neuron biophysics, neural coding, network dynamics, memory, plasticity, and learning. Lab topics include programming mathematical models and data analysis techniques in MATLAB. (Same course as NSC 267.) Effective: 2018 Winter Quarter.

NPB 270—How to Write a Fundable Grant Proposal in the Biomedical Sciences (2)
Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Restricted to members of the Neuroscience and BMCDB graduate groups; graduate students in other biomedical programs may enroll with instructor permission. Teaches the do's and don'ts of writing grants in the biomedical sciences and the mechanisms of the review process. May be repeated for credit. (Same course as NSC 270.) Effective: 2016 Spring Quarter.

NPB 271A—Core Concepts & Methods in Learning, Memory, and Plasticity (2)
Lecture/Discussion—2 hours. Prerequisite(s): Graduate Standing or Consent of Instructor. Core concepts and methods used in studies of learning, memory and plasticity. Behavioral paradigms and measurement approaches in human and animal studies of learning and plasticity, as well as a consideration of the functional, anatomical and neuronal mechanisms underlying brain plasticity. (Same course as PSC 271A, NSC 271A.) (S/U grading only.) Effective: 2019 Fall Quarter.

NPB 271B—Core Concepts & Methods in Learning, Memory, & Plasticity (2)
Lecture/Discussion—2 hours. Prerequisite(s): NPB 271A or NSC 271A or PSC 271A Core concepts and detailed survey methods used in studies of learning, memory and plasticity, from the cellular and molecular level to the level of neural circuits. Areas of learning, memory, and plasticity research where recent progress has been made in linking across these levels of analysis. (Same course as PSC 271B, NSC 271B.) (S/U grading only.) Effective: 2020 Winter Quarter.

NPB 271C—Translational Approaches to Learning, Memory, & Plasticity Disorders (2)
Lecture/Discussion—2 hours. Prerequisite(s): NPB 271B or NSC 271B or PSC 271B Neurological disorders, the effect of these disorders on learning, memory and plasticity, approved therapeutic options and current research designed to improve understanding and treatment of these diseases: (i) the clinical presentation, diagnostic criteria, and existing therapies, (ii) mechanistic studies in humans and animal models, and (iii) molecular pathways involved in the disease and approaches for drug discovery. (Same course as PSC 271C, NSC 271C.) (S/U grading only.) Effective: 2020 Spring Quarter.

NPB 285—Literature in Visual Neuroscience (2)
Seminar—2 hours. May be repeated for credit. (Same course as NSC 285.) (S/U grading only.) Effective: 2008 Fall Quarter.

NPB 287A—Topics in Theoretical Neuroscience (2)
Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. In-depth exploration of topics in theoretical neuroscience. Topic varies each year. Fall quarter (287A): foundational material from books and review articles. Spring quarter (287B): continuation of year's topic through readings of seminal articles from the primary literature. May be repeated for credit. (Same course as NSC 287A.) (S/U grading only.) Effective: 2017 Spring Quarter.
NPB 287B—Topics in Theoretical Neuroscience (2)
Seminar—2 hours. Prerequisite(s): Consent of Instructor. In-depth exploration of topics in theoretical neuroscience. Topic varies each year. Fall quarter (287A): foundational material from books and review articles. Spring quarter (287B): continuation of year's topic through readings of seminal articles from the primary literature. May be repeated for credit. (Same course as NSC 287B.) (S/U grading only.) Effective: 2009 Spring Quarter.

NPB 291—Auditory Neuroscience (1)
Discussion—0.5 hours; Seminar—0.5 hours. Prerequisite(s): NPB 100 or NPB 112 or NSC 222; Or the equivalent. Exploration of various important aspects of auditory physiology, behavior and psychophysics through review of original literature. New topic each quarter. May be repeated for credit with consent of instructor. May be repeated for credit. (S/U grading only.) Effective: 1998 Spring Quarter.

Human Rights Studies
(College of Letters and Science)
Keith Watenpaugh, Ph.D., Program Director
Program Office. 213 Sproul Hall; 530-752-1219; http://human-rights.ucdavis.edu

Human Rights Studies is the newest interdisciplinary program at UC Davis and the first of its kind in the University of California system. Our new century has brought with it a host of complex, unprecedented, and daunting challenges to basic human rights; courage, creativity, and a commitment to sustained and innovative interdisciplinary collaboration are necessary to understand, address and solve these challenges. Human Rights Studies is a place for incubating, supporting, coordinating, and promoting faculty and student research, teaching, learning, service, and engagement across the campus on Human Rights and its attendant fields: humanitarianism, environmental justice, genocide, mass sexual and gender-based violence, refugee studies, memory studies, and post-conflict transitional justice. Undergraduate Human Rights students go on to join the Peace Corps, attend graduate school in the humanities and social sciences, and pursue professional programs and careers in public policy, law, education, nursing, and medicine.

Human Rights Studies | HMR Minor
(College of Letters and Science)
http://humanrightsminor.ucdavis.edu

The interdisciplinary minor in Human Rights gives students a chance to explore human rights as both a specific issue and within larger contexts through a wide variety of disciplines and courses.

Courses in the minor provide students with an opportunity to approach human rights as a practical, as well as an intellectual problem. The minor will be of special interest to students majoring in area studies and those planning to pursue careers in public service, law and international relations. Students will take courses in which human rights problems are the central focus of the course and other courses, which while not having human rights as their central theme, include elements that address the history, theory, practice, violation, promotion and protection of
human rights, or in which students have the opportunity to conduct research projects relevant to the study of human rights.

Program Objectives

In addition to completing RST 090 or 134, students must take two additional Core Courses and two from the Elective Course list. Students must select courses from at least three different departments or programs to satisfy minor requirements.

Advising. Keith Watenpaugh, kwatenpaugh@ucdavis.edu.

### Human Rights

**Choose two core courses:**

With prior permission of the Interdisciplinary Minor in Human Rights advisor, students may substitute one course from the list of electives as a core course.

- HIS 142A History of the Holocaust 4
- RST 131 Genocide *(Discontinued)* 4
- SOC 104 The Political Economy of International Migration 4
- SPA 159 Special Topics in Latin American Literature and Culture 4

When taught as "Witnessing in Latin America: Trauma, Violence and Memory."

**Choose two electives:**

- AMS 156 Race, Culture and Society in the United States 4
- ANT 126B Women and Development 4
- ANT 130A Cultural Dimensions of Globalization 4
- ANT 131 Ecology and Politics 4
- CHI 131 Chicanas in Politics and Public Policy 4
- CHI 131S Chicanas in Politics and Public Policy 4
- CHI 150 The Chicana and Chicano Movement 4
- ENL 107 Freedom of Expression 4
- HIS 142A History of the Holocaust 4
- HIS 142B The Memory of the Holocaust 4
- HIS 172 American Environmental History 4
- HIS 177A History of Black People and American Race Relations, 1450-1860 4
- HIS 177B History of Black People and American Race Relations, 1860-Present 4
- HIS 183A The Frontier Experience: Trans-Mississippi West 4
- HIS 183B The Frontier Experience: Trans-Mississippi West 4
- HIS 189 California History 4
- NAS 115 Native Americans in the Contemporary World 4
- NAS 130B Native American Ethno-Historical Development 4
- NAS 130C Native American Ethno-Historical Development 4
- NAS 157 Native American Religion and Philosophy 4
- RST 131 Genocide *(Discontinued)* 4
- RST 167 Iraq 4
- SOC 104 The Political Economy of International Migration 4
- SOC 130 Race Relations 4
- SOC 137 African American Society and Culture 1790 to 1990 4
- SOC 157 Social Conflict 4
- SOC 160 Sociology of the Environment 4
- SOC 171 Sociology of Violence and Inequality 4
- SPA 159 Special Topics in Latin American Literature and Culture 4

Only if topic is related to human rights. Prior approval from minor advisor is required.
Human Rights Studies | HMR Courses

Courses in HMR:

HMR 001—Human Wrongs/Human Rights (4)
Discussion—1 hour; Lecture—3 hours. Introduction to Human Rights and the problems they seek to address. Using key episodes of inhumanity like slavery, genocide, and racism. Examines how international movements for social justice led to the emergence of the international Human Rights system. GE credit: AH, SS, WC, WE. Effective: 2017 Fall Quarter.

HMR 120A—Art, Architecture, and Human Rights (4)
Lecture/Discussion—4 hours. Study of human rights as they relate to art, architecture, and cultural heritage. Examines museums, art collections, and cultural-heritage management, their relation to the cultural prerogatives of communities and indigenous groups, and protection of cultural heritage during war and conflict. (Same course as AHI 120A.) GE credit: AH, DD, SS, VL, WC, WE. Effective: 2017 Fall Quarter.

HMR 130—Special Topics in Human Rights (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): HMR 134 or RST 134 recommended. Thematic study of human rights. Topics may include contemporary or historical issues in the promotion, protection, and violation of human rights; human rights and the arts, religion, literature are possible topical areas. May be repeated for credit when topic differs. GE credit: AH, SS, WC, WE. Effective: 2017 Fall Quarter.

HMR 131—Genocide (4) Review all entries
Lecture/Discussion—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): Upper division standing. Comparative and critical study of the modern phenomenon of genocide from religious, ethical and historical perspectives. (Same course as Religious Studies 131.) GE credit: AH, SS, VL, WC, WE. Effective: 2014 Spring Quarter.

HMR 131—Genocide (4) Review all entries
Lecture/Discussion—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): Upper division standing. Comparative and critical study of the modern phenomenon of genocide from religious, ethical and historical perspectives. GE credit: AH, SS, WC, WE. Effective: 2018 Fall Quarter.

HMR 134—Human Rights (4) Review all entries
Lecture/Discussion—3 hours; Term Paper/Discussion—1 hour. Introduction to the interdisciplinary study of the origins, evolution, denial and protection of Human Rights. No credit for students who have completed RST 090. (Same course as RST 134.) GE credit: AH, SS, WC, WE. Effective: 2014 Spring Quarter.

HMR 134—Human Rights (4) Review all entries
Lecture/Discussion—3 hours; Term Paper/Discussion—1 hour. Introduction to the interdisciplinary study of the origins, evolution, denial and protection of Human Rights. No credit for students who have completed RST 090. GE credit: AH, SS, WC, WE. Effective: 2019 Winter Quarter.

HMR 136—Human Rights in the Middle East (4)
Lecture/Discussion—3 hours; Term Paper. Study of the experience of Human Rights in the modern Middle East, with special attention to the Human Rights issues raised by events of Arab Spring; Palestine-Israel conflict; history of genocide, mass killing and totalitarianism in the region. GE credit: AH, SS, WC, WE. Effective: 2017 Fall Quarter.

HMR 138—Human Rights, Gender, and Sexuality (4)
Lecture/Discussion—3 hours; Term Paper. Gender and sexuality in the context of human rights. Topics include women's participation in the public sphere, the right to change gender, the right for family privacy, and the right to marriage. GE credit: AH, WC, WE. Effective: 2018 Fall Quarter.

HMR 140A—Human Rights and the Popular Imagination (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Arts, music, literature, film and television in the rise of human rights movements and the protection, promotion and violation of human rights. Topics may include human rights and science fiction; human rights and the graphic novel; human rights and contemporary cinema; human rights and rock and roll GE credit: ACGH, AH, SS, WC, WE. Effective: 2019 Winter Quarter.
HMR 140B—The Art & Politics of Memory in Latin America: Truth, Justice, and Reconciliation (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Critical analysis of the dictatorships and civil conflicts that took place in Cold War Latin America. Case studies focus on the violation of human rights as well as on the political and cultural battles for truth, justice, and reconciliation that take place in the aftermath of those violations. Emphasis on how memory is constructed, in what forms, by whom, and for what purposes. GE credit: AH, SS, WC, WE. Effective: 2019 Summer Session 2.

HMR 161—Human Rights in Latin America (4)
Lecture—3 hours; Term Paper. History of the origins, denial and protection of Human Rights in Latin America. Emphasis on dictatorships, political violence, social resistance, democracy, justice, accountability, truth commissions, memory. (Same course as HIS 161.) GE credit: AH, SS, VL, WC, WE. Effective: 2017 Fall Quarter.

HMR 162Y—The History of Human Rights in Europe (4)
Lecture—3 hours; Web Electronic Discussion—1 hour. History of the origins, development, and state of international humanitarian law (IHL) and international human rights law (IHRL) in Europe. Emphasis on Enlightenment-era and modern theories of the source, utility, and limits of human rights. (Same course as HIS 126Y.) GE credit: SS, WC. Effective: 2017 Fall Quarter.

HMR 190—Seminar (4)
Seminar—3 hours; Term Paper. Emphasis on current scholarly debate about the methods for analyzing and comparing diverse human rights issues with the intention of integrating disciplined study of the field. Effective: 2017 Fall Quarter.

HMR 198—Directed Group Study (1-4)
Variable. Prerequisite(s): Consent of Instructor. Group study on focused topics in human rights. May be repeated for credit. (P/NP grading only.) Effective: 2017 Fall Quarter.

HMR 199—Special Study for Advanced Undergraduates (1-5)
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. Opportunity for advanced undergraduate students to work with a faculty member in a focused manner on a topic or topics of human rights. May be repeated for credit. (P/NP grading only.) Effective: 2017 Fall Quarter.

HMR 200A—History, Theory and Criticism of Human Rights (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Restricted to graduate students. Introduces the advanced study of Human Rights and the theoretical and practical elaboration of the international Human Rights system. Seminar will engage with criticism of Human Rights and develop research and teaching within disciplinary and interdisciplinary frameworks. (Same course as REL 231E.) Effective: 2017 Fall Quarter.

HMR 200B—Memory, Culture, and Human Rights (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Restricted to graduate students. Explores the multiple convergences among memory, culture, and human rights. Discusses diverse approaches to how societal actors in different historical, cultural, and national settings, construct meanings of past political violence, inter-group conflicts, and human rights struggles. (Same course as CST 210.) Effective: 2017 Fall Quarter.

HMR 298—Group Study (1-4)
Variable—1 hour. Prerequisite(s): Consent of Instructor. Restricted to graduate students. Group study on focused topics in human rights. Four-unit courses may serve as electives for the Designated Emphasis in Human Rights. May be repeated up to 16 unit(s) when topic differs. Effective: 2017 Fall Quarter.

HMR 299—Individual Study (1-12)
Variable—1-12 hours. Prerequisite(s): Consent of Instructor. Restricted to graduate students. Individual study for the designated emphasis in human rights. May be repeated for credit. (S/U grading only.) Effective: 2017 Fall Quarter.

HMR 396—Teaching Assistant Training Practicum (1-4)
Variable—1-4 hours. Prerequisite(s): Consent of Instructor. Graduate standing. Restricted to graduate students. Teaching Assistant Training Practicum. May be repeated for credit. (S/U grading only.) Effective: 2017 Fall Quarter.

**Humanities**

**Humanities | Humanities Information**

(College of Letters and Science)
The Humanities program is an undergraduate and graduate curriculum emphasizing innovative approaches to ideas that matter. Courses offered through the program are interdisciplinary in scope and aim to develop critical thinking and writing skills in three principal areas: major figures, works, and genres in world cultures; major themes in world literatures; and relationships between history, society, and culture.

**Humanities | HUM Courses**

**Courses in HUM:**

**HUM 001—Humanities Forum (2)**
Lecture—2 hours. Reading and discussion of a single work representative of a particular culture, historical period, or genre and significant for its ongoing cultural impact in the humanities, sciences, social sciences, technology, and popular arenas. Attention to provocative implications for contemporary society. May be repeated up to 1 time(s) if topic differs. GE credit: AH. Effective: 2001 Fall Quarter.

**HUM 001D—Issues and Concepts in the Humanities (2)**
Discussion—2 hours. Prerequisite(s): HUM 001 (can be concurrent); HUM 001 required concurrently. Small group discussions and preparation of short papers for course 1. May be repeated up to 1 time(s) if topic differs. GE credit: AH, WE. Effective: 2001 Fall Quarter.

**HUM 002A—Global Humanities Forum (4)**
Extensive Writing; Lecture—3 hours. Introduction to humanities topics and methodologies; analysis of major figures, works, and genres in world arts and literatures, with emphasis on relationships between history, society, and culture. May be repeated up to 1 time(s) topic differs. GE credit: AH, WC, WE. Effective: 2010 Fall Quarter.

**HUM 002B—American Humanities Forum (4)**
Extensive Writing; Lecture—3 hours. Introduction to humanities topics and methodologies; analysis of major figures, works, and genres in American arts and literatures, with emphasis on relationships between history, society, and culture. May be repeated up to 1 time(s) topic differs. GE credit: ACGH, AH, WE. Effective: 2010 Fall Quarter.

**HUM 003—Medicine and Humanities (4)**
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): Completion of Subject A requirement. Evolution of the "medical arts" into the "science of medicine." The culture of medicine in the context of society, medical ethics. GE credit: AH, SS, WE. Effective: 1999 Winter Quarter.

**HUM 004—Animals and Human Culture (2)**
Lecture—2 hours. The meaning of human relations with animals studied across a variety of historical periods and cultures and from a variety of humanistic perspectives. GE credit: AH. Effective: 2001 Spring Quarter.

**HUM 004D—Animals and Human Culture: Discussion (2)**
Discussion—2 hours. Prerequisite(s): HUM 004 (can be concurrent); HUM 004 required concurrently. Small group discussions and preparation of short papers for course 4. GE credit: AH, WE. Effective: 2001 Spring Quarter.

**HUM 007—Travel and Travel Literature (4)**
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): Subject A requirement. History of travel from the age of exploration to the modern era. Contemporary trends in travel, including mas tourism, adventure travel, and ecotravel. Social, economic, and cultural issues related to modern trends in travel. Analysis of literary representations of travel. GE credit: AH, WC, WE. Effective: 2000 Spring Quarter.

**HUM 008—Introduction to Perspectives on Narrative (4)**
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): Satisfaction of Subject A requirement. Interdisciplinary approach to the use of story across time, culture, and discipline. How the telling and retelling of
particular stories reflect the values, concerns, and assumptions of their original audiences and genres. GE credit: AH, WE. Effective: 1999 Spring Quarter.

**HUM 009—Don Quixote and the Modern World (2)**
Lecture—2 hours. Reading Don Quixote as emblem of modernity in the West. Issues of reality versus illusion, heroism, freedom and self-fulfillment, racial tolerance and love. Don Quixote in other cultural and popular media: film, dance, art, musical drama, and television. GE credit with concurrent enrollment in course 9D: ArtHum, Wrt. GE credit: AH, WC. Effective: 1999 Winter Quarter.

**HUM 009D—Don Quixote and the Modern World Discussion (2)**
Discussion—2 hours. Prerequisite(s): HUM 009 (can be concurrent); HUM 009 required concurrently. Small group discussions and preparation of short papers for course 9. GE credit: AH, WC, WE. Effective: 1999 Winter Quarter.

**HUM 010—How to be a Critic: Understanding Cultural Products and Practices (2)**
Lecture—2 hours. Introduction to key topics and methodologies of interest to humanists. Series uses a variety of critical approaches to examine the cultural significance of subjects such as: fashion, film, architecture, music, food, dance. May be repeated up to 1 time(s) if topic differs. GE credit: AH. Effective: 2017 Fall Quarter.

**HUM 010D—How to be a Critic: Discussion (2)**
Discussion—2 hours. Concurrent enrollment in HUM 010 required. Optional discussion section can be taken concurrently with HUM 10. Small group discussions and preparation of short papers. GE credit: WE. Effective: 2017 Fall Quarter.

**HUM 013—Witches: Myth and Historical Reality (4)**
Extensive Writing; Lecture—3 hours. This course examines the historical construction of the witch. The four areas covered are: European pagan religions and the spread of Christianity; the "Burning' Times" in early modern Europe; 17th-century New England and the Salem witch trials; and fairytales. GE credit: AH, WC, WE. Effective: 2006 Spring Quarter.

**HUM 015—Language and Identity (4)**
Extensive Writing—1 hour; Lecture/Discussion—3 hours. Introduction to topics related to the construction of identity through language use, including geographical and social factors affecting language groups. Language ideology affecting linguistic groups, including bilinguals and non-native speakers of English. GE credit: AH, SS, WE. Effective: 2002 Spring Quarter.

**HUM 060—Narrative and Argumentative Approaches to Major Current Issues in the Media, Culture, and Society (4)**
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): English A or the equivalent. Interdisciplinary approach to contemporary issues (abortion, AIDS, civil rights, war and peace, welfare state) around which individuals, communities and institutions define themselves in American society, by applying principles of narrative theory to the narratives where those issues are embedded. GE credit: AH, WE. Effective: 1998 Winter Quarter.

**HUM 092—Internship (1-12)**
Internship—3-36 hours. Internships in fields where students can practice their skills. May be repeated for credit. (P/ NP grading only.) Effective: 2004 Fall Quarter.

**HUM 144—Marx, Nietzsche, Freud (4)**
Lecture/Discussion—3 hours; Term Paper. Study of major texts of Marx, Nietzsche, and Freud, selected with an eye to their impact on 20th-century economics, ethics, and attitudes toward eros. Particular focus on conceptions of the self and the individual's relation to society. (Same course as GER 144.) GE credit: AH, WC. Effective: 2011 Spring Quarter.

**HUM 180—Topics in the Humanities (4)**
Lecture/Discussion—3 hours; Term Paper. Analysis of interdisciplinary issues in the Humanities. Topics will vary. May be repeated up to 1 time(s). GE credit: AH. Effective: 2005 Winter Quarter.

**HUM 192—Internship (1-12)**
Internship—3-36 hours. Internships in fields where students can practice their skills. May be repeated for credit. (P/ NP grading only.) Effective: 2004 Fall Quarter.

**HUM 198—Directed Group Study (1-4)**
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

**HUM 199—Special Study for Advanced Undergraduates (1-4)**
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.
HUM 250—Topics in the Humanities (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Topics in the humanities, selected by the instructor. May be repeated once for credit. May be repeated up to 1 time(s). Effective: 1997 Winter Quarter.

HUM 292—Graduate Internship (1-15)
Lecture—3 hours; Lecture/Discussion—1 hour. Prerequisite(s): Consent of Instructor. Individually designed supervised internship, off campus, in community or institutional setting. Developed with advice of faculty mentor. May be repeated up to 15 unit(s). (S/U grading only.) Effective: 2005 Spring Quarter.

HUM 298—Directed Group Study (1-5)
Variable. (S/U grading only.) Effective: 2005 Spring Quarter.

HUM 299—Individual Research (1-4)
Variable. Individual research in the humanities resulting in a formal written research report. (S/U grading only.) Effective: 1997 Winter Quarter.

HUM 396—Teaching Assistant Training Practicum (1-4)
Variable—3-12 hours. Prerequisite(s): Consent of Instructor. Graduate standing. May be repeated for credit. (S/U grading only.) Effective: 2005 Winter Quarter.

**Hydrologic Sciences (Graduate Group)**

**Hydrologic Sciences (Graduate Group) | HYD Information**

Thomas Harter, Ph.D., Chairperson of the Group

**Group Office.** 1152 Plant and Environmental Sciences Building; 530-752-1669; [http://hsgg.ucdavis.edu/](http://hsgg.ucdavis.edu/)

**Faculty.** [http://hsgg.ucdavis.edu/people/faculty/](http://hsgg.ucdavis.edu/people/faculty/)

**Hydrologic Sciences (Graduate Group) | HYD M.S.**

Thomas Harter, Ph.D., Chairperson of the Group

**Group Office.** 1152 Plant and Environmental Sciences Building; 530-752-1669; [http://hsgg.ucdavis.edu/](http://hsgg.ucdavis.edu/)

**Faculty.** [http://hsgg.ucdavis.edu/people/faculty/](http://hsgg.ucdavis.edu/people/faculty/)

**Graduate Study.** The Hydrologic Sciences Graduate Group offers M.S. and Ph.D. degrees. Hydrologic Sciences integrates numerous and diverse fields of sciences to deepen the understanding of the physical and biogeochemical dynamics of water and water resources below, on, and above the land surface. It considers the interactions between water, the natural environment, agriculture, urban areas, ecosystems, climate, and societal systems. And it investigates water management, regulations, water law, and societal conflicts around water. Students have the ability to take advantage of the breadth of earth, environmental, agricultural, and social sciences and engineering resources on campus that are related to water in the natural and built environment. Students deepen their understanding, advance their critical thinking and analysis skills, and gain in-depth knowledge of innovative, leading hydrologic science tools and techniques to employ for problem solving.

**Specialization.** To accommodate the diversity of preparation and interests among students, the program offers five specializations from which the student selects one for their M.S.: physical hydrology, water policy and management, hydrochemistry, hydrobiology, and earth surface processes. Two options – a thesis option (Plan I) and a comprehensive exam option (Plan II) – are available for obtaining the Master of Science.

**Preparation.** Applicants to the program are expected to have completed or to be completing an undergraduate degree in environmental, physical, chemical, or biological sciences, mathematics, engineering, or related degrees. Undergraduate study must include one year of calculus and one course each in probability/statistics, computer programming, physical geology, and introductory hydrology. Additional undergraduate preparation, expected to be completed before entering the program, depend on the choice of specialization: physical hydrology and earth surface processes require one course each in linear algebra, differential equations, and fluid mechanics, one year of general physics, and two courses of general chemistry. Water policy and management requires one course each in microeconomics and in public policy. Hydrochemistry requires one year each in general biology and general 1107
chemistry, and one course in aqueous chemistry. Hydrobiology requires one year each in general biology and general chemistry, and one course in introductory ecology.

Graduate Advisors. Graham Fogg, Ph.D., Carlos Puente, Ph.D., Samuel Sandoval-Solis, Ph.D.

Graduate Admissions Advisor. Mark E. Grismer, Ph.D.

Hydrologic Sciences (Graduate Group) | HYD Courses

Courses in HYD:

**HYD 010—Water, Power, Society (3)**
Discussion—1 hour; Lecture—2 hours. Water resources issues. How water has been used to gain and wield socio-political power. Water resources development in California as related to current and future sustainability of water quantity and quality. Roles of science and policy in solving water problems. (Same course as SAS 010.) GE credit: SE, SL, SS. Effective: 2005 Spring Quarter.

**HYD 092—Hydrologic Science Internship (1-12)**
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Lower division student. Work experience off and on campus in Hydrologic Science. Internship supervised by a member of the faculty. (P/NP grading only.) Effective: 1997 Winter Quarter.

**HYD 098—Directed Group Study (1-5)**
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 2002 Spring Quarter.

**HYD 103N—Fluid Mechanics Fundamentals (4)**
Lecture—4 hours. Prerequisite(s): PHY 009B Fluid mechanics axioms, fluid statics, kinematics, velocity fields for one-dimensional incompressible flow and boundary layers, turbulent flow time averaging, potential flow,
dimensional analysis, and macroscopic balances to solve a range of practical problems. (Same course as EBS 103.)
GE credit: QL, SE, VL. Effective: 2005 Spring Quarter.

**HYD 110—Irrigation Principles and Practices (3)**
Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): PHY 007A; SSC 100 recommended. General course for agricultural and engineering students dealing with soil and plant aspects of irrigation and drainage. Soil-water principles including water movement, plant responses to irrigation regimes, water use by crops; also irrigation systems and water quality. Not open for credit to students who have completed WSC 110. GE credit: SE, SL. Effective: 2009 Fall Quarter.

**HYD 124—Plant-Water-Soil Relationships (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): One upper division course in soil science, such as SSC 100; and one upper division course in plant science or plant biology, such as PLB 111; or consent of instructor. Principles of plant interactions with soil and atmospheric water environments and practical applications to crop management (e.g., irrigation) and plant eco-physiology (e.g., drought). Not open for credit to students who have completed Water Science 104. GE credit: QL, SE, SL. Effective: 2008 Spring Quarter.

**HYD 134—Aqueous Geochemistry (6)**
Laboratory—3 hours; Lecture—4 hours. Prerequisite(s): CHE 002B Chemistry of natural waters; dielectric properties of water; thermodynamic and mass-action relations; metal hydrolysis; acid-base equilibria; metal-coordination chemistry; solubility calculations; electron-exchange reactions; sorptive partitioning; ion exchange; and dissolved organic matter. GE credit: QL, SE. Effective: 2009 Fall Quarter.

**HYD 141—Physical Hydrology (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): PHY 009B; MAT 021B; HYD 100 recommended. Introduction to the processes that constitute the hydrologic cycle. Special emphasis on a quantitative description of the following processes: precipitation, infiltration, evaporation, transpiration, surface runoff, and groundwater runoff. GE credit: QL, SE, SL, VL. Effective: 1997 Fall Quarter.

**HYD 142—Systems Hydrology (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): HYD 141 or ECI 142 General course considering hydrologic processes from a systems or statistical model perspective. General probability concepts are applied to frequency, time series and spatial data analysis. Linear systems are also considered in conjunction with Kalman filter techniques. GE credit: OL, QL, SE. Effective: 1998 Winter Quarter.

**HYD 143—Ecohydrology (4)**
Extensive Problem Solving; Lecture/Discussion—3 hours. Prerequisite(s): HYD 010 or HYD 141 or ESP 001 or ESM 100 or ESM 108 or ESM 120 or GEL 001 or GEL 050 or SSC 100; or Consent of Instructor. Movement and storage of water in individual ecosystems and the integrated functioning of water and biota at the watershed scale. GE credit: OL, QL, SE, SL. Effective: 2017 Winter Quarter.

**HYD 144—Groundwater Hydrology (4)**

**HYD 145—Water Science and Design (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): HYD 141 or MAT 016C or MAT 017C or MAT 021C; or Consent of Instructor. Introduction to watershed engineering, storm water management, design of hydraulic systems. Topics include hydrological risk analysis, flood routing, design storms, open channel flow, pipes, culverts, spillways, and detention basins. Class project and field trips will apply theory to real-life problems. GE credit: QL, SE, SL, WE. Effective: 2016 Fall Quarter.
HYD 145—Water Science and Design (4) Review all entries
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): (HYD 141 or ESM 100); (MAT 016B or MAT 021B); or Consent of Instructor. Introduction to watershed engineering, storm water management, design of hydraulic systems. Topics include hydrological risk analysis, flood routing, design storms, open channel flow, pipes, culverts, spillways, and detention basins. Class project and field trips will apply theory to real-life problems. GE credit: QL, SE, SL, WE. Effective: 2018 Fall Quarter.

HYD 146—Hydrogeology and Contaminant Transport (5)
Laboratory—2 hours; Lecture—3 hours; Term Paper—1 hour. Prerequisite(s): HYD 144 or ECI 144; Or the equivalent. Physical and chemical processes affecting groundwater flow and contaminant transport, with emphasis on realistic hydrogeologic examples. Groundwater geology and chemistry. Fundamentals of groundwater flow and transport analysis. Laboratory includes field pumping test and work with physical and computer models. (Same course as GEL 156.) GE credit: SE. Effective: 2002 Winter Quarter.

HYD 147—Runoff, Erosion and Water Quality Management (3)
Fieldwork; Lecture/Lab—3 hours. Prerequisite(s); (PHY 007B or PHY 009B); (MAT 016C or MAT 017C or MAT 021C); (ECI 142 or HYD 141 or ESM 100); or equivalent. Practical hydrology and runoff water quality management from disturbed watersheds. Development of hillslope and soils restoration concepts and practice, modeling and application. (Same course as EBS 147.) GE credit: SE. Effective: 2018 Spring Quarter.

HYD 150—Water Law (3)
Lecture—3 hours. Prerequisite(s): Consent of instructor or upper division standing. Principles and issues of California Water Law. Types of water rights, groundwater rights and management, and protection of instream uses. Water projects, role of federal government and federal/state relations. Basic water quality acts, endangered species act, water transfers and current water issues. GE credit: ACGH, SS. Effective: 2016 Fall Quarter.

HYD 151—Field Methods in Hydrology (4)
Fieldwork—3 hours; Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): ERS 100 or HYD 141 Measurement methods and data analysis for evaluation of water storage, movement and contamination in the field. Equipment such as data loggers, water and sediment samplers, pressure transducers, weather stations, surveying equipment, and flow meters will be used. GE credit: QL, SE, SL. Effective: 2003 Winter Quarter.

HYD 182—Environmental Analysis using GIS (4)
Laboratory—4 hours; Lecture—2 hours. Prerequisite(s): ABT 150 or LDA 150; Or equivalent GIS experience and skills; general biology and/or ecology courses are recommended. Ecosystem and landscape modeling with emphasis on hydrology and solute transport. Spatial analysis of environmental risk analysis including ecological risk assessment, natural resource management. Spatial database structures, scripting, data models, and error analysis in GIS. (Same course as ABT 182.) GE credit: QL, SE, SL, VL. Effective: 2018 Winter Quarter.

HYD 192—Hydrologic Science Internship (1-12)
Internship—3-40 hours. Prerequisite(s): Consent of Instructor. Completion of 84 units. Work experience off and on campus in water science. Internship supervised by a member of the faculty. (P/NP grading only.) Effective: 1997 Winter Quarter.

HYD 198—Directed Group Study (1-5)
Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

HYD 199—Special Study for Advanced Undergraduate (1-5)
Variable. Prerequisite(s): Senior standing. (P/NP grading only.) Effective: 1997 Fall Quarter.

HYD 200—Survey of Hydrologic Sciences (1) Review all entries
Seminar—1 hour; Term Paper. Prerequisite(s): Open to students in the Hydrologic Sciences program. Seminar course exposes students to the diversity of sciences involved in the program. Students prepare a paper and presentation in their area of research interest. May be repeated twice for credit. May be repeated up to 2 time(s). (S/U grading only.) Effective: 1997 Winter Quarter.

HYD 200—Survey of Hydrologic Sciences (1) Review all entries Discontinued
Seminar—1 hour; Term Paper. Prerequisite(s): Open to students in the Hydrologic Sciences program. Seminar course exposes students to the diversity of sciences involved in the program. Students prepare a paper and presentation in their area of research interest. May be repeated twice for credit. May be repeated up to 2 time(s). (S/U grading only.) Effective: 2019 Winter Quarter.

HYD 201A—Hydrologic Sciences Core Survey (3)
Lecture/Discussion—2 hours; Project (Term Project). Considers the primary sub-disciplines while reviewing the
fundamental scientific concepts/processes of the hydrologic sciences research community, and includes a basic writing component. Effective: 2017 Fall Quarter.

**HYD 201B—Hydrologic Sciences Core Seminar (1)**  
Seminar—2 hours. Exposes students to the research underway in the Hydrologic Sciences Graduate Group as well as provide them the opportunity to present and refine their research through interaction with other students in the Graduate Group. (P/NP grading only.) Effective: 2018 Winter Quarter.

**HYD 205—Continuum Mechanics of Natural Systems (4)**  
Lecture/Discussion—4 hours. Prerequisite(s): MAT 021D; MAT 022B; PHY 009B Continuum mechanics of static and dynamic air, water, earth and biological systems using hydraulic, heat and electrical conductivity; diffusivity; dispersion; strain; stress; deformation gradient; velocity gradient; stretch and spin tensors. (Same course as EBS 205.) Effective: 2002 Fall Quarter.

**HYD 210—Vadose Modeling and Characterization (3)**  
Discussion—0.5 hours; Laboratory—3 hours; Lecture—1.5 hours. Prerequisite(s): SSC 107; or Consent of Instructor. Principles and modeling of water flow and chemical transport in the vadose zone, with specific applications to soils. Topics include hydraulic properties, finite difference application to unsaturated water flow, parameter optimization, diffusive and convective transport in gaseous and liquid phases. Effective: 2015 Spring Quarter.

**HYD 243—Water Resource Planning and Management (3)**  
Lecture—3 hours. Prerequisite(s): HYD 141 or ECI 142 Applications of deterministic and stochastic mathematical programming techniques to water resource planning, analysis, design and management. Water allocation, capacity expansion, and reservoir operation. Conjunctive use of surface water and groundwater. Water quality management. Irrigation planning and operation models. (Same course as EBS 243.) Effective: 1997 Fall Quarter.

**HYD 245—Climate Change, Water and Society (4)**  
Lecture—4 hours. Class size limited to 25 students. Integration of climate science and hydrology with policy to understand hydroclimatology and its impact upon natural and human systems. Assignments: readings, take-home examination on climate and hydrologic science, paper that integrates course concepts into a research prospectus or review article. (Same course as ATM 245 and ECL 245.) Effective: 2015 Spring Quarter.

**HYD 252—Hillslope Geomorphology and Sediment Budgets (4)**  
Fieldwork—3 hours; Lecture—3 hours. Prerequisite(s): HYD 141 or GEL 035 or ECI 142; or Consent of Instructor. Exploration of theoretical and empirical foundations of sediment production on hillslopes using computer models and field experiments to promote an understanding of how watersheds evolve naturally and with human impacts. Effective: 2001 Spring Quarter.

**HYD 254Y—Ecohydraulics (3)**  
Discussion—1 hour; Extensive Problem Solving; Web Virtual Lecture—1 hour. Use of 2D hydrodynamic modeling to perform instream flow assessment by exploring flow-dependent hydraulic patterns at multiple spatial scales and extrapolating results with empirical and analytical functions to evaluate geomorphic resilience and ecological functions. Effective: 2014 Fall Quarter.

**HYD 256—Geomorphology of Estuaries and Deltas (4)**  
Fieldwork—3 hours; Lecture—3 hours. Prerequisite(s): HYD 141 or GEL 035; or ECI 042 or Consent of Instructor. Survey of the processes and landforms associated with sediment deposition in the coastal zone. Application of geomorphic principles to coastal management issues. Effective: 2002 Spring Quarter.

**HYD 264—Modeling of Hydrologic Processes (3)**  
Lecture—3 hours. Prerequisite(s): HYD 141; STA 102; Or the equivalents. Techniques used to model the spatio-temporal structure of rainfall and runoff are introduced. Procedures studied include those based on stochastic point processes, chaos theory, fractal geometry, and fractional noises. Effective: 1997 Winter Quarter.

**HYD 269—Numerical Modeling of Groundwater Systems (3)**  
Lecture—3 hours. Prerequisite(s): MAT 022B; (ECI 144; or HYD 145A); HYD 145B; Finite difference and finite element techniques in modeling groundwater flow and transport. Fundamentals of constructing and calibrating models with hands-on applications. Methods and limitations of numerical solution of transport equations. Model interpretation and ethics. Effective: 1997 Winter Quarter.

**HYD 273—Introduction to Geostatistics (4)**  
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): STA 130A; STA 130B; Or the equivalent. Statistical treatment of spatial data with hydrologic emphasis. Topics: theory of random functions, variogram analysis, Kriging/co-Kriging,

HYD 274—Practice of Groundwater Flow and Transport Modeling (3)
Lecture—2 hours; Lecture/Discussion—0.5 hours; Lecture/Lab—0.5 hours. Prerequisite(s): HYD 269; (ECI 272B or ECI 272C) Selecting and building groundwater flow and transport models. Planning, preparation, execution, presentation, and review of modeling projects. Review of methods, assumptions, and limitations of groundwater models; practicing with MODFLOW, MT3D, associated GUI, and with other groundwater modeling software of choice. Effective: 2012 Fall Quarter.

HYD 275—Analysis of Spatial Processes (3)
Lecture—3 hours. Prerequisite(s): STA 102; Or the equivalent; HYD 273 or STA 273A recommended. Characterization of homogeneous random fields; extremes and spectral parameters; geometry of excursions, local averaging; scale of fluctuation; non-Gaussian and irregular random fields; geostatistical applications. Effective: 1997 Winter Quarter.

HYD 276—Selected Topics in Environmental Remote Sensing (3)
Discussion—2 hours; Lecture—1 hour; Project (Term Project). Prerequisite(s): ERS 186; Consent of Instructor. Or equivalent; ERS 186L recommended. In depth investigation of advanced topics in remote sensing applications, measurements, and theory. May be repeated for credit. (Same course as GEO 286.) Effective: 2014 Fall Quarter.

HYD 290—Seminar in Hydrologic Science (1)
Seminar—1 hour. Prerequisite(s): Consent of Instructor. Graduate standing and background in Hydrologic Science. Seminars and critical review of problems, issues, and research in hydrologic sciences. Oral presentations of research. Topics will vary. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

HYD 298—Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Graduate standing. (S/U grading only.) Effective: 1997 Winter Quarter.

HYD 299—Research (1-12)
Variable. Prerequisite(s): Consent of Instructor. Graduate standing. (S/U grading only.) Effective: 1997 Winter Quarter.

HYD 396—Teaching Assistant Training Practicum (1-4)
Variable. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

HYD 410—OSHA HAZWOPER Refresher Course (1)
Review all entries
Lecture—1 hour. Updates hazardous materials handling information for purposes of keeping certification current. Certification lapses until the refresher course is complete. (P/NP grading only.) Effective: 1998 Winter Quarter.

HYD 410—OSHA HAZWOPER Refresher Course (1)
Review all entries Discontinued
Lecture—1 hour. Updates hazardous materials handling information for purposes of keeping certification current. Certification lapses until the refresher course is complete. (P/NP grading only.) Effective: 2019 Winter Quarter.

HYD 440—Hazardous Waste Operations Training (3)
Laboratory—2 hours; Lecture—2 hours. Prerequisite(s): Upper division standing in College of Agricultural and Environmental Sciences. Forty-hour course designed to meet the requirements of Federal OSHA regulation CFR 1910.120. Covers the health, regulatory, processing and safe handling issues/problems associated with working with hazardous materials. (P/NP grading only.) Effective: 1997 Spring Quarter.

Hydrology

Hydrology | HYD Information

Hydrology | HYD B.S.

(College of Agricultural and Environmental Sciences)

Faculty. http://lawr.ucdavis.edu/people/faculty/hydrology

The Major Program
Hydrology is the study of the occurrence, distribution, circulation, and behavior of water and water-borne materials in the environment of Earth. It includes practical measurement and technical analysis of water phenomena underground, on the Earth's surface, and in the atmosphere. Contemporary hydrologic problems include environmental restoration, sustainability of groundwater and surface water resources, water pollution, and natural disasters such as floods, droughts, landslides, avalanches, and land subsidence. The management of these problems demands hydrologic scientists with the comprehensive, interdisciplinary education embodied in this program. Beyond its societal utility, hydrology can be an exciting science for the curious-minded. Hydrologists explore natural phenomena such as climate change, waterfalls, health of coral reefs, biogeochemical cycles, and aquifers.

The Program. A hydrologist needs a strong background across the basic sciences of physics, mathematics, chemistry, and biology. Breadth of understanding comes from exposure to ecology, geology, engineering, policy, and law. Depth of experience is provided by core hydrology courses, internship opportunities, and practical outdoor training. Students choose electives to match their interests and career goals. Transfer students should have completed as much as possible of the preparatory subject matter listed below.

Internships and Career Alternatives. Job opportunities in hydrology exceed the available supply of trained hydrologists. Students commonly obtain internships and jobs with state and federal agencies, private consulting firms, environmental interest groups, irrigation districts, and utility companies. Federal agencies hiring hydrologists include the U.S. Geological Survey, U.S. Department of Agriculture (Fish and Wildlife, Agricultural Research, Forest Service, and National Resource Conservation Service), Environmental Protection Agency, and national research laboratories (Lawrence Livermore National Laboratory, Lawrence Berkeley National Laboratory). State and local agency employers include California's Departments of Water Resources, Conservation, Fish and Game, and Toxic Substances as well as the Water Resources Control Board and Regional Water Quality Control Boards. To obtain higher levels of responsibility and salary, hydrologists often seek advanced degrees, and the hydrology major is designed to provide students with a highly competitive education to get into graduate school.

Hydrology | HYD Minor
(College of Agricultural and Environmental Sciences)

Faculty. http://lawr.ucdavis.edu/people/faculty/hydrology

The Hydrology Section of the Department of Land, Air and Water Resources offers the minor in Hydrology for environmental or natural science students who have an interest in water/environmental issues. The interested student should have completed preparatory course work in calculus (MAT 016B), chemistry (CHE 002A; CHE 002B recommended), physics (PHY 007A), and biology (BIS 002A). Course work in the minor provides fundamental skills and knowledge of the hydrologic sciences. The program is sufficiently flexible for students to pursue particular water issues or problems of interest to them.

Minor Advisor. Graham Fogg; 530-752-6810; gefogg@ucdavis.edu.

Hydrology | HYD Courses

Courses in HYD:

**HYD 010—Water, Power, Society (3)**
Discussion—1 hour; Lecture—2 hours. Water resources issues. How water has been used to gain and wield socio-political power. Water resources development in California as related to current and future sustainability of water quantity and quality. Roles of science and policy in solving water problems. (Same course as SAS 010.) GE credit: SE, SL, SS. Effective: 2005 Spring Quarter.

**HYD 092—Hydrologic Science Internship (1-12)**
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Lower division student. Work experience off and on campus in Hydrologic Science. Internship supervised by a member of the faculty. (P/NP grading only.) Effective: 1997 Winter Quarter.

**HYD 098—Directed Group Study (1-5)**
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 2002 Spring Quarter.

**HYD 103N—Fluid Mechanics Fundamentals (4)**
Lecture—4 hours. Prerequisite(s): PHY 009B Fluid mechanics axioms, fluid statics, kinematics, velocity fields for one-dimensional incompressible flow and boundary layers, turbulent flow time averaging, potential flow, dimensional analysis, and macroscopic balances to solve a range of practical problems. (Same course as EBS 103.) GE credit: QL, SE, VL. Effective: 2005 Spring Quarter.

**HYD 110—Irrigation Principles and Practices (3)**
Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): PHY 007A; SSC 100 recommended. General course for agricultural and engineering students dealing with soil and plant aspects of irrigation and drainage. Soil-water principles including water movement, plant responses to irrigation regimes, water use by crops; also irrigation systems and water quality. Not open for credit to students who have completed WSC 110. GE credit: SE, SL. Effective: 2009 Fall Quarter.

**HYD 124—Plant-Water-Soil Relationships (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): One upper division course in soil science, such as SSC 100; and one upper division course in plant science or plant biology, such as PLB 111; or consent of instructor. Principles of plant interactions with soil and atmospheric water environments and practical applications to crop management (e.g., irrigation) and plant eco-physiology (e.g., drought). Not open for credit to students who have completed WSC 104. GE credit: QL, SE, SL. Effective: 2008 Spring Quarter.

**HYD 124—Plant-Water-Soil Relationships (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (SSC 100 (can be concurrent) or SSC 107 (can be concurrent)); (PLS 100A (can be concurrent) or PLB 111 (can be concurrent)); or Consent of Instructor. Principles of plant interactions with soil and atmospheric water environments and practical applications to crop management (e.g., irrigation) and plant eco-physiology (e.g., drought). Not open for credit to students who have completed WSC 104. GE credit: QL, SE, SL. Effective: 2018 Fall Quarter.

**HYD 134—Aqueous Geochemistry (6)**
Laboratory—3 hours; Lecture—4 hours. Prerequisite(s): CHE 002B Chemistry of natural waters; dielectric properties of water; thermodynamic and mass-action relations; metal hydrolysis; acid-base equilibria; metal-coordination chemistry; solubility calculations; electron-exchange reactions; sorptive partitioning; ion exchange; and dissolved organic matter. GE credit: QL, SE, SL. Effective: 2009 Fall Quarter.

**HYD 141—Physical Hydrology (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): PHY 009B; MAT 021B; HYD 100 recommended. Introduction to the processes that constitute the hydrologic cycle. Special emphasis on a quantitative description of the following processes: precipitation, infiltration, evaporation, transpiration, surface runoff, and groundwater runoff. GE credit: QL, SE, SL, VL. Effective: 1997 Fall Quarter.
HYD 142—Systems Hydrology (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): HYD 141 or ECI 142 General course considering hydrologic processes from a systems or statistical model perspective. General probability concepts are applied to frequency, time series and spatial data analysis. Linear systems are also considered in conjunction with Kalman filter techniques. GE credit: OL, QL, SE. Effective: 1998 Winter Quarter.

HYD 143—Ecohydrology (4)
Extensive Problem Solving; Lecture/Discussion—3 hours. Prerequisite(s): HYD 010 or HYD 141 or ESP 001 or ESM 100 or ESM 108 or ESM 120 or GEL 001 or GEL 050 or SSC 100; or Consent of Instructor. Movement and storage of water in individual ecosystems and the integrated functioning of water and biota at the watershed scale. GE credit: OL, QL, SE, SL. Effective: 2017 Winter Quarter.

HYD 144—Groundwater Hydrology (4)

HYD 145—Water Science and Design (4) Review all entries
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): HYD 141 or MAT 016C or MAT 017C or MAT 021C; or Consent of Instructor. Introduction to watershed engineering, storm water management, design of hydraulic systems. Topics include hydrological risk analysis, flood routing, design storms, open channel flow, pipes, culverts, spillways, and detention basins. Class project and field trips will apply theory to real-life problems. GE credit: QL, SE, SL, WE. Effective: 2016 Fall Quarter.

HYD 145—Water Science and Design (4) Review all entries
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): (HYD 141 or ESM 100); (MAT 016B or MAT 021B); or Consent of Instructor. Introduction to watershed engineering, storm water management, design of hydraulic systems. Topics include hydrological risk analysis, flood routing, design storms, open channel flow, pipes, culverts, spillways, and detention basins. Class project and field trips will apply theory to real-life problems. GE credit: QL, SE, SL, WE. Effective: 2018 Fall Quarter.

HYD 146—Hydrogeology and Contaminant Transport (5)
Laboratory—2 hours; Lecture—3 hours; Term Paper—1 hour. Prerequisite(s): HYD 144 or ECI 144; Or the equivalent. Physical and chemical processes affecting groundwater flow and contaminant transport, with emphasis on realistic hydrogeologic examples. Groundwater geology and chemistry. Fundamentals of groundwater flow and transport analysis. Laboratory includes field pumping test and work with physical and computer models. (Same course as GEL 156.) GE credit: SE. Effective: 2002 Winter Quarter.

HYD 147—Runoff, Erosion and Water Quality Management (3)
Fieldwork; Lecture/Lab—3 hours. Prerequisite(s): (PHY 007B or PHY 009B); (MAT 016C or MAT 017C or MAT 021C); (ECI 142 or HYD 141 or ESM 100); or equivalent. Practical hydrology and runoff water quality management from disturbed watersheds. Development of hillslope and soils restoration concepts and practice, modeling and application. (Same course as EBS 147.) GE credit: SE. Effective: 2018 Spring Quarter.

HYD 150—Water Law (3)
Lecture—3 hours. Prerequisite(s): Consent of instructor or upper division standing. Principles and issues of California Water Law. Types of water rights, groundwater rights and management, and protection of instream uses. Water projects, role of federal government and federal/state relations. Basic water quality acts, endangered species act, water transfers and current water issues. GE credit: ACGH, SS. Effective: 2016 Fall Quarter.

HYD 151—Field Methods in Hydrology (4)
Fieldwork—3 hours; Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): ERS 100 or HYD 141 Measurement methods and data analysis for evaluation of water storage, movement and contamination in the field. Equipment such as data loggers, water and sediment samplers, pressure transducers, weather stations, surveying equipment, and flow meters will be used. GE credit: QL, SE, SL. Effective: 2003 Winter Quarter.

HYD 182—Environmental Analysis using GIS (4)
Laboratory—4 hours; Lecture—2 hours. Prerequisite(s): ABT 150 or LDA 150; Or equivalent GIS experience and skills; general biology and/or ecology courses are recommended. Ecosystem and landscape modeling with emphasis on hydrology and solute transport. Spatial analysis of environmental risk analysis including ecological risk
assessment, natural resource management. Spatial database structures, scripting, data models, and error analysis in GIS. (Same course as ABT 182.) GE credit: QL, SE, SL, VL. Effective: 2018 Winter Quarter.

HYD 192—Hydrologic Science Internship (1-12)
Internship—3-40 hours. Prerequisite(s): Consent of Instructor. Completion of 84 units. Work experience off and on campus in water science. Internship supervised by a member of the faculty. (P/NP grading only.) Effective: 1997 Winter Quarter.

HYD 198—Directed Group Study (1-5)
Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

HYD 199—Special Study for Advanced Undergraduate (1-5)
Variable. Prerequisite(s): Senior standing. (P/NP grading only.) Effective: 1997 Fall Quarter.

HYD 200—Survey of Hydrologic Sciences (1) 
Seminar—1 hour; Term Paper. Prerequisite(s): Open to students in the Hydrologic Sciences program. Seminar course exposes students to the diversity of sciences involved in the program. Students prepare a paper and presentation in their area of research interest. May be repeated twice for credit. May be repeated up to 2 time(s). (S/U grading only.) Effective: 1997 Winter Quarter.

HYD 200—Survey of Hydrologic Sciences (1) 
Seminar—1 hour; Term Paper. Prerequisite(s): Open to students in the Hydrologic Sciences program. Seminar course exposes students to the diversity of sciences involved in the program. Students prepare a paper and presentation in their area of research interest. May be repeated twice for credit. May be repeated up to 2 time(s). (S/U grading only.) Effective: 2019 Winter Quarter.

HYD 201A—Hydrologic Sciences Core Survey (3)
Lecture/Discussion—2 hours; Project (Term Project). Considers the primary sub-disciplines while reviewing the fundamental scientific concepts/processes of the hydrologic sciences research community, and includes a basic writing component. Effective: 2017 Fall Quarter.

HYD 201B—Hydrologic Sciences Core Seminar (1)
Seminar—2 hours. Exposes students to the research underway in the Hydrologic Sciences Graduate Group as well as provide them the opportunity to present and refine their research through interaction with other students in the Graduate Group. (P/NP grading only.) Effective: 2018 Winter Quarter.

HYD 205—Continuum Mechanics of Natural Systems (4)
Lecture/Discussion—4 hours. Prerequisite(s): MAT 021D; MAT 022B; PHY 009B Continuum mechanics of static and dynamic air, water, earth and biological systems using hydraulic, heat and electrical conductivity; diffusivity; dispersion; strain; stress; deformation gradient; velocity gradient; stretch and spin tensors. (Same course as EBS 205.) Effective: 2002 Fall Quarter.

HYD 210—Vadose Modeling and Characterization (3)
Discussion—0.5 hours; Laboratory—3 hours; Lecture—1.5 hours. Prerequisite(s): SSC 107; or Consent of Instructor. Principles and modeling of water flow and chemical transport in the vadose zone, with specific applications to soils. Topics include hydraulic properties, finite difference application to unsaturated water flow, parameter optimization, diffusive and convective transport in gaseous and liquid phases. Effective: 2015 Spring Quarter.

HYD 243—Water Resource Planning and Management (3)
Lecture—3 hours. Prerequisite(s): HYD 141 or ECI 142 Applications of deterministic and stochastic mathematical programming techniques to water resource planning, analysis, design and management. Water allocation, capacity expansion, and reservoir operation. Conjunctive use of surface water and groundwater. Water quality management. Irrigation planning and operation models. (Same course as EBS 243.) Effective: 1997 Fall Quarter.

HYD 245—Climate Change, Water and Society (4)
Lecture—4 hours. Class size limited to 25 students. Integration of climate science and hydrology with policy to understand hydroclimatology and its impact upon natural and human systems. Assignments: readings, take-home examination on climate and hydrologic science, paper that integrates course concepts into a research prospectus or review article. (Same course as ATM 245 and ECL 245.) Effective: 2015 Spring Quarter.

HYD 252—Hillslope Geomorphology and Sediment Budgets (4)
Fieldwork—3 hours; Lecture—3 hours. Prerequisite(s): HYD 141 or GEL 035 or ECI 142; or Consent of Instructor. Exploration of theoretical and empirical foundations of sediment production on hillslopes using computer models
and field experiments to promote an understanding of how watersheds evolve naturally and with human impacts. Effective: 2001 Spring Quarter.

HYD 254Y—Ecohydraulics (3)
Discussion—1 hour; Extensive Problem Solving; Web Virtual Lecture—1 hour. Use of 2D hydrodynamic modeling to perform instream flow assessment by exploring flow-dependent hydraulic patterns at multiple spatial scales and extrapolating results with empirical and analytical functions to evaluate geomorphic resilience and ecological functions. Effective: 2014 Fall Quarter.

HYD 256—Geomorphology of Estuaries and Deltas (4)
Fieldwork—3 hours; Lecture—3 hours. Prerequisite(s): HYD 141 or GEL 035 or ECI 042 or Consent of Instructor. Survey of the processes and landforms associated with sediment deposition in the coastal zone. Application of geomorphic principles to coastal management issues. Effective: 2002 Spring Quarter.

HYD 264—Modeling of Hydrologic Processes (3)
Lecture—3 hours. Prerequisite(s): HYD 141; STA 102 or the equivalents. Techniques used to model the spatio-temporal structure of rainfall and runoff are introduced. Procedures studied include those based on stochastic point processes, chaos theory, fractal geometry, and fractional noises. Effective: 1997 Winter Quarter.

HYD 269—Numerical Modeling of Groundwater Systems (3)
Lecture—3 hours. Prerequisite(s): MAT 022B; (ECI 144 or HYD 145A); HYD 145B; Finite difference and finite element techniques in modeling groundwater flow and transport. Fundamentals of constructing and calibrating models with hands-on applications. Methods and limitations of numerical solution of transport equations. Model interpretation and ethics. Effective: 1997 Winter Quarter.

HYD 273—Introduction to Geostatistics (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): STA 130A; STA 130B or the equivalent. Statistical treatment of spatial data with hydrologic emphasis. Topics: theory of random functions, variogram analysis, Kriging/co-Kriging, indicator geostatistics, and stochastic simulation of spatial variability. Geostatistical software use. Effective: 2018 Winter Quarter.

HYD 274—Practice of Groundwater Flow and Transport Modeling (3)
Lecture—2 hours; Lecture/Discussion—0.5 hours; Lecture/Lab—0.5 hours. Prerequisite(s): HYD 269; (ECI 272B or ECI 272C) Selecting and building groundwater flow and transport models. Planning, preparation, execution, presentation, and review of modeling projects. Review of methods, assumptions, and limitations of groundwater models; practicing with MODFLOW, MT3D, associated GUI, and with other groundwater modeling software of choice. Effective: 2012 Fall Quarter.

HYD 275—Analysis of Spatial Processes (3)
Lecture—3 hours. Prerequisite(s): STA 102; Or the equivalent; HYD 273 or STA 273A recommended. Characterization of homogeneous random fields; extremes and spectral parameters; geometry of excursions, local averaging; scale of fluctuation; non-Gaussian and irregular random fields; geostatistical applications. Effective: 1997 Winter Quarter.

HYD 286—Selected Topics in Environmental Remote Sensing (3)
Discussion—2 hours; Lecture—1 hour; Project (Term Project). Prerequisite(s): ERS 186; Consent of Instructor. Or equivalent; ERS 186L recommended. In depth investigation of advanced topics in remote sensing applications, measurements, and theory. May be repeated for credit. (Same course as GEO 286) Effective: 2014 Fall Quarter.

HYD 290—Seminar in Hydrologic Science (1)
Seminar—1 hour. Prerequisite(s): Consent of Instructor. Graduate standing and background in Hydrologic Science. Seminars and critical review of problems, issues, and research in hydrologic sciences. Oral presentations of research. Topics will vary. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

HYD 298—Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Graduate standing. (S/U grading only.) Effective: 1997 Winter Quarter.

HYD 299—Research (1-12)
Variable. Prerequisite(s): Consent of Instructor. Graduate standing. (S/U grading only.) Effective: 1997 Winter Quarter.

HYD 396—Teaching Assistant Training Practicum (1-4)
Variable. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.
HYD 410—OSHA HAZWOPER Refresher Course (1) **Review all entries**
Lecture—1 hour. Updates hazardous materials handling information for purposes of keeping certification current. Certification lapses until the refresher course is complete. (P/NP grading only.) Effective: 1998 Winter Quarter.

HYD 410—OSHA HAZWOPER Refresher Course (1) **Review all entries Discontinued**
Lecture—1 hour. Updates hazardous materials handling information for purposes of keeping certification current. Certification lapses until the refresher course is complete. (P/NP grading only.) Effective: 2019 Winter Quarter.

HYD 440—Hazardous Waste Operations Training (3)
Laboratory—2 hours; Lecture—2 hours. Prerequisite(s): Upper division standing in College of Agricultural and Environmental Sciences. Forty-hour course designed to meet the requirements of Federal OSHA regulation CFR 1910.120. Covers the health, regulatory, processing and safe handling issues/problems associated with working with hazardous materials. (P/NP grading only.) Effective: 1997 Spring Quarter.

**Immunology**

**Immunology | IMM Information**
Charles Bevins, M.D., Ph.D., Chairperson of the Group

**Group Office.** 1026 Vet Med Administration Building; 530-754-0103; http://immunology.compmed.ucdavis.edu/

**Faculty.** http://immunology.compmed.ucdavis.edu/people/faculty.html

**Immunology | IMM M.S.**
Charles Bevins, M.D., Ph.D., Chairperson of the Group

**Group Office.** 1026 Vet Med Administration Building; 530-754-0103; http://immunology.compmed.ucdavis.edu/

**Faculty.** http://immunology.compmed.ucdavis.edu/people/faculty.html

**Graduate Study.** The Graduate Group in Immunology offers an interdisciplinary program of study in an exciting field of biology and medicine leading to the M.S. and Ph.D. degrees. Participating faculty from various Schools and Departments at UC Davis provide research opportunities in diverse areas of applied immunology. Areas of focus include infection and immunity (including host response regulation to parasites, viruses and bacteria), nutrition and immunity, autoimmunity, immune regulation, neuroimmunology, cancer therapy and immune mediators and their uses for diagnosis and treatment.

**Preparation.** Applicants for candidacy to these programs should have completed undergraduate preparation in mathematics, physics, chemistry, biochemistry, molecular and cellular biology or related biological and medical sciences.

For work leading to the Ph.D. degree, the requirements include cell biology, chemical immunology, cellular immunology, immunohematology, and advanced immunology. In addition to these general requirements, more specialized preparation in at least one of the following is required: (a) microbiological specialties (bacteriology, virology, parasitology, medical microbiology); (b) zoological specialties (cell biology, endocrinology, embryology, proto-zoology, histology, cytology, physiology); (c) medical specialties (pathology, anatomy, pharmacology, clinical pathology, reproduction, hematology, epidemiology); (d) biochemistry/biophysics specialties (biologically active molecules, control mechanisms); (e) genetic specialties (developmental genetics, population genetics, cytogenetics, molecular genetics).

**Graduate Advisor.** See the graduate program website at http://immunology.compmed.ucdavis.edu/people/.

**Immunology | IMM Ph.D.**

### Immunology | IMM Courses

**Courses in IMM:**

**IMM 201—Introductory Immunology (4)**
Lecture—4 hours. Prerequisite(s): Graduate standing. Enrollment limited to 30 students. Comprehensive introduction to the principles of immunology. Effective: 2006 Fall Quarter.

**IMM 201L—Advanced Immunology Laboratory Rotations (4)**
Discussion/Laboratory—12 hours. Laboratory assignment in two research laboratories. Individual research problems with emphasis on methodological/procedural experience and experimental design. Student writes a project outline and gives oral presentation. May be repeated up to 2 time(s). Effective: 2011 Fall Quarter.

**IMM 202L—Advanced Immunology Laboratory Rotations (5)**
Discussion/Laboratory—15 hours. One four-week and one six week assignment in immunology research laboratories. Individual research problems with an emphasis on methodological/procedural experience and experimental design. May be repeated up to 2 time(s). Effective: 2011 Fall Quarter.

**IMM 203—Cancer Immunology (2)**
Lecture—1 hour; Term Paper—1 hour. Covers concepts in cancer biology, progression and immune evasion. It will also cover topics such as: immune surveillance, immune effector mechanisms and current concepts in immune therapy. Effective: 2011 Fall Quarter.

**IMM 204—Topics in Innate Immunity (2)**
Extensive Writing/Discussion—1 hour; Performance Instruction—1 hour. Prerequisite(s): IMM 201; Or equivalent; IMM 293 preferred. Restricted to first- or second-year GGI and MGG students; others with permission of instructor; enrollment limited to 18 students. Covers current topics in the field of innate immunity through student seminar presentations and critical evaluation of the literature. Concepts include: pathogen recognition, intercellular communication, specialized cellular function and effector/signaling molecules. Effective: 2010 Spring Quarter.

**IMM 210—Topics on Neuroimmunology and Neuroinflammation (1)**
Seminar—1 hour. Prerequisite(s): Consent of Instructor. Topics will include a broad range of frontiers in neuroimmunology and neuroinflammation. Research articles in current literature will serve to guide in-depth discussions of experimental approaches, technical aspects of experimental techniques, data interpretation, and other relevant aspects of each topic. May be repeated for credit. (S/U grading only.) Effective: 2016 Winter Quarter.

**IMM 210—Topics on Neuroimmunology and Neuroinflammation (1)**
Seminar—1 hour. Prerequisite(s): Consent of Instructor. Topics will include a broad range of frontiers in neuroimmunology and neuroinflammation. Research articles in current literature will serve to guide in-depth discussions of experimental approaches, technical aspects of experimental techniques, data interpretation, and other relevant aspects of each topic. May be repeated for credit. (S/U grading only.) Effective: 2016 Winter Quarter.

**IMM 291—Introduction to Critical Analysis of Immunology Research Literature (2)**
Seminar—2 hours. Prerequisite(s): IMM 201 (can be concurrent); or Consent of Instructor. Introduction to critical reading of primary research papers in Immunology. Guided discussions on recent primary research papers provided to students before each class. May be repeated up to 2 time(s). (S/U grading only.) Effective: 2018 Fall Quarter.

**IMM 292—Immunotoxicology Seminar (2)**
Seminar—2 hours. Prerequisite(s): Graduate standing in Pharmacology/Toxicology, Immunology, Physiology, or
Biochemistry. Seminar presentations dealing with principles of xenobiotic effects on immune system functions and specific examples of drugs and environmental chemicals exerting toxic effects on the immune system. (S/U grading only.) Effective: 1997 Winter Quarter.

**IMM 293—Current Concepts in Immunology (4)**
Lecture/Discussion—4 hours. Prerequisite(s): PMI 126; or Consent of Instructor. Innate and acquired immunity as defense mechanisms against disease. Mechanisms regulating the distinct cell types driving these responses and current concepts in the literature. Effective: 2002 Winter Quarter.

**IMM 294—Comparative Clinical Immunology (4)**
Lecture/Discussion—4 hours. Prerequisite(s): PMI 126; or Consent of Instructor. Clinical immunology in animals and man. Pathogenesis of representative infectious diseases, hypersensitive reactions, and autoimmunity. Emphasis on specific and nonspecific immune effector mechanisms to combat infections or mediate pathology. Not open for credit to students who have completed IMM 294A. Effective: 2003 Winter Quarter.

**IMM 295—Cytokines (3)**
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): IMM 293; or Consent of Instructor. Cytokines and their involvement in human and animal physiology/disease, molecular mechanisms and receptor signaling. Immune and non-immune actions. Overlapping/redundant functions (referred to as the "cytokine network"). Effective: 2003 Spring Quarter.

**IMM 296—Advanced Topics in Immunology (2)**
Seminar—2 hours. Prerequisite(s): Graduate standing or consent of instructor. Presentation, discussion, and analysis of faculty research topics in immunology. Required for Immunology Graduate Students every year until they have passed their qualifying exam. May be repeated for credit. (S/U grading only.) Effective: 2002 Winter Quarter.

**IMM 296—Advanced Topics in Immunology (1)**
Seminar—2 hours. Prerequisite(s): Graduate standing or consent of instructor. Presentation and discussion of faculty research topics in Immunology. May be repeated for credit. (S/U grading only.) Effective: 2019 Winter Quarter.

**IMM 297—Mucosal Immunology (2)**
Discussion—1 hour; Lecture—1 hour; Term Paper. Prerequisite(s): IMM 201; Or equivalent. Basic concepts and current research topics in the field of mucosal immunology, with an emphasis on human immunology. Major emphases include innate and adaptive mucosal immunity, the gastrointestinal tract, the lung, lymphocyte trafficking, and mucosal vaccination. Effective: 2006 Summer Session 1.

**Independent Study Program**

**Independent Study Program | Independent Study Program Information**

**Information.** Chairperson, Committee on Courses of Instruction, c/o Academic Senate Office; 530-752-2231.

The Independent Study Program provides an opportunity for upper division students to design and pursue a full quarter (12-15 units) of individual study in an area of special interest.

A program qualifying as Independent Study will consist of one or more courses in the 190–199 series. While the theme of such a program may be reasonably broad, a recognizable common thread should unite all the academic work you undertake during an independent study quarter. Regularly offered formal courses will only be acceptable as a part of such a program if they clearly fit its theme and contribute something essential toward the realization of its objectives. The program is not to be considered a way to take more variable-unit courses than normally permitted.

The procedure for enrolling in an Independent Study Program is as follows:

1. Develop, in general terms, a plan of study;
2. Locate a faculty sponsor or panel of sponsors and with their help and approval develop a detailed plan;
3. Complete a project proposal form (obtained from the Academic Senate office) and submit it to the Academic Senate Committee on Courses of Instruction.

The deadline for applications is the tenth day of instruction of the term before; for specific dates, see the Academic Calendar.

Note that most courses in the 190-199 series are graded on a "Passed/Not Passed" basis unless the instructor has obtained approval for letter grading from both the college or school Committee on Courses of Instruction and from
the Academic Senate Committee on Courses of Instruction. Requests for letter grading must be received by the Senate Committee no later than the fifteenth day of instruction in the quarter in which the course is offered.

You must report the completion or termination of the project to the Committee on Courses of Instruction.

India & South Asia Studies Minor; Middle East/South Asia Studies

India & South Asia Studies Minor; Middle East/South Asia Studies | India & South Asia Studies Minor

(College of Letters and Science)

Smriti Srinivas, Ph.D., Program Director

Program Office. 1272 Social Science & Humanities; 530-754-4926; http://mesa.ucdavis.edu

The minor in India & South Asia Studies covers an area of immense historical, cultural, economic, demographic, and geopolitical significance. The minor is designed to emphasize the interconnected and comparative aspect of history, culture, society, economy, religion, gender relations, media, law, political economy, international relations, urbanism, migration and diaspora, language and literatures across regional and national boundaries. It is an interdisciplinary minor open to undergraduates in all four colleges.

Minor Advisor. Consult the Middle East/South Asia Studies Program in 155 Kerr Hall 530-754-4926 or the Middle East/South Asia Studies website at http://mesa.ucdavis.edu.

With prior consultation with an advisor, students can petition in advance the Program Committee to accept:

Other elective courses toward the minor program if the content is 50% or more on the Arab World. Under no circumstances may more than one lower division course be offered in satisfaction of requirements for the minor.

More than four units of Middle East/South Asia 181C and/or Middle East/South Asia 182C towards the minor program

Total: 20-24

India & South Asia Studies Minor; Middle East/South Asia Studies | MSA Courses

Courses in MSA:

**MSA 092—ME/SA 92. Internship in Middle East/South Asia Studies (3-15)**
Internship. Prerequisite(s): Consent of Instructor. Work experience on and off campus in all subject areas offered as part of the ME/SA Studies program. Internship supervised by a member of the ME/SA faculty. May be repeated up to 15 unit(s). (P/NP grading only.) Effective: 2007 Fall Quarter.

**MSA 098—Directed Group Study (1-5)**
Variable—3-15 hours. May be repeated for credit. (P/NP grading only.) Effective: 2006 Fall Quarter.

**MSA 099—Special Study for Undergraduates (1-5)**
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. May be repeated for credit. (P/NP grading only.) Effective: 2006 Fall Quarter.

**MSA 100—Middle East and South Asia: Comparative Perspectives (4)**
Extensive Writing; Lecture—3 hours. Ethnographic and historical points of intersection and divergence in various aspects of the Middle East and South Asia in precolonial, colonial, and postcolonial societies. Anthropological, historical, and theoretical debates surrounding the region. GE credit: AH, SS, WC, WE. Effective: 2004 Summer Session 1.

**MSA 111A—Great Cities of Arab Middle East and South Asia (4)**
Extensive Writing; Lecture—3 hours. Prerequisite(s): Consent of Instructor. Some knowledge of Islamic/Middle Eastern history is very useful. In-depth examination of the great cities of North Africa, the Middle East and South Asia as cultural and historical artifacts. Topics include: the concept of the Islamic city, processes of modernity, and representations that reinforce imagination, memory and personal identity. GE credit: AH, SS, WC, WE. Effective: 2013 Fall Quarter.

**MSA 112—History of South Asian Islam (4)**

**MSA 121A—Shahnameh: The Persian Book of Kings (4)**
Lecture/Discussion—3 hours; Term Paper. In-depth analysis of the Persian Book of Kings (Shahnameh) by Abu al-Qasim Ferdowsi (d. 1020 CE) in its historical context with a comparative perspective on the role of this work in Persian and world literature. (Same course as COM 175.) GE credit: AH, WC, WE. Effective: 2015 Winter Quarter.

**MSA 121C—A Story for a Life: The Arabian Nights (4)**
Lecture/Discussion—3 hours; Term Paper. In-depth exploration of The Arabian Nights, the best-known work of pre-modern Arabic literature and a major work of world literature. Analysis of the work in its historical context and in comparison to other frame tales in world literature. (Same course as COM 172 and ARB 140.) GE credit: AH, WC, WE. Effective: 2016 Winter Quarter.

**MSA 122A—Themes in the Arabic Novel (4)**
Extensive Writing; Independent Study; Lecture/Discussion—3 hours. Class size limited to 30 students. Select modern Arabic fiction (novels and short stories) in translation. Thematically connected readings supplemented by
non-fictional writings when appropriate. May be repeated up to 2 time(s) if the texts/theme of required course readings sufficiently change. GE credit: AH, OL, WC, WE. Effective: 2013 Fall Quarter.

**MSA 131A—Modern Iranian Cinema (4)**
Film Viewing—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): Upper division standing, or consent of instructor. Iranian cinema of the 20th century in the context of profound cultural and social changes in Iran especially since the Iranian Revolution. Productions by representative directors such as Kiarostami, Makhmalbaf, Bahram Beizaie are included. Knowledge of Persian not required. (Same course as CTS 146A.) GE credit: AH, OL, VL, WC, WE. Effective: 2013 Fall Quarter.

**MSA 131B—Modern South Asia Cinema (4)**
Film Viewing—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): Upper-division standing or consent of instructor. South Asian cinema of last 100 years in the context of cultural, social, and political changes. South Asian history, Independence, Partition, urban life, class, migration, postcolonial identity, diaspora, gender, sexuality, religion, sport, performance, etc (Same course as CTS 146B and ANT 147.) GE credit: AH, SS, VL, WC, WE. Effective: 2017 Winter Quarter.

**MSA 131C—Religion and Media in Arab World (4)**
Lecture—4 hours. Exploration of the role and experience of media technologies in the Arab world. Study of digital and electronic media as well as alternative media practices. Investigation of new trends in political activism and identity formation. (Same course as RST 166.) GE credit: OL, SS, VL, WC, WE. Effective: 2014 Fall Quarter.

**MSA 131D—Modern Turkish Cinema (4)**
Film Viewing—2 hours; Lecture/Discussion—2 hours. Prerequisite(s): Upper-division standing or consent of instructor. Turkish cinema of the 20th & 21st century in the context of cultural, social, & political changes. Issues covered include history, nationalism, political dissent, identity, migration, diaspora, gender, sexuality, religion, and incorporate viewpoints of Kurdish & other minority members. (Same course as CTS 146D and HIS 193E.) GE credit: AH, OL, SS, VL, WC, WE. Effective: 2016 Winter Quarter.

**MSA 150—Women and Islamic Discourses (4)**
Lecture/Discussion—4 hours. Prerequisite(s): WMS 050; Or comparable course. Introduction to the debates/discourses about women and Islam. Transformations in debates/discourses in colonial and postcolonial periods in the Middle East & South Asia. Comparative study of debates/discourses on family, work, law, sexuality, religion, comportment, human rights, feminist and religious movements. (Same course as WMS 185.) GE credit: AH, SS, WC. Effective: 2008 Fall Quarter.

**MSA 151A—Iranian Society & Culture (4)**

**MSA 180—Topics in Middle East and South Asian Studies (4)**
Extensive Writing; Lecture—3 hours. Comparative perspective on the Middle East and South Asia. Topics may include: modernity, religious traditions, colonialism, subalternity and social movements, gender and sexuality, history and memory, science and development, ritual and performance, public culture, diasporas. May be repeated up to 1 time(s) topic varies. GE credit: AH, SS, WC, WE. Effective: 2013 Spring Quarter.

**MSA 181A—Topics in Regional ME/SA Studies (4)**
Lecture—3 hours; Term Paper. Iran & Persian topics for students specializing in region-specific Middle East and South Asia Studies. May be repeated up to 3 time(s). GE credit: AH, SS, WC, WE. Effective: 2015 Winter Quarter.

**MSA 181B—Topics in Regional ME/SA Studies (4)**
Lecture—3 hours; Term Paper. Indian/South Asia topics for students specializing in region-specific Middle East and South Asia Studies. May be repeated up to 3 time(s). GE credit: AH, SS, WC, WE. Effective: 2013 Fall Quarter.

**MSA 181C—Topics in Regional ME/SA Studies: Arab Studies (4)**
Lecture—3 hours; Term Paper. Arab Studies topics. May be repeated up to 3 time(s) when different topics and themes are studied. GE credit: AH, SS. Effective: 2013 Fall Quarter.

**MSA 182A—Undergraduate Proseminar in Middle East/South Asia (4)**
Seminar—3 hours; Term Paper. Prerequisite(s): MSA 100 recommended. Class size limited to 15 students. Seminar in Iran & Persian topics specializing in region-specific Middle East and South Asia studies. May be repeated up to 3 time(s). Effective: 2015 Winter Quarter.
MSA 182B—Undergraduate Proseminar in Middle East/South Asia (4)
Seminar—3 hours; Term Paper. Prerequisite(s): MSA 100 recommended. Class size limited to 15 students. Seminar in India/South Asia topics specializing in region-specific Middle East and South Asia studies. May be repeated up to 3 time(s) when different topics and themes are studied. Effective: 2012 Fall Quarter.

MSA 182C—Undergraduate Proseminar in Middle East/South Asia: Arab Studies Seminar (4)
Seminar—3 hours; Term Paper. Prerequisite(s): MSA 100 recommended. Class size limited to 15 students. Seminar in Arab Studies topics. May be repeated up to 3 time(s). GE credit: WE. Effective: 2013 Fall Quarter.

MSA 192—Internship (1-12)
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Supervised internship on and off campus in the area of Middle East and South Asia Studies. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 2018 Spring Quarter.

MSA 194H—Special Study for Honors Students (1-5)
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. Open only to majors of senior standing who qualify for honors program. Independent study of a problem in Middle East/South Asian studies involving the writing of an honors thesis. May be repeated up to 12 unit(s). Effective: 2009 Winter Quarter.

MSA 198—Directed Group Study (1-5)
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. May be repeated for credit. (P/NP grading only.) Effective: 2018 Spring Quarter.

MSA 199—Special Study for Advanced Undergraduates (1-5)
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. May be repeated for credit. (P/NP grading only.) Effective: 2018 Spring Quarter.

Individual Major

Individual Major | A&ES B.S.
(College of Agricultural and Environmental Sciences)

The Individual Major in this College has been suspended indefinitely.

Program Office. 150 Mrak Hall; 530-752-0108; http://www.caes.ucdavis.edu/students/current/advising

Student Proposal. An Individual Major may be organized by a student having a specific academic interest not represented by an established major. Each student wishing an Individual Major should submit a proposal to the Dean's Office, prior to reaching 120 units, for review by the Student Actions and Individual Major Subcommittee. This proposal must include (1) an essay describing the special educational aims of the student, including a statement indicating why the educational objectives cannot be met by existing majors; (2) a list of planned courses; and (3) faculty advisor recommendations. It is critical that students contact a college counselor in the Dean's Office for consultation and development of the proposal.

Individual Major | Biological Sciences A.B.
(Office of Biological Sciences)

Program Office. Biology Academic Success Center; 1023 Sciences Laboratory Building; 530-752-0410.

The Major Program

The Individual Major, an integrated program composed of courses from two or more disciplines, is designed by the student and is subject to approval by an advisor and appropriate college committees. This major enables a student to pursue a specific interest that cannot be accommodated within the framework of an existing major. It must clearly and specifically meet the student's educational goals as well as meet university and college academic standards.

Student Proposal. A student who wishes to propose an individual major must submit the proposal to the Committee on Undergraduate Student Petitions prior to reaching 120 units. It is important for the student to make arrangements to speak with an advisor in the Biology Academic Success Center early in the development of his/her major as no individual major will be approved after a student has completed 120 units.

Principal Advisor (selected by student). A faculty member in a department or program in the College of Biological Sciences.
Preparatory Subject Matter

Lower division courses basic to the program or needed to satisfy prerequisites for upper division requirements as determined by the Committee on Undergraduate Student Petitions.

Units: 0

Depth Subject Matter

Upper division course work must include:

(a) Choose at least 30 units from courses offered by departments in the College of Biological Sciences.
(b) Additional requirements as determined by the Committee on Undergraduate Student Petitions; see the Biology Academic Success Center for details.
(c) For the B.A. degree, a maximum of 80 units toward the major.

All University, General Education, and College of Biological Sciences Bachelor's degree requirements; variable units.

Units: 28-42

Total: 180

Individual Major | Biological Sciences B.S.

(Chapter of Biological Sciences)

Program Office. Biology Academic Success Center; 1023 Sciences Laboratory Building; 530-752-0410.

The Major Program

The Individual Major, an integrated program composed of courses from two or more disciplines, is designed by the student and is subject to approval by faculty advisor and appropriate college committees. All University, General Education, and College of Biological Sciences Bachelor's degree requirements; variable units.

Units: 40-68

Total: 180
**Individual Major | L&S A.B.**

(College of Letters and Science)

**Program Office.** 200 Social Sciences and Humanities Building (Undergraduate Education and Advising office); http://www.ls.ucdavis.edu/students

**The Major Program**

The Individual Major, an integrated program composed of courses from two or more disciplines, is designed by the student and is subject to approval by the faculty advisor and appropriate college committees. This major enables a student to pursue a specific interest that cannot be accommodated within the framework of an existing major. It must clearly and specifically meet the student's educational goals as well as meet university and college academic standards.

**Student Proposal.** A student who wishes to propose an individual major must submit the proposal to the Faculty Committee on Individual Majors in the College of Letters and Science prior to reaching 120 units. The proposal must be submitted by the end of the fourth week of the quarter. This proposal will consist of (1) an essay, identifying the specific educational and professional objectives, including an indication of why the objectives cannot be met within existing majors, (2) a list of courses planned to complete the major, and (3) faculty advisor recommendations. The proposal will be reviewed and a decision provided the quarter of submittal. It is important that you carefully review the information in the Individual Majors Handbook; available at http://ls.ucdavis.edu/advising/academic-pdfs/individual-major-handbook.pdf.

**Honors Program.** By the fourth week of the last quarter of the junior year, students potentially eligible for high or highest honors at graduation (see College section), may petition the Individual Majors Committee for tentative acceptance into an honors program.

Final admission will depend upon the Committee's approval of a senior thesis prospectus that has been agreed upon by the student and faculty advisor. The prospectus must be presented to the Committee by the end of the fourth full week of instruction of the first quarter of the senior year. Graduation with high or highest honors will be conditional upon both the maintenance of the required grade point average and the satisfactory completion of the senior thesis project. Students who anticipate doing a senior honors thesis should allow up to three units of independent study in the program during each of two quarters in the senior year as course options.

**Major Advisor (selected by student).** Principal Advisor: a faculty member in a teaching department or program in the College of Letters and Science in the major field of emphasis. Secondary Advisor: a faculty member from a secondary area of interest.

**Preparatory Subject Matter**

Lower division courses basic to the program or needed to satisfy prerequisites for upper division requirements. **Units: 0**

**Depth Subject Matter**

*Upper division units must include:*

(a) Interrelated and complementary courses from two or more departments which provide a unified pattern and focus.

(b) At least 30 units from Letters and Science teaching departments or programs.

(c) No more than 10 units in courses numbered 194H, 198 and 199.

(d) For the A.B. degree, a maximum of 80 units toward the major; for the B.S. degree, a maximum of 110 units toward the major.

**Total: 45-54**

Integrated Teaching Credential (Graduate Group)

Integrated Teaching Credential (Graduate Group) | Integrated Teaching Credential M.S.
(School of Education)

School of Education Building: 530-752-0757; http://education.ucdavis.edu
Faculty: https://education.ucdavis.edu/candel-program-faculty

The Integrated Teaching Credential with Master's Degree Program offers an opportunity for qualified students to complete the requirements for both a Masters of Arts in Education degree and a Multiple Subject OR Single Subject Credential in English, mathematics, science, social science or agriculture in a 15-month, five-quarter program. A bilingual authorization in Spanish is available to credential candidates in both the elementary and secondary programs.

The Credential Program prepares students for the teaching profession by immersing them in the total environment of a public school classroom while enrolled in required coursework. The coursework incorporates a theoretical-practical approach to the teaching-learning process, encouraging close interactions among teacher candidates and teacher education faculty. Students complete requirements for the M.A. degree during two part-time quarters following the credential year. This coursework introduces the integration of research into teaching practice, making teachers more informed and pro-active practitioners.

Integrative Genetics & Genomics (Graduate Group)

Faculty. http://igg.ucdavis.edu/faculty/

Graduate Study. The Graduate Group in Integrative Genetics and Genomics (IGG) offers programs of study and research leading to M.S. and Ph.D. degrees. Students in the IGG graduate program have the opportunity to apply genomic, molecular, computational, and classical genetic approaches to study model organisms, a broad range of native and agricultural species, humans, and companion animals. The group integrates genetic research across campus and unites over 100 faculty members from more than 25 departments spanning the College of Biological Sciences, the College of Letters and Science, the College of Agricultural and Environmental Sciences, the School of Medicine, and the School of Veterinary Medicine. Students experience an unsurpassed breadth of research and instructional opportunities from the most fundamental to applied aspects of genetics. For additional information regarding the program, contact the group coordinator at 530-752-4863.

Integrative Genetics & Genomics (Graduate Group) | GGG Courses

Courses in GGG:

**GGG 201A—Advanced Genetic Analysis (5)**
Lecture/Discussion—5 hours. Prerequisite(s): BIS 101; STA 100; Or the equivalent, graduate standing. Fundamentals of genetic analysis and chromosome structure using model organisms including mutation, transmission, complementation, suppression, and enhancement as well as epigenetic phenomena at the whole organism and molecular levels. Effective: 2002 Fall Quarter.

**GGG 201B—Genomics (5)**
Discussion—2 hours; Lecture—3 hours. Prerequisite(s): GGG 201A; GGG 201C; Or equivalents that provide a basic understanding of genetics and molecular biology. Class limited to 40 students; priority to Genetics Graduate Group students. Prokaryotic and eukaryotic genomes. Experimental strategies and analytical challenges of modern genomics research and the theory and mechanics of data analysis. Structural, functional, and comparative genomics. Related issues in bioinformatics. Effective: 2004 Spring Quarter.

**GGG 201C—Molecular Genetic Mechanisms in Disease (4)**
Lecture/Discussion—4 hours. Prerequisite(s): BIS 101; Or the equivalent. Pass One restricted to graduate students in genetics, microbiology or biochemistry and molecular biology graduate groups. Exploration of how basic mechanisms of molecular biology contribute to health and disease. Diseases related to animals, plants, and microbes will highlight fundamental concepts in the assembly, function and regulation of DNA, RNA, and protein. Effective: 2012 Fall Quarter.

**GGG 201D—Quantitative and Population Genetics (5)**
Lecture—5 hours. Prerequisite(s): GGG 201A; or Consent of Instructor. Basic concepts of quantitative and population genetics including gene and genotypic frequencies, multiple factor hypothesis, phenotypic and genotypic values, heritability, selection, genetic variation, the detection of quantitative trait loci and evolution in populations. Experimental and analytical methods. Effective: 2002 Fall Quarter.

**GGG 205—Molecular Genetics Laboratory (5)**
Laboratory—15 hours. Prerequisite(s): BIS 101 (can be concurrent); Or the equivalent, enrolled in Genetics Graduate Group. Students will conduct experiments in molecular genetics laboratories. Individual research problems will emphasize experimental design, experience with methodologies, and data interpretation. May be repeated up to three times for credit. May be repeated up to 3 time(s). (S/U grading only.) Effective: 1997 Winter Quarter.

**GGG 210—Horizontal Gene Transfer (3)**
Lecture/Discussion—3 hours. Prerequisite(s): Background in basic microbiology and genetics required; introductory course in molecular biology, biotechnology and microbial and animal/plant genetics recommended. Transfer of genes between unrelated organisms in nature. Dissemination of foreign DNA from genetically engineered organisms, including plants and animals. Mechanisms by which genes are transferred horizontally, and between kingdoms. Effective: 1999 Fall Quarter.

**GGG 211—Concepts in Human Genetics and Genomics (3)**
Lecture/Discussion—3 hours. Prerequisite(s): GGG 201A; Or equivalent; GGG 201B and GGG 201C or equivalent are recommended. Pass One restricted to graduate students enrolled in the Human Genetics Focus Group; Pass Two restricted to graduate students enrolled in Genetics Graduate Group; after that, open enrollment for graduate students up to 12 students, then undergraduates. Human genomic organization; genetic structure of populations; positional cloning, application of linkage, association, and haplotypes; quantitative trait loci analyses; integrative
genetic studies of gene expression; DNA repair mechanisms in genetic disease; mutation analyses; epigenetics; mitochondrial disease; gene manipulation and therapy. Effective: 2004 Winter Quarter.

**GGG 220—Genomics and Biotechnology of Plant Improvement (3)**
Lecture—3 hours. Prerequisite(s): BIS 101; Or equivalent. Integration of modern biotechnology and classical plant breeding including the impact of structural, comparative and functional genomics on gene discovery, characterization and exploitation. Also covers molecular markers, plant transformation, hybrid production, disease resistance, and novel output traits. (Same course as PLS 220.) Effective: 2002 Winter Quarter.

**GGG 225—Gene and Cellular Therapies (3)**
Lecture/Discussion—3 hours. Gene therapy from basic concepts to clinical applications. Topics include the human genome and genetic variation, genetic diseases, methods to manipulate gene expression, viral and non-viral delivery vectors, history and progress of gene therapy, case studies, and ethical issues. (Same course as PHA 225.) Effective: 2017 Winter Quarter.

**GGG 250—Functional Genomics: From Bench to Bedside (3)**
Lecture/Discussion—3 hours. Prerequisite(s): GGG 201C; MCB 214; Or equivalent. Functional genomics (how genetic variation and epigenomics affect gene expression), with an emphasis on clinical relevance and applications. Topics include genetic variation and human disease, cancer therapeutics, and biomarker discovery. (Same course as PHA 250.) Effective: 2015 Spring Quarter.

**GGG 290—Seminar in Evolutionary, Developmental and Population Genetics (1)**
Seminar—1 hour. Topics of current interest in evolutionary, population, and developmental genetics. May be repeated for credit. (S/U grading only.) Effective: 2014 Fall Quarter.

**GGG 290A—Graduate Student Conference in Genetics (1)**
Conference—1 hour. Restricted to Genetics Graduate Group students. Student-given seminars on topics in genetics, with critiques by instructor and peers. May be repeated for credit. (S/U grading only.) Effective: 2012 Fall Quarter.

**GGG 291—Seminar in History of Genetics (2)**
Seminar—2 hours. Prerequisite(s): BIS 101 The development of modern genetic theories beginning with Mendel. Effective: 1997 Winter Quarter.

**GGG 292—Seminar in Genomics and Epigenomics (1)**
Seminar—1 hour. Topics of current interest in genomics and epigenomics. May be repeated for credit. (S/U grading only.) Effective: 2014 Winter Quarter.

**GGG 293—Seminar in Animal Genetics (1-3)**
Seminar—1-3 hours. Prerequisite(s): GGG 201A; or Consent of Instructor. Emphasis on recent advances in the field of animal genetics, ranging from quantitative genetics to molecular biology as it relates to animals. Effective: 1997 Winter Quarter.

**GGG 294—Seminar in Human Genetics (2)**
Seminar—2 hours. Prerequisite(s): GGG 201A; and Consent of Instructor. Topics of current interest in human genetics and genomics. May be repeated up to 5 time(s) topic differs. Effective: 2004 Fall Quarter.

**GGG 295—Seminar in Molecular Genetics (1-3)**
Seminar—1-3 hours. Prerequisite(s): GGG 201A; or Consent of Instructor. Topics of current interest related to the structure, modification and expression of genes. Effective: 1997 Winter Quarter.

**GGG 296—Scientific Professionalism and Integrity (2)**
Lecture—1 hour; Seminar—1 hour. Prerequisite(s): Graduate standing or consent of instructor. Review of basic skills required of contemporary scientists. Topics include scientific conduct, manuscript preparation, grant writing, seminar presentations, and time management. Emphasis on responsibilities of scientists to factually and thoughtfully communicate results. (P/NP grading only.) Effective: 2017 Spring Quarter.

**GGG 297—Seminar in Plant Genetics (1-3)**
Seminar—1-3 hours. Prerequisite(s): GGG 201A; or Consent of Instructor. Current topics in plant genetics will be examined in student-conducted seminars and discussion format. The integration of molecular, organismal and population genetics to address questions in plant biology will be emphasized. Effective: 1997 Winter Quarter.

**GGG 298—Group Study (1-5)**
Variable. Prerequisite(s): Consent of Instructor. Group study of selected topics in genetics. (S/U grading only.) Effective: 1997 Winter Quarter.
GGG 299—Research (1-12)
Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

GGG 300—Methods in Teaching Genetics (1-3)
Lecture/Discussion; Variable. Prerequisite(s): Consent of Instructor. Graduate standing. Practical experience in the methods and problems of teaching genetics. Includes analysis of texts and supporting material, discussion of teaching techniques, preparing for and conducting discussion or laboratory sections, formulating examinations under supervision of instructor. May be repeated up to 3 time(s) or 9 units if teaching in different genetics related course. (S/U grading only.) Effective: 2001 Fall Quarter.

Integrative Pathobiology (Graduate Group)

Integrative Pathobiology (Graduate Group) | Integrative Pathobiology Information
Patricia Pesavento, D.V.M., Ph.D., Chairperson of the Group
Brian Murphy, D.V.M., Ph.D., Vice-chairperson of the Group
Group Office. 1024 Veterinary Medicine Student Services and Administrative Center; 530-752-3737; http://www.vetmed.ucdavis.edu/integrativepath/

Integrative Pathobiology (Graduate Group) | Integrative Pathobiology M.S.
Patricia Pesavento, D.V.M., Ph.D., Chairperson of the Group
Brian Murphy, D.V.M., Ph.D., Vice-chairperson of the Group
Group Office. 1024 Veterinary Medicine Student Services and Administrative Center; 530-752-3737; http://www.vetmed.ucdavis.edu/integrativepath/

Graduate Study. The Graduate Group in Integrative Pathobiology (GGIP) is the core UC Davis graduate program for students interested in disease processes and biomedical research. The diverse faculty members in the group come from the School of Veterinary Medicine, the School of Medicine, the College of Agricultural and Environmental Sciences, and the College of Biological Sciences. This diversity of faculty offers students a wide range of opportunities and expertise from the UC Davis biomedical research community.

GGIP is designed for students interested in studying mechanisms responsible for the development of disease at the organismal, cellular or subcellular level. Students interested in the interface between cell biology, biochemistry, microbiology, pharmacology, physiology, immunology, and genetics are encouraged to apply.

Preparation. This program is primarily for applicants with a strong background in basic biomedical sciences.

Graduate Advisor. Jeffrey Stott (Pathology, Microbiology, and Immunology)

Integrative Pathobiology (Graduate Group) | Integrative Pathobiology Ph.D.
Patricia Pesavento, D.V.M., Ph.D., Chairperson of the Group
Brian Murphy, D.V.M., Ph.D., Vice-chairperson of the Group
Group Office. 1024 Veterinary Medicine Student Services and Administrative Center; 530-752-3737; http://www.vetmed.ucdavis.edu/integrativepath/

Graduate Study. The Graduate Group in Integrative Pathobiology (GGIP) is the core UC Davis graduate program for students interested in disease processes and biomedical research. The diverse faculty members in the group come from the School of Veterinary Medicine, the School of Medicine, the College of Agricultural and Environmental Sciences, and the College of Biological Sciences. This diversity of faculty offers students a wide range of opportunities and expertise from the UC Davis biomedical research community.
GGIP is designed for students interested in studying mechanisms responsible for the development of disease at the organismal, cellular or subcellular level. Students interested in the interface between cell biology, biochemistry, microbiology, pharmacology, physiology, immunology, and genetics are encouraged to apply.

**Preparation.** Students applying to this program have varied backgrounds. Some hold professional degrees (i.e., DVM, MD or DDS) while others apply after completion of an undergraduate degree. Students without a professional degree are admitted if they have exceptionally strong interests and backgrounds in basic biomedical sciences.

**Graduate Advisor.** Jeffrey Stott (Pathology, Microbiology, and Immunology)

### International Agricultural Development

**International Agricultural Development | IAD Information**

(College of Agricultural and Environmental Sciences)

**Foreign Language Requirement**

Units: 0-15

Students must complete three sequenced quarters (15 units) of courses in one foreign language or its equivalent. Passing a foreign language proficiency examination, a score of 5, 4, or 3 on a foreign language Advanced Placement examination (except Latin), or a score of 550 on the SATII: Subject Test will also satisfy this requirement.

**Internship Requirement**

Units: 4

Students must complete at least four units of internship. Internships can be chosen in consultation with an advisor. Internship requirement waived for students enrolled in the UC Education Abroad Program.

**Areas of Specialization**

Units: 44-45

**Agricultural Production Option**

Units: 45

**Total:** 21-23

International Agricultural Development | IAD Courses

Courses in IAD:

**IAD 010—Introduction to International Agricultural Development (4)**
Discussion—1 hour; Lecture—3 hours. Theories, practices and institutions relating to agricultural development; the interaction of changing social, cultural and economic organization through successive stages of economic development; impact of new agricultural technology on underdeveloped regions. GE credit: SS, WC, WE. Effective: 2011 Spring Quarter.

**IAD 092—Internship (1-12)**
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Supervised internship, off and on campus, in community and institutional settings. (P/NP grading only.) Effective: 2011 Spring Quarter.

**IAD 103—Social Change and Agricultural Development (4)**

**IAD 142—Equipment and Technology for Small Farms (2)**
Laboratory—3 hours; Lecture—1 hour. Types and characteristics of agricultural equipment and technologies appropriate for small commercial farming. Adjustment and calibration of equipment. Selection of and budgeting for equipment. (Same course as ABT 142.) GE credit: QL, SE, VL. Effective: 2011 Spring Quarter.

**IAD 160—Agroforestry: Global and Local Perspectives (3)**
Lecture/Discussion—3 hours. Prerequisite(s): PLS 002 or BIS 001C or BIS 002C; (PLS 142 or PLS 150 or BIS 002B); Or general ecology course in lieu of PLS 142 or PLS 150 or BIS 002B. Traditional and evolving use of trees in agricultural ecosystems; their multiple roles in environmental stabilization and production of food, fuel, and fiber; and socioeconomic barriers to the adoption and implementation of agroforestry practices. Not open for credit to students who have taken previously taken AMR 160. (Former course AMR 160.). (Same course as PLS 160.) GE credit: SE. Effective: 2011 Spring Quarter.

**IAD 170—Program Development for International Agriculture (4)**
Lecture/Discussion—4 hours. Prerequisite(s): IAD 010 Principles of leadership and management for international agricultural development. Organizations and organizational behavior, and the implications for planning and administering organizations involved in the global development effort. Effective: 2011 Spring Quarter.

**IAD 190—Proseminar in International Agricultural Development (1)**
Seminar—1 hour. Presentation and discussion of current topics in international agricultural development by visiting lecturers, staff and students. May be repeated for credit. (P/NP grading only.) Effective: 2011 Spring Quarter.

**IAD 192—Internship (1-12)**
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Supervised internship, off and on campus, in community and institutional settings. May be repeated for credit. (P/NP grading only.) Effective: 2011 Spring Quarter.
IAD 198—Directed Group Study (1-5)
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. Directed group study. May be repeated for credit. (P/NP grading only.) Effective: 2011 Spring Quarter.

IAD 199—Special Study for Advanced Undergraduates (1-5)
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. Special study for advanced undergraduates. May be repeated for credit. (P/NP grading only.) Effective: 2011 Spring Quarter.

IAD 200N—Philosophy and Practice of Agricultural Development (5)
Lecture/Discussion—5 hours; Term Paper. Introduces key elements of philosophy and practice of agricultural development in less developed countries; major paradigms of development; historical context within which these paradigms operate; various development techniques and initiatives emerging from agricultural production to institutional capacity building and management. Not open for credit to students who have completed former IAD 202. Effective: 2011 Spring Quarter.

IAD 201—The Economics of Small Farms and Farming Systems (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ARE 100A or ECN 100; or the equivalent. Economic perspective on small farm development. Establishes a basis for predicting farmers' responses to changes in the economic environment, and for proposing government policies to increase small farm production and improve farmer and national welfare. Effective: 2017 Winter Quarter.

IAD 202N—Analysis and Determinants of Farming Systems (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): PLS 110C or PLS 111; or the equivalent. Unifying concepts of cropping systems in temperate and tropical climatic zones; agroecosystems stability, diversity and sustainability; management strategies, resource use efficiency and their interactions; role of animals, their impact on energy use efficiency, nutrient cycling, and providing food and power. Not open for credit to students who have completed former IAD 200. Effective: 2017 Winter Quarter.

IAD 203N—Project Planning and Evaluation (4)
Discussion—1 hour; Workshop—3 hours. Prerequisite(s): IAD 200N; or Consent of Instructor. Interdisciplinary setting for application of student skills and specialization to a "real world" development project. Focus on team-building and effective interdisciplinary problem-solving methods, with the objective of producing a project document and presentation within a specified deadline. Not open for credit to students who have completed former IAD 203. Effective: 2017 Winter Quarter.

IAD 290—Seminar in International Agricultural Development (1-2)
Seminar—1-2 hours. Prerequisite(s): Consent of Instructor. Discussion and critical evaluation of advanced topics and issues in international agricultural development. May be repeated for credit. (S/U grading only.) Effective: 2011 Spring Quarter.

IAD 291—Topics in International Agricultural Development (1-3)
Lecture/Discussion—1-3 hours. Prerequisite(s): Consent of Instructor. Selected topics dealing with current issues in agricultural development in lesser developed nations. Variable content. May be repeated up to 1 time(s). Effective: 2011 Spring Quarter.

IAD 292—Graduate Internship (1-12)
Internship—3-36 hours. Prerequisite(s): Participation in H. Humphrey Fellow Program or consent of instructor. Individually designed supervised internship, off or on campus, in community, business or institutional setting. Developed with advice of faculty mentor and Humphrey Coordinator. (S/U grading only.) Effective: 2011 Spring Quarter.

IAD 298—Directed Group Study (1-5)
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. Directed group study. May be repeated for credit. (S/U grading only.) Effective: 2011 Spring Quarter.

IAD 299—Research (1-12)
Variable—1-12 hours. Prerequisite(s): Consent of Instructor. Research. May be repeated for credit. (S/U grading only.) Effective: 2011 Spring Quarter.

IAD 396—Teaching Assistant Training Practicum (1-4)
Variable—3-12 hours. Prerequisite(s): Graduate standing. Teaching assistant training practicum. May be repeated for credit. (S/U grading only.) Effective: 2011 Spring Quarter.

International Agricultural Development (Graduate Group)
International Agricultural Development (Graduate Group) | International Agricultural Development M.S.

Kate Scow, Ph.D., Professor (Land, Air, and Water Resources) Chairperson of the Group

Group Office. 1238 Plant and Environmental Sciences Building; 530-752-4839; http://iad.ucdavis.edu

Faculty. http://iad.ucdavis.edu/people/faculty/

Graduate Study. The International Agricultural Development M.S. degree program prepares students for careers in global agricultural and rural development, especially, but not exclusively, of developing and less-industrialized regions. This is an interdisciplinary program designed to provide students with knowledge and skills that will enable them to implement, facilitate, and manage programs that enhance agricultural development, resource management, and rural life.

Students are prepared to realize biological and technological improvement in agricultural and natural systems to facilitate social innovation. Training in International Agricultural Development includes both breadth and depth components. Breadth components, required of all M.S. students, aim to establish an understanding of the issues in international development as they relate to agriculture and the environment. These include the history and philosophy of development, leadership and management techniques, fundamentals of farming systems, and agricultural economics. Students acquire depth in their own areas of specialization within the agricultural and social sciences. The areas include agricultural and resource economics, agricultural engineering, agronomy, animal science, anthropology, aquaculture, avian science, community development, ecology, economics, entomology, environmental design, environmental toxicology, food science, gender, geography, horticulture, nutrition, plant pathology, plant biology, plant protection and pest management, political science, preventive veterinary medicine, range science, sociology, soil science, sustainable agriculture, vegetable crops, viticulture, and water science.

Practical and on-site experience with development issues is encouraged and facilitated by guidance from the group's faculty members, who possess a wide range of experience in international development.

Graduate Advisor. Contact the Group office.

International Agricultural Development (Graduate Group) | IAD Courses

Courses in IAD:

IAD 010—Introduction to International Agricultural Development (4)
Discussion—1 hour; Lecture—3 hours. Theories, practices and institutions relating to agricultural development; the interaction of changing social, cultural and economic organization through successive stages of economic development; impact of new agricultural technology on underdeveloped regions. GE credit: SS, WC, WE. Effective: 2011 Spring Quarter.

IAD 092—Internship (1-12)
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Supervised internship, off and on campus, in community and institutional settings. (P/NP grading only.) Effective: 2011 Spring Quarter.

IAD 103—Social Change and Agricultural Development (4)

IAD 142—Equipment and Technology for Small Farms (2)
Laboratory—3 hours; Lecture—1 hour. Types and characteristics of agricultural equipment and technologies appropriate for small commercial farming. Adjustment and calibration of equipment. Selection of and budgeting for equipment. (Same course as ABT 142.) GE credit: QL, SE, VL. Effective: 2011 Spring Quarter.

IAD 160—Agroforestry: Global and Local Perspectives (3)
Lecture/Discussion—3 hours. Prerequisite(s): PLS 002 or BIS 001C or BIS 002C; (PLS 142 or PLS 150 or BIS 002B); Or general ecology course in lieu of PLS 142 or PLS 150 or BIS 002B. Traditional and evolving use of trees in agricultural ecosystems; their multiple roles in environmental stabilization and production of food, fuel, and fiber; and socioeconomic barriers to the adoption and implementation of agroforestry practices. Not open for credit to
students who have taken previously taken AMR 160. (Former course AMR 160.) (Same course as PLS 160.) GE credit: SE. Effective: 2011 Spring Quarter.

IAD 170—Program Development for International Agriculture (4)
Lecture/Discussion—4 hours. Prerequisite(s): IAD 010 Principles of leadership and management for international agricultural development. Organizations and organizational behavior, and the implications for planning and administering organizations involved in the global development effort. Effective: 2011 Spring Quarter.

IAD 190—Proseminar in International Agricultural Development (1)
Seminar—1 hour. Presentation and discussion of current topics in international agricultural development by visiting lecturers, staff and students. May be repeated for credit. (P/NP grading only.) Effective: 2011 Spring Quarter.

IAD 192—Internship (1-12)
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Supervised internship, off and on campus, in community and institutional settings. May be repeated for credit. (P/NP grading only.) Effective: 2011 Spring Quarter.

IAD 198—Directed Group Study (1-5)
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. Directed group study. May be repeated for credit. (P/NP grading only.) Effective: 2011 Spring Quarter.

IAD 199—Special Study for Advanced Undergraduates (1-5)
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. Special study for advanced undergraduates. May be repeated for credit. (P/NP grading only.) Effective: 2011 Spring Quarter.

IAD 200N—Philosophy and Practice of Agricultural Development (5)
Lecture/Discussion—5 hours; Term Paper. Introduces key elements of philosophy and practice of agricultural development in less developed countries; major paradigms of development; historical context within which these paradigms operate; various development techniques and initiatives emerging from agricultural production to institutional capacity building and management. Not open for credit to students who have completed former IAD 202. Effective: 2011 Spring Quarter.

IAD 201—The Economics of Small Farms and Farming Systems (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ARE 100A or ECN 100; or the equivalent. Economic perspective on small farm development. Establishes a basis for predicting farmers' responses to changes in the economic environment, and for proposing government policies to increase small farm production and improve farmer and national welfare. Effective: 2017 Winter Quarter.

IAD 202N—Analysis and Determinants of Farming Systems (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): PLS 110C or PLS 111; or the equivalent. Unifying concepts of cropping systems in temperate and tropical climatic zones; agroecosystems stability, diversity and sustainability; management strategies, resource use efficiency and their interactions; role of animals, their impact on energy use efficiency, nutrient cycling, and providing food and power. Not open for credit to students who have completed former IAD 200. Effective: 2017 Winter Quarter.

IAD 203N—Project Planning and Evaluation (4)
Discussion—1 hour; Workshop—3 hours. Prerequisite(s): IAD 200N; or Consent of Instructor. Interdisciplinary setting for application of student skills and specialization to a "real world" development project. Focus on team-building and effective interdisciplinary problem-solving methods, with the objective of producing a project document and presentation within a specified deadline. Not open for credit to students who have completed former IAD 203. Effective: 2017 Winter Quarter.

IAD 290—Seminar in International Agricultural Development (1-2)
Seminar—1-2 hours. Prerequisite(s): Consent of Instructor. Discussion and critical evaluation of advanced topics and issues in international agricultural development. May be repeated for credit. (S/U grading only.) Effective: 2011 Spring Quarter.

IAD 291—Topics in International Agricultural Development (1-3)
Lecture/Discussion—1-3 hours. Prerequisite(s): Consent of Instructor. Selected topics dealing with current issues in agricultural development in lesser developed nations. Variable content. May be repeated up to 1 time(s). Effective: 2011 Spring Quarter.

IAD 292—Graduate Internship (1-12)
Internship—3-36 hours. Prerequisite(s): Participation in H. Humphrey Fellow Program or consent of instructor. Individually designed supervised internship, off or on campus, in community, business or institutional setting.
Developed with advice of faculty mentor and Humphrey Coordinator. (S/U grading only.) Effective: 2011 Spring Quarter.

IAD 298—Directed Group Study (1-5)
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. Directed group study. May be repeated for credit. (S/U grading only.) Effective: 2011 Spring Quarter.

IAD 299—Research (1-12)
Variable—1-12 hours. Prerequisite(s): Consent of Instructor. Research. May be repeated for credit. (S/U grading only.) Effective: 2011 Spring Quarter.

IAD 396—Teaching Assistant Training Practicum (1-4)
Variable—3-12 hours. Prerequisite(s): Graduate standing. Teaching assistant training practicum. May be repeated for credit. (S/U grading only.) Effective: 2011 Spring Quarter.

International Commercial Law (Graduate Group)

International Commercial Law (Graduate Group) | ICL Information

Suspension of Program
The International Commercial Law program is no longer admitting students.

International Commercial Law (Graduate Group) | ICL Courses

Courses in ICL:

ICL 201—Orientation in United States Law (7)

ICL 201A—Fundamentals in United States Law (4)
Lecture/Discussion—20 hours. Prerequisite(s): Law school education or equivalent. Investigation of the Common Law System of the U.S. Includes the American constitutional system, the American judiciary, the American civil trial, and foundational substantive and procedural law such as real property, torts, criminal law and procedure, civil procedure, and contracts. Effective: 2013 Summer Session 1.

ICL 201B—Advanced Topics in United States Law (3)
Lecture/Discussion—20 hours. Prerequisite(s): Law school education or equivalent. Orientation to advanced topics in U.S. law: Intellectual Property (including copyright and trademarks), Commercial and Consumer Law, Advanced Contracts, Antitrust, Taxation, Remedies, Labor Law, Environmental Law, Dispute Resolution, Remedies and introduction to trial techniques and legal research/writing. Effective: 2013 Summer Special Session.

ICL 202—Introduction to Contracts (4)
Lecture/Discussion—20 hours. Prerequisite(s): Law school education or equivalent. Examines sorts of promises that are enforced and the nature of protection given promissory obligations in both commercial and noncommercial transactions. Inquiry is made into the means by which traditional doctrine adjusts to changing social demands. Effective: 2009 Fall Semester.

ICL 202A—Introduction to Contracts Formation (2)
Lecture/Discussion—20 hours. Prerequisite(s): Law school education or equivalent. Examines formation of the sorts of promises that are enforced and the nature of protection given promissory obligations in both commercial and noncommercial transactions. Inquiry is made into the means by which traditional doctrine adjusts to changing social demands. Effective: 2013 Summer Session 1.

ICL 202B—Introduction to Contracts Formation (2)
Lecture/Discussion—20 hours. Prerequisite(s): Law school education or equivalent. Examines formation of the sorts of promises that are enforced and the nature of protection given promissory obligations in both commercial and noncommercial transactions. Inquiry is made into the means by which traditional doctrine adjusts to changing social demands. Effective: 2014 Winter Quarter.

ICL 202B—Contracts Performance (2)
Lecture/Discussion—20 hours. Prerequisite(s): Law school education or equivalent. Examines issues of performing
promises that are enforceable and possible breach of promissory obligations in both commercial and noncommercial transactions. Inquiry is made into the means by which traditional doctrine adjusts to changing social demands. Effective: 2013 Fall Quarter.

**ICL 202BS—Contract Performance (2)**
Lecture/Discussion—20 hours. Prerequisite(s): ICL 202A; Or equivalent; Law school education or equivalent. Examines issues of performing promises that are enforceable and possible breach of promissory obligations in both commercial and noncommercial transactions. Inquiry is made into the means by which traditional doctrine adjusts to changing social demands. Effective: 2014 Winter Quarter.

**ICL 203—Civil Procedure (2)**
Lecture/Discussion—20 hours. Prerequisite(s): Law school education or equivalent. Study of the fundamental and recurrent problems in civil actions including the methods used by federal and state courts to resolve civil disputes. Effective: 2009 Fall Semester.

**ICL 204—International Joint Ventures (3)**
Lecture/Discussion—20 hours. Prerequisite(s): ICL 201; Law school education or equivalent. International and U.S. business and legal transactions. Legal planning, problem solving, decision making and negotiations related to the break-up and dissolution of a major international joint venture. U.S. laws including finance, tax, bankruptcy, labor, antitrust, environmental, corporate structures and intellectual property. Offered every three years. Effective: 2002 Summer Special Session.

**ICL 205—Introduction to Constitutional Law (4)**
Lecture/Discussion—20 hours. Prerequisite(s): Law school education or equivalent. Principles, doctrines and controversies regarding the structure and division of powers in American government. Includes judicial review, jurisdiction, standing to sue, federalism, federal and state powers and immunities, and the separation of powers among branches of the federal government. Effective: 2009 Fall Semester.

**ICL 205A—Overview of US Constitutional Law (2)**
Lecture/Discussion—20 hours. Prerequisite(s): Law school education or equivalent. Principles, doctrines and controversies regarding the structure and division of powers in American government. Includes judicial review, jurisdiction, standing to sue, federalism, federal and state powers and immunities, and the separation of powers among branches of the federal government. Effective: 2013 Summer Special Session.

**ICL 205AS—Overview of US Constitutional Law (2)**
Lecture/Discussion—20 hours. Prerequisite(s): Law school education or equivalent. Principles, doctrines and controversies regarding the structure and division of powers in American government. Includes judicial review, jurisdiction, standing to sue, federalism, federal and state powers and immunities, and the separation of powers among branches of the federal government. Effective: 2013 Fall Quarter.

**ICL 205B—Constitutional Law - Protection of Individual Rights (2)**
Lecture/Discussion—20 hours. Prerequisite(s): Law school education or equivalent. Principles, doctrines and controversies regarding the U.S. Constitution Bill of Rights, including due process of law, equal protection, freedom of expression, freedom of religion, state action, and congressional legislation in aid of civil rights and liberties. Effective: 2013 Summer Special Session.

**ICL 211—Negotiations and Alternative Dispute Resolution (1)**
Lecture/Discussion—10 hours. Prerequisite(s): ICL 201; Law school education or the equivalent. Mechanisms for resolving disputes including the alternatives to litigation such as negotiation, mediation, and arbitration. Advantages and disadvantages of each approach. Offered every three years. Effective: 2002 Summer Special Session.

**ICL 212—Introduction to Negotiation (2)**
Lecture/Discussion—20 hours. Prerequisite(s): Law school education or equivalent. Introduction to theoretical and empirical approaches to negotiation for the purposes of making deals and resolving legal disputes. Effective: 2009 Fall Semester.

**ICL 212S—Introduction to Negotiation (2)**
Lecture/Discussion—20 hours. Prerequisite(s): Law school education or equivalent. Introduction to theoretical and empirical approaches to negotiation for the purposes of making deals and resolving legal disputes. Effective: 2013 Fall Quarter.

**ICL 214—Advanced Negotiation (2)**
Lecture/Discussion—20 hours. Prerequisite(s): Law school education or equivalent. Principles and empirical
approaches to advanced negotiations including negotiation framework, models, styles, multiple party/issue negotiations and settlements. Effective: 2009 Fall Semester.

ICL 214S—Advanced Negotiation (2)  
Lecture/Discussion—20 hours. Prerequisite(s): Law school education or equivalent. Principles and empirical approaches to advanced negotiations including negotiation framework, models, styles, multiple party/issue negotiations and settlements. Effective: 2012 Spring Quarter.

ICL 215—Business Associations (4)  
Lecture/Discussion—20 hours. Prerequisite(s): ICL 201; Law school education or the equivalent. Legal rules and concepts applicable to business associations including general partnerships, joint ventures, limited partnerships, limited liability entities, and sole proprietorships. Effective: 2002 Summer Special Session.

ICL 215S—Business Associations (4)  
Lecture/Discussion—20 hours. Prerequisite(s): ICL 201; Law school education or the equivalent. Legal rules and concepts applicable to business associations including general partnerships, joint ventures, limited partnerships, limited liability entities, and sole proprietorships. Effective: 2012 Spring Quarter.

ICL 216—International Business Transactions (2)  
Lecture/Discussion—20 hours. Prerequisite(s): ICL 201; Law school education or the equivalent. Legal problems arising from international business transactions. Focus on international sales contracts, choice of law, forum selection clauses, letters of credit, transfers of technology, regulation of bribery, development of joint ventures, repatriation of profits, foreign exchange problems, and national efforts to control imports. Effective: 2002 Summer Special Session.

ICL 217—Alternative Dispute Resolution (2)  
Lecture/Discussion—20 hours. Prerequisite(s): Law school education or equivalent. Introduces students to a wide variety of alternative dispute resolution procedures, with an in-depth emphasis on negotiation, mediation and arbitration. Effective: 2009 Fall Semester.

ICL 219—Advanced Writing Project (4)  
Project (Term Project). Prerequisite(s): ICL 201; Law school education or the equivalent. The completion of a written research project under the active supervision of a faculty member in satisfaction of the research-writing requirement. (S/U grading only.) Effective: 2002 Summer Special Session.

ICL 220—United States Taxation of Multinational Investments (2)  
Lecture/Discussion—20 hours. Prerequisite(s): ICL 201; Law school education or the equivalent. An analysis of the United States taxation of multinational investments including jurisdiction of tax, the U.S. tax system, foreign tax credits, treaties, and transfer pricing. Effective: 2002 Summer Special Session.

ICL 227—Criminal Procedure (2)  
Lecture/Discussion—20 hours. Prerequisite(s): Law school education or equivalent. Federal constitutional limits on government authority to gather evidence and investigate crime. Includes Fourth Amendment limits on search, seizure, and arrest; Fifth Amendment privilege against self-incrimination; Sixth Amendment right to counsel. Effective: 2009 Summer Quarter.

ICL 228A—Mergers and Acquisitions Law (2)  
Lecture/Discussion—20 hours. Prerequisite(s): Law school education or equivalent. Practical approach to mergers and acquisitions with an in-depth look at the planning, negotiation and completion of mergers and acquisitions. Effective: 2013 Fall Quarter.

ICL 228AS—Mergers and Acquisitions Law (2)  
Lecture/Discussion—20 hours. Prerequisite(s): Law school education or equivalent. Practical approach to mergers and acquisitions with an in-depth look at the planning, negotiation and completion of mergers and acquisitions. Effective: 2013 Fall Quarter.

ICL 236—United States Securities Law & Regulation (2)  
Lecture/Discussion—20 hours. Prerequisite(s): ICL 201; Law school education or the equivalent. Structural and jurisdictional issues associated with securities practice. Topics include the regulation of public offerings, transactions by corporate insiders, regulation of corporate disclosure and conduct, and the liabilities of corporations and individuals under anti-fraud provisions. Effective: 2002 Summer Special Session.

ICL 239—Mediation (2)  
Lecture/Discussion—20 hours. Prerequisite(s): Law school education or equivalent. Introduction to the mediation
Development of communication skills, the ability to analyze disputes, to understand why mediations succeed or fail, and understand the advantages and limitations of mediation as a method of resolving disputes.

Effective: 2009 Fall Semester.

**ICL 242—Private International Law (2)**
Lecture/Discussion—20 hours. Prerequisite(s): ICL 201; Law school education or the equivalent. Operating law across national borders; emphasis on methods of resolving international disputes. International aspects of jurisdiction, choice of law, judgment enforcement, forum choice, process service, taking of evidence, foreign sovereign immunity, extraterritorial regulation of antitrust, securities; other national laws. Effective: 2004 Summer Special Session.

**ICL 242S—Private International Law (2)**
Lecture/Discussion—20 hours. Prerequisite(s): ICL 201; Law school education or the equivalent. Operating law across national borders; emphasis on methods of resolving international disputes. International aspects of jurisdiction, choice of law, judgment enforcement, forum choice, process service, taking of evidence, foreign sovereign immunity, extraterritorial regulation of antitrust, securities; other national laws. Effective: 2011 Fall Quarter.

**ICL 247—Banking Law (1)**
Lecture/Discussion—10 hours. Prerequisite(s): ICL 201; Law school education or the equivalent. Institutional features of international banking transactions, the structure of a large financial deal, and the mechanics of overseeing large loans. Emphasis on negotiable instruments such as bills of lading, letters of credit, standby letters of credit, and interbank transactions. Offered every three years. Effective: 2002 Summer Special Session.

**ICL 249—Comparative Law (1)**
Lecture/Discussion—10 hours. Prerequisite(s): ICL 201; Law school education or the equivalent. A comparative study of the development of schools of legal thought, chiefly Common law systems and Civil law traditions. Attention to the historical reasons for their divergence, contemporary approaches to universal problems such as succession, torts, and contracts, the cross-fertilization of laws and difficulties commonly associated with importing foreign law into new territory. Effective: 2002 Summer Special Session.

**ICL 250—International Trade Law (3)**
Lecture/Discussion—20 hours. Prerequisite(s): ICL 201; Law school education or the equivalent. An investigation of global trading systems including international trade in goods and services, e-commerce, international intellectual property, international tax planning and investment. Includes substantive and procedural provisions of the World Trade Organization (WTO) and the North American Free Trade Agreement (NAFTA). Offered every three years. Effective: 2002 Summer Special Session.

**ICL 251—United States Litigation Issues (1)**
Lecture/Discussion—10 hours. Prerequisite(s): ICL 201; Law school education or the equivalent. Prevention and resolution of disputes in international commerce. Emphasis on preparing for a trial in the United States. Includes the study of pre-trial motions, jury selection, opening statements, rules of evidence, closing arguments, and the selection of appropriate strategies. Offered every three years. Effective: 2002 Summer Special Session.

**ICL 262—Antitrust (1)**
Lecture/Discussion—10 hours. Prerequisite(s): ICL 201; Law school education or the equivalent. Historical and institutional background of Antitrust law in the United States. The statutory framework including price fixing, limits on distribution, monopolization and mergers, and reporting requirements. Effective: 2002 Summer Special Session.

**ICL 270—Financing International Transactions (3)**
Lecture/Discussion—20 hours. Prerequisite(s): ICL 201; Law school education or the equivalent. How capital is raised in international markets. Investment strategies for U.S. markets. Taxation of financial investments, international currency regulation, and assessing rates of return on international investments. Offered every three years. Effective: 2002 Summer Special Session.

**ICL 274—Intellectual Property (2)**
Lecture/Discussion—20 hours. Prerequisite(s): ICL 201; Law school education or the equivalent. Intensive study of intellectual property law. Including copyright, trademark and patent law and unfair competition. Effective: 2002 Summer Special Session.

**ICL 274S—Intellectual Property (2)**
Lecture/Discussion—20 hours. Prerequisite(s): ICL 201; Law school education or the equivalent. Intensive study of intellectual property law. Including copyright, trademark and patent law and unfair competition. Effective: 2011 Fall Quarter.
ICL 283—Contract Remedies (2)
Lecture/Discussion—20 hours. Prerequisite(s): Law school education or equivalent. Covers a range of remedies for contract breach: remedies under common law and equity, liquidated damages clauses, remedies for mistake and unconscionability as well as breach of contract for the Sale of Goods under UCC Article II. Effective: 2014 Winter Quarter.

ICL 283S—Contract Remedies (2)
Discussion/Laboratory—20 hours. Prerequisite(s): ICL 202A; ICL 202B; Or equivalent; Law School education or equivalent. Covers a range of remedies for contract breach: remedies under common law and equity, liquidated damages clauses, remedies for mistake and unconscionability as well as breach of contract for the Sale of Goods under UCC Article II. Effective: 2014 Winter Quarter.

ICL 285—Environmental Law (2)
Lecture/Discussion—20 hours. Prerequisite(s): Law school education or equivalent. Introduction to federal and state environmental law. Historical development of environmental law; the role of courts, the legislature and the executive branch in the development and implementation of environmental policy. Review of major statutes. Effective: 2009 Fall Semester.

ICL 289—Licensing Academy in Intellectual Property & Technology Commercialization (4)
Lecture/Discussion—20 hours. Prerequisite(s): ICL 201; Law School education or equivalent. Intellectual property as it relates to current forms of legal protection and how new innovations fit into these models, including public-private technology transfer, patents, institutional objectives, technology transfer offices, startups, and licenses. Effective: 2013 Summer Special Session.

ICL 290—American Legal System Research Seminar (1)
Seminar—5 hours. Prerequisite(s): ICL 201; Law School education or equivalent. American legal system and its structure. Legal research methodologies and presentation with attention to analysis, synthesis, organization, and editing techniques common to legal writing. (S/U grading only.) Effective: 2004 Summer Special Session.

ICL 291C—International Commercial Law Seminar (4)
Seminar—20 hours. Prerequisite(s): ICL 201; Law School education or equivalent. Advanced seminar on a current topic in International Commercial Law. Offered at the University of Cologne in Cologne, Germany for two weeks each summer. May be repeated up to 3 time(s) when topic differs. Effective: 2013 Summer Special Session.

ICL 292—International Commercial Law Seminar (1-4)
Lecture/Discussion—20 hours. Prerequisite(s): Law school education or equivalent. Advanced seminar in a current topic in International Commercial Law. Topic will change each year the course is offered. May be repeated up to 2 time(s) when topic differs. Effective: 2013 Summer Session 1.

ICL 292S—International Commercial Law Seminar (1-4)
Lecture/Discussion—20 hours. Prerequisite(s): Law school education or equivalent. Advanced seminar in a current topic in International Commercial Law. Topic will change each year the course is offered. May be repeated up to 2 time(s) when topic differs. Effective: 2013 Spring Semester.

ICL 299—Advanced Research in Legal Problems (1-4)
Variable—3-40 hours. Prerequisite(s): ICL 201; Law School education or equivalent. Permission of supervising instructor. Student individualized research projects under faculty supervision. (S/U grading only.) Effective: 2002 Summer Special Session.

International & Community Nutrition

International & Community Nutrition | International & Community Nutrition (Designated Emphasis)

Kathryn G. Dewey, Ph.D., Program Director

Program Office. 3253 Meyer Hall; 530-752-1992; http://picn.ucdavis.edu/

Faculty. http://picn.ucdavis.edu/people/faculty/

Graduate Study. The Program in International and Community Nutrition, an Organized Research Unit located in the Department of Nutrition, coordinates specialized course work and research leading to the Designated Emphasis in International and Community Nutrition for students in various graduate programs. The program focuses on both theoretical and practical issues concerning the identification, treatment, and prevention of human nutritional
problems in low-income countries and in disadvantaged groups in the United States. Students enrolled in the Designated Emphasis are expected to (1) complete the course requirements already established by their respective graduate programs, (2) participate in a weekly advanced seminar in international and community nutrition, (3) complete additional core courses in international nutrition (Nutrition 219A, 219B, 258) and selected courses in the related disciplines of epidemiology, statistics, and social and behavioral sciences, and (4) conduct their dissertation research on a relevant topic under the supervision of a professor who is a member of the Program in International and Community Nutrition.

Students accepted into the following doctoral programs are automatically eligible to participate in the Designated Emphasis: Nutrition, Agricultural and Resource Economics, Epidemiology, Anthropology, and Human Development. Students from other programs may also be accepted by special request to the Program Director. Upon graduation, students receive a Ph.D. in their major field, with specific recognition for the Designated Emphasis in International and Community Nutrition.

**Graduate Advisor.** Contact the Program office.

### International Relations

**International Relations A.B.**

Ethan Scheiner, Ph.D., Program Director

**Program Office.** 464 Kerr Hall; 530-754-809

Problems of security, development, ethnic conflict, human rights, health, and the environment are increasingly confronted at a global rather than a national level. With its theoretical models and real-world application, the study of international relations is an exciting and highly relevant interdisciplinary major.

**The Program.** Graduation with a major in international relations requires completion of introductory courses in political science, economics, statistics, and history. The major also requires fluency in English and a working knowledge (approximately 24 to 30 units of course credits or equivalent fluency) of one other modern language. Students choose one of four tracks that encompass major topical areas in combination with an area studies emphasis:

1. World Trade and Development;
2. Peace and Security;
3. Global Environment, Health, and Natural Resources;
4. Peoples and Nationalities. *Upper division course work for Tracks I, II and III is composed of twelve courses. Students choosing Track IV, Peoples and Nationalities, are required to study or work abroad for a minimum of one quarter; upper division course work is reduced to nine classes in recognition of the experience gained through education abroad.*

**Programs, Internships, and Career Alternatives.** One program of special interest to international relations majors is the Education Abroad Program, which provides insights into the life and culture of other countries. At UC Davis, the Internship and Career Center assists students in obtaining legislative, legal, and business internships. In addition, the UC Davis Washington Center and UC Center Sacramento arrange internships and run full-credit academic program in Washington, D.C. and Sacramento respectively with a full range of opportunities for International Relations majors (see also UC Washington Center (UCDC). International relations graduates are prepared for employment in government agencies (such as the Foreign Service), state agencies, international or non-governmental organizations (such as the United Nations), foundations, and companies having interests in international business, trade, or finance. The stringent language requirement of the major program enhances career prospects in jobs which demand knowledge of the language and culture of other countries.

**International Relations Abroad.** International Relations strongly encourages all students to participate in the UC Education Abroad Program; those who choose to study Track IV, Peoples and Nationalities, must study or work abroad for a minimum of one quarter. A maximum of five courses taken abroad may be applied toward the 12 upper division courses in Tracks I, II, and III of the International Relations major. In Track IV, the four Area Studies courses may be done abroad. Courses are selected with the approval of an advisor for the International Relations program.

**Major Advisor.** Consult department office.

**Preparatory Subject Matter**

**Units:** 28-54
ECN 001A Principles of Microeconomics 4
OR
ANT 002 Cultural Anthropology 5
HIS 004C History of Western Civilization 4
OR
HIS 010C World History III 4
POL 003 International Relations 4
ECN 001B Principles of Macroeconomics 4
POL 002 Introduction to Comparative Politics 4
POL 051 Scientific Study of Politics 4
Choose one: 4-5
   POL 012Y Data Visualization in the Social Sciences 4
   STA 013 Elementary Statistics 4
   SOC 046B Introduction to Social Research 5

Note: Preparatory Subject Matter does not cover all potential prerequisite courses for upper division curriculum.

Foreign language Units: 0-30

One of the following series in a single language, or certified fluency at the highest level required below:

Note: The language curricula are subject to change; please check with an adviser for the major. A language not listed above may be substituted only with prior written approval of the International Relations Program Committee.

**Depth Subject Matter**

Tracks I, II and III: Twelve upper division courses  
Track IV: Nine upper division courses

*Choose one track:*

**Track I: World Trade and Development**  
*Emphasizes contemporary economic relations of industrialized and developing countries.*

*For Advanced Industrialized Focus:*

- **ECN 100A** Intermediate Micro Theory: Consumer and Producer Theory  
  4 units
- **ECN 101** Intermediate Macro Theory  
  4 units
- **ECN 160A** International Microeconomics  
  4 units
- **ECN 160B** International Macroeconomics  
  4 units
- **POL 123** The Politics of Interdependence  
  4 units

Choose two from Group A.  
Choose one from Group B.  
Choose four to fulfill Area Studies Requirement.  

*For Developing Countries Focus:*

- **ECN 115A** Economic Development  
  4 units
- **ECN 115B** Economic Development  
  4 units
- **ECN 162** International Economic Relations  
  4 units
- **POL 123** The Politics of Interdependence  
  4 units
- **POL 124** The Politics of Global Inequality  
  4 units

Choose one from Group A.  
Choose two from Group B.  
Choose four to fulfill Area Studies Requirement.  

*Group A; Advanced Industrialized Countries:*

- **ARE 138** International Commodity & Resource Markets  
  4 units
- **ANT 127** Urban Anthropology  
  4 units
- **CRD 118** Technology and Society  
  4 units
- **CRD 141** Organization of Economic Space  
  4 units
- **ECN 102** Analysis of Economic Data  
  4 units
- **ECN 110B** World Economic History Since the Industrial Revolution  
  4 units
- **IRE 104** The Political Economy of International Migration  
  4 units
- **POL 130** Recent U.S. Foreign Policy  
  4 units
- **POL 140A** Comparative Political Institutions: Electoral Systems  
  4 units
- **POL 140B** Comparative Political Institutions: Parties  
  4 units
- **POL 140C** Comparative Political Institutions: Legislatures  
  4 units
- **POL 140D** When Institutions Fail  
  4 units
- **POL 140E** Policy-Making Processes  
  4 units
- **SOC 138** Economic Sociology  
  4 units
- **SOC 139** Corporations and Society  
  4 units
- **SOC 141** Industrialization and Social Change  
  4 units
- **SOC 183** Comparative Organizations  
  4 units

*Group B; Developing Countries:*

- **ANT 122A** Economic Anthropology  
  4 units
- **ANT 122B** Anthropology and Political Economy  
  4 units
- **ANT 126A** Anthropology of Development  
  4 units
- **ANT 126B** Women and Development  
  4 units
- **ANT 127** Urban Anthropology  
  4 units
CRD 153A  International Community Development: Asia  4
CRD 153B  International Community Development: Europe  4
CRD 153C  International Community Development: Africa  4
CRD 180  Transnational Community Development  4
ECN 110B  World Economic History Since the Industrial Revolution  4
IAD 103  Social Change and Agricultural Development  4
IRE 104  The Political Economy of International Migration  4
POL 124  The Politics of Global Inequality  4
POL 126  Ethnic Self-Determination and International Conflict  4
POL 142A  Comparative Development: Political Development in Modernizing Societies  4
SAS 121  Global Poverty: Critical Thinking and Taking Action  4
SOC 138  Economic Sociology  4
SOC 141  Industrialization and Social Change  4
SOC 145A  Sociology of Third World Development  4
SOC 145B  Gender and Rural Development in the Third World  4

Track II: Peace and Security
Focuses on political and security relationships among states and non-state actors, examining questions of war, peace, alliances, and diplomacy.

Choose five courses spanning two disciplines:  20

ECN 162  International Economic Relations  4
HIS 119  World War I  4
HIS 120  World War II  4
HIS 174B  War, Prosperity, and Depression: United States, 1917-1945  4
HIS 174C  The United States Since World War II, 1945 to the Present  4
POL 120  Theories of International Politics  4
POL 121  Scientific Study of War  4
POL 130  Recent U.S. Foreign Policy  4
POL 132  National Security Policy  4

Choose three additional courses from at least two departments:  12

COM 157  War and Peace in Literature  4
ECN 122  Theory of Games and Strategic Behavior  4
HIS 145  War and Revolution in Europe 1789-1918  4
HIS 146A  Europe in the Twentieth Century  4
HIS 146B  Europe in the Twentieth Century  4
PHI 118  Political Philosophy  4
POL 112  Contemporary Democratic Theory  4
POL 122  International Law  4
POL 124  The Politics of Global Inequality  4
POL 126  Ethnic Self-Determination and International Conflict  4
POL 131  Analysis of U.S. Foreign Policy  4
POL 140A  Comparative Political Institutions: Electoral Systems  4
POL 140B  Comparative Political Institutions: Parties  4
POL 140C  Comparative Political Institutions: Legislatures  4
POL 140D  When Institutions Fail  4
POL 140E  Policy-Making Processes  4
RST 131  Genocide (Discontinued)  4
RST 134  Human Rights (Discontinued)  4
SOC 100  Origins of Modern Sociological Theory  4
SOC 118  Political Sociology  4
SOC 157  Social Conflict  4
WMS 102  Gender and Post Colonialism  4

Choose four courses to fulfill Area Studies Requirement.  16

Track III: Global Environment, Health, and Natural Resources
Familiarizes students with new sources of global interdependence such as biodiversity, natural resource conflicts, population growth, and world health.

Note: Some courses shown below have additional prerequisites.

ECN 162 International Economic Relations 4
POL 123 The Politics of Interdependence 4
ESP 161 Environmental Law 4
OR
ESP 162 Environmental Policy 4

Choose one:

ANT 101 Ecology, Nature, and Society 4
ANT 131 Ecology and Politics 4
ESP 164 Ethical Issues in Environmental Policy (Discontinued) 3
PHI 120 Environmental Ethics 4

Choose two:

ARE 147 Resource and Environment Policy Analysis 3
ARE 175 Natural Resource Economics 4
ARE 176 Environmental Economics 4
ANT 103 Indigenous Peoples and Natural Resource Conservation 4
ABT 182 Environmental Analysis Using GIS 4
CRD 149 Community Development Perspectives on Environmental Justice

ECN 115A Economic Development 4
ECN 125 Energy Economics 4
ESP 164 Ethical Issues in Environmental Policy (Discontinued) 3
IAD 170 Program Development for International Agriculture 4
PHI 120 Environmental Ethics 4
PHY 160 Environmental Physics and Society 3
POL 107 Environmental Politics and Administration 4
POL 175 Science, Technology, and Policy 4
SOC 160 Sociology of the Environment 4

Choose two from one of the following groups:

Atmospheric and Marine Environments:

ATM 116 Modern Climate Change 3
ATM 149 Air Pollution 4
ESM 131 Air as a Resource 3
ESM 120 Global Environmental Interactions 4
ESM 121 Water Science and Management 3
ESP 166N Ocean and Coastal Policy (Discontinued) 3
GEL 116N Oceanography 3

Land Use and Energy Supply:

ANT 104N Cultural Politics of the Environment 4
CRD 142 Rural Change in the Industrialized World 4
ESM 144 Trees and Forests 4
ESP 167 Energy Policy 4
GEL 130 Non-Renewable Natural Resources 3
GEL 134 Environmental Geology and Land Use Planning 3
PLS 101 Agriculture and the Environment 3
PLS 144 Trees and Forests 4
PLS 150 Sustainability and Agroecosystem Management 4
PLS 160 Agroforestry: Global and Local Perspectives 3
POL 171 The Politics of Energy 4

Health and Human Populations:

ANT 121 Special Topics in Medical Anthropology 4
ANT 129 Health and Medicine in a Global Context 4
ANT 131 Ecology and Politics 4
ESP 121 Population Ecology 4
ETX 101 Principles of Environmental Toxicology 4

1152
IDI 141 Infectious Diseases of Humans
NUT 111AY Introduction to Nutrition and Metabolism
NUT 111B Recommendations & Standards for Human Nutrition
NUT 118 Community Nutrition
SOC 170 Population

Choose four courses to fulfill Area Studies Requirement.

**Track IV: Peoples and Nationalities**

Examine social and cultural foundations of national development and international relations.

Choose two:

- ANT 123AN Resistance, Rebellion, and Popular Movements
- ANT 130A Cultural Dimensions of Globalization
- SOC 118 Political Sociology
- SOC 156 Social Movements
- SOC 181 Social Change Organization

Choose one each from three of the following four groups:

**The Mixing of Peoples:**
- ANT 130BN Migration and the Politics of Place and Identity
- ANT 139AN Race, Class, Gender Systems
- CRD 176 Comparative Ethnicity
- HMR 131 Genocide
- HMR 134 Human Rights
- IRE 104 The Political Economy of International Migration
- POL 126 Ethnic Self-Determination and International Conflict

Women:
- ANT 126B Women and Development
- ANT 139BN Gender and Sexuality
- HDE 103 Cross-Cultural Study of Children
- SOC 145B Gender and Rural Development in the Third World
- WMS 102 Gender and Post Colonialism
- WMS 182 Globalization, Gender and Culture

Religion:
- ANT 124 Religion in Society and Culture
- ANT 134 Buddhism in Global Culture
- PHI 105 Philosophy of Religion
- RST 106 Christianity in the Contemporary World
- RST 161 Modern Islam
- RST 161B Modern Islam: Authority and Tradition in Process
- RST 170 Buddhism
- SOC 146 Sociology of Religion

*Development and its Impact on Social Cleavages:*
- ANT 122B Anthropology and Political Economy
- ANT 126A Anthropology of Development
- ANT 126B Women and Development
- CRD 180 Transnational Community Development
- POL 124 The Politics of Global Inequality
- POL 142A Comparative Development: Political Development in Modernizing Societies
- SAS 121 Global Poverty: Critical Thinking and Taking Action
- SOC 145A Sociology of Third World Development
- SOC 145B Gender and Rural Development in the Third World

Four courses to fulfill Area Studies Requirement

Education/Internship Abroad for a minimum of one quarter

**Area Studies Requirement**
Choose four: Courses must incorporate at least two of three groups (History, Social Analysis, Culture and Literature); we encourage students to take all four courses from one region, but will accept a minimum of three from one region and one from a different region. Tracks I, II and III students who choose to take advantage of an Education Abroad experience may fulfill the Area Studies requirement by completing three courses instead of four; all three courses must be from one region.

Africa and the Middle East

History:
- HIS 113 History of Modern Israel 4
- HIS 115A History of West Africa 4
- HIS 115B History of East Africa and the Indian Ocean 4
- HIS 115C History of Southern Africa from Exploration to the Rainbow Nation 4
- HIS 115D Postcolonial Africa 4
- HIS 115F History of Modern North Africa, 1800 to the Present 4
- HIS 116 African History: Special Themes 4
- HIS 193B History of the Modern Middle East, From 1914 4
- HIS 193C The Middle East Environment: Historical Change and Current Challenges 4
- HIS 193D History of Modern Iran, From 1850 to Present 4

Social Analysis:
- AAS 107C African Descent Communities and Culture in Asia 4
- AAS 107D African Descent Communities and Cultures in Europe 4
- AAS 110 West African Social Organization 4
- AAS 111 Cultural Politics in Contemporary Africa 4
- AAS 156 Language and Identity in Africa and the African Diaspora 4
- AAS 176 The Politics of Resources 4
- AAS 177 Politics of Life in Africa 4
- ANT 140A Cultures and Societies of West and Central Africa 4
- ANT 140B Cultures and Societies of East and South Africa 4
- ANT 142 Peoples of the Middle East 4
- CRD 153C International Community Development: Africa 4
- HMR 136 Human Rights in the Middle East 4
- POL 135 International Politics of the Middle East 4
- POL 136 The Arab-Israeli Conflict 4
- POL 146A Politics of Africa: Issues in Contemporary African Politics 4
- POL 146B Politics of Africa: Development in Africa 4
- RST 163 Social Life of Islam 4
- RST 167 Iraq 4
- WMS 184 Gender in the Arab World 4
- WMS 185 Women and Islamic Discourses 4

Culture and Literature:
- AAS 153 African Literature 4
- AAS 157 Literature and Society in South Africa 4
- AAS 162 Islam in Africa and the Americas 4
- AHI 150 Arts of Subsaharan Africa 4
- COM 147 Modern Jewish Writers 4
- COM 166 Literatures of the Modern Middle East 4
- DRA 155A African American Dance and Culture in the United States, Brazil and the Caribbean 4
- FRE 124 Post-Colonial and Francophone Literature 4
- JST 111 Israeli Writing Since 1960 4

East and South Asia

International Relations | IRE Courses

Courses in IRE:

IRE 001—Global Interdependence (4)
Discussion—1 hour; Lecture—3 hours. Development of the concept of global interdependence along its political, economic, demographic, cultural, technological, and environmental dimensions. Focus on the ways societies and states interact. Course provides the foundation for upper division multidisciplinary work in international relations. GE credit: SS, WE. Effective: 1997 Winter Quarter.

IRE 098—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

IRE 099—Special Study for Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

IRE 104—The Political Economy of International Migration (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): SOC 001, SOC 002, SOC 003, or SOC 004 recommended. Analysis of worldwide migration patterns, and social scientific theories of international and transnational migration. Focus in economical, political, and social impact of immigration and potential for international and regional cooperation. (Same course as SOC 104.) GE credit: SS, WC. Effective: 2016 Fall Quarter.

IRE 190—Topics in International Relations (4)
Lecture/Discussion—4 hours. Prerequisite(s): Consent of Instructor. Selected topics in international relations. Variable content. May be repeated for credit when topic differs. May be repeated for credit. GE credit: WE. Effective: 1997 Winter Quarter.

IRE 192—International Relations Internship (1-12)
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Upper division standing. Work experience in international relations, with term paper summarizing the practical experience of the student. (P/NP grading only.) GE credit: SS, WE. Effective: 1997 Winter Quarter.

IRE 194HA—Special Study for Honors Students (4)
Seminar—2 hours; Term Paper. Prerequisite(s): Open only to majors of senior standing who qualify for Honors Program. Directed reading, research, and writing on topics selected by students and instructor culminating in preparation of a senior honors thesis under direction of a faculty advisor. GE credit: OL, SS, WE. Effective: 1997 Winter Quarter.

IRE 194HB—Special Study for Honors Students (4)
Seminar—2 hours; Term Paper. Prerequisite(s): Open only to majors of senior standing who qualify for Honors Program. Directed reading, research, and writing on topics selected by students and instructor culminating in preparation of a senior honors thesis under direction of a faculty advisor. GE credit: OL, SS, WE. Effective: 1997 Winter Quarter.

IRE 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Upper division standing. (P/NP grading only.) Effective: 1997 Winter Quarter.

IRE 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. Upper division standing. (P/NP grading only.) Effective: 1997 Winter Quarter.

International Science Studies Minor; Land, Air & Water Resources

International Science Studies Minor; Land, Air & Water Resources | International Science Studies Minor
This interdisciplinary minor in International Science Studies will introduce College of Agricultural and Environmental Sciences students to global issues, which affect their major disciplines in the current world, and also provide an opportunity to gain first hand experience abroad when appropriate. The goal of this minor is to enable our college students to develop greater international competence and to enhance their employability.

The minor assumes that the student will have a major in the sciences, and that classes taken under one of the three tracks in the minor will contribute depth to the existing major or establish depth in a selected additional field of study. Students will be expected to work closely with an academic advisor in developing an intellectually coherent program of the study. A minimum of 18 units of upper division work is required. Only a single course can be counted toward both major and minor and no course can be used to satisfy the requirements of more than one minor.

**Minor Advisor.** Shu-Hua Chen (Land, Air and Water Resources); 530-752-1822; shachen@ucdavis.edu.

**International Science Studies**

**Units:** 24

Global issue course requirement.

*Focusing on broad range of global issues and their impacts on ecological and environmental resources and biodiversity, in addition to international policy and economics. Beyond the courses taken under each track, choose two out of the three courses listed below:*

**Internship Program**

**Internship Program | Internship Program**

Marcie Kirk Holland, Executive Director

**Program Areas**

Agricultural and Environmental Sciences, Career Recruiting Programs, Engineering and Physical Sciences, Masters, Ph.D.s and Postdocs, Health and Biological Sciences, International Programs and Liberal Arts and Business.

**Internship Experience**

The Internship and Career Center facilitates a campus-wide internship program. All internships, both credit and non-credit, can be taken for Transcript Notation with completion of required evaluation reports. The notation briefly describes the nature and location of the internship experience. Questions pertaining to Transcript Notation may be directed to The Internship and Career Center.

**Course Credit.** Internship courses (numbered 92 and 192) are available for credit on a variable-unit and Passed/Not Passed grading basis. A maximum of 12 units of 92 and/or 192 courses may be counted toward the 180-unit minimum needed for graduation. To qualify for the 192 course, students must have acquired 84 units of credit. All credited internships require approval and sponsorship by a faculty member from an appropriate discipline. Arrangements may be made through the department of the sponsoring faculty member and facilitated by The Internship and Career Center Staff.

HIS 193D History of Modern Iran, From 1850 to Present 4

With prior consultation with an advisor, students can petition in advance the Program Committee to accept:
Other elective courses toward the minor program if the content is 50% or more on the Iranian and Persian World. Under no circumstances may more than one lower division course be offered in satisfaction of requirements for the minor.
More than four units of Middle East/South Asia 181A and/or Middle East/South Asia 182A towards the minor program.

Total: 20-24

Iran & Persian Studies Minor; Middle East/South Asia Studies | MSA Courses

Courses in MSA:

MSA 092—ME/SA 92. Internship in Middle East/South Asia Studies (3-15)
Internship. Prerequisite(s): Consent of Instructor. Work experience on and off campus in all subject areas offered as part of the ME/SA Studies program. Internship supervised by a member of the ME/SA faculty. May be repeated up to 15 units. (P/NP grading only.) Effective: 2007 Fall Quarter.

MSA 098—Directed Group Study (1-5)
Variable—3-15 hours. May be repeated for credit. (P/NP grading only.) Effective: 2006 Fall Quarter.

MSA 099—Special Study for Undergraduates (1-5)
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. May be repeated for credit. (P/NP grading only.) Effective: 2006 Fall Quarter.
MSA 100—Middle East and South Asia: Comparative Perspectives (4)
Extensive Writing; Lecture—3 hours. Ethnographic and historical points of intersection and divergence in various aspects of the Middle East and South Asia in precolonial, colonial, and postcolonial societies. Anthropological, historical, and theoretical debates surrounding the region. GE credit: AH, SS, WC, WE. Effective: 2004 Summer Session 1.

MSA 111A—Great Cities of Arab Middle East and South Asia (4)
Extensive Writing; Lecture—3 hours. Prerequisite(s): Consent of Instructor. Some knowledge of Islamic/Middle Eastern history is very useful. In-depth examination of the great cities of North Africa, the Middle East and South Asia as cultural and historical artifacts. Topics include: the concept of the Islamic city, processes of modernity, and representations that reinforce imagination, memory and personal identity. GE credit: AH, SS, WC, WE. Effective: 2013 Fall Quarter.

MSA 112—History of South Asian Islam (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite: Upper division standing, or consent of instructor. Comparative study of Muslim communities of South Asia. Commonalities in cultural identity and historical experience. Rise and spread of Islam, comparative history of Islamic Empires, colonial rule, and post-colonial nationalism. Effective: 2007 Fall Quarter.

MSA 121A—Shahnameh: The Persian Book of Kings (4)
Lecture/Discussion—3 hours; Term Paper. In-depth analysis of the Persian Book of Kings (Shahnameh) by Abu al-Qasim Ferdowsi (d. 1020 CE) in its historical context with a comparative perspective on the role of this work in Persian and world literature. (Same course as COM 175.) GE credit: AH, WC, WE. Effective: 2015 Winter Quarter.

MSA 121C—A Story for a Life: The Arabian Nights (4)
Lecture/Discussion—3 hours; Term Paper. In-depth exploration of The Arabian Nights, the best-known work of pre-modern Arabic literature and a major work of world literature. Analysis of the work in its historical context and in comparison to other frame tales in world literature. (Same course as COM 172 and ARB 140.) GE credit: AH, WC, WE. Effective: 2016 Winter Quarter.

MSA 122A—Themes in the Arabic Novel (4)
Extensive Writing; Independent Study; Lecture/Discussion—3 hours. Class size limited to 30 students. Select modern Arabic fiction (novels and short stories) in translation. Thematically connected readings supplemented by non-fictional writings when appropriate. May be repeated up to 2 time(s) if the texts/theme of required course readings sufficiently change. GE credit: AH, OL, WC, WE. Effective: 2013 Fall Quarter.

MSA 131A—Modern Iranian Cinema (4)
Film Viewing—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): Upper division standing, or consent of instructor. Iranian cinema of the 20th century in the context of profound cultural and social changes in Iran especially since the Iranian Revolution. Productions by representative directors such as Kiarostami, Makhmalbaf, Bahram Beizaie are included. Knowledge of Persian not required. (Same course as CTS 146A.) GE credit: AH, OL, VL, WC, WE. Effective: 2013 Fall Quarter.

MSA 131B—Modern South Asia Cinema (4)
Film Viewing—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): Upper-division standing or consent of instructor. South Asian cinema of last 100 years in the context of cultural, social, and political changes. South Asian history, Independence, Partition, urban life, class, migration, postcolonial identity, diaspora, gender, sexuality, religion, sport, performance, etc (Same course as CTS 146B and ANT 147.) GE credit: AH, SS, VL, WC, WE. Effective: 2017 Winter Quarter.

MSA 131C—Religion and Media in Arab World (4)
Lecture—4 hours. Exploration of the role and experience of media technologies in the Arab world. Study of digital and electronic media as well as alternative media practices. Investigation of new trends in political activism and identity formation. (Same course as RST 166.) GE credit: OL, SS, VL, WC, WE. Effective: 2014 Fall Quarter.

MSA 131D—Modern Turkish Cinema (4)
Film Viewing—2 hours; Lecture/Discussion—2 hours. Prerequisite(s): Upper-division standing or consent of instructor. Turkish cinema of the 20th & 21st century in the context of cultural, social, & political changes. Issues covered include history, nationalism, political dissent, identity, migration, diaspora, gender, sexuality, religion, and incorporate viewpoints of Kurdish & other minority members. (Same course as CTS 146D and HIS 193E.) GE credit: AH, OL, SS, VL, WC, WE. Effective: 2016 Winter Quarter.

MSA 150—Women and Islamic Discourses (4)
Lecture/Discussion—4 hours. Prerequisite(s): WMS 050; Or comparable course. Introduction to the debates/
discourses about women and Islam. Transformations in debates/discourses in colonial and postcolonial periods in the Middle East & South Asia. Comparative study of debates/discourses on family, work, law, sexuality, religion, comportment, human rights, feminist and religious movements. (Same course as WMS 185.) GE credit: AH, SS, WC. Effective: 2008 Fall Quarter.

**MSA 151A—Iranian Society & Culture (4)**

**MSA 180—Topics in Middle East and South Asian Studies (4)**
Extensive Writing; Lecture—3 hours. Comparative perspective on the Middle East and South Asia. Topics may include: modernity, religious traditions, colonialism, subalternity and social movements, gender and sexuality, history and memory, science and development, ritual and performance, public culture, diasporas. May be repeated up to 1 time(s) topic varies. GE credit: AH, SS, WC, WE. Effective: 2004 Fall Quarter.

**MSA 181A—Topics in Regional ME/SA Studies (4)**
Lecture—3 hours; Term Paper. Iran & Persian topics for students specializing in region-specific Middle East and South Asia Studies. May be repeated up to 3 time(s). GE credit: AH, SS, WC, WE. Effective: 2015 Winter Quarter.

**MSA 181B—Topics in Regional ME/SA Studies (4)**
Lecture—3 hours; Term Paper. Indian/South Asia topics for students specializing in region-specific Middle East and South Asia Studies. May be repeated up to 3 time(s). GE credit: AH, SS, WC, WE. Effective: 2013 Fall Quarter.

**MSA 181C—Topics in Regional ME/SA Studies: Arab Studies (4)**
Lecture—3 hours; Term Paper. Arab Studies topics. May be repeated up to 3 time(s) when different topics and themes are studied. GE credit: AH, SS. Effective: 2013 Fall Quarter.

**MSA 182A—Undergraduate Proseminar in Middle East/South Asia (4)**
Seminar—3 hours; Term Paper. Prerequisite(s): MSA 100 recommended. Class size limited to 15 students. Seminar in Iran & Persian topics specializing in region-specific Middle East and South Asia studies. May be repeated up to 3 time(s). Effective: 2015 Winter Quarter.

**MSA 182B—Undergraduate Proseminar in Middle East/South Asia (4)**
Seminar—3 hours; Term Paper. Prerequisite(s): MSA 100 recommended. Class size limited to 15 students. Seminar in India/South Asia topics specializing in region-specific Middle East and South Asia studies. May be repeated up to 3 time(s) when different topics and themes are studied. Effective: 2012 Fall Quarter.

**MSA 182C—Undergraduate Proseminar in Middle East/South Asia: Arab Studies Seminar (4)**
Seminar—3 hours; Term Paper. Prerequisite(s): MSA 100 recommended. Class size limited to 15 students. Seminar in Arab Studies topics. May be repeated up to 3 time(s). GE credit: WE. Effective: 2013 Fall Quarter.

**MSA 192—Internship (1-12)**
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Supervised internship on and off campus in the area of Middle East and South Asia Studies. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 2018 Spring Quarter.

**MSA 194H—Special Study for Honors Students (1-5)**
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. Open only to majors of senior standing who qualify for honors program. Independent study of a problem in Middle East/South Asian studies involving the writing of an honors thesis. May be repeated up to 12 unit(s). Effective: 2009 Winter Quarter.

**MSA 198—Directed Group Study (1-5)**
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. May be repeated for credit. (P/NP grading only.) Effective: 2018 Spring Quarter.

**MSA 199—Special Study for Advanced Undergraduates (1-5)**
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. May be repeated for credit. (P/NP grading only.) Effective: 2018 Spring Quarter.

Faculty. http://frenchanditalian.ucdavis.edu/people-italian

The Major Program
The major in Italian provides a solid language background that will enable the student to develop an appreciation for the numerous contributions Italians and Italophones have made to literature, the arts, political theory, science, and other expressions of human creativity. The major also emphasizes the influence Italian culture continues to have on our global world.

The Program. The Italian program is geared to the specific needs and interests of the students, who enjoy the advantages of a small classroom setting and the individualized mentoring of dedicated professors. While the use of Italian is stressed in language and literature courses, the program is interdisciplinary in nature. Starting at the lower-division level, students collaborate closely with academic advisors in order to design a major curriculum that includes culture, film, art history, history, food science, and other courses in related fields offered on campus or in Italy. The Italian program actively participates in the UC-wide Education Abroad Program, the Quarter Abroad Program (Florence), the International Internships Program, and the Summer Abroad Program (Rome), all of which offer opportunities for travel and study in Italy.

Career Alternatives. The Italian Program provides a solid foundation for a variety of career paths by offering training in Italian language and culture and developing skills that are vital in any professional setting: critical analysis, interpersonal skills, effective written and oral communication, and cultural sensitivity. In addition to specific career paths in foreign service and education, knowledge of the Italian language and culture enhances professional opportunities in a variety of fields, such as viticulture and enology, food science, political science, medicine, architecture, and engineering.

Honors and Honors Program. Candidates for high or highest honors in Italian must write a senior thesis under the direction of a faculty member. For this purpose, honors candidates must enroll in ITA 194H (3 units) and ITA 195H (3 units). Normally, a student will undertake the honors project during the first two quarters of the senior year; other arrangements must be authorized by the department chair. Only students who, at the end of the junior year (135 units), have attained a cumulative grade-point average of 3.500 in courses required for the major will be eligible for the honors program.

Education Abroad Program. The department strongly encourages students to study abroad in the Summer Abroad program (Rome), the Quarter Abroad Program (Florence), or the Education Abroad Program. Applicable courses are accepted for credit in the major program.

Prerequisite Credit. Credit will not normally be given for a course if it is a prerequisite of a course already successfully completed. Exceptions can be made only by the major advisor.

Quarter Abroad Program. The UC Davis Quarter Abroad Program and the Italian Program offer an exciting Italian Language and Culture Program in Florence, Italy. While studying abroad in Florence, students will earn 23-28 UC Davis quarter units and will experience the richness and vitality of Italian and European culture.

Participants fulfill three-quarters-worth of Italian language study, enroll in culture and film courses, integrate into the Florentine community through meaningful internships (with transcript notation), and explore electives in areas such as art history, fashion, business, and food studies.
There is no language requirement, and all registered UC Davis students with 2.000 GPA and above, good academic standing, and good disciplinary standing are eligible to apply.

For more information, please contact Professor Margherita Heyer-Caput at mheycaput@ucdavis.edu or see https://studyabroad.ucdavis.edu/programs/quarterabroad/italy.html.

Italian | ITA Courses

Courses in ITA:

ITA 001—Elementary Italian (5)
Discussion—5 hours; Laboratory—1 hour. Introduction to Italian grammar and development of all language skills in a cultural context with special emphasis on communication. Students who have successfully completed ITA 002 or ITA 003 in the 10th or higher grade in high school may receive unit credit for this course on a P/NP grading basis only; although a passing grade will be charged to the student's P/NP option, no petition is required; all other students will receive a letter grade unless a P/NP petition is filed.; not open for credit to students who have taken ITA 001A or ITA 001S. GE credit: AH, WC. Effective: 2014 Winter Quarter.

ITA 001A—Accelerated Intensive Elementary Italian (15)
Lecture/Discussion—15 hours. Special 12-week accelerated, intensive summer session course that combines the work of courses 1, 2, and 3. Introduction to Italian grammar and development of all language skills in a cultural context with emphasis on communicative ability. Not open for credit to students who have completed ITA 001, ITA 002, or ITA 003. Effective: 2006 Summer Special Session.

ITA 001S—Elementary Italian (5)
Discussion—5 hours; Laboratory—1 hour. Introduction to Italian grammar and development of all language skills in a cultural context with special emphasis on communication. Course is taught abroad. Students who have successfully completed ITA 002 or ITA 003 in the 10th or higher grade in high school may receive unit credit for this course on a P/NP grading basis only; although a passing grade will be charged to the student's P/NP option, no petition is required; all other students will receive a letter grade unless a P/NP petition is filed; not open for credit to students who have taken ITA 001 or ITA 001A. GE credit: AH, WC. Effective: 2014 Winter Quarter.

ITA 002—Elementary Italian (5)
Discussion—5 hours; Laboratory—1 hour. Prerequisite(s): ITA 001 or ITA 001S Continuation of course 1 or 1S. Review of grammar and vocabulary, and practice of all language skills through cultural texts. Not open for credit to students who have taken ITA 001A or ITA 002S. GE credit: AH, WC. Effective: 2014 Winter Quarter.

ITA 002S—Elementary Italian (5)
Discussion—5 hours; Laboratory—1 hour. Prerequisite(s): ITA 001 or ITA 001S Continuation of course 1 or 1S. Review of grammar and vocabulary, and practice of all language skills through cultural texts. Course is taught abroad. Not open for credit to students who have completed ITA 001A or ITA 002. GE credit: AH, WC. Effective: 2014 Winter Quarter.

ITA 003—Elementary Italian (5)
Laboratory—1 hour; Lecture/Discussion—5 hours. Prerequisite(s): ITA 002 or ITA 002S Continuation of course 2 or 2S. Review of grammar and vocabulary, and practice of all language skills through cultural texts. Not open for credit to students who have taken ITA 001A or ITA 003S. GE credit: AH, WC. Effective: 2014 Winter Quarter.

ITA 003S—Elementary Italian (5)
Discussion—5 hours; Laboratory—1 hour. Prerequisite(s): ITA 002 or ITA 002S Continuation of course 2 or 2S. Review of grammar and vocabulary, and practice of all language skills through cultural texts. Course is taught abroad. Not open for credit to students who have completed ITA 001A or ITA 003. GE credit: AH, WC. Effective: 2014 Winter Quarter.

ITA 004—Intermediate Italian (4)
Laboratory—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): ITA 003 or ITA 003S Review of grammar and syntax through written exercises and short prose works. Intended to develop the linguistic foundations of students who have completed the first year language classes. GE credit: WC. Effective: 2016 Spring Quarter.
ITA 004S—Intermediate Italian (4)
Laboratory—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): ITA 003 or ITA 003S; Or the equivalent. Review of grammar and syntax through written exercises and readings of short prose works. Intended to develop the linguistic foundations of students who have completed the first year language classes. This course is taught abroad. Not open for credit to students who have completed ITA 004. GE credit: WC. Effective: 2012 Spring Quarter.

ITA 005—Intermediate Italian (4)
Laboratory—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): ITA 004 or ITA 004S Review and study of grammar and syntax, readings of short prose works, and written exercises. Intended to prepare students to read, understand, and discuss modern Italian. GE credit: WC. Effective: 2016 Spring Quarter.

ITA 005S—Intermediate Italian (4)
Laboratory—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): ITA 004 or ITA 004S Review and study of grammar and syntax, readings of short prose works, and written exercises. Intended to prepare students to read, understand, and discuss modern Italian. Course is taught abroad. Not open for credit to students who have completed ITA 005. GE credit: WC. Effective: 2013 Spring Quarter.

ITA 008A—Italian Conversation (3)
Discussion—3 hours. Prerequisite(s): ITA 003; Or the equivalent. Italian conversation with peers in classroom setting. GE credit: OL, WC. Effective: 2017 Winter Quarter.

ITA 008AS—Italian Conversation (3)
Discussion—3 hours. Prerequisite(s): ITA 003; Or the equivalent. Italian conversation in local context outside United States. GE credit: OL, WC. Effective: 2017 Winter Quarter.

ITA 008B—Italian Conversation (3)
Discussion—3 hours. Prerequisite(s): ITA 008A Italian conversation with peers in a classroom setting. GE credit: WC. Effective: 2017 Winter Quarter.

ITA 008BS—Italian Conversation (3)
Discussion—3 hours. Prerequisite(s): ITA 008A Italian conversation in local context outside United States. GE credit: OL, WC. Effective: 2017 Winter Quarter.

ITA 009—Reading Italian (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): ITA 005 or ITA 005S Reading and discussion of modern Italian prose, including selections from creative, scientific and journalistic writings. Introduction to contemporary Italian literature and culture. Strengthening the student's command of the Italian language. GE credit: AH, WC. Effective: 2014 Fall Quarter.

ITA 009S—Reading Italian (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): ITA 005 or ITA 005S Reading and discussion of modern Italian prose, including selections from creative, scientific and journalistic writings. Introduction to contemporary Italian literature and culture as well as strengthening the student's command of the Italian language. This course is taught abroad. Not open for credit to students who have completed ITA 009. GE credit: AH, WC. Effective: 2015 Winter Quarter.

ITA 031—Beginning Italian for Spanish Speakers (5)
Lecture/Discussion—5 hours. Prerequisite(s): SPA 003 or SPA 003V or SPA 003Y; Or two years of high school Spanish or native or heritage speaker of Spanish. Intensive introductory course on Italian language with emphasis on structural similarities between Italian and Spanish. Not open for credit to students who have completed ITA 001, ITA 001A, ITA 001S, ITA 002, ITA 002S. GE credit: AH, OL, WC. Effective: 2018 Winter Quarter.

ITA 031Y—Beginning Italian for Spanish Speakers (5)
Lecture/Discussion—3 hours; Web Electronic Discussion—2 hours. Prerequisite(s): SPA 003 or SPA 003V or SPA 003Y; Consent of Instructor. SPA 003 or two years of high school Spanish or native or heritage speaker of Spanish. Intensive Introductory course on Italian language with emphasis on structural similarities between Italian and Spanish. Not open for credit to students who have completed ITA 001, ITA 001A, ITA 001S, ITA 002, ITA 002S. GE credit: AH, OL, WC. Effective: 2018 Spring Quarter.

ITA 032—Beginning Italian for Spanish Speakers (5)
Lecture/Discussion—5 hours. Prerequisite(s): ITA 031 or ITA 031Y; or Consent of Instructor. Continuation of course 31. Intensive introductory course to Italian language and grammar with emphasis on oral and written communication. Highlights the structural similarities between Italian and Spanish. Not open for credit to students...
who have completed ITA 001A, ITA 001S, ITA 002, ITA 002S, ITA 003, ITA 003S. GE credit: AH, OL, WC. Effective: 2017 Fall Quarter.

**ITA 032Y—Beginning Italian for Spanish Speakers (5)**
Lecture/Discussion—3 hours; Web Electronic Discussion—2 hours. Prerequisite(s): ITA 031 or ITA 031Y; or Consent of Instructor. Continuation of course 31. Intensive introductory course to Italian language and grammar with emphasis on oral and written communication. Highlights the structural similarities between Italian and Spanish. Not open for credit to students who have taken ITA 001A, ITA 003, ITA 003S. GE credit: AH, OL, WC. Effective: 2018 Spring Quarter.

**ITA 050—Studies in Italian Cinema (4)**
Discussion—1 hour; Lecture—2 hours; Term Paper. Lower division standing. Introduction to Italian cinema through its genres. Focus is on cinema as a reflection of and a comment on modern Italian history. Film will be studied as an artistic medium and as a form of mass communication. GE credit: AH, WC, WE. Effective: 2016 Spring Quarter.

**ITA 090X—Lower Division Seminar (1-2)**
Seminar—1-2 hours. Prerequisite(s): Consent of Instructor. Lower division standing. Examination of a special topic in Italian language or culture (such as Italian culture seen through film, Italian feminism, literature, or politics) through shared readings, discussions, written assignments, or special activities such as film screening or laboratory work. Effective: 1997 Winter Quarter.

**ITA 098—Directed Group Study (1-5)**
Variable. Prerequisite(s): and Consent of Instructor. Lower division standing. Primarily intended for lower division students. (P/NP grading only.) Effective: 2016 Spring Quarter.

**ITA 101—Advanced Conversation, Composition, and Grammar (4)**
Lecture—3 hours. Prerequisite(s): ITA 009 or ITA 009S; or Consent of Instructor. Or the equivalent. GE credit: AH, OL, WC, WE. Effective: 2016 Spring Quarter.

**ITA 101S—Advanced Composition, Conversation and Grammar (4)**
Extensive Writing; Lecture—3 hours. Prerequisite(s): ITA 009 or ITA 009S; Or the equivalent. Instruction and practice in expository writing in Italian, with emphasis on advanced grammar, organization, and vocabulary building. Course will be taught in Italy. Not open for credit to students who have completed ITA 101. GE credit: AH, OL, WC, WE. Effective: 2016 Spring Quarter.

**ITA 104—Italian Translation and Style (4)**
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): ITA 009 or ITA 009S; Consent of Instructor. Practice in translation from Italian to English and English to Italian, using literary and non-literary texts of different styles. Analysis of linguistic problems and elements of style contained in the translation material. Not open for credit to students who have completed ITA 104S. GE credit: AH, WC. Effective: 2016 Spring Quarter.

**ITA 104S—Translation and Style (4)**
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): ITA 009 or ITA 009S Practice in translation from Italian to English and English to Italian, using literary and non-literary texts of different styles. Analysis of linguistic problems and elements of style contained in the translation material. Course will be taught abroad. No credit allowed to those who have completed ITA 104. GE credit: AH, WC. Effective: 2016 Spring Quarter.

**ITA 105—Introduction to Italian Literature (4)**
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): ITA 009 or ITA 009S; Consent of Instructor. Introduction to the study of the principal authors, works, and movements of the Medieval, Renaissance, and Early Modern periods in Italy. GE credit: AH, OL, WC. Effective: 2016 Spring Quarter.

**ITA 107—Survey of Italian Culture and Institutions (4)**
Lecture—3 hours; Term Paper. Assessment of the impact of regional autonomy on Italian cultural life from the Middle Ages to the present. Special emphasis will be placed upon achievements in literature, the arts, philosophy, and socio-political institutions. To be taught in English. GE credit: AH, OL, SS, VL, WC, WE. Effective: 1997 Winter Quarter.

**ITA 107S—Survey of Italian Culture and Institutions (4)**
Lecture/Discussion—3 hours; Term Paper. An assessment of the impact of regional autonomy on Italian cultural life from the Middle Ages to the present. Special emphasis will be placed upon achievements in literature, the arts, philosophy, and socio-political institutions. To be taught in English. Not open for credit to students who have completed ITA 107. GE credit: AH, OL, SS, VL, WC, WE. Effective: 2004 Winter Quarter.
ITA 108—Contemporary Issues in Italian Culture and Society (4)
Lecture/Discussion—3 hours; Term Paper. Analysis of cultural issues in contemporary Italy: Myth and reality of imagined Italiess, Italian identities; immigration and race relations; the media and popular culture. Taught in English. GE credit: AH, OL, SS, VL, WC, WE. Effective: 1998 Fall Quarter.

ITA 108S—Contemporary Issues in Italian Culture and Society (4)
Lecture/Discussion—3 hours; Term Paper. Analysis of cultural issues in contemporary Italy; myth and reality of imagined Italiess; Italian identities; immigration and race relations; the media and popular culture. Taught in English. This course will be taught abroad. Not open for credit to students who have completed ITA 108. GE credit: AH, OL, SS, VL, WC, WE. Effective: 2004 Winter Quarter.

ITA 112—Medieval and Renaissance Poetry: St. Francis to Petrarch (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): ITA 009 or ITA 009S; Consent of Instructor. Or the equivalent. Study of the origins of Italian religious and secular poetry of the 13th and 14th centuries. A diversified poetry is illustrated in works of St. Francis, Dante, Cavalcanti, Petrarch, the Sicilian School, the Sweet New Style Poets, and other authors. GE credit: AH, OL, WE. Effective: 2016 Spring Quarter.

ITA 113—Dante Alighieri, Divina Commedia (Inferno, Purgatorio, Paradiso) (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): ITA 009 or ITA 009S; Consent of Instructor. Or the equivalent. Study of Dante Alighieri's Divina Commedia, and its role in the development of Italian language and literature. Emphasis will be placed on reading the whole poem within the historical context of the Middle Ages. GE credit: AH, OL, WC, WE. Effective: 2016 Spring Quarter.

ITA 114—Boccaccio, Decameron, and the Renaissance Novella (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): ITA 009 or ITA 009S; Consent of Instructor. Or the equivalent course. Study of the development of the short story in Italy, as exemplified in Giovanni Boccaccio's Decameron, in his predecessors and Renaissance followers. GE credit: AH, OL, WC, WE. Effective: 2016 Spring Quarter.

ITA 115A—Studies in the Cinquecento (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): ITA 009 or ITA 009S; or Consent of Instructor. Or the equivalent. Analysis of key texts from the high moment of the Italian Renaissance. The political and aesthetic legacy of humanism will be foregrounded in relation to authors such as Ficino, Ariosto, Machiavelli, Aretino, Castiglione, and Tasso. GE credit: AH, OL, WC. Effective: 2016 Spring Quarter.

ITA 115B—Italian Literature of the Renaissance and the Baroque: From Cellini to Marino (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): ITA 115A Continued examination into the loss of an ideal. Emphasis on the conflicts in Michelangelo and Tasso leading to Marino, with an excursus on Galileos role in the formation of a modern literary standard. GE credit: OL. Effective: 1997 Winter Quarter.

ITA 115C—Italian Drama from Machiavelli to the Enlightenment (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): ITA 009; or Consent of Instructor. Development of comic and tragic forms as critical representations of their societal and historical contexts, i.e. Machiavelli and the logic of power, Baroque dramatists in the service of counter-reformation Italy, Goldoni's comedies and bourgeois social consciousness. GE credit: AH, OL, WC. Effective: 2016 Fall Quarter.

ITA 115D—Early Modern Italian Lyric (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): ITA 009 or ITA 009S; or Consent of Instructor. Examination of the poetic tradition influenced by Petrarch. Consideration of the relation between gender and genre in such poets as Petrarch, Bembo, della Casa, Tasso, Marino, Gaspara Stampa, Veronica Franco, Isabella di Morra. GE credit: AH, WC, WE. Effective: 2016 Fall Quarter.

ITA 118—Italian Literature of the Eighteenth Century (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): ITA 009 or ITA 009S; or Consent of Instructor. Development of modern Italian literature. Emphasis on the work of Goldoni, Bettinelli, Baretti, Parini, Alfieri, and Vico. GE credit: AH, OL. Effective: 2016 Fall Quarter.

ITA 120A—Italian Literature of the Twentieth Century: The Novel (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): ITA 009; Consent of Instructor. Development of the novel...

**ITA 120B—Italian Literature of the Twentieth Century: Poetry and Drama (4)**

Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): ITA 009; or Consent of Instructor. Italian poetry with emphasis on Hermeticism; the theater of Luigi Pirandello and its role in the development of contemporary Italian drama. GE credit: AH, WC, WE. Effective: 1997 Winter Quarter.

**ITA 121—New Italian Cinema (4)**

Film Viewing—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): FMS 001; or Consent of Instructor. And upper division standing. Italian cinema of the 21st century in the context of profound cultural and social changes in Italy since World War II. Productions by representative directors such as Amelio, Giordana, Moretti, Muccino are included. Knowledge of Italian not required. (Same course as FMS 121.) GE credit: AH, OL, VL, WC, WE. Effective: 2008 Fall Quarter.

**ITA 121S—New Italian Cinema (4)**

Film Viewing—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): FMS 001; and Consent of Instructor. And upper division standing. Italian cinema of the 21st century in the context of profound cultural and social changes in Italy since World War II. Productions by representative directors such as Amelio, Giordana, Moretti, Muccino are included. Knowledge of Italian not required. (Same course as FMS 121S.) GE credit: AH, OL, VL, WC, WE. Effective: 2011 Fall Quarter.

**ITA 128—Topics in Italian Culture (4)**

Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): ITA 009 or ITA 009S; or Consent of Instructor. In-depth study of a particular topic in Italian Culture. Topics include: Italian Cities; Church and State; the "Southern Question"; Fascism and Resistance; 1968: Counter Culture, Feminism and Terrorism; Multicultural Italy. May be repeated up to 1 time(s) when topic differs. GE credit: AH, OL, WC, WE. Effective: 2016 Spring Quarter.

**ITA 131—Autobiography in Italy (4)**

Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): ITA 009 or ITA 009S; or Consent of Instructor. Development of representations of selfhood with particular attention to generic conditions, the confessional tradition and the problem of women's self-representation. Authors studied may included Petrarch, Tasso, Casanova, Alfieri, Zvevok, Sibilla Aleramo and Primo Levi. GE credit: AH, OL, WC, WE. Effective: 2016 Spring Quarter.

**ITA 139B—Italian Literature in English: Boccaccio, Petrarch and the Renaissance (4)**

Lecture/Discussion—3 hours; Term Paper. Petrarch and Boccaccio and their relations to the Middle Ages and the Renaissance; the Renaissance, with particular attention to the works of Lorenzo de' Medici, Leonardo da Vinci, Machiavelli, Ariosto, Michelangelo, and Tasso. GE credit: AH, OL, WC, WE. Effective: 1997 Winter Quarter.

**ITA 140—Italian Literature in English Translation: Dante, Divine Comedy (4)**

Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Any course from the GE Literature Preparation List. Reading of Dante Alighieri's Divine Comedy, through the otherworld realms of Inferno, Purgatory, and Paradise. GE credit: AH, OL, WC, WE. Effective: 1997 Winter Quarter.

**ITA 141—Gender and Interpretation in the Renaissance (4)**

Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR). Critical analysis of Renaissance texts with primary focus on issues such as human dignity, education and gender politics; "high" and "low" culture and its relation to literary practices. (Same course as COM 138.) GE credit: AH, WC, WE. Effective: 2016 Fall Quarter.

**ITA 142—Masterpieces of Modern Italian Narrative (4)**

Discussion—1.5 hours; Lecture—1.5 hours; Term Paper. Prerequisite(s): ENG 003 or COM 002 or HIS 004C Analysis of major works of Italian narrative fiction from unification of Italy to present. Students will learn to use representative methods and concepts which guide literary scholarship. Consideration of works within European social and cultural context. GE credit: AH, WC, WE. Effective: 1997 Winter Quarter.

**ITA 145—Special Topics in Italian Literature (4)**

Lecture/Discussion—4 hours. Prerequisite(s): ITA 009 or ITA 009S; or Consent of Instructor. Study of special topics and themes in Italian literature, such as comic literature, epic poetry, pre-twentieth century theater, fascism, futurism, women and literature, and the image of America, etc. May be repeated for credit. GE credit: AH, OL, VL, WC, WE. Effective: 2016 Spring Quarter.

**ITA 145S—Special Topics in Italian Literature (4)**

Lecture/Discussion—4 hours. Prerequisite(s): ITA 009 or ITA 009S; or Consent of Instructor. Study of special topics
and themes in Italian literature, such as comic literature, epic poetry, pre-twentieth-century theater, fascism, futurism, women and literature, the image of America, etc. Course is taught abroad. May be repeated for credit. Not open for credit to students who have completed ITA 145. GE credit: AH, OL, VL, WC, WE. Effective: 2016 Fall Quarter.

**ITA 150—Studies in Italian Cinema (4)**
Film Viewing—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): Consent of Instructor. Introduction to Italian cinema through its genres. Focus on cinema as a reflection or a comment on modern Italian history. Film as an artistic medium and as a form of mass communication. GE credit: AH, VL, WC, WE. Effective: 2016 Spring Quarter.

**ITA 190X—Upper Division Seminar (1-2)**
Seminar—1-2 hours. Prerequisite(s): Consent of Instructor. Upper division standing. Limited enrollment. Examination of a special topic in Italian language or culture through shared readings, discussions, written assignments or special activities such as film screening or laboratory work. GE credit: AH, WC, WE. Effective: 1997 Winter Quarter.

**ITA 192—Italian Internship (1-12)**
Internship—3-36 hours. Prerequisite(s): Upper division standing and consent of chairperson of Italian Department. Participation in government and business activities to gain work experience and to develop a better knowledge of Italian language and culture. (P/NP grading only.) Effective: 1997 Winter Quarter.

**ITA 192S—Italian Internship (1-12)**
Internship—3-36 hours. Prerequisite(s): Upper division standing, consent of instructor and UC Davis program director or chairperson of Italian Department. Participation in community service, teaching, government, and business activities to gain work experience and to develop a better knowledge of Italian language and culture. This course is offered abroad. (P/NP grading only.) Effective: 2011 Fall Quarter.

**ITA 194H—Special Study for Honors Students (3)**
Independent Study—3 hours. Prerequisite(s): Open only to majors of senior standing who qualify for Honors Program. Guided research, under the direction of a faculty member, leading to a senior honors thesis on a topic in Italian literature, civilization, or language studies. (P/NP grading only.) GE credit: AH, WC. Effective: 1997 Winter Quarter.

**ITA 195H—Honors Thesis (3)**
Independent Study—3 hours. Prerequisite(s): ITA 194H Writing of an honors thesis on a topic in Italian literature, civilization, or language studies under the direction of a faculty member. (P/NP grading only.) GE credit: AH, WC, WE. Effective: 1997 Winter Quarter.

**ITA 197T—Tutoring in Italian (1-4)**
Laboratory—1-2 hours; Seminar—1-2 hours. Prerequisite(s): Consent of Instructor. Upper division standing. Tutoring in undergraduate courses, including leadership in small voluntary discussion groups affiliated with departmental courses. May be repeated up to 6 unit(s). (P/NP grading only.) Effective: 1997 Winter Quarter.

**ITA 197TC—Community Tutoring in Italian (1-5)**
Discussion—1-2 hours; Laboratory—2-4 hours. Prerequisite(s): Consent of Instructor. Field experience as Italian tutors or teacher's aides. May be repeated up to 10 unit(s). (P/NP grading only.) Effective: 1997 Winter Quarter.

**ITA 198—Directed Group Study (1-4)**
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

**ITA 198S—Directed Group Study (1-4)**
Variable. Prerequisite(s): Consent of Instructor. Group study on focused topics in Italian literature and culture. Varies according to instructor. This course is offered abroad. May be repeated for credit when topic differs. (P/NP grading only.) Effective: 2011 Fall Quarter.

**ITA 199—Special Study for Advanced Undergraduates (1-5)**
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

**ITA 199S—Special Study for Advanced Undergraduates (1-5)**
Variable. Prerequisite(s): Consent of Instructor. Opportunity for a faculty member to work with an advanced undergraduate student in a focused manner on a topic or topics of mutual research/creative interest. This course is offered abroad. May be repeated for credit when topic differs. (P/NP grading only.) Effective: 2011 Fall Quarter.

**ITA 207—Individual Study (1-5)**
Variable. Prerequisite(s): Graduate standing or consent of instructor. Effective: 1997 Winter Quarter.
ITA 298—Group Study (1-5)
Variable. Prerequisite(s): Graduate standing or consent of instructor. Effective: 1997 Winter Quarter.

ITA 299—Research (1-12)
Variable. Prerequisite(s): Graduate standing or consent of instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

ITA 299D—Dissertation Research (1-12)
Variable. Prerequisite(s): Graduate standing or consent of instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

ITA 396—Teaching Assistant Training Practicum (1-4)
Variable—3-12 hours. Prerequisite(s): Consent of Instructor. Graduate standing. May be repeated for credit. (S/U grading only.) Effective: 2008 Fall Quarter.

Faculty. https://ealc.ucdavis.edu/people

The Major Program
The department offers a core language program in Japanese, and courses in literature and culture.

The Program. Practical language skills are taught using the most modern methods so that upon entering the upper division a student will have attained substantial fluency in the spoken language (hearing and speaking) and the written language (reading and writing). Upper-division courses balance the need to further language skills with the need to understand and appreciate the cultural richness of Japanese civilization. All students are encouraged to combine their study of language and literature with courses in related fields, and to study abroad through the Education Abroad Program, the UC Davis Study Abroad Program or through internships in Japan.

Career Opportunities. UC Davis graduates have learned that a major in Japanese is a genuine, earned distinction that facilitates entrance to graduate programs and professional schools. In addition, job opportunities abound in virtually all career paths, especially for those who have completed study abroad.

Honors Program. To be eligible to receive high or highest honors in the Japanese major, students must complete a senior thesis project. A student interested in pursuing a senior thesis project must enroll in JPN 194H and complete a scholarly paper or similar research project under the direction of a senate faculty member. The thesis project will have a minimum duration of two quarters and carry a minimum of 6 units of credit. To qualify to undertake the senior thesis project, a student must have completed at least 135 units with a minimum GPA of 3.500 in courses counted toward the major. Interested students should consult with faculty in their field of interest by the quarter before they hope to commence work on the project (in most cases this will be the Spring Quarter of their junior year). Students who complete the senior thesis project and have an overall GPA that qualifies them for honors may be recommended by the faculty for honors, high honors, or highest honors at graduation.

Education Abroad Program. The university maintains study abroad programs in Japan. They offer excellent opportunities for students to polish their language skills and experience Asian cultures firsthand. Students are encouraged to participate. Appropriate courses taken abroad can be applied toward the major or the minor. For details, see the department's undergraduate advisor, the Education Abroad Program office or the UC Davis Study Abroad Office.

Related Courses. See East Asian Studies course list.
Prerequisite Credit. No student may repeat a course if that course is a prerequisite for a course that has already been completed with a grade of C– or better.

Placement. JPN 001 is intended for beginning students with no prior knowledge of the Japanese language. Students who do have some knowledge but wish to improve their skills should meet with one of the advisors to discuss appropriate placement. Students must follow departmental guidelines for placement in all language courses and instructor approval is required for enrollment.

Backtracking. Satisfactory completion of a language course is evidence that a student’s language skills are beyond the level of those expected in its prerequisite courses. Accordingly, students who have completed a language course cannot go back and take its prerequisites. If the prerequisite courses are required for the major, students may substitute other courses. Students who are not sure how this requirement applies to them should speak to the undergraduate advisor.

Waived Language Courses. Students with exceptional language ability may waive required language courses. If lower division courses have been waived, students will not have to take courses in their place. If upper division courses have been waived, students can use other appropriate courses to earn the units they need to complete the major. Consult the undergraduate advisor regarding selection of appropriate courses.

Grading. Students may take up to two and no more than two (regular, letter-graded) courses for the major on a P/NP basis. Courses which are only offered on a P/NP basis do not count toward these limits.

Japanese; East Asian Languages & Cultures | JPN Minor

(College of Letters and Science)

Department Office. 211 Sproul Hall; 530-752-4999; http://japanese.ucdavis.edu

Faculty. https://ealc.ucdavis.edu/people

A minor is offered in Japanese for students wishing to follow a formally recognized program of study in Japanese language and literature. For the minor, students may take one (regular, letter-graded) course on a P/NP basis. Courses which are only offered on a P/NP basis do not count toward these limits.

Total: 40-70
All upper division courses, including both language courses and literature in translation courses, may be used to meet this requirement. One approved lower division course (JPN 010, 025, 050) may also be used. In addition, students must demonstrate their language proficiency, normally through completion of JPN 006. Only four units from 192, 197T, 198, and 199 may be applied to the minor. For details, consult the undergraduate advisor.

Total: 20

Japanese; East Asian Languages & Cultures | JPN Courses

Courses in JPN:

JPN 001—Elementary Japanese (5)
Lecture/Discussion—5 hours. Introduction to spoken and written Japanese in cultural contexts, with emphasis on communication. GE credit: AH, OL, WC. Effective: 2014 Fall Quarter.

JPN 001A—Accelerated Intensive Elementary Japanese (15)
Lecture/Discussion—15 hours. Special 12 week accelerated, intensive summer session course that combines the work of courses 1, 2 and 3. Introduction to Japanese grammar and development of all language skills in a cultural context with emphasis on communication. not open for credit to students who have completed JPN 001, JPN 002, or JPN 003. GE credit: AH, OL, WC. Effective: 2014 Summer Special Session.

JPN 001AS—Intensive Elementary Japanese (15)
Lecture/Discussion—15 hours. Intensive course taught combining the work of courses 1, 2 and 3. Introduction to Japanese grammar and development of all language skills in a cultural context with emphasis on communication. Offered in Japan. not open for credit to students who have taken JPN 001, JPN 002, or JPN 003. GE credit: AH, OL, WC. Effective: 2014 Fall Quarter.

JPN 002—Elementary Japanese (5)
Lecture/Discussion—5 hours. Prerequisite(s): JPN 001 C- or better; Or the equivalent language proficiency. Continuation of training in basic Japanese spoken and written skills. GE credit: AH, OL, WC. Effective: 2016 Spring Quarter.

JPN 003—Elementary Japanese (5)
Lecture/Discussion—5 hours. Prerequisite(s): JPN 002 C- or better; Or the equivalent language proficiency. Continuation of training in basic spoken and written skills in Japanese language. GE credit: AH, OL, WC. Effective: 2016 Spring Quarter.

JPN 004—Intermediate Japanese (5)
Lecture/Discussion—5 hours. Prerequisite(s): JPN 003 C- or better; Or the equivalent language proficiency. Intermediate-level training in spoken and written Japanese in cultural context, based on language skills developed in course 3. GE credit: AH, OL, WC. Effective: 2016 Spring Quarter.

JPN 005—Intermediate Japanese (5)
Lecture/Discussion—5 hours. Prerequisite(s): JPN 004 C- or better; Or the equivalent language proficiency. Intermediate-level training in spoken and written Japanese in cultural context, based on language skills developed in course 4. GE credit: AH, OL, WC. Effective: 2016 Spring Quarter.

JPN 006—Intermediate Japanese (5)
Lecture/Discussion—5 hours. Prerequisite(s): JPN 005 C- or better; Or the equivalent language proficiency. Intermediate-level training in spoken and written Japanese in cultural context, based on language skills developed in course 5. GE credit: AH, OL, WC. Effective: 2016 Spring Quarter.

JPN 007S—Intensive Intermediate Japanese (20)
Lecture/Discussion—20 hours. Prerequisite(s): JPN 002 C- or better; or the equivalent language proficiency. Consent of Instructor. Special intensive course that combines the work of courses 3, 4, 5, and 6. Introduction to Japanese grammar and development of all language skills in a cultural context with emphasis on communication. Taught in Japan. GE credit: AH, OL, WC. Effective: 2017 Winter Quarter.
JPN 010—Masterworks of Japanese Literature (in English) (4)
Discussion—1 hour; Lecture—3 hours. Introduction to Japanese literature: readings and discussion in English of important works from earliest times to the present. GE credit: AH, WC, WE. Effective: 2011 Fall Quarter.

JPN 015S—Introduction to Japanese Culture (2)
Fieldwork; Lecture/Discussion—2 hours. Restricted to students enrolled in units for the Kyoto Quarter Abroad program. Aspects of Japanese culture: literature, history, religion, art, language, and society. Conducted in English; taught in Japan. (P/NP grading only.) GE credit: AH, WC. Effective: 2014 Fall Quarter.

JPN 025—Japanese Language and Culture (in English) (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): JPN 001 or LIN 001 or ANT 004 recommended. Classification and communication of experience in Japanese culture; principles of language use in Japanese society. Speech levels and honorific language, language and gender, minority languages, literacy. Role of Japanese in artificial intelligence and computer science. GE credit: AH, SS, WC, WE. Effective: 2014 Fall Quarter.

JPN 031—Basic Kanji (4)
Lecture—3 hours; Practice—1 hour. Prerequisite(s): JPN 001 C- or better; or Consent of Instructor. Or equivalent proficiency of basic writing system (Hiragana and Katakana). Restricted to students who have never been exposed to any form of Kanji or Chinese characters before; students who have completed schooling up to the 6th grade in the Japanese education system or equivalent or whose native languages have Chinese character orthography are not allowed to register this course. Introduction and mastery of 300 basic Kanji or Chinese characters to establish a solid foundation in the novel and complex Kanji encountered while learning Japanese. GE credit: AH, WC. Effective: 2016 Spring Quarter.

JPN 050—Introduction to the Literature of China and Japan (4)
Lecture/Discussion—4 hours. Methods of literary analysis and their application to major works from the various genres of Chinese and Japanese literature (in translation), including film. East Asian cultural traditions will also be introduced. (Same course as CHN 050.) GE credit: AH, WC. Effective: 2012 Fall Quarter.

JPN 098—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study. (P/NP grading only.) GE credit: AH. Effective: 2016 Fall Quarter.

JPN 099—Special Study for Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

JPN 101—Japanese Literature in Translation: The Early Period (4)
Discussion—1 hour; Lecture—3 hours. Study of early Japanese literature from the Nara to the end of the Heian period through a broad survey of the major literary genres such as lyric poetry, court diaries, prose narratives, poem-tales, and classical Chinese writings. GE credit: AH, WC, WE. Effective: 2012 Winter Quarter.

JPN 102—Japanese Literature in Translation: The Middle Period (4)
Discussion—1 hour; Lecture—3 hours. Study of the major literary genres from the twelfth century to the second half of the nineteenth century including poetry, linked-verse, military chronicles, no drama, Buddhist literature, haiku, haibun, kabuki, bunraku, plays and Edo prose narratives. GE credit: AH, WC, WE. Effective: 2012 Winter Quarter.

JPN 103—Japanese Literature in Translation: The Modern Period (4)
Discussion—1 hour; Lecture—3 hours. Modern Japanese literature from the 1870s to the 1970s. Surveys representative literary works and ideas against the social and intellectual background of the Meiji, Taisho, and Showa periods. GE credit: AH, WC, WE. Effective: 2012 Winter Quarter.

JPN 104—Modern Japanese Literature: War and Revolution (3)
Lecture/Discussion—3 hours. Perspectives and sensibilities with which major modern Japanese writers have interpreted the traumatic and often poignant experiences of war and socio-political upheavals from the late nineteenth century to the 1970s. Lectures, discussions, and readings in English. GE credit: AH, WC. Effective: 1997 Winter Quarter.

JPN 105—Modern Japanese Literature: Hero and Anti-hero (4)
Lecture/Discussion—4 hours. The ways in which representative hero and anti-hero protagonists in modern Japanese literature perceive, confront, challenge, and resolve a wide array of social, political, and moral problems of their times. Course taught in English. GE credit: AH, WC. Effective: 2002 Spring Quarter.

JPN 106—Japanese Culture Through Film (4)
Film Viewing—3 hours; Lecture/Discussion—3 hours. Aspects of Japanese culture such as love, sexuality, war, the
military, the family, the position of women, growing up and death as portrayed in Japanese cinema. Lectures, discussion, and readings in English. Films with English subtitles. GE credit: AH, VL, WC. Effective: 2017 Spring Quarter.

JPN 107—Modern Japanese Autobiographies (in English) (4)
Discussion—1 hour; Lecture—3 hours; Term Paper. Exploring the modern and contemporary Japanese social and cultural landscape through critical analysis of modern Japanese autobiographies by prominent and other authors in the 19th and 20th centuries. GE credit: AH, WC. Effective: 2016 Spring Quarter.

JPN 108—Poetry of China and Japan (in English) (4)
Discussion—1 hour; Lecture—3 hours. A comparative approach to Chinese and Japanese poetry, examining poetic practice in the two cultures; includes a general outline of the two traditions, plus study of poetic forms, techniques, and distinct treatments of universal themes: love, nature, war, etc. (Same course as CHN 108.) GE credit: AH, WC. Effective: 1997 Winter Quarter.

JPN 109—Japanese Popular Culture (4)
Film Viewing—3 hours; Lecture/Discussion—3 hours. Japanese popular culture, from its medieval/early modern precedents to contemporary incarnations. Emphasis on major forms of popular culture that emerged in the 20th century, including comics, animation, science fiction, and fantasy. GE credit: AH, VL, WC. Effective: 2017 Fall Quarter.

JPN 111—Modern Japanese: Reading and Discussion (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): JPN 006 C- or better; Or the equivalent language proficiency. Readings in modern Japanese short stories, newspaper articles, and essays; conversation practice based on these readings. GE credit: AH, OL, WC. Effective: 2016 Spring Quarter.

JPN 112—Modern Japanese: Reading and Discussion (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): JPN 111 C- or better; Or the equivalent language proficiency. Continuation of course 111. GE credit: AH, OL, WC. Effective: 2016 Spring Quarter.

JPN 113—Modern Japanese: Reading and Discussion (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): JPN 112 C- or better; Or the equivalent language proficiency. Continuation of course 112. GE credit: AH, OL, WC. Effective: 2016 Spring Quarter.

JPN 114A—Spoken Japanese (2)
Discussion—2 hours. Prerequisite(s): Consent of Instructor. Training in spoken Japanese for students with a basic working knowledge of the language. (P/NP grading only.) GE credit: OL. Effective: 2017 Spring Quarter.

JPN 114B—Spoken Japanese (2)
Discussion—2 hours. Prerequisite(s): JPN 114A C- or better; or Consent of Instructor. Or equivalent language proficiency. Continuation of course 114A. Training in spoken Japanese for students with a basic working knowledge of the language. (P/NP grading only.) GE credit: OL. Effective: 2016 Fall Quarter.

JPN 114C—Spoken Japanese (2)
Discussion—2 hours. Prerequisite(s): JPN 114B C- or better; or Consent of Instructor. Or equivalent language proficiency. Continuation of course 114B. Training in spoken Japanese for students with a basic working knowledge of the language. (P/NP grading only.) GE credit: OL. Effective: 2016 Fall Quarter.

JPN 115—Japanese Composition (2)
Lecture—2 hours. Prerequisite(s): JPN 006 C- or better; or Consent of Instructor. Development of skills in the techniques of writing Japanese. Practice in short essay writing with an aim toward mastery of the vocabulary and syntax of written style Japanese. Effective: 2016 Spring Quarter.

JPN 116—Culture and History in Kyoto (8)
Fieldwork; Lecture/Discussion—3 hours. Intensive course exploring the historical and cultural riches in Kyoto and its environs. Limited to students enrolled in the corresponding Quarter Abroad program. Takes place on-site in and around Kyoto, Japan. GE credit: AH; WC. Effective: 2017 Fall Quarter.

JPN 117S—Intensive Modern Japanese: Reading and Discussion (17)
Lecture/Discussion—17 hours. Prerequisite(s): JPN 005 C- or better; or Consent of Instructor. Or the equivalent language proficiency. Introduction to basic Japanese grammar and development of more advanced reading, writing, and conversation skills in a cultural context. Combination of courses 6, 111, 112, and 113 taught intensively in Japan. Not open to students who have taken JPN 006, JPN 111, JPN 112, or JPN 113; an exception can be made for students who have taken JPN 006 or its equivalent, provided that those five units are deducted from the 19 total unit load. GE credit: AH, OL, WC. Effective: 2017 Winter Quarter.
JPN 121—Advanced Japanese I (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): JPN 113 C- or better; or Consent of Instructor. First of three courses in a series of fourth year Advanced Japanese which focuses on the levels of formality or politeness in conversation as well as socio-cultural aspects and topics in the Japanese society. GE credit: AH, OL, WC, WE. Effective: 2016 Spring Quarter.

JPN 122—Advanced Japanese II (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): JPN 121 C- or better; or Consent of Instructor. Second of three courses in a series of fourth-year Advanced Japanese which focuses on the levels of formality or politeness in conversation as well as socio-cultural aspects and topics in the Japanese society. GE credit: AH, OL, WC, WE. Effective: 2016 Spring Quarter.

JPN 123—Advanced Japanese III (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): JPN 122 C- or better; or Consent of Instructor. Third of three courses in a series of 4th year Advanced Japanese which focuses on the levels of formality or politeness in conversation as well as socio-cultural aspects and topics in the Japanese society. GE credit: AH, OL, WC, WE. Effective: 2016 Spring Quarter.

JPN 130—Readings in Modern Japanese Literature to 1926 (4) Review all entries
Lecture/Discussion—4 hours. Prerequisite(s): JPN 113; or equivalent language proficiency. Restricted to completion of course 113 or equivalent as determined by taking a placement exam or consent of instructor. Short stories and essays by Japanese writers of the Meiji and Taishô eras, from 1868 to 1926. Authors include Natsume Sôseki, Izumi Kyôka, Tanizaki Jun'ichirô and Akutagawa R yûnosuke. Readings and discussion in Japanese with some emphasis on translation into English. GE credit: AH, WC. Effective: 2017 Winter Quarter.

(College of Letters and Science)
David Biale, Ph.D., Program Director

Department Office. 2216 Social Sciences and Humanities Building; 530-752-9241; http://jewishstudies.ucdavis.edu

Faculty. http://jewishstudies.ucdavis.edu/core-faculty.html
The Program in Jewish Studies offers students the opportunity to explore Jewish history, communities, literature, religion, and culture in a comparative perspective and multicultural framework. Courses include Hebrew language instruction as well as the study of classical and modern Jewish texts in translation.

The interdisciplinary minor in Jewish Studies provides an introduction to the study of Jewish culture, thought, history, and literature. Students learn a broad range of methodologies and critical concepts in these areas and gain insight into the relation between Jewish identities, histories, and representations and those of the cultures in which Jews throughout the world have lived.

The Program in Jewish Studies will be of special interest to students in History, Religious Studies, Comparative Literature and Sociology as well as other fields in the Humanities and Social Sciences.

**Advising.** Jewish Studies Program office; dbiale@ucdavis.edu.

Jewish Studies Minor; Jewish Studies | JST Courses

Courses in JST:

JST 010—Introduction to Jewish Cultures (4)
Lecture—3 hours; Term Paper—1 hour. Diverse Jewish cultures created over the past 2,000 years using examples from less-familiar communities such as India, China, and Ethiopia. Topics include the tensions between homeland/diaspora and questions of identity (race, nationality, culture, or religion). GE credit: SS, WC, WE. Effective: 2002 Winter Quarter.

JST 101—Topics in Jewish Thought (4)
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): JST 010 or RST 023; or Consent of Instructor. Selected themes in Jewish thought in historical and social perspective. This course traces the historical development of topics in Jewish thought such as Messianism, or focuses on one specific historical period, such as modern Jewish thought. May be repeated for credit May be repeated for credit when topic differs. GE credit: AH, WC, WE. Effective: 2004 Spring Quarter.

JST 110—Selected Topics in Jewish Literature (4)
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): One lower division literature or Jewish Studies course or consent of instructor. Literature written about the Jewish experience, treated in its historical and social context. Examines literature written in one language, such as English, Hebrew, or Yiddish, or a theme, such as gender or modern identities, as expressed in different literary traditions. May be repeated for credit May be repeated for credit when topic differs. GE credit: AH, WC, WE. Effective: 2004 Spring Quarter.

JST 111—Israeli Writing Since 1960 (4)
Extensive Writing—1 hour; Lecture/Lab—3 hours. Prerequisite(s): One course in American or European literature. Contemporary Hebrew literature, in translation, in relation to post-independence debates about religious, social, and political identity of the Jewish state; literary reflections of Israeli ethnic diversity and changing gender relations; modern Hebrew poetry and postmodern experiments in fiction. No credit will be given to students who have completed HUM 119. GE credit: AH, WC, WE. Effective: 2001 Fall Quarter.

JST 112—Readings in Jewish Writing and Thought in German Culture (4)
Lecture/Discussion—3 hours; Term Paper—1 hour. Prerequisite(s): RST 023; or Consent of Instructor. Historical tradition of Jewish thought in the German cultural context; unique contributions of Jewish writers to culture of the German speaking world; what it means to be "other" in the mainstream culture. May be repeated up to 2 time(s) when topic differs. No credit will be given to students who have completed HUM 121. GE credit: AH, WC, WE. Effective: 2001 Fall Quarter.

JST 116—Readings in Jewish Writing and Thought in German Culture (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): RST 023; or Consent of Instructor. Historical tradition of Jewish thought in the German cultural context; unique contributions of Jewish writers to culture of the German speaking world; what it means to be "other" in the mainstream culture. May be repeated up to 2 time(s) if topic differs. No credit will be given to students who have completed HUM 121. (Same course as GER 116.) GE credit: AH, OL, WC, WE. Effective: 2007 Spring Quarter.

JST 120—Cinema and the American Jewish Experience (4)
Film Viewing—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): JST 010 recommended. Examination of American cinema to reveal how Jewish identity is expressed and submerged, tracing the relations between religion, identity, race, politics, and art. Not open for credit to students who have completed HUM 122. GE credit: AH, WE. Effective: 2001 Fall Quarter.
JST 121—Oral History and Jewish Life (4)
Lecture/Discussion—3 hours; Term Paper—1 hour. Oral history methodologies and application to an in-depth oral history interview about Jewish life. Topics include oral history practices and ethics, immigration, migration, religious practice, ethnic relations, and community organization structures. No credit given to students who have completed HUM 123. GE credit: SS. Effective: 2001 Fall Quarter.

Land, Air, & Water Resources

Land, Air, & Water Resources | Land, Air, & Water Resources Information
(College of Agricultural and Environmental Sciences)
Randy Southard, Chairperson

Department Office. 1110 Plant and Environmental Sciences Building 530-752-1130; http://lawr.ucdavis.edu

Land, Air and Water Resources is a multidisciplinary department with faculty who specialize in atmospheric science, plant science, soils and biogeochemistry, hydrology, and water engineering. Teaching, research, and outreach efforts focus on agricultural and environmental aspects of these disciplines. The faculty also contributes to numerous other undergraduate and graduate programs in the Colleges of Agricultural and Environmental Sciences, Letters and Science, and Engineering.

Major Programs. Undergraduate programs in Atmospheric Science, Hydrology, Environmental Science and Management, and Sustainable Agriculture and Food Systems are centered in the department; see http://lawr.ucdavis.edu/academic_programs.htm.

Undergraduate Advising Center is located in 1150 Plant and Environmental Sciences Building; 530-752-1603.

Courses. See courses listed under Atmospheric Science, Hydrologic Sciences, Hydrology, Environmental Science and Management, and Soil Science. See also the websites listed above.

Graduate Study. Graduate programs, offering both M.S. and Ph.D. degrees, in Atmospheric Science, Soils and Biogeochemistry, and Hydrologic Sciences are administered in the department; see http://lawr.ucdavis.edu/academic_programs.htm.

Graduate Advising Center is located in 1152 Plant and Environmental Sciences Building; 530-752-1669.

Landscape Architecture

Landscape Architecture | LDA B.S.
(College of Agricultural and Environmental Sciences)
(Department of Human Ecology – Landscape Architecture and Environmental Sciences)

Department Office. Department of Human Ecology; 131 Hunt Hall; 530-752-3907; http://lda.ucdavis.edu

Faculty. http://humanecology.ucdavis.edu/lda/people/faculty.htm

Landscape architecture is the planning and design of land areas where human use requires adaptation or conservation of the environment. Students who study landscape architecture are concerned about the welfare of the environment and the people who use and shape it. They are capable of solving physical problems and are able to visualize and think in terms of spaces and three-dimensional concepts. The program is fully accredited by the Landscape Architecture Accreditation Board (LAAB) which is the only organization professionally sanctioned to grant landscape architectural accreditations in the United States. The program was last reviewed in 2012.

The Program. The curriculum balances creativity and visual and spatial skills with technological expertise and a thorough background in physical, natural, and social sciences. Students develop proficiency at problem solving relating to design of parks, public spaces, energy-efficient neighborhoods, land reclamation projects, city and regional planning, and landscape planning for wilderness and scenic regions, coastal and riparian environments, and other sensitive land areas. The program stresses a process-oriented approach to design and emphasizes environmental and community values.

Preparatory Requirements. Students are admitted to the landscape architecture major only after submitting a portfolio for review and selection by the faculty.
Career Alternatives. Graduates may find jobs in private landscape architectural firms or public agencies, non-profit organizations, and corporations employing landscape architects. The landscape architecture major provides the student with excellent preparation for graduate school or career development in a wide range of environmental and design-related fields.

Graduate Study. Graduate-level landscape architecture courses are available to students pursuing graduate programs compatible with or directed toward landscape management, planning, and design issues. A Graduate Academic Certificate in Landscape Architecture and Environmental Design is an option for any graduate student; see https://gradstudies.ucdavis.edu/programs/graduate-academic-certificates. Program faculty are active members of various graduate groups: Community Development, Geography, Transportation Technology and Policy, and Ecology. Faculty members have expertise in many areas, including landscape history, social theory, practice of public space design, historic landscape preservation, city and regional planning, community participation in urban landscape design, landscape ecology, conservation planning, resource management, bioregionalism, and regenerative landscape systems. Graduate students pursue more focused interests, expanding their professional expertise and/or conducting advanced research in landscape architecture correlated disciplines.

Advising Center. See Sharla Cheney, 135 Hunt Hall; 530-754-8628; scheney@ucdavis.edu.

Major Advisor. Steve Greco

Landscape Architecture | LDA Courses

Courses in LDA:

LDA 001—Introduction to Environmental Design (4)
Discussion—1 hour; Lecture—3 hours; Term Paper. Introduction to the role of design professionals in contributing to the built environment at a range of scales. Introduction to basic methods used by design professionals to evaluate, design, plan, and manage landscapes and the built environment. GE credit: AH, SE, SS, VL, WC, WE. Effective: 2012 Fall Quarter.

LDA 002—Place, Culture and Community (4)
Lecture—4 hours. Introduction to recognizing and reading cultural landscapes, and the application of cultural landscape meaning to the creation of contemporary built environments. Topics include patterns and influences relating to agriculture, military, transportation, housing, wilderness, recreation and tourism. GE credit: ACGH, SS, VL, WC, WE. Effective: 2012 Fall Quarter.

LDA 003—Sustainable Development: Theory and Practice (4)
Discussion—1 hour; Lecture—3 hours. Origins, theoretical perspectives, and practical applications of the concept of sustainable development across scales (site, building, neighborhood, city, region, and nation) through lectures, sketch exercises, student projects, walking tours. GE credit: ACGH, SS, VL, WE. Effective: 2018 Winter Quarter.

LDA 010—World Regional Geography (3)
Lecture—3 hours. Major geographic regions of the world; physical and human geography of each region; interactions between the people and the environment; culture and landscape; major resources; physical environments; population distribution and major cities. GE credit: ACGH, SS, VL, WE. Effective: 2016 Spring Quarter.

LDA 021—Landscape Representation I (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): LDA 001 (can be concurrent); or Consent of Instructor. Pass One is restricted to Pre-Landscape Architecture and Sustainable Environmental Design majors. Introduction to landscape architectural representation techniques. Fundamentals of orthographic drafting, freehand drawing, photography, and basic digital representation. GE credit: AH, OL, VL. Effective: 2017 Fall Quarter.

LDA 023—Landscape Representation II (3)
Project (Term Project); Studio—6 hours. Prerequisite(s): LDA 021; or Consent of Instructor. Restricted to Pre-Landscape Architecture and Landscape Architecture majors only. Instruction of methods to explore and communicate landscape design intentions through digital media Effective: 2017 Fall Quarter.

LDA 030—History of Environmental Design (4)
Discussion—1 hour; Lecture—3 hours. History of Environmental Design across disciplines, including landscape architecture, planning, community and urban design. GE credit: AH, VL, WE. Effective: 2016 Winter Quarter.

LDA 050—Site Ecology (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): BIS 002B Pass One restricted to Pre-Landscape Architecture and Sustainable Environmental Design majors. Introduction to ecological concepts, including nutrient dynamics, population regulation, community structure, ecosystem function. Principles will be applied to human
activities such as biological conservation, ecological restoration, landscape planning, and management. Weekly lab devoted to field exercises in local ecosystems. GE credit: SE, VL, WE. Effective: 2016 Fall Quarter.

LDA 060—Landform and Grading Studio (6)
Extensive Problem Solving; Project (Term Project); Studio—8 hours. Prerequisite(s): LDA 070 Pass One restricted to Pre-Landscape Architecture majors. Introduction of landform and topography as landscape medium and utilization of grading and drainage to design meaningful and functional spaces. Intro to site analysis and site planning, with specific attention to topography. GE credit: AH, OL, SE, VL. Effective: 2017 Fall Quarter.

LDA 061—AutoCAD for Landscape Architects (4) Review all entries
Laboratory—4 hours; Lecture—2 hours. Pass One restricted to Pre-Landscape Architecture, Sustainable Environmental Design, and Landscape Architecture majors. Introduction of computer-aided drafting (CAD) techniques and their application to landscape design. Drawing set-up, layer control, basic drawing and editing commands, dimensioning and text styles, symbol libraries, and display commands used in the creation of landscape architectural drawings. Effective: 2016 Summer Session 1.

LDA 061—AutoCAD for Landscape Architects (4) Review all entries Discontinued
Laboratory—4 hours; Lecture—2 hours. Pass One restricted to Pre-Landscape Architecture, Sustainable Environmental Design, and Landscape Architecture majors. Introduction of computer-aided drafting (CAD) techniques and their application to landscape design. Drawing set-up, layer control, basic drawing and editing commands, dimensioning and text styles, symbol libraries, and display commands used in the creation of landscape architectural drawings. Effective: 2019 Fall Quarter.

LDA 070—Introduction to Spacemaking (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): LDA 021; or Consent of Instructor. Pass One restricted to Pre-Landscape Architecture and Sustainable Environmental Design majors. Introduction to basic principles of design towards the creation of space. Design methodologies and skills to define, manipulate, and represent the built environment. Workshops in 3D physical modeling for spacemaking. GE credit: AH, OL, VL. Effective: 2017 Fall Quarter.

LDA 098—Directed Group Study in Landscape Architecture (1-5)
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. Directed group study. (P/NP grading only.) Effective: 2012 Fall Quarter.

LDA 099—Special Study for Undergraduates in Landscape Architecture (1-5)
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 2012 Fall Quarter.

LDA 101—Advanced Theory in Environmental Design (3)
Lecture/Discussion—3 hours. Prerequisite(s): LDA 070 (can be concurrent); or Consent of Instructor. Open to LDA/SED majors only. Provides exploration of contemporary theories and philosophies impacting design of landscapes and the built environment. Includes exploring competing definitions of "landscape," "nature," and "culture" GE credit: AH. Effective: 2017 Spring Quarter.

LDA 102—Methods in Design and Landscape Research (3)
Lecture—3 hours. Prerequisite(s): LDA 171; or Consent of Instructor. Open to Landscape Architecture majors only. Research, design, and planning methods employed in landscape architecture. Exercises allow students to design independent landscape research. Lectures provide a historical overview of research methodology. GE credit: AH, OL, VL, WE. Effective: 2018 Winter Quarter.

LDA 120—Landscape Representation III (3)
Project (Term Project); Studio—6 hours. Prerequisite(s): LDA 023; or Consent of Instructor. Restricted to Landscape Architecture majors. Provides hands-on workshop environment to explore advanced representation and modeling skills. Digital drawing explored as an analytical research method and generative design technique for creating presentation graphics. Effective: 2017 Fall Quarter.

LDA 140—Green Building, Design, and Materials (4)
Laboratory—4 hours; Lecture—2 hours. Prerequisite(s): LDA 050; LDA 070 Pass One restricted to Sustainable Environmental Design majors. Sustainable design and construction techniques at site and building scales. Emphasizes real-world case studies, analysis of opportunities for actual sites, and application of LEED and Sustainable Sites green rating systems. GE credit: AH, SE, VL. Effective: 2016 Fall Quarter.

LDA 141—Community Participation and Design (4)
Fieldwork—3 hours; Laboratory—3 hours; Lecture—1 hour; Project (Term Project)—3 hours. Prerequisite(s): LDA 021; LDA 030; LDA 050; LDA 070 Restricted to Sustainable Environmental Design and Landscape Architecture majors.

1189
Introduction to community participation and design. Incorporates social and cultural factors, public and community processes, theories and practices related to human-environment behavior; community involvement in design, social analysis, community engagement, accessibility, diversity and politics of place. GE credit: ACGH, AH, DD, SS, VL.

Effective: 2015 Winter Quarter.

LDA 142—Applying Sustainable Strategies (6)
Discussion—3 hours; Lecture—3 hours. Prerequisite(s): LDA 140; LDA 141 Restricted to Sustainable Environmental Design Majors. Capstone class examines case studies and techniques of sustainable development. Student teams will develop detailed proposals for real-world sites. GE credit: AH, OL, SE, SS, VL, WE. Effective: 2016 Spring Quarter.

LDA 150—Introduction to Geographic Information Systems (4)
Laboratory—3 hours; Lecture—3 hours. Pass One restricted to Landscape Architecture and Sustainable Environmental Design majors. Basic concepts, principles, and methods of GIS are presented. Data structures, database design, GIS data creation, GPS, and spatial analysis. Not open to credit for students who have completed ABT 180, PLS 180, ABT 181N. (Same course as ABT 150.) GE credit: SE, VL. Effective: 2018 Winter Quarter.

LDA 160—Design and Build Studio (6)
Extensive Problem Solving; Fieldwork; Studio—8 hours. Prerequisite(s): LDA 001; LDA 002; LDA 003; LDA 021; LDA 030; LDA 050; LDA 070 Restricted to Landscape Architecture majors. Introduction to the spatial design and construction of small-scale projects. Hands-on approach to learning and understanding materials (including wood, concrete, and stone) and methods in landscape construction, and the application of technical skills (including detailing, cost estimation, and specifications). GE credit: AH, OL, VL. Effective: 2013 Fall Quarter.

LDA 161—Professional Practice and Construction Documents (6)
Fieldwork; Project (Term Project); Studio—8 hours. Prerequisite(s): LDA 171 Open to Landscape Architecture majors only. Legal and professional aspects of landscape architecture, including the development of construction documents (drawings and specifications), proposal writing, fee calculations, project management, cost estimation, and insurance. Effective: 2017 Fall Quarter.

LDA 170—Site Planning and Design Studio (6)
Fieldwork; Studio—8 hours. Prerequisite(s): LDA 160 Open to Landscape Architecture majors only. Application of place-making and problem-solving skills to local landscape sites. Analysis of social and environmental conditions in the field. Lectures link design projects to contemporary theories and practices. GE credit: AH, OL, VL. Effective: 2017 Fall Quarter.

LDA 171—Urban Design and Planning Studio (6)
Studio—8 hours. Prerequisite(s): LDA 170 Restricted to Landscape Architecture majors. Studio designing large-scale landscapes at regional, sub-regional, and neighborhood scales. Focuses on understanding complex social, economic, and environmental factors, developing sustainability priorities and strategies, and applying them through design and policy. GE credit: ACGH, AH, OL, VL. Effective: 2016 Fall Quarter.

LDA 180—Advanced Design and Planning Studio (6)
Extensive Problem Solving; Fieldwork; Studio—8 hours. Prerequisite(s): LDA 060; LDA 160; LDA 170; LDA 171; LDA 172. Restricted to Landscape Architecture majors or consent of instructor. Application of advanced theories and methods of design and planning to real-world projects. May be repeated up to 18 unit(s). GE credit: AH, OL, VL. Effective: 2013 Fall Quarter.

LDA 182—Advanced Landscape Architecture Studio I (6)
Studio—8 hours. Prerequisite(s): LDA 171 Restricted to Landscape Architecture majors (ALDA) or consent of instructor. Landscape architecture studio featuring advanced studies and applications of creative work, design, technology and/or theory. One day long fieldtrip required. Effective: 2016 Fall Quarter.

LDA 183—Advanced Landscape Architecture Studio II (6)
Studio—8 hours. Prerequisite(s): LDA 182 Restricted to Landscape Architecture majors (ALDA) or consent of instructor. Landscape architecture studio featuring advanced studies and applications of creative work, design, technology and/or theory. One day long field trip required. Effective: 2016 Fall Quarter.

LDA 184—Capstone Landscape Architecture Studio (6)
Studio—8 hours. Prerequisite(s): LDA 183 Restricted to Landscape Architecture majors or consent of instructor. Capstone studio that synthesizes learning objectives within the senior-level Landscape Architecture studio sequence. Students required to apply creative problem solving, design theory, technology, and representation skills.
towards a design approach that addresses complex, real-world environmental design problems. Effective: 2016 Fall Quarter.

LDA 190—Proseminar in Landscape Architecture (1)
Seminar—1 hour. Lectures and discussion of critical issues in landscape architecture. May be repeated three times for credit. May be repeated up to 3 time(s). (P/NP grading only.) Effective: 2012 Fall Quarter.

LDA 191—Landscape Architecture Planning & Design Studio (2-12)
Seminar—1 hour; Workshop—3 hours. Prerequisite(s): LDA 001; LDA 070; LDA 170; or Consent of Instructor. Priority to Landscape Architecture majors. Faculty initiated workshops featuring advanced studies and applications of original work in landscape architecture. May be repeated up to 20 unit(s). Effective: 2012 Fall Quarter.

LDA 192—Internship in Landscape Architecture (1-12)
Internship. Prerequisite(s): Consent of Instructor. Senior standing in Landscape Architecture. Professional field experience in landscape architecture. May be repeated for a total of 12 units. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 2012 Fall Quarter.

LDA 193A—Senior Project in Landscape Architecture (3)
Studio—6 hours. Prerequisite(s): Senior standing in Landscape Architecture. Limited enrollment. Projects will focus on a critical area of landscape architectural design, planning, analysis, communication, or research. Limited enrollment. Required of all Landscape Architecture majors. (P/NP grading only.) Effective: 2012 Fall Quarter.

LDA 193B—Senior Project in Landscape Architecture (4)
Studio—8 hours. Prerequisite(s): LDA 193A; And senior standing in Landscape Architecture. Limited enrollment. Projects will focus on a critical area of landscape architectural design, planning, analysis, communication, or research. Limited enrollment. Required of all Landscape Architecture majors. (P/NP grading only.) Effective: 2012 Fall Quarter.

LDA 197T—Tutoring in Landscape Architecture (1-5)
Tutorial—3-15 hours. Prerequisite(s): Consent of Instructor. Tutoring in Landscape Architecture courses. (P/NP grading only.) Effective: 2012 Fall Quarter.

LDA 198—Directed Group Study in Landscape Architecture (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study. (P/NP grading only.) Effective: 2012 Fall Quarter.

LDA 199—Special Study for Advanced Undergraduates in Landscape Architecture (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 2012 Fall Quarter.

LDA 200—Citizenship, Democracy, & Public Space (4)
Seminar—4 hours. Prerequisite(s): Graduate standing or consent of instructor. Introduction to seminal works in political theory, philosophy, and the social sciences that focus on citizenship and the public sphere; development of critical perspective regarding restructuring of public space in a pluralistic and global culture; discussion of contemporary case studies. (Same course as GEO 230.) Effective: 2012 Fall Quarter.

LDA 201—Theory and Philosophy of the Designed Environment (4)
Seminar—4 hours. Prerequisite(s): LDA 140; Or the equivalent; graduate standing or consent of instructor. Examines the major theories of environmental design. Epistemology of design serves as framework to examine modern landscape architecture, architecture, urban design and planning. Normative theories of design are reviewed along with the social and environmental sciences. Effective: 2012 Fall Quarter.

LDA 202—Methods in Design and Landscape Research (4)
Seminar—4 hours. Explores many of the research and advanced design and planning methods employed in landscape architecture. Exercises provide the student with a vehicle for designing independent landscape research and creative activities. Lectures provide an historical overview of research methodology. Effective: 2016 Spring Quarter.

LDA 204—Case Studies in Landscape Design and Research (4)
Seminar—4 hours. Prerequisite(s): Graduate standing in Landscape Architecture, Ecology, Geography or Community Development or consent of instructor. Real-world designed environment situations where creative activity and/or basic research is the primary product. May be repeated for credit for a total of 12 units. May be repeated up to 12 unit(s). Effective: 2012 Fall Quarter.

LDA 205—Urban Planning and Design (4)
Discussion—2 hours; Lecture—2 hours. Limited to graduate students. Regulation, design, and development of the
built landscape, planning and land development processes, zoning and subdivision regulation, site planning, urban design goals and methods, public participation strategies, creatively designing landscapes to meet community and ecological goals. (Same course as GEO 233.) Effective: 2016 Winter Quarter.

**LDA 210—Advanced Landscape Architecture Studio (4)**
Laboratory—8 hours. Prerequisite(s): LDA 113 or the equivalent; graduate standing or consent of instructor. Exposes students to real-world, designed-environment situations where creative activity and/or basic research is the primary product. Advanced landscape problems will be utilized at the site, urban or rural scale. Effective: 2012 Fall Quarter.

**LDA 215—Ecologies of Infrastructure (4)**
Seminar—4 hours. Open to graduate standing or consent of instructor. Focus on design practices and theory associated with ecological conceptions of infrastructure, including networked infrastructure, region, bioregion, regionalization, ecological engineering, reconciliation ecology, novel ecosystems, and theory/articulation of landscape change. (Same course as GEO 215.) Effective: 2016 Winter Quarter.

**LDA 216—Food and the City (4)**
Seminar—4 hours. Open to graduate standing or consent of instructor. Exploration of theory and practice related to the design and planning of alternative and resilient food systems, including urban agriculture, agrihoods, and agri-/rural tourism. Includes investigation of urban-rural connections and case-studies of regional urban agriculture projects. Effective: 2019 Winter Quarter.

**LDA 270—Environment and Behavior (4)**
Seminar—3 hours; Tutorial—1 hour. Prerequisite(s): Graduate standing or consent of instructor; PSC 144 recommended. Factors that influence human's interaction with their surroundings and the mechanisms used for recognizing and addressing general and specific human needs in community design and development decisions. Effective: 2012 Fall Quarter.

**LDA 280—Landscape Conservation (3)**
Seminar—3 hours. Prerequisite(s): Contact department for prerequisite courses; graduate standing or consent of instructor. Focus is on land planning, design, and management techniques to further the goal of resource preservation. Examines current critical theory in the establishment and management of conservation areas. Effective: 2012 Fall Quarter.

**LDA 290—Graduate Seminar in Landscape Architecture (2)**
Seminar—2 hours. Prerequisite(s): Consent of Instructor. Graduate standing. Seminar on selected topics in landscape architecture research, analysis, planning, design, communication, or education. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 2012 Fall Quarter.

**LDA 297—Practicum in Landscape Architecture (1-10)**
Independent Study—1-10 hours. Prerequisite(s): Consent of Instructor. Graduate standing. Opportunity for students to work directly in the field with academics at other institutions or with professionals in an office setting. Gives experience beyond the confines of campus and allows direct interaction with the community. (S/U grading only.) Effective: 2012 Fall Quarter.

**LDA 298—Group Study (1-5)**
Variable. Prerequisite(s): Consent of Instructor. Graduate standing. (S/U grading only.) Effective: 2012 Fall Quarter.

**LDA 299—Directed Individual Research for Graduate Students (1-12)**
Independent Study. May be repeated for credit. (S/U grading only.) Effective: 2012 Fall Quarter.

**LDA 396—Teaching Assistant Training Practicum (1-4)**
Variable. May be repeated for credit. (P/NP grading only.) Effective: 2012 Fall Quarter.

### Landscape Restoration Minor; Plant Sciences

**Landscape Restoration Minor; Plant Sciences | Landscape Restoration Minor**

(College of Agricultural and Environmental Sciences)

This minor is of particular interest to students majoring in Wildlife, Fish, and Conservation Biology, Environmental Science and Management, Landscape Architecture, Biological Sciences, Evolution and Ecology, Plant Biology and Sustainable Environmental Design. BIS 002C or PLS 002 is a prerequisite to most courses in the minor. The minor is sponsored by the Department of Plant Sciences.

**Minor Advisor.** T.P. Young (Plant Sciences)
**Landscape Restoration**  
Units: 19-25

**Latin Minor; Classics | LAT Courses**

Courses in LAT:
LAT 001—Elementary Latin (5)
Lecture—5 hours. Introduction to basic grammar and vocabulary and development of translation skills with emphasis on Latin to English. Students who have successfully completed LAT 002 or LAT 003 in the 10th grade or higher grade in high school may receive unit credit for this course on a P/NP grading basis only; although a passing grade will be charged to the student's P/NP option, no petition is required; all other students will receive a letter grade unless a P/NP petition is filed. GE credit: AH. Effective: 1997 Winter Quarter.

LAT 002—Elementary Latin (5)
Lecture—5 hours. Prerequisite(s): LAT 001; Or equivalent. Continuation of course 1. GE credit: AH. Effective: 2016 Spring Quarter.

LAT 003—Intermediate Latin (5)
Lecture—5 hours. Prerequisite(s): LAT 002; Or equivalent. Continuation of course 2. Selected readings from Latin authors. GE credit: AH. Effective: 2016 Spring Quarter.

LAT 098—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

LAT 100—Readings in Latin Prose (4)
Lecture/Discussion—4 hours. Prerequisite(s): LAT 003; Or equivalent. Review of Latin morphology, grammar, and vocabulary. Readings in prose authors, including Julius Caesar. GE credit: AH. Effective: 2016 Fall Quarter.

LAT 101—Livy (4)
Lecture—3 hours; Term Paper. Prerequisite(s): LAT 100; or Consent of Instructor. Livy GE credit: AH, WE. Effective: 2016 Spring Quarter.

LAT 102—Roman Comedy (5)
Lecture—4 hours; Term Paper. Prerequisite(s): LAT 100; or Consent of Instructor. Roman comedy. GE credit: AH, WE. Effective: 2016 Spring Quarter.

LAT 103—Vergil: Aeneid (4)
Lecture—3 hours; Term Paper. Prerequisite(s): LAT 100; or Consent of Instructor. Vergil: Aeneid. GE credit: AH, WE. Effective: 2016 Spring Quarter.

LAT 104—Sallust (4)
Lecture—3 hours; Term Paper. Prerequisite(s): LAT 100; or Consent of Instructor. Sallust. GE credit: AH, WE. Effective: 2016 Spring Quarter.

LAT 105—Catullus (4)
Lecture—3 hours; Term Paper. Prerequisite(s): LAT 100; or Consent of Instructor. Catullus. GE credit: AH, WE. Effective: 2016 Spring Quarter.

LAT 106—Horace: Odes and Epodes (4)
Lecture—3 hours; Term Paper. Prerequisite(s): LAT 100; or Consent of Instructor. Horace: Odes and Epodes. GE credit: AH, WE. Effective: 2016 Spring Quarter.

LAT 108—Horace: Satires and Epistles (4)
Lecture—3 hours; Term Paper. Prerequisite(s): LAT 100; or Consent of Instructor. Horace: Satires and Epistles. GE credit: AH, WE. Effective: 2016 Spring Quarter.

LAT 109—Roman Elegy (4)
Lecture—3 hours; Term Paper. Prerequisite(s): LAT 100; or Consent of Instructor. Roman elegy. GE credit: AH, WE. Effective: 2016 Spring Quarter.

LAT 110—Ovid (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): LAT 100; Or equivalent. Translation and discussion of selected readings from the works of Ovid. May be repeated up to 1 time(s) when topic differs and with consent of instructor. GE credit: AH, WC, WE. Effective: 2011 Fall Quarter.

LAT 112—Cicero (4)
Recitation—3 hours; Term Paper. Prerequisite(s): LAT 100; Or equivalent. Translation and discussion of selected readings from the works of Cicero. May be repeated up to 1 time(s) if readings vary and with consent of instructor. GE credit: AH, WE. Effective: 2011 Fall Quarter.
LAT 115—Lucretius (4)
Lecture—3 hours; Term Paper. Prerequisite(s): LAT 100; or Consent of Instructor. Lucretius. GE credit: AH, WE. Effective: 2016 Spring Quarter.

LAT 116—Vergil: Eclogues and Georgics (4)
Lecture—3 hours; Term Paper. Prerequisite(s): LAT 100; or Consent of Instructor. Vergil: Eclogues and Georgics. GE credit: AH, WE. Effective: 2016 Spring Quarter.

LAT 118—Roman Historians (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): LAT 100; Or equivalent. Readings in Latin from one or more of the major Roman historians and biographers. Authors may include Sallust, Nepos, Livy, Tacitus, Suetonius, and Ammianus Marcellinus. GE credit: AH, WC, WE. Effective: 2011 Fall Quarter.

LAT 119—Readings in Republican Latin Literature (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): LAT 100; Or equivalent. Translation and discussion of selected readings from Republican Latin literature. May be repeated for credit when topics vary. GE credit: AH, WC, WE. Effective: 2012 Summer Session 2.

LAT 120—Readings in Imperial Latin Literature (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): LAT 100; Or equivalent. Readings in Imperial Latin literature. May be repeated up to 2 time(s) when topic varies. GE credit: AH, WC, WE. Effective: 2014 Winter Quarter.

LAT 121—Latin Prose Composition (4)
Lecture/Discussion—4 hours. Prerequisite(s): LAT 100; Or equivalent. Intensive grammar and vocabulary review through exercises in Latin prose composition. GE credit: AH. Effective: 2015 Fall Quarter.

LAT 122—Early Christian Writers (4)
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): LAT 100 (can be concurrent); or Consent of Instructor. Latin style of selected early Christian writers. Topics may include: Latin translations of Greek and Hebrew scriptures, Christian Latin, with focus on North Africa, Palestine, or Spain; High literary Christian Latin; Christian Latin oratorial style. GE credit: AH, WC, WE. Effective: 2017 Fall Quarter.

Lecture—3 hours; Term Paper. Prerequisite(s): LAT 100; or Consent of Instructor. Selected readings from the Vulgate and various medieval authors provide an introduction to the developments in the Latin Language and literature from the fourth to the fifteenth centuries. GE credit: AH, WE. Effective: 2016 Spring Quarter.

LAT 130—Readings in Late Latin (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): LAT 100; or Consent of Instructor. Translation and discussion of selected readings from late imperial-early medieval Christian and pagan literature. GE credit: AH, WC, WE. Effective: 2016 Fall Quarter.

LAT 135—Themes in Latin Literature (4)
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): LAT 100 (can be concurrent); or Consent of Instructor. Readings in Latin that trace a theme across times, genres, and authors. May be repeated for credit May be repeated for credit if topics differ. GE credit: AH, WC, WE. Effective: 2017 Fall Quarter.

LAT 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study. (P/NP grading only.) Effective: 2016 Spring Quarter.

LAT 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. Special study for advanced undergraduates. (P/NP grading only.) Effective: 2016 Fall Quarter.

Latin American & Hemispheric Studies Minor

Latin American & Hemispheric Studies Minor | Latin American & Hemispheric Studies Minor

(College of Letters and Sciences)

Charles F. Walker, Ph.D., Program Director
**Program Office.** Hemispheric Institute of the Americas, 1277 Social Sciences and Humanities Building; 530-752-3046; http://hia.ucdavis.edu

**Faculty.** http://hia.ucdavis.edu/people

The minor in Latin American and Hemispheric Studies offers students the opportunity to explore connections throughout the Western Hemisphere from an array of perspectives across multiple academic fields.

The minor is made up of six courses, arranged in three tiers: Basic (one lower division course on the history of Latin America); Core (two introductory upper division courses chosen from a designated list of fields other than History); and Elective (three additional upper division courses from a designated list of courses that focus primarily on Latin American and/or Hemispheric issues). Students are strongly encouraged to develop proficiency in Spanish or Portuguese, either through course work (such as completion of SPA 024 or 033), or through life experience such as study abroad.

**Minor Advisor.** HIA program coordinator in 1277 Social Sciences and Humanities Building (530-752-3046) or Charles Walker in 1279 Social Science and Humanities Building (530-752-3046).

Law, School of

Law, School of | Law J.D.

School of Law
Kevin Johnson, J.D., Dean
Madhavi Sunder, J.D., Associate Dean; Academic Affairs
Hollis L. Kulwin, J.D., Senior Assistant Dean; Student Affairs
Kristen Mercado, J.D., Assistant Dean; Admission and Financial Aid
Brett C. Burns, Senior Assistant Dean; Administration
The University of California Davis School of Law offers a three-year professional curriculum leading to the degree of Juris Doctor. Within a uniquely supportive atmosphere, law students have access to a comprehensive modern law school curriculum taught by a nationally and internationally distinguished faculty. The School offers a full range of traditional law courses, opportunities for practical experience through clinical programs, and in-depth study of an area of law in an individualized program of classroom work, research, writing, or experience in the community. It further provides professional skills training in interviewing and counseling, negotiation and dispute resolution and trial practice. The School seeks to promote critical evaluation of law and legal institutions in a broad perspective, integrating non-legal disciplines with professional legal education.

UC Davis Law School is fully accredited by the American Bar Association, is a member of the Association of American Law Schools, and has a chapter of the Order of the Coif.

**Program of Study**

The professional curriculum requires six semesters for completion and extends over a period of three years. It is for full-time students only; no part-time or evening program is offered. New students are admitted only at the beginning of the fall semester.

After satisfactorily completing the professional curriculum of 88 semester units and the required period of resident study, you will receive the degree of Juris Doctor (J.D.). Students who fail to attain satisfactory grades may be required to withdraw from the School at the end of any academic year.

The first year’s work is prescribed and provides the essential foundation for subsequent legal study. Satisfactory completion of the first-year courses is, in all cases, prerequisite to second- and third-year courses. The work of the second and third years is elective. The courses of the professional curriculum are listed in the Undergraduate Courses chapter.

**Combined Degree Programs**

Individual students may find a combined degree involving law and another discipline such as economics, business, sociology, or science advantageous. To support this kind of study, the School, in conjunction with other schools and university departments, has established Combined Degree Programs. Under these programs, a student may work toward a J.D. degree and a master’s degree in another discipline at the same time. Students working toward a combined degree are required to spend their first year at the law school.

Normally, a Combined Degree Program will take at least four years. You will usually be able to earn up to 10 semester-hours of law school credit for work in the related discipline and normally can complete the combined degrees in less time than it would take to earn the two degrees separately. The first year of the Combined Degree Program must be taken entirely in the School of Law. During the remaining years, course work may be divided between the law school and the related discipline. You must satisfy the admission requirements for both programs and file applications with both units.

Students have pursued degree programs in combination with UC Davis departments for the M.A. degree in economics, philosophy, computer science, and sociology, and with the School of Management for the M.B.A. degree. The law school will attempt to work out an additional program if you are interested in other disciplines. You may enroll in the Combined Degree Program any time before the beginning of your third year in law school. If you are interested in pursuing a Combined Degree Program, and have made a separate application to another school or department, you should notify the School of Law if that application is accepted.

Law, School of | LAW Courses

Courses of Instruction. The courses listed below have all been taught at least once in the last three years. There is no guarantee that any given course will be taught within the next three years. The numbers in parentheses indicate the number of semester credits. For current information, see Law School Course Descriptions.
Courses in LAW:

LAW 200—Introduction to Law (1)
Discussion—1 hour. Introduction to basic concepts of the law, the historical roots of common law and equity, the precedent system in its practical operation, the modes of reasoning used by courts and attorneys, and the fundamentals of statutory interpretation. (S/U grading only.) Effective: 1997 Winter Quarter.

LAW 200A—U.S. Legal System Seminar (LL.M.) (2)
Discussion—2 hours. History and fundamental principles of the United States legal system. Important current legal issues, developments and trends. Required for LL.M. students who have not attended a U.S. law school. Fall semester only. Effective: 2017 Fall Semester.

LAW 200B—U.S. Legal Methods I (LL.M.) (3)
Lecture. Course is only offered to LL.M. students. Designed to provide background skills necessary to succeed in both law school and legal practice. Gain an introductory working knowledge of the US legal methods which includes learning various forms of legal writing and speaking. Effective: 2017 Fall Semester.

LAW 200CT—U.S. Legal Methods B (LL.M.) (3)
Lecture/Discussion—3 hours. Course is designed to provide background skills necessary to succeed in both law school and legal practice. Students gain an introductory working knowledge of the US legal method which includes learning various forms of legal writing and speaking. Effective: 2017 Spring Semester.

LAW 200D—American Legal Concepts I (LL.M.) (3)
Lecture. Prerequisite(s): Consent of Instructor. Course is only offered to LL.M. students. Designed to provide basic skills necessary to succeed in both law school and legal practice. Effective: 2017 Fall Semester.

LAW 200E—American Legal Concepts II (LL.M.) (3)
Lecture. Course is only offered to LL.M. students. Designed to provide basic skills necessary to succeed in both law school and legal practice. Effective: 2017 Fall Semester.

LAW 200L—Lawyering Process Lab (0)
Laboratory. Lab which accompanies Lawyering Skills course for first-year law students. (S/U grading only.) Effective: 2019 Spring Semester.

LAW 200S—Lawyering Process (2)
Discussion. Students will hone interactive lawyering skills needed for effective transactional and litigation work, including client interviewing and negotiation. They will learn the role that interpersonal skills play in effective lawyering and contemplate the professional identity they wish to cultivate. (S/U grading only.) Effective: 2019 Spring Semester.

LAW 201—Property (4)
Discussion—4 hours. Prerequisite(s): AAS 010; LAW 200A; or Consent of Instructor. Text here A study of doctrines and concepts of property law with primary emphasis on real property. Course coverage includes: the estates in land system; the landlord-tenant relationship, conveyancing, and private and public land use control. Effective: 2006 Fall Semester.

LAW 202—Contracts (5) Review all entries
Discussion—5 hours. Examines sorts of promises that are enforced and the nature of protection given promissory obligations in both commercial and noncommercial transactions. Inquiry is made into the means by which traditional doctrine adjusts or fails to adjust to changing social demands. Effective: 2006 Fall Semester.
LAW 202—Contracts (4) **Review all entries**
Discussion—4 hours. Examines sorts of promises that are enforced and the nature of protection given promissory obligations in both commercial and noncommercial transactions. Inquiry is made into the means by which traditional doctrine adjusts or fails to adjust to changing social demands. Effective: 2018 Fall Semester.

LAW 203—Civil Procedure (5)
Discussion—5 hours. A study of the fundamental and recurrent problems in civil actions including the methods used by federal and state courts to resolve civil disputes. Effective: 2006 Summer Special Session.

LAW 204—Torts (5) **Review all entries**
Discussion—5 hours. Familiarizes students with legal rules, concepts and approaches pertinent to the recovery for personal injuries, property damages and harm done to intangible interests. Effective: 2006 Fall Semester.

LAW 204—Torts (4) **Review all entries**
Discussion—4 hours. Familiarizes students with legal rules, concepts and approaches pertinent to the recovery for personal injuries, property damages and harm done to intangible interests. Effective: 2019 Spring Semester.

LAW 205—Constitutional Law I (4)
Discussion—4 hours. The principles, doctrines and controversies regarding the basic structure of and division of powers in American government. Specific topics include judicial review, jurisdiction, standing to sue, federalism, federal and state powers and immunities, and the separation of powers among the Effective: 2004 Fall Semester.

LAW 206—Criminal Law (3)
Discussion—3 hours. Study of the bases and limits of criminal liability. Coverage of the constitutional, statutory, and case law rules which define, limit, and provide defenses to individual liability for the major criminal offenses. Effective: 1997 Winter Quarter.

LAW 207—Legal Research and Writing I (2)
Discussion/Laboratory—2 hours. Fall semester course taught by Wydick Fellowship Program faculty is an integrated legal research and writing skills course. Basic legal research resources and strategies are introduced and practiced. Effective: 2016 Fall Semester.

LAW 207A—Legal Research (LL.M.) (1)
Discussion—1 hour. Restricted to LL.M. students only. Description of the evolution and use of sources of law and secondary authority. Effective: 2016 Fall Semester.

LAW 207B—Advanced Legal Research (2)
Seminar—2 hours. Restricted to 35 students. Will introduce students to advanced legal research tools and techniques used in practice, including efficient computer research techniques. Effective: 2009 Fall Semester.

LAW 207C—California Civil Procedure Research (1)
Lecture. Prerequisite(s): LAW 207; LAW 208 Includes lectures and in-class exercises working with print, and electronic, legal research materials to prepare responses to various fact patterns. Extensive use of real-world case scenarios to mimic conditions likely encountered by legal practitioners. Half of the course time is lecture; half is in-class practical assignments or discussion designed to enhance the students’ understanding of the concepts introduced. Effective: 2019 Spring Semester.

LAW 207D—Intellectual Property Research (1)
Lecture. Prerequisite(s): LAW 207; LAW 208 Includes lectures and in-class exercises working with print, and electronic, legal research materials to prepare responses to various fact patterns. Extensive use of real-world case scenarios to mimic conditions likely encountered by legal practitioners working in the intellectual property legal practice. Effective: 2019 Spring Semester.

LAW 208—Legal Research and Writing II (2)
Discussion—2 hours. Focuses on persuasive writing and oral advocacy. Students will complete integrated research and writing assignments, including a complaint, a strategic defense office memorandum, a motion to dismiss in federal court, and an appellate brief, with oral arguments by all students. Effective: 2007 Fall Semester.

LAW 208A—Legal Research and Writing II (LL.M.) (2)
Discussion—2 hours. Persuasive writing and oral advocacy. LL.M. students complete integrated research and writing assignments, including a complaint, a strategic defense office memorandum, a motion to dismiss in federal court, and an appellate brief with oral arguments. Effective: 2017 Spring Semester.

LAW 208E—Introduction to U.S. Legal Methods A (3)
Lecture. Prerequisite(s): Consent of Instructor. Restricted to LL.M. students. Designed to provide foreign students
with background skills at a more basic level than U.S. Legal Methods A and B. Students will audit carefully selected courses in the regular curriculum and complete assignments related to those courses. Effective: 2017 Fall Semester.

**LAW 208F—Introduction to U.S. Legal Methods B (LLM) (3)**
Seminar. Prerequisite(s): Consent of Instructor. Restricted to LL.M. students. Designed to provide foreign students with background skills at a more basic level than U.S. Legal Methods A and B. Students will audit carefully selected courses in the regular curriculum and complete assignments related to those courses. Effective: 2017 Fall Semester.

**LAW 208G—U.S. Legal Methods A (LL.M.) (3)**
Lecture. Restricted to LL.M. students. Designed to provide foreign and other students with background skills necessary to succeed in both law school and legal practice. Effective: 2017 Fall Semester.

**LAW 208H—U.S. Legal Methods B (LL.M.) (3)**

**LAW 208M—LL.M. Legal Essay Writing A (1)**
Seminar. Improve legal writing skills with a focus on law school essay exams. Focuses on the following skills: 1) how to understand the goals of a US law school exam and the expectations of the professor; 2) how to structure an answer logically; 3) how to write clearly; 4) how to explain reasoning and discuss complex legal issues. Experiential class. Effective: 2019 Spring Semester.

**LAW 208N—LL.M Legal Essay Writing B (1)**
Seminar. Improve legal writing skills with a focus on bar essay exams. Focuses on the following skills: 1) how to understand the goals of a US bar; 2) how to structure an answer logically; 3) how to write clearly; 4) how to explain reasoning and discuss complex legal issues. Experiential class. Effective: 2019 Spring Semester.

**LAW 209A—Patent Law (3)**
Discussion—3 hours. Prerequisite(s): LAW 274; or Consent of Instructor. Covers all essential aspects of patent law: patentable subject matter, novelty, utility, nonobviousness, enablement, prosecution, infringement, and remedies. Effective: 2011 Fall Semester.

**LAW 209B—Patent Prosecution and Practice (3)**
Seminar. Examines core requirements and strategies for drafting and prosecuting a patent application before the U.S. Patent & Trademark Office. Students will interact with real inventors and US PTO examiners to gain the experience of getting a patent issued. Effective: 2017 Fall Semester.

**LAW 209C—Patentable Subject Matter: Genes, Methods, and Software (2)**
Seminar. In-depth look at recent cases and debates behind genetic patenting, software; business models; diagnostic methods, and others. Reviews the crucial and rapidly evolving field of patent law which affects some of the most important hi-tech industries. Effective: 2018 Spring Semester.

**LAW 209DT—Innovation Law (2)**
Seminar—2 hours. Explores range of legal issues that innovation lawyers face, from establishing a start-up to high stakes technology mergers & acquisitions, to data protection and privacy, protecting intellectual property through strategic patent litigation. Effective: 2018 Spring Semester.

**LAW 209E—Patent Litigation (1)**
Lecture—1 hour. Introduces the basics of Patent Law and examines the U.S. patent enforcement system. Learn how a patent litigation proceeds, focusing on both pre- and post-trial proceedings and examines substantive patent laws. Effective: 2018 Spring Semester.

**LAW 209T—Innovation and Technology Transfer Seminar (2)**
Seminar—2 hours. Prerequisite(s): LAW 209A or LAW 274, recommended but not required. Restricted to 15 students. From biomedicine to cleantech, public institutions are playing leading roles in developing cutting-edge technologies. Explores the law and policy of publicly-supported innovation and technology transfer. Effective: 2010 Fall Semester.
LAW 210—Reforming the Police and Criminal Justice (2)
Seminar—2 hours. Limited to 25 students. Focus on major current issues: policing ethnic neighborhoods; use of deadly force; modernizing the work of prosecutors and defense counsel. Effective: 2016 Fall Semester.

LAW 210A—Privatization of Criminal Justice Seminar (2)
Seminar—2 hours. Prerequisite(s): Prior social theory or criminal procedure knowledge not required; completion of LAW 227A strongly recommended. Restricted to 10 students. Analyze the legal, historical, and sociological aspects of the growing private sector provision of criminal justice services traditionally assumed by government, including prisons, policing, and adjudication. Effective: 2005 Fall Semester.

LAW 210B—Sociology of Criminal Procedure (2)
Seminar—2 hours. Limited enrollment. What are the expectations and roles of the police in a democratic society? We need order maintenance and crime control, but to assume these tasks the police sometimes intrude upon interests considered fundamental to free societies. Effective: 2014 Spring Semester.

LAW 210C—Sexual Assault and the Law (2)
Seminar—2 hours. Criminal law of sexual assault, traditional and modern offenses, and proposals for reform. Discussion of procedural developments, victim's counsel, evidentiary reform, and ADR. And the implications for civil law, tort liability, Title VI, Title IX, and civil liability of perpetrators. Effective: 2015 Fall Semester.

LAW 210DT—Wrongful Convictions (2)
Seminar—2 hours. Course will explore the magnitude and complexity of the wrongful convictions, their causes and remedies under existing law, and possible fixes (reforms). It will emphasize relevant legal rules (Criminal Procedure, Evidence, Post-Conviction Review). Effective: 2015 Fall Semester.

LAW 210ET—Race, Mass Incarceration and Policing (2)

LAW 210F—Restorative Justice (2)
Seminar. Explore both the theory and practice of restorative justice as an alternative approach to the retributive justice model of our current criminal law system and many other institutions. Effective: 2017 Fall Semester.

LAW 210G—Aoki Center Restorative Justice Practicum (1) Review all entries
Fieldwork. Learn about restorative justice principles and practices, receive training in restorative justice facilitation, and participate in and lead restorative justice circles in Davis and Sacramento schools, Yolo County Juvenile Hall, and other venues. (S/U grading only.) Effective: 2018 Fall Semester.

LAW 210G—Aoki Center Restorative Justice Practicum (2) Review all entries
Fieldwork. Learn about restorative justice principles and practices, receive training in restorative justice facilitation, and participate in and lead restorative justice circles in Davis & Sacramento schools, Yolo County Juvenile Hall, and other venues. (S/U grading only.) Effective: 2019 Fall Semester.

LAW 210H—Aoki Federal Court Amicus Project (3)
Project (Term Project). Prerequisite(s): LAW 203; LAW 219; both required or consent of instructor. Work on actual federal criminal cases in the Ninth Circuit Court of Appeals and United States Supreme Court. File briefs amicus curiae on critical issues, and develop research, writing, and oral advocacy skills. Effective: 2018 Fall Semester.

LAW 210J—Best Practices for Justice Seminar: Advocates Working to Improve the Criminal Justice System (2)
Lecture. Prerequisite(s): LAW 206; LAW 227A (can be concurrent) The Criminal Justice System continues to evolve as perceptions regarding judges, police officers and criminal attorneys change. Analyzes how our sense of justice is formed and what it looks like in the actual practice of criminal law. Effective: 2019 Fall Semester.

LAW 210T—Policing Seminar (2) Review all entries Discontinued
Seminar—2 hours. 10 students. What are the expectations and roles of the police in a democratic society? We need order maintenance and crime control, but to assume these tasks the police sometimes intrude upon interests considered fundamental to free societies. Effective: 2010 Fall Semester.

LAW 210T—Reforming the Police Seminar (1) Review all entries
Seminar. Limited to 10 students. Focus on major current criminal justice issues: policing ethnic neighborhoods; use of deadly force; methods of pre-trial release; modernizing the work of prosecutors and defense counsel. (S/U grading only.) Effective: 2018 Fall Semester.
LAW 210T—Reforming the Police Seminar (1) **Review all entries Discontinued**
Seminar. Limited to 10 students. Focus on major current criminal justice issues: policing ethnic neighborhoods; use of deadly force; methods of pre-trial release; modernizing the work of prosecutors and defense counsel. (S/U grading only.) Effective: 2019 Spring Semester.

LAW 211—Negotiations (2)
Discussion—2 hours. Limited enrollment. Skills course teaches theoretical and empirical approaches to negotiation strategy for the purposes of making deals and resolving disputes. Students participate in simulations to hone their negotiation skills, and write analytical papers. Effective: 2016 Fall Semester.

LAW 211A—Advanced Negotiations Strategy and Client Counseling (3)
Discussion—3 hours. Prerequisite(s): Consent of Instructor. Application course; must apply and secure professor approval to enroll; will involve participating in discussions and a series of simulations; your classmates will be counting on you to actively participate and be well prepared for every simulation; do not apply to take this course unless you are willing and able to participate fully and can accept constructive feedback; if you anticipate missing more than two class sessions, do not apply to take this course. Understand the dynamics of interviewing and counseling process. Designed to be relevant to a broad spectrum of negotiation problems that are faced by legal professionals. Effective: 2012 Fall Semester.

LAW 211B—International Business Negotiations (3)
Lecture/Discussion. Prerequisite(s): LAW 215 (can be concurrent); Prerequisites: Prior or concurrent enrollment in Business Associations (LAW 215) required; prior enrollment in Negotiations (LAW 211) and/or International Business Transactions (LAW 270) preferred. Course is structured around a simulated negotiation exercise with students from a similar class at Stanford Law School. Students will experience the development of a business transaction over an extended negotiation in a context that replicates actual legal practice. Effective: 2019 Spring Semester.

LAW 211BT—International Business Negotiations (3) **Review all entries**
Discussion/Laboratory—3 hours. Course is structured around a simulated negotiation exercise with students from a similar class at Stanford Law School. Students will experience the development of a business transaction over an extended negotiation in a context that replicates actual legal practice. Effective: 2016 Fall Semester.

LAW 211C—Negotiating Joint Ventures (2)

LAW 212A—Medical Liability Law and Policy (2)
Discussion—2 hours. This course will consider the many ways in which society seeks to establish and maintain quality in patient care. Effective: 2007 Fall Semester.

LAW 213A—Transnational Criminal Law (3)
Discussion—3 hours. Prerequisite(s): LAW 205; LAW 206 Will examine the laws responses to a particular aspect of globalization, transnational crime. The course will explore the phenomenon of transnationality and how it affects the power of nation-states, acting alone or together, to prosecute certain crimes. Effective: 2006 Fall Semester.

LAW 213T—Terrorism and International Law (2)
Seminar—2 hours. International terrorism remains a pressing concern. Devising effective remedies for responding to it within the bounds of the law is critical. Therefore, the new generation of international lawyers needs to be familiar with the relevant law and standards. Effective: 2013 Fall Semester.

LAW 214—Tax Issues Related to Estate Planning (2)
Discussion—2 hours. Prerequisite(s): LAW 221 recommended. Tax issues Related to estate planning. Effective: 2017 Fall Semester.

LAW 214A—Migration, Work, and Taxation (2)
Seminar. Explores workers’ and prospective workers’ choices to move from one place to another, both across and within national borders. In particular, explores how tax policy and broader economic forces shape those choices. Effective: 2018 Fall Semester.
LAW 215—Business Associations (4)
Discussion—4 hours. Legal rules and concepts applicable to business associations, both public and closely held. Corporate form of organization, partnerships and other associational forms. Effective: 2005 Fall Semester.

LAW 215A—The Law of Corporate Governance Seminar (2)
Seminar—2 hours. Prerequisite(s): LAW 215 Advanced issues in the governance of publicly held corporations. Separation of ownership and control and how the law has addressed this issue at the theoretical level and in the context of topics such as the duties of corporate directors, shareholder voting rights, and competition among states to attract corporate charters. Effective: 2003 Fall Semester.

LAW 215B—Corporate Integrity and Responsibility (2)
Lecture. Equip future business lawyers with the legal knowledge and technical skills to better understand, the U.S, European and Asian (select jurisdictions) regulatory responses to ethical and socially responsible corporate governance practices. Instruction seeks to redefine the aim of corporate governance as a tool to address efficiency, reduce agency costs and improve access to capital, as well as an emerging anti-corruption tool and a means to ensure more ethical corporate behavior. Effective: 2019 Spring Semester.

LAW 215S—Special Session Business Associations (4)
Discussion—4 hours. Provides a broad survey of the legal rules and concepts applicable to business associations, both public and closely. Effective: 2011 Spring Semester.

LAW 216A—Law and Religion (2)
Discussion—2 hours. Restricted to 20 students. Federal constitutional law relating to religion; the interpretation and application of the Free Exercise Clause and the Establishment Clause of the First Amendment. Effective: 2014 Spring Semester.

LAW 217—Telecommunications Law (3) Review all entries
Discussion—3 hours. Economic and administrative regulation of telephony, radio and television broadcasting, and video technologies such as cable and direct broadcast satellites. Emphasis on the recently enacted Telecommunications Reform Act and the role of the Federal Communications Commission, as well as other sources of regulation such as related antitrust law and state public utility regulation. Effective: 2000 Spring Semester.

LAW 217—Telecommunications Law (3) Review all entries Discontinued
Discussion—3 hours. Economic and administrative regulation of telephony, radio and television broadcasting, and video technologies such as cable and direct broadcast satellites. Emphasis on the recently enacted Telecommunications Reform Act and the role of the Federal Communications Commission, as well as other sources of regulation such as related antitrust law and state public utility regulation. Effective: 2018 Fall Semester.

LAW 217—Insurance Law (2) Review all entries

LAW 217A—Comparative Telecommunications Law (2)
Lecture. Explores the key issues facing policy-makers in designing telecommunications regulatory systems (e.g. licensing, universal service, economic regulation, relationship with antitrust law), and the various ways in which different jurisdictions have chosen to address these issues. Effective: 2019 Fall Semester.

LAW 218—Constitutional Law II (4)
Discussion—4 hours. Not open to students who have completed course 218A or 218B. Principally covers the First Amendment and the Equal Protection Clause. Effective: 2011 Fall Semester.

LAW 218A—Constitutional Law II—Equal Protection (2)
Discussion—2 hours. Students who have previously taken course 218, or who plan to take course 218 for 4 units in Spring 2011, may not take this course. Students enrolled in this course will be given priority registration spring semester 2011 to enroll in course 218B. Focuses on the Equal Protection Clause of the Fourteenth Amendment. Effective: 2010 Fall Semester.

LAW 218B—Constitutional Law II — First Amendment (2)
Discussion—2 hours. Students who have previously taken course 218 or who plan to take course 218 for 4 units in Spring 2011 may not take this course. Students not required to take course 218A in order to take this course. Principally covers the free speech clause of the First Amendment. Effective: 2010 Fall Semester.
LAW 218D—Constitutional Theory Seminar (2)
Seminar—2 hours. Provides students with a broad understanding of the shape of modern constitutional theory, and the ability to understand the implications of that theory for concrete historical and modern constitutional disputes. Effective: 2015 Fall Semester.

LAW 218ET—California Constitutional Law (2)
Discussion—2 hours. Reviews, interpretive meta-rules for constitutional construction, structure and institutions of state government, civil liberties under the Declaration of Rights, the impact of race in California society, and criminal law. Effective: 2015 Fall Semester.

LAW 218F—Implicit Bias & the Law: Modern Forms of Discrimination (2)
Seminar. Provides students an opportunity to analyze modern forms of discrimination, learn about cutting edge developments in this area, and explore effective ways to address these issues through the law. Effective: 2019 Fall Semester.

LAW 218T—Selected Topics in Constitutional Law (2)

LAW 218TA—Separation of Powers (2)
Discussion—2 hours. Study of the separation of powers in our federal government by focusing on certain historical events and their impact on constitutional law. Effective: 2012 Spring Semester.

LAW 218TB—Law of War (3)
Discussion—3 hours. Surveys the law of armed conflict as it applies to today's battlefields. Effective: 2013 Fall Semester.

LAW 218TC—Antidiscrimination Law (4)
Discussion—4 hours. Course offers an overview of federal constitutional and statutory antidiscrimination law in the United States. Effective: 2014 Fall Semester.

LAW 219—Evidence (3) Review all entries
Lecture/Discussion. Covers rules regarding the admissibility of proof during civil and criminal cases, including rules governing relevancy, hearsay, the examination and impeachment of witnesses, expert opinion, and constitutional and statutory privileges. Effective: 2018 Spring Semester.

LAW 219—Evidence (4) Review all entries
Lecture/Discussion. Covers rules regarding the admissibility of proof during civil and criminal cases, including rules governing relevancy, hearsay, the examination and impeachment of witnesses, expert opinion, and constitutional and statutory privileges. Effective: 2018 Fall Semester.

LAW 219—Evidence (3) Review all entries
Lecture/Discussion. Covers rules regarding the admissibility of proof during civil and criminal cases, including rules governing relevancy, hearsay, the examination and impeachment of witnesses, expert opinion, and constitutional and statutory privileges. Effective: 2019 Spring Semester.

LAW 219—Evidence (4) Review all entries
Lecture/Discussion. Covers rules regarding the admissibility of proof during civil and criminal cases, including rules governing relevancy, hearsay, the examination and impeachment of witnesses, expert opinion, and constitutional & statutory privileges. Effective: 2019 Fall Semester.

LAW 219A—Advanced Evidence (3)
Discussion—3 hours. Prerequisite(s): LAW 219 Limited to six students; selected by professor. Interested students complete an application form; available in the Law Registrar's Office. Credit is contingent on attending all classes and participating in all exercises. Participation is crucial to the success of the course, as students will be working in teams of three. Do not take this course unless you are willing and able to participate fully and can accept criticism. Public interest lawyers often spend much time in the courtroom. Prosecution, defender, and legal aid offices usually don't have resources to train lawyers in trial work. Seeks to help remedy this deficiency by helping develop witness interrogation skills. (S/U grading only.) Effective: 2010 Fall Semester.

LAW 219B—E-Discovery and Digital Evidence (2)
Lecture. Examines the interplay between the significant e-discovery rules and case law, and the process of
electronic discovery, beginning with the duty to preserve electronically stored information (ESI), to the search, identification, collection, review and production of ESI in litigation. Effective: 2018 Fall Semester.

**LAW 220—Federal Income Taxation (4)**
Discussion—3 hours. Surveys the federal income tax system, with consideration of the nature of income, when and to whom income is taxable, exclusions from the tax base, deductions and credits, and tax consequences of property ownership and disposition. Effective: 2018 Fall Semester.

**LAW 220A—State and Local Taxation (3)**
Discussion—3 hours. Introduction to fundamentals of state and local taxation. Beginning with historical and constitutional aspects, students analyze the recent developments in state and local taxation and their impact on client representation. Effective: 2017 Fall Semester.

**LAW 220B—Tax and Distributive Justice (3)**
Discussion—3 hours. Advanced tax course designed to introduce students to issues of tax policy, with particular emphasis on tax distribution (i.e., who or what should pay taxes in society) and tax incidence (i.e., who or what ends up paying taxes in society). Effective: 2017 Fall Semester.

**LAW 220BT—Law of Banking and Financial Institutions (2)**
Discussion—2 hours. Guides to dual regulatory system, and an understanding of banks and other financial institutions, such as thrifts, credit unions, industrial banks, finance companies, and money transmitters, as well as large versus community banks. Effective: 2011 Spring Semester.

**LAW 220S—Special Session Federal Income Taxation (2)**
Discussion—2 hours. Introduction to the basic principles of federal income taxation using the American federal tax model. Topics include identification of income subject to taxation, gains and losses from property transactions, the timing of income and deductions, and the identity of people subject to tax on particular items of income. Effective: 2005 Summer Special Session.

**LAW 220T—State and Local Taxation (3)**
Discussion—3 hours. Introduction to fundamentals of state and local taxation. Beginning with historical and constitutional aspects, students will analyze recent developments in state and local taxation and their impact on client representation. Effective: 2013 Fall Semester.

**LAW 221—Trusts, Wills and Estates (3) Review all entries**

**LAW 221A—Practical Skills in Will & Trust Drafting and Administration (2)**
Seminar—2 hours. Provides the skills to practice law in the area of estate planning and probate/trust administration. Follow an estate planning client and draft actual estate plan documents. A series of related topics will be explored. Effective: 2019 Fall Semester.

**LAW 221B—Asian Pacific Americans and Law (3)**
Seminar—2 hours. Examines the impact of large corruption scandals on long term social trust, in light of Indian coal block and 2G spectrum allocation scandals. Effective: 2017 Spring Semester.

**LAW 222—Critical Race Theory Seminar (3)**
Discussion—3 hours. Examines race relations and racial discrimination in America through the perspectives of proponents of the Critical Race Theory (CRT) movement, a collection of legal scholars who challenge both conservative and liberal political orthodoxies. Effective: 2013 Spring Semester.

**LAW 222A—Latinos and Latinas and the Law (2)**
Seminar—2 hours. Seminar analyzes some of the legal issues of particular relevance to the Latino community in the United States, including racial identity, immigration, language regulation, national and transnational identity issues, affirmative action, and civil rights. Effective: 2006 Fall Semester.

**LAW 222B—Asian Pacific Americans and Law (3)**

**LAW 222CT—Anti-Corruption Law in India (2)**
Seminar—2 hours. Limited enrollment. Selected topics in the estates and trusts area. Content varies with instructor. Effective: 2017 Spring Semester.

**LAW 223—Estate Planning Seminar (2)**
Seminar—2 hours. Limited enrollment. Selected topics in the estates and trusts area. Content varies with instructor. Effective: 2017 Spring Semester.
LAW 224—Animal Law Seminar (2)
Seminar—2 hours. An introduction to legal principles affecting animals and their use. GE credit: WE. Effective: 2013 Fall Semester.

LAW 225—Marital Property (2)
Discussion—2 hours. Covers the California community property system, including the rights of marital and domestic partners during the ongoing relationship, and upon the end of the relationship by death or divorce. Effective: 2004 Fall Semester.

LAW 226—Disability Rights Law (3)
Discussion—3 hours. Examines disability law and theory. Devoted to the Americans with Disabilities Act (particularly Titles I, II, and III) as it applies to employment, education, public accommodations, and government services and programs. Effective: 2017 Fall Semester.

LAW 226ET—Mental Disability Law (3)
Lecture/Discussion—3 hours. Students will examine the civil and constitutional bases of mental disability law, as well as its history, and explore the role of mental disability in the policing and criminal trial process. Effective: 2017 Spring Semester.

LAW 227A—Criminal Procedure (3)
Discussion—3 hours. Federal constitutional limits on government authority to gather evidence and investigate crime. Topics include Fourth Amendment limits on search, seizure, and arrest; the Fifth Amendment privilege against self-incrimination; and the Sixth Amendment right to counsel. Effective: 2004 Fall Semester.

LAW 227B—Advanced Criminal Procedure (3)
Discussion—3 hours. Examines a range of issues, including bail, charging decisions, preliminary hearings, discovery, statute of limitations, venue, joinder and severance, pleas, plea bargaining, assistance of counsel, trial, double jeopardy, sentencing, appeal and collateral remedies. Effective: 2007 Fall Semester.

LAW 227C—Topics in California Criminal Practice (2)
Seminar. Advanced criminal law and procedure class aimed at students planning to practice criminal law in California, either as an extern or summer clerk, or after graduation. Effective: 2017 Fall Semester.

LAW 228—Startups and Venture Capital (4)
Lecture/Discussion. Prerequisite(s): LAW 215; Prerequisite will not be waived, do not register for the course unless you have completed LAW 215. Limited enrollment. Introduction to the various legal and business considerations involved in forming and operating an emerging growth business. Effective: 2017 Fall Semester.

LAW 228A—Mergers and Acquisitions (3) Review all entries
Discussion—3 hours. Prerequisite(s): LAW 215 Practical approach to mergers and acquisitions, with an in-depth look at the planning, negotiation, documentation and completion of mergers and acquisitions. Effective: 2017 Fall Semester.

LAW 228A—Mergers and Acquisitions (2) Review all entries
Discussion. Prerequisite(s): LAW 215 Practical approach to mergers and acquisitions, with an in-depth look at the planning, negotiation, documentation and completion of mergers and acquisitions. Effective: 2019 Spring Semester.

LAW 228B—Accounting for Lawyers (2)
Discussion—2 hours. Exposes student to basic principles of accounting, from the perspective of the practicing attorney. Effective: 2010 Fall Semester.

LAW 228C—Law and Statistics (3)
Discussion—3 hours. Introduction to fundamentals of statistical analysis and how statistical analysis is used in the law and public policy. Course goal is to help students become excellent consumers of statistical information and evidence. Effective: 2014 Spring Semester.

LAW 229—Scientific Evidence (3)
Discussion—3 hours. Prerequisite(s): LAW 219 Limited enrollment. In addition to examining the evidence law governing the admission of scientific testimony, this course considers trial advocacy in presenting and attacking such testimony. Effective: 2007 Fall Semester.

LAW 230—International Environmental Law (3)
Discussion—3 hours. Prerequisite(s): Prior course work in environmental law and/or international law is helpful. Elective Course for Environmental Law Certificate Program. May satisfy Advanced Writing Requirement with
professor's permission. Provides an overview of the structure and basic principles of international environmental law and policy. Effective: 2012 Fall Semester.

LAW 230A—Wine and the Law (2)
Seminar—2 hours. Surveys the legal landscape of this multi-billion dollar industry, focusing on contemporary debates and developments in judicial, legislative, and administrative arenas. Effective: 2018 Spring Semester.

LAW 230T—Free Trade and the Environment (2)

LAW 231—Sex Based Discrimination (3)
Discussion—3 hours. Issues raised by legal and social distinctions between men and women. Explores potential remedies for discrimination drawn from constitutional law, statutory enactments, and common law developments. Subject matter areas include sex-based discrimination in constitutional law, family law, reproductive rights, educational Effective: 2003 Fall Semester.

LAW 231A—Sexual Orientation, Gender Identity, and the Law (3) Review all entries
Discussion—3 hours. Examines the legal and social regulation of sexual orientation and gender identity. Effective: 2015 Fall Semester.

LAW 231A—Sexual Orientation, Gender Identity, and the Law (2) Review all entries
Discussion—2 hours. Examines the legal and social regulation of sexual orientation and gender identity. Effective: 2018 Fall Semester.

LAW 232—Real Estate Finance (2)
Discussion—2 hours. An examination of the problems involved in the acquisition, financing, and development of real estate, and of lender remedies and debtor protections in the event of debtor default. The course stresses the practical application of California legal doctrines. Effective: 2005 Spring Semester.

LAW 232AT—Real Estate Transactions (2)

LAW 232T—Property Law & Race (2)
Seminar—2 hours. Seminar explores the extent to which property law (common law, federal, state, and local statutes, and administration regulations) historically impacted and currently shapes conceptions of race, racial groups, and racial relations. Effective: 2014 Fall Semester.

LAW 233—Asylum and Refugee Law (2)
Seminar—2 hours. Course surveys U.S. and international law concerning refugees and asylum-seekers. This class will question the meaning of persecution, the definition of “particular social groups” in U.S. law, protections for gender-related violence, statutory bars to asylum, and U.S. refugee policy. Effective: 2017 Spring Semester.

LAW 234—Sexual Orientation and the Law (2) Review all entries Discontinued
Discussion—2 hours. Examines the legal and social regulation of sexual orientation, emphasizing both the legal subordination of lesbians and gay men and the ongoing struggles to end that subordination. Sexual orientation issues in criminal, employment, constitutional, and family law will be covered. Materials will be both doctrinal and theoretical, and will include fiction and oral history as well as cases and statutes. Effective: 2001 Fall Semester.

LAW 234—Drug Law and Policy (2) Review all entries
Seminar. Engage with the wide variety of policy and legal issues presented in the area of drug law and policy with a particular focus on one of the fastest-evolving fields in drug policy: marijuana law and policy. Effective: 2018 Fall Semester.

LAW 235—Administrative Law (3)
Discussion—3 hours. Examines how the U.S. Constitution and the federal Administrative Procedure Act constrain and regulate decision making by government agencies and officials. Effective: 2007 Fall Semester.

LAW 235B—Counseling and Legal Strategy in the Digital Age (2)
Lecture. Explores the complex challenges that entrepreneurs, businesses, and other organizations face when trying to address legal issues relating to technology. The seminar's approach is both practical and multidisciplinary, and it encourages students to explore the roles of a wide range of stakeholders (including lawyers, policy advocates and
policymakers, businesspersons, and technologists) in developing legal and business strategies. Effective: 2017 Fall Semester.

**LAW 236—Securities Regulations (3)**

**LAW 236A—Securities Regulation I (2)**
Discussion—2 hours. Prerequisite(s): LAW 215; or Consent of Instructor. Legal rules and concepts applicable to business associations, both public and closely held. Corporate form of organization, partnerships and other associational forms. Effective: 2016 Fall Semester.

**LAW 236B—Securities Regulation II (2)**
Discussion—2 hours. Prerequisite(s): LAW 215; or Consent of Instructor. LAW 236A recommended. Securities Exchange Act of 1934 and the regulation of securities markets. Topics covered include regulation of securities markets and securities professionals, responsibilities of securities lawyers, continuous reporting, transnational securities fraud, and enforcement of the securities acts. Effective: 2002 Fall Semester.

**LAW 236C—Securities Enforcement (3)**
Lecture. Examines the civil and criminal enforcement of the securities laws by both the Securities and Exchange Commission and Justice Department. Surveys the administrative rules and investigative procedures that govern the SEC and the substantive related crimes. Effective: 2018 Fall Semester.

**LAW 236CT—Securities Enforcement (3)**
Review all entries
Lecture—3 hours. Examines civil and criminal enforcement of securities laws by both the Securities and Exchange Commission and Justice Department. Surveys administrative rules and investigative procedures that govern the SEC and the substantive related crimes. Effective: 2017 Spring Semester.

**LAW 236CT—Securities Enforcement (3)**
Review all entries Discontinued
Lecture—3 hours. Examines civil and criminal enforcement of securities laws by both the Securities and Exchange Commission and Justice Department. Surveys administrative rules and investigative procedures that govern the SEC and the substantive related crimes. Effective: 2018 Fall Semester.

**LAW 237—Legal History (2)**
Discussion—2 hours. Course traces the development of the common law from its origins in medieval England through the twentieth-century. Effective: 2014 Fall Semester.

**LAW 237B—Special Topics in Legal Theory: Ancient Athenian Law (2)**
Seminar—2 hours. Athenian legal system was different from our own and was far less formal. How did it work? Why did it work? Why have political and legal theorists misunderstood Athens for so long and what can we learn from that failure? Effective: 2016 Spring Semester.

**LAW 239—Mediation (3)**
Review all entries
Discussion/Laboratory—3 hours. Restricted to 24 students. Interactive course focuses on attorney representation of clients in mediation. Effective: 2016 Fall Semester.

**LAW 239—Mediation (2)**
Review all entries
Discussion/Laboratory—2 hours. Restricted to 24 students. Interactive course focuses on attorney representation of clients in mediation. Effective: 2018 Fall Semester.

**LAW 240—Reforming Campaign Finance Law and the Initiative Process (2)**
Discussion—2 hours. Limited to 25 students. The recent election exposed many campaign finance and initiative issues. Focuses on reforms as well as the current law. Effective: 2017 Spring Semester.

**LAW 240A—Law of the Political Process (3)**
Discussion—3 hours. Covers many of the foundational issues in the "law of democracy," as that body of statutory and constitutional law has developed in the United States. Effective: 2005 Fall Semester.

**LAW 241—Voting Rights Seminar (2)**
Seminar—2 hours. Seminar investigates the right to vote as a matter of constitutional and statutory law, with emphasis on the voting rights of racial and ethnic minorities. Effective: 2017 Spring Semester.

**LAW 242—Conflict of Laws (2)**
Discussion—3 hours. Study of how law operates across state and national borders. Topics include choice of...

LAW 242S—Special Session Conflict of Laws (2)
Discussion—2 hours. Study of transactions with multi-state and international contracts. Topics include jurisdiction, recognition of foreign judgments, and choice of applicable law. Addresses problems that international lawyers encounter in a wide variety of deals with the emphasis on international commercial deals. Effective: 2005 Summer Special Session.

LAW 243—Commercial and Bankruptcy Law (4)
Discussion—4 hours. Remedies available to creditors to force payment, along with devices that creditors may use to give themselves priority against limited assets. Bankruptcy both as a means for providing funds for creditors and as a device for maximizing asset value. Effective: 2002 Fall Semester.

LAW 243A—Secured Transactions (2)
Discussion—2 hours. Covers secured transactions (where a lender takes an interest in the debtor's property as "collateral," or security, for repayment of a loan) in personal property, such as auto loans and bank loans against business inventory. Effective: 2017 Fall Semester.

LAW 243B—Bankruptcy (3)
Seminar. Introduction to essentials of U.S. law governing bankruptcy of consumers and businesses. The course will address bankruptcy under Chapter 7, Chapter 13, and Chapter 11. Effective: 2017 Fall Semester.

LAW 243C—Advanced Bankruptcy Practice: Corporate Reorganization (2)

LAW 243CT—Advanced Bankruptcy Practice (2) Review all entries
Discussion—2 hours. Course will cover corporate chapter 11 and its alternatives and analyze different professionals’ roles. Selection of venue and formation of strategic objectives will also be discussed. Effective: 2016 Fall Semester.

LAW 243CT—Advanced Bankruptcy Practice (2) Review all entries Discontinued
Discussion—2 hours. Course will cover corporate chapter 11 and its alternatives and analyze different professionals’ roles. Selection of venue and formation of strategic objectives will also be discussed. Effective: 2018 Fall Semester.

LAW 245—Corporate and White Collar Crime (2)
Discussion—2 hours. Covers the law of conspiracy, corporate criminal liability, mail and wire fraud, the Hobbs Act, RICO, money laundering, obstruction of justice, and other white collar crimes and their associated defenses. Effective: 2017 Fall Semester.

LAW 245A—Corporate Responsibility: Case Studies in (Un)Ethical Leadership (2)
Lecture. Prerequisite(s): LAW 215 (can be concurrent) Explores corporate responsibility and leadership through case studies of contemporary scandals. Reviews business forms and the consequences of an institution failing to comply with legal & ethical duties to employees, shareholders, and the public. Effective: 2019 Fall Semester.

LAW 245B—Death Penalty Seminar (2)

LAW 246—Federal Jurisdiction (3)
Discussion—3 hours. Prerequisite(s): LAW 205 Study of subject-matter jurisdiction of federal courts. Effective: 2006 Fall Semester.

LAW 246A—California Civil Procedure: A Practical Approach (2)
Lecture. Prerequisite(s): LAW 203 Provides a practical, hands-on approach to California Civil Procedure through case studies, drafting of common litigation documents, and studying the application of the Code of Civil Procedure to practical case scenarios. Issues of general civil litigation emphasizing bar exam topics are included. Effective: 2019 Fall Semester.

LAW 247—Taxation of Partnerships and LLCs (3)
Lecture/Discussion—3 hours. Prerequisite(s): LAW 220 Study of the federal income tax treatment of partnerships and partners; including entities classified as partnerships. Effective: 2017 Spring Semester.

LAW 247A—International Aspects of U. S. Taxation (3)
Discussion—3 hours. Prerequisite(s): LAW 220 (can be concurrent); Completion or current enrollment in a course
covering the domestic taxation of corporations is suggested but not required; Corporate Tax can be concurrent. Examine the U.S. income tax laws and policies related to the taxation of foreign income of U.S. persons and U.S. income of foreign persons. Effective: 2008 Fall Semester.

**LAW 247B—Corporate Tax (2)** *Review all entries*
Discussion/Laboratory—2 hours. Examination of the federal income tax relationship between corporations and their owners. Covers the transfer of funds into a corporation on formation and the re-transfer of money and property from the corporation to its shareholders. Effective: 2016 Spring Semester.

**LAW 247B—Corporate Tax (3)** *Review all entries*
Discussion/Laboratory. Examination of the federal income tax relationship between corporations and their owners. Covers the transfer of funds into a corporation on formation and the re-transfer of money and property from the corporation to its shareholders. Effective: 2018 Fall Semester.

**LAW 248—Public International Law (3)**
Discussion—3 hours. Introductory course covers basic international law concepts and the law-making process. Effective: 2007 Fall Semester.

**LAW 248A—Jurisdiction in Cyberspace Seminar (2)**
Seminar—2 hours. Limited enrollment. Review concepts in international law, conflicts of law, cyberlaw, and federal jurisdiction to address the growing multi-jurisdictional conflicts created by the Internet. Examine European efforts at crafting intra-Europe jurisdictional rules, as well as other international jurisdiction treaty projects such as Effective: 2005 Fall Semester.

**LAW 248B—International Human Rights (2)**
Discussion—2 hours. Introduces international human rights legal system through an examination of its historical origins and precursors and a review of its international legal backdrop, including the character and sources of international law, the UN Charter and the UN system. Effective: 2013 Spring Semester.

**LAW 248C—Business and Human Rights (2)**
Seminar—2 hours. Explores the human rights responsibilities of businesses from legal, ethical, historical, and comparative perspectives. Equip students with the tools to be sensitive to human rights considerations as legal practitioners or in other fields of endeavor. Effective: 2018 Spring Semester.

**LAW 248CA—United Nations Human Rights Practicum I (2-3)**
Variable. Prerequisite(s): Consent of Instructor. Opportunity to work in support of the mandate of the United Nations Special Rapporteur in the field of cultural rights. Effective: 2017 Fall Semester.

**LAW 248CB—United Nations Human Rights Practicum II (2-3)**
Variable. Prerequisite(s): Consent of Instructor. Build on the knowledge of the workings of the United Nations human rights system they gained in Practicum I, and gain further advanced experience working with UN documents, with individual cases in the field and with thematic reports. Effective: 2017 Fall Semester.

**LAW 248D—Globalization and the Law (3)**

**LAW 248ET—Transitional Justice and Memory Politics in the Asia-Pacific (2)**
Seminar—2 hours. Transitional justice (legal responses to wrongdoings of repressive predecessor regimes) can help resolve “memory politics” that plague the relations and societies of many Asia-Pacific states. Together we will examine relevant roles of governments, novel institutions, the judiciary, and civil society. Effective: 2010 Fall Semester.

**LAW 248G—Legal Spanish for U.S. Lawyers (2)**
Seminar—2 hours. Prerequisite(s): Must satisfy one of the following: undergraduate degree in Spanish; a minor in Spanish with experience living in a Spanish-speaking country; grew up in a Spanish-speaking household and achieved proficiency; able to pass an informal assessment by the instructor. Designed for law students who are native Spanish-speakers or who have achieved proficiency in Spanish through study or experiences in a Spanish-speaking country. (S/U grading only) Effective: 2010 Fall Semester.

**LAW 248T—Advanced International Law (2)**
Discussion—2 hours. Review books of international law; Hugo Grotius and Judge Rosalyn Higgins. Themes include
peaceful resolutions of dispute, law of war and peace, and international legal process. Effective: 2015 Spring Semester.

**LAW 248TA—Human Rights in Post Soviet Central Asia: Legal Tools For Repression and Redress (2)**

**LAW 248TC—International Economics Law (3)**
Discussion—3 hours. Examine the architecture of the international economic system, with a focus on both trade and investment. Effective: 2010 Fall Semester.

**LAW 248TT—Theories of International Law (2)**
Discussion—2 hours. International law, once critiqued as powerless and ineffective, is now challenged as a threat to American democracy. Introduction to competing theories of international law, including natural law, positivism, realism, liberalism, constructivism, fairness, legal process, and world public order. Effective: 2010 Spring Semester.

**LAW 249—Comparative Law (3)**
Discussion—3 hours. The uses of comparative method, principal differences between common law and civil law and the styles of legal reasoning that prevail in these two great legal cultures. Topics include the evolution of the civil law, the phenomenon of codification, the structure of European civil codes and the interpretation of their provisions, the respective roles of counsel, judges and law teachers, civil law procedure, and the analysis of selected areas of substantive law. Knowledge of a foreign language is not required. Effective: 2002 Fall Semester.

**LAW 249S—Special Session Comparative Law (1)**
Discussion—1 hour. This course will provide a comparative perspective for students of American law. After an initial look at the uses of the comparative method, discussions will be centered around the main differences between common law and civil law and the different styles of legal thinking. Topics to be covered will be the evolution of the civil law and the idea of codification, the structure of European civil codes and the interpretation of their provisions, the personnel of the law and procedure in civil law countries, and the analysis of selected problems of substantive law. Knowledge of a foreign language will not be required. Effective: 2005 Summer Special Session.

**LAW 250—Jurisprudence Seminar (3)**
Seminar—3 hours. Limited enrollment. Deals principally with the question of how judges should decide "hard cases," where the content of the law is in doubt and competent arguments have or could be offered for mutually inconsistent decisions in favor of either party. Effective: 2015 Spring Semester.

**LAW 250A—Aoki Legal Scholarship Seminar (3)**

**LAW 250B—Writing Requirement Workshop (2)**
Seminar—2 hours. Second- and third-year students produce a piece of academic writing that satisfies the King Hall writing requirement and is of publishable quality. Receive feedback both from the instructor and from one another in a workshop setting. (S/U grading only.) Effective: 2017 Fall Semester.

**LAW 250T—Asian American Jurisprudence (3)**
Discussion—3 hours. Legal, social, and political discourse on race relations has traditionally been framed in Black-White terms. This course disrupts the traditional view by taking Asian Americans seriously. Effective: 2007 Fall Semester.

**LAW 251—Labor Law (2)**
Discussion—2 hours. Survey of the legislative, administrative, and judicial regulation of labor relations under federal law. Historical development of labor law, the scope of national legislation, unions, strikes, picketing, and collective bargaining agreements. Effective: 2017 Spring Semester.

**LAW 251T—Labor Law I (2)**
Discussion—2 hours. Restricted to students who previously took Labor Law in Fall 2008 may not enroll in Labor Law I. Survey of the legislative, administrative, and judicial regulation of labor relations under federal law. Effective: 2009 Fall Semester.

**LAW 251TB—Labor Law II (2)**
Discussion—2 hours. Prerequisite(s): LAW 251T preferred; not required. Survey of the legislative, administrative, and judicial regulation of labor relations under federal law. Effective: 2010 Spring Semester.
LAW 252—International Litigation and Arbitration (3)
Discussion—3 hours. Current developments in international law, conflict of laws, civil procedure, arbitration, and comparative law in the context of transactions and disputes that cut across national boundaries. Effective: 2004 Fall Semester.

LAW 253—Policy Advocacy (2)
Lecture. In-depth examination of the legislative process both within the California Legislature and from the advocates’ perspective. Train in key policy advocacy skills by legislative leaders and social justice advocates. Effective: 2018 Spring Semester.

LAW 253A—Community Lawyering (3)
Lecture. Study the need for community lawyering including the structural inequalities and privileges embedded in the legal system and society. Skills necessary for community lawyering as well as sites and models for practice will be examined. Effective: 2017 Fall Semester.

LAW 254—Housing Law (2)
Discussion—2 hours. Survey course covers legal and policy issues related to developing, protecting and preserving affordable, safe and accessible housing and sustaining viable, diverse communities. Effective: 2009 Fall Semester.

LAW 254A—White Working Class and the Law (2) Review all entries
Seminar—2 hours. Considers the social, cultural, economic, and legal situation of low-income and/or low-education whites in contemporary U.S. society. Effective: 2017 Fall Semester.

LAW 254A—White Working Class and the Law (2) Review all entries
Seminar—2 hours. Considers the social, cultural, economic, and legal situation of low-income and/or low-education whites in contemporary U.S. society. Effective: 2018 Fall Semester.

LAW 254B—Access to Justice (2)
Seminar. Study of a variety of barriers that impede the access of unrepresented litigants to the courts—including poverty, racial bias, limited English proficiency and the digital divide—and critically examine existing solutions. Opportunity to develop and propose student’s own solution to an access barrier. Effective: 2018 Fall Semester.

LAW 254T—Practicum in Rural Community Advocacy (3)
Seminar—3 hours. Limited enrollment. Provides an opportunity to learn about Participatory Action Research (PAR) methods and community-based lawyering in the context of rural community development and advocacy. Using these skills and knowledge to serve rural California communities. Effective: 2013 Spring Semester.

LAW 255—Pension and Employee Benefits Law (3) Review all entries
Discussion—3 hours. Prerequisite(s): LAW 220 Federal regulation and taxation of private pensions and employee benefits. This course will cover the Employee Retirement Income Security Act (ERISA) and Internal Revenue Code issues. Effective: 2017 Spring Semester.

LAW 255—Pension and Employee Benefits Law (3) Review all entries

LAW 256—Land Use (2)
Discussion—2 hours. Local agencies, developers, environmental interest groups, and others who regularly deal with the administrative and legislative applications of land use planning and development laws. Topics include zoning, general plans, local government land use regulation, and related areas of litigation. The expanding role of the California Environmental Quality Act. Effective: 2004 Spring Semester.

LAW 257—Legislative Process (2)
Discussion—2 hours. Fundamental elements of the legislative process, including legislative procedure; the legislature as an institution; lobbying; statutory interpretation, legislative-executive relations; and the legislature's constitutional powers and limitations. Effective: 2002 Spring Semester.

LAW 257A—Legislative Intent Seminar (2)
Seminar—2 hours. Theories and principles of statutory and constitutional interpretation. Original intent vs. living constitution; permissible kinds of evidence for determining legislative intent; canons of construction; extent to which initiatives should be interpreted similarly to legislative enactments. Effective: 2003 Fall Semester.
LAW 257B—Statutory Interpretation (3)

LAW 258—Professional Responsibility (3) Review all entries
Discussion—3 hours. Students who take LAW 258A are not eligible to enroll in this course. The ABA's Model Rules of Professional Conduct and the Code of Judicial Conduct, which are tested on the MPRE, and the California Rules of Professional Conduct, which are tested on the California Bar Examination. Effective: 2017 Fall Semester.

LAW 258—Professional Responsibility (2) Review all entries
Discussion. Closed to students who have taken LAW 258A. The ABA's Model Rules of Professional Conduct and the Code of Judicial Conduct, which are tested on the MPRE, and the California Rules of Professional Conduct, which are tested on the California Bar Examination. Effective: 2019 Fall Semester.

LAW 258A—Legal Ethics and Corporate Practice (3)
Lecture/Discussion—3 hours. Students who take LAW 258 are not eligible to enroll in this course. Focus on corporate practice to explore the ethical responsibilities of lawyers. Effective: 2017 Spring Semester.

LAW 258B—Professional Responsibility (2) Review all entries Discontinued

LAW 258B—Mindfulness and the Law (2) Review all entries

LAW 258BT—Mindfulness and Professional Identity (2) Review all entries
Seminar—2 hours. Introduction to the practice of meditation and connect it with readings about the legal profession in three key areas. Effective: 2016 Fall Semester.

LAW 258BT—Mindfulness and Professional Identity (2) Review all entries Discontinued
Seminar—2 hours. Introduction to the practice of meditation and connect it with readings about the legal profession in three key areas. Effective: 2018 Fall Semester.

LAW 258CT—The Business of Lawyering (2)
Discussion—2 hours. Desired outcome is a thorough understanding of the business side of law practice and to promote an understanding of the relationship and balance between legal skills, business requirements of a practice, client needs and a work-life balance. Effective: 2015 Fall Semester.

LAW 258DT—Setting Up and Maintaining Solo Law Practice (1)

LAW 258E—Utility of Law School and Careers in the Law (1)
Lecture. Despite improvements in the economy, some observers continue to question whether law school is a viable option for college graduates. Considers the controversy and expose students to the variety of careers in the legal profession. (S/U grading only.) Effective: 2017 Fall Semester.

LAW 258F—Practice Ready Seminar (2)
Seminar. Includes a discussion and review of the role of the junior attorney within a law firm/legal department, professional goal-setting, strategies for effective communication and work within teams, delegation and resource management, organization and time management, an introduction to common junior-level assignments and how to complete them efficiently and effectively, building a professional network, and an introduction to business development, among other topics. (S/U grading only.) Effective: 2017 Fall Semester.

LAW 259—Feminist Legal Theory (3) Review all entries
Discussion—3 hours. Provides an overview of feminist legal theory and considers how its various strands inform legislative and judicial law making. Satisfies Advanced Writing Requirement. Effective: 2016 Fall Semester.

LAW 259—Feminist Legal Theory (2) Review all entries
Discussion—2 hours. Provides an overview of feminist legal theory and considers how its various strands inform legislative and judicial law making. Satisfies Advanced Writing Requirement. Effective: 2019 Spring Semester.
LAW 259A—Women, Islam and the Law (2)
Seminar—2 hours. This course will study legal and religious reform movements for women's rights within Muslim communities in the context of current scholarly and political debates about fundamentalism, democracy, equality, secularism, universalism, and multiculturalism. This is a limited enrollment seminar. Effective: 2007 Fall Semester.

LAW 259B—Women's Human Rights (2)
Seminar—2 hours. Overview of international legal and institutional system for the protection of women’s human rights from an academic perspective and the view of the practitioner. Includes the (CEDAW), violence against women, sexual and reproductive rights, economic rights, and more. Effective: 2016 Spring Semester.

LAW 259P—Women and the Law Practicum (1)
Discussion/Laboratory. Prerequisite(s): LAW 259 (can be concurrent) Complements the content of the feminist legal theory course by providing students the opportunity to consider how feminist theory may be used to inform law-making. Effective: 2007 Fall Semester.

LAW 260—Employment Discrimination (3)
Discussion—3 hours. Examine federal laws prohibiting employment discrimination, including Title VII of the Civil Rights Act of 1964, the Equal Pay Act, the Age Discrimination in Employment Act, the Americans with Disabilities Act, the Rehabilitation Act of 1973, and § 1981. Effective: 2008 Fall Semester.

LAW 260A—Employment Law (3)
Discussion—3 hours. Provides an overview of employment law, labor law and employment discrimination law and aims to serve as a foundation for understanding the law and policy (statutory and common law) that surround the employer-employee relationship. Effective: 2009 Fall Semester.

LAW 261—Judicial Process (2)
Discussion—2 hours. Examines a variety of issues concerning the judicial process. Focus is on judge's role in the legal process, the administration of justice, ethical issues, decision making, bias, and critical examination of the strengths and weaknesses in our current judicial system. Effective: 2008 Fall Semester.

LAW 262—Antitrust (3)
Discussion—3 hours. Focus on the federal antitrust laws, concentrating on basic substantive areas of the Sherman and Clayton Acts. Effective: 2009 Fall Semester.

LAW 262AT—US Antitrust Law and Indian Competition Law: A Comparative Perspective (2)
Lecture/Discussion—2 hours. Fundamental principles of Indian Competition Law and US Antitrust Law in a comparative perspective. The course will help American students, interested in future corporate law careers, to develop effective strategies for better managing cross border deals in India. Effective: 2016 Spring Semester.

LAW 262B—Regulated Industries (2)
Seminar. Examines regulation of business in sectors, traditionally described as “common carrier” and “utility” industries, where because of market failures normal competitive mechanism will not protect consumers from exercises of market power. Effective: 2017 Fall Semester.

LAW 262C—Antitrust and Intellectual Property (1)
Lecture. Explores the challenges antitrust law faces in protecting the innovation incentives of dynamic technology-led market competition, motivating and incentivizing companies to innovate and allowing them to retain the profits of such market growth. Effective: 2019 Spring Semester.

LAW 262S—Special Session Antitrust (1)
Discussion. A study of the federal antitrust laws including price fixing, limits on distribution, tying arrangements, monopolization and mergers. Effective: 2005 Summer Special Session.

LAW 263—Criminal Trial Skills (4) Review all entries

LAW 263—Criminal Trials: Theory and Practice (4) Review all entries

LAW 263A—Trial Practice (3)
Discussion—2 hours; Laboratory—1 hour. Prerequisite(s): LAW 219 (can be concurrent) Limited enrollment. Introduction to the preparation and trial of cases, featuring lectures, videotapes, demonstrations, assigned readings
and forensic drills. Laboratory held on Tuesday, Wednesday, and Thursday evening. (S/U grading only.) Effective: 2016 Fall Semester.

**LAW 263B—Advanced Trial Practice (2)**
Discussion—2 hours. Prerequisite(s): LAW 219; LAW 263A Class limited to 40 students. Trains students on the organization and presentation of a complex trial, including pretrial preparation, jury selection, strategy considerations, evidentiary issues, and effective handling of plaintiff and defense cases through verdict. (S/U grading only.) Effective: 2016 Fall Semester.

**LAW 264—Water Law (3)**
Discussion—3 hours. Property rights in surface waters, including riparian rights, prior appropriation, and public rights use of water bodies; environmental constraints on exercise of water rights; groundwater rights and management; federal allocation and control of water resources; legal aspects of interstate allocation. Effective: 2016 Spring Semester.

**LAW 264A—Ocean and Coastal Law (3)**
Discussion—3 hours. Introduction to the goals and challenges of coastal and ocean policy; the complicated web of public and private interests in coastal lands and ocean waters; regulation of coastal development; domestic and international fisheries management; and preservation of ocean resources. Effective: 2016 Spring Semester.

**LAW 265—Natural Resources Law Seminar (2)**
Seminar—2 hours. Prerequisite(s): LAW 285 or LAW 256 recommended, but not required. Restricted to 15 students. In-depth coverage of two foundational principles of natural resources law: public trust doctrine and private property rights protected under the Takings Clause of the U.S. and many state constitutions. Effective: 2011 Spring Semester.

**LAW 266—Commercial Law (2)** *Review all entries Discontinued*
Discussion; Discussion—2 hours. This course will concentrate primarily on the law of sales. A functional approach will be adopted towards the Uniform Commercial Code and Article 2 on sales. Discussion will include, among other topics, the nature of a sales "bargain," the allocation of the risk between the parties, the legal significance of sales warranties and disclaimers, performance, nonperformance and breach. The purpose throughout will be to explore the UCC, evaluate different ways in which courts construe it and the legal significance of those differences. This functional purpose will be applied to topical issues in commercial law, not limited to sales. Effective: 2004 Fall Semester.

**LAW 266—Commercial Law (3)** *Review all entries*
Discussion. Prerequisite(s): LAW 202 Survey of commercial transactions law under the Uniform Commercial Code (UCC). Covers a number of topics under Articles 2, 3, & 9 of the UCC. Topics include attachment and perfection of security interests in personal property and general principles of negotiability. Primary goals are to provide a foundational knowledge and understanding of several articles of the UCC and improve problem-solving skills in this area. Effective: 2019 Fall Semester.

**LAW 266A—Cyberlaw (3)**

**LAW 267—Civil Rights Law (2)**
Discussion—2 hours. Civil remedies for civil rights violations under the primary United States civil rights statute. Specifically, covers actions for constitutional and statutory violations under 42 USC §1983, affirmative defenses, and abstention doctrines. Effective: 2017 Fall Semester.

**LAW 267B—Civil Rights Seminar (2)**
Seminar—2 hours. Limited enrollment. The social, political, legal and historical factors which led to the creation of the United States Commission on Civil Rights (USCCR) in 1957. The United States Commission on Civil Rights is a bipartisan, independent agency established by the Civil Rights Act. It is directed to investigate complaints alleging deprivations of the right to vote, and voter fraud; to study and collect information relating to discrimination and the denial of equal protection of the laws under the Constitution on the basis of race, color, religion, sex, age, disability, or national origin; and submit reports, findings and recommendations to the President and to Congress. The role that the USCCR has played and continues to play in American politics, legislative enactments and the national dialogue on equality, fairness and justice in the context of civil and human rights. Satisfies Advanced Legal Writing Requirement. Effective: 2002 Spring Semester.

**LAW 268T—Suing the Government: Civil Rights, Torts, Takings, and More (2)**
Discussion—2 hours. Explores the basic requirements of suing government, including sovereign immunity,
particular schemes for litigating against government (Federal Tort Claims Act, APA, False Claims Act, etc.), direct constitutional claims and the procedural pitfalls and remedies available against government. Effective: 2016 Spring Semester.

LAW 269—Basic Finance for Lawyers (3) [Review all entries]
Discussion—3 hours. Prerequisite(s): Students with a non-law basic finance course will not be admitted, except with consent of instructor. Basic techniques of analysis that are part of the core curriculum in a good business school. Gives background necessary for understanding and advising your clients and for understanding other business-related law school courses. Effective: 2017 Spring Semester.

LAW 269—Basic Finance for Lawyers (2) [Review all entries]
Discussion. Prerequisite(s): Students with a non-law basic finance course will not be admitted, except with consent of instructor. Basic techniques of analysis that are part of the core curriculum in a good business school. Gives background necessary for understanding and advising your clients and for understanding other business-related law school courses. Effective: 2019 Fall Semester.

LAW 269AT—The Financial Crisis: Law & Policy and Inequality (2)
Seminar—2 hours. Examines the regulation of financial intermediaries. The stated goal of regulation is to ensure systemic stability and to pursue consumer protection. We will ask whether there is an imbalance between systematic stability and consumer protection before the crisis of 2008. Effective: 2013 Spring Semester.

LAW 269B—Financial Regulation and Consumer Protection (3) [Review all entries]
Lecture. Examines efforts to ensure a “fair” financial marketplace, focusing on the 2010 Dodd-Frank Act and its creation of the Consumer Financial Protection Bureau and regimes enacted to protect consumers. Effective: 2017 Fall Semester.

LAW 269B—Consumer Protection and Financial Regulation (3) [Review all entries]
Lecture. Examines efforts to ensure a “fair” financial marketplace, focusing on the 2010 Dodd-Frank Act and its creation of the Consumer Financial Protection Bureau and regimes enacted to protect consumers. Effective: 2018 Fall Semester.

LAW 269C—Corporate Finance (3)
Discussion—3 hours. Prerequisite(s): LAW 215 or concurrent enrollment recommended. Focus on how corporations raise money, stocks and bonds, etc.; how deals are structured and why corporations use one strategy instead of another. Effective: 2010 Fall Semester.

LAW 269D—Seminar on Financial Regulation (2)
Seminar—2 hours. Introduction to the legal and regulatory issues presented by contemporary capital markets. Effective: 2011 Fall Semester.

LAW 269E—Public Finance (3)
Seminar. Introduction to the basic concepts of public finance, the underlying law governing public finance: in particular state law, federal tax law and federal securities law. Effective: 2017 Fall Semester.

LAW 270—International Business Transactions (2) [Review all entries]
Lecture/Discussion—2 hours. Select legal problems arising from international business transactions. Effective: 2017 Fall Semester.

LAW 270—International Business Transactions (3) [Review all entries]

LAW 270A—Life-Cycle Transactions and Drafting (3) [Review all entries]
Discussion—3 hours. Prerequisite(s): Business Associations and/or Trusts, Wills & Estates are recommended for enhanced comprehension. Class focuses on analysis of contract drafting design for various types of transactions and actual transactional documents typically encountered. Effective: 2016 Spring Semester.

LAW 270A—Life-Cycle Transactions and Drafting (2) [Review all entries]
Discussion. Prerequisite(s): Business Associations and/or Trusts, Wills & Estates are recommended for enhanced comprehension. Class focuses on analysis of contract drafting design for various types of transactions and actual transactional documents typically encountered. Effective: 2019 Spring Semester.

LAW 270B—Technology Transactions (2)
Lecture. Practical overview of technology transactions, including licensing. In addition to substantive lectures,
instruction via hypotheticals and scenarios to illustrate key issues in these transactions, drafting exercises, negotiation exercises, and group presentation exercises. Effective: 2019 Spring Semester.

LAW 270S—Special Session International Business Transactions (2)
Discussion—2 hours. A consideration of select legal problems arising from international business transactions. Topics include the international sales contract, letters of credit, transfers of technology, regulation of bribery, repatriation of profits, and national efforts to control imports. Effective: 2005 Summer Special Session.

LAW 271—Nonprofit Organizations and Drafting (4)
Extensive Writing/Discussion—4 hours. Prerequisite(s): LAW 215; or Consent of Instructor. Restricted to 13 students. Learn special legal rules and concepts applicable to non-profit organizations; particularly IRC 501(c)(3) nonprofits. Combination skills class and a lecture course. Effective: 2010 Fall Semester.

LAW 271A—NonProfit Organizations: State and Local Governance Issues (2)
Discussion—2 hours. Prerequisite(s): LAW 215 (can be concurrent); or Consent of Instructor. Focuses on the state and local laws applicable to nonprofit organizations; i.e., public interest, cultural, religious, educational and other not-for-profit entities. Effective: 2009 Fall Semester.

LAW 271B—Nonprofit Organizations: Tax Exemptions & Taxation Focus (2)
Discussion—2 hours. Prerequisite(s): LAW 215; or Consent of Instructor. LAW 220 recommended. Focuses on the conceptual basis and substantive law criteria for the federal and state income tax exemption of nonprofit organizations. Effective: 2009 Spring Semester.

LAW 271T—Nonprofit Organizations-Key Legal Topics (2)
Discussion—2 hours. Legal issues raised in operating and governing a nonprofit organization, primarily a public charity. Effective: 2014 Spring Semester.

LAW 272—Family Law (3)
Discussion—3 hours. An introduction to the legal regulation of the family. Effective: 2008 Fall Semester.

LAW 272—Family Law (2)
Review all entries

LAW 272—Family Law (3)
Review all entries

LAW 273A—Education Policy and the Law (3)
Discussion—3 hours. Topics include civil rights, inequality and the "right" to an education, bilingual education, school finance litigation, educational access, No Child Left Behind Act, Common Core Standards and charter schools. For students interested in educational policy and social regulatory policy. Effective: 2016 Fall Semester.

LAW 273B—Special Education Law & Policy (2)
Lecture. Introduction to the law of special education including the Individuals with Disabilities in Education Act (IDEA), Section 504 of the Rehabilitation Act, and federal regulations governing special education law. Effective: 2019 Fall Semester.

LAW 273BT—Special Education Law and Policy (2) Review all entries
Lecture. Introduction to the law of special education including the Individuals with Disabilities in Education Act (IDEA), Section 504 of the Rehabilitation Act, and federal regulations governing special education law. Effective: 2017 Fall Semester.

LAW 273BT—Special Education Law & Policy (2) Review all entries Discontinued
Lecture. Introduction to the law of special education including the Individuals with Disabilities in Education Act (IDEA), Section 504 of the Rehabilitation Act, and federal regulations governing special education law. Effective: 2019 Fall Semester.

LAW 274—Intellectual Property (3)
Discussion—3 hours. Provides a broad survey of intellectual property law. Effective: 2007 Fall Semester.

LAW 274A—International Intellectual Property and Development (3) Review all entries
Discussion—3 hours. Examines international trade law, national customs law, intermediary liability rules, claims for rights in traditional knowledge and genetic resources, protections for geographical indications, technology transfer, and intellectual property piracy. Effective: 2017 Fall Semester.

LAW 274A—International Intellectual Property and Development (2) Review all entries
Discussion. Examines international trade law, national customs law, intermediary liability rules, claims for rights in
traditional knowledge and genetic resources, protections for geographical indications, technology transfer, and intellectual property piracy. Effective: 2018 Fall Semester.

LAW 274AS—Special Session Intellectual Property (2)
Discussion—2 hours. This course provides a broad survey of the field of intellectual property. Areas covered will include trademarks, patents, trade secrets, idea protection, unfair competition, and copyright. Effective: 2005 Summer Special Session.

LAW 274B—Intellectual Property Rights in Culture (3) Review all entries Discontinued
Discussion—3 hours. Examines effects of a burgeoning intellectual property regime on cultural conflict and formation. Effective: 2002 Fall Semester.

LAW 274B—Trade Secrets (3) Review all entries

LAW 274B—Trade Secrets (2) Review all entries

LAW 274BT—Law of Trade Secrets and Restrictive Covenants (2) Review all entries
Discussion—2 hours. Focus is on the law of trade secrets, including the Uniform Trade Secret Act (UTSA), restrictive covenants not to compete, and current case law developments in the areas of employee mobility and raids, and corporate espionage. Effective: 2013 Fall Semester.

(S/U grading only.) Effective: 2017 Spring Semester.

LAW 417A—Law Review Editor (1-2)
Variable—1-2 hours. Prerequisite(s): Consent of Instructor. Editors must have completed an editorship article and must perform editorial duties (a substantial time commitment). Credit is awarded only after completion of both semesters. (S/U grading only.) Effective: 2015 Fall Semester.

LAW 417B—Law Review Editor (1-2)
Variable—1-2 hours. Prerequisite(s): Consent of Instructor. Editors must have completed an editorship article and must perform editorial duties (a substantial time commitment). Credit is awarded only after completion of both semesters. (S/U grading only.) Effective: 2016 Spring Semester.

LAW 418—Environmental Law and Policy Journal (1-2)
Independent Study. Environ is a biannual environmental law and policy journal that provides an open forum for the discussion of current environmental issues, particularly those pertaining to the state of California. May be repeated up to 5 times Students are allowed to participate in the journal for more than one term. (S/U grading only.) Effective: 2017 Spring Semester.

LAW 419—Advanced Writing Project (1-4)
Variable. The completion of a writing requirement project under the active and regular supervision of a faculty member in satisfaction of the legal writing requirement. The writing project must be an individually authored work of rigorous intellectual effort of at least 20 typewritten double-spaced pages, excluding footnotes. The project may take any of several forms, for example, a paper, a brief, a memorandum of law, a proposed statute, a statutory scheme or set of administrative regulations (with explanatory comments), or a will or agreement (with explanatory comments). The advanced writing project may also be undertaken in connection with another course or seminar to satisfy the legal writing requirements. The number of units shall be approved by the faculty supervisor and will depend upon the scope of the writing effort. (S/U grading only.) Effective: 2005 Fall Semester.
LAW 419A—Advanced Writing Project (1-4)
Variable. The completion of a writing requirement project under the active and regular supervision of a faculty member in satisfaction of the legal writing requirement. The writing project must be an individually authored work of rigorous intellectual effort of at least 20 typewritten double-spaced pages, excluding footnotes. The project may take any of several forms, for example, a paper, a brief, a memorandum of law, a proposed statute, a statutory scheme or set of administrative regulations (with explanatory comments), or a will or agreement (with explanatory comments). The advanced writing project may also be undertaken in connection with another course or seminar to satisfy the legal writing requirements. The number of units shall be approved by the faculty supervisor and will depend upon the scope of the writing effort. (S/U grading only.) Effective: 2005 Fall Semester.

LAW 419S—Special Session Advanced Writing Project (1-4)
Variable. The completion of a writing requirement project under the active and regular supervision of a faculty member in satisfaction of the legal writing requirement. The writing project must be an individually authored work of rigorous intellectual effort of at least 20 typewritten double-spaced pages, excluding footnotes. The project may take any of several forms, for example, a paper, a brief, a memorandum of law, a proposed statute, a statutory scheme or set of administrative regulations (with explanatory comments), or a will or agreement (with explanatory comments). The advanced writing project may also be undertaken in connection with another course or seminar to satisfy the legal writing requirements. The number of units shall be approved by the faculty supervisor and will depend upon the scope of the writing effort. (S/U grading only.) Effective: 2005 Summer Special Session.

LAW 420—Civil Rights Clinic (2-6)
Clinical Activity—2 hours. Prerequisite(s): LAW 219 (can be concurrent); and Consent of Instructor. Priority given to students enrolled in or have taken LAW 267. Limited enrollment. Clinic provides practical experience in providing legal services to indigent clients who have filed civil rights actions in state and federal trial and appellate courts. Students work on clinic cases under the supervision of the clinic director. May be repeated for credit. Effective: 2015 Spring Semester.

LAW 425—Judicial Clinical (2-12)
Clinical Activity. Prerequisite(s): LAW 261; Required for full-time clinical students and recommended for part-time clinical students. Students may arrange judicial clerkship clinical programs with an approved list of state and federal judges through the Clinical office and under the sponsorship of the faculty member in charge. All students must complete weekly time records and bi-weekly journals. (S/U grading only.) Effective: 1997 Winter Quarter.

LAW 430—Federal and State Taxation Externship (2-6)
Clinical Activity—2-12 hours. Prerequisite(s): LAW 220; and Consent of Instructor. Students will have the opportunity to work with the Internal Revenue Service or other governmental tax agency. Journals and attendance at group meetings are required. (S/U grading only.) Effective: 2013 Fall Semester.

LAW 435—Family Protection Clinic (4)
Clinical Activity—2 hours. Prerequisite(s): LAW 219 (can be concurrent); Full-Year Clinic: prior or concurrent enrollment in LAW 219 to qualify for state court certification; prior or concurrent enrollment in LAW 272 and LAW 263A recommended, not required; One-Semester Clinic: prior or concurrent enrollment in LAW 272 and LAW 263A recommended, not required. Full-Year Clinic: each student required to enroll for two semesters, receiving four units each semester for total of eight units; class limited to seven students; One-Semester Clinic: each student required to meet weekly for a 2-hour seminar; class limited to four students. Represent low-income persons in family law and related matters arising out of situations involving family violence. Effective: 2015 Spring Semester.

LAW 435A—Family Protection Clinic (4)
Clinical Activity—2 hours. Prerequisite(s): LAW 219 (can be concurrent); Consent of Instructor. Full-Year Clinic: LAW 219 is required to qualify for state court certification; prior or concurrent enrollment in LAW 272 and LAW 263A recommended not required. One-Semester Clinic: prior or concurrent enrollment in LAW 272 and LAW 263A recommended not required Full-Year Clinic: each student required to enroll for two semesters receiving four units each semester for total of eight units; class limited to seven students. Represent low-income persons in family law and related matters arising out of situations involving family violence. Effective: 2014 Fall Semester.

LAW 435B—Family Protection Clinic (4)
Clinical Activity—2 hours. Prerequisite(s): LAW 219 (can be concurrent); and Consent of Instructor. Full-Year Clinic: LAW 219 is required to qualify for state court certification; prior or concurrent enrollment in LAW 272 and LAW 263A recommended not required. Full-Year Clinic: each student required to enroll for two semesters receiving four units each semester for total of eight units; class limited to seven students. Represent low-income persons in family law and related matters arising out of situations involving family violence. Effective: 2015 Spring Semester.
LAW 440A—Immigration Law Clinic (4)
Clinical Activity—4 hours. Prerequisite(s): LAW 292 (can be concurrent) Each student is required to enroll for two semesters, receiving four units each semester for total of eight units. Provides legal representation to indigent non-citizens in removal proceedings before U.S. Immigration Courts, the Board of Immigration Appeals, and federal courts, including the Ninth Circuit Court of Appeals. Effective: 2015 Spring Semester.

LAW 440B—Immigration Law Clinic (4)
Clinical Activity—4 hours. Prerequisite(s): LAW 292 (can be concurrent); Consent of Instructor. Each student is required to enroll for two semesters, receiving four units each semester for total of eight units. Provides legal representation to indigent non-citizens in removal proceedings before U.S. Immigration Courts, the Board of Immigration Appeals, and federal courts, including the Ninth Circuit Court of Appeals. Effective: 2015 Spring Semester.

LAW 445—Legislative Process Externship (2-5)
Clinical Activity. Prerequisite(s): LAW 240 (can be concurrent); or Consent of Instructor. Practical experience in the operation of the office of a legislator or a legislative committee. The major thrust of the program is to enable students to become familiar with the give and take realities of making laws, as contracted with (S/U grading only.) Effective: 2001 Spring Semester.

LAW 445A—Aoki Water Justice Clinic (5)
Clinical Activity. Prerequisite(s): Consent of Instructor. Aoki Water Justice Clinic trains students to use community lawyering and transactional legal tools to ensure that low-income, California communities receive safe, clean, and affordable drinking water. Effective: 2017 Fall Semester.

LAW 445B—Advanced Aoki Water Justice Clinic (3-5)
Variable. The Advanced Aoki Water Justice Clinic allows students to leverage their legal research and practical lawyering skills to advance policies that ensure that low-income, California communities receive safe, clean, and affordable drinking water. Effective: 2017 Fall Semester.

LAW 446—UC Davis Capital Law Scholars Externship Program (2-12)
Fieldwork. Program is designed to provide students with hands-on lawyering experience in a legislative office, with a legislative committee, or with a government/nonprofit office engaged in legislative and policy work. Grading is on a S/U basis. (S/U grading only.) Effective: 2016 Fall Semester.

LAW 446A—UC Davis Capital Law Scholars Seminar (1)
Seminar—1 hour. May be required for students enrolled in Capital Law Scholars Externship. Covers issues related to lawyering in California’s state capital, and help students maximize educational and professional experience in their externship placements. Effective: 2016 Fall Semester.

LAW 450—Environmental Law Externship (2-6)
Clinical Activity. Prerequisite(s): LAW 285; or Consent of Instructor. Practical experience in environmental law. Students will work in an approved government, non-profit or private law office engaged in some form of environmental law work for a minimum of 8 hours per week. Students must prepare a journal describing and (S/U grading only.) Effective: 2004 Spring Semester.

LAW 455—Employment Relations Externship (2-6)
Clinical Activity. Prerequisite(s): LAW 251 or LAW 260 (can be concurrent) Practical experience in employment relations, including employment discrimination and public sector labor law. Work under the direct supervision of a government lawyer. Opportunity to participate in a range of with emphasis on observation and participation in actual investigation, interviewing, drafting pleading, and attendance at hearings. May be repeated for credit. (S/U grading only.) Effective: 2003 Fall Semester.

LAW 460—Public Interest Law Externship (2-6)
Clinical Activity—2-6 hours. Prerequisite(s): Prior or concurrent enrollment in LAW 293 recommended. Opportunity to work with a public interest practitioner in a nonprofit organization. Journals and attendance at two group meetings required. Students must complete an evaluative final paper of approximately eight pages. Hours completed in public interest setting may be applied toward the practicum requirement for the Public Interest Law Program. (S/U grading only.) Effective: 2002 Fall Semester.

LAW 465—Intellectual Property Externship (2-6)
Clinical Activity—2-6 hours. Prerequisite(s): LAW 293 and Comparative Public Services recommended. Opportunity to work for government, academic, and nonprofit entities. (S/U grading only.) Effective: 2010 Spring Semester.
LAW 470—Administration of Criminal Justice Externship (2-12)
Clinical Activity—2-12 hours. Prerequisite(s): LAW 219; and LAW 227; Completion of or concurrent enrollment in the above courses; LAW 263A recommended. Limited enrollment. Gain practical experience working full or part time in a District Attorney’s or Public Defender’s office in one of several surrounding counties or in a federal Public Defender or U.S. Attorney’s office. Students participate in the many activities associated with May be repeated up to 12 unit(s). (S/U grading only.) Effective: 2005 Fall Semester.

LAW 475—Washington UC-DC Law Program (10)
Clinical Activity—10 hours. Open to 2L and 3L students. Uniquely collaborative externship program in Washington, D.C., combining weekly seminars with full-time field placement offering students an unparalleled opportunity to learn how federal statutes, regulations, and policies are made, changed, and understood in the nation's capital. (S/U grading only.) Effective: 2010 Spring Semester.

LAW 475A—Law Making and Law Changing in the Nation's Capital (3)

LAW 480—Clinical Program in Prison Law (2-6)
Clinical Activity—2 hours. Prerequisite(s): Consent of Instructor. Provides practical experience in providing legal services to real clients who have various problems related to their incarceration in state prison. The services require analysis and application of Constitutional Law, state statutory law, agency regulations, and the rules of professional responsibility. Effective: 2015 Spring Semester.

LAW 485—California Supreme Court Clinic (6)
Clinical Activity—6 hours. Class size limited to 6 students. California Supreme Court Clinic provides students with an immersive experience in litigating cases before the state’s highest court. Effective: 2013 Fall Semester.

LAW 490T—Aoki Federal Public Defender Clinic (4)
Clinical Activity—4 hours. Students submit applications for the course. Outgrowth of the work of the Aoki Center on Race and Nation. As part of its work, the Aoki Center provides educational opportunities to students interested in critical race perspectives in practice. Effective: 2014 Fall Semester.

LAW 495—Instruction in Legal Research and Writing Skills (1-2)
Discussion—2 hours. Prerequisite(s): Consent of Instructor. Participants assist in instructing the Legal Research and Writing programs for first-year students under the direction of the Legal Research and Writing instructors. (S/U grading only.) Effective: 2017 Spring Semester.

LAW 495LS—Lawyering Skills Teaching Assistant (2)
Discussion. Prerequisite(s): Consent of Instructor. Assist the faculty in Lawyering Skills course for first-year students. Approval of the Lawyering Skills instructor is required for enrollment. Grading is on a satisfactory/unsatisfactory basis. May be repeated up to 4 time(s). (S/U grading only.) Effective: 2019 Spring Semester.

LAW 498—Group Study (1-4)
Variable—1-4 hours. Prerequisite(s): Consent of Instructor. Class size limited to no fewer than 4 or more than 10 students. Groups of students with common interest in studying a stated legal problem may plan and conduct their own research and seminar program under the direction of faculty. (S/U grading only.) Effective: 2012 Fall Semester.

LAW 498A—Group Study (1-4)
Variable. Prerequisite(s): Consent of Instructor. Groups of students with common interest in studying a stated legal problem may plan and conduct their own research and seminar program under the direction of faculty. Effective: 2012 Fall Semester.

LAW 499—Independent Research Project (1-4)
Variable. Students may receive credit for individual projects, subject to the following regulations: (1) the project may extend over no more than two semesters; (2) each project will be under the supervision of a faculty member; (3) an outline of the project must be approved by the supervising faculty member; (4) normally, no faculty member will be permitted to supervise more than 5 students working on individual programs during any semester; and (5) each student must submit an individual paper or approved alternative to the supervising faculty member. (S/U grading only.) Effective: 2005 Fall Semester.

LAW 499A—Independent Research Project (1-4)
Variable. Students may receive credit for individual projects, subject to the following regulations: (1) the project may extend over no more than two semesters; (2) each project will be under the supervision of a faculty member; (3) an outline of the project must be approved by the supervising faculty member; (4) normally, no faculty member will be
permitted to supervise more than 5 students working on individual programs during any semester; and (5) each
customer must submit an individual paper or approved alternative to the supervising faculty member. Grading is on a
Satisfactory/Unsatisfactory basis unless a request for letter grading has been made in advance. May be repeated
for credit. (S/U grading only.) Effective: 2010 Fall Semester.

**LAW 499B—Law Students Study Away (10)**
Independent Study. Students studying away from UC Davis, School of Law. (S/U grading only.) Effective: 2007 Fall Semester.

**LAW 499C—Joint Degree Student-GSM (10)**
Internship. Joint degree course for graduate School of Management students. (S/U grading only.) Effective: 2009 Spring Semester.

**LAW 499S—Special Independent Research Project (1-4)**
Students may receive credit for individual projects, subject to the following regulations: (1) the project may extend
over no more than two semesters; (2) each project will be under the supervision of a faculty member; (3) an outline
of the Effective: 2005 Summer Special Session.

**LAW 499SA—Special Session Independent Research Project (1-4)**
Students may receive credit for individual projects, subject to the following regulations: (1) the project may extend
over no more than two semesters; (2) each project will be under the supervision of a faculty member; (3) an outline
of the Effective: 2005 Summer Special Session.

**LAW 499SB—Special Session Independent Research Project (1-4)**
Variable. Students may receive credit for individual projects, subject to the following regulations: (1) the project may extend
over no more than two semesters; (2) each project will be under the supervision of a faculty member; (3) an outline
of the project must be approved by the supervising faculty member; (4) normally, no faculty member will be
permitted to supervise more than 5 students working on individual programs during any semester; and (5) each
student must submit an individual paper or approved alternative to the supervising faculty member. Effective: 2005
Summer Special Session.

**Linguistics**

**Linguistics | LIN A.B.**
(College of Letters and Science)

Raul Aranovich, Ph.D., Chairperson of the Department

Department Office. 469 Kerr Hall; 530-752-0966; http://linguistics.ucdavis.edu

**The Major Program**

Linguistics is the systematic study of human language. It focuses on theories of language structure, variation, and
use, description of contemporary languages, and the examination of language change through time. Because of
the pervasive influence of language in our everyday lives, work in linguistics interacts in important ways with
studies carried out in many other fields, including psychology, anthropology, neuroscience, philosophy, computer
science, sociology, literature, language teaching, communication and education.

**The Program.** An introductory lower division course provides students with basic concepts and some of the
methods needed to analyze language in a systematic way. Upper division courses probe more deeply into specific
aspects of language structure, language use, and the relationship of language to other realms of human activity.

**Career Alternatives.** Majors in linguistics find practical outlets for their linguistic training in a variety of fields: the
computer science industry [software development]; teaching English as a second language; foreign language
learning; elementary and secondary level bilingual-bicultural programs; language-oriented missionary work;
bilingual-bicultural curriculum development (e.g., for publishing houses); legal work; speech therapy; lexicography
(preparation of dictionaries). All of these types of employment share an interest in persons skilled in the analysis of
language, spoken and/or written. Linguistics equips students with just such skills.
Grading Recommendation. Though not required, it is recommended that all courses offered in satisfaction of the Linguistics major be taken for a letter grade.

Faculty Advisor. Kenji Sagae

Honors and Honors Program. The honors program consists of six units of 194H credit normally taken in the fall and winter quarters of the senior year. Completion of the program is a prerequisite for High or Highest Honors at graduation. Specific eligibility criteria may be obtained from the major advisor. For general information regarding graduation with honors and Dean’s Honors Lists, please see Academic Information.

Graduate Study. The Linguistics Graduate Group offers study and research leading to the M.A. and Ph.D. degrees. Please see Linguistics (Graduate Group); more detailed information may be obtained from the Graduate Advisor or from the Chairperson of the Linguistics Group.

Graduate Advisor. R. Bayley

Total: 48-68

**Linguistics | LIN Courses**

**Courses in LIN:**

**LIN 001—Introduction to Linguistics (4)**
Discussion—1 hour; Lecture—3 hours. Introduction to the study of language; its nature, diversity, and structure. GE credit: AH, SS. Effective: 1997 Winter Quarter.

**LIN 001Y—Introduction to Linguistics (4)**
Discussion—1 hour; Web Virtual Lecture—3 hours. Introduction to the study of language; its nature, diversity, and structure. Students may not take both LIN 001 and LIN 001Y for credit. GE credit: AH, SS. Effective: 2014 Spring Quarter.

**LIN 003—Language and the Body (4)**
Discussion—2 hours; Lecture—2 hours. Open to all students regardless of major. Enrollment will be restricted to 80-100 students. Perspectives on the role of language in issues about bodies. Language-related disabilities. Social implications of language use in discussing body-related conditions. GE credit: OL, SS. Effective: 2018 Winter Quarter.

**LIN 005—Global English and Communication (4)**
Discussion—2 hours; Lecture—2 hours. English as a global language and its uses in intercultural communication. Cultural, historical, and political dimensions of varieties of English spoken around the world. Experiential grounding
in strategies for increasing interpretive and verbal communicative competence for a globalized world. (Same course as CMN 005.) GE credit: AH, OL, SS, WC. Effective: 2012 Spring Quarter.

LIN 006—Language and Society (4)
Discussion—1 hour; Lecture—3 hours. Language as a social phenomenon. Topics include linguistic diversity, language policy, language and identity, language and social structure, speech communities and social networks, the effect of social factors on language variation, linguistic consequences of language contact. GE credit: ACGH, DD, SS, WE. Effective: 2008 Fall Quarter.

LIN 015—Academic Oral Communication (3)
Discussion—2 hours; Lecture—1 hour. Structure of oral communication, critical thinking, and persuasion in classroom discourse in American English and in cross-cultural perspective. GE credit: AH, OL, SS. Effective: 2014 Fall Quarter.

LIN 020—Oral English for International Students (3) Review all entries
Lecture/Discussion—3 hours. Open to non-native speakers of English with priority enrollment to international teaching assistants with qualifying placement exam scores. Intensive work in oral English for international students, to increase fluency, accuracy, and use of appropriate discourse strategies in academic settings (e.g., seminar, discussion, laboratory). Training in segmental features of English sounds, intonation, stress, non-verbal cues, and register. May be repeated for credit. (P/NP grading only.) Effective: 2011 Fall Quarter.

LIN 020—Oral English for International Students (3) Review all entries Discontinued
Lecture/Discussion—3 hours. Open to non-native speakers of English with priority enrollment to international teaching assistants with qualifying placement exam scores. Intensive work in oral English for international students, to increase fluency, accuracy, and use of appropriate discourse strategies in academic settings (e.g., seminar, discussion, laboratory). Training in segmental features of English sounds, intonation, stress, non-verbal cues, and register. May be repeated for credit. (P/NP grading only.) Effective: 2018 Summer Session 2.

LIN 024—English Structures and Strategies in Academic Writing (4) Review all entries
Lecture/Discussion—4 hours. Prerequisite(s): LIN 023 Open to students from language backgrounds other than English. Practice in academic writing designed to prepare undergraduate students from language backgrounds other than English for successful academic work. Development of academic writing, critical thinking, and reading skills. Development of clear, accurate language for presenting an effective argument. Effective: 2006 Fall Quarter.

LIN 024—English Structures and Strategies in Academic Writing (4) Review all entries Discontinued
Lecture/Discussion—4 hours. Prerequisite(s): LIN 023 Open to students from language backgrounds other than English. Practice in academic writing designed to prepare undergraduate students from language backgrounds other than English for successful academic work. Development of academic writing, critical thinking, and reading skills. Development of clear, accurate language for presenting an effective argument. Effective: 2019 Winter Quarter.

LIN 025—English for International/ESL Graduate Students (4) Review all entries
Lecture/Discussion—4 hours. Prerequisite(s): Admission by placement examination or consent of coordinator; open to international and ESL graduate students and limited status international undergraduates (Education Abroad Program participants). Multi-skills ESL course designed to help international/ESL students improve their English language skills for successful academic study. Emphasis on writing, speaking, listening, reading, and academic culture. (P/NP grading only.) Effective: 2003 Fall Quarter.

LIN 025—English for International/ESL Graduate Students (4) Review all entries Discontinued
Lecture/Discussion—4 hours. Prerequisite(s): Admission by placement examination or consent of coordinator; open to international and ESL graduate students and limited status international undergraduates (Education Abroad Program participants). Multi-skills ESL course designed to help international/ESL students improve their English language skills for successful academic study. Emphasis on writing, speaking, listening, reading, and academic culture. (P/NP grading only.) Effective: 2019 Winter Quarter.

LIN 026—Writing for International Graduate Students (3) Review all entries
Lecture—3 hours. Prerequisite(s): Satisfactory completion of LIN 025 if held for it, or consent of instructor. Admission limited to international graduate students. Focuses on writing needed for academic work, including summaries, critiques, research and grant proposals, memos, resumes, and research papers. Includes a review of grammar needed for writing and some focus on reading skills and American vocabulary and idioms. (P/NP grading only.) Effective: 1997 Winter Quarter.

LIN 026—Writing for International Graduate Students (3) Review all entries Discontinued
Lecture—3 hours. Prerequisite(s): Satisfactory completion of LIN 025 if held for it, or consent of instructor.
Admission limited to international graduate students. Focuses on writing needed for academic work, including summaries, critiques, research and grant proposals, memos, resumes, and research papers. Includes a review of grammar needed for writing and some focus on reading skills and American vocabulary and idioms. (P/NP grading only.) Effective: 2019 Winter Quarter.

LIN 096—Directed Group Study in English as a Second Language (1-5)
Variable—1.5 hours. Prerequisite(s): Consent of Instructor. Directed group study of topic in English as a Second Language (ESL). May be repeated for credit May be repeated for credit by consent of the ESL coordinator. (P/NP grading only.) Effective: 1997 Winter Quarter.

LIN 098—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Intended for lower division students. (P/NP grading only.) Effective: 1997 Winter Quarter.

LIN 099—Special Study for Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. Intended for lower division students. (P/NP grading only.) Effective: 1997 Winter Quarter.

LIN 103A—Linguistic Analysis I: Phonetics, Phonology, Morphology (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): LIN 001 recommended. Introduction to fundamental methods and concepts used in linguistic analysis, focusing on phonetic, phonological, and morphological phenomena. Emphasizes development of analytical skills and appreciation of structural regularities and differences among languages. Not open for credit to students who have completed LIN 139. GE credit: AH. Effective: 2017 Winter Quarter.

LIN 103B—Linguistic Analysis II: Morphology, Syntax, Semantics (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): LIN 001 recommended. Introduction to fundamental methods and concepts used in linguistic analysis, focusing on morphological, syntactic, and semantic phenomena. Emphasizes development of analytical skills and appreciation of structural regularities and differences among languages. Not open for credit to students who have completed LIN 140. GE credit: AH. Effective: 2017 Winter Quarter.

LIN 105—Topics in Language and Linguistics (4)
Lecture—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. LIN 001 recommended. Detailed examination of a major contemporary linguistic theory, a major contemporary issue or related set of issues in linguistics, or the structure of a particular language or language family. May be repeated for credit when topic differs. May be repeated for credit. Effective: 2017 Winter Quarter.

LIN 106—English Grammar (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): LIN 001 or LIN 001Y or ENG 003 or UWP 001; or Consent of Instructor. Survey of present-day English grammar as informed by contemporary linguistic theories. The major syntactic structures of English; their variation across dialects, styles, and registers; their development; and their usefulness in describing the conventions of English. (Same course as ENL 106 and UWP 106.) GE credit: AH. Effective: 2018 Winter Quarter.

LIN 111—Introduction to Phonological Theory (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): LIN 103A recommended. Contemporary phonological theory with emphasis on syllable structure, metrical structure, phonology-morphology interaction, and typological variation in these areas, from the perspective of optimality-theoretic approaches. GE credit: AH. Effective: 2017 Winter Quarter.

LIN 112—Phonetics (4)
Lecture—3 hours; Term Paper—1 hour. Prerequisite(s): LIN 001 recommended. Detailed examination of articulatory and acoustic phonetics. GE credit: SE. Effective: 2017 Winter Quarter.

LIN 121—Morphology (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): LIN 103A, 103B recommended. Introduction to the analysis of word structure and the relation of word structure to the lexicon and other grammatical components. GE credit: AH. Effective: 2017 Winter Quarter.

LIN 127—Text Processing and Corpus Linguistics (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): LIN 001, LIN 005, LIN 006, or ANT 004 recommended. Investigation of the lexical organization of human languages through corpus linguistics. Application of principles of linguistic analysis, automatic text processing, and statistical research to solving problems of textual
evaluation and classification, as well as information retrieval and extraction. GE credit: AH, QL, SS. Effective: 2017 Winter Quarter.

LIN 131—Introduction to Syntactic Theory (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): LIN 103B recommended. Introduction to syntactic theory, primarily through the examination of a major theory of syntax, emphasizing theoretical reasoning, argumentation, and problems of theory building in syntax. GE credit: AH. Effective: 2017 Winter Quarter.

LIN 141—Semantics (4)
Lecture—3 hours; Term Paper. Prerequisite(s): LIN 103B recommended. Linguistic study of meanings of words and phrases. Meanings expressed by lexical items and derivational and inflectional morphology. Contribution of argument structure, quantification, and coordination to meaning. GE credit: AH. Effective: 2017 Winter Quarter.

LIN 150—Languages of the World (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): LIN 001 or ANT 004 recommended. Survey of the world's languages, their geographical distribution and classification, both genetic and typological. Illustrative descriptions of several major languages from different geographical areas; pidgins and creoles, lingua francas and other languages of widespread use. Not open for credit to students who have completed LIN 050. GE credit: AH, SS, WC. Effective: 2017 Winter Quarter.

LIN 151—Historical Linguistics (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): LIN 103A recommended. Description and methods of the historical study of language, including the comparative method and internal reconstruction; sound change, morphological change, syntactic change, semantic change. GE credit: AH. Effective: 2017 Winter Quarter.

LIN 152—Language Universals and Typology (4)
Lecture—3 hours; Term Paper. Prerequisite(s): LIN 103B recommended. Investigation into common features of all human languages and the classification of languages in terms of their structural features. Theories of universal grammar. Detailed discussion of non-Indo-European languages and comparison with English. GE credit: AH. Effective: 2017 Winter Quarter.

LIN 160—American Voices (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): LIN 001 or LIN 001Y or ANT 004; Or upper division standing recommended. Explores the forms of American English: traditional notions of regional dialects and increasingly important social dialects, reflecting age, class, gender, race, ethnicity, and sexual orientation. The influence of language attitudes on perception of dialect speakers; dialect in media, education, and GE credit: SS, WE. Effective: 2018 Winter Quarter.

LIN 163—Language, Gender, and Society (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): LIN 001 or ANT 004 recommended. Investigation of real and putative (stereotyped) gender-linked differences in language structure and usage, with a consideration of some social and psychological consequences of such differences. Focus is on English, but other languages are also discussed. GE credit: ACGH, DD, SS, WE. Effective: 2017 Winter Quarter.

LIN 165—Introduction to Applied Linguistics (4)
Discussion—1 hour; Lecture—3 hours. Applications of linguistic principles and the analysis of language-related issues in the world. Exploration of a range of language-related problems including issues related to language learning and teaching to issues concerning language and gender, race, class and the media. GE credit: SS, WE. Effective: 2002 Winter Quarter.

LIN 166—The Spanish Language in the United States (4)
Lecture—3 hours; Term Paper. Prerequisite(s): LIN 001 or LIN 001Y or SPA 111N; SPA 023; Or equivalent to SPA 023 recommended. Linguistic features of the varieties of the Spanish language spoken throughout the United States; phonology, morphology, syntax, vocabulary. Focus on the relationship between United States Spanish and other world varieties of Spanish, within a historical framework. GE credit: SS. Effective: 2018 Spring Quarter.

LIN 171—Introduction to Psycholinguistics (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): LIN 001 or LIN 001Y; LIN 103A, LIN 103B recommended. Introduction to psychological issues relating to the implementation of language and linguistic structure during speech production and comprehension and to the implications of research in psychology and related fields for linguistic theory. GE credit: SS. Effective: 2018 Spring Quarter.

LIN 173—Language Development (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (LIN 001 or LIN 001Y); or Consent of Instructor. LIN 103A, 103B
recommended. Theory and research on children's acquisition of their native language, including the sound system, grammatical systems, and basic semantic categories. (Same course as EDU 173.) GE credit: SS. Effective: 2018 Spring Quarter.

LIN 175—Biological Basis of Language (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Consent of Instructor. LIN 001 recommended. Overview of issues in the field of neurolinguistics and techniques used to explore representation of language in the human brain. GE credit: SE. Effective: 2017 Winter Quarter.

LIN 177—Computational Linguistics (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Consent of Instructor. LIN 001 recommended. Understanding the nature of language through computer modeling of linguistic abilities. Relationships between human cognition and computer representations of cognitive processing. Not open for credit to students who have taken LIN 007. GE credit: SE. Effective: 2017 Winter Quarter.

LIN 180—Second Language Learning and Teaching (4)
Lecture/Discussion—4 hours. Prerequisite(s): LIN 001 or LIN 001Y; Or equivalent recommended. Psycholinguistic and sociolinguistic theories of second language learning. Connections between theoretical perspectives and pedagogical practices in formal and informal second language settings, with focus on tutoring. Impact of sociocontextual factors (e.g., gender, ethnicity). Fieldwork requirement. GE credit: SS, WE. Effective: 2018 Winter Quarter.

LIN 182—Multilingualism (4)
Lecture/Discussion—4 hours. Limited enrollment. Issues in multilingualism from a global perspective: e.g., multilingual communities; multilingualism and identity (gender, ethnicity, nationality); language ideologies and educational and sociopolitical policies surrounding multilingualism; acquisition of multilingualism; discursive practices of multilinguals. GE credit: SS, WC, WE. Effective: 2006 Spring Quarter.

LIN 192—Internship in Linguistics (1-12)
Internship—3-36 hours. Prerequisite(s): LIN 001 or LIN 001Y; Or equivalent course; consent of instructor. Internship applying linguistic-related skills to a fieldwork project in areas such as media, law, or industry, in approved organizations or institutions. Maximum of four units applicable toward major. (P/NP grading only.) Effective: 2006 Spring Quarter.

LIN 194H—Special Study for Honors Students (1-5)
Independent Study—1-5 hours. Prerequisite(s): Consent of Instructor. Open only to linguistics majors of senior standing who qualify for Honors Program. Guided research, under the direction of a faculty member approved by the Program Director, leading to a senior honors thesis. May be repeated for credit for up to 6 units. May be repeated up to 6 unit(s). (P/NP grading only.) Effective: 1997 Winter Quarter.

LIN 197T—Tutoring in Linguistics (1-4)
Discussion—1-4 hours. Prerequisite(s): Consent of Instructor. Upper division standing and consent of department chairperson. Leading of small voluntary discussion groups affiliated with one of the department's regular courses. May be repeated for credit. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

LIN 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

LIN 199—Special Study for Advanced Undergraduates (1-5)
Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

LIN 200A—Foundations of Linguistics I (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Graduate standing. Survey of fundamental issues raised by pre-generative linguistics in the twentieth century, with emphasis on issues crucial to applications of linguistics. Not open for credit to students who have completed LIN 203A. Effective: 2005 Spring Quarter.

LIN 200B—Foundations of Linguistics II (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Graduate standing. Survey of fundamental issues raised by orthodox generative linguistics, with emphasis on issues crucial to applications of linguistics. Not open for credit to students who have completed LIN 203B. Effective: 2005 Spring Quarter.

LIN 200C—Foundations of Linguistics III (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Graduate standing. Survey of fundamental issues raised
by contemporary linguistic theories lying outside the generative grammar orthodoxy, with emphasis on issues
crucial to applications of linguistics. Effective: 2005 Spring Quarter.

LIN 201—Proseminar (1)
Seminar—1 hour. Introduction to research activity of faculty in the Graduate Group in Linguistics and guest
speakers. May be repeated up to 4 unit(s). (S/U grading only) Effective: 2011 Fall Quarter.

LIN 205A—Topics in Linguistic Theory and Methods (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. Advanced study of current problems in
linguistic theory and methodology. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

LIN 205B—Topics in Linguistic Theory and Methods (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. Advanced study of current problems in
linguistic theory and methodology. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

LIN 205C—Topics in Linguistic Theory and Methods (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. Advanced study of current problems in
linguistic theory and methodology. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

LIN 205D—Topics in Linguistic Theory and Methods (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. Advanced study of current problems in
linguistic theory and methodology. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

LIN 211—Advanced Phonological Theory and Analysis (4)
Lecture—3 hours; Term Paper. Prerequisite(s): LIN 111 Critical examination of current phonological theories. Effective:
1997 Winter Quarter.

LIN 212—Advanced Phonetics (4)
Lecture—3 hours; Term Paper. Prerequisite(s): LIN 112 Advanced investigation of the physiological basis of speech

LIN 231—Advanced Syntactic Theory and Analysis (4)
Lecture—3 hours; Term Paper. Prerequisite(s): LIN 131 Critical survey of contemporary theories of syntax. Effective:
1997 Winter Quarter.

LIN 241—Advanced Syntactic Theory and Analysis (4)
Lecture—3 hours; Term Paper. Prerequisite(s): LIN 141; or Consent of Instructor. Advanced critical exploration of
contemporary theories of linguistic semantics. Effective: 1997 Winter Quarter.

LIN 250—Principles of Typological Linguistics (4)
Seminar—3 hours; Term Paper. Cross-linguistic comparison and typology, including word order, morphological
typology, complex clauses, semantic categories and their grammaticalization, and applications of typology to
language acquisition. Effective: 2011 Fall Quarter.

LIN 251—Principles of Historical Linguistics (4)
Lecture—3 hours; Term Paper. Prerequisite(s): LIN 151 Advanced analysis of the theory and methods of historical

LIN 252—Romance Linguistics (4)
Lecture—3 hours; Term Paper. Prerequisite(s): LIN 151 Examination of the development of the Romance languages
from Proto-Romance to the modern era. Application and critical examination of methods of historical and
comparative linguistics in particular areas of structural change in Romance. Effective: 1997 Winter Quarter.

LIN 253—Speech Perception (4)
Discussion—3 hours; Extensive Writing. Investigation into how listeners map a continuous and variable acoustic
signal to a linguistic interpretation. Phonetic context, variation, linguistic knowledge, and sociolinguistics as factors
in perceiving speech. Effective: 2017 Winter Quarter.

LIN 260—Variation in Speech Communities (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): LIN 281; or Consent of Instructor. Linguistic variability in
time, space, and society. Theoretical issues related to social and linguistic constraints in variation; issues and
methods in the quantitative analysis of variation. Speech community, quantitative analytic methods, and the scope
of sociolinguistic competence. Effective: 2005 Spring Quarter.

LIN 263—Discourse Analysis: Text in Context (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Graduate standing. Introduction to and application of
leading theoretical approaches to the analysis of discourse. Approaches to the analysis of (spoken and written) text in context, tools for analyzing different types of texts (narration, conversation, etc.). Theme/rheme, given/new, anaphora, discourse markers, and Effective: 2005 Spring Quarter.

LIN 264—Current Issues in Language and Gender (4)
Project (Term Project); Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing; prior coursework in Linguistics, Gender Studies, or Cultural Studies is desirable; no expectation of bilingual proficiency. Exploration of the construction and performance of gender through language in cross-cultural perspective and in a variety of contexts: informal conversations, narratives, workplaces, schools, households, the mass media. Special topics may include: language acquisition; multilingualism; ecofeminism; queer theory. May be repeated up to 1 time(s) when topic differs. Effective: 2005 Fall Quarter.

LIN 265—Language, Performance, and Power (4)
Seminar—3 hours; Term Paper. Restricted to graduate standing or consent of instructor. Exploration of the intersection between linguistic and social theories in the language-state relation and the performance of identity. Ideological sources of language differentiation; nation-building and linguistic difference. Political economic, sociolinguistic, and ethnographic approaches to understanding linguistic inequality. (Same course as ANT 265.) Effective: 2003 Fall Quarter.

LIN 275—Neurobiology of Language (4)

LIN 280—Theories of Second Language Acquisition (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Covers theoretical perspectives that direct or have directed research in second language acquisition; explores the relationship between linguistics and language teaching and deals with the individual variables that influence second language learning. Effective: 1998 Fall Quarter.

LIN 281—Individual and Social Aspects of Bilingualism (4)
Lecture—3 hours; Term Paper. Broad overview of bi- and multilingualism, with focus on theoretical and descriptive research; topics covered range from language processing in bilinguals to code-switching to language as political issue in multilingual states. Effective: 1997 Winter Quarter.

LIN 282—Politics of Bi and Multilingual Literacies (4)

LIN 289—Pedagogical Applications of Second Language Acquisition Theory (4)
Seminar—3 hours; Term Paper. Prerequisite(s): LIN 280 Pedagogical implications of various theories of second language acquisition, facilitation of language acquisition in classroom settings, and techniques for conducting classroom-based research in language learning. Effective: 1999 Winter Quarter.

LIN 297T—English as a Second Language Teaching/Tutoring (1-4)
Tutorial—1-4 hours. Prerequisite(s): LIN 300 or LIN 301 or LIN 302 (can be concurrent); and Consent of Instructor. Teaching classes for ESL graduate students. Aiding the ESL undergraduate composition classes; tutoring foreign graduate student Teaching Assistants in pronunciation. Does not fulfill requirement toward the M.A. degree. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

LIN 298—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Graduate standing. (S/U grading only.) Effective: 1997 Winter Quarter.

LIN 299—Research (1-12)
Variable. (S/U grading only.) Effective: 1997 Winter Quarter.
LIN 300—Language Pedagogy (4)
Lecture/Discussion—4 hours. Prerequisite(s): Graduate standing in Linguistics or consent of instructor; concurrent enrollment in LIN 297T recommended. Methods of teaching second languages to nonnative speakers, stressing particularly recent linguistic methodology and techniques, as related to teaching and tutoring in the UC Davis ESL program. Effective: 2013 Fall Quarter.

LIN 301—Teaching Academic Literacy (4)
Practice; Project (Term Project); Seminar—3 hours; Tutorial—14 hours. Prerequisite(s): LIN 300; or Consent of Instructor. Graduate standing. Methods of teaching advanced academic literacy in a second language, with a focus on ESL composition. Lesson development, teaching and tutoring in the UC Davis ESL program. Effective: 2007 Fall Quarter.

LIN 302—Recent Research and Special Projects in TESOL (4)
Lecture—4 hours. Prerequisite(s): LIN 300; LIN 301 Review of recent research in second language acquisition and the teaching of English to speakers of other languages. Continued teaching and tutoring in the UCD ESL clinic. Each student also designs and reports on a classroom research project. Effective: 1997 Winter Quarter.

LIN 305—Second Language Literacy and Technology (4)
Lecture/Discussion—1.5 hours; Web Electronic Discussion—1.5 hours. Prerequisite(s): LIN 002 or equivalent coursework/experience in second language pedagogy; consent of instructor; graduate students only. Limited enrollment. Exploration of literacy theory and critical pedagogy in relation to new instructional and communication technologies. Practicum experience in teaching second language literacy; reflection on connections between theory and practice. Fieldwork requirement. Effective: 2007 Fall Quarter.

LIN 310—Language Pedagogy for Teacher Educators (4)
Fieldwork; Project (Term Project); Seminar—3 hours; Tutorial. Prerequisite(s): Admission to Ph.D. program in Linguistics or Foreign Languages, or permission of instructor; significant language teaching experience. Current issues in second language pedagogy, with a focus on communicative methodology, participatory curriculum design, academic literacy, and the social contexts of teaching. Emphasis on reflective teaching and action research. Mentoring of new language teachers. May be repeated up to 12 unit(s). Effective: 2007 Fall Quarter.

LIN 391—Oral English for ESL Students (3) Review all entries
Laboratory—2 hours; Lecture—2 hours. Prerequisite(s): Open only to non-native speakers of English with priority enrollment to international student teaching assistants; completion of any required ESL courses or consent of instructor. Course gives non-native English-speaking students, particularly international student teaching assistants, intensive work in oral English to increase fluency, accuracy, and use of appropriate discourse strategies in academic settings (e.g., seminar, discussion, laboratory). Course may be repeated for credit with consent of coordinator. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

LIN 391—Oral English for ESL Students (3) Review all entries Discontinued
Laboratory—2 hours; Lecture—2 hours. Prerequisite(s): Open only to non-native speakers of English with priority enrollment to international student teaching assistants; completion of any required ESL courses or consent of instructor. Course gives non-native English-speaking students, particularly international student teaching assistants, intensive work in oral English to increase fluency, accuracy, and use of appropriate discourse strategies in academic settings (e.g., seminar, discussion, laboratory). Course may be repeated for credit with consent of coordinator. May be repeated for credit. (S/U grading only.) Effective: 2019 Winter Quarter.

LIN 396—Teaching Assistant Training Practicum (1-4)
Variable. Prerequisite(s): Graduate standing. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

Linguistics (Graduate Group)

Linguistics (Graduate Group) | LIN M.A.
(College of Letters and Science)
Robert J. Bayley, Chairperson of the Group

Department Office. 469 Kerr Hall; 530-752-0966; http://linguistics.ucdavis.edu
Faculty. http://linguistics.ucdavis.edu/directory-of-people/lin-faculty#c4=all&b_start=0
Graduate Study. The Graduate Group in Linguistics offers a program of study leading to the M.A. and the Ph.D. degree.

The M.A. program follows PLAN II. 36-38 units of coursework are required, at least 18 of which must be graduate level courses in the major field. A comprehensive final examination in the major subject is required of each candidate. No thesis is required.

Graduate Advisors. Santiago Barreda-Castanon (Linguistics), Julia Menard-Warwick (Linguistics)

Linguistics (Graduate Group) | LIN Ph.D.

(College of Letters and Science)

Robert J. Bayley, Chairperson of the Group

Department Office. 469 Kerr Hall; 530-752-0966; http://linguistics.ucdavis.edu

Faculty. http://linguistics.ucdavis.edu/directory-of-people/lin-faculty#c4=all&b_start=0

Graduate Study. The Graduate Group in Linguistics offers a program of study leading to the M.A. and the Ph.D. degree.

The Ph.D. degree offers advanced training and research in linguistic theories and methods. Second language acquisition and development is a particular emphasis of the program. Detailed information on both the M.A. and the Ph.D. degrees can be obtained from the graduate advisors, from the chair of the Graduate Group or the departmental chairs.

Graduate Advisors. Santiago Barreda-Castanon (Linguistics), Julia Menard-Warwick (Linguistics)

Linguistics (Graduate Group) | LIN Courses

Courses in LIN:

LIN 001—Introduction to Linguistics (4)
Discussion—1 hour; Lecture—3 hours. Introduction to the study of language; its nature, diversity, and structure. GE credit: AH, SS. Effective: 1997 Winter Quarter.

LIN 001Y—Introduction to Linguistics (4)
Discussion—1 hour; Web Virtual Lecture—3 hours. Introduction to the study of language; its nature, diversity, and structure. Students may not take both LIN 001 and LIN 001Y for credit. GE credit: AH, SS. Effective: 2014 Spring Quarter.

LIN 003—Language and the Body (4)
Discussion—2 hours; Lecture—2 hours. Open to all students regardless of major. Enrollment will be restricted to 80-100 students. Perspectives on the role of language in issues about bodies. Language-related disabilities. Social implications of language use in discussing body-related conditions. GE credit: OL, SS. Effective: 2018 Winter Quarter.

LIN 005—Global English and Communication (4)
Discussion—2 hours; Lecture—2 hours. English as a global language and its uses in intercultural communication. Cultural, historical, and political dimensions of varieties of English spoken around the world. Experiential grounding in strategies for increasing interpretive and verbal communicative competence for a globalized world. (Same course as CMN 005.) GE credit: AH, OL, SS, WC. Effective: 2012 Spring Quarter.

LIN 006—Language and Society (4)
Discussion—1 hour; Lecture—3 hours. Language as a social phenomenon. Topics include linguistic diversity, language policy, language and identity, language and social structure, speech communities and social networks, the effect of social factors on language variation, linguistic consequences of language contact. GE credit: ACGH, DD, SS, WE. Effective: 2008 Fall Quarter.

LIN 015—Academic Oral Communication (3)
Discussion—2 hours; Lecture—1 hour. Structure of oral communication, critical thinking, and persuasion in classroom discourse in American English and in cross-cultural perspective. GE credit: AH, OL, SS. Effective: 2014 Fall Quarter.

1242
LIN 020—Oral English for International Students (3) Review all entries
Lecture/Discussion—3 hours. Open to non-native speakers of English with priority enrollment to international teaching assistants with qualifying placement exam scores. Intensive work in oral English for international students, to increase fluency, accuracy, and use of appropriate discourse strategies in academic settings (e.g., seminar, discussion, laboratory). Training in segmental features of English sounds, intonation, stress, non-verbal cues, and register. May be repeated for credit. (P/NP grading only.) Effective: 2011 Fall Quarter.

LIN 020—Oral English for International Students (3) Review all entries Discontinued
Lecture/Discussion—3 hours. Open to non-native speakers of English with priority enrollment to international teaching assistants with qualifying placement exam scores. Intensive work in oral English for international students, to increase fluency, accuracy, and use of appropriate discourse strategies in academic settings (e.g., seminar, discussion, laboratory). Training in segmental features of English sounds, intonation, stress, non-verbal cues, and register. May be repeated for credit. (P/NP grading only.) Effective: 2018 Summer Session 2.

LIN 024—English Structures and Strategies in Academic Writing (4) Review all entries
Lecture/Discussion—4 hours. Prerequisite(s): LIN 023 Open to students from language backgrounds other than English. Practice in academic writing designed to prepare undergraduate students from language backgrounds other than English for successful academic work. Development of academic writing, critical thinking, and reading skills. Development of clear, accurate language for presenting an effective argument. Effective: 2006 Fall Quarter.

LIN 024—English Structures and Strategies in Academic Writing (4) Review all entries Discontinued
Lecture/Discussion—4 hours. Prerequisite(s): LIN 023 Open to students from language backgrounds other than English. Practice in academic writing designed to prepare undergraduate students from language backgrounds other than English for successful academic work. Development of academic writing, critical thinking, and reading skills. Development of clear, accurate language for presenting an effective argument. Effective: 2019 Winter Quarter.

LIN 025—English for International/ESL Graduate Students (4) Review all entries
Lecture/Discussion—4 hours. Prerequisite(s): Admission by placement examination or consent of coordinator; open to international and ESL graduate students and limited status international undergraduates (Education Abroad Program participants). Multi-skills ESL course designed to help international/ESL students improve their English language skills for successful academic study. Emphasis on writing, speaking, listening, reading, and academic culture. (P/NP grading only.) Effective: 2003 Fall Quarter.

LIN 025—English for International/ESL Graduate Students (4) Review all entries Discontinued
Lecture/Discussion—4 hours. Prerequisite(s): Admission by placement examination or consent of coordinator; open to international and ESL graduate students and limited status international undergraduates (Education Abroad Program participants). Multi-skills ESL course designed to help international/ESL students improve their English language skills for successful academic study. Emphasis on writing, speaking, listening, reading, and academic culture. (P/NP grading only.) Effective: 2019 Winter Quarter.

LIN 026—Writing for International Graduate Students (3) Review all entries
Lecture—3 hours. Prerequisite(s): Satisfactory completion of LIN 025 if held for it, or consent of instructor. Admission limited to international graduate students. Focuses on writing needed for academic work, including summaries, critiques, research and grant proposals, memos, resumes, and research papers. Includes a review of grammar needed for writing and some focus on reading skills and American vocabulary and idioms. (P/NP grading only.) Effective: 1997 Winter Quarter.

LIN 026—Writing for International Graduate Students (3) Review all entries Discontinued
Lecture—3 hours. Prerequisite(s): Satisfactory completion of LIN 025 if held for it, or consent of instructor. Admission limited to international graduate students. Focuses on writing needed for academic work, including summaries, critiques, research and grant proposals, memos, resumes, and research papers. Includes a review of grammar needed for writing and some focus on reading skills and American vocabulary and idioms. (P/NP grading only.) Effective: 2019 Winter Quarter.

LIN 096—Directed Group Study in English as a Second Language (1-5)
Variable—1.5 hours. Prerequisite(s): Consent of Instructor. Directed group study of topic in English as a Second Language (ESL). May be repeated for credit May be repeated for credit by consent of the ESL coordinator. (P/NP grading only.) Effective: 1997 Winter Quarter.

LIN 098—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Intended for lower division students. (P/NP grading only.) Effective: 1997 Winter Quarter.
LIN 099—Special Study for Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. Intended for lower division students. (P/NP grading only.) Effective: 1997 Winter Quarter.

LIN 103A—Linguistic Analysis I: Phonetics, Phonology, Morphology (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): LIN 001 recommended. Introduction to fundamental methods and concepts used in linguistic analysis, focusing on phonetic, phonological, and morphological phenomena. Emphasizes development of analytical skills and appreciation of structural regularities and differences among languages. Not open for credit to students who have completed LIN 139. GE credit: AH. Effective: 2017 Winter Quarter.

LIN 103B—Linguistic Analysis II: Morphology, Syntax, Semantics (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): LIN 001 recommended. Introduction to fundamental methods and concepts used in linguistic analysis, focusing on morphological, syntactic, and semantic phenomena. Emphasizes development of analytical skills and appreciation of structural regularities and differences among languages. Not open for credit to students who have completed LIN 140. GE credit: AH. Effective: 2017 Winter Quarter.

LIN 105—Topics in Language and Linguistics (4)
Lecture—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. LIN 001 recommended. Detailed examination of a major contemporary linguistic theory, a major contemporary issue or related set of issues in linguistics, or the structure of a particular language or language family. May be repeated for credit when topic differs. May be repeated for credit. Effective: 2017 Winter Quarter.

LIN 106—English Grammar (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): LIN 001 or LIN 001Y or ENG 003 or UWP 001; or Consent of Instructor. Survey of present-day English grammar as informed by contemporary linguistic theories. The major syntactic structures of English; their variation across dialects, styles, and registers; their development; and their usefulness in describing the conventions of English. (Same course as ENL 106 and UWP 106.) GE credit: AH. Effective: 2018 Winter Quarter.

LIN 111—Introduction to Phonological Theory (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): LIN 103A recommended. Contemporary phonological theory with emphasis on syllable structure, metrical structure, phonology-morphology interaction, and typological variation in these areas, from the perspective of optimality-theoretic approaches. GE credit: AH. Effective: 2017 Winter Quarter.

LIN 112—Phonetics (4)
Lecture—3 hours; Term Paper—1 hour. Prerequisite(s): LIN 001 recommended. Detailed examination of articulatory and acoustic phonetics. GE credit: SE. Effective: 2017 Winter Quarter.

LIN 121—Morphology (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): LIN 103A, 103B recommended. Introduction to the analysis of word structure and the relation of word structure to the lexicon and other grammatical components. GE credit: AH. Effective: 2017 Winter Quarter.

LIN 127—Text Processing and Corpus Linguistics (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): LIN 001, LIN 005, LIN 006, or ANT 004 recommended. Investigation of the lexical organization of human languages through corpus linguistics. Application of principles of linguistic analysis, automatic text processing, and statistical research to solving problems of textual evaluation and classification, as well as information retrieval and extraction. GE credit: AH, QL, SS. Effective: 2017 Winter Quarter.

LIN 131—Introduction to Syntactic Theory (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): LIN 103B recommended. Introduction to syntactic theory, primarily through the examination of a major theory of syntax, emphasizing theoretical reasoning, argumentation, and problems of theory building in syntax. GE credit: AH. Effective: 2017 Winter Quarter.

LIN 141—Semantics (4)
Lecture—3 hours; Term Paper. Prerequisite(s): LIN 103B recommended. Linguistic study of meanings of words and phrases. Meanings expressed by lexical items and derivational and inflectional morphology. Contribution of argument structure, quantification, and coordination to meaning. GE credit: AH. Effective: 2017 Winter Quarter.
LIN 150—Languages of the World (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): LIN 001 or ANT 004 recommended. Survey of the world's languages, their geographical distribution and classification, both genetic and typological. Illustrative descriptions of several major languages from different geographical areas; pidgins and creoles, lingua francas and other languages of widespread use. Not open for credit to students who have completed LIN 050. GE credit: AH, SS, WC. Effective: 2017 Winter Quarter.

LIN 151—Historical Linguistics (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): LIN 103A recommended. Description and methods of the historical study of language, including the comparative method and internal reconstruction; sound change, morphological change, syntactic change, semantic change. GE credit: AH. Effective: 2017 Winter Quarter.

LIN 152—Language Universals and Typology (4)
Lecture—3 hours; Term Paper. Prerequisite(s): LIN 103B recommended. Investigation into common features of all human languages and the classification of languages in terms of their structural features. Theories of universal grammar. Detailed discussion of non-Indo-European languages and comparison with English. GE credit: AH. Effective: 2017 Winter Quarter.

LIN 160—American Voices (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): LIN 001 or LIN 001Y or ANT 004; Or upper division standing recommended. Explores the forms of American English: traditional notions of regional dialects and increasingly important social dialects, reflecting age, class, gender, race, ethnicity, and sexual orientation. The influence of language attitudes on perception of dialect speakers; dialect in media, education, and GE credit: SS, WE. Effective: 2018 Winter Quarter.

LIN 163—Language, Gender, and Society (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): LIN 001 or ANT 004 recommended. Investigation of real and putative (stereotyped) gender-linked differences in language structure and usage, with a consideration of some social and psychological consequences of such differences. Focus is on English, but other languages are also discussed. GE credit: ACGH, DD, SS, WE. Effective: 2017 Winter Quarter.

LIN 165—Introduction to Applied Linguistics (4)
Discussion—1 hour; Lecture—3 hours. Applications of linguistic principles and the analysis of language-related issues in the world. Exploration of a range of language-related problems including issues related to language learning and teaching to issues concerning language and gender, race, class and the media. GE credit: SS, WE. Effective: 2002 Winter Quarter.

LIN 166—The Spanish Language in the United States (4)
Lecture—3 hours; Term Paper. Prerequisite(s): LIN 001 or LIN 001Y or SPA 111N; SPA 023; Or equivalent to SPA 023 recommended. Linguistic features of the varieties of the Spanish language spoken throughout the United States; phonology, morphology, syntax, vocabulary. Focus on the relationship between United States Spanish and other world varieties of Spanish, within a historical framework. GE credit: SS. Effective: 2018 Spring Quarter.

LIN 171—Introduction to Psycholinguistics (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (LIN 001 or LIN 001Y); LIN 103A, LIN 103B recommended. Introduction to psychological issues relating to the implementation of language and linguistic structure during speech production and comprehension and to the implications of research in psychology and related fields for linguistic theory. GE credit: SS. Effective: 2018 Spring Quarter.

LIN 173—Language Development (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (LIN 001 or LIN 001Y); or Consent of Instructor. LIN 103A, 103B recommended. Theory and research on children's acquisition of their native language, including the sound system, grammatical systems, and basic semantic categories. (Same course as EDU 173.) GE credit: SS. Effective: 2018 Spring Quarter.

LIN 175—Biological Basis of Language (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Consent of Instructor. LIN 001 recommended. Overview of issues in the field of neurolinguistics and techniques used to explore representation of language in the human brain. GE credit: SE. Effective: 2017 Winter Quarter.

LIN 177—Computational Linguistics (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Consent of Instructor. LIN 001 recommended. Understanding the nature of language through computer modeling of linguistic abilities. Relationships between human cognition
and computer representations of cognitive processing. Not open for credit to students who have taken LIN 007. GE credit: SE. Effective: 2017 Winter Quarter.

LIN 180—Second Language Learning and Teaching (4)
Lecture/Discussion—4 hours. Prerequisite(s): LIN 001 or LIN 001Y; Or equivalent recommended. Psycholinguistic and sociolinguistic theories of second language learning. Connections between theoretical perspectives and pedagogical practices in formal and informal second language settings, with focus on tutoring. Impact of sociocontextual factors (e.g., gender, ethnicity). Fieldwork requirement. GE credit: SS, WE. Effective: 2018 Winter Quarter.

LIN 182—Multilingualism (4)
Lecture/Discussion—4 hours. Limited enrollment. Issues in multilingualism from a global perspective: e.g., multilingual communities; multilingualism and identity (gender, ethnicity, nationality); language ideologies and educational and sociopolitical policies surrounding multilingualism; acquisition of multilingualism; discursive practices of multilinguals. GE credit: SS, WC, WE. Effective: 2006 Spring Quarter.

LIN 183—Second Language Learning and Teaching (4)
Lecture/Discussion—4 hours. Prerequisite(s): LIN 001 or LIN 001Y; Or equivalent recommended. Psycholinguistic and sociolinguistic theories of second language learning. Connections between theoretical perspectives and pedagogical practices in formal and informal second language settings, with focus on tutoring. Impact of sociocontextual factors (e.g., gender, ethnicity). Fieldwork requirement. GE credit: SS, WE. Effective: 2018 Winter Quarter.

LIN 192—Internship in Linguistics (1-12)
Internship—3-36 hours. Prerequisite(s): LIN 001 or LIN 001Y; Or equivalent course; consent of instructor. Internship applying linguistic-related skills to a fieldwork project in areas such as media, law, or industry, in approved organizations or institutions. Maximum of four units applicable toward major. (P/NP grading only.) Effective: 2018 Winter Quarter.

LIN 194H—Special Study for Honors Students (1-5)
Independent Study—1-5 hours. Prerequisite(s): Consent of Instructor. Open only to linguistics majors of senior standing who qualify for Honors Program. Guided research, under the direction of a faculty member approved by the Program Director, leading to a senior honors thesis. May be repeated for credit for up to 6 units. May be repeated up to 6 unit(s). (P/NP grading only.) Effective: 1997 Winter Quarter.

LIN 197T—Tutoring in Linguistics (1-4)
Discussion—1-4 hours. Prerequisite(s): Consent of Instructor. Upper division standing and consent of department chairperson. Leading of small voluntary discussion groups affiliated with one of the department's regular courses. May be repeated for credit. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

LIN 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

LIN 199—Special Study for Advanced Undergraduates (1-5)
Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

LIN 200A—Foundations of Linguistics I (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Graduate standing. Survey of fundamental issues raised by pre-generative linguistics in the twentieth century, with emphasis on issues crucial to applications of linguistics. Not open for credit to students who have completed LIN 203A. Effective: 2005 Spring Quarter.

LIN 200B—Foundations of Linguistics II (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Graduate standing. Survey of fundamental issues raised by orthodox generative linguistics, with emphasis on issues crucial to applications of linguistics. Not open for credit to students who have completed LIN 203B. Effective: 2005 Spring Quarter.

LIN 200C—Foundations of Linguistics III (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Graduate standing. Survey of fundamental issues raised by contemporary linguistic theories lying outside the generative grammar orthodoxy, with emphasis on issues crucial to applications of linguistics. Effective: 2005 Spring Quarter.

LIN 201—Proseminar (1)
Seminar—1 hour. Introduction to research activity of faculty in the Graduate Group in Linguistics and guest speakers. May be repeated up to 4 unit(s). (S/U grading only.) Effective: 2011 Fall Quarter.

LIN 205A—Topics in Linguistic Theory and Methods (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. Advanced study of current problems in linguistic theory and methodology. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

LIN 205B—Topics in Linguistic Theory and Methods (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. Advanced study of current problems in linguistic theory and methodology. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.
LIN 205C—Topics in Linguistic Theory and Methods (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. Advanced study of current problems in linguistic theory and methodology. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

LIN 205D—Topics in Linguistic Theory and Methods (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. Advanced study of current problems in linguistic theory and methodology. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

LIN 211—Advanced Phonological Theory and Analysis (4)
Lecture—3 hours; Term Paper. Prerequisite(s): LIN 111 Critical examination of current phonological theories. Effective: 1997 Winter Quarter.

LIN 212—Advanced Phonetics (4)
Lecture—3 hours; Term Paper. Prerequisite(s): LIN 112 Advanced investigation of the physiological basis of speech articulation and acoustic phonetics. Effective: 1997 Winter Quarter.

LIN 231—Advanced Syntactic Theory and Analysis (4)
Lecture—3 hours; Term Paper. Prerequisite(s): LIN 131 Critical survey of contemporary theories of syntax. Effective: 1997 Winter Quarter.

LIN 241—Advanced Syntactic Theory and Analysis (4)
Lecture—3 hours; Term Paper. Prerequisite(s): LIN 141; or Consent of Instructor. Advanced critical exploration of contemporary theories of linguistic semantics. Effective: 1997 Winter Quarter.

LIN 250—Principles of Typological Linguistics (4)
Seminar—3 hours; Term Paper. Cross-linguistic comparison and typology, including word order, morphological typology, complex clauses, semantic categories and their grammaticalization, and applications of typology to language acquisition. Effective: 2011 Fall Quarter.

LIN 251—Principles of Historical Linguistics (4)
Lecture—3 hours; Term Paper. Prerequisite(s): LIN 151 Advanced analysis of the theory and methods of historical linguistics. Effective: 1997 Winter Quarter.

LIN 252—Romance Linguistics (4)
Lecture—3 hours; Term Paper. Prerequisite(s): LIN 151 Examination of the development of the Romance languages from Proto-Romance to the modern era. Application and critical examination of methods of historical and comparative linguistics in particular areas of structural change in Romance. Effective: 1997 Winter Quarter.

LIN 253—Speech Perception (4)
Discussion—3 hours; Extensive Writing. Investigation into how listeners map a continuous and variable acoustic signal to a linguistic interpretation. Phonetic context, variation, linguistic knowledge, and sociolinguistics as factors in perceiving speech. Effective: 2017 Winter Quarter.

LIN 260—Variation in Speech Communities (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): LIN 281; or Consent of Instructor. Linguistic variability in time, space, and society. Theoretical issues related to social and linguistic constraints in variation; issues and methods in the quantitative analysis of variation. Speech community, quantitative analytic methods, and the scope of sociolinguistic competence. Effective: 2005 Spring Quarter.

LIN 263—Discourse Analysis: Text in Context (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Graduate standing. Introduction to and application of leading theoretical approaches to the analysis of discourse. Approaches to the analysis of (spoken and written) text in context, tools for analyzing different types of texts (narration, conversation, etc.). Theme/rheme, given/new, anaphora, discourse markers, and Effective: 2005 Spring Quarter.

LIN 264—Current Issues in Language and Gender (4)
Project (Term Project); Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing; prior coursework in Linguistics, Gender Studies, or Cultural Studies is desirable; no expectation of bilingual proficiency. Exploration of the construction and performance of gender through language in cross-cultural perspective and in a variety of contexts: informal conversations, narratives, workplaces, schools, households, the mass media. Special topics may include: language acquisition; multilingualism; ecofeminism; queer theory. May be repeated up to 1 time(s) when topic differs. Effective: 2005 Fall Quarter.

LIN 265—Language, Performance, and Power (4)
Seminar—3 hours; Term Paper. Restricted to graduate standing or consent of instructor. Exploration of the
intersection between linguistic and social theories in the language-state relation and the performance of identity. Ideological sources of language differentiation; nation-building and linguistic difference. Political economic, sociolinguistic, and ethnographic approaches to understanding linguistic inequality. (Same course as ANT 265.)

Effective: 2003 Fall Quarter.

**LIN 275—Neurobiology of Language (4)**

**LIN 280—Theories of Second Language Acquisition (4)**
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Covers theoretical perspectives that direct or have directed research in second language acquisition; explores the relationship between linguistics and language teaching and deals with the individual variables that influence second language learning. Effective: 1998 Fall Quarter.

**LIN 281—Research Methods in TESOL/SLD (4)**
Lecture—3 hours; Term Paper—1 hour. Prerequisite(s): LIN 280 Students will study a variety of research methods in second language research; evaluate research designs and methods of analyses, formulate research questions and hypotheses and design a study of their own, think about various kinds of data they can collect. Effective: 2000 Winter Quarter.

**LIN 282—Individual and Social Aspects of Bilingualism (4)**
Lecture—3 hours; Term Paper. Broad overview of bi- and multilingualism, with focus on theoretical and descriptive research; topics covered range from language processing in bilinguals to code-switching to language as political issue in multilingual states. Effective: 1997 Winter Quarter.

**LIN 283—Politics of Bi and Multilingual Literacies (4)**

**LIN 289—Pedagogical Applications of Second Language Acquisition Theory (4)**
Seminar—3 hours; Term Paper. Prerequisite(s): LIN 280 Pedagogical implications of various theories of second language acquisition, facilitation of language acquisition in classroom settings, and techniques for conducting classroom-based research in language learning. Effective: 1999 Winter Quarter.

**LIN 297T—English as a Second Language Teaching/Tutoring (1-4)**
Tutorial—1-4 hours. Prerequisite(s): LIN 300 or LIN 301 or LIN 302 (can be concurrent); and Consent of Instructor. Teaching classes for ESL graduate students. Aiding the ESL undergraduate composition classes; tutoring foreign graduate student Teaching Assistants in pronunciation. Does not fulfill requirement toward the M.A. degree. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

**LIN 298—Directed Group Study (1-5)**
Variable. Prerequisite(s): Consent of Instructor. Graduate standing. (S/U grading only.) Effective: 1997 Winter Quarter.

**LIN 299—Research (1-12)**
Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

**LIN 300—Language Pedagogy (4)**
Lecture/Discussion—4 hours. Prerequisite(s): Graduate standing in Linguistics or consent of instructor; concurrent enrollment in LIN 297T recommended. Methods of teaching second languages to nonnative speakers, stressing particularly recent linguistic methodology and techniques, as related to teaching and tutoring in the UC Davis ESL program. Effective: 2013 Fall Quarter.

**LIN 301—Teaching Academic Literacy (4)**
Practice; Project (Term Project); Seminar—3 hours; Tutorial—14 hours. Prerequisite(s): LIN 300; or Consent of Instructor. Graduate standing. Methods of teaching advanced academic literacy in a second language, with a focus on ESL composition. Lesson development, teaching and tutoring in the UC Davis ESL program. Effective: 2007 Fall Quarter.

**LIN 302—Recent Research and Special Projects in TESOL (4)**
Lecture—4 hours. Prerequisite(s): LIN 300; LIN 301 Review of recent research in second language acquisition and
the teaching of English to speakers of other languages. Continued teaching and tutoring in the UCD ESL clinic. Each student also designs and reports on a classroom research project. Effective: 1997 Winter Quarter.

**LIN 305—Second Language Literacy and Technology (4)**
Lecture/Discussion—1.5 hours; Web Electronic Discussion—1.5 hours. Prerequisite(s): LIN 002 or equivalent coursework/experience in second language pedagogy; consent of instructor; graduate students only. Limited enrollment. Exploration of literacy theory and critical pedagogy in relation to new instructional and communication technologies. Practicum experience in teaching second language literacy; reflection on connections between theory and practice. Fieldwork requirement. Effective: 2007 Fall Quarter.

**LIN 310—Language Pedagogy for Teacher Educators (4)**
Fieldwork; Project (Term Project); Seminar—3 hours; Tutorial. Prerequisite(s): Admission to Ph.D. program in Linguistics or Foreign Languages, or permission of instructor; significant language teaching experience. Current issues in second language pedagogy, with a focus on communicative methodology, participatory curriculum design, academic literacy, and the social contexts of teaching. Emphasis on reflective teaching and action research. Mentoring of new language teachers. May be repeated up to 12 unit(s). Effective: 2007 Fall Quarter.

**LIN 391—Oral English for ESL Students (3)**
Laboratory—2 hours; Lecture—2 hours. Prerequisite(s): Open only to non-native speakers of English with priority enrollment to international student teaching assistants; completion of any required ESL courses or consent of instructor. Course gives non-native English-speaking students, particularly international student teaching assistants, intensive work in oral English to increase fluency, accuracy, and use of appropriate discourse strategies in academic settings (e.g., seminar, discussion, laboratory). Course may be repeated for credit with consent of coordinator. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

**LIN 396—Teaching Assistant Training Practicum (1-4)**
Variable. Prerequisite(s): Graduate standing. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

**Linguistics for Language Teachers Minor; Linguistics**

**Linguistics for Language Teachers Minor; Linguistics | LIN for Language Teachers Minor**

(College of Letters and Science)

Raul Aranovich, Ph.D., Chairperson of the Department

**Department Office.** 469 Kerr Hall; 530-752-0966; [http://linguistics.ucdavis.edu](http://linguistics.ucdavis.edu)

**Faculty.** [http://linguistics.ucdavis.edu/directory-of-people/lin-faculty](http://linguistics.ucdavis.edu/directory-of-people/lin-faculty)

Linguistics offers two minor programs:

- **General Linguistics**, which provides the student with basic knowledge of language structure and linguistic analysis.
- **Linguistics for Language Teachers**, which especially complements the major in English with the Teaching Area of emphasis; it is also of relevance to students interested in teaching foreign languages.

**Minor Advisor.** G. Zellou

Linguistics for Language Teachers Minor; Linguistics | LIN Courses

Courses in LIN:

LIN 001—Introduction to Linguistics (4)
Discussion—1 hour; Lecture—3 hours. Introduction to the study of language; its nature, diversity, and structure. GE credit: AH, SS. Effective: 1997 Winter Quarter.

LIN 001Y—Introduction to Linguistics (4)
Discussion—1 hour; Web Virtual Lecture—3 hours. Introduction to the study of language; its nature, diversity, and structure. Students may not take both LIN 001 and LIN 001Y for credit. GE credit: AH, SS. Effective: 2014 Spring Quarter.

LIN 003—Language and the Body (4)
Discussion—2 hours; Lecture—2 hours. Open to all students regardless of major. Enrollment will be restricted to 80-100 students. Perspectives on the role of language in issues about bodies. Language-related disabilities. Social implications of language use in discussing body-related conditions. GE credit: OL, SS. Effective: 2018 Winter Quarter.

LIN 005—Global English and Communication (4)
Discussion—2 hours; Lecture—2 hours. English as a global language and its uses in intercultural communication. Cultural, historical, and political dimensions of varieties of English spoken around the world. Experiential grounding in strategies for increasing interpretive and verbal communicative competence for a globalized world. (Same course as CMN 005.) GE credit: AH, OL, SS, WC. Effective: 2012 Spring Quarter.

LIN 006—Language and Society (4)
Discussion—1 hour; Lecture—3 hours. Language as a social phenomenon. Topics include linguistic diversity, language policy, language and identity, language and social structure, speech communities and social networks, the effect of social factors on language variation, linguistic consequences of language contact. GE credit: ACGH, DD, SS, WE. Effective: 2008 Fall Quarter.

LIN 015—Academic Oral Communication (3)
Discussion—2 hours; Lecture—1 hour. Structure of oral communication, critical thinking, and persuasion in classroom discourse in American English and in cross-cultural perspective. GE credit: AH, OL, SS. Effective: 2014 Fall Quarter.

LIN 020—Oral English for International Students (3) Review all entries
Lecture/Discussion—3 hours. Open to non-native speakers of English with priority enrollment to international teaching assistants with qualifying placement exam scores. Intensive work in oral English for international students, to increase fluency, accuracy, and use of appropriate discourse strategies in academic settings (e.g., seminar, discussion, laboratory). Training in segmental features of English sounds, intonation, stress, non-verbal cues, and register. May be repeated for credit. (P/NP grading only.) Effective: 2011 Fall Quarter.

LIN 020—Oral English for International Students (3) Review all entries Discontinued
Lecture/Discussion—3 hours. Open to non-native speakers of English with priority enrollment to international teaching assistants with qualifying placement exam scores. Intensive work in oral English for international students, to increase fluency, accuracy, and use of appropriate discourse strategies in academic settings (e.g., seminar, discussion, laboratory). Training in segmental features of English sounds, intonation, stress, non-verbal cues, and register. May be repeated for credit. (P/NP grading only.) Effective: 2018 Summer Session 2.

LIN 024—English Structures and Strategies in Academic Writing (4) Review all entries
Lecture/Discussion—4 hours. Prerequisite(s): LIN 023 Open to students from language backgrounds other than
English. Practice in academic writing designed to prepare undergraduate students from language backgrounds other than English for successful academic work. Development of academic writing, critical thinking, and reading skills. Development of clear, accurate language for presenting an effective argument. Effective: 2006 Fall Quarter.

LIN 024—English Structures and Strategies in Academic Writing (4) Review all entries Discontinued
Lecture/Discussion—4 hours. Prerequisite(s): LIN 023 Open to students from language backgrounds other than English. Practice in academic writing designed to prepare undergraduate students from language backgrounds other than English for successful academic work. Development of academic writing, critical thinking, and reading skills. Development of clear, accurate language for presenting an effective argument. Effective: 2006 Fall Quarter.

LIN 025—English for International/ESL Graduate Students (4) Review all entries
Lecture/Discussion—4 hours. Prerequisite(s): Admission by placement examination or consent of coordinator; open to international and ESL graduate students and limited status international undergraduates (Education Abroad Program participants). Multi-skills ESL course designed to help international/ESL students improve their English language skills for successful academic study. Emphasis on writing, speaking, listening, reading, and academic culture. (P/NP grading only.) Effective: 2003 Fall Quarter.

LIN 025—English for International/ESL Graduate Students (4) Review all entries Discontinued
Lecture/Discussion—4 hours. Prerequisite(s): Admission by placement examination or consent of coordinator; open to international and ESL graduate students and limited status international undergraduates (Education Abroad Program participants). Multi-skills ESL course designed to help international/ESL students improve their English language skills for successful academic study. Emphasis on writing, speaking, listening, reading, and academic culture. (P/NP grading only.) Effective: 2019 Winter Quarter.

LIN 026—Writing for International Graduate Students (3) Review all entries
Lecture—3 hours. Prerequisite(s): Satisfactory completion of LIN 025 if held for it, or consent of instructor. Admission limited to international graduate students. Focuses on writing needed for academic work, including summaries, critiques, research and grant proposals, memos, resumes, and research papers. Includes a review of grammar needed for writing and some focus on reading skills and American vocabulary and idioms. (P/NP grading only.) Effective: 1997 Winter Quarter.

LIN 026—Writing for International Graduate Students (3) Review all entries Discontinued
Lecture—3 hours. Prerequisite(s): Satisfactory completion of LIN 025 if held for it, or consent of instructor. Admission limited to international graduate students. Focuses on writing needed for academic work, including summaries, critiques, research and grant proposals, memos, resumes, and research papers. Includes a review of grammar needed for writing and some focus on reading skills and American vocabulary and idioms. (P/NP grading only.) Effective: 2019 Winter Quarter.

LIN 096—Directed Group Study in English as a Second Language (1-5)
Variable—1.5 hours. Prerequisite(s): Consent of Instructor. Directed group study of topic in English as a Second Language (ESL). May be repeated for credit. May be repeated for credit by consent of the ESL coordinator. (P/NP grading only.) Effective: 1997 Winter Quarter.

LIN 098—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Intended for lower division students. (P/NP grading only.) Effective: 1997 Winter Quarter.

LIN 099—Special Study for Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. Intended for lower division students. (P/NP grading only.) Effective: 1997 Winter Quarter.

LIN 103A—Linguistic Analysis I: Phonetics, Phonology, Morphology (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): LIN 001 recommended. Introduction to fundamental methods and concepts used in linguistic analysis, focusing on phonetic, phonological, and morphological phenomena. Emphasizes development of analytical skills and appreciation of structural regularities and differences among languages. Not open for credit to students who have completed LIN 139. GE credit: AH. Effective: 2017 Winter Quarter.

LIN 103B—Linguistic Analysis II: Morphology, Syntax, Semantics (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): LIN 001 recommended. Introduction to fundamental methods and concepts used in linguistic analysis, focusing on morphological, syntactic, and semantic phenomena. Emphasizes development of analytical skills and appreciation of structural regularities and differences among
languages. Not open for credit to students who have completed LIN 140. GE credit: AH. Effective: 2017 Winter Quarter.

LIN 105—Topics in Language and Linguistics (4)
Lecture—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. LIN 001 recommended. Detailed examination of a major contemporary linguistic theory, a major contemporary issue or related set of issues in linguistics, or the structure of a particular language or language family. May be repeated for credit when topic differs. May be repeated for credit. Effective: 2017 Winter Quarter.

LIN 106—English Grammar (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): LIN 001 or LIN 001Y or ENG 003 or UWP 001; or Consent of Instructor. Survey of present-day English grammar as informed by contemporary linguistic theories. The major syntactic structures of English; their variation across dialects, styles, and registers; their development; and their usefulness in describing the conventions of English. (Same course as ENL 106 and UWP 106.) GE credit: AH. Effective: 2018 Winter Quarter.

LIN 107—Foundations of Phonological Theory (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): LIN 103A recommended. Contemporary phonological theory with emphasis on syllable structure, metrical structure, phonology-morphology interaction, and typological variation in these areas, from the perspective of optimality-theoretic approaches. GE credit: AH. Effective: 2017 Winter Quarter.

LIN 108—Phonetics (4)
Lecture—3 hours; Term Paper—1 hour. Prerequisite(s): LIN 001 recommended. Detailed examination of articulatory and acoustic phonetics. GE credit: SE. Effective: 2017 Winter Quarter.

LIN 111—Introduction to Phonological Theory (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): LIN 103A recommended. Contemporary phonological theory with emphasis on syllable structure, metrical structure, phonology-morphology interaction, and typological variation in these areas, from the perspective of optimality-theoretic approaches. GE credit: AH. Effective: 2017 Winter Quarter.

LIN 112—Phonetics (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): LIN 103A, 103B recommended. Introduction to the analysis of word structure and the relation of word structure to the lexicon and other grammatical components. GE credit: AH. Effective: 2017 Winter Quarter.

LIN 127—Text Processing and Corpus Linguistics (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): LIN 001, LIN 005, LIN 006, or ANT 004 recommended. Investigation of the lexical organization of human languages through corpus linguistics. Application of principles of linguistic analysis, automatic text processing, and statistical research to solving problems of textual evaluation and classification, as well as information retrieval and extraction. GE credit: AH, QL, SS. Effective: 2017 Winter Quarter.

LIN 131—Introduction to Syntactic Theory (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): LIN 103B recommended. Introduction to syntactic theory, primarily through the examination of a major theory of syntax, emphasizing theoretical reasoning, argumentation, and problems of theory building in syntax. GE credit: AH. Effective: 2017 Winter Quarter.

LIN 141—Semantics (4)
Lecture—3 hours; Term Paper. Prerequisite(s): LIN 103B recommended. Linguistic study of meanings of words and phrases. Meanings expressed by lexical items and derivational and inflectional morphology. Contribution of argument structure, quantification, and coordination to meaning. GE credit: AH. Effective: 2017 Winter Quarter.

LIN 150—Languages of the World (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): LIN 001 or ANT 004 recommended. Survey of the world’s languages, their geographical distribution and classification, both genetic and typological. Illustrative descriptions of several major languages from different geographical areas; pidgins and creoles, lingua francas and other languages of widespread use. Not open for credit to students who have completed LIN 050. GE credit: AH, SS, WC. Effective: 2017 Winter Quarter.

LIN 151—History of Linguistics (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): LIN 103A recommended. Description and methods of the historical study of language, including the comparative method and internal reconstruction; sound change, morphological change, syntactic change, semantic change. GE credit: AH. Effective: 2017 Winter Quarter.

LIN 152—Language Universals and Typology (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): LIN 103B recommended. Investigation into common features of all human languages and the classification of languages in terms of their structural features. Theories of universal

**LIN 160—American Voices (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): LIN 001 or LIN 001Y or ANT 004; Or upper division standing recommended. Explores the forms of American English: traditional notions of regional dialects and increasingly important social dialects, reflecting age, class, gender, race, ethnicity, and sexual orientation. The influence of language attitudes on perception of dialect speakers; dialect in media, education, and GE credit: SS, WE. Effective: 2018 Winter Quarter.

**LIN 163—Language, Gender, and Society (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): LIN 001 or ANT 004 recommended. Investigation of real and putative (stereotyped) gender-linked differences in language structure and usage, with a consideration of some social and psychological consequences of such differences. Focus is on English, but other languages are also discussed. GE credit: ACGH, DD, SS, WE. Effective: 2017 Winter Quarter.

**LIN 165—Introduction to Applied Linguistics (4)**
Discussion—1 hour; Lecture—3 hours. Applications of linguistic principles and the analysis of language-related issues in the world. Exploration of a range of language-related problems including issues related to language learning and teaching to issues concerning language and gender, race, class and the media. GE credit: SS, WE. Effective: 2002 Winter Quarter.

**LIN 166—The Spanish Language in the United States (4)**
Lecture—3 hours; Term Paper. Prerequisite(s): LIN 001 or LIN 001Y or SPA 111N; SPA 023; Or equivalent to SPA 023 recommended. Linguistic features of the varieties of the Spanish language spoken throughout the United States; phonology, morphology, syntax, vocabulary. Focus on the relationship between United States Spanish and other world varieties of Spanish, within a historical framework. GE credit: SS. Effective: 2018 Spring Quarter.

**LIN 171—Introduction to Psycholinguistics (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (LIN 001 or LIN 001Y); LIN 103A, LIN 103B recommended. Introduction to psychological issues relating to the implementation of language and linguistic structure during speech production and comprehension and to the implications of research in psychology and related fields for linguistic theory. GE credit: SS. Effective: 2018 Spring Quarter.

**LIN 173—Language Development (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (LIN 001 or LIN 001Y); or Consent of Instructor. LIN 103A, 103B recommended. Theory and research on children's acquisition of their native language, including the sound system, grammatical systems, and basic semantic categories. (Same course as EDU 173.) GE credit: SS. Effective: 2018 Spring Quarter.

**LIN 175—Biological Basis of Language (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Consent of Instructor. LIN 001 recommended. Overview of issues in the field of neurolinguistics and techniques used to explore representation of language in the human brain. GE credit: SE. Effective: 2017 Winter Quarter.

**LIN 177—Computational Linguistics (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Consent of Instructor. LIN 001 recommended. Understanding the nature of language through computer modeling of linguistic abilities. Relationships between human cognition and computer representations of cognitive processing. Not open for credit to students who have taken LIN 007. GE credit: SE. Effective: 2017 Winter Quarter.

**LIN 180—Second Language Learning and Teaching (4)**
Lecture/Discussion—4 hours. Prerequisite(s): LIN 001 or LIN 001Y; Or equivalent recommended. Psycholinguistic and sociolinguistic theories of second language learning. Connections between theoretical perspectives and pedagogical practices in formal and informal second language settings, with focus on tutoring. Impact of sociocontextual factors (e.g., gender, ethnicity). Fieldwork requirement. GE credit: SS, WE. Effective: 2018 Winter Quarter.

**LIN 182—Multilingualism (4)**
Lecture/Discussion—4 hours. Limited enrollment. Issues in multilingualism from a global perspective: e.g., multilingual communities; multilingualism and identity (gender, ethnicity, nationality); language ideologies and educational and sociopolitical policies surrounding multilingualism; acquisition of multilingualism; discursive practices of multilinguals. GE credit: SS, WC, WE. Effective: 2006 Spring Quarter.
LIN 192—Internship in Linguistics (1-12)
Internship—3-36 hours. Prerequisite(s): LIN 001 or LIN 001Y; Or equivalent course; consent of instructor. Internship applying linguistic-related skills to a fieldwork project in areas such as media, law, or industry, in approved organizations or institutions. Maximum of four units applicable toward major. (P/NP grading only.) Effective: 2018 Winter Quarter.

LIN 194H—Special Study for Honors Students (1-5)
Independent Study—1-5 hours. Prerequisite(s): Consent of Instructor. Open only to linguistics majors of senior standing who qualify for Honors Program. Guided research, under the direction of a faculty member approved by the Program Director, leading to a senior honors thesis. May be repeated for credit for up to 6 units. May be repeated up to 6 unit(s). (P/NP grading only.) Effective: 1997 Winter Quarter.

LIN 197T—Tutoring in Linguistics (1-4)
Discussion—1-4 hours. Prerequisite(s): Consent of Instructor. Upper division standing and consent of department chairperson. Leading of small voluntary discussion groups affiliated with one of the department's regular courses. May be repeated for credit. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

LIN 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

LIN 199—Special Study for Advanced Undergraduates (1-5)
Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

LIN 200A—Foundations of Linguistics I (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Graduate standing. Survey of fundamental issues raised by pre-generative linguistics in the twentieth century, with emphasis on issues crucial to applications of linguistics. Not open for credit to students who have completed LIN 203A. Effective: 2005 Spring Quarter.

LIN 200B—Foundations of Linguistics II (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Graduate standing. Survey of fundamental issues raised by orthodox generative linguistics, with emphasis on issues crucial to applications of linguistics. Not open for credit to students who have completed LIN 203B. Effective: 2005 Spring Quarter.

LIN 200C—Foundations of Linguistics III (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Graduate standing. Survey of fundamental issues raised by contemporary linguistic theories lying outside the generative grammar orthodoxy, with emphasis on issues crucial to applications of linguistics. Effective: 2005 Spring Quarter.

LIN 201—Proseminar (1)
Seminar—1 hour. Introduction to research activity of faculty in the Graduate Group in Linguistics and guest speakers. May be repeated up to 4 unit(s). (S/U grading only.) Effective: 2011 Fall Quarter.

LIN 205A—Topics in Linguistic Theory and Methods (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. Advanced study of current problems in linguistic theory and methodology. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

LIN 205B—Topics in Linguistic Theory and Methods (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. Advanced study of current problems in linguistic theory and methodology. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

LIN 205C—Topics in Linguistic Theory and Methods (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. Advanced study of current problems in linguistic theory and methodology. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

LIN 205D—Topics in Linguistic Theory and Methods (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. Advanced study of current problems in linguistic theory and methodology. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

LIN 211—Advanced Phonological Theory and Analysis (4)
Lecture—3 hours; Term Paper. Prerequisite(s): LIN 111 Critical examination of current phonological theories. Effective: 1997 Winter Quarter.

LIN 212—Advanced Phonetics (4)
Lecture—3 hours; Term Paper. Prerequisite(s): LIN 112 Advanced investigation of the physiological basis of speech articulation and acoustic phonetics. Effective: 1997 Winter Quarter.
LIN 231—Advanced Syntactic Theory and Analysis (4)
Lecture—3 hours; Term Paper. Prerequisite(s): LIN 131 Critical survey of contemporary theories of syntax. Effective: 1997 Winter Quarter.

LIN 241—Advanced Syntactic Theory and Analysis (4)
Lecture—3 hours; Term Paper. Prerequisite(s): LIN 141; or Consent of Instructor. Advanced critical exploration of contemporary theories of linguistic semantics. Effective: 1997 Winter Quarter.

LIN 250—Principles of Typological Linguistics (4)
Seminar—3 hours; Term Paper. Cross-linguistic comparison and typology, including word order, morphological typology, complex clauses, semantic categories and their grammaticalization, and applications of typology to language acquisition. Effective: 2011 Fall Quarter.

LIN 251—Principles of Historical Linguistics (4)
Lecture—3 hours; Term Paper. Prerequisite(s): LIN 151 Advanced analysis of the theory and methods of historical linguistics. Effective: 1997 Winter Quarter.

LIN 252—Romance Linguistics (4)
Lecture—3 hours; Term Paper. Prerequisite(s): LIN 151 Examination of the development of the Romance languages from Proto-Romance to the modern era. Application and critical examination of methods of historical and comparative linguistics in particular areas of structural change in Romance. Effective: 1997 Winter Quarter.

LIN 253—Speech Perception (4)
Discussion—3 hours; Extensive Writing. Investigation into how listeners map a continuous and variable acoustic signal to a linguistic interpretation. Phonetic context, variation, linguistic knowledge, and sociolinguistics as factors in perceiving speech. Effective: 2017 Winter Quarter.

LIN 260—Variation in Speech Communities (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): LIN 281; or Consent of Instructor. Linguistic variability in time, space, and society. Theoretical issues related to social and linguistic constraints in variation; issues and methods in the quantitative analysis of variation. Speech community, quantitative analytic methods, and the scope of sociolinguistic competence. Effective: 2005 Spring Quarter.

LIN 263—Discourse Analysis: Text in Context (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Graduate standing. Introduction to and application of leading theoretical approaches to the analysis of discourse. Approaches to the analysis of (spoken and written) text in context, tools for analyzing different types of texts (narration, conversation, etc.). Theme/rheme, given/new, anaphora, discourse markers, and Effective: 2005 Spring Quarter.

LIN 264—Current Issues in Language and Gender (4)
Project (Term Project); Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing; prior coursework in Linguistics, Gender Studies, or Cultural Studies is desirable; no expectation of bilingual proficiency. Exploration of the construction and performance of gender through language in cross-cultural perspective and in a variety of contexts: informal conversations, narratives, workplaces, schools, households, the mass media. Special topics may include: language acquisition; multilingualism; ecofeminism; queer theory. May be repeated up to 1 time(s) when topic differs. Effective: 2005 Fall Quarter.

LIN 265—Language, Performance, and Power (4)
Seminar—3 hours; Term Paper. Restricted to graduate standing or consent of instructor. Exploration of the intersection between linguistic and social theories in the language-state relation and the performance of identity. Ideological sources of language differentiation; nation-building and linguistic difference. Political economic, sociolinguistic, and ethnographic approaches to understanding linguistic inequality. (Same course as ANT 265.) Effective: 2003 Fall Quarter.

LIN 275—Neurobiology of Language (4)

LIN 280—Theories of Second Language Acquisition (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Covers theoretical perspectives that direct or have directed research in second language acquisition; explores the relationship between linguistics and language teaching and deals with the individual variables that influence second language learning. Effective: 1998 Fall Quarter.
LIN 281—Research Methods in TESOL/SLD (4)
Lecture—3 hours; Term Paper—1 hour. Prerequisite(s): LIN 280 Students will study a variety of research methods in second language research; evaluate research designs and methods of analyses, formulate research questions and hypotheses and design a study of their own, think about various kinds of data they can collect. Effective: 2000 Winter Quarter.

LIN 282—Individual and Social Aspects of Bilingualism (4)
Lecture—3 hours; Term Paper. Broad overview of bi- and multilingualism, with focus on theoretical and descriptive research; topics covered range from language processing in bilinguals to code-switching to language as political issue in multilingual states. Effective: 1997 Winter Quarter.

LIN 283—Politics of Bi and Multilingual Literacies (4)

LIN 289—Pedagogical Applications of Second Language Acquisition Theory (4)
Seminar—3 hours; Term Paper. Prerequisite(s): LIN 280 Pedagogical implications of various theories of second language acquisition, facilitation of language acquisition in classroom settings, and techniques for conducting classroom-based research in language learning. Effective: 1999 Winter Quarter.

LIN 297T—English as a Second Language Teaching/Tutoring (1-4)
Tutorial—1-4 hours. Prerequisite(s): LIN 300 or LIN 301 or LIN 302 (can be concurrent); and Consent of Instructor. Teaching classes for ESL graduate students. Aiding the ESL undergraduate composition classes; tutoring foreign graduate student Teaching Assistants in pronunciation. Does not fulfill requirement toward the M.A. degree. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

LIN 298—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Graduate standing. (S/U grading only.) Effective: 1997 Winter Quarter.

LIN 299—Research (1-12)
Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

LIN 300—Language Pedagogy (4)
Lecture/Discussion—4 hours. Prerequisite(s): Graduate standing in Linguistics or consent of instructor; concurrent enrollment in LIN 297T recommended. Methods of teaching second languages to nonnative speakers, stressing particularly recent linguistic methodology and techniques, as related to teaching and tutoring in the UC Davis ESL program. Effective: 2013 Fall Quarter.

LIN 301—Teaching Academic Literacy (4)
Practice; Project (Term Project); Seminar—3 hours; Tutorial—14 hours. Prerequisite(s): LIN 300; or Consent of Instructor. Graduate standing. Methods of teaching advanced academic literacy in a second language, with a focus on ESL composition. Lesson development, teaching and tutoring in the UC Davis ESL program. Effective: 2007 Fall Quarter.

LIN 302—Recent Research and Special Projects in TESOL (4)
Lecture—4 hours. Prerequisite(s): LIN 300; LIN 301 Review of recent research in second language acquisition and the teaching of English to speakers of other languages. Continued teaching and tutoring in the UCD ESL clinic. Each student also designs and reports on a classroom research project. Effective: 1997 Winter Quarter.

LIN 305—Second Language Literacy and Technology (4)
Lecture/Discussion—1.5 hours; Web Electronic Discussion—1.5 hours. Prerequisite(s): LIN 002 or equivalent coursework/experience in second language pedagogy; consent of instructor; graduate students only. Limited enrollment. Exploration of literacy theory and critical pedagogy in relation to new instructional and communication technologies. Practicum experience in teaching second language literacy; reflection on connections between theory and practice. Fieldwork requirement. Effective: 2007 Fall Quarter.

LIN 310—Language Pedagogy for Teacher Educators (4)
Fieldwork; Project (Term Project); Seminar—3 hours; Tutorial. Prerequisite(s): Admission to Ph.D. program in Linguistics or Foreign Languages, or permission of instructor; significant language teaching experience. Current issues in second language pedagogy, with a focus on communicative methodology, participatory curriculum design, academic literacy, and the social contexts of teaching. Emphasis on reflective teaching and action research. Mentoring of new language teachers. May be repeated up to 12 unit(s). Effective: 2007 Fall Quarter.
LIN 391—Oral English for ESL Students (3) **Review all entries**
Laboratory—2 hours; Lecture—2 hours. Prerequisite(s): Open only to non-native speakers of English with priority enrollment to international student teaching assistants; completion of any required ESL courses or consent of instructor. Course gives non-native English-speaking students, particularly international student teaching assistants, intensive work in oral English to increase fluency, accuracy, and use of appropriate discourse strategies in academic settings (e.g., seminar, discussion, laboratory). Course may be repeated for credit with consent of coordinator. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

LIN 391—Oral English for ESL Students (3) **Review all entries Discontinued**
Laboratory—2 hours; Lecture—2 hours. Prerequisite(s): Open only to non-native speakers of English with priority enrollment to international student teaching assistants; completion of any required ESL courses or consent of instructor. Course gives non-native English-speaking students, particularly international student teaching assistants, intensive work in oral English to increase fluency, accuracy, and use of appropriate discourse strategies in academic settings (e.g., seminar, discussion, laboratory). Course may be repeated for credit with consent of coordinator. May be repeated for credit. (S/U grading only.) Effective: 2019 Winter Quarter.

LIN 396—Teaching Assistant Training Practicum (1-4)
Variable. Prerequisite(s): Graduate standing. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

**Luso-Brazilian Studies Minor; Spanish**

**Luso-Brazilian Studies Minor; Spanish | Luso-Brazilian Studies Minor**
(College of Letters and Science)

The Department of Spanish and Portuguese sponsors the minor in Luso-Brazilian Studies, which offers students the opportunity to engage with the Portuguese-speaking world as a global space, as well as gain in-depth knowledge of Brazilian literature, culture and society. The minor is structured to facilitate engagement with Latin American, peninsular, and transatlantic topics, while ensuring that students master the essential skills of linguistic competence, and literary and cultural knowledge.

**Education Abroad Program Options.** We highly recommend that students participate in study abroad; see [http://studyabroad.ucdavis.edu](http://studyabroad.ucdavis.edu). Courses taken abroad may count toward the Luso-Brazilian Studies minor.

**Minor Advisor.** L. Bernucci, R. Newcomb

Faculty. http://gsm.ucdavis.edu/faculty-and-research-0

Program of Study

The hallmark of the UC Davis MBA program is its flexibility. Students are required to take ten core courses, 30 units, and 42 units of elective coursework for the 72 units required for the degree. The required core curriculum is designed to provide students foundation in the functional areas of business-accounting, economics, finance, marketing, organizational behavior, statistics, and strategy. These management disciplines are examined through the use of case studies, lectures and the analysis of a few select companies on which to base illustrations and spark discussions. As early as the first year of study, students are able to integrate elective courses into their personal curriculum.

Elective courses at the Graduate School of Management place an emphasis on real-world application of management principles through the use of executive guest speakers who present “live” case study analyses and actual “client” businesses for student projects. Many courses require team projects and emphasize managing by innovation and entrepreneurialism. These team projects develop your independent research abilities and hone your presentation skills.

Most students choose functional concentrations such as:

• Business Analytics and Technologies
• Entrepreneurship
• Finance/Accounting
• Marketing
• Management
• Strategy

Management, Graduate School of | MGB Courses

Students must complete the Management core course requirement before enrolling in any of the following elective courses, or petition with consent of the instructor. The core courses include: 200A, 201A, 201B, 202A, 203A, 204, 205, 252, 268, 440, 440A, 440B, 440C. For a list of elective courses, see https://webapps.gsm.ucdavis.edu/Raps/courses/curriculumOverviewByProgram?program=SMBA.

Courses in MGB:

MGB 200A—Financial Accounting (3)
Lecture—3 hours. Prerequisite(s): Graduate student in the Graduate School of Management. Introduction to the concepts and objectives underlying the preparation of financial statements. Topics include understanding the accounting cycle, measurement and valuation problems associated with financial statement components, consideration of the usefulness of financial statements in the analysis of a corporation's operations. Effective: 2009 Fall Quarter.
MGB 200B—Managerial Accounting (3)
Lecture—3 hours. Prerequisite(s): MGT 200A or MGB 200A or MGP 200A Information managers should know to be effective, including: product costing, motivating people, and differential analysis for decision making. Includes team projects and written and oral presentations. Effective: 2017 Fall Quarter.

MGB 201A—The Individual and Group Dynamics (3)
Lecture—3 hours. Prerequisite(s): Graduate student in the Graduate School of Management. Examines basic psychological and social psychological processes shaping human behavior and applies knowledge of these processes to the following organizational problems: motivation, job design, commitment, socialization, culture, individual and group decision making, and team building. Effective: 2009 Fall Quarter.

MGB 201B—Organizational Strategy and Structure (3)
Lecture/Discussion—3 hours. Prerequisite(s): Completion of first year courses in Graduate School of Management or the equivalent. Open to MBA students only. Strategic management of organizations, including analysis of industries, firm resources and capabilities and corporate strategy. Strategy formulation, implementation and strategic decision-making. Firm and industry life cycles and change. Analysis of organizational design and structure including differentiation and integration. Effective: 2011 Fall Quarter.

MGB 202A—Markets and the Firm (3)
Lecture—3 hours. Prerequisite(s): Graduate student in the Graduate School of Management. Examines the interaction of consumers, firms and government, and the effect this interaction has on the use of resources and firm profitability. Fundamental economic concepts such as marginal analysis, opportunity cost, pricing, and externalities are introduced and applied. Effective: 2009 Fall Quarter.

MGB 202B—Business, Government, and the International Economy (3)
Lecture—3 hours. Prerequisite(s): MGB 202A or MGT 202A or MGP 202A Examines the influence of government and international factors on business. Topics include distribution of income, business cycles, inflation and interest rates, the federal debt, monetary policy and international trade and finance. Effective: 2017 Fall Quarter.

MGB 203A—Data Analysis for Managers (3)
Lecture—3 hours. Prerequisite(s): Graduate student in the Graduate School of Management MBA program or consent of instructor. Introduction to statistics and data analysis for managerial decision making. Descriptive statistics, principles of data collection, sampling, quality control, statistical inference. Application of data analytic methods to problems in marketing, finance, accounting, production, operations, and public policy. Effective: 2009 Fall Quarter.

MGB 203B—Forecasting and Managerial Research Methods (3)
Lecture—3 hours. Prerequisite(s): MGT 203A or MGP 203A or MGB 203A Practical statistical methods for managerial decision making covers regression analysis, time series analysis and forecasting, design and analysis of experiments in managerial research and contingency table analysis. Application of these methods to marketing, finance, accounting, production, operations, and public policy. Effective: 2009 Fall Quarter.

MGB 204—Marketing Management (3)
Lecture—3 hours. Prerequisite(s): Graduate student in the Graduate School of Management. Analysis of market opportunities, elements of market research, development of marketing strategies, market planning and implementations, and control systems. Consumer and industrial markets, market segmentation, pricing strategies, distribution channels, promotion, and sales. Effective: 2009 Fall Quarter.

MGB 205—Financial Theory and Policy (3)
Lecture—3 hours. Prerequisite(s): Graduate student in the Graduate School of Management. Corporate financial policy and investment management. Covers capital budgeting, optimal financial structure, cost-of-capital determination, risk measurement. Develops basic valuation principles for investments with long-lived and risky cash-flows, and extends these to derivative securities, asset portfolios, investment management and hedging. Effective: 2010 Spring Quarter.

MGB 206—Decision Making and Management Science (3)
Lecture—3 hours. Prerequisite(s): Graduate student in the Graduate School of Management MBA program or consent of instructor. Develops decision-making and problem-solving skills in conjunction with a quantitative model-building approach. Emphasizes how structured modeling techniques, probability forecasts, simulations, and computer optimization models are used in the overall process of making decisions in an uncertain environment. Effective: 2009 Fall Quarter.
MGB 207—Management Information Systems (3)
Lecture—3 hours. Prerequisite(s): Graduate Student or consent of instructor. Introduction to computer programming and data handling skills. Use of computer in organizations, emphasis on managerial aspects of computing. Standard and nonstandard uses of data files, centralization versus decentralization of computing, office automation, computer security. Effective: 2009 Fall Quarter.

MGB 215—Business Law (3)
Lecture—3 hours. Prerequisite(s): Completion of administration core requirements or petition with consent of instructor. Introduction to law and legal process in the United States. Sources of law. Structure and operation of courts, federal-state relationships, fundamentals of administrative law, fundamentals of business law. Effective: 2009 Fall Quarter.

MGB 216—Managing Professionals, Budgets, Controls and Ethics (3)
Lecture—3 hours. Prerequisite(s): Graduate standing. Performance measures, budgetary controls and ethical pressures which occur at middle management levels in service-type operations. Addresses such organizations as engineering, medical groups, law offices, management consultants. Effective: 2009 Fall Quarter.

MGB 220—Management of Social Networks (3)
Lecture/Discussion—3 hours. Prerequisite(s): MGB 201A Open to MBA students only. Principles and applications of social network theory: coordinating divergent interests to create value for individuals and organizations. Emphasis on conceptual models, web-based diagnostic tools, and practical applications. Effective: 2009 Fall Quarter.

MGB 223—Power and Influence in Management (3)
Seminar—3 hours. Prerequisite(s): MGT 201A or MGB 201A or MGP 201A; Consent of Instructor. Investigation of the bases of power in organizations and the tactics used to translate power into influence. Topics include the control of resources (including information), social psychological processes (including commitment), the construction of meaning, and ethics. Effective: 2017 Fall Quarter.

MGB 224—Managing People in High-Performance Organizations (3)
Lecture—3 hours. Prerequisite(s): MGT 201A or MGB 201A or MGP 201A Restricted to students in the MBA program. Strategic approach to the management of people within organization. Analyze employment systems' fit with firms' environments and strategies. Explore consequences of choices firms make in managing people—decisions as to selection, performance evaluation, compensation, and other management policies and practices. Not open to students who have taken MGT 224 or MGP 224. Effective: 2017 Fall Quarter.

MGB 234—Pricing (3)
Lecture/Discussion—3 hours. Prerequisite(s): (MGT 202A or MGB 202A or MGP 202A); (MGP 203B or MGB 203B or MGT 203B); (MGT 204 or MGB 204 or MGP 204) Restricted to students in the MBA program. Combines lectures, cases and homework to teach students tools and skills necessary to analyze pricing situations, make pricing decisions, and implement them, in a systematic manner. Effective: 2017 Fall Quarter.

MGB 239—Digital Marketing (3)
Lecture/Discussion—3 hours. Prerequisite(s): MGB 204 or MGT 204 or MGP 204 Course equips students for a career in digital marketing and social media. Topics include online advertising, search engine optimization, interactive mktg, online privacy issues, e-commerce, social influence, social network theory, measurement of social influence, integrating social and traditional media. Effective: 2017 Fall Quarter.

MGB 240—Management Policy and Strategy (3)
Lecture—3 hours. Prerequisite(s): First-year core courses of M.B.A. program. Examines the scope of missions, objectives strategies, policies, structures, measurements and incentives which bear on the management of an organization. Real client organizations, in the private and public sectors, are assigned to student teams as the subjects of study. Effective: 2009 Fall Quarter.

MGB 241—New Product Development (3)
Lecture/Discussion—3 hours. Prerequisite(s): MGT 204 or MGB 204 or MGP 204 Open to graduate students in the Graduate School of Management. State-of-the-art concepts and methods to enhance the effectiveness of new product development activities. Focuses on the understanding of managerial issues and acquiring the ability to solve problems. Effective: 2017 Fall Quarter.

MGB 242—Marketing Communications (3)
Lecture—3 hours. Issues in designing a marketing communications strategy. Topics include mass and direct communications, institutional aspects of advertising, consumer behavior, evaluating ad effectiveness, determining ad budget, creative strategy, and use and abuse of promotions. Effective: 2009 Fall Quarter.
MGB 243—Customer Relationship Management (3)
Lecture/Discussion—3 hours. Prerequisite(s): MGT 204 or MGB 204 or MGP 204 Restricted to MBA students only. Customer Relationship Management (CRM) is a management approach under which marketing activities are organized and measured around customers (rather than around brands.) This approach is appealing because customers, not brands, are those who make buying decisions. Effective: 2017 Fall Quarter.

MGB 244—New and Small Business Ventures (3)
Lecture—3 hours. Prerequisite(s): MGT 204 or MGP 204 or MGB 204 Student teams develop complete business plans for their own start-up ventures. Process includes: elevator pitch, business strategy, comprehensive bottoms-up financial projections, capital requirements, product differentiation, competitive, alliance, and go-to-market strategy development, investor presentation, and comprehensive written business plan. Effective: 2017 Fall Quarter.

MGB 245—Business Writing (3)
Lecture/Discussion—3 hours. Prerequisite(s): Completion of first-year core courses at the Graduate School of Management or the equivalent. Restricted to MBA students only. Techniques for sharpening writing skills are introduced, along with grammatical structure, word choice, and punctuation. Learn to develop styles that are pitch-perfect for given situations and to think strategically about each communication challenge in a management setting. Effective: 2011 Fall Quarter.

MGB 246—Negotiation and Team Building (3)
Lecture/Discussion—3 hours. Prerequisite(s): MGB 205; MGB 202. Basic theory of negotiation; applies theory to process of building teams to achieve business purposes. Covers integrative and distributive strategies of claiming value, how to recognize bargaining tricks, uncovering hidden agendas, brainstorming to extend Pareto frontier. Effective: 2011 Fall Quarter.

MGB 247—Customer Service as a Marketing Tool (3)
Lecture—3 hours. Understanding the distinct features of services, how to create value through service, methods of building strong relationships with customers, methods of measuring and building customer satisfaction, and measuring the financial impact of service improvement. Effective: 2009 Fall Quarter.

MGB 248—Marketing Strategies (3)
Lecture—3 hours. Prerequisite(s): (MGT 202A or MGB 202A or MGP 202A); (MGP 204 or MGT 204 or MGB 204) Examines process by which organizations develop strategic marketing plans. Includes definition of activities and products, marketing audits, appraising market opportunities, design of new activities and products, and organizing marketing planning function. Applications to problems in private and public sector marketing. Effective: 2017 Fall Quarter.

MGB 249—Marketing Research (3)
Lecture—3 hours. Prerequisite(s): (MGT 202A or MGB 202A or MGP 202A); (MGP 203A or MGB 203A or MGT 203A); (MGT 204 or MGB 204 or MGP 204) Course addresses the managerial issues and problems of systematically gathering and analyzing information for making private and public marketing decisions. Covers the cost and value of information, research design, information collection, measuring instruments, data analysis, and marketing research applications. Effective: 2017 Fall Quarter.

MGB 250—Technology Competition and Strategy (3)
Lecture—3 hours. Prerequisite(s): (MGT 202A or MGB 202A or MGP 202A); (MGP 203A or MGB 203A or MGT 203A) Restricted to students in the MBA program. Why is software typically so defective? Why do many firms in the IT industry give away their best products free? This course helps you analyze questions like these by modeling competition and strategy in the network, technology and information industries. Effective: 2017 Fall Quarter.

MGB 251—Management of Innovation (3)
Lecture—3 hours. Prerequisite(s): MGT 201A or MGB 201A or MGP 201A Managing innovative enterprise in changing and uncertain environments. Covers technology forecasting and assessment, program selection and control, financial management, regulation, and ethics. Effective: 2017 Fall Quarter.

MGB 252—Managing for Operational Excellence (3)
Lecture—3 hours. Prerequisite(s): MGB 203A or MGP 203A or MGT 203A Open to students in the Graduate School of Management. Explores the management of operations as applied to manufacturing as well as services provided both inside and outside the organization. Develop an understanding of how uncertainty affects planning and delivery by looking at fundamental models of operations. Effective: 2018 Spring Quarter.

MGB 253—Corporate Social Responsibility (3)
Lecture—3 hours. Goal in this course will be to develop a thought process and approach to corporate social
responsibility that students will be able to build on during their post-school leadership roles, whether as corporate executives, entrepreneurs, or NGO leaders. Effective: 2016 Spring Quarter.

MGB 255—Entrepreneurship and Venture Investment Clinic (3)
Lecture—3 hours. Class size limited to 30 students. Provides the necessary analytical and design tools to create business ideas and refine business models based on emerging technologies. Students learn to work closely in small teams to synthesize technical, strategic, and marketing needs into designs for new ventures. Effective: 2016 Spring Quarter.

MGB 258—Mergers and Acquisitions (3)
Lecture—3 hours. Prerequisite(s): MGB 205 Course focuses on the market for corporate acquisitions and restructuring activity. Topics include: sources of value creation; takeovers; anti-takeover provisions; bidding strategies; use of leverage in buyouts; regulatory risk and hurdles; and, valuation approaches for highly leveraged transactions. Effective: 2015 Spring Quarter.

MGB 259—Banking and the Financial System (3)
Lecture—3 hours. Prerequisite(s): MGP 205 or MGT 205; Consent of Instructor. Analyzes the role of financial markets and institutions in allocating capital. Focuses on: bank lending; debt securities; financial market innovations; regulation; functions of commercial banks and other financial intermediaries. Utilizes case studies. Effective: 2016 Spring Quarter.

MGB 260—Corporate Finance (3)
Lecture—3 hours. Prerequisite(s): (MGT 200A or MGB 200A or MGP 200A); (MGP 202A or MGB 202A or MGT 202A); (MGT 205 or MGB 205 or MGP 205) Focuses on planning, acquiring, and managing a company's financial resources. Includes discussion of financial aspects of mergers and other forms of reorganization; analysis of investment, financial, and dividend policy; and theories of optimal capital structure. Effective: 2017 Fall Quarter.

MGB 261—Investment Analysis (3)
Lecture—3 hours. Prerequisite(s): (MGT 203A or MGB 203A or MGP 203A); (MGP 205 or MGT 205 or MGB 205) Examines asset pricing theories and relevant evidence, including the investment performance of stocks and bonds. Topics include the efficiency of markets, domestic and international portfolio diversification, factors influencing the value of stocks and other investments, and portfolio management and performance. Effective: 2017 Fall Quarter.

MGB 262—Money and Security Markets (3)
Lecture—3 hours. Examines how money and securities markets are organized; how public agencies, businesses, others obtain and invest funds in those markets. Relationship between interest rates, monetary policy, government's role in improving capital markets, approaches to assessing changes in regulation of specific markets. Effective: 2009 Fall Quarter.

MGB 263—Derivative Securities (3)
Lecture/Discussion—3 hours. Prerequisite(s): (MGT 203A or MGB 203A or MGP 203A); (MGT 205 or MGB 205 or MGP 205) Open to students enrolled in the MBA program. Behavior of options, futures, and other derivative securities markets and how public agencies, business and others use those markets. Trading strategies involving options, swaps, and financial futures contracts. Pricing of derivative securities, primarily by arbitrage methods. Effective: 2017 Fall Quarter.

MGB 264—Business Taxation (3)

MGB 265—Venture Capital and the Finance of Innovation (3)
Lecture/Discussion—3 hours. Prerequisite(s): MGT 205 or MGB 205 or MGP 205 Restricted to students in the MBA program. Examines venture capital finance and the related practice of R&D finance. Goal is to apply finance tools and framework to the world of venture capital and financing of projects in high-growth industries. Effective: 2017 Fall Quarter.

MGB 266—International Finance (3)
Lecture—3 hours. Prerequisite(s): MGT 205 or MGB 205 or MGP 205; Or the equivalent. Studies fixed and floating exchange-rate systems. Topics include determinants of a nation's balance of international payments; macroeconomic interdependence of nations under various exchange-rate regimes and its implications for domestic stabilization policies; and the international coordination of monetary and stabilization policies. Effective: 2017 Fall Quarter.
MGB 267—Teams and Technology (3)
Lecture/Discussion—3 hours. Prerequisite(s): Consent of Instructor. Restricted to working professional MBA students. Theory and practice of managing teams with primary goals of: providing conceptual guidelines for analyzing and diagnosing group dynamics and determining strategic options as a manager; imparting interpersonal skills for implementing effective strategies; understanding how technological change affects team processes. Effective: 2010 Fall Quarter.

MGB 268—Articulation and Critical Thinking (3)
Lecture/Discussion—3 hours. With commitment to this course, students will become competent public speakers, write well at a level expected in business, think efficiently and critically about business challenges and have a useful personal code of ethics to shape their actions and decisions. No student may repeat course for credit. Effective: 2014 Winter Quarter.

MGB 269—Business Intelligence Technologies-Data Mining (3)

MGB 270—Corporate Financial Reporting (3)
Lecture—3 hours. Prerequisite(s): MGT 200A or MGP 200A or MGB 200A Analyzes and evaluates contemporary issues in financial reporting and develops implications of those issues for business decision makers, investment managers, and accounting policymakers. Effective: 2017 Fall Quarter.

MGB 271—Strategic Cost Management (3)
Lecture/Discussion—3 hours. Prerequisite(s): MGT 202A or MGP 202A or MGB 202A Restricted to students in the MBA program. Theoretical frameworks and associated techniques for using organizational design and cost management to achieve a sustainable, profitable cost structure. Topics include: target costing, process design for low cost, total cost of ownership, cost of customers, implementing structural change, and incentives. Effective: 2017 Fall Quarter.

MGB 272—Evaluation of Financial Information (3)
Lecture—3 hours. Prerequisite(s): MGT 200A or MGP 200A or MGB 200A Studies how investors, creditors, others use accounting and other information in making rational investment, lending decisions. Emphasis is placed on the analysis of financial information in a variety of contexts. Where applicable, recent research in finance and economics is discussed. Effective: 2017 Fall Quarter.

MGB 273—Accounting and Reporting for Government Nonprofit Entities (3)
Lecture—3 hours. Concepts, methods, and uses of accounting and financial reporting by governmental and nonprofit entities. Introduction to budgeting and performance evaluation, and accounting for entities such as hospitals, universities, and welfare agencies. Effective: 2009 Fall Quarter.

MGB 274—Corporate Governance (3)
Lecture—3 hours. Prerequisite(s): Full-time MBA students or consent of instructor. Discusses how corporations can better operate in the interests of shareholders and public. Directly relevant to managers, consultants in compensation and incentives, staff working on mergers and acquisitions, corporate regulators, shareholder rights activists, and board members. Effective: 2009 Fall Quarter.

MGB 276—Real Estate, Finance and Development (3)
Lecture—3 hours. Prerequisite(s): (MGT 205 or MGP 205 or MGB 205); (MGT 201A or MGB 201A or MGP 201A) Focus on single family, attached, detached, multi-family, and light commercial development. Students will study factors which make up successful real estate developments. Course will consider financial aspects involved in land acquisition, land development, construction, and project lending. Effective: 2017 Fall Quarter.

MGB 281—Systems Analysis and Design (3)
Lecture—3 hours. Design and specification of computer-based information systems. Applications systems development life cycle, use requirements and feasibility assessment, logical and physical design, program development and testing, conversion and implementation. Effective: 2015 Spring Quarter.

MGB 282—Supply Chain Management (3)
Lecture/Discussion—3 hours. Prerequisite(s): MGT 203A or MGB 203A or MGP 203A Restricted to students in the MBA program. Matching supply with demand is a primary challenge for a firm: excess supply is too costly,
inadequate supply irritates customers. Matching supply to demand is easiest when a firm has a flexible supply process, but flexibility is generally expensive. Effective: 2017 Fall Quarter.

**MGB 284—Applied Linear Models for Management (3)**
Lecture—3 hours. Covers regression, analysis of variance, and multivariate analysis. Topics will focus on applications to management and policy problems. Effective: 2015 Spring Quarter.

**MGB 285—Time Series Analysis and Forecasting (3)**
Lecture—3 hours. Prerequisite(s): MGB 203B or MGT 203B or MGP 203B Considers application of time series methods to evaluation and forecasting problems. Covers univariate and multivariate ARIMA models and transfer function models. Applications will be in such areas as economics, finance, budgeting, program evaluation, and industrial process control. Effective: 2016 Spring Quarter.

**MGB 286—Telecommunications and Computer Networks (3)**
Lecture—3 hours. Prerequisite(s): MGB 280. Communication system components; common carrier services; design and control of communications networks; network management and distributed environment; local area networks; data security in computer networks. Effective: 2015 Spring Quarter.

**MGB 287—Business Database and Database Marketing (3)**

**MGB 290—Topics in General Management (3)**
Seminar—3 hours. Prerequisite(s): Completion of all first-year graduate courses at the Graduate School of Management or the equivalent. Advanced topics in general management. Varied topics to cover more extensively issues discussed in courses 201A and 201B, or current business interest topics in fields of business writing, business communications, development, or workplace processes. May be repeated for credit. Effective: 2009 Spring Quarter.

**MGB 291—Topics in Organizational Behavior (3)**
Seminar—3 hours. Prerequisite(s): Completion of all first-year graduate courses at the Graduate School of Management or the equivalent. Advanced topics in social psychology and sociology of organizations. Varied topics to cover more extensively issues discussed in courses 201A and 201B, or current business interest topics in fields of organization design, strategy, development, or workplace processes. May be repeated for credit. Effective: 2009 Fall Quarter.

**MGB 292—Topics in Finance (3)**
Seminar—3 hours. Prerequisite(s): Completion of all first-year graduate courses at the Graduate School of Management or the equivalent. Contemporary and emerging issues in finance. Application of modern techniques of finance to business problems. Use of appropriate electronic database and research techniques. May be repeated for credit. Effective: 2009 Fall Quarter.

**MGB 293—Topics in Marketing (3)**
Seminar—3 hours. Prerequisite(s): Completion of all first-year graduate courses at the Graduate School of Management or the equivalent. Advanced topics in marketing, which may include marketing research, new product development, brand management, pricing, distribution management, service marketing, hitech marketing, advertising, sales promotions, marketing through the Web. May be repeated for credit. Effective: 2009 Fall Quarter.

**MGB 294—Topics in Accounting (3)**
Seminar—3 hours. Prerequisite(s): Completion of all first-year graduate courses at the Graduate School of Management or the equivalent. Contemporary and emerging issues in financial management accounting. Application of modern techniques of evaluation and analysis of financial information. Use of appropriate electronic database and research techniques. May be repeated for credit. Effective: 2009 Fall Quarter.

**MGB 295—Topics in Information Technology (3)**
Seminar—3 hours. Prerequisite(s): Completion of all first-year graduate courses at the Graduate School of Management or the equivalent. Applications of information technology to management and management of information technology. Adaptation to the dynamic nature of the field. May be repeated for credit. Effective: 2009 Fall Quarter.

**MGB 296—Topics in Technology Management (3)**
Seminar—3 hours. Prerequisite(s): Completion of all first-year graduate courses at the Graduate School of Management or the equivalent. Cyclical nature of innovation and technological change, features of innovative firms
and industries, national innovation systems, and impact of information technologies on innovation processes. May be repeated for credit. Effective: 2009 Fall Quarter.

MGB 297—Topics in International Management (3)
Seminar—3 hours. Prerequisite(s): Completion of all first-year graduate courses at the Graduate School of Management or the equivalent. Broader environment in which U.S. firms and their foreign competitors operate. Integration of material from other topics courses (marketing, strategy, finance, accounting, information technology, technology management) into the international setting. May be repeated for credit. Effective: 2010 Fall Quarter.

MGB 298—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 2009 Fall Quarter.

MGB 299—Individual Study (1-12)
Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 2009 Fall Quarter.

MGB 401—Crisis Management (1)
Discussion/Laboratory—1 hour. Establishes and explores the defining characteristics of crises. Will learn to anchor crisis management firmly within overall strategic management and also acquire a set of useful tools and techniques for planning for and handling actual crises. Effective: 2017 Winter Quarter.

MGB 402—Crisis Communications and Reputation Management (1)
Discussion/Laboratory—1 hour. Intended to provide you with an understanding of the framework and tools necessary to successfully address communications and reputation management tasks in a variety of crisis situations. Effective: 2016 Summer Quarter.

MGB 403—Business Statistics Practicum (1)
Project (Term Project)—1 hour. Prerequisite(s): (MGT 203A or MGP 203A or MGB 203A); (MGT 203B (can be concurrent) or MGP 203B (can be concurrent) or MGB 203B (can be concurrent)); MGT 203B, MGP 203B, or MGB 203B completed or required concurrently. Restricted to students in the MBA program. Applies techniques and concepts in business statistics to real case studies. Effective: 2011 Fall Quarter.

MGB 404—Organizational Change Management (1)
Lecture/Discussion—1 hour. Challenges in getting significant changes made in organizations. Learn Organization Change Management (OCM) techniques and discuss case situations where OCM techniques play a role. Effective: 2016 Fall Quarter.

MGB 405—Business Literature (1)
Lecture/Discussion—1 hour. Will examine Business history – historical trends that might influence contemporary business. Some argue that the recent collapse of our financial system might have been averted if business leaders had a better sense of history. Effective: 2017 Winter Quarter.

MGB 406—Ethical Issues in Management (1)
Lecture/Discussion—1 hour. Explores the philosophical foundation of ethical theory and its recent applications to business situations. Professional codes of ethics, such as those promulgated by educational, managerial, engineering, scientific, medical and legal professional societies, are presented. Effective: 2017 Winter Quarter.

MGB 407—Storytelling for Leadership (1)
Lecture/Discussion—1 hour. Internalize the fundamental principles behind stories that educate, influence, motivate, inspire, persuade and connect. Effective: 2016 Fall Quarter.

MGB 408—The Business of the Media (1)
Lecture/Discussion—1 hour. Focuses on the media industries and how emerging digital technologies are disrupting the way media consumption, distribution and business models work. Will highlight the economics of several media, both news and entertainment. Effective: 2016 Summer Quarter.

MGB 409—Managing Multi-Asset Class Investment Portfolios (1)
Lecture/Discussion—1 hour. Prerequisite(s): MGB 202A; MGB 203A; MGB 205 Examines top down management of multi-asset class portfolios. Topics include bonds, hedge funds, private equity, real estate, commodities, endowments, return generation, performance analysis, credit cycles, financial crises, manager selection, investment policy, and investment careers. Student teams present endowment portfolio recommendations. Effective: 2015 Spring Quarter.

MGB 410—Corporate Governance (1)
Lecture/Discussion—1 hour. Covers recent and not-so-recent business and accounting scandals, discuss how
corporations can better operate in the interests of shareholders and the public, and learn from people who rely on
corporate governance in making investment decisions. Effective: 2017 Winter Quarter.

MGB 411—Turnaround Management (1)
Lecture/Discussion—1 hour. Evaluate the financial performance of a company, identify opportunities for
improvement, propose real solutions to enhance performance, and most important inspire action in staff. Effective:
2017 Winter Quarter.

MGB 412—International Marketing (1)
Lecture/Discussion—1 hour. Basic concepts of international marketing. Understanding and managing
heterogeneous, dynamic, and interdependent environments across countries. How to develop and implement an
international marketing strategy; where and how to compete, how to adapt your marketing mix. Effective: 2016 Fall
Quarter.

MGB 413—Sustainable Business Ventures: Business and Energy (1)
Lecture/Discussion—1 hour. Introduction to sustainability goals, indicators, values, measurement techniques, and
practice how it applies to large and small enterprise. Effective: 2017 Winter Quarter.

MGB 414—Multi-Channel Marketing (1)
Lecture/Discussion—1 hour. Multi-channel marketing strategies empower managers to create value for different
customer segments. Covers the necessary concepts to evaluate and select go-to market strategies in order to
capitalize on the ubiquity of modern customers. Effective: 2013 Spring Quarter.

MGB 415—Climate Risks and Opportunities (1)
Lecture/Discussion—1 hour. Provide a working knowledge of the risks and opportunities arising from climate
change and climate policy for businesses. Effective: 2016 Summer Quarter.

MGB 416—Topics in Private Equity (1)
Lecture—1 hour. Prerequisite(s): MGB 205 or MGP 205 or MGT 205 Restricted to students in the MBA program.
Focuses on the finance principles related to the risk and return of the private equity (PE) industry, valuation of PE
target companies, the structuring of leveraged buyouts (LBOs), and the management of portfolio companies.
Effective: 2017 Fall Quarter.

MGB 417—Incentives and Controls (1)
Lecture/Discussion—1 hour. Understand how organizations use financial and nonfinancial performance
management and incentive systems to motivate people and manage resources. Effective: 2017 Winter Quarter.

MGB 418—Scientific Discovery and Business Innovation at Scale in the Food and Agriculture Sector (1)
Lecture—3 hours. Restricted to students in the MBA program. Scientific discovery and business innovation within
the food and agriculture sector profoundly influences the sustainability of society and enterprise competitiveness.
Students will learn how business innovation models co-exist antagonistically or synergistically with scientific

MGB 419—Business Strategy Consulting Skills (1)
Lecture—5 hours. Restricted to students enrolled in the MBA program. Students will learn practical business
consulting skills which will help apply strategy theories in the workplace. Students will learn and practice tools to
frame and analyze problems, conduct research, communicate findings and navigate client relationships. Effective:
2017 Winter Quarter.

MGB 420—Advanced Optimization in a Python-based Modeling Language (1)
Web Virtual Lecture—1 hour. Prerequisite(s): (MGB 252 or MGT 252 or MGP 252); (MGB 206 or MGT 206 or MGP
206) Restricted to students enrolled in the MBA program. Covers advanced optimization modeling techniques and
practical application of modern, scalable modeling language. Techniques will be developed using examples from
production planning in a supply chain, but students may explore other areas of application of optimization for their
final project. Effective: 2017 Winter Quarter.

MGB 421—Monte Carlo Simulation for Managerial Analysis (1)
Lecture—1 hour. Students create Excel-based simulation models across business domains, from finance to
hypothesis testing and inventory management. By course-end, students are experts at recognizing this decision-
making fallacy and fixing it. Effective: 2017 Spring Quarter.

MGB 422—Behavioral Finance and Valuation (1)
Lecture—1 hour. Prerequisite(s): (MGT 260 or MGP 260 or MGB 260); (MGT 261 or MGP 261 or MGB 261) Restricted
to students enrolled in the MBA program. Investor psychology and market frictions can cause asset prices to
deviate from fundamental values, creating profit opportunities for sophisticated investors. The course will cover
techniques of financial analysis with the goal of learning how to value assets and identify mispricing. Effective: 2017
Winter Quarter.

MGB 423—Leader as Coach: An Introduction to Coaching Skills for Leaders (1)
Lecture—1 hour. Restricted to students enrolled in the MBA program. Course introduces the fundamental coaching
skills and coaching models that leaders can apply in everyday interactions with their team and colleagues in order
to build trust, overcome challenges and help others discover their own full potential. Effective: 2017 Winter Quarter.

MGB 424—Practicum for Managing People in Modern Organizations (1)
Project (Term Project)—1 hour. Prerequisite(s): MGB 224 Restricted to students in the MBA program. Provides solid
grounding in the management of work and the employment relationship. Examines firms’ interrelated policies and

MGB 425—Digital Marketing Techniques (1)
Lecture—1 hour. Course provides students with an introduction to digital marketing. The course introduces MBA
students to the fundamental aspects and tools of online marketing communication, i.e., how organizations use
digital channels to effectively communicate their value propositions to the target customers. Effective: 2017 Winter
Quarter.

MGB 426—The Business of Healthcare (1)
Lecture—1 hour. Restricted to students enrolled in the MBA program (Business Administration—Working
Professional, Business Administration—Bay Area, Business Administration—Full-Time). Course is intended to
provide students with an overall understanding of the unique business aspects of the healthcare industry. Effective:
2017 Winter Quarter.

MGB 427—Implementing International Strategy (1)
Lecture—1 hour. Restricted to students enrolled in the MBA program (Business Administration—Working
Professional, Business Administration—Bay Area, Business Administration—Full-Time). Course looks at the pitfalls of
implementing international strategies, and suggest several accessible, yet powerful frameworks to help
international managers implement strategies successfully and completely. Effective: 2017 Winter Quarter.

MGB 428—Renewable Energy Ventures: Planning, Funding and Regulatory Risk Assessment for Entrepreneurs
and Investors (1)
Lecture—1 hour. Restricted to students enrolled in the MBA program. Advanced innovation lab will introduce
students to issues addressed by entrepreneurs and investors in renewable ventures. Lectures, simulations, case
studies and practical experience of the presenters will be delivered. Effective: 2016 Summer Quarter.

MGB 429—Detection and Prevention of Asset Misappropriation Fraud in the Workplace (1)
Lecture—1 hour. Restricted to students enrolled in the MBA program. Course will discuss the fundamentals of fraud
detection and prevention in the workplace. Students will learn the major schemes involving workplace fraud, how
management can detect fraud and what policies and procedures can be implemented to prevent fraud. Effective:
2016 Fall Quarter.

MGB 430—Learning From Catastrophes: Lessons for Managers (1)
Lecture—1 hour. Restricted to students enrolled in the MBA program. Catastrophes unfold in surprisingly similar
ways. In this course, students will analyze catastrophes to understand these common patterns and investigate how
they can be prevented and mitigated. Students will then apply these lessons to management to gain
unconventional insights. Effective: 2016 Summer Quarter.

MGB 431—Project Management (1)
Lecture—10 hours. Open to students enrolled in the MBA program. Students learn project management; including
project scope, project planning, milestones and project closing. Important themes include leadership, team
 dynamics, storytelling/creating a narrative, communication, and conflict management. Effective: 2016 Fall Quarter.

MGB 432—Project Management with Applications in Healthcare (1)
Lecture—1 hour. Course will focus on the heart of healthcare administration and how project management can be
applied as a key lever to increase efficiency, decrease costs and improve the patient experience. Effective: 2017
Spring Quarter.

MGB 433—Corporate Social Responsibility (1)
Lecture—1 hour. Learn practical information that will help students understand the basics of designing, managing
and evaluating an effective CSR program. Expose students to a basic set of CSR issues in the context of cross-
purpose business challenges and then focus on the analysis and critical decisions that managers must make to move their business and their social agenda forward. Effective: 2018 Spring Quarter.

**MGB 434—Practicum for Pricing (1)**
Project (Term Project)—1 hour. Prerequisite(s): MGB 234 Restricted to students in the MBA program. Enhance understanding of the principles and concepts learned in Pricing by (1) teaching the necessary statistical and mathematical skills, and (2) requiring a report for a real Pricing case. Effective: 2011 Winter Quarter.

**MGB 435—Data Wrangling (1)**
Lecture—1 hour. Develop practical skills to pre-process data. Tidied raw data can then be used for downstream data analysis, modeling, and visualization. Effective: 2018 Fall Quarter.

**MGB 440—Integrated Management Project (5)**
Project (Term Project)—3 hours. Prerequisite(s): First-year core courses of MBA program. Applies classroom learning to solve complex business challenges for real world clients. Student teams learn practical consulting skills while their clients benefit from the student's experience, insights, and work product. Effective: 2016 Fall Quarter.

**MGB 440A—Integrated Management Project (3)**
Lecture/Discussion—3 hours. Prerequisite(s): First-year core courses of MBA program. Restricted to full-time MBA students. Applies classroom learning to solve complex business challenges for real world clients. Student teams learn practical consulting skills while their clients benefit from the student's experience, insights, and work product. Effective: 2015 Spring Quarter.

**MGB 440B—Integrated Management Project (3)**
Project (Term Project)—3 hours. Prerequisite(s): First-year core courses of MBA program. Restricted to full-time MBA students. Applies classroom learning to solve complex business challenges for real world clients. Student teams learn practical consulting skills while their clients benefit from the student's experience, insights, and work product. Effective: 2015 Spring Quarter.

**MGB 440C—Integrated Management Project Lead (1)**
Project (Term Project)—1 hour. Integrated Management Project Team leader. Effective: 2016 Fall Quarter.

**MGB 442—Practicum for Marketing Communication (1)**
Project (Term Project)—1 hour. Prerequisite(s): MGB 242 Restricted to students in the MBA program. Provides experience applying concepts learned in Marketing Communications to a realistic advertising or communication problem faced by firms. Effective: 2011 Spring Quarter.

**MGB 443—Practicum for Customer Relationship Management (1)**
Project (Term Project)—1 hour. Prerequisite(s): MGB 243 Restricted to students in the MBA program. Hands-on training in applying Customer Relationship Management concepts and metrics to secondary data. Enhances ability to interpret results and decide the right type of marketing actions by requiring an executive report at the end of the quarter. Effective: 2010 Fall Quarter.

**MGB 448—Practicum for Marketing Strategies (1)**
Project (Term Project)—1 hour. Prerequisite(s): MGB 248 Restricted to students in the MBA program. Provides opportunities to apply the concepts covered in the Marketing Strategies class through a group project involving the analysis of strategic marketing decisions based on business-related issues, simulation and modeling. Effective: 2010 Fall Quarter.

**MGB 449—Marketing Research Practicum (1)**
Project (Term Project)—1 hour. Prerequisite(s): MGB 249 Restricted to students in the MBA program, or in some cases with permission of instructor. Provides opportunities to apply the concepts and methods covered in the Marketing Research class. Hands-on and project-based, work could be either individual or in groups depending on enrollments and/or interests of students. Effective: 2011 Spring Quarter.

**MGB 450—Practicum for Technology Strategy and Competition (1)**
Project (Term Project)—1 hour. Prerequisite(s): MGB 250 Restricted to students in the MBA program. In-depth practicum project course. Apply theories, concepts, and models, learned in course 250 to a real-world business problem, through data collection, data analysis, simulation, modeling and post-model interpretation. Effective: 2011 Winter Quarter.

**MGB 460—Practicum for Corporate Finance and Real Estate (1)**
Project (Term Project)—1 hour. Prerequisite(s): MGB 260 Restricted to students in the MBA program. Work in groups
to select and value a financial entity. It could be a firm, a sports player, a building, a project, or a patent. Grade based on an in-class presentation and a write-up. Effective: 2011 Spring Quarter.

**MGB 461—Practicum for Investment Analysis (1)**
Project (Term Project)—1 hour. Prerequisite(s): MGB 261 Restricted to students in the MBA program. Provides practical experience applying concepts learned in Investment Analysis to a realistic portfolio management setting via a hypothetical exercise. Produce a realistic executive summary and presentation of an investment proposal for a hypothetical client. Effective: 2010 Fall Quarter.

**MGB 464—Practicum for Taxes and Business Strategy (1)**
Project (Term Project)—1 hour. Prerequisite(s): MGB 264 Restricted to students in the MBA program. Practical application project drawing from the tax planning theory contained in course 264. Project consists of a business formation and operation, change in organization (incorporation), and movement into multi-national and multi-jurisdictional tax. Effective: 2010 Fall Quarter.

**MGB 465—Practicum for Venture Capital (1)**
Project (Term Project)—1 hour. Prerequisite(s): MGB 265 Restricted to students in the MBA program. Provides an opportunity to apply concepts learned in Venture Capital in a realistic setting. Complete project analyzing a potential investment in a hypothetical venture and prepare an deal term sheet/investment agreement. Effective: 2011 Winter Quarter.

**MGB 467—Practicum for Teams and Technology (1)**
Project (Term Project)—1 hour. Prerequisite(s): MGB 267 Restricted to students in the MBA program. Groups investigate the performance, creativity, conflict, information sharing, and leadership behaviors of a real world team. Provide consulting advice to the team, which not only gives analytic skills, but also builds presentation skills. Effective: 2011 Spring Quarter.

**MGB 469—Practicum for Business Intelligence Technologies (1)**
Project (Term Project)—1 hour. Prerequisite(s): MGB 269 Restricted to students in the MBA program. Projects applying concepts learned in Business Intelligence Technologies to real business problems. Effective: 2011 Winter Quarter.

**MGB 482—Practicum for Supply Chain Management (1)**
Project (Term Project)—1 hour. Prerequisite(s): MGT 282 (can be concurrent) or MGP 282 (can be concurrent) or MGB 282 (can be concurrent); Course is a pre-requisite or co-requisite. Restricted to students in the MBA program. Provides experience applying concepts learned in Supply Chain Management to a realistic management setting via a project. Effective: 2011 Spring Quarter.

**MGB 490—Directed Group Study Management Practicum (3)**
Review all entries
Lecture/Discussion—3 hours. Prerequisite(s): Consent of Instructor. Sponsorship of a GSM Academic Senate faculty member; approval of graduate advisor. Provides opportunity for students to gain experience in applying business methodologies previously acquired in other GSM courses. May be repeated for credit. Effective: 2015 Spring Quarter.

**MGB 490—Directed Group Study Management Practicum (1)**
Review all entries
Lecture/Discussion—1 hour. Prerequisite(s): Consent of Instructor. Sponsorship of a GSM Academic Senate faculty member; approval of graduate advisor. Provides opportunity for students to gain experience in applying business methodologies previously acquired in other GSM courses. May be repeated for credit. Effective: 2019 Spring Quarter.

**MGB 498—Directed Group Study Management Practicum (1-12)**
Project (Term Project). Prerequisite(s): Consent of Instructor. Sponsorship of a GSM Academic Senate faculty member, and approval of graduate advisor. Provides the opportunity for students to gain experience in applying business methodologies previously acquired in other GSM courses. May be repeated up to 6 unit(s). (S/U grading only.) Effective: 2011 Summer Quarter.

**MGB 499—Directed Individual Study Management Practicum (1-12)**
Project (Term Project). Prerequisite(s): Consent of Instructor. Sponsorship of a Graduate School of Management Academic Senate faculty member and approval of graduate advisor. Provides the opportunity for students to gain experience in applying business methodologies previously acquired in other Graduate School of Management courses. May be repeated for credit. (S/U grading only.) Effective: 2011 Summer Quarter.
Students must complete the Management core course requirement before enrolling in any of the following elective courses, or petition with consent of the instructor. The core courses include: 200A, 201A, 201B, 202A, 203A, 204, 205, 252, 268, 440, 440A, 440B, 440C. For a list of elective courses, see https://webapps.gsm.ucdavis.edu/Raps/courses/curriculumOverviewByProgram?program=SMBA.

Courses in MGP:

**MGP 200A—Financial Accounting (3)**
Lecture—3 hours. Prerequisite(s): Graduate student in the Graduate School of Management. Introduction to the concepts and objectives underlying the preparation of financial statements. Topics include understanding the accounting cycle, measurement and valuation problems associated with financial statement components, consideration of the usefulness of financial statements in the analysis of a corporation’s operations. Effective: 1994 Fall Quarter.

**MGP 200B—Managerial Accounting (3)**
Lecture—3 hours. Prerequisite(s): MGT 200A or MGB 200A or MGP 200A Information managers should know to be effective, including: product costing, motivating people, and differential analysis for decision making. Includes team projects and written and oral presentations. Effective: 2017 Fall Quarter.

**MGP 201A—The Individual and Group Dynamics (3)**
Lecture—3 hours. Prerequisite(s): Graduate student in the Graduate School of Management. Examines basic psychological and social psychological processes shaping human behavior and applies knowledge of these processes to the following organizational problems: motivation, job design, commitment, socialization, culture, individual and group decision making, and team building. Effective: 1994 Fall Quarter.

**MGP 201B—Organizational Strategy and Structure (3)**
Lecture/Discussion—3 hours. Prerequisite(s): Completion of first year courses in Graduate School of Management or equivalent. Open to MBA students only. Strategic management of organizations, including analysis of industries, firm resources and capabilities and corporate strategy. Strategy formulation, implementation and strategic decision-making. Firm and industry life cycles and change. Analysis of organizational design and structure including differentiation and integration. Effective: 2011 Fall Quarter.

**MGP 202A—Markets and the Firm (3)**
Lecture—3 hours. Prerequisite(s): Graduate student in the Graduate School of Management. Examines the interaction of consumers, firms and government, and the effect this interaction has on the use of resources and firm profitability. Fundamental economic concepts such as marginal analysis, opportunity cost, pricing, and externalities are introduced and applied. Effective: 1994 Fall Quarter.

**MGP 202B—Business, Government, and the International Economy (3)**
Lecture—3 hours. Prerequisite(s): MGP 202A or MGT 202A or MGB 202A Examines the influence of government and international factors on business. Topics include distribution of income, business cycles, inflation and interest rates, the federal debt, monetary policy and international trade and finance. Effective: 2017 Fall Quarter.

**MGP 203A—Data Analysis for Managers (3)**
Lecture—3 hours. Prerequisite(s): Graduate student in the Graduate School of Management MBA program or consent of instructor. Introduction to statistics and data analysis for managerial decision making. Descriptive statistics, principles of data collection, sampling, quality control, statistical inference. Application of data analytic methods to problems in marketing, finance, accounting, production, operations, and public policy. Effective: 1994 Fall Quarter.

**MGP 203B—Forecasting and Managerial Research Methods (3)**
Lecture—3 hours. Prerequisite(s): MGP 203A or MGT 203A or MGB 203A Practical statistical methods for managerial decision making covers regression analysis, time series analysis and forecasting, design and analysis of experiments in managerial research and contingency table analysis. Application of these methods to marketing, finance, accounting, production, operations, and public policy. Effective: 2017 Fall Quarter.

**MGP 204—Marketing Management (3)**
Lecture—3 hours. Prerequisite(s): Graduate student in the Graduate School of Management. Analysis of market opportunities, elements of market research, development of marketing strategies, market planning and implementations, and control systems. Consumer and industrial markets, market segmentation, pricing strategies, distribution channels, promotion, and sales. Effective: 1997 Fall Quarter.
MGP 205—Financial Theory and Policy (3)
Lecture—3 hours. Prerequisite(s): Graduate student in the Graduate School of Management. Corporate financial policy and investment management. Covers capital budgeting, optimal financial structure, cost-of-capital determination, risk measurement. Develops basic valuation principles for investments with long-lived and risky cash-flows, and extends these to derivative securities, asset portfolios, investment management and hedging. Effective: 1994 Fall Quarter.

MGP 206—Decision Making and Management Science (3)
Lecture—3 hours. Prerequisite(s): Graduate student in the Graduate School of Management MBA program or consent of instructor. Develops decision-making and problem-solving skills in conjunction with a quantitative model-building approach. Emphasizes how structured modeling techniques, probability forecasts, simulations, and computer optimization models are used in the overall process of making decisions in an uncertain environment. Effective: 1994 Fall Quarter.

MGP 207—Management Information Systems (3)
Lecture—3 hours. Prerequisite(s): Graduate student or consent of instructor. Introduction to computer programming and data handling skills. Use of computer in organizations, emphasis on managerial aspects of computing. Standard and nonstandard uses of data files, centralization versus decentralization of computing, office automation, computer security. Effective: 1994 Fall Quarter.

MGP 215—Business Law (3)
Lecture—3 hours. Prerequisite(s): Completion of administration core requirements or petition with consent of instructor. Introduction to law and legal process in the United States. Sources of law. Structure and operation of courts, federal-state relationships, fundamentals of administrative law, fundamentals of business law. Effective: 1997 Winter Quarter.

MGP 216—Managing Professionals, Budgets, Controls and Ethics (3)
Lecture—3 hours. Prerequisite(s): Graduate standing. Performance measures, budgetary controls and ethical pressures which occur at middle management levels in service-type operations. Addresses such organizations as engineering, medical groups, law offices, management consultants. Effective: 1997 Winter Quarter.

MGP 220—Management of Social Networks (3)
Lecture/Discussion—3 hours. Prerequisite(s): MGP 201A Open to MBA students only. Principles and applications of social network theory: coordinating divergent interests to create value for individuals and organizations. Emphasis on conceptual models, web-based diagnostic tools, and practical applications. Effective: 2004 Winter Quarter.

MGP 223—Power and Influence in Management (3)
Seminar—3 hours. Prerequisite(s): MGT 201A or MGB 201A or MGP 201A; Consent of Instructor. Investigation of the bases of power in organizations and the tactics used to translate power into influence. Topics include the control of resources (including information), social psychological processes (including commitment), the construction of meaning, and ethics. Effective: 2017 Fall Quarter.

MGP 224—Managing People in High-Performance Organizations (3)
Lecture—3 hours. Prerequisite(s): MGT 201A or MGB 201A or MGP 201A Restricted to students in the MBA program. Strategic approach to the management of people within organization. Analyze employment systems' fit with firms' environments and strategies. Explore consequences of choices firms make in managing people—decisions as to selection, performance evaluation, compensation, and other management policies and practices. Not open to students who have taken MGB 224 or MGT 224. Effective: 2017 Fall Quarter.

MGP 234—Pricing (3)
Lecture/Discussion—3 hours. Prerequisite(s): (MGT 202A or MGB 202A or MGP 202A); (MGP 203B or MGB 203B or MGT 203B); (MGT 204 or MGB 204 or MGP 204) Restricted to students in the MBA Program. Combines lectures, cases and homework to teach students tools and skills necessary to analyze pricing situations, make pricing decisions, and implement them, in a systematic manner. Effective: 2017 Fall Quarter.

MGP 239—Digital Marketing (3)
Lecture/Discussion—3 hours. Prerequisite(s): MGP 204 or MGT 204 or MGB 204 Course equips students for a career in digital marketing and social media. Topics include online advertising, search engine optimization, interactive mktg, online privacy issues, e-commerce, social influence, social network theory, measurement of social influence, integrating social and traditional media. Effective: 2017 Fall Quarter.

MGP 240—Management Policy and Strategy (3)
Lecture—3 hours. Prerequisite(s): First-year core courses of M.B.A. program. Examines the scope of missions,
objectives strategies, policies, structures, measurements and incentives which bear on the management of an organization. Real client organizations, in the private and public sectors, are assigned to student teams as the subjects of study. Effective: 1994 Fall Quarter.

**MGP 241—New Product Development (3)**
Lecture/Discussion—3 hours. Prerequisite(s): MGT 204 or MGB 204 or MGP 204 Open to students in the MBA Program for Working Professionals. State-of-the-art concepts and methods to enhance the effectiveness of new product development activities. Focuses on the understanding of managerial issues and acquiring the ability to solve problems. Effective: 2017 Fall Quarter.

**MGP 242—Marketing Communications (3)**
Lecture—3 hours. Issues in designing a marketing communications strategy. Topics include mass and direct communications, institutional aspects of advertising, consumer behavior, evaluating ad effectiveness, determining ad budget, creative strategy, and use and abuse of promotions. Effective: 2000 Fall Quarter.

**MGP 243—Customer Relationship Management (3)**
Lecture/Discussion—3 hours. Prerequisite(s): MGT 204 or MGP 204 or MGB 204 Restricted to MBA students only. Customer Relationship Management (CRM) is a management approach under which marketing activities are organized and measured around customers (rather than around brands.) This approach is appealing because customers, not brands, are those who make buying decisions. Effective: 2017 Fall Quarter.

**MGP 244—New and Small Business Ventures (3)**
Lecture—3 hours. Prerequisite(s): MGT 204 or MGB 204 or MGP 204 Student teams develop complete business plans for their own start-up ventures. Process includes: elevator pitch, business strategy, comprehensive bottoms-up financial projections, capital requirements, product differentiation, competitive, alliance, and go-to-market strategy development, investor presentation, and comprehensive written business plan. Effective: 2017 Fall Quarter.

**MGP 245—Business Writing (3)**
Lecture/Discussion—3 hours. Prerequisite(s): Completion of first-year core courses at the Graduate School of Management or the equivalent. Restricted to MBA students only. Techniques for sharpening writing skills are introduced, along with grammatical structure, word choice, and punctuation. Learn to develop styles that are pitch-perfect for given situations and to think strategically about each communication challenge in a management setting. Effective: 2011 Fall Quarter.

**MGP 246—Negotiation and Team Building (3)**
Lecture/Discussion—3 hours. Prerequisite(s): MGP 205; MGP 202. Basic theory of negotiation; applies theory to process of building teams to achieve business purposes. Covers integrative and distributive strategies of claiming value, how to recognize bargaining tricks, uncovering hidden agendas, brainstorming to extend Pareto frontier. Effective: 2011 Fall Quarter.

**MGP 247—Customer Service as a Marketing Tool (3)**
Lecture—3 hours. Understanding the distinct features of services, how to create value through service, methods of building strong relationships with customers, methods of measuring and building customer satisfaction, and measuring the financial impact of service improvement. Effective: 1998 Spring Quarter.

**MGP 248—Marketing Strategies (3)**
Lecture—3 hours. Prerequisite(s): (MGT 202A or MGB 202A or MGP 202A); (MGP 204 or MGB 204 or MGT 204) Examines process by which organizations develop strategic marketing plans. Includes definition of activities and products, marketing audits, appraising market opportunities, design of new activities and products, and organizing marketing planning function. Applications to problems in private and public sector marketing. Effective: 2017 Fall Quarter.

**MGP 249—Marketing Research (3)**
Lecture—3 hours. Prerequisite(s): (MGT 202A or MGB 202A or MGP 202A); (MGP 203A or MGB 203A or MGT 203A); (MGT 204 or MGB 204 or MGP 204) Course addresses the managerial issues and problems of systematically gathering and analyzing information for making private and public marketing decisions. Covers the cost and value of information, research design, information collection, measuring instruments, data analysis, and marketing research applications. Effective: 2017 Fall Quarter.

**MGP 250—Technology, Competition and Strategy (3)**
Lecture—3 hours. Prerequisite(s): (MGT 202A or MGB 202A or MGP 202A); (MGP 203A or MGB 203A or MGT 203A) Restricted to students in the MBA program. Why is software typically so defective? Why do many firms in the
IT industry give away their best products free? This course helps you analyze questions like these by modeling competition and strategy in the network, technology and information industries. Effective: 2017 Fall Quarter.

MGP 251—Management of Innovation (3)
Lecture—3 hours. Prerequisite(s): MGT 201A or MGB 201A or MGP 201A Managing innovative enterprise in changing and uncertain environments. Covers technology forecasting and assessment, program selection and control, financial management, regulation, and ethics. Effective: 2017 Fall Quarter.

MGP 252—Managing for Operational Excellence (3)
Lecture—3 hours. Prerequisite(s): MGP 203A or MGB 203A or MGT 203A Open to students in the Graduate School of Management. Explores the management of operations as applied to manufacturing as well as services provided both inside and outside the organization. Develop an understanding of how uncertainty affects planning and delivery by looking at fundamental models of operations. Effective: 2017 Fall Quarter.

MGP 253—Corporate Social Responsibility (3)
Lecture—3 hours. Goal in this course will be to develop a thought process and approach to corporate social responsibility that students will be able to build on during their post-school leadership roles, whether as corporate executives, entrepreneurs, or NGO leaders. Effective: 2018 Spring Quarter.

MGP 255—Entrepreneurship and Venture Investment Clinic (3)
Lecture—3 hours. Class size limited to 30 students. Provides the necessary analytical and design tools to create business ideas and refine business models based on emerging technologies. Students learn to work closely in small teams to synthesize technical, strategic, and marketing needs into designs for new ventures. Effective: 2016 Spring Quarter.

MGP 258—Mergers and Acquisitions (3)
Lecture—3 hours. Prerequisite(s): MGP 205 or MGT 205 or MGB 205 Course focuses on the market for corporate acquisitions and restructuring activity. Topics include: sources of value creation; takeovers; anti-takeover provisions; bidding strategies; use of leverage in buyouts; regulatory risk and hurdles; and, valuation approaches for highly leveraged transactions. Effective: 2015 Spring Quarter.

MGP 259—Banking and the Financial System (3)
Lecture—3 hours. Prerequisite(s): MGB 205 or MGT 205; Consent of Instructor. Analyzes the role of financial markets and institutions in allocating capital. Focuses on: bank lending; debt securities; financial market innovations; regulation; functions of commercial banks and other financial intermediaries. Utilizes case studies. Effective: 2016 Spring Quarter.

MGP 260—Corporate Finance (3)
Lecture—3 hours. Prerequisite(s): (MGT 200A or MGB 200A or MGP 200A); (MGP 202A or MGB 202A or MGT 202A); (MGT 205 or MGB 205 or MGP 205) Focuses on planning, acquiring, and managing a company's financial resources. Includes discussion of financial aspects of mergers and other forms of reorganization; analysis of investment, financial, and dividend policy; and theories of optimal capital structure. Effective: 2017 Fall Quarter.

MGP 261—Investment Analysis (3)
Lecture—3 hours. Prerequisite(s): (MGT 203A or MGP 203A or MGB 203A); (MGB 205 or MGP 205 or MGT 205) Examines asset pricing theories and relevant evidence, including the investment performance of stocks and bonds. Topics include the efficiency of markets, domestic and international portfolio diversification, factors influencing the value of stocks and other investments, and portfolio management and performance. (P/NP grading only.) Effective: 2017 Fall Quarter.

MGP 262—Money and Security Markets (3)
Lecture—3 hours. Examines how money and securities markets are organized; how public agencies, businesses, others obtain and invest funds in those markets. Relationship between interest rates, monetary policy, government's role in improving capital markets, approaches to assessing changes in regulation of specific markets. Effective: 1994 Fall Quarter.

MGP 263—Derivative Securities (3)
Lecture/Discussion—3 hours. Prerequisite(s): (MGT 205 or MGP 205 or MGB 205); (MGT 203A or MGP 203A or MGB 203A) Open to students enrolled in the MBA program. Behavior of options, futures, and other derivative securities markets and how public agencies, business and others use those markets. Trading strategies involving options, swaps, and financial futures contracts. Pricing of derivative securities, primarily by arbitrage methods. Effective: 2017 Fall Quarter.
MGP 264—Business Taxation (3)

MGP 265—Venture Capital and the Finance of Innovation (3)
Lecture/Discussion—3 hours. Prerequisite(s): MGB 205 or MGP 205 or MGT 205 Restricted to students in the MBA program. Examines venture capital finance and the related practice of R&D finance. Goal is to apply finance tools and framework to the world of venture capital and financing of projects in high-growth industries. Effective: 2017 Fall Quarter.

MGP 266—International Finance (3)
Lecture—3 hours. Prerequisite(s): MGT 205 or MGB 205 or MGP 205; Or the equivalent. Studies fixed and floating exchange-rate systems. Topics include determinants of a nation's balance of international payments; macroeconomic interdependence of nations under various exchange-rate regimes and its implications for domestic stabilization policies; and the international coordination of monetary and stabilization policies. Effective: 2017 Fall Quarter.

MGP 267—Teams and Technology (3)
Lecture/Discussion—3 hours. Prerequisite(s): Consent of Instructor. Restricted to working professional MBA students. Theory and practice of managing teams with primary goals of: providing conceptual guidelines for analyzing and diagnosing group dynamics and determining strategic options as a manager; imparting interpersonal skills for implementing effective strategies; understanding how technological changes affects team processes. Effective: 2009 Spring Quarter.

MGP 268—Articulation and Critical Thinking (3)
Lecture/Discussion—3 hours. With commitment to this course, students will become competent public speakers, write well at a level expected in business, think efficiently and critically about business challenges and have a useful personal code of ethics to shape their actions and decisions. No student may repeat course for credit. Effective: 2013 Fall Quarter.

MGP 269—Business Intelligence Technologies-Data Mining (3)

MGP 270—Corporate Financial Reporting (3)
Lecture—3 hours. Prerequisite(s): MGT 200A or MGP 200A or MGB 200A Analyzes and evaluates contemporary issues in financial reporting and develops implications of those issues for business decision makers, investment managers, and accounting policymakers. Effective: 2017 Fall Quarter.

MGP 271—Strategic Cost Management (3)
Lecture/Discussion—3 hours. Prerequisite(s): MGT 202A or MGP 202A or MGB 202A Restricted to students in the MBA program. Theoretical frameworks and associated techniques for using organizational design and cost management to achieve a sustainable, profitable cost structure. Topics include: target costing, process design for low cost, total cost of ownership, cost of customers, implementing structural change, and incentives. Effective: 2017 Fall Quarter.

MGP 272—Evaluation of Financial Information (3)
Lecture—3 hours. Prerequisite(s): MGT 200A or MGP 200A or MGB 200A Studies how investors, creditors, others use accounting and other information in making rational investment, lending decisions. Emphasis is placed on the analysis of financial information in a variety of contexts. Where applicable, recent research in finance and economics is discussed. Effective: 2017 Fall Quarter.

MGP 273—Accounting and Reporting for Government Nonprofit Entities (3)
Lecture—3 hours. Concepts, methods, and uses of accounting and financial reporting by governmental and nonprofit entities. Introduction to budgeting and performance evaluation, and accounting for entities such as hospitals, universities, and welfare agencies. Effective: 1994 Fall Quarter.

MGP 274—Corporate Governance (3)
Lecture—3 hours. Prerequisite(s): Full-time MBA students or consent of instructor. Discusses how corporations can better operate in the interests of shareholders and public. Directly relevant to managers, consultants in
compensation and incentives, staff working on mergers and acquisitions, corporate regulators, shareholders rights activists, and board members. Effective: 2009 Winter Quarter.

**MGP 276—Real Estate, Finance and Development (3)**
Lecture—3 hours. Prerequisite(s): (MGT 205 or MGB 205 or MGP 205); (MGP 201A or MGB 201A or MGT 201A)
Focus on single family, attached, detached, multi-family, and light commercial development. Students will study factors which make up successful real estate developments. Course will consider financial aspects involved in land acquisition, land development, construction, and project lending. Effective: 2017 Fall Quarter.

**MGP 281—Systems Analysis and Design (3)**
Lecture—3 hours. Design and specification of computer-based information systems. Applications systems development life cycle, use requirements and feasibility assessment, logical and physical design, program development and testing, conversion and implementation. Effective: 1994 Fall Quarter.

**MGP 282—Supply Chain Management (3)**
Lecture/Discussion—3 hours. Prerequisite(s): MGT 203A or MGB 203A or MGP 203A Restricted to students in the MBA program. Matching supply with demand is a primary challenge for a firm: excess supply is too costly, inadequate supply irritates customers. Matching supply to demand is easiest when a firm has a flexible supply process, but flexibility is generally expensive. Effective: 2017 Fall Quarter.

**MGP 284—Applied Linear Models for Management (3)**
Lecture—3 hours. Covers regression, analysis of variance, and multivariate analysis. Topics will focus on applications to management and policy problems. Effective: 2015 Spring Quarter.

**MGP 285—Time Series Analysis and Forecasting (3)**
Lecture—3 hours. Prerequisite(s): MGP 203B or MGT 203B or MGB 203B Considers application of time series methods to evaluation and forecasting problems. Covers univariate and multivariate ARIMA models and transfer function models. Applications will be in such areas as economics, finance, budgeting, program evaluation, and industrial process control. Effective: 2016 Spring Quarter.

**MGP 286—Telecommunications and Computer Networks (3)**
Lecture—3 hours. Prerequisite(s): MGP 280. Communication system components; common carrier services; design and control of communications networks; network management and distributed environment; local area networks; data security in computer networks. Effective: 1995 Spring Quarter.

**MGP 287—Business Database and Database Marketing (3)**

**MGP 290—Topics in General Management (3)**
Seminar—3 hours. Prerequisite(s): Completion of all first-year graduate courses at the Graduate School of Management or the equivalent. Advanced topics in general management. Varied topics to cover more extensively issues discussed in courses 201A and 201B, or current business interest topics in fields of business writing, business communications, development, or workplace processes. May be repeated for credit. Effective: 2009 Fall Quarter.

**MGP 291—Topics in Organizational Behavior (3)**
Seminar—3 hours. Prerequisite(s): Completion of all first-year graduate courses at the Graduate School of Management or the equivalent. Advanced topics in social psychology and sociology of organizations. Varied topics to cover more extensively issues discussed in courses 201A and 201B, or current business interest topics in fields of organization design, strategy, development, or workplace processes. May be repeated for credit. Effective: 1999 Fall Quarter.

**MGP 292—Topics in Finance (3)**
Seminar—3 hours. Prerequisite(s): Completion of all first-year graduate courses at the Graduate School of Management or the equivalent. Contemporary and emerging issues in finance. Application of modern techniques of finance to business problems. Use of appropriate electronic database and research techniques. May be repeated for credit. Effective: 1999 Fall Quarter.

**MGP 293—Topics in Marketing (3)**
Seminar—3 hours. Prerequisite(s): Completion of all first-year graduate courses at the Graduate School of Management or the equivalent. Advanced topics in marketing, which may include marketing research, new product
development, brand management, pricing, distribution management, service marketing, hitech marketing, advertising, sales promotions, marketing through the Web. May be repeated for credit. Effective: 1999 Fall Quarter.

**MGP 294—Topics in Accounting (3)**
Seminar—3 hours. Prerequisite(s): Completion of all first-year graduate courses at the Graduate School of Management or the equivalent. Contemporary and emerging issues in financial management accounting. Application of modern techniques of evaluation and analysis of financial information. Use of appropriate electronic database and research techniques. May be repeated for credit. Effective: 1999 Fall Quarter.

**MGP 295—Topics in Information Technology (3)**
Seminar—3 hours. Prerequisite(s): Completion of all first-year graduate courses at the Graduate School of Management or the equivalent. Applications of information technology to management and management of information technology. Adaptation to the dynamic nature of the field. May be repeated for credit. Effective: 1999 Fall Quarter.

**MGP 296—Topics in Technology Management (3)**
Seminar—3 hours. Prerequisite(s): Completion of all first-year graduate courses at the Graduate School of Management or the equivalent. Cyclical nature of innovation and technological change, features of innovative firms and industries, national innovation systems, and impact of information technologies on innovation processes. May be repeated for credit. Effective: 1999 Fall Quarter.

**MGP 297—Topics in International Management (3)**
Seminar—3 hours. Prerequisite(s): Completion of all first-year graduate courses at the Graduate School of Management or the equivalent. Broader environment in which U.S. firms and their foreign competitors operate. Integration of material from other topics courses (marketing, strategy, finance, accounting, information technology, technology management) into the international setting. May be repeated for credit. May be repeated for credit. Effective: 1999 Fall Quarter.

**MGP 298—Directed Group Study (1-5)**
Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1994 Fall Quarter.

**MGP 299—Individual Study (1-12)**
Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 2000 Spring Quarter.

**MGP 401—Crisis Management (1)**
Discussion/Laboratory—1 hour. Establishes and explores the defining characteristics of crises. Will learn to anchor crisis management firmly within overall strategic management and also acquire a set of useful tools and techniques for planning for and handling actual crises. Effective: 2017 Winter Quarter.

**MGP 402—Crisis Communications and Reputation Management (1)**
Discussion/Laboratory—1 hour. Intended to provide you with an understanding of the framework and tools necessary to successfully address communications and reputation management tasks in a variety of crisis situations. Effective: 2016 Summer Quarter.

**MGP 403—Business Statistics Practicum (1)**
Project (Term Project)—1 hour. Prerequisite(s): (MGT 203A or MGP 203A or MGB 203A); (MGT 203B (can be concurrent) or MGP 203B (can be concurrent) or MGB 203B (can be concurrent)); MGT 203B, MGP 203B, or MGB 203B completed or required concurrently. Restricted to students in the MBA program. Applies techniques and concepts in business statistics to real case studies. Effective: 2011 Fall Quarter.

**MGP 404—Organizational Change Management (1)**
Lecture/Discussion—1 hour. Challenges in getting significant changes made in organizations. Learn Organization Change Management (OCM) techniques and discuss case situations where OCM techniques play a role. Effective: 2016 Fall Quarter.

**MGP 405—Business Literature (1)**
Lecture/Discussion—1 hour. Will examine Business history – historical trends that might influence contemporary business. Some argue that the recent collapse of our financial system might have been averted if business leaders had a better sense of history. Effective: 2017 Winter Quarter.

**MGP 406—Ethical Issues in Management (1)**
Lecture/Discussion—1 hour. Explores the philosophical foundation of ethical theory and its recent applications to business situations. Professional codes of ethics, such as those promulgated by educational, managerial, engineering, scientific, medical and legal professional societies, are presented. Effective: 2017 Winter Quarter.
MGP 407—Storytelling for Leadership (1)
Lecture/Discussion—1 hour. Internalize the fundamental principles behind stories that educate, influence, motivate, inspire, persuade and connect. Effective: 2016 Fall Quarter.

MGP 408—The Business of the Media (1)
Lecture/Discussion—1 hour. Focuses on the media industries and how emerging digital technologies are disrupting the way media consumption, distribution and business models work. Will highlight the economics of several media, both news and entertainment. Effective: 2016 Summer Quarter.

MGP 409—Managing Multi-Asset Class Investment Portfolios (1)
Lecture/Discussion—1 hour. Prerequisite(s): MGP 202A; MGP 203A; MGP 205 Examine top down management of multi-asset class portfolios. Topics include bonds, hedge funds, private equity, real estate, commodities, endowments, return generation, performance analysis, credit cycles, financial crises, manager selection, investment policy, and investment careers. Student teams present endowment portfolio recommendations. Effective: 2015 Spring Quarter.

MGP 410—Corporate Governance (1)
Lecture/Discussion—1 hour. Covers recent and not-so-recent business and accounting scandals, discuss how corporations can better operate in the interests of shareholders, and the public and learn from people who rely on corporate governance in making investment decisions. Effective: 2017 Winter Quarter.

MGP 411—Turnaround Management (1)
Lecture/Discussion—1 hour. Evaluate the financial performance of a company, identify opportunities for improvement, propose real solutions to enhance performance, and most important inspire action in staff. Effective: 2017 Winter Quarter.

MGP 412—International Marketing (1)
Lecture/Discussion—1 hour. Basic concepts of international marketing. Understanding and managing heterogeneous, dynamic, and interdependent environments across countries. How to develop and implement an international marketing strategy: where and how to compete, how to adapt to your marketing mix. Effective: 2016 Fall Quarter.

MGP 413—Sustainable Business Ventures: Business and Energy (1)
Lecture/Discussion—1 hour. Introduction to sustainability goals, indicators, values, measurement techniques, and practice how it applies to large and small enterprise. Effective: 2013 Spring Quarter.

MGP 414—Multi-Channel Marketing (1)
Lecture/Discussion—1 hour. Multi-channel marketing strategies empower managers to create value for different customer segments. Covers the necessary concepts to evaluate and select go-to market strategies in order to capitalize on the ubiquity of modern customers. Effective: 2017 Winter Quarter.

MGP 415—Climate Risks and Opportunities (1)
Lecture/Discussion—1 hour. Provide a working knowledge of the risks and opportunities arising from climate change and climate policy for businesses. Effective: 2016 Summer Quarter.

MGP 416—Topics in Private Equity (1)
Lecture—1 hour. Prerequisite(s): MGP 205 or MGT 205 or MGB 205 Restricted to students in the MBA program. Focuses on the finance principles related to the risk and return of the private equity (PE) industry, valuation of PE target companies, the structuring of leveraged buyouts (LBOs), and the management of portfolio companies. Effective: 2017 Fall Quarter.

MGP 417—Incentives and Controls (1)
Lecture/Discussion—1 hour. Understand how organizations use financial and nonfinancial performance management and incentive systems to motivate people and manage resources. Effective: 2017 Winter Quarter.

MGP 418—Scientific Discovery and Business Innovation at Scale in the Food and Agriculture Sector (1)
Lecture—3 hours. Restricted to students in the MBA program. Scientific discovery and business innovation within the food and agriculture sector profoundly influences the sustainability of society and enterprise competitiveness. Students will learn how business innovation models co-exist antagonistically or synergistically with scientific discovery and its influence on enterprise competitiveness. Effective: 2017 Winter Quarter.

MGP 419—Business Strategy Consulting Skills (1)
Lecture—5 hours. Restricted to students enrolled in the MBA program. Students will learn practical business consulting skills which will help apply strategy theories in the workplace. Students will learn and practice tools to
frame and analyze problems, conduct research, communicate findings and navigate client relationships. Effective: 2017 Winter Quarter.

**MGP 420—Advanced Optimization in a Python-based Modeling Language (1)**
Web Virtual Lecture—1 hour. Prerequisite(s): (MGP 252 or MGB 252 or MGT 252); (MGP 206 or MGB 206 or MGT 206) Restricted to students enrolled in the MBA program. Covers advanced optimization modeling techniques and practical application of modern, scalable modeling language. Techniques will be developed using examples from production planning in a supply chain, but students may explore other areas of application of optimization for their final project. Effective: 2017 Winter Quarter.

**MGP 421—Monte Carlo Simulation for Managerial Analysis (1)**
Lecture—1 hour. Students create Excel-based simulation models across business domains, from finance to hypothesis testing and inventory management. By course-end, students are experts at recognizing this decision-making fallacy and fixing it. Effective: 2017 Spring Quarter.

**MGP 422—Behavioral Finance and Valuation (1)**
Lecture—1 hour. Prerequisite(s); (MGT 260 or MGP 260 or MGB 260); (MGT 261 or MGP 261 or MGB 261) Restricted to students enrolled in the MBA program. Investor psychology and market frictions can cause asset prices to deviate from fundamental values, creating profit opportunities for sophisticated investors. The course will cover techniques of financial analysis with the goal of learning how to value assets and identify mispricing. Effective: 2017 Winter Quarter.

**MGP 423—Leader as Coach: An Introduction to Coaching Skills for Leaders (1)**
Lecture—1 hour. Restricted to students enrolled in the MBA program. Course introduces the fundamental coaching skills and coaching models that leaders can apply in everyday interactions with their team and colleagues in order to build trust, overcome challenges and help others discover their own full potential. Effective: 2017 Winter Quarter.

**MGP 424—Practicum for Managing People in Modern Organizations (1)**
Project (Term Project)—1 hour. Prerequisite(s): MGP 224 Restricted to students in the MBA program. Provides solid grounding in the management of work and the employment relationship. Examines firms’ interrelated policies and practices for managing people. Effective: 2011 Winter Quarter.

**MGP 425—Digital Marketing Techniques (1)**
Lecture—1 hour. Course provides students with an introduction to digital marketing. The course introduces MBA students to the fundamental aspects and tools of online marketing communication, i.e., how organizations use digital channels to effectively communicate their value propositions to the target customers. Effective: 2017 Spring Quarter.

**MGP 426—The Business of Healthcare (1)**
Lecture—1 hour. Restricted to students enrolled in the MBA program (Business Administration—Working Professional, Business Administration—Bay Area, Business Administration—Full-Time). Course is intended to provide students with an overall understanding of the unique business aspects of the healthcare industry. Effective: 2017 Winter Quarter.

**MGP 427—Implementing International Strategy (1)**
Lecture—1 hour. Restricted to students enrolled in the MBA program (Business Administration—Working Professional, Business Administration—Bay Area, Business Administration—Full-Time). Course looks at the pitfalls of implementing international strategies, and suggest several accessible, yet powerful frameworks to help international managers implement strategies successfully and completely. Effective: 2017 Winter Quarter.

**MGP 428—Renewable Energy Ventures: Planning, Funding and Regulatory Risk Assessment for Entrepreneurs and Investors (1)**
Lecture—1 hour. Restricted to students enrolled in the MBA program. Advanced innovation lab will introduce students to issues addressed by entrepreneurs and investors in renewable ventures. Lectures, simulations, case studies and practical experience of the presenters will be delivered. Effective: 2016 Summer Quarter.

**MGP 429—Detection and Prevention of Asset Misappropriation Fraud in the Workplace (1)**
Lecture—1 hour. Restricted to students enrolled in the MBA program. Course will discuss the fundamentals of fraud detection and prevention in the workplace. Students will learn the major schemes involving workplace fraud, how management can detect fraud and what policies and procedures can be implemented to prevent fraud. Effective: 2016 Fall Quarter.

**MGP 430—Learning From Catastrophes: Lessons for Managers (1)**
Lecture—1 hour. Restricted to students enrolled in the MBA program. Catastrophes unfold in surprisingly similar
ways. In this course, students will analyze catastrophes to understand these common patterns and investigate how they can be prevented and mitigated. Students will then apply these lessons to management to gain unconventional insights. Effective: 2016 Summer Quarter.

MGP 431—Project Management (1)
Lecture—10 hours. Open to students enrolled in the MBA program. Students learn project management; including project scope, project planning, milestones and project closing. Important themes include leadership, team dynamics, storytelling/creating a narrative, communication, and conflict management. Effective: 2016 Fall Quarter.

MGP 432—Project Management with Applications in Healthcare (1)
Lecture—1 hour. Course will focus on the heart of healthcare administration and how project management can be applied as a key lever to increase efficiency, decrease costs and improve the patient experience. Effective: 2017 Spring Quarter.

MGP 433—Corporate Social Responsibility (1)
Lecture—1 hour. Learn practical information that will help students understand the basics of designing, managing and evaluating an effective CSR program. Expose students to a basic set of CSR issues in the context of cross-purpose business challenges and then focus on the analysis and critical decisions that managers must make to move their business and their social agenda forward. Effective: 2018 Spring Quarter.

MGP 434—Practicum for Pricing (1)
Project (Term Project)—1 hour. Prerequisite(s): MGP 234 Restricted to students in the MBA program. Enhance understanding of the principles and concepts learned in Pricing by (1) teaching the necessary statistical and mathematical skills, and (2) requiring a report for a real Pricing case. Effective: 2011 Winter Quarter.

MGP 435—Data Wrangling (1)
Lecture—1 hour. Develop practical skills to pre-process data. Tidied raw data can then be used for downstream data analysis, modeling, and visualization. Effective: 2018 Fall Quarter.

MGP 440—Integrated Management Project (5)
Project (Term Project)—3 hours. Prerequisite(s): First-year core courses of MBA program. Applies classroom learning to solve complex business challenges for real world clients. Student teams learn practical consulting skills while their clients benefit from the student's experience, insights, and work product. Effective: 2016 Fall Quarter.

MGP 440A—Integrated Management Project (3)
Lecture/Discussion—3 hours. Prerequisite(s): First-year core courses of MBA program. Restricted to full-time MBA students. Applies classroom learning to solve complex business challenges for real world clients. Student teams learn practical consulting skills while their clients benefit from the student's experience, insights, and work product. Effective: 2015 Spring Quarter.

MGP 440B—Integrated Management Project (3)
Project (Term Project)—3 hours. Prerequisite(s): First-year core courses of MBA program. Restricted to full-time MBA students. Applies classroom learning to solve complex business challenges for real world clients. Student teams learn practical consulting skills while their clients benefit from the student's experience, insights, and work product. Effective: 2015 Spring Quarter.

MGP 440C—Integrated Management Project Lead (1)
Project (Term Project)—1 hour. Integrated Management Project Team leader. Effective: 2016 Fall Quarter.

MGP 442—Practicum for Marketing Communication (1)
Project (Term Project)—1 hour. Prerequisite(s): MGP 242 Restricted to students in the MBA program. Provides experience applying concepts learned in Marketing Communications to a realistic advertising or communication problem faced by firms. Effective: 2011 Spring Quarter.

MGP 443—Practicum for Customer Relationship Management (1)
Project (Term Project)—1 hour. Prerequisite(s): MGP 243 Restricted to students in the MBA program. Hands-on training in applying Customer Relationship Management concepts and metrics to secondary data. Enhances ability to interpret results and decide the right type of marketing actions by requiring an executive report at the end of the quarter. Effective: 2010 Fall Quarter.

MGP 448—Practicum for Marketing Strategies (1)
Project (Term Project)—1 hour. Prerequisite(s): MGP 248 Restricted to students in the MBA program. Provides opportunities to apply the concepts covered in the Marketing Strategies class through a group project involving the
analysis of strategic marketing decisions based on business-related issues, simulation and modeling. Effective: 2010 Fall Quarter.

**MGP 449—Marketing Research Practicum (1)**
Project (Term Project)—1 hour. Prerequisite(s): MGP 249 Restricted to students in the MBA program, or in some cases with permission of instructor. Provides opportunities to apply the concepts and methods covered in the Marketing Research class. Hands-on and project-based, work could be either individual or in groups depending on enrollments and/or interests of students. Effective: 2011 Spring Quarter.

**MGP 450—Practicum for Technology Strategy and Competition (1)**
Project (Term Project)—1 hour. Prerequisite(s): MGP 250 Restricted to students in the MBA program. In-depth practicum project course. Apply theories, concepts, and models, learned in course 250 to a real-world business problem, through data collection, data analysis, simulation, modeling and post-model interpretation. Effective: 2011 Winter Quarter.

**MGP 460—Practicum for Corporate Finance and Real Estate (1)**
Project (Term Project)—1 hour. Prerequisite(s): MGP 260 Restricted to students in the MBA Program. Work in groups to select and value a financial entity. It could be a firm, a sports player, a building, a project, or a patent. Grade based on an in-class presentation and a write-up. Effective: 2011 Spring Quarter.

**MGP 461—Practicum for Investment Analysis (1)**
Project (Term Project)—1 hour. Prerequisite(s): MGP 261 Restricted to students in the MBA program. Provides practical experience applying concepts learned in Investment Analysis to a realistic portfolio management setting via a hypothetical exercise. Produce a realistic executive summary and presentation of an investment proposal for a hypothetical client. Effective: 2010 Fall Quarter.

**MGP 464—Practicum for Taxes and Business Strategy (1)**
Project (Term Project)—1 hour. Prerequisite(s): MGP 264 Restricted to students in the MBA program. Practical application project drawing from the tax planning theory contained in course 264. Project consists of a business formation and operation, change in organization (incorporation), and movement into multi-national and multi-jurisdictional tax. Effective: 2010 Fall Quarter.

**MGP 465—Practicum for Venture Capital (1)**
Project (Term Project)—1 hour. Prerequisite(s): MGP 265 Restricted to students in the MBA program. Provides an opportunity to apply concepts learned in Venture Capital in a realistic setting. Complete project analyzing a potential investment in a hypothetical venture and prepare an deal term sheet/investment agreement. Effective: 2011 Winter Quarter.

**MGP 467—Practicum for Teams and Technology (1)**
Project (Term Project)—1 hour. Prerequisite(s): MGP 267 Restricted to students in the MBA program. Groups investigate the performance, creativity, conflict, information sharing, and leadership behaviors of a real world team. Provide consulting advice to the team, which not only gives analytic skills, but also builds presentation skills. Effective: 2011 Spring Quarter.

**MGP 469—Practicum for Business Intelligence Technologies (1)**
Project (Term Project)—1 hour. Prerequisite(s): MGP 269 Restricted to students in the MBA program. Projects applying concepts learned in Business Intelligence Technologies to real business problems. Effective: 2011 Winter Quarter.

**MGP 482—Practicum for Supply Chain Management (1)**
Project (Term Project)—1 hour. Prerequisite(s): MGT 282 (can be concurrent) or MGP 282 (can be concurrent) or MGB 282 (can be concurrent); Course is a pre-requisite or co-requisite. Restricted to students in the MBA program. Provides experience applying concepts learned in Supply Chain Management to a realistic management setting via a project. Effective: 2011 Spring Quarter.

**MGP 490—Directed Group Study Management Practicum (3)**
Lecture/Discussion—3 hours. Prerequisite(s): Consent of Instructor. Sponsorship of a GSM Academic Senate faculty member; approval of graduate advisor. Provides opportunity for students to gain experience in applying business methodologies previously acquired in other GSM courses. May be repeated for credit. Effective: 2012 Summer Quarter.

**MGP 490—Directed Group Study Management Practicum (1)**
Lecture/Discussion—1 hour. Prerequisite(s): Consent of Instructor. Sponsorship of a GSM Academic Senate faculty member; approval of graduate advisor. Provides opportunity for students to gain experience in applying business
methodologies previously acquired in other GSM courses. May be repeated for credit. Effective: 2019 Spring Quarter.

MGP 498—Directed Group Study Management Practicum (1-12)
Project (Term Project). Prerequisite(s): Consent of Instructor. Sponsorship of a GSM Academic Senate faculty member; approval of graduate advisor. Provides the opportunity for students to gain experience in applying business methodologies previously acquired in other GSM courses. May be repeated up to 6 unit(s). (S/U grading only.) Effective: 2011 Summer Quarter.

MGP 499—Directed Individual Study Management Practicum (1-12)
Project (Term Project). Prerequisite(s): Consent of Instructor. Sponsorship of a Graduate School of Management Academic Senate faculty member; approval of graduate advisor. Provides the opportunity for students to gain experience in applying business methodologies previously acquired in other Graduate School of Management courses. May be repeated for credit. (S/U grading only.) Effective: 2011 Summer Quarter.

Management, Graduate School of | MGT Courses

Students must complete the Management core course requirement before enrolling in any of the following elective courses, or petition with consent of the instructor. The core courses include: 200A, 201A, 201B, 202A, 203A, 204, 205, 252, 268, 440, 440A, 440B, 440C. For a list of elective courses, see https://webapps.gsm.ucdavis.edu/Raps/courses/curriculumOverviewByProgram?program=SMBA.

Courses in MGT:

MGT 011A—Elementary Accounting (4)
Discussion—1 hour; Lecture—3 hours. Basic concepts of accounting; interpreting and using financial statements; understanding accounting principles. GE credit: SS. Effective: 2017 Summer Session 1.

MGT 011B—Elementary Accounting (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MGT 011A Theory of product costing; Analyzing the role and impact of accounting information on decision making; planning and performance evaluation. GE credit: SS. Effective: 2017 Spring Quarter.

MGT 012Y—Navigating Life’s Financial Decisions (3)
Lecture—2 hours; Web Virtual Lecture—1 hour. Survey of major life financial decisions (e.g., career choice, consumption v. saving, investments, mortgages, insurance) and how decision-making biases (e.g., overconfidence, present bias, limited attention) can lead to suboptimal choice. The course draws on research from economics, psychology, and sociology. GE credit: QL, SS. Effective: 2016 Winter Quarter.

MGT 098—Directed Group Study (1-5)
Seminar—3-15 hours. Open to all undergraduates, but is primarily intended for lower division students. May be repeated for credit. (P/NP grading only.) Effective: 2016 Fall Quarter.

MGT 100—Introduction to Financial Accounting (3)
Lecture—3 hours. Prerequisite(s): MGT 011A Course is open to all upper division undergraduate and graduate students, except those in the Graduate School of Management. Introduction to the concepts, methods, and uses of accounting and financial reporting. Effective: 2016 Summer Session 1.

MGT 101—Sources and Uses of Accounting Information (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MGT 011A; MGT 011B Develops an understanding of the supply and demand of accounting information. Topics include the generation and processing of accounting information, the examination of accounting information by auditors, and the use of accounting information by capital markets and tax authorities. Effective: 2017 Fall Quarter.

MGT 101—Sources & Uses of Accounting Information (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MGT 011A C- or better; MGT 011B C- or better; must have C- or better in all prerequisite courses. Develops an understanding of the supply and demand of accounting information. Topics include the generation and processing of accounting information, the examination of accounting information by auditors, and the use of accounting information by capital markets and tax authorities. Effective: 2019 Fall Quarter.

MGT 103—Intermediate Financial Accounting I (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MGT 011A; MGT 011B Course begins to develop expertise in
the accounting for assets and introduces students to the analysis of financial statements. Effective: 2017 Fall Quarter.

**MGT 105—Intermediate Financial Accounting II (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MGT 103 Course continues to develop expertise in the preparation of financial statements by studying the accounting for liabilities and stockholders’ equity. Course also examines the accounting for contracts that can have significant effects on firms’ financial statements. Effective: 2017 Fall Quarter.

**MGT 107—Intermediate Financial Accounting III (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MGT 105 Course finishes the Intermediate Financial Accounting series by examining in depth the accounting for contracts related to pensions and leases. Course teaches the preparation of the statement of cash flows and footnote disclosures. Effective: 2017 Fall Quarter.

**MGT 120—Managing and Using Information Technology (4)**
Discussion—1 hour; Lecture—3 hours. Develop an analytical framework to manage and monitor business systems concerned with operational, human, and organizational interactions. Introduction to computer hardware, systems software, and information systems. Management of information technology and the impact of information systems on modern management. GE credit: SS. Effective: 2017 Spring Quarter.

**MGT 140—Marketing for the Technology-Based Enterprise (4)**
Discussion—1 hour; Lecture—3 hours. Quantitative analysis of needs in a product (technology-based) economy, with emphasis on how scientists, engineers, and business people interact to develop and market products and services. GE credit: SS. Effective: 2017 Winter Quarter.

**MGT 150—Technology Management (4)**
Discussion—1 hour; Lecture—3 hours. Management of firms in high technology industries such as software development and biotechnology research. Motivating and managing workers, organizing for innovation, and making decisions. GE credit: SS. Effective: 2016 Fall Quarter.

**MGT 160—Financing New Business Ventures (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MGT 011A; (MAT 016B or MAT 017B or MAT 021B); STA 013 Concepts/methods used to structure and finance new business ventures. Topics include evaluating the net social (financial) benefit of new investment projects; raising venture capital; the role of the venture capitalist; and the choice of organizational structure in new ventures. GE credit: SS. Effective: 2017 Fall Quarter.

**MGT 170—Managing Costs and Quality (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MGT 011B; or Consent of Instructor. Designing cost systems in high technology organizations and managing operations to maximize quality and minimize costs. Topics include activity based costing and management, managing quality and time to create value, ethical issues in cost assignment, and differential costing for decision. GE credit: SS. Effective: 2016 Fall Quarter.

**MGT 170—Managing Costs and Quality (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MGT 011B; MGT 011A; or Consent of Instructor. Designing cost systems in high technology organizations and managing operations to maximize quality and minimize costs. Topics include activity based costing and management, managing quality and time to create value, ethical issues in cost assignment, and differential costing for decision. GE credit: SS. Effective: 2018 Summer Session 1.

**MGT 170—Management Accounting and Control (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MGT 011A; MGT 011B; or Consent of Instructor. Covers the design of cost accounting systems, the preparation of financial budgets and forecasts, cost analysis, and the use of cost and other financial data to motivate and evaluate the performance of business units and managers. GE credit: SS. Effective: 2019 Winter Quarter.

**MGT 180—Supply Chain Planning and Management (4)**
Discussion—1 hour; Lecture—3 hours. Course develops key concepts and relationships between supply chain design and business models and strategies. Much of the focus is on quantitative techniques for analysis and management of the production and delivery of goods and services by an organization. GE credit: SS. Effective: 2017 Winter Quarter.

**MGT 190—Special Topics in Accounting (4)**
Seminar—4 hours. Prerequisite(s): MGT 011A; MGT 011B; MGT 101 Seminar in the theory and practice of advanced or emerging areas related to the practice of professional accountancy. Specific topics will vary according to the interests of the instructor or students. Effective: 2017 Spring Quarter.
MGT 200A—Financial Accounting (3)
Lecture—3 hours. Prerequisite(s): Graduate student in the Graduate School of Management. Introduction to the concepts and objectives underlying the preparation of financial statements. Topics include understanding the accounting cycle, measurement and valuation problems associated with financial statement components, consideration of the usefulness of financial statements in the analysis of a corporation's operations. Effective: 1997 Fall Quarter.

MGT 200B—Managerial Accounting (3)
Lecture—3 hours. Prerequisite(s): MGT 200A or MGB 200A or MGP 200A. Information managers should know to be effective, including: product costing, motivating people, and differential analysis for decision making. Includes team projects and written and oral presentations. Effective: 2017 Fall Quarter.

MGT 201A—The Individual and Group Dynamics (3)
Lecture—3 hours. Prerequisite(s): Graduate student in the Graduate School of Management. Examines basic psychological and social psychological processes shaping human behavior and applies knowledge of these processes to the following organizational problems: motivation, job design, commitment, socialization, culture, individual and group decision making, and team building. Effective: 1997 Fall Quarter.

MGT 201B—Organizational Strategy and Structure (3)
Lecture/Discussion—3 hours. Prerequisite(s): Completion of first year courses in Graduate School of Management or the equivalent. Open to MBA students only. Strategic management of organizations, including analysis of industries, firm resources and capabilities and corporate strategy. Strategy formulation, implementation and strategic decision-making. Firm and industry life cycles and change. Analysis of organizational design and structure including differentiation and integration. Effective: 2010 Fall Quarter.

MGT 202A—Markets and the Firm (3)
Lecture—3 hours. Prerequisite(s): Graduate student in the Graduate School of Management. Examines the interaction of consumers, firms and government, and the effect this interaction has on the use of resources and firm profitability. Fundamental economic concepts such as marginal analysis, opportunity cost, pricing, and externalities are introduced and applied. Effective: 1997 Fall Quarter.

MGT 202B—Business, Government, and the International Economy (3)
Lecture—3 hours. Prerequisite(s): MGT 202A or MGB 202A or MGP 202A. Examines the influence of government and international factors on business. Topics include distribution of income, business cycles, inflation and interest rates, the federal debt, monetary policy and international trade and finance. Effective: 2017 Fall Quarter.

MGT 203A—Data Analysis for Managers (3)
Lecture—3 hours. Prerequisite(s): Graduate student in the Graduate School of Management MBA program or consent of instructor. Introduction to statistics and data analysis for managerial decision making. Descriptive statistics, principles of data collection, sampling, quality control, statistical inference. Application of data analytic methods to problems in marketing, finance, accounting, production, operations, and public policy. Effective: 1997 Winter Quarter.

MGT 203B—Forecasting and Managerial Research Methods (3)
Lecture—3 hours. Prerequisite(s): MGT 203A or MGB 203A or MGP 203A. Practical statistical methods for managerial decision making covers regression analysis, time series analysis and forecasting, design and analysis of experiments in managerial research and contingency table analysis. Application of these methods to marketing, finance, accounting, production, operations, and public policy. Effective: 2017 Fall Quarter.

MGT 204—Marketing Management (3)
Lecture—3 hours. Prerequisite(s): Graduate student in the Graduate School of Management. Analysis of market opportunities, elements of market research, development of marketing strategies, market planning and implementations, and control systems. Consumer and industrial markets, market segmentation, pricing strategies, distribution channels, promotion, and sales. Effective: 1997 Fall Quarter.

MGT 205—Financial Theory and Policy (3)
Lecture—3 hours. Prerequisite(s): Graduate student in the Graduate School of Management. Corporate financial policy and investment management. Covers capital budgeting, optimal financial structure, cost-of-capital determination, risk measurement. Develops basic valuation principles for investments with long-lived and risky cash-flows, and extends these to derivative securities, asset portfolios, investment management and hedging. Effective: 2009 Fall Quarter.
MGT 206—Decision Making and Management Science (3)
Lecture—3 hours. Prerequisite(s): Graduate student in the Graduate School of Management MBA program or consent of instructor. Develops decision-making and problem-solving skills in conjunction with a quantitative model-building approach. Emphasizes how structured modeling techniques, probability forecasts, simulations, and computer optimization models are used in the overall process of making decisions in an uncertain environment. Effective: 1997 Winter Quarter.

MGT 207—Management Information Systems (3)
Lecture—3 hours. Prerequisite(s): Graduate student or consent of instructor. Introduction to computer programming and data handling skills. Use of computer in organizations, emphasis on managerial aspects of computing. Standard and nonstandard uses of data files, centralization versus decentralization of computing, office automation, computer security. Effective: 1997 Winter Quarter.

MGT 215—Business Law (3)
Lecture—3 hours. Prerequisite(s): Completion of administration core requirements or petition with consent of instructor. Introduction to law and legal process in the United States. Sources of law. Structure and operation of courts, federal-state relationships, fundamentals of administrative law, fundamentals of business law. Effective: 1997 Winter Quarter.

MGT 216—Managing Professionals, Budgets, Controls and Ethics (3)
Lecture—3 hours. Prerequisite(s): Graduate standing. Performance measures, budgetary controls and ethical pressures which occur at middle management levels in service-type operations. Addresses such organizations as engineering, medical groups, law offices, management consultants. Effective: 1997 Winter Quarter.

MGT 220—Management of Social Networks (3)
Lecture/Discussion—3 hours. Prerequisite(s): MGT 201A Open to MBA students only. Principles and applications of social network theory: coordinating divergent interests to create value for individuals and organizations. Emphasis on conceptual models, web-based diagnostic tools, and practical applications. Effective: 2004 Winter Quarter.

MGT 223—Power and Influence in Management (3)
Seminar—3 hours. Prerequisite(s): MGT 201A or MGB 201A or MGP 201A; Consent of Instructor. Investigation of the bases of power in organizations and the tactics used to translate power into influence. Topics include the control of resources (including information), social psychological processes (including commitment), the construction of meaning, and ethics. Effective: 2017 Fall Quarter.

MGT 224—Managing People in High-Performance Organizations (3)
Lecture—3 hours. Prerequisite(s): MGT 201A or MGB 201A or MGP 201A Restricted to students in the MBA program. Strategic approach to the management of people within organization. Analyze employment systems' fit with firms' environments and strategies. Explore consequences of choices firms make in managing people—decisions as to selection, performance evaluation, compensation, and other management policies and practices. Not open to students who have taken MGB 224 or MGP 224. Effective: 2017 Fall Quarter.

MGT 234—Pricing (3)
Lecture/Discussion—3 hours. Prerequisite(s): (MGT 202A or MGB 202A or MGP 202A); (MGT 203B or MGB 203B or MGP 203B); (MGB 204 or MGP 204 or MGT 204) Restricted to students in the MBA program. Combines lectures, cases and homework to teach students tools and skills necessary to analyze pricing situations, make pricing decisions, and implement them, in a systematic manner. Effective: 2017 Fall Quarter.

MGT 239—Digital Marketing (3)
Lecture/Discussion—3 hours. Prerequisite(s): MGT 204 or MGB 204 or MGP 204 Course equips students for a career in digital marketing and social media. Topics include online advertising, search engine optimization, interactive mktg, online privacy issues, e-commerce, social influence, social network theory, measurement of social influence and integrating social and traditional media. Effective: 2017 Fall Quarter.

MGT 240—Management Policy and Strategy (3)
Lecture—3 hours. Prerequisite(s): First-year core courses of M.B.A. program. Examines the scope of missions, objectives strategies, policies, structures, measurements and incentives which bear on the management of an organization. Real client organizations, in the private and public sectors, are assigned to student teams as the subjects of study. Effective: 1997 Winter Quarter.

MGT 240A—Integrated Management Project (3)
Lecture/Discussion—3 hours. Prerequisite(s): First-year core courses of MBA program. Restricted to full-time MBA students. Applies classroom learning to solve complex business challenges for real world clients. Student teams
learn practical consulting skills while their clients benefit from the student’s experience, insights, and work product. Effective: 2013 Spring Quarter.

MGT 241—New Product Development (3)
Lecture/Discussion—3 hours. Prerequisite(s): MGT 204 or MGB 204 or MGP 204 Open to graduate students in the Graduate School of Management. State-of-the-art concepts and methods to enhance the effectiveness of new product development activities. Focuses on the understanding of managerial issues and acquiring the ability to solve problems. Effective: 2017 Fall Quarter.

MGT 242—Marketing Communications (3)
Lecture—3 hours. Issues in designing a marketing communications strategy. Topics include mass and direct communications, institutional aspects of advertising, consumer behavior, evaluating ad effectiveness, determining ad budget, creative strategy, and use and abuse of promotions. Effective: 2000 Fall Quarter.

MGT 243—Customer Relationship Management (3)
Lecture/Discussion—3 hours. Prerequisite(s): MGT 204 or MGB 204 or MGP 204 Restricted to MBA students only. Customer Relationship Management (CRM) is a management approach under which marketing activities are organized and measured around customers (rather than around brands.) This approach is appealing because customers, not brands, are those who make buying decisions. Effective: 2017 Fall Quarter.

MGT 244—New and Small Business Ventures (3)
Lecture—3 hours. Prerequisite(s): MGT 204 or MGB 204 or MGP 204 Student teams develop complete business plans for their own start-up ventures. Process includes: elevator pitch, business strategy, comprehensive bottom-up financial projections, capital requirements, product differentiation, competitive, alliance, and go-to-market strategy development, investor presentation, and comprehensive written business plan. Effective: 2017 Fall Quarter.

MGT 245—Business Writing (3)
Lecture/Discussion—3 hours. Prerequisite(s): Completion of first-year core courses at the Graduate School of Management or the equivalent. Restricted to MBA students only. Techniques for sharpening writing skills are introduced, along with grammatical structure, word choice, and punctuation. Learn to develop styles that are pitch-perfect for given situations and to think strategically about each communication challenge in a management setting. Effective: 2011 Fall Quarter.

MGT 246—Negotiation and Team Building (3)
Lecture/Discussion—3 hours. Prerequisite(s): MGT 205; MGT 202. Basic theory of negotiation; applies theory to process of building teams to achieve business purposes. Covers integrative and distributive strategies of claiming value, how to recognize bargaining tricks, uncovering hidden agendas, brainstorming to extend Pareto frontier. Effective: 2011 Fall Quarter.

MGT 247—Customer Service as a Marketing Tool (3)
Lecture—3 hours. Understanding the distinct features of services, how to create value through service, methods of building strong relationships with customers, methods of measuring and building customer satisfaction, and measuring the financial impact of service improvement. Effective: 1998 Spring Quarter.

MGT 248—Marketing Strategies (3)
Lecture—3 hours. Prerequisite(s): (MGT 202A or MGB 202A or MGP 202A); (MGP 204 or MGB 204 or MGT 204) Examines process by which organizations develop strategic marketing plans. Includes definition of activities and products, marketing audits, appraising market opportunities, design of new activities and products, and organizing marketing planning function. Applications to problems in private and public sector marketing. Effective: 2017 Fall Quarter.

MGT 249—Marketing Research (3)
Lecture—3 hours. Prerequisite(s): (MGT 202A or MGB 202A or MGP 202A); (MGP 203A or MGB 203A or MGT 203A); (MGT 204 or MGB 204 or MGP 204) Course addresses the managerial issues and problems of systematically gathering and analyzing information for making private and public marketing decisions. Covers the cost and value of information, research design, information collection, measuring instruments, data analysis, and marketing research applications. Effective: 2017 Fall Quarter.

MGT 250—Technology, Competition and Strategy (3)
Lecture—3 hours. Prerequisite(s): (MGT 202A or MGB 202A or MGP 202A); (MGP 203A or MGT 203A or MGB 203A) Restricted to students in the MBA program. Why is software typically so defective? Why do many firms in the IT industry give away their best products free? This course helps you analyze questions like these by modeling competition and strategy in the network, technology and information industries. Effective: 2017 Fall Quarter.
MGT 251—Management of Innovation (3)
Lecture—3 hours. Prerequisite(s): MGT 201A or MGB 201A or MGP 201A Managing innovative enterprise in changing and uncertain environments. Covers technology forecasting and assessment, program selection and control, financial management, regulation, and ethics. Effective: 2017 Fall Quarter.

MGT 252—Managing for Operational Excellence (3)
Lecture—3 hours. Prerequisite(s): MGT 203A or MGB 203A or MGP 203A Open to students in the Graduate School of Management. Explores the management of operations as applied to manufacturing as well as services provided both inside and outside the organization. Develop an understanding of how uncertainty affects planning and delivery by looking at fundamental models of operations. Effective: 2018 Spring Quarter.

MGT 253—Corporate Social Responsibility (3)
Lecture—3 hours. Goal in this course will be to develop a thought process and approach to corporate social responsibility that students will be able to build on during their post-school leadership roles, whether as corporate executives, entrepreneurs, or NGO leaders. Effective: 2016 Spring Quarter.

MGT 255—Entrepreneurship and Venture Investment Clinic (3)
Lecture—3 hours. Class size limited to 30 students. Provides the necessary analytical and design tools to create business ideas and refine business models based on emerging technologies. Students learn to work closely in small teams to synthesize technical, strategic, and marketing needs into designs for new ventures. Effective: 2016 Spring Quarter.

MGT 258—Mergers and Acquisitions (3)
Lecture—3 hours. Prerequisite(s): MGT 205 Course focuses on the market for corporate acquisitions and restructuring activity. Topics include: sources of value creation; takeovers; anti-takeover provisions; bidding strategies; use of leverage in buyouts; regulatory risk and hurdles; and, valuation approaches for highly leveraged transactions. Effective: 2016 Spring Quarter.

MGT 259—Banking and the Financial System (3)
Lecture—3 hours. Prerequisite(s): MGB 205 or MGP 205; Consent of Instructor. Analyzes the role of financial markets and institutions in allocating capital. Focuses on: bank lending; debt securities; financial market innovations; regulation; functions of commercial banks and other financial intermediaries. Utilizes case studies. Effective: 2016 Spring Quarter.

MGT 260—Corporate Finance (3)
Lecture—3 hours. Prerequisite(s): (MGT 200A or MGB 200A or MGP 200A); (MGP 202A or MGB 202A or MGT 202A); (MGT 205 or MGP 205 or MGB 205) Focuses on planning, acquiring, and managing a company's financial resources. Includes discussion of financial aspects of mergers and other forms of reorganization; analysis of investment, financial, and dividend policy; and theories of optimal capital structure. Effective: 2017 Fall Quarter.

MGT 261—Investment Analysis (3)
Lecture—3 hours. Prerequisite(s): (MGT 203A or MGB 203A or MGP 203A); (MGP 205 or MGT 205 or MGB 205) Examines asset pricing theories and relevant evidence, including the investment performance of stocks and bonds. Topics include the efficiency of markets, domestic and international portfolio diversification, factors influencing the value of stocks and other investments, and portfolio management and performance. Effective: 2017 Fall Quarter.

MGT 262—Money and Security Markets (3)
Lecture—3 hours. Examines how money and securities markets are organized; how public agencies, businesses, others obtain and invest funds in those markets. Relationship between interest rates, monetary policy, government's role in improving capital markets, approaches to assessing changes in regulation of specific markets. Effective: 1997 Fall Quarter.

MGT 263—Derivative Securities (3)
Lecture/Discussion—3 hours. Prerequisite(s): (MGT 203A or MGB 203A or MGP 203A); (MGP 205 or MGT 205 or MGB 205) Open to students enrolled in the MBA program. Behavior of options, futures, and other derivative securities markets and how public agencies, business and others use those markets. Trading strategies involving options, swaps, and financial futures contracts. Pricing of derivative securities, primarily by arbitrage methods. Effective: 2017 Fall Quarter.

MGT 264—Business Taxation (3)
MGT 265—Venture Capital and the Finance of Innovation (3)
Lecture/Discussion—3 hours. Prerequisite(s): MGT 205 or MGP 205 or MGB 205 Restricted to students in the MBA program. Examines venture capital finance and the related practice of R&D finance. Goal is to apply finance tools and framework to the world of venture capital and financing of projects in high-growth industries. Effective: 2017 Fall Quarter.

MGT 266—International Finance (3)
Lecture—3 hours. Prerequisite(s): MGB 205 or MGT 205 or MGP 205; Or the equivalent. Studies fixed and floating exchange-rate systems. Topics include determinants of a nation's balance of international payments; macroeconomic interdependence of nations under various exchange-rate regimes and its implications for domestic stabilization policies; and the international coordination of monetary and stabilization policies. Effective: 2017 Fall Quarter.

MGT 267—Teams and Technology (3)
Lecture/Discussion—3 hours. Prerequisite(s): Consent of Instructor. Restricted to working professional MBA students. Theory and practice of managing teams with primary goals of: providing conceptual guidelines for analyzing and diagnosing group dynamics and determining strategic options as a manager; imparting interpersonal skills for implementing effective strategies; understanding how technological change affects team processes. Effective: 2009 Spring Quarter.

MGT 268—Articulation and Critical Thinking (3)
Lecture/Discussion—3 hours. Commitment to this course, become competent public speakers, write well at a level expected in business, think efficiently and critically about business challenges and have a useful personal code of ethics to shape their actions and decisions. No student may repeat course for credit. Effective: 2013 Fall Quarter.

MGT 269—Business Intelligence Technologies-Data Mining (3)

MGT 270—Corporate Financial Reporting (3)
Lecture—3 hours. Prerequisite(s): MGT 200A or MGP 200A or MGB 200A Analyzes and evaluates contemporary issues in financial reporting and develops implications of those issues for business decision makers, investment managers, and accounting policymakers. Effective: 2017 Fall Quarter.

MGT 271—Strategic Cost Management (3)
Lecture/Discussion—3 hours. Prerequisite(s): MGT 202A or MGP 202A or MGB 202A Restricted to students in the MBA program. Theoretical frameworks and associated techniques for using organizational design and cost management to achieve a sustainable, profitable cost structure. Topics include: target costing, process design for low cost, total cost of ownership, cost of customers, implementing structural change, and incentives. Effective: 2017 Fall Quarter.

MGT 272—Evaluation of Financial Information (3)
Lecture—3 hours. Prerequisite(s): MGT 200A or MGP 200A or MGB 200A Studies how investors, creditors, others use accounting and other information in making rational investment, lending decisions. Emphasis is placed on the analysis of financial information in a variety of contexts. Where applicable, recent research in finance and economics is discussed. Effective: 2017 Fall Quarter.

MGT 273—Accounting and Reporting for Government Nonprofit Entities (3)
Lecture—3 hours. Concepts, methods, and uses of accounting and financial reporting by governmental and nonprofit entities. Introduction to budgeting and performance evaluation, and accounting for entities such as hospitals, universities, and welfare agencies. Effective: 1997 Winter Quarter.

MGT 274—Corporate Governance (3)
Lecture—3 hours. Prerequisite(s): Full-time MBA students or consent of instructor. Discusses how corporations can better operate in the interests of shareholders and public. Directly relevant to managers, consultants in compensation and incentives, staff working on mergers and acquisitions, corporate regulators, shareholder rights activists, and board members. Effective: 2009 Fall Quarter.

MGT 276—Real Estate, Finance and Development (3)
Lecture—3 hours. Prerequisite(s): (MGP 205 or MGT 205 or MGB 205); (MGP 201A or MGB 201A or MGT 201A) Focus on single family, attached, detached, multi-family, and light commercial development. Students will study
factors which make up successful real estate developments. Course will consider financial aspects involved in land acquisition, land development, construction, and project lending. Effective: 2017 Fall Quarter.

MGT 281—Systems Analysis and Design (3)
Lecture—3 hours. Design and specification of computer-based information systems. Applications systems development life cycle, use requirements and feasibility assessment, logical and physical design, program development and testing, conversion and implementation. Effective: 1997 Winter Quarter.

MGT 282—Supply Chain Management (3)
Lecture/Discussion—3 hours. Prerequisite(s): MGT 203A or MGP 203A or MGB 203A Restricted to students in the MBA program. Matching supply with demand is a primary challenge for a firm: excess supply is too costly, inadequate supply irritates customers. Matching supply to demand is easiest when a firm has a flexible supply process, but flexibility is generally expensive. Effective: 2017 Fall Quarter.

MGT 284—Applied Linear Models for Management (3)
Lecture—3 hours. Covers regression, analysis of variance, and multivariate analysis. Topics will focus on applications to management and policy problems. Effective: 1997 Winter Quarter.

MGT 285—Time Series Analysis and Forecasting (3)
Lecture—3 hours. Prerequisite(s): MGT 203B or MGP 203B or MGP 203B Considers application of time series methods to evaluation and forecasting problems. Covers univariate and multivariate ARIMA models and transfer function models. Applications will be in such areas as economics, finance, budgeting, program evaluation, and industrial process control. Effective: 2016 Spring Quarter.

MGT 286—Telecommunications and Computer Networks (3)
Lecture—3 hours. Prerequisite(s): MGT 280. Communication system components; common carrier services; design and control of communications networks; network management and distributed environment; local area networks; data security in computer networks. Effective: 1997 Winter Quarter.

MGT 287—Business Database and Database Marketing (3)

MGT 288—Special Topics in Management of Information Systems (3)
Lecture—3 hours. Managerial aspects of information systems. Topics stressing applications in organizations chosen from: economics of computers and information systems, decision support systems, management of computer-based information systems, office automation. Effective: 1997 Winter Quarter.

MGT 290—Topics in General Management (3)
Seminar—3 hours. Prerequisite(s): Completion of all first-year graduate courses at the Graduate School of Management or the equivalent. Advanced topics in general management. Varied topics to cover more extensively issues discussed in courses 201A and 201B, or current business interest topics in fields of business writing, business communications, development, or workplace processes. May be repeated for credit. Effective: 2009 Fall Quarter.

MGT 291—Topics in Organizational Behavior (3)
Seminar—3 hours. Prerequisite(s): Completion of all first-year graduate courses at the Graduate School of Management or the equivalent. Advanced topics in social psychology and sociology of organizations. Varied topics to cover more extensively issues discussed in courses 201A and 201B, or current business interest topics in fields of organization design, strategy, development, or workplace processes. May be repeated for credit. Effective: 2009 Fall Quarter.

MGT 292—Topics in Finance (3)
Seminar—3 hours. Prerequisite(s): Completion of all first-year graduate courses at the Graduate School of Management or the equivalent. Contemporary and emerging issues in finance. Application of modern techniques of finance to business problems. Use of appropriate electronic database and research techniques. May be repeated for credit. Effective: 1999 Fall Quarter.

MGT 293—Topics in Marketing (3)
Seminar—3 hours. Prerequisite(s): Completion of all first-year graduate courses at the Graduate School of Management or the equivalent. Advanced topics in marketing, which may include marketing research, new product development, brand management, pricing, distribution management, service marketing, hitech marketing, advertising, sales promotions, marketing through the Web. May be repeated for credit. Effective: 2009 Fall Quarter.
MGT 294—Topics in Accounting (3)  
Seminar—3 hours. Prerequisite(s): Completion of all first-year graduate courses at the Graduate School of Management or the equivalent. Contemporary and emerging issues in financial management accounting. Application of modern techniques of evaluation and analysis of financial information. Use of appropriate electronic database and research techniques. May be repeated for credit. Effective: 1999 Fall Quarter.

MGT 295—Topics in Information Technology (3)  
Seminar—3 hours. Prerequisite(s): Completion of all first-year graduate courses at the Graduate School of Management or the equivalent. Applications of information technology to management and management of information technology. Adaptation to the dynamic nature of the field. May be repeated for credit. Effective: 1999 Fall Quarter.

MGT 296—Topics in Technology Management (3)  
Seminar—3 hours. Prerequisite(s): Completion of all first-year graduate courses at the Graduate School of Management or the equivalent. Cyclical nature of innovation and technological change, features of innovative firms and industries, national innovation systems, and impact of information technologies on innovation processes. May be repeated for credit. Effective: 1999 Fall Quarter.

MGT 297—Topics in International Management (3)  
Seminar—3 hours. Prerequisite(s): Completion of all first-year graduate courses at the Graduate School of Management or the equivalent. Broader environment in which U.S. firms and their foreign competitors operate. Integration of material from other topics courses (marketing, strategy, finance, accounting, information technology, technology management) into the international setting. May be repeated for credit. May be repeated for credit. Effective: 1999 Fall Quarter.

MGT 298—Directed Group Study (1-5)  
Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

MGT 299—Individual Study (1-12)  
Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

MGT 401—Crisis Management (1)  
Discussion/Laboratory—1 hour. Establishes and explores the defining characteristics of crises. Will learn to anchor crisis management firmly within overall strategic management and also acquire a set of useful tools and techniques for planning for and handling actual crises. Effective: 2016 Summer Quarter.

MGT 402—Crisis Communications and Reputation Management (1)  
Discussion/Laboratory—1 hour. Intended to provide you with an understanding of the framework and tools necessary to successfully address communications and reputation management tasks in a variety of crisis situations. Effective: 2016 Winter Quarter.

MGT 403—Business Statistics Practicum (1)  
Project (Term Project)—1 hour. Prerequisite(s): (MGT 203A or MGP 203A or MGB 203A); (MGT 203B (can be concurrent) or MGP 203B (can be concurrent) or MGB 203B (can be concurrent)); MGT 203B, MGP 203B, or MGB 203B completed or required concurrently. Restricted to students in the MBA program. Applies techniques and concepts in business statistics to real case studies. Effective: 2011 Fall Quarter.

MGT 404—Organizational Change Management (1)  
Lecture/Discussion—1 hour. Challenges in getting significant changes made in organizations. Learn Organization Change Management (OCM) techniques and discuss case situations where OCM techniques play a role. Effective: 2016 Fall Quarter.

MGT 405—Business Literature (1)  
Lecture/Discussion—1 hour. Will examine Business history – historical trends that might influence contemporary business. Some argue that the recent collapse of our financial system might have been averted if business leaders had a better sense of history. Effective: 2017 Winter Quarter.

MGT 406—Ethical Issues in Management (1)  
Lecture/Discussion—1 hour. Explores the philosophical foundation of ethical theory and its recent applications to business situations. Professional codes of ethics, such as those promulgated by educational, managerial, engineering, scientific, medical and legal professional societies, are presented. Effective: 2017 Winter Quarter.
MGT 407—Storytelling for Leadership (1)
Lecture/Discussion—1 hour. Internalize the fundamental principles behind stories that educate, influence, motivate, inspire, persuade and connect. Effective: 2016 Fall Quarter.

MGT 408—The Business of the Media (1)
Lecture/Discussion—1 hour. Focuses on the media industries and how emerging digital technologies are disrupting the way media consumption, distribution and business models work. Will highlight the economics of several media, both news and entertainment. Effective: 2016 Summer Quarter.

MGT 409—Managing Multi-Asset Class Investment Portfolios (1)
Lecture/Discussion—1 hour. Prerequisite(s): MGT 202A; MGT 203A; MGT 205 Examines top down management of multi-asset class portfolios. Topics include bonds, hedge funds, private equity, real estate, commodities, endowments, return generation, performance analysis, credit cycles, financial crises, manager selection, investment policy, and investment careers. Student teams present endowment portfolio recommendations. Effective: 2015 Spring Quarter.

MGT 410—Corporate Governance (1)
Lecture/Discussion—1 hour. Covers recent and not-so-recent business and accounting scandals, discuss how corporations can better operate in the interests of shareholders and the public, and learn from people who rely on corporate governance in making investment decisions. Effective: 2017 Winter Quarter.

MGT 411—Turnaround Management (1)
Lecture/Discussion—1 hour. Evaluate the financial performance of a company, identify opportunities for improvement, propose real solutions to enhance performance, and most important inspire action in staff. Effective: 2017 Winter Quarter.

MGT 412—International Marketing (1)
Lecture/Discussion—1 hour. Basic concepts of international marketing. Understanding and managing heterogeneous, dynamic, and interdependent environments across countries. How to develop and implement an international marketing strategy: where and how to compete, how to adapt your marketing mix. Effective: 2016 Fall Quarter.

MGT 413—Sustainable Business Ventures: Business and Energy (1)
Lecture/Discussion—1 hour. Introduction to sustainability goals, indicators, values, measurement techniques, and practice how it applies to large and small enterprise. Effective: 2013 Winter Quarter.

MGT 414—Multi-Channel Marketing (1)
Lecture/Discussion—1 hour. Multi-channel marketing strategies empower managers to create value for different customer segments. Covers the necessary concepts to evaluate and select go-to market strategies in order to capitalize on the ubiquity of modern customers. Effective: 2017 Winter Quarter.

MGT 415—Climate Risks and Opportunities (1)
Lecture/Discussion—1 hour. Provide a working knowledge of the risks and opportunities arising from climate change and climate policy for businesses. Effective: 2016 Summer Quarter.

MGT 417—Incentives and Controls (1)
Lecture/Discussion—1 hour. Understand how organizations use financial and nonfinancial performance management and incentive systems to motivate people and manage resources. Effective: 2017 Winter Quarter.

MGT 418—Scientific Discovery and Business Innovation at Scale in the Food and Agriculture Sector (1)
Lecture—3 hours. Restricted to students in the MBA program. Scientific discovery and business innovation within the food and agriculture sector profoundly influences the sustainability of society and enterprise competitiveness. Students will learn how business innovation models co-exist antagonistically or synergistically with scientific discovery and its influence on enterprise competitiveness. Effective: 2017 Winter Quarter.

MGT 419—Business Strategy Consulting Skills (1)
Lecture—5 hours. Restricted to students enrolled in the MBA program. Students will learn practical business consulting skills which will help apply strategy theories in the workplace. Students will learn and practice tools to frame and analyze problems, conduct research, communicate findings and navigate client relationships. Effective: 2017 Winter Quarter.

MGT 420—Advanced Optimization in a Python-based Modeling Language (1)
Web Virtual Lecture—1 hour. Prerequisite(s): (MGT 252 or MGB 252 or MGP 252); (MGT 206 or MGB 206 or MGP 206) Restricted to students enrolled in the MBA program. Covers advanced optimization modeling techniques and
practical application of modern, scalable modeling language. Techniques will be developed using examples from production planning in a supply chain, but students may explore other areas of application of optimization for their final project. Effective: 2017 Winter Quarter.

MGT 421—Monte Carlo Simulation for Managerial Analysis (1)
Lecture—1 hour. Students create Excel-based simulation models across business domains, from finance to hypothesis testing and inventory management. By course-end, students are experts at recognizing this decision-making fallacy and fixing it. Effective: 2017 Spring Quarter.

MGT 422—Behavioral Finance and Valuation (1)
Lecture—1 hour. Prerequisite(s): (MGT 260 or MGP 260 or MGB 260); (MGT 261 or MGP 261 or MGB 261) Restricted to students enrolled in the MBA program. Investor psychology and market frictions can cause asset prices to deviate from fundamental values, creating profit opportunities for sophisticated investors. The course will cover techniques of financial analysis with the goal of learning how to value assets and identify mispricing. Effective: 2017 Winter Quarter.

MGT 423—Leader as Coach: An Introduction to Coaching Skills for Leaders (1)
Lecture—1 hour. Restricted to students enrolled in the MBA program. Course introduces the fundamental coaching skills and coaching models that leaders can apply in everyday interactions with their team and colleagues in order to build trust, overcome challenges and help others discover their own full potential. Effective: 2017 Winter Quarter.

MGT 424—Practicum for Managing People in Modern Organizations (1)
Project (Term Project)—1 hour. Prerequisite(s): MGT 224 Restricted to students in the MBA program. Provides solid grounding in the management of work and the employment relationship. Examines firms’ interrelated policies and practices for managing people. Effective: 2011 Winter Quarter.

MGT 425—Digital Marketing Techniques (1)
Lecture—1 hour. Course provides students with an introduction to digital marketing. The course introduces MBA students to the fundamental aspects and tools of online marketing communication, i.e., how organizations use digital channels to effectively communicate their value propositions to the target customers. Effective: 2017 Winter Quarter.

MGT 426—The Business of Healthcare (1)
Lecture—1 hour. Restricted to students enrolled in the MBA program (Business Administration—Working Professional, Business Administration—Bay Area, Business Administration—Full-Time). Course is intended to provide students with an overall understanding of the unique business aspects of the healthcare industry. Effective: 2017 Winter Quarter.

MGT 427—Implementing International Strategy (1)
Lecture—1 hour. Restricted to students enrolled in the MBA program (Business Administration—Working Professional, Business Administration—Bay Area, Business Administration—Full-Time). Course looks at the pitfalls of implementing international strategies, and suggest several accessible, yet powerful frameworks to help international managers implement strategies successfully and completely. Effective: 2017 Winter Quarter.

MGT 428—Renewable Energy Ventures: Planning, Funding and Regulatory Risk Assessment for Entrepreneurs and Investors (1)
Lecture—1 hour. Restricted to students enrolled in the MBA program. Advanced innovation lab will introduce students to issues addressed by entrepreneurs and investors in renewable ventures. Lectures, simulations, case studies and practical experience of the presenters will be delivered. Effective: 2016 Summer Quarter.

MGT 429—Detection and Prevention of Asset Misappropriation Fraud in the Workplace (1)
Lecture—1 hour. Restricted to students enrolled in the MBA program. Course will discuss the fundamentals of fraud detection and prevention in the workplace. Students will learn the major schemes involving workplace fraud, how management can detect fraud and what policies and procedures can be implemented to prevent fraud. Effective: 2016 Fall Quarter.

MGT 430—Learning From Catastrophes: Lessons for Managers (1)
Lecture—1 hour. Restricted to students enrolled in the MBA program. Catastrophes unfold in surprisingly similar ways. In this course, students will analyze catastrophes to understand these common patterns and investigate how they can be prevented and mitigated. Students will then apply these lessons to management to gain unconventional insights. Effective: 2016 Summer Quarter.

MGT 431—Project Management (1)
Lecture—10 hours. Open to students enrolled in the MBA program. Students learn project management; including
project scope, project planning, milestones and project closing. Important themes include leadership, team
dynamics, storytelling/creating a narrative, communication, and conflict management. Effective: 2016 Fall Quarter.

**MGT 432—Project Management with Applications in Healthcare (1)**
Lecture—1 hour. Course will focus on the heart of healthcare administration and how project management can be
applied as a key lever to increase efficiency, decrease costs and improve the patient experience. Effective: 2017
Spring Quarter.

**MGT 433—Corporate Social Responsibility (1)**
Lecture—1 hour. Learn practical information that will help students understand the basics of designing, managing
and evaluating an effective CSR program. Expose students to a basic set of CSR issues in the context of cross-
purpose business challenges and then focus on the analysis and critical decisions that managers must make to
move their business and their social agenda forward. Effective: 2018 Spring Quarter.

**MGT 434—Practicum for Pricing (1)**
Project (Term Project)—1 hour. Prerequisite(s): MGT 234 Restricted to students in the MBA program. Enhance
understanding of the principles and concepts learned in Pricing by (1) teaching the necessary statistical and
mathematical skills, and (2) requiring a report for a real Pricing case. Effective: 2011 Winter Quarter.

**MGT 435—Data Wrangling (1)**
Lecture—1 hour. Develop practical skills to pre-process data. Tidied raw data can then be used for downstream data
analysis, modeling, and visualization. Effective: 2018 Fall Quarter.

**MGT 440—Integrated Management Project (5)**
Project (Term Project)—3 hours. Prerequisite(s): First-year core courses of MBA program. Applies classroom learning
to solve complex business challenges for real world clients. Student teams learn practical consulting skills while
their clients benefit from the student's experience, insights, and work product. Effective: 2016 Fall Quarter.

**MGT 440A—Integrated Management Project (3)**
Lecture/Discussion—3 hours. Prerequisite(s): First-year core courses of MBA program. Restricted to full-time (day)
MBA students. Applies classroom learning to solve complex business challenges for real world clients. Student
teaches practical consulting skills while their clients benefit from the student’s experience, insights, and work product. Effective: 2012 Fall Quarter.

**MGT 440B—Integrated Management Project (3)**
Project (Term Project)—3 hours. Prerequisite(s): First-year core courses of MBA program. Restricted to full-time (day)
MBA students. Applies classroom learning to solve complex business challenges for real world clients. Student
teaches practical consulting skills while their clients benefit from the student’s experience, insights, and work product. Effective: 2013 Winter Quarter.

**MGT 440C—Integrated Management Project Team Lead (1)**
Project (Term Project)—1 hour. Integrated Management Project Team leader. Effective: 2016 Fall Quarter.

**MGT 442—Practicum for Marketing Communication (1)**
Project (Term Project)—1 hour. Prerequisite(s): MGT 242 Restricted to students in the MBA program. Provides
experience applying concepts learned in Marketing Communications to a realistic advertising or communication

**MGT 443—Practicum for Customer Relationship Management (1)**
Project (Term Project)—1 hour. Prerequisite(s): MGT 243 Restricted to students in the MBA program. Hands-on
training in applying Customer Relationship Management concepts and metrics to secondary data. Enhances ability
to interpret results and decide the right type of marketing actions by requiring an executive report at the end of the
quarter. Effective: 2010 Fall Quarter.

**MGT 448—Practicum for Marketing Strategies (1)**
Project (Term Project)—1 hour. Prerequisite(s): MGT 248 Restricted to students in the MBA program. Provides
opportunities to apply the concepts covered in the Marketing Strategies class through a group project involving the
analysis of strategic marketing decisions based on business-related issues, simulation and modeling. Effective:
2010 Fall Quarter.
Marketing Research class. Hands-on and project-based, work could be either individual or in groups depending on enrollments and/or interests of students. Effective: 2011 Spring Quarter.

MGT 450—Practicum for Technology Strategy and Competition (1)
Project (Term Project)—1 hour. Prerequisite(s): MGT 250 Restricted to students in the MBA program. In-depth practicum project course. Apply theories, concepts, and models, learned in course 250 to a real-world business problem, through data collection, data analysis, simulation, modeling and post-model interpretation. Effective: 2011 Winter Quarter.

MGT 460—Practicum for Corporate Finance and Real Estate (1)
Project (Term Project)—1 hour. Prerequisite(s): MGT 260 Restricted to students in the MBA Program. Work in groups to select and value a financial entity. It could be a firm, a sports player, a building, a project, or a patent. Grade based on an in-class presentation and a write-up. Effective: 2011 Spring Quarter.

MGT 461—Practicum for Investment Analysis (1)
Project (Term Project)—1 hour. Prerequisite(s): MGT 261 Restricted to students in the MBA program. Provides practical experience applying concepts learned in Investment Analysis to a realistic portfolio management setting via a hypothetical exercise. Produce a realistic executive summary and presentation of an investment proposal for a hypothetical client. Effective: 2010 Fall Quarter.

MGT 464—Practicum for Taxes and Business Strategy (1)
Project (Term Project)—1 hour. Prerequisite(s): MGT 264 Restricted to students in the MBA program. Practical application project drawing from the tax planning theory contained in course 264. Project consists of a business formation and operation, change in organization (incorporation), and movement into multi-national and multi-jurisdictional tax. Effective: 2010 Fall Quarter.

MGT 465—Practicum for Venture Capital (1)
Project (Term Project)—1 hour. Prerequisite(s): MGT 265 Restricted to students in the MBA program. Provides an opportunity to apply concepts learned in Venture Capital in a realistic setting. Complete project analyzing a potential investment in a hypothetical venture and prepare an deal term sheet/investment agreement. Effective: 2011 Winter Quarter.

MGT 467—Practicum for Teams and Technology (1)
Project (Term Project)—1 hour. Prerequisite(s): MGT 267 Restricted to students in the MBA program. Groups investigate the performance, creativity, conflict, information sharing, and leadership behaviors of a real world team. Provide consulting advice to the team, which not only gives analytic skills, but also builds presentation skills. Effective: 2011 Spring Quarter.

MGT 469—Practicum for Business Intelligence Technologies (1)
Project (Term Project)—1 hour. Prerequisite(s): MGT 269 Restricted to students in the MBA program. Projects applying concepts learned in Business Intelligence Technologies to real business problems. Effective: 2011 Winter Quarter.

MGT 482—Practicum for Supply Chain Management (1)
Project (Term Project)—1 hour. Prerequisite(s): MGT 282 (can be concurrent) or MGP 282 (can be concurrent) or MGB 282 (can be concurrent); Course is a pre-requisite or co-requisite. Restricted to students in the MBA program. Provides experience applying concepts learned in Supply Chain Management to a realistic management setting via a project. Effective: 2011 Spring Quarter.

MGT 490—Directed Group Study Management Practicum (3)
Review all entries
Lecture/Discussion—3 hours. Prerequisite(s): Consent of Instructor. Sponsorship of a GSM Academic Senate faculty member; approval of graduate advisor. Provides opportunity for students to gain experience in applying business methodologies previously acquired in other GSM courses. May be repeated for credit. Effective: 2015 Spring Quarter.

MGT 490—Directed Group Study Management Practicum (1)
Review all entries
Lecture/Discussion—1 hour. Prerequisite(s): Consent of Instructor. Sponsorship of a GSM Academic Senate faculty member; approval of graduate advisor. Provides opportunity for students to gain experience in applying business methodologies previously acquired in other GSM courses. May be repeated for credit. Effective: 2019 Spring Quarter.

MGT 498—Directed Group Study Management Practicum (1-12)
Projects (Term Project). Prerequisite(s): Consent of Instructor. Sponsorship of a GSM Academic Senate faculty member, and approval of graduate advisor. Provides the opportunity for students to gain experience in applying
Managerial Economics

The Major Program

The Managerial Economics major at UC Davis is a disciplinary program combining strong preparation in microeconomic theory and quantitative methods. It prepares students for the analysis of management and policy issues in business, finance, marketing, production, agriculture, food distribution, natural resources, the environment, resource allocation, and international trade and development. Students specialize in one or more emphases selected from the following:

2. International Business Economics explores the economic drivers and policy challenges in the major emerging markets and focuses on how these markets are impacting the world economy.
3. Environmental and Resource Economics concentrates on issues related to the use of resources and environmental quality.
4. Agribusiness Economics focuses on the economic and policy aspects of production and marketing of foods and fibers.

Students in the Managerial Economics program develop valuable skills and strengths that lead to careers in business and government.

Major Advisor. Contact undergraduate advisors at manecon@primal.ucdavis.edu.

Internships and Career Alternatives. Internships for students in Managerial Economics provide additional career experience, information, and preparation in a variety of business enterprises and governmental agencies. For more information, see http://icc.ucdavis.edu/. Managerial Economics majors have established careers in every area of business and industry, including marketing, analysis, consulting, financial services, accounting, entrepreneurship, real estate and government. Many graduates have entered advanced degree programs in business management, accounting, finance, agricultural and resource economics, economics, public policy, and law.

Study Abroad. The Agricultural and Resource Economics department encourages students to complement their Managerial Economics degree with a study abroad experience. Students must seek pre-approval from a Managerial Economics staff advisor for major-related courses. A total of two upper-division courses (maximum four units each) may be applied to major requirements. However, core courses (ARE 100A, 100B, 106, 155, and ECN 101) are excluded. Students are expected to complete ARE 100A and STA 103 prior to taking upper-division classes abroad for the major.

Domestic Institutions. Upper-division coursework taken at other four-year institutions for credit in the major must be reviewed by a Managerial Economics staff advisor.
Graduate Study. Students who meet the admission requirements of Graduate Studies and the Department of Agricultural and Resource Economics may pursue studies leading to the M.S. and Ph.D. degrees. For information on admission to graduate study and degree requirements, consult the Graduate Program Coordinator in the Department of Agricultural and Resource Economics; also see http://agecon.ucdavis.edu.

Preparatory Subject Matter  
**Units:** 39-41

- **ARE 018** Business Law 4
- **PLS 021** Application of Computers in Technology 3
- **OR**
- **ECS 015** Introduction to Computers 4
- **MGT 011A** Elementary Accounting 4
- **MGT 011B** Elementary Accounting 4

The following must be completed with a grade of C- (or P) or better:
- **ECN 001A** Principles of Microeconomics 4
- **OR**
- **ECN 001AV** Principles of Microeconomics 4
- **ECN 001B** Principles of Macroeconomics 4
- **MAT 016A** Short Calculus 3
- **MAT 016B** Short Calculus 3
- **MAT 016C** Short Calculus 3
- **OR**
- **MAT 017A** Calculus for Biology and Medicine 4
- **MAT 017B** Calculus for Biology and Medicine 4
- **OR**
- **MAT 021A** Calculus 4
- **MAT 021B** Calculus 4
- **STA 013** Elementary Statistics 4
- **OR**
- **STA 013Y** Elementary Statistics 4
- **STA 103** Applied Statistics for Business & Economics 4

Major English Requirement  
**Units:** 8

The following must be completed with a grade of C- (or P) or better:
- **CMN 001** Introduction to Public Speaking 4
- **OR**
- **CMN 003** Interpersonal Communication Competence 4
- **OR**
- **CMN 003Y** Interpersonal Communication Competence 4
- **OR**
- **UWP 104A** Writing in the Professions: Business Writing 4

The upper-division composition exam will not satisfy this requirement.

Depth Subject Matter  
**Units:** 52-55

Core  
It is strongly recommended that students complete core courses during their third year.

- **ARE 100A** Intermediate Microeconomics: Theory of Production and Consumption 4
  Must be completed with a grade of C- or better. NOTE: ECN 100A is not accepted.
- **ARE 100B** Intermediate Microeconomics: Imperfect Competition, Markets and Welfare Economics 4
  NOTE: ECN 100B is not accepted.
- **ARE 106** Econometric Theory and Applications 4
- **ARE 155** Operations Research and Management Science 4
**ECN 101 Intermediate Macro Theory**  
4

Exceptions to all emphases. The following courses do not apply toward any emphasis: ARE 113, 135, 142, 147, 147M, ECN 102, 134, 140, 162.

Completing more than one emphasis. Courses may overlap between emphases. Requirements must be fulfilled as outlined in each emphasis with a minimum of 32 units.

Students must attain a major GPA of at least a C average (2.000) in courses taken for depth subject matter (core and restricted electives). These courses must be taken for a letter grade. All restricted elective courses taken will be calculated as part of the major GPA, including courses with F grades that have not been repeated.

Managerial Economics | Managerial Economics Minor

(College of Agricultural and Environmental Sciences)

Advising Office. 1176 Social Sciences and Humanities Building; 530-754-9536; http://manecon.ucdavis.edu

Faculty. https://are.ucdavis.edu/people/faculty/

Preparation for the minor includes ECN 001A or 001AV, and 001B; MAT 016A-016B-016C or 017A-017B or 021A-021B; STA 013 or 013Y, and 103, with grades of C- (or P) or better.

One upper-division class to satisfy the minor may be taken for passed/not passed grading. A total of two upper-division courses (maximum four units each) may be taken through UC Study Abroad, all other courses must be taken in residence. Students must seek pre-approval from a Managerial Economics staff advisor for any international courses.

Students must attain a minor GPA of at least a C average (2.000) in courses taken for the minor. All upper-division courses taken toward minor requirements will be calculated as part of the minor GPA, including courses with F grades that have not been repeated.

Marine & Coastal Science

Marine & Coastal Science | Marine & Coastal Science B.S.

(College of Letters & Sciences, College of Agricultural and Environmental Sciences, and College of Biological Sciences)

Michael E. Oskin, Ph.D., Chairperson of the Department
David A. Osleger, Ph.D., Vice-Chairperson, Undergraduate Program
Sujoy Mukhopadhyay, Ph.D., Vice-Chairperson, Graduate Program

Department Office. Earth and Planetary Sciences; 2119 Earth and Physical Sciences; 530-752-0350; http://geology.ucdavis.edu/

The major in Marine and Coastal Science focuses on the interdisciplinary nature of marine sciences by exposing students to core, breadth, and focus area courses in the discipline, in addition to a strong foundation of science preparatory material. The major builds upon UC Davis strengths in marine and coastal sciences, including field-based courses offered at Bodega Marine Laboratory to provide students a unique, interdisciplinary, "hands on" education. Advising is provided by the Department of Earth and Planetary Sciences for interested students.

The Program. The major begins with introductory courses in mathematics, chemistry, physics, biology, and earth sciences. These are followed by core courses in Marine Science. The major requirements provide focus and breadth, so that each student gains mastery in one area and broad exposure to many facets of Marine and Coastal Science. Focus areas are: (i) Coastal Environmental Processes, (ii) Marine Ecology and Organismal Biology, (iii) Marine Environmental Chemistry, and (iv) Oceans and the Earth System.

In this major, students will be exposed to the foundation disciplines within marine science (biology, chemistry, geology, physics) as well as modern issues facing marine and coastal environments; e.g., climate change, pollution, carbon cycling, conservation. The major requires field experience, independent research or internship, and concludes with a capstone course featuring current research in marine science. These integrative experiences will require students to synthesize the interdisciplinary topics that they have encountered through this degree program. The mastery achieved provides a strong foundation for future careers in academic science, government, policy, and the private sector. For more information, see http://marinescience.ucdavis.edu/programs/mcsci/index.html.

Internships and Career Alternatives. A B.S. in Marine and Coastal Science will provide students with knowledge and practical experience needed to pursue careers in marine science (government, private sector, research) and/or advanced degree programs. The major program includes both research and internship experiences to help prepare students for these career paths. For more information, see http://marinescience.ucdavis.edu/programs/mcsci/internships.html.

Advising. Students majoring in Marine and Coastal Science are strongly encouraged to meet with their faculty advisor (assigned, based upon Focus Area choice) once per year to review their coursework plans. Staff advising is available through the Department of Earth and Planetary Sciences, and student peer advisors are available. Faculty advisors include: Tessa Hill (College of Letters and Science), Anne Todgham and John Largier (College of Agricultural and Environmental Sciences), and Brian Gaylord (College of Biological Sciences). For more information, see http://marinescience.ucdavis.edu/programs/mcsci/advising.html.

The student's chosen Focus Area will determine the college into which the student is admitted, the college where the degree is awarded, and the associated department:

- **Coastal Environmental Processes.** College of Agricultural and Environmental Sciences; Environmental Science & Policy
- **Marine Ecology & Organismal Biology.** College of Biological Sciences; Evolution & Ecology
- **Marine Environmental Chemistry.** College of Agricultural and Environmental Sciences; Environmental Toxicology
- **Oceans and the Earth System.** College of Letters and Science; Earth and Planetary Sciences
Preparatory Subject Matter

**Units:** 51-63

Courses cannot be utilized to fulfill multiple requirements, with the exception that any Bodega Marine Laboratory course simultaneously fulfills the field requirement below.

Focus Area Requirement

Complete at least four courses from one category below, totaling at least 12 units.

Coastal Environmental Processes. College of Agricultural and Environmental Sciences; Environmental Science & Policy

Emphasis on processes and environments of the coastal zone, and the strong physical-biological connection that exists here. Courses highlight the critical terrestrial-marine interface and fundamental physical processes in the coastal zone.

This focus area requirement can be fulfilled using:

**Marine Ecology and Organismal Biology, College of Biological Sciences; Evolution & Ecology**

Focus on physiological adaptations to the marine environment, and the biology of marine species from the molecular to population levels. Courses include emphasis on the ecological processes that determine the distribution and abundance of marine organisms, and the patterns and mechanisms of evolution in the ocean.

*The focus area requirement can be fulfilled using:*

- ANS 131 Reproduction and Early Development in Aquatic Animals ~ 4
- BIS 122 Population Biology and Ecology † 3
- BIS 122P Population Biology and Ecology/Advanced Laboratory Topics † 5
- ESP 100 General Ecology 4
- ESP 121 Population Ecology 4

- EVE 101 Introduction to Ecology 4
- EVE 106 Mechanical Design in Organisms ~† 3
- EVE 112 Biology of Invertebrates 3
- EVE 112L Biology of Invertebrates Laboratory 2
- EVE 114 Experimental Invertebrate Biology ~† 3
- EVE 115 Marine Ecology 4
- EVE 120 Global Change Ecology 3
- ETX 127 Environmental Stress and Development in Marine Organisms ~† 10
- NPB 141 Physiological Adaptation of Marine Organisms † 3
- NPB 141P Physiological Adaptation of Marine Organisms/Advanced Laboratory Topics † 5
- WFC 120 Biology and Conservation of Fishes 3
- WFC 120L Laboratory in Biology and Conservation of Fishes 2
- WFC 121 Physiology of Fishes 4
- WFC 122 Population Dynamics and Estimation 4
- WFC 130 Physiological Ecology of Wildlife 4

**Marine Environmental Chemistry, College of Agricultural and Environmental Sciences; Environmental Toxicology**

Emphasis on major themes in marine chemistry, geochemistry, the carbon cycle, and contaminant fate and transport.

*The focus area requirement can be fulfilled using:*

- CHE 100 Environmental Water Chemistry 3
- ETX 101 Principles of Environmental Toxicology # 4
- ETX 102A Environmental Fate of Toxicants # 4

† Only offered at Bodega Marine Laboratory.

= Some courses may require additional prerequisites; see above.

=† Some courses may require additional prerequisites; see above. Only offered at Bodega Marine Laboratory.

Field Requirement

The Field Requirement provides exposure to field techniques, experimental design, and the marine environment itself. It is highly recommended that students fulfill this requirement by residence at Bodega Marine Laboratory for one or more courses; see courses denoted with †. Bodega Marine Laboratory courses may simultaneously fulfill an additional requirement in categories above.

Units: 0-14
Alternatively, students may fulfill the Field Requirement by taking two of the following courses; these courses cannot fulfill multiple requirements:

- **GEL 109L** Earth History: Sediments and Strata Laboratory 2
- **EVE 112L** Biology of Invertebrates Laboratory 2
- **EVE 115** Marine Ecology 4
- **ESP 123** Introduction to Field and Laboratory Methods in Ecology 4
- **ESP 151L** Limnology Laboratory 3
- **GEL 182** Field Studies in Marine Geochemistry 2-8
- **WFC 100** Field Methods in Wildlife, Fish, & Conservation Biology 4
- **WFC 102L** Field Studies in Fish Biology: Laboratory 6
- **WFC 157** Coastal Ecosystems 4

**Internship/Research**

- **BIS 124** Coastal Marine Research 6
- **GEL 192** Internship in Geology 1-12
- **ESP 192** Internship 1-12
- **EVE 192** Internship 1-12
- **EVE 199** Special Study for Advanced Undergraduates 1-5

**Total Units for the Major by chosen Focus Area:**

- **Coastal Environmental Processes (Agricultural and Environmental Sciences)** 96-118
- **Marine Ecology & Organismal Biology (Biological Sciences)** 111-137
- **Marine Environmental Chemistry (Agricultural and Environmental Sciences)** 96-118
- **Oceans and the Earth System (Letters and Science)** 96-118

**Total:** 96-137

**Master of Health Services; Nursing | Master of Health Services**

Heather M. Young, Ph.D., R.N., F.A.A.N.; Associate Vice Chancellor for Nursing, UC Davis; Dean and Professor, Betty Irene Moore School of Nursing

Theresa A. Harvath, Ph.D., R.N., F.A.A.N.; Executive Associate Dean

Elizabeth Rice, Ph.D., P.M.H.N.P.-B.C., R.N.; Associate Dean for Clinical Education and Practice, Director for the Master of Science—Family Nurse Practitioner Degree Program

Betty Irene Moore Hall
2570 48th St., Sacramento, CA 95817
916-734-2145
http://nursing.ucdavis.edu

**Faculty.** http://nursing.ucdavis.edu

**Mission Statement**

The Betty Irene Moore School of Nursing at UC Davis cultivates academic excellence through immersive, interprofessional and interdisciplinary education and research in partnership with the communities serves. Faculty, staff, and students discover and disseminate knowledge to advance health, improve quality of care and shape policy.

**Nursing Science and Health-Care Leadership Graduate Degree Program**
Hosted by the Betty Irene Moore School of Nursing at UC Davis, the Nursing Science and Health-Care Leadership Graduate Degree Programs prepare nurse leaders, physician assistants, nurse practitioners, researchers and faculty in a unique interdisciplinary and interprofessional environment. The full-time, academic, doctoral program prepares graduates as leaders in health care, health policy and nurse faculty/researchers at the university level. The master's degree Physician Assistant Studies program prepares graduates to deliver care as physician assistants. Graduates of the professional master's degree leadership program are prepared for health-care leadership roles in a variety of organizations and as nurse faculty at the community college and prelicensure education levels. Graduates of the master's degree Nurse Practitioner Program are prepared to deliver care as nurse practitioners.

Faculty

The UC Davis Nursing Science and Health-Care Leadership Graduate Group includes a wide cross-section of academic disciplines with faculty from the Betty Irene Moore School of Nursing as well as UC Davis Health System and other UC Davis schools, colleges, and departments. Within the graduate group faculty are experts in nursing, medicine, health informatics, nutrition, biostatistics, public health and other fields.

Master of Health Services; Nursing | NRS Courses

Courses in NRS:

**NRS 201—Health Status and Care Systems (4)**
Discussion/Laboratory; Lecture/Discussion—3 hours; Project (Term Project). Prerequisite(s): Current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor. Comparative health status data, major current health issues globally, nationally, regionally. Theoretical perspectives on social, political, economic determinants of health. Health-care systems examined, linked to data, and evaluated in regards to outcomes. Aging, rural, ethnic minority populations highlighted. Effective: 2010 Fall Quarter.

**NRS 202—Implementation Science (4)**
Lecture/Discussion—4 hours. Prerequisite(s): Current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor. Change processes in health care from political, historic, economic and sociologic frameworks. Historic and current examples of transformative change in the health-care system. Skills for system transformation through health policy, practice, research and education are emphasized. Effective: 2010 Winter Quarter.

**NRS 203—Leadership in Health Care (4)**
Fieldwork; Lecture/Discussion—3 hours. Prerequisite(s): Current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor. Critical examination of leadership from a variety of theoretical and philosophical perspectives and focuses on specific challenges in health care and leadership at various levels, e.g., patient, organizational, and policy levels. Effective: 2010 Fall Quarter.

**NRS 204—Research Skills for Nursing Science and Health-Care Leadership (4)**
Discussion/Laboratory—1 hour; Lecture/Discussion—3 hours. Prerequisite(s): Current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor. Foundation for analyzing research, health, and systems data to answer clinical, systems, or policy questions. Use and examine multiple sources of data and information as a basis for planned change and transformation in health care. Effective: 2014 Winter Quarter.

**NRS 205—Research Design in Nursing and Health Care (4)**
Lecture/Discussion—4 hours. Prerequisite(s): Current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor. Major types of quantitative and qualitative research design and their application to nursing and health-care research. Implications of choosing alternative research designs and critical analysis of philosophical underpinnings. Evaluation of control and validity, sampling, instruments to measure health concepts. Effective: 2010 Fall Quarter.

**NRS 205A—Overview of Research in Nursing Science and Health Care (2)**
Lecture—2 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Provides an overview of quantitative and qualitative paradigms in scientific inquiry and the major designs related to each paradigm. First of a three-course series on research design and methods in nursing science and healthcare research. Effective: 2015 Fall Quarter.

**NRS 205B—Quantitative Research in Nursing Science and Health Care (4)**
Lecture—4 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and
Health-Care Leadership Graduate Degree programs or by consent of instructor. Introduces principles of quantitative data collection and analysis as applied to major study designs in nursing and health-care research. Provides a basic foundation for producing, interpreting, and applying quantitative research findings to answer clinical, system, and policy questions. Effective: 2015 Fall Quarter.

**NRS 205C—Qualitative Research in Nursing Science and Health Care (4)**
Lecture—4 hours. Prerequisite(s): Consent of Instructor. Restricted to current Ph.D. students in NSHL program or consent of instructor. Introduces principles of qualitative data collection and analysis as applied to major study designs in nursing and health-care research. Provides a basic foundation for producing, interpreting, and applying qualitative research findings to answer clinical, system, and policy questions. Effective: 2015 Fall Quarter.

**NRS 206—Community Connections (2-5)**
Variable—6 hours. Prerequisite(s): Current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor. Open to NSHL MS students only. Community-based learning and experiences including community participation, assessment, data collection and analysis using multiple approaches, community health improvement projects, collaborative leadership practice, all with the guidance of community members and nursing faculty. May be repeated for credit. (S/U grading only.) Effective: 2010 Fall Quarter.

**NRS 210Y—Applied Health Informatics (4)**
Lecture/Discussion—1 hour; Web Virtual Lecture—3 hours. Prerequisite(s): Consent of Instructor. Open to current student in NSHL graduate programs or consent of instructor. Within the conceptual framework of the Foundation of Knowledge model, this course integrates nursing science, information science, computer science and cognitive science to acquire, process, generate and disseminate knowledge. Effective: 2014 Winter Quarter.

**NRS 211Y—Rural Health (2-3)**
Fieldwork—1 hour; Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Interprofessional graduate course provides an introduction to rural health theory, research, policy, and practice, with an emphasis on rural health assets and disparities. Effective: 2015 Spring Quarter.

**NRS 212—Technology & Innovations in Health Care (2)**
Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Multidisciplinary approach to stimulate new thinking in the practice, process, and delivery of health care. Focus on improving overall health outcomes. Effective: 2017 Winter Quarter.

**NRS 213—Race and Health in the United States (3)**
Seminar—7.5 hours. Prerequisite(s): Consent of Instructor. Open to all Nursing Science and Health-Care Leadership graduate students or consent of instructor only. Race as a social construct and unequal health care distribution in the United States. Practical health care leadership to end racial inequalities in health. Effective: 2018 Fall Quarter.

**NRS 220—Social, Cultural, and Behavioral Determinants of Health (2)**
Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Effects of globalization, political systems, local and global economies, culture, race, class, gender, and sexuality on population health. Effective: 2016 Summer Quarter.

**NRS 221—Biophysical Concepts in Nursing (3)**
Lecture/Discussion—3 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Pathophysiological processes that contribute to different disease states across the lifespan; case studies; selective clinical decisions using current, reliable sources of pathophysiology information. Effective: 2016 Summer Quarter.

**NRS 222A—Research Quality Improvement and Evidence Based Practice (2)**
Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Introduction to providing safe, competent and compassionate care in a highly technical and digital environment. Emphasis on safety, quality and research to clinical practice. Accessing and analyzing reliable sources of evidence for integration in care-plan. Effective: 2016 Summer Quarter.

**NRS 222B—Research Quality Improvement and Evidence Based Practice (2)**
Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Introduction to providing safe,

**NRS 223—Quality and Safety Education in Health Care (2)**
Lecture/Discussion—2 hours. Prerequisite(s): NRS 221; NRS 272; NRS 420; NRS 421; NRS 273; NRS 422; NRS 423; NRS 425; Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Implementing best practices alongside technological tools and focusing on continuous quality improvement. Emphasis on providing safe, competent care in a highly technical and digital environment. Building capacity to apply concepts related to safety, quality and research to clinical practice. Effective: 2017 Spring Quarter.

**NRS 224—Developing Future Nurse Leaders (2)**
Lecture/Discussion—2 hours. Prerequisite(s): NRS 221; NRS 272; NRS 420; NRS 421; NRS 273; NRS 422; NRS 423; NRS 425; NRS 223; NRS 426; Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Develop skills around effective decision making, fiscal and environmental stewardship, initiating and maintaining effective working relationships, using mutually respectful communication and collaboration, care coordination, delegation and supervision. Emphasis on conflict resolution, leadership and interprofessional teamwork. Effective: 2017 Summer Quarter.

**NRS 225—Professional Nursing Role Formation (3)**
Lecture/Discussion—3 hours. Prerequisite(s): NRS 220; NRS 221; NRS 222A; NRS 272; NRS 420; NRS 421; NRS 429A; NRS 222B; NRS 273; NRS 422; NRS 423; NRS 429B; NRS 203; NRS 425; NRS 429C; NRS 202; NRS 223; NRS 426; NRS 429D; NRS 224; NRS 424; NRS 427; NRS 429E; Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Transition from nursing student to professional nurse. Focus on ethical comportment, professional values of social justice, autonomy, advocacy, altruism, human dignity, and integrity. Students must pass a mastery exit examination and complete a capstone project. Effective: 2017 Fall Quarter.

**NRS 242A—Implementation Science for Clinicians (2)**
Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Course focuses on identification of relevant research or improvement questions specific to patient care and evaluating the pertinent research literature related to the implementation of evidence based care. The course is 1st of a 3-course series. Effective: 2014 Summer Quarter.

**NRS 242B—Implementation Science for Clinicians (2)**
Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Course is a continuation of course 242A, Implementation Science for Clinicians, with a focus on implementing and evaluating a change. Effective: 2014 Summer Quarter.

**NRS 242C—Implementation Science for Clinicians (2)**
Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Advanced skills in application of implementation science into systems based practice and incorporating quality improvement and patient safety knowledge with particular focus on prevention of medical errors. Effective: 2014 Spring Quarter.

**NRS 243A—Leadership in Professional Practice (2)**
Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Course is a critical examination of leadership using theoretical and philosophical perspectives with an applied approach applicable to clinical practice. The 3 course series is conducted across three quarters in the 1st, 3rd and 8th quarters. Effective: 2013 Summer Quarter.

**NRS 243B—Leadership in Professional Practice (1)**
Lecture/Discussion—1 hour. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Course introduces professional role topics including history of the profession, the role in interprofessional teams and the health care system, transitioning to the role from other health professions, scope of practice, certification and licensure and professional organizations. Effective: 2014 Winter Quarter.
NRS 243C—Leadership in Professional Practice (1)
Lecture/Discussion—1 hour. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Course expands upon the leadership role as it relates to their clinical practice and professional role. Professional role topics including: transitioning from student to practicing professional, scope of practice, the physician relationship, and more advanced concepts in ethics. Effective: 2014 Spring Quarter.

NRS 250—Foundations of Primary Health Care (7)
Laboratory—3 hours; Lecture/Discussion—6 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Course is designed to promote the understanding and clinical application of human anatomy, physiology, histology, immunology and pathology. Effective: 2013 Summer Quarter.

NRS 251A—Primary Health Care (8)
Lecture/Discussion—8 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Course introduces primary health care concepts essential to the care of common medical problems seen in primary care settings. Module content will focus on various organ systems and specialty areas. Effective: 2013 Summer Quarter.

NRS 251B—Foundations of Primary Health Care (8)
Lecture/Discussion—8 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Course introduces primary health care concepts essential to the care of common medical problems seen in primary care settings. Effective: 2013 Fall Quarter.

NRS 251C—Primary Health Care (8)
Lecture/Discussion—8 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Course introduces primary health care concepts essential to the care of common medical problems seen in primary care settings. Effective: 2014 Spring Quarter.

NRS 251D—Primary Health Care (6)
Lecture/Discussion—6 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Course introduces primary health care concepts essential to the care of common medical problems seen in primary care settings. Effective: 2014 Summer Quarter.

NRS 260—Foundations of Behavioral Health (1)
Lecture/Discussion—1 hour. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Course focuses on the spectrum of normal psychological development over the lifespan for children, adults and elders. Theories of stress and coping mechanism are presented as a framework for the assessment of individuals. Effective: 2013 Summer Quarter.

NRS 270—Foundations of Pharmacology (2)
Laboratory—3 hours; Lecture/Discussion—1 hour. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Course introduces the student to the major concepts in pharmacology and relevant human physiology related to pharmacotherapeutics and toxicology. Effective: 2013 Summer Quarter.

NRS 271A—Pharmacology (2)
Laboratory—3 hours; Lecture/Discussion—1 hour. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Systems based pharmacology focused on classes of drugs used to treat disorders in specialty systems. Effective: 2013 Fall Quarter.

NRS 271B—Pharmacology (2)
Laboratory—3 hours; Lecture/Discussion—1 hour. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Systems based pharmacology focused on classes of drugs used to treat disorders in specialty systems. Effective: 2013 Fall Quarter.
NRS 271C—Pharmacology (2)
Laboratory—3 hours; Lecture/Discussion—1 hour. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Systems based pharmacology focused on classes of drugs used to treat disorders in specialty systems. Effective: 2014 Spring Quarter.

NRS 272—Foundations of Pharmacology (2)
Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Theoretical background to providing safe and effective care related to drugs and natural products. Effective: 2016 Summer Quarter.

NRS 273—Pharmacology Concepts in Nursing (2)
Lecture/Discussion—2 hours. Prerequisite(s): NRS 221; NRS 272; NRS 420; NRS 421; Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Application of principles for safe and effective use of medications and natural products; use of current, reliable information to make clinical decisions. Effective: 2016 Fall Quarter.

NRS 290—Master's Seminar (2)
Discussion—2 hours. Prerequisite(s): Current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor. Open to NSHL MS students only or by consent of course instructor. Subject varies from quarter to quarter. Current knowledge and issues relevant to one of two fields of emphasis: population health or health systems. May be repeated up to 10 time(s). Effective: 2010 Fall Quarter.

NRS 291—Doctoral Seminar (2)
Discussion—2 hours. Prerequisite(s): Current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor. Focus on the theory, research and knowledge relevant to one of two fields of emphasis: population health or health systems. Emphasis placed on reading, critique and synthesis of classic and cutting-edge research in nursing and health care. May be repeated up to 10 time(s). Effective: 2010 Fall Quarter.

NRS 291D—Doctoral Seminar (2)
Discussion—2 hours. Prerequisite(s): Current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor. Focus on the theory, research and knowledge relevant to one of two fields of emphasis: population health or health systems. Emphasis placed on reading, critique and synthesis of classic and cutting-edge research in nursing and health care. May be repeated up to 10 time(s). (S/U grading only.) Effective: 2014 Winter Quarter.

NRS 298—Special Topics in Nursing Science and Health-Care Leadership (1-4)
Lecture/Discussion—1-2 hours; Variable—1-3 hours. Prerequisite(s): Current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor. In-depth study of topics in Nursing Science and Health-Care Leadership, selected from: policy and politics in health care, health-care disparities, current issues in health care, approaches to the conduct of science, or other related areas, with year to year variation. May be repeated for credit. Effective: 2014 Spring Quarter.

NRS 298V—Online Special Topics in Nursing Science and Health-Care Leadership (1-4)
Web Electronic Discussion—1-4 hours; Web Virtual Lecture—1-4 hours. Prerequisite(s): Current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor. In-depth study of topics in Nursing Science and Health-Care Leadership, selected from: policy and politics in health care, health-care disparities, current issues in health care, approaches to the conduct of science, or other related areas, with year to year variation. May be repeated for credit. Effective: 2014 Spring Quarter.

NRS 299—Research and Writing (1-12)
Extensive Writing/Discussion—3-36 hours. Prerequisite(s): Consent of Instructor. Students in the Nursing Science and Health-Care Leadership graduate programs conduct research and writing under the supervision of a faculty member. May be repeated for credit. (S/U grading only.) Effective: 2011 Winter Quarter.

NRS 299D—Dissertation Research and Writing (1-12)
Extensive Writing/Discussion—3-36 hours. Prerequisite(s): Consent of Instructor. Students in the Nursing Science and Health-Care Leadership graduate programs conduct dissertation research and writing under the supervision of a faculty member. May be repeated for credit. (S/U grading only.) Effective: 2011 Winter Quarter.

NRS 301—Learner Centered Teaching (3-4)
Lecture/Discussion—3 hours; Practice—1 hour. Prerequisite(s): Consent of Instructor. Open to current students in the
Nursing Science and Health-care Leadership graduate programs; outside students with prior educational or work experience in education may register for this class with the consent of instructor. Students will explore best practices in learner-centered teaching, performance-based curriculum models, instructional design, and assessing/evaluating student learning. Students will have experience in planning learner-centered activities that are engaging and effective in achieving desired student performance. Effective: 2016 Spring Quarter.

**NRS 302—Teaching Methods - Use of Emerging Technologies to Improve Student Learning (4)**
Lecture/Discussion—3 hours; Practice—1 hour. Prerequisite(s): Consent of Instructor. Open to current students in the Nursing Science and Health-care Leadership graduate programs; outside students with prior educational or work experience in education may register for this class with the consent of instructor. Students will examine, design and develop instructional strategies that use innovative and emerging technologies to promote motivation, performance and learning in health professions education. Research findings associated with use of various emerging technologies will be examined. Effective: 2016 Fall Quarter.

**NRS 303—Professional Role Formation (2-4)**
Laboratory—2 hours; Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Open to current students in the Nursing Science and Health-care Leadership graduate programs; outside students with prior educational or work experience in education may register for this class with the consent of instructor. Exploration of the educator role. Topics include Role Expectations, Legal and Regulatory Issues, Professional Ethics, Educational Scholarship, Individual Differences, Learning Environments, and Lifelong Learning. Placements for the optional practicum are arranged in a wide variety of settings. Effective: 2017 Winter Quarter.

**NRS 306—Nature of Caregiving (4)**
Lecture/Discussion—4 hours. Prerequisite(s): Consent of Instructor. Explores theoretical and conceptual frameworks to enable clinicians to understand the nature of family caregiving. Students examine and apply frameworks in order to conduct comprehensive person and family based assessments and interventions incorporating various dimensions of family caregiving. Effective: 2019 Fall Quarter.

**NRS 307—Family Centered Communication & Shared Decision Making (4)**
Lecture/Discussion—4 hours. Prerequisite(s): Consent of Instructor. Incorporates shared decision-making principles and group communication to address family centered care planning and challenging clinical discussions. Targets competencies needed by health professionals to partner effectively to enhance the caregiving experience and reduce negative sequelae over the caregiving trajectory. Effective: 2020 Winter Quarter.

**NRS 308—Patient & Family Centered Care Plan Development (4)**
Lecture/Discussion—4 hours. Prerequisite(s): Consent of Instructor. Synthesizes assessment data and analyzes impact of technology, individual, family, sociocultural, health care system, and illness-related variables in specific family care-giving situations. Co-create comprehensive evidence based plan to facilitate the health and well-being of the family unit through shared decision-making. Effective: 2020 Spring Quarter.

**NRS 400—Basic Clinical Skills (1-4)**
Lecture/Lab—1-4 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Instruction and practice of the fundamental clinical skills necessary for patient care comprise this course with a primary focus on principles of effective communication in establishing the therapeutic provider-patient relationship. Effective: 2013 Summer Quarter.

**NRS 401—Basic Clinical Skills (1-4)**
Lecture/Lab—1-4 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Continuation of focus on history taking and physical examination skills with advanced/specialized content. Effective: 2013 Fall Quarter.

**NRS 410A—Advanced Clinical Skills (1-4)**
Lecture/Lab—1-4 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Continuation of focus on history taking and physical examination skills with advanced/specialized content related specified systems. Effective: 2014 Winter Quarter.

**NRS 410B—Advanced Clinical Skills (1-4)**
Lecture/Lab—1-4 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Continuation of focus on history taking and physical examination skills with advanced/specialized content related specified systems. Effective: 2014 Spring Quarter.
NRS 410C—Advanced Clinical Skills (1-4)
Lecture/Lab—1-4 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Continuation of focus on history taking and physical examination skills with advanced/specialized content related specified systems. Effective: 2014 Summer Quarter.

NRS 410D—Advanced Clinical Skills (1-4)
Lecture/Lab—1-4 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Continuation of focus on history taking and physical examination skills with advanced/specialized content related to specified systems. Effective: 2013 Fall Quarter.

NRS 410E—Advanced Clinical Skills (1-4)
Lecture/Lab—1-4 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Continuation of focus on history taking and physical examination skills with advanced/specialized content related to specified systems. Effective: 2013 Fall Quarter.

NRS 410F—Advanced Clinical Skills (1-4)
Lecture/Lab—1-4 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Continuation of focus on history taking and physical examination skills with advanced/specialized content related to specified specialty systems. Effective: 2014 Spring Quarter.

NRS 410G—Advanced Clinical Skills (1-4)
Lecture/Lab—1-4 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Continuation of focus on history taking and physical examination skills with advanced/specialized content related to specified specialty systems. Effective: 2015 Fall Quarter.

NRS 420—Foundations of Clinical Nursing Practice (3)
Clinical Activity—9 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Foundational course introduces students to core concepts of clinical nursing, including clinical reasoning, professional ethics, therapeutic communication and activities of daily living. Develop skills for the provision of safe, high quality, culturally-sensitive, person-centered care across the lifespan. Effective: 2016 Summer Quarter.

NRS 421—Health Assessment Across the Lifespan (3)
Clinical Activity—6 hours; Lecture/Discussion—1 hour. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Prepares students to conduct a health history assessment using developmentally and culturally appropriate approaches for individuals across the lifespan. Acquire the knowledge, understanding, and skills needed to perform, interpret and communicate a health history. Effective: 2016 Summer Quarter.

NRS 422—Care of Adults with Chronic Conditions (6)
Clinical Activity—9 hours; Lecture/Discussion—3 hours. Prerequisite(s): NRS 221; NRS 272; NRS 420; NRS 421; Consent of Instructor. This course is open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Learn concepts central to the effective management of a variety of common chronic illness and disabling conditions across the lifespan in a variety of different settings. Practice conducting in-depth health assessments of individuals with chronic conditions. Effective: 2016 Fall Quarter.

NRS 423—Psychosocial Wellness & Illness (5)
Clinical Activity—6 hours; Lecture/Discussion—3 hours. Prerequisite(s): NRS 221; NRS 272; NRS 420; NRS 421; Consent of Instructor. This course is open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Explore the biological, psychological, cultural, societal, and environmental factors that affect psychological wellness and illness. Practice providing care to individuals and families experiencing disruptions in mental health secondary to physical or psychiatric illness, trauma or loss. Effective: 2016 Fall Quarter.

NRS 424—Nursing Care of Older Adults (3)
Clinical Activity—3 hours; Lecture/Discussion—2 hours. Prerequisite(s): NRS 221; NRS 272; NRS 420; NRS 421; NRS 273; NRS 422; NRS 423; NRS 425; NRS 223; NRS 426; Consent of Instructor. Open to graduate students in the
Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Build skills for situations involving older adults, such as in the management of complex clinical and administering and interpreting standardized assessment tools. Develop plans of care for older adults experiencing a variety of geriatric syndromes. Effective: 2017 Summer Quarter.

NRS 425—Family Focused Nursing (9)
Clinical Activity—12 hours; Lecture/Discussion—5 hours. Prerequisite(s): NRS 221; NRS 272; NRS 420; NRS 421; NRS 273; NRS 422; NRS 423; Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Focuses on family as the unit of nursing and interprofessional care. Includes influences of family on health and illness, reproductive and gender/sexuality issues, pregnancy, birth and child-rearing, and the health and illness in children and youth. Effective: 2017 Winter Quarter.

NRS 426—Nursing Care of Adults with Complex Illness or Injury (8)
Clinical Activity—12 hours; Lecture/Discussion—4 hours. Prerequisite(s): NRS 221; NRS 272; NRS 420; NRS 421; NRS 273; NRS 422; NRS 423; NRS 425; Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Prepares students to provide comprehensive, patient-centered nursing care for patients with acute or complex illness and injury. Theory portion focuses on concepts associated with complex physiological alterations. Effective: 2017 Spring Quarter.

NRS 427—Fostering Healthy Communities (7)
Clinical Activity—9 hours; Lecture/Discussion—4 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Focuses on populations & communities, and emphasizes working with diverse communities in providing health promotion, chronic disease management, transitional support and crisis intervention. Develop skills to critically analyze and shape health policy and develop accessible community resources. Effective: 2017 Summer Quarter.

NRS 428—Capstone Clinical Nursing Practicum (8)
Clinical Activity—24 hours. Prerequisite(s): NRS 220; NRS 221; NRS 222A; NRS 272; NRS 420; NRS 421; NRS 429A; NRS 222B; NRS 273; NRS 422; NRS 423; NRS 429B; NRS 203; NRS 212; NRS 425; NRS 429C; NRS 202; NRS 223; NRS 426; NRS 429D; NRS 224; NRS 424; NRS 427; NRS 429E; Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Practicum experience is designed to facilitate transition to professional practice. Opportunity to choose a clinical practice area of interest and to work with a preceptor with expertise in that area. Effective: 2017 Fall Quarter.

NRS 429A—Collaborative Practice A (1)
Clinical Activity—3 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Interprofessional course uses experiential learning activities including simulation, role play, and case studies. Concepts include but are not limited to; communication, person-centered care, ethical decision making, end-of-life decisions, culturally appropriate care, quality and safety, social justice, and professionalism. Effective: 2016 Summer Quarter.

NRS 429B—Collaborative Practice B (1)
Clinical Activity—3 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Interprofessional course uses experiential learning activities including simulation, role play, and case studies. Concepts include but are not limited to; communication, person-centered care, ethical decision making, end-of-life decisions, culturally appropriate care, quality and safety, social justice, and professionalism. Effective: 2016 Fall Quarter.

NRS 429C—Collaborative Practice C (1)
Clinical Activity—3 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Interprofessional course uses experiential learning activities including simulation, role play, and case studies. Concepts include but are not limited to; communication, person-centered care, ethical decision making, end-of-life decisions, culturally appropriate care, quality and safety, social justice, and professionalism. Effective: 2017 Winter Quarter.

NRS 429D—Collaborative Practice D (1)
Clinical Activity—3 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Interprofessional course uses experiential learning activities including simulation, role play, and case studies. Concepts include but are not limited to; communication, person-centered care, ethical decision making, end-of-life decisions, culturally appropriate care, quality and safety, social justice, and professionalism. Effective: 2017 Spring Quarter.
NRS 429E—Collaborative Practice E (1)
Clinical Activity—3 hours. Prerequisite(s): Consent of Instructor. This course is open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Interprofessional course uses experiential learning activities including simulation, role play, and case studies. Concepts include but are not limited to; communication, person-centered care, ethical decision making, end-of-life decisions, culturally appropriate care, quality and safety, social justice, and professionalism. Effective: 2017 Summer Quarter.

NRS 429F—Collaborative Practice F (1)
Clinical Activity—3 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Interprofessional course uses experiential learning activities including simulation, role play, and case studies. Concepts include but are not limited to; communication, person-centered care, ethical decision making, end-of-life decisions, culturally appropriate care, quality and safety, social justice, and professionalism. Effective: 2017 Fall Quarter.

NRS 440—Preparation for Clinical Practice (1-3)
Clinical Activity—3-9 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Students are placed in clinical settings and/or clinical simulation laboratories to observe and practice the integration of clinical skills with direct supervision by faculty. Effective: 2016 Winter Quarter.

NRS 450A—Supervised Clinical Practice-Primary Health Care (1-16)
Clinical Activity—48 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Each of the required primary care rotations is a four-week supervised clinical practice experience in primary care, under the supervision of an appropriate community-based primary care provider per accreditation requirements. May be repeated up to 5 time(s). Effective: 2016 Winter Quarter.

NRS 450B—Supervised Clinical Practice-Primary Health Care (1-16)
Clinical Activity—48 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Each of the required primary care rotations is a four-week supervised clinical practice experience in primary care, under the supervision of an appropriate community-based primary care provider per accreditation requirements. May be repeated up to 5 time(s). Effective: 2016 Winter Quarter.

NRS 450C—Supervised Clinical Practice-Primary Health Care (1-16)
Clinical Activity—48 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Each of the required primary care rotations is a four-week supervised clinical practice experience in primary care, under the supervision of an appropriate community-based primary care provider per accreditation requirements. May be repeated up to 5 time(s). Effective: 2016 Winter Quarter.

NRS 450D—Supervised Clinical Practice-Primary Health Care (1-16)
Clinical Activity—48 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Each of the required primary care rotations is a four-week supervised clinical practice experience in primary care, under the supervision of an appropriate community-based primary care provider per accreditation requirements. May be repeated up to 5 time(s). Effective: 2016 Winter Quarter.

NRS 450E—Supervised Clinical Practice-Primary Health Care (1-16)
Clinical Activity—48 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Each of the required primary care rotations is a four-week supervised clinical practice experience in primary care, under the supervision of an appropriate community-based primary care provider per accreditation requirements. May be repeated up to 5 time(s). Effective: 2016 Winter Quarter.

NRS 451—Supervised Clinical Practice-Pediatrics (1-16)
Clinical Activity—48 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Four-week clinical rotation under the supervision of an appropriate community-based Pediatric Medicine provider per accreditation requirements. May be repeated up to 5 time(s). Effective: 2016 Winter Quarter.
NRS 452—Supervised Clinical Practice—Women's Health (1-16)
Clinical Activity—48 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Four-week clinical rotation under the supervision of an appropriate community-based women's health and prenatal care provider per accreditation requirements. May be repeated up to 5 time(s). Effective: 2016 Winter Quarter.

NRS 453—Supervised Clinical Practice—Mental Health (1-16)
Clinical Activity—48 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Four-week clinical rotation under the supervision of an appropriate community-based psychiatrist, psychiatric/mental health provider per accreditation requirements. May be repeated up to 5 time(s). Effective: 2016 Winter Quarter.

NRS 454—Supervised Clinical Practice—Emergency Medicine (1-16)
Clinical Activity—48 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Four-week clinical rotation under the supervision of an appropriate Emergency Medicine provider per accreditation requirements. May be repeated up to 5 time(s). Effective: 2016 Winter Quarter.

NRS 455—Supervised Clinical Practice—Inpatient Surgery (1-16)
Clinical Activity—48 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Four-week clinical experience under the supervision of an appropriate surgical provider per accreditation requirements. May be repeated up to 5 time(s). Effective: 2016 Winter Quarter.

NRS 456—Supervised Clinical Practice—Inpatient Medicine (1-16)
Clinical Activity—48 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Four-week clinical rotation under the supervision of an appropriate inpatient provider per accreditation requirements. May be repeated up to 5 time(s). Effective: 2016 Winter Quarter.

NRS 459—Supervised Clinical Practice—Other Specialties (1-16)
Clinical Activity—48 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Two four-week selective rotations are available to accommodate student interest and/or accommodate a student’s clinical deficits identified by the program. May be repeated up to 5 time(s). Effective: 2016 Winter Quarter.

NRS 470—Health Care Ethics (3-9)
Discussion/Laboratory—1 hour; Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Guided independent study of issues in biomedical ethics, with discussion of readings that are based on student interests and needs. Participation in ethics rounds. (Same course as GMD 470.) (S/U grading only.) Effective: 2012 Spring Quarter.

NRS 471—Supervised Clinical Practice—Geriatrics (1-16)
Clinical Activity—48 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Four-week clinical rotation under the supervision of an appropriate community-based Geriatric Medicine provider per accreditation requirements. May be repeated up to 5 time(s). Effective: 2016 Winter Quarter.

NRS 475—Supervised Clinical Practice—Acute Care (1-16)
Clinical Activity—48 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Two- to four-week rotation focus on providing acute care in inpatient settings. Students will work directly with specific inpatient units. May be repeated up to 5 time(s). Effective: 2016 Winter Quarter.

NRS 480—Supervised Clinical Practice—Rural Health (1-16)
Clinical Activity—48 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Rural health rotations focus on providing care in medically underserved rural sites. Students will experience care across the continuum in ambulatory, inpatient, and community based settings. May be repeated up to 5 time(s). Effective: 2016 Winter Quarter.

NRS 490—Supervised Clinical Practice—Quality and Safety (1-16)
Clinical Activity—48 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science
and Health-Care Leadership Graduate Degree programs or by consent of instructor. Clinical rotation that allow students to work directly with patient safety and quality improvement committees in various organizations. May be repeated up to 5 time(s). Effective: 2016 Winter Quarter.

**NRS 493A—Improving Quality in Health Care (4)**
Lecture/Discussion—4 hours. Prerequisite(s): Consent of Instructor. Open to Nursing Science and Health-Care Leadership Students. Working in interdisciplinary teams, will explore the theory and practical methods being employed to make improvement in health care systems while providing an opportunity for interprofessional educational experience. Effective: 2017 Fall Quarter.

**NRS 493B—Improving Quality in Health Care (4)**
Lecture/Discussion—4 hours. Prerequisite(s): NRS 493A; Consent of Instructor. Open to Nursing Science and Health-Care Leadership Students. Working in interdisciplinary teams, will explore advanced theory and practical methods being employed to make improvement in health care systems while providing an opportunity for interprofessional educational experience. Effective: 2018 Winter Quarter.

**NRS 493C—Enhancing Patient Safety in Health Care (3)**
Clinical Activity—1 hour; Discussion—1 hour; Seminar—1 hour. Prerequisite(s): Consent of Instructor. Nursing Science and Health-Care Leadership Graduate students. Inter-professional module is designed to explore the theory and practical methods being employed to improve patient safety in health care while providing an opportunity for inter-professional educational experience. Effective: 2017 Spring Quarter.

### Master of Preventive Veterinary Medicine

**Master of Preventive Veterinary Medicine | Master of Preventive Veterinary Medicine M.P.V.M.**
(School of Veterinary Medicine)

Ashley Hill, D.V.M., M.P.V.M., Ph.D., Chairperson of the Group

**Group Office.** Veterinary Medicine Administrative Building, Rm 1022; 530-752-2657; Fax 530-754-9161; http://www.vetmed.ucdavis.edu/mpvm/index.cfm

**Faculty.** http://www.vetmed.ucdavis.edu/mpvm/faculty/

**Graduate Advisor.** Contact the Group office.

**Master of Preventive Veterinary Medicine | MPM Courses**

**Courses in MPM:**

**MPM 200—Introduction to Information Management for Epidemiologists (1)**
Laboratory—1 hour. Restricted to students in the Master of Preventive Veterinary Medicine program. Introduction to practical application of epidemiological methods to solve problems involving population health data. Emphasis on using worksheet/database software tools for organizing, analyzing, reporting, and interpreting data. Ten, three-hour sessions. Effective: 2016 Summer Session 2.

**MPM 201—Emerging Issues at the Interface of Animal, Human, and Ecosystem Health (2.5)**
Discussion—1.5 hours; Lecture—1 hour. Class size limited to 35 students. Introduce one health topics emphasizing relationships between environmental, animal and human health. Topics include ecosystem change and impacts on animals and humans, cross-species disease transmission and approaches for addressing critical data gaps to inform ecosystem health and disease prevention. Effective: 2016 Fall Quarter.

**MPM 202—Medical Statistics I (4)**
Laboratory—10 hours; Lecture—15 hours. Prerequisite(s): MPVM or MPH standing or consent of instructor. Restricted to 80 students. Basic statistics in clinical, laboratory and population medicine: descriptive statistics; probability; binomial, Poisson, normal, t-, F-, and Chi-square distributions; sampling distributions; parameter estimation; hypothesis testing; elementary nonparametric methods, simple linear regression and correlation; life table construction and analysis. Effective: 2015 Summer Session 2.

**MPM 203—Medical Statistics II (4)**
Laboratory—2 hours; Lecture—3 hours. Prerequisite(s): MPM 202; or Consent of Instructor. Or equivalent. Continuation of course 202. Analysis of variance in biomedical sciences; nonparametric methods; multiple
regression; unconditional logistic regression; biomedical applications of statistical methods. Microcomputer applications in population medicine to reinforce principles that are taught in lecture. Required for students in the Preventive Veterinary Program Graduate Group (PVM) and the Masters of Public Health Program (MPH). Effective: 2015 Fall Quarter.

**MPM 204—Medical Statistics III (4)**
Laboratory—2 hours; Lecture—3 hours. Continuation of course 203. Selecting the best regression equation, conditional logistic regression, Poisson regression, survival analysis, analysis of time dependent variation and trends. Microcomputer applications in population medicine to reinforce principles that are taught in lecture. Effective: 2016 Fall Quarter.

**MPM 205—Principles of Epidemiology (4)**
Lecture—4 hours. Prerequisite(s): MPM 202; or Consent of Instructor. An introductory statistics course. Basic epidemiologic concepts and approaches to epidemiologic research, with examples from veterinary and human medicine, including outbreak investigation, infectious disease epidemiology, properties of tests, and an introduction to epidemiologic study design and surveillance. (Same course as EPI 205.) Effective: 2017 Winter Quarter.

**MPM 206—Epidemiologic Study Design (4)**
Discussion—9 hours; Laboratory—2 hours; Lecture—30 hours. Prerequisite(s): MPM 205; or Consent of Instructor. Builds on concepts presented in course 205. Concepts of epidemiologic study design—clinical trials, observational cohort studies, case control studies—introduced in course 205A are covered in more depth, using a problem-based format. Discussion of published epidemiologic studies (Same course as EPI 206.) Effective: 2015 Winter Quarter.

**MPM 207—Applied Epidemiologic Problem Solving (1)**
Discussion/Laboratory—2 hours. Integration of epidemiologic and statistical methodology in a problem-solving approach to contemporary animal population health issues. Data validation and manipulation. Effective: 2014 Fall Quarter.

**MPM 208—Research Planning and Reporting I (2)**
Lecture/Discussion—2 hours. MPVM standing or consent of instructor Identify and implement research questions through hypothesis construction, articulation of aims, acquiring permits, working as a team, and all other techniques needed to develop a successful research program. Not open for credit to students who have previously taken MPM 408B. Effective: 2017 Winter Quarter.

**MPM 209—Research Planning and Reporting II (1)**
Lecture/Discussion. Prerequisite(s): MPM 208 Concepts and skills in effective scientific writing for publication in a peer-reviewed journal in animal health or biomedicine. Includes developing an argument, organizing and writing a manuscript, improving readability, and responding to peer review. Effective: 2016 Fall Quarter.

**MPM 210—Advanced Health Leadership (1.5)**
Discussion; Lecture. Class size limited to 35 students. Develop skills for effective scientific leadership, including: project management and collaboration, conflict resolution, communication with the public, dynamic distribution of health information, and evidence-based policy influence. Effective: 2017 Winter Quarter.

**MPM 212—Concepts and Methods in Infectious Disease Surveillance and Control (3)**
Discussion/Laboratory—1 hour; Lecture—2 hours. Prerequisite(s): Consent of Instructor. Basic and advanced level of conceptual and methodological foundations in infectious disease epidemiology necessary for veterinarians to develop and evaluate programs for detection, prevention, and control of infectious diseases in animal populations. Effective: 2016 Fall Quarter.

---

**Master of Professional Accountancy**

**Master of Professional Accountancy | Master of Professional Accountancy M.P.Ac.**

Robert Yetman, Ph.D., Chairperson of the Group

**Group Office.** Gallagher Hall; 530-752-7658; Fax 530-754-9355; [https://gsm.ucdavis.edu/master-professional-accountancy-mpac](https://gsm.ucdavis.edu/master-professional-accountancy-mpac)

**Faculty.** [http://gsm.ucdavis.edu/faculty-and-research-0](http://gsm.ucdavis.edu/faculty-and-research-0)

**Graduate Advisor.** Contact the Group office.
Courses in ACC:

**ACC 201—Financial Reporting (4)**
Lecture—4 hours. Restricted to Master of Professional Accountancy graduate students. Coverage includes the fundamentals of accounting and reporting economic events and transactions. Emphasizes the preparation of balance sheets, income statements, statements of cash flow, and statements of stockholders’ equity. Not open for credit to students who have taken any MGT 200A. Effective: 2016 Winter Quarter.

**ACC 203—Intermediate Financial Reporting (4)**
Lecture—4 hours. Prerequisite(s): ACC 201 or (MGT 200A or MGP 200A or MGB 200A) Restricted to students enrolled in the Master of Professional Accountancy degree program. Focuses on the preparation of complex financial statements. Topics include accounting recognition, measurement, and disclosure, as well as the theoretical foundations of and motivations for financial reporting choices. Not open for credit to students who have taken any MGT 200A. Effective: 2015 Fall Quarter.

**ACC 205—Advanced Financial Reporting (4)**
Lecture—4 hours. Prerequisite(s): ACC 203 Restricted to graduate students in Graduate School of Management. Advanced treatment of recognition, measurement, and disclosure including pensions, accounting for income taxes, mergers and acquisitions, consolidations, special-purpose entities, and foreign subsidiaries. Includes accounting for governmental and nonprofit entities, as well as advanced treatment of international accounting standards. Effective: 2015 Fall Quarter.

**ACC 211—Tax Reporting and Analysis (4)**
Lecture—4 hours. Restricted to Master of Professional Accountancy graduate students. Introduction to the taxation of business entities and their related transactions, with an emphasis on the details of tax law and tax reporting requirements. Topics include individual, partnership, and corporate taxation, as well as tax theory. Not open for credit to students who have completed any MGT 264. Effective: 2015 Fall Quarter.

**ACC 213—Intermediate Tax Reporting and Analysis (4)**
Lecture—4 hours. Prerequisite(s): ACC 211; (MGT 264 or MGP 264 or MGB 264) Restricted to graduate students in the Graduate School of Management. Detailed analysis of federal taxation of individuals. Topics include the timing of income recognition, deductions and credits for tax purposes, as well as the basics of property transactions. Effective: 2015 Fall Quarter.

**ACC 215—Advanced Tax Reporting and Analysis (4)**
Lecture—4 hours. Prerequisite(s): ACC 213 Restricted to graduate students in Graduate School of Management. Advanced treatment of complex tax transactions and entities. Topics include aspects of federal taxation of entities and the applicable impact upon individual taxpayers. Coverage includes basis analysis as applicable to pass through entities and an introduction to professional responsibilities. Effective: 2015 Fall Quarter.

**ACC 217—Taxation of Individuals, Property, and Estates (4)**
Lecture—4 hours. Prerequisite(s): ACC 213 Restricted to graduate students in Graduate School of Management. In-depth analysis of individual income tax issues and property transactions including non-taxable exchanges, compensation, gifts, and transfer taxes. Expanded analysis of multistate tax issues. Emphasis is on the interrelationships of complex individual transactions as well as planning techniques. Effective: 2015 Fall Quarter.

**ACC 219—Taxation of Business Entities (4)**
Lecture—4 hours. Prerequisite(s): ACC 213 Restricted to graduate students in Graduate School of Management. Analysis of detailed business entity tax issues including basis calculations, alternative minimum taxation, multistate and multinational taxation, stock transactions, and mergers and acquisitions. Tax planning for entities and relationships between business entities and their owners. Effective: 2015 Fall Quarter.

**ACC 231—Analysis and Use of Accounting Reports (4)**
Lecture—4 hours. Prerequisite(s): ACC 203 Restricted to students enrolled in the Master of Professional Accountancy degree program. Evaluation of complex financial accounting reports by managers and persons outside the firm, such as investors, creditors, and financial analysts. Topics include cash flow vs. income measurement, ratio and valuation analysis, and the effects of international accounting standards. Not open for credit to students who have completed any MGT 272. Effective: 2015 Fall Quarter.

**ACC 241—Auditing and the Accounting Profession (4)**
Lecture—4 hours. Prerequisite(s): ACC 201; (MGT 200A or MGP 200A or MGB 200A) Restricted to Graduate School
of Management students. Introduction to the audit environment, professional standards, the accounting profession, and the professional responsibilities of accountants. Integrate audit topics across the areas of financial, cost, tax and systems accounting. (S/U grading only.) Effective: 2015 Fall Quarter.

**ACC 243—Auditing and Attestation Services (4)**
Lecture—4 hours. Prerequisite(s): ACC 241 Restricted to graduate students in Graduate School of Management. Advanced treatment of the audit process and environment. Topics include audit planning and performance, evidence, internal controls, professional standards, and audit reports. Reviews, compilations and attestation services are examined, as are governmental agency audits. Effective: 2015 Fall Quarter.

**ACC 251—Managerial Accounting and Controls (4)**
Lecture—4 hours. Prerequisite(s): ACC 201; (MGT 200A or MGP 200A or MGB 200A) Restricted to graduate students in Graduate School of Management. Analysis of management accounting systems including cost accounting, performance measurement, and compensation and reward systems. Focuses on the production of information useful for managerial decision-making, as well as the design of these systems. Not open for credit to students who have completed any MGT 271. Effective: 2015 Fall Quarter.

**ACC 253—Accounting Information and Control Systems (4)**
Lecture—4 hours. Prerequisite(s): ACC 201; (MGT 200A or MGP 200A or MGB 200A) Restricted to graduate students in Graduate School of Management. Analysis of information systems used for accounting, recordkeeping, and control. Topics include the regulatory requirements of accounting control systems as well as their implementation and auditing considerations. Not open for credit to students who have taken any MGT 271. Effective: 2015 Fall Quarter.

**ACC 261—Communications for Professional Accountants (4)**
Lecture—4 hours. Prerequisite(s): ACC 201; (MGT 200A or MGP 200A or MGB 200A) Restricted to graduate students in the Graduate School of Management. Overview of written and oral professional communications with an emphasis on structuring and documenting audits and reports, understanding audiences (investors, creditors, regulators, and other stakeholders), and consideration of ethical and regulatory responsibilities. Not open for credit to students who have taken any MGT 268. Effective: 2015 Fall Quarter.

**ACC 271—Accounting Ethics (4)**
Lecture—4 hours. Prerequisite(s): ACC 201; (MGT 200A or MGP 200A or MGB 200A) Restricted to Graduate School of Management students. Analysis of accountants' professional responsibilities and ethics. Topics include the behavioral foundations of ethics in a business environment, how those elements affect accountants' integrity, objectivity, and independence. Professional standards related to accountants' conduct are also covered. Effective: 2016 Winter Quarter.

**ACC 455—Audit Data Analytics (4)**
Lecture—4 hours. Prerequisite(s): ACC 253 Analytical techniques and methods as related to the practice of financial statement auditing. Combines theory and the application of auditing professional standards including diagnosing problems and issues, analyzing relevant information, and reporting decision results and recommendations. Effective: 2018 Spring Quarter.

**ACC 490—Topics in Accounting (1-4)**
Lecture—1-4 hours. Contemporary and emerging issues in financial management accounting. Application of modern techniques of evaluation and analysis of financial information. Use of appropriate electronic database and research techniques. May be repeated for credit When topic differ, students can retake this course for credit. Effective: 2018 Spring Quarter.

---

**Master's Entry Program in Nursing; Nursing**

**Master's Entry Program in Nursing; Nursing | Master's Entry Program in Nursing M.S.N.**

Heather M. Young, Ph.D., R.N., F.A.A.N.; Associate Vice Chancellor for Nursing, UC Davis; Dean and Professor, Betty Irene Moore School of Nursing

Theresa A. Harvath, Ph.D., R.N., F.A.A.N.; Executive Associate Dean

Elizabeth Rice, Ph.D., P.M.H.N.P.-B.C., R.N.; Associate Dean for Clinical Education and Practice, Director for the Master of Science—Family Nurse Practitioner Degree Program
Mission Statement

The Betty Irene Moore School of Nursing at UC Davis cultivates academic excellence through immersive, interprofessional and interdisciplinary education and research in partnership with the communities it serves. Faculty, staff and students discover and disseminate knowledge to advance health, improve quality of care and shape policy.

Nursing Science and Health-Care Leadership Graduate Degree Program

Hosted by the Betty Irene Moore School of Nursing at UC Davis, the Nursing Science and Health-Care Leadership Graduate Degree Programs prepare nurse leaders, physician assistants, nurse practitioners, researchers and faculty in a unique interdisciplinary and interprofessional environment. The full-time, academic, doctoral program prepares graduates as leaders in health care, health policy and nurse faculty/researchers at the university level. The master's degree Physician Assistant Studies program prepares graduates to deliver care as physician assistants. Graduates of the professional master's degree leadership program are prepared for health-care leadership roles in a variety of organizations and as nurse faculty at the community college and prelicensure education levels. Graduates of the master's degree Nurse Practitioner Program are prepared to deliver care as nurse practitioners.

Faculty

The UC Davis Nursing Science and Health-Care Leadership Graduate Group includes a wide cross-section of academic disciplines with faculty from the Betty Irene Moore School of Nursing as well as UC Davis Health System and other UC Davis schools, colleges, and departments. Within the graduate group faculty are experts in nursing, medicine, health informatics, nutrition, biostatistics, public health and other fields.

The Master's Entry Program in Nursing prepares new nurses as leaders in quality and safety, advocates for diverse patient populations and agents of change for healthier communities. Graduates of the program are qualified to take the national licensing examination (NCLEX) for registered nurses, eligible for certification as a Public Health Nurse and earn a Master of Science in Nursing Degree.

Master's Entry Program in Nursing; Nursing | NRS Courses

Courses in NRS:

NRS 201—Health Status and Care Systems (4)
Discussion/Laboratory; Lecture/Discussion—3 hours; Project (Term Project). Prerequisite(s): Current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor. Comparative health status data, major current health issues globally, nationally, regionally. Theoretical perspectives on social, political, economic determinants of health. Health-care systems examined, linked to data, and evaluated in regards to outcomes. Aging, rural, ethnic minority populations highlighted. Effective: 2010 Fall Quarter.

NRS 202—Implementation Science (4)
Lecture/Discussion—4 hours. Prerequisite(s): Current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor. Change processes in health care from political, historic, economic and sociologic frameworks. Historic and current examples of transformative change in the health-care system. Skills for system transformation through health policy, practice, research and education are emphasized. Effective: 2010 Winter Quarter.

NRS 203—Leadership in Health Care (4)
Fieldwork; Lecture/Discussion—3 hours. Prerequisite(s): Current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor. Critical examination of leadership from a variety of theoretical and philosophical perspectives and focuses on specific challenges in health care and leadership at various levels, e.g., patient, organizational, and policy levels. Effective: 2010 Fall Quarter.

NRS 204—Research Skills for Nursing Science and Health-Care Leadership (4)
Discussion/Laboratory—1 hour; Lecture/Discussion—3 hours. Prerequisite(s): Current enrollment in the Nursing
Science and Health-Care Leadership graduate program or consent of instructor. Foundation for analyzing research, health, and systems data to answer clinical, systems, or policy questions. Use and examine multiple sources of data and information as a basis for planned change and transformation in health care. Effective: 2014 Winter Quarter.

**NRS 205—Research Design in Nursing and Health Care (4)**
Lecture/Discussion—4 hours. Prerequisite(s): Current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor. Major types of quantitative and qualitative research design and their application to nursing and health-care research. Implications of choosing alternative research designs and critical analysis of philosophical underpinnings. Evaluation of control and validity, sampling, instruments to measure health concepts. Effective: 2014 Winter Quarter.

**NRS 205A—Overview of Research in Nursing Science and Health Care (2)**
Lecture—2 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Provides an overview of quantitative and qualitative paradigms in scientific inquiry and the major designs related to each paradigm. First of a three-course series on research design and methods in nursing science and healthcare research. Effective: 2010 Fall Quarter.

**NRS 205B—Quantitative Research in Nursing Science and Health Care (4)**
Lecture—4 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Introduces principles of quantitative data collection and analysis as applied to major study designs in nursing and health-care research. Provides a basic foundation for producing, interpreting, and applying quantitative research findings to answer clinical, system, and policy questions. Effective: 2015 Fall Quarter.

**NRS 205C—Qualitative Research in Nursing Science and Health Care (4)**
Lecture—4 hours. Prerequisite(s): Consent of Instructor. Restricted to current Ph.D. students in NSHL program or consent of instructor. Introduces principles of qualitative data collection and analysis as applied to major study designs in nursing and health-care research. Provides a basic foundation for producing, interpreting, and applying qualitative research findings to answer clinical, system, and policy questions. Effective: 2015 Fall Quarter.

**NRS 206—Community Connections (2-5)**
Variable—6 hours. Prerequisite(s): Current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor. Open to NSHL MS students only. Community-based learning and experiences including community participation, assessment, data collection and analysis using multiple approaches, community health improvement projects, collaborative leadership practice, all with the guidance of community members and nursing faculty. May be repeated for credit. (S/U grading only.) Effective: 2010 Fall Quarter.

**NRS 210Y—Applied Health Informatics (4)**
Lecture/Discussion—1 hour; Web Virtual Lecture—3 hours. Prerequisite(s): Consent of Instructor. Open to current student in NSHL graduate programs or consent of instructor. Within the conceptual framework of the Foundation of Knowledge model, this course integrates nursing science, information science, computer science and cognitive science to acquire, process, generate and disseminate knowledge. Effective: 2014 Winter Quarter.

**NRS 211Y—Rural Health (2-3)**
Fieldwork—1 hour; Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Interprofessional graduate course provides an introduction to rural health theory, research, policy, and practice, with an emphasis on rural health assets and disparities. Effective: 2015 Spring Quarter.

**NRS 212—Technology & Innovations in Health Care (2)**
Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Multidisciplinary approach to stimulate new thinking in the practice, process, and delivery of health care. Focus on improving overall health outcomes. Effective: 2017 Winter Quarter.

**NRS 213—Race and Health in the United States (3)**
Seminar—7.5 hours. Prerequisite(s): Consent of Instructor. Open to all Nursing Science and Health-Care Leadership graduate students or consent of instructor only. Race as a social construct and unequal health care distribution in the United States. Practical health care leadership to end racial inequalities in health. Effective: 2018 Fall Quarter.

**NRS 220—Social, Cultural, and Behavioral Determinants of Health (2)**
Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing
Effective: 2016 Summer Quarter.

NRS 221—Biophysical Concepts in Nursing (3)
Lecture/Discussion—3 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Pathophysiological processes that contribute to different disease states across the lifespan; case studies; selective clinical decisions using current, reliable sources of pathophysiology information. Effective: 2016 Summer Quarter.

NRS 222A—Research Quality Improvement and Evidence Based Practice (2)
Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Introduction to providing safe, competent and compassionate care in a highly technical and digital environment. Emphasis on safety, quality and research to clinical practice. Accessing and analyzing reliable sources of evidence for integration in care-plan. Effective: 2016 Summer Quarter.

NRS 222B—Research Quality Improvement and Evidence Based Practice (2)
Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Introduction to providing safe, competent and compassionate care in a highly technical and digital environment. Emphasis on safety, quality and research to clinical practice. Accessing and analyzing reliable sources of evidence for integration in care-plan. Effective: 2016 Fall Quarter.

NRS 223—Quality and Safety Education in Health Care (2)
Lecture/Discussion—2 hours. Prerequisite(s): NRS 221; NRS 272; NRS 420; NRS 421; NRS 273; NRS 422; NRS 423; NRS 425; Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Implementing best practices alongside technological tools and focusing on continuous quality improvement. Emphasis on providing safe, competent care in a highly technical and digital environment. Building capacity to apply concepts related to safety, quality and research to clinical practice. Effective: 2017 Spring Quarter.

NRS 224—Developing Future Nurse Leaders (2)
Lecture/Discussion—2 hours. Prerequisite(s): NRS 221; NRS 272; NRS 420; NRS 421; NRS 273; NRS 422; NRS 423; NRS 425; NRS 223; NRS 426; Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Develop skills around effective decision making, fiscal and environmental stewardship, initiating and maintaining effective working relationships, using mutually respectful communication and collaboration, care coordination, delegation and supervision. Emphasis on conflict resolution, leadership and interprofessional teamwork. Effective: 2017 Summer Quarter.

NRS 225—Professional Nursing Role Formation (3)
Lecture/Discussion—3 hours. Prerequisite(s): NRS 220; NRS 221; NRS 222A; NRS 272; NRS 420; NRS 421; NRS 429A; NRS 222B; NRS 273; NRS 422; NRS 423; NRS 429B; NRS 203; NRS 212; NRS 425; NRS 429C; NRS 202; NRS 223; NRS 426; NRS 429D; NRS 224; NRS 424; NRS 427; NRS 429E; Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Transition from nursing student to professional nurse. Focus on ethical comportment, professional values of social justice, autonomy, advocacy, altruism, human dignity, and integrity. Students must pass a mastery exit examination and complete a capstone project. Effective: 2017 Fall Quarter.

NRS 242A—Implementation Science for Clinicians (2)
Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Course focuses on identification of relevant research or improvement questions specific to patient care and evaluating the pertinent research literature related to the implementation of evidence based care. The course is 1st of a 3-course series. Effective: 2014 Summer Quarter.

NRS 242B—Implementation Science for Clinicians (2)
Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Course is a continuation of course 242A, Implementation Science for Clinicians, with a focus on implementing and evaluating a change. Effective: 2014 Summer Quarter.
NRS 242C—Implementation Science for Clinicians (2)
Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Advanced skills in application of implementation science into systems based practice and incorporating quality improvement and patient safety knowledge with particular focus on prevention of medical errors. Effective: 2014 Spring Quarter.

NRS 243A—Leadership in Professional Practice (2)
Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Course is a critical examination of leadership using theoretical and philosophical perspectives with an applied approach applicable to clinical practice. The 3 course series is conducted across three quarters in the 1st, 3rd and 8th quarters. Effective: 2013 Summer Quarter.

NRS 243B—Leadership in Professional Practice (1)
Lecture/Discussion—1 hour. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Course introduces professional role topics including history of the profession, the role in interprofessional teams and the health care system, transitioning to the role from other health professions, scope of practice, certification and licensure and professional organizations. Effective: 2014 Winter Quarter.

NRS 243C—Leadership in Professional Practice (1)
Lecture/Discussion—1 hour. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Course expands upon the leadership role as it relates to their clinical practice and professional role. Professional role topics including: transitioning from student to practicing professional, scope of practice, the physician relationship, and more advanced concepts in ethics. Effective: 2014 Spring Quarter.

NRS 250—Foundations of Primary Health Care (7)
Laboratory—3 hours; Lecture/Discussion—6 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Course is designed to promote the understanding and clinical application of human anatomy, physiology, histology, immunology and pathology. Effective: 2013 Summer Quarter.

NRS 251A—Primary Health Care (8)
Lecture/Discussion—8 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Course introduces primary health care concepts essential to the care of common medical problems seen in primary care settings. Module content will focus on various organ systems and specialty areas. Effective: 2013 Fall Quarter.

NRS 251B—Foundations of Primary Health Care (8)
Lecture/Discussion—8 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Course introduces primary health care concepts essential to the care of common medical problems seen in primary care settings. Effective: 2014 Winter Quarter.

NRS 251C—Primary Heath Care (8)
Lecture/Discussion—8 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Course introduces primary health care concepts essential to the care of common medical problems seen in primary care settings. Effective: 2014 Spring Quarter.

NRS 251D—Primary Heath Care (6)
Lecture/Discussion—6 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Course introduces primary health care concepts essential to the care of common medical problems seen in primary care settings. Effective: 2014 Summer Quarter.

NRS 260—Foundations of Behavioral Health (1)
Lecture/Discussion—1 hour. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Course focuses on the spectrum of normal psychological development over the lifespan for children, adults and elders. Theories of stress
and coping mechanism are presented as a framework for the assessment of individuals. Effective: 2013 Summer Quarter.

**NRS 270—Foundations of Pharmacology (2)**
Laboratory—3 hours; Lecture/Discussion—1 hour. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Course introduces the student to the major concepts in pharmacology and relevant human physiology related to pharmacoanerapeutics and toxicology. Effective: 2013 Summer Quarter.

**NRS 271A—Pharmacology (2)**
Laboratory—3 hours; Lecture/Discussion—1 hour. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Systems based pharmacology focused on classes of drugs used to treat disorders in specialty systems. Effective: 2013 Fall Quarter.

**NRS 271B—Pharmacology (2)**
Laboratory—3 hours; Lecture/Discussion—1 hour. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Systems based pharmacology focused on classes of drugs used to treat disorders in specialty systems. Effective: 2014 Spring Quarter.

**NRS 271C—Pharmacology (2)**
Laboratory—3 hours; Lecture/Discussion—1 hour. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Systems based pharmacology focused on classes of drugs used to treat disorders in specialty systems. Effective: 2014 Spring Quarter.

**NRS 272—Foundations of Pharmacology (2)**
Laboratory—3 hours; Lecture/Discussion—1 hour. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Course introduces the student to the major concepts in pharmacology and relevant human physiology related to pharmacoanerapeutics and toxicology. Effective: 2013 Summer Quarter.

**NRS 273—Pharmacology Concepts in Nursing (2)**
Laboratory—3 hours; Lecture/Discussion—1 hour. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Systems based pharmacology focused on classes of drugs used to treat disorders in specialty systems. Effective: 2013 Fall Quarter.

**NRS 274—Pharmacology Concepts in Nursing (2)**
Laboratory—3 hours; Lecture/Discussion—1 hour. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Systems based pharmacology focused on classes of drugs used to treat disorders in specialty systems. Effective: 2014 Spring Quarter.

**NRS 290—Master's Seminar (2)**
Discussion—2 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Theoretical background to providing safe and effective care related to drugs and natural products. Effective: 2016 Summer Quarter.

**NRS 291—Doctoral Seminar (2)**
Discussion—2 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Application of principles for safe and effective use of medications and natural products; use of current, reliable information to make clinical decisions. Effective: 2016 Fall Quarter.

**NRS 291D—Doctoral Seminar (2)**
Discussion—2 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Application of principles for safe and effective use of medications and natural products; use of current, reliable information to make clinical decisions. Effective: 2014 Winter Quarter.

**NRS 298—Special Topics in Nursing Science and Health-Care Leadership (1-4)**
Lecture/Discussion—1-2 hours; Variable—1-3 hours. Prerequisite(s): Consent of Instructor. In-depth study of topics in Nursing Science and Health-Care Leadership, selected from: policy and politics in health care, health-care disparities, current issues in
health care, approaches to the conduct of science, or other related areas, with year to year variation. May be repeated for credit. Effective: 2014 Spring Quarter.

NRS 298V—Online Special Topics in Nursing Science and Health-Care Leadership (1-4)
Web Electronic Discussion—1-4 hours; Web Virtual Lecture—1-4 hours. Prerequisite(s): Current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor. In-depth study of topics in Nursing Science and Health-Care Leadership, selected from: policy and politics in health care, health-care disparities, current issues in health care, approaches to the conduct of science, or other related areas, with year to year variation. May be repeated for credit. Effective: 2014 Winter Quarter.

NRS 299—Research and Writing (1-12)
Extensive Writing/Discussion—3-36 hours. Prerequisite(s): Consent of Instructor. Students in the Nursing Science and Health-Care Leadership graduate programs conduct research and writing under the supervision of a faculty member. May be repeated for credit. (S/U grading only.) Effective: 2011 Winter Quarter.

NRS 299D—Dissertation Research and Writing (1-12)
Extensive Writing/Discussion—3-36 hours. Prerequisite(s): Consent of Instructor. Students in the Nursing Science and Health-Care Leadership graduate programs conduct dissertation research and writing under the supervision of a faculty member. May be repeated for credit. (S/U grading only.) Effective: 2011 Winter Quarter.

NRS 301—Learner Centered Teaching (3-4)
Lecture/Discussion—3 hours; Practice—1 hour. Prerequisite(s): Consent of Instructor. Open to current students in the Nursing Science and Health-Care Leadership graduate programs; outside students with prior educational or work experience in education may register for this class with the consent of instructor. Students will explore best practices in learner-centered teaching, performance-based curriculum models, instructional design, and assessing/evaluating student learning. Students will have experience in planning learner-centered activities that are engaging and effective in achieving desired student performance. Effective: 2016 Spring Quarter.

NRS 302—Teaching Methods - Use of Emerging Technologies to Improve Student Learning (4)
Lecture/Discussion—3 hours; Practice—1 hour. Prerequisite(s): Consent of Instructor. Open to current students in the Nursing Science and Health-care Leadership graduate programs; outside students with prior educational or work experience in education may register for this class with the consent of instructor. Students will examine, design and develop instructional strategies that use innovative and emerging technologies to promote motivation, performance and learning in health professions education. Research findings associated with use of various emerging technologies will be examined. Effective: 2016 Fall Quarter.

NRS 303—Professional Role Formation (2-4)
Laboratory—2 hours; Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Open to current students in the Nursing Science and Health-care Leadership graduate programs; outside students with prior educational or work experience in education may register for this class with the consent of instructor. Exploration of the educator role. Topics include Role Expectations, Legal and Regulatory Issues, Professional Ethics, Educational Scholarship, Individual Differences, Learning Environments, and Lifelong Learning. Placements for the optional practicum are arranged in a wide variety of settings. Effective: 2017 Winter Quarter.

NRS 306—Nature of Caregiving (4)
Lecture/Discussion—4 hours. Prerequisite(s): Consent of Instructor. Explores theoretical and conceptual frameworks to enable clinicians to understand the nature of family caregiving. Students examine and apply frameworks in order to conduct comprehensive person and family based assessments and interventions incorporating various dimensions of family caregiving. Effective: 2019 Fall Quarter.

NRS 307—Family Centered Communication & Shared Decision Making (4)
Lecture/Discussion—4 hours. Prerequisite(s): Consent of Instructor. Incorporates shared decision-making principles and group communication to address family centered care planning and challenging clinical discussions. Targets competencies needed by health professionals to partner effectively to enhance the caregiving experience and reduce negative sequelae over the caregiving trajectory. Effective: 2020 Winter Quarter.

NRS 308—Patient & Family Centered Care Plan Development (4)
Lecture/Discussion—4 hours. Prerequisite(s): Consent of Instructor. Synthesizes assessment data and analyzes impact of technology, individual, family, sociocultural, health care system, and illness-related variables in specific family care-giving situations. Co-create comprehensive evidence based plan to facilitate the health and well-being of the family unit through shared decision-making. Effective: 2020 Spring Quarter.
NRS 400—Basic Clinical Skills (1-4)
Lecture/Lab—1-4 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Instruction and practice of the fundamental clinical skills necessary for patient care comprise this course with a primary focus on principles of effective communication in establishing the therapeutic provider-patient relationship. Effective: 2013 Summer Quarter.

NRS 401—Basic Clinical Skills (1-4)
Lecture/Lab—1-4 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Continuation of focus on history taking and physical examination skills with advanced/specialized content. Effective: 2013 Fall Quarter.

NRS 410A—Advanced Clinical Skills (1-4)
Lecture/Lab—1-4 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Continuation of focus on history taking and physical examination skills with advanced/specialized content. Effective: 2014 Winter Quarter.

NRS 410B—Advanced Clinical Skills (1-4)
Lecture/Lab—1-4 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Continuation of focus on history taking and physical examination skills with advanced/specialized content related specified systems. Effective: 2014 Spring Quarter.

NRS 410C—Advanced Clinical Skills (1-4)
Lecture/Lab—1-4 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Continuation of focus on history taking and physical examination skills with advanced/specialized content related specified systems. Effective: 2014 Summer Quarter.

NRS 410D—Advanced Clinical Skills (1-4)
Lecture/Lab—1-4 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Continuation of focus on history taking and physical examination skills with advanced/specialized content related to specified systems. Effective: 2013 Fall Quarter.

NRS 410E—Advanced Clinical Skills (1-4)
Lecture/Lab—1-4 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Continuation of focus on history taking and physical examination skills with advanced/specialized content related to specified systems. Effective: 2013 Fall Quarter.

NRS 410F—Advanced Clinical Skills (1-4)
Lecture/Lab—1-4 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Continuation of focus on history taking and physical examination skills with advanced/specialized content related to specified specialty systems. Effective: 2014 Spring Quarter.

NRS 410G—Advanced Clinical Skills (1-4)
Lecture/Lab—1-4 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Continuation of focus on history taking and physical examination skills with advanced/specialized content related to specified specialty systems. Effective: 2015 Fall Quarter.

NRS 420—Foundations of Clinical Nursing Practice (3)
Clinical Activity—9 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Foundational course introduces students to core concepts of clinical nursing, including clinical reasoning, professional ethics, therapeutic communication and activities of daily living. Develop skills for the provision of safe, high quality, culturally-sensitive, person-centered care across the lifespan. Effective: 2016 Summer Quarter.

NRS 421—Health Assessment Across the Lifespan (3)
Clinical Activity—6 hours; Lecture/Discussion—1 hour. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor.
Prepares students to conduct a health history assessment using developmentally and culturally appropriate approaches for individuals across the lifespan. Acquire the knowledge, understanding, and skills needed to perform, interpret and communicate a health history. Effective: 2016 Summer Quarter.

NRS 422—Care of Adults with Chronic Conditions (6)
Clinical Activity—9 hours; Lecture/Discussion—3 hours. Prerequisite(s): NRS 221; NRS 272; NRS 420; NRS 421; Consent of Instructor. This course is open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Learn concepts central to the effective management of a variety of common chronic illness and disabling conditions across the lifespan in a variety of different settings. Practice conducting in-depth health assessments of individuals with chronic conditions. Effective: 2016 Fall Quarter.

NRS 423—Psychosocial Wellness & Illness (5)
Clinical Activity—6 hours; Lecture/Discussion—3 hours. Prerequisite(s): NRS 221; NRS 272; NRS 420; NRS 421; Consent of Instructor. This course is open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Explore the biological, psychological, cultural, societal, and environmental factors that affect psychological wellness and illness. Practice providing care to individuals and families experiencing disruptions in mental health secondary to physical or psychiatric illness, trauma or loss. Effective: 2016 Fall Quarter.

NRS 424—Nursing Care of Older Adults (3)
Clinical Activity—3 hours; Lecture/Discussion—2 hours. Prerequisite(s): NRS 221; NRS 272; NRS 420; NRS 421; NRS 273; NRS 422; NRS 423; NRS 425; NRS 223; NRS 426; Consent of Instructor. This course is open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Build skills for situations involving older adults, such as in the management of complex clinical and administering and interpreting standardized assessment tools. Develop plans of care for older adults experiencing a variety of geriatric syndromes. Effective: 2017 Summer Quarter.

NRS 425—Family Focused Nursing (9)
Clinical Activity—12 hours; Lecture/Discussion—5 hours. Prerequisite(s): NRS 221; NRS 272; NRS 420; NRS 421; NRS 273; NRS 422; NRS 423; Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Focuses on family as the unit of nursing and interprofessional care. Includes influences of family on health and illness, reproductive and gender/sexuality issues, pregnancy, birth and child-rearing, and the health and illness in children and youth. Effective: 2017 Winter Quarter.

NRS 426—Nursing Care of Adults with Complex Illness or Injury (8)
Clinical Activity—12 hours; Lecture/Discussion—4 hours. Prerequisite(s): NRS 221; NRS 272; NRS 420; NRS 421; NRS 273; NRS 422; NRS 423; NRS 425; Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Prepares students to provide comprehensive, patient-centered nursing care for patients with acute or complex illness and injury. Theory portion focuses on concepts associated with complex physiological alterations. Effective: 2017 Spring Quarter.

NRS 427—Fostering Healthy Communities (7)
Clinical Activity—9 hours; Lecture/Discussion—4 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Focuses on populations & communities, and emphasizes working with diverse communities in providing health promotion, chronic disease management, transitional support and crisis intervention. Develop skills to critically analyze and shape health policy and develop accessible community resources. Effective: 2017 Summer Quarter.

NRS 428—Capstone Clinical Nursing Practicum (8)
Clinical Activity—24 hours. Prerequisite(s): NRS 220; NRS 221; NRS 222A; NRS 272; NRS 420; NRS 421; NRS 429A; NRS 222B; NRS 273; NRS 422; NRS 423; NRS 429B; NRS 203; NRS 212; NRS 425; NRS 429C; NRS 202; NRS 223; NRS 426; NRS 429D; NRS 224; NRS 424; NRS 427; NRS 429E; Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Practicum experience is designed to facilitate transition to professional practice. Opportunity to choose a clinical practice area of interest and to work with a preceptor with expertise in that area. Effective: 2017 Fall Quarter.

NRS 429A—Collaborative Practice A (1)
Clinical Activity—3 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Interprofessional course uses experiential learning activities including simulation, role play, and case studies. Concepts include but are not limited to: communication, person-centered care, ethical decision making, end-of-life decisions, culturally appropriate care, quality and safety, social justice, and professionalism. Effective: 2016 Summer Quarter.
NRS 429B—Collaborative Practice B (1)
Clinical Activity—3 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Interprofessional course uses experiential learning activities including simulation, role play, and case studies. Concepts include but are not limited to; communication, person-centered care, ethical decision making, end-of-life decisions, culturally appropriate care, quality and safety, social justice, and professionalism. Effective: 2016 Fall Quarter.

NRS 429C—Collaborative Practice C (1)
Clinical Activity—3 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Interprofessional course uses experiential learning activities including simulation, role play, and case studies. Concepts include but are not limited to; communication, person-centered care, ethical decision making, end-of-life decisions, culturally appropriate care, quality and safety, social justice, and professionalism. Effective: 2017 Winter Quarter.

NRS 429D—Collaborative Practice D (1)
Clinical Activity—3 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Interprofessional course uses experiential learning activities including simulation, role play, and case studies. Concepts include but are not limited to; communication, person-centered care, ethical decision making, end-of-life decisions, culturally appropriate care, quality and safety, social justice, and professionalism. Effective: 2017 Spring Quarter.

NRS 429E—Collaborative Practice E (1)
Clinical Activity—3 hours. Prerequisite(s): Consent of Instructor. This course is open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Interprofessional course uses experiential learning activities including simulation, role play, and case studies. Concepts include but are not limited to; communication, person-centered care, ethical decision making, end-of-life decisions, culturally appropriate care, quality and safety, social justice, and professionalism. Effective: 2017 Summer Quarter.

NRS 429F—Collaborative Practice F (1)
Clinical Activity—3 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Interprofessional course uses experiential learning activities including simulation, role play, and case studies. Concepts include but are not limited to; communication, person-centered care, ethical decision making, end-of-life decisions, culturally appropriate care, quality and safety, social justice, and professionalism. Effective: 2017 Fall Quarter.

NRS 440—Preparation for Clinical Practice (1-3)
Clinical Activity—3-9 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership graduate programs or by consent of instructor. Students are placed in clinical settings and/or clinical simulation laboratories to observe and practice the integration of clinical skills with direct supervision by faculty. Effective: 2016 Winter Quarter.

NRS 450A—Supervised Clinical Practice—Primary Health Care (1-16)
Clinical Activity—48 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Each of the required primary care rotations is a four-week supervised clinical practice experience in primary care, under the supervision of an appropriate community-based primary care provider per accreditation requirements. May be repeated up to 5 time(s). Effective: 2016 Winter Quarter.

NRS 450B—Supervised Clinical Practice—Primary Health Care (1-16)
Clinical Activity—48 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Each of the required primary care rotations is a four-week supervised clinical practice experience in primary care, under the supervision of an appropriate community-based primary care provider per accreditation requirements. May be repeated up to 5 time(s). Effective: 2016 Winter Quarter.

NRS 450C—Supervised Clinical Practice—Primary Health Care (1-16)
Clinical Activity—48 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Each of the required primary care rotations is a four-week supervised clinical practice experience in primary care, under the supervision of an appropriate community-based primary care provider per accreditation requirements. May be repeated up to 5 time(s). Effective: 2016 Winter Quarter.
NRS 450D—Supervised Clinical Practice-Primary Health Care (1-16)
Clinical Activity—48 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Each of the required primary care rotations is a four-week supervised clinical practice experience in primary care, under the supervision of an appropriate community-based primary care provider per accreditation requirements. May be repeated up to 5 time(s). Effective: 2016 Winter Quarter.

NRS 450E—Supervised Clinical Practice-Primary Health Care (1-16)
Clinical Activity—48 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Each of the required primary care rotations is a four-week supervised clinical practice experience in primary care, under the supervision of an appropriate community-based primary care provider per accreditation requirements. May be repeated up to 5 time(s). Effective: 2016 Winter Quarter.

NRS 451—Supervised Clinical Practice-Pediatrics (1-16)
Clinical Activity—48 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Four-week clinical rotation under the supervision of an appropriate community-based Pediatric Medicine provider per accreditation requirements. May be repeated up to 5 time(s). Effective: 2016 Winter Quarter.

NRS 452—Supervised Clinical Practice-Women's Health (1-16)
Clinical Activity—48 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Four-week clinical rotation under the supervision of an appropriate community-based women’s health and prenatal care provider per accreditation requirements. May be repeated up to 5 time(s). Effective: 2016 Winter Quarter.

NRS 453—Supervised Clinical Practice-Mental Health (1-16)
Clinical Activity—48 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Four-week clinical rotation under the supervision of an appropriate community-based psychiatrist, psychiatric/mental health provider per accreditation requirements. May be repeated up to 5 time(s). Effective: 2016 Winter Quarter.

NRS 454—Supervised Clinical Practice-Emergency Medicine (1-16)
Clinical Activity—48 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Four-week clinical rotation under the supervision of an appropriate Emergency Medicine provider per accreditation requirements. May be repeated up to 5 time(s). Effective: 2016 Winter Quarter.

NRS 455—Supervised Clinical Practice-Inpatient Surgery (1-16)
Clinical Activity—48 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Four-week clinical experience under the supervision of an appropriate surgical provider per accreditation requirements. May be repeated up to 5 time(s). Effective: 2016 Winter Quarter.

NRS 456—Supervised Clinical Practice-Inpatient Medicine (1-16)
Clinical Activity—48 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Four-week clinical rotation under the supervision of an appropriate inpatient provider per accreditation requirements. May be repeated up to 5 time(s). Effective: 2016 Winter Quarter.

NRS 459—Supervised Clinical Practice-Other Specialties (1-16)
Clinical Activity—48 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Two four-week selective rotations are available to accommodate student interest and/or accommodate a student’s clinical deficits identified by the program. May be repeated up to 5 time(s). Effective: 2016 Winter Quarter.

NRS 470—Health Care Ethics (3-9)
Discussion/Laboratory—1 hour; Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Guided independent study of issues in biomedical ethics, with discussion of readings that are based on student interests and needs. Participation in ethics rounds. (Same course as GMD 470.) (S/U grading only.) Effective: 2012 Spring Quarter.
NRS 471—Supervised Clinical Practice-Geriatrics (1-16)
Clinical Activity—48 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Four-week clinical rotation under the supervision of an appropriate community-based Geriatric Medicine provider per accreditation requirements. May be repeated up to 5 time(s). Effective: 2016 Winter Quarter.

NRS 475—Supervised Clinical Practice-Acute Care (1-16)
Clinical Activity—48 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Two- to four-week rotation focus on providing acute care in inpatient settings. Students will work directly with specific inpatient units. May be repeated up to 5 time(s). Effective: 2016 Winter Quarter.

NRS 480—Supervised Clinical Practice-Rural Health (1-16)
Clinical Activity—48 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Rural health rotations focus on providing care in medically underserved rural sites. Students will experience care across the continuum in ambulatory, inpatient, and community based settings. May be repeated up to 5 time(s). Effective: 2016 Winter Quarter.

NRS 490—Supervised Clinical Practice-Quality and Safety (1-16)
Clinical Activity—48 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Clinical rotation that allow students to work directly with patient safety and quality improvement committees in various organizations. May be repeated up to 5 time(s). Effective: 2016 Winter Quarter.

NRS 493A—Improving Quality in Health Care (4)
Lecture/Discussion—4 hours. Prerequisite(s): Consent of Instructor. Open to Nursing Science and Health-Care Leadership Students. Working in interdisciplinary teams, will explore the theory and practical methods being employed to make improvement in health care systems while providing an opportunity for interprofessional educational experience. Effective: 2017 Fall Quarter.

NRS 493B—Improving Quality in Health Care (4)
Lecture/Discussion—4 hours. Prerequisite(s): NRS 493A; Consent of Instructor. Open to Nursing Science and Health-Care Leadership Students. Working in interdisciplinary teams, will explore advanced theory and practical methods being employed to make improvement in health care systems while providing an opportunity for interprofessional educational experience. Effective: 2018 Winter Quarter.

NRS 493C—Enhancing Patient Safety in Health Care (3)
Clinical Activity—1 hour; Discussion—1 hour; Seminar—1 hour. Prerequisite(s): Consent of Instructor. Nursing Science and Health-Care Leadership graduate students. Inter-professional module is designed to explore the theory and practical methods being employed to improve patient safety in health care while providing an opportunity for inter-professional educational experience. Effective: 2017 Spring Quarter.

The Department of Materials Science and Engineering offers one undergraduate program in Materials Science and Engineering and a minor in Materials Science.

**Mission Statement.** The mission of the Department of Materials Science and Engineering is to promote excellence in innovative cross-disciplinary materials education and research within an inclusive culture of students, staff, and faculty committed to creating a climate that respect and embraces racial, gender, and ethnic diversity at every level.

**Honors Program.** An Honors Program is available to qualified students in Materials Science and Engineering. It is a two-year program designed to challenge the most talented students in the major. Students invited to participate will complete either an honors thesis or a project that might involve local industry. Students must maintain a grade point average of 3.500 to continue in the program. Successful completion of the Honors Program will be acknowledged on the student's transcript.

**Materials Science and Engineering Undergraduate Program**

The Materials Science and Engineering program is accredited by the Engineering Accreditation Commission of ABET; see http://www.abet.org.

Materials science and engineering is directed toward an understanding of the structure, properties, and processing of materials. Society demands new and improved materials with capabilities far superior to common metals, polymers, and ceramics. New materials are needed for high-speed transportation systems, surgical and dental implants, new generations of power plants, renewable energy sources, and solid-state electronic and photonics devices in computer and communication technology. Both the development of new materials and the understanding of present-day materials demand a thorough knowledge of basic engineering and scientific principles, including crystal structure, elastic and plastic behavior, thermodynamics, phase equilibria and reaction rates, and structural and physical and chemical behavior of engineering materials.

Materials engineers study phenomena found in many different engineering operations, from fracture behavior in automobiles to fatigue behavior in aircraft frames, from corrosion behavior in petro-chemical refineries to radiation-induced damage in nuclear power plants, and from the fabrication of steel to the design of semiconductors. Materials engineers are also increasingly involved in developing the new materials needed to attain higher efficiencies in existing and proposed energy conversion schemes and will play a central role in the development of new technologies based on composites and high-temperature superconductivity.

The undergraduate materials science and engineering program provides the background for activities in research, processing, and the design of materials. The curriculum is based on a common core of courses basic to engineering; courses taken during your first two years provide a strong foundation in fundamental engineering concepts.

**Objectives.** We educate students in the fundamentals of materials science and engineering, balanced with the application of these principles to practical problems; educate students as independent, critical thinkers who can also function effectively in a team; educate students with a sense of community, ethical responsibility, and professionalism; educate students for careers in industry, government, and academia; teach students the necessity for continuing education and self-learning; and foster proficiency in written and oral communications.

Students are encouraged to adhere carefully to all prerequisite requirements. The instructor is authorized to drop students from a course for which stated prerequisites have not been completed.

Exclusive of General Education units, the minimum number of units required for the Materials Science and Engineering major is 154.

Depending on area of focus, 6-9 units of upper division electives 6-9

Students may receive up to a maximum of four units of credit for engineering 199 0
courses, when these courses are approved by the departmental undergraduate studies
committee. To receive credit, students must submit a summary of their research to the
committee. A letter of support from the faculty mentor is also required to verify that you
have conducted substantial research activity.

**Upper Division Composition Requirement** 0-4

*Choose one; grade of C- or better is required:*

- UWP 102E Writing in the Disciplines: Engineering 4
- UWP 102F Writing in the Disciplines: Food Science and Technology 4
- UWP 104A Writing in the Professions: Business Writing 4
- UWP 104E Writing in the Professions: Science 4
- UWP 104T Writing in the Professions: Technical Writing 4
- Passing the Upper Division Composition Exam. 0

**Total: 154-156**

**Graduate Programs in the Department of Materials Science and Engineering**

The Department of Materials Science and Engineering is home to a top-20 ranked graduate programs in Materials Science & Engineering. We offer a unique interdisciplinary environment for graduate studies, with renowned faculty and state-of-the-art research facilities.

**The Graduate Program in Materials Science and Engineering**

M.Eng., M.S., and Ph.D.

Ph.D. designated emphases are available as specializations in biotechnology, biophysics, and nuclear science.

The Materials Science and Engineering Graduate Program provides students with a strong background in advanced materials synthesis, processing, and characterization, both from an experimental and theoretical standpoint.

Doctoral students are typically offered competitive four-year financial offers of fellowships and research/teaching assistantships which include tuition, fees, and a stipend.

Financial offers are subject to satisfactory progress towards completion of degree requirements.

Research areas include biomaterials, catalysts, ceramics, electronic and electrochemical properties and devices, glasses, green engineering and design, interfaces, magnetic materials and devices, materials microstructure and/or processing, mathematical modeling, mechanical properties and synthesis, metals, microscopy, molecular modeling, nanomaterials, optical properties and devices, polymers, renewable energy, sintering, structural materials, thermochemistry, and thin films.

Research Facilities and Partnerships:

- Interdisciplinary Center for Electron Microscopy
- Center for Northern California Nanotechnology
- Center for Nanomaterials in the Environment, Agriculture and Technology

**Department Office.** 3001 Ghausi Hall; 530-752-0400; Fax 530-752-1031; [http://mse.engineering.ucdavis.edu](http://mse.engineering.ucdavis.edu)

**Faculty.** [https://mse.engineering.ucdavis.edu/people/faculty/](https://mse.engineering.ucdavis.edu/people/faculty/)

**Materials Science Minor**

There is a constant need for professionals with more knowledge and experience in understanding the behavior of materials from which products such as electronics, sensors, biological implants, transportation vehicles, medical devices and infrastructure are made. The goal of this minor is to prepare students for careers that require training in materials science, including the fundamentals of thermodynamics and kinetics and their effects on phase composition and structure, as well as the complex relationships between composition, structure, processing and behavior/performance. Topics covered include material thermodynamics and kinetics, materials structural analysis, and structure-property relationships for electronic, optical, magnetic and mechanical behavior. The minor is expected to accommodate persons of diverse backgrounds, such as those majoring in engineering, physical sciences, biological sciences, and mathematics.

All courses must be taken for a letter grade. A grade of C- or better is required for all courses used to satisfy minor requirements, with an overall GPA in minor requirement courses of 2.000 or better.

**Minor Advisor.** S. Gentry (Department of Materials Science and Engineering)

**Materials Science**

**Total: 20**
Courses in EMS:

EMS 002—Materials Marvels: The Science of Superheroes (3)
Discussion—1 hour; Lecture—2 hours. Introduction to science and technology of materials as key engineering ingredients. Explores the relationship between art and materials, and how superheroes are both products and resources of ideas for new materials' technologies. GE credit: SE, SL, WE. Effective: 2018 Winter Quarter.

EMS 006H—Honors Materials Science Computer Applications (1)
Discussion—1 hour. Prerequisite(s): ENG 006 (can be concurrent); Enrollment in the Materials Science and Engineering Honors Program; ENG 006 required concurrently. Restricted to students in the Materials Science and Engineering Honors Program. Examination of materials science computer applications through additional readings, discussions, collaborative work, or special activities which may include projects or computer simulations. Effective: 2018 Winter Quarter.

EMS 009H—Honors Solid-State Materials Science (1)
Discussion—1 hour. Prerequisite(s): PHY 009D (can be concurrent); Enrollment in the Materials Science and Engineering Honors Program; PHY 009D required concurrently. Restricted to students in the Materials Science and Engineering Honors Program. Examination of solid-state materials science and modern physics topics through additional readings, discussions, collaborative work, or special activities which may include projects, laboratory experience or computer simulations. Effective: 2017 Winter Quarter.

EMS 147—Principles of Polymer Materials Science (3)
Lecture—3 hours. Prerequisite(s): CHE 002A; CHE 002B; ((CHE 008A, CHE 008B) or (ENG 045 or ENG 045Y)); introductory physics. Basic principles of polymer science presented including polymer structure and synthesis; polymerization mechanisms, polymer classes, properties, and reactions; polymer morphology, rheology, and characterization; polymer processing. (Same course as FPS 100.) GE credit: QL, SE. Effective: 2018 Spring Quarter.

EMS 160—Thermodynamics of Materials Processes and Phase Stability (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ENG 045 C- or better; PHY 009B C- or better; MAT 022B C- or better; CHE 002C recommended. Review of thermodynamic principles of interest to materials scientists and engineers. Application of thermodynamics to material processing, phase stability, corrosion. GE credit: QL, SE, SL, VL. Effective: 2017 Winter Quarter.

EMS 160—Thermodynamics of Materials Processes and Phase Stability (4)
Review all entries

Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ENG 045 C- or better or ENG 045Y C- or better; PHY 009B C- or better; MAT 022B C- or better; CHE 002C recommended. Review of thermodynamic principles of interest to materials scientists and engineers. Application of thermodynamics to material processing, phase stability, corrosion. GE credit: QL, SE, SL, VL. Effective: 2018 Fall Quarter.

EMS 160—Thermodynamics of Materials Processes and Phase Stability (4)
Review all entries

Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ENG 045 C- or better or ENG 045Y C- or better; PHY 009B C- or better; MAT 022B C- or better; CHE 002C recommended. Review of thermodynamic principles of interest to materials scientists and engineers. Application of thermodynamics to material processing, phase stability, corrosion. GE credit: QL, SE, SL. Effective: 2018 Fall Quarter.

EMS 162—Structure and Characterization of Engineering Materials (4)
Lecture—4 hours. Prerequisite(s): ENG 045 C- or better or ENG 045Y C- or better; MAT 022A C- or better; PHY 009B C- or better. Description of the structure of engineering materials on the atomic scale by exploring the fundamentals of crystallography. The importance of this structure to materials’ properties. Description of experimental determination using x-ray diffraction techniques. GE credit: QL, SE. Effective: 2018 Winter Quarter.

EMS 162—Structure and Characterization of Engineering Materials Laboratory (2)
Discussion—1 hour; Laboratory—3 hours. Prerequisite(s): EMS 162 (can be concurrent). Concurrent enrollment recommended. Experimental investigations of structure of solid materials are combined with techniques for characterization of materials. Laboratory exercises emphasize methods used to study structure of solids at the atomic and microstructural levels. Methods focus on optical, x-ray and electron techniques. Not open for credit to those who have completed EMS 132; can be taken for 2 units of credit by those who have completed EMS 134L; not open for credit to those who have completed both EMS 132L and EMS 134L. GE credit: QL, SE, SL, VL, WE. Effective: 2017 Winter Quarter.
EMS 162L—Structure and Characterization of Materials Laboratory (3) Review all entries
Discussion—1 hour; Extensive Writing; Laboratory—3 hours. Prerequisite(s): EMS 162 (can be concurrent); Concurrent enrollment in EMS 162 recommended. Experimental investigations of structure of solid materials are combined with techniques for characterization of materials. Laboratory exercises emphasize methods used to study structure of solids at the atomic and microstructural levels. Methods focus on optical, x-ray and electron techniques. GE credit: SE, WE. Effective: 2020 Winter Quarter.

EMS 164—Rate Processes in Materials Science (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ENG 045 C- or better or ENG 045Y C- or better); EMS 160 Basic kinetic laws and the principles governing phase transformations. Applications in diffusion, oxidation, nucleation, growth and spinodal transformations. GE credit: QL, SE, SL, VL. Effective: 2018 Winter Quarter.

EMS 164—Kinetics of Materials (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ENG 045 C- or better or ENG 045Y C- or better); EMS 160 Basic kinetic laws and the principles governing phase transformations. Applications in diffusion, oxidation, nucleation, growth and spinodal transformations. GE credit: QL, SE, SL, VL. Effective: 2019 Fall Quarter.

EMS 170—Sustainable Energy Technologies: Batteries, Fuel Cells, and Photovoltaic Cells (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ENG 045 or ENG 045Y Open to students in Engineering or related fields. Basic principles of future energy devices such as lithium batteries, fuel cells, and photovoltaic cells. Examines the current status of these energy technologies and analyze challenges that still must be overcome. GE credit: SE. Effective: 2018 Winter Quarter.

EMS 170L—Sustainable Energy Technologies Laboratory (3)
Discussion—1 hour; Extensive Writing; Laboratory—3 hours. Prerequisite(s): ENG 045; EMS 170 (can be concurrent); EMS 172 (recommended) Fundaments of manufacturing and characterization of energy devices, such as lithium batteries, fuel cells and photovoltaic cells. Discussion on limiting factors in the performance of the devices. GE credit: SE. Effective: 2019 Fall Quarter.

EMS 172—Electronic, Optical and Magnetic Properties of Materials (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): CHE 110A or PHY 009D; ENG 006 or ECM 006 or equivalent recommended. Electronic, optical, and magnetic properties of materials as related to structure and processing of solid state materials. Physical principles for understanding the properties of metals, semiconductors, ceramics, and amorphous solids and the applications of these materials in engineering. GE credit: QL, SE, SL, VL. Effective: 2017 Winter Quarter.

EMS 172—Smart Materials (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): CHE 110A or PHY 009D; ENG 006 or ECH 060 or equivalent recommended. Electronic, optical, and magnetic properties of materials as related to structure and processing of solid state materials. Physical principles for understanding the properties of metals, semiconductors, ceramics, and amorphous solids and the applications of these materials in engineering. GE credit: SE, VL. Effective: 2019 Fall Quarter.

EMS 172L—Electronic, Optical and Magnetic Properties Laboratory (2) Review all entries
Laboratory—3 hours; Lecture/Lab—1 hour. Prerequisite(s): EMS 172 (can be concurrent); Concurrent enrollment recommended. Experimental investigation of electronic, optical and magnetic properties of engineering materials, emphasizing the fundamental relationship between microstructure and properties as well as the influence of rate processes on the evolution of the microstructure and properties. GE credit: QL, SE, SL, VL, WE. Effective: 2017 Winter Quarter.

EMS 172L—Smart Materials Laboratory (3) Review all entries
Discussion—1 hour; Extensive Writing; Laboratory—3 hours. Prerequisite(s): EMS 172 (can be concurrent); Concurrent enrollment in EMS 172 recommended. Experimental investigation of electronic, optical and magnetic properties of engineering materials, emphasizing the fundamental relationship between microstructure and properties as well as the influence of rate processes on the evolution of the microstructure and properties. GE credit: SE, WE. Effective: 2019 Fall Quarter.

EMS 174—Mechanical Behavior of Materials (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ENG 045 C- or better or ENG 045Y C- or better); EMS 162 recommended. Microscopic and macroscopic aspects of the mechanical behavior of engineering materials, with emphasis on recent development in materials characterization by nondestructive testing. Fundamental aspects of
plasticity in engineering materials, strengthening mechanisms and mechanical failure modes of materials systems. GE credit: QL, SE, SL, VL. Effective: 2018 Spring Quarter.

EMS 174L—Mechanical Behavior Laboratory (2) Review all entries
Laboratory—3 hours; Lecture/Lab—1 hour. Prerequisite(s): EMS 174 (can be concurrent); Concurrent enrollment recommended. Experimental investigation of mechanical behavior of engineering materials. Laboratory exercises emphasize the fundamental relationship between microstructure and mechanical properties, and the evolution of the microstructure as a consequence of rate process. Not open for credit to those who have taken EMS 138L; not open for credit to those who have taken both EMS 134L and EMS 138L. GE credit: QL, SE, SL, VL, WE. Effective: 2016 Winter Quarter.

EMS 174L—Mechanical Behavior Laboratory (3) Review all entries
Discussion—1 hour; Extensive Writing; Laboratory—3 hours. Prerequisite(s): EMS 174 (can be concurrent); Concurrent enrollment recommended. Experimental investigation of mechanical behavior of engineering materials. Laboratory exercises emphasize the fundamental relationship between microstructure and mechanical properties, and the evolution of the microstructure as a consequence of rate process. GE credit: SE, WE. Effective: 2020 Winter Quarter.

EMS 180—Materials in Engineering Design (4)
Lecture—3 hours; Lecture/Discussion—1 hour. Prerequisite(s): ENG 045 C- or better or ENG 045Y C- or better Restricted to students with upper division standing. Quantitative treatment of materials selection for engineering applications. Discussion of design and material selection strategy; process and process selection strategy; process economics; life-cycle thinking and eco-design. Use of materials selection software. GE credit: OL, SE, SL, VL, WE. Effective: 2018 Spring Quarter.

EMS 181—Materials Processing (4) Review all entries
Lecture—3 hours; Lecture/Discussion—1 hour. Prerequisite(s): (ENG 045 C- or better or ENG 045Y C- or better); (ENG 105 or ECH 152B or EEC 140A or EMS 164) Principles of phase equilibria, thermodynamics and reaction kinetics applied to materials processing. Effects of processing variables on the structure-property relationship. Fundamentals of the manufacturing processes for electronic, optical, functional and structural materials. GE credit: OL, SE, VL, WE. Effective: 2018 Spring Quarter.

EMS 181—Manufacturing of 3D & Composite Materials (4) Review all entries
Lecture—3 hours; Lecture/Discussion—1 hour. Prerequisite(s): (ENG 045 C- or better or ENG 045Y C- or better); (ENG 105 or ECH 152B or EEC 140A or EMS 164) Fundamental physical and chemical principles underlying various processing techniques, used in manufacturing processes for bulk (3D) and composite structural and functional materials. Effects of processing variables on structure-property relationships. GE credit: SE. Effective: 2020 Winter Quarter.

EMS 182—Failure Analysis (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ENG 045 C- or better or ENG 045Y C- or better; EMS 174 recommended. Analysis of the way materials fail. Effects of temperature, mechanical deformation and corrosion on the properties of materials. forensics and methodologies for investigating failures of materials including optical microscopy, x-ray analysis and scanning electron microscopy. Investigation of practical problems. GE credit: QL, SE, VL, WE. Effective: 2018 Spring Quarter.

EMS 183—Processing of 2D & Nanomaterials (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ENG 045 C- or better or ENG 045Y C- or better); (ENG 105 or ECH 152B or EEC 140A or EMS 164) Fundamentals of processing methods for two-dimensional materials, including thin films and graphene-like materials; as well as nanomaterials, including nanoparticles, nanowires, and quantum dots. GE credit: SE. Effective: 2019 Fall Quarter.

EMS 188A—Materials Design Project (4)
Discussion—1 hour; Laboratory—4 hours. Prerequisite(s): EMS 160; EMS 162; EMS 164; EMS 172; EMS 174 Major materials design experience involving analysis of real materials synthesis/processing/fabrication and technological applications including critical assessments of economic, manufacturing, and ethical constraints. Various principles of materials science are integrated into a culminating team design project. GE credit: OL, SE, SL, VL, WE. Effective: 2017 Winter Quarter.

EMS 188AH—Honors Materials Design (1)
Discussion—1 hour. Prerequisite(s): Enrollment in the Materials Science and Engineering Honors Program. Open only to students in the Materials Science and Engineering Honors Program. Examination of special topics covered
in the materials design course through additional readings, discussions, collaborative work, or special activities which may include projects, laboratory experience or computer simulations. Effective: 2017 Winter Quarter.

**EMS 188B—Materials Design Project (4)**
Discussion—1 hour; Laboratory—4 hours. Prerequisite(s): EMS 188A Major materials design experience involving analysis of real materials synthesis/processing/fabrication and technological applications including critical assessments of economic, manufacturing, and ethical constraints. Various principles of materials science are integrated into a culminating team design project. GE credit: OL, SE, SL, VL, WE. Effective: 2017 Winter Quarter.

**EMS 188BH—Honors Materials Design (1)**
Discussion—1 hour. Prerequisite(s): Enrollment in the Materials Science and Engineering Honors Program. Open only to students in the Materials Science and Engineering Honors Program. Examination of special topics covered in the materials design course through additional readings, discussions, collaborative work, or special activities which may include projects, laboratory experience or computer simulations. Effective: 2017 Winter Quarter.

**EMS 190C—Research Group Conference (1)**
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Upper division standing. Individual and/or group conference on problems, progress and techniques in materials research. May be repeated for credit. May be repeated for credit. (P/NP grading only.) Effective: 2017 Winter Quarter.

**EMS 198—Directed Group Study (1-5)**
Lecture—1-5 hours. Prerequisite(s): Consent of Instructor. Group study of selected topics. (P/NP grading only.) Effective: 2017 Winter Quarter.

**EMS 199—Special Study for Advanced Undergraduates (1-5)**
Variable. Prerequisite(s): Consent of Instructor. Special study for advanced undergraduates. (P/NP grading only.) Effective: 2017 Winter Quarter.

**EMS 200—Preparing for Graduate Student Success (1)**
Seminar—1.5 hours. Restricted to graduate students in Materials Science and Engineering. Introduction to the soft-skills and campus resources needed to succeed in graduate school. Emphasis on the student-mentor relationship and the process of selecting a research mentor. (Same course as ECH 200.) (S/U grading only.) Effective: 2018 Fall Quarter.

**EMS 230—Fundamentals of Electron Microscopy (3)**
Lecture—2 hours; Lecture/Discussion—1 hour. Prerequisite(s): EMS 162 Principles and techniques of scanning and transmission of electron microscopy used in the study of materials will be described. Emphasis upon practical applications. Effective: 2017 Winter Quarter.

**EMS 230L—Laboratory for Electron Microscopy (2)**
Laboratory—6 hours. Prerequisite(s): EMS 230 (can be concurrent); EMS 230 required concurrently. Practical application of techniques of electron scanning and transmission microscopy including x-ray microanalysis. Effective: 2017 Winter Quarter.

**EMS 232—Advanced Topics in Transmission Electron Microscopy (3)**
Discussion—2 hours; Lecture—1 hour. Prerequisite(s): EMS 230 Advanced course in the techniques of electron microscopy including analytical techniques, probe diffraction methods, and high resolution imaging. Effective: 2017 Winter Quarter.

**EMS 232—Advanced Topics in Transmission Electron Microscopy (3)**
Discussion—2 hours; Lecture—1 hour. Prerequisite(s): EMS 230 Advanced course in the techniques of electron microscopy including analytical techniques, probe diffraction methods, and high resolution imaging. Effective: 2018 Fall Quarter.

**EMS 232L—Laboratory for Advanced Transmission Electron Microscopy (2)**
Discussion—1 hour; Laboratory—3 hours. Prerequisite(s): EMS 230L Laboratory in advanced transmission electron microscopy techniques relevant to specific graduate research projects in materials science. Effective: 2017 Winter Quarter.

**EMS 232L—Laboratory for Advanced Transmission Electron Microscopy (2)**
Discussion—1 hour; Laboratory—3 hours. Prerequisite(s): EMS 230L Laboratory in advanced transmission electron microscopy techniques relevant to specific graduate research projects in materials science. Effective: 2018 Fall Quarter.
EMS 241—Principles and Applications of Dislocation Mechanics (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Consent of Instructor. Graduate standing in Engineering. Concepts in dislocation theory are applied to explain plasticity of crystalline solids. Glide and climb of dislocations, strain hardening, recrystallization, theories of creep processes and interaction of dislocation with solute atoms, precipitates and impurity clouds are discussed. Effective: 2017 Winter Quarter.

EMS 241—Principles and Applications of Dislocation Mechanics (4) Review all entries Discontinued
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Consent of Instructor. Graduate standing in Engineering. Concepts in dislocation theory are applied to explain plasticity of crystalline solids. Glide and climb of dislocations, strain hardening, recrystallization, theories of creep processes and interaction of dislocation with solute atoms, precipitates and impurity clouds are discussed. Effective: 2018 Fall Quarter.

EMS 243—Kinetics of Phase Transformation in Engineering Materials (3) Review all entries
Lecture—3 hours. Prerequisite(s): Consent of Instructor. Graduate standing in Engineering; EMS 160 recommended. Theory of alloying, kinetics of phase changes, homogenous and heterogeneous transformation, transformation by shear, order-disorder reactions. Effective: 2017 Winter Quarter.

EMS 243—Kinetics of Phase Transformation in Engineering Materials (3) Review all entries Discontinued
Lecture—3 hours. Prerequisite(s): Consent of Instructor. Graduate standing in Engineering; EMS 160 recommended. Theory of alloying, kinetics of phase changes, homogenous and heterogeneous transformation, transformation by shear, order-disorder reactions. Effective: 2018 Fall Quarter.

EMS 244—Interaction of Materials and their Environment (3)
Lecture—3 hours. Prerequisite(s): (ENG 045 or ENG 045Y); ENG 105A recommended; or consent of instructor. Thermodynamic and kinetic foundations of the corrosion and oxidation processes. Practical aspects of corrosion control and prevention. Stress-corrosion and gas-embrittlement phenomena. Special topics in corrosion; microbiological and atmospheric corrosion. Effective: 2017 Winter Quarter.

EMS 245—Micro- and Nano-Technology in Life Sciences (4) Review all entries
Lecture/Discussion—4 hours. Prerequisite(s): Graduate standing or consent of instructor. Survey of biomedical device design from the engineering and biological perspectives; micro-/nano-fabrication and characterization techniques; surface chemistry and mass transfer; essential biological processes and models; proposal development skills to merge aforementioned themes in a multidisciplinary project. (Same course as EEC 245 and ECH 245.) Effective: 2017 Winter Quarter.

EMS 245—Micro- and Nano-Technology in Life Sciences (4) Review all entries
Lecture/Discussion—4 hours. Prerequisite(s): Graduate standing or consent of instructor. Survey of biodevice design from engineering and biological perspectives; micro-/nano-fabrication techniques; surface science and mass transport; essential biological processes and models; proposal development skills on merging aforementioned themes. (Same course as EEC 245, ECH 245, and MAE 245.) Effective: 2019 Winter Quarter.

EMS 246—Photovoltactics and Solar Cells (3)
Lecture—3 hours. Prerequisite(s): EEC 140B; or Consent of Instructor. Or equivalent. Physics and application of photovoltaics and solar cells, including design, fabrication technology, and grid incorporation. Mono and microcrystalline silicon devices; thin-film technologies, heterojunction and organic-semiconductor technologies. Collectors, electrical inverters and infrastructure issues. Challenges and concerns. (Same course as EEC 248.) Effective: 2017 Winter Quarter.

EMS 248—Fracture of Engineering Materials (3)
Lecture—3 hours. Prerequisite(s): EMS 174 Description of the failure of materials by crack propagation. Topics include the stress fields about elastic cracks, the Griffith-Irwin analysis, descriptions of plastic zones, fracture toughness testing, microstructural aspects of fracture and failure at elevated temperatures. Effective: 2017 Winter Quarter.

EMS 249—Mechanisms of Fatigue (3)
Lecture—3 hours. Prerequisite(s): EMS 174; or Consent of Instructor. EMS 248 recommended. Microstructural description of the mechanisms of fatigue in metals. Topics include a phenomenological treatment of cyclic deformation, dislocation processes in cyclic deformation, fatigue crack nucleation, Stage I growth, threshold effects and high temperature cyclic deformation. Effective: 2017 Winter Quarter.

EMS 250A—Special Topics in Polymer and Fiber Science (3)
Lecture—3 hours. Prerequisite(s): EMS 147; or Consent of Instructor. Selected topics of current interest in polymer
and fiber sciences. Topics will vary each time the course is offered. (Same course as FPS 250A.) Effective: 2017 Winter Quarter.

EMS 250B—Special Topics in Polymer and Fiber Science (3)
Lecture—3 hours. Prerequisite(s): EMS 147; or Consent of Instructor. Selected topics of current interest in polymer and fiber sciences. Topics will vary each time the course is offered. (Same course as FPS 250B.) Effective: 2017 Winter Quarter.

EMS 250C—Special Topics in Polymer and Fiber Science (3) Review all entries
Lecture—3 hours. Prerequisite(s): EMS 147; or Consent of Instructor. Selected topics of current interest in polymer and fiber sciences. Topics will vary each time the course is offered. (Same course as FPS 250C.) Effective: 2017 Winter Quarter.

EMS 250C—Special Topics in Polymer and Fiber Science (3) Review all entries Discontinued
Lecture—3 hours. Prerequisite(s): EMS 147; or Consent of Instructor. Selected topics of current interest in polymer and fiber sciences. Topics will vary each time the course is offered. (Same course as FPS 250C.) Effective: 2019 Fall Quarter.

EMS 250D—Special Topics in Polymer and Fiber Science (3) Review all entries
Lecture—3 hours. Prerequisite(s): EMS 147; or Consent of Instructor. Selected topics of current interest in polymer and fiber sciences. Topics will vary each time the course is offered. (Same course as FPS 250D.) Effective: 2017 Winter Quarter.

EMS 250D—Special Topics in Polymer and Fiber Science (3) Review all entries Discontinued
Lecture—3 hours. Prerequisite(s): EMS 147; or Consent of Instructor. Selected topics of current interest in polymer and fiber sciences. Topics will vary each time the course is offered. (Same course as FPS 250D.) Effective: 2019 Fall Quarter.

EMS 250E—Special Topics in Polymer and Fiber Science (3)
Lecture—3 hours. Prerequisite(s): EMS 147; or Consent of Instructor. Selected topics of current interest in polymer and fiber sciences. Topics will vary each time the course is offered. (Same course as FPS 250E.) Effective: 2017 Winter Quarter.

EMS 250F—Special Topics in Polymer and Fiber Science (3) Review all entries
Lecture—3 hours. Prerequisite(s): EMS 147; or Consent of Instructor. Selected topics of current interest in polymer and fiber sciences. Topics will vary each time the course is offered. (Same course as FPS 250F.) Effective: 2017 Winter Quarter.

EMS 250F—Special Topics in Polymer and Fiber Science (3) Review all entries Discontinued
Lecture—3 hours. Prerequisite(s): EMS 147; or Consent of Instructor. Selected topics of current interest in polymer and fiber sciences. Topics will vary each time the course is offered. (Same course as FPS 250F.) Effective: 2019 Fall Quarter.

EMS 251—Applications of Solid State Nuclear Magnetic Resonance Spectroscopy (3) Review all entries
Lecture—3 hours. Prerequisite(s): Graduate standing in chemistry, physics or engineering, or consent of instructor. Fundamentals of solid state NMR spectroscopy and principles of advanced NMR techniques for analyzing structure of solid materials. Effective: 2017 Winter Quarter.

EMS 251—Applications of Solid State Nuclear Magnetic Resonance Spectroscopy (3) Review all entries Discontinued
Lecture—3 hours. Prerequisite(s): Graduate standing in chemistry, physics or engineering, or consent of instructor. Fundamentals of solid state NMR spectroscopy and principles of advanced NMR techniques for analyzing structure of solid materials. Effective: 2018 Fall Quarter.

EMS 260—Advanced Thermodynamics of Solids (4) Review all entries
Lecture/Discussion—4 hours. Prerequisite(s): EMS 160 Thermodynamic principles, formalism and their application to solid materials. Specific examples from ceramic and solid state systems. Use of thermodynamic approach in developing understanding of and constraints for processes in real systems. Effective: 2017 Winter Quarter.

EMS 260—Advanced Thermodynamics of Solids (4) Review all entries
Lecture/Discussion—4 hours. Prerequisite(s): EMS 160 Thermodynamic principles, formalism and their application to solid materials. Statistical mechanics and the relations between microscopic and macroscopic properties. Prediction of phase diagrams and phase stability, particularly for solids. Effective: 2019 Fall Quarter.
EMS 262—Advanced Topics in Structure of Materials (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EMS 162; EMS 174 recommended; graduate standing in Engineering or consent of instructor. Nature of microstructure in engineering materials. Crystalline and non-crystalline structures, with special emphasis on grain boundary segregation in the development of polycrystalline microstructure and the radial distribution function of amorphous materials. Not open for credit to students who previously completed (cancelled) EMS 245. Effective: 2017 Winter Quarter.

EMS 264—Transport Phenomena in Materials Processes (4)
Lecture/Discussion—4 hours. Prerequisite(s): Graduate standing in Engineering. Thermodynamic driving forces and atomic-scale mechanisms underlying diffusive mass transport and interface motion in materials. Nucleation, growth and coarsening dynamics of phase transformations. Not open for credit to students who previously completed EMS 240. Effective: 2017 Winter Quarter.

EMS 268—Advanced Materials Characterization (4)
Lecture/Discussion—4 hours. Open to graduate students in Chemistry, Physics, and Engineering. Fundamental working principles for characterization methods used in structural and compositional analysis of engineering materials. Topics include x-ray, electron, ion, and neutron interactions with materials and techniques include diffraction, spectroscopy, and imaging methods. Effective: 2019 Spring Quarter.

EMS 272—Advanced Functional Properties of Materials (4)
Lecture/Discussion—4 hours. Prerequisite(s): Graduate standing in Physics, Chemistry, and Engineering. Fundamental physical properties of solid materials important to solid state devices, specifically electronic, magnetic, and optical properties. Topics include band structures, metals, superconductors, semiconductors, dielectrics, optical properties, and magnetic properties and implementation of these properties into devices. Effective: 2017 Winter Quarter.

EMS 274—Advanced Mechanical Properties of Materials (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EMS 174 Comprehensive study of mechanical properties of materials, with special attention to dislocations and deformation and fracture control mechanisms. Mechanical properties of conventional engineering materials as well as advanced materials such as nanocrystalline solids and thin films are considered. Effective: 2017 Winter Quarter.

EMS 280A—Graduate Capstone Project (4)
Discussion—1 hour; Laboratory—4 hours. Prerequisite(s): Graduate standing in an engineering discipline. Advanced materials design experience involving analysis of engineering applications of materials, including synthesis, processing, and fabrication. Additional consideration of critical assessments of economics, manufacturing, and ethical constraints. Fundamental principles of materials science are integrated into a culminating capstone project. Effective: 2019 Fall Quarter.

EMS 280B—Graduate Capstone Project (4)
Discussion—1 hour; Laboratory—4 hours. Prerequisite(s): EMS 280A Advanced materials design experience involving analysis of engineering applications of materials, including synthesis, processing and fabrication. Additional consideration of critical assessments of economics, manufacturing, and ethical constraints. Fundamental principles of materials science are integrated into a culminating capstone project. Effective: 2019 Fall Quarter.

EMS 282—Glass: Science and Technology (3)
Extensive Writing—1 hour; Lecture—2 hours. Prerequisite(s): Graduate standing in Chemistry, Physics or Engineering, or consent of instructor. Modern paradigms in glass science and their applications to technologies. Relation of macroscopic properties of glasses and glass-forming liquids to atomic-level structures, including principles of formation, relaxation, transport phenomena, nucleation, crystallization and phase separation in glasses. Effective: 2017 Winter Quarter.

EMS 288—Living Matter: Physical Biology of the Cell (3)
Lecture—3 hours. Open to any student possessing general background in any disciplines of physical or biological sciences and engineering. Introduction to the origin, maintenance, and regulation of the dynamic architecture of the cell, including cellular modes of organization, dynamics and energy dissipation, molecular transport, motility, regulation, and adaptability. (Same course as BIM 288 and BPH 288.) Effective: 2016 Fall Quarter.

EMS 289A—Special Topics in Materials Science; Electronic Materials (1-5) Review all entries
Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Electronic Materials. May be repeated for credit when topic differs. Effective: 2017 Winter Quarter.
EMS 289A—Special Topics in Materials Science (1-5) **Review all entries**
Lecture/Discussion—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in the discipline of Materials Science & Engineering. Topics will vary by instructor. May be repeated for credit When topic differs. Effective: 2019 Fall Quarter.

EMS 289B—Special Topics in Materials Science; Ceramics and Minerals (1-5) **Review all entries**
Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Ceramics and Minerals. May be repeated for credit when topic differs. Effective: 2017 Winter Quarter.

EMS 289B—Special Topics in Materials Science; Ceramics and Minerals (1-5) **Review all entries Discontinued**
Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Ceramics and Minerals. May be repeated for credit when topic differs. Effective: 2019 Fall Quarter.

EMS 289C—Special Topics in Materials Science; Physics and Chemistry of Materials (1-5) **Review all entries**
Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Physics and Chemistry of Materials. May be repeated for credit when topic differs. Effective: 2017 Winter Quarter.

EMS 289C—Special Topics in Materials Science; Physics and Chemistry of Materials (1-5) **Review all entries Discontinued**
Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Physics and Chemistry of Materials. May be repeated for credit when topic differs. Effective: 2019 Fall Quarter.

EMS 289D—Special Topics in Materials Science; Materials Processing (1-5) **Review all entries**
Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Materials Processing. May be repeated for credit when topic differs. Effective: 2017 Winter Quarter.

EMS 289D—Special Topics in Materials Science; Materials Processing (1-5) **Review all entries Discontinued**
Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Materials Processing. May be repeated for credit when topic differs. Effective: 2019 Fall Quarter.

EMS 289E—Special Topics in Materials Science; Materials Science and Forensics (1-5) **Review all entries**
Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Materials Science and Forensics. May be repeated for credit when topic differs. Effective: 2017 Winter Quarter.

EMS 289E—Special Topics in Materials Science; Materials Science and Forensics (1-5) **Review all entries Discontinued**
Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Materials Science and Forensics. May be repeated for credit when topic differs. Effective: 2019 Fall Quarter.

EMS 289F—Special Topics in Materials Science; Biomaterials (1-5) **Review all entries**
Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Biomaterials. May be repeated for credit when topic differs. Effective: 2017 Winter Quarter.

EMS 289F—Special Topics in Materials Science; Biomaterials (1-5) **Review all entries Discontinued**
Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Biomaterials. May be repeated for credit when topic differs. Effective: 2019 Fall Quarter.

EMS 289G—Special Topics in Materials Science; Surface Chemistry of Metal Oxides (1-5) **Review all entries**
Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Surface Chemistry of Metal Oxides. May be repeated for credit when topic differs. Effective: 2017 Winter Quarter.

EMS 289G—Special Topics in Materials Science; Surface Chemistry of Metal Oxides (1-5) **Review all entries Discontinued**
Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Surface Chemistry of Metal Oxides. May be repeated for credit when topic differs. Effective: 2019 Fall Quarter.

EMS 290—Materials Science and Engineering Seminar (1)
Seminar—1 hour. Prerequisite(s): Graduate standing or consent of instructor. Selected topics of current interest in Materials Science and Engineering. The subjects covered will vary from year to year and will be announced at the beginning of each quarter. May be repeated for credit. (S/U grading only.) Effective: 2017 Fall Quarter.

EMS 290C—Graduate Research Conference (1)
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Individual and/or group conference on problems, progress, and techniques in materials science and engineering research. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 2017 Winter Quarter.
EMS 292—Materials Science & Engineering Internship (1-12)
Internship. Prerequisite(s): Consent of Instructor. Graduate level standing. Work or lab experience in industry or off-campus lab focusing on Materials Science & Engineering applications at the graduate level. May be repeated up to 1 time(s). (S/U grading only.) Effective: 2019 Fall Quarter.

EMS 294—Materials Science Seminar (1)
Seminar—1 hour. Current literature and developments in materials science with presentations by individual students. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 2017 Winter Quarter.

EMS 298—Group Study (1-5)

EMS 299—Research (1-12)
Variable. Prerequisite(s): Consent of Instructor. Research. (S/U grading only.) Effective: 2017 Winter Quarter.

EMS 390—The Teaching of Materials Science (1)
Discussion—1 hour. Prerequisite(s): Meet qualifications for teaching assistant and/or associate-in in materials science and engineering. Participation as a teaching assistant or associate-in in a designated engineering course. Methods of leading discussion groups or laboratory sections, writing and grading quizzes, use of laboratory equipment, and grading laboratory reports. May be repeated for credit. (S/U grading only.) Effective: 2017 Winter Quarter.

Maternal & Child Nutrition; Nutrition

Maternal & Child Nutrition; Nutrition | Maternal & Child Nutrition M.A.S.

(Department of Nutrition)
Francene M. Steinberg, Ph.D., Chairperson of the Department

Department Office. 3135 Meyer Hall; 530-752-4630; https://extension.ucdavis.edu/maternal-and-child-nutrition
Faculty. https://extension.ucdavis.edu/maternal-and-child-nutrition

Graduate Study. The Nutrition Department offers the degree of M.A.S. in Maternal and Child Nutrition. This program consists of three required six-unit core courses (Nutrition During Pregnancy, Lactation and Infant Nutrition, and Child and Adolescent Nutrition), six to eight units of special topics seminars, two units of electives, and a six-unit student project (produced in consultation with a three-member guidance committee) for a total of 36 units. Each of the core courses will comprise 10 weeks of in-class instruction twice per week for two-and-a-half hours per meeting. Classes will also include online discussion of related material and readings.

Each student will be assigned a three-member guidance committee consisting of two members of the teaching faculty and an additional qualified faculty member to advise the student in identifying a student project.

Preparation. Admission to the program requires a bachelor's degree with prior course work that includes (or is comparable to): one year of general chemistry, two quarters of organic chemistry, a course in statistics, one course in general physiology, and two quarters of the biochemistry of nutrition.

Courses in Maternal and Child Nutrition. See courses under Nutrition.

Graduate Advisors. Reina Engle-Stone, Ph.D., Asst. Professor (Nutrition), Jane Heinig, Ph.D., Academic Administrator (Nutrition)

Mathematical Analytics & Operations Research; Mathematics

Mathematical Analytics & Operations Research; Mathematics | Mathematical Analytics & Operations Research B.S.

(College of Letters and Science)
The Major Programs

Mathematics is the study of abstract structures, space, change, and the interrelations of these concepts. It also is the language of the exact sciences.

The Program. Students majoring in mathematics may follow a program leading to either the Bachelor of Arts or the Bachelor of Science degree. After completing basic introductory courses such as calculus and linear algebra, students plan an upper division program in consultation with a faculty advisor. Upper division courses include real analysis, probability, modern algebra, as well as a variety of other courses that allow students to further mathematical knowledge and skills that feature their research or career interests. This individualized program can lead to graduate study in pure or applied mathematics, elementary or secondary level teaching, or to other professional goals. It can also reflect a special interest such as computational and applied mathematics, computer science, or statistics, or may be combined with a major in some other field.

Career Alternatives. A degree in mathematics provides entry to many careers in industry in addition to teaching. For instance, operations research, data analysis, systems analysis, computing, actuarial work, insurance, and financial services are only a few such careers. Mathematics is also a sound basis for graduate work in a variety of fields, such as law, engineering, and economics.

Recommended Language Preparation. Bachelor of Science degree candidates are advised, but not required, to satisfy the same language requirement as that for a Bachelor of Arts degree candidate, and to fulfill it in French, German, or Russian.

Major Advisors. For a current list of faculty and staff advisors, see https://www.math.ucdavis.edu/undergrad/advising/advisers/ or contact the Student Services office at studentservices@math.ucdavis.edu.

Depth Subject Matter Requirements. The upper division course offering is grouped into core and enrichment courses. The core classes are intended to provide basic mathematical techniques, whereas the enrichment choices allow students to further mathematical knowledge and skills that feature their research or career interests. Certain mathematically oriented courses given by other departments are admissible in partial satisfaction of the depth subject matter requirements with prior departmental approval. Before graduating, students also complete a mathematics capstone, which can be satisfied by completing an undergraduate thesis, an approved internship, or one of the approved capstone courses.

Statement of Objectives. As early as possible, but no later than the last quarter of the sophomore year or no later than the beginning of the first quarter of the junior year for transfer students, each prospective mathematics major, in consultation with an advisor, should file a formal program of study in one of the majors offered in mathematics. Forms to be used for this are available on OASIS (students.ucdavis.edu), our website or from the Department office. Failure to file a formal program could lead to a delay in graduation.

Information for Undergraduates. Assistance in planning an undergraduate major program in mathematics is available on our website, as well as by consulting an advisor. Information about the Department's advisors can be found on our website: https://www.math.ucdavis.edu/undergrad/advising/advisers/.

Mathematics Placement Requirement. Students who wish to enroll in MAT 012, 016A, 017A, 021A, 021AH, and 021M must satisfy the mathematics placement requirement by taking an online exam. Students who do not satisfy the requirement will be administratively dropped from these courses. For more information, including preparation tips and how to access the online exam, please see the Department of Mathematics' website, at http://www.math.ucdavis.edu/undergrad/math_placement, well in advance of enrolling.

Department Honors. Students who have completed at least 135 units with a minimum GPA of 3.500 in courses counted towards their major will be considered for Department Honors.

Students who meet the minimum GPA requirement for honors at graduation for the College of Letters and Science and who complete a senior project as part of MAT 194 or 199 units in consultation with their faculty adviser may also
be recommended by the department for graduation with High Honors or Highest Honors. Recommendations will be based on evaluations of students’ academic achievements in their major and the quality of their senior project. For complete details, see our website at https://www.math.ucdavis.edu/undergrad/honors/.

Teaching Credential Subject Representative. Dr. Ali Dad-del

Graduate Study. The Department offers programs of study and research leading to the M.A. and Ph.D. degrees in Mathematics. Information regarding graduate study may be obtained by consulting our website, and by sending an email to studentservices@math.ucdavis.edu.

Mathematical Analytics & Operations Research; Mathematics | MAT Courses

Note: Mathematics 016A, 016B, and 016C are intended for students who will take no more Mathematics courses.
Mathematics 017A, 017B, and 017C have the same level of rigor as 016A, 016B, and 016C, yet are much more broad mathematically (containing algebra, differential equations and probability, besides traditional calculus), and are intended for biology.

Courses in MAT:

MAT 000B—Elementary Algebra (no credit) (0)
Lecture—3 hours. Not open to Concurrent student enrollment. Basic concepts of algebra, including polynomials, factoring, equations, graphs, and inequalities. Offered only if sufficient number of students enroll. (P/NP grading only.) Effective: 1997 Winter Quarter.

MAT 000C—Trigonometry (no credit) (0)
Lecture—2 hours. Not open to Concurrent student enrollment. Basic concepts of trigonometry, including trigonometric functions, identities, inverse functions, and applications. Offered only if sufficient number of students enroll. (P/NP grading only.) Effective: 1997 Winter Quarter.

MAT 000D—Intermediate Algebra (no credit) (0)
Lecture—3 hours. Not open to Concurrent student enrollment. Basic concepts of algebra, prepares student for college work in mathematics, such as course 16A or 21A. Functions, equations, graphs, logarithms, and systems of equations. Offered only if sufficient number of students enroll. (P/NP grading only.) Effective: 1997 Winter Quarter.

MAT 012—Precalculus (3)
Lecture—3 hours. Prerequisite(s): Two years of high school algebra, plane geometry, plane trigonometry; and obtaining required score on the Precalculus Diagnostic Examination. Topics selected for their use in calculus, including functions and their graphs, slope, zeroes of polynomials, exponential, logarithmic and trigonometric functions, sketching surfaces and solids. Not open for credit to students who have completed any of courses MAT 016A, MAT 016B, MAT 016C, MAT 017A, MAT 017B, MAT 017C, MAT 021A, MAT 021B, or MAT 021C with a C- or better. GE credit: QL, SE, SL. Effective: 2012 Winter Quarter.

MAT 016A—Short Calculus (3)
Lecture—3 hours. Prerequisite(s): Two years of high school algebra, plane geometry, plane trigonometry, and satisfying the Mathematics Placement Requirement. Limits; differentiation of algebraic functions; analytic geometry; applications, in particular to maxima and minima problems. Not open for credit to students who have completed
MAT 017B, MAT 017C, MAT 021A, MAT 021B, or MAT 021C; only 2 units of credit to students who have completed MAT 17A. GE credit: QL, SE, SL. Effective: 2012 Winter Quarter.

MAT 016B—Short Calculus (3)
Lecture—3 hours. Prerequisite(s): MAT 016A C- or better or MAT 017A C- or better or MAT 021A C- or better or MAT 021AH C- or better Integration; calculus for trigonometric, exponential, and logarithmic functions; applications. Not open for credit to students who have completed MAT 017C, MAT 021B, or MAT 021C; only 2 units of credit to students who have completed MAT 017B. GE credit: QL, SE, SL. Effective: 2017 Winter Quarter.

MAT 016C—Short Calculus (3)
Lecture—3 hours. Prerequisite(s): MAT 016B C- or better or MAT 017B C- or better or MAT 021B C- or better or MAT 021BH C- or better Differential equations; partial derivatives; double integrals; applications; series. Not open for credit to students who have completed MAT 021C; only 2 units of credit to students who have completed MAT 017C. GE credit: QL, SE, SL. Effective: 2017 Winter Quarter.

MAT 017A—Calculus for Biology and Medicine (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Two years of high school algebra, plane geometry, plane trigonometry, and analytical geometry, and satisfying the Mathematics Placement Requirement. Introduction to differential calculus via applications in biology and medicine. Limits, derivatives of polynomials, trigonometric, and exponential functions, graphing, applications of the derivative to biology and medicine. Not open for credit to students who have completed MAT 016B, MAT 016C, MAT 021A, MAT 021B, or MAT 021C; only 2 units of credit to students who have completed MAT 016A. GE credit: QL, SE, SL. Effective: 2014 Fall Quarter.

MAT 017B—Calculus for Biology and Medicine (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MAT 016A C- or better or MAT 017A C- or better or MAT 021A C- or better or MAT 021AH C- or better Introduction to integral calculus and elementary differential equations via applications to biology and medicine. Fundamental theorem of calculus, techniques of integration including integral tables and numerical methods, improper integrals, elementary first order differential equations, applications in biology and medicine. Not open for credit to students who have completed MAT 016B, MAT 016C, MAT 021A, MAT 021B, or MAT 021C; only 2 units of credit for students who have completed MAT 016A. GE credit: QL, SE, SL. Effective: 2017 Winter Quarter.

MAT 017C—Calculus for Biology and Medicine (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MAT 017B C- or better Matrix algebra, functions of several variables, partial derivatives, systems of differential equations, and applications to biology and medicine. Not open for credit to students who have completed MAT 21C; only 2 units of credit to students who have completed MAT 16C. GE credit: SE, SL. Effective: 2016 Fall Quarter.

MAT 021A—Calculus (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Two years of high school algebra, plane geometry, plane trigonometry, and analytical geometry, and satisfying the Mathematics Placement Requirement. Functions, limits, continuity. Slope and derivative. Differentiation of algebraic and transcendental functions. Applications to motion, natural growth, graphing, extrema of a function. Differentials. L'Hopital's rule. Not open for credit to students who have completed MAT 016B, MAT 016C, MAT 017B, or MAT 017C; only 2 units of credit to students who have completed MAT 016A or MAT 017A. GE credit: QL, SE, SL. Effective: 2012 Winter Quarter.

MAT 021AH—Honors Calculus (4)
Lecture/Discussion—4 hours. Prerequisite(s): A Precalculus Diagnostic Examination score significantly higher than the minimum for MAT 021A is required. More intensive treatment of material covered in course 21A. GE credit: QL, SE. Effective: 1997 Winter Quarter.

MAT 021AL—Emerging Scholars Program Calculus Workshop (2)
Workshop—6 hours. Prerequisite(s): MAT 021A (can be concurrent); MAT 021A required concurrently. Functions, limits, continuity. Slope and derivative. Same course content as course 21A. Enrollment for students in the Emerging Scholars Program by instructor's invitation only. (P/NP grading only.) GE credit: SE. Effective: 2006 Fall Quarter.

MAT 021B—Calculus (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (MAT 021A C- or better or MAT 021AH C- or better) or MAT 017A B or better Continuation of course 21A. Definition of definite integral, fundamental theorem of calculus, techniques of integration. Application to area, volume, arc length, average of a function, improper integral, surface of revolution. Only 2 units of credit to students who have completed MAT 016B, MAT 016C, MAT 017B, or MAT 017C. GE credit: QL, SE. Effective: 2017 Winter Quarter.
MAT 021BH—Honors Calculus (4)
Lecture/Discussion—4 hours. Prerequisite(s): MAT 021A B or better or MAT 021AH B or better. More intensive treatment of material covered in course 21B. Students completing 21BH can continue with course 21CH or the regular 21C. GE credit: SE. Effective: 1997 Winter Quarter.

MAT 021BL—Emerging Scholars Program Calculus Workshop (2)
Workshop—6 hours. Prerequisite(s): MAT 021B (can be concurrent); Concurrent enrollment in MAT 021B. Continuation of course 21A. Same course content as 21B. Enrollment for students in the Emerging Scholars Program by instructor’s invitation only. (P/NP grading only.) GE credit: SE. Effective: 2016 Fall Quarter.

MAT 021C—Calculus (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MAT 016C C- or better or MAT 017C C- or better or MAT 021B C- or better or MAT 021BH C- or better or MAT 017B B or better; Continuation of course 21B. Sequences, series, tests for convergence, Taylor expansions. Vector algebra, vector calculus, scalar and vector fields. Partial derivatives, total differentials. Applications to maximum and minimum problems in two or more variables. Applications to physical systems. GE credit: QL, SE. Effective: 2017 Winter Quarter.

MAT 021CH—Honors Calculus (4)
Lecture/Discussion—4 hours. Prerequisite(s): MAT 021B B or better or MAT 021BH B or better. More intensive treatment of material covered in course 21C. GE credit: SE. Effective: 1997 Winter Quarter.

MAT 021CL—Emerging Scholars Program Calculus Workshop (2)
Workshop—6 hours. Prerequisite(s): MAT 021C (can be concurrent); Concurrent enrollment in MAT 021C. Continuation of course 21B. Same course content as course 21C. Enrollment for students in the Emerging Scholars Program by instructor’s invitation only. (P/NP grading only.) GE credit: SE. Effective: 2016 Fall Quarter.

MAT 021D—Vector Analysis (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MAT 021C C- or better or MAT 021CH C- or better or MAT 017C B or better or MAT 021BH C- or better; Continuation of course 21C. Definite integrals over plane and solid regions in various coordinate systems. Line and surface integrals. Green’s theorem, Stoke’s theorem, divergence theorem. GE credit: QL, SE. Effective: 2017 Winter Quarter.

MAT 021M—Accelerated Calculus (5)
Discussion/Laboratory—1 hour; Lecture/Discussion—4 hours. Prerequisite(s): Grade of B or higher in both semesters of high school calculus or a score of 4 or higher on the Advanced Placement Calculus AB exam, and obtaining the required score on the Precalculus Diagnostic Examination and its trigonometric component. Accelerated treatment of material from courses 21A and 21B, with detailed presentation of theory, definitions, and proofs, and treatment of computational aspects of calculus at a condensed but sophisticated level. Not open for credit to students who have completed MAT 021A or MAT 021B. GE credit: QL, SE. Effective: 1997 Winter Quarter.

MAT 022A—Linear Algebra (3) **Review all entries**
Lecture—3 hours. Prerequisite(s): MAT 016C C- or better or MAT 017C C- or better or MAT 021C C- or better or MAT 021CH C- or better; (ENG 006 or EME 005 or MAT 022AL (can be concurrent)) Matrices and linear transformations, determinants, eigenvalues, eigenvectors, diagonalization, factorization. Not open for credit to students who have completed course 67. GE credit: QL, SE. Effective: 2017 Winter Quarter.

MAT 022A—Linear Algebra (3) **Review all entries**
Lecture—3 hours. Prerequisite(s): MAT 016C C- or better or MAT 017C C- or better or MAT 021C C- or better or MAT 021CH C- or better; (ENG 006 or EME 005 or ECH 060 or MAT 022AL (can be concurrent)) Matrices and linear transformations, determinants, eigenvalues, eigenvectors, diagonalization, factorization. Not open for credit to students who have completed course 67. GE credit: QL, SE. Effective: 2018 Summer Session 1.

MAT 022AL—Linear Algebra Computer Laboratory (1)
Laboratory—3 hours. Prerequisite(s): MAT 016C or MAT 017C or MAT 021C or MAT 021CH Introduction to Matlab and its use in linear algebra. (P/NP grading only.) GE credit: QL, SE. Effective: 2017 Winter Quarter.

MAT 022B—Differential Equations (3)
Lecture—3 hours. Prerequisite(s): MAT 022A C- or better or MAT 067 C- or better; Solutions of elementary differential equations. GE credit: QL, SE. Effective: 2016 Fall Quarter.

MAT 025—Advanced Calculus (4)
Lecture/Discussion—4 hours. Prerequisite(s): MAT 021C C- or better or MAT 021CH C- or better; Introduction to the rigorous treatment of abstract mathematical analysis. Proofs in mathematics, induction, sets, cardinality; real
number system, theory of convergence of sequences. Not open for credit to students who have completed former
MAT 127A. GE credit: SE. Effective: 2017 Spring Quarter.

**MAT 027A—Linear Algebra with Applications to Biology (4)**
Laboratory—2 hours; Lecture—3 hours. Prerequisite(s): MAT 017C C- or better or MAT 021C C- or better or MAT 021CH C- or better. Introduction to linear algebra with biological, medical, and bioengineering applications. Matrix algebra, vector spaces, orthogonality, determinants, eigenvalues, eigenvectors, principal component analysis, singular value decomposition, and linear transformations. Computer labs cover mathematical and computational techniques for modeling biological systems. Only one unit of credit for students who have completed MAT 022A. (Same course as BIS 027A.) GE credit: SE. Effective: 2019 Winter Quarter.

**MAT 027B—Differential Equations with Applications to Biology (4)**
Laboratory—2 hours; Lecture—3 hours. Prerequisite(s): MAT 027A C- or better or (MAT 022A C- or better, (MAT 022AL C- or better or ENG 006 C- or better or EME 005 C- or better)). Solutions of differential equations with biological, medical, and bioengineering applications. First and second order linear equations, phase plane analysis, nonlinear dynamics, Laplace transforms, and the diffusion equation. Computer labs cover mathematical and numerical techniques for modeling biological systems. Only one unit of credit for students who have completed MAT 022B. (Same course as Cross-listed with BIS 027B.) GE credit: SE. Effective: 2019 Spring Quarter.

**MAT 036—Fundamentals of Mathematics (3)**
Lecture—3 hours. Prerequisite(s): Satisfaction of the Mathematics Placement Requirement. Introduction to fundamental mathematical ideas selected from the principal areas of modern mathematics. Properties of the primes, the fundamental theorems of arithmetic, properties of the rationals and irrationals, binary and other number systems. Not open for credit to students who have taken MAT 108. Effective: 2001 Winter Quarter.

**MAT 067—Modern Linear Algebra (4)**
Lecture/Discussion—4 hours. Prerequisite(s): MAT 021C C- or better or MAT 021CH C- or better. Rigorous treatment of linear algebra; topics include vector spaces, bases and dimensions, orthogonal projections, eigenvalues and eigenvectors, similarity transformations, singular value decomposition and positive definiteness. Only one unit of credit to students who have completed MAT 022A. GE credit: SE. Effective: 2017 Winter Quarter.

**MAT 071A—Explorations in Elementary Mathematics (3)**
Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): Two years of high school mathematics. Weekly explorations of mathematical ideas related to the elementary school curriculum will be carried out by cooperative learning groups. Lectures will provide background and synthesize the results of group exploration. Effective: 1997 Winter Quarter.

**MAT 071B—Explorations in Elementary Mathematics (3)**
Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): Two years of high school mathematics. Weekly explorations of mathematical ideas related to the elementary school curriculum will be carried out by cooperative learning groups. Lectures will provide background and synthesize the results of group exploration. Effective: 1997 Winter Quarter.

**MAT 089—Elementary Problem Solving (1)**
Lecture—1 hour. Prerequisite(s): High school mathematics through precalculus. Solve and present solutions to challenging and interesting problems in elementary mathematics. May be repeated up to 1 time(s). (P/NP grading only.) Effective: 2001 Winter Quarter.

**MAT 098—Directed Group Study (1-5)**
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

**MAT 099—Special Study for Undergraduates (1-5)**
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

**MAT 107—Probability and Stochastic Processes with Applications to Biology (4)**
Laboratory—2 hours; Lecture—3 hours. Prerequisite(s): (MAT 027A C- or better or BIS 027A C- or better) or (MAT 022A C- or better, (MAT 022AL C- or better or ENG 006 C- or better or EME 005 C- or better)). Introduction to probability theory and stochastic processes with biological, medical, and bioengineering applications. Combinatorics, discrete and continuous random variables, Bayes' formula, conditional probability, Markov chains, Poisson processes, and Brownian motion. Computer labs cover mathematical and computational modeling techniques. Only 2 units of credit for students who have completed MAT 135A or STA 131A. (Same course as BIS 107) GE credit: SE. Effective: 2019 Spring Quarter.
MAT 108—Introduction to Abstract Mathematics (4)
Lecture/Discussion—4 hours. Prerequisite(s): MAT 021B A rigorous treatment of mathematical concepts with emphasis on developing the ability to understand abstract mathematical ideas, to read and write mathematical concepts, and to prove theorems. Designed to serve as preparation for the more rigorous upper division courses. GE credit: SE. Effective: 2008 Spring Quarter.

MAT 111—History of Mathematics (4) Review all entries
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 025 or MAT 067 or MAT 108 or MAT 114 or MAT 115A or MAT 141 or MAT 145; One of the courses mentioned; eight units of upper division Mathematics. History of mathematics from ancient times through the development of calculus. Mathematics from Arab, Hindu, Chinese and other cultures. Selected topics from the history of modern mathematics. GE credit: SE. Effective: 2010 Fall Quarter.

MAT 111—History of Mathematics (4) Review all entries
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 025 or MAT 127A or MAT 067 or MAT 108 or MAT 114 or MAT 115A or MAT 141 or MAT 145; Eight units of upper division Mathematics. History of mathematics from ancient times through the development of calculus. Mathematics from Arab, Hindu, Chinese and other cultures. Selected topics from the history of modern mathematics. GE credit: SE. Effective: 2018 Fall Quarter.

MAT 114—Convex Geometry (4)
Lecture/Discussion—4 hours. Prerequisite(s): MAT 021C; (MAT 022A or MAT 067) Topics selected from the theory of convex bodies, convex functions, geometric inequalities, combinatorial geometry, and integral geometry. Designed to serve as preparation for the more rigorous upper-division courses. GE credit: SE. Effective: 2007 Winter Quarter.

MAT 115A—Number Theory (4)
Lecture/Discussion—4 hours. Prerequisite(s): MAT 021B Divisibility and related topics, diophantine equations, selected topics from the theory of prime numbers. Designed to serve as preparation for the more rigorous upper division courses. GE credit: QL, SE. Effective: 2006 Fall Quarter.

MAT 115B—Number Theory (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): MAT 115A; (MAT 022A or MAT 067) Euler function, Moebius function, congruences, primitive roots, quadratic reciprocity law. GE credit: QL, SE, SL. Effective: 2016 Fall Quarter.

MAT 116—Differential Geometry (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): MAT 021D; MAT 022B; (MAT 022A or MAT 067) Vector analysis, curves, and surfaces in three dimensions. GE credit: SE. Effective: 2017 Winter Quarter.

MAT 118A—Partial Differential Equations: Elementary Methods (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): MAT 021D; MAT 022B; (MAT 022A or MAT 067) Derivation of partial differential equations; separation of variables; equilibrium solutions and Laplace's equation; Fourier series; method of characteristics for the one dimensional wave equation. Solution of nonhomogeneous equations. GE credit: QL, SE. Effective: 2006 Fall Quarter.

MAT 118B—Partial Differential Equations: Eigenfunction Expansions (4)
Lecture—3 hours. Prerequisite(s): MAT 118A Sturm-Liouville Theory; selfadjoint operators; mixed boundary conditions; partial differential equations in two and three dimensions; Eigenvalue problems in circular domains; nonhomogeneous problems and the method of eigenfunction expansions; Poisson's Equations. GE credit: QL, SE. Effective: 2000 Fall Quarter.

MAT 118C—Partial Differential Equations: Green's Functions and Transforms (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): MAT 118B Green's functions for one-dimensional problems and Poisson's equation; Fourier transforms; Green's Functions for time dependent problems; Laplace transform and solution of partial differential equations. GE credit: QL, SE. Effective: 2000 Fall Quarter.

MAT 119A—Ordinary Differential Equations (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): MAT 021D; MAT 022B; (MAT 022A or MAT 067) Scalar and planar autonomous systems; nonlinear systems and linearization; existence and uniqueness of solutions; matrix solution of linear systems; phase plane analysis; stability analysis; bifurcation theory; Liapunov's method; limit cycles; Poincare Bendixson theory. GE credit: QL, SE. Effective: 2007 Winter Quarter.

MAT 119B—Ordinary Differential Equations (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): MAT 119A Lorentz equations; Poincare maps; center manifolds and normal forms; scalar and planar maps; phase space analysis for iterated maps; period-doubling
bifurcation; Lyapunov exponent; chaos and symbolic dynamics; strange attractors; fractals. GE credit: QL, SE. Effective: 2007 Spring Quarter.

**MAT 124—Mathematical Biology (4)**
Lecture—3 hours; Project (Term Project). Prerequisite(s): MAT 022B; (MAT 022A or MAT 067) Methods of mathematical modeling of biological systems including difference equations, ordinary differential equations, stochastic and dynamic programming models. Computer simulation methods applied to biological systems. Applications to population growth, cell biology, physiology, evolutionary ecology and protein clustering. MATLAB programming required. GE credit: QL, SE. Effective: 2007 Spring Quarter.

**MAT 125A—Real Analysis (4)**
Lecture/Discussion—4 hours. Prerequisite(s): MAT 025 Functions, limits of functions, continuity and uniform continuity, sequences of functions, series of real numbers, series of functions, power series. Not open for credit to students who have completed former MAT 127B. GE credit: SE. Effective: 2006 Fall Quarter.

**MAT 125B—Real Analysis (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MAT 125A; (MAT 067 or (MAT 022A, MAT 108)) Theory of the derivative, Taylor series, integration, partial derivatives, Implicit Function Theorem. Not open for credit to students who have completed former MAT 127C. GE credit: SE. Effective: 2017 Winter Quarter.

**MAT 127A—Real Analysis (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (MAT 021C or MAT 021CH); (MAT 067 or (MAT 022A, MAT 108) Real numbers, sequences, series, and continuous functions. May be repeated for credit. Effective: 2017 Fall Quarter.

**MAT 127B—Real Analysis (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MAT 127A Derivatives, integrals, sequences of functions, and power series. Effective: 2017 Fall Quarter.

**MAT 127C—Real Analysis (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MAT 127B Metric spaces and multi-variable calculus. Effective: 2017 Fall Quarter.

**MAT 128A—Numerical Analysis (4) Review all entries**
Lecture—3 hours; Project (Term Project). Prerequisite(s): MAT 021C; ECS 030 Error analysis, approximation, interpolation, numerical differentiation and integration. Programming in language such as Pascal, Fortran, or BASIC required. GE credit: QL, SE. Effective: 2016 Fall Quarter.

**MAT 128B—Numerical Analysis in Solution of Equations (4) Review all entries**
Lecture—3 hours; Project (Term Project). Prerequisite(s): MAT 021C; (ECS 032A or ENG 006 or EME 005 or ECS 030) Solution of nonlinear equations and nonlinear systems. Minimization of functions of several variables. Simultaneous linear equations. Eigenvalue problems. Linear programming. Programming in language such as Pascal, Fortran, or BASIC required. GE credit: QL, SE. Effective: 2016 Fall Quarter.

**MAT 128C—Numerical Analysis in Differential Equations (4) Review all entries**
Lecture—3 hours; Project (Term Project). Prerequisite(s): (MAT 022A or MAT 067); (ECS 032A or ENG 006 or EME 005 or ECS 030) Difference equations, operators, numerical solutions of ordinary and partial differential equations. Programming in language such as Pascal, Fortran, or BASIC required. GE credit: QL, SE. Effective: 2016 Fall Quarter.
MAT 129—Fourier Analysis (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): MAT 021D; MAT 022B; (MAT 022A or MAT 067); MAT 025 Fourier series and integrals, orthogonal sets of functions. Topics selected from trigonometric approximation, orthogonal polynomials, applications to signal and image processing, numerical analysis, and differential equations. GE credit: QL, SE. Effective: 2016 Fall Quarter.

MAT 133—Mathematical Finance (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): (MAT 067 or (MAT 022A, MAT 108)), MAT 135A Analysis and evaluation of deterministic and random cash flow streams, yield and pricing of basic financial instruments, interest rate theory, mean-variance portfolio theory, capital asset pricing models, utility functions and general principles. MATLAB programming required. GE credit: QL, SE, SL. Effective: 2016 Fall Quarter.

MAT 135A—Probability (4)
Lecture/Discussion—4 hours. Prerequisite(s): MAT 021C; (MAT 108 or MAT 025) Probability space; discrete probability, combinatorial analysis; independence, conditional probability; random variables, discrete and continuous distributions, probability mass function, joint and marginal density functions; expectation, moments, variance, Chebyshev inequality; sums of random variables, random walk, large number law, central limit theorem. Not open for credit to students who have completed former course 131. GE credit: SE. Effective: 2016 Fall Quarter.

MAT 135B—Stochastic Processes (4)
Discussion/Laboratory—4 hours. Prerequisite(s): MAT 135A; (MAT 022A or MAT 067) Generating functions, branching processes, characteristic function; Markov chains; convergence of random variables, law of iterated logarithm; random processes, Brownian motion, stationary processes, renewal processes, queueing theory, martingales. Not open for credit to students who have completed former course 132A. GE credit: QL, SE. Effective: 2009 Spring Quarter.

MAT 141—Euclidean Geometry (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MAT 021B; (MAT 022A or MAT 067) Axiomatic and analytic examination of Euclidean geometry from an advanced point of view. In particular, a discussion of its relation to other geometries. Designed to serve as preparation for the more rigorous upper division courses. GE credit: SE. Effective: 2018 Winter Quarter.

MAT 145—Combinatorics (4)
Lecture/Discussion—4 hours. Prerequisite(s): MAT 021C Combinatorial methods using basic graph theory, counting methods, generating functions, and recurrence relations. Designed to serve as preparation for the more rigorous upper division courses. GE credit: QL, SE. Effective: 2016 Fall Quarter.

MAT 146—Algebraic Combinatorics (4) Review all entries
Lecture/Discussion—4 hours. Prerequisite(s): MAT 145; MAT 025; (MAT 022A or MAT 067) Enumeration, Polya theory, generating functions, current topics in algebraic combinatorics. Not open for credit to students who have completed former course 149A. GE credit: SE. Effective: 2007 Spring Quarter.

MAT 146—Algebraic Combinatorics (4) Review all entries
Lecture/Discussion—4 hours. Prerequisite(s): (MAT 022A, MAT 108) or MAT 067); MAT 145 Enumeration, Polya theory, generating functions, current topics in algebraic combinatorics. Not open for credit to students who have completed former course 149A. GE credit: SE. Effective: 2018 Fall Quarter.

MAT 147—Topology (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): MAT 025 Basic notions of point-set and combinatorial topology. GE credit: SE. Effective: 2016 Fall Quarter.

MAT 148—Discrete Mathematics (4)
Lecture/Discussion—4 hours. Prerequisite(s): MAT 067 or (MAT 022A, MAT 108) Coding theory, error correcting codes, finite fields and the algebraic concepts needed in their development. Not open for credit to students who have completed former course 149B. GE credit: QL, SE. Effective: 2016 Fall Quarter.

MAT 150A—Modern Algebra (4)
Lecture/Discussion—4 hours. Prerequisite(s): MAT 067 or (MAT 022A, MAT 108) Basic concepts of groups, symmetries of the plane. Emphasis on the techniques used in the proof of the ideas (Lemmas, Theorems, etc.) developing these concepts. Precise thinking, proof writing, and the ability to deal with abstraction. GE credit: SE. Effective: 2016 Fall Quarter.
MAT 150B—Modern Algebra (4)
Lecture/Discussion—4 hours. Prerequisite(s): MAT 150A Bilinear forms, rings, factorization, modules. GE credit: SE. Effective: 2007 Winter Quarter.

MAT 150C—Modern Algebra (4)
Lecture/Discussion—4 hours. Prerequisite(s): MAT 150B Group representations, fields, Galois theory. GE credit: SE. Effective: 2007 Spring Quarter.

MAT 160—Mathematics for Data Analytics and Decision Making (4)
Lecture—3 hours; Project (Term Project). Prerequisite(s): MAT 167 Relational model; relational algebra, relational calculus, normal forms, functional and multivalued dependencies, separability. Cost benefit analysis of physical database design and reorganization. Performance via analytical modeling, simulation, and queueing theory. Block accesses; buffering; operating system contention; CPU intensive operations. GE credit: SE. Effective: 2018 Spring Quarter.

MAT 165—Mathematics and Computers (4)
Lecture—3 hours; Project (Term Project). Prerequisite(s): MAT 022A or MAT 067; (MAT 025 or MAT 108 or MAT 114 or MAT 115A or MAT 145) Introduction to computational mathematics, symbolic computation, and computer generated/verified proofs in algebra, analysis and geometry. Investigation of rigorous new mathematics developed in conjunction with modern computational questions and the role that computers play in mathematical conjecture and experimentation. GE credit: QL, SE. Effective: 2016 Fall Quarter.

MAT 167—Applied Linear Algebra (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): MAT 022A or MAT 067 Applications of linear algebra; LU and QR matrix factorizations, eigenvalue and singular value matrix decompositions. GE credit: QL, SE. Effective: 2016 Fall Quarter.

MAT 168—Optimization (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): MAT 021C; ((MAT 022A, MAT 108) or MAT 067)) Linear programming, simplex method. Basic properties of unconstrained nonlinear problems, descent methods, conjugate direction method. Constrained minimization. Programming language required. GE credit: QL, SE. Effective: 2016 Fall Quarter.

MAT 180—Special Topics (3)
Lecture—3 hours. Prerequisite(s): MAT 025; (MAT 067 or (MAT 022A, MAT 108)) Special topics from various fields of modern, pure, and applied mathematics. Some recent topics include Knot Theory, General Relativity, and Fuzzy Sets. May be repeated for credit when topics differs. GE credit: SE. Effective: 2016 Fall Quarter.

MAT 185A—Complex Analysis (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): (MAT 067 or (MAT 022A, MAT 108)), MAT 125A Complex number system, analyticity and the Cauchy-Riemann equations, elementary functions, complex integration, power and Laurent series expansions, residue theory. GE credit: SE. Effective: 2016 Fall Quarter.

MAT 185B—Complex Analysis (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): MAT 185A Analytical functions, elementary functions and their mapping properties, applications of Cauchy's integral theorem, conformal mapping and applications to heat flow and fluid mechanics. GE credit: SE. Effective: 2007 Spring Quarter.

MAT 189—Advanced Problem Solving (3)
Lecture—3 hours. Prerequisite(s): MAT 025; ((MAT 022A, MAT 108) or MAT 067) Solution and presentation of advanced problem solving techniques. Solve and present interesting and challenging problems of all areas of mathematics. GE credit: OL, QL, SE, WE. Effective: 2016 Fall Quarter.

MAT 192—Internship in Applied Mathematics (1-3)
Internship. Prerequisite(s): Consent of Instructor. Supervised work experience in applied mathematics. Final report. May be repeated up to 10 unit(s). (P/NP grading only.) Effective: 2016 Fall Quarter.

MAT 194—Undergraduate Thesis (3)
Independent Study. Prerequisite(s): Consent of Instructor. Independent research under supervision of a faculty member. Student will submit written report in thesis form. May be repeated for credit with consent of Vice Chairperson. (P/NP grading only.) GE credit: SE. Effective: 2016 Fall Quarter.

MAT 197TC—Tutoring Mathematics in the Community (1-5)
Laboratory—2-6 hours; Seminar—1-2 hours. Prerequisite(s): Consent of Instructor. Special projects in mathematical
education developing techniques for mathematics instruction and tutoring on an individual or small group basis. May be repeated once for credit. May be repeated up to 1 time(s). (P/NP grading only.) Effective: 2016 Fall Quarter.

MAT 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 2016 Fall Quarter.

MAT 199—Special Study for Advanced Undergraduates (1-5)
Variable. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

MAT 200A—Problem-Solving in Analysis (1)
Extensive Problem Solving; Lecture—1 hour. Prerequisite(s): MAT 201A; MAT 201B; MAT 201C Problem-solving in graduate analysis: continuous functions, metric spaces, Banach and Hilbert spaces, bounded linear operators, the spectral theorem, distributions, Fourier series and transforms, Lp spaces, Sobolev spaces. May be repeated up to 2 time(s). Effective: 2010 Spring Quarter.

MAT 200B—Problem-Solving in Analysis (2)
Extensive Problem Solving; Lecture—1 hour. Prerequisite(s): MAT 201A; MAT 201B; MAT 201C Problem-solving in graduate analysis: continuous functions, metric spaces, Banach and Hilbert spaces, bounded linear operators, the spectral theorem, distributions, Fourier series and transforms, Lp spaces, Sobolev spaces. May be repeated up to 2 time(s). Effective: 2010 Fall Quarter.

MAT 201A—Analysis (4)

MAT 201B—Analysis (4)

MAT 201C—Analysis (4)

MAT 202—Functional Analysis (4)

MAT 205—Complex Analysis (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 185A; Or equivalent to MAT 185A, or consent of instructor. Analytic continuation, Riemann surfaces, conformal mappings, Riemann mapping theorem, entire functions, special functions, elliptic functions. Effective: 2009 Spring Quarter.

MAT 205A—Complex Analysis (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 185A; Or equivalent to MAT 185A, or consent of instructor. Cauchy's theorem, Cauchy's integral formulas, meromorphic functions, complex logarithm, entire functions, Weierstrass infinite product formula, the gamma and zeta functions, and prime number theorem. No credit given to students who have completed MAT 205. Effective: 2011 Fall Quarter.

MAT 205B—Complex Analysis (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 205A; or Consent of Instructor. Conformal mappings, the Schwarz lemma, analytic automorphisms, the Riemann mapping theorem, elliptic functions, Eisenstein series, the Jacobi theta functions, asymptotics, Bessel functions, the Airy function, topics on special functions and Riemann surfaces. May be repeated up to 2 time(s) if topic varies. Effective: 2011 Spring Quarter.
MAT 206—Measure Theory (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): MAT 125B Introduction to measure theory. The study of lengths, surface areas, and volumes in general spaces, as related to integration theory. Effective: 2007 Spring Quarter.

MAT 207A—Methods of Applied Mathematics (4)

MAT 207B—Methods of Applied Mathematics (4)

MAT 207C—Methods of Applied Mathematics (4)

MAT 215A—Topology (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): Graduate standing or consent of instructor. Fundamental group and covering space theory. Homology and cohomology. Manifolds and duality. CW complexes. Fixed point theorems. Effective: 2002 Fall Quarter.

MAT 215B—Topology (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): Graduate standing or consent of instructor. Fundamental group and covering space theory. Homology and cohomology. Manifolds and duality. CW complexes. Fixed point theorems. Effective: 2002 Fall Quarter.

MAT 215C—Topology (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): Graduate standing or consent of instructor. Fundamental group and covering space theory. Homology and cohomology. Manifolds and duality. CW complexes. Fixed point theorems. Effective: 2002 Fall Quarter.

MAT 216—Geometric Topology (4)

MAT 218A—Partial Differential Equations (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 201A; MAT 201B; MAT 201C; or Consent of Instructor. Year-long sequence on PDEs which covers linear transport, Laplace, heat, and wave equations, maximum principles, method of characteristics, Sobolev and Hölder space theory, weak derivatives, semilinear, quasilinear, and fully nonlinear elliptic/parabolic equations, nonlinear hyperbolic equations, and compensated compactness. Effective: 2009 Fall Quarter.

MAT 218B—Partial Differential Equations (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 218A; or Consent of Instructor. Year-long sequence on PDEs which covers linear transport, Laplace, heat, and wave equations, maximum principles, method of characteristics, Sobolev and Hölder space theory, weak derivatives, semilinear, quasilinear, and fully nonlinear elliptic/parabolic equations, nonlinear hyperbolic equations, and compensated compactness. Effective: 2010 Winter Quarter.

MAT 218C—Partial Differential Equations (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 218B; or Consent of Instructor. Year-long
sequence on PDEs which covers linear transport, Laplace, heat, and wave equations, maximum principles, method of characteristics, Sobolev and Hölder space theory, weak derivatives, semilinear, quasilinear, and fully nonlinear elliptic/parabolic equations, nonlinear hyperbolic equations, and compensated compactness. Effective: 2010 Spring Quarter.

**MAT 221A—Mathematical Fluid Dynamics (4)**

**MAT 221B—Mathematical Fluid Dynamics (4)**

**MAT 226A—Numerical Methods: Fundamentals (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 128A; MAT 128B; Or equivalent, or consent of instructor; familiarity with some programming language. Fundamental principles and methods in numerical analysis, including the concepts of stability of algorithms and conditioning of numerical problems, numerical methods for interpolation and integration, eigenvalue problems, singular value decomposition and its applications. Effective: 2009 Fall Quarter.

**MAT 226B—Numerical Methods: Large-Scale Matrix Computations (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 167; Or equivalent, or consent of instructor; familiarity with some programming language. Numerical methods for large-scale matrix computations, including direct and iterative methods for the solution of linear systems, the computation of eigenvalues and singular values, the solution of least-squares problems, matrix compression, methods for the solution of linear programs. Effective: 2010 Winter Quarter.

**MAT 226C—Numerical Methods: Ordinary Differential Equations (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 022B; Or equivalent, or consent of instructor; familiarity with some programming language. Numerical methods for the solution of ordinary differential equations, including methods for initial-value problems and two-point boundary-value problems, theory of and methods for differential algebraic equations, dimension reduction of large-scale dynamical systems. Effective: 2010 Spring Quarter.

**MAT 227—Mathematical Biology (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): Graduate standing or consent of instructor. Nonlinear ordinary and partial differential equations and stochastic processes of cell and molecular biology. Scaling, qualitative, and numerical analysis of mathematical models. Applications to nerve impulse, chemotaxis, muscle contraction, and morphogenesis. Effective: 2002 Fall Quarter.

**MAT 228A—Numerical Solution of Differential Equations (4)**

**MAT 228B—Numerical Solution of Differential Equations (4)**

**MAT 228C—Numerical Solution of Differential Equations (4)**

**MAT 235A—Probability Theory (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 125B; (MAT 135A or STA 131A); or Consent of Instructor. Measure-theoretic foundations, abstract integration, independence, laws of large numbers, characteristic functions, central limit theorems. Weak convergence in metric spaces, Brownian motion, invariance principle.
Conditional expectation. Topics selected from: martingales, Markov chains, ergodic theory. (Same course as STA 235A.) Effective: 2007 Fall Quarter.

**MAT 235B—Probability Theory (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 235A or STA 235A; or Consent of Instructor. Measure-theoretic foundations, abstract integration, independence, laws of large numbers, characteristic functions, central limit theorems. Weak convergence in metric spaces, Brownian motion, invariance principle. Conditional expectation. Topics selected from: martingales, Markov chains, ergodic theory. (Same course as STA 235B.) Effective: 2008 Spring Quarter.

**MAT 235C—Probability Theory (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 235B or STA 235B; or Consent of Instructor. Measure-theoretic foundations, abstract integration, independence, laws of large numbers, characteristic functions, central limit theorems. Weak convergence in metric spaces, Brownian motion, invariance principle. Conditional expectation. Topics selected from: martingales, Markov chains, ergodic theory. (Same course as STA 235C.) Effective: 2008 Spring Quarter.

**MAT 236A—Stochastic Dynamics and Applications (4)**

**MAT 236B—Stochastic Dynamics and Applications (4)**

**MAT 239—Differential Topology (4)**
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): MAT 201A; or Consent of Instructor. Vector calculus, point-set topology; MAT 250A and MAT 250B is highly recommended. Topics include: differentiable manifolds, vector fields, transversality, Sard's theorem, examples of differentiable manifolds; orientation, intersection theory, index of vector fields; differential forms, integration, Stokes' theorem, deRham cohomology; Morse functions, Morse lemma, index of critical points. Effective: 2007 Spring Quarter.

**MAT 240A—Differential Geometry (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 201A; MAT 239; MAT 250A and MAT 250B highly recommended; intended primarily for second-year graduate students. Riemannian metrics, connections, geodesics, Gauss lemma, convex neighborhoods, curvature tensor, Ricci and scalar curvature, connections and curvature on vector bundles. Effective: 2008 Fall Quarter.

**MAT 240B—Differential Geometry (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 240A; Intended primarily for second-year graduate students. Jacobi fields, conjugate points, completeness, Hopf-Rinow theorem, Cartan-Hadamard theorem, energy, variation theorems and their applications, Rauch comparison theorem and its applications. Effective: 2009 Winter Quarter.

**MAT 245—Enumerative Combinatorics (4)**
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): MAT 145; MAT 150; or the equivalent, or consent of instructor. Introduction to modern combinatorics and its applications. Emphasis on enumerative aspects of combinatorial theory. Effective: 2004 Fall Quarter.

**MAT 246—Algebraic Combinatorics (4)**
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): MAT 245; or Consent of Instructor. Algebraic and geometric aspects of combinatorics. The use of structures such as groups, polytopes, rings, and simplicial complexes to solve combinatorial problems. Effective: 2005 Winter Quarter.

**MAT 248A—Algebraic Geometry (4)**
MAT 248B—Algebraic Geometry (4)

MAT 249—Problem-Solving in Algebra (3)
Extensive Problem Solving; Lecture—1 hour. Prerequisite(s): MAT 250A (can be concurrent); MAT 250B (can be concurrent) Problem-solving in graduate algebra: groups, rings, modules, matrices, tensor products, representations, Galois theory, ring extensions, commutative algebra and homological algebra. (S/U grading only.) Effective: 2019 Fall Quarter.

MAT 249A—Problem-Solving in Algebra (1) Review all entries
Extensive Problem Solving; Lecture—1 hour. Prerequisite(s): MAT 250A; MAT 250B Problem-solving in graduate algebra: groups, rings, modules, matrices, tensor products, representations, Galois theory, ring extensions, commutative algebra and homological algebra. May be repeated up to 2 time(s). Effective: 2011 Spring Quarter.

MAT 249B—Problem-Solving in Algebra (2) Review all entries
Extensive Problem Solving; Lecture—1 hour. Prerequisite(s): MAT 250A; MAT 250B Problem-solving in graduate algebra: groups, rings, modules, matrices, tensor products, representations, Galois theory, ring extensions, commutative algebra and homological algebra. May be repeated up to 2 time(s). Effective: 2019 Spring Quarter.

MAT 250A—Algebra (4)

MAT 250B—Algebra (4)

MAT 250C—Algebra (4)

MAT 258A—Numerical Optimization (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 025; MAT 167 Numerical methods for infinite dimensional optimization problems. Newton and quasi-Newton methods, linear and sequential quadratic programming, barrier methods; large-scale optimization; theory of approximations; infinite and semi-infinite programming; applications to optimal control, stochastic optimization and distributed systems. Effective: 2007 Fall Quarter.

MAT 258B—Discrete and Mixed-Integer Optimization (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 025; MAT 167; or Consent of Instructor. Combinatorial, integer, and mixed-integer linear optimization problems. Ideal and strong formulations, cutting planes, branch and cut, decomposition methods. Effective: 2014 Fall Quarter.

MAT 261A—Lie groups and their representations (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 215A; MAT 240A; MAT 250A; MAT 250B; Or the equivalent, or consent of instructor. Lie groups and Lie algebras. Classification of semi-simple Lie groups.

MAT 261B—Lie groups and their representations (4)

MAT 265—Mathematical Quantum Mechanics (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 201; or Consent of Instructor. Mathematical foundations of quantum mechanics: the Hilbert space and Operator Algebra formulations; the Schrödinger and Heisenberg equations, symmetry in quantum mechanics, basics of spectral theory and perturbation theory. Applications to atoms and molecules. The Dirac equation. Effective: 2003 Fall Quarter.

MAT 266—Mathematical Statistical Mechanics and Quantum Field Theory (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 265; or Consent of Instructor. Mathematical principles of statistical mechanics and quantum field theory. Topics include classical and quantum lattice systems, variational principles, spontaneous symmetry breaking and phase transitions, second quantization and Fock space, and fundamentals of quantum field theory. May be repeated up to 1 time(s). Effective: 2010 Spring Quarter.

MAT 271—Applied and Computational Harmonic Analysis (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): (MAT 125B or MAT 201C); (MAT 128B or MAT 167); MAT 129; Or the equivalent, or consent of instructor. Introduction to mathematical basic building blocks (wavelets, local Fourier basis, and their relatives) useful for diverse fields (signal and image processing, numerical analysis, and statistics). Emphasis on the connection between the continuum and the discrete worlds. Effective: 2007 Fall Quarter.

MAT 280—Topics in Pure and Applied Mathematics (3)
Lecture—3 hours. Prerequisite(s): Graduate standing. Special topics in various fields of pure and applied mathematics. Topics selected based on the mutual interests of students and faculty. May be repeated for credit when topic differs. May be repeated for credit. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

MAT 290—Seminar (1-6)
Seminar—1-6 hours. Advanced study in various fields of mathematics, including analysis, applied mathematics, discrete mathematics, geometry, mathematical biology, mathematical physics, optimization, partial differential equations, probability, and topology. May be repeated for credit. (S/U grading only.) Effective: 2003 Spring Quarter.

MAT 298—Group Study (1-5)

MAT 299—Individual Study (1-12)
Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

MAT 299D—Dissertation Research (1-12)
Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

MAT 301A—Mathematics Teaching Practicum (3)
Discussion—1 hour; Fieldwork—5 hours. Prerequisite(s): MAT 302A (can be concurrent); MAT 303A (can be concurrent); MAT 302A and MAT 303A required concurrently or consent of instructor. Specialist training in mathematics teaching. Teaching, training, and cross observing classes taught using large group Socratic techniques, small group guided inquiry experiences, and/or other approaches to teaching at various grade levels. Required for advanced degrees in mathematics education. May be repeated up to 1 time(s). Effective: 2001 Fall Quarter.

MAT 301B—Mathematics Teaching Practicum (3)
Discussion—1 hour; Fieldwork—5 hours. Prerequisite(s): MAT 302B (can be concurrent); MAT 303B (can be concurrent); MAT 302B and MAT 303B required concurrently or consent of instructor. Specialist training in mathematics teaching. Teaching, training, and cross observing classes taught using large group Socratic techniques, small group guided inquiry experiences, and/or other approaches to teaching at various grade levels. Required for advanced degrees in mathematics education. May be repeated up to 1 time(s). Effective: 2002 Winter Quarter.
MAT 301C—Mathematics Teaching Practicum (3)
Discussion—1 hour; Fieldwork—5 hours. Prerequisite(s): MAT 302C (can be concurrent); MAT 303B (can be concurrent); MAT 302C and MAT 303C required concurrently or consent of instructor. Specialist training in mathematics teaching. Teaching, training, and cross observing classes taught using large group Socratic techniques, small group guided inquiry experiences, and/or other approaches to teaching at various grade levels. Required for advanced degrees in mathematics education. May be repeated up to 1 time(s). Effective: 2002 Spring Quarter.

MAT 302A—Curriculum Development in Mathematics (1)
Lecture/Discussion—1 hour. Prerequisite(s): MAT 303A (can be concurrent); MAT 303B required concurrently or consent of instructor. Mathematics curriculum development for all grade levels. Required for advanced degrees in mathematics education. May be repeated up to 1 time(s). Effective: 2001 Fall Quarter.

MAT 302B—Curriculum Development in Mathematics (1)
Lecture/Discussion—1 hour. Prerequisite(s): MAT 303B (can be concurrent); MAT 303B required concurrently or consent of instructor. Mathematics curriculum development for all grade levels. Required for advanced degrees in mathematics education. May be repeated up to 1 time(s). Effective: 2002 Winter Quarter.

MAT 302C—Curriculum Development in Mathematics (1)
Lecture/Discussion—1 hour. Prerequisite(s): MAT 303C (can be concurrent); MAT 303C required concurrently or consent of instructor. Mathematics curriculum development for all grade levels. Required for advanced degrees in mathematics education. May be repeated for credit. Effective: 2002 Spring Quarter.

MAT 303A—Mathematics Pedagogy (1)
Lecture/Discussion—1 hour. Prerequisite(s): MAT 302A (can be concurrent) or MAT 210AL (can be concurrent); MAT 302A or MAT 210AL required concurrently or consent of instructor. An investigation of the interplay of mathematical pedagogy and mathematical content, including a historical survey of past and present methods in view of some of the influences that shaped their development. May be repeated up to 1 time(s). Effective: 2001 Fall Quarter.

MAT 303B—Mathematics Pedagogy (1)
Lecture/Discussion—1 hour. Prerequisite(s): MAT 302B (can be concurrent) or MAT 210BL (can be concurrent); MAT 302A or MAT 210AL required concurrently or consent of instructor. An investigation of the interplay of mathematical pedagogy and mathematical content, including a historical survey of past and present methods in view of some of the influences that shaped their development. May be repeated up to 1 time(s). Effective: 2002 Winter Quarter.

MAT 303C—Mathematics Pedagogy (1)
Lecture/Discussion—1 hour. Prerequisite(s): MAT 302C (can be concurrent) or MAT 210CL (can be concurrent); MAT 302C or MAT 210CL required concurrently or consent of instructor. An investigation of the interplay of mathematical pedagogy and mathematical content, including a historical survey of past and present methods in view of some of the influences that shaped their development. May be repeated up to 1 time(s). Effective: 2002 Spring Quarter.

MAT 390—Teaching Assistantship Training (3)
Lecture—3 hours. Prerequisite(s): Graduate standing in the Department of Mathematics. Experience in methods of assisting and teaching of mathematics at the university level. Includes discussion of lecturing techniques, running discussion sessions, holding office hours, preparing and grading of examinations, student-teacher interaction, and related topics. Required of departmental teaching assistants. (S/U grading only.) Effective: 2008 Fall Quarter.

MAT 399—Individual Study (2-4)
Discussion—1 hour; Independent Study—2-3 hours. Individual study of some aspect of mathematics education or a focused work on a curriculum design project under supervision of a faculty member in mathematics. May be repeated up to 1 time(s). (S/U grading only.) Effective: 2002 Spring Quarter.

Mathematical & Physical Sciences

Mathematical & Physical Sciences | Mathematical & Physical Sciences
(College of Letters and Science)

Program Office. 1207 Social Science and Humanities

The Program of Study
Mathematical and Physical Sciences teach students to use experimental studies and theoretical analyses to find solutions to real world problems. Students learn to address issues such as cleaning up the environment, preserving
natural resources and creating innovative materials for the future. From the study of atoms to the examination of
distant galaxies, from abstract number theory to the development of new chemical compounds, these
disciplines provide students with the skills to build the world of tomorrow.

Mathematical & Physical Sciences | MPS Courses

Courses in MPS:

MPS 001—General Science: Science in the News (4)
Discussion/Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): Lower division standing. Basic principles in
science including numeracy, scale, energy, and time; the scientific method; good and bad science. Emphasis on
science topics recently in the news. Effective: 2002 Spring Quarter.

MPS 011A—Mathematical and Physical Sciences Seminar (2)
Lecture—2 hours. Prerequisite(s): Mentorship for undergraduate research participants in the physical and
mathematical sciences. Research and writing in the mathematical and physical sciences. Presentations by various
science faculty members. Effective: 1997 Fall Quarter.

MPS 011B—Mathematical and Physical Sciences Seminar (2)
Lecture—2 hours. Prerequisite(s): Mentorship for undergraduate research participants in the physical and
mathematical sciences. Research and writing in the mathematical and physical sciences. Presentations by various
science faculty members. Effective: 1997 Fall Quarter.

Faculty. https://www.math.ucdavis.edu/people/faculty/

The Major Programs

Mathematics is the study of abstract structures, space, change, and the interrelations of these concepts. It also is
the language of the exact sciences.

The Program. Students majoring in mathematics may follow a program leading to either the Bachelor of Arts or the
Bachelor of Science degree. After completing basic introductory courses such as calculus and linear algebra,
students plan an upper division program in consultation with a faculty advisor. Upper division courses include real
analysis, probability, modern algebra, as well as a variety of other courses that allow students to further
mathematical knowledge and skills that feature their research or career interests. This individualized program can
lead to graduate study in pure or applied mathematics, elementary or secondary level teaching, or to other
professional goals. It can also reflect a special interest such as computational and applied mathematics, computer
science, or statistics, or may be combined with a major in some other field.

Career Alternatives. A degree in mathematics provides entry to many careers in industry in addition to teaching.
For instance, operations research, data analysis, systems analysis, computing, actuarial work, insurance, and
financial services are only a few such careers. Mathematics is also a sound basis for graduate work in a variety of
fields, such as law, engineering, and economics.

Recommended Language Preparation. Bachelor of Science degree candidates are advised, but not required, to
satisfy the same language requirement as that for a Bachelor of Arts degree candidate, and to fulfill it in French,
German, or Russian.

Major Advisors. For a current list of faculty and staff advisors, see https://www.math.ucdavis.edu/undergrad/
advising/advisers/ or contact the Student Services office at studentservices@math.ucdavis.edu.

Depth Subject Matter Requirements. The upper division course offering is grouped into core and enrichment
courses. The core classes are intended to provide basic mathematical techniques, whereas the enrichment choices
allow students to further mathematical knowledge and skills that feature their research or career interests. Certain mathematically oriented courses given by other departments are admissible in partial satisfaction of the depth subject matter requirements with prior departmental approval. Before graduating, students also complete a mathematics capstone, which can be satisfied by completing an undergraduate thesis, an approved internship, or one of the approved capstone courses.

**Statement of Objectives.** As early as possible, but no later than the last quarter of the sophomore year or no later than the beginning of the first quarter of the junior year for transfer students, each prospective mathematics major, in consultation with an advisor, should file a formal program of study in one of the majors offered in mathematics. Forms to be used for this are available on OASIS (students.ucdavis.edu), our website or from the Department office. Failure to file a formal program could lead to a delay in graduation.

**Information for Undergraduates.** Assistance in planning an undergraduate major program in mathematics is available on our website, as well as by consulting an advisor. Information about the Department's advisors can be found on our website: [https://www.math.ucdavis.edu/undergrad/advising/advisers/](https://www.math.ucdavis.edu/undergrad/advising/advisers/)

**Mathematics Placement Requirement.** Students who wish to enroll in MAT 012, 016A, 017A, 021A, 021AH, and 021M must satisfy the mathematics placement requirement by taking an online exam. Students who do not satisfy the requirement will be administratively dropped from these courses. For more information, including preparation tips and how to access the online exam, please see the Department of Mathematics' website, at [http://www.math.ucdavis.edu/undergrad/math_placement](http://www.math.ucdavis.edu/undergrad/math_placement), well in advance of enrolling.

**Department Honors.** Students who have completed at least 135 units with a minimum GPA of 3.500 in courses counted towards their major will be considered for Department Honors.

Students who meet the minimum GPA requirement for honors at graduation for the College of Letters and Science and who complete a senior project as part of MAT 194 or 199 units in consultation with their faculty adviser may also be recommended by the department for graduation with High Honors or Highest Honors. Recommendations will be based on evaluations of students’ academic achievements in their major and the quality of their senior project. For complete details, see our website at [https://www.math.ucdavis.edu/undergrad/honors/](https://www.math.ucdavis.edu/undergrad/honors/).

**Teaching Credential Subject Representative.** Dr. Ali Dad-del

**Graduate Study.** The Department offers programs of study and research leading to the M.A. and Ph.D. degrees in Mathematics. Information regarding graduate study may be obtained by consulting our website, and by sending an email to studentservices@math.ucdavis.edu.

### Mathematical & Scientific Computation; Mathematics | MAT Courses

**Note:** Mathematics 016A, 016B, and 016C are intended for students who will take no more Mathematics courses. Mathematics 017A, 017B, and 017C have the same level of rigor as 016A, 016B, and 016C, yet are much more broad mathematically (containing algebra, differential equations and probability, besides traditional calculus), and are intended for biology.

**Courses in MAT:**

**MAT 000B—Elementary Algebra (no credit) (0)**

Lecture—3 hours. Not open to Concurrent student enrollment. Basic concepts of algebra, including polynomials, factoring, equations, graphs, and inequalities. Offered only if sufficient number of students enroll. (P/NP grading only.) Effective: 1997 Winter Quarter.

**MAT 000C—Trigonometry (no credit) (0)**

Lecture—2 hours. Not open to Concurrent student enrollment. Basic concepts of trigonometry, including trigonometric functions, identities, inverse functions, and applications. Offered only if sufficient number of students enroll. (P/NP grading only.) Effective: 1997 Winter Quarter.

**MAT 000D—Intermediate Algebra (no credit) (0)**

Lecture—3 hours. Not open to Concurrent student enrollment. Basic concepts of algebra, prepares student for
college work in mathematics, such as course 16A or 21A. Functions, equations, graphs, logarithms, and systems of equations. Offered only if sufficient number of students enroll. (P/NP grading only.) Effective: 1997 Winter Quarter.

MAT 012—Precalculus (3)
Lecture—3 hours. Prerequisite(s): Two years of high school algebra, plane geometry, plane trigonometry; and obtaining required score on the Precalculus Diagnostic Examination. Topics selected for their use in calculus, including functions and their graphs, slope, zeroes of polynomials, exponential, logarithmic and trigonometric functions, sketching surfaces and solids. Not open for credit to students who have completed any of courses MAT 016A, MAT 016B, MAT 016C, MAT 017A, MAT 017B, MAT 017C, MAT 021A, MAT 021B, or MAT 021C with a C- or better. GE credit: QL, SE, SL. Effective: 2012 Winter Quarter.

MAT 016A—Short Calculus (3)
Lecture—3 hours. Prerequisite(s): Two years of high school algebra, plane geometry, plane trigonometry, and satisfying the Mathematics Placement Requirement. Limits; differentiation of algebraic functions; analytic geometry; applications, in particular to maxima and minima problems. Not open for credit to students who have completed MAT 017B, MAT 017C, MAT 021A, MAT 021B, or MAT 021C; only 2 units of credit to students who have completed MAT 17A. GE credit: QL, SE, SL. Effective: 2012 Winter Quarter.

MAT 016B—Short Calculus (3)
Lecture—3 hours. Prerequisite(s): MAT 016A C- or better or MAT 017A C- or better or MAT 021A C- or better or MAT 021AH C- or better Integration; calculus for trigonometric, exponential, and logarithmic functions; applications. Not open for credit to students who have completed MAT 017C, MAT 021B, or MAT 021C; only 2 units of credit to students who have completed MAT 017B. GE credit: QL, SE, SL. Effective: 2017 Winter Quarter.

MAT 016C—Short Calculus (3)
Lecture—3 hours. Prerequisite(s): MAT 016B C- or better or MAT 017B C- or better or MAT 021B C- or better or MAT 021BH C- or better Differential equations; partial derivatives; double integrals; applications; series. Not open for credit to students who have completed MAT 021C; only 2 units of credit to students who have completed MAT 017C. GE credit: QL, SE, SL. Effective: 2017 Winter Quarter.

MAT 017A—Calculus for Biology and Medicine (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Two years of high school algebra, plane geometry, plane trigonometry, and analytical geometry, and satisfying the Mathematics Placement Requirement. Introduction to differential calculus via applications in biology and medicine. Limits, derivatives of polynomials, trigonometric, and exponential functions, graphing, applications of the derivative to biology and medicine. Not open for credit to students who have completed MAT 016B, MAT 016C, MAT 021A, MAT 021B, or MAT 021C; only 2 units of credit to students who have completed MAT 016A. GE credit: QL, SE, SL. Effective: 2014 Fall Quarter.

MAT 017B—Calculus for Biology and Medicine (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MAT 016A C- or better or MAT 017A C- or better or MAT 021A C- or better or MAT 021AH C- or better Introduction to integral calculus and elementary differential equations via applications to biology and medicine. Fundamental theorem of calculus, techniques of integration including integral tables and numerical methods, improper integrals, elementary first order differential equations, applications in biology and medicine. Not open for credit to students who have completed MAT 016C, MAT 021B, or MAT 021C; only 2 units of credit for students who have completed MAT 016A. GE credit: QL, SE, SL. Effective: 2017 Winter Quarter.

MAT 017C—Calculus for Biology and Medicine (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MAT 017B C- or better Matrix algebra, functions of several variables, partial derivatives, systems of differential equations, and applications to biology and medicine. Not open for credit to students who have completed MAT 21C; only 2 units of credit to students who have completed MAT 16C. GE credit: SE, SL. Effective: 2017 Winter Quarter.

MAT 021A—Calculus (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Two years of high school algebra, plane geometry, plane trigonometry, and analytical geometry, and satisfying the Mathematics Placement Requirement. Functions, limits, continuity. Slope and derivative. Differentiation of algebraic and transcendental functions. Applications to motion, natural growth, graphing, extrema of a function. Differentials. L'Hôpital's rule. Not open for credit to students who have completed MAT 016B, MAT 016C, MAT 017B, or MAT 017C; only 2 units of credit to students who have completed MAT 016A or MAT 017A. GE credit: QL, SE, SL. Effective: 2012 Winter Quarter.
MAT 021AH—Honors Calculus (4)
Lecture/Discussion—4 hours. Prerequisite(s): A Precalculus Diagnostic Examination score significantly higher than the minimum for MAT 021A is required. More intensive treatment of material covered in course 21A. GE credit: QL, SE. Effective: 1997 Winter Quarter.

MAT 021AL—Emerging Scholars Program Calculus Workshop (2)
Workshop—6 hours. Prerequisite(s): MAT 021A (can be concurrent); MAT 021A required concurrently. Functions, limits, continuity. Slope and derivative. Same course content as course 21A. Enrollment for students in the Emerging Scholars Program by instructor's invitation only. (P/NP grading only.) GE credit: SE. Effective: 2006 Fall Quarter.

MAT 021B—Calculus (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (MAT 021A C- or better or MAT 021AH C- or better) or MAT 017A B or better Continuation of course 21A. Definition of definite integral, fundamental theorem of calculus, techniques of integration. Application to area, volume, arc length, average of a function, improper integral, surface of revolution. Only 2 units of credit to students who have completed MAT 016B, MAT 016C, MAT 017B, or MAT 017C. GE credit: QL, SE. Effective: 2017 Winter Quarter.

MAT 021BH—Honors Calculus (4)
Lecture/Discussion—4 hours. Prerequisite(s): MAT 021A B or better or MAT 021AH B or better More intensive treatment of material covered in course 21B. Students completing 21BH can continue with course 21CH or the regular 21C. GE credit: SE. Effective: 1997 Winter Quarter.

MAT 021BL—Emerging Scholars Program Calculus Workshop (2)
Workshop—6 hours. Prerequisite(s): MAT 021B (can be concurrent); Concurrent enrollment in MAT 021B. Continuation of course 21A. Same course content as 21B. Enrollment for students in the Emerging Scholars Program by instructor's invitation only. (P/NP grading only.) GE credit: SE. Effective: 2016 Fall Quarter.

MAT 021C—Calculus (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MAT 016C C- or better or MAT 017C C- or better or MAT 021B C- or better or MAT 021AH C- or better or MAT 017B B or better; Continuation of course 21B. Sequences, series, tests for convergence, Taylor expansions. Vector algebra, vector calculus, scalar and vector fields. Partial derivatives, total differentials. Applications to maximum and minimum problems in two or more variables. Applications to physical systems. GE credit: QL, SE. Effective: 2017 Winter Quarter.

MAT 021CH—Honors Calculus (4)
Lecture/Discussion—4 hours. Prerequisite(s): MAT 021B B or better or MAT 021BH B or better More intensive treatment of material covered in course 21C. GE credit: SE. Effective: 1997 Winter Quarter.

MAT 021CL—Emerging Scholars Program Calculus Workshop (2)
Workshop—6 hours. Prerequisite(s): MAT 021C (can be concurrent); Concurrent enrollment in MAT 021C. Continuation of course 21B. Same course content as course 21C. Enrollment for students in the Emerging Scholars Program by instructor's invitation only. (P/NP grading only.) GE credit: SE. Effective: 2016 Fall Quarter.

MAT 021D—Vector Analysis (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (MAT 021C C- or better or MAT 021CH C- or better) or MAT 017C B or better Continuation of course 21C. Definite integrals over plane and solid regions in various coordinate systems. Line and surface integrals. Green's theorem, Stoke's theorem, divergence theorem. GE credit: QL, SE. Effective: 2017 Winter Quarter.

MAT 021M—Accelerated Calculus (5)
Discussion/Laboratory—1 hour; Lecture/Discussion—4 hours. Prerequisite(s): Grade of B or higher in both semesters of high school calculus or a score of 4 or higher on the Advanced Placement Calculus AB exam, and obtaining the required score on the Precalculus Diagnostic Examination and its trigonometric component. Accelerated treatment of material from courses 21A and 21B, with detailed presentation of theory, definitions, and proofs, and treatment of computational aspects of calculus at a condensed but sophisticated level. Not open for credit to students who have completed MAT 021A or MAT 021B. GE credit: SE. Effective: 1997 Winter Quarter.

MAT 022A—Linear Algebra (3) Review all entries
Lecture—3 hours. Prerequisite(s): MAT 016C C- or better or MAT 017C C- or better or MAT 021C C- or better or MAT 021CH C- or better; (ENG 006 or EME 005 or MAT 022AL (can be concurrent)) Matrices and linear transformations, determinants, eigenvalues, eigenvectors, diagonalization, factorization. Not open for credit to students who have completed course 67. GE credit: QL, SE. Effective: 2017 Winter Quarter.
MAT 022A—Linear Algebra (3) **Review all entries**
Lecture—3 hours. Prerequisite(s): (MAT 016C C- or better or MAT 017C C- or better or MAT 021C C- or better or MAT 021CH C- or better); (ENG 006 or EME 005 or ECH 060 or MAT 022AL (can be concurrent)) Matrices and linear transformations, determinants, eigenvalues, eigenvectors, diagonalization, factorization. Not open for credit to students who have completed course 67. GE credit: QL, SE. Effective: 2018 Summer Session 1.

MAT 022AL—Linear Algebra Computer Laboratory (1)
Laboratory—3 hours. Prerequisite(s): MAT 016C or MAT 017C or MAT 021C or MAT 021CH Introduction to Matlab and its use in linear algebra. (P/NP grading only.) GE credit: QL, SE. Effective: 2017 Winter Quarter.

MAT 022B—Differential Equations (3)
Lecture—3 hours. Prerequisite(s): (MAT 022A C- or better or MAT 067 C- or better) Solutions of elementary differential equations. GE credit: QL, SE. Effective: 2016 Fall Quarter.

MAT 025—Advanced Calculus (4)
Lecture/Discussion—4 hours. Prerequisite(s): MAT 021C C- or better or MAT 021CH C- or better Introduction to the rigorous treatment of abstract mathematical analysis. Proofs in mathematics, induction, sets, cardinality; real number system, theory of convergence of sequences. Not open for credit to students who have completed former MAT 127A. GE credit: SE. Effective: 2017 Spring Quarter.

MAT 027A—Linear Algebra with Applications to Biology (4)
Laboratory—2 hours; Lecture—3 hours. Prerequisite(s): MAT 017C C- or better or MAT 021C C- or better or MAT 021CH C- or better Introduction to linear algebra with biological, medical, and bioengineering applications. Matrix algebra, vector spaces, orthogonality, determinants, eigenvalues, eigenvectors, principal component analysis, singular value decomposition, and linear transformations. Computer labs cover mathematical and computational techniques for modeling biological systems. Only one unit of credit for students who have completed MAT 022A. (Same course as BIS 027A.) GE credit: SE. Effective: 2019 Winter Quarter.

MAT 027B—Differential Equations with Applications to Biology (4)
Laboratory—2 hours; Lecture—3 hours. Prerequisite(s): MAT 027A C- or better or (MAT 022A C- or better, (MAT 022AL C- or better or ENG 006 C- or better or EME 005 C- or better)) Solutions of differential equations with biological, medical, and bioengineering applications. First and second order linear equations, phase plane analysis, nonlinear dynamics, Laplace transforms, and the diffusion equation. Computer labs cover mathematical and numerical techniques for modeling biological systems. Only one unit of credit for students who have completed MAT 022B. (Same course as Cross-listed with BIS 027B.) GE credit: SE. Effective: 2019 Spring Quarter.

MAT 036—Fundamentals of Mathematics (3)
Lecture—3 hours. Prerequisite(s): Satisfaction of the Mathematics Placement Requirement. Introduction to fundamental mathematical ideas selected from the principal areas of modern mathematics. Properties of the primes, the fundamental theorems of arithmetic, properties of the rationals and irrationals, binary and other number systems. Not open for credit to students who have taken MAT 108. Effective: 2001 Winter Quarter.

MAT 067—Modern Linear Algebra (4)
Lecture/Discussion—4 hours. Prerequisite(s): MAT 021C C- or better or MAT 021CH C- or better Rigorous treatment of linear algebra; topics include vector spaces, bases and dimensions, orthogonal projections, eigenvalues and eigenvectors, similarity transformations, singular value decomposition and positive definiteness. Only one unit of credit to students who have completed MAT 022A. GE credit: SE. Effective: 2017 Winter Quarter.

MAT 071A—Explorations in Elementary Mathematics (3)
Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): Two years of high school mathematics. Weekly explorations of mathematical ideas related to the elementary school curriculum will be carried out by cooperative learning groups. Lectures will provide background and synthesize the results of group exploration. Effective: 1997 Winter Quarter.

MAT 071B—Explorations in Elementary Mathematics (3)
Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): Two years of high school mathematics. Weekly explorations of mathematical ideas related to the elementary school curriculum will be carried out by cooperative learning groups. Lectures will provide background and synthesize the results of group exploration. Effective: 1997 Winter Quarter.

MAT 089—Elementary Problem Solving (1)
Lecture—1 hour. Prerequisite(s): High school mathematics through precalculus. Solve and present solutions to
challenging and interesting problems in elementary mathematics. May be repeated up to 1 time(s). (P/NP grading only.) Effective: 2001 Winter Quarter.

**MAT 098—Directed Group Study (1-5)**
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

**MAT 099—Special Study for Undergraduates (1-5)**
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

**MAT 107—Probability and Stochastic Processes with Applications to Biology (4)**
Laboratory—2 hours; Lecture—3 hours. Prerequisite(s): (MAT 027A C- or better or BIS 027A C- or better) or (MAT 022A C- or better, (MAT 022AL C- or better or ENG 006 C- or better or EME 005 C- or better)) Introduction to probability theory and stochastic processes with biological, medical, and bioengineering applications. Combinatorics, discrete and continuous random variables, Bayes' formula, conditional probability, Markov chains, Poisson processes, and Brownian motion. Computer labs cover mathematical and computational modeling techniques. Only 2 units of credit for students who have completed MAT 135A or STA 131A. (Same course as BIS 107) GE credit: SE. Effective: 2019 Spring Quarter.

**MAT 108—Introduction to Abstract Mathematics (4)**
Lecture/Discussion—4 hours. Prerequisite(s): MAT 021B A rigorous treatment of mathematical concepts with emphasis on developing the ability to understand abstract mathematical ideas, to read and write mathematical concepts, and to prove theorems. Designed to serve as preparation for the more rigorous upper division courses. GE credit: SE. Effective: 2008 Spring Quarter.

**MAT 111—History of Mathematics (4) Review all entries**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 025 or MAT 067 or MAT 108 or MAT 114 or MAT 115A or MAT 141 or MAT 145; One of the courses mentioned; eight units of upper division Mathematics. History of mathematics from ancient times through the development of calculus. Mathematics from Arab, Hindu, Chinese and other cultures. Selected topics from the history of modern mathematics. GE credit: SE. Effective: 2010 Fall Quarter.

**MAT 111—History of Mathematics (4) Review all entries**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 025 or MAT 127A or MAT 067 or MAT 108 or MAT 114 or MAT 115A or MAT 141 or MAT 145; Eight units of upper division Mathematics. History of mathematics from ancient times through the development of calculus. Mathematics from Arab, Hindu, Chinese and other cultures. Selected topics from the history of modern mathematics. GE credit: SE. Effective: 2018 Fall Quarter.

**MAT 114—Convex Geometry (4)**
Lecture/Discussion—4 hours. Prerequisite(s): MAT 021C; (MAT 022A or MAT 067) Topics selected from the theory of convex bodies, convex functions, geometric inequalities, combinatorial geometry, and integral geometry. Designed to serve as preparation for the more rigorous upper-division courses. GE credit: SE. Effective: 2007 Winter Quarter.

**MAT 115A—Number Theory (4)**
Lecture/Discussion—4 hours. Prerequisite(s): MAT 021B Divisibility and related topics, diophantine equations, selected topics from the theory of prime numbers. Designed to serve as preparation for the more rigorous upper division courses. GE credit: QL, SE. Effective: 2006 Fall Quarter.

**MAT 115B—Number Theory (4)**
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): MAT 115A; (MAT 022A or MAT 067) Euler function, Moebius function, congruences, primitive roots, quadratic reciprocity law. GE credit: QL, SE, SL. Effective: 2016 Fall Quarter.

**MAT 116—Differential Geometry (4)**
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): MAT 021D; MAT 022B; (MAT 022A or MAT 067) Vector analysis, curves, and surfaces in three dimensions. GE credit: SE. Effective: 2017 Winter Quarter.

**MAT 118A—Partial Differential Equations: Elementary Methods (4)**
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): MAT 021D; MAT 022B; (MAT 022A or MAT 067) Derivation of partial differential equations; separation of variables; equilibrium solutions and Laplace’s equation; Fourier series; method of characteristics for the one dimensional wave equation. Solution of nonhomogeneous equations. GE credit: QL, SE. Effective: 2006 Fall Quarter.

**MAT 118B—Partial Differential Equations: Eigenfunction Expansions (4)**
Lecture—3 hours. Prerequisite(s): MAT 118A Sturm-Liouville Theory; selfadjoint operators; mixed boundary
conditions; partial differential equations in two and three dimensions; Eigenvalue problems in circular domains;
nonhomogeneous problems and the method of eigenfunction expansions; Poisson's Equations. GE credit: QL, SE.
Effective: 2000 Fall Quarter.

MAT 118C—Partial Differential Equations: Green's Functions and Transforms (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): MAT 118B Green's functions for one-dimensional
problems and Poisson's equation; Fourier transforms; Green's Functions for time dependent problems; Laplace
transform and solution of partial differential equations. GE credit: QL, SE. Effective: 2000 Fall Quarter.

MAT 119A—Ordinary Differential Equations (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): MAT 021D; MAT 022B; (MAT 022A or MAT 067) Scalar
and planar autonomous systems; nonlinear systems and linearization; existence and uniqueness of solutions; matrix
solution of linear systems; phase plane analysis; stability analysis; bifurcation theory; Lyapunov's method; limit
cycles; Poincare Bendixson theory. GE credit: QL, SE. Effective: 2007 Winter Quarter.

MAT 119B—Ordinary Differential Equations (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): MAT 119A Lorentz equations; Poincare maps; center
manifolds and normal forms; scalar and planar maps; phase space analysis for iterated maps; period-doubling
bifurcation; Lyapunov exponent; chaos and symbolic dynamics; strange attractors; fractals. GE credit: QL, SE.
Effective: 2007 Spring Quarter.

MAT 124—Mathematical Biology (4)
Lecture—3 hours; Project (Term Project). Prerequisite(s): MAT 022B; (MAT 022A or MAT 067) Methods of
mathematical modeling of biological systems including difference equations, ordinary differential equations,
stochastic and dynamic programming models. Computer simulation methods applied to biological systems.
Applications to population growth, cell biology, physiology, evolutionary ecology and protein clustering. MATLAB
programming required. GE credit: QL, SE. Effective: 2007 Spring Quarter.

MAT 125A—Real Analysis (4)
Lecture/Discussion—4 hours. Prerequisite(s): MAT 025 Functions, limits of functions, continuity and uniform
continuity, sequences of functions, series of real numbers, series of functions, power series. Not open for credit to
students who have completed former MAT 127B. GE credit: SE. Effective: 2006 Fall Quarter.

MAT 125B—Real Analysis (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MAT 125A; (MAT 067 or (MAT 022A, MAT 108)) Theory of the
derivative, Taylor series, integration, partial derivatives, Implicit Function Theorem. Not open for credit to students
who have completed former MAT 127C. GE credit: SE. Effective: 2017 Winter Quarter.

MAT 127A—Real Analysis (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (MAT 021C or MAT 021CH); (MAT 067 or (MAT 022A, MAT 108)
Real numbers, sequences, series, and continuous functions. May be repeated for credit. Effective: 2017 Fall Quarter.

MAT 127B—Real Analysis (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MAT 127A Derivatives, integrals, sequences of functions, and
power series. Effective: 2017 Fall Quarter.

MAT 127C—Real Analysis (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MAT 127B Metric spaces and multi-variable calculus. Effective:
2017 Fall Quarter.

MAT 128A—Numerical Analysis (4) Review all entries
Lecture—3 hours; Project (Term Project). Prerequisite(s): MAT 021C; ECS 030 Error analysis, approximation,
interpolation, numerical differentiation and integration. Programming in language such as Pascal, Fortran, or BASIC
required. GE credit: QL, SE. Effective: 2016 Fall Quarter.

MAT 128A—Numerical Analysis (4) Review all entries
Lecture—3 hours; Project (Term Project). Prerequisite(s): MAT 021C; (ECS 032A or ENG 006 or EME 005 or ECS
030) Error analysis, approximation, interpolation, numerical differentiation and integration. Programming in
language such as Pascal, Fortran, or BASIC required. GE credit: QL, SE. Effective: 2019 Winter Quarter.

MAT 128B—Numerical Analysis in Solution of Equations (4) Review all entries
Lecture—3 hours; Project (Term Project). Prerequisite(s): MAT 021C; (MAT 022A or MAT 067); ECS 030 Solution of
nonlinear equations and nonlinear systems. Minimization of functions of several variables. Simultaneous linear
equations. Eigenvalue problems. Linear programming. Programming in language such as Pascal, Fortran, or BASIC required. GE credit: QL, SE. Effective: 2016 Fall Quarter.

**MAT 128B—Numerical Analysis in Solution of Equations (4)** Review all entries
Lecture—3 hours; Project (Term Project). Prerequisite(s): (MAT 022A or MAT 067); (ECS 032A or ENG 006 or EME 005 or ECS 030) Solution of nonlinear equations and nonlinear systems. Minimization of functions of several variables. Simultaneous linear equations. Eigenvalue problems. Linear programming. Programming in language such as Pascal, Fortran, or BASIC required. GE credit: QL, SE. Effective: 2016 Fall Quarter.

**MAT 128C—Numerical Analysis in Differential Equations (4)** Review all entries
Lecture—3 hours; Project (Term Project). Prerequisite(s): (MAT 022A or MAT 067); (ECS 032A or ENG 006 or EME 005 or ECS 030) Difference equations, operators, numerical solutions of ordinary and partial differential equations. Programming in language such as Pascal, Fortran, or BASIC required. GE credit: QL, SE. Effective: 2016 Fall Quarter.

**MAT 129—Fourier Analysis (4)**
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): MAT 021D; MAT 022B; (MAT 022A or MAT 067); MAT 025 Fourier series and integrals, orthogonal sets of functions. Topics selected from trigonometric approximation, orthogonal polynomials, applications to signal and image processing, numerical analysis, and differential equations. GE credit: QL, SE. Effective: 2016 Fall Quarter.

**MAT 133—Mathematical Finance (4)**
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): (MAT 067 or (MAT 022A, MAT 108)), MAT 135A Analysis and evaluation of deterministic and random cash flow streams, yield and pricing of basic financial instruments, interest rate theory, mean-variance portfolio theory, capital asset pricing models, utility functions and general principles. MATLAB programming required. GE credit: QL, SE. Effective: 2016 Fall Quarter.

**MAT 135A—Probability (4)**
Lecture/Discussion—4 hours. Prerequisite(s): MAT 021C; (MAT 108 or MAT 025) Probability space; discrete probability, combinatorial analysis; independence, conditional probability; random variables, discrete and continuous distributions, probability mass function, joint and marginal density functions; expectation, moments, variance, Chebyshev inequality; sums of random variables, random walk, large number law, central limit theorem. Not open for credit to students who have completed former MAT 131. GE credit: SE. Effective: 2016 Fall Quarter.

**MAT 135B—Stochastic Processes (4)**
Discussion/Laboratory—4 hours. Prerequisite(s): MAT 135A; (MAT 022A or MAT 067) Generating functions, branching processes, characteristic function; Markov chains; convergence of random variables, law of iterated logarithm; random processes, Brownian motion, stationary processes, renewal processes, queueing theory, martingales. Not open for credit to students who have completed former MAT 132A. GE credit: QL, SE. Effective: 2009 Spring Quarter.

**MAT 141—Euclidean Geometry (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MAT 021B; (MAT 022A or MAT 067) Axiomatic and analytic examination of Euclidean geometry from an advanced point of view. In particular, a discussion of its relation to other geometries. Designed to serve as preparation for the more rigorous upper division courses. GE credit: SE. Effective: 2018 Winter Quarter.

**MAT 145—Combinatorics (4)**
Lecture/Discussion—4 hours. Prerequisite(s): MAT 021C Combinatorial methods using basic graph theory, counting methods, generating functions, and recurrence relations. Designed to serve as preparation for the more rigorous upper division courses. GE credit: QL, SE. Effective: 2016 Fall Quarter.

**MAT 146—Algebraic Combinatorics (4)** Review all entries
Lecture/Discussion—4 hours. Prerequisite(s): MAT 145; MAT 025; (MAT 022A or MAT 067) Enumeration, Polya theory, generating functions, current topics in algebraic combinatorics. Not open for credit to students who have completed former course 149A. GE credit: SE. Effective: 2007 Spring Quarter.

**MAT 146—Algebraic Combinatorics (4)** Review all entries
Lecture/Discussion—4 hours. Prerequisite(s): ((MAT 022A, MAT 108) or MAT 067)); MAT 145 Enumeration, Polya
theory, generating functions, current topics in algebraic combinatorics. Not open for credit to students who have completed former MAT 149A. GE credit: SE. Effective: 2018 Fall Quarter.

MAT 147—Topology (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): MAT 025 Basic notions of point-set and combinatorial topology. GE credit: SE. Effective: 2016 Fall Quarter.

MAT 148—Discrete Mathematics (4)
Lecture/Discussion—4 hours. Prerequisite(s): MAT 067 or (MAT 022A, MAT 108) Coding theory, error correcting codes, finite fields and the algebraic concepts needed in their development. Not open for credit to students who have completed former MAT 149B. GE credit: QL, SE. Effective: 2016 Fall Quarter.

MAT 150A—Modern Algebra (4)
Lecture/Discussion—4 hours. Prerequisite(s): MAT 067 or (MAT 022A, MAT 108) Basic concepts of groups, symmetries of the plane. Emphasis on the techniques used in the proof of the ideas (Lemmas, Theorems, etc.) developing these concepts. Precise thinking, proof writing, and the ability to deal with abstraction. GE credit: SE. Effective: 2016 Fall Quarter.

MAT 150B—Modern Algebra (4)
Lecture/Discussion—4 hours. Prerequisite(s): MAT 150A Bilinear forms, rings, factorization, modules. GE credit: SE. Effective: 2007 Winter Quarter.

MAT 150C—Modern Algebra (4)
Lecture/Discussion—4 hours. Prerequisite(s): MAT 150B Group representations, fields, Galois theory. GE credit: SE. Effective: 2007 Spring Quarter.

MAT 160—Mathematics for Data Analytics and Decision Making (4)
Lecture—3 hours; Project (Term Project). Prerequisite(s): MAT 167 Relational model; relational algebra, relational calculus, normal forms, functional and multivalued dependencies, separability. Cost benefit analysis of physical database design and reorganization. Performance via analytical modeling, simulation, and queueing theory. Block accesses; buffering; operating system contention; CPU intensive operations. GE credit: QL, SE. Effective: 2018 Spring Quarter.

MAT 165—Mathematics and Computers (4)
Lecture—3 hours; Project (Term Project). Prerequisite(s): MAT 022A or MAT 067; (MAT 025 or MAT 108 or MAT 114 or MAT 115A or MAT 145) Introduction to computational mathematics, symbolic computation, and computer generated/verified proofs in algebra, analysis and geometry. Investigation of rigorous new mathematics developed in conjunction with modern computational questions and the role that computers play in mathematical conjecture and experimentation. GE credit: QL, SE. Effective: 2016 Fall Quarter.

MAT 167—Applied Linear Algebra (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): MAT 022A or MAT 067 Applications of linear algebra; LU and QR matrix factorizations, eigenvalue and singular value matrix decompositions. GE credit: QL, SE. Effective: 2016 Fall Quarter.

MAT 168—Optimization (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): MAT 021C; ((MAT 022A, MAT 108) or MAT 067)) Linear programming, simplex method. Basic properties of unconstrained nonlinear problems, descent methods, conjugate direction method. Constrained minimization. Programming language required. GE credit: QL, SE. Effective: 2016 Fall Quarter.

MAT 180—Special Topics (3)
Lecture—3 hours. Prerequisite(s): MAT 025; (MAT 067 or (MAT 022A, MAT 108)) Special topics from various fields of modern, pure, and applied mathematics. Some recent topics include Knot Theory, General Relativity, and Fuzzy Sets. May be repeated for credit when topics differs. GE credit: SE. Effective: 2016 Fall Quarter.

MAT 185A—Complex Analysis (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): (MAT 067 or (MAT 022A, MAT 108)), MAT 125A Complex number system, analyticity and the Cauchy-Riemann equations, elementary functions, complex integration, power and Laurent series expansions, residue theory. GE credit: SE. Effective: 2016 Fall Quarter.

MAT 185B—Complex Analysis (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): MAT 185A Analytical functions, elementary functions
and their mapping properties, applications of Cauchy's integral theorem, conformal mapping and applications to
heat flow and fluid mechanics. GE credit: SE. Effective: 2007 Spring Quarter.

**MAT 189—Advanced Problem Solving (3)**
Lecture—3 hours. Prerequisite(s): MAT 025; ((MAT 022A, MAT 108) or MAT 067) Solution and presentation of
advanced problem solving techniques. Solve and present interesting and challenging problems of all areas of
mathematics. GE credit: OL, QL, SE, WE. Effective: 2016 Fall Quarter.

**MAT 192—Internship in Applied Mathematics (1-3)**
Internship. Prerequisite(s): Consent of Instructor. Supervised work experience in applied mathematics. Final report.
May be repeated up to 10 unit(s). (P/NP grading only) Effective: 2016 Fall Quarter.

**MAT 194—Undergraduate Thesis (3)**
Independent Study. Prerequisite(s): Consent of Instructor. Independent research under supervision of a faculty
member. Student will submit written report in thesis form. May be repeated for credit with consent of Vice
Chairperson. (P/NP grading only) GE credit: SE. Effective: 2016 Fall Quarter.

**MAT 197TC—Tutoring Mathematics in the Community (1-5)**
Laboratory—2-6 hours; Seminar—1-2 hours. Prerequisite(s): Consent of Instructor. Special projects in mathematical
education developing techniques for mathematics instruction and tutoring on an individual or small group basis.
May be repeated once for credit. May be repeated up to 1 time(s). (P/NP grading only) Effective: 2016 Fall Quarter.

**MAT 198—Directed Group Study (1-5)**
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only) Effective: 2016 Fall Quarter.

**MAT 199—Special Study for Advanced Undergraduates (1-5)**
Variable. (P/NP grading only) GE credit: SE. Effective: 1997 Winter Quarter.

**MAT 200A—Problem-Solving in Analysis (1)**
Extensive Problem Solving; Lecture—1 hour. Prerequisite(s): MAT 201A; MAT 201B; MAT 201C Problem-solving in
graduate analysis: continuous functions, metric spaces, Banach and Hilbert spaces, bounded linear operators, the
spectral theorem, distributions, Fourier series and transforms, Lp spaces, Sobolev spaces. May be repeated up to 2
time(s). Effective: 2010 Spring Quarter.

**MAT 200B—Problem-Solving in Analysis (2)**
Extensive Problem Solving; Lecture—1 hour. Prerequisite(s): MAT 201A; MAT 201B; MAT 201C Problem-solving in
graduate analysis: continuous functions, metric spaces, Banach and Hilbert spaces, bounded linear operators, the
spectral theorem, distributions, Fourier series and transforms, Lp spaces, Sobolev spaces. May be repeated up to 2
time(s). Effective: 2010 Fall Quarter.

**MAT 201A—Analysis (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): Graduate standing in Mathematics or Applied
Mathematics, or consent of instructor. Metric and normed spaces. Continuous functions. Topological, Hilbert, and
Banach spaces. Fourier series. Spectrum of bounded and compact linear operators. Linear differential operators
calculus and variational methods. Effective: 2004 Fall Quarter.

**MAT 201B—Analysis (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): Graduate standing in Mathematics or Applied
Mathematics, or consent of instructor. Metric and normed spaces. Continuous functions. Topological, Hilbert, and
Banach spaces. Fourier series. Spectrum of bounded and compact linear operators. Linear differential operators

**MAT 201C—Analysis (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): Graduate standing in Mathematics or Applied
Mathematics, or consent of instructor. Metric and normed spaces. Continuous functions. Topological, Hilbert, and
Banach spaces. Fourier series. Spectrum of bounded and compact linear operators. Linear differential operators
calculus and variational methods. Effective: 2005 Spring Quarter.

**MAT 202—Functional Analysis (4)**
Lecture—3 hours; Term Paper. Prerequisite(s): MAT 201A; MAT 201B Hahn-Banach, Open mapping, Closed graph,

MAT 205—Complex Analysis (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 185A; Or equivalent to MAT 185A, or consent of instructor. Analytic continuation, Riemann surfaces, conformal mappings, Riemann mapping theorem, entire functions, special functions, elliptic functions. Effective: 2009 Spring Quarter.

MAT 205A—Complex Analysis (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 185A; Or equivalent to MAT 185A, or consent of instructor. Cauchy's theorem, Cauchy's integral formulas, meromorphic functions, complex logarithm, entire functions, Weierstrass infinite product formula, the gamma and zeta functions, and prime number theorem. No credit given to students who have completed MAT 205. Effective: 2011 Fall Quarter.

MAT 205B—Complex Analysis (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 205A; or Consent of Instructor. Conformal mappings, the Schwarz lemma, analytic automorphisms, the Riemann mapping theorem, elliptic functions, Eisenstein series, the Jacobi theta functions, asymptotics, Bessel functions, the Airy function, topics on special functions and Riemann surfaces. May be repeated up to 2 time(s) if topic varies. Effective: 2011 Spring Quarter.

MAT 206—Measure Theory (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): MAT 125B Introduction to measure theory. The study of lengths, surface areas, and volumes in general spaces, as related to integration theory. Effective: 2007 Spring Quarter.

MAT 207A—Methods of Applied Mathematics (4)

MAT 207B—Methods of Applied Mathematics (4)

MAT 207C—Methods of Applied Mathematics (4)

MAT 215A—Topology (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): Graduate standing or consent of instructor. Fundamental group and covering space theory. Homology and cohomology. Manifolds and duality. CW complexes. Fixed point theorems. Effective: 2002 Fall Quarter.

MAT 215B—Topology (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): Graduate standing or consent of instructor. Fundamental group and covering space theory. Homology and cohomology. Manifolds and duality. CW complexes. Fixed point theorems. Effective: 2002 Fall Quarter.

MAT 215C—Topology (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): Graduate standing or consent of instructor. Fundamental group and covering space theory. Homology and cohomology. Manifolds and duality. CW complexes. Fixed point theorems. Effective: 2002 Fall Quarter.

MAT 216—Geometric Topology (4)
Extensive Problem Solving—1 hour; Lecture—3 hours. Prerequisite(s): MAT 215A Topology of two- and three-dimensional manifolds. Surfaces and their diffeomorphisms. Dehn twists. Heegaard surfaces. Theory of
3-dimensional manifolds. Knots and knot theory. Hyperbolic manifolds and geometric structures. May be repeated up to 1 time(s). Effective: 2010 Spring Quarter.

**MAT 218A—Partial Differential Equations (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 201A; MAT 201B; MAT 201C; or Consent of Instructor. Year-long sequence on PDEs which covers linear transport, Laplace, heat, and wave equations, maximum principles, method of characteristics, Sobolev and Hölder space theory, weak derivatives, semilinear, quasilinear, and fully nonlinear elliptic/parabolic equations, nonlinear hyperbolic equations, and compensated compactness. Effective: 2009 Fall Quarter.

**MAT 218B—Partial Differential Equations (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 218A; or Consent of Instructor. Year-long sequence on PDEs which covers linear transport, Laplace, heat, and wave equations, maximum principles, method of characteristics, Sobolev and Hölder space theory, weak derivatives, semilinear, quasilinear, and fully nonlinear elliptic/parabolic equations, nonlinear hyperbolic equations, and compensated compactness. Effective: 2010 Winter Quarter.

**MAT 218C—Partial Differential Equations (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 218B; or Consent of Instructor. Year-long sequence on PDEs which covers linear transport, Laplace, heat, and wave equations, maximum principles, method of characteristics, Sobolev and Hölder space theory, weak derivatives, semilinear, quasilinear, and fully nonlinear elliptic/parabolic equations, nonlinear hyperbolic equations, and compensated compactness. Effective: 2010 Spring Quarter.

**MAT 221A—Mathematical Fluid Dynamics (4)**

**MAT 221B—Mathematical Fluid Dynamics (4)**

**MAT 226A—Numerical Methods: Fundamentals (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 128A; MAT 128B; Or equivalent, or consent of instructor; familiarity with some programming language. Fundamental principles and methods in numerical analysis, including the concepts of stability of algorithms and conditioning of numerical problems, numerical methods for interpolation and integration, eigenvalue problems, singular value decomposition and its applications. Effective: 2009 Fall Quarter.

**MAT 226B—Numerical Methods: Large-Scale Matrix Computations (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 167; Or equivalent, or consent of instructor; familiarity with some programming language. Numerical methods for large-scale matrix computations, including direct and iterative methods for the solution of linear systems, the computation of eigenvalues and singular values, the solution of least-squares problems, matrix compression, methods for the solution of linear programs. Effective: 2010 Winter Quarter.

**MAT 226C—Numerical Methods: Ordinary Differential Equations (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 022B; Or equivalent, or consent of instructor; familiarity with some programming language. Numerical methods for the solution of ordinary differential equations, including methods for initial-value problems and two-point boundary-value problems, theory of and methods for differential algebraic equations, dimension reduction of large-scale dynamical systems. Effective: 2010 Spring Quarter.

**MAT 227—Mathematical Biology (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): Graduate standing or consent of instructor. Nonlinear ordinary and partial differential equations and stochastic processes of cell and molecular biology. Scaling, qualitative, and numerical analysis of mathematical models. Applications to nerve impulse, chemotaxis, muscle contraction, and morphogenesis. Effective: 2002 Fall Quarter.
MAT 228A—Numerical Solution of Differential Equations (4)

MAT 228B—Numerical Solution of Differential Equations (4)

MAT 228C—Numerical Solution of Differential Equations (4)

MAT 235A—Probability Theory (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 125B; (MAT 135A or STA 131A); or Consent of Instructor. Measure-theoretic foundations, abstract integration, independence, laws of large numbers, characteristic functions, central limit theorems. Weak convergence in metric spaces, Brownian motion, invariance principle. Conditional expectation. Topics selected from: martingales, Markov chains, ergodic theory. (Same course as STA 235A.) Effective: 2007 Fall Quarter.

MAT 235B—Probability Theory (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 235A or STA 235A; or Consent of Instructor. Measure-theoretic foundations, abstract integration, independence, laws of large numbers, characteristic functions, central limit theorems. Weak convergence in metric spaces, Brownian motion, invariance principle. Conditional expectation. Topics selected from: martingales, Markov chains, ergodic theory. (Same course as STA 235B.) Effective: 2008 Spring Quarter.

MAT 235C—Probability Theory (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 235B or STA 235B; or Consent of Instructor. Measure-theoretic foundations, abstract integration, independence, laws of large numbers, characteristic functions, central limit theorems. Weak convergence in metric spaces, Brownian motion, invariance principle. Conditional expectation. Topics selected from: martingales, Markov chains, ergodic theory. (Same course as STA 235C.) Effective: 2008 Spring Quarter.

MAT 236A—Stochastic Dynamics and Applications (4)

MAT 236B—Stochastic Dynamics and Applications (4)

MAT 239—Differential Topology (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): MAT 201A; or Consent of Instructor. Vector calculus, point-set topology; MAT 250A and MAT 250B is highly recommended. Topics include: differentiable manifolds, vector fields, transversality, Sard's theorem, examples of differentiable manifolds; orientation, intersection theory, index of vector fields; differential forms, integration, Stokes' theorem, deRham cohomology; Morse functions, Morse lemma, index of critical points. Effective: 2007 Spring Quarter.

MAT 240A—Differential Geometry (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 201A; MAT 239; MAT 250A and MAT 250B highly recommended; intended primarily for second-year graduate students. Riemannian metrics, connections, geodesics, Gaussian lemma, convex neighborhoods, curvature tensor, Ricci and scalar curvature, connections and curvature on vector bundles. Effective: 2008 Fall Quarter.

MAT 240B—Differential Geometry (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 240A; Intended primarily for second-year

MAT 245—Enumerative Combinatorics (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): MAT 145; MAT 150; or the equivalent, or consent of instructor. Introduction to modern combinatorics and its applications. Emphasis on enumerative aspects of combinatorial theory. Effective: 2004 Fall Quarter.

MAT 246—Algebraic Combinatorics (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): MAT 245; or Consent of Instructor. Algebraic and geometric aspects of combinatorics. The use of structures such as groups, polytopes, rings, and simplicial complexes to solve combinatorial problems. Effective: 2005 Winter Quarter.

MAT 248A—Algebraic Geometry (4)

MAT 248B—Algebraic Geometry (4)

MAT 249—Problem-Solving in Algebra (3)
Extensive Problem Solving; Lecture—1 hour. Prerequisite(s): MAT 250A (can be concurrent); MAT 250B (can be concurrent) Problem-solving in graduate algebra: groups, rings, modules, matrices, tensor products, representations, Galois theory, ring extensions, commutative algebra and homological algebra. (S/U grading only.) Effective: 2019 Fall Quarter.

MAT 249A—Problem-Solving in Algebra (1) *Review all entries*
Extensive Problem Solving; Lecture—1 hour. Prerequisite(s): MAT 250A; MAT 250B Problem-solving in graduate algebra: groups, rings, modules, matrices, tensor products, representations, Galois theory, ring extensions, commutative algebra and homological algebra. May be repeated up to 2 time(s). Effective: 2011 Spring Quarter.

MAT 249A—Problem-Solving in Algebra (1) *Review all entries Discontinued*
Extensive Problem Solving; Lecture—1 hour. Prerequisite(s): MAT 250A; MAT 250B Problem-solving in graduate algebra: groups, rings, modules, matrices, tensor products, representations, Galois theory, ring extensions, commutative algebra and homological algebra. May be repeated up to 2 time(s). Effective: 2019 Spring Quarter.

MAT 249B—Problem-Solving in Algebra (2) *Review all entries*
Extensive Problem Solving; Lecture—1 hour. Prerequisite(s): MAT 250A; MAT 250B Problem-solving in graduate algebra: groups, rings, modules, matrices, tensor products, representations, Galois theory, ring extensions, commutative algebra and homological algebra. May be repeated up to 2 time(s). Effective: 2011 Fall Quarter.

MAT 249B—Problem-Solving in Algebra (2) *Review all entries Discontinued*
Extensive Problem Solving; Lecture—1 hour. Prerequisite(s): MAT 250A; MAT 250B Problem-solving in graduate algebra: groups, rings, modules, matrices, tensor products, representations, Galois theory, ring extensions, commutative algebra and homological algebra. May be repeated up to 2 time(s). Effective: 2019 Fall Quarter.

MAT 250A—Algebra (4)

MAT 250B—Algebra (4)

MAT 250C—Algebra (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): Graduate standing in mathematics or consent of

MAT 258A—Numerical Optimization (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 025; MAT 167 Numerical methods for infinite dimensional optimization problems. Newton and Quasi-Newton methods, linear and sequential quadratic programming, barrier methods; large-scale optimization; theory of approximations; infinite and semi-infinite programming; applications to optimal control, stochastic optimization and distributed systems. Effective: 2007 Fall Quarter.

MAT 258B—Discrete and Mixed-Integer Optimization (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 025; MAT 167; or Consent of Instructor. Combinatorial, integer, and mixed-integer linear optimization problems. Ideal and strong formulations, cutting planes, branch and cut, decomposition methods. Effective: 2014 Fall Quarter.

MAT 261A—Lie groups and their representations (4)

MAT 265—Mathematical Quantum Mechanics (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 201; or Consent of Instructor. Mathematical foundations of quantum mechanics: the Hilbert space and Operator Algebra formulations; the Schrödinger and Heisenberg equations, symmetry in quantum mechanics, basics of spectral theory and perturbation theory. Applications to atoms and molecules. The Dirac equation. Effective: 2003 Fall Quarter.

MAT 266—Mathematical Statistical Mechanics and Quantum Field Theory (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 265; or Consent of Instructor. Mathematical principles of statistical mechanics and quantum field theory. Topics include classical and quantum lattice systems, variational principles, spontaneous symmetry breaking and phase transitions, second quantization and Fock space, and fundamentals of quantum field theory. May be repeated up to 1 time(s). Effective: 2010 Spring Quarter.

MAT 271—Applied and Computational Harmonic Analysis (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): (MAT 125B or MAT 201C); (MAT 128B or MAT 167); MAT 129; Or the equivalent, or consent of instructor. Introduction to mathematical basic building blocks (wavelets, local Fourier basis, and their relatives) useful for diverse fields (signal and image processing, numerical analysis, and statistics). Emphasis on the connection between the continuum and the discrete worlds. Effective: 2007 Fall Quarter.

MAT 280—Topics in Pure and Applied Mathematics (3)
Lecture—3 hours. Prerequisite(s): Graduate standing. Special topics in various fields of pure and applied mathematics. Topics selected based on the mutual interests of students and faculty. May be repeated for credit when topic differs. May be repeated for credit May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

MAT 290—Seminar (1-6)
Seminar—1-6 hours. Advanced study in various fields of mathematics, including analysis, applied mathematics, discrete mathematics, geometry, mathematical biology, mathematical physics, optimization, partial differential equations, probability, and topology. May be repeated for credit. (S/U grading only.) Effective: 2003 Spring Quarter.

MAT 298—Group Study (1-5)

MAT 299—Individual Study (1-12)
Variable. (S/U grading only.) Effective: 1997 Winter Quarter.
MAT 299D—Dissertation Research (1-12)
Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

MAT 301A—Mathematics Teaching Practicum (3)
Discussion—1 hour; Fieldwork—5 hours. Prerequisite(s): MAT 302A (can be concurrent); MAT 303A (can be concurrent); MAT 302A and MAT 303A required concurrently or consent of instructor. Specialist training in mathematics teaching. Teaching, training, and cross observing classes taught using large group Socratic techniques, small group guided inquiry experiences, and/or other approaches to teaching at various grade levels. Required for advanced degrees in mathematics education. May be repeated up to 1 time(s). Effective: 2001 Fall Quarter.

MAT 301B—Mathematics Teaching Practicum (3)
Discussion—1 hour; Fieldwork—5 hours. Prerequisite(s): MAT 302B (can be concurrent); MAT 303B (can be concurrent); MAT 302B and MAT 303B required concurrently or consent of instructor. Specialist training in mathematics teaching. Teaching, training, and cross observing classes taught using large group Socratic techniques, small group guided inquiry experiences, and/or other approaches to teaching at various grade levels. Required for advanced degrees in mathematics education. May be repeated up to 1 time(s). Effective: 2002 Winter Quarter.

MAT 301C—Mathematics Teaching Practicum (3)
Discussion—1 hour; Fieldwork—5 hours. Prerequisite(s): MAT 302C (can be concurrent); MAT 303C (can be concurrent); MAT 302C and MAT 303C required concurrently or consent of instructor. Specialist training in mathematics teaching. Teaching, training, and cross observing classes taught using large group Socratic techniques, small group guided inquiry experiences, and/or other approaches to teaching at various grade levels. Required for advanced degrees in mathematics education. May be repeated up to 1 time(s). Effective: 2002 Spring Quarter.

MAT 302A—Curriculum Development in Mathematics (1)
Lecture/Discussion—1 hour. Prerequisite(s): MAT 303A (can be concurrent); MAT 303A required concurrently or consent of instructor. Mathematics curriculum development for all grade levels. Required for advanced degrees in mathematics education. May be repeated up to 1 time(s). Effective: 2001 Fall Quarter.

MAT 302B—Curriculum Development in Mathematics (1)
Lecture/Discussion—1 hour. Prerequisite(s): MAT 303B (can be concurrent); MAT 303B required concurrently or consent of instructor. Mathematics curriculum development for all grade levels. Required for advanced degrees in mathematics education. May be repeated up to 1 time(s). Effective: 2002 Winter Quarter.

MAT 302C—Curriculum Development in Mathematics (1)
Lecture/Discussion—1 hour. Prerequisite(s): MAT 303C (can be concurrent); MAT 303C required concurrently or consent of instructor. Mathematics curriculum development for all grade levels. Required for advanced degrees in mathematics education. May be repeated for credit. Effective: 2002 Spring Quarter.

MAT 303A—Mathematics Pedagogy (1)
Lecture/Discussion—1 hour. Prerequisite(s): MAT 302A (can be concurrent) or MAT 210AL (can be concurrent); MAT 302A or MAT 210AL required concurrently or consent of instructor. An investigation of the interplay of mathematical pedagogy and mathematical content, including a historical survey of past and present methods in view of some of the influences that shaped their development. May be repeated up to 1 time(s). Effective: 2001 Fall Quarter.

MAT 303B—Mathematics Pedagogy (1)
Lecture/Discussion—1 hour. Prerequisite(s): MAT 302B (can be concurrent) or MAT 210BL (can be concurrent); MAT 302A or MAT 210AL required concurrently or consent of instructor. An investigation of the interplay of mathematical pedagogy and mathematical content, including a historical survey of past and present methods in view of some of the influences that shaped their development. May be repeated up to 1 time(s). Effective: 2002 Winter Quarter.

MAT 303C—Mathematics Pedagogy (1)
Lecture/Discussion—1 hour. Prerequisite(s): MAT 302C (can be concurrent) or MAT 210CL (can be concurrent); MAT 302C or MAT 210CL required concurrently or consent of instructor. An investigation of the interplay of mathematical pedagogy and mathematical content, including a historical survey of past and present methods in view of some of the influences that shaped their development. May be repeated up to 1 time(s). Effective: 2002 Winter Quarter.

MAT 390—Teaching Assistantship Training (3)
Lecture—3 hours. Prerequisite(s): Graduate standing in the Department of Mathematics. Experience in methods of assisting and teaching of mathematics at the university level. Includes discussion of lecturing techniques, running...
discussion sessions, holding office hours, preparing and grading of examinations, student-teacher interaction, and related topics. Required of departmental teaching assistants. (S/U grading only.) Effective: 2008 Fall Quarter.

**MAT 399—Individual Study (2-4)**
Discussion—1 hour; Independent Study—2-3 hours. Individual study of some aspect of mathematics education or a focused work on a curriculum design project under supervision of a faculty member in mathematics. May be repeated up to 1 time(s). (S/U grading only.) Effective: 2002 Spring Quarter.

**Faculty.** https://www.math.ucdavis.edu/people/faculty/

**The Major Programs**
Mathematics is the study of abstract structures, space, change, and the interrelations of these concepts. It also is the language of the exact sciences.

**The Program.** Students majoring in mathematics may follow a program leading to either the Bachelor of Arts or the Bachelor of Science degree. After completing basic introductory courses such as calculus and linear algebra, students plan an upper division program in consultation with a faculty advisor. Upper division courses include real analysis, probability, modern algebra, as well as a variety of other courses that allow students to further mathematical knowledge and skills that feature their research or career interests. This individualized program can lead to graduate study in pure or applied mathematics, elementary or secondary level teaching, or to other professional goals. It can also reflect a special interest such as computational and applied mathematics, computer science, or statistics, or may be combined with a major in some other field.

**Career Alternatives.** A degree in mathematics provides entry to many careers in industry in addition to teaching. For instance, operations research, data analysis, systems analysis, computing, actuarial work, insurance, and financial services are only a few such careers. Mathematics is also a sound basis for graduate work in a variety of fields, such as law, engineering, and economics.

**Recommended Language Preparation.** Bachelor of Science degree candidates are advised, but not required, to satisfy the same language requirement as that for a Bachelor of Arts degree candidate, and to fulfill it in French, German, or Russian.

**Major Advisors.** For a current list of faculty and staff advisors; see https://www.math.ucdavis.edu/undergrad/advising/advisers/ or contact the Student Services office at studentservices@math.ucdavis.edu.

**Depth Subject Matter Requirements.** The upper division course offering is grouped into core and enrichment courses. The core classes are intended to provide basic mathematical techniques, whereas the enrichment choices allow students to further mathematical knowledge and skills that feature their research or career interests. Certain mathematically oriented courses given by other departments are admissible in partial satisfaction of the depth subject matter requirements with prior departmental approval. Before graduating, students also complete a mathematics capstone, which can be satisfied by completing an undergraduate thesis, an approved internship, or one of the approved capstone courses.
Statement of Objectives. As early as possible, but no later than the last quarter of the sophomore year or no later than the beginning of the first quarter of the junior year for transfer students, each prospective mathematics major, in consultation with an advisor, should file a formal program of study in one of the majors offered in mathematics. Forms to be used for this are available on OASIS (students.ucdavis.edu), our website or from the Department office. Failure to file a formal program could lead to a delay in graduation.

Information for Undergraduates. Assistance in planning an undergraduate major program in mathematics is available on our website, as well as by consulting an advisor. Information about the Department's advisors can be found on our website, https://www.math.ucdavis.edu/undergrad/advising/advisers/.

Mathematics Placement Requirement. Students who wish to enroll in MAT 012, 016A, 017A, 021A, 021AH, and 021M must satisfy the mathematics placement requirement by taking an online exam. Students who do not satisfy the requirement will be administratively dropped from these courses. For more information, including preparation tips and how to access the online exam, please see the Department of Mathematics' website, at http://www.math.ucdavis.edu/undergrad/math_placement, well in advance of enrolling.

Department Honors. Students who have completed at least 135 units with a minimum GPA of 3.500 in courses counted towards their major will be considered for Department Honors.

Students who meet the minimum GPA requirement for honors at graduation for the College of Letters and Science and who complete a senior project as part of MAT 194 or 199 units in consultation with their faculty adviser may also be recommended by the department for graduation with High Honors or Highest Honors. Recommendations will be based on evaluations of students' academic achievements in their major and the quality of their senior project. For complete details, see our website at http://www.math.ucdavis.edu.

Teaching Credential Subject Representative. Dr. Ali Dad-del

Graduate Study. The Department offers programs of study and research leading to the M.A. and Ph.D. degrees in Mathematics. Information regarding graduate study may be obtained by consulting our website, and by sending an email to studentservices@math.ucdavis.edu.

Choose one option:

(a) 
- MAT 022A  Linear Algebra  3
- MAT 108   Introduction to Abstract Mathematics  4

(b) 
- MAT 067   Modern Linear Algebra  4

- ECS 032A  Introduction to Programming  4
- ENG 006   Engineering Problem Solving  4
- MAT 022AL Linear Algebra Computer Laboratory  1

Equivalent MATLAB knowledge.

Additional non-Mathematics courses chosen from natural sciences.  12

NOTE: Basic knowledge of MATLAB is required for both MAT 0022A and MAT 067. Students can learn it on their own, enroll in ENG 006, EME 005, or in the one unit course MAT 022AL (can be taken concurrently).

Depth Subject Matter

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>

1381
A. Core
- MAT 127A Real Analysis 4
- MAT 127B Real Analysis 4
- MAT 127C Real Analysis 4
- MAT 135A Probability 4
- MAT 150A Modern Algebra 4

B. Choose one Plan: 16

Plan 1: General Mathematics
Choose four:
- MAT 111-185B, excluding MAT 180, worth at least four units each. Up to four of these 16 units may be approved upper division courses outside of the Department of Mathematics with extensive use of mathematics.

Plan 2: Secondary Teaching
- MAT 111 History of Mathematics 4
- MAT 115A Number Theory 4
- MAT 141 Euclidean Geometry 4
Choose one:
- MAT 111-185B, excluding MAT 180, worth at least four units each. Up to four of these 16 units may be approved upper division courses outside of the Department of Mathematics with extensive use of mathematics.

NOTE: Students who wish to satisfy the single subject matter waiver for the teaching credential should see an adviser as early as possible.

C. Capstone Course:
Choose one:
- MAT 189 Advanced Problem Solving 3
- MAT 192 Internship in Applied Mathematics 1-3
- MAT 194 Undergraduate Thesis 3
- MAT 180 Special Topics 3

Total: 78-82

**Mathematics Placement Requirement.** Students who wish to enroll in MAT 012, 016A, 017A, 021A, 021AH, and 021M must satisfy the mathematics placement requirement by taking an online exam. Students who do not satisfy the requirement will be administratively dropped from these courses. For more information, including preparation tips and how to access the online exam, please see the Department of Mathematics' website, at [http://www.math.ucdavis.edu/undergrad/math_placement](http://www.math.ucdavis.edu/undergrad/math_placement), well in advance of enrolling.

**Department Honors.** Students who have completed at least 135 units with a minimum GPA of 3.500 in courses counted towards their major will be considered for Department Honors.

Students who meet the minimum GPA requirement for honors at graduation for the College of Letters and Science and who complete a senior project as part of MAT 194 or 199 units in consultation with their faculty adviser may also be recommended by the department for graduation with High Honors or Highest Honors. Recommendations will be based on evaluations of students' academic achievements in their major and the quality of their senior project. For complete details, see our website at [https://www.math.ucdavis.edu/undergrad/honors/](https://www.math.ucdavis.edu/undergrad/honors/).

**Teaching Credential Subject Representative.** Dr. Ali Dad-del

**Graduate Study.** The Department offers programs of study and research leading to the M.A. and Ph.D. degrees in Mathematics. Information regarding graduate study may be obtained by consulting our website, and by sending an email to studentservices@math.ucdavis.edu.

**Choose one option:**

(a)  
MAT 022A Linear Algebra 3

(b)  
MAT 108 Introduction to Abstract Mathematics 4
MAT 067 Modern Linear Algebra 4

Computer Science or Engineering 4
ECS 032A Introduction to Programming 4
ENG 006 Engineering Problem Solving 4

MATLAB
MAT 022AL Linear Algebra Computer Laboratory 1
Equivalent MATLAB knowledge

Plan I: General Mathematics 5
PHY 009A Classical Physics 5

Plan II: Mathematics for Secondary Teaching 4-5
Choose one:
PHY 007A General Physics 4
STA 013 Elementary Statistics 4
STA 100 Applied Statistics for Biological Sciences 4
STA 032 Gateway to Statistical Data Science 4
PHY 009A Classical Physics 5

NOTE: Basic knowledge of MATLAB is required for both MAT 0022A and MAT 067. Students can learn it on their own, enroll in ENG 006, EME 005, or in the one unit course MAT 022AL (can be taken concurrently).

Depth Subject Matter Units: 51

Choose one plan:
Plan I: General Mathematics
A. Core 32
  MAT 127A Real Analysis 4
  MAT 127B Real Analysis 4
  MAT 127C Real Analysis 4
  MAT 135A Probability 4
  MAT 150A Modern Algebra 4
  MAT 150B Modern Algebra 4
  MAT 150C Modern Algebra 4
  MAT 185A Complex Analysis 4
B. Enrichment 16
Choose four:
  MAT 111-MAT 185B, excluding MAT 180, worth at least four units each.
  Up to four units can be approved upper division units outside the Department of Mathematics with extensive use of mathematics.
C. Capstone Course 3
Choose one:
  MAT 189 Advanced Problem Solving 3
  MAT 192 Internship in Applied Mathematics 1-3
  MAT 194 Undergraduate Thesis 3
  MAT 180 Special Topics 3

Plan II: Mathematics for Secondary Teaching
A. Core 32
  MAT 111 History of Mathematics 4
  MAT 115A Number Theory 4
  MAT 127A Real Analysis 4
  MAT 127B Real Analysis 4
  MAT 127C Real Analysis 4
  MAT 135A Probability 4
  MAT 141 Euclidean Geometry 4

Mathematics | MAT M.A.
(College of Letters and Science)
Thomas Strohmer, Ph.D., Chairperson

Department Office. 1130 Mathematical Sciences Bldg.; 530-752-0827; studentservices@math.ucdavis.edu; http://www.math.ucdavis.edu

Faculty. https://www.math.ucdavis.edu/people/faculty/

The Mathematics Department offers programs of study and research leading to the M.A. and Ph.D. degrees in Mathematics. Information regarding graduate study may be obtained by consulting our website, and by sending an email to studentservices@math.ucdavis.edu.

Mathematics | MAT Ph.D.
(College of Letters and Science)
Thomas Strohmer, Ph.D., Chairperson

Department Office. 1130 Mathematical Sciences Bldg.; 530-752-0827; studentservices@math.ucdavis.edu; http://www.math.ucdavis.edu

Faculty. https://www.math.ucdavis.edu/people/faculty/

The Mathematics Department offers programs of study and research leading to the M.A. and Ph.D. degrees in Mathematics. Information regarding graduate study may be obtained by consulting our website, and by sending an email to studentservices@math.ucdavis.edu.

Mathematics | MAT Minor
(College of Letters and Science)
Abigail Thompson, Ph.D., Chairperson

Department Office. 1130 Mathematical Sciences Bldg.; 530-752-0827; studentservices@math.ucdavis.edu; http://www.math.ucdavis.edu

Faculty. https://www.math.ucdavis.edu/people/faculty/

The Minor Program
Mathematics is the study of abstract structures, space, change, and the interrelations of these concepts. It also is the language of the exact sciences.

Minor Advisor. For a current list of faculty and staff advisor, contact the Student Services office at studentservices@math.ucdavis.edu, or see https://www.math.ucdavis.edu/undergrad/advising/adviser/.

Mathematics | MAT Courses

Note: Mathematics 016A, 016B, and 016C are intended for students who will take no more Mathematics courses. Mathematics 017A, 017B, and 017C have the same level of rigor as 016A, 016B, and 016C, yet are much more broad mathematically (containing algebra, differential equations and probability, besides traditional calculus), and are intended for biology.

Courses in MAT:

MAT 000B—Elementary Algebra (no credit) (0)
Lecture—3 hours. Not open to Concurrent student enrollment. Basic concepts of algebra, including polynomials, factoring, equations, graphs, and inequalities. Offered only if sufficient number of students enroll. (P/NP grading only.) Effective: 1997 Winter Quarter.

MAT 000C—Trigonometry (no credit) (0)
Lecture—2 hours. Not open to Concurrent student enrollment. Basic concepts of trigonometry, including trigonometric functions, identities, inverse functions, and applications. Offered only if sufficient number of students enroll. (P/NP grading only.) Effective: 1997 Winter Quarter.

MAT 000D—Intermediate Algebra (no credit) (0)
Lecture—3 hours. Not open to Concurrent student enrollment. Basic concepts of algebra, prepares student for college work in mathematics, such as course 16A or 21A. Functions, equations, graphs, logarithms, and systems of equations. Offered only if sufficient number of students enroll. (P/NP grading only.) Effective: 1997 Winter Quarter.

MAT 012—Precalculus (3)
Lecture—3 hours. Prerequisite(s): Two years of high school algebra, plane geometry, plane trigonometry; and obtaining required score on the Precalculus Diagnostic Examination. Topics selected for their use in calculus, including functions and their graphs, slope, zeroes of polynomials, exponential, logarithmic and trigonometric functions, sketching surfaces and solids. Not open for credit to students who have completed any of courses MAT 016A, MAT 016B, MAT 016C, MAT 017A, MAT 017B, MAT 017C, MAT 021A, MAT 021B, or MAT 021C with a C- or better. GE credit: QL, SE, SL. Effective: 2012 Winter Quarter.

MAT 016A—Short Calculus (3)
Lecture—3 hours. Prerequisite(s): Two years of high school algebra, plane geometry, plane trigonometry, and satisfying the Mathematics Placement Requirement. Limits; differentiation of algebraic functions; analytic geometry; applications, in particular to maxima and minima problems. Not open for credit to students who have completed MAT 017B, MAT 017C, MAT 021A, MAT 021B, or MAT 021C; only 2 units of credit to students who have completed MAT 17A. GE credit: QL, SE, SL. Effective: 2012 Winter Quarter.

MAT 016B—Short Calculus (3)
Lecture—3 hours. Prerequisite(s): MAT 016A C- or better or MAT 017A C- or better or MAT 021A C- or better or MAT 021AH C- or better Integration; calculus for trigonometric, exponential, and logarithmic functions; applications. Not open for credit to students who have completed MAT 017B, MAT 017C, MAT 021B, or MAT 021C; only 2 units of credit to students who have completed MAT 17B. GE credit: QL, SE, SL. Effective: 2017 Winter Quarter.

MAT 016C—Short Calculus (3)
Lecture—3 hours. Prerequisite(s): MAT 016B C- or better or MAT 017B C- or better or MAT 021B C- or better or MAT 021BH C- or better Differential equations; partial derivatives; double integrals; applications; series. Not open for credit to students who have completed MAT 021C; only 2 units of credit to students who have completed MAT 017C. GE credit: QL, SE, SL. Effective: 2017 Winter Quarter.

MAT 017A—Calculus for Biology and Medicine (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Two years of high school algebra, plane geometry, plane trigonometry, and analytical geometry, and satisfying the Mathematics Placement Requirement. Introduction to differential calculus via applications in biology and medicine. Limits, derivatives of polynomials, trigonometric, and exponential functions, graphing, applications of the derivative to biology and medicine. Not open for credit to students who have completed MAT 016B, MAT 016C, MAT 021A, MAT 021B, or MAT 021C; only 2 units of credit to students who have completed MAT 016A. GE credit: QL, SE, SL. Effective: 2014 Fall Quarter.
MAT 017B—Calculus for Biology and Medicine (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MAT 016A C- or better or MAT 017A C- or better or MAT 021A C- or better or MAT 021AH C- or better Introduction to integral calculus and elementary differential equations via applications to biology and medicine. Fundamental theorem of calculus, techniques of integration including integral tables and numerical methods, improper integrals, elementary first order differential equations, applications in biology and medicine. Not open for credit to students who have completed MAT 016C, MAT 021B, or MAT 021C; only 2 units of credit for students who have completed MAT 016B. GE credit: QL, SE, SL. Effective: 2017 Winter Quarter.

MAT 017C—Calculus for Biology and Medicine (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MAT 017B C- or better Matrix algebra, functions of several variables, partial derivatives, systems of differential equations, and applications to biology and medicine. Not open for credit to students who have completed MAT 21C; only 2 units of credit to students who have completed MAT 16C. GE credit: SE, SL. Effective: 2016 Fall Quarter.

MAT 021A—Calculus (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Two years of high school algebra, plane geometry, plane trigonometry, and analytical geometry, and satisfying the Mathematics Placement Requirement. Functions, limits, continuity. Slope and derivative. Differentiation of algebraic and transcendental functions. Applications to motion, natural growth, graphing, extrema of a function. Differentials. L'Hopital's rule. Not open for credit to students who have completed MAT 016B, MAT 016C, MAT 017B, or MAT 017C; only 2 units of credit to students who have completed MAT 016A or MAT 017A. GE credit: QL, SE, SL. Effective: 2012 Winter Quarter.

MAT 021AH—Honors Calculus (4)
Lecture/Discussion—4 hours. Prerequisite(s): A Precalculus Diagnostic Examination score significantly higher than the minimum for MAT 021A is required. More intensive treatment of material covered in course 21A. GE credit: QL, SE. Effective: 1997 Winter Quarter.

MAT 021AL—Emerging Scholars Program Calculus Workshop (2)
Workshop—6 hours. Prerequisite(s): MAT 021A (can be concurrent); MAT 021A required concurrently. Functions, limits, continuity. Slope and derivative. Same course content as course 21A. Enrollment for students in the Emerging Scholars Program by instructor's invitation only. (P/NP grading only.) GE credit: SE. Effective: 2006 Fall Quarter.

MAT 021B—Calculus (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (MAT 021A C- or better or MAT 021AH C- or better) or MAT 017A B or better Continuation of course 21A. Definition of definite integral, fundamental theorem of calculus, techniques of integration. Application to area, volume, arc length, average of a function, improper integral, surface of revolution. Only 2 units of credit to students who have completed MAT 016B, MAT 016C, MAT 017B, or MAT 017C. GE credit: QL, SE. Effective: 2017 Winter Quarter.

MAT 021BH—Honors Calculus (4)
Lecture/Discussion—4 hours. Prerequisite(s): MAT 021A B or better or MAT 021BH B or better More intensive treatment of material covered in course 21B. Students completing 21BH can continue with course 21CH or the regular 21C. GE credit: SE. Effective: 1997 Winter Quarter.

MAT 021BL—Emerging Scholars Program Calculus Workshop (2)
Workshop—6 hours. Prerequisite(s): MAT 021B (can be concurrent); Concurrent enrollment in MAT 021B. Continuation of course 21A. Same course content as 21B. Enrollment for students in the Emerging Scholars Program by instructor's invitation only. (P/NP grading only.) GE credit: SE. Effective: 2016 Fall Quarter.

MAT 021C—Calculus (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MAT 016C C- or better or MAT 017C C- or better or MAT 021B C- or better or MAT 021BH C- or better or MAT 017B B or better; Continuation of course 21B. Sequences, series, tests for convergence, Taylor expansions. Vector algebra, vector calculus, scalar and vector fields. Partial derivatives, total differentials. Applications to maximum and minimum problems in two or more variables. Applications to physical systems. GE credit: QL, SE. Effective: 2017 Winter Quarter.

MAT 021CH—Honors Calculus (4)
Lecture/Discussion—4 hours. Prerequisite(s): MAT 021B B or better or MAT 021BH B or better More intensive treatment of material covered in course 21C. GE credit: SE. Effective: 1997 Winter Quarter.

MAT 021CL—Emerging Scholars Program Calculus Workshop (2)
Workshop—6 hours. Prerequisite(s): MAT 021C (can be concurrent); Concurrent enrollment in MAT 021C.
Continuation of course 21B. Same course content as course 21C. Enrollment for students in the Emerging Scholars Program by instructor's invitation only. (P/NP grading only.) GE credit: SE. Effective: 2016 Fall Quarter.

MAT 021D—Vector Analysis (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (MAT 021C C- or better or MAT 021CH C- or better) or MAT 017C B or better Continuation of course 21C. Definite integrals over plane and solid regions in various coordinate systems. Line and surface integrals. Green's theorem, Stokes's theorem, divergence theorem. GE credit: SE. Effective: 2017 Winter Quarter.

MAT 021M—Accelerated Calculus (5)
Discussion/Laboratory—1 hour; Lecture/Discussion—4 hours. Prerequisite(s): Grade of B or higher in both semesters of high school calculus or a score of 4 or higher on the Advanced Placement Calculus AB exam, and obtaining the required score on the Precalculus Diagnostic Examination and its trigonometric component. Accelerated treatment of material from courses 21A and 21B, with detailed presentation of theory, definitions, and proofs, and treatment of computational aspects of calculus at a condensed but sophisticated level. Not open for credit to students who have completed MAT 021A or MAT 021B. GE credit: QL, SE. Effective: 1997 Winter Quarter.

MAT 022A—Linear Algebra (3) Review all entries
Lecture—3 hours. Prerequisite(s): MAT 016C C- or better or MAT 017C C- or better or MAT 021C C- or better or MAT 021CH C- or better; (ENG 006 or EME 005 or MAT 022AL (can be concurrent)) Matrices and linear transformations, determinants, eigenvalues, eigenvectors, diagonalization, factorization. Not open for credit to students who have completed course 67. GE credit: QL, SE. Effective: 2017 Winter Quarter.

MAT 022B—Differential Equations (3) Review all entries
Lecture—3 hours. Prerequisite(s): (MAT 016C C- or better or MAT 017C C- or better or MAT 021C C- or better or MAT 021CH C- or better); (ENG 006 or EME 005 or ECH 060 or MAT 022AL (can be concurrent)) Matrices and linear transformations, determinants, eigenvalues, eigenvectors, diagonalization, factorization. Not open for credit to students who have completed course 67. GE credit: QL, SE. Effective: 2018 Summer Session 1.

MAT 022AL—Linear Algebra Computer Laboratory (1)
Laboratory—3 hours. Prerequisite(s): MAT 016C or MAT 017C or MAT 021C or MAT 021CH Introduction to Matlab and its use in linear algebra. (P/NP grading only.) GE credit: QL, SE. Effective: 2017 Winter Quarter.

MAT 025—Advanced Calculus (4)
Lecture/Discussion—4 hours. Prerequisite(s): MAT 021C C- or better or MAT 021CH C- or better Introduction to linear algebra with biological, medical, and bioengineering applications. Matrix algebra, vector spaces, orthogonality, determinants, eigenvalues, eigenvectors, principal component analysis, singular value decomposition, and linear transformations. Computer labs cover mathematical and computational techniques for modeling biological systems. Only one unit of credit for students who have completed former MAT 127A. GE credit: SE. Effective: 2017 Spring Quarter.

MAT 027A—Linear Algebra with Applications to Biology (4)
Laboratory—2 hours; Lecture—3 hours. Prerequisite(s): MAT 017C C- or better or MAT 021C C- or better or MAT 021CH C- or better Introduction to linear algebra with biological, medical, and bioengineering applications. Matrix algebra, vector spaces, orthogonality, determinants, eigenvalues, eigenvectors, principal component analysis, singular value decomposition, and linear transformations. Computer labs cover mathematical and computational techniques for modeling biological systems. Only one unit of credit for students who have completed MAT 022A. (Same course as BIS 027A.) GE credit: SE. Effective: 2019 Winter Quarter.

MAT 027B—Differential Equations with Applications to Biology (4)
Laboratory—2 hours; Lecture—3 hours. Prerequisite(s): MAT 027A C- or better or (MAT 022A C- or better, (MAT 022AL C- or better or ENG 006 C- or better or EME 005 C- or better)) Solutions of differential equations with biological, medical, and bioengineering applications. First and second order linear equations, phase plane analysis, nonlinear dynamics, Laplace transforms, and the diffusion equation. Computer labs cover mathematical and numerical techniques for modeling biological systems. Only one unit of credit for students who have completed MAT 022B. (Same course as Cross-listed with BIS 027B.) GE credit: SE. Effective: 2019 Spring Quarter.

MAT 036—Fundamentals of Mathematics (3)
Lecture—3 hours. Prerequisite(s): Satisfaction of the Mathematics Placement Requirement. Introduction to fundamental mathematical ideas selected from the principal areas of modern mathematics. Properties of the
primes, the fundamental theorems of arithmetic, properties of the rationals and irrationals, binary and other number systems. Not open for credit to students who have taken MAT 108. Effective: 2001 Winter Quarter.

MAT 067—Modern Linear Algebra (4)
Lecture/Discussion—4 hours. Prerequisite(s): MAT 021C C- or better or MAT 021CH C- or better. Rigorous treatment of linear algebra; topics include vector spaces, bases and dimensions, orthogonal projections, eigenvalues and eigenvectors, similarity transformations, singular value decomposition and positive definiteness. Only one unit of credit to students who have completed MAT 022A. GE credit: SE. Effective: 2017 Winter Quarter.

MAT 071A—Explorations in Elementary Mathematics (3)
Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): Two years of high school mathematics. Weekly explorations of mathematical ideas related to the elementary school curriculum will be carried out by cooperative learning groups. Lectures will provide background and synthesize the results of group exploration. Effective: 1997 Winter Quarter.

MAT 071B—Explorations in Elementary Mathematics (3)
Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): Two years of high school mathematics. Weekly explorations of mathematical ideas related to the elementary school curriculum will be carried out by cooperative learning groups. Lectures will provide background and synthesize the results of group exploration. Effective: 1997 Winter Quarter.

MAT 089—Elementary Problem Solving (1)
Lecture—1 hour. Prerequisite(s): High school mathematics through precalculus. Solve and present solutions to challenging and interesting problems in elementary mathematics. May be repeated up to 1 time(s). (P/NP grading only.) Effective: 2001 Winter Quarter.

MAT 098—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

MAT 099—Special Study for Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

MAT 107—Probability and Stochastic Processes with Applications to Biology (4)
Laboratory—2 hours; Lecture—3 hours. Prerequisite(s): (MAT 027A C- or better or BIS 027A C- or better) or (MAT 022A C- or better, (MAT 022AL C- or better or ENG 006 C- or better or EME 005 C- or better)) Introduction to probability theory and stochastic processes with biological, medical, and bioengineering applications. Combinatorics, discrete and continuous random variables, Bayes' formula, conditional probability, Markov chains, Poisson processes, and Brownian motion. Computer labs cover mathematical and computational modeling techniques. Only 2 units of credit for students who have completed MAT 135A or STA 131A. (Same course as BIS 107) GE credit: SE. Effective: 2019 Spring Quarter.

MAT 108—Introduction to Abstract Mathematics (4)
Lecture/Discussion—4 hours. Prerequisite(s): MAT 021B A rigorous treatment of mathematical concepts with emphasis on developing the ability to understand abstract mathematical ideas, to read and write mathematical concepts, and to prove theorems. Designed to serve as preparation for the more rigorous upper division courses. GE credit: SE. Effective: 2008 Spring Quarter.

MAT 111—History of Mathematics (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 025 or MAT 067 or MAT 108 or MAT 114 or MAT 115A or MAT 141 or MAT 145; One of the courses mentioned; eight units of upper division Mathematics. History of mathematics from ancient times through the development of calculus. Mathematics from Arab, Hindu, Chinese and other cultures. Selected topics from the history of modern mathematics. GE credit: SE. Effective: 2010 Fall Quarter.

MAT 111—History of Mathematics (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 025 or MAT 127A or MAT 067 or MAT 108 or MAT 114 or MAT 115A or MAT 141 or MAT 145; Eight units of upper division Mathematics. History of mathematics from ancient times through the development of calculus. Mathematics from Arab, Hindu, Chinese and other cultures. Selected topics from the history of modern mathematics. GE credit: SE. Effective: 2018 Fall Quarter.

MAT 114—Convex Geometry (4)
Lecture/Discussion—4 hours. Prerequisite(s): MAT 021C; (MAT 022A or MAT 067) Topics selected from the theory of convex bodies, convex functions, geometric inequalities, combinatorial geometry, and integral geometry. Designed to serve as preparation for the more rigorous upper-division courses. GE credit: SE. Effective: 2007 Winter Quarter.
MAT 115A—Number Theory (4)
Lecture/Discussion—4 hours. Prerequisite(s): MAT 021B Divisibility and related topics, diophantine equations, selected topics from the theory of prime numbers. Designed to serve as preparation for the more rigorous upper division courses. GE credit: QL, SE. Effective: 2006 Fall Quarter.

MAT 115B—Number Theory (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): MAT 115A; (MAT 022A or MAT 067) Euler function, Moebius function, congruences, primitive roots, quadratic reciprocity law. GE credit: QL, SE, SL. Effective: 2016 Fall Quarter.

MAT 116—Differential Geometry (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): MAT 021D; MAT 022B; (MAT 022A or MAT 067) Vector analysis, curves, and surfaces in three dimensions. GE credit: SE. Effective: 2017 Winter Quarter.

MAT 118A—Partial Differential Equations: Elementary Methods (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): MAT 021D; MAT 022B; (MAT 022A or MAT 067) Derivation of partial differential equations; separation of variables; equilibrium solutions and Laplace's equation; Fourier series; method of characteristics for the one dimensional wave equation. Solution of nonhomogeneous equations. GE credit: QL, SE. Effective: 2006 Fall Quarter.

MAT 118B—Partial Differential Equations: Eigenfunction Expansions (4)
Lecture—3 hours. Prerequisite(s): MAT 118A Sturm-Liouville Theory; selfadjoint operators; mixed boundary conditions; partial differential equations in two and three dimensions; Eigenvalue problems in circular domains; nonhomogeneous problems and the method of eigenfunction expansions; Poisson's Equations. GE credit: QL, SE. Effective: 2000 Fall Quarter.

MAT 118C—Partial Differential Equations: Green's Functions and Transforms (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): MAT 118B Green's functions for one-dimensional problems and Poisson's equation; Fourier transforms; Green's Functions for time dependent problems; Laplace transform and solution of partial differential equations. GE credit: QL, SE. Effective: 2000 Fall Quarter.

MAT 119A—Ordinary Differential Equations (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): MAT 021D; MAT 022B; (MAT 022A or MAT 067) Scalar and planar autonomous systems; nonlinear systems and linearization; existence and uniqueness of solutions; matrix solution of linear systems; phase plane analysis; stability analysis; bifurcation theory; Liapunov's method; limit cycles; Poincare Bendixson theory. GE credit: QL, SE. Effective: 2000 Fall Quarter.

MAT 119B—Ordinary Differential Equations (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): MAT 119A Lorentz equations; Poincare maps; center manifolds and normal forms; scalar and planar maps; phase space analysis for iterated maps; period-doubling bifurcation; Lyapunov exponent; chaos and symbolic dynamics; strange attractors; fractals. GE credit: QL, SE. Effective: 2007 Spring Quarter.

MAT 124—Mathematical Biology (4)
Lecture—3 hours; Project (Term Project). Prerequisite(s): MAT 022B; (MAT 022A or MAT 067) Methods of mathematical modeling of biological systems including difference equations, ordinary differential equations, stochastic and dynamic programming models. Computer simulation methods applied to biological systems. Applications to population growth, cell biology, physiology, evolutionary ecology and protein clustering. MATLAB programming required. GE credit: QL, SE. Effective: 2007 Spring Quarter.

MAT 125A—Real Analysis (4)
Lecture/Discussion—4 hours. Prerequisite(s): MAT 025 Functions, limits of functions, continuity and uniform continuity, sequences of functions, series of real numbers, series of functions, power series. Not open for credit to students who have completed former MAT 127B. GE credit: SE. Effective: 2006 Fall Quarter.

MAT 125B—Real Analysis (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MAT 125A; (MAT 067 or (MAT 022A, MAT 108)) Theory of the derivative, Taylor series, integration, partial derivatives, Implicit Function Theorem. Not open for credit to students who have completed former MAT 127C. GE credit: SE. Effective: 2017 Winter Quarter.

MAT 127A—Real Analysis (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (MAT 021C or MAT 021CH); (MAT 067 or (MAT 022A, MAT 108) Real numbers, sequences, series, and continuous functions. May be repeated for credit. Effective: 2017 Fall Quarter.
MAT 127B—Real Analysis (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MAT 127A Derivatives, integrals, sequences of functions, and power series. Effective: 2017 Fall Quarter.

MAT 127C—Real Analysis (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MAT 127B Metric spaces and multi-variable calculus. Effective: 2017 Fall Quarter.

MAT 128A—Numerical Analysis (4) Review all entries
Lecture—3 hours; Project (Term Project). Prerequisite(s): MAT 021C; ECS 030 Error analysis, approximation, interpolation, numerical differentiation and integration. Programming in language such as Pascal, Fortran, or BASIC required. GE credit: QL, SE. Effective: 2016 Fall Quarter.

MAT 128B—Numerical Analysis in Solution of Equations (4) Review all entries
Lecture—3 hours; Project (Term Project). Prerequisite(s): MAT 021C; (MAT 022A or MAT 067); ECS 030 Solution of nonlinear equations and nonlinear systems. Minimization of functions of several variables. Simultaneous linear equations. Eigenvalue problems. Linear programming. Programming in language such as Pascal, Fortran, or BASIC required. GE credit: QL, SE. Effective: 2016 Fall Quarter.

MAT 128C—Numerical Analysis in Differential Equations (4) Review all entries
Lecture—3 hours; Project (Term Project). Prerequisite(s): MAT 022B; (MAT 022A or MAT 067); ECS 030 Difference equations, operators, numerical solutions of ordinary and partial differential equations. Programming in language such as Pascal, Fortran, or BASIC required. GE credit: QL, SE. Effective: 2016 Fall Quarter.

MAT 129—Fourier Analysis (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): MAT 021D; MAT 022B; (MAT 022A or MAT 067); MAT 025 Fourier series and integrals, orthogonal sets of functions. Topics selected from trigonometric approximation, orthogonal polynomials, applications to signal and image processing, numerical analysis, and differential equations. GE credit: QL, SE. Effective: 2016 Fall Quarter.

MAT 133—Mathematical Finance (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): (MAT 067 or (MAT 022A, MAT 108)), MAT 135A Analysis and evaluation of deterministic and random cash flow streams, yield and pricing of basic financial instruments, interest rate theory, mean-variance portfolio theory, capital asset pricing models, utility functions and general principles. MATLAB programming required. GE credit: QL, SE, SL. Effective: 2016 Fall Quarter.

MAT 135A—Probability (4)
Lecture/Discussion—4 hours. Prerequisite(s): MAT 021C; (MAT 108 or MAT 025) Probability space; discrete probability, combinatorial analysis; independence, conditional probability; random variables, discrete and continuous distributions, probability mass function, joint and marginal density functions; expectation, moments, variance, Chebyshev inequality; sums of random variables, random walk, large number law, central limit theorem. Not open for credit to students who have completed former MAT 131. GE credit: SE. Effective: 2018 Spring Quarter.

MAT 135B—Stochastic Processes (4)
Discussion/Laboratory—4 hours. Prerequisite(s): MAT 135A; (MAT 022A or MAT 067) Generating functions, branching processes, characteristic function; Markov chains; convergence of random variables, law of iterated logarithm; random processes, Brownian motion, stationary processes, renewal processes, queueing theory,
martingales. Not open for credit to students who have completed former MAT 132A. GE credit: QL, SE. Effective: 2009 Spring Quarter.

MAT 141—Euclidean Geometry (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MAT 021B; (MAT 022A or MAT 067) Axiomatic and analytic examination of Euclidean geometry from an advanced point of view. In particular, a discussion of its relation to other geometries. Designed to serve as preparation for the more rigorous upper division courses. GE credit: SE. Effective: 2008 Winter Quarter.

MAT 145—Combinatorics (4)
Lecture/Discussion—4 hours. Prerequisite(s): MAT 021C Combinatorial methods using basic graph theory, counting methods, generating functions, and recurrence relations. Designed to serve as preparation for the more rigorous upper division courses. GE credit: QL, SE. Effective: 2016 Fall Quarter.

MAT 146—Algebraic Combinatorics (4) \textbf{Review all entries}
Lecture/Discussion—4 hours. Prerequisite(s): MAT 145; MAT 025; (MAT 022A or MAT 067) Enumeration, Polya theory, generating functions, current topics in algebraic combinatorics. Not open for credit to students who have completed former course 149A. GE credit: SE. Effective: 2007 Spring Quarter.

MAT 147—Topology (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): MAT 025 Basic notions of point-set and combinatorial topology. GE credit: SE. Effective: 2016 Fall Quarter.

MAT 148—Discrete Mathematics (4)
Lecture/Discussion—4 hours. Prerequisite(s): MAT 067 or (MAT 022A, MAT 108) Coding theory, error correcting codes, finite fields and the algebraic concepts needed in their development. Not open for credit to students who have completed former MAT 149B. GE credit: QL, SE. Effective: 2016 Fall Quarter.

MAT 150A—Modern Algebra (4)
Lecture/Discussion—4 hours. Prerequisite(s): MAT 067 or (MAT 022A, MAT 108) Basic concepts of groups, symmetries of the plane. Emphasis on the techniques used in the proof of the ideas (Lemmas, Theorems, etc.) developing these concepts. Precise thinking, proof writing, and the ability to deal with abstraction. GE credit: SE. Effective: 2016 Winter Quarter.

MAT 150B—Modern Algebra (4)
Lecture/Discussion—4 hours. Prerequisite(s): MAT 150A Bilinear forms, rings, factorization, modules. GE credit: SE. Effective: 2007 Winter Quarter.

MAT 150C—Modern Algebra (4)
Lecture/Discussion—4 hours. Prerequisite(s): MAT 150B Group representations, fields, Galois theory. GE credit: SE. Effective: 2007 Spring Quarter.

MAT 160—Mathematics for Data Analytics and Decision Making (4)
Lecture—3 hours; Project (Term Project). Prerequisite(s): MAT 167 Relational model; relational algebra, relational calculus, normal forms, functional and multivalued dependencies, separability. Cost benefit analysis of physical database design and reorganization. Performance via analytical modeling, simulation, and queueing theory. Block accesses; buffering; operating system contention; CPU intensive operations. GE credit: SE. Effective: 2018 Spring Quarter.

MAT 165—Mathematics and Computers (4)
Lecture—3 hours; Project (Term Project). Prerequisite(s): MAT 022A or MAT 067; (MAT 025 or MAT 108 or MAT 114 or MAT 115A or MAT 145) Introduction to computational mathematics, symbolic computation, and computer generated/verified proofs in algebra, analysis and geometry. Investigation of rigorous new mathematics developed in conjunction with modern computational questions and the role that computers play in mathematical conjecture and experimentation. GE credit: QL, SE. Effective: 2016 Fall Quarter.

MAT 167—Applied Linear Algebra (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): MAT 022A or MAT 067 Applications of linear algebra;
LU and QR matrix factorizations, eigenvalue and singular value matrix decompositions. GE credit: QL, SE. Effective: 2016 Fall Quarter.

**MAT 168—Optimization (4)**
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): MAT 021C; ((MAT 022A, MAT 108) or MAT 067)) Linear programming, simplex method. Basic properties of unconstrained nonlinear problems, descent methods, conjugate direction method. Constrained minimization. Programming language required. GE credit: QL, SE. Effective: 2016 Fall Quarter.

**MAT 180—Special Topics (3)**
Lecture—3 hours. Prerequisite(s): MAT 025; (MAT 067 or (MAT 022A, MAT 108)) Special topics from various fields of modern, pure, and applied mathematics. Some recent topics include Knot Theory, General Relativity, and Fuzzy Sets. May be repeated for credit when topics differs. GE credit: SE. Effective: 2016 Fall Quarter.

**MAT 185A—Complex Analysis (4)**
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): (MAT 067 or (MAT 022A, MAT 108)), MAT 125A Complex number system, analyticity and the Cauchy-Riemann equations, elementary functions, complex integration, power and Laurent series expansions, residue theory. GE credit: SE. Effective: 2016 Fall Quarter.

**MAT 185B—Complex Analysis (4)**
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): MAT 185A Analytical functions, elementary functions and their mapping properties, applications of Cauchy's integral theorem, conformal mapping and applications to heat flow and fluid mechanics. GE credit: SE. Effective: 2007 Spring Quarter.

**MAT 189—Advanced Problem Solving (3)**
Lecture—3 hours. Prerequisite(s): MAT 025; ((MAT 022A, MAT 108) or MAT 067) Solution and presentation of advanced problem solving techniques. Solve and present interesting and challenging problems of all areas of mathematics. GE credit: OL, QL, SE, WE. Effective: 2016 Fall Quarter.

**MAT 192—Internship in Applied Mathematics (1-3)**
Internship. Prerequisite(s): Consent of Instructor. Supervised work experience in applied mathematics. Final report. May be repeated up to 10 unit(s). (P/NP grading only.) Effective: 2016 Fall Quarter.

**MAT 194—Undergraduate Thesis (3)**
Independent Study. Prerequisite(s): Consent of Instructor. Independent research under supervision of a faculty member. Student will submit written report in thesis form. May be repeated for credit with consent of Vice Chairperson. (P/NP grading only.) GE credit: SE. Effective: 2016 Fall Quarter.

**MAT 197TC—Tutoring Mathematics in the Community (1-5)**
Laboratory—2-6 hours; Seminar—1-2 hours. Prerequisite(s): Consent of Instructor. Special projects in mathematical education developing techniques for mathematics instruction and tutoring on an individual or small group basis. May be repeated once for credit. May be repeated up to 1 time(s). (P/NP grading only.) Effective: 2016 Fall Quarter.

**MAT 198—Directed Group Study (1-5)**
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 2016 Fall Quarter.

**MAT 199—Special Study for Advanced Undergraduates (1-5)**
Variable. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

**MAT 200A—Problem-Solving in Analysis (1)**
Extensive Problem Solving; Lecture—1 hour. Prerequisite(s): MAT 201A; MAT 201B; MAT 201C Problem-solving in graduate analysis: continuous functions, metric spaces, Banach and Hilbert spaces, bounded linear operators, the spectral theorem, distributions, Fourier series and transforms, Lp spaces, Sobolev spaces. May be repeated up to 2 time(s). Effective: 2010 Spring Quarter.

**MAT 200B—Problem-Solving in Analysis (2)**
Extensive Problem Solving; Lecture—1 hour. Prerequisite(s): MAT 201A; MAT 201B; MAT 201C Problem-solving in graduate analysis: continuous functions, metric spaces, Banach and Hilbert spaces, bounded linear operators, the spectral theorem, distributions, Fourier series and transforms, Lp spaces, Sobolev spaces. May be repeated up to 2 time(s). Effective: 2010 Fall Quarter.

**MAT 201A—Analysis (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): Graduate standing in Mathematics or Applied Mathematics, or consent of instructor. Metric and normed spaces. Continuous functions. Topological, Hilbert, and Banach spaces. Fourier series. Spectrum of bounded and compact linear operators. Linear differential operators

**MAT 201B—Analysis (4)**

**MAT 201C—Analysis (4)**

**MAT 202—Functional Analysis (4)**

**MAT 205—Complex Analysis (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 185A; Or equivalent to MAT 185A, or consent of instructor. Analytic continuation, Riemann surfaces, conformal mappings, Riemann mapping theorem, entire functions, special functions, elliptic functions. Effective: 2009 Spring Quarter.

**MAT 205A—Complex Analysis (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 185A; Or equivalent to MAT 185A, or consent of instructor. Cauchy's theorem, Cauchy's integral formulas, meromorphic functions, complex logarithm, entire functions, Weierstrass infinite product formula, the gamma and zeta functions, and prime number theorem. No credit given to students who have completed MAT 205. Effective: 2011 Fall Quarter.

**MAT 205B—Complex Analysis (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 205A; or Consent of Instructor. Conformal mappings, the Schwarz lemma, analytic automorphisms, the Riemann mapping theorem, elliptic functions, Eisenstein series, the Jacobi theta functions, asymptotics, Bessel functions, the Airy function, topics on special functions and Riemann surfaces. May be repeated up to 2 time(s) if topic varies. Effective: 2011 Spring Quarter.

**MAT 206—Measure Theory (4)**
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): MAT 125B Introduction to measure theory. The study of lengths, surface areas, and volumes in general spaces, as related to integration theory. Effective: 2007 Spring Quarter.

**MAT 207A—Methods of Applied Mathematics (4)**

**MAT 207B—Methods of Applied Mathematics (4)**

**MAT 207C—Methods of Applied Mathematics (4)**

**MAT 215A—Topology (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): Graduate standing or consent of instructor. Fundamental group and covering space theory. Homology and cohomology. Manifolds and duality. CW complexes. Fixed point theorems. Effective: 2002 Fall Quarter.

**MAT 215B—Topology (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): Graduate standing or consent of instructor. Fundamental group and covering space theory. Homology and cohomology. Manifolds and duality. CW complexes. Fixed point theorems. Effective: 2002 Fall Quarter.

**MAT 215C—Topology (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): Graduate standing or consent of instructor. Fundamental group and covering space theory. Homology and cohomology. Manifolds and duality. CW complexes. Fixed point theorems. Effective: 2002 Fall Quarter.

**MAT 216—Geometric Topology (4)**

**MAT 218A—Partial Differential Equations (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 201A; MAT 201B; MAT 201C; or Consent of Instructor. Year-long sequence on PDEs which covers linear transport, Laplace, heat, and wave equations, maximum principles, method of characteristics, Sobolev and Hölder space theory, weak derivatives, semilinear, quasilinear, and fully nonlinear elliptic/parabolic equations, nonlinear hyperbolic equations, and compensated compactness. Effective: 2009 Fall Quarter.

**MAT 218B—Partial Differential Equations (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 218A; or Consent of Instructor. Year-long sequence on PDEs which covers linear transport, Laplace, heat, and wave equations, maximum principles, method of characteristics, Sobolev and Hölder space theory, weak derivatives, semilinear, quasilinear, and fully nonlinear elliptic/parabolic equations, nonlinear hyperbolic equations, and compensated compactness. Effective: 2010 Winter Quarter.

**MAT 218C—Partial Differential Equations (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 218B; or Consent of Instructor. Year-long sequence on PDEs which covers linear transport, Laplace, heat, and wave equations, maximum principles, method of characteristics, Sobolev and Hölder space theory, weak derivatives, semilinear, quasilinear, and fully nonlinear elliptic/parabolic equations, nonlinear hyperbolic equations, and compensated compactness. Effective: 2010 Spring Quarter.

**MAT 221A—Mathematical Fluid Dynamics (4)**

**MAT 221B—Mathematical Fluid Dynamics (4)**

**MAT 226A—Numerical Methods: Fundamentals (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 128A; MAT 128B; Or equivalent, or consent of instructor; familiarity with some programming language. Fundamental principles and methods in numerical analysis, including the concepts of stability of algorithms and conditioning of numerical problems, numerical methods for interpolation and integration, eigenvalue problems, singular value decomposition and its applications. Effective: 2009 Fall Quarter.
MAT 226B—Numerical Methods: Large-Scale Matrix Computations (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 167; Or equivalent, or consent of instructor; familiarity with some programming language. Numerical methods for large-scale matrix computations, including direct and iterative methods for the solution of linear systems, the computation of eigenvalues and singular values, the solution of least-squares problems, matrix compression, methods for the solution of linear programs. Effective: 2010 Winter Quarter.

MAT 226C—Numerical Methods: Ordinary Differential Equations (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 022B; Or equivalent, or consent of instructor; familiarity with some programming language. Numerical methods for the solution of ordinary differential equations, including methods for initial-value problems and two-point boundary-value problems, theory of and methods for differential algebraic equations, dimension reduction of large-scale dynamical systems. Effective: 2010 Spring Quarter.

MAT 227—Mathematical Biology (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): Graduate standing or consent of instructor. Nonlinear ordinary and partial differential equations and stochastic processes of cell and molecular biology. Scaling, qualitative, and numerical analysis of mathematical models. Applications to nerve impulse, chemotaxis, muscle contraction, and morphogenesis. Effective: 2002 Fall Quarter.

MAT 228A—Numerical Solution of Differential Equations (4)

MAT 228B—Numerical Solution of Differential Equations (4)

MAT 228C—Numerical Solution of Differential Equations (4)

MAT 235A—Probability Theory (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 125B; (MAT 135A or STA 131A); or Consent of Instructor. Measure-theoretic foundations, abstract integration, independence, laws of large numbers, characteristic functions, central limit theorems. Weak convergence in metric spaces, Brownian motion, invariance principle. Conditional expectation. Topics selected from: martingales, Markov chains, ergodic theory. (Same course as STA 235A.) Effective: 2007 Fall Quarter.

MAT 235B—Probability Theory (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 235A or STA 235A; or Consent of Instructor. Measure-theoretic foundations, abstract integration, independence, laws of large numbers, characteristic functions, central limit theorems. Weak convergence in metric spaces, Brownian motion, invariance principle. Conditional expectation. Topics selected from: martingales, Markov chains, ergodic theory. (Same course as STA 235B.) Effective: 2008 Spring Quarter.

MAT 235C—Probability Theory (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 235B or STA 235B; or Consent of Instructor. Measure-theoretic foundations, abstract integration, independence, laws of large numbers, characteristic functions, central limit theorems. Weak convergence in metric spaces, Brownian motion, invariance principle. Conditional expectation. Topics selected from: martingales, Markov chains, ergodic theory. (Same course as STA 235C.) Effective: 2008 Spring Quarter.

MAT 236A—Stochastic Dynamics and Applications (4)
MAT 236B—Stochastic Dynamics and Applications (4)

MAT 239—Differential Topology (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): MAT 201A; or Consent of Instructor. Vector calculus, point-set topology; MAT 250A and MAT 250B is highly recommended. Topics include: differentiable manifolds, vector fields, transversality, Sard's theorem, examples of differentiable manifolds; orientation, intersection theory, index of vector fields; differential forms, integration, Stokes' theorem, deRham cohomology; Morse functions, Morse lemma, index of critical points. Effective: 2007 Spring Quarter.

MAT 240A—Differential Geometry (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 201A; MAT 239; MAT 250A and MAT 250B highly recommended; intended primarily for second-year graduate students. Riemannian metrics, connections, geodesics, Gauss lemma, convex neighborhoods, curvature tensor, Ricci and scalar curvature, connections and curvature on vector bundles. Effective: 2008 Fall Quarter.

MAT 240B—Differential Geometry (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 240A; Intended primarily for second-year graduate students. Jacobi fields, conjugate points, completeness, Hopf-Rinow theorem, Cartan-Hadamard theorem, energy, variation theorems and their applications, Rauch comparison theorem and its applications. Effective: 2009 Winter Quarter.

MAT 245—Enumerative Combinatorics (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): MAT 145; MAT 150; or the equivalent, or consent of instructor. Introduction to modern combinatorics and its applications. Emphasis on enumerative aspects of combinatorial theory. Effective: 2004 Fall Quarter.

MAT 246—Algebraic Combinatorics (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): MAT 245; or Consent of Instructor. Algebraic and geometric aspects of combinatorics. The use of structures such as groups, polytopes, rings, and simplicial complexes to solve combinatorial problems. Effective: 2005 Winter Quarter.

MAT 248A—Algebraic Geometry (4)

MAT 248B—Algebraic Geometry (4)

MAT 249—Problem-Solving in Algebra (3)
Extensive Problem Solving; Lecture—1 hour. Prerequisite(s): MAT 250A (can be concurrent); MAT 250B (can be concurrent) Problem-solving in graduate algebra: groups, rings, modules, matrices, tensor products, representations, Galois theory, ring extensions, commutative algebra and homological algebra. (S/U grading only.) Effective: 2019 Fall Quarter.

MAT 249A—Problem-Solving in Algebra (1) Review all entries
Extensive Problem Solving; Lecture—1 hour. Prerequisite(s): MAT 250A; MAT 250B Problem-solving in graduate algebra: groups, rings, modules, matrices, tensor products, representations, Galois theory, ring extensions, commutative algebra and homological algebra. May be repeated up to 2 time(s). Effective: 2011 Spring Quarter.

MAT 249A—Problem-Solving in Algebra (1) Review all entries Discontinued
Extensive Problem Solving; Lecture—1 hour. Prerequisite(s): MAT 250A; MAT 250B Problem-solving in graduate algebra: groups, rings, modules, matrices, tensor products, representations, Galois theory, ring extensions, commutative algebra and homological algebra. May be repeated up to 2 time(s). Effective: 2019 Spring Quarter.

MAT 249B—Problem-Solving in Algebra (2) Review all entries
Extensive Problem Solving; Lecture—1 hour. Prerequisite(s): MAT 250A; MAT 250B Problem-solving in graduate
algebra: groups, rings, modules, matrices, tensor products, representations, Galois theory, ring extensions, commutative algebra and homological algebra. May be repeated up to 2 time(s). Effective: 2011 Fall Quarter.

**MAT 249B—Problem-Solving in Algebra (2)**  
Review all entries Discontinued

Extensive Problem Solving; Lecture—1 hour. Prerequisite(s): MAT 250A; MAT 250B Problem-solving in graduate algebra: groups, rings, modules, matrices, tensor products, representations, Galois theory, ring extensions, commutative algebra and homological algebra. May be repeated up to 2 time(s). Effective: 2019 Fall Quarter.

**MAT 250A—Algebra (4)**

**MAT 250B—Algebra (4)**

**MAT 250C—Algebra (4)**

**MAT 258A—Numerical Optimization (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 025; MAT 167 Numerical methods for infinite dimensional optimization problems. Newton and Quasi-Newton methods, linear and sequential quadratic programming, barrier methods; large-scale optimization; theory of approximations; infinite and semi-infinite programming; applications to optimal control, stochastic optimization and distributed systems. Effective: 2007 Fall Quarter.

**MAT 258B—Discrete and Mixed-Integer Optimization (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 025; MAT 167; or Consent of Instructor. Combinatorial, integer, and mixed-integer linear optimization problems. Ideal and strong formulations, cutting planes, branch and cut, decomposition methods. Effective: 2014 Fall Quarter.

**MAT 261A—Lie groups and their representations (4)**

**MAT 261B—Lie groups and their representations (4)**

**MAT 265—Mathematical Quantum Mechanics (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 201; or Consent of Instructor. Mathematical foundations of quantum mechanics: the Hilbert space and Operator Algebra formulations; the Schrödinger and Heisenberg equations, symmetry in quantum mechanics, basics of spectral theory and perturbation theory. Applications to atoms and molecules. The Dirac equation. Effective: 2003 Fall Quarter.

**MAT 266—Mathematical Statistical Mechanics and Quantum Field Theory (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): MAT 265; or Consent of Instructor. Mathematical principles of statistical mechanics and quantum field theory. Topics include classical and quantum lattice systems, variational principles, spontaneous symmetry breaking and phase transitions, second quantization and Fock space, and fundamentals of quantum field theory. May be repeated up to 1 time(s). Effective: 2010 Spring Quarter.

**MAT 271—Applied and Computational Harmonic Analysis (4)**
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): (MAT 125B or MAT 201C); (MAT 128B or MAT 167); MAT
129; Or the equivalent, or consent of instructor. Introduction to mathematical basic building blocks (wavelets, local Fourier basis, and their relatives) useful for diverse fields (signal and image processing, numerical analysis, and statistics). Emphasis on the connection between the continuum and the discrete worlds. Effective: 2007 Fall Quarter.

**MAT 280—Topics in Pure and Applied Mathematics (3)**
Lecture—3 hours. Prerequisite(s): Graduate standing. Special topics in various fields of pure and applied mathematics. Topics selected based on the mutual interests of students and faculty. May be repeated for credit when topic differs. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

**MAT 290—Seminar (1-6)**
Seminar—1-6 hours. Advanced study in various fields of mathematics, including analysis, applied mathematics, discrete mathematics, geometry, mathematical biology, mathematical physics, optimization, partial differential equations, probability, and topology. May be repeated for credit. (S/U grading only.) Effective: 2003 Spring Quarter.

**MAT 298—Group Study (1-5)**

**MAT 299—Individual Study (1-12)**
Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

**MAT 299D—Dissertation Research (1-12)**
Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

**MAT 301A—Mathematics Teaching Practicum (3)**
Discussion—1 hour; Fieldwork—5 hours. Prerequisite(s): MAT 302A (can be concurrent); MAT 303A (can be concurrent); MAT 302A and MAT 303A required concurrently or consent of instructor. Specialist training in mathematics teaching. Teaching, training, and cross observing classes taught using large group Socratic techniques, small group guided inquiry experiences, and/or other approaches to teaching at various grade levels. Required for advanced degrees in mathematics education. May be repeated up to 1 time(s). Effective: 2001 Fall Quarter.

**MAT 301B—Mathematics Teaching Practicum (3)**
Discussion—1 hour; Fieldwork—5 hours. Prerequisite(s): MAT 302B (can be concurrent); MAT 303B (can be concurrent); MAT 302B and MAT 303B required concurrently or consent of instructor. Specialist training in mathematics teaching. Teaching, training, and cross observing classes taught using large group Socratic techniques, small group guided inquiry experiences, and/or other approaches to teaching at various grade levels. Required for advanced degrees in mathematics education. May be repeated up to 1 time(s). Effective: 2002 Winter Quarter.

**MAT 301C—Mathematics Teaching Practicum (3)**
Discussion—1 hour; Fieldwork—5 hours. Prerequisite(s): MAT 302C (can be concurrent); MAT 303B (can be concurrent); MAT 302B and MAT 303C required concurrently or consent of instructor. Specialist training in mathematics teaching. Teaching, training, and cross observing classes taught using large group Socratic techniques, small group guided inquiry experiences, and/or other approaches to teaching at various grade levels. Required for advanced degrees in mathematics education. May be repeated up to 1 time(s). Effective: 2002 Spring Quarter.

**MAT 302A—Curriculum Development in Mathematics (1)**
Lecture/Discussion—1 hour. Prerequisite(s): MAT 303A (can be concurrent); MAT 303A required concurrently or consent of instructor. Mathematics curriculum development for all grade levels. Required for advanced degrees in mathematics education. May be repeated up to 1 time(s). Effective: 2001 Fall Quarter.

**MAT 302B—Curriculum Development in Mathematics (1)**
Lecture/Discussion—1 hour. Prerequisite(s): MAT 303B (can be concurrent); MAT 303B required concurrently or consent of instructor. Mathematics curriculum development for all grade levels. Required for advanced degrees in mathematics education. May be repeated up to 1 time(s). Effective: 2002 Winter Quarter.

**MAT 302C—Curriculum Development in Mathematics (1)**
Lecture/Discussion—1 hour. Prerequisite(s): MAT 303C (can be concurrent); MAT 303C required concurrently or consent of instructor. Mathematics curriculum development for all grade levels. Required for advanced degrees in mathematics education. May be repeated for credit. Effective: 2002 Spring Quarter.
MAT 303A—Mathematics Pedagogy (1)
Lecture/Discussion—1 hour. Prerequisite(s): MAT 302A (can be concurrent) or MAT 210AL (can be concurrent); MAT 302A or MAT 210AL required concurrently or consent of instructor. An investigation of the interplay of mathematical pedagogy and mathematical content, including a historical survey of past and present methods in view of some of the influences that shaped their development. May be repeated up to 1 time(s). Effective: 2001 Fall Quarter.

MAT 303B—Mathematics Pedagogy (1)
Lecture/Discussion—1 hour. Prerequisite(s): MAT 302B (can be concurrent) or MAT 210BL (can be concurrent); MAT 302B or MAT 210BL required concurrently or consent of instructor. An investigation of the interplay of mathematical pedagogy and mathematical content, including a historical survey of past and present methods in view of some of the influences that shaped their development. May be repeated up to 1 time(s). Effective: 2002 Winter Quarter.

MAT 303C—Mathematics Pedagogy (1)
Lecture/Discussion—1 hour. Prerequisite(s): MAT 302C (can be concurrent) or MAT 210CL (can be concurrent); MAT 302C or MAT 210CL required concurrently or consent of instructor. An investigation of the interplay of mathematical pedagogy and mathematical content, including a historical survey of past and present methods in view of some of the influences that shaped their development. May be repeated up to 1 time(s). Effective: 2002 Spring Quarter.

MAT 390—Teaching Assistantship Training (3)
Lecture—3 hours. Prerequisite(s): Graduate standing in the Department of Mathematics. Experience in methods of assisting and teaching of mathematics at the university level. Includes discussion of lecturing techniques, running discussion sessions, holding office hours, preparing and grading of examinations, student-teacher interaction, and related topics. Required of departmental teaching assistants. (S/U grading only.) Effective: 2008 Fall Quarter.

MAT 399—Individual Study (2-4)
Discussion—1 hour; Independent Study—2-3 hours. Individual study of some aspect of mathematics education or a focused work on a curriculum design project under supervision of a faculty member in mathematics. May be repeated up to 1 time(s). (S/U grading only.) Effective: 2002 Spring Quarter.

Mechanical & Aerospace Engineering; Engineering

Mechanical & Aerospace Engineering; Engineering | MAE Information

(College of Engineering)
Stephen K. Robinson, Ph.D., Chairperson of the Department
Benjamin D. Shaw, Ph.D., Vice Chairperson for Undergraduate Studies

Department Office. 2132 Bainer Hall; 530-752-0580; Fax 530-752-4158; http://mae.ucdavis.edu
Faculty. http://mae.ucdavis.edu/people/faculty/

Mechanical & Aerospace Engineering; Engineering | MAE M.S.

(College of Engineering)
Stephen K. Robinson, Ph.D., Chairperson of the Department
Benjamin D. Shaw, Ph.D., Vice Chairperson for Undergraduate Studies

Department Office. 2132 Bainer Hall; 530-752-0580; Fax 530-752-4158; http://mae.ucdavis.edu
Faculty. http://mae.ucdavis.edu/people/faculty/

The defining element of graduate study in the Mechanical and Aerospace Engineering Program is interdisciplinary design. Research within this graduate program advances design in diverse fields such as vehicles, plasma MHD propulsion, biomechanics, aerostructures, sensors, combustion, and energy systems. Graduate students acquire skills both to address fundamental issues in these areas and to design complex, multi-component systems. The highly collaborative environment fosters multidisciplinary research while drawing on the study of mathematics, experimental and space plasma science, electrical engineering, materials science, materials modeling, molecular dynamics and numerical analysis, bioengineering, space physics, and nanotechnology in addition to the core areas. Recruiters from industry are active here, knowing that, in addition to having hands-on design experience, our students are well grounded in engineering fundamentals. They study with professors who “wrote the book” on their discipline, and work on design projects with researchers who are international authorities in their field. Our
graduate students are able to work closely with faculty in a friendly but demanding environment where teamwork and faculty mentoring are important, as is the cross-disciplinary, collaborative culture that is unique to UC Davis.

Research Highlights:

- Aeronautics and aerostructures
- Spacecraft design and operation
- Space environmental studies
- Remote sensing
- Electrical propulsion
- Flight dynamics and control
- Computational fluid dynamics
- Experimental MHD turbulence studies
- Dynamic systems and controls
- Robotics
- Materials modeling
- Manufacturing and Mechanical design
- Reacting flows
- Heat transfer
- Automotive system dynamics
- Biosensors/Microelectromechanical Systems (MEMS)
- Molecular self-assembly
- Radiation effects in solids
- Nonlinear dynamics and phase-locking
- Biofluid mechanics
- Biosolid mechanics
- Sports biomechanics
- Energy Systems/Fuel Cell/Hybrid Vehicle Technology
- High energy density science and applications
- Nuclear fusion energy
- Wind energy

Research Facilities and Partnerships:

- Center for Computational Fluid Dynamics
- Institute of Transportation Studies
- Center for Advanced Highway Maintenance and Construction Technology
- GATE Center for Hybrid Electric Vehicles
- Aeronautical Wind Tunnel Facility

Mechanical & Aerospace Engineering; Engineering | EME Courses

Courses in EME:

**EME 001—Mechanical Engineering (1)**
Lecture—1 hour. Description of the field of mechanical engineering with examples taken from industrial applications, discussions of the practice with respect to engineering principles, ethics, and responsibilities. (P/NP grading only.) Effective: 2001 Fall Quarter.

**EME 005—Computer Programming for Engineering Applications (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MAT 016A (can be concurrent) or MAT 021A (can be concurrent) Structured programming in C for solving problems in engineering. Introduction to MATLAB and comparison study of C/C++ with MATLAB. GE credit: SE. Effective: 2017 Fall Quarter.

**EME 050—Manufacturing Processes (4)**
Laboratory—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): ENG 004 C- or better; PHY 009A C- or better Restricted to Mechanical Engineering and Mechanical Engineering/Materials Science Engineering majors. Modern
manufacturing methods, safety, manufacturing instructions, computer-aided manufacturing and their role in the engineering design and development process. GE credit: SE. Effective: 2017 Fall Quarter.

**EME 092—Internship in Mechanical Engineering (1-5)**
Internship. Prerequisite(s): Lower division standing; approval of project prior to period of internship. Supervised work-study experience in engineering. May be repeated for credit. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

**EME 097TC—Mentoring and Tutoring Engineering in the Community (1-4)**
Variable—3-12 hours. Prerequisite(s): Consent of Instructor. Mentoring, coaching, tutoring and/or supervision of students in K-12 schools in Engineering-related topics. May be repeated for credit. (P/NP grading only.) Effective: 2012 Fall Quarter.

**EME 099—Special Study for Undergraduates (1-5)**
Variable. Prerequisite(s): Consent of Instructor. Lower division standing. (P/NP grading only.) Effective: 1997 Winter Quarter.

**EME 106—Thermo-Fluid Dynamics (4)**
Lecture—4 hours. Prerequisite(s): ENG 103 C- or better; ENG 105 C- or better Restricted to Mechanical Engineering, Aerospace Science and Engineering, and Mechanical Engineering/Materials Science Engineering majors. Inviscid incompressible flow, compressible flow, ideal gas mixtures, psychrometrics, reacting mixtures and combustion. GE credit: SE. Effective: 2013 Winter Quarter.

**EME 108—Measurement Systems (4)**
Discussion—1 hour; Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): ENG 100 C- or better; ENG 102 C- or better; ENG 104 recommended. Restricted to Mechanical Engineering, Aerospace Science & Engineering and Mechanical/Materials Science & Engineering. Experiments to illustrate principles of mechanical systems. Signal analysis; Demonstration of basic sensors for mechanical systems; Experimental project design; Experiments involving voltage measurement; strain gauges, dynamic systems of 1st order. Three units of credit for students who have previously taken BIM 111; two units of credit for students who have previously taken EBS 165; one unit of credit allowed for students who have completed EME 107B (former version of EME 108). GE credit: SE, WE. Effective: 2017 Fall Quarter.

**EME 109—Experimental Methods for Thermal Fluids (4)**
Discussion—1 hour; Extensive Writing; Laboratory—1.5 hours; Lecture—2 hours. Prerequisite(s): EME 106 C- or better Restricted to Mechanical Engineering, Aerospace Science & Engineering and Mechanical/Materials Science Engineering Majors. Experiments illustrating principles of thermal-fluid systems and related measurement devices. Statistical design of experiments and uncertainty analysis of data; thermodynamic cycles, combustion, compressible and incompressible flows. Three units of credit for students who have previously taken ECH 155A; two units of credit for students who have previously taken ECH 155B; three units of credit for students who have previously taken ECI 141L; one unit of credit for students who have already completed EME 107A (former version of EME 109). GE credit: SE. Effective: 2017 Fall Quarter.

**EME 115—Introduction to Numerical Analysis and Methods (4)**
Lecture—3 hours; Lecture/Discussion—1 hour. Prerequisite(s): (ENG 006 C- or better or EME 005 C- or better or ECS 030 C- or better or ECM 006 C- or better); (MAT 021A C- or better, MAT 021B C- or better, MAT 021C C- or better, MAT 021D C- or better, MAT 022A C- or better, MAT 022B C- or better); (PHY 009A C- or better, PHY 009B C- or better, PHY 009C C- or better) Number representation, Taylor expansions, error and stability analysis, roots of nonlinear equations, sets of linear equations, numerical integration, ordinary differential equations. Not open for credit to students who have taken EAD 115. GE credit: SE. Effective: 2017 Fall Quarter.

**EME 121—Engineering Applications of Dynamics (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ENG 102 C- or better; (ENG 006 C- or better or EME 005 C- or better or ECS 030 C- or better) Restricted to Mechanical Engineering, Aerospace Science and Engineering, and Mechanical Engineering/Materials Science Engineering majors. Technical elective that revisits dynamic principles with emphasis on engineering applications; Equations of motion are derived and put into a format for computer solution; There is a computer laboratory where real engineering systems are simulated. GE credit: SE. Effective: 2017 Fall Quarter.

**EME 134—Vehicle Stability (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ENG 102 C- or better Restricted to Mechanical Engineering, Aerospace Science and Engineering, and Mechanical Engineering/Materials Science Engineering majors. Analytical
and experimental studies of the dynamics, stability and control of vehicles such as cars, trailers, airplanes, motorcycles, bicycles and rail cars. GE credit: SE. Effective: 2017 Fall Quarter.

**EME 139—Stability of Flexible Dynamic Systems (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ENG 102 C- or better; ENG 103 C- or better Stability of flexible systems. Introduction to fluid-structure interaction. Mechanical vibrations. Design of mechanical subsystems or systems under constraints. Dynamic instabilities. Flutter. Control effectiveness. Energy extraction from fluid-structure interactions. Design applications to aerospace, mechanical and biomedical systems. No credit for students who have completed EAE 139. GE credit: SE. Effective: 2016 Spring Quarter.

**EME 150A—Mechanical Design (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ENG 045 C- or better or ENG 045Y C- or better); (ENG 104 C- or better, EME 050 C- or better (can be concurrent) Restricted to Mechanical Engineering, Aerospace Science and Engineering, Mechanical Engineering/Materials Science and Engineering majors. Principles of mechanics applied to design. Deformation and stress analysis. Structural integrity under static and fluctuating loads. Projects demonstrate progression from concept to engineering analysis, with emphasis on strength and durability. GE credit: SE, WE. Effective: 2017 Fall Quarter.

**EME 150B—Mechanical Design (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EME 150A C- or better Restricted to Mechanical Engineering, Aerospace Science and Engineering, Mechanical Engineering/Materials Science and Engineering. Principles of engineering mechanics applied to the design and selection of mechanical components. Design projects, which concentrate on conceptual design, engineering analysis, methods of manufacture, material selection, and cost. GE credit: SE. Effective: 2017 Fall Quarter.

**EME 151—Statistical Methods in Design and Manufacturing (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EME 150A C- or better Restricted to Mechanical Engineering, Aerospace Science and Engineering, Mechanical Engineering/Materials Science and Engineering. Methods of statistical analysis with emphasis on applications in mechanical design and manufacturing. Applications include product evaluation and decision making, probabilistic design, systems reliability, and fatigue under random loading. GE credit: SE. Effective: 2017 Fall Quarter.

**EME 152—Computer-Aided Mechanism Design (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ENG 102 C- or better; (EME 005 C- or better or ENG 006 C- or better or ECS 030 C- or better) Restricted to Mechanical Engineering, Aerospace Science and Engineering, Mechanical Engineering/Materials Science and Engineering. Computer-aided kinematic, static, and dynamic analysis and design of planar mechanisms such as multiple-loop linkages and geared linkages. Introduction to kinematic synthesis of mechanisms. GE credit: SE. Effective: 2017 Fall Quarter.

**EME 154—Mechatronics (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ENG 100 C- or better; ENG 102 C- or better; EME 050 C- or better Restricted to Mechanical Engineering, Aerospace Science and Engineering, Mechanical Engineering/Materials Science and Engineering. Overview of mechatronics system and control system design concepts, control software architecture, control hardware architecture, microcontroller and interface technology for mechatronics control, sensor for mechatronics systems, actuator drives. GE credit: SE. Effective: 2017 Fall Quarter.

**EME 161—Combustion and the Environment (4)**
Lecture/Discussion—1 hour. Prerequisite(s): EME 106 C- or better; EME 165 C- or better Introduction to basic mechanisms and...
processes associated with heating, ventilation and air conditioning (HVAC), including equipment and systems used for HVAC in residential and commercial buildings. Only 2 units for students who have completed ECI 125. GE credit: SE. Effective: 2017 Winter Quarter.

EME 165—Heat Transfer (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ENG 006 C- or better or EME 005 C- or better or ECS 030 C- or better); ENG 103 C- or better; ENG 105 C- or better Restricted to Mechanical Engineering, Aerospace Science and Engineering, Mechanical Engineering/Materials Science and Engineering. Conduction, convection, and radiation heat transfer. Computational modeling of heat transfer in engineering. Applications to engineering equipment with the use of digital computers. GE credit: SE. Effective: 2017 Winter Quarter.

EME 171—Analysis, Simulation and Design of Mechatronic Systems (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ENG 100 C- or better; ENG 102 C- or better Restricted to Mechanical Engineering, Aerospace Science and Engineering, Mechanical Engineering/Materials Science and Engineering. Modeling of dynamic engineering systems in various energy domains. Analysis and design of dynamic systems. Response of linear systems. Digital computer simulation and physical experiments. GE credit: SE. Effective: 2017 Fall Quarter.

EME 172—Automatic Control of Engineering Systems (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ENG 100 C- or better; ENG 102 C- or better Restricted to Mechanical Engineering, Aerospace Science and Engineering, Mechanical Engineering/Materials Science and Engineering. Classical feedback control systems; block diagrams; performance specifications; steady state errors; rise and settling times; root locus; PID controllers; Bode and Nyquist plots; stability; phase and gain margins; advanced topics as time allows. GE credit: SE. Effective: 2017 Fall Quarter.

EME 185A—Mechanical Engineering Systems Design Project (4) Review all entries
Laboratory—3 hours; Lecture—1 hour. Prerequisite(s): (EME 150A C- or better, EME 165 C- or better (can be concurrent)); CMN 001 or CMN 003 recommended; upper division composition recommended. Restricted to Senior standing in Mechanical Engineering (EMEC). Major mechanical engineering design experience; the mechanical engineering design process and its use in the design of engineering systems incorporating appropriate engineering standards and multiple realistic constraints. GE credit: OL, SE, VL. Effective: 2017 Fall Quarter.

EME 185B—Mechanical Engineering Systems Design Project (4)
Laboratory—3 hours; Lecture—1 hour. Prerequisite(s): EME 050 C- or better; EME 150A C- or better; EME 165 C- or better (can be concurrent); ENG 003, CMN 001 or CMN 003 recommended; upper division composition recommended. Restricted to Senior standing in Mechanical Engineering (EMEC). Major mechanical engineering design experience; the mechanical engineering design process and its use in the design of engineering systems incorporating appropriate engineering standards and multiple realistic constraints. GE credit: OL, SE, VL. Effective: 2019 Winter Quarter.

EME 189A—Selected Topics in Mechanical Engineering; Energy Systems and the Environment (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Energy Systems and the Environment. May be repeated for credit when the topic is different. Effective: 2008 Summer Session 1.

EME 189B—Selected Topics in Mechanical Engineering; Engineering Controls (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Engineering Controls. May be repeated for credit when the topic is different. GE credit: SE. Effective: 2008 Summer Session 1.

EME 189C—Selected Topics in Mechanical Engineering; Engineering Dynamics (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Engineering Dynamics. May be repeated for credit when the topic is different. Effective: 2008 Summer Session 1.

EME 189D—Selected Topics in Mechanical Engineering; Biomechanics (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Biomechanics. May be repeated for credit when the topic is different. Effective: 2008 Summer Session 1.
EME 189E—Selected Topics in Mechanical Engineering; Fluid Mechanics (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Fluid Mechanics. May be repeated for credit when the topic is different. Effective: 2008 Summer Session 1.

EME 189F—Selected Topics in Mechanical Engineering; Manufacturing Engineering (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Manufacturing Engineering. May be repeated for credit when the topic is different. Effective: 2008 Summer Session 1.

EME 189G—Selected Topics in Mechanical Engineering; Mechanical Engineering and Product Design (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Mechanical Engineering and Product Design. May be repeated for credit when the topic is different. Effective: 2008 Summer Session 1.

EME 189H—Selected Topics in Mechanical Engineering; Mechatronics Systems (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Mechatronics Systems. May be repeated for credit when the topic is different. Effective: 2008 Summer Session 1.

EME 189I—Selected Topics in Mechanical Engineering; MEMS/Nanotechnology (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in MEMS/Nanotechnology. May be repeated for credit when the topic is different. Effective: 2008 Summer Session 1.

EME 189J—Selected Topics in Mechanical Engineering; Solid and Structural Mechanics (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Solid and Structural Mechanics. May be repeated for credit when the topic is different. Effective: 2008 Summer Session 1.

EME 189K—Selected Topics in Mechanical Engineering; Thermodynamics (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Thermodynamics. May be repeated for credit when the topic is different. Effective: 2008 Summer Session 1.

EME 189L—Selected Topics in Mechanical Engineering; Vehicle and Transportation Systems (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Vehicle and Transportation Systems. May be repeated for credit when the topic is different. Effective: 2008 Summer Session 1.

EME 192—Intership in Engineering (1-5)
Variable. Prerequisite(s): Upper division standing; approval of project prior to period of internship. Supervised work experience in mechanical engineering. May be repeated for credit. (P/NP grading only.) Effective: 1997 Fall Quarter.

EME 197TC—Mentoring and Tutoring Engineering in the Community (1-4)
Variable—3-12 hours. Prerequisite(s): Consent of Instructor. Upper division standing. Mentoring, coaching, tutoring and/or supervision of students in K-12 schools in Engineering-related topics. May be repeated for credit. (P/NP grading only.) Effective: 2012 Fall Quarter.

EME 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

EME 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

Mechanical & Aerospace Engineering; Engineering | EAE Courses

Courses in EAE:

EAE 001—Introduction to Aerospace Science Engineering (1)
Lecture—1 hour. Description of the field of aerospace engineering with examples from industry, government, and research. Aerospace engineering principles, ethics, and responsibilities. (P/NP grading only.) Effective: 2002 Fall Quarter.

EAE 010—From the Wright Brothers to Drones and Quadcopters (2)
Lecture—2 hours. History of aircraft and its influence on society. Topics covered will include Unmanned Aerial Vehicles, safety considerations, economics and privacy issues. Aerodynamics, stability and control will also be introduced. GE credit: SE, SS. Effective: 2015 Summer Session 1.

EAE 099—Special Study for Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. Lower division standing. (P/NP grading only.) Effective: 1997 Winter Quarter.

EAE 126—Theoretical and Computational Aerodynamics (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ENG 180 C- or better or EAD 115 C- or better or MAT 128C C-
or better or EME 115 C- or better); EAE 127 C- or better Development of general equations of fluid motion. Study of flow field kinematics and dynamics. Flow about a body. Thin airfoil theory. Viscous effects. Applications of numerical methods to wing analysis and design. GE credit: SE. Effective: 2013 Fall Quarter.

**EAE 127—Applied Aircraft Aerodynamics (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EME 106 C- or better Principles, governing equations, and predictive theories for aircraft aerodynamics. Lift and drag of 2D airfoils, 3D wings, and high-lift devices. GE credit: SE, WE. Effective: 2017 Fall Quarter.

**EAE 128—Stability and Control of Aerospace Vehicles (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ENG 102 C- or better Restricted to upper division standing. Aircraft and spacecraft stability and control. Derivation of fundamental equations of motion for aircraft/spacecraft. Fundamentals of feedback. Aircraft flight control systems. Spacecraft attitude control systems. GE credit: SE. Effective: 2017 Fall Quarter.

**EAE 130A—Aircraft Performance and Design (4)**
Discussion—1 hour; Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): EAE 127 C- or better; EAE 129 C- or better (can be concurrent) Major aircraft design experience with multiple realistic constraints including aerodynamics, performance analysis, weight estimation, stability and control, and appropriate engineering standards. GE credit: SE. Effective: 2017 Fall Quarter.

**EAE 130B—Aircraft Performance and Design (4)**
Discussion—1 hour; Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): EAE 130A C- or better Restricted to upper division standing. Major aircraft design experience including detailed design, cost analysis, analysis of aircraft structure, propulsion system, aerodynamics, aircraft handling qualities, manufacturing, or meeting relevant engineering standards. GE credit: OL, SE. Effective: 2017 Fall Quarter.

**EAE 133—Finite Element Methods in Structures (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ENG 104 C- or better Open to College of Engineering Students. Introduction to the aerospace structural design process. History of aircraft and spacecraft materials. Effects of loading beyond elastic limit. Deflections and stresses due to combined loading. Virtual work principles, and finite element methods. Applications to aerospace structures. GE credit: SE. Effective: 2011 Fall Quarter.

**EAE 135—Aerospace Structures (4)**
Lecture—4 hours. Prerequisite(s): ENG 104 C- or better; EAE 126 or EAE 127 recommended. Analysis and design methods used in aerospace structures. Shear flow in open, closed and multicell beam cross-sections, buckling of flat and curved sheets, tension field beams, local buckling. GE credit: SE. Effective: 2017 Fall Quarter.

**EAE 137—Structural Composites (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ENG 104 C- or better Overview of materials and technology for creating structures from fiber reinforced resin matrix composite material systems. Elementary design analysis and case studies emphasizing aeronautical applications. GE credit: SE. Effective: 2010 Fall Quarter.

**EAE 138—Aircraft Propulsion (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EME 106 C- or better Analysis/design of modern aircraft gas turbine engines. Development/application of cycle performance prediction techniques. Introduction to design of inlets, compressors, burners, turbines, and nozzles. Cycle design for specific applications. GE credit: SE. Effective: 2017 Fall Quarter.

**EAE 140—Rocket Propulsion (4)**
Lecture—4 hours. Prerequisite(s): EME 106 C- or better Restricted to upper division standing. Fluid and thermodynamics of rocket engines, liquid and solid rocket propulsion. Space propulsion concepts and space mission requirements. Not open for credit to students who have taken identical EAE 189A prior to Fall Quarter 2013. GE credit: SE. Effective: 2016 Winter Quarter.

**EAE 141—Space Systems Design (4)**
Discussion—2 hours; Lecture—2 hours. Prerequisite(s): ENG 102 C- or better; EME 106 C- or better Introduction to space systems design including space project organization, requirements definition and specification, concepts formulation, system tradeoffs, subsystem design. Prototype space mission concepts are presented and a multidisciplinary mission design is developed that considers all relevant architecture elements. GE credit: SE. Effective: 2013 Fall Quarter.

**EAE 142—Orbital Mechanics (4)**
Lecture—4 hours. Prerequisite(s): ENG 102 C- or better Restricted to upper division standing. Satellite orbits,
multistage rockets, current global boosters, and new technologies. Design application problems include satellites, trajectory optimizations, and interplanetary trajectories. Not open for credit to students who have completed EAE 189B prior to Fall Quarter 2013. GE credit: SE. Effective: 2013 Fall Quarter.

EAE 189C—Flight Simulation and Testing in Design of Aircraft and Spacecraft (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ENG 102; and Consent of Instructor. Teaches flight test techniques together with data analysis methods to prepare students for any type of flight testing including fixed wing, rotary wing and launch vehicles. GE credit: SE. Effective: 2013 Fall Quarter.

EAE 198—Directed Group Study (1-5)
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

EAE 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

Mechanical & Aerospace Engineering; Engineering | MAE Courses

Courses in MAE:

MAE 207—Engineering Experimentation & Uncertainty Analysis (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EME 107A; EME 107B Design and analysis of engineering experiments with emphasis on measurement standards, data analysis, regressions and general and detailed uncertainty analysis, including statistical treatment of experimental data intervals, propagation of bias and precision errors, correlated bias approximations, and using jitter programs. Effective: 2006 Winter Quarter.

MAE 210A—Advanced Fluid Mechanics and Heat Transfer (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ENG 103; ENG 105; EME 165 Development of differential equations governing continuity, momentum and energy transfer. Solutions in laminar flow for exact cases, low and high Reynolds numbers and lubrication theory. Dynamics of inviscid flow. Effective: 1999 Fall Quarter.

MAE 210B—Advanced Fluid Mechanics and Heat Transfer (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MAE 210A Study of stability and transition to turbulence. Introduction to the physics of turbulence. Modeling of turbulence for numerical determination of momentum and heat transfer. Effective: 1997 Winter Quarter.

MAE 211—Fluid Flow and Heat Transfer (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ENG 103; ENG 105; EME 165; Or equivalent. Design aspects of selected topics such as: heat conduction, fins; heat transport in ducts, boundary layers and separated flows; heat exchangers. Effective: 2000 Winter Quarter.

MAE 212—Biomedical Heat and Mass Transport Processes (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EME 165; EBS 125; ECH 153; Or the equivalent. Application of principles of heat and mass transfer to biomedical systems related to heat exchange between the biomedical system and its environment, mass transfer across cell membranes and the design and analysis of artificial human organs. (Same course as BIM 212.) Effective: 2000 Winter Quarter.

MAE 213—Advanced Turbulence Modeling (4)
Lecture—4 hours. Prerequisite(s): MAE 210B Methods of analyzing turbulence; kinematics and dynamics of homogeneous turbulence; Reynolds stress and heat-flux equations; second order closures and their simplification; numerical methods; application to boundary layer-type flows; two-dimensional and three-dimensional hydraulic and environmental flows. Effective: 1997 Winter Quarter.

MAE 216—Advanced Thermodynamics (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ENG 105 Study of topics important to energy conversion systems, propulsion and other systems using high temperature gases. Classical thermodynamics and quantum statistical mechanics of nonreacting and chemically reacting gases, gas mixtures, and other substances. Effective: 1999 Fall Quarter.

MAE 217—Combustion (4)
Lecture—3 hours; Lecture/Discussion—1 hour. Prerequisite(s): ENG 103; ENG 105; EME 106 Restricted to graduate students. Review of chemical thermodynamics and chemical kinetics. Discussion of reacting flows, their governing equations and transport phenomena; detonations; laminar flame structure and turbulent combustion. Effective: 2014 Spring Quarter.
MAE 218—Advanced Energy Systems (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ENG 103; ENG 105; Or the equivalent. Review of options available for advanced power generation. Detailed study of basic power balances, component efficiencies, and overall powerplant performance for one advanced concept such as a fusion, magnetohydrodynamic, or solar electric powerplant. Effective: 1999 Fall Quarter.

MAE 219—Introduction to Scientific Computing in Solid and Fluid Dynamics (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ENG 103; ENG 104 Scientific calculations with finite element and finite difference methods for multi-dimensional problems in solid and fluid dynamics are performed with examples in C,C++,FORTRAN,and MATLAB script files. Derivation of the basic equations of motion in finite volume form with applications to elasticity,waves. Effective: 2000 Spring Quarter.

MAE 220—Mechanical Vibrations (4)
Lecture—4 hours. Prerequisite(s): ENG 122 Multiple degrees of freedom; damping measures; Rayleigh's method; vibration absorbers; eigenvalues and modeshapes; modal coordinates; forced vibrations; random processes and vibrations; autocorrelation; spectral density; first passage and fatigue failure; nonlinear systems; phase plane. Effective: 2000 Winter Quarter.

MAE 222—Advanced Dynamics (4)
Lecture—4 hours. Prerequisite(s): ENG 102 Dynamics of particles, rigid bodies and distributed systems with engineering applications; generalized coordinates; Hamilton's principle; Lagrange's equations; Hamilton-Jacobi theory; modal dynamics orthogonality; wave dynamics; dispersion. Effective: 1999 Fall Quarter.

MAE 223—Multibody Dynamics (4)
Lecture—4 hours. Prerequisite(s): ENG 102 Coupled rigid-body kinematics/dynamics; reference frames; vector differentiation; configuration and motion constraints; holonomicity; generalized speeds; partial velocities; mass; inertia tensor/theorems; angular momentum; generalized forces; comparing Newton/Euler, Lagrange's, Kane's methods; computer-aided equation derivation; orientation; Euler; Rodrigues parameters. (Same course as BIM 223.) Effective: 2000 Winter Quarter.

MAE 225—Spatial Kinematics and Robotics (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): MAE 222; C Language. Spatial kinematics, screw theory, spatial mechanisms analysis and synthesis, robot kinematics and dynamics, robot workspace, path planning, robot programming, real-time architecture and software implementation. (Same course as BIM 225.) Effective: 2000 Winter Quarter.

MAE 226—Acoustics and Noise Control (4)
Lecture—4 hours. Prerequisite(s): ENG 122 Description of sound using normal modes and waves; interaction between vibrating solids and sound fields; sound absorption in enclosed spaces; sound transmission through barriers; applications in design, acoustic enclosures and sound walls, room acoustics, design of quiet machinery. Effective: 2001 Spring Quarter.

MAE 228—Introduction to BioMEMS (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): BS engineering discipline or consent of instructor. Ideal for beginning graduate or advanced undergraduate students interested in microelectromechanical systems (MEMS) topics related to biological applications. Covers topics from various disciplines related to BioMEMS: mechanical, electrical, biomedical, chemical engineering, and materials science. Effective: 2014 Winter Quarter.

MAE 229—Design & Analysis of Micro-Electromechanical Systems (4)
Lecture—4 hours. Prerequisite(s): (ENG 045 or ENG 045Y); ENG 100; ENG 104; and Consent of Instructor. ENG 122 recommended. Mechanical design of micro-electromechanical systems(MEMS). Device modeling: lumped parameter models; energy methods; nonlinearity; electrical and mechanical noise sources. Actuation and measurement methods: capacitive, piezoresistive, thermal, piezoelectric, and optical techniques. Review of basic electronics: bridge circuits, amplitude modulation; lock-in detection. Effective: 2018 Spring Quarter.

MAE 232—Skeletal Tissue Mechanics (3)
Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): ENG 104B. Overview of the mechanical properties of the various tissues in the musculoskeletal system, the relationship of these properties to anatomic and histologic structure, and the changes in these properties caused by aging and disease. Tissues covered include bone, cartilage and synovial fluid, ligament and tendon. (Same course as BIM 232.) Effective: 1997 Winter Quarter.
MAE 234—Design and Dynamics of Road Vehicles (4)
Lecture—4 hours. Prerequisite(s): EME 134 Analysis and numerical simulation of road vehicles with design applications. Effective: 2000 Spring Quarter.

MAE 237—Analysis and Design of Composite Structures (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ENG 104; Or equivalent. Modeling and analysis methodology for composite structures including response and failure. Laminated plate bending theory. Introduction to failure processes. Includes discussion of aerospace structural analysis. Effective: 2014 Winter Quarter.

MAE 238—Advanced Aerodynamic Design and Optimization (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Consent of Instructor. Application of aerodynamic theory to obtain optimum aerodynamic shapes. Both analytic solutions and solutions obtained with numerical optimization techniques will be examined. Includes introduction to the calculus of variations and numerical optimization techniques. Effective: 1997 Winter Quarter.

MAE 239—Advanced Finite Elements and Optimization (4)
Lecture—4 hours. Prerequisite(s): ENG 180 or EAD 115 or MAT 128C Introduction to advanced finite elements and design optimization methods, with application to modeling of complex mechanical, aerospace and biomedical systems. Application of states of the art in finite elements in optimum design of components under realistic loading conditions and constraints. (Same course as BIM 239.) Effective: 2007 Fall Quarter.

MAE 240—Computational Methods in Nonlinear Mechanics (4)
Lecture—4 hours. Prerequisite(s): EAD 115 or MAT 128B or ENG 180 Deformation of solids and the motion of fluids treated with state-of-the-art computational methods. Numerical treatment of nonlinear dynamics; classification of coupled problems; applications of finite element methods to mechanical, aeronautical, and biological systems. (Same course as BIM 240.) Effective: 1999 Winter Quarter.

MAE 242—Stability of Thin-Walled Structures (4)
Lecture—4 hours. Prerequisite(s): ENG 104; Or equivalent. Static stability of thin-walled aerospace structures treated from both theoretical and practical design perspectives. Both monolithic and composite construction considered. Buckling of stiffened panels, shells and thin-walled beams, experimental methods and failure/crippling processes. Effective: 2002 Fall Quarter.

MAE 245—Micro- and Nano-Technology in Life Sciences (4)
Lecture/Discussion—4 hours. Prerequisite(s): Graduate standing or consent of instructor. Survey of biodevice design from engineering and biological perspectives; micro-/nano-fabrication techniques; surface science and mass transport; essential biological processes and models; proposal development skills on merging aforementioned themes. (Same course as ECH 245, EMS 245, and EEC 245.) Effective: 2019 Winter Quarter.

MAE 248—Advanced Turbomachinery (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ENG 103; ENG 105 Preliminary aerodynamic design of axial and radial flow compressors and turbines. Design of diffusers. Selection of turbomachine and configurations and approximations to optimum dimensions and flow angles. Introduction to through flow analysis. Rotating stall and surge, and aeromechanical considerations. Effective: 1999 Fall Quarter.

MAE 250A—Advanced Methods in Mechanical Design (4)
Lecture—4 hours. Prerequisite(s): EME 150A; EME 150B; Or the equivalents or consent of instructor. Applications of advanced techniques of solid mechanics to mechanical design problems. Coverage of advanced topics in stress analysis and static failure theories with emphasis in design of machine elements. Design projects emphasizing advanced analysis tools for life cycle evaluation. Effective: 1999 Fall Quarter.

MAE 250B—Advanced Methods in Mechanical Design (4)
Lecture—4 hours. Prerequisite(s): MAE 250A Applications of advanced techniques of solid mechanics to mechanical design problems. Advanced topics in variational methods of mechanics with emphasis in design of machine elements. Design projects emphasizing advanced analysis tools. Effective: 1999 Fall Quarter.

MAE 250C—Mechanical Performance of Materials (4)

MAE 251—Mechatronics System Design (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (EME 154, EME 172) or (EEC 157A, EEC 157B) Motion
mechanism design, electric actuator, power electronics motion control, sensor technologies, personal computer-based control systems design, motion control general operating system and real time operating systems, motion control software design, discrete event control software design. Effective: 2002 Fall Quarter.

MAE 252—Information Processing for Autonomous Robotics (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EME 154; EME 171; ENG 006; EME 005; Or equivalent programming experience to ENG 006 and EME 005. MAE 154, MAE 171, or consent of instructor. Computational principles for sensing, reasoning, and navigation for autonomous robots. Effective: 2005 Winter Quarter.

MAE 253—Network Theory and Applications (4) Review all entries
Lecture/Discussion—4 hours. Prerequisite(s): MAT 022A; MAT 022B; (STA 013 or STA 120); STA 013Y; Experience with computer software, or consent of instructor. Pass One and Pass Two open to Graduate Students in Mechanical and Aerospace Engineering and Computer Science only. Develops the mathematical theory underlying growth, structure and function of networks with applications to physical, social, biological and engineered systems. Topics include network growth, resilience, epidemiology, phase transitions, software and algorithms, routing and search control, cascading failures. (Same course as Computer Science Engineering 253.) Effective: 2018 Spring Quarter.

MAE 255—Computer Aided Design and Manufacturing (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): Proficiency in a high level programming language such as Fortran, Pascal or C. Representation and processing of geometrical information in design and manufacturing. Numeric and symbolic computations. Coordinate systems and transformations. Bezier and B-spline curves and surfaces. Interpolation and approximation methods. Intersections, offsets, and blends. Path planning for machining, inspection, and robotics applications. Effective: 2004 Spring Quarter.

MAE 256—Sustainable Manufacturing and Design (4)
Lecture/Discussion—4 hours. Open to graduate students; undergraduate students allowed only with consent of instructor. Definitions, methods, and dimensions of sustainability in manufacturing and product design. Emphasis on resource efficiency and life cycle engineering in the context of the production environment. Effective: 2018 Spring Quarter.

MAE 258—Hybrid Electric Vehicle System Theory and Design (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): EME 150B; Graduate standing in Mechanical and Aeronautical Engineering. Advanced vehicle design for fuel economy, performance, and low emissions, considering regulations, societal demands and manufacturability. Analysis and verification of computer design and control of vehicle systems in real vehicle tests. Advanced engine concepts. Effective: 2000 Spring Quarter.

MAE 262—Advanced Aerodynamics (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EAE 126 Study of invicid and viscous flows about aerodynamic shapes at subsonic, transonic and supersonic conditions. Application of aerodynamic theory to design for reduced drag and increased lift. Effective: 2000 Winter Quarter.

MAE 263—Introduction to Computational Aerodynamics and Fluid Dynamics (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ENG 103; or Consent of Instructor. Introduction to numerical methods for solution of fluid flow problems. Discretization techniques and solution algorithms. Finite difference solutions to classical model equations pertinent to wave phenomena, diffusion phenomena, or equilibrium. Application to the incompressible Navier-Stokes equation. Effective: 1999 Fall Quarter.

MAE 267—Parallel Computations in Fluid/Thermal Sciences (4)
Discussion—2 hours; Lecture—2 hours. Prerequisite(s): EME 106; EME 165; ENG 180; or Consent of Instructor. Or equivalent to ENG 180. Graduate or junior/senior undergraduate as a technical elective. Programming languages
and constructs for engineering analysis on parallel computers including MPI (distributed), OpenMP (shared), and Fortran95. Effective: 2007 Fall Quarter.

**MAE 268—Wind Power Engineering (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ENG 102; ENG 103; or Consent of Instructor. Or equivalent courses. Fundamentals for understanding the conversion of wind power to mechanical power and electricity. Related engineering, economic and societal issues. Effective: 2006 Fall Quarter.

**MAE 269—Fuel Cell Systems (4)**
Discussion—2 hours; Lecture—2 hours. Prerequisite(s): EME 106; EME 107; EME 165; or Consent of Instructor. Or equivalent courses. Graduate or junior/senior undergraduate as a technical elective. Basics of electrochemistry and fuel cell engines in mobile and stationary applications. Aspects of fuel cell energy converters and their subsystems including practice with existing fuel cell and hydrogen systems on campus. Effective: 2006 Fall Quarter.

**MAE 271—Advanced Modeling and Simulation of Mechatronic Systems (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): EME 172; Or equivalent. Multiport models of mechanical, electrical, hydraulic, and thermal devices; bond graphs, block diagrams and state space equations; modeling of multiple energy domain systems; 3-dimensional mechanics; digital simulation laboratory. Effective: 2005 Winter Quarter.

**MAE 272—Theory and Design of Control Systems (4)**
Lecture—4 hours. Prerequisite(s): EME 172; Or the equivalent. Mathematical representations of linear dynamical systems. Feedback principles; benefits and cost of feedback. Analysis and design of control systems based on classical and modern approaches, with emphasis on applications to mechanical and aeronautical systems. Effective: 2000 Winter Quarter.

**MAE 273A—Single Input Single Output (SISO) Optimal Robust Control (4)**
Lecture—4 hours. Prerequisite(s): EME 172; MAE 272; or Consent of Instructor. EEC 250 recommended. Open to Graduate Students. Analysis and design of SISO (Single Input Single Output) feedback control systems utilizing Youla Parameterization technique. Optimal control concepts (controllability, observability, Linear Quadratic Regulator) and an introduction to Kalman filtering and robust optimal control theory for designing H2/LQG and Hinf controllers. Effective: 2018 Fall Quarter.

**MAE 273B—Multiple Input Multiple Output (MIMO) Optimal Robust Control (4)**
Lecture—4 hours. Prerequisite(s): MAE 272; MAE 273A; or Consent of Instructor. Open to Graduate Students. Analysis and design of MIMO (Multiple Input Multiple Output) feedback control systems utilizing Youla Parameterization technique. Uncertainty modeling and MIMO feedback control system design using loop shaping with Hinf/H2 system norm optimization techniques. Effective: 2018 Fall Quarter.

Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EME 172 Discrete systems analysis; digital filtering; sample data systems; state space and transform design techniques; quantization effects; multi-input, multi-output systems. Effective: 2000 Spring Quarter.

**MAE 275—Advance Aircraft Stability and Control (4)**

**MAE 275—Guidance and Control of Unmanned Aerial Systems (4)**
Lecture—4 hours. Prerequisite(s): ENG 102; EME 172; or Consent of Instructor. Familiarity with simulation tools, such as Matlab/Simulink, expected. Open to Graduate Students. Introduction to Unmanned Aerial Systems (UAS). Challenges in guiding and controlling limited-payload small and miniature aircraft systems. Coordinate frames, kinematics and dynamics, linear design models, autopilot design, sensor models, state estimation, design model for guidance, straight-line and orbit following, and path planning. Effective: 2019 Winter Quarter.

**MAE 276—Data Acquisition and Analysis (4)**
Discussion—1 hour; Lecture—3 hours. Application of computers for data acquisition and control. Topics include computer architecture, characteristics of transducers, hardware for laboratory applications of computers, fundamentals of interfaces between computers and experimental equipment, programming techniques for data acquisition and control, basic data analysis. Effective: 1999 Fall Quarter.

**MAE 290C—Graduate Research Conference (1)**
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Individual and/or group conference on problems.
progress, and techniques in mechanical and aeronautical engineering research. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 1999 Fall Quarter.

MAE 297—SEMINAR (1)
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Current topics in engineering including developments in mechanical and aeronautical engineering with presentations by students, faculty, and visitors. May be repeated for credit. (S/U grading only.) Effective: 2000 Fall Quarter.

MAE 298—Group Study (1-5)

MAE 299—Research (1-12)
Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

MAE 390—The Teaching of Aeronautical Science and Engineering (1)
Discussion—1 hour. Prerequisite(s): Meet qualifications for teaching assistant and/or associate-in in Aeronautical Science and Engineering. Methods of leading discussion groups or laboratory sections, writing and grading quizzes, use of laboratory equipment, and grading laboratory reports. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

MAE 396—Teaching Assistant Training Practicum (1-4)
Variable. Prerequisite(s): Graduate standing. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

Mechanical Engineering; Engineering

Mechanical Engineering; Engineering | EME B.S.
(College of Engineering)

Stephen K. Robinson, Ph.D., Chairperson of the Department
Benjamin D. Shaw, Ph.D., Vice Chairperson for Undergraduate Studies

Department Office. 2132 Bainer Hall; 530-752-0580; Fax 530-752-4158; http://mae.ucdavis.edu

Faculty. http://mae.ucdavis.edu/people/faculty/

The Mechanical and Aerospace Engineering Undergraduate Programs

The Department of Mechanical and Aerospace Engineering administers two undergraduate programs in the College of Engineering: (1) Mechanical Engineering, (2) Aerospace Science and Engineering.

For more information about our programs, see http://mae.ucdavis.edu/undergraduate/undergraduate-majors.

Mission. The Department of Mechanical and Aerospace Engineering is committed to educating future engineers so that they may contribute to the economic growth and well-being of the state, the nation, and the world, and to the advancement of knowledge in the mechanical and aerospace sciences.

Objectives. The objectives of the programs offered in Mechanical and Aerospace Engineering include the following: to prepare its graduates to practice mechanical and/or aerospace engineering in a broad range of industries, to enable interested graduates to pursue graduate education, to prepare its graduates to participate in research and development, and in other creative and innovative efforts in science, engineering, and technology and to allow interested graduates to pursue entrepreneurial endeavors.

Objectives. The objectives of the Mechanical Engineering and Aerospace Science and Engineering programs are to produce graduates who do one or more of the following: a. Practice mechanical engineering and/or aerospace engineering in a broad range of agencies, industries, and institutes; b. Pursue graduate education; c. Participate in research and development, and other creative and innovative efforts in science, engineering, and technology; d. Pursue entrepreneurial endeavors.

Mechanical Engineering Undergraduate Program

The Mechanical Engineering program is accredited by the Engineering Accreditation Commission of ABET; http://www.abet.org.
The mechanical engineer uses basic science in the design and manufacture of complex engineering systems, requiring the application of physical and mechanical principles to the development of machines, energy conversion systems, materials, and equipment for guidance and control.

Work in this broad field of engineering requires a thorough knowledge of mathematics, physics, chemistry, material science, applied mechanics, thermodynamics, heat transfer, mass transfer, electricity, manufacturing processes, and economics.

The Mechanical Engineering program is designed to provide knowledge in mechanical engineering and associated applied sciences so that graduates may practice in a broad range of industries, pursue graduate studies, participate in research and development, and/or pursue entrepreneurial endeavors.

Areas of Interest

Students spend their third year in further study of fundamental courses, and in the fourth year they may tailor their studies to their interests by selecting courses in controls and systems analysis, fluid mechanics, heat transfer, mechanical design or thermodynamics. Students can either prepare for graduate study in mechanical engineering or obtain a broad background for entering engineering practice.

Students may select elective courses from among the areas of interest listed below.

Mechanical Design. The creation and improvement of products, processes, or systems that are mechanical in nature are the primary activities of a professional mechanical engineer. The development of a product from concept generation to detailed design, manufacturing process selection and planning, quality control and assurance, and life cycle considerations are areas of study and specialization in the area of mechanical design.

Solutions to such major social problems as environmental pollution, the lack of mass transportation, the lack of raw materials, and energy shortages, will depend heavily on the engineer’s ability to create new types of machinery and mechanical systems.

The engineer-designer must have a solid and relatively broad background in the basic physical and engineering sciences and have the ability to synthesize the information from such a background in creative problem solving. In addition to having technical competence, the designer must be able to consider the socioeconomic consequences of a design and its possible impact on the environment. Product safety, reliability, and economics are other considerations.

Suggested technical electives:

- Aerospace Science and Engineering 133, 139
- Biological Systems Engineering 114, 120, 165
- Biomedical Engineering 118/Electrical and Computer Engineering 147
- Engineering 122, 160 (only one unit of credit towards Technical Electives requirement)
- Materials Science and Engineering 180, 181, 182
- Mechanical Engineering 121, 134, 150B, 151, 152, 154, 161, 163

Biomedical and Engineering Fluid Mechanics. This field of study is based on the fundamentals of fluid mechanics and their broad range of applications in the biomedical and engineering areas. Areas of current research include blood circulation and its potential role in the regulation of normal physiological function and in the development of disease; groundwater and atmospheric flows and their implications for pollutant transport and environmental concerns; aerodynamic flow around transportation vehicles and its impact on vehicle performance; and flow in combustion engines and other energy systems with considerations of efficiency and environmental impact. These areas are investigated both experimentally and computationally.

Suggested technical electives:

- Aerospace Science and Engineering 138
- Engineering 160 (only one unit of credit towards technical requirements)
- Chemical Engineering 161A, 161B
- Civil and Environmental Engineering 144, 149
- Mechanical Engineering 161, 163

**Combustion and the Environment.** Combustion is widely used for energy generation, propulsion, heating, and waste disposal, as well as for many other applications. Mechanical engineers are often heavily involved with the design of combustion systems (internal combustion engines, gas turbines, furnaces, etc.) and deal with aspects of combustion ranging from increasing efficiencies to reducing pollutant emissions. This specialization is for those who would like to work in fields that use combustion, or that deal with pollution related to combustion. With the current increased emphasis on reducing pollutants while maintaining or increasing efficiency, the efforts of mechanical engineers in designing and improving combustion systems are becoming more important.

Suggested technical electives:

- Mechanical Engineering 161, 163
- Civil and Environmental Engineering 149, 150

Suggested Advisors. R.C. Aldredge, P. A. Erickson, B.D. Shaw

**Heat Transfer, Thermodynamics, and Energy Systems.** This specialization emphasizes the fundamentals of heat transfer and thermodynamics, and their application to the design of advanced engineering systems. The objective of the program is to introduce students to the fundamental processes of heat transfer and thermodynamics in complex engineering systems so that they are able to design more efficient, cost effective, and reliable systems with less environmental pollution and impact. An understanding of heat transfer and thermodynamics is required for the design of efficient, cost-effective systems for power generation, propulsion, heat exchangers, industrial processes, refining, and chemical processing. This area of specialization is important to many industries—aerospace, defense, automotive—as well as to the thermal design of electronic and computer packages.

Suggested technical electives:

- Aerospace Science and Engineering 138
- Mechanical Engineering 161, 163

Suggested Advisors. R.C. Aldredge, P.A. Erickson, V. Narayanan, J.W. Park, B.D. Shaw

**Manufacturing.** Manufacturing is concerned with the conversion of raw materials into finished products by a variety of processes, such as machining, forming, casting, and molding. Modern manufacturing technology is increasingly dependent upon integration with computer-aided design systems and precision computer controls. State-of-the-art laboratories offer the opportunity for hands-on experience with a wide spectrum of manufacturing equipment. Manufacturing engineers must have expertise in design, materials, controls, statistical methods, computer software, and microprocessor applications.

Suggested technical electives:

- Biomedical Engineering 118/Electrical and Computer Engineering 147
- Electrical and Computer Engineering 160
- Materials Science and Engineering 180, 181
- Mechanical Engineering 150B, 151, 154

**System Dynamics and Control.** Engineers are increasingly concerned with the performance of integrated dynamics systems in which it is not possible to optimize component parts without considering the overall system. System dynamics and control specialists are concerned with the modeling, analysis, and simulation of all types of dynamic systems and with the use of automatic control techniques to change the dynamic characteristics of systems in useful ways. The emphasis in this program is on the physical systems that are closely related to mechanical engineering, but the techniques for studying these systems apply to social, economic, and other dynamic systems.

Ongoing research includes projects on continuously variable transmissions, active and semi-active suspension systems, modeling and control of vehicle dynamics, electromechanical actuator design, electronically controlled
steering, the analysis of fuel management systems, and the design of flight-control systems with humans in the loop.

Suggested technical electives:

- Aerospace Science and Engineering 127, 129
- Biological Systems Engineering 114, 120
- Civil and Environmental Engineering 131, 149
- Engineering 122, 160 (only one unit of credit towards Technical Electives requirement)
- Mechanical Engineering 134, 150, 161

Suggested Advisors. F. Assadian, P. A. Erickson, X. Lin, J. W. Park, S. Velinsky

Ground Vehicle Systems. An important aspect of mechanical engineering is the design of more environmentally benign surface vehicles that provide efficient individual and public transportation. Innovations in the field require competence in vehicle dynamics, control of vehicle dynamics, power sources and power transmission, lightweight structures and systems, alternatively fueled power systems, including electrical drives and fuel cells, and mechanical systems.

Suggested technical electives:

- Aerospace Science and Engineering 127, 129, 139
- Civil and Environmental Engineering 130, 149, 160
- Engineering 122, 160 (only one unit of credit towards Technical Electives requirement)
- Mechanical Engineering 121, 134, 152

Transportation Systems. As society recognizes the increasing importance of optimizing transportation systems to minimize environmental degradation and energy expenditure, engineers will need to consider major innovations in the way people and goods are moved. Such innovations will require competence in vehicle dynamics, propulsion and control, and an understanding of the problems caused by present-day modes of transportation. Vehicle control requires an understanding of sensors and actuators, and the integration of yet-to-be-proposed concepts into overall vehicular dynamics. Competence in these areas allows for the development of alternative propulsion concepts, such as electric, hybrid, and fuel cell.

Suggested technical electives:

- Aerospace Science and Engineering 127, 129
- Biological Systems Engineering 114, 120
- Civil and Environmental Engineering 131, 149
- Engineering 122, 160 (only one unit of credit towards Technical Electives requirement)
- Mechanical Engineering 134, 150B, 161, 163

Suggested Advisors. F. Assadian, P. A. Erickson, X. Lin, J. W. Park, S. Velinsky

Mechanical Engineering Program Requirements

Students are encouraged to adhere carefully to all prerequisite requirements. The instructor is authorized to drop students from a course for which stated prerequisites have not been completed.

Exclusive of General Education units, the minimum number of units required for the Mechanical Engineering major is 148.

**Total:** 148

**Mechanical Engineering; Engineering | EME Courses**

**Courses in EME:**

**EME 001—Mechanical Engineering (1)**

Lecture—1 hour. Description of the field of mechanical engineering with examples taken from industrial applications, discussions of the practice with respect to engineering principles, ethics, and responsibilities. (P/NP grading only.)

Effective: 2001 Fall Quarter.
EME 005—Computer Programming for Engineering Applications (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MAT 016A (can be concurrent) or MAT 021A (can be concurrent) Structured programming in C for solving problems in engineering. Introduction to MATLAB and comparison study of C/C++ with MATLAB. GE credit: SE. Effective: 2017 Fall Quarter.

EME 050—Manufacturing Processes (4)
Laboratory—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): ENG 004 C- or better; PHY 009A C- or better Restricted to Mechanical Engineering and Mechanical Engineering/Materials Science Engineering majors. Modern manufacturing methods, safety, manufacturing instructions, computer-aided manufacturing and their role in the engineering design and development process. GE credit: SE. Effective: 2017 Fall Quarter.

EME 092—Internship in Mechanical Engineering (1-5)
Internship. Prerequisite(s): Lower division standing; approval of project prior to period of internship. Supervised work-study experience in engineering. May be repeated for credit. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

EME 097TC—Mentoring and Tutoring Engineering in the Community (1-4)
Variable—3-12 hours. Prerequisite(s): Consent of Instructor. Mentoring, coaching, tutoring and/or supervision of students in K-12 schools in Engineering-related topics. May be repeated for credit. (P/NP grading only.) Effective: 2012 Fall Quarter.

EME 099—Special Study for Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. Lower division standing. (P/NP grading only.) Effective: 1997 Winter Quarter.

EME 106—Thermo-Fluid Dynamics (4)
Lecture—4 hours. Prerequisite(s): ENG 103 C- or better; ENG 105 C- or better Restricted to Mechanical Engineering, Aerospace Science and Engineering, and Mechanical Engineering/Materials Science Engineering majors. Inviscid incompressible flow, compressible flow, ideal gas mixtures, psychrometrics, reacting mixtures and combustion. GE credit: SE. Effective: 2013 Winter Quarter.

EME 108—Measurement Systems (4)
Discussion—1 hour; Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): ENG 100 C- or better; ENG 102 C- or better; ENG 104 recommended. Restricted to Mechanical Engineering, Aerospace Science & Engineering and Mechanical/Materials Science & Engineering. Experiments to illustrate principles of mechanical systems. Signal analysis; Demonstration of basic sensors for mechanical systems; Experimental project design; Experiments involving voltage measurement; strain gauges, dynamic systems of 1st order. Three units of credit for students who have previously taken BIM 111; two units of credit for students who have previously taken EBS 165; one unit of credit allowed for students who have completed EME 107B (former version of EME 108). GE credit: SE, WE. Effective: 2017 Fall Quarter.

EME 109—Experimental Methods for Thermal Fluids (4)
Discussion—1 hour; Extensive Writing; Laboratory—1.5 hours; Lecture—2 hours. Prerequisite(s): EME 106 C- or better Restricted to Mechanical Engineering, Aerospace Science & Engineering and Mechanical/Materials Science Engineering Majors. Experiments illustrating principles of thermal-fluid systems and related measurement devices. Statistical design of experiments and uncertainty analysis of data; thermodynamic cycles, combustion, compressible and incompressible flows. Three units of credit for students who have previously taken ECH 155A; two units of credit for students who have previously taken ECH 155B; three units of credit for students who have previously taken ECI 141L; one unit of credit for students who have already completed EME 107A (former version of EME 109). GE credit: SE. Effective: 2017 Fall Quarter.

EME 115—Introduction to Numerical Analysis and Methods (4)
Lecture—3 hours; Lecture/Discussion—1 hour. Prerequisite(s): (ENG 006 C- or better or EME 005 C- or better or ECS 030 C- or better or ECM 006 C- or better); (MAT 021A C- or better, MAT 021B C- or better, MAT 021C C- or better, MAT 021D C- or better, MAT 022A C- or better, MAT 022B C- or better); (PHY 009A C- or better, PHY 009B C- or better, PHY 009C C- or better) Number representation, Taylor expansions, error and stability analysis, roots of nonlinear equations, sets of linear equations, numerical integration, ordinary differential equations. Not open for credit to students who have taken EAD 115. GE credit: SE. Effective: 2017 Fall Quarter.

EME 121—Engineering Applications of Dynamics (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ENG 102 C- or better; (ENG 006 C- or better or EME 005 C- or better or ECS 030 C- or better) Restricted to Mechanical Engineering, Aerospace Science and Engineering, and
Mechanical Engineering/Materials Science Engineering majors. Technical elective that revisits dynamic principles with emphasis on engineering applications; Equations of motion are derived and put into a format for computer solution; There is a computer laboratory where real engineering systems are simulated. GE credit: SE. Effective: 2017 Fall Quarter.

EME 134—Vehicle Stability (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ENG 102 C- or better Restricted to Mechanical Engineering, Aerospace Science and Engineering, and Mechanical Engineering/Materials Science Engineering majors. Analytical and experimental studies of the dynamics, stability and control of vehicles such as cars, trailers, airplanes, motorcycles, bicycles and rail cars. GE credit: SE. Effective: 2017 Fall Quarter.

EME 139—Stability of Flexible Dynamic Systems (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ENG 102 C- or better; ENG 103 C- or better Stability of flexible systems. Introduction to fluid-structure interaction. Mechanical vibrations. Design of mechanical subsystems or systems under constraints. Dynamic instabilities. Flutter. Control effectiveness. Energy extraction from fluid-structure interactions. Design applications to aerospace, mechanical and biomedical systems. No credit for students who have completed EAE 139. GE credit: SE. Effective: 2016 Spring Quarter.

EME 150A—Mechanical Design (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ENG 045 C- or better or ENG 045Y C- or better; (ENG 104 C- or better, EME 050 C- or better (can be concurrent)) Restricted to Mechanical Engineering, Aerospace Science and Engineering, Mechanical Engineering/Materials Science and Engineering majors. Principles of mechanics applied to design. Deformation and stress analysis. Structural integrity under static and fluctuating loads. Projects demonstrate progression from concept to engineering analysis, with emphasis on strength and durability. GE credit: SE, WE. Effective: 2017 Fall Quarter.

EME 150B—Mechanical Design (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EME 150A C- or better Restricted to Mechanical Engineering, Aerospace Science and Engineering, Mechanical Engineering/Materials Science and Engineering. Principles of engineering mechanics applied to the design and selection of mechanical components. Design projects, which concentrate on conceptual design, engineering analysis, methods of manufacture, material selection, and cost. GE credit: SE. Effective: 2017 Fall Quarter.

EME 151—Statistical Methods in Design and Manufacturing (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EME 150A C- or better Restricted to Mechanical Engineering, Aerospace Science and Engineering, Mechanical Engineering/Materials Science and Engineering. Methods of statistical analysis with emphasis on applications in mechanical design and manufacturing. Applications include product evaluation and decision making, probabilistic design, systems reliability, and fatigue under random loading. GE credit: SE. Effective: 2017 Fall Quarter.

EME 152—Computer-Aided Mechanism Design (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ENG 102 C- or better; (ENG 005 C- or better or ENG 006 C- or better or ECS 030 C- or better) Restricted to Mechanical Engineering, Aerospace Science and Engineering, Mechanical Engineering/Materials Science and Engineering. Principles of computer-aided mechanism design. Computer-aided kinematic, static, and dynamic analysis and design of planar mechanisms such as multiple-loop linkages and geared linkages. Introduction to kinematic synthesis of mechanisms. GE credit: SE. Effective: 2017 Fall Quarter.

EME 154—Mechatronics (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ENG 100 C- or better; ENG 102 C- or better; EME 050 C- or better Restricted to Mechanical Engineering, Aerospace Science and Engineering, Mechanical Engineering/ Materials Science and Engineering. Overview of mechatronics system and control system design concepts, control software architecture, control hardware architecture, microcontroller and interface technology for mechatronics control, sensor for mechatronics systems, actuator drives. GE credit: SE. Effective: 2017 Fall Quarter.

EME 161—Combustion and the Environment (4)
Lecture—3 hours; Lecture/Discussion—1 hour. Prerequisite(s): EME 106 C- or better Introduction to combustion kinetics; premixed and diffusion flames; turbulent combustion; pollutant formation; examples of combustion devices such as internal combustion engines, gas turbines, furnaces and incinerators; alternative fuels. GE credit: SE. Effective: 2017 Fall Quarter.
EME 163—Internal Combustion Engines and Future Alternatives (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): EME 050 C- or better; EME 106 C- or better Restricted to Mechanical Engineering, Aerospace Science and Engineering, Mechanical Engineering/Materials Science and Engineering. Fundamentals of internal combustion engine design and performance. Future needs to adapt to environmental concerns, and the feasibility of better alternatives in the future. GE credit: SE. Effective: 2017 Fall Quarter.

EME 164—Introduction to Heating, Ventilation and Air Conditioning Systems (4)
Lecture—4 hours. Prerequisite(s): EME 106 C- or better; EME 165 C- or better Introduction to basic mechanisms and processes associated with heating, ventilation and air conditioning (HVAC), including equipment and systems used for HVAC in residential and commercial buildings. Only 2 units for students who have completed ECI 125. GE credit: SE. Effective: 2017 Winter Quarter.

EME 165—Heat Transfer (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ENG 006 C- or better or EME 005 C- or better or ECS 030 C- or better); ENG 103 C- or better; ENG 105 C- or better Restricted to Mechanical Engineering, Aerospace Science and Engineering, Mechanical Engineering/Materials Science and Engineering. Conduction, convection, and radiation heat transfer. Computational modeling of heat transfer in engineering. Applications to engineering equipment with the use of digital computers. GE credit: SE. Effective: 2017 Winter Quarter.

EME 171—Analysis, Simulation and Design of Mechatronic Systems (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ENG 100 C- or better; ENG 102 C- or better Restricted to Mechanical Engineering, Aerospace Science and Engineering, Mechanical Engineering/Materials Science and Engineering. Modeling of dynamic engineering systems in various energy domains. Analysis and design of dynamic systems. Response of linear systems. Digital computer simulation and physical experiments. GE credit: SE. Effective: 2017 Fall Quarter.

EME 172—Automatic Control of Engineering Systems (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ENG 100 C- or better; ENG 102 C- or better Restricted to Mechanical Engineering, Aerospace Science and Engineering, Mechanical Engineering/Materials Science and Engineering. Classical feedback control systems; block diagrams; performance specifications; steady state errors; rise and settling times; root locus; PID controllers; Bode and Nyquist plots; stability; phase and gain margins; advanced topics as time allows. GE credit: SE. Effective: 2017 Fall Quarter.

EME 185A—Mechanical Engineering Systems Design Project (4) Review all entries
Laboratory—3 hours; Lecture—1 hour. Prerequisite(s): (EME 150A C- or better, EME 165 C- or better (can be concurrent)); CMN 001 or CMN 003 recommended; upper division composition recommended. Restricted to Senior standing in Mechanical Engineering (EMEC). Major mechanical engineering design experience; the mechanical engineering design process and its use in the design of engineering systems incorporating appropriate engineering standards and multiple realistic constraints. GE credit: OL, SE, VL. Effective: 2017 Fall Quarter.

EME 185B—Mechanical Engineering Systems Design Project (4) Review all entries
Laboratory—3 hours; Lecture—1 hour. Prerequisite(s): EME 050 C- or better; EME 150A C- or better; EME 165 C- or better (can be concurrent); ENG 003, CMN 001 or CMN 003 recommended; upper division composition recommended. Restricted to Senior standing in Mechanical Engineering (EMEC). Major mechanical engineering design experience; the mechanical engineering design process and its use in the design of engineering systems incorporating appropriate engineering standards and multiple realistic constraints. GE credit: OL, SE, VL. Effective: 2019 Winter Quarter.

EME 189A—Selected Topics in Mechanical Engineering; Energy Systems and the Environment (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Energy Systems and the Environment. May be repeated for credit when the topic is different. Effective: 2008 Summer Session 1.

EME 189B—Selected Topics in Mechanical Engineering; Engineering Controls (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Engineering Controls. May be repeated for credit when the topic is different. GE credit: SE. Effective: 2008 Summer Session 1.
EME 189C—Selected Topics in Mechanical Engineering; Engineering Dynamics (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Engineering Dynamics. May be repeated for credit when the topic is different. Effective: 2008 Summer Session 1.

EME 189D—Selected Topics in Mechanical Engineering; Biomechanics (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Biomechanics. May be repeated for credit when the topic is different. Effective: 2008 Summer Session 1.

EME 189E—Selected Topics in Mechanical Engineering; Fluid Mechanics (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Fluid Mechanics. May be repeated for credit when the topic is different. Effective: 2008 Summer Session 1.

EME 189F—Selected Topics in Mechanical Engineering; Manufacturing Engineering (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Manufacturing Engineering. May be repeated for credit when the topic is different. Effective: 2008 Summer Session 1.

EME 189G—Selected Topics in Mechanical Engineering; Mechanical Engineering and Product Design (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Mechanical Engineering and Product Design. May be repeated for credit when the topic is different. Effective: 2008 Summer Session 1.

EME 189H—Selected Topics in Mechanical Engineering; Mechatronics Systems (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Mechatronics Systems. May be repeated for credit when the topic is different. Effective: 2008 Summer Session 1.

EME 189I—Selected Topics in Mechanical Engineering; MEMS/Nanotechnology (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in MEMS/Nanotechnology. May be repeated for credit when the topic is different. Effective: 2008 Summer Session 1.

EME 189J—Selected Topics in Mechanical Engineering; Solid and Structural Mechanics (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Solid and Structural Mechanics. May be repeated for credit when the topic is different. Effective: 2008 Summer Session 1.

EME 189K—Selected Topics in Mechanical Engineering; Thermodynamics (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Thermodynamics. May be repeated for credit when the topic is different. Effective: 2008 Summer Session 1.

EME 189L—Selected Topics in Mechanical Engineering; Vehicle and Transportation Systems (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Vehicle and Transportation Systems. May be repeated for credit when the topic is different. Effective: 2008 Summer Session 1.

EME 192—Intership in Engineering (1-5)
Variable. Prerequisite(s): Upper division standing; approval of project prior to period of internship. Supervised work experience in mechanical engineering. May be repeated for credit. (P/NP grading only.) Effective: 1997 Fall Quarter.

EME 197TC—Mentoring and Tutoring Engineering in the Community (1-4)
Variable—3-12 hours. Prerequisite(s): Consent of Instructor. Upper division standing. Mentoring, coaching, tutoring and/or supervision of students in K-12 schools in Engineering-related topics. May be repeated for credit. (P/NP grading only.) Effective: 2012 Fall Quarter.

EME 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

EME 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

Medical-Veterinary Entomology Minor; Entomology & Nematology

Medical-Veterinary Entomology Minor; Entomology & Nematology | Medical-Veterinary Entomology Minor
Formerly the departments of Entomology and Nematology
(College of Agricultural and Environmental Sciences)
Steve Nadler, Ph.D., Chairperson of the Department
Joanna Chiu, Ph.D., Vice Chairperson of the Department
Department Office. 367 Briggs Hall; 530-752-0492; http://entomology.ucdavis.edu

Faculty. http://entomology.ucdavis.edu/Faculty/

Minor Requirements:
The Department of Entomology has five minor programs open to students in other disciplines who are interested in rounding out their academic study with a concentration in the area of entomology.

Minor Adviser. S. Lawler, S. Nadler

Medical-Veterinary Entomology Minor; Entomology & Nematology | ENT Courses

Courses in ENT:

ENT 001—Art, Science and the World of Insects (3)
Laboratory—3 hours; Lecture—3 hours. Fusion of entomology and art to create an appreciation of insect biology, ecology, interactions with humans and importance in human culture. Multidisciplinary approaches in education and career paths in entomology and art will be highlighted. GE credit: AH, OL, SE, SS, VL, WE. Effective: 2013 Fall Quarter.

ENT 002—Biodiversity (3)
Lecture—2 hours; Lecture/Discussion—1 hour. Introduction to nature, scope and geographical distribution of biodiversity (diversity of life, with emphasis on plants and animals, especially insects). Humans and biodiversity - domestication, aesthetics, ethics and valuation. Species richness and "success". Biodiversity through time; monitoring, evaluation and conservation. Biomes-global, continental and Californian. (Same course as EVE 002.) GE credit: SE, SL, WE. Effective: 2013 Fall Quarter.

ENT 010—Natural History of Insects (3)
Lecture—3 hours. Introduction to the insects detailing their great variety, structures and functions, habits, and their significance in relation to plants and animals including man. Designed for students not specializing in entomology. Not open for credit to students who have had ENT 100, but students who have taken this course may take ENT 100 for credit. GE credit: SE, SL, WE. Effective: 2013 Fall Quarter.

ENT 090X—Special Topics in Entomology (2)
Seminar—2 hours. Prerequisite(s): Consent of Instructor. Freshman seminar course for in-depth examination of a special topic within the subject area. May be repeated up to 2 time(s). (P/NP grading only.) Effective: 2013 Fall Quarter.

ENT 092—Internship (1-12)
Variable—3-36 hours. Prerequisite(s): Consent of Instructor. Work-learn experience on and off campus in all subject areas offered by the department, supervised by a member of the faculty. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 2013 Fall Quarter.

ENT 099—Special Study for Undergraduates (1-5)
Effective: 2013 Fall Quarter.
ENT 100—General Entomology (4) Review all entries
Lecture—3 hours; Term Paper—1 hour. Prerequisite(s): BIS 001B Biology, anatomy, physiology, development, classification, ecology and relation of insects to human welfare. GE credit: WE. Effective: 2013 Fall Quarter.

ENT 100—General Entomology (4) Review all entries
Lecture—3 hours; Term Paper—1 hour. Prerequisite(s): BIS 002B; or Consent of Instructor. Biology, anatomy, physiology, development, classification, ecology and relation of insects to human welfare. GE credit: WE. Effective: 2019 Winter Quarter.

ENT 100L—General Entomology Laboratory (2)
Laboratory—6 hours. Prerequisite(s): ENT 100 (can be concurrent) Anatomy, development, population ecology, methods of collecting, classification and identification of insects of all orders and of major families. GE credit: VL. Effective: 2013 Fall Quarter.

ENT 101—Functional Insect Morphology (3)
Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): ENT 100 Study of the basic external and internal structures, organs and tissues of insects, with emphasis on functional systems. Functional anatomy, histology and fine structures of important organs and tissues will be discussed. Effective: 2013 Fall Quarter.

ENT 102—Insect Physiology (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ENT 100; Or course in physiology or invertebrate zoology. Processes by which insects maintain themselves, reproduce, and adapt to environment. Insects as models for basic/applied research through detailed analysis of metabolic, physiological, and behavioral processes. Emphasis on analysis of methodology, fact, and theory. GE credit: SE, WE. Effective: 2013 Fall Quarter.

ENT 103—Insects Systematics (3)
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): Introductory course in zoology or entomology. Principles and methods of systematics, with particular reference to insects. Emphasis on different theories of classification, and analysis of phylogenetic relationships. Effective: 2013 Fall Quarter.

ENT 104—Behavioral Ecology of Insects (3)
Lecture—3 hours. Prerequisite(s): Introductory biology or zoology. Basic principles and mechanisms of insect behavior and ecology. An evolutionary approach to understanding behavioral ecology of insects. Effective: 2013 Fall Quarter.

ENT 105—Insect Ecology (4) Review all entries
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): BIS 002B (can be concurrent); Consent of Instructor. Introduction to insect ecology combining fundamental concepts and questions in ecology with ideas, hypotheses and insights from insects. Integrates aspects of individual, population, community and ecosystem ecology. GE credit: OL, SE, SL, WE. Effective: 2017 Fall Quarter.

ENT 105—Insect Ecology (4) Review all entries
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): BIS 002B (can be concurrent); or Consent of Instructor. Introduction to insect ecology combining fundamental concepts and questions in ecology with ideas, hypotheses and insights from insects. Integrates aspects of individual, population, community and ecosystem ecology. GE credit: OL, SE, SL, WE. Effective: 2017 Fall Quarter.

ENT 107—California Insect Diversity (5)
Fieldwork—6 hours; Laboratory—6 hours; Lecture—1 hour. Prerequisite(s): An introductory course in entomology. Survey of the diversity of insects from selected ecological zones in California with emphasis on collection, identification, and natural history. GE credit: SE. Effective: 2019 Spring Quarter.

ENT 109—Field Taxonomy and Ecology (7)
Laboratory—36 hours; Lecture—2 hours. Prerequisite(s): An introductory course in entomology or consent of instructor. GE credit: SE. Effective: 2013 Fall Quarter.

ENT 110—Arthropod Pest Management (5)
Laboratory—6 hours; Lecture—3 hours. Prerequisite(s): BIS 001B Development of the ecological basis for the integrated pest management paradigm with emphasis on agriculture. Ecological and practical aspects of control tactics. Laboratory emphasizes identification of pests and beneficials of agriculture and urban situations. GE credit: SE, WE. Effective: 2013 Fall Quarter.

ENT 116—Freshwater Macroinvertebrates (3)
Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): BIS 002B; Or equivalent. Limited enrollment. Biology,
ecology and taxonomy of freshwater macroinvertebrates, including insects, crustaceans, molluscs, worms, leeches, flatworms and others. Adaptations to life in freshwater. Aquatic food webs. Uses of macroinvertebrates in water quality monitoring. Field trips during regular lab hours. GE credit: SE, SL. Effective: 2013 Fall Quarter.

ENT 116L—Aquatic Insect Collection (2)
Fieldwork—2 hours; Laboratory—4 hours. Prerequisite(s): ENT 100L or ENT 116 (can be concurrent); Or prior experience with insect/arthropod identification to Family level. Restricted to 25 students. Collection of aquatic insects and identification to the Family level. Collections will require two, one-day weekend field trips (by arrangement). Collection requirement is 40 Families. Effective: 2016 Fall Quarter.

ENT 117—Longevity (4)
Lecture—3 hours; Term Paper—1 hour. Prerequisite(s): Upper division standing or consent of instructor. Nature, origin, determinants, and limits of longevity with particular reference to humans; emphasis on implications of findings from non-human model systems including natural history, ecology and evolution of life span; description of basic demographic techniques including life table methods. (Same course as HDE 117.) GE credit: SE, SL, WE. Effective: 2013 Fall Quarter.

ENT 119—Apiculture (3)
Lecture—3 hours. Biology and behavior of honeybees; communication, orientation, social organization, foraging activities, honey production, pollination activities. GE credit: OL, SE, VL, WE. Effective: 2016 Fall Quarter.

ENT 123—Plant-Virus-Vector Interaction (3)
Lecture—3 hours. Prerequisite(s): BIS 002A; BIS 101; PLB 105, PLP 120, and ENT 100 recommended. Analysis of interactions necessary for viruses to infect plants. Interactions among insect vectors and host plants involved in the plant-virus life cycle. Evolutionary aspects of the molecular components in viral infection and modern approaches to the interdiction of viral movement. (Same course as PBI 123 and PLP 123.) GE credit: SE, SL, WE. Effective: 2014 Winter Quarter.

ENT 135—Introduction to Biological Control (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ENT 100 or ENT 110 Effective: 2013 Fall Quarter.

ENT 153—Medical Entomology (3) Review all entries
Lecture—3 hours. Prerequisite(s): BIS 001A; or Consent of Instructor. Upper division standing in one of the biological sciences, or consent of instructor. Basic biology and classification of medically important arthropods with special emphasis on the ecology of arthropodborne diseases and principles of their control. Relationships of arthropods to human health. GE credit: SE, SL, WE. Effective: 2013 Fall Quarter.

ENT 156—Biology of Parasitism (3) Review all entries
Lecture—3 hours. Prerequisite(s): BIS 002A; or Consent of Instructor. Lectures on the biological and ecological aspects affecting host-parasite relationships using selected examples from protozoan and metazoan fauna. GE credit: SE. Effective: 2013 Fall Quarter.

ENT 158—Forensic Entomology (3) Review all entries
Laboratory—4 hours; Lecture—2 hours. Prerequisite(s): BIS 001B or ENT 100; Upper division standing. Arthropods, their general biology, successsion, developmental cycles and population biology in matters of criminal prosecution and civil litigation. Emphasis on basic arthropod biology, ecological and developmental concepts and methods,
development of reasoning abilities, implication, development of opinions and evidence. GE credit: WE. Effective: 2013 Fall Quarter.

**ENT 158—Forensic Entomology (3)** Review all entries
Laboratory—4 hours; Lecture—2 hours. Prerequisite(s): ENT 100; or Consent of Instructor. Upper division standing. Arthropods, their general biology, succession, developmental cycles and population biology in matters of criminal prosecution and civil litigation. Emphasis on basic arthropod biology, ecological and developmental concepts and methods, development of reasoning abilities, implication, development of opinions and evidence. GE credit: WE. Effective: 2013 Fall Quarter.

**ENT 180A—Experimental Ecology and Evolution in the Field (4)** Review all entries
Fieldwork—3 hours; Lecture/Lab—3 hours. Prerequisite(s): (ENT 105 or ESP 100); EVE 100; EVE 101 Experimental design in field ecology. Examination of primary literature, experimental design, independent and collaborative research, analysis of data, development of original research paper based on field experiments. (Same course as EVE 180A.) GE credit: QL, SE, VL. Effective: 2014 Winter Quarter.

**ENT 180B—Experimental Ecology and Evolution in the Field (4)** Review all entries
Fieldwork—3 hours; Lecture/Lab—3 hours. Prerequisite(s): EVE 180A or ENT 180A; EVE 100 or EVE 101 or ESP 100; ENT 105 Experimental design in field ecology. Examination of primary literature, experimental design, independent and collaborative research, analysis of data, development of original research paper based on field experiments. (Same course as EVE 180B.) GE credit: QL, SE, VL, WE. Effective: 2014 Winter Quarter.

**ENT 192—Internship (1-12)**
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Completion of 84 units. Laboratory experience or fieldwork off and on campus in all subject areas offered in the Department of Entomology. Internships supervised by a member of the faculty. (P/NP grading only.) Effective: 2013 Fall Quarter.

**ENT 197T—Tutoring in Entomology (1-3)**
Discussion—1-3 hours. Leading small discussion groups. Preview assignments and prepare guidelines for discussion. (P/NP grading only.) Effective: 2013 Fall Quarter.

**ENT 198—Directed Group Study (1-5)**
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 2013 Fall Quarter.

**ENT 199—Special Study for Advanced Undergraduates (1-5)**
Variable. (P/NP grading only.) Effective: 2013 Fall Quarter.

**ENT 212—Molecular Biology of Insects and Insect Viruses (3)**

**ENT 214—Vector-borne Infectious Diseases: Changing Patterns (2)**
Lecture/Discussion—2 hours. Prerequisite(s): Open to graduate students, MPVM and MPH students, DVM and medical students with second- or third-year standing. Open to upper division undergraduate students with consent of instructor(s). Vector-borne infectious diseases especially as they relate to changing patterns associated with climatic changes, trade and population movement. (Same course as PMI 214.) Effective: 2013 Fall Quarter.
ENT 225—Terrestrial Field Ecology (4)
Fieldwork—12 hours; Seminar—1 hour. Prerequisite(s): Introductory ecology and introductory statistics or consent of instructor. A field course conducted over spring break and four weekends at Bodega Bay, emphasizing student projects. Ecological hypothesis testing, data gathering, analysis and written and oral presentation of results. (Same course as ECK 225 and PBG 225.) Effective: 2013 Fall Quarter.

ENT 230—Advanced Biological Control (4)
Laboratory—6 hours; Lecture—2 hours. Prerequisite(s): Graduate or upper division standing in biological science or consent of instructor. Principles and current issues in biological control of arthropod pests and weeds; laboratory devoted to identification and life history of the major groups of parasitic and predaceous arthropods. Effective: 2013 Fall Quarter.

ENT 253—Advanced Medical Entomology (3)
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): One upper division course in Entomology (other than ENT 153) and one course in Microbiology: ENT 153 strongly recommended. An analysis of several anthropod-borne human diseases with emphasis on the relationships of the biology of the vector to the ecology of the disease. Discussion includes demonstration of vectors and techniques. Effective: 2013 Fall Quarter.

ENT 290—Exploratory Topics in Entomology (2)
Seminar—2 hours. Interdisciplinary topics in entomology, including innovative applications of entomological concepts to other fields of research and human endeavor (e.g. medicine, technology, art, criminology). May be repeated up to 8 unit(s) when topic differs. Effective: 2013 Fall Quarter.

ENT 291—Current topics in Medical and Veterinary Entomology (2)
Seminar—2 hours. Prerequisite(s): ENT 153 Discussions of parasitology, ecology and epidemiology related to vectors of pathogens causing disease in humans and animals. May be repeated up to 1 time(s). Effective: 2013 Fall Quarter.

ENT 292—Current Topics in Insect Physiology and Behavior (2)
Seminar—2 hours. Prerequisite(s): ENT 102 if topic is physiology, a course in behavior if topic is behavior, or either if topic bridges both. Analysis of contemporary advances in insect physiology, biochemistry and/or behavior. Interpretation and description of physiological and behavioral mechanisms and functions. Application of general principles to solution of problems in the laboratory and field. May be repeated up to 8 unit(s) topic differs. Effective: 2013 Fall Quarter.

ENT 293N—Current Topics in Insect Biotechnology and Genomics (2)
Seminar—2 hours. Prerequisite(s): ENT 212 Discussion of advances in insect biotechnology, including genetic engineering and genomics. May be repeated up to 6 unit(s) topic differs. Effective: 2013 Fall Quarter.

ENT 294—Current topics in Insect Ecology, Evolution, and Systematics (2)
Seminar—2 hours. Prerequisite(s): ENT 103; General course in ecology or evolution. Discussions of advanced topics in ecology, evolution and systematics with emphasis on analysis of factors influencing the distribution, abundance, adaptations and evolutionary relationships of insects. Includes consideration of applications of basic theory (e.g. biological control). May be repeated up to 8 unit(s) topic differs. Effective: 2013 Fall Quarter.

ENT 295—Current Topics in Agricultural Entomology and Bee Biology (2)
Seminar—2 hours. Prerequisite(s): ENT 110 if topic relates to pests and beneficial predators; ENT 119 if topic is bee biology; either if topic bridges both. Discussion of advanced topics about the biology, ecology, behavior, and management of pest and beneficial insects. May be repeated up to 8 unit(s) if topic differs. Effective: 2013 Fall Quarter.

ENT 297N—Seminar in Entomology (1)
Seminar—1 hour. Weekly Entomology seminar. May be repeated up to 9 unit(s) topic differs. (S/U grading only.) Effective: 2013 Summer Quarter.

ENT 298—Group Study (1-5)
Variable. (S/U grading only.) Effective: 2013 Fall Quarter.

ENT 299—Research (1-12)
Variable. (S/U grading only.) Effective: 2013 Fall Quarter.

Medicine, School of

Medicine, School of | SOM Information
Curriculum for the School of Medicine

The curriculum for the M.D. degree at the UC Davis School of Medicine is a four-year program providing comprehensive preparation for graduate medical training (internships and residencies) and the practice of medicine. It offers a blend of basic science training and clinical experience with opportunities for research.

The first-year curriculum begins in August and extends into May and is organized into two blocks, Foundations and Mechanisms & Diseases. The basic science portion of the Foundations block includes courses in Molecular Biology, Cell and Tissue Biology, Gross Anatomy/Embryology/Radiology, and Human Physiology. The major organizing theme is structure-function along the continuum of hierarchical biologic structure from molecule to cell, tissue and major organ systems. The three-year Doctoring curriculum begins with Doctoring 1, which is presented concurrently with the other courses. The focus of Doctoring 1 is physical examination training using standardized patients and models, correlated with concurrent gross anatomy and physiology by organ system. Behavioral medicine, epidemiology, biostatistics, cross-cultural medicine, and ethics are woven into the cases and didactic presentations and team-based learning modules. Students are required to attend preceptorships in the community and participate in home visits. Periodic quizzes and review sessions are used in the basic science courses throughout the block for formative assessment, and all courses administer comprehensive summative final examinations in December.

The Mechanisms & Disease block of the first-year curriculum begins in January and extends through April, with final exams in early May. There are two major threads, each of which is composed of several integrated courses. The Doctoring 1 course is offered concurrently. The Immunology/Microbiology/Pharmacology/Pathology thread presents an introduction to host defense, infection, basic pharmacologic principles, and general pathologic processes. The Endocrinology/Nutrition/Reproduction/Genetics (ENRG) thread covers essential concepts in genetics, basic and clinical nutrition, reproductive medicine, and clinical endocrinology. The general pathology course also includes male-female GU and endocrine pathology, and the pharmacology course covers antibiotics and endocrine pharmacology, with the goal of integration with concurrent courses. Periodic quizzes and review sessions provide formative feedback, and final examinations are used for summative assessment. The Doctoring 1 course continues with an emphasis on interviewing skills and clinical assessment. Cases are used in the problem-based learning approach for basic-science-clinical correlation, and for the exploration of psychosocial issues. Preceptorships and home visits continue. The Doctoring 1 course concludes with a comprehensive final examination, and also includes an observed complete history and physical examination.

The first-year curriculum ends with a five-week unscheduled block that may be used for vacation, remediation, electives, research, and international experiences.

The second-year curriculum is composed of two blocks—Brain & Behavior and Pathophysiology. Brain & Behavior begins in late June and extends through August with a neurosciences block composed of integrated neuroanatomy-clinical neurosciences. The latter emphasizes the pathophysiology of common neurological disorders. The systemic pathology curriculum continues with a focus on neuropathology, and the pharmacology course covers neuropharmacology. A clinical psychiatry course is also presented during this period. The Doctoring 2 course begins, focusing on advanced clinical skills and clinical reasoning using a combination of standardized patient assessments, problem-based learning, subspecialty physical examination sessions, preceptorships, and didactics in clinical epidemiology, medical economics, and socio-behavioral medicine. The Pathophysiology Block is devoted to compressed pathophysiology courses with tight integration of the systemic pathology and pharmacology courses. The courses are organized according to organ system (cardiovascular, pulmonary, renal, musculoskeletal system, hematology, gastroenterology, oncology, and dermatology). The Doctoring 2 curriculum continues concurrently with its focus on advanced clinical skills, epidemiology, ethics, and problem-based
assessments. History taking and physical diagnosis skills are correlated with the ongoing pathophysiology courses. Like the first year, all of the second-year courses utilize periodic quizzes and review sessions and a comprehensive final examination. The Doctoring 2 course includes an objective structured clinical examination (OSCE) using standardized patients at the end of the course series.

The second-year curriculum ends in February and is followed by a six-week, unscheduled block for preparation for USMLE Step 1, remediation, electives, and vacation.

The third-year program begins in April and includes six required clerkship rotations in the clinical specialties. Clerkships in surgery, internal medicine, obstetrics & gynecology, pediatrics, and psychiatry run for 8 weeks each. A four-week family medicine clerkship and a four-week selective are also required. In addition to the core clerkships, students will participate in a longitudinal primary care clinic throughout the third year. The third-year Doctoring program consists of longitudinal small groups led by faculty members who remain with their group throughout the year as the students rotate through their clerkships. Doctoring 3 themes include advanced interviewing techniques, clinical reasoning, clinical epidemiology, evidence-based medicine, and ethics/jurisprudence. Students must take a comprehensive clinical skills examination at the end of the third year which features self-assessment and faculty feedback.

The fourth-year curriculum features built-in flexibility to allow students to individualize their medical careers. The early start to the fourth year in May allows students to pursue electives for early exposure to clinical specialties or to complete clerkships which may have been deferred. All students are required to select a minimum of 32 weeks of clinical electives in addition to a single 4-week special study module or scholarly project. The Special Study modules are designed to integrate basic sciences with clinical sciences, provide opportunities for students to practice and refine fundamental skills in critical appraisal and analysis of emerging scientific developments, and to allow students to focus in-depth on a multidisciplinary topic of special interest to the student. The Scholarly Project requires independent inquiry with faculty mentorship and leads to a publishable manuscript and student presentation of the project at a research forum held in the winter.

Individual student programs are designed under the guidance of college directors, mentors and faculty advisers, with the support of the Career Advising Office. Each student's fourth year program must be approved by the Fourth Year Oversight Committee to ensure appropriate breadth, depth, and vigor. There are strict guidelines for the choices and time allowed away from the home institution. To satisfy the M.D. degree program, the student must successfully complete the required course work, clerkships, and fourth-year requirements. Students must pass USMLE Step 1, USMLE Step 2 CS and CK, and complete the fourth-year clinical performance examination. In addition to the fourth-year elective program available, there is the opportunity for students to select from a variety of electives during the first two years. Examples include electives in history of ethics and medicine, medical Spanish and insights in clinical research. Most students also participate in one of several student-run, community clinics for elective credit during their first and second years.

**Coordination with other Advanced Degree Programs**

The curriculum for the M.D. degree provides flexibility and encourages coordination with other advanced degree programs (Ph.D., M.S., M.A., M.B.A., and M.P.H.). These programs offer a wide breadth of study areas and draw upon the considerable expertise of the entire campus faculty. The Department of Public Health Sciences offers an M.P.H. program in conjunction with the M.D. program. This program is designed for students interested in disease prevention and community health, health professionals and State Health Department employees.

**Medicine, School of SOM Requirements**

**Required Curriculum for the M.D. Degree**

Units: 0

The following listing is the typical sequencing of all courses required for earning the M.D. degree. Course descriptions are given under the individual departmental course offerings.

**First-Year Required Courses**

Units: 58

**Year 1, Foundations Block**

- BCM 410A Molecular Medicine 4
- CHA 400 Developmental, Gross & Radiologic Anatomy 7.5
- HPH 400 Human Physiology 6

Fourth-Year Requirements

Thirty-six weeks of Required Course work comprised of the following specifics:

- Four weeks of an Inpatient Acting Internship from one of the following departments at UC Davis: Internal Medicine, OB-GYN, Pediatrics, Surgery, Family & Community Medicine and Psychiatry.
- Four weeks of Inpatient or Ambulatory Acting Internship in any department/discipline.
- Four weeks of Special Studies Module or Scholarly Project.
- Four weeks of Emergency Medicine.
- Twenty weeks of additional Acting Internships, Advanced Clinical Clerkships or Clinical Didactics.
- Sixteen weeks must be taken at UC Davis.
- Twenty-eight weeks must be in direct patient care.

Medicine, School of SOM Courses

Courses in School of Medicine:

**ANE 192—Internship in Anesthesiology (1-6)**
Internship—3-18 hours; Project (Term Project). Prerequisite(s): Upper division standing; approval of project prior to period of internship by preceptor. Supervised work experience in anesthesia and related fields. (P/F grading only.) Effective: 1997 Winter Quarter.

**ANE 199—Special Study for Advanced Undergraduates (1-5)**
Variable—3-15 hours. May be repeated for credit. (P/NP grading only.) Effective: 2007 Fall Quarter.

**ANE 430—Intro to Anesthesiology and Perioperative Medicine (3-6)**
Clinical Activity—40 hours. Prerequisite(s): Consent of Instructor. Introduction to anesthesiology during the MS3 year, with emphasis on introduction to the field of anesthesiology and the day-to-day practice of an anesthesiologist in the perioperative setting. May be repeated for credit. (H/P/F grading only.) Effective: 2018 Fall Quarter.

**ANE 435—Primary Care Multidisciplinary Pain Management (3)**
Clinical Activity. Rotation will give 3rd year primary-care bound students an overview of the scope of Pain Medicine. May be repeated for credit. (H/P/F grading only.) Effective: 2016 Fall Quarter.

**ANE 455—Externship in Anesthesiology (3-6)**
Clinical Activity, Prerequisite(s): Consent of Instructor. Away clinical rotation in Anesthesiology or Pain Medicine. (H/P/F grading only.) Effective: 2017 Summer Quarter.

**ANE 460—Anesthesiology Clinical Clerkship (3-18)**
Discussion—2 hours; Practice—10 hours; Variable—30 hours. Prerequisite(s): Consent of Instructor. Medical student. In-depth exposure to anesthesia through informal lectures and mentoring by anesthesiologists. Emphasis on understanding and applying anesthetic principles in managing administration of general, regional, and specialized areas. (H/P/F grading only.) Effective: 1997 Spring Quarter.

**ANE 461—Perioperative Medicine (3-12)**
Clinical Activity—30 hours. Prerequisite(s): Successful completion of third-year clerkships; consent of IOR. Two week rotation provides a broad exposure to various patient care services within the Department of Anesthesiology and Pain Medicine to apply medical knowledge to safely care for patients. (H/P/F grading only.) Effective: 2011 Spring Quarter.

**ANE 462—Perioperative Management of the Obstetric Patient (3-6)**
Variable—2 hours. Prerequisite(s): Consent of Instructor. Perioperative Management of Obstetric Patient advanced clinical clerkship will offer the medical student the chance to understand and be able to apply the principles of basic science into major improvements in obstetric anesthesia patient care. May be repeated for credit. (H/P/F grading only.) Effective: 2018 Spring Quarter.
ANE 463—Multidisciplinary Pain Management (6)
Clinical Activity—30 hours; Lecture/Discussion—10 hours. Prerequisite(s): Senior medical student in good standing. Senior clerkship to expose students to all facets of treating pain in all aspects of clinical care: outpatient and inpatient settings, acute and chronic pain, end of life issues, pediatrics, rehabilitation, etc. Daily clinics, rounds, and lectures. (H/P/F grading only.) Effective: 1999 Summer Quarter.

ANE 464—Multidisciplinary Approach to the Neurosurgical Patient (3-9)
Clinical Activity—40 hours. Prerequisite(s): Consent of Instructor. Participate in the perioperative care of patients undergoing neurosurgical procedures while under the supervision of anesthesia, neurology and neurosurgical ICU residents and attending physicians. May be repeated for credit. (H/P/F grading only.) Effective: 2017 Winter Quarter.

ANE 465—Away Acting Internship in Anesthesiology (3-18)
Clinical Activity—40 hours; Variable—3-18 hours. Prerequisite(s): Consent of Instructor. Satisfactory completion of Anesthesiology Clerkship. Work at the level of a sub intern in Inpatient and/or Outpatient settings. Expectation is to provide direct patient management. May be repeated for credit. (H/P/F grading only.) Effective: 2010 Summer Quarter.

ANE 480—Brief Introduction to Clinical Anesthesiology and Chronic Pain Management (3)
Clinical Activity—30 hours. Prerequisite(s): Second-year medical student. Daily experience in clinical anesthesiology at the preoperative screening unit, operating room, post anesthesia care unit, chronic pain management clinic with daily clinical correlation case discussions, and one-on-one interaction with faculty anesthesiologists. (H/P/F grading only.) Effective: 1997 Spring Quarter.

ANE 493A—Applied Physiology and Pharmacology (6)
Clinical Activity—4 hours; Laboratory—16 hours; Lecture—5 hours; Lecture/Lab—10 hours. Prerequisite(s): Consent of Instructor. UC Davis School of Medicine students only. Review and demonstrate the application of basic physiology and pharmacology to patient care. There will be an in-depth analysis of the physiology and pharmacology of the cardiovascular, pulmonary, nervous, renal and endocrine systems. (H/P/F grading only.) Effective: 2007 Winter Quarter.

ANE 493B—Interdisciplinary Medicine in Pain Care (6)
Clinical Activity—4 hours; Laboratory—16 hours; Lecture—5 hours; Lecture/Lab—10 hours. Prerequisite(s): Consent of Instructor. UC Davis School of Medicine students only. Integrate applied and practical neuroanatomy, physiology, pharmacology, psychology/psychiatry and social medicine in the care of patients who are receiving care for pain caused by acute or chronic medical disease or trauma. (H/P/F grading only.) Effective: 2007 Winter Quarter.

ANE 498—Individual or Group Study (1-5)
Discussion—1-5 hours; Laboratory—2-10 hours. Prerequisite(s): Interns and residents with consent of instructor. Directed reading and discussion and/or laboratory investigation on selected topics. (H/P/F grading only.) Effective: 1997 Winter Quarter.

ANE 499—Anesthesiology Research (1-18)
Laboratory—12-54 hours. Prerequisite(s): Third- or fourth-year medical students, advanced standing undergraduate and veterinary medicine students; or consent of instructor. Problems in clinical and/or laboratory research. May be repeated for credit. (H/P/F grading only.) Effective: 2018 Spring Quarter.

BCM 092—Internship in Biological Chemistry (1-12)
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Supervised work experience in biological chemistry and related fields (P/NP grading only.) Effective: 1997 Winter Quarter.

BCM 192—Internship in Biological Chemistry (1-12)
Internship—3-36 hours. Prerequisite(s): Upper division standing; approval of project prior to internship by preceptor. Supervised work experience in Biological Chemistry and related fields. (P/NP grading only,) Effective: 1997 Winter Quarter.

BCM 198—Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. For undergraduate students desiring to explore particular topics in depth. Lecture and conferences may be involved. (P/NP grading only.) Effective: 1997 Winter Quarter.

BCM 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only,) Effective: 1997 Winter Quarter.

BCM 209—Prostaglandins/Leukotrienes and Related Lipids (2)
Lecture—2 hours. Prerequisite(s): (BCP 101A and BCP 101B) or (PHC 101A and PHC 101B) or (PGG 100A and PGG 1432.
100B). Oxidative desaturation/elongation of polyunsaturated fatty acids. Biosynthesis of prostaglandins/
Physiological/pathophysiological implications; pharmacological and clinical relevance. Effective: 1997 Winter Quarter.

BCM 217—Molecular Genetics of Fungi (3)
Lecture—3 hours. Prerequisite(s): PLP 130; PLP 215X; BCP 101B; BOT 119; GGG 100; GGG 102A; Graduate standing in 
a biological science; MIC 215 recommended. Advanced treatment of molecular biology and genetics of filamentous 
fungi and yeasts, including gene structure, organization and regulation; secretion; control of reproduction; 
molecular evolution; transformation; and gene manipulation. (Same course as PLP 217.) Effective: 1997 Winter Quarter.

BCM 222—Mechanisms of Translational Control (2)
Discussion—1 hour; Lecture—1 hour. Prerequisite(s): BCP 201C or Consent of Instructor. Molecular mechanisms of 
protein synthesis and translational control in eukaryotic cells, with emphasis on mammalian cells and their viruses. 
An advanced graduate-level treatment of topics of current interest, with readings and discussion of primary papers 
from the literature. Effective: 1997 Winter Quarter.

BCM 230—Practical NMR Spectroscopy and Imaging (1)
Lecture—1 hour. Prerequisite(s): CHE 107A; CHE 107B; (PHY 009A, PHY 009B, PHY 009C; or PHY 005A, PHY 005B, 
PHY 005C) or consent of instructor. Basic theory, experimental methods, and instrumentation of NMR. Enables 
students to understand NMR spectroscopy and imaging experiments. (S/U grading only.) Effective: 1997 Winter Quarter.

BCM 231—Biological Nuclear Magnetic Resonance (3)
Lecture—3 hours. Prerequisite(s): MCB 221A; Or equivalent or consent of instructor. Principles and applications of 
magnetic resonance in biomedicine. Fundamental concepts and the biophysical basis for magnetic resonance 
applications in areas of tissue characterization/imaging, metabolic regulation, and cellular bioenergetics. (Same 
course as BPH 231.) Effective: 1997 Winter Quarter.

BCM 291—Seminar in Genetic Approaches to Pathogenesis of Human Disease (1)
Seminar—1 hour. Prerequisite(s): Student in Genetics Graduate Group or consent of instructor. Current genetic 
approaches to understanding the pathogenesis of disease and mammalian development presented and critically 
discussed by faculty, fellows and students. Topics include Mendelian and non-Mendelian diseases, imprinting, 
homologous recombination, statistical methods, genetic epidemiology and cell cycle dependent expression. (Same 
course as BCM 491.) (S/U grading only.) Effective: 1997 Fall Quarter.

BCM 298—Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. For graduate students desiring to explore particular topics in depth. 
Lectures and conferences may be involved. Effective: 1997 Winter Quarter.

BCM 299—Research (1-12)
Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

BCM 410A—Molecular Medicine (4)
Discussion—3 hours; Lecture—3 hours; Web Virtual Lecture—1 hour. Prerequisite(s): Consent of Instructor. Restricted 
to Medical Students only. Biochemistry of proteins and nucleic acids. Includes an introduction to cancer biology and 
a full discussion of carbohydrate metabolism. Molecular aspects of human disease are highlighted throughout the 
course. (P/F grading only.) Effective: 2015 Summer Quarter.

BCM 491—Seminar in Genetic Approaches to Pathogenesis of Human Disease (1)
Seminar—1 hour. Prerequisite(s): Student in Genetics Graduate Group or consent of instructor. Current genetic 
approaches to understanding the pathogenesis of disease and mammalian development presented and critically 
discussed by faculty, fellows and students. Topics include Mendelian and non-Mendelian diseases, imprinting, 
homologous recombination, statistical methods, genetic epidemiology and cell cycle dependent expression. (Same 
course as BCM 291.) (H/P/F grading only.) Effective: 1999 Fall Quarter.

BCM 493—Medical Genomics (6)
Clinical Activity—4 hours; Laboratory—12 hours; Lecture—4 hours. Prerequisite(s): Consent of Instructor. Four-week 
module will focus on the clinical methods and applications of medical genomics. Topics will include an introduction 
to the human genome and human genomics, genetic and epigenetic variation and the ethics of medical genomics. 
(H/P/F grading only.) Effective: 2012 Spring Quarter.
BCM 497T—Tutoring in Biological Chemistry (1-5)
Tutorial—3-15 hours. Prerequisite(s): Advanced standing or consent of instructor. Assist instructor by tutoring medical students in preparation for one of the departmental courses that is a component of the required curriculum of the School of Medicine. (H/P/F grading only.) Effective: 1997 Winter Quarter.

BCM 498—Group Study (1-5)
Variable. Prerequisite(s): Medical students with consent of instructor. (H/P/F grading only.) Effective: 1997 Winter Quarter.

BCM 499—Research (1-12)
Variable. Prerequisite(s): Medical students with consent of instructor. Research with Department of Biological Chemistry. May be repeated for credit. (H/P/F grading only.) Effective: 1997 Winter Quarter.

CHA 101—Human Gross Anatomy (4)
Lecture—4 hours. Prerequisite(s): BIS 002A; Concurrent enrollment in EXB 106L or CHA 101L strongly recommended. Upper division students only; Pass One open to upper division Exercise Biology or Anthropology majors only; Pass Two open to Seniors in any major; open enrollment at the start of the quarter for upper division students in any major. Detailed study of the gross anatomical structure of the human body, with emphasis on function and clinical relevance to students entering health care professions. (Same course as EXB 106.) GE credit: SE. Effective: 2010 Fall Quarter.

CHA 101L—Human Gross Anatomy Laboratory (3)
Laboratory—9 hours. Prerequisite(s): BIS 002A; (EXB 106 (can be concurrent) or CHA 101 (can be concurrent)); If EXB 106 or CHA 101 is not taken concurrently, it must have been already completed. Upper division students only; Pass One open to upper division Exercise Biology or Anthropology majors only; Pass Two open to Seniors in any major; open enrollment at the start of the quarter for upper division students in any major; mandatory attendance on first day of lab. Detailed study of prosected human cadavers in small group format with extensive hands-on experience. (Same course as EXB 106L.) GE credit: SE. Effective: 2010 Fall Quarter.

CHA 102—Human Microscopic Anatomy: Structure and Function of Human Tissues and Organ Systems (4.5)
Discussion/Laboratory—4 hours; Lecture—3 hours. Prerequisite(s): BIS 104 Limited enrollment. Course complements Gross Anatomy by extending the study of structure to the microscopic level. Shows how cells are assembled into tissues, and tissues into organs, with an emphasis on demonstrating how microscopic structure explains function. GE credit: SE. Effective: 2017 Winter Quarter.

CHA 103—Human Clinical Neuroanatomy (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): CHA 101; or Consent of Instructor. Open to upper division students. Clinically relevant anatomy of the normal human nervous system, including external and internal anatomy of the brain, spinal cord, and cranial nerves. Blood supply to the brain and spinal cord. Functional neuroanatomy of motor, sensory, and cognitive systems. Application of neuroanatomical principles relevant to clinical problem solving for students entering health care professions. (Same course as NEU 103.) GE credit: SE. Effective: 2018 Spring Quarter.

CHA 192—Internship in Morphology (1-12)
Internship—3-36 hours. Prerequisite(s): Upper division standing; laboratory science experience including some chemistry; approval of project by preceptor prior to period of internship. Experience of supervised internship in research laboratories of members of the department. (P/NP grading only.) Effective: 1997 Winter Quarter.

CHA 197T—Tutoring in Cell Biology and Human Anatomy (1-5)
Discussion—1 hour; Laboratory—6-9 hours. Prerequisite(s): CHA 101 B or better; and Consent of Instructor. Provides laboratory instruction in gross and microscopic human anatomy, with small groups of undergraduates under the supervision of the instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

CHA 198—Directed Group Study (1-5)
Discussion—1-10 hours. Prerequisite(s): Consent of Instructor. Directed reading, discussion, and/or laboratory experience on selected topics. (P/NP grading only.) Effective: 1997 Winter Quarter.

CHA 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

CHA 200—Graduate Human Gross Anatomy (6)
Laboratory—6 hours; Lecture—4 hours. Prerequisite(s): Consent of Instructor. Open only to full-time graduate students. Lectures on human gross anatomy and cadaver dissection laboratory. Topics arranged by region; emphasis on osteology, neuromuscular anatomy, cardiovascular anatomy, gastrointestinal anatomy and anatomy of 1434
reproductive systems. Only 2 units of credit for students who have completed CHA 101. Effective: 2008 Winter Quarter.

**CHA 202—Microscopic Anatomy for Researchers (3)**
Discussion/Laboratory—3 hours; Lecture—2 hours. Open to graduate students in the biomedical sciences (no consent required); advanced undergraduates seeking research careers in the biomedical sciences (consent of instructor required). The growing importance of the use of gene knock-out studies and imaging technology requires significant understanding of basic anatomy. Designed to familiarize students in diverse fields with anatomical, cellular and tissue organization of typical animal models. Effective: 2017 Spring Quarter.

**CHA 203—Neurobiology (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): Consent of Instructor. Two upper division or one graduate course in Neurobiology. Physiology and anatomy of the normal human nervous system in an integrated format. Effective: 2004 Spring Quarter.

**CHA 290—Seminar (1)**
Seminar—1 hour. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

**CHA 290C—Research Group Conference (1)**
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Graduate student with research experience (may be taken concurrently). Discussion of problems, progress and literature groups relevant to current research undertaken by laboratory groups Human Anatomy. (S/U grading only.) Effective: 1997 Winter Quarter.

**CHA 298—Advanced Group Study (1-5)**
Variable. Prerequisite(s): Consent of Instructor. Effective: 1997 Winter Quarter.

**CHA 299—Research (1-12)**
Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

**CHA 400—Developmental, Gross & Radiologic Anatomy (7.5)**
Laboratory—5 hours; Lecture—3 hours. Prerequisite(s): Consent of Instructor. Medical students only. Integrated presentation of developmental, gross and radiologic anatomy. Embryology and radiology correlated with the dissection of the entire body. Embryology from implantation to birth. (P/F grading only.) Effective: 2011 Summer Quarter.

**CHA 402—Cell and Tissue Biology (4.5)**
Laboratory—4 hours; Lecture—2 hours. Prerequisite(s): Consent of Instructor. Medical student only. Microscopic structure of the basic cells, tissues and organs of the body with an emphasis on how structure explains function. Analysis and identification of sectioned material at the light microscopic and ultrastructural levels. (P/F grading only.) Effective: 2011 Summer Quarter.

**CHA 403—Medical Neuroanatomy (5)**
Discussion/Laboratory—1 hour; Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): CHA 400; Block 1. Restricted to medical students only. Anatomy of the normal human nervous system, to include gross external and internal morphology of brain and spinal cord, and function neuroanatomy of motor, sensory and cognitive systems. Incorporates application of neuroanatomy to clinical problem solving. (Same course as HPH 403.) (P/F grading only.) Effective: 2007 Summer Quarter.

**CHA 493B—Anatomy Medical Education Special Study Module (6)**
Auto Tutorial—6 hours; Clinical Activity—14 hours; Independent Study—10 hours; Seminar—10 hours. Prerequisite(s): Consent of Instructor. UC Davis School of Medicine students only. Attend all of the lectures and laboratory sessions for course 400 and 402 during the four-week section (approximately seven anatomy labs and three to four histology labs); tutor first-year students during the laboratory sessions; prepare and present a clinical correlate session. (H/P/F grading only.) Effective: 2007 Spring Quarter.

**CHA 497T—Tutoring in Human Anatomy (1-5) [Review all entries]**
Tutorial—3-15 hours. Prerequisite(s): Advanced standing or consent of instructor. Assist instructor by tutoring medical students in preparation for one of the departmental courses that is a component of the required curriculum for the School of Medicine. (H/P/F grading only.) Effective: 1997 Winter Quarter.

**CHA 497T—Tutoring in Human Anatomy (3-6) [Review all entries]**
Tutorial—3-15 hours. Prerequisite(s): Advanced standing or consent of instructor. Assist instructor by tutoring medical students in preparation for one of the departmental courses that is a component of the required curriculum for the School of Medicine. May be repeated for credit. (H/P/F grading only.) Effective: 2018 Fall Quarter.
CHA 498—Advanced Group Study (1-12)
Variable. Prerequisite(s): Medical students, interns, and residents with consent of instructor. Directed reading and group discussions and/or laboratory experience on selected topics. (H/P/F grading only.) Effective: 1997 Winter Quarter.

CHA 499—Research (1-12)
Variable. Prerequisite(s): Consent of Instructor. (H/P/F grading only.) Effective: 1997 Winter Quarter.

CLH 200—Introduction to Clinical Research (3) Review all entries
Independent Study—3 hours; Lecture—2 hours. Prerequisite(s): Consent of Instructor. One of the following degrees: MD, DDS, DMD, OD, ND, DO, PharmD, DVM, PhD or DNS in nursing. Application and acceptance into the Clinical Research Graduate Group, K30 program or other SOM/CTSC training programs. Introduction to the CRGG program and overview of major clinical research topics. Overview of basic clinical skills needed to accomplish CRGG mentored research project. (S/U grading only.) Effective: 2008 Summer Special Session.

CLH 200—Introduction to Translational Research (1) Review all entries
Lecture—1 hour. Prerequisite(s): Consent of Instructor. One of the following degrees: MD, DDS, DMD, OD, ND, DO, PharmD, DVM, PhD or DNS in nursing; application and acceptance into the Clinical Research Graduate Group, K30 program or other SOM/CTSC training program. Overview of basic clinical skills needed to accomplish CRGG mentored research project. (S/U grading only.) Effective: 2018 Summer Quarter.

CLH 201—Strategies for Grant Writing (2)
Lecture—2 hours. Prerequisite(s): Consent of Instructor. Completed one of the following degrees: MD, DDS, DMD, OD, ND, DO, PharmD, DVM, PhD or DNS in nursing; application and acceptance into the Clinical Research Graduate Group, K30 program or other SOM/CTSC training program. Practical skills and strategies to create successful grant proposals in NIH style/format. Generating ideas, identifying and accessing research resources, grant components, specific aims, background and significance, preliminary studies, budgets, and bios. Matriculation through UC system, and resubmissions. (Former course MDS 461CR.) (S/U grading only.) Effective: 2008 Summer Special Session.

CLH 202—Introduction to Clinical Epidemiology and Study Design (3) Review all entries
Discussion—10 hours; Lecture—25 hours. Prerequisite(s): Consent of Instructor. Completed one of the following degrees: MD, DDS, DMD, OD, ND, DO, PharmD, DVM, PhD or DNS in nursing; application and acceptance into the Clinical Research Graduate Group, K30 program, or other SOM/CTSC training programs. Anatomy and physiology of conducting clinical epidemiologic research. Familiarity with three basic study designs (cross-sectional, case-control, and cohort). Discussion of principles of measurements in clinical epidemiological studies, basic methods for analyzing data, and ethical issues involved in conducting research. (S/U grading only.) Effective: 2008 Summer Special Session.

CLH 202—Introduction to Clinical Research (3) Review all entries
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): Consent of Instructor. Completed one of the following degrees: MD, DDS, DMD, OD, ND, DO, PharmD, DVM, PhD or DNS in nursing; application and acceptance into the Clinical Research Graduate Group, MRCTP program, Clinical Research Certificate or other SOM/CTSC training programs. Anatomy and physiology of conducting clinical epidemiologic research. Familiarity with three basic study designs: cross-sectional, case-control, and cohort. Discussion of principles of measurements in clinical epidemiological studies, basic methods for analyzing data, and ethical issues involved in conducting research. Effective: 2019 Winter Quarter.

CLH 203—Methods in Clinical Research (3)
Discussion—1 hour; Independent Study—10 hours; Lecture—4 hours. Prerequisite(s): Consent of Instructor. Completed one of the following degrees: MD, DDS, DMD, OD, ND, DO, PharmD, DVM, PhD or DNS in nursing; application and acceptance into the Clinical Research Graduate Group, K30 program or other SOM training programs. Overview of major approaches to clinical research, including health services research techniques, informatics, GCRC, and preclinical methodologies to enhance clinical projects. Overview of UCD clinical research support infrastructure. Methodologies applicable to clinical research and its multi-disciplinary perspective. (S/U grading only.) Effective: 2015 Spring Quarter.

CLH 204—The Ethics of Research (1)
Lecture—1 hour. Prerequisite(s): Consent of Instructor. Priority given to those with acceptance into the Clinical Research Graduate Group, K12, T32 or other SOM/CTSC training program. Acquire information about ethical responsibilities; Explore major questions in ethics; Apply ethical principles, concepts and values; Gain an

1436
appreciation of the role of trust in scientific research. Recommend three quarters of CLH204. Must enroll in Fall to continue through Spring. May be repeated up to 3 unit(s). (S/U grading only.) Effective: 2016 Fall Quarter.

CLH 207—Team Science (1)
Lecture/Discussion—1 hour. Prerequisite(s): Participation in CTSC Research Education and Training Programs, or consent of instructor. Restricted to 25 students. Today's scientific challenges necessitate cross-disciplinary engagement and high collaboration levels. This course offers guidance on how best to engage in team science to pursue complex questions, work effectively with team members, and produce high impact research that meets society's needs. (S/U grading only.) Effective: 2015 Winter Quarter.

CLH 208—Introduction to Grant Writing, I (2)
Extensive Writing; Lecture/Discussion—2 hours. First in a two-quarter series. Scholars are encouraged to enroll in both classes. The two-course sequence provides training in practical aspects of competitive grant writing. The focus is NIH, but information will apply to other funding agencies. (S/U grading only.) Effective: 2014 Fall Quarter.

CLH 209—Introduction to Grant Writing, II (1)
Lecture/Discussion—1 hour. Prerequisite(s): CLH 208; Consent of Instructor. Restricted to students who have completed course 208. Second in a two-quarter series. Two-course sequence provides training in practical aspects of competitive grant writing. (S/U grading only.) Effective: 2016 Fall Quarter.

CLH 210Y—Principles and Methods of Comparative Effectiveness Research (4)
Discussion—2 hours; Project (Term Project)—6 hours; Web Electronic Discussion; Web Virtual Lecture—4 hours. Prerequisite(s): Consent of Instructor. Familiarity with research methodology, and a course in introductory statistics. Provides an introduction to Comparative Effectiveness Research (CER) and methods for conducting CER. (S/U grading only.) Effective: 2015 Winter Quarter.

CLH 211—Critical Assessment of the Biomedical Literature (1)
Lecture/Discussion—1 hour. Prerequisite(s): Consent of Instructor. Exposes students to topical issues and controversies in the design of interdisciplinary translational research, with an emphasis on critical assessment of the biomedical and health sciences literature. The course extends students' knowledge of study design through practical application. May be repeated up to 3 unit(s). (S/U grading only.) Effective: 2016 Fall Quarter.

CLH 212—Introduction to Stem Cell Biology (3)
Lecture/Discussion—3 hours. Open to graduate students with a fundamental knowledge of cell biology. Introduction to Stem Cell Biology. Each week will focus on different aspects of stem cells, including general concepts, stem cells in lower organisms, embryonic stem cells and cellular reprogramming. Effective: 2016 Spring Quarter.

CLH 214A—Biodesign I (2)
Lecture—2 hours. Prerequisite(s): Consent of Instructor. Prior approval by instructor required; student must commit to taking both courses; Biodesign I and Biodesign II. Focuses on the principles of needs identification and invention of biomedical technologies. Two part course provides a basic understanding of the elements of the innovation process and how to translate these principles into biomedical device design. Effective: 2016 Fall Quarter.

CLH 214B—Biodesign II (2)
Lecture—2 hours. Prerequisite(s): CLH 214A; Consent of Instructor. Prior approval by instructor required; student must commit to taking both courses; Biodesign I and Biodesign II. Focuses on the implementation of biomedical technologies and translational process. Two part course provides a basic understanding of the elements of the innovation process and how to translate these principles into biomedical device design. Effective: 2017 Winter Quarter.

CLH 220—Basics of Stem and Progenitor Cells (1)
Lecture—1 hour. Prerequisite(s): MCP 200L; MCP 200; Consent of Instructor; Graduate standing. This is a lecture course designed for graduate students who have experience in cell culture techniques. It is designed to give a broad overview of the field and current cells of interest to the greater research community. (S/U grading only.) Effective: 2007 Spring Quarter.

CLH 222—Ethical Issues in Stem Cell Biology (1)
Lecture/Discussion—1 hour. Prerequisite(s): Consent of Instructor. Graduate standing. Critical presentation and analysis of recent articles in stem cell biology and small group discussions of the ethical issues surrounding this area of research. (S/U grading only.) Effective: 2007 Winter Quarter.

CLH 230—Congestive Heart Failure, Mechanism of Disease (3)
Lecture/Discussion—2 hours; Project (Term Project). Prerequisite(s): Consent of Instructor. Graduate standing.
Underlying mechanisms of cardiomyopathy and heart failure. Presentation of fundamental knowledge of and recent basic research on heart failure. Student team projects: investigation and presentation of a research topic and bench research project to advance research in the same area. Effective: 2008 Summer Session 1.

CLH 231—Current Techniques in Clinical Research (2)
Clinical Activity—3 hours; Lecture—1 hour. Prerequisite(s): CLH 250; and Consent of Instructor. Graduate standing. Current techniques used in clinical research such as electrophysiology, cardiovascular surgery, cardiac catheterization and echocardiography, team science, and patient management. Lectures are presented by experts on each technique, with an emphasis on use in translational research. (S/U grading only.) Effective: 2006 Fall Quarter.

CLH 233—Molecular Mechanisms of Disease: Cancer (3)
Lecture/Discussion—2 hours; Project (Term Project)—3 hours. Prerequisite(s): Consent of Instructor. Restricted to students pursuing the designated emphasis in Translational Research; graduate standing. Cutting edge of research on underlying mechanisms of cancer development, progression and prevention—clinical trials/drug development, signaling pathways and molecular mechanisms of cancer development, recent basic research on cancer stem cells, genetics and epigenetic events and animal models used. Effective: 2013 Fall Quarter.

CLH 240—Predoctoral Clinical Research Training Program Research Integration (1)
Discussion—0.5 hours; Seminar—0.5 hours. Prerequisite(s): Consent of Instructor. Enrollment in the Predoctoral Clinical Research Training Program in the CTSC, School of Medicine. Alternating sessions: journal club, seminar/discussion, and research integration sessions. May be repeated up to 3 time(s). (S/U grading only.) Effective: 2007 Fall Quarter.

CLH 244—Introduction to Medical Statistics (4)
Lecture—4 hours. Introduction to statistical methods and software in clinical, laboratory and population medicine. Graphical and tabular presentation of data, probability, binomial, Poisson, normal, t-, F-, and Chi-square distributions, elementary nonparametric methods, simple linear regression and correlation, life tables. Only one unit of credit for students who have completed STA 100 or MPM 402. (Same course as SPH 244.) Effective: 2017 Winter Quarter.

CLH 245—Biostatistics for Biomedical Science (4)
Lecture—4 hours. Prerequisite(s): CLH 244 or SPH 244; Consent of Instructor. Or equivalent. Analysis of data and design of experiments for laboratory data. (Same course as SPH 245.) Effective: 2015 Spring Quarter.

CLH 246—Biostatistics for Clinical Research (4)
Lecture—4 hours. Prerequisite(s): CLH 245 or SPH 245 Emphasizes critical biostatistics for clinical research and targets biomedical audience. Students will develop understanding for basic planning and analysis of clinical studies and learn to develop collaborations with biostatisticians. May be repeated for credit. (Same course as SPH 246.) Effective: 2015 Winter Quarter.

CLH 247—Statistical Analysis for Laboratory Data (4)
Lecture—4 hours. Prerequisite(s): CLH 245 or SPH 245 Statistical methods for experimental design and analysis of laboratory data including gene expression arrays, RNA-Seq, and mass spec. (Same course as SPH 247.) Effective: 2015 Spring Quarter.

CLH 250—Integrating Medicine Into Basic Science (6)
Clinical Activity—8 hours; Discussion—6 hours; Lecture—3.75 hours; Seminar—2.5 hours. Graduate standing; acceptance into HHMI Integrating Medicine into Basic Science program. Four-week summer institute consisting of didactic lectures, reading assignments, group discussions, and clinical rotations to acculturate students to the human medical environment; integrate medical principles, physiology and pathophysiology into basic research; introduce high-impact clinical studies related to medicine and health. (S/U grading only.) Effective: 2006 Fall Quarter.

CLH 290A—Hot Topics in Clinical Research (1)
Seminar—1 hour. Prerequisite(s): Graduate standing or consent of instructor. Seminars presented by guest lecturers on subjects of their own research activities. May be repeated for credit. (S/U grading only.) Effective: 2006 Fall Quarter.

CLH 290B—Hot Topics in Stem Cell Biology (1)
Seminar—1 hour. Prerequisite(s): Consent of Instructor. Graduate standing. Seminars presented by guest lecturers on subjects of their own research. (S/U grading only.) Effective: 2006 Fall Quarter.
CLH 290C—Literature in Stem Cell Biology (1)
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Graduate standing. Critical presentation and analysis of recent journal articles in stem cell biology by students. May be repeated for credit. (S/U grading only.) Effective: 2006 Fall Quarter.

CLH 290D—Literature in Translational Research (1)
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Graduate standing. Critical presentation and analysis of recent journal articles in translational research by students. May be repeated for credit. (S/U grading only.) Effective: 2009 Fall Quarter.

CLH 298—Group Study in Clinical Research (1-5)
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. Restricted to students enrolled in the Mentored Clinical Research Training Program. Special topics in Clinical Research appropriate for group study at the graduate level. May be repeated for credit. (S/U grading only.) Effective: 2006 Winter Quarter.

CLH 299—Clinical Research (1-5)
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. Restricted to students enrolled in the Mentored Clinical Research Training Program. Independent research and special topics in clinical research appropriate for graduate level. May be repeated for credit. (S/U grading only.) Effective: 2006 Fall Quarter.

DER 192—Internship in Cutaneous Biology (1-4)
Internship—8-20 hours. Prerequisite(s): Upper division standing or consent of instructor. Approval of project prior to internship by preceptor. Supervised work experience involving research on the skin. Final report. (P/NP grading only.) Effective: 1997 Winter Quarter.

DER 199—Special Study in Cutaneous Biology (1-4)
Variable. Prerequisite(s): Advanced undergraduate standing and/or consent of instructor. Special study by individual arrangement of specialized topics in biology of skin. Work may be assigned readings, laboratory research or a combination. (P/NP grading only.) Effective: 1997 Winter Quarter.

DER 299—Research in Cutaneous Biology (1-12)
Laboratory—3-36 hours. Prerequisite(s): Consent of Instructor. Independent research in cellular and biochemical mechanisms of cutaneous biology and pathology. (S/U grading only.) Effective: 1997 Winter Quarter.

DER 420—Integumentary System (2)
Clinical Activity—0.25 hours; Lecture/Discussion—3 hours. Prerequisite(s): Approval of School of Medicine Committee on Student Promotions. Restricted to Medical students only; student must have passed all SOM Year 1 courses. Cell biology, pathology, and physical diagnosis of the skin. Recognition of normal variations, and common or important dermatoses. Patient demonstrations of select conditions. (P/F grading only.) Effective: 2013 Fall Quarter.

DER 460—Dermatology Clinical Clerkship (3-9)
Clinical Activity—40 hours. Prerequisite(s): Completion of three years of medical school; or consent of instructor. Limited enrollment. Observation and participation in dermatology clinics/practice and participation in Ward Rounds and Dermatology Clinics at UC Davis Medical Center, Kaiser, and private practitioner offices. May be repeated for credit. (H/P/F grading only.) Effective: 2011 Summer Quarter.

DER 465—Specialty Externship in Dermatology (3-16)
Clinical Activity—30 hours. Prerequisite(s): Consent of Instructor. Externship provides in-depth exposure to one of a variety of sub-specialties in Dermatology. May be repeated for credit. (H/P/F grading only.) Effective: 2011 Summer Quarter.

DER 466—Away Acting Internship in Dermatology (3-18)
Clinical Activity—40 hours; Lecture—6 hours; Variable—3-18 hours. Prerequisite(s): Consent of Instructor. Work at the level of a sub intern in Inpatient and/or Outpatient settings. Expectation is to provide direct patient management. May be repeated for credit. (H/P/F grading only.) Effective: 2010 Summer Quarter.

DER 470—Introduction to Dermatopathology (6)
Clinical Activity—20 hours; Independent Study—20 hours; Lecture/Discussion—6 hours. Prerequisite(s): Consent of Instructor. Previous rotation in a Dermatology Clerkship. Restricted to fourth year medical student. Integrated, multi-specialty approach to the microscopic diagnosis of inflammatory and neoplastic skin disorders. (H/P/F grading only.) Effective: 2010 Spring Quarter.
DER 475—Telehealth in Dermatology (6)
Clinical Activity—4 hours; Project (Term Project)—36 hours. Restricted to Medical students. Introduction to the application of telehealth in dermatology to provide diagnoses, consultation, treatment, and education. Participate in teledermatology clinics with remote sites throughout California, conduct telehealth project(s), and review the latest literature in telehealth application in improving healthcare access. May be repeated up to 6 unit(s) for additional time needed to complete telehealth project or to work on new telehealth projects. (H/P/F grading only.) Effective: 2012 Winter Quarter.

DER 480—Insights in Dermatology (1-3)
Clinical Activity—3-9 hours. Prerequisite(s): Consent of Instructor. First- and second-year medical students in good academic standing. Clinical experience limited to observation of delivery of dermatologic care and attendance at some conferences. (H/P/F grading only.) Effective: 1997 Winter Quarter.

DER 495—Wound Healing: From Bench to Bedside (6)
Auto Tutorial—15 hours; Clinical Activity—12 hours; Laboratory—8 hours; Term Paper. Prerequisite(s): Consent of Instructor. Restricted to medical students only. An integrated, multi-specialty approach to clinical soft tissue wound healing. (H/P/F grading only.) Effective: 2001 Summer Quarter.

DER 498—Special Topics in Clinical Dermatology (1-6)
Independent Study—3-18 hours. Prerequisite(s): Medical students with consent of instructor. Individually arranged study of special topics in clinical dermatology determined by student and instructor. Assigned readings and/or clinical examination of selected patients. (H/P/F grading only.) Effective: 1997 Winter Quarter.

DER 499—Research in Cutaneous Biology (1-12)
Laboratory—3-36 hours. Prerequisite(s): Consent of Instructor. Research, either laboratory or clinical, on ongoing projects within the department under supervision of faculty. (H/P/F grading only.) Effective: 1997 Winter Quarter.

FAP 092C—Primary Care Clinic (2)
Clinical Activity—8 hours; Lecture—2 hours; Seminar—2 hours. Prerequisite(s): Consent of Instructor. Enrollment at the UC Davis campus, for freshman and sophomore students. Students must apply and interview with the Board of Clinica Tepati or Imani Clinic. Field experience exposes lower division students to health care delivery, patient histories, physical examinations, health promotion, disease prevention, diagnosis; treatment of episodic, acute, chronic illness; appropriate referral and follow-up. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

FAP 192C—Primary Care Clinics (1-2)
Clinical Activity—6-8 hours; Lecture—1-2 hours; Seminar—2 hours. Prerequisite(s): Consent of Instructor. Enrollment at the UC Davis campus, upper-division standing. Students must apply and interview with the Board of Clinica Tepati or Imani Clinic. Field experience introduces students to health care delivery, patient histories and physical examinations, health promotions and disease prevention, diagnosis and treatment of episodic, acute and chronic illness, basic laboratory testing and appropriate referral and follow-up. May be repeated for credit. (P/NP grading only.) Effective: 2004 Fall Quarter.

FAP 195—Health Care to Underserved Populations (1)
Lecture—1 hour. Prerequisite(s): Sociology, political science, or applied behavioral science background recommended, or registration in medical school. Discusses sociocultural perspectives of underserved populations in California impacting their health; roles of family/interpersonal relationships in making health care decisions; and clinician's perspectives in treating people of cultures which are unfamiliar and/or uncomfortable with Western medicine. May be repeated for credit. (P/NP grading only.) Effective: 2011 Spring Quarter.

FAP 401—Introductory Preceptorship in Family Practice (3-9)
Clinical Activity—20-40 hours. Prerequisite(s): Completion of first-year of medical training. Preceptorship in family practice offered as an introduction to clinical medicine. 20 hours or 40 hours per week in a family physician's office, doing patient interviews, historytaking, and performing physical exams. (H/P/F grading only.) Effective: 1999 Summer Quarter.

FAP 405—The Healer's Art (1)
Lecture—0.6 hours; Workshop—3 hours. Prerequisite(s): Consent of Instructor. Limited to first-year medical students. Learning to strengthen your humanity and remain open-hearted can make the difference between burnout and a fulfilling life. Learn tools for selfcare, healing, finding meaning, strengthening commitment and becoming a true physician. May be repeated for credit. (P/F grading only.) Effective: 2016 Fall Quarter.
FAP 411—Selected Studies of Systems for Chronic Illness Care (3)
Clinical Activity—4 hours; Discussion—4 hours. Prerequisite(s): FAP 400A; FAP 400B; FAP 400C; Medical students with consent of instructor. Understanding of chronic illness, particularly diabetes, participate in patient care, alternative techniques. May be repeated up to 1 time(s). (H/P/F grading only.) Effective: 2004 Spring Quarter.

FAP 430—Family Medicine Clerkship (6-12)
Clinical Activity—45 hours; Lecture—2 hours; Workshop—2 hours. Prerequisite(s): Approval by School of Medicine Committee on Student Progress. Family medicine clerkship for third year medical students. (H/P/F grading only.) Effective: 2015 Spring Quarter.

FAP 430FA—SJVP Longitudinal Family Medicine Clerkship (1.5-6)
Clinical Activity—45 hours; Lecture—2 hours; Workshop—2 hours. Prerequisite(s): Consent of Instructor. Approval by School of Medicine Committee on Student Progress. Longitudinal Family Medicine Clerkship runs concurrently with Internal Medicine, Pediatrics and Psychiatry for 32 weeks. Time is spent in direct patient care situations under the guidance of faculty. (H/P/F grading only.) Effective: 2017 Spring Quarter.

FAP 430FB—SJVP Longitudinal Family Medicine Clerkship (1.5-6)
Clinical Activity—45 hours; Lecture—2 hours; Workshop—2 hours. Prerequisite(s): Consent of Instructor. Approval by School of Medicine Committee on Student Progress. Longitudinal Family Medicine Clerkship runs concurrently with Internal Medicine, Pediatrics and Psychiatry for 32 weeks. Time is spent in direct patient care situations under the guidance of faculty. (H/P/F grading only.) Effective: 2017 Spring Quarter.

FAP 430RC—SJVP Longitudinal Family Medicine Clerkship (1.5-6)
Clinical Activity—45 hours; Lecture—2 hours; Workshop—2 hours. Prerequisite(s): Consent of Instructor. Approval by School of Medicine Committee on Student Progress. Longitudinal Family Medicine Clerkship runs concurrently with Internal Medicine, Pediatrics and Psychiatry for 32 weeks. Time is spent in direct patient care situations under the guidance of faculty. (H/P/F grading only.) Effective: 2017 Spring Quarter.

FAP 430RD—SJVP Longitudinal Family Medicine Clerkship (1.5-6)
Clinical Activity—45 hours; Lecture—2 hours; Workshop—2 hours. Prerequisite(s): Consent of Instructor. Approval by School of Medicine Committee on Student Progress. Longitudinal Family Medicine Clerkship runs concurrently with Internal Medicine, Pediatrics and Psychiatry for 32 weeks. Time is spent in direct patient care situations under the guidance of faculty. (H/P/F grading only.) Effective: 2017 Spring Quarter.

FAP 430T—TeachMS Longitudinal Primary Care Clerkship (A) (4)
Clinical Activity—45 hours; Lecture—2 hours; Workshop—2 hours. Prerequisite(s): Consent of Instructor. Approval by School of Medicine Committee on Student Progress. Longitudinal Clerkship runs concurrently with Internal Medicine and Psychiatry for 24 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. (H/P/F grading only.) Effective: 2013 Fall Quarter.
FAP 430TB—TeachMS Longitudinal Primary Care Clerkship (B) (6)
Clinical Activity—45 hours; Lecture—2 hours; Workshop—2 hours. Prerequisite(s): Consent of Instructor. Approval by School of Medicine Committee on Student Progress. Longitudinal Clerkship runs concurrently with Internal Medicine and Psychiatry for 24 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. (H/P/F grading only.) Effective: 2013 Fall Quarter.

FAP 430TC—TeachMS Longitudinal Primary Care Clerkship (C) (2)
Clinical Activity—45 hours; Lecture—2 hours; Workshop—2 hours. Prerequisite(s): Consent of Instructor. Approval by School of Medicine Committee on Student Progress. Longitudinal Clerkship runs concurrently with Internal Medicine and Psychiatry for 24 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. (H/P/F grading only.) Effective: 2013 Fall Quarter.

FAP 431—Introduction to Primary Care Continuity Clinic (1)
Clinical Activity—4 hours; Project (Term Project)—1 hour. Prerequisite(s): Consent of Instructor. Completion of the Pre-Clinical Curriculum. Longitudinal component of the third-year primary care curriculum. Student attends their clinic roughly 18 half-days over the course of the year, working one-on-one with a primary care preceptor. (H/P/F grading only.) Effective: 2016 Fall Quarter.

FAP 431A—Primary Care Continuity Clinic (1)
Clinical Activity—4 hours; Project (Term Project)—1 hour. Prerequisite(s): Consent of Instructor. Completion of the Pre-Clinical Curriculum. Longitudinal component of the third-year primary care curriculum. Student attends their clinic roughly 18 half-days over the course of the year, working one-on-one with a primary care preceptor. (H/P/F grading only.) Effective: 2015 Spring Quarter.

FAP 431B—Primary Care Continuity Clinic (1)
Clinical Activity—4 hours; Project (Term Project)—1 hour. Prerequisite(s): Consent of Instructor. Completion of the Pre-Clinical Curriculum. Longitudinal component of the third-year primary care curriculum. Student attends their clinic roughly 18 half-days over the course of the year, working one-on-one with a primary care preceptor. (H/P/F grading only.) Effective: 2015 Spring Quarter.

FAP 431C—Primary Care Continuity Clinic (1)
Clinical Activity—4 hours; Project (Term Project)—1 hour. Prerequisite(s): Consent of Instructor. Completion of the Pre-Clinical Curriculum. Longitudinal component of the third-year primary care curriculum. Student attends their clinic roughly 18 half-days over the course of the year, working one-on-one with a primary care preceptor. (H/P/F grading only.) Effective: 2015 Spring Quarter.

FAP 431D—Primary Care Continuity Clinic (1)
Clinical Activity—4 hours; Project (Term Project)—1 hour. Prerequisite(s): Consent of Instructor. Completion of the Pre-Clinical Curriculum. Longitudinal component of the third-year primary care curriculum. Student attends their clinic roughly 18 half-days over the course of the year, working one-on-one with a primary care preceptor. (H/P/F grading only.) Effective: 2015 Spring Quarter.

FAP 431KA—ACE-PC Continuity Clinic (6)
Clinical Activity—40 hours. Prerequisite(s): Consent of Instructor. Longitudinal clinic component of the 2nd year of the ACE-PC Program. Students start off with a 4 week immersion experience and then 12 additional half-days over the course of the year, working one-on-one with a primary care preceptor. (H/P/F grading only.) Effective: 2017 Spring Quarter.

FAP 431KB—ACE-PC Continuity Clinic (0.5)
Clinical Activity—2 hours. Prerequisite(s): Consent of Instructor. Longitudinal clinic component of the 2nd year of the ACE-PC Program. Students start off with a 4 week immersion experience and then 12 additional half-days over the course of the year, working one-on-one with a primary care preceptor. (H/P/F grading only.) Effective: 2017 Spring Quarter.

FAP 431KC—ACE-PC Continuity Clinic (0.5)
Clinical Activity—2 hours. Prerequisite(s): Consent of Instructor. Longitudinal clinic component of the 2nd year of the ACE-PC Program. Students start off with a 4 week immersion experience and then 12 additional half-days over the course of the year, working one-on-one with a primary care preceptor. (H/P/F grading only.) Effective: 2017 Spring Quarter.

FAP 431KD—ACE-PC Continuity Clinic (0.5)
Clinical Activity—2 hours. Prerequisite(s): Consent of Instructor. Longitudinal clinic component of the 2nd year of the ACE-PC Program. Students start off with a 4 week immersion experience and then 12 additional half-days over the
course of the year, working one-on-one with a primary care preceptor. (H/P/F grading only.) Effective: 2017 Spring Quarter.

FAP 434—Primary Care Clinics-Clinica Tepati (3-12)
Clinical Activity—32-36 hours; Lecture—1-2 hours; Seminar—0-2 hours. Open to medical students in all four years of medical school. Medical students will learn counseling, diagnosis and treatment of patients with chronic and acute disease under supervision of physician. Provides exposure to special health care needs of various ethnic and poverty-level populations. May be repeated for credit. (P/F grading only.) Effective: 2010 Winter Quarter.

FAP 435—Primary Care Clinics-Imani Clinic (3-12)
Clinical Activity—32-36 hours; Lecture—1-2 hours; Seminar—0-2 hours. Open to medical students in all four years of medical school. Learn counseling, diagnosis and treatment of patients with chronic and acute disease under supervision of physician. Provides exposure to special health care needs of various ethnic and poverty-level populations. May be repeated for credit. (P/F grading only.) Effective: 2010 Winter Quarter.

FAP 436—Continuity Clinic in Primary Care—Shifa Clinic (3-12)
Clinical Activity—32-36 hours; Lecture—1-2 hours; Seminar—0-2 hours; Variable. Open to medical students in all four years of medical school. Learn counseling, diagnosis and treatment of patients with chronic and acute disease under supervision of physician. Provides exposure to special health care needs of various ethnic and poverty-level populations. May be repeated for credit. (P/F grading only.) Effective: 2010 Winter Quarter.

FAP 437—Primary Care Clinics-Knights Landing (3)
Clinical Activity—3 hours; Lecture—1 hour. Must complete an application and interview prior to registering. Learn counseling, diagnosis and treatment of patients with chronic and acute disease under supervision of physician. Provides exposure to special health care needs of various ethnic and poverty-level populations in the community of Knights Landing. May be repeated for credit. (P/F grading only.) Effective: 2012 Winter Quarter.

FAP 439D—Directed Clinical Studies in Family Medicine (1-12)
Clinical Activity—40 hours. Prerequisite(s): Consent of Instructor. Individual directed studies in extended preparation for modified curriculum or to complete a clinical rotation following a leave of absence. May be repeated for credit. (P/F grading only.) Effective: 2011 Spring Quarter.

FAP 439R—Directed Studies in Family Medicine (1-12)
Clinical Activity—30 hours; Independent Study—10 hours. Prerequisite(s): Consent of Instructor. Individual directed studies in extended preparation for remediation of all or part of clinical rotation. Clinical studies to accommodate and satisfy remedial work as directed by the Committee on Student Progress and approved by the course IOR. May be repeated for credit. (P/F grading only.) Effective: 2011 Summer Quarter.

FAP 444—Advanced Preceptorship in Family Medicine (3-18)
Clinical Activity—40 hours. Prerequisite(s): Completion of third-year primary care plus clerkship or consent of instructor. Open to medical students only. Preceptorships with primary care physicians in a variety of settings. Acquisition skills to evaluate and develop a treatment plan for patients with common medical problems seen by primary care physicians in an out patient setting. May be repeated up to 18 unit(s). (H/P/F grading only.) Effective: 2002 Fall Quarter.

FAP 450—CAM in Family & Community Health (3-18)
Variable—20-40 hours. Complementary and alternative medicine courses at away institutions that cover various aspects of integrative medicine, including but not limited to: botanicals, homeopathy, mind/body, naturopathy, nutrition, traditional Chinese medicine, osteopathy, and energy medicine. Intended to grant units for away rotations; not offered at the UC Davis Medical Center. (H/P/F grading only.) Effective: 2011 Winter Quarter.

FAP 460—Geriatrics in Community Health (3-6)
Clinical Activity—12 hours; Fieldwork—24 hours; Lecture—4 hours. Prerequisite(s): FAP 430 Visits to community agencies including mental health teams, adult day health centers, a diagnostic and research center, and case management specialists. Observation and participation in MMSE’s, patient-family conferences, interdisciplinary team meetings, neuropsychiatric testing and home visit evaluations. (H/P/F grading only.) Effective: 2001 Spring Quarter.

FAP 468—International Preceptorship (3-12)
Clinical Activity—40 hours. Prerequisite(s): Medical students with consent of instructor. Preceptorship with a family practitioner in a foreign country (Arranged by student contact or with assistance of the Family and Community Medicine Department.) Participate in clinical activities, analyze and report characteristics of the practice. May be repeated up to 12 unit(s). (H/P/F grading only.) Effective: 2002 Fall Quarter.
FAP 469—Inpatient Acting Internship in Family Medicine (3-12)
Clinical Activity—40 hours. Prerequisite(s): Completion of third-year of medical school or consent of instructor. Open to medical students only. Comprehensive primary medical care of inpatients on a family medicine hospital service. Available sites are university-based family medicine residency programs and programs within the UC Davis Network of Affiliated Family Medicine Residency Programs. May be repeated up to 12 unit(s). (H/P/F grading only.) Effective: 2011 Spring Quarter.

FAP 470—Inpatient Clinical Elective in Family Medicine (3-12)
Clinical Activity—40 hours. Prerequisite(s): Completion of third-year of medical school or consent of instructor. Open to medical students only. Comprehensive primary medical care of patients on a family medicine hospital service. Usually includes inpatient and outpatient experience. May be repeated up to 12 unit(s). (H/P/F grading only.) Effective: 2011 Spring Quarter.

FAP 475—Combined Inpatient/Outpatient Clinical Elective in Family Medicine (3-12)
Clinical Activity—40 hours. Prerequisite(s): Completion of third-year of medical school or consent of instructor. Open to Medical students only. Combined inpatient and outpatient elective. Consists of comprehensive primary medical care of patients on a family medicine hospital service and in a family medicine outpatient clinic. May be repeated up to 12 unit(s). (H/P/F grading only.) Effective: 2011 Fall Quarter.

FAP 488—Selected Studies in Family Practice (1-9)
Variable—3-27 hours. Prerequisite(s): Medical students with consent of instructor. Assigned readings in family practice to increase understanding on selected topics relating to family medicine and primary health care delivery; visits to and written analysis of selected health care programs; and/or exposure to family practice with a community physician preceptor. May be repeated up to 9 unit(s). (H/P/F grading only.) Effective: 2002 Fall Quarter.

FAP 490—Health Care to Underserved Populations (1)
Lecture—1 hour. Prerequisite(s): Sociology, Political Science, or Applied Behavioral Science background recommended, or registration in medical school. Discusses sociocultural perspectives of underserved populations impacting health; roles of family/interpersonal relationships in making health care decisions; the nature of ethnic/racial/socioeconomic health care disparities; and clinicians’ perspectives in treating people of cultures which are unfamiliar and/or uncomfortable with Western medicine. May be repeated for credit. (P/F grading only.) Effective: 2012 Winter Quarter.

FAP 493—Aging and Health (6)
Seminar—12 hours. Prerequisite(s): Consent of Instructor. Is disease and infirmity the inevitable consequence of aging? We will spend four weeks exploring this question by reviewing the biology of aging, physiologic changes seen in aged individuals and disease processes commonly found in elderly persons. (H/P/F grading only.) Effective: 2010 Summer Quarter.

FAP 495—LGBTIQQA Healthcare Lecture Series (1)
Lecture—6 hours. Increase the awareness of medical issues surrounding the LGBTIQQA community and arm students with knowledge of the health disparities the community faces. Provide better quality care to the LGBTIQQA patients cared for as physicians. May be repeated for credit. (P/F grading only.) Effective: 2012 Winter Quarter.

FAP 498—Directed Group Study (1-5)
Variable—3-15 hours. Explore in-depth various topics in primary care. Extensive contact with and oversight by instructor. May be repeated for credit. (H/P/F grading only.) Effective: 2008 Spring Quarter.

FAP 499—Research (1-12)
Prerequisite(s): Medical students with consent of instructor. Research in various aspects of the health care delivery system. (H/P/F grading only.) Effective: 1997 Winter Quarter.

HPH 099—Special Study for Undergraduates (1-5)
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 2004 Fall Quarter.

HPH 115—Cannabis and Cannabinoids in Physiology and Medicine (3)
Lecture—3 hours. Prerequisite(s): NPB 100 or NPB 101 or NPB 110B; or Consent of Instructor. In-depth scientific analysis of cannabis and cannabinoids, topics include biochemical, physiological, behavioral, pharmacological, social and therapeutic aspects of cannabinoids, with emphasis on the physiological impacts on major organ systems in humans and animals, and the potential medicinal uses. GE credit: SE, SL. Effective: 2017 Spring Quarter.

HPH 157—Advanced Physiology of Animal/Human Disease (3)
Lecture—1 hour; Lecture/Discussion—2 hours. Prerequisite(s): NPB 101 B+ or better or NPB 110C B+ or better;
Consent of Instructor. Limited to 35 students initially. Centers on fundamental mechanisms and pathophysiological basis for animal and human diseases. Course is case-based and uses animal and human diseases to help exemplify the physiological consequences of organ dysfunction. (Same course as NPB 157.) Effective: 2017 Spring Quarter.

**HPH 192—Internship in Human Physiology (1-12)**
Internship—3-36 hours. Prerequisite(s): Upper division standing; approval of project prior to period of internship by preceptor. Supervised work experience in physiology and related fields. (P/NP grading only.) Effective: 1997 Winter Quarter.

**HPH 198—Directed Group Study (1-5)**
Variable. Prerequisite(s): Consent of Instructor. Directed reading, discussion and/or laboratory experience on selected topics. (P/NP grading only.) Effective: 1997 Winter Quarter.

**HPH 199—Special Study for Advanced Undergraduates (1-5)**
Laboratory—3-15 hours. Prerequisite(s): Consent of Instructor. Senior standing in biology, chemistry, physics, psychology, or engineering. (P/NP grading only.) Effective: 1997 Winter Quarter.

**HPH 210A—Advanced Physiology (4)**
Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Physiology Ph.D. program or consent of instructor. Advanced course in general principles of physiology, surveying homeostasis, cellular and selected topics, and neurophysiology. (Same course as MCP 210A.) Effective: 1999 Fall Quarter.

**HPH 210A—Advanced Physiology (5)**
Review all entries
Discussion—2 hours; Lecture—3 hours. Prerequisite(s): Physiology Ph.D. program or consent of instructor. HPH 210A (or MCP 210A) is a required core course for the MCIP graduate group; course contains thermodynamics discussions and requires substantial math and physics background in order to succeed; approval for registering from Co-IRs is required to get CRN. Advanced course on fundamental principles of cell physiology, transport physiology, signal transduction, physiology of excitable cells, and muscle physiology. (Same course as MCP 210A.) Effective: 2019 Winter Quarter.

**HPH 298—Group Study (1-5)**
Variable. Prerequisite(s): Consent of Instructor. For graduate students desiring to explore particular topics in depth. Lectures and conferences may be involved. Effective: 1997 Winter Quarter.

**HPH 299—Research (1-12)**
Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

**HPH 400—Human Physiology (6)**
Laboratory—2 hours; Lecture—3 hours. Medical student only. General and cellular physiology of neurons, muscle, and epithelial cells and systemic physiology of cardiovascular, respiratory, gastrointestinal, and renal systems. (P/F grading only.) Effective: 2011 Summer Quarter.

**HPH 403—Medical Neuroanatomy (5)**
Discussion/Laboratory—1 hour; Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): HPH 400; Block 1. Restricted to medical students only. Anatomy of the normal human nervous system, to include gross external and internal morphology of brain and spinal cord, and function neuroanatomy of motor, sensory and cognitive systems. Incorporates application of neuroanatomy to clinical problem solving. (Same course as CHA 403.) (P/F grading only.) Effective: 2007 Summer Quarter.

**HPH 440—Cannabis and Cannabinoids in Physiology and Medicine (3)**
Lecture. Prerequisite(s): Consent of Instructor. Provides an in-depth scientific analysis of current knowledge on cannabis and cannabinoids pertaining to human physiology and potential medicinal uses. May be repeated for credit. (H/P/F grading only.) Effective: 2018 Winter Quarter.

**HPH 493—Physiological Principles in SICU SSM (6)**
Clinical Activity—4 hours; Laboratory—16 hours; Lecture—5 hours; Lecture/Lab—10 hours. Prerequisite(s): Consent of Instructor. Restricted to UC Davis School of Medicine students only. Special Study Module, a four week course on the topic: Care of the Critically Ill Surgical Patient: Use of Physiological Principles to Guide Treatment of Patients with Common Surgical Problems (Same course as SUR 493C.) (H/P/F grading only.) Effective: 2008 Winter Quarter.

**HPH 497T—Tutoring in Human Physiology (1-5)**
Tutorial—3-15 hours. Prerequisite(s): Advanced standing or consent of instructor. Assist instructor by tutoring medical students in preparation for one of the departmental courses that is a component of the required curriculum of the School of Medicine. (S/U grading only.) Effective: 1997 Winter Quarter.
HPH 498—Directed Reading and Group Study (1-4)
Discussion—2-8 hours. Prerequisite(s): Consent of Instructor. Medical student. Directed reading and discussion on selected topics in human physiology. (S/U grading only.) Effective: 1997 Winter Quarter.

HPH 499—Research (1-6)
Variable. Prerequisite(s): Medical students with consent of instructor. Laboratory investigation on selected topics. (S/U grading only.) Effective: 1997 Winter Quarter.

IMD 090—Seminar in Medical Ethics (1)
Lecture—1 hour. Seminar Series covering the current topics in Medical Ethics. (P/NP grading only.) Effective: 2017 Winter Quarter.

IMD 092—Internship (1-4)
Internship—3-12 hours. Prerequisite(s): Consent of Instructor. Lower division standing. Supervised internship in internal medicine and related fields. (P/NP grading only.) Effective: 1997 Winter Quarter.

IMD 098—Directed Group Study (1-2)
Seminar—1-2 hours. Prerequisite(s): Consent of Instructor. Lower division standing. Directed group study in medicine and related fields. (P/F grading only.) Effective: 1997 Winter Quarter.

IMD 099—Undergraduate Research in Medicine: Molecular and Cell Biology (1-3)
Variable. Prerequisite(s): Consent of Instructor. (P/F grading only.) Effective: 1997 Winter Quarter.

IMD 164—Practicum in Community Health Clinic: Bayanihan Clinic (1-2)
Clinical Activity—5 hours. Through active participation in the medical aspects of community health clinics, the undergraduate student gains knowledge of the organization, administration, and problem-solving capabilities. May be repeated for credit. (P/NP grading only.) Effective: 2014 Winter Quarter.

IMD 192—Internship in Internal Medicine (1-12)
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Upper division standing. Supervised work experience in internal medicine and related fields. (P/F grading only.) Effective: 1997 Winter Quarter.

IMD 194—Practicum in Community Health Clinics (1-3)
Clinical Activity—5-15 hours. Prerequisite(s): Consent of Instructor. The undergraduate student, through active participation in the medical aspects of community health clinics, gains knowledge of the organization, administration, and problem-solving capabilities of these primary care facilities. May be repeated for credit. (P/F grading only.) Effective: 1997 Winter Quarter.

IMD 198—Directed Group Study (1-3)
Extensive Problem Solving—2 hours; Seminar—1-2 hours. Prerequisite(s): Consent of Instructor. Directed group study in medicine and related fields. (P/NP grading only.) Effective: 2014 Winter Quarter.

IMD 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. Upper division standing. (P/F grading only.) Effective: 1997 Winter Quarter.

IMD 214—Topics in Medical Ethics (1)
Seminar—1 hour. The complex moral, legal and ethical dilemmas that patients, families, and health care providers face in today's clinics. May be repeated up to 1 time(s). (S/U grading only.) Effective: 2001 Fall Quarter.

IMD 220D—Cardiovascular System (2.5)
Lecture/Discussion—5.5 hours. Prerequisite(s): HPH 200; and Consent of Instructor. Graduate student status. Principles of etiology, mechanisms, diagnosis and management of the major diseases of the cardiovascular system. Included are ischemic, valvular, hypertensive, cardiomyopathic, pericardial, and electrical disorders. Effective: 2002 Fall Quarter.

IMD 250—Medicine and the Law (3)
Lecture/Discussion—2 hours; Project (Term Project)—2 hours. Legal and bioethical principles and concepts in medicine. Topics include standard of care, informed consent, reproductive medicine, and end-of-life issues. (S/U grading only.) Effective: 2002 Winter Quarter.

IMD 414—One Health: A Course on Global Health (1)
Conference—8 hours. Global health problems are complex and require culturally-sensitive, socially-acceptable, and action-oriented approaches to create practical and cost-effective solutions. Will examine major health problems created by the convergence of human, animal, and environmental influences. May be repeated for credit. (P/F grading only.) Effective: 2011 Summer Quarter.
IMD 416—Summer Institute on Race and Health (6)
Independent Study—30 hours. Prerequisite(s): Consent of Instructor. Limited enrollment. Using field trips, media, readings, and clinical experiences, 8-10 first year medical students will explore issues of race, health disparities and related issues in a 4 week institute during the summer break. (P/F grading only.) Effective: 2011 Spring Quarter.

IMD 420A—Hematology (2)
Discussion—1 hour; Lecture/Discussion—1 hour. Prerequisite(s): Consent of Instructor. Restricted to Medical students only. Malignant disorders of blood cells and transfusion therapy. Covers acute leukemia, myelodysplasia, myeloproliferative disorders, lymphoma, and myeloma. (P/F grading only.) Effective: 2010 Summer Quarter.

IMD 420B—Gastrointestinal System (2.5)
Discussion—2 hours; Lecture/Discussion—2 hours. Prerequisite(s): Approval of Committee on Student Progress. Restricted to Medical students only. Basic pathophysiologic principles of digestive diseases on which clinical concepts and judgments can be developed. Emphasis on pathophysiologic basis of gastroenterological and hepatic disorders with discussion of major disorders and their diagnosis and management. (P/F grading only.) Effective: 2008 Winter Quarter.

IMD 420C—Pulmonary & Critical Care Medicine (2.5)
Lecture/Discussion—5.5 hours. Prerequisite(s): Approval of SOM's Committee on Student Promotions. Restricted to Medical students only; student must pass all SOM Year 1 courses. Clinical aspects of respiratory anatomy, physiology, and pathology. Diagnostic procedures and a description of the major pulmonary diseases & disorders, and critical care medicine. (P/F grading only.) Effective: 2013 Fall Quarter.

IMD 420D—Cardiovascular System (2.5)
Lecture/Discussion—5.5 hours. Prerequisite(s): Approval of the School of Medicine Committee on Student Promotions. Restricted to Medical students only; student must pass all SOM Year 1 courses. Principles of etiology, mechanisms, diagnosis and management of the major diseases of the cardiovascular system. Included are ischemic, valvular, hypertensive, cardiomyopathic, pericardial, and electrical disorders. (P/F grading only.) Effective: 2013 Fall Quarter.

IMD 420E—Nephrology (2)
Discussion—2 hours; Laboratory—2 hours; Lecture—2 hours. Prerequisite(s): Approval of Student Progress Committee. Fundamental aspects of disorders of body water, electrolytes and acid/base balance; major categories and mechanisms of parenchymal renal diseases; urinary tract infections. (P/F grading only.) Effective: 2002 Winter Quarter.

IMD 430—Medicine Clerkship (12)
Clinical Activity—45 hours. Prerequisite(s): Approval by School of Medicine Committee on Student Progress. Clerkship is divided into two, four-week blocks, one each at UCDMC and at Kaiser Hospitals. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. (H/P/F grading only.) Effective: 2001 Summer Quarter.

IMD 430FA—SJVP Longitudinal Medicine Clerkship (1.5-6)
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Approval by School of Medicine Committee on Student Progress. Longitudinal Clerkship runs concurrently with Family Medicine, Pediatrics and Psychiatry for 32 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only.) Effective: 2017 Spring Quarter.

IMD 430FB—SJVP Longitudinal Medicine Clerkship (1.5-6)
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Approval by School of Medicine Committee on Student Progress. Longitudinal Clerkship runs concurrently with Family Medicine, Pediatrics and Psychiatry for 32 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only.) Effective: 2017 Spring Quarter.

IMD 430FC—SJVP Longitudinal Medicine Clerkship (1.5-6)
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Approval by School of Medicine Committee on Student Progress. Longitudinal Clerkship runs concurrently with Family Medicine, Pediatrics and Psychiatry for 32 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only.) Effective: 2017 Spring Quarter.

IMD 430FD—SJVP Longitudinal Medicine Clerkship (1.5-6)
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Approval by School of Medicine Committee on Student Progress. Longitudinal Clerkship runs concurrently with Family Medicine, Pediatrics and Psychiatry for 32 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only.) Effective: 2017 Spring Quarter.
weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only.) Effective: 2017 Spring Quarter.

**IMD 430R—Rural PRIME Internal Medicine Longitudinal Clerkship (2)**
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Internal Medicine Longitudinal Integrated Clerkship for the Rural PRIME Program. (H/P/F grading only.) Effective: 2017 Spring Quarter.

**IMD 430RA—Rural PRIME Internal Medicine Longitudinal Clerkship (3)**
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Internal Medicine Longitudinal Integrated Clerkship for the Rural PRIME Program. (H/P/F grading only.) Effective: 2017 Spring Quarter.

**IMD 430RB—Rural PRIME Internal Medicine Longitudinal Clerkship (3)**
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Internal Medicine Longitudinal Integrated Clerkship for the Rural PRIME Program. (H/P/F grading only.) Effective: 2017 Spring Quarter.

**IMD 430RC—Rural PRIME Internal Medicine Longitudinal Clerkship (3)**
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Internal Medicine Longitudinal Integrated Clerkship for the Rural PRIME Program. (H/P/F grading only.) Effective: 2017 Spring Quarter.

**IMD 430RD—Rural PRIME Internal Medicine Longitudinal Clerkship (1)**
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Internal Medicine Longitudinal Integrated Clerkship for the Rural PRIME Program. (H/P/F grading only.) Effective: 2017 Spring Quarter.

**IMD 430TA—TeachMS Longitudinal Medicine Clerkship (A) (4)**
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Approval by School of Medicine Committee on Student Progress. Longitudinal Clerkship runs concurrently with Primary Care and Psychiatry for 24 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only.) Effective: 2013 Fall Quarter.

**IMD 430TB—TeachMS Longitudinal Medicine Clerkship (B) (6)**
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Approval by School of Medicine Committee on Student Progress. Longitudinal Clerkship runs concurrently with Primary Care and Psychiatry for 24 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only.) Effective: 2013 Fall Quarter.

**IMD 430TC—TeachMS Longitudinal Medicine Clerkship (C) (2)**
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Approval by School of Medicine Committee on Student Progress. Longitudinal Clerkship runs concurrently with Primary Care and Psychiatry for 24 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only.) Effective: 2013 Fall Quarter.

**IMD 439D—Directed Clinical Studies in Internal Medicine (1-12)**
Clinical Activity—40 hours. Prerequisite(s): Consent of Instructor. Individual directed studies in extended preparation for modified curriculum or to complete a clinical rotation following a leave of absence. May be repeated for credit. (P/F grading only.) Effective: 2011 Spring Quarter.

**IMD 439R—Directed Studies in Internal Medicine (1-12)**
Clinical Activity—30 hours; Independent Study—10 hours. Prerequisite(s): Consent of Instructor. Individual directed studies in extended preparation for remediation of all or part of clinical rotation. Clinical studies to accommodate and satisfy remedial work as directed by the Committee on Student Progress and approved by the course IOR. May be repeated for credit. (P/F grading only.) Effective: 2011 Summer Quarter.

**IMD 450A—Medicine and the Law (1.5)**
Discussion—2 hours; Seminar—2 hours. Prerequisite(s): Consent of Instructor. Restricted to Medical students only. Legal and bioethical principles and concepts in medicine. Topics include standard of care, informed consent, reproductive medicine, and end-of-life issues. (H/P/F grading only.) Effective: 2010 Summer Quarter.

**IMD 450B—Medicine and the Law (1.5)**
Discussion—2 hours; Seminar—2 hours. Prerequisite(s): Consent of Instructor. Restricted to Medical students only. Legal and bioethical principles and concepts in medicine. Topics include standard of care, informed consent, reproductive medicine, and end-of-life issues. (H/P/F grading only.) Effective: 2010 Summer Quarter.

**IMD 459—Oncology: Research and Treatment of Cancer (2)**
Lecture/Discussion—2 hours. Prerequisite(s): Second-, third-, or fourth-year medical student and/or consent of instructor. Comprehensive review of current treatment practices of cancer and state-of-the-art research impacting...
treatment and prevention of cancer. Emphasis on epidemiology, molecular biology, and pharmacology. (H/P/F grading only.) Effective: 1997 Winter Quarter.

**IMD 460—Correctional Health Care Clerkship (1-4)**  
*Review all entries*

Clinical Activity. Prerequisite(s): Consent of Instructor. Fourth-year medical student in good academic standing. Covers Correctional Health delivery and the effects of detention and incarceration on health status. Special emphasis on problems unique to health care delivery in a prison setting. Student will spend time in clinical settings at three prison facilities. (H/P/F grading only.) Effective: 1997 Winter Quarter.

**IMD 460—Correctional Health Care Clerkship (1-12)**  
*Review all entries*

Clinical Activity. Prerequisite(s): Consent of Instructor. Fourth-year medical student in good academic standing. Covers Correctional Health delivery and the effects of detention and incarceration on health status. Special emphasis on problems unique to health care delivery in a prison setting. Student will spend time in clinical settings at three prison facilities. (H/P/F grading only.) Effective: 2019 Winter Quarter.

**IMD 461—Mather VA Internal Medicine AI (6)**

Clinical Activity—50 hours; Independent Study—5 hours; Lecture/Discussion—5 hours. Prerequisite(s): Consent of Instructor. Limited enrollment. Acting Internship in Internal Medicine for qualified 4th year Medical Students from the UC Davis School of Medicine at the Sacramento VA Hospital. Experiences will somewhat mirror those of AIs at UCDMC. May be repeated for credit. (H/P/F grading only.) Effective: 2014 Summer Quarter.

**IMD 462—Medicine Wards AI (6)**

Clinical Activity—40 hours. Prerequisite(s): Consent of Instructor. MDS 431; demonstrated ability to accept responsibility. Limited enrollment. Assume role of acting intern and be primary physician on medical ward under direction of medical resident and staff. Teams I-V take call every fifth night. Emphasis on evidence-based inpatient care. May be repeated for credit. (H/P/F grading only.) Effective: 2012 Fall Quarter.

**IMD 463—Acting Internship in Medicine Intensive Care Unit (MICU) (3-6)**

Clinical Activity—40 hours. Prerequisite(s): Completion of third-year in medical school; consent of Director of MICU. Limited enrollment. At UCDMC, student functions as acting intern on MICU service under direction of medical resident and staff. Responsibility for patients admitted to MICU. On call in hospital every fourth night. May be repeated for credit. (H/P/F grading only.) Effective: 2016 Spring Quarter.

**IMD 464—Bayanihan Primary Care Clinic (3)**

Clinical Activity—0.6 hours. Restricted to medical students in all four years of medical school. Under the guidance and supervision of a physician, medical students will learn patient history taking, medical documentation, counseling, diagnosis and treatment of patients with chronic and acute disease. Provides exposure to the special needs of various ethnic and socioeconomic groups. May be repeated for credit. (P/F grading only.) Effective: 2009 Spring Quarter.

**IMD 465—Medicos-Global Health Sciences (9)**

Clinical Activity—25 hours; Fieldwork—5 hours; Lecture—5 hours; Project (Term Project)—5 hours. Prerequisite(s): Consent of Instructor. Medical students only. Travel to foreign country for four weeks to collaborate with faculty from local universities and work in urban and rural environments, including hands-on experience with clinic patients. Cultural exchange and awareness of global health care. (P/F grading only.) Effective: 2007 Summer Quarter.

**IMD 468—Ambulatory Internal Medicine Externship (3-18)**

Clinical Activity—40 hours; Variable—12-40 hours. Prerequisite(s): IMD 430; and Consent of Instructor. Demonstrated ability to accept responsibility. Limited enrollment. Hands-on primary care clinical experience in the ambulatory setting supervised by a general internist. Emphasis on evidence-based outpatient care. (H/P/F grading only.) Effective: 2007 Summer Quarter.

**IMD 470—Critical Evaluation of Landmark Studies in Evidence-Based Medicine (3)**

Seminar. Prerequisite(s): Fourth-year medical student. Primary objective is to prepare future physicians to effectively integrate evidence-based medicine into their clinical practice. While this course will have an Internal Medicine emphasis, the skills the course aims to impart (formulating focused clinical questions, searching the medical literature, evaluating the quality of research, and integrating evidence into clinical practice, giving effective article presentations) will apply to all future clinicians, regardless of their specialty. (P/F grading only.) Effective: 2017 Fall Quarter.

**IMD 480—Person Centered Assessment (1)**

Lecture—1 hour. Prerequisite(s): Open to all medical students. Person-centered assessment modalities and
diagnostic approaches with regards to Internal Medicine and its different subspecialties. (P/F grading only.) Effective: 2002 Fall Quarter.

**IMD 493—Introduction Interprofessionalism, Pain Management, and Palliative Care (6)** [Review all entries]
Clinical Activity—24 hours; Discussion—4 hours; Independent Study—2 hours. Prerequisite(s): Consent of Instructor. Learners will spend one week with the inpatient palliative care service, one week with the inpatient pain pharmacy service and two weeks with Snowline Hospice. (P/F grading only.) Effective: 2018 Winter Quarter.

**IMD 493—Palliative Care: Essentials in Communication, Pain & Symptom Management (6)** [Review all entries]
Clinical Activity—24 hours; Discussion—4 hours; Independent Study—2 hours. Prerequisite(s): Consent of Instructor. Spend one week with the inpatient palliative care service, one week with the inpatient pain pharmacy service, and two weeks with Snowline Hospice. (P/F grading only.) Effective: 2019 Spring Quarter.

**IMD 494—Practicum in Community Health Clinics (1-3)**
Clinical Activity—15-40 hours. Prerequisite(s): Medical student with consent of instructor. Students are assigned to clinical settings that demonstrate ethnic, urban/rural, or other related aspects of clinical community health. Through active participation in health care delivery, students are able to relate conceptual with practical aspects of primary health care. May be repeated for credit. (H/P/F grading only.) Effective: 1997 Winter Quarter.

**IMD 497—Medicine, Bioethics and the Holocaust (3)**
Lecture/Discussion—10 hours. Prerequisite(s): Consent of Instructor. Medical students only. The concept of "evil" and the role of collaborators, bystanders and participants exemplified by the holocaust and compared to problems physicians face in practice today. Demonstration that evil emerges incrementally until taken for granted. (P/F grading only.) Effective: 2004 Winter Quarter.

**IMD 498—Group Study in Internal Medicine (1-18)**
Variable. Prerequisite(s): Consent of Instructor. Special study for medical students which may involve laboratory or library research, ambulatory or inpatient care responsibility on campus, at UCDMC or off campus by specific arrangement. (H/P/F grading only.) Effective: 1997 Winter Quarter.

**IMD 499—General Medicine Research (1-18)**
Independent Study—20 hours. (H/P/F grading only.) Effective: 2006 Winter Quarter.

**CAR 192—Internship in Cardiology (1-12)**
Internship—3-36 hours. Prerequisite(s): Upper division standing; approval of project by preceptor prior to internship. Supervised work experience in cardiology. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 1997 Winter Quarter.

**CAR 199—Cardiology Research (1-5)**
Variable. Prerequisite(s): Consent of Instructor. Special study by individual arrangement in cardiovascular medicine. Work will include directed readings, laboratory and discussions. (P/NP grading only.) Effective: 1997 Winter Quarter.

**CAR 220—Basic Science in Cardiology (1)**
Lecture—1 hour. Prerequisite(s): Graduate or medical student status. Fundamentals underlying cardiovascular medicine. Including hemodynamics, neural control of the circulation, biochemistry and some experimental design and statistics. Experts in each of these fields will give current information in their areas. (S/U grading only.) Effective: 1997 Winter Quarter.

**CAR 299—Cardiology Research (1-12)**
Variable—40 hours. Prerequisite(s): Consent of Instructor. Research or special studies. (S/U grading only.) Effective: 2010 Spring Quarter.

**CAR 401—Clinical Cardiology Clerkship: Kaiser (3-18)**
Clinical Activity—1-5 hours. Prerequisite(s): Third- and fourth-year medical students with advance approval by Division of Cardiology. Limited enrollment. Emphasis placed on history taking and physical examination of pediatric and adult patients with congenital and acquired cardiovascular disease. Hospital rounds in CCU and elsewhere. Roles of ECG, PCG, and cardiac fluoroscopy, etc., in office cardiology will be evaluated. May be repeated for credit. (H/P/F grading only.) Effective: 1997 Winter Quarter.

**CAR 460—Cardiology Clinical Clerkship (3-18)**
Clinical Activity—2-12 hours. Prerequisite(s): IMD 430; Third- and fourth-year medical students in good academic standing with consent of instructor. Limited enrollment. Participation with members of subspecialty consultation service in initial clinical evaluation, work-up, management, and follow-up of patients with cardiologic disorders. Two outpatient clinics per week. May be repeated for credit. (H/P/F grading only.) Effective: 1997 Winter Quarter.
CAR 461—Management of Coronary Artery Disease: Coronary Care Unit (3-18)
Clinical Activity. Prerequisite(s): Completion of second-year of medical school and advance approval by Division of Cardiology. Limited enrollment. Research in laboratory and exercise testing to be determined by instructor. Current methods of clinical research involving certain aspects of diagnosis and treatment. May be repeated for credit. (H/P/F grading only.) Effective: 1997 Winter Quarter.

CAR 464—Preventive Cardiology (3-6)
Clinical Activity; Seminar—2 hours. Prerequisite(s): Consent of Instructor. Completion of third-year medical school. Clinical experience, weekly seminar and reading on primary and secondary prevention of cardiovascular disease. Will be carried out in Lipid and Hypertension Clinics, Exercise Laboratory, Cardiac Care Unit, Cardiac Catheterization, and Cardiac Surgery services. (H/P/F grading only.) Effective: 1997 Winter Quarter.

CAR 480—Insights in Cardiology (1-3)
Clinical Activity—3-9 hours. Prerequisite(s): Medical student in good academic standing and approval by Division of Cardiology. Students attend one or more cardiovascular medicine clinics: general, hypertension, arrhythmia. Introduction to the diagnosis/treatment of common cardiovascular problems. (H/P/F grading only.) Effective: 1997 Winter Quarter.

CAR 493—Gender Specific Medicine SSM (6)
Clinical Activity—4 hours; Laboratory—16 hours; Lecture—5 hours; Lecture/Lab—10 hours. Prerequisite(s): Consent of Instructor. UC Davis School of Medicine students only. Special Studies Module, a four week course on the topic: Basic Science Principles Relating to Gender Specific Medicine. (Same course as OBG 493.) (H/P/F grading only.) Effective: 2007 Spring Quarter.

CAR 498—Special Group Study: EKG Unit (1-12)
Variable. Prerequisite(s): Medical student with advance approval by monthly attending faculty. Limited enrollment. Special group study in cardiology for medical students in EKG unit. May include lectures, directed reading, and/or discussion groups. May be repeated for credit. (H/P/F grading only.) Effective: 1997 Winter Quarter.

CAR 499—Research (1-12)
Variable. Prerequisite(s): Consent of Instructor. Approval by Division of Cardiology. (H/P/F grading only.) Effective: 1997 Winter Quarter.

EMR 092—Emergency Medicine Clinical Research Internship (1-4)
Internship—6-12 hours. Prerequisite(s): Consent of Instructor. Undergraduate student in good academic standing at UC Davis. Intended to give the undergraduate student an opportunity to conduct "hands-on" clinical research in the Emergency Department. Through the lecture/discussion, students will learn the basics of conducting and developing clinical research studies, using examples from ongoing studies. May be repeated up to 4 unit(s). Units awarded will depend on hours worked. (P/NP grading only.) Effective: 2007 Summer Session 1.

EMR 092C—Joan Viteri Memorial Clinic Preceptorship (1.5)
Clinical Activity; Seminar—1 hour. Prerequisite(s): Consent of Instructor. Directed towards the undergraduate students at UC Davis that volunteer at the Joan Viteri Memorial Clinic (JVMC). May be repeated for credit. (P/NP grading only.) Effective: 2017 Spring Quarter.

EMR 192—Emergency Medicine Clinical Research Internship (1-4)
Internship—6-12 hours. Prerequisite(s): Consent of Instructor. Undergraduate student in good academic standing at UC Davis. Intended to give the upper division undergraduate student an opportunity to conduct "hands-on" clinical research in the Emergency Department. Through the lecture/discussion, students learn the basics of conducting and developing clinical research studies. May be repeated up to 2 time(s). (P/NP grading only.) Effective: 2007 Summer Quarter.

EMR 192A—Joan Viteri Memorial Clinic (JVMC) Student Volunteer (1)
Lecture/Discussion—1 hour. Prerequisite(s): Consent of Instructor. Open to undergraduate students only. Field experience in health care delivery, patient histories and physical examinations, health promotions and disease prevention, diagnosis and treatment of episodic, acute and chronic illness, basic laboratory testing and appropriate referral and follow-up. Students must apply and interview. May be repeated up to 9 time(s). (P/NP grading only.) Effective: 2019 Spring Quarter.

EMR 199A—Special Study for Advanced Undergraduates (4-12)
Variable—4-12 hours. Prerequisite(s): Consent of Instructor. Experienced RA's who have successfully performed in the EMRAP program for a minimum of 3 quarters; must have database skills. For students interested in working on specific EM projects in a more extensive way. Must commit at least four hours per week for two quarters. Will be
awarded credit upon completion of course 199B. Credit awarded upon completion of EMR 199B. Effective: 2007 Fall Quarter.

**EMR 299—Research (1-12)**
Variable—1-12 hours. Prerequisite(s): Consent of Instructor. Directed research in the Department of Emergency Medicine. May be repeated for credit. (S/U grading only.) Effective: 2017 Spring Quarter.

**EMR 401—Preceptorship in Emergency Medicine (1-6)**
Clinical Activity—10 hours. Prerequisite(s): Consent of Instructor. Exposure to the specialty of Emergency Medicine and observation of a wide array of patients in the Emergency Department. May be repeated for credit. (P/F grading only.) Effective: 2012 Spring Quarter.

**EMR 430—Introduction to Medical Toxicology (3-6)**
Variable—40 hours. Prerequisite(s): Consent of Instructor. Fourth-year medical student in good standing. In-depth review of clinical and medical toxicologic emergencies. Rotation includes contact with toxicology trained emergency faculty, didactic lectures, journal club, simulation training and exposure to a very busy poison control center. (H/P/F grading only.) Effective: 2012 Spring Quarter.

**EMR 435—Wilderness Medicine (3-6)**
Clinical Activity—12 hours; Independent Study—8 hours; Lecture/Discussion—20 hours. Prerequisite(s): Consent of Instructor. Designed as an introductory elective course for students to explore how physicians can interact with the environment in austere conditions through lectures, hands-on/field experience, and case-based learning. (P/F grading only.) Effective: 2018 Spring Quarter.

**EMR 440—Emergency Medicine Clerkship (6)**
Clinical Activity—46 hours; Lecture/Discussion—4 hours. Prerequisite(s): Satisfactory completion of Medicine, Surgery, and Pediatric Clerkship. Students complete clinical shifts in the Emergency Department, functioning as Acting Intern. Treat a wide variety of patients and problems under the supervision of the EM Attending. Students are expected to take focused histories and present in clear, concise fashion. May be repeated for credit. (H/P/F grading only.) Effective: 2011 Fall Quarter.

**EMR 445—Emergency Medicine Ultrasound for Fourth-Year Medical Student (3-6)**
Variable. Prerequisite(s): Fourth-year Medical Student in good standing; interest in Emergency Medicine or Critical Care is recommended; EMR 440 or equivalent is recommended prior to the rotation. Limited enrollment. Intended for students interested in learning both the technical and cognitive skills of bedside ultrasound. Emphasis will be on the use of ultrasound in emergency medicine as a diagnostic tool and in procedural guidance. (H/P/F grading only.) Effective: 2008 Fall Quarter.

**EMR 450—Ambulatory Elective in Emergency Medicine (3-18)**
Variable. Restricted to MS4 students in good standing; externships/away rotations only. Credit will be given for approved non-AI Emergency Medicine courses at other institutions to which there is not an equal learning experience at UC Davis. May be repeated up to 2 time(s). (H/P/F grading only.) Effective: 2016 Fall Quarter.

**EMR 455A—Focus on POCUS A (6)**
Clinical Activity—30 hours. Prerequisite(s): Consent of Instructor. Directed towards gaining a greater proficiency of point-of-care ultrasound. Particularly useful for those pursuing careers that use this modality heavily in clinical practice such as primary care, pediatrics, emergency medicine, critical care, physical medicine and rehabilitation, etc. (H/P/F grading only.) Effective: 2017 Summer Quarter.

**EMR 455B—Focus on POCUS B (6)**
Clinical Activity—30 hours. Prerequisite(s): Consent of Instructor. Directed towards gaining a greater proficiency of point-of-care ultrasound. Particularly useful for those pursuing careers that use this modality heavily in clinical practice such as primary care, pediatrics, emergency medicine, critical care, physical medicine and rehabilitation, etc. (H/P/F grading only.) Effective: 2017 Summer Quarter.

**EMR 465—Externship in Emergency Medicine (3-9)**
Clinical Activity—36 hours; Lecture/Discussion—4 hours. Prerequisite(s): Satisfactory completion of Medicine, Surgery and Pediatrics. Students complete clinical shifts in the Emergency Department, functioning as Acting Intern. Treat a wide variety of patients and problems under the supervision of the EM Attending. Students are expected to take focused histories and present in clear, concise fashion. May be repeated for credit No Limit. (H/P/F grading only.) Effective: 2017 Fall Quarter.

**EMR 470—Pediatric Emergency Medicine Clerkship (3-6)**
Clinical Activity—36 hours; Lecture/Discussion—4 hours. Prerequisite(s): Satisfactory completion of Medicine,
Surgery, and Pediatrics. Restricted to fourth-year medical student in good standing only. See patients in the Pediatric area of the Emergency Department under the supervision of an Emergency Medicine Attending. Emphasis on recognition and management of the acutely ill pediatric patient and treatment of common pediatric complaints. (H/P/F grading only.) Effective: 2017 Summer Quarter.

**EMR 480—Understanding Health Policy: A Focus on Analysis and Translation (1-6)**
Discussion—16 hours; Independent Study—10 hours; Lecture—4 hours. Prerequisite(s): Consent of Instructor. The paradigm of healthcare delivery in the US is changing rapidly. To prepare the next generation of physician leaders, this course will provide students with the skills, tools, and knowledge needed to impact decisions made at the policy level. (H/P/F grading only.) Effective: 2015 Fall Quarter.

**EMR 490—Emergency Procedures Elective (3)**
Discussion/Laboratory—24 hours; Independent Study—4 hours; Tutorial—4 hours; Web Virtual Lecture—8 hours. Prerequisite(s): Current basic life support (BLS) certification. Restricted to fourth-year medical student in good standing only. Simulator-based skills training for emergency procedures. Topics include airway management, central venous access, chest tube placement, and general critical care resuscitation skills. (P/F grading only.) Effective: 2010 Summer Quarter.

**EMR 493A—Cardiac Arrest, Resuscitation and Repurfusion SSM (3)**
Clinical Activity—4 hours; Laboratory—16 hours; Lecture—5 hours; Lecture/Lab—10 hours. Prerequisite(s): Consent of Instructor. Restricted to UC Davis School of Medicine students only. Special Studies Module, a four week course specific to the topics of Cardiac Arrest, Resusciatation and Repurfusion. (H/P/F grading only.) Effective: 2010 Summer Quarter.

**EMR 493B—Cardiac Arrest, Resuscitation and Repurfusion SSM (3)**
Clinical Activity—4 hours; Laboratory—16 hours; Lecture—5 hours; Lecture/Lab—10 hours. Prerequisite(s): Consent of Instructor. Restricted to UC Davis School of Medicine students only. Special Studies Module, a four week course specific to the topics of Cardiac Arrest, Resusciatation and Repurfusion. (H/P/F grading only.) Effective: 2010 Summer Quarter.

**EMR 499—Research (2-18)**
Laboratory. Prerequisite(s): Consent of Instructor. Elective where topics may be selected in either basic or clinical research areas of Emergency and/or Critical Care Medicine. The goals will be tailored to each individual student. Enrollment requires prior discussion and consent of instructor. (H/P/F grading only.) Effective: 1997 Winter Quarter.

**ENM 192—Internship in Endocrinology (1-12)**
Internship—3-36 hours. Prerequisite(s): Upper division standing; approval of project by preceptor prior to internship. Supervised work experience in endocrinology. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 1997 Winter Quarter.

**ENM 299—Research (1-12)**
Variable. Prerequisite(s): Consent of Instructor. Endocrinology research. (S/U grading only.) Effective: 1997 Winter Quarter.

**ENM 460—Endocrinology Clinical Clerkship (3-18)**
Clinical Activity. Prerequisite(s): IMD 430; And/or consent of instructor. Limited enrollment. Participation with members of subspecialty service in the initial evaluation, work-up, management and follow-up of patients with endocrinologic disorders. Limited enrollment. (H/P/F grading only.) Effective: 1997 Winter Quarter.

**ENM 465—Clinical Nutrition Clerkship (3-18)**
Clinical Activity—30 hours. Prerequisite(s): IMD 430; Consent of IOR. In-depth experience in assessment and monitoring of nutritional support of patients whose illnesses are complicated by malnutrition and of patients with problems in under-nutrition due to various illnesses. May be repeated for credit. (H/P/F grading only.) Effective: 1997 Winter Quarter.

**ENM 480—Insights in Endocrinology (1-3)**
Clinical Activity—3-9 hours. Prerequisite(s): Consent of Instructor. Student in good academic standing. First- or second-year students observe in morning Endocrine and Diabetes clinics and attend bi-weekly noon and afternoon endocrine conferences. They also give brief endocrine physiology oral presentation to the endocrine group. (H/P/F grading only.) Effective: 1997 Winter Quarter.

**ENM 499—Research (1-12)**
Variable. Prerequisite(s): Consent of Instructor. (H/P/F grading only.) Effective: 1997 Winter Quarter.
GAS 192—Internship in Gastroenterology (1-12)
Internship—3-36 hours. Prerequisite(s): Upper division standing; approval of project by preceptor prior to internship.
Supervised work experience in gastroenterology. May be repeated for credit up to 12 units. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 1997 Winter Quarter.

GAS 299—Research (1-12)

GAS 460—Gastroenterology Clinical Clerkship (3-18)
Clinical Activity—30 hours. Prerequisite(s): Consent of Instructor. Completion of third-year of medical school. Work-up, manage, and follow-up new patients on active inpatient consulting service. Gastroenterology/Hepatology patients. Daily rounds with attending physician. May be repeated for credit. (H/P/F grading only.) Effective: 2013 Summer Quarter.

GAS 480—Insights in Gastroenterology (1-3)
Clinical Activity—3-9 hours. Prerequisite(s): Consent of Instructor. Student in good academic standing. To gain insight in clinical activities of Gastroenterology Division through attendance at any of the following: endoscopic procedures, ward rounds, outpatient clinic, and G.I. grand rounds. (H/P/F grading only.) Effective: 1997 Winter Quarter.

GAS 499—Research (1-12)
Clinical Activity. Prerequisite(s): Consent of Instructor. Medical student status. Part-time participation in active clinical and basic research projects. Some will involve both patient care and relevant laboratory procedures. Basic research includes liver metabolism, cancer markers, porphyrias diet and cancer, folate metabolism. May be repeated for credit. May be repeated for credit. (H/P/F grading only.) Effective: 1997 Winter Quarter.

GMD 192—Internship in General Medicine (1-12)
Internship—3-36 hours. Prerequisite(s): Upper division standing; approval of project by preceptor prior to internship. Supervised work experience in general medicine. May be repeated for credit up to 12 units. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 1997 Winter Quarter.

GMD 291—Seminars in Human Health Services Research and Clinical Epidemiology (1)
Seminar—1 hour. Critical review, evaluation, and discussion of research in health services and clinical epidemiology. Presentation of statistical, epidemiologic, and econometric methods. Students present their own research and critique the work of others. May be repeated for credit. May be repeated for credit. (Same course as EPI 291.) (S/U grading only.) Effective: 1998 Fall Quarter.

GMD 460—General Medicine Consults (1-18)
Clinical Activity—1-18 hours; Variable—1-18 hours. Prerequisite(s): Fourth-year medical students with consent of instructor; a general medicine clerkship. Limited enrollment. Supervised opportunity to see entire spectrum of medical problems encountered by a general internist. Student spends time in General Medicine Clinic and on the General Medicine Consult Service. Consultation Service is particularly concerned with medical evaluation of surgical patients. (H/P/F grading only.) Effective: 1997 Winter Quarter.

GMD 470—Health Care Ethics (3-9)
Discussion/Laboratory—1 hour; Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Guided independent study of issues in biomedical ethics, with discussion of readings that are based on student interests and needs. Participation in ethics rounds. (Same course as NRS 470.) (H/P/F grading only.) Effective: 2012 Spring Quarter.

GMD 485—Introduction to Health Care Ethics (1)
Lecture. Prerequisite(s): Medical student in good standing. Introduction to concepts and methods of healthcare ethics. Emphasis on problems and methods. (H/P/F grading only.) Effective: 1997 Fall Quarter.

GMD 499—General Medicine Research (1-18)
Clinical Activity—8-40 hours; Discussion—3 hours. Prerequisite(s): Consent of Instructor. Student will be involved in a clinical research problem within the areas, interest and expertise of members of Division of General Internal Medicine. Alternatively, the research effort will be directed toward investigation of a clinical problem of general medical interest. May be repeated for credit. (H/P/F grading only.) Effective: 1997 Winter Quarter.

HON 199—Research in Hematology-Oncology (1-5)
Laboratory. Prerequisite(s): Consent of Instructor. Upper division standing. Experience in laboratory research. (P/NP grading only.) Effective: 1997 Winter Quarter.
HON 298—Topics in Hematology (1-4)
Variable. Prerequisite(s): One year of graduate work and/or consent of instructor. Basic concepts of the physiology of the hematopoietic organ, the pathophysiology of hematopoietic disease, and concepts of therapeutics will be offered for study. The specific topics to be dictated by the interest and background of the students. Effective: 1997 Winter Quarter.

HON 299—Research (1-12)
Variable. Prerequisite(s): Consent of Instructor. Laboratory investigation contributing to the dissertation for a graduate degree. (S/U grading only.) Effective: 1997 Winter Quarter.

HON 420—Oncology (4)
Lecture/Discussion—2 hours. Prerequisite(s): Approval by the SOM Committee on Student Promotions. Restricted to Medical student only; students must pass all Year 1 SOM courses. Covers the principles of oncology and the pathophysiology of specific, common cancers correlated with organ systems pathophysiology and systemic pathology courses. (P/F grading only.) Effective: 2015 Fall Quarter.

HON 460—Hematology-Oncology Consult Clerkship (6-12)
Clinical Activity. Prerequisite(s): Consent of Instructor. Fourth-year medical student in good academic standing. Limited enrollment. Acting intern on inpatient hematology/oncology ward service. May be repeated for credit. Limited enrollment. May be repeated for credit. (H/P/F grading only.) Effective: 1997 Winter Quarter.

HON 461—Hematology-Oncology Consult Clerkship (6-12)
Clinical Activity. Prerequisite(s): Consent of Instructor. Fourth-year medical student in good academic standing. Limited enrollment. Student is an integral member of the inpatient hematology and oncology consult service, the bone marrow service, and will attend all conferences sponsored by the Division. May be repeated for credit. Limited enrollment. May be repeated for credit. (H/P/F grading only.) Effective: 1997 Winter Quarter.

HON 462—Hematology-Oncology Ambulatory Clerkship (3-18)
Clinical Activity—30 hours. Prerequisite(s): Consent of Instructor. Fourth-year medical student in good academic standing. Limited enrollment. Outpatient rotations in related clinics. Participation with members of the subspecialty service in the initial clinical evaluation, work-up, management and follow-up of the patient with hematologic or oncologic disorders. May be repeated for credit. (H/P/F grading only.) Effective: 2011 Winter Quarter.

HON 493—Cancer as a Process (1-6)
Auto Tutorial—6 hours; Clinical Activity—14 hours; Independent Study—10 hours; Seminar—10 hours. Prerequisite(s): Consent of Instructor. Restricted to UC Davis School of Medicine students only. Covers cancer as a process, beginning with risks and prevention, preneoplasia, microinvasion, treatment options, metastases and systemic therapy, pain medicine and palliative care, and cancer communication. Format includes traditional lectures, student-led case discussions, and problem-based learning. (H/P/F grading only.) Effective: 2012 Summer Quarter.

HON 499—Research (1-12)
Variable. Prerequisite(s): Consent of Instructor. (H/P/F grading only.) Effective: 1997 Winter Quarter.

IDI 141—Infectious Diseases of Humans (1)
Lecture—1 hour. Prerequisite(s): Introductory knowledge in biology and chemistry recommended. Course integrates information on biological and molecular nature of the causative organism, modern diagnostics, treatment and prevention strategies, and the role of infectious diseases in contemporary society and throughout human history. (P/NP grading only.) Effective: 1997 Winter Quarter.

IDI 192—Research Internship in Internal Medicine (1-12)
Internship—3-36 hours. Supervised work experience in the division of Infectious Diseases. Undergraduates will have an opportunity to acquire research experience in clinical settings. May be repeated for credit up to 12 units. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 1997 Winter Quarter.

IDI 199—Infectious Diseases Research (1-5)
Variable. Prerequisite(s): Consent of Instructor. Chemistry through organic chemistry (in addition, physical and biochemistry preferred), biology through basic bacteriology (in addition, microbiology and immunology preferred). Discrete problem requiring reading and actual manual effort in solution will be assigned to each student. Progress and results will be reviewed at intervals with instructor and via seminar presentation. (P/NP grading only.) Effective: 1997 Winter Quarter.

IDI 211—Epidemiology and Prevention of Infectious Diseases (3)
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): EPI 205B; (EPI 207; or IMD 421). Infectious disease
epidemiology and prevention, with equal emphasis on human and veterinary diseases. Major categories of infectious diseases by mode of transmission. Effective: 2002 Spring Quarter.

IDI 299—Research in Infectious Diseases (1-12)
Variable. Prerequisite(s): Consent of Instructor. Laboratory investigation contributing to the dissertation for a graduate degree. (S/U grading only.) Effective: 1997 Winter Quarter.

IDI 440—Introduction to AIDS and Related Disorders (1.5-6)
Clinical Activity—30 hours; Discussion—10 hours. Prerequisite(s): First- and second-year medical students must be in good academic standing and have consent from the instructor. Familiarizes students with the diagnosis and treatment of individuals infected with the human immunodeficiency virus. Students will interview patients, observe patient care and participate in ongoing clinic research as well as examine alternative lifestyles. May be repeated for credit. May be repeated for credit. (H/P/F grading only.) Effective: 2005 Spring Quarter.

IDI 450—Clinical and Social Care of the Injection Drug User (1-4)
Clinical Activity—3 hours; Lecture—1 hour. Prerequisite(s): Consent of Instructor. First- and second-year medical students in good academic standing. Lecture and guided clinical practice in a supervised clinical setting, focusing on the social and medical aspects of health care for injection drug users. May be repeated for credit up to 24 units. May be repeated up to 24 unit(s). (H/P/F grading only.) Effective: 2005 Fall Quarter.

IDI 460—Infectious Diseases Clinical Clerkship (3-6)
Clinical Activity. Prerequisite(s): Successful completion of two years of study in an accredited medical school. Limited enrollment with priority to fourth-year medical students. Patients ill with infectious diseases, including AIDS, will be evaluated and presented at rounds and case conferences. Patients are also seen in the Infectious Diseases Clinic. Instruction in clinical microbiology and the proper use of the laboratory will be provided. (H/P/F grading only.) Effective: 1997 Winter Quarter.

IDI 493—Correctional Medicine SSM - Evaluation of HIV and Hepatitis C Patients (6)
Clinical Activity—30 hours; Discussion—5 hours. Primary agenda focuses on the evaluation of treatment of HIV and Hepatitis C patients in the correctional environment. (H/P/F grading only.) Effective: 2016 Fall Quarter.

IDI 499—Research Topics in Infectious Disease (2-12)
Variable. Prerequisite(s): Successful completion of the first-year of study in School of Medicine, graduate students (approved for graduate credit), and/or consent of instructor. Discrete problem requiring reading and actual manual effort in solution will be assigned to each student. Progress and results to be reviewed at intervals with instructor and via seminar presentation. (H/P/F grading only.) Effective: 1997 Winter Quarter.

NEP 192—Internship in Nephrology (1-12)
Internship—3-36 hours. Prerequisite(s): Upper division standing; approval of project by preceptor prior to internship. Supervised work experience in nephrology. May be repeated for credit up to 12 units. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 1997 Winter Quarter.

NEP 299—Nephrology Research (1-12)
Variable. Prerequisite(s): Consent of Instructor. Research topics in Nephrology. May be repeated for credit. (S/U grading only.) Effective: 2002 Summer Quarter.

NEP 444—Curriculum Design for Doctoring (1)
Project (Term Project)—2 hours; Seminar—1 hour. Prerequisite(s): Consent of Instructor. Second year standing in School of Medicine. Design of Doctoring curriculum for medical students in focused topic areas to be announced annually. Students will design sessions, consider resource needs, and work with IORs to initiate the curriculum. (P/F grading only.) Effective: 2007 Summer Quarter.

NEP 460—Nephrology and Fluid Balance (3-6)
Clinical Activity—4 hours; Lecture/Discussion—10 hours. Prerequisite(s): Consent of Instructor. Completion of third-year medical school; completion of Medicine Core Clerkship. Limited enrollment. Active participation in all inpatient/outpatient clinical activities, attendance at specific lectures and conferences at UCD Medical Center covering the field of nephrology and fluid-electrolyte disorders. (H/P/F grading only.) Effective: 2001 Summer Quarter.

NEP 499—Research in Nephrology (3-18)
Variable. Prerequisite(s): Consent of Instructor. Individual arrangement. Independent laboratory research on a specific problem related to biochemical or immunologic causes of renal disease and/or uremic disorders in humans or animals. May be repeated for credit. (H/P/F grading only.) Effective: 2017 Fall Quarter.
PUL 192—Internship in Pulmonary Medicine (1-12)
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Upper division standing; approval of project by preceptor prior to internship. Supervised work experience in pulmonary medicine. May be repeated for credit up to 12 units. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 1997 Winter Quarter.

PUL 299—Pulmonary Disease Research (1-12)
Laboratory. Prerequisite(s): Consent of Instructor. By arrangement only. Pulmonary disease research activity with focus in inhalation toxicity, oxidants or lung biochemistry, and cell and molecular biology. (S/U grading only.) Effective: 1997 Winter Quarter.

PUL 460—Comprehensive Pulmonary Medicine Clerkship (3-6)
Clinical Activity—40 hours. Prerequisite(s): Completion of second year of medical school and/or consent of instructor; completion of Internal Medicine Clerkship. Rotation intended to provide a comprehensive student education in Pulmonary Medicine. Students will participate in hands on clinical education, as well as completing an assigned curricula. Intended for students pursuing Internal Medicine & Primary Care careers. May be repeated for credit. (H/P/F grading only.) Effective: 2013 Summer Quarter.

PUL 461—Critical Care Clinical Clerkship (3-6)
Clinical Activity—40 hours. Prerequisite(s): Completion of second year of medical school and/or consent of instructor; completion of Internal Medicine and Surgical Clerkships. Rotation intended to provide student education in the Critical Care Management of sub-speciality patients. May be repeated for credit. (H/P/F grading only.) Effective: 2013 Summer Quarter.

PUL 462—Pulmonary Consult Clerkship (3-6)
Clinical Activity—35 hours. Prerequisite(s): Completion of second year of medical school and/or consent of instructor; completion of Internal Medicine Clerkship. Similar to course 460. Rotation designed for students interested in learning pulmonary medicine, but who desire more variety in their clerkships, and do not desire the comprehensive experience offered by a four-week pulmonary rotation. May be repeated for credit. (H/P/F grading only.) Effective: 2013 Summer Quarter.

PUL 470—Practicum in Care of the Terminally Ill (3-6)
Clinical Activity—35 hours; Seminar—5 hours; Variable—3-6 hours. Prerequisite(s): Consent of Instructor. Restricted to fourth-year Medical students in good standing. Work with hospice interdisciplinary team. Direct experience in the care of patients with illnesses where no cure is possible. Emphasis on symptom relief, end of life issues, physician assisted suicide. (H/P/F grading only.) Effective: 2010 Spring Quarter.

PUL 475—Encounters in Ethics in the ICU (3-6)
Clinical Activity—12 hours; Independent Study—6 hours; Lecture/Discussion—6 hours. Prerequisite(s): Fourth-year Medical Student. Care for critically ill adults with complex medical disease carries with it unique ethical roles and duties for the physician. May be repeated for credit. (H/P/F grading only.) Effective: 2011 Summer Quarter.

PUL 480—Pulmonary-Critical Care Medicine Insights (1-3)
Clinical Activity—3-9 hours. Prerequisite(s): Consent of Instructor. Student in good academic standing. Attend respiratory outpatient clinics and in-patient pulmonary consultation rounds and medical intensive care rounds. Introduction to diagnosis and treatment of common pulmonary problems. (H/P/F grading only.) Effective: 1997 Winter Quarter.

PUL 499—Research (1-12)
Variable. Prerequisite(s): Consent of Instructor. Research opportunity in Pulmonary Medicine. May be repeated for credit. (H/P/F grading only.) Effective: 2017 Fall Quarter.

RAL 099—Directed Research Immunology (1-5)
Laboratory. Prerequisite(s): Consent of Instructor. Independent research will be encouraged in basic immunology, including the role of the cellular immune system in oncogenesis. (P/NP grading only.) Effective: 1997 Winter Quarter.

RAL 192—Internship in Rheumatology-Allergy (1-12)
Internship—3-36 hours. Prerequisite(s): Upper division standing; approval of project by preceptor prior to internship. Supervised work experience in rheumatology-allergy. May be repeated for credit up to 12 units. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 1997 Winter Quarter.

RAL 199—Directed Research in Immunology (1-5)
Laboratory. Prerequisite(s): Consent of Instructor. Independent research will be encouraged in basic immunology, including the role of the cellular immune system in oncogenesis. (P/NP grading only.) Effective: 1997 Winter Quarter.
RAL 209—Current Topics in Immunology: From Presentations to Grants (3)
Lecture—1 hour; Project (Term Project)—1 hour; Term Paper/Discussion—1 hour. Prerequisite(s): IMM 201 Current developments in various aspects of immunology and their interrelationships. Focus on areas of immunology not currently covered in the basic and advanced immunology courses. Oral presentation, written review and grant preparation. Effective: 2008 Winter Quarter.

RAL 298—Topics in Rheumatology and Clinical Immunology (1-5)
Laboratory. Prerequisite(s): Consent of Instructor. Library and/or laboratory work as required. (S/U grading only.) Effective: 1997 Winter Quarter.

RAL 299—Research in Autoimmune Disease (1-12)
Laboratory. Prerequisite(s): Consent of Instructor. Independent research will be encouraged in both animal models of human disease (including congenitally athymic [nude], asplenic, and New Zealand mice) and the cellular immune system of patients with systemic lupus erythematosus, Sjögrens syndrome, polymyositis and drug hypersensitivity. (S/U grading only.) Effective: 1997 Winter Quarter.

RAL 460—Rheumatology Clinical Clerkship (1-18)
Clinical Activity—2-40 hours. Prerequisite(s): MDS 431 and Consent of Instructor. Participation with members of the subspecialty service in the diagnosis and therapeutic management of patients with rheumatologic diseases. May be repeated for credit. (H/P/F grading only.) Effective: 2009 Spring Quarter.

RAL 461—Allergy Clinical Clerkship (3-18)
Clinical Activity. Prerequisite(s): Consent of Instructor. Completion of second year of medical school. Student will work with practicing allergist in daily work with patients and participate in weekly allergy clinic and teaching conferences. Study of the literature. Will see patients with problems in clinical immunology, immunodeficiency, asthma, allergic rhinitis. (H/P/F grading only.) Effective: 1997 Winter Quarter.

RAL 480—Insights in Rheumatology (1-3)
Clinical Activity—3-9 hours. Prerequisite(s): Consent of Instructor. Student in good academic standing. Participation in rheumatology consultation rounds, rheumatic disease clinics and conferences with supervised readings in rheumatology. (S/U grading only.) Effective: 1997 Winter Quarter.

RAL 499—Research (1-12)
Variable—2-40 hours. Prerequisite(s): Medical student with consent of instructor. Part-time participation in active clinical and basic research projects which can involve both patient care and relevant laboratory procedures. Students can gain experience in clinical medicine and clinical investigation. May be repeated for credit. (H/P/F grading only.) Effective: 2009 Spring Quarter.

JUNK

MMI 098—Directed Group Study (1-5)
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. Group Study in Medical Microbiology and Immunology; primarily for lower division students. Directed reading and discussion on selected topics. May be repeated for credit when topic differs. (P/NP grading only.) Effective: 2019 Winter Quarter.

MMI 099—Special Study for Undergraduates (1-5)
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. Restricted to lower division standing. Special study for lower division students. May be repeated for credit. (P/NP grading only.) Effective: 2019 Winter Quarter.

MMI 130—Medical Mycology (2)
Lecture—2 hours. Prerequisite(s): Consent of Instructor. A course in pathogenic microbiology. Various aspects of pathogenic fungi, particularly affecting humans, will be discussed including epidemiology, pathogenesis and pathology, diagnosis and therapy. (Same course as MMI 430.) Effective: 1997 Winter Quarter.

MMI 188—Human Immunology (3)
Lecture—3 hours. Prerequisite(s): Undergraduate level introductory Biology course. Human immune system and mechanisms of immunity. Basic components and function of immune system. Molecular basis of immune response; basic cellular and molecular mechanisms. Interactions between cells of immune system producing immune responses; regulating molecules. Effective: 2004 Spring Quarter.

MMI 192—Internship in Medical Microbiology (1-12)
Internship—3-36 hours. Prerequisite(s): Upper division standing; approval of project prior to period of internship. Supervised work experience in medical microbiology and related fields. (P/NP grading only.) Effective: 1997 Winter Quarter.
MMI 194H—Senior Honors Project in Medical Microbiology and Immunology (5)
Independent Study—15 hours. Prerequisite(s): MMI 199; and Consent of Instructor. Project in research related to immunology of medically important viruses. Development of a hypothesis-driven project, performance of experimental protocols and preparation of graphical representation of original data. Requires oral and written presentation of research results. May be repeated up to 3 time(s) with consent of instructor. (P/NP grading only.) Effective: 2004 Spring Quarter.

MMI 198—Group Study in Medical Microbiology (1-5)
Variable. Prerequisite(s): Consent of Instructor. Upper division standing. Directed reading and discussion and/or laboratory investigation on selected topics. (P/NP grading only.) Effective: 1997 Winter Quarter.

MMI 199—Research in Medical Microbiology (1-5)
Variable. Prerequisite(s): Consent of Instructor. Upper division standing. Individual research. (P/NP grading only.) Effective: 1997 Winter Quarter.

MMI 200D—Mechanisms for Microbial Interactions with Hosts (3)
Lecture/Discussion—3 hours. Prerequisite(s): MIB 200A; or Consent of Instructor. Study of mechanisms involved in microbial interactions within a host environment. The following principles are basic to understanding these interactions: host recognition, invasion, competition and growth, and host defense. Effective: 1997 Winter Quarter.

MMI 210A—Critical Analysis of Contemporary Research on Animal Models of Human Infectious Disease (1)
Lecture/Discussion—1 hour. Prerequisite(s): Consent of Instructor. Students funded by the Animal Models of Infectious Diseases Training Grant. Limited enrollment. Topics will include diverse vertebrate and invertebrate models of human infectious diseases. May be repeated for credit. (S/U grading only.) Effective: 2013 Fall Quarter.

MMI 210B—Comparative Analysis of Animal Models of Human Infectious Diseases (1)
Lecture/Discussion—1 hour. Prerequisite(s): Students funded by the Animal Models of Infectious Diseases Training Grant; others by consent of instructor. Limited enrollment. Compares the major vertebrate and invertebrate animal models that are used most commonly to study human infectious disease, including mouse, non-human primate, Caenorhabditis elegans, and drosophila. May be repeated for credit. (S/U grading only.) Effective: 2014 Winter Quarter.

MMI 215—Medical Parasitology (3)
Discussion—1.5 hours; Lecture—1.5 hours. Prerequisite(s): Graduate student with consent of instructor. Epidemiology, pathogenesis, diagnostic methods and current literature discussion of protozoa, helminths and arthropods of medical importance. Effective: 2011 Spring Quarter.

MMI 280—The Endogenous Microbiota in Health and Disease (3)
Lecture—3 hours. Prerequisite(s): Graduate standing. Recent insights into the microbial communities inhabiting mucosal surfaces, and will discuss how the composition of these communities contributes to normal development, metabolism, education of the immune system, and disease susceptibility. Offered in spring quarter; even years. Effective: 2016 Spring Quarter.

MMI 291—Seminar in Microbiology and Immunology (1)
Seminar—1 hour. Restricted to students with upper division or graduate standing. Research seminars on current topics in microbiology and immunology. May be repeated for credit when topic differs. (S/U grading only.) Effective: 2007 Spring Quarter.

MMI 298—Group Study in Medical Microbiology and Immunology (1-5)
Variable. Prerequisite(s): Consent of Instructor. Open to graduate students. Directed reading and discussion and/or laboratory investigation on selected topics. Sections 1, 2, 4, 5 are S/U grading only. (S/U grading only.) Effective: 1997 Winter Quarter.

MMI 299—Research (1-12)
Variable. Prerequisite(s): Consent of Instructor. Open to graduate students. Laboratory investigation contributing to the dissertation for a graduate degree. (S/U grading only.) Effective: 1997 Winter Quarter.

MMI 410—Physician Scientist Molecular Medicine Journal Club (1)
Lecture/Discussion—1 hour. Weekly seminars by students on research articles in current literature. Topics/articles to be selected by instructors to include a broad range of frontiers in biomedical literature. May be repeated for credit. (H/P/F grading only.) Effective: 2004 Fall Quarter.

MMI 430—Medical Mycology (2)
Lecture—2 hours. Prerequisite(s): Consent of Instructor. A course in pathogenic microbiology. Various aspects of
pathogenic fungi, particularly affecting humans, will be discussed including epidemiology, pathogenesis and pathology, diagnosis and therapy. (Same course as MMI 130.) (H/P/F grading only.) Effective: 1997 Winter Quarter.

**MMI 480A—Medical Immunology (2.5)**
Discussion/Laboratory—0.5 hours; Lecture—2 hours. Restricted to Medical students only. Helping to understand the immune system, the nomenclature and functional significance of the tissues, cells, proteins and genes of the immune system, as well as the normal regulatory mechanisms and pathologic outcomes related to the immune response. (P/F grading only.) Effective: 2016 Spring Quarter.

**MMI 480B—Medical Microbiology (5.5)**
Discussion/Laboratory—1 hour; Lecture—2.75 hours. Restricted to Medical students only. Discussion of the diseases caused by infectious agents includes their pathogenesis, clinical manifestations, diagnosis, treatment epidemiology and prevention. Covers the general properties of and diagnostic techniques for bacteria, fungi and viruses. (P/F grading only.) Effective: 2016 Spring Quarter.

**MMI 497T—Tutoring in Medical Microbiology (1-5)**
Tutorial—3-15 hours. Prerequisite(s): Consent of Instructor. Appropriate preparation in subject matter. Assist instructor by tutoring medical students in one of the departmental courses that is a component of the required curriculum of the School of Medicine. (H/P/F grading only.) Effective: 1997 Winter Quarter.

**MMI 498—Group Study in Medical Microbiology and Immunology (1-5)**
Variable. Prerequisite(s): Medical students with consent of instructor. Directed reading and discussion and/or laboratory investigation on selected topics. (H/P/F grading only.) Effective: 1997 Winter Quarter.

**MMI 499—Research (1-12)**
Variable. Prerequisite(s): Medical students with consent of instructor. May be repeated for credit. (H/P/F grading only.) Effective: 2008 Winter Quarter.

**MDS 099—Special Study in Medicine for Undergraduates (1-5)**
Independent Study—3-15 hours. Prerequisite(s): Consent of Instructor. Participate in research projects relating to medicine with faculty in the School of Medicine. (P/NP grading only.) Effective: 1997 Fall Quarter.

**MDS 192—Medical Education Internship for Advanced Undergraduates (1-12)**
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Competency with computers. Enrollment dependent on availability of intern positions. Participate in projects related to curriculum development in support of curriculum for M.D. degree. Gain work experience and appreciation for innovative approaches to learning in basic and clinical sciences of medical education. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 1997 Winter Quarter.

**MDS 400—Summer Pre-Matriculation Program (2)**
Independent Study—15 hours; Lecture—14 hours; PE Activity—7 hours. Prerequisite(s): Consent of Instructor. Two week program provides students from diverse backgrounds an early introduction to learning skills that will facilitate success in medical school. (P/F grading only.) Effective: 2016 Summer Quarter.

**MDS 401—Applications of Computers to Medical Practice (2)**
Auto Tutorial—2 hours. Prerequisite(s): Enrollment in medical school. Proficiency in computer applications relative to practice of medicine, with emphasis on email, literature searching, file transfer, and hospital information services. Course given online, at home or in lab; time and place determined by student. (H/P/F grading only.) Effective: 1997 Winter Quarter.

**MDS 402—Clinical & Cultural Spanish (2)**
Independent Study—4 hours; Lecture—1 hour; Practice—1 hour. Prerequisite(s): Consent of Instructor. Medical students, nursing students and physician assistants students who are fluent Spanish speakers will learn a comprehensive set of medical vocabulary and cultural aspects related to the treatment of Spanish speaking patients. (P/F grading only.) Effective: 2015 Winter Quarter.

**MDS 403—Science & Practice of Mindfulness and Compassion (1)**
Independent Study—20 hours; Lecture/Discussion—10 hours. Course will examine current scientific evidence for the effects of different mindfulness and compassion meditation practices in both healthy and clinical samples. (P/F grading only.) Effective: 2015 Summer Quarter.

**MDS 406—Endocrinology, Nutrition, Reproduction and Genetics (9.5)**
Discussion/Laboratory—2.8 hours; Lecture—3.8 hours. Prerequisite(s): BCM 410A; HPH 400; and Consent of Instructor. Restricted to Medical students only. Basic and pathophysiologic processes involved in human reproductive and endocrine control systems, nutritional regulation, and foundational genetics across the lifespan.
Integrate information across these systems and use clinical reasoning process to identify and understand relevant perturbations and diseases. May be repeated up to 3 time(s). (P/F grading only.) Effective: 2016 Winter Quarter.

MDS 411—Doctoring 1 (9) Review all entries
Clinical Activity—1 hour; Discussion—1 hour; Lecture—1 hour. Prerequisite(s): Consent of Instructor. Small group training in patient communication, interviewing techniques, physical exam and clinical identification. Outpatient clinical experiences and didactic presentations also included. (P/F grading only.) Effective: 2017 Summer Quarter.

MDS 411—Doctoring 1 (7) Review all entries
Clinical Activity—1 hour; Discussion—1 hour; Lecture—1 hour. Prerequisite(s): Consent of Instructor. Small group training in patient communication, interviewing techniques, physical exam and clinical identification. Outpatient clinical experiences and didactic presentations also included. (P/F grading only.) Effective: 2018 Summer Quarter.

MDS 411B—Doctoring 1 (5) Clinical Activity—1.5 hours; Discussion—1.5 hours; Lecture/Discussion—1.8 hours. Medical students only. Small, case-based learning groups with training in patient communication and interviewing techniques, clinical identification and problem solving, applications of social, psychological, cultural, bioethical, and basic science concepts to patient case scenarios, outpatient clinical experiences and didactic presentations. (P/F grading only.) Effective: 2018 Winter Quarter.

MDS 411KA—ACE-PC Program Doctoring 1 (13) Clinical Activity—5 hours; Lecture/Discussion—6 hours. Prerequisite(s): Consent of Instructor. Small case-based learning groups with training in patient communication and interviewing techniques clinical identification and problem solving applications of social psychological cultural bioethical and basic science concepts to patient case scenarios outpatient clinical experiences and didactic presentations. (P/F grading only.) Effective: 2018 Summer Quarter.

MDS 411KB—ACE-PC Program Doctoring 1 (5) Clinical Activity—4 hours; Lecture/Discussion—1 hour. Prerequisite(s): Consent of Instructor. Application of multidisciplinary basic, social and clinical science to clinical cases in small groups. History, physical examination with preceptors. Didactics in epidemiology, ethics, sexuality and clinical reasoning. Evaluation of professional competencies, attitudes and skills needed in the practice of medicine. (P/F grading only.) Effective: 2015 Winter Quarter.

MDS 415—Population Health and Evidence-Based Medicine (2) Review all entries
Discussion—4 hours; Lecture—12 hours. Prerequisite(s): Consent of Instructor. Focuses on the bedrock themes of public health: populations and prevention. (P/F grading only.) Effective: 2017 Summer Quarter.

MDS 415—Population Health and Evidence-Based Medicine (2) Review all entries Discontinued
Discussion—4 hours; Lecture—12 hours. Prerequisite(s): Consent of Instructor. Focuses on the bedrock themes of public health: populations and prevention. (P/F grading only.) Effective: 2018 Summer Quarter.

MDS 415A—Population Health and Evidence-Based Medicine (2) Discussion—4 hours; Lecture—12 hours. Prerequisite(s): Consent of Instructor. Introduces the fundamental concepts and tools of population health, evidence-based medicine, and system science. (P/F grading only.) Effective: 2018 Summer Quarter.

MDS 415B—Critical Appraisal of Topics in Population Health (0.5)
Discussion—6 hours. Apply foundational skills to explore critical issues in 21st century public health, including tobacco control, firearm violence, and obesity. In a series of small-group discussions “interpreting the medical literature,” key concepts from epidemiology and biostatistics are reinforced while students are armed with specific strategies for addressing high-risk behaviors in the context of population health. (P/F grading only.) Effective: 2018 Summer Quarter.

MDS 415C—Population Health and System Science (1.5)
Discussion—6 hours; Fieldwork—3 hours; Lecture—4 hours. Prerequisite(s): Consent of Instructor. Addresses the social, economic, cultural, policy-related, and environmental factors that affect the health of populations and individuals, and the role of health care systems (locally, regionally, nationally, and globally) in moderating the effects of these factors. Content builds on MDS 415A/B, the TeamPEACE (Teamwork for Professionalism, Ethics, and Cultural Enrichment) curriculum in Doctoring 1, and students’ lived experience in UC Davis free clinics. (P/F grading only.) Effective: 2018 Summer Quarter.

MDS 416A—Clinical Skills (7)
Clinical Activity—1 hour; Discussion—1 hour; Lecture/Discussion—1 hour. First in a series of courses that span across...
the pre-clerkship curriculum designed to integrate the clinical teaching within the pre-clerkship curriculum at the UC Davis School of Medicine. In Year 1, students acquire the foundational knowledge, skills, and attitudes to succeed in medical training, including: history taking, physical exam, and interpersonal communication skills. (P/F grading only.) Effective: 2019 Summer Quarter.

**MDS 416B—Clinical Skills B (7)**
Clinical Activity—1 hour; Discussion—1 hour; Lecture—1 hour. Second in a series of courses designed to integrate the clinical teaching within the pre-clerkship curriculum at the UC Davis School of Medicine. In year 2, students build upon the foundation in clinical skills and professional behavior set out in year 1. The year 2 clinical skills course involves applying clinical skills to the caring for patients who present with active medical issues requiring further diagnostic investigation and therapeutic management. (P/F grading only.) Effective: 2019 Summer Quarter.

**MDS 417A—Clinical Experiences A (1)**
Clinical Activity—0.5 hours. Clinical Experiences longitudinal thread is designed to provide continued clinical exposure throughout the pre-clerkship curriculum at the UC Davis School of Medicine. In Year 1, students apply the basic physical exam and history taking skills to real-life patients in outpatient clinical settings. (P/F grading only.) Effective: 2019 Summer Quarter.

**MDS 417B—Clinical Experiences B (1.5)**
Clinical Activity—0.5 hours. Clinical Experiences longitudinal thread is designed to provide continued clinical exposure throughout the pre-clerkship curriculum at the UC Davis School of Medicine. In year 2, students use their growing knowledge and skill set to complete supervised encounters with real patients in the inpatient setting. In addition to practicing their physical exam and history taking skills, students apply their presentation and counseling skills in real-life encounters. (P/F grading only.) Effective: 2019 Summer Quarter.

**MDS 418A—Health & Humanity A (2)**
Lecture/Discussion—1 hour. Health and Humanity longitudinal thread is designed to integrate wellness, professionalism, and the behavioral sciences within the pre-clerkship curriculum at the UC Davis School of Medicine. Throughout Year 1, students acquire the foundational knowledge surrounding the social determinants of health, implicit bias, and cultural humility. (P/F grading only.) Effective: 2019 Summer Quarter.

**MDS 420—Multisystem Clinical Presentations (0.5)**
Extensive Problem Solving—15 hours; Independent Study—6 hours. Prerequisite(s): Consent of Instructor. Completion of Pathophysiology Block. Capstone course integrates coursework, knowledge, skills and experiential learning to enable the student to demonstrate a broad mastery of learning across the curriculum. (P/F grading only.) Effective: 2014 Winter Quarter.

**MDS 421A—Doctoring 2 (6)**
Discussion—1 hour; Internship—0.5 hours; Lecture/Discussion—1 hour. Prerequisite(s): Approval by the School of Medicine Committee on Student Progress; medical students only. Application of multidisciplinary basic, social and clinical science to clinical cases in small groups. History, physical examination with preceptors. Didactics in epidemiology, ethics, sexuality and clinical reasoning. Evaluation of professional competencies, attitudes and skills needed in the practice of medicine. (P/F grading only.) Effective: 2007 Summer Quarter.

**MDS 421B—Doctoring 2 (6)**
Discussion—1 hour; Internship—0.5 hours; Lecture/Discussion—1 hour. Prerequisite(s): Approval by the School of Medicine Committee on Student Progress; medical students only. Application of multidisciplinary basic, social & clinical science concepts to cases in small groups. History, physical examination with preceptors. Didactics in epidemiology, ethics, sexuality, and clinical reasoning. Evaluation of professional competencies, attitudes and skills needed in the practice of medicine. (P/F grading only.) Effective: 2007 Summer Quarter.

**MDS 421C—Doctoring 2 (6)**
Discussion—1 hour; Internship—0.5 hours; Lecture/Discussion—1 hour. Prerequisite(s): Approval by the School of Medicine Committee on Student Progress; medical students only. Application of multidisciplinary basic, social and clinical science concepts to clinical cases in small group discussions facilitated by medical school faculty. Evaluation of professional competencies, attitudes and skills needed in the practice of clinical medicine. (P/F grading only.) Effective: 2007 Summer Quarter.

**MDS 421KA—ACE-PC Program Doctoring 2 (6)**
Discussion—1 hour; Internship—0.5 hours; Lecture/Discussion—1 hour. Prerequisite(s): MDS 411KA; MDS 411KB; Admission into ACE-PC. MDS 421KA-C are a year-long series of courses. Objectives and assessments have been...
accelerated to accommodate the students enrolled in the ACE-PC Program. Students will participate in all aspects of Doctoring 2, other than what was done in 411KA/KB. (P/F grading only.) Effective: 2015 Summer Quarter.

MDS 421KB—ACE-PC Program Doctoring 2 (6)
Discussion—1 hour; Internship—0.5 hours; Lecture/Discussion—1 hour. Prerequisite(s): Approval by the School of Medicine on Student Progress; medical students only. MDS 421KA-C are a year-long series of courses. Objectives and assessments have been accelerated to accommodate the students enrolled in the ACEPC Program. Students will participate in all aspects of Doctoring 2, other than what was done in 411KA/KB. (P/F grading only.) Effective: 2015 Summer Quarter.

MDS 421KC—ACE-PC Program Doctoring 2 (6)
Discussion—1 hour; Internship—0.5 hours; Lecture/Discussion—1 hour. Prerequisite(s): Approval by the School of Medicine Committee on Student Progress; medical students only. MDS 421KA-C are a year-long series of courses. Students will participate in all aspects of Doctoring 2, other than what was done in 411KA/KB. (P/F grading only.) Effective: 2015 Summer Quarter.

MDS 428—Foundations of Bioethics (1)
Discussion—3 hours; Independent Study—16.5 hours; Lecture/Discussion—3 hours; Web Virtual Lecture—1 hour. Prerequisite(s): Consent of Instructor. Course will expose students to core content in bioethics and the law and introduce a framework for ethical decision-making, while emphasizing relationships between bioethics and clinical care. (P/F grading only.) Effective: 2014 Summer Quarter.

MDS 429—Transition to Clerkships (1)
Discussion—7 hours; Discussion/Laboratory—12 hours; Independent Study—2 hours; Workshop—13 hours. Incoming third-year medical students will participate in a variety of educational experiences designed to prepare them to begin their clerkship curriculum. Course content will be disseminated in large and small group settings. (P/F grading only.) Effective: 2015 Spring Quarter.

MDS 430—Introduction to Doctoring 3 (1)
Discussion/Laboratory—2 hours. Prerequisite(s): Approval by SOM Committee on Student Progress. Restricted to Medical students only. Application of multidisciplinary basic, social and clinical science concepts to clinical cases in small group discussions facilitated by medical school faculty. Evaluation of professional competencies, attitudes and skills needed in the practice of clinical medicine. (H/P/F grading only.) Effective: 2011 Spring Quarter.

MDS 430A—Doctoring 3 (1)
Discussion—3 hours. Prerequisite(s): Approval by SOM Committee on Student Progress. Restricted to Medical students only. Application of multidisciplinary basic, social and clinical science concepts to clinical cases in small group discussions facilitated by medical school faculty. Evaluation of professional competencies, attitudes and skills needed in the practice of clinical medicine. (H/P/F grading only.) Effective: 2015 Spring Quarter.

MDS 430B—Doctoring 3 (1)
Discussion—2 hours. Prerequisite(s): Approval by SOM Committee on Student Progress. Restricted to Medical students only. Application of multidisciplinary basic, social & clinical science concepts to clinical cases in small group discussions facilitated by medical school faculty. Evaluation of professional competencies, attitudes and skills needed in the practice of clinical medicine. (H/P/F grading only.) Effective: 2015 Summer Quarter.

MDS 430C—Doctoring 3 (1)
Discussion—2 hours. Prerequisite(s): Approval by SOM Committee on Student Progress. Restricted to Medical students only. Application of multidisciplinary basic, social & clinical science concepts to clinical cases in small group discussions facilitated by medical school faculty. Evaluation of professional competencies, attitudes and skills needed in the practice of clinical medicine. (H/P/F grading only.) Effective: 2015 Summer Quarter.

MDS 435KA—ACE-PC Longitudinal Integrated Clerkship A (18)
Clinical Activity—45 hours; Discussion—4 hours; Independent Study—6 hours. Prerequisite(s): Consent of Instructor. Longitudinal Clerkship will combine the Internal Medicine, OB/GYN, Pediatrics, Psychiatry and Surgery Clerkships for the ACE-PC Program. (H/P/F grading only.) Effective: 2016 Spring Quarter.
MDS 435KB—ACE-PC Longitudinal Integrated Clerkship B (21)
Clinical Activity—45 hours; Discussion—4 hours; Independent Study—6 hours. Prerequisite(s): Consent of Instructor. Longitudinal Clerkship will combine the Internal Medicine, OB/GYN, Pediatrics, Psychiatry and Surgery Clerkships for the ACE-PC Program. (H/P/F grading only.) Effective: 2016 Spring Quarter.

MDS 435KC—ACE-PC Longitudinal Integrated Clerkship C (18)
Clinical Activity—45 hours; Discussion—4 hours; Independent Study—6 hours. Prerequisite(s): Consent of Instructor. Longitudinal Clerkship will combine the Internal Medicine, OB/GYN, Pediatrics, Psychiatry and Surgery Clerkships for the ACE-PC Program. (H/P/F grading only.) Effective: 2016 Spring Quarter.

MDS 440—Doctoring 4 Teaching Fellowship (3)
Discussion—0.5 hours; Seminar—0.25 hours. Prerequisite(s): MDS 430A; MDS 430B; MDS 430C; MDS 430D; and Consent of Instructor. Restricted to Medical student only. Instruction on teaching methodology and pedagogy. Mentored teaching of junior medical students in seminar, lecture, and bedside. (H/P/F grading only.) Effective: 2015 Spring Quarter.

MDS 441—Combined Ophthalmology and Otolaryngology Clerkship (6)
Clinical Activity—4 hours. Prerequisite(s): Approval by Committee on Student Promotion and Evaluation. Fundamental knowledge of ophthalmology and otolaryngology for the treatment of eye, ear, nose and throat problems at a level of training of general physicians, including when to refer patients to a specialist. (H/P/F grading only.) Effective: 1997 Summer Quarter.

MDS 445—Race and Health in the United States (3-6)
Discussion—4 hours. Interprofessional course facilitates the professional and personal developmental of medical students and other health professions students who think they would like to be leaders in securing equity in population health and work environments. (P/F grading only.) Effective: 2017 Fall Quarter.

MDS 449—Transition to Residency (3-6)
Clinical Activity. Prerequisite(s): Consent of Instructor. Transition to Residency program addresses the graduating medical students need to improve clinical skills necessary for the first six months of residency and unmet graduation competencies in our competency-based curriculum. (P/F grading only.) Effective: 2017 Fall Quarter.

MDS 450—Introduction to UCD Medical Center (1)
Seminar. Prerequisite(s): Second-year medical student. Designed to assist medical student in transition from classroom to hospital setting. (H/P/F grading only.) Effective: 1997 Winter Quarter.

MDS 455—Student Run Clinics (1-3)
Clinical Activity—3-9 hours. Open to medical students in good standing. Will learn counseling, diagnosis and treatment of patients with chronic and acute disease under supervision of physician. Meet all requirements and prerequisites of the particular clinic within which they work. May be repeated for credit. (P/F grading only.) Effective: 2011 Summer Quarter.

MDS 460CR—Introduction to Clinical Research (2)
Independent Study—3 hours; Lecture—2 hours. Restricted to completion of M.D., D.D.S, D.M.D., O.D., N.D., Pharm.D., D.V.M., Ph.D., or D.N.S. in nursing; application and acceptance into the Clinical Research Graduate Group, K30 program Introduction to the CRGG program and overview of major clinical research topics. Overview of basic clinical skills needed to accomplish CRGG mentored research project. (P/F grading only.) Effective: 2006 Summer Special Session.

MDS 461CR—Strategies for Grant Writing (2)
Lecture—2 hours. Restricted to completion of M.D., D.D.S, D.M.D., O.D., N.D., Pharm.D., D.V.M., Ph.D., or D.N.S. in nursing; application and acceptance into the Clinical Research Graduate Group, K30 program. Practical skills and strategies to create successful grant proposals in the NIH style and format. Generating ideas, identifying and accessing research resources, grant components, specific aims, background and significance, preliminary studies, budgets, and bios. Matriculation through UC system, and resubmissions. (S/U grading only.) Effective: 2007 Spring Quarter.

MDS 462CR—Introduction to Clinical Epidemiology and Study Design (3)
Discussion—10 hours; Lecture—25 hours. Restricted to completion of M.D., D.D.S, D.M.D., O.D., N.D., Pharm.D., D.V.M., Ph.D., or D.N.S. in nursing; application and acceptance into the Clinical Research Graduate Group, K30 program. Anatomy and physiology of conducting clinical epidemiologic research. Familiarity with three basic study designs (cross-sectional, case-control, and cohort). Discussion of principles of measurements in clinical
epidemiological studies, basic methods for analyzing data, and ethical issues involved in conducting research. (S/U grading only.) Effective: 2004 Summer Special Session.

MDS 463CR—Methods in Clinical Research (5)
Discussion—2 hours; Lecture—3 hours. Restricted to completion of M.D., D.D.S, D.M.D., O.D., N.D., Pharm.D., D.V.M., Ph.D., or D.N.S. in nursing; application and acceptance into the Clinical Research Graduate Group, K30 program. Overview of major approaches to clinical research, including health services research techniques, informatics, the GCRC, and preclinical methodologies to enhance clinical projects. Overview of UC Davis clinical research support infrastructure. Methodologies applicable to clinical research and its multi-disciplinary perspective. (S/U grading only.) Effective: 2007 Spring Quarter.

MDS 464CR—Responsible Conduct of Research (3)

MDS 465CR—Introduction to Medical Statistics (4)
Laboratory—2 hours; Lecture—3 hours. Restricted to completion of M.D., D.D.S, D.M.D., O.D., N.D., Pharm.D., D.V.M., Ph.D., or D.N.S. in nursing; application and acceptance into the Clinical Research Graduate Group, K30 program. Biomedical applications of statistical methods in clinical, laboratory and population medicine. Graphical/tabular data presentation, probability, binomial, Poisson, normal, t-, F-, and Chi-square distributions, elementary nonparametric methods, simple linear regression/correlation, life tables. Microcomputer applications of statistical procedures in population medicine. (S/U grading only.) Effective: 2005 Summer Special Session.

MDS 468C—International Clinical Preceptorship (1-12)
Clinical Activity—30 hours. Prerequisite(s): Consent of Instructor. Medical students. Multidisciplinary preceptorship in a foreign country. Clinical credit will be awarded using this course, once approval has been received from the appropriate governing committee. May be repeated for credit. (H/P/F grading only.) Effective: 2015 Spring Quarter.

MDS 468D—International Elective (1-12)
Clinical Activity—10 hours; Independent Study—20 hours. Prerequisite(s): Consent of Instructor. Medical students. Multidisciplinary preceptorship in a foreign country. Course used to award non-clinical credit for international experiences which have been approved by the appropriate governing committee. May be repeated for credit. (H/P/F grading only.) Effective: 2015 Summer Quarter.

MDS 470—Introduction to Dentistry (3-18)
Clinical Activity—34 hours; Lecture—6 hours; Variable—3-18 hours. Prerequisite(s): Consent of Instructor. Fourth-year medical student in good standing. Introduction to Dentistry and basic Oral and Maxillofacial Surgery. Course is offered by the Oral and Maxillofacial Surgery department at UC San Francisco. (P/F grading only.) Effective: 2009 Fall Quarter.

MDS 480—Insights in Clinical Research (1)
Lecture—1 hour. Prerequisite(s): Medical student in good standing. Seminars on research presented by Medical School faculty; overview of pertinent issues, including medical ethics, human subjects protocols, case control methods, etc. May be repeated for credit. (P/F grading only.) Effective: 2005 Spring Quarter.

MDS 481—Insights into Clinical Specialties (1)
Lecture/Discussion—1 hour. Prerequisite(s): Medical student in good standing. Exposure to various medical specialties, their residency programs and ways in which medical students can prepare for and improve their candidacy for such programs. May be repeated for credit. (H/P/F grading only.) Effective: 1998 Winter Quarter.

MDS 482—Lecture Series in Reproductive Health (1)
Lecture—1 hour. Psychosocial and public health aspects of providing quality reproductive health care and application in student-run free clinics and in 3rd year clerkships. May be repeated up to 2 time(s). Only medical students may enroll for credit; undergraduates may audit the course. (P/F grading only.) Effective: 2002 Winter Quarter.

MDS 483—Insights in Political, Legal and Business Aspects of Medicine (1)
Lecture—1 hour. Prerequisite(s): Medical students in good standing. Restricted to Medical student only. The practical aspects of a medical career. May be repeated up to 2 time(s). (P/F grading only.) Effective: 2002 Spring Quarter.
MDS 485—Health Policy Lecture Series (1)
Lecture—1 hour. Lecture series provides an overview of local, state, national and international health policy. The current challenges health care reform implementation is facing provides how medical students can successfully advocate for changes in health policy. May be repeated for credit. (P/F grading only.) Effective: 2011 Fall Quarter.

MDS 486—Topics in Health Care Improvement (0.5)
Lecture/Discussion—15 hours. Lecture series will cover major topics in health care improvement, presented by guest speakers who are leaders in the field. May be repeated for credit. (P/F grading only.) Effective: 2015 Spring Quarter.

MDS 487—History and Ethics of Medicine (1)
Lecture—1.25 hours. Introduction to ethical problems and events in health care in both modern and historical contexts. Eight one-hour and fifteen-minute interactive sessions designed to introduce students to historical topics in medicine and medical ethics. (P/F grading only.) Effective: 2004 Winter Quarter.

MDS 489—Directed Studies (1-9)
Prerequisite(s): Consent of Instructor. Individual directed studies in extended preparation for modified curriculum, USMLE exams, and/or as required by Committee on Student Progress. Independent studies to accommodate modified curriculums, prepare for taking USMLE exams and for remediation course work directed by the Committee on Student Progress. May be repeated for credit. (P/F grading only.) Effective: 2009 Winter Quarter.

MDS 489C—Clinical Reintroduction Experience (1-9)
Clinical Activity—20 hours. Prerequisite(s): Consent of Instructor. Learn and practice basic clinical skills in a supervised clinical setting. Skills include patient interviewing, history, physical examination, diagnostic and clinical reasoning, case presentation, and medical records documentation. Direct observation and individual feedback on clinical skills development is provided. (P/F grading only.) Effective: 2012 Summer Quarter.

MDS 489R—USMLE Directed Remedial Studies (1-9)
Independent Study—20 hours. Prerequisite(s): Recommendation by Committee on Student Progress. Independent studies to accommodate remediation for taking USMLE exams directed by the Committee on Student Progress. May be repeated for credit. (P/F grading only.) Effective: 2011 Spring Quarter.

MDS 490A—Community Health Scholars Seminar A (1.5)
Lecture—1 hour. Prerequisite(s): Consent of Instructor. Longitudinal year-long course starting on July 1 and concluding at the end of Block 2. Focuses on immersing students in their respective communities to understand the strengths and challenges they face in relation to health. May be repeated for credit. (P/F grading only.) Effective: 2017 Summer Quarter.

MDS 490B—Community Health Scholars Seminar B (0.5)
Lecture—1 hour. Prerequisite(s): Consent of Instructor. Longitudinal year-long course starting on July 1 and concluding at the end of Block 2. Focuses on immersing students in their respective communities to understand the strengths and challenges they face in relation to health. May be repeated for credit. (P/F grading only.) Effective: 2017 Summer Quarter.

MDS 490C—Community Health Scholars Seminar C (0.5)
Lecture—1 hour. Prerequisite(s): Consent of Instructor. Longitudinal year-long course starting on July 1 and concluding at the end of Block 2. Focuses on immersing students in their respective communities to understand the strengths and challenges they face in relation to health. May be repeated for credit. (P/F grading only.) Effective: 2017 Summer Quarter.

MDS 490D—Community Health Scholars Seminar D (0.5)
Lecture—1 hour. Prerequisite(s): Consent of Instructor. Longitudinal year-long course starting on July 1 and concluding at the end of Block 2. Focuses on immersing students in their respective communities to understand the strengths and challenges they face in relation to health. May be repeated for credit. (P/F grading only.) Effective: 2017 Summer Quarter.

MDS 493—Independent Special Study Module (3-12)
Variable—20 hours. Prerequisite(s): Consent of Instructor. FYOC approval required. Student developed alternative to the SSM/SPO Requirement. Approval by FYOC is required. (H/P/F grading only.) Effective: 2015 Winter Quarter.

MDS 493A—International and Comparative Health Care—SSM (6)
Discussion—20 hours; Lecture—10 hours. Prerequisite(s): Consent of Instructor. Restricted to UC Davis School of Medicine students only. Through a series of lectures, seminars and clinical experiences, all occurring in other
nations, students will research how health care systems address critical health issues. In 2007, Chronic Disease is the focal issue. SSM Component. (H/P/F grading only.) Effective: 2012 Spring Quarter.

**MDS 493B—International and Comparative Health Care—Clinical (3-9)**
Clinical Activity—30 hours. Prerequisite(s): Consent of Instructor. Restricted to UC Davis School of Medicine students only. Through a series of lectures, seminars and clinical experiences, all occurring in other nations, students will research how health care systems address critical health issues. In 2007, Chronic Disease is the focal issue. Clinical Component. (H/P/F grading only.) Effective: 2012 Spring Quarter.

**MDS 493D—Teaching the Basic Sciences SSM (6)**
Laboratory—30 hours; Lecture—6 hours; Lecture/Lab—8 hours; Tutorial—10 hours. Prerequisite(s): MDS 440 (can be concurrent); and Consent of Instructor. MDS 440 required concurrently. Restricted to UC Davis School of Medicine students only. Special Studies Module, a yearlong in progress court to teach lecture and discussion education technique and theory. (H/P/F grading only.) Effective: 2015 Spring Quarter.

**MDS 493Q—Improving Quality in Health Care (6)**
Discussion/Laboratory—10 hours; Lecture—8 hours; Project (Term Project)—10 hours. Prerequisite(s): Consent of Instructor. Working in interdisciplinary teams, will explore the theory and practical methods being employed to make improvement in health care systems while providing an opportunity for interprofessional educational experience. (H/P/F grading only.) Effective: 2015 Fall Quarter.

**MDS 494—Non-Clinical Medical Student Externship (3-9)**
Clinical Activity—10 hours; Independent Study—20 hours. Prerequisite(s): Consent of Instructor. Restricted to students with approval of credit by the Fourth Year Oversight Committee. Generic course for awarding externship credit for medical student rotations that are not primarily focused on patient care. May be repeated for credit. (H/P/F grading only.) Effective: 2014 Fall Quarter.

**MDS 495—Medicine Literature Review (1-9)**
Discussion—3-27 hours. Prerequisite(s): Medical student in good academic standing and permission of the Associate Dean of Curricular Affairs. Independent study: topics for selection include, but are not restricted to, medical ethics, economics and jurisprudence, culture and medicine, ethnicity and medicine, gender and medicine, history of medicine, health manpower, and medical education. A prepared paper on the selected topic will be required. (P/F grading only.) Effective: 1997 Fall Quarter.

**MDS 497—Scholarly Project (6)**
Independent Study—0.5 hours; Seminar—0.25 hours. Prerequisite(s): Consent of Instructor. Project proposal must be accepted by the Scholarly Project Executive Committee (SPEC). Restricted to 4th year medical school students only. Develop a research project on a focused topic area, implements the research, writes a publishable paper, and presents an oral summary of the project. (H/P/F grading only.) Effective: 2015 Spring Quarter.

**MDS 499—Research in Medical Education & Curriculum Development (4-9)**
Independent Study—10-36 hours. Prerequisite(s): Medical students in good standing and competency with computers. Research and development of an independent project related to expanding computer-assisted resources in support of the MD curriculum at UC Davis. (H/P/F grading only.) Effective: 1997 Fall Quarter.
MDS 499—Medical Student Research Fellowship (1-9) **Review all entries**
Independent Study—10-36 hours. Prerequisite(s): Medical students in good standing and competency with computers. Independent research project as part of the Medical Student Research Fellowship. (H/P/F grading only.) Effective: 2018 Summer Quarter.

PHA 092—Internship in Pharmacology (1-12)
Internship—3-36 hours. Prerequisite(s): Lower division student with good academic standing; approval of project prior to period of internship. Supervised work experience in pharmacology and related fields. (P/NP grading only.) Effective: 1997 Winter Quarter.

PHA 099—Special Study for Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. Lower division standing. (P/NP grading only.) Effective: 1997 Winter Quarter.

PHA 192—Internship in Pharmacology (1-12)
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Upper division standing; approval of project prior to period of internship. Supervised work experience in pharmacology and related fields. (P/NP grading only.) Effective: 1997 Winter Quarter.

PHA 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

PHA 199—Special Study for Advanced Undergraduates (1-5)
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

PHA 205—Problem Solving in Pharmacology (1)
Lecture/Discussion—1 hour. Restricted to Graduate Students in Pharmacology and Toxicology, Chemistry and Clinical Research Graduate Groups; other students may be accepted with consent of instructor. Students will be introduced to a current biomedical problem that would benefit from a developing drug and will develop an experimental strategy for addressing the issue. Students will develop model systems for testing various classic and recent pharmacological approaches. May be repeated up to 12 time(s) Course changes subjects every quarter; each course is unique and can be taken as often as desirable; certain students (Trainees of the Training Program in Pharmacological Sciences) must take course for at least three years. Effective: 2014 Fall Quarter.

PHA 207—Drug Discovery and Development (3)
Extensive Writing—1 hour; Lecture/Discussion—2 hours. Prerequisite(s): An equivalent course in general pharmacology, or knowledge of basic pharmacology. Intended for graduate students in Pharmacology and Toxicology, Chemistry and Clinical Research Graduate Groups; other students, including undergraduates, may be accepted with consent of instructor. Survey of the process by which a drug is discovered, developed and made available to the public. Topics include drug identification and optimization, safety testing, clinical evaluation, regulatory issues, intellectual property, formulation, and the global pharmaceutical industry. May be repeated for credit. Effective: 2010 Winter Quarter.

PHA 208—Advanced Cardiac Physiology and Pharmacology (3)
Lecture—2 hours; Lecture/Discussion—1 hour. Prerequisite(s): An equivalent course in general pharmacology or physiology (example, BIM 204), or knowledge of basic pharmacology/physiology. Open to graduate students from the Pharmacology and Toxicology, Molecular, Cellular and Integrated Physiology, Biomedical Engineering and Clinical Research Graduate Groups; other students (including undergraduates) may be accepted upon consultation with the instructors. Detailed characterization of the mechanisms involved in cardiac excitation—contraction coupling, alterations that occur in heart disease and pharmacological interventions. Topics include cardiac contractile apparatus, action potential, Ca cycling, excitation—transcription coupling, cardiac inotropy, heart failure and arrhythmias. Effective: 2013 Spring Quarter.

PHA 225—Gene and Cellular Therapies (3)
Lecture/Discussion—3 hours. Gene therapy from basic concepts to clinical applications. Topics include the human genome and genetic variation, genetic diseases, methods to manipulate gene expression, viral and non-viral delivery vectors, history and progress of gene therapy, case studies, and ethical issues. (Same course as GGG 225.) Effective: 2017 Winter Quarter.

PHA 250—Functional Genomics: From Bench to Bedside (3)
Lecture/Discussion—3 hours. Prerequisite(s): GGG 201C; MCB 214; Or equivalent. Functional genomics (how genetic variation and epigenomics affect gene expression), with an emphasis on clinical relevance and
applications. Topics include genetic variation and human disease, cancer therapeutics, and biomarker discovery. (Same course as GGG 250.) Effective: 2015 Spring Quarter.

**PHA 291—Pharmacology Research Seminar Series (1)**
Discussion—1 hour; Seminar—1 hour. Prerequisite(s): Consent of Instructor. Upper division or graduate standing. Research seminars on current topics in Pharmacology. May be repeated for credit when topic differs. (S/U grading only.) Effective: 2007 Fall Quarter.

**PHA 298—Group Study (1-5)**
Variable. Prerequisite(s): Consent of Instructor. Effective: 1997 Winter Quarter.

**PHA 299—Research (1-12)**
Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

**PHA 400A—Pharmacology (2)**
Discussion/Laboratory—0.3 hours; Lecture—1 hour. Prerequisite(s): Approval by School of Medicine Committee on Student Progress. Restricted to Medical student only. Principles in pharmacology, including pharmacokinetics, drug metabolism and the actions, uses and toxicities of the major classes of drugs. (P/F grading only.) Effective: 2012 Winter Quarter.

**PHA 400B—Pharmacology (1.5)**
Discussion—0.25 hours; Lecture—1 hour. Prerequisite(s): Approval by School of Medicine Committee on Student Progress; medical students only. Treatment of respiratory and cardiovascular disease, central nervous system drugs, GI, Toxicology and chemotherapy. Specific topics include: asthma, chronic obstructive pulmonary disease, hypertension, congestive heart failure, and the treatment of arrhythmias. Pain Management, depression, psychosis, acid reflux, IBS and toxicology. (P/F grading only.) Effective: 2008 Fall Quarter.

**PHA 400C—Pharmacology (3.5)**
Discussion—0.5 hours; Lecture—2 hours. Prerequisite(s): PHA 400A; PHA 400B; Approval by School of Medicine Committee on Student Progress; medical students only. Treatment of respiratory and cardiovascular disease, central nervous system drugs, GI, Toxicology and chemotherapy. Specific topics include: asthma, chronic obstructive pulmonary disease, hypertension, congestive heart failure, and the treatment of arrhythmias. Pain Management, depression, psychosis, acid reflux, IBS and toxicology. (P/F grading only.) Effective: 2015 Fall Quarter.

**PHA 445—Introduction to Integrative Medicine (1)**
Lecture/Discussion—1 hour. Prerequisite(s): Medical student in good standing. Basic principles of alternative medical systems (e.g., traditional Chinese, Ayurvedic, Tibetan), alternative practices (e.g., chiropractic, osteopathy, naturopathy, homeopathy, herbalism, guided imagery/meditation, massage therapy), and mind/body connection are presented as introduction to integrating alternative treatments into traditional medicinal practice. (H/P/F grading only.) Effective: 2000 Winter Quarter.

**PHA 490—Seminar in Pharmacology for Medical Students (1)**
Seminar—1 hour. Prerequisite(s): Consent of Instructor. Seminar in pharmacology for medical students. (H/P/F grading only.) Effective: 1997 Winter Quarter.

**PHA 497T—Tutoring in Pharmacology (1-5)**
Tutorial—3-15 hours. Prerequisite(s): Advanced standing or consent of instructor. Assist instructor by tutoring medical students in preparation for one of the departmental courses that is a component of the required curriculum of the School of Medicine. (H/P/F grading only.) Effective: 1997 Winter Quarter.

**PHA 499—Directed Research for Medical Students (1-12)**
Laboratory—3-36 hours. Prerequisite(s): Consent of Instructor. Directed research in pharmacology for medical students. May be repeated for credit. (H/P/F grading only.) Effective: 2017 Fall Quarter.

**NEU 103—Human Clinical Neuroanatomy (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): CHA 101; or Consent of Instructor. Open to upper division students. Clinically relevant anatomy of the normal human nervous system, including external and internal anatomy of the brain, spinal cord, and cranial nerves. Blood supply to the brain and spinal cord. Functional neuroanatomy of motor, sensory, and cognitive systems. Application of neuroanatomical principles relevant to clinical problem solving for students entering health care professions. (Same course as CHA 103.) GE credit: SE. Effective: 2018 Spring Quarter.
NEU 199—Individual Special Study and Research (1-4)
Variable. Prerequisite(s): Consent of Instructor. Individual special study in neurophysiology and biomedical engineering is offered to qualified students. Studies on psychophysics, single-unit electrophysiology and instrumentation are offered in Davis. (P/NP grading only.) Effective: 1997 Winter Quarter.

NEU 298—Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. For graduate students desiring to explore particular topics in depth. Lectures and conferences may be involved. (S/U grading only.) Effective: 1997 Winter Quarter.

NEU 299—Individual Special Study and Research (1-12)
Laboratory—3-36 hours. Prerequisite(s): Consent of Instructor. Individual special study and research in Neurophysiology and Biomedical engineering is offered at both Davis and Sacramento Medical Center. (S/U grading only.) Effective: 1997 Winter Quarter.

NEU 420—Clinical Neurosciences (2)
Lecture—1.5 hours; Lecture/Discussion—1 hour. Restricted to Medical Students only. Pathophysiology underlying neurological disorders, including disorders of development, muscle, nerve, cerebral circulation, metabolism, myelin, cortical function, movement, cerebrospinal fluid, autonomic function and special senses. Anatomical basis of clinical testing, nervous system infection, neoplasia and trauma. (P/F grading only.) Effective: 2007 Summer Quarter.

NEU 440—Where Drugs Come From: How They are Discovered, Developed, Regulated, and Marketed (3-6)
Lecture. Includes the following topics: Overview of the Drug Discovery Process; Drug Regulation in the United States; Patents and Other Forms of Exclusivity; Drug Targets and Pharmacology; Identification of Lead Candidates; Preclinical Assessment; ADME Including Basic Pharmacokinetic Principles; Principles of Drug Toxicity; Principles of Drug Safety; Clinical Trials; Generic Drugs; Pharmaceutical Industry; Drug Distribution and Marketing; Dietary Supplements; Controlled Substances. (H/P/F grading only.) Effective: 2018 Winter Quarter.

NEU 450—Clinical Neurology Clerkship (3-6)
Clinical Activity—24 hours; Conference—12 hours; Independent Study—10 hours; Seminar—4 hours. Prerequisite(s): Open to all fourth year medical students and third year medical students with consent of instructor. Restricted to six students per rotation. Critical elements of neurological clinical skills (history & exam) and basic and clinical neurological concepts expected for general residency preparation. Active, didactic, experiential and independent learning to encourage maturation of general professional competencies. May be repeated for credit. (H/P/F grading only.) Effective: 2011 Winter Quarter.

NEU 452—Advanced Clinical Neurology (6)
Clinical Activity. Prerequisite(s): Consent of Instructor. Completion of four-week Neurology selective. Extension of basic Neurology clerkship. Designed for students with special interest in medical disorders of nervous system. By arrangement with department, student may serve as an acting intern. Principles of neurological differential diagnosis and therapeutics emphasized. (H/P/F grading only.) Effective: 1997 Winter Quarter.

NEU 455—Child Neurology (6)
Clinical Activity. Prerequisite(s): IMD 430; OBG 430; PED 430; and Consent of Instructor. Student exposed to children with disorders of the nervous system, both in outpatient and inpatient services. Cases presented to a member of full-time faculty who will discuss clinical findings, differential diagnosis, management and therapy. This course satisfies the fourth year neuroscience requirement. (H/P/F grading only.) Effective: 1997 Winter Quarter.

NEU 455—Child Neurology (1-12)
Clinical Activity. Prerequisite(s): IMD 430; OBG 430; PED 430; and Consent of Instructor. Exposure to children with disorders of the nervous system, both in outpatient and inpatient services. Cases presented to a member of full-time faculty who will discuss clinical findings, differential diagnosis, management and therapy. Satisfies fourth-year neuroscience requirement. (H/P/F grading only.) Effective: 2019 Spring Quarter.

NEU 460—Externship in Neurology (3-6)
Clinical Activity. Prerequisite(s): Consent of Instructor. Externship course for Neurology rotations not meeting the qualifications to be an Acting Internship. May be repeated for credit. (H/P/F grading only.) Effective: 2017 Summer Quarter.

NEU 462—Externship in Advanced Neurology (3-6)
Clinical Activity. Prerequisite(s): Consent of Instructor. Away rotation in Neurology where coursework meets the standards to be counted as an Acting Internship. (H/P/F grading only.) Effective: 2017 Summer Quarter.

NEU 493F—Issues in Geriatric Care (6)
Seminar. Four-week module teaches an approach to common problems in the elderly through history and exam,
with an emphasis on integration of underlying anatomy, physiology, and pathophysiology in common geriatric presentations. May be repeated for credit. (H/P/F grading only.) Effective: 2018 Winter Quarter.

**NEU 498NE—Group Study in Neurology (1-6)**
Variable—3-5 hours. Prerequisite(s): Medical students with consent of instructor. Directed readings and discussions with a comprehensive written examination at the end of course. (P/F grading only.) Effective: 2002 Summer Session 2.

**NEU 499—Research (1-12)**
Laboratory—2-24 hours. Prerequisite(s): Consent of Instructor. Approved for graduate degree credit. Laboratory investigation on selected topics. May be repeated for credit. (H/P/F grading only.) Effective: 2017 Fall Quarter.

**NSU 199—Special Study in Neurosurgery for Advanced Undergraduates (1-5)**
Variable. Prerequisite(s): Advanced undergraduate standing with consent of instructor. Students may participate in ongoing neurosurgical projects or may pursue and design independent projects. (P/NP grading only.) Effective: 1997 Winter Quarter.

**NSU 299—Special Study in Neurosurgery for Advanced Undergraduates (1-5)**
Variable. Prerequisite(s): Advanced undergraduate standing with consent of instructor. Students may participate in ongoing neurosurgical projects or may pursue and design independent projects. (P/NP grading only.) Effective: 1997 Winter Quarter.

**NSU 451—Neurosurgical Critical Care Clerkship (3)**
Clinical Activity. Prerequisite(s): Third- or fourth-year medical student having completed a neurosurgical clerkship or consent of instructor. Students participate in the care of neurosurgical patients in the NSICU and in the admission and surgical management of patients admitted through the Emergency Room. (H/P/F grading only.) Effective: 1997 Winter Quarter.

**NSU 455—Clinical Pediatric Neurosurgery (6)**
Clinical Activity. Prerequisite(s): NSU 460; and Consent of Instructor. Third- or fourth-year medical students. Admission and follow-up of pediatric patients. Neurological history, examination, and diagnostic procedures are emphasized. Students will participate in surgical procedures and are required to attend all pediatric neurosurgery conferences. (H/P/F grading only.) Effective: 1997 Winter Quarter.

**NSU 460—Clinical Neurosurgery (6-18)**
Clinical Activity. Prerequisite(s): Consent of Instructor. Third- and fourth-year medical students. Approved for graduate degree credit. Admission and follow-up of patients. Neurological history, examination and further diagnostic procedures emphasized. Students participate in meaningful aspects of surgical procedures and attend listed conferences, rounds, and seminars. (H/P/F grading only.) Effective: 1997 Winter Quarter.

**NSU 464—Externship (3-9)**
Clinical Activity. Prerequisite(s): Fourth-year medical student having completed a neurosurgical clerkship or consent of instructor. Clerkship in neurosurgery to be arranged at another institution with accredited residency program in neurosurgery under proper supervision. (H/P/F grading only.) Effective: 2016 Summer Quarter.

**NSU 470—Advanced Clinical Neurosurgery (6-18)**
Clinical Activity. Prerequisite(s): Consent of Instructor. Fourth-year medical student in good academic standing. Student will function as acting intern on neurosurgery service. Admission and management of patients. Neurological history, examination, diagnostic procedures, and surgical management are emphasized. Students participate in meaningful aspects of surgical procedures and attend required conferences and rounds. (H/P/F grading only.) Effective: 1997 Winter Quarter.

**NSU 480—Insights in Neurosurgery (1-3)**
Clinical Activity—3-9 hours. Prerequisite(s): Consent of Instructor. First- and second-year medical students in good academic standing. Observation of neurosurgical care in emergency room, operating room and hospital floors, including manner of treatment of a variety of chronic and acute neurological diseases. (H/P/F grading only.) Effective: 1997 Winter Quarter.

**NSU 499—Neurosurgery Research (1-18)**
Variable. Prerequisite(s): Medical student with consent of instructor. Student may participate in ongoing neurosurgical projects or may pursue and design independent projects. May be repeated for credit. (H/P/F grading only.) Effective: 2017 Fall Quarter.

**OBG 192—Shifa Clinic/student volunteer (1)**
Clinical Activity—8 hours; Conference—2 hours; Discussion—2 hours. Open to undergraduates only. Supervised
work experience in Obstetrics & Gynecology. May be repeated up to 3 time(s). (P/NP grading only.) Effective: 2003 Fall Quarter.

**OBG 194—Shifa Clinic Student Volunteer (1)**
Clinical Activity—6 hours; Conference—1 hour. Prerequisite(s): Consent of Instructor. The applications will be available for students. Selection of students will be made by selection committee of medical students coordinators and the IOR. Attend clinic every third Sunday performing duties of receptionist, intake, translation, monitor. Students attend a meeting immediately after end of clinic. There is a mandatory Monday meeting with Clinic co-directors. Students are expected to participate on various committees. May be repeated up to 3 time(s). (P/NP grading only.) Effective: 2008 Fall Quarter.

**OBG 198—Directed Group Study (1-5)**
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

**OBG 199—Special Study for Advanced Undergraduates (1-5)**
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

**OBG 220—Genetics of Reproduction (3)**

**OBG 290—Current Topics in Research (1)**
Seminar—1 hour. Prerequisite(s): Consent of Instructor. Graduate standing. Selected topics in reproductive biology. (S/U grading only.) Effective: 1997 Winter Quarter.

**OBG 298—Group Study (1-5)**
Variable. Prerequisite(s): Consent of Instructor. Graduate standing. Effective: 1997 Winter Quarter.

**OBG 299—Research (1-12)**
Variable. Prerequisite(s): Consent of Instructor. Graduate standing. (S/U grading only.) Effective: 1997 Winter Quarter.

**OBG 430—Obstetrics and Gynecology Clerkship (12)**
Clinical Activity—45 hours. Prerequisite(s): Approval by School of Medicine Committee on Student Progress. Obstetrics, gynecologic and gynecological oncology experience in the delivery room, operating room, clinics and wards at UCDMC and affiliated sites. Rounds, conferences, interactive student presentations and seminars ongoing. (H/P/F grading only.) Effective: 2001 Summer Quarter.

**OBG 430F—SJVP OBGYN Clerkship at UCSF (6-12)**
Clinical Activity—45 hours. Prerequisite(s): Approval by School of Medicine Committee on Student Progress. Obstetrics, gynecologic and gynecological oncology experience in the delivery room, operating room, clinics and wards at UCSF Fresno. Rounds, conferences, interactive student presentations and seminars ongoing. (H/P/F grading only.) Effective: 2017 Spring Quarter.

**OBG 430R—Rural PRIME OBGYN Longitudinal Clerkship (2)**
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Obstetrics and Gynecology Longitudinal Integrated Clerkship for the Rural PRIME Program. (H/P/F grading only.) Effective: 2017 Spring Quarter.

**OBG 430RA—Rural PRIME OBGYN Longitudinal Clerkship (3)**
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Obstetrics and Gynecology Longitudinal Integrated Clerkship for the Rural PRIME Program. (H/P/F grading only.) Effective: 2017 Spring Quarter.

**OBG 430RB—Rural PRIME OBGYN Longitudinal Clerkship (3)**
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Obstetrics and Gynecology Longitudinal Integrated Clerkship for the Rural PRIME Program. (H/P/F grading only.) Effective: 2017 Spring Quarter.

**OBG 430RC—Rural PRIME OBGYN Longitudinal Clerkship (3)**
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Obstetrics and Gynecology Longitudinal Integrated Clerkship for the Rural PRIME Program. (H/P/F grading only.) Effective: 2017 Spring Quarter.

**OBG 430RD—Rural PRIME OBGYN Longitudinal Clerkship (1)**
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Obstetrics and Gynecology Longitudinal Integrated Clerkship for the Rural PRIME Program. (H/P/F grading only.) Effective: 2017 Spring Quarter.

**OBG 439D—Directed Clinical Studies in OBGYN (1-12)**
Clinical Activity—40 hours. Prerequisite(s): Consent of Instructor. Individual directed studies in extended preparation
for modified curriculum or to complete a clinical rotation following a leave of absence. May be repeated for credit. (P/F grading only.) Effective: 2011 Spring Quarter.

**OBG 439R**—Directed Studies in OBGYN (1-12)
Clinical Activity—30 hours; Independent Study—10 hours. Prerequisite(s): Consent of Instructor. Individual directed studies in extended preparation for remediation of all or part of clinical rotation. Clinical studies to accommodate and satisfy remedial work as directed by the Committee on Student Progress and approved by the course IOR. May be repeated for credit. (P/F grading only.) Effective: 2011 Summer Quarter.

**OBG 460**—Away Clinical Elective in OBGYN (3-18)
Clinical Activity—30 hours; Variable—10 hours. Prerequisite(s): OBG 430; and Consent of Instructor. Or the equivalent; third- or fourth-year medical student. Active participation in inpatient and/or outpatient care. Attendance at specified conferences; student-faculty member informal conferences. May be repeated for credit. (H/P/F grading only.) Effective: 2010 Spring Quarter.

**OBG 465**—Away Acting Internship in OBGYN (3-18)
Clinical Activity—40 hours; Variable—10 hours. Prerequisite(s): OBG 430; and Consent of Instructor. Other third-year core clerkships. Work at the level of a sub intern in Inpatient and/or Outpatient settings. Students are expected to provide direct patient management. (H/P/F grading only.) Effective: 2010 Summer Quarter.

**OBG 470**—Gynecologic Oncology Acting Internship (3-18)
Clinical Activity—40 hours; Variable—10 hours. Prerequisite(s): OBG 430; and Consent of Instructor. The third-year core clerkships. Four week elective primarily involves direct inpatient management of women on the UCDMC Gyn/Onc service. Students will be acting at the level of a sub-intern and will work under the supervision of house staff, fellows, and attendings. May be repeated up to 99 unit(s). (H/P/F grading only.) Effective: 2010 Spring Quarter.

**OBG 471**—Ambulatory Gynecology and Obstetrics Elective (3-18)
Clinical Activity—35 hours. Prerequisite(s): OBG 430; and Consent of Instructor. Third- or fourth-year Medical Student. Conduct examinations, present patients and discuss treatment regimens at the following ambulatory clinics: General Obstetrics & Gynecology, New and Return Obstetrics (including Post-Partum), High-Risk Obstetrics, Pre-Operative Clinic, and other sub-specialty clinics as assigned. May be repeated for credit. (H/P/F grading only.) Effective: 2010 Summer Quarter.

**OBG 472**—Family Planning and Reproductive Health (1-6) Review all entries
Clinical Activity—30 hours; Seminar—5 hours. Prerequisite(s): OBG 430; and Consent of Instructor. Elective that will focus on the Gynecologic Subspecialty of Family Planning. Counseling and provision of contraceptive methods, experience with pelvic ultrasounds, management of spontaneous, inevitable and induced abortion and post-abortion care by both surgical and medical techniques are included. May be repeated for credit. (H/P/F grading only.) Effective: 2014 Spring Quarter.

**OBG 472**—Family Planning & Reproductive Health (1-9) Review all entries
Clinical Activity—30 hours; Seminar—5 hours. Prerequisite(s): OBG 430; and Consent of Instructor. Elective focuses on the Gynecologic Subspecialty of Family Planning. Counseling and provision of contraceptive methods, experience with pelvic ultrasounds, management of spontaneous, inevitable and induced abortion and post-abortion care by both surgical and medical techniques are included. May be repeated for credit. (H/P/F grading only.) Effective: 2019 Spring Quarter.

**OBG 475**—Labor & Delivery Acting Internship (3-18)
Clinical Activity—40 hours; Variable—10 hours. Prerequisite(s): OBG 430; and Consent of Instructor. The third-year core clerkships. Four week elective primarily involves direct inpatient management of women on the UCDMC L&D unit. Students will be acting at the level of a sub-intern and will work under the supervision of house staff, fellows, and attendings. May be repeated for credit. (H/P/F grading only.) Effective: 2010 Spring Quarter.

**OBG 480**—The Birthing Process (1)
Lecture/Discussion—1 hour. Open only to UC Davis medical students. Training to assist in the birthing process as a Doula. Topics not covered in the summer course. (S/U grading only.) Effective: 2000 Fall Quarter.

**OBG 493**—Gender Specific Medicine SSM (6)
Clinical Activity—4 hours; Laboratory—16 hours; Lecture—5 hours; Lecture/Lab—10 hours. Prerequisite(s): Consent of Instructor. Restricted to UC Davis School of Medicine students only. Special Studies Module, a four week course on the topic: Basic Science Principles Relating to Gender Specific Medicine. (Same course as CAR 493.) (H/P/F grading only.) Effective: 2007 Spring Quarter.
OOG 494—Shifa Clinic (6) Review all entries
Clinical Activity—8 hours. Prerequisite(s): Medical student in good standing. Restricted to Medical student only. Interaction with patients from multiple ethnic and cultural backgrounds under the direct supervision of a physician/preceptor. Women's health issues and primary care issues in a diversely mixed population. May be repeated up to 3 time(s). (P/F grading only.) Effective: 2008 Fall Quarter.

OOG 494—Shifa Clinic (6) Review all entries
Clinical Activity—8 hours. Prerequisite(s): Medical student in good standing. Restricted to Medical student only. Interaction with patients from multiple ethnic and cultural backgrounds under the direct supervision of a physician/preceptor. Women's health issues and primary care issues in a diversely mixed population. May be repeated up to 3 time(s). (P/F grading only.) Effective: 2018 Summer Quarter.

OOG 494—Shifa Clinic (1-12) Review all entries
Clinical Activity—8 hours. Prerequisite(s): Consent of Instructor. Medical student in good standing. Interaction with patients from multiple ethnic and cultural backgrounds under the direct supervision of a physician/preceptor. Women's health issues and primary care issues in a diversely mixed population. May be repeated for credit. (H/P/F grading only.) Effective: 2012 Summer Quarter.

OOG 494A—Shifa Clinic (1)
Clinical Activity—8 hours. Prerequisite(s): Consent of Instructor. Medical student in good standing. Interaction with patients from multiple ethnic and cultural backgrounds under the direct supervision of a physician/preceptor. Women's health issues and primary care issues in a diversely mixed population. (H/P/F grading only.) Effective: 2012 Summer Quarter.

OOG 494B—Shifa Clinic (1)
Clinical Activity—8 hours. Prerequisite(s): Consent of Instructor. Medical student in good standing. Interaction with patients from multiple ethnic and cultural backgrounds under the direct supervision of a physician/preceptor. Women's health issues and primary care issues in a diversely mixed population. (H/P/F grading only.) Effective: 2012 Summer Quarter.

OOG 494C—Shifa Clinic (1)
Clinical Activity—8 hours. Prerequisite(s): Consent of Instructor. Medical student in good standing. Interaction with patients from multiple ethnic and cultural backgrounds under the direct supervision of a physician/preceptor. Women's health issues and primary care issues in a diversely mixed population. (H/P/F grading only.) Effective: 2012 Summer Quarter.

OOG 498—Group Study (1-5)
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. Explore particular topics in-depth in Obstetrics and Gynecology. Extensive contact with and oversight by instructor. May be repeated for credit. (H/P/F grading only.) Effective: 2004 Fall Quarter.

OOG 499—Research in Obstetrics & Gynecology (2-12)
Clinical Activity; Variable. Prerequisite(s): Consent of Instructor. Fourth-year medical student. Research in Obstetrics and Gynecology arranged with instructor. May be repeated up to 8 time(s). (H/P/F grading only.) Effective: 2006 Fall Quarter.

OPT 192—Research Internship (1-12)
Internship—3-36 hours. Prerequisite(s): Upper division standing; approval of project prior to period of internship by preceptor. Supervised work experience in ophthalmology research. Research staff in Ophthalmology have programs in cell biology, electron microscopy, biochemistry, immunology and visual psychophysics. (P/NP grading only.) Effective: 1997 Winter Quarter.

OPT 199—Special Study for Advanced Undergraduates (1-4)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

OPT 299—Basic Research in Visual Science (1-12)
Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

OPT 442—Introduction to Ophthalmology (3)
Clinical Activity—40 hours. Prerequisite(s): Third- or fourth-year Medical Student with consent of instructor; consent of advisor; completion of third-year clerkships in Medicine and Surgery; consult Course Coordinator. Ocular disease diagnosis and management relevant to the clinical practice of future primary care physicians and others. (H/P/F grading only.) Effective: 2010 Summer Quarter.
OPT 465—Advanced Subspecialty Ophthalmology (3-6)
Clinical Activity—40 hours; Variable—40 hours. Prerequisite(s): IMD 430; and Consent of Instructor. Medical students in third or fourth year. Participation in disciplines of neuro-ophthalmology/pediatric ophthalmology, diseases of the cornea and external eye, glaucoma and retina. (H/P/F grading only.) Effective: 2010 Summer Quarter.

OPT 498—Group Study (1-3)
Variable. Prerequisite(s): Medical students with consent of instructor. Directed reading and discussion. (H/P/F grading only.) Effective: 1997 Winter Quarter.

OPT 499—Research in Ophthalmology (1-12)
Variable—3-36 hours. Prerequisite(s): Medical students with consent of instructor. Individual research on selected topics in optics and visual physiology, cornea and external disease. May be repeated for credit. (H/P/F grading only.) Effective: 2017 Fall Quarter.

OSU 099—Special Studies for Undergraduates (1-4)
Variable. Prerequisite(s): Consent of Instructor. Lower division standing. (P/NP grading only.) Effective: 1997 Winter Quarter.

OSU 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. Upper division standing. (P/NP grading only.) Effective: 1997 Winter Quarter.

OSU 421—The Musculoskeletal System (2.5)
Discussion—2 hours; Lecture/Discussion—4 hours. Prerequisite(s): Consent of committee on student progress. Restricted to Medical students only. Basic and clinical science of orthopaedic surgery and rheumatology. (P/NP grading only.) Effective: 2012 Summer Quarter.

OSU 428—Ambulatory and Emergency Room Orthopaedics (3-6)
Clinical Activity. Prerequisite(s): Consent of Instructor. Fourth-year medical student in good academic standing. Limited enrollment. Introduction to general orthopaedic problems and trauma and their management in an outpatient environment, including the emergency room. Student will conduct orthopaedic examinations, present patients to staff rotating through trauma, hand, pediatrics, adult and foot clinics. (H/P/F grading only.) Effective: 1997 Winter Quarter.

OSU 462—Community Preceptorship (3-6)
Clinical Activity. Prerequisite(s): Consent of Instructor. Fourth-year medical student in good academic standing; consent of instructor. Acquaints student with private practice of orthopaedics in the community setting. Opportunity to observe and assist private practitioners in office, emergency room, operating room and inpatient environment. Student must provide own transportation. (H/P/F grading only.) Effective: 1997 Winter Quarter.

OSU 464—Acting Internship (6)
Clinical Activity. Prerequisite(s): Consent of Instructor. Fourth-year medical student in good academic standing. Rotation designed to increase basic knowledge of musculoskeletal abnormalities at clinical level. Attention focused on selective case material. For those students who demonstrate proficiency, responsibility will be similar to that of intern. May be repeated for credit. (H/P/F grading only.) Effective: 1997 Winter Quarter.

OSU 465—Externship in Advanced Orthopaedics (3-6)
Clinical Activity—40 hours. Prerequisite(s): Consent of Instructor. Fourth-year medical student in good academic standing. Advanced Orthopaedic rotation done at an approved institution. Topics may include Trauma, Sports, Spine, Pediatrics, Joint and/or Foot/Ankle. Students are expected to perform at the level of an Intern. May be repeated for credit. (H/P/F grading only.) Effective: 2013 Summer Quarter.

OSU 466—Away Clerkship in Orthopaedics (3-9)
Clinical Activity—40 hours. Orthopaedic advanced clerkship at an approved institution. (H/P/F grading only.) Effective: 2019 Spring Quarter.

OSU 480—Insights in Orthopaedic Surgery (1-3)
Clinical Activity—3-9 hours. Prerequisite(s): Consent of Instructor. First- and second-year medical students in good academic standing. Exposure to aims, methods and procedures in orthopaedic surgery via attendance at grand rounds, patient care conferences, and group discussions. (H/P/F grading only.) Effective: 1997 Winter Quarter.

OSU 481—History of Medicine for Medical Students (1.5)
Lecture/Discussion—2.5 hours. Prerequisite(s): Third- or fourth-year students in the School of Medicine or second-
year students with consent of instructor. Overview of the history of medicine throughout the world to introduce medical students to landmark accomplishments and key figures in the development of health care and to provide an expanded philosophical perspective on the everchanging field of modern medicine. (H/P/F grading only.) Effective: 1997 Winter Quarter.

**OSU 499—Orthopardics Research (1-12)**
Clinical Activity. Prerequisite(s): Consent of Instructor. Third- or fourth-year medical student in good academic standing. Laboratory or clinical investigation on selected topics. May be repeated for credit. (H/P/F grading only.) Effective: 1997 Winter Quarter.

**OTO 192—Internship in Otolaryngology (1-12)**
Internship—3-36 hours. Prerequisite(s): Upper division standing; approval of project prior to period of internship by preceptor. Supervised work experience in otolaryngology and related fields. Final project report. (P/NP grading only.) Effective: 1997 Winter Quarter.

**OTO 199—Special Study in Otolaryngology for Advanced Undergraduates (1-5)**
Variable. Prerequisite(s): Advanced undergraduate with consent of instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

**OTO 290C—Research Conference in Otolaryngology (1)**
Lecture/Discussion—1 hour. Prerequisite(s): Graduate students; medical students; advanced undergraduates with consent of instructor. Presentation and discussion of faculty and student research in otolaryngology. (S/U grading only.) Effective: 1997 Winter Quarter.

**OTO 291—Principles of Speech, Hearing and Equilibrium (3)**
Lecture/Discussion—3 hours. Prerequisite(s): Graduate students; medical students; advanced undergraduates with consent of instructor. Presentations by faculty and guest lecturers on anatomy, physiology, and behaviors involved in speech production, hearing, and equilibrium. Each student will be expected to make one class presentation. Effective: 1997 Winter Quarter.

**OTO 299—Individual Study in Otolaryngology for Advanced Graduate Students (1-12)**
Variable. Prerequisite(s): Advanced graduate student with consent of instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

**OTO 403—Basic Principles of Reconstructive Surgery (1)**
Lecture. Prerequisite(s): Third- or fourth-year medical student with consent of instructor. Formal presentations covering basic principles of reconstructive surgery, including wound healing, treatment of lacerations, skin and bone grafts, flaps, Z-plasties and revision of scars. Laboratory session utilizing animal tissues. Effective: 1997 Winter Quarter.

**OTO 440—Otolaryngology Required Clerkship (3-9)**
Clinical Activity—30 hours. Prerequisite(s): Consent by Committee on Student Evaluation and Promotion. Provide fundamental knowledge of otorhinolaryngologic diagnosis and principles, develop facility with basic ENT instruments, provide an understanding of treatment for ear, nose and throat problems and provide knowledge of what patients should be referred for otorhinolaryngologic care. May be repeated for credit. (H/P/F grading only.) Effective: 2011 Summer Quarter.

**OTO 450—Fourth Year Otolaryngology Elective (6)**
Clinical Activity—35 hours; Discussion—1 hour; Film Viewing—0.25 hours; Lecture—2 hours. Prerequisite(s): Consent of Instructor. Third- or fourth-year Medical Students. Participation in Otolaryngology Clinic and operating room. Evaluation and management of common Otolaryngologic diseases. (H/P/F grading only.) Effective: 2001 Fall Quarter.

**OTO 460—Clinical Otolaryngology Elective (3-18)**
Clinical Activity. Prerequisite(s): Third- and fourth-year medical students with consent of instructor; open to graduate students. Approved for graduate degree credit. Total involvement in clinical activities of the department. (H/P/F grading only.) Effective: 1997 Winter Quarter.

**OTO 465—Away Acting Internship in Otolaryngology (3-6)**
Clinical Activity. Externship rotation for Acting Internships in Otolaryngology. May be repeated for credit. (H/P/F grading only.) Effective: 2018 Spring Quarter.

**OTO 490—Journal Seminar (1)**
Lecture/Discussion—10 hours. Prerequisite(s): Fourth-year medical students with consent of instructor; open to
graduate students. Approved for graduate degree credit. Monthly review of current otolaryngologic and related literature and recent advances. (H/P/F grading only.) Effective: 1997 Winter Quarter.

**OTO 498—Individual or Group Study (1-5)**
Laboratory—1-4 hours; Lecture/Discussion—1-2 hours. Prerequisite(s): Consent of Instructor. Introduction to basic research in Otolaryngology. Lectures, discussion and laboratory study of sensory and motor systems. (H/P/F grading only.) Effective: 1997 Winter Quarter.

**OTO 499—Research (1-12)**
Variable. Prerequisite(s): Medical students with consent of instructor; Open to graduate students. Approved for graduate degree credit. Participation in ongoing projects. May be repeated for credit. (H/P/F grading only.) Effective: 2017 Fall Quarter.

**PMD 192—Internship in Human Pathology (1-12)**
Internship—3-36 hours. Prerequisite(s): Upper division standing; approval of project prior to period of internship by preceptor. Supervised work experience in pathology and related fields. (P/NP grading only.) Effective: 1997 Winter Quarter.

**PMD 199—Special Study in Pathology for Advanced Undergraduates (1-5)**
Variable. Prerequisite(s): Consent of Instructor. Advanced undergraduates. (P/NP grading only.) Effective: 1997 Winter Quarter.

**PMD 290C—Research Group Conferences (1)**
Seminar—1 hour. Prerequisite(s): Graduate level standing. Focused around the mechanisms of function of the central nervous system under normal and pathogenic conditions. Seminars lead by various speakers from UC Davis and other Institutions, both domestic and international. May be repeated for credit. (S/U grading only.) Effective: 2017 Fall Quarter.

**PMD 296—Neurodevelopment Group Study (1-6)**
Variable—1-6 hours. Explore mechanisms that impact perinatal development of the cerebral cortex, and other cortical structures, under normal and pathological conditions. (S/U grading only.) Effective: 2017 Summer Quarter.

**PMD 298—Advanced Group Study (1-5)**
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. Group Study provides the opportunity for a faculty member to work with students in a focused manner. (S/U grading only.) Effective: 2017 Summer Quarter.

**PMD 299—Research (1-12)**
Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

**PMD 405—Brain Cutting Conference (1-4)**
Seminar—1-4 hours. Prerequisite(s): Third- and fourth year medical students or consent of instructor. Current specimens are sectioned, discussed, and clinical correlations proposed. (H/P/F grading only.) Effective: 1997 Winter Quarter.

**PMD 407—Advanced Neuropathology (3-18)**
Lecture/Discussion—40 hours. Prerequisite(s): Consent of Instructor. Third or fourth year medical student. Restricted to Medical students only. Presents an integrated introduction to mechanisms of the central and peripheral nervous system injury. Gain an understanding of pathological mechanisms underlying disease, the anatomic and molecular manifestations of pathologic processes of the CNS and PNS. (H/P/F grading only.) Effective: 2015 Fall Quarter.

**PMD 410A—General and Endocrine Pathology (2.5)**
Discussion/Laboratory—4.5 hours; Lecture—4 hours. Restricted to medical students only. Pathologic mechanisms of human disease. Concepts of general pathologic processes, i.e., cell death, inflammation and neoplasia. Endocrine pathology in the context of clinical human disease. Emphasis on integration of clinical practice with gross and histologic images emphasizing team-based learning. (P/F grading only.) Effective: 2015 Winter Quarter.

**PMD 410B—Systemic Pathology (1)**
Discussion/Laboratory—0.5 hours; Lecture—1 hour. Prerequisite(s): Approval by SOM Committee on Student progress. Restricted to Medical students only. Anatomic and clinical pathology of organ system human disease with an emphasis on integration with clinical medicine. Topics include hematopathology and neuropathology. (P/F grading only.) Effective: 2015 Winter Quarter.

**PMD 410C—Systemic Pathology (2)**
Discussion—2 hours; Lecture—1 hour. Prerequisite(s): Approval by SOM Committee on Student progress. Restricted to Medical students only. Anatomic and clinical pathology of organ system human disease with an emphasis on
integration with clinical medicine. Topics include pulmonary pathology, cardiovascular pathology, hematopathology, oncologic pathology, and nephropathology. (P/F grading only.) Effective: 2010 Spring Quarter.

**PMD 410D**—**Systemic Pathology** (2.5)
Discussion—2 hours; Lecture—1 hour. Prerequisite(s): Approval by SOM Committee on Student progress. Restricted to Medical students only. Anatomic and clinical pathology of organ system human disease with emphasis on integration with clinical medicine. Course content parallels concurrent clinical courses with integration of lectures and discussions. Topics include gastrointestinal and gynecologic pathology, hepatopathology, oncologic pathology and musculoskeletal pathology. (P/F grading only.) Effective: 2010 Spring Quarter.

**PMD 435**—**Clinical Patient Care in Pathology** (3-9)
Clinical Activity—24 hours; Independent Study—7 hours; Lecture/Discussion—4 hours. Prerequisite(s): and Consent of Instructor. Completed one of the following 3rd year clerkships: Family Medicine, Internal Medicine, Surgery, OB/GYN or Pediatrics. Four-week course is designed to give the third-year medical student an exposure to the diverse roles that pathologists have in clinical patient care. May be repeated for credit. (H/P/F grading only.) Effective: 2015 Summer Quarter.

**PMD 440**—**Surgery-Pathology-Radiology (SPR) Research Laboratory** (2)
Discussion/Laboratory—2 hours; Lecture/Discussion—1 hour. Prerequisite(s): Consent of Instructor. Provide future clinicians and scientists with basic clinical and bioengineering laboratory skills to prepare for careers in translational research (P/F grading only.) Effective: 2014 Summer Quarter.

**PMD 464**—**Anatomic Pathology** (3-6)
Clinical Activity—40 hours; Variable. Prerequisite(s): Consent of Instructor. Fourth-year Medical Students. Restricted to Medical Students only. Anatomic pathology with an emphasis on autopsy and surgical pathology with application to clinical practice. Specimen grossing, frozen sections, microscopic sign-out and conferences. Exposure to cytopathology, hematopathology, and clinical pathology is available. (H/P/F grading only.) Effective: 2010 Winter Quarter.

**PMD 465**—**Applied Clinical Laboratory Medicine** (3-6)
Variable—40 hours. Prerequisite(s): Consent of Instructor. Emphasis upon laboratory techniques, procedures, and interpretation of laboratory results. Students will be expected to participate fully and in all laboratory operations including bench techniques, laboratory management, and quality control. May be repeated for credit. (H/P/F grading only.) Effective: 2010 Winter Quarter.

**PMD 470**—**Sub-Specialty in Didactic Pathology** (3-16)
Lecture/Lab—25 hours. Prerequisite(s): Consent of Instructor. Externship provides in-depth exposure to one of a variety of sub-specialties in Pathology. May be repeated for credit. (H/P/F grading only.) Effective: 2011 Spring Quarter.

**PMD 474**—**Anatomic Pathology Acting Internship** (3-9)
Clinical Activity—40-80 hours. Prerequisite(s): Fourth-year medical student or consent of instructor. Restricted to medical students only. Anatomic Pathology AI will permit students to gain skills needed for first year Pathology Residency. Students will perform autopsies and take full responsibility for a variety of surgical pathology cases. A mix of outpatient and inpatient cases is expected. May be repeated for credit. (H/P/F grading only.) Effective: 2011 Summer Quarter.

**PMD 475**—**Anatomic Pathology Acting Internship** (3-9)
Clinical Activity—40-80 hours. Prerequisite(s): PMD 410A; PMD 410B; PMD 410C; PMD 410D; and Consent of Instructor. Or equivalent. Successful completion of third-year clinical rotations. Restricted to Medical Students only. Year four level course is designed to provide a concentrated experience in Surgical Pathology and Cytolopathology. Rotate on the surgical and cytopathology sub-specialty teams and assume responsibility for patient cases. May be repeated for credit. (H/P/F grading only.) Effective: 2015 Summer Quarter.

**PMD 493**—**Interdisciplinary Study of Gastrointestinal Cancer** (6)
Clinical Activity—12 hours; Discussion/Laboratory—20 hours; Laboratory—3 hours; Lecture—5 hours. Prerequisite(s): Consent of Instructor. In-depth study of gastrointestinal, hepatic and pancreatic cancer. Emphasis on an integration of basic science and clinical medicine. Participating departments include pathology, surgical oncology, medical oncology, gastroenterology, radiology and radiotherapy. (Same course as SUR 493D.) (H/P/F grading only.) Effective: 2012 Summer Quarter.

**PMD 497T**—**Tutoring in Pathology** (1-5)
Tutorial—3-15 hours. Prerequisite(s): Advanced standing or consent of instructor. Assist instructor by tutoring
medical students in preparation for one of the departmental courses that is a component of the required curriculum of the School of Medicine. (H/P/F grading only.) Effective: 1997 Winter Quarter.

**PMD 498—Advanced Group Study (1-5)**
Variable. Prerequisite(s): Consent of Instructor. Medical student. Group study in variety of advanced topics in general, special, experimental, or comparative pathology. (H/P/F grading only.) Effective: 1997 Winter Quarter.

**PMD 499—Research (1-18)**
Variable. Prerequisite(s): Medical student with consent of instructor. Limited enrollment. Research in experimental, molecular, comparative, and applied pathology. May be repeated for credit. (H/P/F grading only.) Effective: 2017 Fall Quarter.

**PED 199—Special Study in Pediatric Research (1-5)**
Variable. Prerequisite(s): Undergraduate student with consent of instructor based upon adequate preparation as determined by instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

**PED 299—Pediatric Research (1-12)**
Variable. Prerequisite(s): Consent of Instructor. Graduate students who are candidates for a degree in some area of biology or behavioral sciences. (S/U grading only.) Effective: 1997 Winter Quarter.

**PED 401—Preceptorship in Pediatrics (2)**
Variable. Prerequisite(s): Second-year medical student or first-year medical student with consent of instructor. Opportunity to observe and participate in primary medical care in a practicing pediatrician's office. Participation in history-taking and physical examination will be at discretion of preceptor and dependent on students experience. Evaluation by student. (H/P/F grading only.) Effective: 1997 Winter Quarter.

**PED 402—Clinical Experience in Private Practice (1-18)**
Clinical Activity. Prerequisite(s): PED 430; Third- or fourth-year medical student; consent of preceptor and Chairperson. Opportunity to participate in practice of preceptor, performing such tasks as history taking, physical examination, and patient management. (H/P/F grading only.) Effective: 1997 Winter Quarter.

**PED 405—Pediatrics Lecture Series (0.5)**
Lecture—15 hours. Prerequisite(s): Consent of Instructor. Lecture series covers major topics in pediatrics with case presentations and panels from pediatric subspecialists. Topics include, but are not limited to: cardiology, pulmonology, nephrology, gastroenterology, critical care, and primary care pediatrics. May be repeated for credit. (P/F grading only.) Effective: 2014 Fall Quarter.

**PED 415—Fetal and Neonatal Physiology (1)**
Independent Study—4 hours; Lecture/Discussion—4 hours. Prerequisite(s): Consent of Instructor. Elective is designed to combine for study a variety of aspects of the physiology, anatomy and biochemistry of the fetus and newborn with relevant clinical examples of disorders in each of the 10 topics that will be discussed. (P/F grading only.) Effective: 2014 Spring Quarter.

**PED 430—Pediatric Clerkship (12)**
Clinical Activity—45 hours. Prerequisite(s): Approval by School of Medicine Committee on Student Progress. Restricted to Medical students only. Eight week clinical clerkship providing students with the opportunity to learn fundamentals of caring for the pediatric patient by participating in nursery, ambulatory and inpatient services at UCDMC and affiliated clinical sites. Rounds, conferences, student presentations ongoing. (P/NP grading only.) Effective: 2001 Summer Quarter.

**PED 430F—SJVP Pediatric Clerkship at UCSF (12)**
Clinical Activity—45 hours. Prerequisite(s): Approval by School of Medicine Committee on Student Progress. Restricted to Medical students only. Eight-week clinical clerkship providing students with the opportunity to learn fundamentals of caring for the pediatric patient by participating in nursery, ambulatory and inpatient services at UCSF Fresno. Rounds, conferences, student presentations ongoing. (H/P/F grading only.) Effective: 2013 Fall Quarter.

**PED 430FA—SJVP Longitudinal Pediatrics Clerkship (1.5-6)**
Clinical Activity—40-60 hours. Prerequisite(s): Consent of Instructor. Longitudinal Pediatrics Clerkship runs concurrently with Internal Medicine, Family Medicine and Psychiatry for 32 weeks. Time is spent in direct patient care situations under the guidance of faculty. (H/P/F grading only.) Effective: 2017 Spring Quarter.

**PED 430FB—SJVP Longitudinal Pediatrics Clerkship (1.5-6)**
Clinical Activity—40-60 hours. Prerequisite(s): Consent of Instructor. Longitudinal Pediatrics Clerkship runs...
concurrently with Internal Medicine, Family Medicine and Psychiatry for 32 weeks. Time is spent in direct patient care situations under the guidance of faculty. (H/P/F grading only.) Effective: 2017 Spring Quarter.

**PED 430FC—SJVP Longitudinal Pediatrics Clerkship (1.5-6)**
Clinical Activity—40-60 hours. Prerequisite(s): Consent of Instructor. Longitudinal Pediatrics Clerkship runs concurrently with Internal Medicine, Family Medicine and Psychiatry for 32 weeks. Time is spent in direct patient care situations under the guidance of faculty. (H/P/F grading only.) Effective: 2017 Spring Quarter.

**PED 430FD—SJVP Longitudinal Pediatrics Clerkship (1.5-6)**
Clinical Activity—40-60 hours. Prerequisite(s): Consent of Instructor. Longitudinal Pediatrics Clerkship runs concurrently with Internal Medicine, Family Medicine and Psychiatry for 32 weeks. Time is spent in direct patient care situations under the guidance of faculty. (H/P/F grading only.) Effective: 2017 Spring Quarter.

**PED 430R—Rural PRIME Pediatrics Longitudinal Clerkship (2)**
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Pediatrics Longitudinal Integrated Clerkship for the Rural PRIME Program. (H/P/F grading only.) Effective: 2017 Spring Quarter.

**PED 430RA—Rural PRIME Pediatrics Longitudinal Clerkship (3)**
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Pediatrics Longitudinal Integrated Clerkship for the Rural PRIME Program. (H/P/F grading only.) Effective: 2017 Spring Quarter.

**PED 430RB—Rural PRIME Pediatrics Longitudinal Clerkship (3)**
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Pediatrics Longitudinal Integrated Clerkship for the Rural PRIME Program. (H/P/F grading only.) Effective: 2017 Spring Quarter.

**PED 430RC—Rural PRIME Pediatrics Longitudinal Clerkship (3)**
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Pediatrics Longitudinal Integrated Clerkship for the Rural PRIME Program. (H/P/F grading only.) Effective: 2017 Spring Quarter.

**PED 430RD—Rural PRIME Pediatrics Longitudinal Clerkship (1)**
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Pediatrics Longitudinal Integrated Clerkship for the Rural PRIME Program. (H/P/F grading only.) Effective: 2017 Spring Quarter.

**PED 430TA—TeachMS Longitudinal Pediatrics Clerkship (A) (4)**
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Longitudinal Clerkship runs concurrently with Primary Care and Psychiatry for 24 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. (H/P/F grading only.) Effective: 2016 Fall Quarter.

**PED 430TB—TeachMS Longitudinal Pediatrics Clerkship (B) (6)**
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Longitudinal clerkship runs concurrently with Primary Care and Psychiatry for 24 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. (H/P/F grading only.) Effective: 2016 Fall Quarter.

**PED 430TC—TeachMS Longitudinal Pediatrics Clerkship (C) (2)**
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Longitudinal clerkship runs concurrently with Primary Care and Psychiatry for 24 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. (H/P/F grading only.) Effective: 2016 Fall Quarter.

**PED 439D—Directed Clinical Studies in Pediatrics (1-12)**
Clinical Activity—40 hours. Prerequisite(s): Consent of Instructor. Individual directed studies in extended preparation for modified curriculum or to complete a clinical rotation following a leave of absence. May be repeated for credit. (P/F grading only.) Effective: 2011 Spring Quarter.

**PED 439R—Directed Studies in Pediatrics (1-12)**
Clinical Activity—30 hours; Independent Study—10 hours. Prerequisite(s): Consent of Instructor. Individual directed studies in extended preparation for remediation of all or part of clinical rotation. Clinical studies to accommodate and satisfy remedial work as directed by the Committee on Student Progress and approved by the course IOR. May be repeated for credit. (P/F grading only.) Effective: 2011 Summer Quarter.

**PED 460A—Acting Internship: General Inpatient Pediatric Clerkship (3-18)**
Clinical Activity. Prerequisite(s): PED 430 B or better; and Consent of Instructor. Letter of recommendation from Pediatrics faculty member. Limited enrollment. The Ward Acting Intern functions in a manner similar to that of a
pediatric intern. The Acting Intern takes admissions in the regular sequence and is expected to take night call. (H/P/F grading only.) Effective: 2016 Fall Quarter.

PED 460B—Acting Internship: Outpatient Pediatrics (3-18)
Clinical Activity. Prerequisite(s): PED 430 B or better; and Consent of Instructor. Letter of recommendation from Pediatrics faculty member. Limited enrollment. Supervised experience in pediatric care on outpatient service at UCDMC. Student functions as Acting Intern with appropriate supervision by residents and attending faculty. Limited enrollment. (H/P/F grading only.) Effective: 1997 Winter Quarter.

PED 461—Pediatric Inpatient AI in Hematology/Oncology (6)
Clinical Activity—37.5 hours; Lecture—7.5 hours. Prerequisite(s): PED 430; and Consent of Instructor. Satisfactory completed. Limited Enrollment. Inpatient and outpatient experience in diagnosis and management of oncologic and hematologic disorders in children. Laboratory experience and participation in clinical investigation may be arranged. (H/P/F grading only.) Effective: 2009 Spring Quarter.

PED 462—Elective in Pediatric Endocrinology (3-18)
Clinical Activity. Prerequisite(s): Consent of Instructor. Completion of second-year study or the equivalent. Limited enrollment. Inpatient and outpatient experience in diagnosis and management of endocrine endocrine disorders in children. Laboratory experience and participation in clinical investigation may be arranged. (H/P/F grading only.) Effective: 1997 Winter Quarter.

PED 463—Medical and Mental Health Evaluation of Children at Risk for Maltreatment (3-9)
Clinical Activity—30 hours; Discussion—4 hours. Elective for fourth-year medical students covers basic areas of knowledge needed for child abuse prevention and consultation. Rotation includes legal cases, abuse exams, child and parent interactive therapy and visits to community organizations. May be repeated for credit. (H/P/F grading only.) Effective: 2012 Spring Quarter.

PED 464—Acting Internship in Neonatology (3-12)
Clinical Activity—60 hours. Prerequisite(s): PED 430 B or better; and Consent of Instructor. Letter of recommendation from Pediatrics faculty member. Limited enrollment. Diagnostic and therapeutic aspect of the medical and surgical high-risk neonate. Student expected to take night call. May be repeated for credit. (H/P/F grading only.) Effective: 2014 Fall Quarter.

PED 465—Pediatrics Specialty Clinic Elective (3-18)
Clinical Activity. Prerequisite(s): PED 430; and Consent of Instructor. Satisfactory completed. Limited enrollment. Supervised experience in a variety of pediatric subspecialty clinics. Limited enrollment. (H/P/F grading only.) Effective: 1997 Winter Quarter.

PED 466—Elective in Pediatric Cardiology (3-18)
Clinical Activity. Prerequisite(s): PED 430; Satisfactory completed. Inpatient and outpatient experience in diagnosis and management of cardiologic disorders in children. Laboratory experience and participation in clinical investigation may be arranged. (H/P/F grading only.) Effective: 1997 Winter Quarter.

PED 467—Elective in Pulmonary Medicine (3-18)
Clinical Activity. Prerequisite(s): Pediatric clerkship. Inpatient and outpatient management of pediatric patients with pulmonary diseases. These will include but will not be limited to cystic fibrosis, asthma, and other forms of chronic pulmonary diseases as well as congenital abnormalities. (H/P/F grading only.) Effective: 1997 Winter Quarter.

PED 468—Elective in Pediatrics Nephrology (3-18)
Clinical Activity. Prerequisite(s): PED 430; and Consent of Instructor. Satisfactory completed. Limited enrollment. Inpatient and outpatient experience in diagnosis and management of renal disorders in children. Laboratory experience and participation in clinical investigation may be arranged. Limited enrollment. (H/P/F grading only.) Effective: 1997 Winter Quarter.

PED 469—Elective in Pediatric Infectious Disease (3-18)
Clinical Activity. Prerequisite(s): PED 430; and Consent of Instructor. Satisfactory completed. Limited enrollment. Inpatient and outpatient experience in diagnosis and treatment of infectious disease of infants and children. Laboratory and clinical investigation may be arranged. Limited enrollment. (H/P/F grading only.) Effective: 1997 Winter Quarter.

PED 470—Elective in Pediatric Neurology (3-18)
Clinical Activity. Prerequisite(s): PED 430; IMD 430; OBG 430; and Consent of Instructor. All courses satisfactory completed. Limited enrollment. Inpatient and outpatient experience in diagnosis and management of neurological disorders in children. Students will also participate in other pediatric subspecialty clinics which serve children with
neurological disorders. This course does not satisfy the fourth year neurology requirement. Limited enrollment. (H/P/F grading only.) Effective: 1997 Winter Quarter.

PED 471—Elective in Pediatric Gastroenterology (3-18)
Clinical Activity. Prerequisite(s): PED 430; and Consent of Instructor. Satisfactory completed. Limited enrollment. Inpatient and outpatient experience in diagnosis and management of gastroenterology disorders in children. Laboratory experience and participation in clinical investigation may be arranged. Limited enrollment. (H/P/F grading only.) Effective: 1997 Winter Quarter.

PED 472—Clinical Rotation in Adolescent Medicine (3-9)
Clinical Activity—39 hours; Lecture—1 hour. Prerequisite(s): Consent of Instructor. Fourth-year Medical Student. Under supervision, students will see patients in the UCD clinic and at a number of community-based sites. Emphasis on the socially-mediated problems that face adolescents, including substance abuse, STD’s, pregnancy, depression and suicide. One hour of lecture each week. (H/P/F grading only.) Effective: 2011 Summer Quarter.

PED 473—Away Acting Internship in Pediatrics (6-18)
Clinical Activity—40 hours; Lecture—6 hours; Variable. Prerequisite(s): Consent of Instructor. Satisfactory completion of Pediatrics Clerkship. Work at the level of a sub intern in Inpatient and/or Outpatient settings. Expectation is to provide direct patient management. (H/P/F grading only.) Effective: 2016 Fall Quarter.

PED 476—Acting Internship in Pediatric Intensive Care (3-18)
Clinical Activity. Prerequisite(s): PED 430 A is required; or Consent of Instructor. Letter of recommendation from Pediatrics faculty member. Limited enrollment. Evaluation and support of critically ill infants and children. In general, student expected to take night call every third night during rotation. May be repeated for credit. (H/P/F grading only.) Effective: 2016 Fall Quarter.

PED 493—Ethical, Legal and Social Issues in Clinical Genetics (6)
Auto Tutorial—8 hours; Clinical Activity—18 hours; Independent Study—2 hours; Seminar—12 hours. Prerequisite(s): Consent of Instructor. Restricted to UC Davis School of Medicine students only. Develop advanced knowledge, communication skills and attitudes necessary to provide compassionate, knowledgeable, and expert care to patients who may be at increased genetic risk for disease. Seminars cover ethical and legal principles, epidemiology, and genetics. (H/P/F grading only.) Effective: 2010 Summer Quarter.

PED 493B—Living with Intellectual & Developmental Disability in the Community (1-6)
Clinical Activity—8 hours; Fieldwork—4 hours; Lecture—10 hours; Seminar—4 hours. Prerequisite(s): Consent of Instructor. In-depth experience with Intellectual & Developmental Disability across the lifespan. (H/P/F grading only.) Effective: 2012 Summer Quarter.

PED 493C—Fetal and Neonatal Physiology SSM (6)
Clinical Activity—8 hours; Lecture/Discussion—24 hours. Prerequisite(s): Consent of Instructor. Elective is available for students interested in exploring the fascinating world of the fetus and neonate. The elective is designed to combine the basic sciences with relevant clinical examples of disorders. (H/P/F grading only.) Effective: 2014 Fall Quarter.

PED 498—Directed Group Study (1-5)
Variable—3-15 hours. Explore in-depth various topics in Pediatrics. Extensive contact with and oversight by instructor. May be repeated for credit. (H/P/F grading only.) Effective: 2004 Fall Quarter.

PED 499—Research Topics in Pediatrics (1-18)
Variable. Prerequisite(s): Student in Medical School with consent of instructor. Individual research project in pediatric subspecialty areas (cardiology, endocrinology, hematology, metabolism, newborn physiology and others) may be arranged with faculty member. Independent research by student will be emphasized and long-term projects are possible. May be repeated for credit. (H/P/F grading only.) Effective: 2017 Fall Quarter.

PMR 100—Research Approaches to Disability and Rehabilitation (2)
Lecture/Discussion—2 hours. Discussion and evaluation of research approaches to medical rehabilitation, community integration, and quality of life of disabled persons, with a focus on the progressive disabilities associated with neuromuscular diseases. Intent is to encourage interest in professions that serve the disabled community and increase awareness of rehabilitation goals. Effective: 2002 Winter Quarter.

PMR 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Advanced standing. (P/NP grading only.) Effective: 1997 Winter Quarter.
PMR 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. Advanced standing. (P/NP grading only.) Effective: 1997 Winter Quarter.

PMR 299—Research (1-12)
Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

PMR 405—Healthy Living: Leading by Example (1.5)
Clinical Activity—1 hour; Discussion—2 hours; Laboratory—4 hours; Lecture—4 hours. Prerequisite(s): Consent of Instructor. Course is to improve the physical and mental health of participating students while supplementing their medical education with specific concepts. May be repeated for credit. (P/F grading only.) Effective: 2014 Fall Quarter.

PMR 405A—Healthy Living: Leading by Example (1)
Clinical Activity—1 hour; Discussion—2 hours; Laboratory—4 hours; Lecture—4 hours. Prerequisite(s): Consent of Instructor. Improve the physical and mental health of participating students while supplementing their medical education with specific concepts. May be repeated for credit. (P/F grading only.) Effective: 2014 Fall Quarter.

PMR 405B—Healthy Living: Leading by Example (0.5)
Clinical Activity—1 hour; Discussion—2 hours; Laboratory—4 hours; Lecture—4 hours. Prerequisite(s): Consent of Instructor. Improve the physical and mental health of participating students while supplementing their medical education with specific concepts. May be repeated for credit. (P/F grading only.) Effective: 2014 Fall Quarter.

PMR 421—Introduction to Sports Medicine (1)
Clinical Activity—4 hours; Fieldwork; Lecture—1 hour. Introduction to basic concepts of Sports Medicine in Physical Medicine and Rehabilitation. Students attend afternoon clinic with Sports Medicine attending; attend lectures focusing on Sports Medicine topics. Students also eligible to cover sporting events with attending physicians where available. (P/F grading only.) Effective: 2007 Summer Quarter.

PMR 440—Rehabilitation Medicine Clerkship (3)
Clinical Activity—36 hours; Lecture/Discussion—4 hours. Prerequisite(s): IMD 430; SUR 430; and Consent of Instructor. Rehabilitation and comprehensive care of physically disabled and physical medicine management of neurologic, neuromuscular and musculoskeletal disorders. Emphasis on evaluation and conservative treatment of spinal disorders, sports injuries and neuromuscular disease. Emphasis on inpatient rehabilitation, pediatrics, spine or sports possible. (H/P/F grading only.) Effective: 2008 Winter Quarter.

PMR 461—Rehabilitation Medicine (6) Review all entries
Clinical Activity—36 hours; Lecture/Discussion—4 hours. Prerequisite(s): IMD 430; SUR 430; and Consent of Instructor. 4-week rotation designed as broad overview of PM&R practice for students interested in residency training in the specialty. Emphasis on evaluation and conservative treatment of spinal disorders, sports injuries, neuromuscular disease, neurological and non-operative orthopedic problems requiring rehabilitative management. May be repeated for credit. (H/P/F grading only.) Effective: 2008 Winter Quarter.

PMR 461—Rehabilitation Medicine (6) Review all entries
Clinical Activity—36 hours; Lecture/Discussion—4 hours. Prerequisite(s): IMD 430; SUR 430; and Consent of Instructor. Four-week rotation designed as broad overview of PM&R practice for students interested in residency training in the specialty. Emphasis on evaluation and conservative treatment of spinal disorders, sports injuries, neuromuscular disease, neurological and non-operative orthopedic problems requiring rehabilitative management. May be repeated for credit. (H/P/F grading only.) Effective: 2018 Fall Quarter.

PMR 462—Rehabilitation Medicine Clinical Elective (5-18)
Clinical Activity. Prerequisite(s): IMD 430; SUR 430; and Consent of Instructor. Completion of third year in Medical School. Emphasis on evaluation of patients with neurological or orthopaedic problems requiring rehabilitative techniques for their management. Introduction to management of such patients. Physical Medicine and Rehabilitation at off-campus facility must be approved by Chairperson. (H/P/F grading only.) Effective: 1997 Winter Quarter.

PMR 470—Away Acting Internship in Physical Medicine & Rehabilitation (3-6)
Clinical Activity. Prerequisite(s): Consent of Instructor. AI Externship option for PM&R rotations at other institutions. May be repeated for credit. (H/P/F grading only.) Effective: 2018 Spring Quarter.

PMR 493—Applied Musculoskeletal Anatomy: Sports & Spine SSM (6)
Clinical Activity—4 hours; Laboratory—16 hours; Lecture—5 hours; Lecture/Lab—10 hours. Prerequisite(s): Consent of Instructor. Restricted to UC Davis School of Medicine students only. This four week module will review the
anatomy and biomechanics of the musculoskeletal system as well as its associated pathology. The students will be instructed on appropriate musculoskeletal exam techniques and logical approach to the patient in the clinical setting. (H/P/F grading only.) Effective: 2008 Winter Quarter.

**PMR 498—Advanced Group Study (1-5)**
Variable. Prerequisite(s): Consent of Instructor. Study and experience for medical students in any of a number of areas in physical medicine and rehabilitation. (H/P/F grading only.) Effective: 1997 Winter Quarter.

**PMR 499—Research for Medical Students (1-12)**
Variable. Prerequisite(s): Consent of Instructor. Research on any of a variety of topics in physical medicine and rehabilitation. May be repeated for credit. (H/P/F grading only.) Effective: 2017 Fall Quarter.

**PSU 460—Clinical Plastic Surgery Elective (1-18)**
Clinical Activity. Prerequisite(s): SUR 430; and Consent of Instructor. Third- or fourth-year medical students. Total involvement in patient care involving surgical preparation, treatment, operative care, and follow-up. Developing and understanding reconstruction and aesthetic plastic surgery. Microvascular surgery included. Student rotation. (H/P/F grading only.) Effective: 1997 Winter Quarter.

**PSY 092—Willow Clinic (1-2)**
Clinical Activity—2-6 hours; Seminar—1-2 hours; Variable. Open to lower division undergraduate students. Student run clinic for undergraduate students interested in learning about and meeting the unique health care needs for the homeless population. May be repeated for credit. (P/NP grading only.) Effective: 2009 Fall Quarter.

**PSY 192—Willow Clinic (1-2)**
Clinical Activity—2-6 hours; Lecture—1-2 hours; Seminar—1-2 hours. Prerequisite(s): Consent of Instructor. UC Davis enrollment; upper division standing. Student run clinic for upper division students interested in learning about and meeting the unique health care needs for the homeless population. May be repeated for credit. (P/NP grading only.) Effective: 2009 Winter Quarter.

**PSY 198—Directed Group Study (1-5)**
Variable. Prerequisite(s): Consent of Instructor. Advanced standing. (P/NP grading only.) Effective: 1997 Winter Quarter.

**PSY 199—Special Study for Advanced Undergraduates (1-5)**
Variable. Prerequisite(s): Consent of Instructor. Advanced standing. (P/NP grading only.) Effective: 1997 Winter Quarter.

**PSY 298—Directed Group Study for Graduate Students (1-5)**
Variable. Prerequisite(s): Consent of Instructor. Graduate standing. Effective: 1997 Winter Quarter.

**PSY 299—Special Study for Graduate Students (1-12)**
Variable. Prerequisite(s): Consent of Instructor. Graduate standing. (S/U grading only.) Effective: 1997 Winter Quarter.

**PSY 403—Fundamentals of Clinical Psychiatry (3)**
Clinical Activity—1 hour; Lecture—3 hours. Prerequisite(s): Approval of SOM Committee on Student Progress. Restricted to medical student only. Psychiatric interviewing, Mental Status Exam and diagnosis. Major child and adult disorders, including substance abuse and dependence. Weekly student interviews of psychiatric patients in small group format. (P/F grading only.) Effective: 2008 Winter Quarter.

**PSY 410—Klingenstein Summer Elective (2.5)**
Clinical Activity—20 hours. Prerequisite(s): Consent of Instructor. During this "mini-clerkship," fellows will attend clinics, in-patient settings, and clinicians' offices. They will meet weekly to present cases and review current literature, and will complete a summary narrative at the end of their experience. (P/F grading only.) Effective: 2015 Spring Quarter.

**PSY 410L—Klingenstein Longitudinal Elective (2)**
Clinical Activity—5 hours; Discussion—2 hours; Discussion/Laboratory—10 hours. Prerequisite(s): Consent of Instructor. Year-long mentoring program provides clinical exposure to child and adolescent psychiatric healthcare during a medical student's pre-clinical years. (P/F grading only.) Effective: 2015 Fall Quarter.

**PSY 412—Psychiatry Grand Rounds (1)**
Lecture—1 hour. Prerequisite(s): Medical students or staff or other qualified mental health professionals with consent of instructor. Weekly conference at UCDMC for presentation of selected clinical cases, presentation of lecture and research reports. (H/P/F grading only.) Effective: 1997 Winter Quarter.
PSY 413—Outpatient Psychiatry Clerkship (6)
Clinical Activity—36 hours; Conference—2 hours; Lecture—2 hours. Prerequisite(s): PSY 430; And/or consent of coordinator. Experience in clinical management/treatment of adult outpatients with psychiatric and substance abuse disorders; crisis management/intervention, evaluation/development of diagnosis and treatment plan; emphasis on outpatient psychopharmacology/brief psychotherapy; observation of group therapy. Individual supervision by faculty/residents. (H/P/F grading only.) Effective: 2009 Winter Quarter.

PSY 414—Psychosomatic Medicine Clerkship (3-12)
Clinical Activity—32 hours; Discussion—8 hours. Prerequisite(s): Psychiatry Clerkship or consent of instructor; medical students only. A large university hospital service in which the student functions as a member of the team in evaluation, management and psychiatric liaison with other medical specialties. Intensive supervision from senior staff and psychiatric residents. May be repeated up to 2 time(s). (H/P/F grading only.) Effective: 2007 Winter Quarter.

PSY 415—Telemedicine Clinical Elective (3-9)
Clinical Activity—20 hours. Prerequisite(s): Fourth-year medical student with consent of instructor. Fourth-year medical student elective in Telemedicine focusing on psychiatric issues. Align with University, School and Center for Health and Technology mission of rural outreach and public health, particularly in primary care. May be repeated for credit. (H/P/F grading only.) Effective: 2011 Winter Quarter.

PSY 416—Child Psychiatry Clerkship (6)
Clinical Activity—36 hours; Conference—2 hours; Lecture/Discussion—2 hours. Prerequisite(s): PSY 430; And/or consent of coordinator. Didactic and clinical inpatient, outpatient, and consultation-liaison experiences with children, adolescents and families. Clinical observations, diagnostic assessment, and treatment will be undertaken with close supervision. Literature review and case conferences presented on a regular basis. (H/P/F grading only.) Effective: 2009 Winter Quarter.

PSY 417—Jail Psychiatric Clerkship (6)
Clinical Activity—28 hours; Conference—8 hours; Lecture—4 hours. Prerequisite(s): PSY 430; And/or consent of course coordinator. Students gain experience, under close faculty supervision, assessing acute and chronic mentally ill inmates in both inpatient and clinic settings. (H/P/F grading only,) Effective: 2009 Winter Quarter.

PSY 418—Off-Campus Clinical Experience (3-9)
Clinical Activity—20-40 hours. Prerequisite(s): Consent of Instructor. Fourth-year medical students. Clinical or research elective in off-campus medical school or mental health setting. To be arranged with advance approval of instructor and individual in charge of off-campus setting. May be repeated for credit. (H/P/F grading only,) Effective: 2012 Winter Quarter.

PSY 419—Combined Family Medicine-Psychiatry Clerkship (3-6)
Clinical Activity—32 hours; Discussion—8 hours. Students rotate through the county Primary Care Clinic under the supervision of dual-boarded Psychiatry and Family Practice Faculty to provide medical care of indigent and uninsured patients as well as primary care for psychiatry patients. May be repeated for credit. (H/P/F grading only,) Effective: 2018 Winter Quarter.

PSY 420—Acting Internship in Psychiatry (3-6)
Clinical Activity—40 hours. Prerequisite(s): PSY 430; And/or consent of course coordinator. Acting intern position with close faculty supervision with emphasis on biological psychiatry, psychopharmacology and psychodynamic aspects appropriate to diagnostic and long-term patient management. (H/P/F grading only,) Effective: 2016 Summer Quarter.

PSY 421—Combined Internal Medicine-Psychiatry Clerkship (3-6)
Clinical Activity—32 hours; Discussion—8 hours. Prerequisite(s): Psychiatry Clerkship or consent of instructor; medical students only. Students rotate through the county Primary Care Clinic under the supervision of dual-boarded Psychiatry and Internal Medicine Faculty to provide medical care of indigent and uninsured patients as well as primary care for psychiatry patients. May be repeated for credit. (H/P/F grading only,) Effective: 2016 Summer Quarter.

PSY 422—Readings in Psychiatry (1-3)
Discussion. Independent reading of a selected topic in psychiatry. Supervision and discussion with a psychiatry faculty member. (H/P/F grading only,) Effective: 1997 Winter Quarter.

PSY 423—Willow Clinic (3-12)
Variable—4-10 hours. Prerequisite(s): Open to medical students in all four years of medical school. Student run clinic
for medical students interested in learning about and meeting the unique health care needs for the homeless population. May be repeated for credit. (P/F grading only.) Effective: 2009 Spring Quarter.

**PSY 424—Functional Genomics (2)**
Discussion—1 hour; Lecture—1 hour. Prerequisite(s): Graduate standing or consent of instructor. The theory, methods and principles of functional neurogenomics with emphasis on the relationship to molecular mechanisms involved in development and disease of the nervous system. (H/P/F grading only.) Effective: 2010 Winter Quarter.

**PSY 430—Psychiatry Clinical Clerkship (12)**
Clinical Activity—45 hours. Prerequisite(s): Approval by School of Medicine Committee on Student Progress. Assigned to clinical settings, students build upon the skills gained in preclinical years; emphasis on diagnostic, therapeutic and interpersonal skills. Areas of focus - patient management, interviewing skills, mental status exam, differential diagnosis, basic psychopharmacology, crisis assessment, intervention and case (H/P/F grading only.) Effective: 2001 Summer Quarter.

**PSY 430FA—SJVP Longitudinal Psychiatry Clerkship (1.5-6)**
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Approval by School of Medicine Committee on Student Progress. Longitudinal Clerkship runs concurrently with Family Medicine, Pediatrics and Internal Medicine for 32 weeks. Time is spent in direct patient care situations under the guidance of faculty. (H/P/F grading only.) Effective: 2017 Spring Quarter.

**PSY 430FB—SJVP Longitudinal Psychiatry Clerkship (1.5-6)**
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Approval by School of Medicine Committee on Student Progress. Longitudinal Clerkship runs concurrently with Family Medicine, Pediatrics and Internal Medicine for 32 weeks. Time is spent in direct patient care situations under the guidance of faculty. (H/P/F grading only.) Effective: 2017 Spring Quarter.

**PSY 430FC—SJVP Longitudinal Psychiatry Clerkship (1.5-6)**
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Approval by School of Medicine Committee on Student Progress. Longitudinal Clerkship runs concurrently with Family Medicine, Pediatrics and Internal Medicine for 32 weeks. Time is spent in direct patient care situations under the guidance of faculty. (H/P/F grading only.) Effective: 2017 Spring Quarter.

**PSY 430FD—SJVP Longitudinal Psychiatry Clerkship (1.5-6)**
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Approval by School of Medicine Committee on Student Progress. Longitudinal Clerkship runs concurrently with Family Medicine, Pediatrics and Internal Medicine for 32 weeks. Time is spent in direct patient care situations under the guidance of faculty. (H/P/F grading only.) Effective: 2017 Spring Quarter.

**PSY 430R—Rural PRIME Psychiatry Longitudinal Clerkship (2)**
Clinical Activity—45 hours. Psychiatry Longitudinal Integrated Clerkship for the Rural PRIME Program. (H/P/F grading only.) Effective: 2017 Spring Quarter.

**PSY 430RA—Rural PRIME Psychiatry Longitudinal Clerkship (3)**
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Psychiatry Longitudinal Integrated Clerkship for the Rural PRIME Program. (H/P/F grading only.) Effective: 2017 Spring Quarter.

**PSY 430RB—Rural PRIME Psychiatry Longitudinal Clerkship (3)**
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Psychiatry Longitudinal Integrated Clerkship for the Rural PRIME Program. (H/P/F grading only.) Effective: 2017 Spring Quarter.

**PSY 430RC—Rural PRIME Psychiatry Longitudinal Clerkship (3)**
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Psychiatry Longitudinal Integrated Clerkship for the Rural PRIME Program. (H/P/F grading only.) Effective: 2017 Spring Quarter.

**PSY 430RD—Rural PRIME Psychiatry Longitudinal Clerkship (1)**
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Psychiatry Longitudinal Integrated Clerkship for the Rural PRIME Program. (H/P/F grading only.) Effective: 2017 Spring Quarter.

**PSY 430TA—TeachMS Longitudinal Psychiatry Clerkship (A) (4)**
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Approval by School of Medicine Committee on Student Promotions. Longitudinal Clerkship runs concurrently with Primary Care and Medicine for 24 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only.) Effective: 2013 Fall Quarter.
PSY 430TB—TeachMS Longitudinal Psychiatry Clerkship (B) (6)
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Approval by School of Medicine Committee on Student Promotions. Longitudinal Clerkship runs concurrently with Primary Care and Medicine for 24 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only.) Effective: 2013 Fall Quarter.

PSY 430TC—TeachMS Longitudinal Psychiatry Clerkship (C) (2)
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Approval by School of Medicine Committee on Student Promotions. Longitudinal Clerkship runs concurrently with Primary Care and Medicine for 24 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only.) Effective: 2013 Fall Quarter.

PSY 439D—Directed Clinical Studies in Psychiatry (1-12)
Clinical Activity—40 hours. Prerequisite(s): Consent of Instructor. Individual directed studies in extended preparation for modified curriculum or to complete a clinical rotation following a leave of absence. May be repeated for credit. (P/F grading only.) Effective: 2011 Spring Quarter.

PSY 439R—Directed Studies in Psychiatry (1-12)
Clinical Activity—30 hours; Independent Study—10 hours. Prerequisite(s): Consent of Instructor. Individual directed studies in extended preparation for remediation of all or part of clinical rotation. Clinical studies to accommodate and satisfy remedial work as directed by the Committee on Student Progress and approved by the course IOR. May be repeated for credit. (P/F grading only.) Effective: 2011 Summer Quarter.

PSY 480—Insights in Psychiatry (1-3)
Clinical Activity—3-9 hours. Prerequisite(s): Consent of Instructor. First- or second-year medical student in good academic standing. On individual basis, student provided with an opportunity for gaining insight into various clinical activities in the practice of psychiatry. (H/P/F grading only.) Effective: 1997 Winter Quarter.

PSY 488—Acting Internship in Inpatient Psychiatry, Away Rotation (6)
Clinical Activity—40 hours. Prerequisite(s): Psychiatry Clerkship and/or consent of course coordinator. Inpatient acting internship at approved non-UCDHS affiliated training program that provides experience and preparation for ambulatory medical care. Students perform as an intern, with a smaller number of patients, greater supervision, and responsibility for the ongoing care of assigned patients. (H/P/F grading only.) Effective: 2009 Summer Quarter.

PSY 489—Acting Internship in Ambulatory Psychiatry, Away Rotation (6)
Clinical Activity—40 hours. Prerequisite(s): Psychiatry Clerkship and/or consent of course coordinator. Outpatient acting internship at an approved non-UCDHS affiliated training program that provides experience and preparation for ambulatory medical care. Students perform as an intern, with smaller number of patients, greater supervision, and responsibility for the ongoing care of assigned patients. (H/P/F grading only.) Effective: 2009 Summer Quarter.

PSY 493—Culture, Medicine and Society (6)
Clinical Activity—16 hours; Discussion—4 hours; Independent Study—8 hours; Seminar—12 hours. Prerequisite(s): Consent of Instructor. Restricted to UC Davis School of Medicine students only. Students will learn about the epidemiological significance of health disparities and barriers to access to health care. The course will cover (1) Epidemiology/Health Disparities; (2) Society and Medicine; (3) Cinemeducation; (4) Reflection/Integration. (H/P/F grading only.) Effective: 2007 Spring Quarter.

PSY 498—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Approved for graduate degree credit. Medical students desiring to explore particular topics in depth. (H/P/F grading only.) Effective: 1997 Winter Quarter.

PSY 499—Research (1-12)
Variable. Prerequisite(s): Consent of Instructor. Approved for graduate degree credit. Individual research on selected topics or research projects. May be repeated for credit. (H/P/F grading only.) Effective: 2017 Fall Quarter.

RON 199—Special Study for Advanced Undergraduates; Research in Radiation Biology (1-5)
Variable—3-15 hours. Radiation Oncology is a unique discipline combining elements of clinical practice linked to complex physics based dosimetry and treatment planning. Included within this clinical environment is a strong basis in biology that underpins the clinical effectiveness of radiation treatment. May be repeated for credit. (P/NP grading only.) Effective: 2010 Fall Quarter.

RON 211—Introduction to Radiation Oncology Physics (3-6)
Variable. Prerequisite(s): Consent of Instructor. Restricted to physics and engineering graduate students and senior undergraduate physics majors. Class size limited to three students. Introduction to radiation oncology physics.

RON 299—Independent Study and Research (1-12)
Laboratory—3-40 hours. Prerequisite(s): Enrollment with a graduate group for Ph.D. candidacy and consent of group advisor and sponsor. Research under supervision of Radiation Oncology faculty. Work must be appropriate to fulfill the requirements for the Ph.D. degree. (S/U grading only.) Effective: 2012 Fall Quarter.

RON 420—Radiobiology Lecture Course (1)
Lecture—1 hour. Prerequisite(s): BIS 001A; MAT 012; PHY 001A Radiobiology lectures are designed to engage the physician residents, physics residents and medical students in learning Radiobiology principles and concepts during the year the Radiation Physics course is taught. May be repeated up to 2 time(s). (H/P/F grading only.) Effective: 2011 Winter Quarter.

RON 463—Radiation Oncology Clerkship (3-9)
Clinical Activity—30 hours. Prerequisite(s): MDS 430; MDS 431; third-year clinical clerkship; consent of instructor required. Introduction to radiation oncology. Students will participate in workup and treatment planning for radiation oncology patients and will be introduced to the concepts involved in clinical radiation oncology, radiobiology, and radiation physics. May be repeated for credit. (H/P/F grading only.) Effective: 2012 Summer Quarter.

RON 465—Externship in Radiation Oncology (3-16)
Clinical Activity—30 hours. Prerequisite(s): Consent of Instructor. Externship provides in-depth exposure to the field of Radiation Oncology for students who rotation through an affiliated institution. May be repeated for credit. (H/P/F grading only.) Effective: 2015 Spring Quarter.

RON 499—Independent Study and Research in Therapeutic Radiology (1-18)
Variable—3-40 hours. Prerequisite(s): Consent of Instructor. Advanced-level research seminar in clinical and/or translational radiation oncology. Work with the course instructor to generate a testable hypothesis. May be repeated for credit. (H/P/F grading only.) Effective: 2014 Fall Quarter.

RDI 413—Radiological Diagnosis II (Physics of Diagnostic Radiology) (5)
Laboratory—6 hours; Lecture—49 hours. Prerequisite(s): Consent of Instructor. Physics of diagnostic imaging; x-ray production and interaction; image formation; modulation transfer function; fluoroscopy; cine fluoroscopy; stereoscopy; xeroradiography; computerized and geometrical tomography; magnetic resonance and ultrasound. Principles of radiation protection in imaging will be covered. (H/P/F grading only.) Effective: 1997 Winter Quarter.

RDI 414—Medical Radiation Biology (3)
Lecture—27 hours. Prerequisite(s): Consent of Instructor. Medical radiation biology; molecular cellular and organ system response to acute and chronic irradiation; radiation carcinogenesis and genetic effects; radiation risk assessment; diagnostic ultrasound and magnetic resonance imaging health effects. Medical/legal considerations of radiation exposure. (H/P/F grading only.) Effective: 1997 Winter Quarter.

RDI 430—Introduction to Clinical Radiology (3-6)
Variable. Prerequisite(s): Consent of Instructor. Introduces students to common radiology tests, including limitations and risks by using ACR Appropriateness Criteria and incorporate patient specific clinical data into ordering and interpreting appropriate imaging tests. (H/P/F grading only.) Effective: 2014 Fall Quarter.

RDI 461—Advanced Clinical Clerkship in Diagnostic Radiology (3-6)
Clinical Activity—35 hours; Conference—4 hours; Discussion/Laboratory—1 hour. Prerequisite(s): Consent of Instructor. Satisfactory completion of second year medical school curriculum and of third-year clerkships in Internal Medicine and General Surgery. Restricted to eight students per rotation; open to visiting medical students from accredited programs. Work with clinical Radiologists in image interpretation fluoroscopy angiography image-guided intervention cardiac stress testing radionuclide therapy. Daily conferences in Radiology Diagnosis and Therapy Health Physics Radiation Safety. Prepare two clinical cases for in-class presentation. Assigned readings. May be repeated for credit. (H/P/F grading only.) Effective: 2014 Spring Quarter.

RDI 462—Diagnostic Imaging of Acquired and Congenital Heart Disease (2)
Lecture/Discussion—5 hours. Prerequisite(s): RDI 461 (can be concurrent); Fourth-year medical student in good academic standing. Main emphasis on radiology of acquired and congenital heart disease, but also on magnetic resonance, nuclear medicine, and echocardiography of heart diseases. (H/P/F grading only.) Effective: 1997 Winter Quarter.
RDI 473—Advanced Clinical Clerkship in Neuroradiology (3-6)
Clinical Activity—35 hours; Conference—4 hours; Independent Study—1 hour; Variable—9-18 hours. Prerequisite(s): Fourth-year medical student with interest in Diagnostic Radiology, Neuroradiology, Neurology, Neurosurgery, Psychiatry, Psychology, or related field; satisfactory completion of RDI 461, or the equivalent, is strongly encouraged. Restricted to one student per 2/4 week rotation. Work with Neuroradiologists in image interpretation of CT, MRI, and fluoroscopy. Opportunity to participate in assessment of Neurointerventional patients, and to observe Neurointerventional procedures. Daily conferences in Neuroimaging, General Radiology, Health Physics, and Radiology Safety. Assigned readings. May be repeated for credit. Credit limited to 3 units for 2 weeks; 6 units for 4 weeks. (H/P/F grading only.) Effective: 2014 Spring Quarter.

RDI 474—Advanced Clinical Clerkship in Pediatric Radiology (3-6)
Clinical Activity—30 hours; Conference—5 hours; Film Viewing—3 hours; Independent Study—2 hours. Prerequisite(s): Fourth-year medical students with interest in Radiology and/or Pediatrics; interested third-year medical students who have successfully completed Pediatrics clinical clerkships may enroll, given availability and consent of the instructor of record; prior completion of PDI 461, or the equivalent, encouraged. Restricted to two students per two-week or four-week rotation. Participation in the radiological care of Pediatric patients; evaluate the patient receiving the radiographic study, including pertinent historical/physical findings. Student expected to write up case files on interesting cases encountered during their rotation. May be repeated for credit. Credit limited to 3 units for 2 weeks; 6 units for 4 weeks. (H/P/F grading only.) Effective: 2014 Spring Quarter.

RDI 475—Advanced Clinical Clerkship in Musculoskeletal Radiology (MSK) (3-6)
Clinical Activity—35 hours; Conference—4 hours; Discussion/Laboratory—1 hour; Variable—9-18 hours. Prerequisite(s): Fourth-year medical student with interest in Musculoskeletal Radiology, Orthopedic Surgery, Sports Medicine, PMNR, or related field; satisfactory completion of RDI 461, or the equivalent, is strongly encouraged. Restricted to one student per 2/4 week rotation. Work with Musculoskeletal Radiologists in interpretation of CT, MRI, radiography, and fluoroscopy. Opportunity to assess patients for, and to observe image-guided procedures. Daily conferences in Musculoskeletal Imaging, General Radiology, Health Physics, and Radiology Safety. Assigned readings. May be repeated for credit. Credit limited to 3 units for 2 weeks; 6 units for 4 weeks. (H/P/F grading only.) Effective: 2014 Spring Quarter.

RDI 476—Advanced Clinical Clerkship Vascular/Interventional Radiology (IR) (3-6)
Clinical Activity—35 hours; Conference—4 hours; Discussion/Laboratory—1 hour; Variable—9-18 hours. Prerequisite(s): Fourth-year medical student with interest in Diagnostic Radiology, Vascular/Interventional Radiology, Cardiovascular Imaging, Cardiology, Cardiovascular Surgery, Surgical Oncology, General Surgery, or related field; satisfactory completion of RDI 461, or the equivalent, is strongly encouraged. Restricted to one student per 2/4 week rotation. Medical student will work with Vascular/Interventional Radiologists in the evaluation of patients for interventional procedures. There will be opportunities to Daily conferences in Neuroimaging, General Radiology, Health Physics, and Radiology Safety. Assigned readings. May be repeated for credit. Credit limited to 3 units for 2 weeks; 6 units for 4 weeks. (H/P/F grading only.) Effective: 2014 Spring Quarter.

RDI 477—Advanced Clinical Clerkship in Ultrasound Radiology (3-6)
Clinical Activity—30 hours; Conference—5 hours; Film Viewing—3 hours; Variable—9-18 hours. Prerequisite(s): Fourth-year medical student with interest in Radiology, OB/GYN, or in other medical or surgical subspecialties employing ultrasound in their clinical practice; prior completion of RDI 461, or the equivalent, is encouraged. Restricted to two students per 2/4 week rotation. Participation as an active team member on a busy clinical ultrasound service. May be repeated for credit. (H/P/F grading only.) Effective: 2016 Summer Quarter.

RDI 478—Advanced Clinical Clerkship Abdominal Imaging (3-6)
Clinical Activity—35 hours; Conference—4 hours; Discussion/Laboratory—1 hour; Variable—9-18 hours. Restricted to one student per 2/4 week rotation. Work with clinical Radiologists on abdominal and pelvic CT, MR, ultrasound, digital radiography, gastrointestinal and genitourinary procedures, image-guided intervention. Offered as a 2-week rotation for third-year medical students and a 2/4-week rotation for fourth-year medical students. May be repeated for credit. Credit limited to 3 units for 2 weeks; 6 units for 4 weeks. (H/P/F grading only.) Effective: 2014 Spring Quarter.

RDI 479—Specialty Externship in Radiology (3-16)
Clinical Activity—25 hours; Discussion—10 hours. Externship provides in-depth exposure to one of a variety of subspecialties in Radiology. May be repeated for credit. (H/P/F grading only.) Effective: 2011 Winter Quarter.
RDI 480—Away Acting Internship in Radiology (3-6)
Clinical Activity—40 hours. Prerequisite(s): Consent of Instructor. Away Acting Internship rotation for Radiology and Nuclear Medicine. May be repeated for credit. (H/P/F grading only.) Effective: 2018 Spring Quarter.

RDI 498—Group Study in Diagnostic Radiology (1-12)
Variable. Prerequisite(s): Consent of Instructor. (H/P/F grading only.) Effective: 1997 Winter Quarter.

RDI 499—Research in Diagnostic Radiology (1-12)
Variable. Prerequisite(s): Consent of Instructor. Approved for graduate degree credit. May be repeated for credit. (H/P/F grading only.) Effective: 2017 Fall Quarter.

RNU 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Upper division standing. (P/NP grading only.) Effective: 1997 Winter Quarter.

RNU 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. Upper division standing. (P/NP grading only.) Effective: 1997 Winter Quarter.

RNU 299—Research: Special Study for Graduate Students (1-12)
Variable. Prerequisite(s): Consent of Instructor. Graduate standing. (S/U grading only.) Effective: 1997 Winter Quarter.

RNU 401—Biomedical Radiochemistry (3)
Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): Consent of Instructor. Open to graduate and medical students. Approved for graduate degree credit. Course is designed to combine basic nuclear physics, chemistry, and biology into a comprehensive and vigorous lecture-laboratory experience in biomedical nuclear chemistry. Subjects include choice and purification of appropriate gamma and beta radioisotopes, compounding biological pharmacodynamics and radioimmunoassay. (H/P/F grading only.) Effective: 1997 Winter Quarter.

RNU 411—Radiological Physics I (Physics of Nuclear Medicine) (5)
Laboratory—12 hours; Lecture—43 hours. Prerequisite(s): Consent of Instructor. Physics of diagnostic and therapeutic nuclear medicine, nuclear physics, radioactive decay; interaction of ionizing radiation; dosimeters; attenuation; internal and external dosimetry; health physics; radiation detection and imaging; scintillation cameras, computerized planar and tomographic imaging. Offered at UC Davis Medical Center. (H/P/F grading only.) Effective: 1997 Winter Quarter.

RNU 463—Clinical Clerkship in Nuclear Medicine (3-8)
Clinical Activity. Prerequisite(s): Consent of Instructor. Satisfactory completion of second-year medical school; RDI 461 recommended. Limited enrollment. Clerkship correlates radioisotopic methods with clinical, pathophysiological, and other diagnostic aspects of the patients care. Each patient reviewed with student by faculty member. Reading assignments, informal projects, and research techniques available. (H/P/F grading only.) Effective: 1999 Spring Quarter.

RNU 498—Group Study in Nuclear Medicine (1-12)
Variable. Prerequisite(s): Consent of Instructor. Approved for graduate degree credit. (H/P/F grading only.) Effective: 1997 Winter Quarter.

RNU 499—Research in Nuclear Medicine (1-12)
Variable. Prerequisite(s): Consent of Instructor. Research in Nuclear Medicine. May be repeated for credit. (H/P/F grading only.) Effective: 2017 Fall Quarter.

SUR 099—Cardiovascular Tissue Engineering Research (1-5)

SUR 192—Internship in General Surgery (1-12)
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Upper division standing; approval of project prior to period of internship by preceptor. Supervised work experience in general surgery and related fields. (P/NP grading only.) Effective: 1997 Winter Quarter.

SUR 199—Special Study in General Surgery for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Advanced undergraduate student with consent of instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

SUR 299—Research (1-12)
Variable. Prerequisite(s): Consent of Instructor. Graduate standing. (S/U grading only.) Effective: 1997 Winter Quarter.
SUR 430—Surgery Clerkship (12)
Clinical Activity—45 hours. Prerequisite(s): Approval by School of Medicine Committee on Student Progress. Eight-week general surgery clerkship includes GI, Burn, Oncology, Plastics, Vascular Cardiothoracic, consult, transplant and trauma. Clerkship assignments are at UCDMC. Daily core material presentations and reading assignments. Student involvement includes work-up and care of surgical patients. (H/P/F grading only.) Effective: 2001 Summer Quarter.

SUR 430F—SJVP Surgery Clerkship at UCSF (6-12)
Clinical Activity—45 hours. Prerequisite(s): Approval by School of Medicine Committee on Student Progress. General surgery clerkship includes GI, Burn, Oncology, Plastics, Vascular Cardiothoracic, consult, transplant and trauma. Clerkship assignments are at UCSF Fresno. Student involvement includes work-up and care of surgical patients. (H/P/F grading only.) Effective: 2017 Winter Quarter.

SUR 430R—Rural PRIME Surgery Longitudinal Clerkship (2)
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Surgery Longitudinal Integrated Clerkship for the Rural PRIME Program. (H/P/F grading only.) Effective: 2017 Spring Quarter.

SUR 430RA—Rural PRIME Surgery Longitudinal Clerkship (3)
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Surgery Longitudinal Integrated Clerkship for the Rural PRIME Program. (H/P/F grading only.) Effective: 2017 Spring Quarter.

SUR 430RB—Rural PRIME Surgery Longitudinal Clerkship (3)
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Surgery Longitudinal Integrated Clerkship for the Rural PRIME Program. (H/P/F grading only.) Effective: 2017 Spring Quarter.

SUR 430RC—Rural PRIME Surgery Longitudinal Clerkship (3)
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Surgery Longitudinal Integrated Clerkship for the Rural PRIME Program. (H/P/F grading only.) Effective: 2017 Spring Quarter.

SUR 430RD—Rural PRIME Surgery Longitudinal Clerkship (1)
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Surgery Longitudinal Integrated Clerkship for the Rural PRIME Program. (H/P/F grading only.) Effective: 2017 Spring Quarter.

SUR 439D—Directed Clinical Studies in Surgery (1-12)
Clinical Activity—40 hours. Prerequisite(s): Consent of Instructor. Partial completion of a Clinical Rotation. Individual directed studies in extended preparation for modified curriculum or to complete a clinical rotation following a leave of absence. May be repeated for credit. (P/F grading only.) Effective: 2011 Spring Quarter.

SUR 439R—Directed Studies in Surgery (1-12)
Clinical Activity—30 hours; Independent Study—10 hours. Prerequisite(s): Consent of Instructor. Individual directed studies in extended preparation for remediation of all or part of clinical rotation. Clinical studies to accommodate and satisfy remedial work as directed by the Committee on Student Progress and approved by the course IOR. May be repeated for credit. (P/F grading only.) Effective: 2011 Summer Quarter.

SUR 450—Surgical Skills Boot Camp (3-6)
Independent Study—30 hours; Workshop—10 hours. Prerequisite(s): Consent of Instructor. Goal of the surgical skills boot camp didactic is to enable students to demonstrate competence in basic surgical skills and theory, using analytical thinking and hands-on simulation. May be repeated for credit. (H/P/F grading only.) Effective: 2015 Spring Quarter.

SUR 461—Surgery Burn Unit Clerkship (6-18)
Clinical Activity. Prerequisite(s): SUR 430; and Consent of Instructor. Fourth-year medical student or third-year medical student. Rotation through Surgery Specialty Clinics: Vascular, GI, GU, Thoracic, Plastic, Radiotherapy. Student works up one new and two return visit patients. Presents consult to on-site faculty. Weekly review with preceptor and course director. Reading assignments to add perspective for in-depth discussions. (H/P/F grading only.) Effective: 1997 Winter Quarter.

SUR 462—Surgery Trauma Service Clerkship (6-9)
Clinical Activity. Prerequisite(s): SUR 430; and Consent of Instructor. Fourth-year medical student, or third-year medical student. Student works as an extern on one of the two general surgery Trauma teams, participating in resuscitation and management of critically injured patients. Team hours consist of 24 hours on, and 24 hours off. (H/P/F grading only.) Effective: 1997 Winter Quarter.
SUR 463—Surgery Intensive Care Unit (6-9)
Clinical Activity. Prerequisite(s): SUR 430; and Consent of Instructor. Fourth-year medical student, or third-year
time student. Student participates in direct supervision of critically ill surgical patients in a twelve-bed surgery
ICU. Each student is closely supervised. Provides in-depth experience with management of critically ill patients. (H/
P/F grading only.) Effective: 1997 Winter Quarter.

SUR 466—Clinical Plastic Surgery Elective (3-9)
Clinical Activity—50 hours. Prerequisite(s): SUR 430; and Consent of Instructor. Third- or fourth-year medical
students. Total involvement in patient care involving surgical preparation, treatment, operative care, and follow-up.
Developing and understanding reconstruction and aesthetic plastic surgery. Microvascular surgery included.
Student rotation. (H/P/F grading only.) Effective: 2014 Fall Quarter.

SUR 467—Surgical Oncology (3-9)
Clinical Activity. Prerequisite(s): SUR 430; and Consent of Instructor. Fourth-year medical student, or third-year
medical student. Students actively participate in management of patients requiring surgery for cancer, endocrine
disease and selected general surgical problems. Cases include malignant melanoma, sarcomas, gastrointestinal
cancer, head and neck pathology, and metastatic malignancies. Attending rounds daily. Four teaching conferences
weekly. (H/P/F grading only.) Effective: 1997 Winter Quarter.

SUR 468—Cardiothoracic Surgery Clerkship (6-9)
Clinical Activity. Prerequisite(s): SUR 430; and Consent of Instructor. Fourth-year medical student, or third-year
medical student. Student works as an extern on the Cardiothoracic Surgical Service, participating in perioperative
management and operations on the heart, lungs, mediastinum, and other thoracic structures. Regularly scheduled
teaching conferences are conducted. (H/P/F grading only.) Effective: 1997 Winter Quarter.

SUR 471—Gastrointestinal Surgery (3-9)
Clinical Activity. Prerequisite(s): SUR 430; IMD 430; PED 430; and Consent of Instructor. Fourth-year medical
student or third-year medical student. Student participates on the GI Surgery Service, working under the immediate
supervision of the faculty and surgical housestaff, involving the full spectrum of gastrointestinal diseases performed
by the medical student. (H/P/F grading only.) Effective: 1997 Winter Quarter.

SUR 472—Vascular Surgery (3-9)
Clinical Activity. Prerequisite(s): SUR 430; IMD 430; PED 430; and Consent of Instructor. Fourth-year medical
student or third-year medical student. Student participates on the vascular surgery service and in the management
and operations of arterial and venous system, exclusive of diseases that require cardiopulmonary bypass for
treatment. Includes patient care responsibilities with appropriate supervision. (H/P/F grading only.) Effective: 1997
Winter Quarter.

SUR 474—Colorectal Surgery (3-6)
Clinical Activity. Prerequisite(s): Consent of Instructor. Fourth-year medical student. Students actively participate in
clinic and the operating room on colon and rectal patients. This includes medical and surgical management.
Assignments involve work up and care of the surgical patients. May be repeated for credit. (H/P/F grading only.)
Effective: 2018 Spring Quarter.

SUR 475—Pediatric Surgery (6-9)
Clinical Activity—4-6 hours. Prerequisite(s): SUR 430; and Consent of Instructor. Fourth-year medical student or
third-year medical student. Care of patients with neonatal congenital surgical problems. Fluid and electrolyte
management in infants. General experience with acquired surgical diseases in children. (H/P/F grading only.)
Effective: 1998 Fall Quarter.

SUR 476—Surgical Consult Service (6-9)
Clinical Activity. Prerequisite(s): SUR 430; and Consent of Instructor. Fourth-year medical student or third-year
medical student. Students function as acting interns working in parallel with the interns on the service. They consult
on all non-trauma patients in the emergency room and on the wards and also participate in the operating room. (H/
P/F grading only.) Effective: 1998 Fall Quarter.

SUR 477—Clinically Oriented Anatomy (3)
Clinical Activity—40 hours. Prerequisite(s): Completion of three years of medical school. Restricted to fourth-year
medical student only. Anatomy of selected regions of the body using cadaver dissection, prosections and
interactive CD ROMs. Anatomical relationships relevant to common surgical procedures. Surgical and interventional
radiology procedures. (P/NP grading only.) Effective: 2002 Winter Quarter.
SUR 478—Surgical Preceptorship: Off Campus (3-18)
Clinical Activity—60 hours. Prerequisite(s): Consent of Instructor. Fourth-year medical student. Student participates in the preoperative, operative and postoperative care of surgical patients under the supervision of attending staff. (H/P/F grading only.) Effective: 2014 Fall Quarter.

SUR 480—Insights in Surgery (1-3)
Clinical Activity—3-9 hours. Prerequisite(s): Consent of Instructor. Medical student in good academic standing. Individualized activities, including ward rounds, subspecialty clinics and conferences, grand rounds, and observation of a variety of surgical procedures. (H/P/F grading only.) Effective: 1997 Winter Quarter.

SUR 481—Interactive Clinical Case Presentation (ICCP) (3)
Clinical Activity—1 hour. Prerequisite(s): Fourth-year medical students; however, course is open for third and fourth year student observers. Course taught as one session (4 hours) per month for three quarters (July to March); students who enroll can earn up to three credits and the minimum requirements will be to attend at least six sessions; students can do all nine sessions and work toward an honor; for the written part students will have to pick two of the nine case presentations and write a detailed paper with a literature review on “The Current management” of that disease-this can in fact be a manuscript submitted for publication with a faculty member as an advisor; maximum of 10-15 students in good standing. Case presentation of common clinical scenarios (i.e. chestpain/MI; fever/pneumonia; abdo pain/chlecy stites, etc.) from various discipline held in an auditorium with real patients exposure. Interactive session to review history, physical findings and case management. Students will be asked to perform H&P. (H/P/F grading only.) Effective: 2007 Summer Quarter.

SUR 493B—Critically Ill Surgical Patients SSM (6)
Clinical Activity—4 hours; Laboratory—16 hours; Lecture—5 hours; Lecture/Lab—10 hours. Prerequisite(s): Consent of Instructor. Restricted to UC Davis School of Medicine students only. Special Study Module, a four week course on the topic: Application of Basic Cardiopulmonary Physiology to Problems Encountered in Critically Ill Surgical Patients. (H/P/F grading only.) Effective: 2007 Spring Quarter.

SUR 493C—Physiological Principles in SICU SSM (6)
Clinical Activity—4 hours; Laboratory—16 hours; Lecture—5 hours; Lecture/Lab—10 hours. Prerequisite(s): Consent of Instructor. Restricted to UC Davis School of Medicine students only. Special Studies Module, A four week course on the topic: Care of the Critically Ill Surgical Patient: Use of Physiological Principles to Guide Treatment of Patients with Common Surgical Problems. (Same course as HPH 493C.) (H/P/F grading only.) Effective: 2007 Spring Quarter.

SUR 493D—Interdisciplinary Study of Gastrointestinal Cancer (6)
Clinical Activity—12 hours; Discussion/Laboratory—20 hours; Laboratory—3 hours; Lecture—5 hours. Prerequisite(s): Consent of Instructor. In-depth study of gastrointestinal, hepatic and pancreatic cancer. Emphasis on an integration of basic science and clinical medicine. Participating departments include pathology, surgical oncology, medical oncology, gastroenterology, radiology and radiotherapy. (Same course as PMD 493.) (H/P/F grading only.) Effective: 2012 Summer Quarter.

SUR 494H—Fourth-Year Surgical Honors Program (18)
Variable. Prerequisite(s): SUR 430; and Consent of Instructor. Completion of third year of medical school with superior performance on SUR 430. To provide intensive and comprehensive training in surgery to students interested in a postgraduate surgical career, that would enable them to succeed during the internship and residency training. (H/P/F grading only.) Effective: 1997 Winter Quarter.

SUR 495—Intense Introduction to Cardiac Surgery (3)
Clinical Activity—16 hours; Lecture/Discussion—4 hours. Prerequisite(s): Consent of Instructor. Restricted to medical student between first and second year. Close contact with vascular surgeon for two-week period. Includes Sunday mornings. 100% mandatory attendance. Physiology of going on and off cardiopulmonary bypass. Atherosclerotic cardiovascular disease, structural and valvular heart disease and electrical and rhythmic heart disease. May be repeated up to 1 time(s). (P/F grading only.) Effective: 2009 Spring Quarter.

SUR 498—Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Medical student. Directed reading and discussion and/or laboratory investigation on selected topics. (H/P/F grading only.) Effective: 1997 Winter Quarter.

SUR 499—Laboratory Research (1-12)
Laboratory—3-36 hours. Prerequisite(s): Consent of Instructor. Completion of second year of medical school. Laboratory research on surgically related problems. Participation in projects to include the following: burn, nutrition, oncology, transplant and others. May be repeated for credit. (H/P/F grading only.) Effective: 2017 Fall Quarter.
URO 199—Special Study for Advanced Undergraduates (1-5)
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

URO 400—Office Urology (1)
Clinical Activity—4 hours. Prerequisite(s): Fourth-year medical students with consent of instructor. Introduction to ambulatory care of urologic patients including basic therapeutic and diagnostic procedures from case material referred to private clinic. Management of urinary tract infection will be emphasized. (H/P/F grading only.) Effective: 1997 Winter Quarter.

URO 460—Urology Clinical Clerkship (5-18)
Clinical Activity—8-40 hours. Prerequisite(s): Consent of Instructor. Third-year medical student; physical diagnosis or the equivalent. Limited enrollment. Clinical experience in diagnosis and treatment of urologic disease. Student will work closely with house staff, participate in conferences and surgery, and perform initial patient evaluation on new patients. May be repeated for credit. (H/P/F grading only.) Effective: 2010 Winter Quarter.

URO 499—Research in Urology (1-12)
Variable. Prerequisite(s): Medical or veterinary medical students with consent of instructor. Research in oncology, male infertility, urodynamics, neurogenic bladder. Unique opportunity to apply recent technologies (nuclear medicine resonance, flow cytometry, recombinant DNA) in investigation, diagnosis and treatment of GU cancer, infectious disease, male infertility and development of genitourinary bioprosthetics. May be repeated for credit. (H/P/F grading only.) Effective: 2017 Winter Quarter.

SOM Courses | ANE | in Anesthesiology and Pain Medicine:

ANE 192—Internship in Anesthesiology (1-6)
Internship—3-18 hours; Project (Term Project). Prerequisite(s): Upper division standing; approval of project prior to period of internship by preceptor. Supervised work experience in anesthesia and related fields. (P/F grading only.) Effective: 1997 Winter Quarter.

ANE 199—Special Study for Advanced Undergraduates (1-5)
Variable—3-15 hours. May be repeated for credit. (P/NP grading only.) Effective: 2007 Fall Quarter.

ANE 430—Intro to Anesthesiology and Perioperative Medicine (3-6)
Clinical Activity—40 hours. Prerequisite(s): Consent of Instructor. Introduction to anesthesiology during the MS3 year, with emphasis on introduction to the field of anesthesiology and the day-to-day practice of an anesthesiologist in the perioperative setting. May be repeated for credit. (H/P/F grading only.) Effective: 2018 Fall Quarter.

ANE 435—Primary Care Multidisciplinary Pain Management (3)
Clinical Activity. Rotation will give 3rd year primary-care bound students an overview of the scope of Pain Medicine. May be repeated for credit. (H/P/F grading only.) Effective: 2016 Fall Quarter.

ANE 455—Externship in Anesthesiology (3-6)
Clinical Activity. Prerequisite(s): Consent of Instructor. Away clinical rotation in Anesthesiology or Pain Medicine. (H/P/F grading only.) Effective: 2017 Summer Quarter.

ANE 460—Anesthesiology Clinical Clerkship (3-18)
Discussion—2 hours; Practice—10 hours; Variable—30 hours. Prerequisite(s): Consent of Instructor. Medical student. In-depth exposure to anesthesia through informal lectures and mentoring by anesthesiologists. Emphasis on understanding and applying anesthetic principles in managing administration of general, regional, and specialized areas. (H/P/F grading only.) Effective: 1997 Spring Quarter.

ANE 461—Perioperative Medicine (3-12)
Clinical Activity—30 hours. Prerequisite(s): Successful completion of third-year clerkships; consent of IOR. Two week rotation provides a broad exposure to various patient care services within the Department of Anesthesiology and Pain Medicine to apply medical knowledge to safely care for patients. (H/P/F grading only.) Effective: 2011 Spring Quarter.
ANE 462—Perioperative Management of the Obstetric Patient (3-6)
Variable—2 hours. Prerequisite(s): Consent of Instructor. Perioperative Management of Obstetric Patient advanced clinical clerkship will offer the medical student the chance to understand and be able to apply the principles of basic science into major improvements in obstetric anesthesia patient care. May be repeated for credit. (H/P/F grading only.) Effective: 2018 Spring Quarter.

ANE 463—Multidisciplinary Pain Management (6)
Clinical Activity—30 hours; Lecture/Discussion—10 hours. Prerequisite(s): Senior medical student in good standing. Senior clerkship to expose students to all facets of pain management in all aspects of clinical care: outpatient and inpatient settings, acute and chronic pain, end of life issues, pediatrics, rehabilitation, etc. Daily clinics, rounds, and lectures. (H/P/F grading only.) Effective: 1999 Summer Quarter.

ANE 464—Multidisciplinary Approach to the Neurosurgical Patient (3-9)
Clinical Activity—40 hours. Prerequisite(s): Consent of Instructor. Participate in the perioperative care of patients undergoing neurosurgical procedures while under the supervision of anesthesia, neurology and neurosurgical ICU residents and attending physicians. May be repeated for credit. (H/P/F grading only.) Effective: 2017 Winter Quarter.

ANE 465—Away Acting Internship in Anesthesiology (3-18)
Clinical Activity—40 hours; Variable—3-18 hours. Prerequisite(s): Consent of Instructor. Satisfactory completion of Anesthesiology Clerkship. Work at the level of a sub intern in Inpatient and/or Outpatient settings. Expectation is to provide direct patient management. May be repeated for credit. (H/P/F grading only.) Effective: 2010 Summer Quarter.

ANE 480—Brief Introduction to Clinical Anesthesiology and Chronic Pain Management (3)
Clinical Activity—30 hours. Prerequisite(s): Second-year medical student. Daily experience in clinical anesthesiology at the preoperative screening unit, operating room, post anesthesia care unit, chronic pain management clinic with daily clinical correlation case discussions, and one-on-one interaction with faculty anesthesiologists. (H/P/F grading only.) Effective: 1997 Spring Quarter.

ANE 493A—Applied Physiology and Pharmacology (6)
Clinical Activity—4 hours; Laboratory—16 hours; Lecture—5 hours; Lecture/Lab—10 hours. Prerequisite(s): Consent of Instructor. UC Davis School of Medicine students only. Review and demonstrate the application of basic physiology and pharmacology to patient care. There will be an in-depth analysis of the physiology and pharmacology of the cardiovascular, pulmonary, nervous, renal and endocrine systems. (H/P/F grading only.) Effective: 2007 Winter Quarter.

ANE 493B—Interdisciplinary Medicine in Pain Care (6)
Clinical Activity—4 hours; Laboratory—16 hours; Lecture—5 hours; Lecture/Lab—10 hours. Prerequisite(s): Consent of Instructor. UC Davis School of Medicine students only. Integrate applied and practical neuroanatomy, physiology, pharmacology, psychology/psychiatry and social medicine in the care of patients who are receiving care for pain caused by acute or chronic medical disease or trauma. (H/P/F grading only.) Effective: 2007 Spring Quarter.

ANE 498—Individual or Group Study (1-5)
Discussion—1-5 hours; Laboratory—2-10 hours. Prerequisite(s): Interns and residents with consent of instructor. Directed reading and discussion and/or laboratory investigation on selected topics. (H/P/F grading only.) Effective: 1997 Winter Quarter.

ANE 499—Anesthesiology Research (1-18)
Laboratory—12-54 hours. Prerequisite(s): Third- or fourth-year medical students, advanced standing undergraduate and veterinary medicine students; or consent of instructor. Problems in clinical and/or laboratory research. May be repeated for credit. (H/P/F grading only.) Effective: 2018 Spring Quarter.

SOM Courses | BCM
Courses in BCM:

BCM 092—Internship in Biological Chemistry (1-12)
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Supervised work experience in biological chemistry and related fields (P/NP grading only.) Effective: 1997 Winter Quarter.

BCM 192—Internship in Biological Chemistry (1-12)
Internship—3-36 hours. Prerequisite(s): Upper division standing; approval of project prior to internship by preceptor. Supervised work experience in Biological Chemistry and related fields. (P/NP grading only.) Effective: 1997 Winter Quarter.
BCM 198—Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. For undergraduate students desiring to explore particular topics in depth. Lecture and conferences may be involved. (P/NP grading only.) Effective: 1997 Winter Quarter.

BCM 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

BCM 209—Prostaglandins/Leukotrienes and Related Lipids (2)

BCM 217—Molecular Genetics of Fungi (3)
Lecture—3 hours. Prerequisite(s): PLP 130; PLP 215X; BCP 101B; BOT 119; GGG 100; GGG 102A; Graduate standing in a biological science; MIC 215 recommended. Advanced treatment of molecular biology and genetics of filamentous fungi and yeasts, including gene structure, organization and regulation; secretion; control of reproduction; molecular evolution; transformation; and gene manipulation. (Same course as PLP 217.) Effective: 1997 Winter Quarter.

BCM 222—Mechanisms of Translational Control (2)
Discussion—1 hour; Lecture—1 hour. Prerequisite(s): BCP 201C or Consent of Instructor. Molecular mechanisms of protein synthesis and translational control in eukaryotic cells, with emphasis on mammalian cells and their viruses. An advanced graduate-level treatment of topics of current interest, with readings and discussion of primary papers from the literature. Effective: 1997 Winter Quarter.

BCM 230—Practical NMR Spectroscopy and Imaging (1)
Lecture—1 hour. Prerequisite(s): CHE 107A; CHE 107B; (PHY 009A, PHY 009B, PHY 009C; or PHY 005A, PHY 005B, PHY 005C) or consent of instructor. Basic theory, experimental methods, and instrumentation of NMR. Enables students to understand NMR spectroscopy and imaging experiments. (S/U grading only.) Effective: 1997 Winter Quarter.

BCM 231—Biological Nuclear Magnetic Resonance (3)
Lecture—3 hours. Prerequisite(s): MCB 221A; Or equivalent or consent of instructor. Principles and applications of magnetic resonance in biomedicine. Fundamental concepts and the biophysical basis for magnetic resonance applications in areas of tissue characterization/imaging, metabolic regulation, and cellular bioenergetics. (Same course as BPH 231.) Effective: 1997 Winter Quarter.

BCM 291—Seminar in Genetic Approaches to Pathogenesis of Human Disease (1)
Seminar—1 hour. Prerequisite(s): Student in Genetics Graduate Group or consent of instructor. Current genetic approaches to understanding the pathogenesis of disease and mammalian development presented and critically discussed by faculty, fellows and students. Topics include Mendelian and non-Mendelian diseases, imprinting, homologous recombination, statistical methods, genetic epidemiology and cell cycle dependent expression. (Same course as BCM 491.) (S/U grading only.) Effective: 1999 Fall Quarter.

BCM 298—Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. For graduate students desiring to explore particular topics in depth. Lectures and conferences may be involved. Effective: 1997 Winter Quarter.

BCM 299—Research (1-12)
Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

BCM 410A—Molecular Medicine (4)
Discussion—3 hours; Lecture—3 hours; Web Virtual Lecture—1 hour. Prerequisite(s): Consent of Instructor. Restricted to Medical Students only. Biochemistry of proteins and nucleic acids. Includes an introduction to cancer biology and a full discussion of carbohydrate metabolism. Molecular aspects of human disease are highlighted throughout the course. (P/F grading only.) Effective: 2015 Summer Quarter.

BCM 491—Seminar in Genetic Approaches to Pathogenesis of Human Disease (1)
Seminar—1 hour. Prerequisite(s): Student in Genetics Graduate Group or consent of instructor. Current genetic approaches to understanding the pathogenesis of disease and mammalian development presented and critically discussed by faculty, fellows and students. Topics include Mendelian and non-Mendelian diseases, imprinting,
homologous recombination, statistical methods, genetic epidemiology and cell cycle dependent expression. (Same course as BCM 291.) (H/P/F grading only.) Effective: 1999 Fall Quarter.

**BCM 493—Medical Genomics (6)**
Clinical Activity—4 hours; Laboratory—12 hours; Lecture—4 hours. Prerequisite(s): Consent of Instructor. Four-week module will focus on the clinical methods and applications of medical genomics. Topics will include an introduction to the human genome and human genomics, genetic and epigenetic variation and the ethics of medical genomics. (H/P/F grading only.) Effective: 2012 Spring Quarter.

**BCM 497T—Tutoring in Biological Chemistry (1-5)**
Tutorial—3-15 hours. Prerequisite(s): Advanced standing or consent of instructor. Assist instructor by tutoring medical students in preparation for one of the departmental courses that is a component of the required curriculum of the School of Medicine. (H/P/F grading only.) Effective: 1997 Winter Quarter.

**BCM 498—Group Study (1-5)**
Variable. Prerequisite(s): Medical students with consent of instructor. (H/P/F grading only.) Effective: 1997 Winter Quarter.

**BCM 499—Research (1-12)**
Variable. Prerequisite(s): Medical students with consent of instructor. Research with Department of Biological Chemistry. May be repeated for credit. (H/P/F grading only.) Effective: 2017 Fall Quarter.

**SOM Courses | CHA**

**Courses in CHA:**

**CHA 101—Human Gross Anatomy (4)**
Lecture—4 hours. Prerequisite(s): BIS 002A; Concurrent enrollment in EXB 106L or CHA 101L strongly recommended. Upper division students only; Pass One open to upper division Exercise Biology or Anthropology majors only; Pass Two open to Seniors in any major; open enrollment at the start of the quarter for upper division students in any major. Detailed study of the gross anatomical structure of the human body, with emphasis on function and clinical relevance to students entering health care professions. (Same course as EXB 106.) GE credit: SE. Effective: 2010 Fall Quarter.

**CHA 101L—Human Gross Anatomy Laboratory (3)**
Laboratory—9 hours. Prerequisite(s): BIS 002A; (EXB 106 can be concurrent) or CHA 101 (can be concurrent); If EXB 106 or CHA 101 is not taken concurrently, it must have been already completed. Upper division students only; Pass One open to upper division Exercise Biology or Anthropology majors only; Pass Two open to Seniors in any major; mandatory attendance on first day of lab. Detailed study of prossected human cadavers in small group format with extensive hands-on experience. (Same course as EXB 106L.) GE credit: SE. Effective: 2010 Fall Quarter.

**CHA 102—Human Microscopic Anatomy: Structure and Function of Human Tissues and Organ Systems (4.5)**
Discussion/Laboratory—4 hours; Lecture—3 hours. Prerequisite(s): BIS 104 Limited enrollment. Course complements Gross Anatomy by extending the study of structure to the microscopic level. Shows how cells are assembled into tissues, and tissues into organs, with an emphasis on demonstrating how microscopic structure explains function. GE credit: SE. Effective: 2017 Winter Quarter.

**CHA 103—Human Clinical Neuroanatomy (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): CHA 101; or Consent of Instructor. Open to upper division students. Clinically relevant anatomy of the normal human nervous system, including external and internal anatomy of the brain, spinal cord, and cranial nerves. Blood supply to the brain and spinal cord. Functional neuroanatomy of motor, sensory, and cognitive systems. Application of neuroanatomical principles relevant to clinical problem solving for students entering health care professions. (Same course as NEU 103.) GE credit: SE. Effective: 2018 Spring Quarter.

**CHA 192—Internship in Morphology (1-12)**
Internship—3-36 hours. Prerequisite(s): Upper division standing; laboratory science experience including some chemistry; approval of project by preceptor prior to period of internship. Experience of supervised internship in research laboratories of members of the department. (P/NP grading only.) Effective: 1997 Winter Quarter.

**CHA 197T—Tutoring in Cell Biology and Human Anatomy (1-5)**
Discussion—1 hour; Laboratory—6-9 hours. Prerequisite(s): CHA 101 B or better; and Consent of Instructor. Provides
laboratory instruction in gross and microscopic human anatomy, with small groups of undergraduates under the supervision of the instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

CHA 198—Directed Group Study (1-5)
Discussion—1-10 hours. Prerequisite(s): Consent of Instructor. Directed reading, discussion, and/or laboratory experience on selected topics. (P/NP grading only.) Effective: 1997 Winter Quarter.

CHA 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

CHA 200—Graduate Human Gross Anatomy (6)
Laboratory—6 hours; Lecture—4 hours. Prerequisite(s): Consent of Instructor. Open only to full-time graduate students. Lectures on human gross anatomy and cadaver dissection laboratory. Topics arranged by region; emphasis on osteology, neuromuscular anatomy, cardiovascular anatomy, gastrointestinal anatomy and anatomy of reproductive systems. Only 2 units of credit for students who have completed CHA 101. Effective: 2008 Winter Quarter.

CHA 202—Microscopic Anatomy for Researchers (3)
Discussion/Laboratory—3 hours; Lecture—2 hours. Open to graduate students in the biomedical sciences (no consent required); advanced undergraduates seeking research careers in the biomedical sciences (consent of instructor required). The growing importance of the use of gene knock-out studies and imaging technology requires significant understanding of basic anatomy. Designed to familiarize students in diverse fields with anatomical, cellular and tissue organization of typical animal models. Effective: 2017 Spring Quarter.

CHA 203—Neurobiology (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): Consent of Instructor. Two upper division or one graduate course in Neurobiology. Physiology and anatomy of the normal human nervous system in an integrated format. Effective: 2004 Spring Quarter.

CHA 290—Seminar (1)
Seminar—1 hour. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

CHA 290C—Research Group Conference (1)
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Graduate student with research experience (may be taken concurrently). Discussion of problems, progress and literature groups relevant to current research undertaken by laboratory groups Human Anatomy. (S/U grading only.) Effective: 1997 Winter Quarter.

CHA 298—Advanced Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Effective: 1997 Winter Quarter.

CHA 299—Research (1-12)
Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

CHA 400—Developmental, Gross & Radiologic Anatomy (7.5)
Laboratory—5 hours; Lecture—3 hours. Prerequisite(s): Consent of Instructor. Medical students only. Integrated presentation of developmental, gross and radiologic anatomy. Embryology and radiology correlated with the dissection of the entire body. Embryology from implantation to birth. (P/F grading only.) Effective: 2011 Summer Quarter.

CHA 402—Cell and Tissue Biology (4.5)
Laboratory—4 hours; Lecture—2 hours. Prerequisite(s): Consent of Instructor. Medical student only. Microscopic structure of the basic cells, tissues and organs of the body with an emphasis on how structure explains function. Analysis and identification of sectioned material at the light microscopic and ultrastructural levels. (P/F grading only.) Effective: 2011 Summer Quarter.

CHA 403—Medical Neuroanatomy (5)
Discussion/Laboratory—1 hour; Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): CHA 400; Block 1. Restricted to medical students only. Anatomy of the normal human nervous system, to include gross external and internal morphology of brain and spinal cord, and function neuroanatomy of motor, sensory and cognitive systems. Incorporates application of neuroanatomy to clinical problem solving. (Same course as HPH 403.) (P/F grading only.) Effective: 2007 Summer Quarter.

CHA 493B—Anatomy Medical Education Special Study Module (6)
Auto Tutorial—6 hours; Clinical Activity—14 hours; Independent Study—10 hours; Seminar—10 hours. Prerequisite(s): Consent of Instructor. UC Davis School of Medicine students only. Attend all of the lectures and laboratory sessions....
for course 400 and 402 during the four-week section (approximately seven anatomy labs and three to four histology labs); tutor first-year students during the laboratory sessions; prepare and present a clinical correlate session. (H/P/F grading only.) Effective: 2007 Spring Quarter.

**CHA 497T—Tutoring in Human Anatomy (1-5)** [Review all entries]

Tutorial—3-15 hours. Prerequisite(s): Advanced standing or consent of instructor. Assist instructor by tutoring medical students in preparation for one of the departmental courses that is a component of the required curriculum for the School of Medicine. (H/P/F grading only.) Effective: 1997 Winter Quarter.

**CHA 497T—Tutoring in Human Anatomy (3-6)** [Review all entries]

Tutorial—3-15 hours. Prerequisite(s): Advanced standing or consent of instructor. Assist instructor by tutoring medical students in preparation for one of the departmental courses that is a component of the required curriculum for the School of Medicine. May be repeated for credit. (H/P/F grading only.) Effective: 2018 Fall Quarter.

**CHA 498—Advanced Group Study (1-12)**

Variable. Prerequisite(s): Medical students, interns, and residents with consent of instructor. Directed reading and group discussions and/or laboratory experience on selected topics. (H/P/F grading only.) Effective: 1997 Winter Quarter.

**CHA 499—Research (1-12)**

Variable. Prerequisite(s): Consent of Instructor. (H/P/F grading only.) Effective: 1997 Winter Quarter.

### SOM Courses | CLH

#### Course in CLH:

**CLH 200—Introduction to Clinical Research (3)** [Review all entries]

Independent Study—3 hours; Lecture—2 hours. Prerequisite(s): Consent of Instructor. One of the following degrees: MD, DDS, DMD, OD, ND, DO, PharmD, DVM, PhD or DNS in nursing. Application and acceptance into the Clinical Research Graduate Group, K30 program or other SOM/CTSC training programs. Introduction to the CRGG program and overview of major clinical research topics. Overview of basic clinical skills needed to accomplish CRGG mentored research project. (S/U grading only.) Effective: 2008 Summer Special Session.

**CLH 200—Introduction to Translational Research (1)** [Review all entries]

Lecture—1 hour. Prerequisite(s): Consent of Instructor. One of the following degrees: MD, DDS, DMD, OD, ND, DO, PharmD, DVM, PhD or DNS in nursing; application and acceptance into the Clinical Research Graduate Group, K30 program or other SOM/CTSC training programs. Introduction to the CRGG program and overview of major clinical research topics. Overview of basic clinical skills needed to accomplish CRGG mentored research project. (S/U grading only.) Effective: 2018 Summer Quarter.

**CLH 201—Strategies for Grant Writing (2)**

Lecture—2 hours. Prerequisite(s): Consent of Instructor. Completed one of the following degrees: MD, DDS, DMD, OD, ND, DO, PharmD, DVM, PhD or DNS in nursing. Application and acceptance into the Clinical Research Graduate Group, K30 program or other SOM/CTSC training program. Practical skills and strategies to create successful grant proposals in NIH style/format. Generating ideas, identifying and accessing research resources, grant components, specific aims, background and significance, preliminary studies, budgets, and bios. Matriculation through UC system, and resubmissions. (Former course MDS 461CR.) (S/U grading only.) Effective: 2008 Summer Special Session.

**CLH 202—Introduction to Clinical Epidemiology and Study Design (3)** [Review all entries]

Discussion—10 hours; Lecture—25 hours. Prerequisite(s): Consent of Instructor. Completed one of the following degrees: MD, DDS, DMD, OD, ND, DO, PharmD, DVM, PhD or DNS in nursing; application and acceptance into the Clinical Research Graduate Group, K30 program or other SOM/CTSC training programs. Anatomy and physiology of conducting clinical epidemiologic research. Familiarity with three basic study designs (cross-sectional, case-control, and cohort). Discussion of principles of measurements in clinical epidemiological studies, basic methods for analyzing data, and ethical issues involved in conducting research. (S/U grading only.) Effective: 2008 Summer Special Session.

**CLH 202—Introduction to Clinical Research (3)** [Review all entries]

Discussion—1 hour; Lecture—2 hours. Prerequisite(s): Consent of Instructor. Completed one of the following degrees: MD, DDS, DMD, OD, ND, DO, PharmD, DVM, PhD or DNS in nursing; application and acceptance into the Clinical Research Graduate Group, MRCTP program, Clinical Research Certificate or other SOM/CTSC training programs. Anatomy and physiology of conducting clinical epidemiologic research. Familiarity with three basic study
designs: cross-sectional, case-control, and cohort. Discussion of principles of measurements in clinical epidemiological studies, basic methods for analyzing data, and ethical issues involved in conducting research. Effective: 2019 Winter Quarter.

**CLH 203—Methods in Clinical Research (3)**
Discussion—1 hour; Independent Study—10 hours; Lecture—4 hours. Prerequisite(s): Consent of Instructor. Completed one of the following degrees: MD, DDS, DMD, OD, ND, DO, PharmD, DVM, PhD or DNS in nursing; application and acceptance into the Clinical Research Graduate Group, K30 program or other SOM training programs. Overview of major approaches to clinical research, including health services research techniques, informatics, GCRC, and preclinical methodologies to enhance clinical projects. Overview of UCD clinical research support infrastructure. Methodologies applicable to clinical research and its multi-disciplinary perspective. (S/U grading only.) Effective: 2015 Spring Quarter.

**CLH 204—The Ethics of Research (1)**
Lecture—1 hour. Prerequisite(s): Consent of Instructor. Priority given to those with acceptance into the Clinical Research Graduate Group, K12, T32 or other SOM/CTSC training program. Acquire information about ethical responsibilities; Explore major questions in ethics; Apply ethical principles, concepts and values; Gain an appreciation of the role of trust in scientific research. Recommend three quarters of CLH204. Must enroll in Fall to continue through Spring. May be repeated up to 3 unit(s). (S/U grading only.) Effective: 2016 Fall Quarter.

**CLH 207—Team Science (1)**
Lecture/Discussion—1 hour. Prerequisite(s): Participation in CTSC Research Education and Training Programs, or consent of instructor. Restricted to 25 students. Today's scientific challenges necessitate cross-disciplinary engagement and high collaboration levels. This course offers guidance on how best to engage in team science to pursue complex questions, work effectively with team members, and produce high impact research that meets society's needs. (S/U grading only.) Effective: 2015 Winter Quarter.

**CLH 208—Introduction to Grant Writing, I (2)**
Extensive Writing; Lecture/Discussion—2 hours. First in a two-quarter series. Scholars are encouraged to enroll in both classes. The two-course sequence provides training in practical aspects of competitive grant writing. The focus is NIH, but information will apply to other funding agencies. (S/U grading only.) Effective: 2014 Fall Quarter.

**CLH 209—Introduction to Grant Writing, II (1)**
Lecture/Discussion—1 hour. Prerequisite(s): CLH 208; Consent of Instructor. Restricted to students who have completed course 208. Second in a two-quarter series. Two-course sequence provides training in practical aspects of competitive grant writing. (S/U grading only.) Effective: 2016 Fall Quarter.

**CLH 210Y—Principles and Methods of Comparative Effectiveness Research (4)**
Discussion—2 hours; Project (Term Project)—6 hours; Web Electronic Discussion; Web Virtual Lecture—4 hours. Prerequisite(s): Consent of Instructor. Familiarity with research methodology, and a course in introductory statistics. Provides an introduction to Comparative Effectiveness Research (CER) and methods for conducting CER. (S/U grading only.) Effective: 2015 Winter Quarter.

**CLH 211—Critical Assessment of the Biomedical Literature (1)**
Lecture/Discussion—1 hour. Prerequisite(s): Consent of Instructor. Exposes students to topical issues and controversies in the design of interdisciplinary translational research, with an emphasis on critical assessment of the biomedical and health sciences literature. The course extends students' knowledge of study design through practical application. May be repeated up to 3 unit(s). (S/U grading only.) Effective: 2016 Fall Quarter.

**CLH 212—Introduction to Stem Cell Biology (3)**
Lecture/Discussion—3 hours. Open to graduate students with a fundamental knowledge of cell biology. Introduction to Stem Cell Biology. Each week will focus on different aspects of stem cells, including general concepts, stem cells in lower organisms, embryonic stem cells and cellular reprogramming. Effective: 2016 Spring Quarter.

**CLH 214A—Bodesign I (2)**
Lecture—2 hours. Prerequisite(s): Consent of Instructor. Prior approval by instructor required; student must commit to taking both courses; Bodesign I and Bodesign II. Focuses on the principles of needs identification and invention of biomedical technologies. Two part course provides a basic understanding of the elements of the innovation process and how to translate these principles into biomedical device design. Effective: 2016 Fall Quarter.

**CLH 214B—Bodesign II (2)**
Lecture—2 hours. Prerequisite(s): CLH 214A; Consent of Instructor. Prior approval by instructor required; student
must commit to taking both courses; Biodesign I and Biodesign II. Focuses on the implementation of biomedical technologies and translational process. Two part course provides a basic understanding of the elements of the innovation process and how to translate these principles into biomedical device design. Effective: 2017 Winter Quarter.

**CLH 220—Basics of Stem and Progenitor Cells (1)**
Lecture—1 hour. Prerequisite(s): MCP 200L; MCP 200; Consent of Instructor; Graduate standing. This is a lecture course designed for graduate students who have experience in cell culture techniques. It is designed to give a broad overview of the field and current cells of interest to the greater research community. (S/U grading only.) Effective: 2007 Spring Quarter.

**CLH 222—Ethical Issues in Stem Cell Biology (1)**
Lecture/Discussion—1 hour. Prerequisite(s): Consent of Instructor. Graduate standing. Critical presentation and analysis of recent articles in stem cell biology and small group discussions of the ethical issues surrounding this area of research. (S/U grading only.) Effective: 2007 Winter Quarter.

**CLH 230—Congestive Heart Failure, Mechanism of Disease (3)**
Lecture/Discussion—2 hours; Project (Term Project). Prerequisite(s): Consent of Instructor. Graduate standing. Underlying mechanisms of cardiomyopathy and heart failure. Presentation of fundamental knowledge of and recent basic research on heart failure. Student team projects: investigation and presentation of a research topic and bench research project to advance research in the same area. Effective: 2008 Summer Session 1.

**CLH 231—Current Techniques in Clinical Research (2)**
Clinical Activity—3 hours; Lecture—1 hour. Prerequisite(s): CLH 250; and Consent of Instructor. Graduate standing. Current techniques used in clinical research such as electrophysiology, cardiovascular surgery, cardiac catheterization and echocardiography, team science, and patient management. Lectures are presented by experts on each technique, with an emphasis on use in translational research. (S/U grading only.) Effective: 2006 Fall Quarter.

**CLH 233—Molecular Mechanisms of Disease: Cancer (3)**
Lecture/Discussion—2 hours; Project (Term Project)–3 hours. Prerequisite(s): Consent of Instructor. Restricted to students pursuing the designated emphasis in Translational Research. Graduate standing. Cutting edge of research on underlying mechanisms of cancer development, progression and prevention—clinical trials/drug development, signaling pathways and molecular mechanisms of cancer development, recent basic research on cancer stem cells, genetics and epigenetic events and animal models used. Effective: 2013 Fall Quarter.

**CLH 240—Predoctoral Clinical Research Training Program Research Integration (1)**
Discussion—0.5 hours; Seminar—0.5 hours. Prerequisite(s): Consent of Instructor. Enrollment in the Predoctoral Clinical Research Training Program in the CTSC, School of Medicine. Alternating sessions: journal club, seminar/discussion, and research integration sessions. May be repeated up to 3 time(s). (S/U grading only.) Effective: 2007 Fall Quarter.

**CLH 244—Introduction to Medical Statistics (4)**
Lecture—4 hours. Introduction to statistical methods and software in clinical, laboratory and population medicine. Graphical and tabular presentation of data, probability, binomial, Poisson, normal, t-, F-, and Chi-square distributions, elementary nonparametric methods, simple linear regression and correlation, life tables. Only one unit of credit for students who have completed STA 100 or MPM 402. (Same course as SPH 244.) Effective: 2017 Winter Quarter.

**CLH 245—Biostatistics for Biomedical Science (4)**
Lecture—4 hours. Prerequisite(s): CLH 244 or SPH 244; Consent of Instructor. Or equivalent. Analysis of data and design of experiments for laboratory data. (Same course as SPH 245.) Effective: 2015 Spring Quarter.

**CLH 246—Biostatistics for Clinical Research (4)**
Lecture—4 hours. Prerequisite(s): CLH 245 or SPH 245 Emphasizes critical biostatistics for clinical research and targets biomedical audience. Students will develop understanding for basic planning and analysis of clinical studies and learn to develop collaborations with biostatisticians. May be repeated for credit. (Same course as SPH 246.) Effective: 2015 Winter Quarter.

**CLH 247—Statistical Analysis for Laboratory Data (4)**
Lecture—4 hours. Prerequisite(s): CLH 245 or SPH 245 Statistical methods for experimental design and analysis of laboratory data including gene expression arrays, RNA-Seq, and mass spec. (Same course as SPH 247.) Effective: 2015 Spring Quarter.
CLH 250—Integrating Medicine Into Basic Science (6)
Clinical Activity—8 hours; Discussion—6 hours; Lecture—3.75 hours; Seminar—2.5 hours. Graduate standing; acceptance into HHMI Integrating Medicine into Basic Science program. Four-week summer institute consisting of didactic lectures, reading assignments, group discussions, and clinical rotations to acculturate students to the human medical environment; integrate medical principles, physiology and pathophysiology into basic research; introduce high-impact clinical studies related to medicine and health. (S/U grading only.) Effective: 2006 Fall Quarter.

CLH 290A—Hot Topics in Clinical Research (1)
Seminar—1 hour. Prerequisite(s): Graduate standing or consent of instructor. Seminars presented by guest lecturers on subjects of their own research activities May be repeated for credit. (S/U grading only.) Effective: 2006 Fall Quarter.

CLH 290B—Hot Topics in Stem Cell Biology (1)
Seminar—1 hour. Prerequisite(s): Consent of Instructor. Graduate standing. Seminars presented by guest lecturers on subjects of their own research (S/U grading only.) Effective: 2006 Fall Quarter.

CLH 290C—Literature in Stem Cell Biology (1)
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Graduate standing. Critical presentation and analysis of recent journal articles in stem cell biology by students. May be repeated for credit. (S/U grading only.) Effective: 2006 Fall Quarter.

CLH 290D—Literature in Translational Research (1)
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Graduate standing. Critical presentation and analysis of recent journal articles in translational research by students. May be repeated for credit. (S/U grading only.) Effective: 2009 Fall Quarter.

CLH 298—Group Study in Clinical Research (1-5)
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. Restricted to students enrolled in the Mentored Clinical Research Training Program. Special topics in Clinical Research appropriate for group study at the graduate level. May be repeated for credit. (S/U grading only.) Effective: 2006 Winter Quarter.

CLH 299—Clinical Research (1-5)
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. Restricted to students enrolled in the Mentored Clinical Research Training Program. Independent research and special topics in clinical research appropriate for graduate level. May be repeated for credit. (S/U grading only.) Effective: 2006 Fall Quarter.

SOM Courses | DER

Courses in DER:

DER 192—Internship in Cutaneous Biology (1-4)
Internship—8-20 hours. Prerequisite(s): Upper division standing or consent of instructor. Approval of project prior to internship by preceptor. Supervised work experience involving research on the skin. Final report. (P/NP grading only.) Effective: 1997 Winter Quarter.

DER 199—Special Study in Cutaneous Biology (1-4)
Variable. Prerequisite(s): Advanced undergraduate standing and/or consent of instructor. Special study by individual arrangement of specialized topics in biology of skin. Work may be assigned readings, laboratory research or a combination. (P/NP grading only.) Effective: 1997 Winter Quarter.

DER 299—Research in Cutaneous Biology (1-12)
Laboratory—3-36 hours. Prerequisite(s): Consent of Instructor. Independent research in cellular and biochemical mechanisms of cutaneous biology and pathology. (S/U grading only.) Effective: 1997 Winter Quarter.

DER 420—Integumentary System (2)
Clinical Activity—0.25 hours; Lecture/Discussion—3 hours. Prerequisite(s): Approval of School of Medicine Committee on Student Promotions. Restricted to Medical students only; student must have passed all SOM Year 1 courses. Cell biology, pathology, and physical diagnosis of the skin. Recognition of normal variations, and common or important dermatoses. Patient demonstrations of select conditions. (P/F grading only.) Effective: 2013 Fall Quarter.

DER 460—Dermatology Clinical Clerkship (3-9)
Clinical Activity—40 hours. Prerequisite(s): Completion of three years of medical school; or consent of instructor. Limited enrollment. Observation and participation in dermatology clinics/practice and participation in Ward Rounds.
and Dermatology Clinics at UC Davis Medical Center, Kaiser, and private practitioner offices. May be repeated for credit. (H/P/F grading only.) Effective: 2011 Summer Quarter.

DER 465—Specialty Externship in Dermatology (3-16)
Clinical Activity—30 hours. Prerequisite(s): Consent of Instructor. Externship provides in-depth exposure to one of a variety of sub-specialties in Dermatology. May be repeated for credit. (H/P/F grading only.) Effective: 2011 Summer Quarter.

DER 466—Away Acting Internship in Dermatology (3-18)
Clinical Activity—40 hours; Lecture—6 hours; Variable—3-18 hours. Prerequisite(s): Consent of Instructor. Work at the level of a sub intern in Inpatient and/or Outpatient settings. Expectation is to provide direct patient management. May be repeated for credit. (H/P/F grading only.) Effective: 2010 Summer Quarter.

DER 470—Introduction to Dermatopathology (6)
Clinical Activity—20 hours; Independent Study—20 hours; Lecture/Discussion—6 hours. Prerequisite(s): Consent of Instructor. Previous rotation in a Dermatology Clerkship. Restricted to fourth year medical student. Integrated, multi-specialty approach to the microscopic diagnosis of inflammatory and neoplastic skin disorders. (H/P/F grading only.) Effective: 2010 Spring Quarter.

DER 475—Telehealth in Dermatology (6)
Clinical Activity—4 hours; Project (Term Project)—36 hours. Restricted to Medical students. Introduction to the application of telehealth in dermatology to provide diagnoses, consultation, treatment, and education. Participate in teledermatology clinics with remote sites throughout California, conduct telehealth project(s), and review the latest literature in telehealth application in improving healthcare access. May be repeated up to 6 unit(s) for additional time needed to complete telehealth project or to work on new telehealth projects. (H/P/F grading only.) Effective: 2012 Winter Quarter.

DER 480—Insights in Dermatology (1-3)
Clinical Activity—3-9 hours. Prerequisite(s): Consent of Instructor. First- and second- year medical students in good academic standing. Clinical experience limited to observation of delivery of dermatologic care and attendance at some conferences. (H/P/F grading only.) Effective: 1997 Winter Quarter.

DER 495—Wound Healing: From Bench to Bedside (6)
Auto Tutorial—15 hours; Clinical Activity—12 hours; Laboratory—8 hours; Term Paper. Prerequisite(s): Consent of Instructor. Restricted to medical students only. An integrated, multi-specialty approach to clinical soft tissue wound healing. (H/P/F grading only.) Effective: 2001 Summer Quarter.

DER 498—Special Topics in Clinical Dermatology (1-6)
Independent Study—3-18 hours. Prerequisite(s): Medical students with consent of instructor. Individually arranged study of special topics in clinical dermatology determined by student and instructor. Assigned readings and/or clinical examination of selected patients. (H/P/F grading only.) Effective: 1997 Winter Quarter.

DER 499—Research in Cutaneous Biology (1-12)
Laboratory—3-36 hours. Prerequisite(s): Consent of Instructor. Research, either laboratory or clinical, on ongoing projects within the department under supervision of faculty. (H/P/F grading only.) Effective: 1997 Winter Quarter.

SOM Courses | EPP

Course in EPP:

SOM Courses | FAP

Courses in FAP:

FAP 092C—Primary Care Clinic (2)
Clinical Activity—8 hours; Lecture—2 hours; Seminar—2 hours. Prerequisite(s): Consent of Instructor. Enrollment at the UC Davis campus, for freshman and sophomore students. Students must apply and interview with the Board of Clinica Tepati or Imani Clinic. Field experience exposes lower division students to health care delivery, patient histories, physical examinations, health promotion, disease prevention, diagnosis; treatment of episodic, acute, chronic illness; appropriate referral and follow-up. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

FAP 192C—Primary Care Clinics (1-2)
Clinical Activity—6-8 hours; Lecture—1-2 hours; Seminar—2 hours. Prerequisite(s): Consent of Instructor. Enrollment at the UC Davis campus, upper-division standing. Students must apply and interview with the Board of Clinica
Tepati or Imani Clinic. Field experience introduces students to health care delivery, patient histories and physical examinations, health promotions and disease prevention, diagnosis and treatment of episodic, acute and chronic illness, basic laboratory testing and appropriate referral and follow-up. May be repeated for credit. (P/NP grading only.) Effective: 2004 Fall Quarter.

**FAP 195—Health Care to Underserved Populations (1)**
Lecture—1 hour. Prerequisite(s): Sociology, political science, or applied behavioral science background recommended, or registration in medical school. Discusses sociocultural perspectives of underserved populations in California impacting their health; roles of family/interpersonal relationships in making health care decisions; and clinician's perspectives in treating people of cultures which are unfamiliar and/or uncomfortable with Western medicine. May be repeated for credit. (P/NP grading only.) Effective: 2011 Spring Quarter.

**FAP 401—Introductory Preceptorship in Family Practice (3-9)**
Clinical Activity—20-40 hours. Prerequisite(s): Completion of first-year of medical training. Preceptorship in family practice offered as an introduction to clinical medicine. 20 hours or 40 hours per week in a family physician's office, doing patient interviews, historytaking, and performing physical exams. (H/P/F grading only.) Effective: 1999 Summer Quarter.

**FAP 405—The Healer's Art (1)**
Lecture—0.6 hours; Workshop—3 hours. Prerequisite(s): Consent of Instructor. Limited to first-year medical students. Learning to strengthen your humanity and remain open-hearted can make the difference between burnout and a fulfilling life. Learn tools for selfcare, healing, finding meaning, strengthening commitment and becoming a true physician. May be repeated for credit. (P/F grading only.) Effective: 1999 Summer Quarter.

**FAP 411—Selected Studies of Systems for Chronic Illness Care (3)**
Clinical Activity—4 hours; Discussion—4 hours. Prerequisite(s): FAP 400A; FAP 400B; FAP 400C; Medical students with consent of instructor. Understanding of chronic illness, particularly diabetes, participate in patient care, alternative techniques. May be repeated up to 1 time(s). (H/P/F grading only.) Effective: 2004 Spring Quarter.

**FAP 430—Family Medicine Clerkship (6-12)**
Clinical Activity—45 hours; Lecture—2 hours; Workshop—2 hours. Prerequisite(s): Approval by School of Medicine Committee on Student Progress. Family medicine clerkship for third year medical students. (H/P/F grading only.) Effective: 2015 Spring Quarter.

**FAP 430FA—SJVP Longitudinal Family Medicine Clerkship (1.5-6)**
Clinical Activity—45 hours; Lecture—2 hours; Workshop—2 hours. Prerequisite(s): Consent of Instructor. Approval by School of Medicine Committee on Student Progress. Longitudinal Family Medicine Clerkship runs concurrently with Internal Medicine, Pediatrics and Psychiatry for 32 weeks. Time is spent in direct patient care situations under the guidance of faculty. (H/P/F grading only.) Effective: 2017 Spring Quarter.

**FAP 430FB—SJVP Longitudinal Family Medicine Clerkship (1.5-6)**
Clinical Activity—45 hours; Lecture—2 hours; Workshop—2 hours. Prerequisite(s): Consent of Instructor. Approval by School of Medicine Committee on Student Progress. Longitudinal Family Medicine Clerkship runs concurrently with Internal Medicine, Pediatrics and Psychiatry for 32 weeks. Time is spent in direct patient care situations under the guidance of faculty. (H/P/F grading only.) Effective: 2017 Spring Quarter.

**FAP 430FC—SJVP Longitudinal Family Medicine Clerkship (1.5-6)**
Clinical Activity—45 hours; Lecture—2 hours; Workshop—2 hours. Prerequisite(s): Consent of Instructor. Approval by School of Medicine Committee on Student Progress. Longitudinal Family Medicine Clerkship runs concurrently with Internal Medicine, Pediatrics and Psychiatry for 32 weeks. Time is spent in direct patient care situations under the guidance of faculty. (H/P/F grading only.) Effective: 2017 Spring Quarter.

**FAP 430FD—SJVP Longitudinal Family Medicine Clerkship (1.5-6)**
Clinical Activity—45 hours; Lecture—2 hours; Workshop—2 hours. Prerequisite(s): Consent of Instructor. Approval by School of Medicine Committee on Student Progress. Longitudinal Family Medicine Clerkship runs concurrently with Internal Medicine, Pediatrics and Psychiatry for 32 weeks. Time is spent in direct patient care situations under the guidance of faculty. (H/P/F grading only.) Effective: 2017 Spring Quarter.

**FAP 430R—Rural PRIME Family Medicine Longitudinal Clerkship (2)**
Clinical Activity—45 hours; Lecture—2 hours; Workshop—2 hours. Prerequisite(s): Approval by School of Medicine Committee on Student Progress. Family Medicine Longitudinal Integrated Clerkship for the Rural PRIME Program. (H/P/F grading only.) Effective: 2017 Spring Quarter.
FAP 430RA—Rural PRIME Family Medicine Longitudinal Clerkship (3)
Clinical Activity—45 hours; Lecture—2 hours; Workshop—2 hours. Prerequisite(s): Consent of Instructor. Family Medicine Longitudinal Integrated Clerkship for the Rural PRIME Program. (H/P/F grading only.) Effective: 2017 Spring Quarter.

FAP 430RB—Rural PRIME Family Medicine Longitudinal Clerkship (3)
Clinical Activity—45 hours; Lecture—2 hours; Workshop—2 hours. Prerequisite(s): Consent of Instructor. Family Medicine Longitudinal Integrated Clerkship for the Rural PRIME Program. (H/P/F grading only.) Effective: 2017 Spring Quarter.

FAP 430RC—Rural PRIME Family Medicine Longitudinal Clerkship (3)
Clinical Activity—45 hours; Lecture—2 hours; Workshop—2 hours. Prerequisite(s): Consent of Instructor. Family Medicine Longitudinal Integrated Clerkship for the Rural PRIME Program. (H/P/F grading only.) Effective: 2017 Spring Quarter.

FAP 430RD—Rural PRIME Family Medicine Longitudinal Clerkship (1)
Clinical Activity—45 hours; Lecture—2 hours; Workshop—2 hours. Prerequisite(s): Consent of Instructor. Family Medicine Longitudinal Integrated Clerkship for the Rural PRIME Program. (H/P/F grading only.) Effective: 2017 Spring Quarter.

FAP 430TA—TeachMS Longitudinal Primary Care Clerkship (A) (4)
Clinical Activity—45 hours; Lecture—2 hours; Workshop—2 hours. Prerequisite(s): Consent of Instructor. Approval by School of Medicine Committee on Student Progress. Longitudinal Clerkship runs concurrently with Internal Medicine and Psychiatry for 24 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. (H/P/F grading only.) Effective: 2013 Fall Quarter.

FAP 430TB—TeachMS Longitudinal Primary Care Clerkship (B) (6)
Clinical Activity—45 hours; Lecture—2 hours; Workshop—2 hours. Prerequisite(s): Consent of Instructor. Approval by School of Medicine Committee on Student Progress. Longitudinal Clerkship runs concurrently with Internal Medicine and Psychiatry for 24 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. (H/P/F grading only.) Effective: 2013 Fall Quarter.

FAP 430TC—TeachMS Longitudinal Primary Care Clerkship (C) (2)
Clinical Activity—45 hours; Lecture—2 hours; Workshop—2 hours. Prerequisite(s): Consent of Instructor. Approval by School of Medicine Committee on Student Progress. Longitudinal Clerkship runs concurrently with Internal Medicine and Psychiatry for 24 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. (H/P/F grading only.) Effective: 2013 Fall Quarter.

FAP 431—Introduction to Primary Care Continuity Clinic (1)
Clinical Activity—4 hours; Project (Term Project)—1 hour. Prerequisite(s): Consent of Instructor. Completion of the Pre-Clinical Curriculum. Longitudinal component of the third-year primary care curriculum. Student attends their clinic roughly 18 half-days over the course of the year, working one-on-one with a primary care preceptor. (H/P/F grading only.) Effective: 2016 Fall Quarter.

FAP 431A—Primary Care Continuity Clinic (1)
Clinical Activity—4 hours; Project (Term Project)—1 hour. Prerequisite(s): Consent of Instructor. Completion of the Pre-Clinical Curriculum. Longitudinal component of the third-year primary care curriculum. Student attends their clinic roughly 18 half-days over the course of the year, working one-on-one with a primary care preceptor. (H/P/F grading only.) Effective: 2015 Spring Quarter.

FAP 431B—Primary Care Continuity Clinic (1)
Clinical Activity—4 hours; Project (Term Project)—1 hour. Prerequisite(s): Consent of Instructor. Completion of the Pre-Clinical Curriculum. Longitudinal component of the third-year primary care curriculum. Student attends their clinic roughly 18 half-days over the course of the year, working one-on-one with a primary care preceptor. (H/P/F grading only.) Effective: 2015 Spring Quarter.

FAP 431C—Primary Care Continuity Clinic (1)
Clinical Activity—4 hours; Project (Term Project)—1 hour. Prerequisite(s): Consent of Instructor. Completion of the Pre-Clinical Curriculum. Longitudinal component of the third-year primary care curriculum. Student attends their clinic roughly 18 half-days over the course of the year, working one-on-one with a primary care preceptor. (H/P/F grading only.) Effective: 2015 Spring Quarter.

FAP 431D—Primary Care Continuity Clinic (1)
Clinical Activity—4 hours; Project (Term Project)—1 hour. Prerequisite(s): Consent of Instructor. Completion of the
Pre-Clinical Curriculum. Longitudinal component of the third-year primary care curriculum. Student attends their clinic roughly 18 half-days over the course of the year, working one-on-one with a primary care preceptor. (H/P/F grading only.) Effective: 2015 Spring Quarter.

**FAP 431KA—ACE-PC Continuity Clinic (6)**
Clinical Activity—40 hours. Prerequisite(s): Consent of Instructor. Longitudinal clinic component of the 2nd year of the ACE-PC Program. Students start off with a 4 week immersion experience and then 12 additional half-days over the course of the year, working one-on-one with a primary care preceptor. (H/P/F grading only.) Effective: 2017 Spring Quarter.

**FAP 431KB—ACE-PC Continuity Clinic (0.5)**
Clinical Activity—2 hours. Prerequisite(s): Consent of Instructor. Longitudinal clinic component of the 2nd year of the ACE-PC Program. Students start off with a 4 week immersion experience and then 12 additional half-days over the course of the year, working one-on-one with a primary care preceptor. (H/P/F grading only.) Effective: 2017 Spring Quarter.

**FAP 431KC—ACE-PC Continuity Clinic (0.5)**
Clinical Activity—2 hours. Prerequisite(s): Consent of Instructor. Longitudinal clinic component of the 2nd year of the ACE-PC Program. Students start off with a 4 week immersion experience and then 12 additional half-days over the course of the year, working one-on-one with a primary care preceptor. (H/P/F grading only.) Effective: 2017 Spring Quarter.

**FAP 431KD—ACE-PC Continuity Clinic (0.5)**
Clinical Activity—2 hours. Prerequisite(s): Consent of Instructor. Longitudinal clinic component of the 2nd year of the ACE-PC Program. Students start off with a 4 week immersion experience and then 12 additional half-days over the course of the year, working one-on-one with a primary care preceptor. (H/P/F grading only.) Effective: 2017 Spring Quarter.

**FAP 434—Primary Care Clinics—Clinica Tepati (3-12)**
Clinical Activity—32-36 hours; Lecture—1-2 hours; Seminar—0-2 hours. Open to medical students in all four years of medical school. Medical students will learn counseling, diagnosis and treatment of patients with chronic and acute disease under supervision of physician. Provides exposure to special health care needs of various ethnic and poverty-level populations. May be repeated for credit. (P/F grading only.) Effective: 2010 Winter Quarter.

**FAP 435—Primary Care Clinics—Imani Clinic (3-12)**
Clinical Activity—32-36 hours; Lecture—1-2 hours; Seminar—0-2 hours. Open to medical students in all four years of medical school. Learn counseling, diagnosis and treatment of patients with chronic and acute disease under supervision of physician. Provides exposure to special health care needs of various ethnic and poverty-level populations. May be repeated for credit. (P/F grading only.) Effective: 2010 Winter Quarter.

**FAP 436—Continuity Clinic in Primary Care—Shifa Clinic (3-12)**
Clinical Activity—32-36 hours; Lecture—1-2 hours; Seminar—0-2 hours; Variable. Open to medical students in all four years of medical school. Learn counseling, diagnosis and treatment of patients with chronic and acute disease under supervision of physician. Provides exposure to special health care needs of various ethnic and poverty-level populations. May be repeated for credit. (P/F grading only.) Effective: 2010 Winter Quarter.

**FAP 437—Primary Care Clinics—Knights Landing (3)**
Clinical Activity—3 hours; Lecture—1 hour. Must complete an application and interview prior to registering. Learn counseling, diagnosis and treatment of patients with chronic and acute disease under supervision of physician. Provides exposure to special health care needs of various ethnic and poverty-level populations in the community of Knights Landing. May be repeated for credit. (P/F grading only.) Effective: 2010 Winter Quarter.

**FAP 439D—Directed Clinical Studies in Family Medicine (1-12)**
Clinical Activity—40 hours. Prerequisite(s): Consent of Instructor. Individual directed studies in extended preparation for modified curriculum or to complete a clinical rotation following a leave of absence. May be repeated for credit. (P/F grading only.) Effective: 2012 Winter Quarter.

**FAP 439R—Directed Studies in Family Medicine (1-12)**
Clinical Activity—30 hours; Independent Study—10 hours. Prerequisite(s): Consent of Instructor. Individual directed studies in extended preparation for remediation of all or part of clinical rotation. Clinical studies to accommodate and satisfy remedial work as directed by the Committee on Student Progress and approved by the course IOR. May be repeated for credit. (P/F grading only.) Effective: 2011 Summer Quarter.
FAP 444—Advanced Preceptorship in Family Medicine (3-18)
Clinical Activity—40 hours. Prerequisite(s): Completion of third-year primary care plus clerkship or consent of instructor. Open to medical students only. Preceptorships with primary care physicians in a variety of settings. Acquisition skills to evaluate and develop a treatment plan for patients with common medical problems seen by primary care physicians in an outpatient setting. May be repeated up to 18 unit(s). (H/P/F grading only.) Effective: 2002 Fall Quarter.

FAP 450—CAM in Family & Community Health (3-18)
Variable—20-40 hours. Complementary and alternative medicine courses at away institutions that cover various aspects of integrative medicine, including but not limited to: botanicals, homeopathy, mind/body, naturopathy, nutrition, traditional Chinese medicine, osteopathy, and energy medicine. Intended to grant units for away rotations; not offered at the UC Davis Medical Center. (H/P/F grading only.) Effective: 2011 Winter Quarter.

FAP 460—Geriatrics in Community Health (3-6)
Clinical Activity—12 hours; Fieldwork—24 hours; Lecture—4 hours. Prerequisite(s): FAP 430 Visits to community agencies including mental health teams, adult day health centers, a diagnostic and research center, and case management specialists. Observation and participation in MMSE's, patient-family conferences, interdisciplinary team meetings, neuropsychiatric testing and home visit evaluations. (H/P/F grading only.) Effective: 2001 Spring Quarter.

FAP 468—International Preceptorship (3-12)
Clinical Activity—40 hours. Prerequisite(s): Medical students with consent of instructor. Preceptorship with a family practitioner in a foreign country (Arranged by student contact or with assistance of the Family and Community Medicine Department.) Participate in clinical activities, analyze and report characteristics of the practice. May be repeated up to 12 unit(s). (H/P/F grading only.) Effective: 2002 Fall Quarter.

FAP 469—Inpatient Acting Internship in Family Medicine (3-12)
Clinical Activity—40 hours. Prerequisite(s): Completion of third-year of medical school or consent of instructor. Open to medical students only. Comprehensive primary medical care of inpatients on a family medicine hospital service. Available sites are university-based family medicine residency programs and programs within the UC Davis Network of Affiliated Family Medicine Residency Programs. May be repeated up to 12 unit(s). (H/P/F grading only.) Effective: 2011 Spring Quarter.

FAP 470—Inpatient Clinical Elective in Family Medicine (3-12)
Clinical Activity—40 hours. Prerequisite(s): Completion of third-year of medical school or consent of instructor. Open to medical students only. Comprehensive primary medical care of patients on a family medicine hospital service. Usually includes inpatient and outpatient experience. May be repeated up to 12 unit(s). (H/P/F grading only.) Effective: 2011 Spring Quarter.

FAP 475—Combined Inpatient/Outpatient Clinical Elective in Family Medicine (3-12)
Clinical Activity—40 hours. Prerequisite(s): Completion of third-year of medical school or consent of instructor. Open to medical students only. Combined inpatient and outpatient elective. Consists of comprehensive primary medical care of patients on a family medicine hospital service and in a family medicine outpatient clinic. May be repeated up to 12 unit(s). (H/P/F grading only.) Effective: 2011 Fall Quarter.

FAP 488—Selected Studies in Family Practice (1-9)
Variable—3-27 hours. Prerequisite(s): Medical students with consent of instructor. Assigned readings in family practice to increase understanding on selected topics relating to family medicine and primary health care delivery; visits to and written analysis of selected health care programs; and/or exposure to family practice with a community physician preceptor. May be repeated up to 9 unit(s). (H/P/F grading only.) Effective: 2011 Fall Quarter.

FAP 490—Health Care to Underserved Populations (1)
Lecture—1 hour. Prerequisite(s): Sociology, Political Science, or Applied Behavioral Science background recommended, or registration in medical school. Discusses sociocultural perspectives of underserved populations impacting health; roles of family/interpersonal relationships in making health care decisions; the nature of ethnic/racial/socioeconomic health care disparities; and clinicians' perspectives in treating people of cultures which are unfamiliar and/or uncomfortable with Western medicine. May be repeated for credit. (P/F grading only.) Effective: 2012 Winter Quarter.

FAP 493—Aging and Health (6)
Seminar—12 hours. Prerequisite(s): Consent of Instructor. Is disease and infirmity the inevitable consequence of aging? We will spend four weeks exploring this question by reviewing the biology of aging, physiologic changes...
seen in aged individuals and disease processes commonly found in elderly persons. (H/P/F grading only.) Effective: 2010 Summer Quarter.

**FAP 495—LGBTIQQA Healthcare Lecture Series (1)**
Lecture—6 hours. Increase the awareness of medical issues surrounding the LGBTIQQA community and arm students with knowledge of the health disparities the community faces. Provide better quality care to the LGBTIQQA patients cared for as physicians. May be repeated for credit. (P/F grading only.) Effective: 2012 Winter Quarter.

**FAP 498—Directed Group Study (1-5)**
Variable—3-15 hours. Explore in-depth various topics in primary care. Extensive contact with and oversight by instructor. May be repeated for credit. (H/P/F grading only.) Effective: 2008 Spring Quarter.

**FAP 499—Research (1-12)**
Prerequisite(s): Medical students with consent of instructor. Research in various aspects of the health care delivery system. (H/P/F grading only.) Effective: 1997 Winter Quarter.

**SOM Courses | HPH**

**Courses in HPH:**

**HPH 099—Special Study for Undergraduates (1-5)**
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 2004 Fall Quarter.

**HPH 115—Cannabis and Cannabinoids in Physiology and Medicine (3)**
Lecture—3 hours. Prerequisite(s): NPB 100 or NPB 101 or NPB 110B; or Consent of Instructor. In-depth scientific analysis of cannabis and cannabinoids, topics include biochemical, physiological, behavioral, pharmacological, social and therapeutic aspects of cannabinoids, with emphasis on the physiological impacts on major organ systems in humans and animals, and the potential medicinal uses. GE credit: SE, SL. Effective: 2017 Spring Quarter.

**HPH 157—Advanced Physiology of Animal/Human Disease (3)**
Lecture—1 hour; Lecture/Discussion—2 hours. Prerequisite(s): NPB 101 B+ or better or NPB 110C B+ or better; Consent of Instructor. Limited to 35 students initially. Centers on fundamental mechanisms and pathophysiological basis for animal and human diseases. Course is case-based and uses animal and human diseases to help exemplify the physiological consequences of organ dysfunction. (Same course as NPB 157.) Effective: 2017 Spring Quarter.

**HPH 192—Internship in Human Physiology (1-12)**
Internship—3-36 hours. Prerequisite(s): Upper division standing; approval of project prior to period of internship by preceptor. Supervised work experience in physiology and related fields. (P/NP grading only.) Effective: 1997 Winter Quarter.

**HPH 198—Directed Group Study (1-5)**
Variable. Prerequisite(s): Consent of Instructor. Directed reading, discussion and/or laboratory experience on selected topics. (P/NP grading only.) Effective: 1997 Winter Quarter.

**HPH 199—Special Study for Advanced Undergraduates (1-5)**
Laboratory—3-15 hours. Prerequisite(s): Consent of Instructor. Senior standing in biology, chemistry, physics, psychology, or engineering. (P/NP grading only.) Effective: 1997 Winter Quarter.

**HPH 210A—Advanced Physiology (4) Review all entries**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Physiology Ph.D. program or consent of instructor. Advanced course in general principles of physiology, surveying homeostasis, cellular and selected topics, and neurophysiology. (Same course as MCP 210A.) Effective: 1999 Fall Quarter.

**HPH 210A—Advanced Physiology (5) Review all entries**
Discussion—2 hours; Lecture—3 hours. Prerequisite(s): Physiology Ph.D. program or consent of instructor. HPH 210A (or MCP 210A) is a required core course for the MCIP graduate group; course contains thermodynamics discussions and requires substantial math and physics background in order to succeed; approval for registering from Co-IrS is required to get CRN. Advanced course on fundamental principles of cell physiology, transport physiology, signal transduction, physiology of excitable cells, and muscle physiology. (Same course as MCP 210A.) Effective: 2019 Winter Quarter.

**HPH 298—Group Study (1-5)**
Variable. Prerequisite(s): Consent of Instructor. For graduate students desiring to explore particular topics in depth. Lectures and conferences may be involved. Effective: 1997 Winter Quarter.
HPH 299—Research (1-12)
Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

HPH 400—Human Physiology (6)
Laboratory—2 hours; Lecture—3 hours. Medical student only. General and cellular physiology of neurons, muscle, and epithelial cells and systemic physiology of cardiovascular, respiratory, gastrointestinal, and renal systems. (P/F grading only.) Effective: 2011 Summer Quarter.

HPH 403—Medical Neuroanatomy (5)
Discussion/Laboratory—1 hour; Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): HPH 400; Block 1. Restricted to medical students only. Anatomy of the normal human nervous system, to include gross external and internal morphology of brain and spinal cord, and function neuroanatomy of motor, sensory and cognitive systems. Incorporates application of neuroanatomy to clinical problem solving. (Same course as CHA 403.) (P/F grading only.) Effective: 2007 Summer Quarter.

HPH 440—Cannabis and Cannabinoids in Physiology and Medicine (3)
Lecture. Prerequisite(s): Consent of Instructor. Provides an in-depth scientific analysis of current knowledge on cannabis and cannabinoids pertaining to human physiology and potential medicinal uses. May be repeated for credit. (H/P/F grading only.) Effective: 2018 Winter Quarter.

HPH 493—Physiological Principles in SICU SSM (6)
Clinical Activity—4 hours; Laboratory—16 hours; Lecture—5 hours; Lecture/Lab—10 hours. Prerequisite(s): Consent of Instructor. Restricted to UC Davis School of Medicine students only. Special Study Module, a four week course on the topic: Care of the Critically Ill Surgical Patient: Use of Physiological Principles to Guide Treatment of Patients with Common Surgical Problems (Same course as SUR 493C.) (H/P/F grading only.) Effective: 2008 Winter Quarter.

HPH 497T—Tutoring in Human Physiology (1-5)
Tutorial—3-15 hours. Prerequisite(s): Advanced standing or consent of instructor. Assist instructor by tutoring medical students in preparation for one of the departmental courses that is a component of the required curriculum of the School of Medicine. (S/U grading only.) Effective: 1997 Winter Quarter.

HPH 498—Directed Reading and Group Study (1-4)
Discussion—2-8 hours. Prerequisite(s): Consent of Instructor. Medical student. Directed reading and discussion on selected topics in human physiology. (S/U grading only.) Effective: 1997 Winter Quarter.

HPH 499—Research (1-6)
Variable. Prerequisite(s): Medical students with consent of instructor. Laboratory investigation on selected topics. (S/U grading only.) Effective: 1997 Winter Quarter.

SOM Courses | IMD

Courses in IMD:

IMD 090—Seminar in Medical Ethics (1)
Lecture—1 hour. Seminar Series covering the current topics in Medical Ethics. (P/NP grading only.) Effective: 2017 Winter Quarter.

IMD 092—Internship (1-4)
Internship—3-12 hours. Prerequisite(s): Consent of Instructor. Lower division standing. Supervised internship in internal medicine and related fields. (P/NP grading only.) Effective: 1997 Winter Quarter.

IMD 098—Directed Group Study (1-2)
Seminar—1-2 hours. Prerequisite(s): Consent of Instructor. Lower division standing. Directed group study in medicine and related fields. (P/F grading only) Effective: 1997 Winter Quarter.

IMD 099—Undergraduate Research in Medicine: Molecular and Cell Biology (1-3)
Variable. Prerequisite(s): Consent of Instructor. (P/F grading only.) Effective: 1997 Winter Quarter.

IMD 164—Practicum in Community Health Clinic: Bayanihan Clinic (1-2)
Clinical Activity—5 hours. Through active participation in the medical aspects of community health clinics, the undergraduate student gains knowledge of the organization, administration, and problem-solving capabilities. May be repeated for credit. (P/NP grading only.) Effective: 2014 Winter Quarter.

IMD 192—Internship in Internal Medicine (1-12)
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Upper division standing. Supervised work experience in internal medicine and related fields. (P/F grading only.) Effective: 1997 Winter Quarter.
IMD 194—Practicum in Community Health Clinics (1-3)
Clinical Activity—5-15 hours. Prerequisite(s): Consent of Instructor. The undergraduate student, through active participation in the medical aspects of community health clinics, gains knowledge of the organization, administration, and problem-solving capabilities of these primary care facilities. May be repeated for credit. (P/F grading only.) Effective: 1997 Winter Quarter.

IMD 198—Directed Group Study (1-3)
Extensive Problem Solving—2 hours; Seminar—1-2 hours. Prerequisite(s): Consent of Instructor. Directed group study in medicine and related fields. (P/NP grading only.) Effective: 2014 Winter Quarter.

IMD 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. Upper division standing. (P/F grading only.) Effective: 1997 Winter Quarter.

IMD 214—Topics in Medical Ethics (1)
Seminar—1 hour. The complex moral, legal and ethical dilemmas that patients, families, and health care providers face in today's clinics. May be repeated up to 1 time(s). (S/U grading only.) Effective: 2001 Fall Quarter.

IMD 220D—Cardiovascular System (2.5)
Lecture/Discussion—5.5 hours. Prerequisite(s): HPH 200; and Consent of Instructor. Graduate student status. Principles of etiology, mechanisms, diagnosis and management of the major diseases of the cardiovascular system. Included are ischemic, valvular, hypertensive, cardiomyopathic, pericardial, and electrical disorders. Effective: 2002 Fall Quarter.

IMD 250—Medicine and the Law (3)
Lecture/Discussion—2 hours; Project (Term Project)—2 hours. Legal and bioethical principles and concepts in medicine. Topics include standard of care, informed consent, reproductive medicine, and end-of-life issues. (S/U grading only.) Effective: 2002 Winter Quarter.

IMD 414—One Health: A Course on Global Health (1)
Conference—8 hours. Global health problems are complex and require culturally-sensitive, socially-acceptable, and action-oriented approaches to create practical and cost-effective solutions. Will examine major health problems created by the convergence of human, animal, and environmental influences. May be repeated for credit. (P/F grading only.) Effective: 2011 Summer Quarter.

IMD 416—Summer Institute on Race and Health (6)
Independent Study—30 hours. Prerequisite(s): Consent of Instructor. Limited enrollment. Using field trips, media, readings, and clinical experiences, 8-10 first year medical students will explore issues of race, health disparities and related issues in a 4 week institute during the summer break. (P/F grading only.) Effective: 2011 Summer Quarter.

IMD 420A—Hematology (2)
Discussion—1 hour; Lecture/Discussion—1 hour. Prerequisite(s): Consent of Instructor. Restricted to Medical students only. Malignant disorders of blood cells and transfusion therapy. Covers acute leukemia, myelodysplasia, myeloproliferative disorders, lymphoma, and myeloma. (P/F grading only.) Effective: 2010 Summer Quarter.

IMD 420B—Gastrointestinal System (2.5)
Discussion—2 hours; Lecture/Discussion—2 hours. Prerequisite(s): Approval of Committee on Student Progress. Restricted to Medical students only. Basic pathophysiologic principles of digestive diseases on which clinical concepts and judgments can be developed. Emphasis on pathophysiologic basis of gastroenterological and hepatic disorders with discussion of major disorders and their diagnosis and management. (P/F grading only.) Effective: 2008 Winter Quarter.

IMD 420C—Pulmonary & Critical Care Medicine (2.5)
Lecture/Discussion—5.5 hours. Prerequisite(s): Approval of SOM's Committee on Student Promotions. Restricted to Medical students only; student must pass all SOM Year 1 courses. Clinical aspects of respiratory anatomy, physiology, and pathology. Diagnostic procedures and a description of the major pulmonary diseases & disorders, and critical care medicine. (P/F grading only.) Effective: 2013 Fall Quarter.

IMD 420D—Cardiovascular System (2.5)
Lecture/Discussion—5.5 hours. Prerequisite(s): Approval of the School of Medicine Committee on Student Promotions. Restricted to Medical students only; student must pass all SOM Year 1 courses. Principles of etiology, mechanisms, diagnosis and management of the major diseases of the cardiovascular system. Included are ischemic, valvular, hypertensive, cardiomyopathic, pericardial, and electrical disorders. (P/F grading only.) Effective: 2013 Fall Quarter.
IMD 420E—Nephrology (2)
Discussion—2 hours; Laboratory—2 hours; Lecture—2 hours. Prerequisite(s): Approval of Student Progress Committee. Fundamental aspects of disorders of body water, electrolytes and acid/base balance; major categories and mechanisms of parenchymal renal diseases; urinary tract infections. (P/F grading only.) Effective: 2002 Winter Quarter.

IMD 430—Medicine Clerkship (12)
Clinical Activity—45 hours. Prerequisite(s): Approval by School of Medicine Committee on Student Progress. Clerkship is divided into two, four-week blocks, one each at UCDMC and at Kaiser Hospitals. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. (H/P/F grading only.) Effective: 2001 Summer Quarter.

IMD 430FA—SJVP Longitudinal Medicine Clerkship (1.5-6)
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Approval by School of Medicine Committee on Student Progress. Longitudinal Clerkship runs concurrently with Family Medicine, Pediatrics and Psychiatry for 32 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only.) Effective: 2017 Spring Quarter.

IMD 430FB—SJVP Longitudinal Medicine Clerkship (1.5-6)
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Approval by School of Medicine Committee on Student Progress. Longitudinal Clerkship runs concurrently with Family Medicine, Pediatrics and Psychiatry for 32 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only.) Effective: 2017 Spring Quarter.

IMD 430FC—SJVP Longitudinal Medicine Clerkship (1.5-6)
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Approval by School of Medicine Committee on Student Progress. Longitudinal Clerkship runs concurrently with Family Medicine, Pediatrics and Psychiatry for 32 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only.) Effective: 2017 Spring Quarter.

IMD 430FD—SJVP Longitudinal Medicine Clerkship (1.5-6)
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Approval by School of Medicine Committee on Student Progress. Longitudinal Clerkship runs concurrently with Family Medicine, Pediatrics and Psychiatry for 32 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only.) Effective: 2017 Spring Quarter.

IMD 430R—Rural PRIME Internal Medicine Longitudinal Clerkship (2)
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Internal Medicine Longitudinal Integrated Clerkship for the Rural PRIME Program. (H/P/F grading only.) Effective: 2017 Spring Quarter.

IMD 430RA—Rural PRIME Internal Medicine Longitudinal Clerkship (3)
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Internal Medicine Longitudinal Integrated Clerkship for the Rural PRIME Program. (H/P/F grading only.) Effective: 2017 Spring Quarter.

IMD 430RB—Rural PRIME Internal Medicine Longitudinal Clerkship (3)
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Internal Medicine Longitudinal Integrated Clerkship for the Rural PRIME Program. (H/P/F grading only.) Effective: 2017 Spring Quarter.

IMD 430RC—Rural PRIME Internal Medicine Longitudinal Clerkship (3)
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Internal Medicine Longitudinal Integrated Clerkship for the Rural PRIME Program. (H/P/F grading only.) Effective: 2017 Spring Quarter.

IMD 430RD—Rural PRIME Internal Medicine Longitudinal Clerkship (1)
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Internal Medicine Longitudinal Integrated Clerkship for the Rural PRIME Program. (H/P/F grading only.) Effective: 2017 Spring Quarter.

IMD 430TA—TeachMS Longitudinal Medicine Clerkship (A) (4)
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Approval by School of Medicine Committee on Student Progress. Longitudinal Clerkship runs concurrently with Primary Care and Psychiatry for 24 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only.) Effective: 2013 Fall Quarter.

IMD 430TB—TeachMS Longitudinal Medicine Clerkship (B) (6)
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Approval by School of Medicine Committee on
Student Progress. Longitudinal Clerkship runs concurrently with Primary Care and Psychiatry for 24 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only.) Effective: 2013 Fall Quarter.

IMD 430TC—TeachMS Longitudinal Medicine Clerkship (C) (2)
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Approval by School of Medicine Committee on Student Progress. Longitudinal Clerkship runs concurrently with Primary Care and Psychiatry for 24 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only.) Effective: 2013 Fall Quarter.

IMD 439D—Directed Clinical Studies in Internal Medicine (1-12)
Clinical Activity—40 hours. Prerequisite(s): Consent of Instructor. Individual directed studies in extended preparation for modified curriculum or to complete a clinical rotation following a leave of absence. May be repeated for credit. (P/F grading only.) Effective: 2011 Spring Quarter.

IMD 439R—Directed Studies in Internal Medicine (1-12)
Clinical Activity—30 hours; Independent Study—10 hours. Prerequisite(s): Consent of Instructor. Individual directed studies in extended preparation for remediation of all or part of clinical rotation. Clinical studies to accommodate and satisfy remedial work as directed by the Committee on Student Progress and approved by the course IOR. May be repeated for credit. (P/F grading only.) Effective: 2011 Summer Quarter.

IMD 450A—Medicine and the Law (1.5)
Discussion—2 hours; Seminar—2 hours. Prerequisite(s): Consent of Instructor. Restricted to Medical students only. Legal and bioethical principles and concepts in medicine. Topics include standard of care, informed consent, reproductive medicine, and end-of-life issues. (H/P/F grading only.) Effective: 2010 Summer Quarter.

IMD 450B—Medicine and the Law (1.5)
Discussion—2 hours; Seminar—2 hours. Prerequisite(s): Consent of Instructor. Restricted to Medical students only. Legal and bioethical principles and concepts in medicine. Topics include standard of care, informed consent, reproductive medicine, and end-of-life issues. (H/P/F grading only.) Effective: 2010 Summer Quarter.

IMD 459—Oncology: Research and Treatment of Cancer (2)
Lecture/Discussion—2 hours. Prerequisite(s): Second-, third-, or fourth-year medical student and/or consent of instructor. Comprehensive review of current treatment practices of cancer and state-of-the-art research impacting treatment and prevention of cancer. Emphasis on epidemiology, molecular biology, and pharmacology. (H/P/F grading only.) Effective: 1997 Winter Quarter.

IMD 460—Correctional Health Care Clerkship (1-4) Review all entries
Clinical Activity. Prerequisite(s): Consent of Instructor. Fourth-year medical student in good academic standing. Covers Correctional Health delivery and the effects of detention and incarceration on health status. Special emphasis on problems unique to health care delivery in a prison setting. Student will spend time in clinical settings at three prison facilities. (H/P/F grading only.) Effective: 1997 Winter Quarter.

IMD 460—Correctional Health Care Clerkship (1-12) Review all entries
Clinical Activity. Prerequisite(s): Consent of Instructor. Fourth-year medical student in good academic standing. Covers Correctional Health delivery and the effects of detention and incarceration on health status. Special emphasis on problems unique to health care delivery in a prison setting. Student will spend time in clinical settings at three prison facilities. (H/P/F grading only.) Effective: 2019 Winter Quarter.

IMD 461—Mather VA Internal Medicine AI (6)
Clinical Activity—50 hours; Independent Study—5 hours; Lecture/Discussion—5 hours. Prerequisite(s): Consent of Instructor. Limited enrollment. Acting Internship in Internal Medicine for qualified 4th year Medical Students from the UC Davis School of Medicine at the Sacramento VA Hospital. Experiences will somewhat mirror those of AIs at UCDMC. May be repeated for credit. (H/P/F grading only.) Effective: 2014 Summer Quarter.

IMD 462—Medicine Wards Al (6)
Clinical Activity—40 hours. Prerequisite(s): Consent of Instructor. MDS 431; demonstrated ability to accept responsibility. Limited enrollment. Assume role of acting intern and be primary physician on medical ward under direction of medical resident and staff. Teams I-V take call every fifth night. Emphasis on evidence-based inpatient care. May be repeated for credit. (H/P/F grading only.) Effective: 2012 Fall Quarter.

IMD 463—Acting Internship in Medicine Intensive Care Unit (MICU) (3-6)
Clinical Activity—40 hours. Prerequisite(s): Completion of third-year in medical school; consent of Director of MICU. Limited enrollment. At UCDMC, student functions as acting intern on MICU service under direction of medical
resident and staff. Responsibility for patients admitted to MICU. On call in hospital every fourth night. May be repeated for credit. (H/P/F grading only.) Effective: 2016 Spring Quarter.

**IMD 464—Bayanihan Primary Care Clinic (3)**
Clinical Activity—0.6 hours. Restricted to medical students in all four years of medical school. Under the guidance and supervision of a physician, medical students will learn patient history taking, medical documentation, counseling, diagnosis and treatment of patients with chronic and acute disease. Provides exposure to the special needs of various ethnic and socioeconomic groups. May be repeated for credit. (P/F grading only.) Effective: 2009 Spring Quarter.

**IMD 465—Medicos-Global Health Sciences (9)**
Clinical Activity—25 hours; Fieldwork—5 hours; Lecture—5 hours; Project (Term Project)—5 hours. Prerequisite(s): Consent of Instructor. Medical students only. Travel to foreign country for four weeks to collaborate with faculty from local universities and work in urban and rural environments, including hands-on experience with clinic patients. Cultural exchange and awareness of global health care. (P/F grading only.) Effective: 2007 Summer Quarter.

**IMD 468—Ambulatory Internal Medicine Externship (3-18)**
Clinical Activity—40 hours; Variable—12-40 hours. Prerequisite(s): IMD 430; and Consent of Instructor. Demonstrated ability to accept responsibility. Limited enrollment. Hands-on primary care clinical experience in the ambulatory setting supervised by a general internist. Emphasis on evidence-based outpatient care. (H/P/F grading only.) Effective: 2010 Summer Quarter.

**IMD 470—Critical Evaluation of Landmark Studies in Evidence-Based Medicine (3)**
Seminar. Prerequisite(s): Fourth-year medical student. Primary objective is to prepare future physicians to effectively integrate evidence-based medicine into their clinical practice. While this course will have an Internal Medicine emphasis, the skills the course aims to impart (formulating focused clinical questions, searching the medical literature, evaluating the quality of research, and integrating evidence into clinical practice, giving effective article presentations) will apply to all future clinicians, regardless of their specialty. (P/F grading only.) Effective: 2017 Fall Quarter.

**IMD 480—Person Centered Assessment (1)**
Lecture—1 hour. Prerequisite(s): Open to all medical students. Person-centered assessment modalities and diagnostic approaches with regards to Internal Medicine and its different subspecialties. (P/F grading only.) Effective: 2002 Fall Quarter.

**IMD 493—Introduction Interprofessionalism, Pain Management, and Palliative Care (6)**
Clinical Activity—24 hours; Discussion—4 hours; Independent Study—2 hours. Prerequisite(s): Consent of Instructor. Learners will spend one week with the inpatient palliative care service, one week with the inpatient pain pharmacy service and two weeks with Snowline Hospice. (P/F grading only.) Effective: 2018 Winter Quarter.

**IMD 494—Practicum in Community Health Clinics (1-3)**
Clinical Activity—15-40 hours. Prerequisite(s): Medical student with consent of instructor. Students are assigned to clinical settings that demonstrate ethnic, urban/rural, or other related aspects of clinical community health. Through active participation in health care delivery, students are able to relate conceptual with practical aspects of primary health care. May be repeated for credit. (H/P/F grading only.) Effective: 1997 Winter Quarter.

**IMD 497—Medicine, Bioethics and the Holocaust (3)**
Lecture/Discussion—10 hours. Prerequisite(s): Consent of Instructor. Medical students only. The concept of "evil" and the role of collaborators, bystanders and participants exemplified by the holocaust and compared to problems physicians face in practice today. Demonstration that evil emerges incrementally until taken for granted. (P/F grading only.) Effective: 2004 Winter Quarter.

**IMD 498—Group Study in Internal Medicine (1-18)**
Variable. Prerequisite(s): Consent of Instructor. Special study for medical students which may involve laboratory or library research, ambulatory or inpatient care responsibility on campus, at UCDMC or off campus by specific arrangement. (H/P/F grading only.) Effective: 1997 Winter Quarter.
IMD 499—General Medicine Research (1-18)
Independent Study—20 hours. (H/P/F grading only.) Effective: 2006 Winter Quarter.

SOM Courses | CAR

Courses in CAR:

CAR 192—Internship in Cardiology (1-12)
Internship—3-36 hours. Prerequisite(s): Upper division standing; approval of project by preceptor prior to internship. Supervised work experience in cardiology. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 1997 Winter Quarter.

CAR 199—Cardiology Research (1-5)
Variable. Prerequisite(s): Consent of Instructor. Special study by individual arrangement in cardiovascular medicine. Work will include directed readings, laboratory and discussions. (P/NP grading only.) Effective: 1997 Winter Quarter.

CAR 220—Basic Science in Cardiology (1)
Lecture—1 hour. Prerequisite(s): Graduate or medical student status. Fundamentals underlying cardiovascular medicine. Including hemodynamics, neural control of the circulation, biochemistry and some experimental design and statistics. Experts in each of these fields will give current information in their areas. (S/U grading only.) Effective: 1997 Winter Quarter.

CAR 299—Cardiology Research (1-12)
Variable—40 hours. Prerequisite(s): Consent of Instructor. Research or special studies. (S/U grading only.) Effective: 2010 Spring Quarter.

CAR 401—Clinical Cardiology Clerkship: Kaiser (3-18)
Clinical Activity—1-5 hours. Prerequisite(s): Third- and fourth-year medical students with advance approval by Division of Cardiology. Limited enrollment. Emphasis placed on history taking and physical examination of pediatric and adult patients with congenital and acquired cardiovascular disease. Hospital rounds in CCU and elsewhere. Roles of ECG, PCG, and cardiac fluoroscopy, etc., in office cardiology will be evaluated. May be repeated for credit. (H/P/F grading only.) Effective: 1997 Winter Quarter.

CAR 460—Cardiology Clinical Clerkship (3-18)
Clinical Activity—2-12 hours. Prerequisite(s): IMD 430; Third- and fourth-year medical students in good academic standing with consent of instructor. Limited enrollment. Participation with members of subspecialty consultation service in initial clinical evaluation, work-up, management, and follow-up of patients with cardiologic disorders. Two outpatient clinics per week. May be repeated for credit. (H/P/F grading only.) Effective: 1997 Winter Quarter.

CAR 461—Management of Coronary Artery Disease: Coronary Care Unit (3-18)
Clinical Activity. Prerequisite(s): Completion of second-year of medical school and advance approval by Division of Cardiology. Limited enrollment. Research in laboratory and exercise testing to be determined by instructor. Current methods of clinical research involving certain aspects of diagnosis and treatment. May be repeated for credit. (H/P/F grading only.) Effective: 1997 Winter Quarter.

CAR 464—Preventive Cardiology (3-6)
Clinical Activity; Seminar—2 hours. Prerequisite(s): Consent of Instructor. Completion of third-year medical school. Clinical experience, weekly seminar and reading on primary and secondary prevention of cardiovascular disease. Will be carried out in Lipid and Hypertension Clinics, Exercise Laboratory, Cardiac Care Unit, Cardiac Catheterization, and Cardiac Surgery services. (H/P/F grading only.) Effective: 1997 Winter Quarter.

CAR 480—Insights in Cardiology (1-3)
Clinical Activity—3-9 hours. Prerequisite(s): Medical student in good academic standing and approval by Division of Cardiology. Students attend one or more cardiovascular medicine clinics: general, hypertension, arrhythmia. Introduction to the diagnosis/treatment of common cardiovascular problems. (H/P/F grading only.) Effective: 1997 Winter Quarter.

CAR 493—Gender Specific Medicine SSM (6)
Clinical Activity—4 hours; Laboratory—16 hours; Lecture—5 hours; Lecture/Lab—10 hours. Prerequisite(s): Consent of Instructor. UC Davis School of Medicine students only. Special Studies Module, a four week course on the topic: Basic Science Principles Relating to Gender Specific Medicine. (Same course as OBG 493.) (H/P/F grading only.) Effective: 2007 Spring Quarter.

CAR 498—Special Group Study: EKG Unit (1-12)
Variable. Prerequisite(s): Medical student with advance approval by monthly attending faculty. Limited enrollment.
Special group study in cardiology for medical students in EKG unit. May include lectures, directed reading, and/or discussion groups. May be repeated for credit. (H/P/F grading only.) Effective: 1997 Winter Quarter.

**CAR 499—Research (1-12)**
Variable. Prerequisite(s): Consent of Instructor. Approval by Division of Cardiology. (H/P/F grading only.) Effective: 1997 Winter Quarter.

**SOM Courses | EMR**

**Courses in EMR:**

**EMR 092—Emergency Medicine Clinical Research Internship (1-4)**
Internship—6-12 hours. Prerequisite(s): Consent of Instructor. Undergraduate student in good academic standing at UC Davis. Intended to give the undergraduate student an opportunity to conduct "hands-on" clinical research in the Emergency Department. Through the lecture/discussion, students will learn the basics of conducting and developing clinical research studies, using examples from ongoing studies. May be repeated up to 4 unit(s). Units awarded will depend on hours worked. (P/NP grading only.) Effective: 2007 Summer Session 1.

**EMR 092C—Joan Viteri Memorial Clinic Preceptorship (1.5)**
Clinical Activity; Seminar—1 hour. Prerequisite(s): Consent of Instructor. Directed towards the undergraduate students at UC Davis that volunteer at the Joan Viteri Memorial Clinic (JVMC). May be repeated for credit. (P/NP grading only.) Effective: 2007 Summer Quarter.

**EMR 192—Emergency Medicine Clinical Research Internship (1-4)**
Internship—6-12 hours. Prerequisite(s): Consent of Instructor. Undergraduate student in good academic standing at UC Davis. Intended to give the upper division undergraduate student an opportunity to conduct "hands-on" clinical research in the Emergency Department. Through the lecture/discussion, students learn the basics of conducting and developing clinical research studies. May be repeated up to 2 time(s). (P/NP grading only.) Effective: 2007 Summer Quarter.

**EMR 192A—Joan Viteri Memorial Clinic (JVMC) Student Volunteer (1)**
Lecture/Discussion—1 hour. Prerequisite(s): Consent of Instructor. Open to undergraduate students only. Field experience in health care delivery, patient histories and physical examinations, health promotions and disease prevention, diagnosis and treatment of episodic, acute and chronic illness, basic laboratory testing and appropriate referral and follow-up. Students must apply and interview. May be repeated up to 9 time(s). (P/NP grading only.) Effective: 2019 Spring Quarter.

**EMR 199A—Special Study for Advanced Undergraduates (4-12)**
Variable—4-12 hours. Prerequisite(s): Consent of Instructor. Experienced RA’s who have successfully performed in the EMRAP program for a minimum of 3 quarters; must have database skills. For students interested in working on specific EM projects in a more extensive way. Must commit at least four hours per week for two quarters. Will be awarded credit upon completion of course 199B. Credit awarded upon completion of EMR 199B. Effective: 2007 Fall Quarter.

**EMR 299—Research (1-12)**
Variable—1-12 hours. Prerequisite(s): Consent of Instructor. Directed research in the Department of Emergency Medicine. May be repeated for credit. (S/U grading only.) Effective: 2017 Spring Quarter.

**EMR 401—Preceptorship in Emergency Medicine (1-6)**
Clinical Activity—10 hours. Prerequisite(s): Consent of Instructor. Exposure to the specialty of Emergency Medicine and observation of a wide array of patients in the Emergency Department. May be repeated for credit. (P/F grading only.) Effective: 2012 Spring Quarter.

**EMR 430—Introduction to Medical Toxicology (3-6)**
Variable—40 hours. Prerequisite(s): Consent of Instructor. Fourth-year medical student in good standing. In-depth review of clinical and medical toxicologic emergencies. Rotation includes contact with toxicology trained emergency faculty, didactic lectures, journal club, simulation training and exposure to a very busy poison control center. (H/P/F grading only.) Effective: 2012 Spring Quarter.

**EMR 435—Wilderness Medicine (3-6)**
Clinical Activity—12 hours; Independent Study—8 hours; Lecture/Discussion—20 hours. Prerequisite(s): Consent of Instructor. Designed as an introductory elective course for students to explore how physicians can interact with the environment in austere conditions through lectures, hands-on/field experience, and case-based learning. (P/F grading only.) Effective: 2018 Spring Quarter.

1515
EMR 440—Emergency Medicine Clerkship (6)
Clinical Activity—46 hours; Lecture/Discussion—4 hours. Prerequisite(s): Satisfactory completion of Medicine, Surgery, and Pediatric Clerkship. Students complete clinical shifts in the Emergency Department, functioning as Acting Intern. Treat a wide variety of patients and problems under the supervision of the EM Attending. Students are expected to take focused histories and present in clear, concise fashion. May be repeated for credit. (H/P/F grading only) Effective: 2011 Fall Quarter.

EMR 445—Emergency Medicine Ultrasound for Fourth-Year Medical Student (3-6)
Variable. Prerequisite(s): Fourth-year Medical Student in good standing; interest in Emergency Medicine or Critical Care is recommended; EMR 440 or equivalent is recommended prior to the rotation. Limited enrollment. Intended for students interested in learning both the technical and cognitive skills of bedside ultrasound. Emphasis will be on the use of ultrasound in emergency medicine as a diagnostic tool and in procedural guidance. (H/P/F grading only.) Effective: 2008 Fall Quarter.

EMR 450—Ambulatory Elective in Emergency Medicine (3-18)
Variable. Restricted to MS4 students in good standing; externships/away rotations only. Credit will be given for approved non-AI Emergency Medicine courses at other institutions to which there is not an equal learning experience at UC Davis. May be repeated up to 2 times. (H/P/F grading only.) Effective: 2016 Fall Quarter.

EMR 455A—Focus on POCUS A (6)
Clinical Activity—30 hours. Prerequisite(s): Consent of Instructor. Directed towards gaining a greater proficiency of point-of-care ultrasound. Particularly useful for those pursuing careers that use this modality heavily in clinical practice such as primary care, pediatrics, emergency medicine, critical care, physical medicine and rehabilitation, etc. (H/P/F grading only.) Effective: 2017 Summer Quarter.

EMR 455B—Focus on POCUS B (6)
Clinical Activity—30 hours. Prerequisite(s): Consent of Instructor. Directed towards gaining a greater proficiency of point-of-care ultrasound. Particularly useful for those pursuing careers that use this modality heavily in clinical practice such as primary care, pediatrics, emergency medicine, critical care, physical medicine and rehabilitation, etc. (H/P/F grading only.) Effective: 2017 Summer Quarter.

EMR 465—Externship in Emergency Medicine (3-9)
Clinical Activity—36 hours; Lecture/Discussion—4 hours. Prerequisite(s): Satisfactory completion of Medicine, Surgery and Pediatrics. Students complete clinical shifts in the Emergency Department, functioning as Acting Intern. Treat a wide variety of patients and problems under the supervision of the EM Attending. Students are expected to take focused histories and present in clear, concise fashion. May be repeated for credit No Limit. (H/P/F grading only.) Effective: 2017 Fall Quarter.

EMR 470—Pediatric Emergency Medicine Clerkship (3-6)
Clinical Activity—36 hours; Lecture/Discussion—4 hours. Prerequisite(s): Satisfactory completion of Medicine, Surgery, and Pediatrics. Restricted to fourth-year medical student in good standing only. See patients in the Pediatric area of the Emergency Department under the supervision of an Emergency Medicine Attending. Emphasis on recognition and management of the acutely ill pediatric patient and treatment of common pediatric complaints. (H/P/F grading only.) Effective: 2017 Fall Quarter.

EMR 480—Understanding Health Policy: A Focus on Analysis and Translation (1-6)
Discussion—16 hours; Independent Study—10 hours; Lecture—4 hours. Prerequisite(s): Consent of Instructor. The paradigm of healthcare delivery in the US is changing rapidly. To prepare the next generation of physician leaders, this course will provide students with the skills, tools, and knowledge needed to impact decisions made at the policy level. (H/P/F grading only.) Effective: 2015 Fall Quarter.

EMR 490—Emergency Procedures Elective (3)
Discussion/Laboratory—24 hours; Independent Study—4 hours; Tutorial—4 hours; Web Virtual Lecture—8 hours. Prerequisite(s): Current basic life support (BLS) certification. Restricted to fourth-year medical student in good standing only. Simulator-based skills training for emergency procedures. Topics include airway management, central venous access, chest tube placement, and general critical care resuscitation skills. (P/F grading only.) Effective: 2010 Summer Quarter.

EMR 493A—Cardiac Arrest, Resuscitation and Repurfusion SSM (3)
Clinical Activity—4 hours; Laboratory—16 hours; Lecture—5 hours; Lecture/Lab—10 hours. Prerequisite(s): Consent of Instructor. Restricted to UC Davis School of Medicine students only. Special Studies Module, a four week course
specific to the topics of Cardiac Arrest, Resusciatation and Repurfusion. (H/P/F grading only.) Effective: 2010 Summer Quarter.

**EMR 493B—Cardiac Arrest, Resuscitation and Repurfusion SSM (3)**
Clinical Activity—4 hours; Laboratory—16 hours; Lecture—5 hours; Lecture/Lab—10 hours. Prerequisite(s): Consent of Instructor. Restricted to UC Davis School of Medicine students only. Special Studies Module, a four week course specific to the topics of Cardiac Arrest, Resusciation and Repurfusion. (H/P/F grading only.) Effective: 2010 Summer Quarter.

**EMR 499—Research (2-18)**
Laboratory. Prerequisite(s): Consent of Instructor. Elective where topics may be selected in either basic or clinical research areas of Emergency and/or Critical Care Medicine. The goals will be tailored to each individual student. Enrollment requires prior discussion and consent of instructor. (H/P/F grading only.) Effective: 1997 Winter Quarter.

**SOM Courses | ENM**

**Courses in ENM:**

**ENM 192—Internship in Endocrinology (1-12)**
Internship—3-36 hours. Prerequisite(s): Upper division standing; approval of project by preceptor prior to internship. Supervised work experience in endocrinology. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 1997 Winter Quarter.

**ENM 299—Research (1-12)**
Variable. Prerequisite(s): Consent of Instructor. Endocrinology research. (S/U grading only.) Effective: 1997 Winter Quarter.

**ENM 460—Endocrinology Clinical Clerkship (3-18)**
Clinical Activity. Prerequisite(s): IMD 430; And/or consent of instructor. Limited enrollment. Participation with members of subspecialty service in the initial evaluation, work-up, management and follow-up of patients with endocrinologic disorders. Limited enrollment. (H/P/F grading only.) Effective: 1997 Winter Quarter.

**ENM 465—Clinical Nutrition Clerkship (3-18)**
Clinical Activity—30 hours. Prerequisite(s): IMD 430; Consent of IOR. In-depth experience in assessment and monitoring of nutritional support of patients whose illnesses are complicated by malnutrition and of patients with problems in under-nutrition due to various illnesses. May be repeated for credit. (H/P/F grading only.) Effective: 1997 Winter Quarter.

**ENM 480—Insights in Endocrinology (1-3)**
Clinical Activity—3-9 hours. Prerequisite(s): Consent of Instructor. Student in good academic standing. First- or second-year students observe in morning Endocrine and Diabetes clinics and attend bi-weekly noon and afternoon endocrine conferences. They also give brief endocrine physiology oral presentation to the endocrine group. (H/P/F grading only.) Effective: 1997 Winter Quarter.

**ENM 499—Research (1-12)**
Variable. Prerequisite(s): Consent of Instructor. (H/P/F grading only.) Effective: 1997 Winter Quarter.

**SOM Courses | GAS**

**Courses in GAS:**

**GAS 192—Internship in Gastroenterology (1-12)**
Internship—3-36 hours. Prerequisite(s): Upper division standing; approval of project by preceptor prior to internship. Supervised work experience in gastroenterology. May be repeated for credit up to 12 units. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 1997 Winter Quarter.

**GAS 299—Research (1-12)**

**GAS 460—Gastroenterology Clinical Clerkship (3-18)**
Clinical Activity—30 hours. Prerequisite(s): Consent of Instructor. Completion of third-year of medical school. Work-up, manage, and follow-up new patients on active inpatient consulting service. Gastroenterology/Hepatology patients. Daily rounds with attending physician. May be repeated for credit. (H/P/F grading only.) Effective: 2013 Summer Quarter.
GAS 480—Insights in Gastroenterology (1-3)
Clinical Activity—3-9 hours. Prerequisite(s): Consent of Instructor. Student in good academic standing. To gain insight in clinical activities of Gastroenterology Division through attendance at any of the following: endoscopic procedures, ward rounds, outpatient clinic, and G.I. grand rounds. (H/P/F grading only.) Effective: 1997 Winter Quarter.

GAS 499—Research (1-12)
Clinical Activity. Prerequisite(s): Consent of Instructor. Medical student status. Part-time participation in active clinical and basic research projects. Some will involve both patient care and relevant laboratory procedures. Basic research includes liver metabolism, cancer markers, porphyrias diet and cancer, folate metabolism. May be repeated for credit. May be repeated for credit. (H/P/F grading only.) Effective: 1997 Winter Quarter.

SOM Courses | GMD

Courses in GMD:

GMD 192—Internship in General Medicine (1-12)
Internship—3-36 hours. Prerequisite(s): Upper division standing; approval of project by preceptor prior to internship. Supervised work experience in general medicine. May be repeated for credit up to 12 units. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 1997 Winter Quarter.

GMD 291—Seminars in Human Health Services Research and Clinical Epidemiology (1)
Seminar—1 hour. Critical review, evaluation, and discussion of research in health services and clinical epidemiology. Presentation of statistical, epidemiologic, and econometric methods. Students present their own research and critique the work of others. May be repeated for credit. May be repeated for credit. (Same course as EPI 291.) (S/U grading only.) Effective: 1998 Fall Quarter.

GMD 460—General Medicine Consults (1-18)
Clinical Activity—1-18 hours; Variable—1-18 hours. Prerequisite(s): Fourth-year medical students with consent of instructor; a general medicine clerkship. Limited enrollment. Supervised opportunity to see entire spectrum of medical problems encountered by a general internist. Student spends time in General Medicine Clinic and on the General Medicine Consult Service. Consultation Service is particularly concerned with medical evaluation of surgical patients. (H/P/F grading only.) Effective: 1997 Winter Quarter.

GMD 470—Health Care Ethics (3-9)
Discussion/Laboratory—1 hour; Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Guided independent study of issues in biomedical ethics, with discussion of readings that are based on student interests and needs. Participation in ethics rounds. (Same course as NRS 470.) (H/P/F grading only.) Effective: 2012 Spring Quarter.

GMD 485—Introduction to Health Care Ethics (1)
Lecture. Prerequisite(s): Medical student in good standing. Introduction to concepts and methods of healthcare ethics. Emphasis on problems and methods. (H/P/F grading only.) Effective: 1997 Fall Quarter.

GMD 499—General Medicine Research (1-18)
Clinical Activity—8-40 hours; Discussion—3 hours. Prerequisite(s): Consent of Instructor. Student will be involved in a clinical research problem within the areas, interest and expertise of members of Division of General Internal Medicine. Alternatively, the research effort will be directed toward investigation of a clinical problem of general medical interest. May be repeated for credit. (H/P/F grading only.) Effective: 1997 Winter Quarter.

SOM Courses | HON

Courses in HON:

HON 199—Research in Hematology-Oncology (1-5)
Laboratory. Prerequisite(s): Consent of Instructor. Upper division standing. Experience in laboratory research. (P/NP grading only.) Effective: 1997 Winter Quarter.

HON 298—Topics in Hematology (1-4)
Variable. Prerequisite(s): One year of graduate work and/or consent of instructor. Basic concepts of the physiology of the hematopoietic organ, the pathophysiology of hematopoietic disease, and concepts of therapeutics will be offered for study. The specific topics to be dictated by the interest and background of the students. Effective: 1997 Winter Quarter.
HON 299—Research (1-12)
Variable. Prerequisite(s): Consent of Instructor. Laboratory investigation contributing to the dissertation for a graduate degree. (S/U grading only.) Effective: 1997 Winter Quarter.

HON 420—Oncology (4)
Lecture/Discussion—2 hours. Prerequisite(s): Approval by the SOM Committee on Student Promotions. Restricted to Medical student only; students must pass all Year 1 SOM courses. Covers the principles of oncology and the pathophysiology of specific, common cancers correlated with organ systems pathophysiology and systemic pathology courses. (P/F grading only.) Effective: 2015 Fall Quarter.

HON 460—Hematology-Oncology Consult Clerkship (6-12)
Clinical Activity. Prerequisite(s): Consent of Instructor. Fourth-year medical student in good academic standing. Limited enrollment. Acting intern on inpatient hematology/oncology ward service. May be repeated for credit. Limited enrollment. May be repeated for credit. (H/P/F grading only.) Effective: 1997 Winter Quarter.

HON 461—Hematology-Oncology Consult Clerkship (6-12)
Clinical Activity. Prerequisite(s): Consent of Instructor. Fourth-year medical student in good academic standing. Limited enrollment. Student is an integral member of the inpatient hematology and oncology consult service, the bone marrow service, and will attend all conferences sponsored by the Division. May be repeated for credit. Limited enrollment. May be repeated for credit. (H/P/F grading only.) Effective: 1997 Winter Quarter.

HON 462—Hematology-Oncology Ambulatory Clerkship (3-18)
Clinical Activity—30 hours. Prerequisite(s): Consent of Instructor. Fourth-year medical student in good academic standing. Limited enrollment. Outpatient rotations in related clinics. Participation with members of the subspecialty service in the initial clinical evaluation, work-up, management and follow-up of the patient with hematologic or oncologic disorders. May be repeated for credit. (H/P/F grading only.) Effective: 2011 Winter Quarter.

HON 493—Cancer as a Process (1-6)
Auto Tutorial—6 hours; Clinical Activity—14 hours; Independent Study—10 hours; Seminar—10 hours. Prerequisite(s): Consent of Instructor. Restricted to UC Davis School of Medicine students only. Covers cancer as a process, beginning with risks and prevention, preneoplasia, microinvasion, treatment options, metastases and systemic therapy, pain medicine and palliative care, and cancer communication. Format includes traditional lectures, student-led case discussions, and problem-based learning. (H/P/F grading only.) Effective: 2012 Summer Quarter.

HON 499—Research (1-12)
Variable. Prerequisite(s): Consent of Instructor. (H/P/F grading only.) Effective: 1997 Winter Quarter.

SOM Courses | IDI

Courses in IDI:

IDI 141—Infectious Diseases of Humans (1)
Lecture—1 hour. Prerequisite(s): Introductory knowledge in biology and chemistry recommended. Course integrates information on biological and molecular nature of the causative organism, modern diagnostics, treatment and prevention strategies, and the role of infectious diseases in contemporary society and throughout human history. (P/NP grading only.) Effective: 1997 Winter Quarter.

IDI 192—Research Internship in Internal Medicine (1-12)
Internship—3-36 hours. Supervised work experience in the division of Infectious Diseases. Undergraduates will have an opportunity to acquire research experience in clinical settings. May be repeated for credit up to 12 units. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 1997 Winter Quarter.

IDI 199—Infectious Diseases Research (1-5)
Variable. Prerequisite(s): Consent of Instructor. Chemistry through organic chemistry (in addition, physical and biochemistry preferred), biology through basic bacteriology (in addition, microbiology and immunology preferred). Discrete problem requiring reading and actual manual effort in solution will be assigned to each student. Progress and results will be reviewed at intervals with instructor and via seminar presentation. (P/NP grading only.) Effective: 1997 Winter Quarter.

IDI 211—Epidemiology and Prevention of Infectious Diseases (3)
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): EPI 205B; (EPI 207; or IMD 421). Infectious disease epidemiology and prevention, with equal emphasis on human and veterinary diseases. Major categories of infectious diseases by mode of transmission. Effective: 2002 Spring Quarter.
IDI 299—Research in Infectious Diseases (1-12)
Variable. Prerequisite(s): Consent of Instructor. Laboratory investigation contributing to the dissertation for a graduate degree. (S/U grading only.) Effective: 1997 Winter Quarter.

IDI 440—Introduction to AIDS and Related Disorders (1.5-6)
Clinical Activity—30 hours; Discussion—10 hours. Prerequisite(s): First- and second-year medical students must be in good academic standing and have consent from the instructor. Familiarizes students with the diagnosis and treatment of individuals infected with the human immunodeficiency virus. Students will interview patients, observe patient care and participate in ongoing clinic research as well as examine alternative lifestyles. May be repeated for credit. May be repeated for credit. (H/P/F grading only.) Effective: 2005 Spring Quarter.

IDI 450—Clinical and Social Care of the Injection Drug User (1-4)
Clinical Activity—3 hours; Lecture—1 hour. Prerequisite(s): Consent of Instructor. First- and second-year medical students in good academic standing. Lecture and guided clinical practice in a supervised clinical setting, focusing on the social and medical aspects of health care for injection drug users. May be repeated for credit up to 24 units. May be repeated up to 24 unit(s). (H/P/F grading only.) Effective: 1999 Fall Quarter.

IDI 460—Infectious Diseases Clinical Clerkship (3-6)
Clinical Activity. Prerequisite(s): Successful completion of two years of study in an accredited medical school. Limited enrollment with priority to fourth-year medical students. Patients ill with infectious diseases, including AIDS, will be evaluated and presented at rounds and case conferences. Patients are also seen in the Infectious Diseases Clinic. Instruction in clinical microbiology and the proper use of the laboratory will be provided. (H/P/F grading only.) Effective: 1997 Winter Quarter.

IDI 493—Correctional Medicine SSM - Evaluation of HIV and Hepatitis C Patients (6)
Clinical Activity—30 hours; Discussion—5 hours. Primary agenda focuses on the evaluation of treatment of HIV and Hepatitis C patients in the correctional environment. (H/P/F grading only.) Effective: 2016 Fall Quarter.

IDI 499—Research Topics in Infectious Disease (2-12)
Variable. Prerequisite(s): Successful completion of the first-year of study in School of Medicine, graduate students (approved for graduate credit), and/or consent of instructor. Discrete problem requiring reading and actual manual effort in solution will be assigned to each student. Progress and results to be reviewed at intervals with instructor and via seminar presentation. (H/P/F grading only.) Effective: 1997 Winter Quarter.

SOM Courses | NEP

Courses in NEP:

NEP 192—Internship in Nephrology (1-12)
Internship—3-36 hours. Prerequisite(s): Upper division standing; approval of project by preceptor prior to internship. Supervised work experience in nephrology. May be repeated for credit up to 12 units. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 1997 Winter Quarter.

NEP 299—Nephrology Research (1-12)
Variable. Prerequisite(s): Consent of Instructor. Research topics in Nephrology. May be repeated for credit. (S/U grading only.) Effective: 2002 Summer Quarter.

NEP 444—Curriculum Design for Doctoring (1)
Project (Term Project)—2 hours; Seminar—1 hour. Prerequisite(s): Consent of Instructor. Second year standing in School of Medicine. Design of Doctoring curriculum for medical students in focused topic areas to be announced annually. Students will design sessions, consider resource needs, and work with IORs to initiate the curriculum. (P/F grading only.) Effective: 2007 Summer Quarter.

NEP 460—Nephrology and Fluid Balance (3-6)
Clinical Activity—4 hours; Lecture/Discussion—10 hours. Prerequisite(s): Consent of Instructor. Completion of third-year medical school; completion of Medicine Core Clerkship. Limited enrollment. Active participation in all inpatient/ outpatient clinical activities, attendance at specific lectures and conferences at UCD Medical Center covering the field of nephrology and fluid-electrolyte disorders. (H/P/F grading only.) Effective: 2001 Summer Quarter.

NEP 499—Research in Nephrology (3-18)
Variable. Prerequisite(s): Consent of Instructor. Individual arrangement. Independent laboratory research on a specific problem related to biochemical or immunologic causes of renal disease and/or uremic disorders in humans or animals. May be repeated for credit. (H/P/F grading only.) Effective: 2017 Fall Quarter.

SOM Courses | PUL
Courses in PUL:

**PUL 192—Internship in Pulmonary Medicine (1-12)**
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Upper division standing; approval of project by preceptor prior to internship. Supervised work experience in pulmonary medicine. May be repeated for credit up to 12 units. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 1997 Winter Quarter.

**PUL 299—Pulmonary Disease Research (1-12)**
Laboratory. Prerequisite(s): Consent of Instructor. By arrangement only. Pulmonary disease research activity with focus in inhalation toxicity, oxidants or lung biochemistry, and cell and molecular biology. (S/U grading only.) Effective: 1997 Winter Quarter.

**PUL 460—Comprehensive Pulmonary Medicine Clerkship (3-6)**
Clinical Activity—40 hours. Prerequisite(s): Completion of second year of medical school and/or consent of instructor; completion of Internal Medicine Clerkship. Rotation intended to provide a comprehensive student education in Pulmonary Medicine. Students will participate in hands on clinical education, as well as completing an assigned curricula. Intended for students pursuing Internal Medicine & Primary Care careers. May be repeated for credit. (H/P/F grading only.) Effective: 2013 Summer Quarter.

**PUL 461—Critical Care Clinical Clerkship (3-6)**
Clinical Activity—40 hours. Prerequisite(s): Completion of second year of medical school and/or consent of instructor; completion of Internal Medicine and Surgical Clerkships. Rotation intended to provide student education in the Critical Care Management of sub-specialty patients. May be repeated for credit. (H/P/F grading only.) Effective: 2013 Summer Quarter.

**PUL 462—Pulmonary Consult Clerkship (3-6)**
Clinical Activity—35 hours. Prerequisite(s): Completion of second year of medical school and/or consent of instructor; completion of Internal Medicine Clerkship. Similar to course 460. Rotation designed for students interested in learning pulmonary medicine, but who desire more variety in their clerkships, and do not desire the comprehensive experience offered by a four-week pulmonary rotation. May be repeated for credit. (H/P/F grading only.) Effective: 2013 Summer Quarter.

**PUL 470—Practicum in Care of the Terminally Ill (3-6)**
Clinical Activity—35 hours; Seminar—5 hours; Variable—3-6 hours. Prerequisite(s): Consent of Instructor. Restricted to fourth-year Medical students in good standing. Work with hospice interdisciplinary team. Direct experience in the care of patients with illnesses where no cure is possible. Emphasis on symptom relief, end of life issues, physician assisted suicide. (H/P/F grading only.) Effective: 2010 Spring Quarter.

**PUL 475—Encounters in Ethics in the ICU (3-6)**
Clinical Activity—12 hours; Independent Study—6 hours; Lecture/Discussion—6 hours. Prerequisite(s): Fourth-year Medical Student. Care for critically ill adults with complex medical disease carries with it unique ethical roles and duties for the physician. May be repeated for credit. (H/P/F grading only.) Effective: 2011 Summer Quarter.

**PUL 480—Pulmonary-Critical Care Medicine Insights (1-3)**
Clinical Activity—3-9 hours. Prerequisite(s): Consent of Instructor. Student in good academic standing. Attend respiratory outpatient clinics and in-patient pulmonary consultation rounds and medical intensive care rounds. Introduction to diagnosis and treatment of common pulmonary problems. (H/P/F grading only.) Effective: 1997 Winter Quarter.

**PUL 499—Research (1-12)**
Variable. Prerequisite(s): Consent of Instructor. Research opportunity in Pulmonary Medicine. May be repeated for credit. (H/P/F grading only.) Effective: 2017 Fall Quarter.

**SOM Courses | RAL**

Course in RAL:

**RAL 099—Directed Research Immunology (1-5)**
Laboratory. Prerequisite(s): Consent of Instructor. Independent research will be encouraged in basic immunology, including the role of the cellular immune system in oncogenesis. (P/NP grading only.) Effective: 1997 Winter Quarter.

**RAL 192—Internship in Rheumatology-Allergy (1-12)**
Internship—3-36 hours. Prerequisite(s): Upper division standing; approval of project by preceptor prior to internship. Supervised work experience in rheumatology-allergy. May be repeated for credit up to 12 units. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 1997 Winter Quarter.
RAL 199—Directed Research in Immunology (1-5)
Laboratory. Prerequisite(s): Consent of Instructor. Independent research will be encouraged in basic immunology, including the role of the cellular immune system in oncogenesis. (P/NP grading only.) Effective: 1997 Winter Quarter.

RAL 209—Current Topics in Immunology: From Presentations to Grants (3)
Lecture—1 hour; Project (Term Project)—1 hour; Term Paper/Discussion—1 hour. Prerequisite(s): IMM 201 Current developments in various aspects of immunology and their interrelationships. Focus on areas of immunology not currently covered in the basic and advanced immunology courses. Oral presentation, written review and grant preparation. Effective: 2008 Winter Quarter.

RAL 298—Topics in Rheumatology and Clinical Immunology (1-5)
Laboratory. Prerequisite(s): Consent of Instructor. Library and/or laboratory work as required. (S/U grading only.) Effective: 1997 Winter Quarter.

RAL 299—Research in Autoimmune Disease (1-12)
Laboratory. Prerequisite(s): Consent of Instructor. Independent research will be encouraged in both animal models of human disease (including congenitally athymic [nude], asplenic, and New Zealand mice) and the cellular immune system of patients with systemic lupus erythematosus, Sjögrens syndrome, polymyositis and drug hypersensitivity. (S/U grading only.) Effective: 1997 Winter Quarter.

RAL 460—Rheumatology Clinical Clerkship (1-18)
Clinical Activity—2-40 hours. Prerequisite(s): MDS 431 and Consent of Instructor. Participation with members of the subspecialty service in the diagnosis and therapeutic management of patients with rheumatologic diseases. May be repeated for credit. (H/P/F grading only.) Effective: 2009 Spring Quarter.

RAL 461—Allergy Clinical Clerkship (3-18)
Clinical Activity. Prerequisite(s): Consent of Instructor. Completion of second year of medical school. Student will work with practicing allergist in daily work with patients and participate in weekly allergy clinic and teaching conferences. Study of the literature. Will see patients with problems in clinical immunology, immunodeficiency, asthma, allergic rhinitis. (H/P/F grading only.) Effective: 1997 Winter Quarter.

RAL 480—Insights in Rheumatology (1-3)
Clinical Activity—3-9 hours. Prerequisite(s): Consent of Instructor. Student in good academic standing. Participation in rheumatology consultation rounds, rheumatic disease clinics and conferences with supervised readings in rheumatology. (S/U grading only.) Effective: 1997 Winter Quarter.

RAL 499—Research (1-12)
Variable—2-40 hours. Prerequisite(s): Medical student with consent of instructor. Part-time participation in active clinical and basic research projects which can involve both patient care and relevant laboratory procedures. Students can gain experience in clinical medicine and clinical investigation. May be repeated for credit. (H/P/F grading only.) Effective: 2009 Spring Quarter.

SOM Courses | MMI

Courses in MMI:

MMI 098—Directed Group Study (1-5)
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. Group Study in Medical Microbiology and Immunology; primarily for lower division students. Directed reading and discussion on selected topics. May be repeated for credit when topic differs. (P/NP grading only.) Effective: 2019 Winter Quarter.

MMI 099—Special Study for Undergraduates (1-5)
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. Restricted to lower division standing. Special study for lower division students. May be repeated for credit. (P/NP grading only.) Effective: 2019 Winter Quarter.

MMI 130—Medical Mycology (2)
Lecture—2 hours. Prerequisite(s): Consent of Instructor. A course in pathogenic microbiology. Various aspects of pathogenic fungi, particularly affecting humans, will be discussed including epidemiology, pathogenesis and pathology, diagnosis and therapy. (Same course as MMI 430.) Effective: 1997 Winter Quarter.

MMI 188—Human Immunology (3)
Lecture—3 hours. Prerequisite(s): Undergraduate level introductory Biology course. Human immune system and mechanisms of immunity. Basic components and function of immune system. Molecular basis of immune response; basic cellular and molecular mechanisms. Interactions between cells of immune system producing immune responses; regulating molecules. Effective: 2004 Spring Quarter.
MMI 192—Internship in Medical Microbiology (1-12)
Internship—3-36 hours. Prerequisite(s): Upper division standing; approval of project prior to period of internship. Supervised work experience in medical microbiology and related fields. (P/NP grading only.) Effective: 1997 Winter Quarter.

MMI 194H—Senior Honors Project in Medical Microbiology and Immunology (5)
Independent Study—15 hours. Prerequisite(s): MMI 199; and Consent of Instructor. Project in research related to immunology of medically important viruses. Development of a hypothesis-driven project, performance of experimental protocols and preparation of graphical representation of original data. Requires oral and written presentation of research results. May be repeated up to 3 time(s) with consent of instructor. (P/NP grading only.) Effective: 2004 Spring Quarter.

MMI 198—Group Study in Medical Microbiology (1-5)
Variable. Prerequisite(s): Consent of Instructor. Upper division standing. Directed reading and discussion and/or laboratory investigation on selected topics. (P/NP grading only.) Effective: 1997 Winter Quarter.

MMI 199—Research in Medical Microbiology (1-5)
Variable. Prerequisite(s): Consent of Instructor. Upper division standing. Individual research. (P/NP grading only.) Effective: 1997 Winter Quarter.

MMI 200D—Mechanisms for Microbial Interactions with Hosts (3)
Lecture/Discussion—3 hours. Prerequisite(s): MIB 200A; or Consent of Instructor. Study of mechanisms involved in microbial interactions within a host environment. The following principles are basic to understanding these interactions: host recognition, invasion, competition and growth, and host defense. Effective: 1997 Winter Quarter.

MMI 210A—Critical Analysis of Contemporary Research on Animal Models of Human Infectious Disease (1)
Lecture/Discussion—1 hour. Prerequisite(s): Consent of Instructor. Students funded by the Animal Models of Infectious Diseases Training Grant. Limited enrollment. Topics will include diverse vertebrate and invertebrate models of human infectious diseases. May be repeated for credit. (S/U grading only.) Effective: 2013 Fall Quarter.

MMI 210B—Comparative Analysis of Animal Models of Human Infectious Diseases (1)
Lecture/Discussion—1 hour. Prerequisite(s): Students funded by the Animal Models of Infectious Diseases Training Grant; others by consent of instructor. Limited enrollment. Compares the major vertebrate and invertebrate animal models that are used most commonly to study human infectious disease, including mouse, non-human primate, Caenorhabditis elegans, and drosophila. May be repeated for credit. (S/U grading only.) Effective: 2014 Winter Quarter.

MMI 215—Medical Parasitology (3)
Discussion—1.5 hours; Lecture—1.5 hours. Prerequisite(s): Graduate student with consent of instructor. Epidemiology, pathogenesis, diagnostic methods and current literature discussion of protozoa, helminths and arthropods of medical importance. Effective: 2011 Spring Quarter.

MMI 280—The Endogenous Microbiota in Health and Disease (3)
Lecture—3 hours. Prerequisite(s): Graduate standing. Recent insights into the microbial communities inhabiting mucosal surfaces, and will discuss how the composition of these communities contributes to normal development, metabolism, education of the immune system, and disease susceptibility. Offered in spring quarter; even years. Effective: 2016 Spring Quarter.

MMI 291—Seminar in Microbiology and Immunology (1)
Seminar—1 hour. Restricted to students with upper division or graduate standing. Research seminars on current topics in microbiology and immunology. May be repeated for credit when topic differs. (S/U grading only.) Effective: 2007 Spring Quarter.

MMI 298—Group Study in Medical Microbiology and Immunology (1-5)
Variable. Prerequisite(s): Consent of Instructor. Open to graduate students. Directed reading and discussion and/or laboratory investigation on selected topics. Sections 1, 2, 4, 5 are S/U grading only. (S/U grading only.) Effective: 1997 Winter Quarter.

MMI 299—Research (1-12)
Variable. Prerequisite(s): Consent of Instructor. Open to graduate students. Laboratory investigation contributing to the dissertation for a graduate degree. (S/U grading only.) Effective: 1997 Winter Quarter.

MMI 410—Physician Scientist Molecular Medicine Journal Club (1)
Lecture/Discussion—1 hour. Weekly seminars by students on research articles in current literature. Topics/articles to
be selected by instructors to include a broad range of frontiers in biomedical literature. May be repeated for credit. (H/P/F grading only.) Effective: 2004 Fall Quarter.

**MMI 430—Medical Mycology (2)**
Lecture—2 hours. Prerequisite(s): Consent of Instructor. A course in pathogenic microbiology. Various aspects of pathogenic fungi, particularly affecting humans, will be discussed including epidemiology, pathogenesis and pathology, diagnosis and therapy. (Same course as MMI 130.) (H/P/F grading only.) Effective: 1997 Winter Quarter.

**MMI 480A—Medical Immunology (2.5)**
Discussion/Laboratory—0.5 hours; Lecture—2 hours. Restricted to Medical students only. Helping to understand the immune system, the nomenclature and functional significance of the tissues, cells, proteins and genes of the immune system, as well as the normal regulatory mechanisms and pathologic outcomes related to the immune response. (P/F grading only.) Effective: 2016 Spring Quarter.

**MMI 480B—Medical Microbiology (5.5)**
Discussion/Laboratory—1 hour; Lecture—2.75 hours. Restricted to Medical students only. Discussion of the diseases caused by infectious agents includes their pathogenesis, clinical manifestations, diagnosis, treatment epidemiology and prevention. Covers the general properties of and diagnostic techniques for bacteria, fungi and viruses. (P/F grading only.) Effective: 2016 Spring Quarter.

**MMI 497T—Tutoring in Medical Microbiology (1-5)**
Tutorial—3-15 hours. Prerequisite(s): Consent of Instructor. Appropriate preparation in subject matter. Assist instructor by tutoring medical students in one of the departmental courses that is a component of the required curriculum of the School of Medicine. (H/P/F grading only.) Effective: 1997 Winter Quarter.

**MMI 498—Group Study in Medical Microbiology and Immunology (1-5)**
Variable. Prerequisite(s): Medical students with consent of instructor. Directed reading and discussion and/or laboratory investigation on selected topics. (H/P/F grading only) Effective: 1997 Winter Quarter.

**MMI 499—Research (1-12)**
Variable. Prerequisite(s): Medical students with consent of instructor. May be repeated for credit. (H/P/F grading only.) Effective: 2008 Winter Quarter.

**SOM Courses | MDS**

**Courses in MDS:**

**MDS 099—Special Study in Medicine for Undergraduates (1-5)**
Independent Study—3-15 hours. Prerequisite(s): Consent of Instructor. Participate in research projects relating to medicine with faculty in the School of Medicine. (P/NP grading only.) Effective: 1997 Fall Quarter.

**MDS 192—Medical Education Internship for Advanced Undergraduates (1-12)**
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Competency with computers. Enrollment dependent on availability of intern positions. Participate in projects related to curriculum development in support of curriculum for M.D. degree. Gain work experience and appreciation for innovative approaches to learning in basic and clinical sciences of medical education. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 1997 Winter Quarter.

**MDS 400—Summer Pre-Matriculation Program (2)**
Independent Study—15 hours; Lecture—14 hours; PE Activity—7 hours. Prerequisite(s): Consent of Instructor. Two week program provides students from diverse backgrounds an early introduction to learning skills that will facilitate success in medical school. (P/F grading only.) Effective: 2016 Summer Quarter.

**MDS 401—Applications of Computers to Medical Practice (2)**
Auto Tutorial—2 hours. Prerequisite(s): Enrollment in medical school. Proficiency in computer applications relative to practice of medicine, with emphasis on email, literature searching, file transfer, and hospital information services. Course given online, at home or in lab; time and place determined by student. (H/P/F grading only.) Effective: 1997 Winter Quarter.

**MDS 402—Clinical & Cultural Spanish (2)**
Independent Study—4 hours; Lecture—1 hour; Practice—1 hour. Prerequisite(s): Consent of Instructor. Medical students, nursing students and physician assistants students who are fluent Spanish speakers will learn a comprehensive set of medical vocabulary and cultural aspects related to the treatment of Spanish speaking patients. (P/F grading only.) Effective: 2015 Winter Quarter.
MDS 403—Science & Practice of Mindfulness and Compassion (1)
Independent Study—20 hours; Lecture/Discussion—10 hours. Course will examine current scientific evidence for
the effects of different mindfulness and compassion meditation practices in both healthy and clinical samples. (P/F
grading only.) Effective: 2015 Summer Quarter.

MDS 406—Endocrinology, Nutrition, Reproduction and Genetics (9.5)
Discussion/Laboratory—2.8 hours; Lecture—3.8 hours. Prerequisite(s): BCM 410A; HPH 400; and Consent of
Instructor. Restricted to Medical students only. Basic and pathophysiologic processes involved in human
reproductive and endocrine control systems, nutritional regulation, and foundational genetics across the lifespan.
Integrate information across these systems and use clinical reasoning process to identify and understand relevant
perturbations and diseases. May be repeated up to 3 time(s). (P/F grading only.) Effective: 2016 Winter Quarter.

MDS 411—Doctoring 1 (9)
Clinical Activity—1 hour; Discussion—1 hour; Lecture—1 hour. Prerequisite(s): Consent of Instructor. Small group
training in patient communication, interviewing techniques, physical exam and clinical identification. Outpatient
clinical experiences and didactic presentations also included. (P/F grading only.) Effective: 2017 Summer Quarter.

MDS 411B—Doctoring 1 (5)
Clinical Activity—1.5 hours; Discussion—1.5 hours; Lecture/Discussion—1.8 hours. Medical students only. Small, case-
based learning groups with training in patient communication and interviewing techniques, clinical identification
and problem solving, applications of social, psychological, cultural, bioethical, and basic science concepts to
patient case scenarios, outpatient clinical experiences and didactic presentations also included. (P/F grading only.) Effective: 2018 Winter Quarter.

MDS 411KA—ACE-PC Program Doctoring 1 (13)
Clinical Activity—5 hours; Lecture/Discussion—6 hours. Prerequisite(s): Consent of Instructor. Small case-based
learning groups with training in patient communication and interviewing techniques clinical identification
and problem solving applications of social psychological cultural bioethical and basic science concepts to patient case
scenarios outpatient clinical experiences and didactic presentations. (P/F grading only.) Effective: 2014 Summer Quarter.

MDS 411KB—ACE-PC Program Doctoring 1 (5)
Clinical Activity—4 hours; Lecture/Discussion—1 hour. Prerequisite(s): Consent of Instructor. Application of
multidisciplinary basic, social and clinical science to clinical cases in small groups. History, physical examination
with preceptors. Didactics in epidemiology, ethics, sexuality and clinical reasoning. Evaluation of professional
competencies, attitudes and skills needed in the practice of medicine. (P/F grading only.) Effective: 2015 Winter Quarter.

MDS 415—Population Health and Evidence-Based Medicine (2)
Discussion—4 hours; Lecture—12 hours. Prerequisite(s): Consent of Instructor. Focuses on the bedrock themes of
public health: populations and prevention. (P/F grading only.) Effective: 2017 Summer Quarter.

MDS 415—Population Health and Evidence-Based Medicine (2) Discontinued
Discussion—4 hours; Lecture—12 hours. Prerequisite(s): Consent of Instructor. Focuses on the bedrock themes of
public health: populations and prevention. (P/F grading only.) Effective: 2018 Summer Quarter.

MDS 415A—Population Health and Evidence-Based Medicine (2)
Discussion—4 hours; Lecture—12 hours. Prerequisite(s): Consent of Instructor. Introduces the fundamental concepts
and tools of population health, evidence-based medicine, and system science. (P/F grading only.) Effective: 2018 Summer Quarter.

MDS 415B—Critical Appraisal of Topics in Population Health (0.5)
Discussion—6 hours. Apply foundational skills to explore critical issues in 21st century public health, including
tobacco control, firearm violence, and obesity. In a series of small-group discussions “interpreting the medical
literature,” key concepts from epidemiology and biostatistics are reinforced while students are armed with specific
strategies for addressing high-risk behaviors in the context of population health. (P/F grading only.) Effective: 2018 Summer Quarter.
MDS 415C—Population Health and System Science (1.5)
Discussion—6 hours; Fieldwork—3 hours; Lecture—4 hours. Prerequisite(s): Consent of Instructor. Addresses the social, economic, cultural, policy-related, and environmental factors that affect the health of populations and individuals, and the role of health care systems (locally, regionally, nationally, and globally) in moderating the effects of these factors. Content builds on MDS 415A/B, the TeamPEACE (Teamwork for Professionalism, Ethics, and Cultural Enrichment) curriculum in Doctoring 1, and students' lived experience in UC Davis free clinics. (P/F grading only.) Effective: 2018 Summer Quarter.

MDS 416A—Clinical Skills (7)
Clinical Activity—1 hour; Discussion—1 hour; Lecture/Discussion—1 hour. First in a series of courses that span across the pre-clerkship curriculum designed to integrate the clinical teaching within the pre-clerkship curriculum at the UC Davis School of Medicine. In Year 1, students acquire the foundational knowledge, skills, and attitudes to succeed in medical training, including: history taking, physical exam, and interpersonal communication skills. (P/F grading only.) Effective: 2019 Summer Quarter.

MDS 416B—Clinical Skills B (7)
Clinical Activity—1 hour; Discussion—1 hour; Lecture—1 hour. Second in a series of courses designed to integrate the clinical teaching within the pre-clerkship curriculum at the UC Davis School of Medicine. In year 2, students build upon the foundation in clinical skills and professional behavior set out in year 1. The year 2 clinical skills course involves applying clinical skills to the caring for patients who present with active medical issues requiring further diagnostic investigation and therapeutic management. (P/F grading only.) Effective: 2019 Summer Quarter.

MDS 417A—Clinical Experiences A (1)
Clinical Activity—0.5 hours. Clinical Experiences longitudinal thread is designed to provide continued clinical exposure throughout the pre-clerkship curriculum at the UC Davis School of Medicine. In Year 1, students apply the basic physical exam and history taking skills to real-life patients in outpatient clinical settings. (P/F grading only.) Effective: 2019 Summer Quarter.

MDS 417B—Clinical Experiences B (1.5)
Clinical Activity—0.5 hours. Clinical Experiences longitudinal thread is designed to provide continued clinical exposure throughout the pre-clerkship curriculum at the UC Davis School of Medicine. In year 2, students use their growing knowledge and skill set to complete supervised encounters with real patients in the inpatient setting. In addition to practicing their physical exam and history taking skills, students apply their presentation and counseling skills in real-life encounters. (P/F grading only.) Effective: 2019 Summer Quarter.

MDS 418A—Health & Humanity A (2)
Lecture/Discussion—1 hour. Health and Humanity longitudinal thread is designed to integrate wellness, professionalism, and the behavioral sciences within the pre-clerkship curriculum at the UC Davis School of Medicine. Throughout Year 1, students acquire the foundational knowledge surrounding the social determinants of health, implicit bias, and cultural humility. (P/F grading only.) Effective: 2019 Summer Quarter.

MDS 420—Multisystem Clinical Presentations (0.5)
Extensive Problem Solving—15 hours; Independent Study—6 hours. Prerequisite(s): Consent of Instructor. Completion of Pathophysiology Block. Capstone course integrates coursework, knowledge, skills and experiential learning to enable the student to demonstrate a broad mastery of learning across the curriculum. (P/F grading only.) Effective: 2014 Winter Quarter.

MDS 421A—Doctoring 2 (6)
Discussion—1 hour; Internship—0.5 hours; Lecture/Discussion—1 hour. Prerequisite(s): Approval by the School of Medicine Committee on Student Progress; medical students only. Application of multidisciplinary basic, social and clinical science to clinical cases in small groups. History, physical examination with preceptors. Didactics in epidemiology, ethics, sexuality and clinical reasoning. Evaluation of professional competencies, attitudes and skills needed in the practice of medicine. (P/F grading only.) Effective: 2007 Summer Quarter.

MDS 421B—Doctoring 2 (6)
Discussion—1 hour; Internship—0.5 hours; Lecture/Discussion—1 hour. Prerequisite(s): Approval by the School of Medicine on Student Progress; medical students only. Application of multidisciplinary basic, social & clinical science concepts to cases in small groups. History, physical examination with preceptors. Didactics in epidemiology, ethics, sexuality, and clinical reasoning. Evaluation of professional competencies, attitudes and skills needed in the practice of medicine. (P/F grading only.) Effective: 2007 Summer Quarter.
MDS 421C—Doctoring 2 (6)
Discussion—1 hour; Internship—0.5 hours; Lecture/Discussion—1 hour. Prerequisite(s): Approval by the School of Medicine Committee on Student Progress; medical students only. Application of multidisciplinary basic, social and clinical science concepts to clinical cases in small group discussions facilitated by medical school faculty. Evaluation of professional competencies, attitudes and skills needed in the practice of clinical medicine. (P/F grading only.) Effective: 2007 Summer Quarter.

MDS 421KA—ACE-PC Program Doctoring 2 (6)
Discussion—1 hour; Internship—0.5 hours; Lecture/Discussion—1 hour. Prerequisite(s): MDS 411KA; MDS 411KB; Admission into ACE-PC. MDS 421KA-C are a year-long series of courses. Objectives and assessments have been accelerated to accommodate the students enrolled in the ACE-PC Program. Students will participate in all aspects of Doctoring 2, other than what was done in 411KA/KB. (P/F grading only.) Effective: 2015 Summer Quarter.

MDS 421KB—ACE-PC Program Doctoring 2 (6)
Discussion—1 hour; Internship—0.5 hours; Lecture/Discussion—1 hour. Prerequisite(s): Approval by the School of Medicine on Student Progress; medical students only. MDS 421KA-C are a year-long series of courses. Objectives and assessments have been accelerated to accommodate the students enrolled in the ACEPC Program. Students will participate in all aspects of Doctoring 2, other than what was done in 411KA/KB. (P/F grading only.) Effective: 2015 Summer Quarter.

MDS 421KC—ACE-PC Program Doctoring 2 (6)
Discussion—1 hour; Internship—0.5 hours; Lecture/Discussion—1 hour. Prerequisite(s): Approval by the School of Medicine Committee on Student Progress; medical students only. MDS 421KA-C are a year-long series of courses. Objectives and assessments have been accelerated to accommodate the students enrolled in the ACEPC Program. Students will participate in all aspects of Doctoring 2, other than what was done in 411KA/KB. (P/F grading only.) Effective: 2015 Summer Quarter.

MDS 428—Foundations of Bioethics (1)
Discussion—3 hours; Independent Study—16.5 hours; Lecture/Discussion—3 hours; Web Virtual Lecture—1 hour. Prerequisite(s): Consent of Instructor. Course will expose students to core content in bioethics and the law and introduce a framework for ethical decision-making, while emphasizing relationships between bioethics and clinical care. (P/F grading only.) Effective: 2014 Summer Quarter.

MDS 429—Transition to Clerkships (1)
Discussion—7 hours; Discussion/Laboratory—12 hours; Independent Study—2 hours; Workshop—13 hours. Incoming third-year medical students will participate in a variety of educational experiences designed to prepare them to begin their clerkship curriculum. Course content will be disseminated in large and small group settings. (P/F grading only.) Effective: 2015 Spring Quarter.

MDS 430—Introduction to Doctoring 3 (1)
Discussion/Laboratory—2 hours. Prerequisite(s): Approval by SOM Committee on Student Progress. Restricted to Medical students only. Application of multidisciplinary basic, social and clinical science concepts to clinical cases in small group discussions facilitated by medical school faculty. Evaluation of professional competencies, attitudes and skills needed in the practice of clinical medicine. (H/P/F grading only.) Effective: 2011 Spring Quarter.

MDS 430A—Doctoring 3 (1)
Discussion—3 hours. Prerequisite(s): Approval by SOM Committee on Student Progress. Restricted to Medical students only. Application of multidisciplinary basic, social and clinical science concepts to clinical cases in small group discussions facilitated by medical school faculty. Evaluation of professional competencies, attitudes and skills needed in the practice of clinical medicine. (H/P/F grading only.) Effective: 2015 Spring Quarter.

MDS 430B—Doctoring 3 (1)
Discussion—2 hours. Prerequisite(s): Approval by SOM Committee on Student Progress. Restricted to Medical students only. Application of multidisciplinary basic, social & clinical science concepts to clinical cases in small group discussions facilitated by medical school faculty. Evaluation of professional competencies, attitudes and skills needed in the practice of clinical medicine. (H/P/F grading only.) Effective: 2015 Spring Quarter.

MDS 430C—Doctoring 3 (1)
Discussion—2 hours. Prerequisite(s): Approval by SOM Committee on Student Progress. Restricted to Medical students only. Application of multidisciplinary basic, social & clinical science concepts to clinical cases in small group discussions facilitated by medical school faculty. Evaluation of professional competencies, attitudes and skills needed in the practice of clinical medicine. (H/P/F grading only.) Effective: 2015 Spring Quarter.
MDS 430D—Doctoring 3 (1)
Discussion—2 hours. Prerequisite(s): Approval by SOM Committee on Student Progress. Restricted to Medical students only. Application of multidisciplinary basic, social & clinical science concepts to clinical cases in small group discussions facilitated by medical school faculty. Evaluation of professional competencies, attitudes and skills needed in the practice of clinical medicine. (H/P/F grading only.) Effective: 2015 Summer Quarter.

MDS 435KA—ACE-PC Longitudinal Integrated Clerkship A (18)
Clinical Activity—45 hours; Discussion—4 hours; Independent Study—6 hours. Prerequisite(s): Consent of Instructor. Longitudinal Clerkship will combine the Internal Medicine, OBGYN, Pediatrics, Psychiatry and Surgery Clerkships for the ACE-PC Program. (H/P/F grading only.) Effective: 2016 Spring Quarter.

MDS 435KB—ACE-PC Longitudinal Integrated Clerkship B (21)
Clinical Activity—45 hours; Discussion—4 hours; Independent Study—6 hours. Prerequisite(s): Consent of Instructor. Longitudinal Clerkship will combine the Internal Medicine, OBGYN, Pediatrics, Psychiatry and Surgery Clerkships for the ACE-PC Program. (H/P/F grading only.) Effective: 2016 Spring Quarter.

MDS 435KC—ACE-PC Longitudinal Integrated Clerkship C (18)
Clinical Activity—45 hours; Discussion—4 hours; Independent Study—6 hours. Prerequisite(s): Consent of Instructor. Longitudinal Clerkship will combine the Internal Medicine, OBGYN, Pediatrics, Psychiatry and Surgery Clerkships for the ACE-PC Program. (H/P/F grading only.) Effective: 2016 Spring Quarter.

MDS 440—Doctoring 4 Teaching Fellowship (3)
Discussion—0.5 hours; Seminar—0.25 hours. Prerequisite(s): MDS 430A; MDS 430B; MDS 430C; MDS 430D; and Consent of Instructor. Restricted to Medical student only. Instruction on teaching methodology and pedagogy. Mentored teaching of junior medical students in seminar, lecture, and bedside. (H/P/F grading only.) Effective: 2015 Spring Quarter.

MDS 441—Combined Ophthalmology and Otolaryngology Clerkship (6)
Clinical Activity—4 hours. Prerequisite(s): Approval by Committee on Student Promotion and Evaluation. Fundamental knowledge of ophthalmology and otolaryngology for the treatment of eye, ear, nose and throat problems at a level of training of general physicians, including when to refer patients to a specialist. (H/P/F grading only.) Effective: 1997 Summer Quarter.

MDS 445—Race and Health in the United States (3-6)
Discussion—4 hours. Interprofessional course facilitates the professional and personal developmental of medical students and other health professions students who think they would like to be leaders in securing equity in population health and work environments. (P/F grading only.) Effective: 2017 Fall Quarter.

MDS 449—Transition to Residency (3-6)
Clinical Activity. Prerequisite(s): Consent of Instructor. Transition to Residency program addresses the graduating medical students need to improve clinical skills necessary for the first six months of residency and unmet graduation competencies in our competency-based curriculum. (P/F grading only.) Effective: 2017 Fall Quarter.

MDS 450—Introduction to UCD Medical Center (1)
Seminar. Prerequisite(s): Second-year medical student. Designed to assist medical student in transition from classroom to hospital setting. (H/P/F grading only.) Effective: 1997 Winter Quarter.

MDS 455—Student Run Clinics (1-3)
Clinical Activity—3-9 hours. Open to medical students in good standing. Will learn counseling, diagnosis and treatment of patients with chronic and acute disease under supervision of physician. Meet all requirements and prerequisites of the particular clinic within which they work. May be repeated for credit. (P/F grading only.) Effective: 2011 Summer Quarter.

MDS 460CR—Introduction to Clinical Research (2)
Independent Study—3 hours; Lecture—2 hours. Restricted to completion of M.D., D.D.S, D.M.D., O.D., N.D., Pharm.D., D.V.M., Ph.D., or D.N.S. in nursing; application and acceptance into the Clinical Research Graduate Group, K30 program Introduction to the CRGG program and overview of major clinical research topics. Overview of basic clinical skills needed to accomplish CRGG mentored research project. (P/F grading only.) Effective: 2006 Summer Special Session.

MDS 461CR—Strategies for Grant Writing (2)
Lecture—2 hours. Restricted to completion of M.D., D.D.S, D.M.D., O.D., N.D., Pharm.D., D.V.M., Ph.D., or D.N.S. in nursing; application and acceptance into the Clinical Research Graduate Group, K30 program. Practical skills and strategies to create successful grant proposals in the NIH style and format. Generating ideas, identifying and
accessing research resources, grant components, specific aims, background and significance, preliminary studies, budgets, and bios. Matriculation through UC system, and resubmissions. (S/U grading only.) Effective: 2007 Spring Quarter.

**MDS 462CR—Introduction to Clinical Epidemiology and Study Design (3)**
