Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR). Shakespeare's representations of the classical world in the light of selected ancient texts and Renaissance conceptions of Antiquity, with special attention to the depiction of politics and history. GE credit: AH, WC, WE. Effective: 2016 Spring Quarter.

COM 140—Thematic and Structural Study of Literature (4)
Lecture/Discussion—3 hours; Term Paper. Interpretation of selected works illustrating the historical evolution of themes, as well as of formal and structural elements. May be repeated for credit. GE credit: AH, WE. Effective: 1997 Winter Quarter.

COM 141—Introduction to Critical Theoretical Approaches to Literature and Culture (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR). Introduction to critical theory and its use for interpreting literary texts, film, and media forms in global culture. (Same course as CRI 101.) GE credit: AH, WC, WE. Effective: 2016 Fall Quarter.

COM 142—Critical Reading and Analysis (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. Close reading of selected texts; scrutiny of very limited amount of material, with attention to the problems of texts in translation. GE credit: AH, WE. Effective: 1997 Winter Quarter.

COM 144—The Grotesque (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR). Study of the "grotesque" in selected texts from the Renaissance to the 20th century, with attention to the "grotesque" as a means of social, cultural, and political commentary, as well as of aesthetic innovation. GE credit: AH, WC, WE. Effective: 2016 Spring Quarter.

COM 145—Representations of the City (4)
Discussion—1 hour; Extensive Writing; Lecture—2 hours. Exploration of the representation of the city in major translated literary texts from a variety of literary traditions and periods. Emphasis on the diversity of urban experience in literature. Topics include public and private space, memory, and gender. GE credit: AH, WC, WE. Effective: 2004 Spring Quarter.
COM 146—Myth in Literature (4)
Lecture—3 hours; Term Paper. Prerequisite(s): COM 006 recommended. Comparative study of different versions of one or more central myths, with attention to their cultural settings, artistic and literary forms of representation, as well as to their psychological dimensions. GE credit: AH, WC, WE. Effective: 1997 Winter Quarter.

COM 147—Modern Jewish Writers (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR). Problems of the modern Jewish experience from the perspective of the writer's construction of the self in relation to the future and to the non-Jew. Draws upon Russian, German, Yiddish, and American traditions. GE credit: AH, WC, WE. Effective: 2016 Spring Quarter.

COM 148—Mystical Literatures of South Asia and the Middle East (4)
Lecture/Discussion—3 hours; Term Paper. Exploration of the comparative mystical literatures of major religious traditions, with a focus on those produced in South Asia and the Middle East, although including other traditions. GE credit: AH, WC, WE. Effective: 2010 Fall Quarter.

COM 151—Colonial and Postcolonial Experience in Literature (4)
Lecture—3 hours; Term Paper. Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR). A literary introduction to the cultural issues of colonialism and postcolonialism through reading, discussing and writing on narratives which articulate diverse points of view. GE credit: AH, WC, WE. Effective: 2016 Spring Quarter.

COM 152—Literature of the Americas (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR). Study of the various stylistic, historical, social and cultural factors that contribute to a hemispheric vision of American literature, encompassing works by Canadian, United States, Caribbean, Brazilian, and Spanish-American writers. GE credit: AH, WC, WE. Effective: 2016 Fall Quarter.

COM 152S—Literature of the Americas (Taught in Latin America) (4)
Fieldwork—6 hours; Lecture/Discussion—6 hours; Term Paper. Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR). Various stylistic, historical, social, and cultural factors that contribute to a hemispheric vision of American literature, encompassing works by Canadian, United States, Caribbean, Brazilian, and Spanish-American writers. Course taught abroad. May be repeated up to 1 time(s). GE credit: AH, VL, WC, WE. Effective: 2016 Fall Quarter.

COM 153—The Forms of Asian Literature (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR). Introduction to distinctive Asian literary forms, such as haiku, noh, the Chinese novel and tale, through reading of major works. Comparison with Western genres and study of native and Western critical traditions. GE credit: AH, WC, WE. Effective: 2016 Fall Quarter.

COM 154—African Literature (4)
Lecture—3 hours; Term Paper. Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR). Colonial and post-colonial sub-Saharan African literature and the African oral traditions from which it emerged. Genres and themes of African literature from the nineteenth century to the present. (Same course as AAS 153.) GE credit: AH, WC, WE. Effective: 2012 Spring Quarter.

COM 155—Classical Literatures of the Islamic World 600-1900 (4)
Lecture—3 hours; Term Paper. Major texts from Arabic, Persian, Ottoman Turkish and Urdu literature with attention to historical and cross-cultural context. Includes epic, romance, various genres of lyric poetry, fairy tales, historical and religious stories, mystical and philosophical narratives, and essays. GE credit: AH, OL, WC, WE. Effective: 2014 Fall Quarter.

COM 156—The Ramayana (4)
Lecture—3 hours; Term Paper. Exploration of the Indian epic, Ramayana, through the lens of literature, performance, and visual art. Emphasis on the text's diversity and its contemporary global relevance. Topics include Ramayanas in Southeast Asia, and in various South Asian diaspora communities. (Same course as RST 158.) GE credit: AH, WC, WE. Effective: 2015 Spring Quarter.

COM 157—War and Peace in Literature (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): COM 001 or COM 002 or COM 003; or Consent of Instructor. Through study of a few major works from Western and non-Western literature the course seeks to illuminate the way in which literature from antiquity to the present has dealt with the antinomy peace/war through the ages. GE credit: AH, WC, WE. Effective: 1997 Winter Quarter.
COM 158—The Detective Story as Literature (4)
Lecture—3 hours; Term Paper. Study of the origins, literary and social background, development and implications of the literature of detection in a comparative context. GE credit: AH, WC, WE. Effective: 1997 Winter Quarter.

COM 159—Women in Literature (4)
Lecture—3 hours; Term Paper. Prerequisite(s): COM 001, COM 002, COM 003, or COM 004 or the equivalent recommended. Portrayals of women in literature, comparing selected heroines who represent a particular theme, period, or genre. Texts range around the globe and from ancient to modern works, such as Lysistrata, Emma, Hedda Gabler, The Makioka Sisters, and Top Girls. GE credit: AH, WC, WE. Effective: 1997 Winter Quarter.

COM 160A—The Modern Novel (4)
Lecture/Discussion—3 hours; Term Paper. The changing image of man and his world as seen in novels by such writers as Joyce, Proust, and Mann. GE credit: AH, WC, WE. Effective: 1997 Winter Quarter.

COM 160B—The Modern Drama (4)
Lecture/Discussion—3 hours; Term Paper. Readings in representative authors such as Ibsen, Strindberg, Chekhov, Pirandello and Brecht. GE credit: AH, WC, WE. Effective: 1997 Winter Quarter.

COM 161A—Tragedy (4)
Lecture/Discussion—3 hours; Term Paper. Persistent and changing aspects of the tragic vision in literature from ancient times to the present. GE credit: AH, WC, WE. Effective: 1997 Winter Quarter.

COM 161B—Comedy (4)

COM 162—Writing Love and War in South Asia (4)
Lecture—3 hours; Term Paper. Comparative study of the themes and motifs of love and war in the literature of South Asia. Includes a discussion of Sanskrit epics, classical erotic court poetry, medieval heroic poetry, mystical compositions and colonial and post-colonial fiction. GE credit: AH, OL, WC, WE. Effective: 2016 Spring Quarter.

COM 163—Biography and Autobiography (4)
Lecture/Discussion—3 hours; Term Paper. Portrayals of a human life in biographies and/or autobiographies of different countries and ages. GE credit: AH, WC, WE. Effective: 1997 Winter Quarter.

COM 164A—The European Middle Ages (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR). Medieval literary genres as the foundation for modern literary forms. Topics and themes as love, God, vision, nature, history and politics, and sign theory. GE credit: AH, WC, WE. Effective: 2016 Spring Quarter.

COM 164B—The Renaissance (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR). Literature, new science, gender, politics, and exploration in European Renaissance. Readings in Petrarch, Machiavelli, Montaigne, Tasso, Ariosto, Stampa, Shakespeare, Labé and Aphra Behn. GE credit: AH, WC, WE. Effective: 2016 Spring Quarter.

COM 164C—Baroque and Neoclassicism (4)
Lecture/Discussion—3 hours; Term Paper. Readings in major authors such as Calderón, Corneille, Pascal, Racine, Milton, and Grimmelshausen, with consideration of the tension between the expansive energies of the "baroque" and the restraints of dogma and reason. GE credit: AH, WC, WE. Effective: 1997 Winter Quarter.

COM 164D—The Enlightenment (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR). Enlightenment writers such as Swift, Voltaire, Sterne, Rousseau, Wolstonecraft, and Kant. Emphasis on the revolutionary impact of eighteenth-century philosophical ideas and literary forms on modern political, social, and aesthetic culture. GE credit: AH, WC, WE. Effective: 2016 Spring Quarter.

COM 165—Caribbean Literatures (4)
Lecture/Discussion—4 hours. Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR). Comparative approach to the multi-lingual, multi-cultural literatures of the Caribbean. Works from English, French, and Spanish speaking regions with special attention to problems of identity, diaspora and resistance, class, gender, race. Not open to students who have completed COM 165S. GE credit: AH, WC, WE. Effective: 2016 Fall Quarter.

COM 165S—Caribbean Literatures (4)
Lecture/Discussion—4 hours. Restricted to upper division standing in the student's discipline of origin. Comparative
approach to the multi-lingual, multi-cultural literatures of the Caribbean. Works from English, French, and Spanish speaking regions with special attention to problems of identity, diaspora and resistance, class, gender, race. Taught at the University of Havana, Cuba. Not open to students who have completed COM 165. GE credit: AH, WC, WE. Effective: 2004 Fall Quarter.

COM 166—Literatures of the Modern Middle East (4)
Lecture/Discussion—3 hours; Term Paper. Major translated works in modern Middle Eastern and North African Literature, including Arabic, Hebrew, Persian, and Turkish. Social and historical formation, with topics such as conflict and coexistence, journeys, and displaced people, gender and family. GE credit: AH, WC, WE. Effective: 2007 Fall Quarter.

COM 166A—The Epic (4)
Lecture/Discussion—3 hours; Term Paper. Study of various forms of epic poetry in both the oral and literary traditions. May be repeated for credit in different subject area. May be repeated for credit. GE credit: AH, WC, WE. Effective: 1997 Winter Quarter.

COM 166B—The Novel (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR). The novel as global genre: picaresque, epistolary, Bildungsroman, historical novel, contemporary forms. May be repeated up to 1 time(s). GE credit: AH, WC, WE. Effective: 2016 Spring Quarter.

COM 167—Comparative Study of Major Authors (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. Pivotal works of artists in the Western mainstream, such as Dante, Shakespeare, Cervantes, Goethe, Tolstoi, Proust, and Joyce. GE credit: AH, WC, WE. Effective: 1997 Winter Quarter.

COM 168A—Romanticism (4)
Discussion—3 hours; Term Paper. Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR). Introduction to the Romantic movement with emphasis upon Romantic concepts of the self, irony, love, the imagination and artistic creativity, and the relationship of the individual to nature and society. GE credit: AH, WC, WE. Effective: 2016 Spring Quarter.

COM 168B—Realism and Naturalism (4)
Discussion—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. Novels and plays by Dickens, Zola, Flaubert, Dreiser, Ibsen, and Strindberg investigate marriage and adultery, the city and its perils, the hardships of industrialization, the war between the sexes, the New Woman, and other 19th-century themes. GE credit: AH, WC, WE. Effective: 1997 Winter Quarter.

COM 169—The Avant-Garde (4)
Lecture/Discussion—3 hours; Term Paper. Studies in movements such as surrealism, expressionism and the absurd. GE credit: AH, WE. Effective: 1997 Winter Quarter.

COM 170—The Contemporary Novel (4)
Lecture—3 hours; Term Paper. Study of important novels from different parts of the world, including Asia, Africa, Latin America, Europe, and the United States, in the period from the Second World War to the present. GE credit: AH, WC, WE. Effective: 1997 Winter Quarter.

COM 172—A Story for a Life: The Arabian Nights (4)
Lecture/Discussion—3 hours; Term Paper. In-depth exploration of The Arabian Nights, the best-known work of premodern Arabic literature and a major work of world literature. Analysis of the work in its historical context and in comparison to other frame tales in world literature. (Same course as ARB 140 and MSA 121C.) GE credit: AH, WC, WE. Effective: 2016 Winter Quarter.

COM 175—Shahnameh: The Persian Book of Kings (4)
Lecture/Discussion—3 hours; Term Paper. In-depth analysis of the Persian Book of Kings (Shahnameh) by Abu al-Qasim Ferdowski (d. 1020 CE) in its historical context with a comparative perspective on the role of this work in Persian and world literature. (Same course as MSA 121A.) GE credit: AH, WC, WE. Effective: 2015 Winter Quarter.

COM 180—Selected Topics in Comparative Literature (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Completion of Subject A requirement and at least one course in literature. Study of a selected topic or topics appropriate to student and faculty interests and areas of specialization of the instructor. May be repeated up to 1 time(s). GE credit: AH, WC, WE. Effective: 1997 Winter Quarter.
COM 180S—Selected Topics in Comparative Literature (Taught Abroad) (4)
Extensive Writing; Fieldwork—6 hours; Lecture/Discussion—6 hours. Prerequisite(s): Subject A, and at least one course in literature, or consent of instructor. Study of selected topics appropriate to student and faculty interests and areas of specialization of the instructor. May be repeated once for credit when topic differs. May be repeated up to 1 time(s). GE credit: AH, WC, WE. Effective: 2007 Fall Quarter.

COM 192—Internship in Comparative Literature (1-12)
Internship—1-12 hours. Prerequisite(s): Consent of Instructor. Completion of 84 units. Restricted to Comparative Literature majors. Internships in fields where students can practice their skills. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 1997 Winter Quarter.

COM 194H—Special Study for Honors Students (1-5)
Independent Study—1-5 hours. Prerequisite(s): Consent of Instructor. Open only to majors of senior standing who qualify for Honors Program. Guided research, under the direction of a faculty member approved by the Program Director, leading to a senior honors thesis on a comparative topic. May be repeated for credit. (P/NP grading only.) GE credit: AH, WE. Effective: 1997 Winter Quarter.

COM 195—Senior Seminar in Comparative Literature (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Senior standing as a Comparative Literature major or minor or consent of instructor. Advanced study of selected topics and texts in Comparative Literature, with explicit emphasis on the theoretical and interpretive approaches that define Comparative Literature as a discipline and distinguish it from other literary disciplines. Required for the major. GE credit: AH, WE. Effective: 2012 Fall Quarter.

COM 197T—Tutoring in Comparative Literature (1-5)
Discussion—2-4 hours. Prerequisite(s): Consent of Instructor. Upper division standing with declared major in Comparative Literature. Tutoring in undergraduate courses including leadership in small voluntary discussion groups affiliated with current courses offered by Comparative Literature. May be repeated up to 6 unit(s). (P/NP grading only.) Effective: 1997 Winter Quarter.

COM 198—Directed Group Study for Advanced Undergraduates (1-5)
Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

COM 199—Special Study for Advanced Undergraduates (1-5)
Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

COM 210—Topics and Themes in Comparative Literature (4)
Discussion—3 hours; Term Paper. Prerequisite(s): Graduate standing in Comparative Literature, English, or a foreign-language literature, or consent of instructor. Comparative, interpretive study of the treatment of specific topics and themes in literary works from various periods, societies, and cultures, in light of these works' historical and sociocultural contexts. May be repeated for credit. Effective: 1997 Winter Quarter.

COM 214—Approaches to Lyric Poetry (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Analysis and interpretation of poetic texts in different historical periods and national literatures, with consideration of major theoretical developments in the understanding of poetic discourse. Effective: 1998 Fall Quarter.

COM 215—Forms of the Spiritual Quest (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor; knowledge of at least one foreign language. An exploration, culminating in a research paper, of changing forms of the quest for transcendence in different cultures, mainly in major works of Western literature, but also in other traditions and from the perspectives of other disciplines. Effective: 1997 Winter Quarter.

COM 220—Literary Genres (4)
Discussion—3 hours; Term Paper. Prerequisite(s): Graduate standing in Comparative Literature, English, or a foreign-language literature or consent of instructor. Comparative literature of major works in a particular genre from various linguistic, national, and cultural traditions, with particular attention to historical developments within the genre and to genre theory. May be repeated for credit. Effective: 1997 Winter Quarter.

COM 238—Gender and Interpretation (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Study of how literary texts from different periods, societies, and cultures represent gender roles and gender hierarchy, building on recent work on gender in anthropology, literature, psychology, and women's studies. Effective: 1998 Fall Quarter.
COM 250A—Research in Primary Literature (4)
Project (Term Project). Individually guided research in the primary literature of concentration, under the supervision of a faculty member culminating in a conference paper. Required of M.A. and Ph.D. candidates. Effective: 2011 Fall Quarter.

COM 250B—Research in Second Literature (4)
Project (Term Project). Individually guided research in the secondary literature of concentration, under the supervision of a faculty member culminating in a paper. Required of Ph.D. candidates. Effective: 2011 Fall Quarter.

COM 250C—Research in Third Literature or Special Topic (4)
Conference—1 hour; Independent Study—8 hours; Term Paper. Individually guided research, under the supervision of a faculty member, in the third literature of concentration or on a special topic culminating in a paper. Required of Ph.D. candidates. Effective: 2016 Winter Quarter.

COM 250D—Dissertation Prospectus (4)
Independent Study. Individually guided writing of the dissertation prospectus under supervision of a faculty member. Must be taken prior to completion of the qualifying exam. Required of Ph.D. candidates. (S/U grading only.) Effective: 2006 Spring Quarter.

COM 255—Proseminar: Comparative Literature: Past, Present, Future (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Graduate standing. Restricted to graduate students. History, theory, and methodology of comparative literature. Issues of national literature, world literature, and comparative literature. Relation of comparative literature to other disciplines and diverse expressions. Discussion of current problems in teaching and research in comparative literature. Required for MA/PhD. Effective: 2016 Winter Quarter.

COM 260—Contexts of the 19th-Century Novel (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Development in 19th-century history, culture, and society in relation to major trends in the 19th-century novel. Effective: 1998 Fall Quarter.

COM 297—Directed Independent Study in Primary, Secondary, or Third Literature (4)
Conference—1 hour; Independent Study—8 hours; Term Paper. Prerequisite(s): Consent of Instructor. Restricted to graduate students. Directed Independent Study in Primary, Secondary, or Third Literature culminating in term paper. Only for languages with no graduate course offerings. May be repeated for credit when no seminars are available and topic differs. Effective: 2016 Spring Quarter.

COM 298—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Graduate standing. (S/U grading only.) Effective: 1997 Winter Quarter.

COM 299—Individual Study (1-12)
Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

COM 299D—Special Study for the Doctoral Dissertation (1-12)
Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

COM 390—Teaching Comparative Literature in College (4)
Discussion—2 hours; Lecture—2 hours. Prerequisite(s): Appointment as a Comparative Literature Associate Instructor or consent of instructor. Restricted to graduate students. Discussion of the theory and practice of teaching composition at the college level in a department of comparative literature in relation to the major cultural and social developments and with specific application to the introductory courses 1, 2, 3, 4. (S/U grading only.) Effective: 2016 Winter Quarter.

COM 392—Teaching Internship in Comparative Literature (2)
Discussion—2 hours. Restricted to graduate students. Regular consultations between the student instructor teaching Comparative Literature courses and a supervisor. Specifically designed for first-time TAs in COM 5, 6, 7, and 10. Instruction in the teaching of writing in a literature course, grading of papers, leading discussions. (S/U grading only.) Effective: 2016 Winter Quarter.

COM 396—Teaching Assistant Training Practicum (1-4)
Variable. Prerequisite(s): Graduate standing. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

Computational Biology Minor; Computer Science Engineering

539
### Computational Biology Minor; Computer Science Engineering | Computational Biology Minor

(College of Engineering)

Matthew Farrens, Ph.D., Chairperson of the Department

Department Office. 2063 Kemper Hall 530-752-7004; http://www.cs.ucdavis.edu

The minor in Computational Biology will provide to students with engineering, physical science or biological science majors the foundations necessary to build efficient computational models and algorithms, use state-of-the-art techniques for scientific analysis and create scalable infrastructure environments for biological and biotechnological applications.

Students must take a total of 19-24 upper division units, with two required courses and 11-12 units of upper division electives, as specified below. A minimum GPA of 2.000 is required for coursework in the minor. Students should note that most of the courses listed below have lower division prerequisites. In particular, required course ECS 122A has a prerequisite chain of ECS 020, 036A, 036B, and 036C. No more than one course of Upper Division work will be permitted for overlap between any major and the minor.

**Minor Advisors.** T. Pham, V. Filkov, D. Gusfield, P. Koehl, J. Sison, I. Tagkopoulos

Computer Engineering; Electrical & Computer Engineering | Computer Engineering B.S.

(College of Engineering)

Saif Islam, Ph.D., Chairperson of the Department
Josh Hihath, Ph.D., Vice Chairperson for Undergraduate Studies
Khaled Abdel-Ghaffar, Ph.D., Vice Chairperson for Graduate Studies

Department Office. 2064 Kemper Hall 530-752-0583; http://www.ece.ucdavis.edu

Faculty. http://www.ece.ucdavis.edu/people/faculty/

The Electrical and Computer Engineering Undergraduate Programs

The department administers two undergraduate curricula in the College of Engineering: (1) the Electrical Engineering curriculum and (2) the Computer Engineering curriculum.

Integrated Degree Program (IDP). The IDP leads to both the Bachelor of Science and the Master of Science degrees. The program provides a student the opportunity to obtain superior breadth and depth of technical material. The IDP program in the Department of Electrical and Computer Engineering is available only to UC Davis undergraduates with strong academic records enrolled in the Electrical Engineering, Computer Engineering or Applied Physics curricula. Applicants in their junior year must apply for the IDP by March 31. For more information on IDP, see http://www.ece.ucdavis.edu.

Mission. Under its land grant status, the University of California has a mission to provide the state with the trained workforce it needs and to advance knowledge and research in directions that contribute to the general welfare of the state and the nation. The Department of Electrical and Computer Engineering contributes to the mission of the University in three ways. First, its undergraduate and graduate education programs seek to provide students with an understanding of the fundamental principles of electrical and computer engineering, the skills needed to solve the complex technological problems of modern society and the ability to continue to learn and develop throughout their careers. Second, through its research programs, the department contributes to the development and progress of electronics, communications, and computer technology. Finally, the department helps to transfer research results to industry through publication, public service and professional activities.

Objectives. Teaching—To provide undergraduate students with sufficient breadth to allow them to participate in teams, continue their own education after graduation and select a focus area intelligently; to provide undergraduate students with sufficient depth in a narrower discipline to allow them to develop the ability to solve complex engineering problems; to educate the students in the graduate program to be leaders in industry or to do meaningful research in industry, government or academia. Research—To develop and maintain research programs that produce useful technological advances while simultaneously training the next generation of researchers and leaders; to update and/or shift the foci of these programs frequently in response to the needs of our constituency and the nation; to provide a stimulating environment that encourages our graduate students to develop their abilities as far as possible.

Computer Engineering Undergraduate Program

The Computer Engineering program is accredited by the Engineering Accreditation Commission of ABET; see http://www.abet.org.

Exclusive of General Education units, the minimum number of units required for the Computer Engineering undergraduate major is 148.

Students are encouraged to adhere carefully to all prerequisite requirements. The instructor is authorized to drop students from a course for which stated prerequisites have not been completed.

- EEC 193A Senior Design Project 3
- EEC 193B Senior Design Project 3
- EEC 195A Autonomous Vehicle Design Project 3
- EEC 195B Autonomous Vehicle Design Project 3

Choose one upper division EEC or ECS course; excluding ECS 132, 155, 157, 188, 154A, 154B. 3-5

Technical Electives 8
CHE 002B, 002C, and any upper-division course; except CHE 195, 197.
ENG 035, 045, and any upper-division engineering course not used in satisfaction of core degree requirements; excluding ENG 100, 160, 190 (each restricted to one unit of technical elective), 198, ECS 132, 155, 157, 188, 154A, 154B.
A maximum of six units for any combination of engineering courses numbered 190C, 192, 198, and 199 may be used.
Mathematics: any upper-division course; except MAT 135A, 197TC.
Physics: any upper-division course; except 116, 137, 160 (restricted to one unit of technical elective), 195, 197T.
Statistics: any upper-division course; except STA 100, 102, 103, 104, 106, 108, 120, 130A.
BIS 101 Genes and Gene Expression 4
BIS 101D Genes and Gene Expression Discussion 1
BIS 102 Structure and Function of Biomolecules 3

Computer Engineering; Electrical & Computer Engineering | EEC Courses

Courses in EEC:

EEC 001—Introduction to Electrical and Computer Engineering (1)
Lecture—1 hour. Electrical and Computer Engineering as a professional activity. What Electrical and Computer Engineers know and how they use their knowledge. (P/NP grading only.) GE credit: SE. Effective: 2012 Fall Quarter.

EEC 007—Introduction to Programming and Microcontrollers (4)
Laboratory—2 hours; Lecture—3 hours. Pass One restricted to Electrical Engineering majors only. Programming computers using C/C++ languages. Software engineering and object-oriented design. Programming for hardware devices. Only two units of credit for students who have previously taken ECS 036A or ECS 032A. Effective: 2019 Winter Quarter.

EEC 010—Introduction to Digital and Analog Systems (4) Review all entries
Laboratory—3 hours; Lecture—2 hours; Project (Term Project). Prerequisite(s): ECS 030; (PHY 009C (can be concurrent) or PHY 009HD (can be concurrent)); and Consent of Instructor. Open to Electrical and Computer Engineering sophomores. Interactive and practical introduction to fundamental concepts of electrical and computer engineering by implementing electronic systems, which can be digitally controlled and interrogated, with a programmable microcontroller with the ability to program the electrical connections between analog and digital components. GE credit: SE. Effective: 2017 Winter Quarter.

Total: 146
EEC 010—Introduction to Digital and Analog Systems (4) Review all entries
Laboratory—3 hours; Lecture—2 hours; Project (Term Project). Prerequisite(s): (PHY 009C can be concurrent) or PHY 009HD (can be concurrent); (ECS 030 or ECS 036B or EEC 007); ENG 017; Consent of Instructor. Open to Electrical and Computer Engineering sophomores. Interactive and practical introduction to fundamental concepts of electrical and computer engineering by implementing electronic systems, which can be digitally controlled and interrogated, with a programmable microcontroller with the ability to program the electrical connections between analog and digital components. GE credit: SE. Effective: 2019 Winter Quarter.

EEC 018—Digital Systems I (5)
Laboratory—4 hours; Lecture—3 hours. Prerequisite(s): ENG 017 Introduction to digital system design including combinational logic design, sequential and asynchronous circuits, computer arithmetic, memory systems and algorithmic state machine design; computer aided design (CAD) methodologies and tools. No credit to students who have previously completed EEC 180A. Effective: 2019 Winter Quarter.

EEC 089A—Special Topics in Electromagnetics (1-5)
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Electromagnetics. May be repeated for credit if topic differs. GE credit: SE. Effective: 2011 Winter Quarter.

EEC 089B—Special Topics in Physical Electronics (1-5)
Variable. Prerequisite(s): Consent of Instructor. Special topics in Physical Electronics. May be repeated for credit if topic differs. GE credit: SE. Effective: 2011 Winter Quarter.

EEC 089C—Special Topics in Active and Passive Circuits (1-5)
Variable. Prerequisite(s): Consent of Instructor. Special topics in Active and Passive Circuits. May be repeated for credit if topic differs. GE credit: SE. Effective: 2011 Winter Quarter.

EEC 089D—Special Topics in Signals and Systems (1-5)
Variable. Prerequisite(s): Consent of Instructor. Special topics in Signals and Systems. May be repeated for credit if topic differs. GE credit: SE. Effective: 2011 Winter Quarter.

EEC 089E—Special Topics in Computer Systems and Software (1-5)
Variable. Prerequisite(s): Consent of Instructor. Special topics in Computer Systems and Software. May be repeated for credit if topic differs. GE credit: SE. Effective: 2011 Winter Quarter.

EEC 089F—Special Topics in Digital System Design (1-5)
Variable. Prerequisite(s): Consent of Instructor. Special topics in Digital System Design. May be repeated for credit if topic differs. GE credit: SE. Effective: 2011 Winter Quarter.

EEC 090C—Research Group Conference in Electrical and Computer Engineering (1)
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Lower division standing. Research group conferences. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

EEC 090X—Lower Division Seminar (1-4)
Seminar—1-4 hours. Prerequisite(s): Consent of Instructor. Examination of a special topic in a small group setting. May be repeated for credit. Effective: 1997 Winter Quarter.

EEC 092—Internship in Electrical and Computer Engineering (1-5)
Internship—3-15 hours. Prerequisite(s): Lower division standing; project approval prior to period of internship. Supervised work experience in Electrical and Computer Engineering. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

EEC 098—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

EEC 099—Special Study for Lower Division Students (1-5)
Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

EEC 100—Circuits II (5) Review all entries
Discussion—1 hour; Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ENG 017 C- or better Restricted to the following majors: Electrical Engineering, Computer Engineering, Computer Science & Engineering, Electronic Materials Engineering, Electrical Engineering/Materials Science, Optical Science & Engineering, Biomedical Engineering, Applied Physics, Electrical & Computer Engineering graduate students. Theory, application, and design of analog circuits. Methods of analysis including frequency response, SPICE simulation, and Laplace transform. Operational amplifiers and design of active filters. Students who have completed Engineering 100 may receive 3.5 units of credit. GE credit: QL, SE, VL. Effective: 2014 Fall Quarter.
EEC 100—Circuits II (5) Review all entries
Discussion—1 hour; Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ENG 017 C- or better; MAT 022B
Restricted to the following majors: Electrical Engineering, Computer Engineering, Computer Science & Engineering,
Electronic Materials Engineering, Electrical Engineering/Materials Science, Optical Science & Engineering,
Biomedical Engineering, Applied Physics, Electrical & Computer Engineering graduate students. Theory,
application, and design of analog circuits. Methods of analysis including frequency response, SPICE simulation,
and Laplace transform. Operational amplifiers and design of active filters. Students who have completed ENG 100 may
receive 3.5 units of credit. GE credit: QL, SE, VL. Effective: 2018 Fall Quarter.

EEC 105A—EE-Emerge 1 (1)
Workshop—1 hour. Pass One restricted to Electrical & Computer Engineering Junior and Sophomore-level students.
Work in groups to conceive, design and prototype electronic exhibits to promote engineering to the public. (P/NP
grading only.) Effective: 2019 Fall Quarter.

EEC 105B—EE-Emerge 2 (2)
Workshop—2 hours. Pass One restricted to Electrical & Computer Engineering Junior and Sophomore-level
students. Work in groups to construct electronic exhibits. (P/NP grading only.) Effective: 2019 Fall Quarter.

EEC 105C—EE-Emerge 3 (1)
Workshop—1 hour. Prerequisite(s): EEC 105B Work in groups to present electronic exhibits to the public. (P/NP
grading only.) Effective: 2019 Fall Quarter.

EEC 110A—Electronic Circuits I (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EEC 100; EEC 140A (can be concurrent) Use and modeling of
nonlinear solid-state electronic devices in basic analog and digital circuits. Introduction to the design of transistor
amplifiers and logic gates. GE credit: SE, VL. Effective: 2018 Winter Quarter.

EEC 110B—Electronic Circuits II (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): EEC 110A Analysis and design of integrated circuits. Single-
stage amplifiers, cascaded amplifier stages, differential amplifiers, current sources, frequency response, and return-
ratio analysis of feedback amplifiers. GE credit: SE, VL. Effective: 2009 Fall Quarter.

EEC 112—Communication Electronics (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): EEC 110A; EEC 150A; EEC 110B recommended. Electronic
circuits for analog and digital communication, including oscillators, mixers, tuned amplifiers, modulators,
demodulators, and phase-locked loops. Circuits for amplitude modulation (AM) and frequency modulation (FM) are
emphasized. GE credit: SE. Effective: 2014 Spring Quarter.

EEC 116—VLSI Design (4) Review all entries
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): EEC 116 or EEC 118 Analysis and design of digital
integrated circuits. Emphasis on MOS logic circuit families. Logic gate construction, voltage transfer characteristics,
propagation delay, and power consumption. Regenerative circuits, sequential elements, interconnect, RAMs, ROMs,
and PLAs. GE credit: SE. Effective: 2011 Spring Quarter.

EEC 116—VLSI Design (4) Review all entries
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): EEC 110A; (EEC 018 or EEC 180A) Analysis and design of
digital integrated circuits. Emphasis on MOS logic circuit families. Logic gate construction, voltage transfer
characteristics, propagation delay, and power consumption. Regenerative circuits, sequential elements,
interconnect, RAMs, ROMs, and PLAs. GE credit: SE. Effective: 2019 Spring Quarter.

EEC 118—Digital Integrated Circuits (4) Review all entries
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): EEC 110A; EEC 180A Analysis and design of digital
integrated circuits. Emphasis on MOS logic circuit families. Logic gate construction, voltage transfer characteristics,
propagation delay, and power consumption. Regenerative circuits, sequential elements, interconnect, RAMs, ROMs,
and PLAs. GE credit: SE. Effective: 2011 Spring Quarter.

EEC 118—Digital Integrated Circuits (4) Review all entries
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): EEC 110A; (EEC 018 or EEC 180A) Analysis and design of
digital integrated circuits. Emphasis on MOS logic circuit families. Logic gate construction, voltage transfer
characteristics, propagation delay, and power consumption. Regenerative circuits, sequential elements,
interconnect, RAMs, ROMs, and PLAs. GE credit: SE. Effective: 2019 Spring Quarter.

EEC 119A—Integrated Circuit Design Project (3)
Laboratory—6 hours; Workshop—1 hour. Prerequisite(s): EEC 116 or EEC 118 Design course involving architecture,
circuit design, physical design, and validation through extensive simulation of a digital or mixed-signal integrated
circuit of substantial complexity under given design constraints. Team project that includes a final report. GE credit: SE. Effective: 2014 Fall Quarter.

EEC 119B—Integrated Circuit Design Project (3)
Laboratory—6 hours; Workshop—1 hour. Prerequisite(s): EEC 119A Design course involving architecture, circuit design, physical design, and validation through extensive simulation of a digital or mixed-signal integrated circuit of substantial complexity under given design constraints. Team project that includes a final report. GE credit: SE. Effective: 2014 Fall Quarter.

EEC 130A—Electromagnetics I (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MAT 021D; (PHY 009C or PHY 009HD); ENG 017 Basics of static electric and magnetic fields and fields in materials. Work and scalar potential. Maxwell's equations in integral and differential form. Plan waves in lossless media. Lossless transmission lines. GE credit: SE. Effective: 1997 Winter Quarter.

EEC 130B—Introductory Electromagnetics II (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EEC 130A Plane wave propagation in lossy media, reflections, guided waves, simple modulated waves and dispersion, and basic antennas. GE credit: SE. Effective: 1997 Winter Quarter.

EEC 132A—RF and Microwaves in Wireless Communication (5)
Discussion—1 hour; Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): EEC 110A; EEC 130B Study of Radio Frequency and Microwave theory and practice for design of wireless electronic systems. Transmission lines, microwave integrated circuits, circuit analysis of electromagnetic energy transfer systems, the scattering parameters. GE credit: SE. Effective: 2015 Winter Quarter.

EEC 132B—RF and Microwaves in Wireless Communication (5)
Discussion—1 hour; Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): EEC 132A Passive RF and microwave device analysis, design, fabrication, and testing for wireless applications. RF and microwave filter and coupler design. Introductory analysis and design of RF and microwave transistor amplifiers. GE credit: SE. Effective: 2007 Winter Quarter.

EEC 132C—RF and Microwaves in Wireless Communications (5)
Discussion—1 hour; Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): EEC 132B RF and microwave amplifier theory and design, including transistor circuit models, stability considerations, noise models and low noise design. Theory and design of microwave transistor oscillators and mixers. Wireless system design and analysis. GE credit: SE. Effective: 2009 Spring Quarter.

EEC 133—Electromagnetic Radiation and Antenna Analysis (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EEC 130B Properties of electromagnetic radiation; analysis and design of antennas: ideal cylindrical, small loop, aperture, and arrays; antenna field measurements. GE credit: SE. Effective: 1999 Fall Quarter.

EEC 133—Electromagnetic Radiation and Antenna Analysis (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EEC 130B Properties of electromagnetic radiation; analysis and design of antennas: ideal cylindrical, small loop, aperture, and arrays; antenna field measurements. GE credit: SE. Effective: 2018 Fall Quarter.

EEC 134A—RF/Microwave Systems Design (3)
Laboratory—6 hours; Workshop—3 hours. Prerequisite(s): EEC 130B or EEC 110B or EEC 150A Class size limited to 24 students. Board-level RF design, fabrication, and characterization of an RF/microwave system, including the antenna, RF front-end, baseband, mix-signal circuits, and digital signal processing models. GE credit: SE. Effective: 2014 Fall Quarter.

EEC 134B—RF/Microwave Systems Design (3)
Laboratory—6 hours; Workshop—3 hours. Prerequisite(s): EEC 134A Class size limited to 24 students. Board-level RF design, fabrication, and characterization of an RF/microwave system, including the antenna, RF front-end, baseband, mix-signal circuits, and digital signal processing models. GE credit: SE. Effective: 2015 Winter Quarter.

EEC 135—Optical Communications I: Fibers (4)
EEC 135—Optoelectronics for High-Speed Data Networking and Computing Systems (4) Review all entries

EEC 136A—Electronic Design Project (3) Review all entries
Laboratory—6 hours; Workshop—1 hour. Prerequisite(s): ECS 030; EEC 100; EEC 180A; (EEC 110B or EEC 157A (can be concurrent) or EEC 180B) Pass One restricted to major. Optical, electronic and communication-engineering design of an opto-electronic system operating under performance and economic constraints. Measurement techniques will be designed and implemented, and the system will be characterized. GE credit: SE. Effective: 2015 Fall Quarter.

EEC 136B—Electronic Design Project (3)
Laboratory—6 hours; Workshop—1 hour. Prerequisite(s): EEC 136A Optical, electronic and communication-engineering design of an opto-electronic system operating under performance and economic constraints. Measurement techniques will be designed and implemented, and the system will be characterized. GE credit: SE. Effective: 2019 Winter Quarter.

EEC 140A—Principles of Device Physics I (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ENG 017; (PHY 009D or PHY 009HE) Semiconductor device fundamentals, equilibrium and non-equilibrium statistical mechanics, conductivity, diffusion, electrons and holes, p-n and Schottky junctions, first-order metal-oxide-semiconductor (MOS) field effect transistors, bipolar junction transistor fundamentals. GE credit: SE, SL. Effective: 2016 Fall Quarter.

EEC 140B—Principles of Device Physics II (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EEC 140A Electrical properties, designs, models and advanced concepts for MOS, Bipolar, and Junction Field-Effect Transistors, including scaling, minority-carrier distributions, non-ideal effects, and device fabrication methods. MESFET and heterojunction bipolar transistors (HBTs). Fundamentals of solar cells, photodetectors, LEDs and semiconductor lasers. GE credit: SE. Effective: 2018 Fall Quarter.

EEC 145—Electronic Materials (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EEC 140A Electronic and physical properties of materials used in electronics, ICs, optoelectronics and MEMS. Semiconductors, dielectrics, metals, optical materials, organic semiconductive, optical and nonlinear properties, as well as their synthesis and deposition methods. GE credit: SE. Effective: 2015 Fall Quarter.

EEC 146A—Integrated Circuits Fabrication (4)
Laboratory—4 hours; Lecture—2 hours. Prerequisite(s): EEC 140A Theoretical and experimental study of basic fabrication processes for metal oxide semiconductor integrated circuits, including oxidation, photolithography, impurity diffusion, metallization, wet chemical etching, and characterization. GE credit: SE. Effective: 2018 Winter Quarter.

EEC 146B—Advanced Integrated Circuits Fabrication (3)
Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): EEC 146A Restricted to Electrical, Computer, and Electrical/Materials Science majors and Electrical Engineering graduate students; non-majors accommodated when space available. Fabrication processes for CMOS VLSI. Laboratory projects examine deposition of thin films, ion
implantation, process simulation, anisotropic plasma etching, sputter metallization, and C-V analysis. Topics include isolation, projection alignment, epilayer growth, thin gate oxidation, and rapid thermal annealing. GE credit: SE. Effective: 1997 Winter Quarter.

**EEC 150A—Introduction to Signals and Systems I (4)**
Lecture—4 hours. Prerequisite(s): EEC 100; (ENG 006 (can be concurrent) or MAT 022AL (can be concurrent)) Characterization and analysis of continuous-time linear systems. Fourier series and transforms with applications. Introduction to communication systems. Transfer functions and block diagrams. Elements of feedback systems. Stability of linear systems. GE credit: QL, SE. Effective: 2013 Fall Quarter.

**EEC 150B—Introduction to Signals and Systems II (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EEC 150A Characterization and analysis of discrete time systems. Difference equation models. Ztransform analysis methods. Discrete and fast Fourier transforms. Introduction to digital filter design. GE credit: QL, SE. Effective: 2012 Fall Quarter.

**EEC 152—Digital Signal Processing (4)**
Laboratory—6 hours; Lecture—2 hours. Prerequisite(s): EEC 150B; (EEC 070 or ECS 050) Theory and practice of real-time digital signal processing. Fundamentals of real-time systems. Programmable architectures including I/O, memory, peripherals, interrupts, DMA. Interfacing issues with A/D and D/A converters to a programmable DSP. Specification driven design and implementation of simple DSP applications. GE credit: SE. Effective: 2014 Fall Quarter.

**EEC 157A—Control Systems (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): EEC 100 Analysis and design of feedback control systems. Examples are drawn from electrical and mechanical systems as well as other engineering fields. Mathematical modeling of systems, stability criteria, root-locus and frequency domain design methods. GE credit: SE. Effective: 2013 Fall Quarter.

**EEC 157B—Control Systems (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): EEC 157A Control system design; transfer-function and state-space methods; sampled-data implementation, digital control. Laboratory includes feedback system experiments and simulation studies. GE credit: SE. Effective: 1997 Winter Quarter.

**EEC 160—Signal Analysis and Communications (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EEC 150A Signal analysis based on Fourier methods. Fourier series and transforms; time-sampling, convolution, and filtering; spectral density; modulation: carrier-amplitude, carrier-frequency, and pulse-amplitude. GE credit: SE. Effective: 1997 Winter Quarter.

**EEC 161—Probabilistic Analysis of Electrical & Computer Systems (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EEC 100; (ENG 006 or MAT 022AL) Probabilistic and statistical analysis of electrical and computer systems. Discrete and continuous random variables, expectation and moments. Transformation of random variables. Joint and conditional densities. Limit theorems and statistics. Noise models, system reliability and testing. GE credit: SE. Effective: 2016 Spring Quarter.

**EEC 165—Statistical and Digital Communication (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): EEC 160; EEC 161 Introduction to random process models of modulated signals and noise, and analysis of receiver performance. Analog and digitally modulated signals. Signal-to-noise ratio, probability of error, matched filters. Intersymbol interference, pulse shaping and equalization. Carrier and clock synchronization. GE credit: SE. Effective: 2017 Winter Quarter.

**EEC 170—Introduction to Computer Architecture (4) Review all entries**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EEC 180A; ECS 030 Introduces basic aspects of computer architecture, including computer performance measurement, instruction set design, computer arithmetic, pipelined/non-pipelined implementation, and memory hierarchies (cache and virtual memory). Presents a simplified Reduced Instruction Set Computer using logic design methods from the prerequisite course. GE credit: SE. Effective: 2015 Winter Quarter.

**EEC 170—Introduction to Computer Architecture (4) Review all entries**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECS 036B or ECS 030 or ECS 034 or EEC 007); (EEC 018 or EEC 180A) Introduces basic aspects of computer architecture, including computer performance measurement, instruction set design, computer arithmetic, pipelined/non-pipelined implementation, and memory hierarchies (cache and virtual memory). Presents a simplified Reduced Instruction Set Computer using logic design methods from the prerequisite course. GE credit: SE. Effective: 2019 Winter Quarter.
EEC 171—Parallel Computer Architecture (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EEC 170 or ECS 154B Organization and design of parallel processors including shared-memory multiprocessors, cache coherence, memory consistency, snooping protocols, synchronization, scalable multiprocessors, message passing protocols, distributed shared memory and interconnection networks. GE credit: SE. Effective: 2014 Fall Quarter.

EEC 172—Embedded Systems (4)
Laboratory—6 hours; Lecture—2 hours. Prerequisite(s): (EEC 170 or ECS 154A); EEC 100 Introduction to embedded-system hardware and software. Topics include: embedded processor and memory architecture; input/output hardware and software, including interrupts and direct memory access; interfacing with sensors and actuators; wired and wireless embedded networking. GE credit: SE. Effective: 2016 Winter Quarter.

EEC 173A—Computer Networks (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 060; (ECS 132 or EEC 161 or MAT 135A or STA 131A or STA 120 or STA 032) Pass One open to Computer Science, Computer Science Engineering and Computer Engineering Majors only. Overview of computer networks, TCP/IP protocol suite, computer-networking applications and protocols, transport-layer protocols, network architectures, Internet Protocol (IP), routing, link-layer protocols, local area and wireless networks, medium access control, physical aspects of data transmission, and network-performance analysis. Only 2 units of credit for students who have taken ECS 157. (Same course as ECS 152A.) GE credit: SE. Effective: 2016 Fall Quarter.

EEC 173B—Design Projects in Communication Networks (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EEC 173A or ECS 152A Advanced topics and design projects in communication networks. Example topics include wireless networks, multimedia networking, network design and management, traffic analysis and modeling, network simulations and performance analysis. Offered in alternate years. (Same course as ECS 152C.) GE credit: SE. Effective: 2005 Spring Quarter.

EEC 180—Digital Systems II (5)
Laboratory—4 hours; Lecture—3 hours. Prerequisite(s): EEC 018 or EEC 180A Computer-aided design of digital systems with emphasis on hardware description languages (VHDL), logic synthesis, and field-programmable gate arrays (FPGA). May cover advanced topics in digital system design such as static timing analysis, pipelining, memory system design, testing digital circuits. No credit to students who have previously completed EEC 180B. Effective: 2019 Winter Quarter.

EEC 180A—Digital Systems I (5)
Laboratory—6 hours; Lecture—3 hours. Prerequisite(s): PHY 009C or PHY 009HD Introduction to digital system design including combinational logic design, sequential and asynchronous circuits, computer arithmetic, memory systems and algorithmic state machine design; computer aided design (CAD) methodologies and tools. GE credit: SE. Effective: 2014 Spring Quarter.

EEC 180A—Digital Systems I (5) Discontinued
Laboratory—6 hours; Lecture—3 hours. Prerequisite(s): PHY 009C or PHY 009HD Introduction to digital system design including combinational logic design, sequential and asynchronous circuits, computer arithmetic, memory systems and algorithmic state machine design; computer aided design (CAD) methodologies and tools. GE credit: SE. Effective: 2019 Winter Quarter.

EEC 180B—Digital Systems II (5)
Laboratory—6 hours; Lecture—3 hours. Prerequisite(s): EEC 180A Computer-aided design of digital systems with emphasis on hardware description languages (VHDL), logic synthesis, and field-programmable gate arrays (FPGA). May cover advanced topics in digital system design such as static timing analysis, pipelining, memory system design, testing digital circuits. GE credit: SE. Effective: 2013 Fall Quarter.
EEC 180B—Digital Systems II (5) Review all entries Discontinued
Laboratory—6 hours; Lecture—3 hours. Prerequisite(s): EEC 180A Computer-aided design of digital systems with emphasis on hardware description languages (VHDL), logic synthesis, and field-programmable gate arrays (FPGA). May cover advanced topics in digital system design such as static timing analysis, pipelining, memory system design, testing digital circuits. GE credit: SE. Effective: 2019 Winter Quarter.

EEC 181A—Digital Systems Design Project (3) Review all entries
Laboratory—6 hours; Workshop—1 hour. Prerequisite(s): EEC 180B; EEC 170 Digital-system and computer-engineering design course involving architecture, design, implementation and testing of a prototype application-specific processor under given design constraints. This is a team project that includes a final presentation and report. GE credit: SE. Effective: 2018 Winter Quarter.

EEC 181B—Digital Systems Design Project (3)
Laboratory—6 hours; Workshop—1 hour. Prerequisite(s): EEC 181A Digital-system and computer-engineering design course involving architecture, design, implementation and testing of a prototype application-specific processor under given design constraints. This is a team project that includes a final presentation and report. GE credit: SE. Effective: 2015 Winter Quarter.

EEC 183—Testing and Verification of Digital Systems (5)
Laboratory—4 hours; Lecture—3 hours. Prerequisite(s): EEC 170; EEC 180B Computer aided-testing and design verification techniques for digital systems; physical fault testing; simulation-based design verification; formal verification; timing analysis. GE credit: SE. Effective: 2012 Spring Quarter.

EEC 189A—Special Topics in Electrical Engineering and Computer Science; Computer Science (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Computer Science. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189B—Special Topics in Electrical Engineering and Computer Science; Programming Systems (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Programming Systems. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189C—Special Topics in Electrical Engineering and Computer Science; Digital Systems (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Digital Systems. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189D—Special Topics in Electrical Engineering and Computer Science; Communications (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Communications. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189E—Special Topics in Electrical Engineering and Computer Science; Signal Transmission (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Signal Transmission. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189F—Special Topics in Electrical Engineering and Computer Science; Digital Communication (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Digital Communication. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189G—Special Topics in Electrical Engineering and Computer Science; Control Systems (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Control Systems. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189H—Special Topics in Electrical Engineering and Computer Science; Robotics (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Robotics. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189I—Special Topics in Electrical Engineering and Computer Science; Signal Processing (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Signal Processing. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.
EEC 189J—Special Topics in Electrical Engineering and Computer Science; Image Processing (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Image Processing. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189K—Special Topics in Electrical Engineering and Computer Science; High-Frequency Phenomena and Devices (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in High-Frequency Phenomena and Devices. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189L—Special Topics in Electrical Engineering and Computer Science; Solid-State Devices and Physical Electronics (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Solid-State Devices and Physical Electronics. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189M—Special Topics in Electrical Engineering and Computer Science; Systems Theory (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Systems Theory. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189N—Special Topics in Electrical Engineering and Computer Science; Active and Passive Circuits (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Active and Passive Circuits. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189O—Special Topics in Electrical Engineering and Computer Science; Integrated Circuits (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Integrated Circuits. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189P—Special Topics in Electrical Engineering and Computer Science; Computer Software (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Computer Software. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189Q—Special Topics in Electrical Engineering and Computer Science; Computer Engineering (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Computer Engineering. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189R—Special Topics in Electrical Engineering and Computer Science; Microprocessing (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Microprocessing. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189S—Special Topics in Electrical Engineering and Computer Science; Electronics (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Electronics. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189T—Special Topics in Electrical Engineering and Computer Science; Electromagnetics (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Electromagnetics. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189U—Special Topics in Electrical Engineering and Computer Science; Opto-Electronics (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Opto-Electronics. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189W—Special Topics in Electrical and Computer Engineering; Computer Networks (1-5)
Variable. Prerequisite(s): Consent of Instructor. Special topics in Computer Networks. May be repeated for credit when topic differs. GE credit: SE. Effective: 2018 Winter Quarter.

EEC 190C—Research Group Conferences in Electrical and Computer Engineering (1)
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Upper division standing in Electrical and Computer Engineering. Research group conferences. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 2013 Spring Quarter.

EEC 192—Internship in Electrical and Computer Engineering (1-5) Review all entries
Internship—3-15 hours. Prerequisite(s): Consent of Instructor. Completion of a minimum of 84 units; project approval before period of internship. Supervised work experience in electrical and computer engineering. May be repeated for credit project is different. (P/NP grading only.) GE credit: SE. Effective: 2012 Fall Quarter.

EEC 192—Internship in Electrical and Computer Engineering (1-6) Review all entries
Internship—3-18 hours. Prerequisite(s): Consent of Instructor. Completion of a minimum of 84 units; project approval
before period of internship. Supervised work experience in electrical and computer engineering. May be repeated for credit if project differs. (P/NP grading only.) GE credit: SE. Effective: 2018 Fall Quarter.

EEC 193A—Senior Design Project (3)
Laboratory—6 hours; Workshop—1 hour. Prerequisite(s): EEC 196 (can be concurrent); and Consent of Instructor. Restricted to senior standing in Electrical or Computer Engineering. Team design project for seniors in Electrical or Computer Engineering. Project involves analysis, design, implementation and evaluation of an Electrical Engineering or Computer Engineering system. Project is supervised by a faculty member. GE credit: SE. Effective: 2014 Fall Quarter.

EEC 193B—Senior Design Project (3)
Laboratory—6 hours; Workshop—1 hour. Prerequisite(s): EEC 193A Team design project for seniors in Electrical Engineering or Computer Engineering. Project involves analysis, design, implementation and evaluation of an Electrical Engineering or Computer Engineering system. Project supervised by a faculty member. GE credit: SE. Effective: 2015 Winter Quarter.

EEC 195A—Autonomous Vehicle Design Project (3) Review all entries
Laboratory—6 hours; Workshop—1 hour. Prerequisite(s): ECS 030; EEC 180A; (EEC 110B or EEC 157A (can be concurrent) or EEC 180B or ECS 060) Pass One restricted to major. Design and construct an autonomous race car. Work in groups to design, build and test speed control circuits, track sensing circuits, and a steering control loop. GE credit: SE. Effective: 2015 Fall Quarter.

EEC 195B—Autonomous Vehicle Design Project (3)
Laboratory—6 hours; Workshop—1 hour. Prerequisite(s): EEC 195A Design and construct an autonomous race car. Students work in groups to design, build and test speed control circuits, track sensing circuits, and a steering control loop. GE credit: SE. Effective: 2019 Winter Quarter.

EEC 196—Issues in Engineering Design (1)
Seminar—1 hour. Prerequisite(s): Senior standing in Electrical or Computer Engineering. The course covers various electrical and computer engineering standards and realistic design constraints including economic, manufacturability, sustainability, ethical, health and safety, environmental, social, and political. GE credit: SE. Effective: 2008 Fall Quarter.

EEC 197T—Tutoring in Electrical and Computer Engineering (1-3)
Discussion—1 hour; Discussion/Laboratory—2-8 hours. Prerequisite(s): Consent of Instructor. Upper division standing. Tutoring in Electrical and Computer Engineering courses, especially introductory circuits. For upper-division undergraduate students who will provide tutorial assistance. (P/NP grading only.) Effective: 2007 Fall Quarter.

EEC 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. May be repeated up to 3 time(s). (P/NP grading only.) GE credit: SE. Effective: 2007 Fall Quarter.

EEC 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 2007 Fall Quarter.

EEC 201—Digital Signal Processing (4)
Lecture—4 hours. Prerequisite(s): EEC 150B; STA 120 or MAT 131 or MAT 167 recommended. Theory and design of digital filters. Classification of digital filters, linear phase systems, all-pass functions, FIR and IIR filter design methods and optimality measures, numerically robust structures for digital filters. Effective: 2006 Winter Quarter.

EEC 202—Advanced Digital Signal Processing (4) Review all entries
Lecture—4 hours. Prerequisite(s): EEC 201, EEC 260 and EEC 265, and MAT 167 are recommended. Multirate DSP theory and wavelets, optimal transform and subband coders in data compressions, advanced sampling theory and oversampled A/D converters, transmultiplexers and precoders in digital communication systems, genomic signal processing. Effective: 2006 Spring Quarter.
EEC 202—Advanced Digital Signal Processing (4) Review all entries Discontinued

EEC 205—Computational Methods in Biomedical Imaging (4)
Lecture—4 hours. Prerequisite(s): (BIM 105 or STA 120); (BIM 108 or EEC 150A) Analytic tomographic reconstruction from projections in 2D and 3D; model-based image reconstruction methods; maximum likelihood and Bayesian methods; applications to CT, PET, and SPECT. (Same course as BIM 252.) Effective: 2011 Fall Quarter.

EEC 206—Digital Image Processing (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): EEC 150B Two-dimensional systems theory, image perception, sampling and quantization, transform theory and applications, enhancement, filtering and restoration, image analysis, and image processing systems. Effective: 1997 Winter Quarter.

EEC 210—MOS Analog Circuit Design (3)
Lecture—3 hours. Prerequisite(s): EEC 110B; EEC 140A Analysis and design of MOS amplifiers, bias circuits, voltage references and other analog circuits. Stability and compensation of feedback amplifiers. Introduction to noise analysis in MOS circuits. Effective: 2016 Winter Quarter.

EEC 211—Advanced Analog Circuit Design (3)
Lecture—3 hours. Prerequisite(s): EEC 210; STA 131A and EEC 112 recommended. Noise and distortion in electronic circuits and systems. Application to communication circuits. Specific applications include mixers, low-noise amplifiers, power amplifiers, phase-locked loops, oscillators and receiver architectures. Effective: 2002 Winter Quarter.

EEC 212—Analog MOS IC Design for Signal Processing (3)

EEC 213—Data-Conversion Techniques and Circuits (3)

EEC 214—Computer-Aided Circuit Analysis and Design (3) Review all entries
Lecture—3 hours. Prerequisite(s): EEC 110A; EEC 110B; And knowledge of FORTRAN or C. Network equation formulations. Nonlinear DC, linear AC, timedomain (both linear and nonlinear), steady-state (nonlinear) and harmonic analysis. DC, AC, and time-domain sensitivities of linear and nonlinear circuits. Gradient-based design optimization. Behavioral simulations. Extensive CAD project. Effective: 2000 Winter Quarter.

EEC 214—Computer-Aided Circuit Analysis and Design (3) Review all entries Discontinued
Lecture—3 hours. Prerequisite(s): EEC 110A; EEC 110B; And knowledge of FORTRAN or C. Network equation formulations. Nonlinear DC, linear AC, timedomain (both linear and nonlinear), steady-state (nonlinear) and harmonic analysis. DC, AC, and time-domain sensitivities of linear and nonlinear circuits. Gradient-based design optimization. Behavioral simulations. Extensive CAD project. Effective: 2019 Spring Quarter.

EEC 215—Circuits for Digital Communications (3)
Lecture—3 hours. Prerequisite(s): EEC 150B; EEC 210 (can be concurrent); EEC 165, EEC 166, or EEC 265 recommended. Analog, digital, and mixed-signal CMOS implementations of communication-circuit blocks: gain control, adaptive equalizers, sampling detectors, clock recovery. Effective: 2000 Fall Quarter.

EEC 216—Low Power Digital Integrated Circuit Design (3) Review all entries

EEC 216—Low Power Digital Integrated Circuit Design (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EEC 118 Integrated circuit design for low power and energy consumption. Low power architectures, logic styles and circuit design. Variable supply and threshold voltages.

**EEC 217—Biomedical Electronics (4)** Review all entries
Lecture—3 hours; Project (Term Project). Prerequisite(s): EEC 210; or Consent of Instructor. Special consideration and accommodation will be made for biomedical or signal processing majors who have not taken EEC 210. Circuit design for medical applications including weak inversion amplifiers; integrated ULF filters; chopper stabilization; electrochemical interfaces; neurostimulation pulse generation; wireless powering of and communication with implantable devices. Electrophysiological signaling and aspects of signal processing for biomedical systems. Effective: 2013 Spring Quarter.

**EEC 217—Biomedical Electronics (4)** Review all entries Discontinued
Lecture—3 hours; Project (Term Project). Prerequisite(s): EEC 210; or Consent of Instructor. Special consideration and accommodation will be made for biomedical or signal processing majors who have not taken EEC 210. Circuit design for medical applications including weak inversion amplifiers; integrated ULF filters; chopper stabilization; electrochemical interfaces; neurostimulation pulse generation; wireless powering of and communication with implantable devices. Electrophysiological signaling and aspects of signal processing for biomedical systems. Effective: 2019 Spring Quarter.

**EEC 219—Advanced Digital Circuit Design (3)** Review all entries

**EEC 219—Advanced Digital Circuit Design (3)** Review all entries Discontinued

**EEC 221—Analog Filter Design (3)** Review all entries
Lecture—3 hours. Prerequisite(s): EEC 100; EEC 150A Design of active and passive filters including filter specification and approximation theory. Passive LC filter design will cover doubly-terminated reactance two-port synthesis. Active filter design will include sensitivity, op-amp building blocks, cascade, multi-loop, ladder and active-R filter design. Effective: 1997 Fall Quarter.

**EEC 221—Radio Frequency & Microwave Filter Design (4)** Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EEC 132A; or Consent of Instructor. Design of radio frequency and microwave filters including filter specification and approximation theory. Passive LC filter design covers doubly-terminated reactance two-port synthesis and coupling matrix based synthesis. Active filter design includes sensitivity, op-amp building blocks, and cascade filter design. Effective: 2019 Fall Quarter.

**EEC 222—RF IC Design (3)**
Lecture—3 hours. Prerequisite(s): EEC 132C; EEC 210 Radio frequency (RF) solid-state devices, RF device modeling and design rules; non-linear RF circuit design techniques; use of non-linear computer-aided (CAD) tools; RF power amplifier design. Effective: 2004 Winter Quarter.

**EEC 223—RF Integrated Circuits for Wireless Communications (4)**
Lecture—3 hours; Project (Term Project). Integrated RF front end circuit design of receivers and synthesizers for wireless communications, such as LNA, mixers, PLL; noise and linearity analysis and specifications; theory and working mechanism of synthesizers and phase noise analysis. Effective: 2018 Fall Quarter.

**EEC 224—Terahertz and mm-Wave Integrated Circuit Design (4)**
Lecture—3 hours; Project (Term Project). Prerequisite(s): EEC 132A; EEC 112; or Consent of Instructor. Fundamental theory of RF transmitter and receiver, including noise analysis, transceiver architectures, and antenna arrays. Fundamental limitations, theory and design of amplifiers, oscillators and signal sources at THz and mm-wave frequencies Effective: 2018 Winter Quarter.

**EEC 228—Advanced Microwave Circuit and Device Design Techniques (4)**
EEC 229—RF-MEMS and Adaptive Wireless Frontends (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EEC 130A Focuses on the modeling, design, fabrication, and characterization of RF-MEMS while providing a thorough introduction to the technology with an emphasis on how it will benefit the design of adaptive RF/microwave wireless systems. Effective: 2015 Fall Quarter.

EEC 230—Electromagnetics (3)
Lecture—3 hours. Prerequisite(s): EEC 130B Maxwell's equations, plane waves, reflection and refraction, complex waves, waveguides, resonant cavities, and basic antennas. Effective: 2001 Fall Quarter.

EEC 231A—Plasma Physics and Controlled Fusion (3)
Lecture—3 hours. Prerequisite(s): Consent of Instructor. Equilibrium plasma properties; single particle motion; fluid equations; waves and instabilities in a fluid plasma; plasma kinetic theory and transport coefficients; linear and nonlinear Vlasov theory; fluctuations, correlations and radiation; inertial and magnetic confinement systems in controlled fusion. Effective: 2015 Spring Quarter.

EEC 231B—Plasma Physics and Controlled Fusion (3)
Lecture—3 hours. Prerequisite(s): EEC 231A; and Consent of Instructor. Equilibrium plasma properties; single particle motion; fluid equations; waves and instabilities in a fluid plasma; plasma kinetic theory and transport coefficients; linear and nonlinear Vlasov theory; fluctuations, correlations and radiation; inertial and magnetic confinement systems in controlled fusion. Effective: 2015 Spring Quarter.

EEC 231C—Plasma Physics and Controlled Fusion (3)
Lecture—3 hours. Prerequisite(s): EEC 231B; and Consent of Instructor. Equilibrium plasma properties; single particle motion; fluid equations; waves and instabilities in a fluid plasma; plasma kinetic theory and transport coefficients; linear and nonlinear Vlasov theory; fluctuations, correlations and radiation; inertial and magnetic confinement systems in controlled fusion. Effective: 2015 Spring Quarter.

EEC 232A—Advanced Applied Electromagnetics I (3)
Lecture—3 hours. Prerequisite(s): EEC 132B The exact formulation of applied electromagnetic problems using Green's functions. Applications of these techniques to transmission circuits. Effective: 2000 Fall Quarter.

EEC 232B—Advanced Applied Electromagnetics II (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): EEC 132B An advanced treatment of electromagnetics with applications to passive microwave devices and antennas. Effective: 2000 Fall Quarter.

EEC 233—High Speed Signal Integrity (3)
Lecture—3 hours. Prerequisite(s): EEC 130B Design and analysis of interconnects in high-speed circuits and sub-systems; understanding of high-speed signal propagation and signal integrity concepts; electromagnetic modeling tools and experimental techniques. Effective: 2008 Fall Quarter.

EEC 234A—Physics and Technology of Microwave Vacuum Electron Beam Devices I (4)
Lecture—4 hours. Prerequisite(s): B.S. degree in physics or electrical engineering or the equivalent background. Physics and technology of electron beam emissions, flow and transport, electron gun design, space charge waves and klystrons. Effective: 2015 Fall Quarter.

EEC 234B—Physics and Technology of Microwave Vacuum Electron Beam Devices II (4)
Lecture—4 hours. Prerequisite(s): EEC 234A Theory and experimental design of traveling wave tubes, backward wave oscillators, and extended interaction oscillators. Effective: 2016 Spring Quarter.

EEC 234C—Physics and Technology of Microwave Vacuum Electron Beam Devices III (4)
Lecture—4 hours. Prerequisite(s): EEC 234B Physics and technology of gyrotrons, gyro-amplifiers, free electron lasers, magnetrons, crossfield amplifiers and relativistic devices. Effective: 2015 Fall Quarter.

EEC 235—Photonics (4)
Lecture—3 hours; Project (Term Project)—1 hour. Prerequisite(s): EEC 230 (can be concurrent) Optical propagation of electromagnetic waves and beams in photonic components and the design of such devices using numerical techniques. Effective: 2004 Fall Quarter.

EEC 236—Nonlinear Optical Applications (3)
Lecture—3 hours. Prerequisite(s): EEC 130B; EEC 230 (can be concurrent) Nonlinear optical interactions in optical communication, optical information processing and integrated optics. Basic concepts underlying optical nonlinear interactions in materials and guided media. Not open for credit to students who have completed EEC 233. Effective: 2000 Fall Quarter.
EEC 237A—Lasers (3)
Lecture—3 hours. Prerequisite(s): EEC 235; EEC 130B; Or the equivalent of EEC 130B. Not open for credit to students who have completed course 226A. Theoretical and practical description of lasers. Theory of population inversion, amplification and oscillation using semiclassical oscillator model and rate equations. Description and design of real laser system (Not open for credit to students who have completed course 226A.) Effective: 1998 Winter Quarter.

EEC 237B—Laser Physics II (4)

EEC 238—Semiconductor Diode Lasers (3) Review all entries
Lecture—3 hours. Prerequisite(s): EEC 245A Understanding of fundamental optical transitions in semiconductor and quantum-confined systems are applied to diode lasers and selected photonic devices. The importance of radiative and non-radiative recombination, simulated emission, excitons in quantum wells, and strained quantum layers are considered. Effective: 1998 Spring Quarter.

EEC 238—Semiconductor Lasers & Photonic Integration (4) Review all entries
Lecture—4 hours. Prerequisite(s): EEC 140A Understanding of fundamental optical transitions in semiconductors and quantum-confined systems are applied to diode & unipolar lasers and selected photonic devices. The importance of radiative and non-radiative recombination, simulated emission, excitons in quantum wells, and strained quantum layers are considered. Photonic integrated circuits based on active (with optical gain) and passive (without optical gain). Effective: 2019 Fall Quarter.

EEC 239A—Optical Fiber Communications Technologies (4) Review all entries

EEC 239A—Optical Communication Technologies for High-Speed Data Networking (4) Review all entries

EEC 239B—Optical Fiber Communications Systems and Networking (4) Review all entries

EEC 239B—High-Capacity Optical Data Systems & Networks (4) Review all entries
Lecture—4 hours. Prerequisite(s): EEC 239A High-capacity optical data systems and networks, built-on modern optical communication technologies. Technologies behind data center networking, software defined networking, and RF-optical networking. Physical layer issues in light of networking architectures and protocols. Optical communications systems design and integration. Systems technologies and higher-level network architecture, case studies. WDM, TDM, and EON networking, optical and wireless access technologies based on PON and ROF. Effective: 2019 Fall Quarter.

EEC 240—Semiconductor Device Physics (3)
Lecture—3 hours. Prerequisite(s): EEC 140B Physical principles, characteristics and models of fundamental semiconductor device types, including P-N and Schottky diodes, MOSFETs and MESFETs Bipolar Junction Transistors, and light emitters/detectors. Effective: 1998 Fall Quarter.

EEC 241—Introduction to Molecular Electronics (4)
Lecture/Discussion—4 hours. Prerequisite(s): Consent of Instructor. Examines molecules for electronic devices and sensors. Course covers: electronic states of molecules, charge transport in nanoscale systems, and fabrication and

**EEC 242—Advanced Nanostructured Devices (3)**

Lecture—3 hours. Prerequisite(s): EEC 130A; EEC 140A Physics of nano-structured materials and device operation. Overview of new devices enabled by nanotechnology; fabrication and characterization methods; applications of nano-structures and devices. Effective: 2005 Fall Quarter.

**EEC 244A—Design of Microelectromechanical Systems (MEMS) (3)**

Lecture—3 hours. Prerequisite(s): EEC 140A; EEC 140B; or Consent of Instructor. Theory and practice of MEMS design. Micromechanical fundamentals, CAD tools, and case studies. A MEMS design project is required. The designs will be fabricated in a commercial foundry and tested in course 244B. Effective: 1997 Fall Quarter.

**EEC 244B—Microsciences (4)**

Lecture/Discussion—4 hours. Introduction to the theory of physical and chemical principles at the microscale. Scale effects, surface tension, microfluidic mechanics, micromechanical properties, intermolecular interactions and microtribology. (Same course as BIM 218.) Effective: 2011 Fall Quarter.

**EEC 245—Micro- and Nano-Technology in Life Sciences (4) Review all entries**

Lecture/Discussion—4 hours. Prerequisite(s): Graduate standing or consent of instructor. Survey of biomedical device design from the engineering and biological perspectives; micro-/nano-fabrication and characterization techniques; surface chemistry and mass transfer; essential biological processes and models; proposal development skills to merge aforementioned themes in a multidisciplinary project. (Same course as ECH 245 and EMS 245.) Effective: 2016 Winter Quarter.

**EEC 245—Micro- and Nano-Technology in Life Sciences (4) Review all entries**

Lecture/Discussion—4 hours. Prerequisite(s): Graduate standing or consent of instructor. Survey of biodevice design from engineering and biological perspectives; micro-/nano-fabrication techniques; surface science and mass transport; essential biological processes and models; proposal development skills on merging aforementioned themes. (Same course as ECH 245, EMS 245, and MAE 245.) Effective: 2019 Winter Quarter.

**EEC 246—Advanced Projects in IC Fabrication (3)**

Discussion—1 hour; Laboratory—6 hours. Prerequisite(s): EEC 146B Individualized projects in the fabrication of analog or digital integrated circuits. Effective: 1997 Winter Quarter.

**EEC 247—Advanced Semiconductor Devices (4)**

Lecture—3 hours; Project (Term Project). Prerequisite(s): Graduate standing in Engineering. Semiconductor devices, including MOSFETs, heterojunction transistors, light-emitting diodes, lasers, sensors, detectors, power and high-voltage transistors, MEMS resonators, organic semiconductors and photovoltaics. All material is from recent literature, encouraging students to utilize search methods and critically assess the latest research. Effective: 2011 Fall Quarter.

**EEC 248—Photovoltaics and Solar Cells (3)**

Lecture—3 hours. Prerequisite(s): EEC 140B; or Consent of Instructor. Or equivalent. Physics and application of photovoltaics and solar cells, including design, fabrication technology, and grid incorporation. Mono and microcrystalline silicon devices; thin-film technologies, heterojunction and organic-semiconductor technologies. Collectors, electrical inverters and infrastructure issues. Challenges and concerns. (Same course as EMS 246.) Effective: 2014 Fall Quarter.

**EEC 249—Nanofabrication (3)**

Lecture—3 hours. Prerequisite(s): Graduate standing in Engineering. Theory and practices of nanofabrication used for producing ICs, electronic devices, optoelectronics, sensors, and microstructures. Major topics include electron-, photon-, and ion-beams and their interactions with solids, chemical vapor depositions, plasma processing and micromachining. Effective: 2014 Winter Quarter.

**EEC 250—Linear Systems and Signals (4)**

**EEC 251—Nonlinear Systems (3)**

EEC 252—Multivariable Control System Design (3)
Lecture—3 hours. Prerequisite(s): EEC 250 Modern control system design, theory, and techniques. Topics will include single-loop feedback design; stability, performance and robustness of multivariable control systems; LQG design; H-infinity design; frequency response methods; and optimization-based design. Effective: 2005 Fall Quarter.

EEC 254—Optimization (3)
Lecture—3 hours. Prerequisite(s): MAT 022A; Knowledge of FORTRAN or C. Modeling optimization problems in engineering design and other applications; optimality conditions; unconstrained optimization (gradient, Newton, conjugate gradient and quasi-Newton methods); duality and Lagrangian relaxation constrained optimization. (Primal method and an introduction to penalty and augmented Lagrangian methods.) Effective: 1997 Winter Quarter.

EEC 255—Robotic Systems (3)

EEC 256—Stochastic Optimization in Dynamic Systems (4)
Lecture—4 hours. Prerequisite(s): EEC 260; Or the equivalent. Markov Decision Processes (MDP), dynamic programming, multi-armed bandit, Partially observable MDP, optimal stopping, stochastic scheduling, sequential detection and quickest change detection, competitive MDP and game theory, applications in dynamic systems such as queueing networks, communication systems, and multi-agent systems. Effective: 2012 Spring Quarter.

EEC 260—Random Signals and Noise (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): STA 120; EEC 150A; EEC 250 recommended. Random processes as probabilistic models for signals and noise. Review of probability, random variables, and expectation. Study of correlation function and spectral density, ergodicity and duality between time averages and expected values, filters and dynamical systems. Applications. Effective: 1997 Winter Quarter.

EEC 261—Signal Processing for Communications (4)
Lecture—4 hours. Prerequisite(s): EEC 165; EEC 260; or Consent of Instructor. Signal processing in wireless and wireline communication systems. Characterization and distortion of wireless and wireline channels. Channel equalization and maximum likelihood sequence estimation. Channel precoding and pre-equalization. OFDM and transmit diversity. Array processing. Effective: 2003 Spring Quarter.

EEC 262—Multi-access Communications Theory (4)
Lecture—3 hours; Project (Term Project). Prerequisite(s): (EEC 173A or ECS 152A); STA 120; Or equivalent of STA 120. Maximum stable throughput of Poisson collision channels. Classic collision resolution algorithms. Carrier sensing multiple access and its performance analysis. System stability analysis. Joint design of the physical/medium access control layers. Capacity region of multi-access channels. Multi-access with correlated sources. Effective: 2006 Spring Quarter.

EEC 263—Optimal and Adaptive Filtering (4)

EEC 264—Estimation and Detection of Signals in Noise (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EEC 260 Introduction to parameter estimation and detections of signals in noise. Bayes and Neyman-Pearson likelihood-ratio tests for signal detection. Maximum-likelihood parameter estimation. Detection of known and Gaussian signals in white or colored noise. Applications to communications, radar, signal processing. Effective: 2007 Fall Quarter.

EEC 265—Principles of Digital Communications (4)

EEC 266—Information Theory and Coding (3)
Lecture—3 hours. Prerequisite(s): STA 120 Information theory and coding. Measure of information. Redundancy

EEC 267—Mobile Communications (4)
Lecture/Lab—3 hours. Prerequisite(s): EEC 260; EEC 265 (can be concurrent) Time-varying multi-path fading channel models and receiver performance in fading channels; multiple access techniques and multiple access receivers design and performance; optimum design and the capacity of wireless channels. Effective: 2013 Spring Quarter.

EEC 269A—Error Correcting Codes I (3)
Lecture—3 hours. Prerequisite(s): MAT 022A; EEC 160 Introduction to the theory and practice of block codes, linear block codes, cyclic codes, decoding algorithms, coding techniques. Effective: 2001 Fall Quarter.

EEC 269B—Error Correcting Codes II (3)
Lecture—3 hours. Prerequisite(s): EEC 165; EEC 269A Introduction to convolutional codes, turbo codes, trellis and block coded modulation codes, soft-decision decoding algorithms, the Viterbi algorithm, reliability-based decoding, trellis-based decoding, multistage decoding. Effective: 2002 Spring Quarter.

EEC 270—Computer Architecture (3)
Lecture—3 hours. Prerequisite(s): EEC 170 or ECS 154B Introduction to modern techniques for high-performance single and multiple processor systems. Topics include advanced pipeline design, advanced memory hierarchy design, optimizing pipeline and memory use, and memory sharing among multiprocessors. Case studies of recent single and multiple processor systems. Effective: 1999 Winter Quarter.

EEC 272—High-Performance Computer Architecture (4)
Lecture—4 hours. Prerequisite(s): EEC 270 or ECS 201A Designing and analysis of high performance computer architecture with emphasis on vector processing, on-chip interconnect networks, chip-level multiprocessors, memory and storage subsystem design and impact of technological advances on computer architecture. Effective: 2015 Spring Quarter.

EEC 273—Networking Architecture and Resource Management (4)
Lecture—3 hours; Project (Term Project). Prerequisite(s): ECS 152A or EEC 173A Pass One and Pass Two open to Graduate Students in Computer Science and Electrical and Computer Engineering only. Concepts and design principles of computer networks. Network architectures, protocol mechanisms and implementation principles (transport/network/data-link layers), network algorithms, router mechanisms, design requirements of applications, network simulation, modeling and performance analysis. (Same course as ECS 258.) Effective: 2016 Fall Quarter.

EEC 274—Internet Measurements, Modeling and Analysis (4)
Lecture—3 hours; Project (Term Project). Prerequisite(s): ECS 252 or EEC 273 Advanced topics in the theoretical foundations of network measurements, modeling, and statistical inferencing. Applications to Internet engineering, routing optimization, load balancing, traffic engineering, fault tolerance, anomaly detection, and network security. Individual project requirement. Effective: 2007 Winter Quarter.

EEC 276—Fault-Tolerant Computer Systems: Design and Analysis (3) Review all entries
Lecture—3 hours. Prerequisite(s): EEC 170; EEC 180A Introduces fault-tolerant digital system theory and practice. Covers recent and classic fault-tolerant techniques based on hardware redundancy, time redundancy, information redundancy, and software redundancy. Examines hardware and software reliability analysis, and example fault-tolerant designs. Not open for credit to students who have completed EEC 276A. Effective: 1997 Fall Quarter.

EEC 278—Computer Arithmetic for Digital Implementation (3) Review all entries
Lecture—3 hours. Prerequisite(s): EEC 170; EEC 180A The design and implementation of computer arithmetic logic.
units are studied with particular emphasis on high-speed performance requirements. Addition (subtraction), multiplication and division operations are covered, and fixed and floating-point representations are examined.

Effective: 1997 Winter Quarter.

**EEC 278—Computer Arithmetic for Digital Implementation (3)**  
Review all entries  
Lecture—3 hours. Prerequisite(s): EEC 170; (EEC 018 or EEC 180A) Design and implementation of computer arithmetic logic units are studied with particular emphasis on high-speed performance requirements. Addition (subtraction), multiplication and division operations are covered, and fixed and floating-point representations are examined. Effective: 1997 Winter Quarter.

**EEC 278—Computer Arithmetic for Digital Implementation (3)**  
Review all entries Discontinued  
Lecture—3 hours. Prerequisite(s): EEC 170; (EEC 018 or EEC 180A) Design and implementation of computer arithmetic logic units are studied with particular emphasis on high-speed performance requirements. Addition (subtraction), multiplication and division operations are covered, and fixed and floating-point representations are examined. Effective: 1999 Winter Quarter.

Effective: 2019 Winter Quarter.

**EEC 279—Modern Parallel Computing (3)**  
Review all entries  
Lecture—3 hours. Prerequisite(s): ECS 036B or ECS 034; optional but desirable: EEC 170 or ECS 154A. Exploration of the architecture of modern parallel computers, their programming models, and their programming systems. Effective: 2019 Spring Quarter.

**EEC 281—VLSI Digital Signal Processing (4)**  
Review all entries  
Lecture—3 hours; Project (Term Project). Prerequisite(s): EEC 150B; EEC 170; EEC 180B; or Consent of Instructor. Digital signal processors, building blocks, and algorithms. Design and implementation of processor algorithms, architectures, control, functional units, and circuit topologies for increased performance and reduced circuit size and power dissipation. Effective: 2011 Spring Quarter.

Effective: 2019 Winter Quarter.

**EEC 281—VLSI Digital Signal Processing (4)**  
Review all entries  
Lecture—3 hours; Project (Term Project). Prerequisite(s): EEC 150B; EEC 170; (EEC 180 or EEC 180B); or Consent of Instructor. Digital signal processors, building blocks, and algorithms. Design and implementation of processor algorithms, architectures, control, functional units, and circuit topologies for increased performance and reduced circuit size and power dissipation. Effective: 2019 Spring Quarter.

**EEC 282—Hardware Software Codesign (3)**  
Review all entries  
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): EEC 170; EEC 180B Specification and design of embedded systems; modeling and performance estimation; hardware/software partitioning; co-simulation; design re-use; platform-based design; reconfigurable computing. Effective: 2003 Spring Quarter.

Effective: 2019 Winter Quarter.

**EEC 282—Hardware Software Codesign (3)**  
Review all entries  
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): EEC 170; (EEC 180 or EEC 180B) Specification and design of embedded systems; modeling and performance estimation; hardware/software partitioning; co-simulation; design re-use; platform-based design; reconfigurable computing. Effective: 2019 Winter Quarter.

**EEC 282—Hardware Software Codesign (3)**  
Review all entries Discontinued  
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): EEC 170; (EEC 180 or EEC 180B) Specification and design of embedded systems; modeling and performance estimation; hardware/software partitioning; co-simulation; design re-use; platform-based design; reconfigurable computing. Effective: 2019 Spring Quarter.

**EEC 283—Advanced Design Verification of Digital Systems (4)**  
Review all entries  
Lecture—3 hours; Project (Term Project)—1 hour. Prerequisite(s): EEC 170; EEC 180A Design verification techniques for digital systems; simulation-based design verification techniques; formal verification techniques, including equivalence checking, model checking, and theorem proving; timing analysis and verification; application of design certification techniques to microprocessors. Effective: 2000 Winter Quarter.

**EEC 283—Advanced Design Verification of Digital Systems (4)**  
Review all entries  
Lecture—3 hours; Project (Term Project)—1 hour. Prerequisite(s): EEC 170; (EEC 018 or EEC 180A) Design verification techniques for digital systems; simulation-based design verification techniques; formal verification techniques, including equivalence checking, model checking, and theorem proving; timing analysis and verification; application of design certification techniques to microprocessors. Effective: 2019 Winter Quarter.

Review all entries  
Lecture—4 hours. Prerequisite(s): EEC 170; EEC 180B; or Consent of Instructor. ECS 122A recommended. Introduction to design and optimization of digital computing systems for embedded applications. Topics include combinatorial optimization techniques, performance and energy optimization in embedded systems, compilation
and architecture-specific mapping, programmable and reconfigurable platforms; design automation and algorithmic improvements to design process. Effective: 2007 Winter Quarter.

Lecture—4 hours. Prerequisite(s): EEC 170; (EEC 180 or EEC 180B); or Consent of Instructor. ECS 122A recommended. Introduction to design and optimization of digital computing systems for embedded applications. Topics include combinatorial optimization techniques, performance and energy optimization in embedded systems, compilation and architecture-specific mapping, programmable and reconfigurable platforms; design automation and algorithmic improvements to design process. Effective: 2019 Winter Quarter.

EEC 286—Introduction to Digital System Testing (3) Review all entries
Lecture—3 hours. Prerequisite(s): ECS 122A; STA 120 or STA 131A; (EEC 018 or EEC 180A) Review of several current techniques used to diagnose faults in both combinational and sequential circuits. Topics include path sensitization procedures, Boolean difference, D-algorithm random test generation, TC testing and an analysis of the effects of intermittent faults. Not open for credit to students who have completed EEC 276A. Effective: 1998 Winter Quarter.

EEC 286—Introduction to Digital System Testing (3) Review all entries
Lecture—3 hours. Prerequisite(s): (STA 120 or STA 131A); (EEC 018 or EEC 180A) Review of several current techniques used to diagnose faults in both combinational and sequential circuits. Topics include path sensitization procedures, Boolean difference, D-algorithm random test generation, TC testing and an analysis of the effects of intermittent faults. Not open for credit to students who have completed EEC 276A. Effective: 2019 Winter Quarter.

EEC 289A—Special Topics in Electrical and Computer Engineering; Computer Science (1-5)
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Computer Science. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289B—Special Topics in Electrical and Computer Engineering; Programming Systems (1-5)
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Programming Systems. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289C—Special Topics in Electrical and Computer Engineering; Digital Systems (1-5)
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Digital Systems. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289D—Special Topics in Electrical and Computer Engineering; Digital Systems (1-5)
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Digital Systems. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289E—Special Topics in Electrical and Computer Engineering; Signal Transmission (1-5)
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Signal Transmission. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289F—Special Topics in Electrical and Computer Engineering; Digital Communication (1-5)
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Digital Communication. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289G—Special Topics in Electrical and Computer Engineering; Control Systems (1-5)
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Control Systems. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289H—Special Topics in Electrical and Computer Engineering; Robotics (1-5)
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Robotics. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289I—Special Topics in Electrical and Computer Engineering; Signal Processing (1-5)
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Signal Processing. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289J—Special Topics in Electrical and Computer Engineering; Image Processing (1-5)
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Image Processing. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289K—Special Topics in Electrical and Computer Engineering; High Frequency Phenomena and Devices (1-5)
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in High Frequency Phenomena and Devices. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.
EEC 289L—Special Topics in Electrical and Computer Engineering; Solid-State Devices and Physical Electronics (1-5)
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Solid-State Devices and Physical Electronics. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289M—Special Topics in Electrical and Computer Engineering; Systems Theory (1-5)
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Systems Theory. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289N—Special Topics in Electrical and Computer Engineering; Active and Passive Circuits (1-5)
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Active and Passive Circuits. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289O—Special Topics in Electrical and Computer Engineering; Integrated Circuits (1-5)
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Integrated Circuits. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289P—Special Topics in Electrical and Computer Engineering; Computer Software (1-5)
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Computer Software. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289Q—Special Topics in Electrical and Computer Engineering; Computer Engineering (1-5)
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Computer Engineering. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289R—Special Topics in Electrical and Computer Engineering; Microprocessing (1-5)
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Microprocessing. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289S—Special Topics in Electrical and Computer Engineering; Electronics (1-5)
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Electronics. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289T—Special Topics in Electrical and Computer Engineering; Electromagnetics (1-5)
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Electromagnetics. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289U—Special Topics in Electrical and Computer Engineering; Optoelectronics (1-5)
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Optoelectronics. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289W—Special Topics in Electrical and Computer Engineering; Computer Networks (1-5)
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Computer Networks. May be repeated for credit when topic differs. Effective: 2018 Winter Quarter.

EEC 290—Seminar in Electrical and Computer Engineering (1)
Seminar—1 hour. Discussion and presentation of current research and development in Electrical and Computer Engineering. May be repeated for credit. Effective: 1997 Winter Quarter.

EEC 290C—Graduate Research Group Conference in Electrical and Computer Engineering (1)
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Research problems, progress, and techniques in electrical and computer engineering. May be repeated for credit. Effective: 1997 Winter Quarter.

EEC 290P—Capstone Project For MS Plan II (4)
Extensive Problem Solving; Lecture—1 hour; Term Paper. Prerequisite(s): Consent of Instructor. Conducting research projects in electrical and computer engineering. Communicating research results in written reports and oral presentations. Systemic project implementation to answer a comprehensive scientific or technical question in the area of electrical and computer engineering. Effective: 2019 Spring Quarter.

EEC 291—Solid-State Circuit Research Laboratory Seminar (1)
Seminar—1 hour. Prerequisite(s): Graduate standing. Lectures on solid-state circuit and system design by various visiting experts in the field. May be repeated for credit. Effective: 1997 Winter Quarter.
EEC 292—Seminar in Solid-State Technology (1)
Seminar—1 hour. Prerequisite(s): Graduate standing. Lectures on solid-state technology by various visiting experts in the field. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

EEC 293—Computer Engineering Research Seminar (1)
Seminar—1 hour. Prerequisite(s): Graduate standing or consent of instructor. Lectures, tutorials and seminars on topics in computer engineering. May be repeated for credit. (S/U grading only.) Effective: 2000 Winter Quarter.

EEC 294—Communications, Signal and Image Processing Seminar (1)
Seminar—1 hour. Prerequisite(s): Graduate standing. Communications, signal and image processing, video engineering and computer vision. May be repeated for credit. (S/U grading only.) Effective: 2003 Winter Quarter.

EEC 295—Systems, Control and Robotics Seminar (1)
Seminar—1 hour. Prerequisite(s): Graduate standing. Seminars on current research in systems and control by faculty and visiting experts. Technical presentations and lectures on current topics in robotics research and robotics technology. May be repeated for credit. (S/U grading only.) Effective: 1998 Winter Quarter.

EEC 296—Photonics Research Seminar (1)
Seminar—1 hour. Prerequisite(s): Graduate standing. Lectures on photonics and related areas by faculty and visiting experts. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 1998 Winter Quarter.

EEC 298—Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

EEC 299—Research (1-12)
Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

EEC 390—The Teaching of Electrical Engineering (1)
Discussion—1 hour. Prerequisite(s): Meet qualifications for teaching assistant and/or associate-in in Electrical Engineering. Participation as a teaching assistant or associate-in in a designated engineering course. Methods of leading discussion groups or laboratory sections, writing and grading quizzes, use of laboratory equipment, and grading laboratory reports. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

EEC 396—Teaching Assistant Training Practicum (1-4)
Variable. Prerequisite(s): Graduate standing. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

Computer Science (Graduate Group)

Computer Science (Graduate Group) | Computer Science (Graduate Group) Information
Kwan-Liu Ma, Ph.D., Chairperson of the Group

Group Office. 2063 Engineering II (Department of Computer Science) 530-752-7004; gradinfocs@ucdavis.edu; http://www.cs.ucdavis.edu

Computer Science (Graduate Group) | Computer Science M.S.
Kwan-Liu Ma, Ph.D., Chairperson of the Group

Group Office. 2063 Engineering II (Department of Computer Science); 530-752-7004; gradinfocs@ucdavis.edu; http://www.cs.ucdavis.edu

Graduate Study. The Graduate Group in Computer Science offers programs of study leading to the M.S. and Ph.D. degrees in Computer Science. The varied nature of the faculty brings a wide variety of research interests to the program. Research strengths lie in algorithms, computational biology, computer architecture, computer graphics and visualization, database systems, computer security and cryptography, computer networks, program specifications and verification, programming languages and compilers, parallel and distributed systems, scientific computation, and software engineering. Interdisciplinary research in computer science is encouraged.

Preparation. Normal preparation for the program is a bachelor's degree in either computer science or in a closely related field (such as electrical engineering or mathematics, with substantial course work in computer science). Applications are also considered from students with outstanding records in other disciplines. M.S. students may either complete a thesis, project or pass a comprehensive examination.
Graduate Advisors. D. Ghosal (Chair), M. Farrens, P. Koehl

The Major Program

The Department of Computer Science administers two majors: Computer Science and Engineering (CSE), in the College of Engineering, and Computer Science (CS), in the College of Letters and Science. It also administers two minors: Computer Science, in the College of Letters and Science, and Computational Biology, in the College of Engineering. For information on the Computer Science and Engineering curriculum and the minor in Computational Biology, see Engineering: Computer Science.

The primary differences between the CSE and CS majors are the extent of hardware coverage and curricular flexibility. The CSE major develops a solid understanding of the entire machine, including hands-on experience with its hardware components. The CS major teaches some hardware, at the digital-design level, on simulators. The CSE major has fewer free electives. The CS major's more generous electives make it easier to complete a minor or double major.

Students in the CS major receive a solid grounding in the fundamentals of computer languages, operating systems, computer architecture, and the mathematical abstractions underpinning computer science. Students are prepared for both industry and postgraduate study.
Preparatory Requirements

Before declaring a major in Computer Science, students must complete the following courses with an overall UC Davis grade point average of at least 3.000; a grade of C- or better required in all courses:

- MAT 021A Calculus 4
- MAT 021B Calculus 4
- ECS 020 Discrete Mathematics For Computer Science 4

Choose one option: 5-8

(a) 8
- ECS 030 Programming and Problem Solving (Discontinued) 4
- ECS 036A Programming & Problem Solving 4
- ECS 040 Software Development and Object-Oriented Programming (Discontinued) 4

OR
- ECS 036B Software Development and Object-Oriented Programming in C++ 4

(b) 5
- ECS 034 Software Development in UNIX and C/C++ 5

Preparatory Subject Matter

Choose three from the following: 15

- BIS 002A Introduction to Biology: Essentials of Life on Earth 5
- BIS 002B Introduction to Biology: Principles of Ecology and Evolution 5
- BIS 002C Introduction to Biology: Biodiversity and the Tree of Life 5
- CHE 002A General Chemistry 5
- CHE 002B General Chemistry 5
- CHE 002C General Chemistry 5

Graduate Study. See Graduate Studies.
The Major Program

The Department of Computer Science administers two majors: Computer Science and Engineering (CSE), in the College of Engineering, and Computer Science (CS), in the College of Letters and Science. It also administers two minors: Computer Science, in the College of Letters and Science, and Computational Biology, in the College of Engineering. For information on the Computer Science and Engineering curriculum and the minor in Computational Biology, see Engineering: Computer Science.

The primary differences between the CSE and CS majors are the extent of hardware coverage and curricular flexibility. The CSE major develops a solid understanding of the entire machine, including hands-on experience with its hardware components. The CS major teaches some hardware, at the digital-design level, on simulators. The CSE major has fewer free electives. The CS major's more generous electives make it easier to complete a minor or double major.

Students in the CS major receive a solid grounding in the fundamentals of computer languages, operating systems, computer architecture, and the mathematical abstractions underpinning computer science. Students are prepared for both industry and postgraduate study.
Choose any three upper-division Computer Science Engineering courses; a single approved course of three to five units from ECS 192 or 199 is allowed.

Choose any two upper division courses including any upper division Computer Science and Engineering courses or any upper division course in MAT (excluding MAT 111), EEC 100, 171, 172, 180A, 180B; ECN 122; STA 131A, 131B, 141B, 141C; PSC 120 or LIN 127, 177.

Total: 19-22

Computer Science; Letters & Science | ECS Courses

Courses in ECS:

ECS 010—Introduction to Programming (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Two years of high school algebra. Pass One open to Computer Science, Computer Science Engineering, Computer Engineering, Electrical Engineering Majors only. Hands-on introduction to computation, through programming and problem solving. Two units of credit for students who have taken course 12 or Engineering 6. Not open to students who have completed course 30. GE credit: QL, SE, SL. Effective: 2016 Fall Quarter.

ECS 010—Introduction to Programming (4) Review all entries Discontinued
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Two years of high school algebra. Pass One open to Computer Science, Computer Science Engineering, Computer Engineering, Electrical Engineering Majors only. Hands-on introduction to computation, through programming and problem solving. Two units of credit for students who have taken course 12 or Engineering 6. Not open to students who have completed course 30. GE credit: QL, SE, SL. Effective: 2018 Fall Quarter.

ECS 012—Introduction to Media Computation (4)
Discussion/Laboratory—1 hour; Lecture—3 hours. Introduction to key computational ideas necessary to understand and produce digital media. Fundamentals of programming are covered as well as analysis of how media are represented and transmitted in digital form. Aimed primarily at non-computer science students. Two units of credit for students that have taken ECS 010 or ECS 030 or ENG 006. (Same course as CTS 012.) GE credit: AH, SE, VL. Effective: 2015 Spring Quarter.

ECS 015—Introduction to Computers (4)
Laboratory—3 hours; Lecture—3 hours. Computer uses in modern society. Emphasis on uses in non-scientific disciplines. Includes word processing, spreadsheets, web-page creation, elementary programming, basic computer organization, the Internet, the uses of computers and their influence on society. Course not intended for CS or CSE majors. Only two units of credit allowed to students who have completed PLS 021; not open for credit to students who have completed ECS 030. GE credit: QL, SE, WE. Effective: 2013 Fall Quarter.

ECS 020—Discrete Mathematics For Computer Science (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MAT 016A C- or better or MAT 017A C- or better or MAT 021A C- or better Pass One open to Computer Science, Computer Science Engineering, Computer Engineering, and Cognitive Science Majors only. Discrete mathematics of particular utility to computer science. Proofs by induction. Propositional and first-order logic. Sets, functions, and relations. Big-O and related notations. Recursion and solutions of recurrence relations. Combinatorics. Probability on finite probability spaces. Graph theory. GE credit: QL, SE. Effective: 2017 Winter Quarter.

ECS 030—Programming and Problem Solving (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MAT 016A (can be concurrent) or MAT 017A (can be concurrent) or MAT 021A (can be concurrent); Prior experience with basic programming concepts (variable, loops, conditional statements) recommended. Pass One open to Computer Science, Computer Science Engineering, Computer Engineering, Electrical Engineering, and Cognitive Science Majors only. Introduction to computers and computer programming, algorithm design, and debugging. Elements of good programming style. Programming in the C language. Use of basic UNIX tools. GE credit: QL, SE. Effective: 2017 Spring Quarter.

ECS 030—Programming and Problem Solving (4) Review all entries Discontinued
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MAT 016A (can be concurrent) or MAT 017A (can be concurrent) or MAT 021A (can be concurrent); Prior experience with basic programming concepts (variable, loops, conditional statements) recommended. Pass One open to Computer Science, Computer Science Engineering,

**ECS 032A—Introduction to Programming (4)**
Discussion—1 hour; Lecture—3 hours. Not open to students who have completed ECS 036A. Introduction to programming and problem solving in Python. Aimed primarily at non-major students. No credit to students who completed previous ECS 010, ECS 030 or higher. GE credit: SE. Effective: 2018 Fall Quarter.

**ECS 032B—Introduction to Data Structures (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 010 C- or better or ECS 030 C- or better or ECS 032A C- or better or ECS 036A C- or better Design and analysis of data structures using Python; trees, heaps, searching, sorting, and graphs. No credit to students who completed ECS 030C or ECS 060 or higher. GE credit: SE. Effective: 2018 Fall Quarter.

**ECS 034—Software Development in UNIX and C/C++ (5)**
Discussion—1 hour; Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): ECS 032B C- or better; or Consent of Instructor. UNIX Operating system tools and programming environment. Methods for debugging and verification. Principles of C and object-oriented programming in C++. Extensive programming. Only three units of credit for students who have previously taken ECS 036B. GE credit: SE. Effective: 2018 Fall Quarter.

**ECS 036A—Programming and Problem Solving (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Prior experience with basic programming concepts (variable, loops, conditional statements) required; must satisfy computer science placement exam, or C- or better in ECS 32A. Pass One restricted to Computer Science, Computer Science and Engineering, Computer Engineering, Electrical Engineering, and Cognitive Science majors only. Computers and computer programming for students with some prior experience, algorithm design, and debugging. Good programming style. Use of basic UNIX tools. Two units if completed ECS 032A; no credit for students who have completed ECS 032B or previous course ECS 030. GE credit: SE. Effective: 2018 Fall Quarter.

**ECS 036B—Software Development and Object-Oriented Programming in C++ (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 032A C- or better or ECS 010 C- or better; or must satisfy computer science placement exam; prior experience with basic programming concepts (variable, loops, conditional statements) required. Pass One restricted to Computer Science, Computer Science & Engineering, Computer Engineering, Electrical Engineering, and Cognitive Science majors only. Computers and computer programming for students with some prior experience, algorithm design, and debugging. Good programming style. Use of basic UNIX tools. Two units if completed ECS 032A; no credit for students who have completed ECS 032B or previous course ECS 030. GE credit: SE. Effective: 2018 Fall Quarter.

**ECS 036C—Data Structures, Algorithms, and Programming (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 040 C- or better or ECS 036B C- or better Pass One restricted to Computer Science, Computer Science and Engineering, Computer Engineering, Electrical Engineering, and Cognitive Science majors only. Design and analysis of data structures for a variety of applications; trees, heaps, searching, sorting, hashing, and graphs. Extensive programming. Not open for credit to students who have taken ECS 032B or previous ECS 060. GE credit: SE. Effective: 2018 Fall Quarter.
ECS 036C—Data Structures, Algorithms, and Programming (4)  
**Review all entries**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECS 040 C- or better or ECS 036B C- or better); ECS 020 C- or better  
Pass One restricted to Computer Science, Computer Science and Engineering, Computer Engineering, Electrical Engineering, and Cognitive Science majors only. Design and analysis of data structures for a variety of applications; trees, heaps, searching, sorting, hashing, and graphs. Extensive programming. Not open for credit to students who have taken ECS 032B or previous ECS 060. GE credit: SE. Effective: 2019 Winter Quarter.

ECS 040—Software Development and Object-Oriented Programming (4)  
**Review all entries**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 030 C- or better; Or equivalent. Pass One open to Computer Science, Computer Science Engineering, Computer Engineering, Electrical Engineering, and Cognitive Science Majors only. Elements of program design, style, documentation, efficiency. Methods for debugging and verification. Operating system tools. Principles and use of object-oriented programming in C++. Basic data structures and their use. GE credit: SE. Effective: 2018 Winter Quarter.

ECS 050—Computer Organization and Machine-Dependent Programming (4)  
**Review all entries**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 040 C- or better or ECS 032B C- or better or ECS 036B C- or better  
Pass One open to Computer Science, Computer Science Engineering, Computer Engineering, and Cognitive Science Majors only. Comparative study of different hardware architectures via programming in the assembly languages of various machines. Role of system software in producing an abstract machine. Introduction to I/O devices and programming. Only one unit of credit allowed for students who have taken EEC 070. GE credit: SE. Effective: 2019 Winter Quarter.

ECS 060—Data Structures and Programming (4)  
**Review all entries**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 040 C- or better Pass One open to Computer Science, Computer Science Engineering, Computer Engineering, and Cognitive Science Majors only. Design and analysis of data structures for a variety of applications. Trees, heaps, searching, sorting, hashing, graphs. Extensive programming. GE credit: QL, SE. Effective: 2017 Spring Quarter.

ECS 089A—Special Topics in Computer Science; Computer Science Theory (1-5)  
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Computer Science Theory. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECS 089B—Special Topics in Computer Science; Architecture (1-5)  
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Architecture. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECS 089C—Special Topics in Computer Science; Programming Languages and Compilers (1-5)  
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Programming Languages and Compilers. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECS 089D—Special Topics in Computer Science; Operating Systems (1-5)  
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Operating Systems. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.
ECS 089E—Special Topics in Computer Science; Software Engineering (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Software Engineering. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECS 089F—Special Topics in Computer Science; Databases (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Databases. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECS 089G—Special Topics in Computer Science; Artificial Intelligence (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Artificial Intelligence. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECS 089H—Special Topics in Computer Science; Computer Graphics (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Computer Graphics. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECS 089I—Special Topics in Computer Science; Networks (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Networks. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECS 089J—Special Topics in Computer Science; Computer-Aided Design (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Computer-Aided Design. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECS 089K—Special Topics in Computer Science; Scientific Computing (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Scientific Computing. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECS 089L—Special Topics in Computer Science; Computer Science (1-5)
Laboratory. Prerequisite(s): Consent of Instructor. Special topics in Computer Science. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECS 092—Internship in Computer Science (1-5)
Internship. Prerequisite(s): Lower division standing; project approval prior to period of internship. Supervised work experience in computer science. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

ECS 098—Directed Group Study (1-5)
Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

ECS 098F—Student Facilitated Course (1-4)
Variable—1-4 hours. Prerequisite(s): Consent of Instructor. Student facilitated course intended primarily for lower division students. (P/NP grading only.) Effective: 2016 Winter Quarter.

ECS 099—Special Study for Lower Division Students (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

ECS 113—Computer Security for Non-Majors (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Programming skill at the level of ECS 015. Principles, mechanisms, implementation, and sound practices of computer security and data protection. Cryptography, authentication and access control. Internet security. Malicious software. Common vulnerabilities. Practical security in everyday life. Course not intended for CS or CSE majors. No credit allowed to students who have completed ECS 153 or ECS 155. GE credit: QL, SE. Effective: 2016 Fall Quarter.
ECS 120—Theory of Computation (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECS 020 or MAT 108); (ECS 32B or ECS 36C Recommended) Pass One open to Computer Science, Computer Science Engineering, and Computer Engineering Majors only. Fundamental ideas in the theory of computation, including formal languages, computability and complexity. Reducibility among computational problems. GE credit: QL, SE. Effective: 2019 Winter Quarter.

ECS 122A—Algorithm Design and Analysis (4) Review all entries

ECS 122B—Algorithm Design and Analysis (4) Review all entries

ECS 124—Theory and Practice of Bioinformatics (4) Review all entries
Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): (ECS 010 or ECS 032A or ECS 030 or ECS 036A or ENG 006); (STA 012 or STA 013 or STA 013Y or STA 032 or STA 100 or STA 131A or MAT 135A or BIM 105); (BIS 002A or MCB 010) Pass One open to Computer Science, Computer Science Engineering, and Biotechnology majors only. Fundamental biological, mathematical and algorithmic models underlying bioinformatics and systems biology; sequence analysis, database search, genome annotation, clustering and classification, functional gene networks, regulatory network inference, phylogenetic trees, applications of common bioinformatics tools in molecular biology and genetics. GE credit: SE. Effective: 2018 Spring Quarter.

ECS 127—Cryptography (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 020 or MAT 108 Pass One open to Computer Science and Computer Science Engineering Majors only. Introduction to the theory and practice of cryptographic techniques used in computer security. Encryption (secret-key and public-key), message authentication, digital signatures, entity authentication, key distribution, and other cryptographic protocols. The social context of cryptography. GE credit: QL, SE, SL. Effective: 2016 Fall Quarter.
ECS 036A) Pass One open to Computer Science and Computer Science Engineering Majors only. Introduction to the theory and practice of cryptographic techniques used in computer security. Encryption (secret-key and public-key), message authentication, digital signatures, entity authentication, key distribution, and other cryptographic protocols. The social context of cryptography. GE credit: QL, SE, SL. Effective: 2019 Winter Quarter.

ECS 129—Computational Structural Bioinformatics (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): BIS 002A or MCB 010; College level programming course. Pass One open to Computer Science, Computer Science Engineering, and Biotechnology majors only. Fundamental biological, chemical and algorithmic models underlying computational structural biology; protein structure and nucleic acids structure; comparison of protein structures; protein structure prediction; molecular simulations; databases and online services in computational structural biology. GE credit: SE. Effective: 2016 Fall Quarter.

ECS 129—Computational Structural Bioinformatics (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (BIS 002A or MCB 010); (ECS 010 or ECS 032A or ECS 036A) Pass One open to Computer Science, Computer Science Engineering, and Biotechnology majors only. Fundamental biological, chemical and algorithmic models underlying computational structural biology; protein structure and nucleic acids structure; comparison of protein structures; protein structure prediction; molecular simulations; databases and online services in computational structural biology. GE credit: SE. Effective: 2019 Winter Quarter.

ECS 130—Scientific Computation (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECS 030 or ENG 006); (MAT 022A or MAT 067) Pass One open to Computer Science and Computer Science Engineering Majors only. Matrix-vector approach using MATLAB for floating-point arithmetic, error analysis, data interpolation, least squares data fitting, quadrature, zeros, optimization and matrix eigenvalues and singular values. Parallel computing for matrix operations and essential matrix factorizations. GE credit: SE. Effective: 2016 Fall Quarter.

ECS 130—Scientific Computation (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECS 030 or ENG 006 or ECS 032A or ECS 010 or ECS 036A); (MAT 022A or MAT 067) Pass One open to Computer Science and Computer Science Engineering Majors only. Matrix-vector approach using MATLAB for floating-point arithmetic, error analysis, data interpolation, least squares data fitting, quadrature, zeros, optimization and matrix eigenvalues and singular values. Parallel computing for matrix operations and essential matrix factorizations. GE credit: SE. Effective: 2019 Winter Quarter.

ECS 132—Probability and Statistical Modeling for Computer Science (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 040; (ECS 034 or ECS 036B); ECS 050; MAT 021C; (MAT 022A or MAT 067) Pass One open to Computer Science and Computer Science Engineering Majors only. Univariate and multivariate distributions. Estimation and model building. Markov/Hidden Markov models. Applications to data mining, networks, security, software engineering and bioinformatics. GE credit: QL, SE. Effective: 2016 Fall Quarter.

ECS 132—Probability and Statistical Modeling for Computer Science (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECS 040 or ECS 034 or ECS 036B); ECS 050; MAT 021C; (MAT 022A or MAT 067) Pass One open to Computer Science and Computer Science Engineering Majors only. Univariate and multivariate distributions. Estimation and model building. Markov/Hidden Markov models. Applications to data mining, networks, security, software engineering and bioinformatics. GE credit: QL, SE. Effective: 2019 Winter Quarter.

ECS 140A—Programming Languages (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 050 or EEC 070; ECS 060 Pass One open to Computer Science, Computer Science Engineering, Computer Engineering, and Cognitive Science Majors only. Syntactic definition of programming languages. Introduction to programming language features including variables, data types, data abstraction, object-orientedness, scoping, parameter disciplines, exception handling. Non-imperative programming languages. Comparative study of several high-level programming languages. GE credit: SE. Effective: 2017 Winter Quarter.

ECS 140A—Programming Languages (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 050; (ECS 060 or ECS 032B or ECS 036C); ECS 020 Pass One open to Computer Science, Computer Science Engineering, Computer Engineering, and Cognitive Science Majors only. Syntactic definition of programming languages. Introduction to programming language features including variables, data types, data abstraction, object-orientedness, scoping, parameter disciplines,
exception handling. Non-imperative programming languages. Comparative study of several high-level programming languages. GE credit: SE. Effective: 2019 Winter Quarter.

**ECS 140A—Programming Languages (4)** *Review all entries*
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 050; (ECS 060 or ECS 032B or ECS 036C); ECS 020; ECS 150 Pass One open to Computer Science, Computer Science Engineering, Computer Engineering, and Cognitive Science Majors only. Syntactic definition of programming languages. Introduction to programming language features including variables, data types, data abstraction, object-orientedness, scoping, parameter disciplines, exception handling. Non-imperative programming languages. Comparative study of several high-level programming languages. GE credit: SE. Effective: 2019 Fall Quarter.

**ECS 140B—Programming Languages (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 140A Pass One open to Computer Science and Computer Science Engineering Majors only. Continuation of programming language principles. Further study of programming language paradigms such as functional and logic; additional programming language paradigms such as concurrent (parallel); key implementation issues for those paradigms; and programming language semantics. GE credit: SE. Effective: 2019 Winter Quarter.

**ECS 142—Compilers (4)** *Review all entries*
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 020; ECS 140A; ECS 120 recommended. Pass One open to Computer Science and Computer Science Engineering Majors only. Principles and techniques of lexical analysis, parsing, semantic analysis, code generation, and code optimization. Implementation of compilers. GE credit: SE. Effective: 2016 Fall Quarter.

**ECS 142—Compilers (4)** *Review all entries*
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 140A; ECS 120; ECS 122A recommended. Pass One open to Computer Science and Computer Science Engineering Majors only. Principles and techniques of lexical analysis, parsing, semantic analysis, code generation, and code optimization. Implementation of compilers. GE credit: SE. Effective: 2019 Winter Quarter.

**ECS 145—Scripting Languages and Their Applications (4)** *Review all entries*
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Programming skill at the level of ECS 060. Pass One open to Computer Science and Computer Science Engineering Majors only. Goals and philosophy of scripting languages, with Python and R as prime examples. Applications include networking, data analysis and display, and graphical user interfaces (GUIs). GE credit: SE. Effective: 2016 Fall Quarter.

**ECS 145—Scripting Languages and Their Applications (4)** *Review all entries*
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 034 or ECS 036C or ECS 060; or Consent of Instructor. Pass One open to Computer Science and Computer Science Engineering Majors only. Goals and philosophy of scripting languages, with Python and R as prime examples. Applications include networking, data analysis and display, and graphical user interfaces (GUIs). GE credit: SE. Effective: 2019 Winter Quarter.

**ECS 150—Operating Systems and System Programming (4)** *Review all entries*
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 040; (ECS 050 or EEC 070 or EEC 170) Pass One open to Computer Science, Computer Science Engineering, and Computer Engineering Majors only. Basic concepts of operating systems and system programming. Processes and interprocess communication/synchronization; virtual memory, program loading and linking; file and I/O subsystems; utility programs. Study of a real operating system. GE credit: SE. Effective: 2019 Winter Quarter.

**ECS 150—Operating Systems and System Programming (4)** *Review all entries*
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECS 034 or ECS 036C or ECS 060); (ECS 154A or EEC 170) Pass One open to Computer Science, Computer Science Engineering, and Computer Engineering Majors only. Basic concepts of operating systems and system programming. Processes and interprocess communication/synchronization; virtual memory, program loading and linking; file and I/O subsystems; utility programs. Study of a real operating system. GE credit: SE. Effective: 2019 Winter Quarter.

**ECS 152A—Computer Networks (4)** *Review all entries*
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 060; (ECS 132 or EEC 161 or MAT 135A or STA 131A or STA 120 or STA 032) Pass One open to Computer Science and Computer Science Engineering Majors only. Overview of computer networks, TCP/IP protocol suite, computer-networking applications and protocols, transport-layer protocols, network architectures, Internet Protocol (IP), routing, link-layer protocols, local area and wireless networks, medium access control, physical aspects of data transmission, and network-performance analysis. Only 2
units of credit for students who have taken ECS 157. (Same course as EEC 173A.) GE credit: SE. Effective: 2016 Fall Quarter.

**ECS 152A—Computer Networks (4)** *Review all entries*

Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECS 060 or ECS 032B or ECS 036C); (ECS 132 or EEC 161 or MAT 135A or STA 131A or STA 120 or STA 032) Pass One open to Computer Science and Computer Science Engineering Majors only. Overview of computer networks, TCP/IP protocol suite, computer-networking applications and protocols, transport-layer protocols, network architectures, Internet Protocol (IP), routing, link-layer protocols, local area and wireless networks, medium access control, physical aspects of data transmission, and network-performance analysis. Only 2 units of credit for students who have taken ECS 157. (Same course as EEC 173A.) GE credit: SE. Effective: 2019 Winter Quarter.

**ECS 152B—Computer Networks (4)** *Review all entries*

Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 152A or EEC 173A Pass One open to Computer Science and Computer Science Engineering Majors only. TCP/IP protocol suite, computer networking applications, client-server and peer-to-peer architectures, application-layer protocols, transport-layer protocols, transport-layer interfaces, sockets, network programming, remote procedure calls, and network management. GE credit: SE. Effective: 2016 Fall Quarter.

**ECS 152C—Advanced Topics in Computer Networks (4)**

Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EEC 173A or ECS 152A Advanced topics in computer networks, wireless networks, multimedia networking, traffic analysis and modeling, network design and management, network simulation and performance analysis, and design projects in communication networks. (Same course as EEC 173B.) GE credit: SE. Effective: 2014 Fall Quarter.

**ECS 153—Computer Security (4)** *Review all entries*

Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 150; ECS 152A Pass One open to Computer Science and Computer Science Engineering Majors only. Principles, mechanisms, and implementation of computer security and data protection. Policy, encryption and authentication, access control, and integrity models and mechanisms; network security; secure systems; programming and vulnerabilities analysis. Study of an existing operating system. Not open for credit to students who have completed course 155. GE credit: SE. Effective: 2016 Fall Quarter.

**ECS 153—Computer Security (4)** *Review all entries*

Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 150; (ECS 152A or EEC 173A) Pass One open to Computer Science and Computer Science Engineering Majors only. Principles, mechanisms, and implementation of computer security and data protection. Policy, encryption and authentication, access control, and integrity models and mechanisms; network security; secure systems; programming and vulnerabilities analysis. Study of an existing operating system. Not open for credit to students who have completed ECS 155. GE credit: SE. Effective: 2018 Fall Quarter.

**ECS 154A—Computer Architecture (4)**

Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 050 or EEC 070 Pass One open to Computer Science and Computer Science Engineering Majors only. Introduction to digital design. Interfacing of devices for I/O, memory and memory management. Input/output programming, via wait loops, hardware interrupts and calls to operating system services. Hardware support for operating systems software. Only one unit of credit allowed for students who have taken EEC 170. GE credit: SE. Effective: 2017 Winter Quarter.

**ECS 154B—Computer Architecture (4)**

Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 154A or (EEC 170, EEC 180A) Pass One open to Computer Science and Computer Science Engineering Majors only. Hardwired and microprogrammed CPU design. Memory hierarchies. Uniprocessor performance analysis under varying program mixes. Introduction to pipelining and multiprocessors. GE credit: SE. Effective: 2016 Fall Quarter.

**ECS 158—Programming on Parallel Architectures (4)**

Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 150; ECS 154B recommended. Pass One open to
Computer Science and Computer Science Engineering Majors only. Techniques for software development using the shared-memory and message-passing paradigms, on parallel architectures and networks of workstations. Locks, barriers, and other techniques for synchronization. Introduction to parallel algorithms. GE credit: SE. Effective: 2018 Winter Quarter.

**ECS 160—Software Engineering (4)** [Review all entries]
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 140A Pass One open to Computer Science and Computer Science Engineering Majors only. Requirements, specification, design, implementation, testing, and verification of large software systems. Study and use of software engineering methodologies. Team programming. GE credit: SE. Effective: 2016 Fall Quarter.

**ECS 160—Software Engineering (4)** [Review all entries]
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 140A; extensive programming experience recommended. Pass One open to Computer Science and Computer Science Engineering Majors only. Requirements, specification, design, implementation, testing, and verification of large software systems. Study and use of software engineering methodologies. Team programming. GE credit: SE. Effective: 2019 Winter Quarter.

**ECS 161—Modern Programming Tools (4)** [Review all entries]
Laboratory—2 hours; Lecture—2 hours. Prerequisite(s): ECS 040; or equivalent. Pass One open to Computer Science and Computer Science Engineering Majors only. Concepts and practice of collaborative software development using modern software tools. GE credit: SE. Effective: 2017 Fall Quarter.

**ECS 161—Modern Programming Tools (4)** [Review all entries]
Laboratory—2 hours; Lecture—2 hours. Prerequisite(s): (ECS 040 or ECS 032B or ECS 036B) Pass One open to Computer Science and Computer Science Engineering Majors only. Concepts and practice of collaborative software development using modern software tools. GE credit: SE. Effective: 2019 Winter Quarter.

**ECS 162—Web Programming (4)** [Review all entries]
Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): ECS 030; Or equivalent programming experience in C and the Unix environment. Pass One open to Computer Science and Computer Science Engineering Majors only. Technical aspects of building websites, including both server-side and client-side software development. GE credit: SE, VL. Effective: 2017 Fall Quarter.

**ECS 162—Web Programming (4)** [Review all entries]
Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): ECS 030 or ECS 034 or ECS 036B; or equivalent programming experience in C and the Unix environment. Pass One open to Computer Science and Computer Science Engineering Majors only. Technical aspects of building websites, including both server-side and client-side software development. GE credit: SE, VL. Effective: 2019 Winter Quarter.

**ECS 163—Information Interfaces (4)** [Review all entries]
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 060 Pass One open to Computer Science and Computer Science Engineering Majors only. Art and science of information visualization and interfaces for information systems. Design principles of human-computer interaction. Visual display and navigation of nonspatial and higher dimensional data. Implementations, performance issues, tradeoffs, and evaluation of interactive information systems. GE credit: SE, VL. Effective: 2016 Fall Quarter.

**ECS 163—Information Interfaces (4)** [Review all entries]
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 060 or ECS 032B or ECS 036C Pass One open to Computer Science and Computer Science Engineering Majors only. Art and science of information visualization and interfaces for information systems. Design principles of human-computer interaction. Visual display and navigation of nonspatial and higher dimensional data. Implementations, performance issues, tradeoffs, and evaluation of interactive information systems. GE credit: SE, VL. Effective: 2019 Winter Quarter.

**ECS 165A—Database Systems (4)** [Review all entries]
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 060 or ECS 032B or ECS 036C Pass One open to Computer Science and Computer Science Engineering Majors only. Database modeling and design (E/R model, relational model), relational algebra, query languages (SQL), file and index structures, query processing, transaction management. GE credit: SE. Effective: 2016 Fall Quarter.

**ECS 165A—Database Systems (4)** [Review all entries]
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 060 or ECS 032B or ECS 036C Pass One open to Computer Science and Computer Science Engineering Majors only. Database modeling and design (E/R model,
relational model), relational algebra, query languages (SQL), file and index structures, query processing, transaction management. GE credit: SE. Effective: 2019 Winter Quarter.

ECS 165B—Database Systems (4) **Review all entries**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 165A Pass One open to Computer Science and Computer Science Engineering Majors only. Data modeling (object-relational, graph-based, spatiotemporal models). Querying semistructured data (XML). Database theory (normalization, integration, provenance). Database programming (stored procedures, embedded SQL, web programming). Advanced topics (data warehousing, parallel data processing). GE credit: SE. Effective: 2016 Fall Quarter.

ECS 165B—Database Systems (4) **Review all entries**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 165A; (ECS 060 or ECS 034 or ECS 036C) Pass One open to Computer Science and Computer Science Engineering Majors only. Data modeling (object-relational, graph-based, spatiotemporal models). Querying semistructured data (XML). Database theory (normalization, integration, provenance). Database programming (stored procedures, embedded SQL, web programming). Advanced topics (data warehousing, parallel data processing). GE credit: SE. Effective: 2016 Fall Quarter.

ECS 165B—Database Systems (4) **Review all entries**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 165A; (ECS 060 or ECS 034 or ECS 036C) Pass One open to Computer Science and Computer Science Engineering Majors only. Data modeling (object-relational, graph-based, spatiotemporal models). Querying semistructured data (XML). Database theory (normalization, integration, provenance). Database programming (stored procedures, embedded SQL, web programming). Advanced topics (data warehousing, parallel data processing). GE credit: SE. Effective: 2019 Winter Quarter.

ECS 170—Introduction to Artificial Intelligence (4) **Review all entries**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 060 Pass One open to Computer Science and Computer Science Engineering Majors only. Design and implementation of intelligent computer systems. Knowledge representation and organization. Memory and inference. Problem solving. Natural language processing. GE credit: SE. Effective: 2016 Fall Quarter.

ECS 170—Introduction to Artificial Intelligence (4) **Review all entries**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 060 or ECS 032B or ECS 036C Pass One open to Computer Science and Computer Science Engineering Majors only. Design and implementation of intelligent computer systems. Knowledge representation and organization. Memory and inference. Problem solving. Natural language processing. GE credit: SE. Effective: 2019 Winter Quarter.

ECS 171—Machine Learning (4) **Review all entries**
Discussion—1 hour; Lecture—3 hours. Pass One open to Computer Science and Computer Science Engineering Majors only. Introduction to machine learning. Supervised and unsupervised learning, including classification, dimensionality reduction, regression and clustering using modern machine learning methods. Applications of machine learning to other fields. GE credit: SE. Effective: 2016 Fall Quarter.

ECS 171—Machine Learning (4) **Review all entries**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 060 or ECS 032B or ECS 036C; or Consent of Instructor. Probability equivalent to STA 032 or STA 131A or ECS 132 recommended; linear algebra equivalent to MAT 22A recommended. Pass One open to Computer Science and Computer Science Engineering Majors only. Introduction to machine learning. Supervised and unsupervised learning, including classification, dimensionality reduction, regression and clustering using modern machine learning methods. Applications of machine learning to other fields. GE credit: SE. Effective: 2019 Winter Quarter.

ECS 173—Image Processing and Analysis (4) **Review all entries**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (MAT 067 or MAT 022A C- or better); ECS 060 Pass One open to Computer Science and Computer Science Engineering Majors only. Techniques for automated extraction of high-level information from images generated by cameras, three-dimensional surface sensors, and medical devices. Typical applications include detection of objects in various types of images and describing populations of biological specimens appearing in medical imagery. GE credit: SE. Effective: 2016 Fall Quarter.

ECS 173—Image Processing and Analysis (4) **Review all entries**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (MAT 067 C- or better or MAT 022A C- or better); (ECS 060 or ECS 032B or ECS 036C) Pass One open to Computer Science and Computer Science Engineering Majors only. Techniques for automated extraction of high-level information from images generated by cameras, three-dimensional surface sensors, and medical devices. Typical applications include detection of objects in various types of images and describing populations of biological specimens appearing in medical imagery. GE credit: SE. Effective: 2019 Winter Quarter.

ECS 174—Computer Vision (4) **Review all entries**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 060; (STA 032 or STA 131A or MAT 135A or EEC 161 or ECS 132) recommended; (MAT 022A or MAT 067) recommended. Pass One open to Computer Science and Computer Science Engineering Majors only. Computer vision is the study of enabling machines to "see" the
visual world (e.g., understand images and videos). Explores several fundamental topics in the area, including feature detection, grouping and segmentation, and recognition. GE credit: SE. Effective: 2018 Spring Quarter.

**ECS 174—Computer Vision (4)** [Review all entries]
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECS 060 or ECS 032B or ECS 036C); (STA 032 or STA 131A or MAT 135A or EEC 161 or ECS 132 recommended); (MAT 022A or MAT 067 recommended). Pass One open to Computer Science and Computer Science and Engineering Majors only. Computer vision is the study of enabling machines to "see" the visual world; e.g., understand images and videos. Explores several fundamental topics in the area, including feature detection, grouping and segmentation, and recognition. GE credit: SE. Effective: 2019 Winter Quarter.

**ECS 175—Computer Graphics (4)** [Review all entries]
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 060; (MAT 022A or MAT 067) Pass One open to Computer Science and Computer Science Engineering Majors only. Principles of computer graphics, with a focus on interactive systems. Current graphics hardware, elementary operations in two-and three-dimensional space, geometric transformations, camera models and interaction, graphics system design, standard graphics APIs, individual projects. GE credit: SE, VL. Effective: 2016 Fall Quarter.

**ECS 175—Computer Graphics (4)** [Review all entries]
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECS 060 or ECS 034 or ECS 036C); (MAT 022A or MAT 067) Pass One open to Computer Science and Computer Science Engineering Majors only. Principles of computer graphics, with a focus on interactive systems. Current graphics hardware, elementary operations in two-and three-dimensional space, geometric transformations, camera models and interaction, graphics system design, standard graphics APIs, individual projects. GE credit: SE, VL. Effective: 2019 Winter Quarter.

**ECS 177—Scientific Visualization (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 175 Pass One open to Computer Science and Computer Science Engineering Majors only. Computer graphics techniques for generating images of various types of measured or computer-simulated data. Typical applications for these graphics techniques include study of air flows around car bodies, medical data, and molecular structures. GE credit: SE, VL. Effective: 2016 Fall Quarter.

**ECS 178—Geometric Modeling (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 175 Pass One open to Computer Science and Computer Science Engineering Majors only. Interactive graphics techniques for defining and manipulating geometrical shapes used in computer animation, car body design, aircraft design, and architectural design. GE credit: SE, VL. Effective: 2016 Fall Quarter.

**ECS 188—Ethics in an Age of Technology (4)** [Review all entries]

**ECS 188—Ethics in an Age of Technology (4)** [Review all entries]

**ECS 189A—Special Topics in Computer Science; Computer Science Theory (1-5)**
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Computer Science Theory. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

**ECS 189B—Special Topics in Computer Science; Architecture (1-5)**
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Architecture. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

**ECS 189C—Special Topics in Computer Science; Programming Languages and Compilers (1-5)**
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Programming Languages and Compilers. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.
ECS 189D—Special Topics in Computer Science; Operating Systems (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Operating Systems. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECS 189E—Special Topics in Computer Science; Software Engineering (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Software Engineering. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECS 189F—Special Topics in Computer Science; Databases (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic Databases. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECS 189G—Special Topics in Computer Science; Artificial Intelligence (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Artificial Intelligence. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECS 189H—Special Topics in Computer Science; Computer Graphics (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Computer Graphics. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECS 189I—Special Topics in Computer Science; Networks (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Networks. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECS 189J—Special Topics in Computer Science; Computer-Aided Design (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Computer-Aided Design. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECS 189K—Special Topics in Computer Science; Scientific Computing (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Scientific Computing. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECS 189L—Special Topics in Computer Science; Computer Science (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Computer Science. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECS 189M—Special Topics in Computer Security; Computer Security (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Computer Security. May be repeated for credit when topic differs. Effective: 2009 Spring Quarter.

ECS 189N—Special Topics in Bioinformatics and Computational Biology (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Bioinformatics and Computational Biology. May be repeated for credit when topic differs. Effective: 2009 Spring Quarter.

ECS 190C—Research Group Conferences in Computer Science (1) Review all entries
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Upper division standing in Computer Science and Engineering. Research group conferences. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

ECS 190C—Research Group Conferences in Computer Science (1) Review all entries
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Upper division standing in Computer Science or Computer Science and Engineering. Research group conferences. May be repeated for credit. (P/NP grading only.) Effective: 2019 Winter Quarter.

ECS 190X—Senior Seminar (2)
Seminar—2 hours. Prerequisite(s): Senior standing. Examination of a special topic in a small group setting. Effective: 1997 Winter Quarter.

ECS 192—Internship in Computer Science (1-5)
Internship. Prerequisite(s): Completion of a minimum of 84 units; project approval prior to period of internship. Supervised work experience in computer science. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

ECS 193A—Senior Design Project (3)
Lecture/Discussion—3 hours. Prerequisite(s): ECS 160 (can be concurrent); Senior standing in Computer Science or Computer Science and Engineering or consent of instructor. Pass One open to Computer Science Engineering
Majors only; Pass Two open to Computer Science and Computer Science Engineering Majors only. Responding to real-life client design challenges, student teams plan, implement, and evaluate large-scale projects involving computer and computational systems. The project is supervised by a faculty member. Students must take course 193A and 193B to receive credit. GE credit: SE. Effective: 2017 Winter Quarter.

ECS 193B—Senior Design Project (3)
Lecture/Discussion—3 hours. Prerequisite(s): ECS 193A IP or better Pass One open to Computer Science Engineering Majors only; Pass Two open to Computer Science and Computer Science Engineering Majors only. Responding to real-life client design challenges, student teams plan, implement, and evaluate large-scale projects involving computer and computational systems. The project is supervised by a faculty member. Students must take course 193A and 193B to receive credit. GE credit: SE. Effective: 2017 Spring Quarter.

ECS 197T—Tutoring in Computer Science (1-3)
Discussion—1 hour; Discussion/Laboratory—3-6 hours. Prerequisite(s): Consent of Instructor. Restricted to upper-division standing. Tutoring in computer science courses, especially introductory courses. (P/NP grading only.) Effective: 2014 Fall Quarter.

ECS 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

ECS 198F—Student Facilitated Course (1-4)
Variable—1-4 hours. Prerequisite(s): Consent of Instructor. Student facilitated course intended primarily for upper division students. (P/NP grading only.) Effective: 2016 Winter Quarter.

ECS 199—Special Study for Advanced Undergraduates (1-5)
Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

ECS 199FA—Student Facilitated Course Development (1-4)
Variable—1-4 hours. Under the supervision of a faculty member, an undergraduate student plans and develops the course they will offer under 98F/198F. (P/NP grading only.) Effective: 2016 Winter Quarter.

ECS 199FB—Student Facilitated Teaching (1-4)
Variable—1-4 hours. Prerequisite(s): ECS 199FA; Consent of Instructor. STU FAC. Under the supervision of a faculty member, an undergraduate student teaches a course under 98F/198F. (P/NP grading only.) Effective: 2016 Winter Quarter.

ECS 201A—Advanced Computer Architecture (4)
Lecture—3 hours; Term Paper. Prerequisite(s): (ECS 154B or EEC 170); ECS 150 Pass 1 and Pass 2 open to Graduate Students in Computer Science only. Modern research topics and methods in computer architecture. Design implications of memory latency and bandwidth limitations. Performance enhancement via within-processor and between-processor parallelism. Term project involving student-proposed extensions/modifications of work in the research literature. Not open for credit to students who have completed ECS 250A. Effective: 2016 Spring Quarter.

ECS 201B—High-Performance Uniprocessing (4)
Lecture—3 hours; Term Paper. Prerequisite(s): ECS 201A Pass 1 and Pass 2 open to Graduate Students in Computer Science only. Maximizing uniprocessor performance. Barriers to high performance; solutions to the problems; historical and current processor designs. Not open for credit to students who have completed ECS 250B. Effective: 2016 Spring Quarter.

ECS 201C—Parallel Architectures (4)
Lecture—3 hours; Project (Term Project). Prerequisite(s): ECS 201A Evolution of parallel architectures from special-purpose machines to commodity servers. Emphasis on recent machines and applications that drive them. Not open for credit to students who have completed ECS 250C. Effective: 2003 Spring Quarter.

ECS 203—Novel Computing Technologies (4)
Lecture—3 hours; Project (Term Project)—1 hour. Prerequisite(s): ECS 201A Pass One and Pass Two open to Graduate Students in Computer Science only. Novel computing technologies that could revolutionize computer architecture. Quantum computing technologies, including algorithms, devices, and fault tolerance. A survey of other unconventional technologies including nanoscale electronics, MEMS devices, biological devices, and nanotechnology. Effective: 2016 Spring Quarter.

ECS 220—Theory of Computation (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 120; ECS 122A Pass 1 and Pass 2 open to Graduate
Students in Computer Science only. Time and space complexity classes. Reductions, completeness, and the role of randomness. Logic and undecidability. Effective: 2016 Spring Quarter.

**ECS 221—Computational Methods in Systems and Synthetic Biology (4)**

**ECS 222A—Design and Analysis of Algorithms (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 122A; STA 031A recommended. Pass One and Pass Two open to Graduate Students in Computer Science only. Techniques for designing efficient algorithms, analyzing their complexity and applying these algorithms to a broad range of applications. Methods for recognizing and dealing with difficult problems. Effective: 2016 Spring Quarter.

**ECS 222B—Advanced Design and Analysis of Algorithms (4)**
Lecture—3 hours; Project (Term Project)—1 hour. Prerequisite(s): ECS 222A Pass One and Pass Two open to Graduate Students in Computer Science only. Problem classification. The classes P, NP, P-space, co-NP. Matching and network flow algorithms. Matrix multiplication. Approximation algorithms. Effective: 2016 Spring Quarter.

**ECS 223—Parallel Algorithms (4)**
Discussion/Laboratory—3 hours; Project (Term Project)—1 hour. Prerequisite(s): ECS 222A Pass One and Pass Two open to Graduate Students in Computer Science only. Models of parallel computer systems including PRAMs, loosely coupled systems and interconnection networks. Parallel algorithms for classical problems and general techniques for their design and analysis. Proving lower bounds on parallel computation in several settings. Effective: 2016 Spring Quarter.

**ECS 224—String Algorithms and Applications in Computational Biology (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 122A Pass One and Pass Two open to Graduate Students in Computer Science only. Algorithms that operate on strings. Pattern matching, sets of patterns, regular expression pattern matching, suffix trees and applications, inexact similarity, parametric sequence alignment, applications to DNA sequencing and protein database searching. Effective: 2016 Spring Quarter.

**ECS 225—Graph Theory (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Graduate standing in electrical engineering or computer science or consent of instructor. Open to Graduate Students in Computer Science only. Fundamental concepts. Planar graphs: Kuratowski's theorem. Packings and coverings. Menger's theorem, representation of cuts, Hamilton graphs, rigid graphs, chordal graphs, graph coloring, graph isomorphism, applications and some algorithms. Effective: 2018 Winter Quarter.

**ECS 226—Computational Geometry (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 175; ECS 222A Pass One and Pass Two open to Graduate Students in Computer Science only. Mathematics of unstructured data. Algorithms for data structures such as Voronoi diagrams, oct-trees, and arrangements. Applications in computer graphics, concentrating on problems in three-dimensions. Effective: 2016 Spring Quarter.

**ECS 227—Modern Cryptography (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 220 or ECS 222A Pass One and Pass Two open to Graduate Students in Computer Science only. Modern cryptography as a discipline emphasizing formal definitions and proofs of security. One-way functions, pseudo-randomness, encryption, digital signatures, zero-knowledge, secure protocols. Effective: 2016 Spring Quarter.

**ECS 228—Cryptography for E-Commerce (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 222A Pass One and Pass Two open to Graduate Students in Computer Science only. Cryptographic primitives and protocols of importance to e-commerce, present and future, including content distribution mechanisms, payment mechanisms, pricing mechanisms, anonymity and privacy mechanisms, fair exchange mechanisms. Effective: 2016 Spring Quarter.

**ECS 229—Advanced Computational Structural Bioinformatics (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Graduate standing. Pass One and Pass Two open to Graduate Students in Computer Science only. Algorithmic problems in structural biology; protein structure classification;
protein structure prediction (including comparative modeling and ab initio protein structure prediction); molecular simulations (molecular dynamics and Monte Carlo simulations). Effective: 2016 Spring Quarter.

**ECS 230—Applied Numerical Linear Algebra (4)**
Discussion—1 hour; Discussion/Laboratory—3 hours. Prerequisite(s): ECS 130 or EAD 209 or MAT 167 Pass One and Pass Two open to Graduate Students in Computer Science only. Numerical linear algebra (NLA) with emphasis on applications in engineered systems; matrix factorizations; perturbation and rounding error analyses of fundamental NLA algorithms. Effective: 2016 Spring Quarter.

**ECS 231—Large-Scale Scientific Computation (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 130 Pass One and Pass Two open to Graduate Students in Computer Science only. Algorithms and techniques for large-scale scientific computation, including basics for high performance computing, iterative methods, discrete approximation, fast Fourier transform, Poisson solvers, particle methods, spectral graph partition and its applications. Effective: 2016 Spring Quarter.

**ECS 234—Computational Functional Genomics (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 124; Graduate standing in Computer Science or Life Sciences. Pass One and Pass Two open to Graduate Students in Computer Science only. Bioinformatics methods for analysis and inference of functional relationships among genes using large-scale genomic data, including methods for integration of gene expression, promoter sequence, TF-DNA binding and other data, and approaches in modeling of biological networks. Effective: 2016 Spring Quarter.

**ECS 235A—Computer and Information Security (4)**
Lecture—3 hours; Project (Term Project). Prerequisite(s): ECS 150; ECS 152A recommended. Pass One and Pass Two open to Graduate Students in Computer Science only. Modern topics in computer security, including: protection, access control, operating systems security, network security, applied cryptography, cryptographic protocols, secure programming practices, safe languages, mobile code, malware, privacy and anonymity, and case studies from real-world systems. Not open for credit to students who have taken ECS 235. Effective: 2016 Fall Quarter.

**ECS 235B—Foundations of Computer and Information Security (4)**
Lecture—3 hours; Project (Term Project). Prerequisite(s): ECS 235A; (ECS 120 and ECS 150 recommended.) Pass One and Pass Two open to Graduate Students in Computer Science only. Theoretical foundations of methods used to protect data in computer and communication systems. Access control matrix and undecidability of security; policies; Bell-LaPadula, Biba, Chinese Wall models; non-interference and non-deducibility; information flow and the confinement problem. Not open for credit to students who have taken ECS 235. Effective: 2016 Fall Quarter.

**ECS 236—Computer Security: Intrusion Detection Based Approach (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 150; ECS 153 recommended. Pass One and Pass Two open to Graduate Students in Computer Science only. Concepts of intrusion detection, anomaly detection based on machine learning, signature-based detection using pattern matching, automated response to attacks using artificial intelligence planning, tracing intruders based on principal component analysis, security policy languages. Effective: 2016 Spring Quarter.

**ECS 240—Programming Languages (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 140A; ECS 142 Pass One and Pass Two open to Graduate Students in Computer Science only. Advanced topics in programming languages, including formal syntax and semantics, the relation between formal semantics and verification, an introduction to the lambda calculus. Additional topics will include language design principles, alternative programming languages, in-depth semantic theory and models of language implementation. Effective: 2016 Spring Quarter.

**ECS 242—Translation of Programming Languages (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ECS 240 Pass One and Pass Two open to Graduate Students in Computer Science only. Lexical analysis, parsing, storage management, symbol table design, semantic analysis and code generation. LR, LALR grammars. Compilercompilers. Effective: 2016 Spring Quarter.

**ECS 243—Code Generation and Optimization (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 201A or EEC 270 Pass One and Pass Two open to Graduate Students in Computer Science only. Compiler optimizations for performance, code size and power reduction. Topics include control- and data-flow analysis, redundancy elimination, loop and cache optimizations, register allocation, local and global instruction scheduling, and modulo scheduling. Effective: 2016 Fall Quarter.

**ECS 244—Principles of Concurrent Programming (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ECS 020; ECS 150 Pass One and Pass Two open to
Graduate Students in Computer Science only. Fundamental concepts and applications of concurrent programs; concurrent program verification and derivation; synchronization mechanisms in programming languages; distributed programming techniques; case studies of languages. Effective: 2016 Spring Quarter.

**ECS 247—Concurrent Programming Languages (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ECS 140A; ECS 150 Pass One and Pass Two open to Graduate Students in Computer Science only. Language design parameters. Models of parallel machines. Load balancing. Scalability. Portability. Efficiency measures. Design and implementation techniques for several classes of concurrent programming languages (such as object-oriented, functional, logic, and constraint programming languages). Effective: 2016 Spring Quarter.

**ECS 251—Operating Systems (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 150 Pass One and Pass Two open to Graduate Students in Computer Science only. Models, design, implementation, performance evaluation in operating systems. Algorithms, internal architectures for single processor OS and distributed systems. Concurrency control, recovery, security. OS kernel-level programming. Special topics embedded systems, real-time system, device driver, NPU (Network Processor Unit). Effective: 2016 Fall Quarter.

**ECS 252—Computer Networks (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ECS 152B Pass 1 and Pass 2 open to Graduate Students in Computer Science only. Internet protocol based computer networks applications, transport, network layer protocols. High speed LAN technologies: Ethernet, Asynchronous Transfer Mode (ATM). Delay models in data networks: analysis of multiaccess techniques in polling, ring, random access networks. Multimedia applications requirements and design. Effective: 2016 Spring Quarter.

**ECS 253—Network Theory and Applications (4)**
Lecture/Discussion—4 hours. Prerequisite(s): MAT 022A; MAT 022B; (STA 013 or STA 013Y or STA 120); Experience with computer software, or consent of instructor. Pass One and Pass Two open to Graduate Students in Mechanical and Aerospace Engineering and Computer Science only. Develops the mathematical theory underlying growth, structure and function of networks with applications to physical, social, biological and engineered systems. Topics include network growth, resilience, epidemiology, phase transitions, software and algorithms, routing and search control, cascading failures. (Same course as Mechanical & Aeronautical Engineering 253.) Effective: 2018 Spring Quarter.

**ECS 255—Resource Management in Wireless Communication Networks (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 252A Advanced research issues in wireless communication networks, including multi-user diversity and cross-layer optimization, basic network information theory, MIMO systems and the impact on networks, and dynamics spectrum management. Effective: 2009 Winter Quarter.

**ECS 256—Performance Evaluation (4)**
Lecture—3 hours; Project (Term Project)—1 hour. Prerequisite(s): ECS 020; ECS 152A; STA 131A; (EEC 170 or (ECS 154A, ECS 154B)); ECS 150 recommended. Pass One and Pass Two open to Graduate Students in Computer Science only. Use of simulation and queueing theory in computer and communication system design. Applications to processor scheduling, memory hierarchies; I/O systems; packet and circuit switched networks; fault-tolerance; computer networks applications. Not open for credit to students who have completed ECS 256A. Effective: 2016 Fall Quarter.

**ECS 256—Probability Models for Computer Science (4)**
Extensive Problem Solving; Lecture—3 hours; Project (Term Project). Prerequisite(s): A calculus-based course in probability, such as ECS132, STA 131A, or EEC 161; programming skills and familiarity with matrix algebra. Pass One and Pass Two open to graduate students in Computer Science only. Probabilistic and statistical models useful in computer/data science. Applications to networks, bioinformatics, database management, machine learning, software engineering and image processing. Not open for credit to students who have completed ECS 256A. Effective: 2019 Spring Quarter.
ECS 257—Mobile and Wireless Networks (4)
Independent Study—1 hour; Lecture—3 hours. Prerequisite(s): ECS 252 Pass One and Pass Two open to Graduate Students in Computer Science only. Fundamental techniques in design of second generation wireless networks: cellular network and protocols, medium access techniques, handoff control, signaling and mobility management, wireless data works, Internet mobility and Personal Communication Services (PCS). Third generation wideband systems, novel technologies, adhoc networks. Effective: 2016 Fall Quarter.

ECS 258—Networking Architecture and Resource Management (4)
Lecture—3 hours; Project (Term Project). Prerequisite(s): ECS 152A or EEC 173A Pass One and Pass Two open to Graduate Students in Computer Science and Electrical and Computer Engineering only. Concepts and design principles of computer networks. Network architectures, protocol mechanisms and implementation principles (transport/network/data-link layers), network algorithms, router mechanisms, design requirements of applications, network simulation, modeling and performance analysis. (Same course as EEC 273.) Effective: 2016 Fall Quarter.

ECS 259—Optical Networks (4)

ECS 260—Software Engineering (4)
Lecture—3 hours; Project (Term Project)—3 hours. Prerequisite(s): ECS 142; ECS 160 recommended. Pass One and Pass Two open to Graduate Students in Computer Science only. Advanced techniques for domain-specific software reuse. Effective: 2016 Fall Quarter.

ECS 261—Program Verification (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): PHI 112; or MAT 125 or familiarity with first-order logic; knowledge of an integrative and functional programming language. Methods of proving correctness of programs with respect to formal specifications, with attention to those suited for employing automated deduction. Logic background, symbolic execution, techniques suited to iterative programming, methods from denotational semantics, termination, dynamic logic and proofs of concurrent programs. Effective: 1997 Fall Quarter.

ECS 262—Formal Specification (3)
Lecture—3 hours. Prerequisite(s): ECS 261 Pass One and Pass Two open to Graduate Students in Computer Science only. Formal specification of modules, and its relationship to topdown programming development and verification. Abstract data types, together with methods for specifying them. Implementations and proofs of implementation. Using specifications to reason about programs. Parameterized types. Constructing good formal specifications. Effective: 2016 Fall Quarter.

ECS 265—Distributed Database Systems (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 165A Pass One and Pass Two open to Graduate Students in Computer Science only. Concepts of distributed database systems and architectures, distributed database design, distributed query processing and optimization, transaction management and concurrency control, heterogeneous and multidatabase systems. Effective: 2016 Fall Quarter.

ECS 266—Spatial Databases (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 165A Concepts, models, and architectures for spatial databases, spatial access methods, query processing, spatio-temporal data management, moving objects, spatial data mining. Effective: 2008 Winter Quarter.

ECS 267—Wide-Area Distributed Information Systems (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 152B or ECS 165A Pass One and Pass Two open to Graduate Students in Computer Science only. Wide-area distributed information systems, data broadcast, multicast, publish/subscribe, service differentiation, information retrieval, Web caching. Effective: 2016 Fall Quarter.

ECS 268—Scientific Data And Workflow Management (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 165A Scientific data integration, metadata, knowledge representation, ontologies, scientific workflow design and management. Effective: 2008 Winter Quarter.

ECS 269—Visual Recognition (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 171 or ECS 174; or equivalent. Graduate seminar course on computer vision with an emphasis on object recognition, activity recognition, and scene understanding. Effective: 2018 Fall Quarter.
ECS 270—Artificial Intelligence (3)
Lecture—3 hours. Prerequisite(s): ECS 140A; ECS 172 Pass One and Pass Two open to Graduate Students in Computer Science only. Concepts and techniques underlying the design and implementation of models of human performance on intelligent tasks. Representation of high-level knowledge structures. Models of memory and inference. Natural language and story understanding. Common sense planning and problem solving. Effective: 2016 Fall Quarter.

ECS 271—Machine Learning and Discovery (4)
Lecture—3 hours; Project (Term Project)—1 hour. Prerequisite(s): ECS 170 Pass One and Pass Two open to Graduate Students in Computer Science only. Artificial intelligence techniques for knowledge acquisition by computers. Fundamental problems in machine learning and discovery. Systems that learn from examples, analogies, and solved problems. Systems that discover numerical laws and qualitative relationships. Projects centering on implementation and evaluation. Effective: 2016 Fall Quarter.

ECS 272—Information Visualization (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ECS 163 or ECS 175 recommended. Pass One and Pass Two open to Graduate Students in Computer Science only. Advanced topics in information visualization: perceptually effective display methods, color design and selection, interaction models and techniques, focus-context techniques, distortion methods, large graph visualization techniques, visual data mining methods, and evaluation methods. Effective: 2016 Fall Quarter.

ECS 273—Applied Visual Computing (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): Graduate standing. Visual computing paradigms, current visualization technologies, principles of 3-d graphics, user interface designs, and exploratory visualization. Effective: 2002 Winter Quarter.

ECS 274—Automated Deduction (4)
Lecture—3 hours. Prerequisite(s): PHI 112; or MAT 125 or familiarity with first order logic. Techniques of mechanical theorem proving. Methods based on resolution and term rewriting. Decision procedures. Induction. Applications to program verification, question/answering and plan generation. Study existing mechanical theorem provers. Effective: 1997 Fall Quarter.

ECS 275A—Advanced Computer Graphics (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ECS 175 or ECS 177 or ECS 178 Pass One and Pass Two open to Graduate Students in Computer Science only. Advanced topics in computer graphics. Hidden surface models, rendering of various surface types, subdivision methods, shading techniques, anti-aliasing, modeling techniques. Effective: 2016 Fall Quarter.

ECS 275B—Advanced Computer Graphics (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ECS 175 or ECS 177 or ECS 178 Pass 1 and Pass 2 open to Graduate Students in Computer Science only. Advanced topics in computer graphics and geometric modeling. Topics taken from advanced research papers in computer graphics, image synthesis, visualization and geometric modeling. Discussion of current research in the field. Effective: 2016 Spring Quarter.

ECS 276—Advanced Volume Visualization (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 177 Pass One and Pass Two open to Graduate Students in Computer Science only. Applications, available tools and techniques, the challenges confronting the field of volume visualization, and some of the advanced topics in the field. Primary emphasis on advanced software and hardware techniques to achieve interactive visualization. Effective: 2016 Fall Quarter.

ECS 277—Advanced Visualization (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 177 Visualization of 3D data, including scalar fields, vector fields, and medical data. Effective: 2000 Fall Quarter.

ECS 278—Computer-Aided Geometric Design (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ECS 175 Pass One and Pass Two open to Graduate Students in Computer Science only. Mathematical techniques for the definition and manipulation of curves and surfaces. Bezier curves and surfaces, B-spline curves and surfaces, subdivision surfaces, wavelets. Integration into various computer graphics rendering models, visualization systems and computer-aided design systems. Effective: 2016 Fall Quarter.

ECS 279—Computer Animation (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 175; or ECS 275. Pass One and Pass Two open to
Graduate Students in Computer Science only. Course surveys current research and fundamental techniques that lie behind character animation tools. Emphasis on improving expressive aspects of movement and how physics, motion capture data, the arts and psychology literature, and interactive techniques can be used towards this goal. Effective: 2016 Fall Quarter.

**ECS 280—Virtual Reality Technology (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 175 Pass One and Pass Two open to Graduate Students in Computer Science only. Fundamentals and principles of Virtual Reality (VR) technology. Potential and limits for its useful application. Developing a complete virtual reality application. Effective: 2016 Spring Quarter.

**ECS 289A—Special Topics in Computer Science; Computer Science Theory (1-5)**
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Computer Science Theory. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

**ECS 289B—Special Topics in Computer Science; Architecture (1-5)**
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Architecture. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

**ECS 289C—Special Topics in Computer Science; Programming Languages and Compilers (1-5)**
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Programming Languages and Compilers. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

**ECS 289D—Special Topics in Computer Science; Operating Systems (1-5)**
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Operating Systems. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

**ECS 289E—Special Topics in Computer Science; Software Engineering (1-5)**
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Software Engineering. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

**ECS 289F—Special Topics in Computer Science; Databases (1-5)**
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Databases. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

**ECS 289G—Special Topics in Computer Science (1-5)**
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Artificial Intelligence. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

**ECS 289H—Special Topics in Computer Science; Computer Graphics (1-5)**
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Computer Graphics. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

**ECS 289I—Special Topics in Computer Science (1-5)**
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Networks. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

**ECS 289J—Special Topics in Computer Science; Computer-Aided Design (1-5)**
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Computer-Aided Design. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

**ECS 289K—Special Topics in Computer Science; Scientific Computing (1-5)**
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Scientific Computing. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

**ECS 289L—Special Topics in Computer Science; Computer Science (1-5)**
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Computer Science. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

**ECS 289M—Special Topics in Computer Science; Security (1-5)**
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Security. May be repeated for credit when topic differs. Effective: 2001 Winter Quarter.

**ECS 289N—Special Topics in Bioinformatics and Computational Biology (1-5)**
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Bioinformatics and Computational Biology. May be repeated for credit when topic differs. Effective: 2009 Spring Quarter.
ECS 290—Seminar in Computer Science (1)
Seminar—1 hour. Participating seminar; discussion and presentation of current research and development in computer science. (S/U grading only.) Effective: 1997 Winter Quarter.

ECS 290C—Graduate Research Group Conference (1)
Discussion—1 hour. Research problems, progress and techniques in computer science. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

ECS 293A—Research in Computer Science (1)
Lecture—1 hour. Prerequisite(s): Graduate standing in computer science. Pass One and Pass Two open to Graduate Students in Computer Science only. Study of research topics in computer science, PhD level research methodologies (experimental, applied and theoretical). Study skills necessary to successfully find/solve significant research problems. Finding and successful interacting with a research advisor. Ethical issues in research/collaborative work. (S/U grading only.) Effective: 2016 Fall Quarter.

ECS 293B—Research in Computer Science (1)
Lecture—1 hour. Prerequisite(s): Graduate standing in computer science; ECS 293A recommended. Pass One and Pass Two open to Graduate Students in Computer Science only. Study of PhD level research methodologies (experimental, applied and theoretical), presenting research results for the computer science community. Study skills necessary to successfully find/solve significant research problems. (S/U grading only.) Effective: 2016 Fall Quarter.

ECS 298—Group Study (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

ECS 299—Research (1-12)
Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

ECS 390—The Teaching of Computer Science (1)
Discussion—1 hour. Prerequisite(s): Meet qualifications for teaching assistant and/or associate-in in Computer Science. Pass One and Pass Two open to Graduate Students in Computer Science only. Participation as a teaching assistant or associate-in in a designated engineering course. Methods of leading discussion groups or laboratory sections, writing and grading quizzes, use of laboratory equipment, and grading laboratory reports. May be repeated for credit. (S/U grading only.) Effective: 2016 Spring Quarter.

ECS 396—Teaching Assistant Training Practicum (1-4)
Variable. Prerequisite(s): Graduate standing. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

Computer Science & Engineering; Engineering

Computer Science & Engineering; Engineering | Computer Science & Engineering B.S.

(College of Engineering)

The Computer Science and Engineering Program

The Department of Computer Science administers two curricula: Computer Science and Engineering in the College of Engineering, and Computer Science in the College of Letters and Science. It also administers two minors: Computer Science in the College of Letters and Science, and Computational Biology in the College of Engineering. For information on the Computer Science curriculum and minor; see Computer Science.

The Computer Science Engineering major (below) prepares students to do further work in hardware, software, theory, or electronics, either in industry or in postgraduate study.

The primary differences between the Computer Science Engineering and the Computer Science majors are the extent of course work covering hardware and the flexibility of the curriculum. The Computer Science Engineering major develops a solid understanding of the entire machine, including hands-on experience with its hardware
components. The Computer Science major has some course work on hardware, at the digital-design level, on simulators. The Computer Science Engineering major has fewer free electives. The CS major’s more generous electives make it easier to complete a minor or double major.

A key theme of the Computer Science Engineering curriculum is the hardware/software interaction, a theme reflected in the courses required and the orientation of the courses themselves.

The Computer Science and Engineering major provides students with a solid background in mathematics, physics, chemistry, and electronic circuits and systems, all supporting the computer hardware and computer software courses that constitute the focus of the curriculum.

**Mission.** The University of California, Davis, is, first and foremost, an institution of learning and teaching, committed to serving the needs of society. The Department of Computer Science contributes to the mission in three ways. First, its undergraduate and graduate education programs seek to educate students in the fundamental principles of computer science and the skills needed to solve the complex technological problems of modern society. The breadth of coursework provides a framework for life-long learning and an appreciation for multidisciplinary activities. Second, through its research programs, the department contributes to the development and progress of computer science, and software and information technology, to provide innovative, creative solutions for societal needs. Finally, the department disseminates its research to enhance collaborations with the public sector, further interdisciplinary interests that benefit society, and educate the public through publications, public service, and professional activities.

**Department Objectives.** Teaching—We seek to provide undergraduate students with a thorough understanding of the key principles and practices of computing, which include a strong theoretical background in mathematics, basic sciences, and engineering fundamentals and an ability to apply this knowledge to practical problems. We endeavor to provide students with sufficient breadth to work creatively and productively in multidisciplinary work teams; this breadth, in its broadest context, will form the basis for an appreciation and interest in life-long learning. We provide students with the opportunities to design and conduct experiments, and to collect and analyze data in core, as well as more specialized, areas of computer science. We provide students with breadth in the humanities and social sciences so they learn to communicate effectively, understand professional and ethical issues in society, and appreciate the interrelatedness between computing and society. We educate graduate students to be our next generation of teachers or leaders in industry, or to pursue meaningful, creative research in industry, government, or academia. Research—We develop and maintain research programs that produce fundamental scientific advances, as well as useful technological innovations, while simultaneously training the next generation of researchers and leaders in the field of computer science.

**Objectives.** We train graduates to practice computer science and engineering in a broad range of industries; we prepare interested graduates for graduate education or other professional degrees; we give students an understanding of computer software and hardware systems, and both theoretical and experimental approaches to problem solving; we ready graduates for lifelong learning; and we encourage graduates to contribute to their profession and society.

**Computer Science and Engineering Undergraduate Program**

The Computer Science and Engineering program is accredited by the Engineering Accreditation Commission and the Computing Accreditation Commission of ABET; see [http://www.abet.org](http://www.abet.org).

Exclusive of General Education units, the minimum number of units for the Computer Science and Engineering major is 144.

Students are encouraged to adhere carefully to all prerequisite requirements. The instructor is authorized to drop students from a course for which stated prerequisites have not been completed.

Computer Science Electives:
Choose a minimum of four courses and a minimum of 15 units chosen from ECS courses numbered 120 to 189 inclusive; one approved course of three-five units from ECS 192 or 199; ECS 171, 180A, 180B; one course may be taken from the following restricted elective list: ECN 122; LIN 127, 177; MAT 135A, 135B; PSC 120; STA 131A, 131B. No course can count as both a required course and a computer science and engineering elective.

Upper Division Composition Requirement
Choose one:
- UWP 101 Advanced Composition 4
- Passing the Upper-Division Composition Exam administered by the College of Letters Science. 0

Computer Science & Engineering; Engineering | ECS Courses

Courses in ECS:

ECS 010—Introduction to Programming (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Two years of high school algebra. Pass One open to Computer Science, Computer Science Engineering, Computer Engineering, Electrical Engineering Majors only. Hands-on introduction to computation, through programming and problem solving. Two units of credit for students who have taken course 12 or Engineering 6. Not open to students who have completed course 30. GE credit: QL, SE, SL. Effective: 2016 Fall Quarter.

ECS 010—Introduction to Programming (4) Review all entries Discontinued
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Two years of high school algebra. Pass One open to Computer Science, Computer Science Engineering, Computer Engineering, Electrical Engineering Majors only. Hands-on introduction to computation, through programming and problem solving. Two units of credit for students who have taken course 12 or Engineering 6. Not open to students who have completed course 30. GE credit: QL, SE, SL. Effective: 2018 Fall Quarter.

ECS 012—Introduction to Media Computation (4)
Discussion/Laboratory—1 hour; Lecture—3 hours. Introduction to key computational ideas necessary to understand and produce digital media. Fundamentals of programming are covered as well as analysis of how media are represented and transmitted in digital form. Aimed primarily at non-computer science students. Two units of credit for students that have taken ECS 010 or ECS 030 or ENG 006. (Same course as CTS 012.) GE credit: AH, SE, VL. Effective: 2015 Spring Quarter.

ECS 015—Introduction to Computers (4)
Laboratory—3 hours; Lecture—3 hours. Computer uses in modern society. Emphasis on uses in non-scientific disciplines. Includes word processing, spreadsheets, web-page creation, elementary programming, basic computer organization, the Internet, the uses of computers and their influence on society. Course not intended for CS or CSE majors. Only two units of credit allowed to students who have completed PLS 021; not open for credit to students who have completed ECS 030. GE credit: QL, SE, WE. Effective: 2013 Fall Quarter.

ECS 020—Discrete Mathematics For Computer Science (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MAT 016A C- or better or MAT 017A C- or better or MAT 021A C- or better Pass One open to Computer Science, Computer Science Engineering, Computer Engineering, and Cognitive Science Majors only. Discrete mathematics of particular utility to computer science. Proofs by induction. Propositional and first-order logic. Sets, functions, and relations. Big-O and related notations. Recursion and solutions of recurrence relations. Combinatorics. Probability on finite probability spaces. Graph theory. GE credit: QL, SE. Effective: 2017 Winter Quarter.

ECS 030—Programming and Problem Solving (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MAT 016A (can be concurrent) or MAT 017A (can be concurrent) or MAT 021A (can be concurrent); Prior experience with basic programming concepts (variable, loops, conditional statements) recommended. Pass One open to Computer Science, Computer Science Engineering, Computer Engineering, Electrical Engineering, and Cognitive Science Majors only. Introduction to computers and
computer programming, algorithm design, and debugging. Elements of good programming style. Programming in the C language. Use of basic UNIX tools. GE credit: QL, SE. Effective: 2017 Spring Quarter.

**ECS 030—Programming and Problem Solving (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MAT 016A (can be concurrent) or MAT 017A (can be concurrent) or MAT 021A (can be concurrent); Prior experience with basic programming concepts (variable, loops, conditional statements) recommended. Pass One open to Computer Science, Computer Science Engineering, Computer Engineering, Electrical Engineering, and Cognitive Science Majors only. Introduction to computers and computer programming, algorithm design, and debugging. Elements of good programming style. Programming in the C language. Use of basic UNIX tools. GE credit: QL, SE. Effective: 2018 Fall Quarter.

**ECS 032A—Introduction to Programming (4)**
Discussion—1 hour; Lecture—3 hours. Not open to students who have completed ECS 036A. Introduction to programming and problem solving in Python. Aimed primarily at non-major students. No credit to students who completed previous ECS 010, ECS 030 or higher. GE credit: SE. Effective: 2018 Fall Quarter.

**ECS 034—Software Development in UNIX and C/C++ (5)**
Discussion—1 hour; Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): ECS 032B C- or better; or Consent of Instructor. UNIX Operating system tools and programming environment. Methods for debugging and verification. Principles of C and object-oriented programming in C++. Extensive programming. Only three units of credit for students who have previously taken ECS 036B. GE credit: SE. Effective: 2018 Fall Quarter.

**ECS 036A—Programming and Problem Solving (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Prior experience with basic programming concepts (variable, loops, conditional statements) required; must satisfy computer science placement exam, or C- or better in ECS 32A. Pass One restricted to Computer Science, Computer Science and Engineering, Computer Engineering, Electrical Engineering, and Cognitive Science majors only. Computers and computer programming for students with some prior experience, algorithm design, and debugging. Good programming style. Use of basic UNIX tools. Two units if completed ECS 032A; no credit for students who have completed ECS 032B or previous course ECS 030. GE credit: SE. Effective: 2018 Fall Quarter.

**ECS 036B—Software Development and Object-Oriented Programming in C++ (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 032A C- or better or ECS 010 C- or better; or must satisfy computer science placement exam; prior experience with basic programming concepts (variable, loops, conditional statements) required. Pass One restricted to Computer Science, Computer Science & Engineering, Computer Engineering, Electrical Engineering, and Cognitive Science majors only. Computers and computer programming for students with some prior experience, algorithm design, and debugging. Good programming style. Use of basic UNIX tools. Two units if completed ECS 032A; no credit for students who have completed ECS 032B or previous course ECS 030. GE credit: SE. Effective: 2019 Winter Quarter.

**ECS 036C—Programming and Problem Solving (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 032A C- or better or ECS 030 C- or better or ECS 032A C- or better or ECS 036A C- or better Design and analysis of data structures using Python; trees, heaps, searching, sorting, and graphs. No credit to students who completed ECS 036C or ECS 060 or higher. GE credit: SE. Effective: 2018 Fall Quarter.

**ECS 036D—Programming & Problem Solving (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 032A C- or better or ECS 010 C- or better; or must satisfy computer science placement exam; prior experience with basic programming concepts (variable, loops, conditional statements) required. Pass One restricted to Computer Science, Computer Science & Engineering, Computer Engineering, Electrical Engineering, and Cognitive Science majors only. Computers and computer programming for students with some prior experience, algorithm design, and debugging. Good programming style. Use of basic UNIX tools. Two units if completed ECS 032A; no credit for students who have completed ECS 032B or previous course ECS 030. GE credit: SE. Effective: 2018 Fall Quarter.

**ECS 036E—Software Development and Object-Oriented Programming in C++ (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 030 C- or better or ECS 036A C- or better Pass One restricted to Computer Science, Computer Science and Engineering, Computer Engineering, Electrical Engineering, and Cognitive Science majors only. Object-oriented programming in C++. Basic data structures and their use. Writing good programs of increased complexity and efficiency. Methods for debugging and verification. Not open for credit to students who have taken ECS 034, previous course ECS 040 or ECS 060. GE credit: SE. Effective: 2018 Fall Quarter.
ECS 036C—Data Structures, Algorithms, and Programming (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 040 C- or better or ECS 036B C- or better Pass One restricted to Computer Science, Computer Science and Engineering, Computer Engineering, Electrical Engineering, and Cognitive Science majors only. Design and analysis of data structures for a variety of applications; trees, heaps, searching, sorting, hashing, and graphs. Extensive programming. Not open for credit to students who have taken ECS 032B or previous ECS 060. GE credit: SE. Effective: 2018 Fall Quarter.

ECS 036D—Data Structures, Algorithms, and Programming (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 040 C- or better or ECS 036B C- or better; ECS 020 C- or better Pass One restricted to Computer Science, Computer Science and Engineering, Computer Engineering, Electrical Engineering, and Cognitive Science majors only. Design and analysis of data structures for a variety of applications; trees, heaps, searching, sorting, hashing, and graphs. Extensive programming. Not open for credit to students who have taken ECS 032B or previous ECS 060. GE credit: SE. Effective: 2019 Winter Quarter.

ECS 040—Software Development and Object-Oriented Programming (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 030 C- or better; Or equivalent. Pass One open to Computer Science, Computer Science Engineering, Computer Engineering, Electrical Engineering, and Cognitive Science Majors only. Elements of program design, style, documentation, efficiency. Methods for debugging and verification. Operating system tools. Principles and use of object-oriented programming in C++. Basic data structures and their use. GE credit: SE. Effective: 2018 Winter Quarter.

ECS 040—Software Development and Object-Oriented Programming (4) Review all entries Discontinued
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 030 C- or better; Or equivalent. Pass One open to Computer Science, Computer Science Engineering, Computer Engineering, Electrical Engineering, and Cognitive Science Majors only. Elements of program design, style, documentation, efficiency. Methods for debugging and verification. Operating system tools. Principles and use of object-oriented programming in C++. Basic data structures and their use. GE credit: SE. Effective: 2018 Fall Quarter.

ECS 050—Computer Organization and Machine-Dependent Programming (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 040 C- or better Pass One open to Computer Science, Computer Science Engineering, Computer Engineering, and Cognitive Science Majors only. Comparative study of different hardware architectures via programming in the assembly languages of various machines. Role of system software in producing an abstract machine. Introduction to I/O devices and programming. Only one unit of credit allowed for students who have taken EEC 070. GE credit: SE. Effective: 2017 Winter Quarter.

ECS 050—Computer Organization and Machine-Dependent Programming (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 040 C- or better or ECS 032B C- or better or ECS 036B C- or better Pass One open to Computer Science, Computer Science Engineering, Computer Engineering, and Cognitive Science Majors only. Comparative study of different hardware architectures via programming in the assembly languages of various machines. Role of system software in producing an abstract machine. Introduction to I/O devices and programming. Only one unit of credit allowed for students who have taken EEC 070. GE credit: SE. Effective: 2019 Winter Quarter.

ECS 060—Data Structures and Programming (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 040 C- or better Pass One open to Computer Science, Computer Science Engineering, Computer Engineering, and Cognitive Science Majors only. Design and analysis of data structures for a variety of applications. Trees, heaps, searching, sorting, hashing, graphs. Extensive programming. GE credit: QL, SE. Effective: 2017 Spring Quarter.

ECS 060—Data Structures and Programming (4) Review all entries Discontinued
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 040 C- or better Pass One open to Computer Science, Computer Science Engineering, Computer Engineering, and Cognitive Science Majors only. Design and analysis of data structures for a variety of applications. Trees, heaps, searching, sorting, hashing, graphs. Extensive programming. GE credit: QL, SE. Effective: 2018 Fall Quarter.

ECS 089A—Special Topics in Computer Science; Computer Science Theory (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Computer Science Theory. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECS 089B—Special Topics in Computer Science; Architecture (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Architecture. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.
ECS 089C—Special Topics in Computer Science; Programming Languages and Compilers (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Programming Languages and Compilers. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECS 089D—Special Topics in Computer Science; Operating Systems (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Operating Systems. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECS 089E—Special Topics in Computer Science; Software Engineering (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Software Engineering. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECS 089F—Special Topics in Computer Science; Databases (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Databases. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECS 089G—Special Topics in Computer Science; Artificial Intelligence (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Artificial Intelligence. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECS 089H—Special Topics in Computer Science; Computer Graphics (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Computer Graphics. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECS 089I—Special Topics in Computer Science; Networks (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Networks. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECS 089J—Special Topics in Computer Science; Computer-Aided Design (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Computer-Aided Design. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECS 089K—Special Topics in Computer Science; Scientific Computing (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Scientific Computing. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECS 089L—Special Topics in Computer Science; Computer Science (1-5)
Laboratory. Prerequisite(s): Consent of Instructor. Special topics in Computer Science. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECS 092—Internship in Computer Science (1-5)
Internship. Prerequisite(s): Lower division standing; project approval prior to period of internship. Supervised work experience in computer science. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

ECS 098—Directed Group Study (1-5)
Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

ECS 098F—Student Facilitated Course (1-4)
Variable—1-4 hours. Prerequisite(s): Consent of Instructor. Student facilitated course intended primarily for lower division students. (P/NP grading only.) Effective: 2016 Winter Quarter.

ECS 099—Special Study for Lower Division Students (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

ECS 113—Computer Security for Non-Majors (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Programming skill at the level of ECS 015. Principles, mechanisms, implementation, and sound practices of computer security and data protection. Cryptography, authentication and access control. Internet security. Malicious software. Common vulnerabilities. Practical security in everyday life. Course not intended for CS or CSE majors. No credit allowed to students who have completed ECS 153 or ECS 155. GE credit: SE. Effective: 2018 Winter Quarter.

ECS 113—Computer Security for Non-Majors (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 010 or ECS 030 or ECS 032A or ECS 036A Principles, mechanisms, implementation, and sound practices of computer security and data protection. Cryptography, authentication and access control. Internet security. Malicious software. Common vulnerabilities. Practical security
in everyday life. Course not intended for CS or CSE majors. No credit allowed to students who have completed ECS 153 or ECS 155. GE credit: SE. Effective: 2019 Winter Quarter.

**ECS 120—Theory of Computation (4)**  
*Review all entries*  
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 020 or MAT 108 Pass One open to Computer Science, Computer Science Engineering, and Computer Engineering Majors only. Fundamental ideas in the theory of computation, including formal languages, computability and complexity. Reducibility among computational problems. GE credit: QL, SE. Effective: 2016 Fall Quarter.

**ECS 120—Theory of Computation (4)**  
*Review all entries*  
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECS 020 or MAT 108); (ECS 32B or ECS 36C Recommended) Pass One open to Computer Science, Computer Science Engineering, and Computer Engineering Majors only. Fundamental ideas in the theory of computation, including formal languages, computability and complexity. Reducibility among computational problems. GE credit: QL, SE. Effective: 2019 Winter Quarter.

**ECS 122A—Algorithm Design and Analysis (4)**  
*Review all entries*  

**ECS 122B—Algorithm Design and Analysis (4)**  
*Review all entries*  
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 122A Pass One open to Computer Science, Computer Science Engineering, and Computer Engineering Majors only. Theory and practice of hard problems, and problems with complex algorithm solutions. NP-completeness, approximation algorithms, randomized algorithms, dynamic programming and branch and bound. Theoretical analysis, implementation and practical evaluations. Examples from parallel, string, graph, and geometric algorithms. GE credit: QL, SE. Effective: 2016 Fall Quarter.

**ECS 124—Theory and Practice of Bioinformatics (4)**  
*Review all entries*  
Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): (ECS 010 or ECS 030 or ENG 006); (STA 012 or STA 013 or STA 013Y or STA 032 or STA 100 or STA 131A or MAT 135A or BIM 105); (BIS 002A or MCB 010) Pass One open to Computer Science, Computer Science Engineering, and Biotechnology majors only. Fundamental biological, mathematical and algorithmic models underlying bioinformatics and systems biology; sequence analysis, database search, genome annotation, clustering and classification, functional gene networks, regulatory network inference, phylogenetic trees, applications of common bioinformatics tools in molecular biology and genetics. GE credit: SE. Effective: 2018 Spring Quarter.

**ECS 124—Theory and Practice of Bioinformatics (4)**  
*Review all entries*  
Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): (ECS 010 or ECS 032A or ECS 030 or ECS 036A or ENG 006); (STA 012 or STA 013 or STA 013Y or STA 032 or STA 100 or STA 131A or MAT 135A or BIM 105); (BIS 002A or MCB 010) Pass One open to Computer Science, Computer Science Engineering, and Biotechnology majors only. Fundamental biological, mathematical and algorithmic models underlying bioinformatics and systems biology; sequence analysis, database search, genome annotation, clustering and classification, functional gene networks, regulatory network inference, phylogenetic trees, applications of common bioinformatics tools in molecular biology and genetics. GE credit: SE. Effective: 2019 Winter Quarter.
ECS 127—Cryptography (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 020 or MAT 108 Pass One open to Computer Science and Computer Science Engineering Majors only. Introduction to the theory and practice of cryptographic techniques used in computer security. Encryption (secret-key and public-key), message authentication, digital signatures, entity authentication, key distribution, and other cryptographic protocols. The social context of cryptography. GE credit: QL, SE, SL. Effective: 2016 Fall Quarter.

ECS 127—Cryptography (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECS 020 or MAT 108); (ECS 010 or ECS 032A or ECS 030 or ECS 036A) Pass One open to Computer Science and Computer Science Engineering Majors only. Introduction to the theory and practice of cryptographic techniques used in computer security. Encryption (secret-key and public-key), message authentication, digital signatures, entity authentication, key distribution, and other cryptographic protocols. The social context of cryptography. GE credit: QL, SE, SL. Effective: 2019 Winter Quarter.

ECS 129—Computational Structural Bioinformatics (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): BIS 002A or MCB 010; College level programming course. Pass One open to Computer Science, Computer Science Engineering, and Biotechnology majors only. Fundamental biological, chemical and algorithmic models underlying computational structural biology; protein structure and nucleic acids structure; comparison of protein structures; protein structure prediction; molecular simulations; databases and online services in computational structural biology. GE credit: SE. Effective: 2016 Fall Quarter.

ECS 129—Computational Structural Bioinformatics (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (BIS 002A or MCB 010); (ECS 010 or ECS 032A or ECS 036A) Pass One open to Computer Science, Computer Science Engineering, and Biotechnology majors only. Fundamental biological, chemical and algorithmic models underlying computational structural biology; protein structure and nucleic acids structure; comparison of protein structures; protein structure prediction; molecular simulations; databases and online services in computational structural biology. GE credit: SE. Effective: 2019 Winter Quarter.

ECS 130—Scientific Computation (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECS 030 or ENG 006); (MAT 022A or MAT 067) Pass One open to Computer Science and Computer Science Engineering Majors only. Matrix-vector approach using MATLAB for floating-point arithmetic, error analysis, data interpolation, least squares data fitting, quadrature, zeros, optimization and matrix eigenvalues and singular values. Parallel computing for matrix operations and essential matrix factorizations. GE credit: SE. Effective: 2016 Fall Quarter.

ECS 130—Scientific Computation (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECS 030 or ENG 006 or ECS 032A or ECS 010 or ECS 036A); (MAT 022A or MAT 067) Pass One open to Computer Science and Computer Science Engineering Majors only. Matrix-vector approach using MATLAB for floating-point arithmetic, error analysis, data interpolation, least squares data fitting, quadrature, zeros, optimization and matrix eigenvalues and singular values. Parallel computing for matrix operations and essential matrix factorizations. GE credit: SE. Effective: 2019 Winter Quarter.

ECS 132—Probability and Statistical Modeling for Computer Science (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 040; (ECS 050 or EEC 070); MAT 021C; (MAT 022A or MAT 067) Pass One open to Computer Science and Computer Science Engineering Majors only. Univariate and multivariate distributions. Estimation and model building. Markov/Hidden Markov models. Applications to data mining, networks, security, software engineering and bioinformatics. GE credit: QL, SE. Effective: 2016 Fall Quarter.

ECS 132—Probability and Statistical Modeling for Computer Science (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECS 040 or ECS 034 or ECS 036B); ECS 050; MAT 021C; (MAT 022A or MAT 067) Pass One open to Computer Science and Computer Science Engineering Majors only. Univariate and multivariate distributions. Estimation and model building. Markov/Hidden Markov models. Applications to data mining, networks, security, software engineering and bioinformatics. GE credit: QL, SE. Effective: 2019 Winter Quarter.

ECS 140A—Programming Languages (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 050 or EEC 070; ECS 060 Pass One open to Computer Science, Computer Science Engineering, Computer Engineering, and Cognitive Science Majors only. Syntactic definition of programming languages. Introduction to programming language features including variables, data types, data abstraction, object-orientedness, scoping, parameter disciplines, exception handling. Non-imperative
programming languages. Comparative study of several high-level programming languages. GE credit: SE. Effective: 2017 Winter Quarter.

ECS 140A—Programming Languages (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 050; (ECS 060 or ECS 032B or ECS 036C); ECS 020 Pass One open to Computer Science, Computer Science Engineering, Computer Engineering, and Cognitive Science Majors only. Syntactic definition of programming languages. Introduction to programming language features including variables, data types, data abstraction, object-orientedness, scoping, parameter disciplines, exception handling. Non-imperative programming languages. Comparative study of several high-level programming languages. GE credit: SE. Effective: 2017 Winter Quarter.

ECS 140A—Programming Languages (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 050; (ECS 060 or ECS 032B or ECS 036C); ECS 020; ECS 150 Pass One open to Computer Science, Computer Science Engineering, Computer Engineering, and Cognitive Science Majors only. Syntactic definition of programming languages. Introduction to programming language features including variables, data types, data abstraction, object-orientedness, scoping, parameter disciplines, exception handling. Non-imperative programming languages. Comparative study of several high-level programming languages. GE credit: SE. Effective: 2019 Winter Quarter.

ECS 140B—Programming Languages (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 140A Pass One open to Computer Science and Computer Science Engineering Majors only. Continuation of programming language principles. Further study of programming language paradigms such as functional and logic; additional programming language paradigms such as concurrent (parallel); key implementation issues for those paradigms; and programming language semantics. GE credit: SE. Effective: 2019 Fall Quarter.

ECS 142—Compilers (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 020; ECS 140A; ECS 120 recommended. Pass One open to Computer Science and Computer Science Engineering Majors only. Principles and techniques of lexical analysis, parsing, semantic analysis, code generation, and code optimization. Implementation of compilers. GE credit: SE. Effective: 2016 Fall Quarter.

ECS 142—Compilers (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 140A; ECS 120; ECS 122A recommended. Pass One open to Computer Science and Computer Science Engineering Majors only. Principles and techniques of lexical analysis, parsing, semantic analysis, code generation, and code optimization. Implementation of compilers. GE credit: SE. Effective: 2019 Winter Quarter.

ECS 145—Scripting Languages and Their Applications (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Programming skill at the level of ECS 060. Pass One open to Computer Science and Computer Science Engineering Majors only. Goals and philosophy of scripting languages, with Python and R as prime examples. Applications include networking, data analysis and display, and graphical user interfaces (GUIs). GE credit: SE. Effective: 2016 Fall Quarter.

ECS 145—Scripting Languages and Their Applications (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 034 or ECS 036C or ECS 060; or Consent of Instructor. Pass One open to Computer Science and Computer Science Engineering Majors only. Goals and philosophy of scripting languages, with Python and R as prime examples. Applications include networking, data analysis and display, and graphical user interfaces (GUIs). GE credit: SE. Effective: 2019 Winter Quarter.

ECS 150—Operating Systems and System Programming (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 040; (ECS 050 or EEC 070 or EEC 170) Pass One open to Computer Science, Computer Science Engineering, and Computer Engineering Majors only. Basic concepts of operating systems and system programming. Processes and interprocess communication/synchronization; virtual memory, program loading and linking; file and I/O subsystems; utility programs. Study of a real operating system. GE credit: SE. Effective: 2017 Fall Quarter.

ECS 150—Operating Systems and System Programming (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECS 034 or ECS 036C or ECS 060); (ECS 154A or EEC 170) Pass One open to Computer Science, Computer Science Engineering, and Computer Engineering Majors only. Basic concepts of operating systems and system programming. Processes and interprocess communication/
synchronization; virtual memory, program loading and linking; file and I/O subsystems; utility programs. Study of a real operating system. GE credit: SE. Effective: 2019 Winter Quarter.

**ECS 152A—Computer Networks (4)**  
Review all entries  
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 060; (ECS 132 or EEC 161 or MAT 135A or STA 131A or STA 120 or STA 032) Pass One open to Computer Science and Computer Science Engineering Majors only. Overview of computer networks, TCP/IP protocol suite, computer-networking applications and protocols, transport-layer protocols, network architectures, Internet Protocol (IP), routing, link-layer protocols, local area and wireless networks, medium access control, physical aspects of data transmission, and network-performance analysis. Only 2 units of credit for students who have taken ECS 157. (Same course as EEC 173A.) GE credit: SE. Effective: 2019 Winter Quarter.

**ECS 152A—Computer Networks (4)**  
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECS 060 or ECS 032B or ECS 036C); (ECS 132 or EEC 161 or MAT 135A or STA 131A or STA 120 or STA 032) Pass One open to Computer Science and Computer Science Engineering Majors only. Overview of computer networks, TCP/IP protocol suite, computer-networking applications and protocols, transport-layer protocols, network architectures, Internet Protocol (IP), routing, link-layer protocols, local area and wireless networks, medium access control, physical aspects of data transmission, and network-performance analysis. Only 2 units of credit for students who have taken ECS 157. (Same course as EEC 173A.) GE credit: SE. Effective: 2016 Fall Quarter.

**ECS 152B—Computer Networks (4)**  
Review all entries  
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 152A or EEC 173A Pass One open to Computer Science and Computer Science Engineering Majors only. TCP/IP protocol suite, computer networking applications, client-server and peer-to-peer architectures, application-layer protocols, transport-layer protocols, transport-layer interfaces, sockets, network programming, remote procedure calls, and network management. GE credit: SE. Effective: 2016 Fall Quarter.

**ECS 152B—Computer Networks (4)**  
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 150; (ECS 152A or EEC 173A) Pass One open to Computer Science and Computer Science Engineering Majors only. TCP/IP protocol suite, computer networking applications, client-server and peer-to-peer architectures, application-layer protocols, transport-layer protocols, transport-layer interfaces, sockets, network programming, remote procedure calls, and network management. GE credit: SE. Effective: 2019 Winter Quarter.

**ECS 152C—Advanced Topics in Computer Networks (4)**  
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EEC 173A or ECS 152A Advanced topics in computer networks, wireless networks, multimedia networking, traffic analysis and modeling, network design and management, network simulation and performance analysis, and design projects in communication networks. (Same course as EEC 173B.) GE credit: SE. Effective: 2014 Fall Quarter.

**ECS 153—Computer Security (4)**  
Review all entries  
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 150; ECS 152A Pass One open to Computer Science and Computer Science Engineering Majors only. Principles, mechanisms, and implementation of computer security and data protection. Policy, encryption and authentication, access control, and integrity models and mechanisms; network security; secure systems; programming and vulnerabilities analysis. Study of an existing operating system. Not open for credit to students who have completed course 155. GE credit: SE. Effective: 2016 Fall Quarter.

**ECS 153—Computer Security (4)**  
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 150; ECS 152A or EEC 173A Pass One open to Computer Science and Computer Science Engineering Majors only. Principles, mechanisms, and implementation of computer security and data protection. Policy, encryption and authentication, access control, and integrity models and mechanisms; network security; secure systems; programming and vulnerabilities analysis. Study of an existing operating system. Not open for credit to students who have completed ECS 155. GE credit: SE. Effective: 2018 Fall Quarter.

**ECS 154A—Computer Architecture (4)**  
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 050 or EEC 070 Pass One open to Computer Science and Computer Science Engineering Majors only. Introduction to digital design. Interfacing of devices for I/O, memory and memory management. Input/output programming, via wait loops, hardware interrupts and calls to operating system services. Hardware support for operating systems software. Only one unit of credit allowed for students who have taken EEC 170. GE credit: SE. Effective: 2017 Winter Quarter.
ECS 154B—Computer Architecture (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 154A or (EEC 170, EEC 180A) Pass One open to Computer Science and Computer Science Engineering Majors only. Hardwired and microprogrammed CPU design. Memory hierarchies. Uniprocessor performance analysis under varying program mixes. Introduction to pipelining and multiprocessors. GE credit: SE. Effective: 2016 Fall Quarter.

ECS 158—Programming on Parallel Architectures (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 150; ECS 154B recommended. Pass One open to Computer Science and Computer Science Engineering Majors only. Techniques for software development using the shared-memory and message-passing paradigms, on parallel architectures and networks of workstations. Locks, barriers, and other techniques for synchronization. Introduction to parallel algorithms. GE credit: SE. Effective: 2018 Winter Quarter.

ECS 160—Software Engineering (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 140A Pass One open to Computer Science and Computer Science Engineering Majors only. Requirements, specification, design, implementation, testing, and verification of large software systems. Study and use of software engineering methodologies. Team programming. GE credit: SE. Effective: 2016 Fall Quarter.

ECS 160—Software Engineering (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 140A; extensive programming experience recommended. Pass One open to Computer Science and Computer Science Engineering Majors only. Requirements, specification, design, implementation, testing, and verification of large software systems. Study and use of software engineering methodologies. Team programming. GE credit: SE. Effective: 2019 Winter Quarter.

ECS 161—Modern Programming Tools (4) Review all entries
Laboratory—2 hours; Lecture—2 hours. Prerequisite(s): ECS 040; or equivalent. Pass One open to Computer Science and Computer Science Engineering Majors only. Concepts and practice of collaborative software development using modern software tools. GE credit: SE. Effective: 2017 Fall Quarter.

ECS 161—Modern Programming Tools (4) Review all entries
Laboratory—2 hours; Lecture—2 hours. Prerequisite(s): (ECS 040 or ECS 032B or ECS 036B) Pass One open to Computer Science and Computer Science Engineering Majors only. Concepts and practice of collaborative software development using modern software tools. GE credit: SE. Effective: 2019 Winter Quarter.

ECS 162—Web Programming (4) Review all entries
Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): ECS 030; Or equivalent programming experience in C and the Unix environment. Pass One open to Computer Science and Computer Science Engineering Majors only. Technical aspects of building websites, including both server-side and client-side software development. GE credit: SE, VL. Effective: 2017 Fall Quarter.

ECS 162—Web Programming (4) Review all entries
Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): ECS 030 or ECS 034 or ECS 036B; or equivalent programming experience in C and the Unix environment. Pass One open to Computer Science and Computer Science Engineering Majors only. Technical aspects of building websites, including both server-side and client-side software development. GE credit: SE, VL. Effective: 2019 Winter Quarter.

ECS 163—Information Interfaces (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 060 Pass One open to Computer Science and Computer Science Engineering Majors only. Art and science of information visualization and interfaces for information systems. Design principles of human-computer interaction. Visual display and navigation of nonspatial and higher dimensional data. Implementations, performance issues, tradeoffs, and evaluation of interactive information systems. GE credit: SE, VL. Effective: 2016 Fall Quarter.

ECS 163—Information Interfaces (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 060 or ECS 032B or ECS 036C Pass One open to Computer Science and Computer Science Engineering Majors only. Art and science of information visualization and interfaces for information systems. Design principles of human-computer interaction. Visual display and navigation of nonspatial and higher dimensional data. Implementations, performance issues, tradeoffs, and evaluation of interactive information systems. GE credit: SE, VL. Effective: 2019 Winter Quarter.

ECS 165A—Database Systems (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 060 Pass One open to Computer Science and Computer
Science Engineering Majors only. Database modeling and design (E/R model, relational model), relational algebra, query languages (SQL), file and index structures, query processing, transaction management. GE credit: SE. Effective: 2016 Fall Quarter.

**ECS 165A—Database Systems (4) Review all entries**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 060 or ECS 032B or ECS 036C Pass One open to Computer Science and Computer Science Engineering Majors only. Database modeling and design (E/R model, relational model), relational algebra, query languages (SQL), file and index structures, query processing, transaction management. GE credit: SE. Effective: 2019 Winter Quarter.

**ECS 165B—Database Systems (4) Review all entries**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 165A Pass One open to Computer Science and Computer Science Engineering Majors only. Data modeling (object-relational, graph-based, spatiotemporal models). Querying semistructured data (XML). Database theory (normalization, integration, provenance). Database programming (stored procedures, embedded SQL, web programming). Advanced topics (data warehousing, parallel data processing). GE credit: SE. Effective: 2016 Fall Quarter.

**ECS 170—Introduction to Artificial Intelligence (4) Review all entries**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 060 Pass One open to Computer Science and Computer Science Engineering Majors only. Design and implementation of intelligent computer systems. Knowledge representation and organization. Memory and inference. Problem solving. Natural language processing. GE credit: SE. Effective: 2016 Fall Quarter.

**ECS 171—Machine Learning (4) Review all entries**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 060 or ECS 032B or ECS 036C; or Consent of Instructor. Probability equivalent to STA 032 or STA 131A or ECS 132 recommended; linear algebra equivalent to MAT 22A recommended. Pass One open to Computer Science and Computer Science Engineering Majors only. Introduction to machine learning. Supervised and unsupervised learning, including classification, dimensionality reduction, regression and clustering using modern machine learning methods. Applications of machine learning to other fields. GE credit: SE. Effective: 2019 Winter Quarter.

**ECS 173—Image Processing and Analysis (4) Review all entries**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (MAT 067 or MAT 022A C- or better); ECS 060 Pass One open to Computer Science and Computer Science Engineering Majors only. Techniques for automated extraction of high-level information from images generated by cameras, three-dimensional surface sensors, and medical devices. Typical applications include detection of objects in various types of images and describing populations of biological specimens appearing in medical imagery. GE credit: SE. Effective: 2016 Fall Quarter.
of images and describing populations of biological specimens appearing in medical imagery. GE credit: SE.
Effective: 2019 Winter Quarter.

**ECS 174—Computer Vision (4)**  
*Review all entries*

Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 060; (STA 032 or STA 131A or MAT 135A or EEC 161 or ECS 132) recommended; (MAT 022A or MAT 067) recommended. Pass One open to Computer Science and Computer Science and Engineering Majors only. Computer vision is the study of enabling machines to "see" the visual world (e.g., understand images and videos). Explores several fundamental topics in the area, including feature detection, grouping and segmentation, and recognition. GE credit: SE. Effective: 2018 Spring Quarter.

**ECS 174—Computer Vision (4)**  
*Review all entries*

Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECS 060 or ECS 032B or ECS 036C); (STA 032 or STA 131A or MAT 135A or EEC 161 or ECS 132 recommended); (MAT 022A or MAT 067 recommended). Pass One open to Computer Science and Computer Science and Engineering Majors only. Computer vision is the study of enabling machines to "see" the visual world; e.g., understand images and videos. Explores several fundamental topics in the area, including feature detection, grouping and segmentation, and recognition. GE credit: SE. Effective: 2019 Winter Quarter.

**ECS 175—Computer Graphics (4)**  
*Review all entries*

Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 060; (MAT 022A or MAT 067) Pass One open to Computer Science and Computer Science Engineering Majors only. Principles of computer graphics, with a focus on interactive systems. Current graphics hardware, elementary operations in two-and three-dimensional space, geometric transformations, camera models and interaction, graphics system design, standard graphics APIs, individual projects. GE credit: SE, VL. Effective: 2016 Fall Quarter.

**ECS 175—Computer Graphics (4)**  
*Review all entries*

Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECS 060 or ECS 034 or ECS 036C); (MAT 022A or MAT 067) Pass One open to Computer Science and Computer Science Engineering Majors only. Principles of computer graphics, with a focus on interactive systems. Current graphics hardware, elementary operations in two-and three-dimensional space, geometric transformations, camera models and interaction, graphics system design, standard graphics APIs, individual projects. GE credit: SE, VL. Effective: 2019 Winter Quarter.

**ECS 177—Scientific Visualization (4)**

Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 175 Pass One open to Computer Science and Computer Science Engineering Majors only. Computer graphics techniques for generating images of various types of measured or computer-simulated data. Typical applications for these graphics techniques include study of air flows around car bodies, medical data, and molecular structures. GE credit: SE, VL. Effective: 2016 Fall Quarter.

**ECS 178—Geometric Modeling (4)**

Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 175 Pass One open to Computer Science and Computer Science Engineering Majors only. Interactive graphics techniques for defining and manipulating geometrical shapes used in computer animation, car body design, aircraft design, and architectural design. GE credit: SE, VL. Effective: 2016 Fall Quarter.

**ECS 188—Ethics in an Age of Technology (4)**  
*Review all entries*

**ECS 188—Ethics in an Age of Technology (4)**  
*Review all entries*

**ECS 189A—Special Topics in Computer Science; Computer Science Theory (1-5)**

Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Computer Science Theory. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.
ECS 189B—Special Topics in Computer Science; Architecture (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Architecture. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECS 189C—Special Topics in Computer Science; Programming Languages and Compilers (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Programming Languages and Compilers. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECS 189D—Special Topics in Computer Science; Operating Systems (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Operating Systems. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECS 189E—Special Topics in Computer Science; Software Engineering (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Software Engineering. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECS 189F—Special Topics in Computer Science; Databases (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic Databases. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECS 189G—Special Topics in Computer Science; Artificial Intelligence (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Artificial Intelligence. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECS 189H—Special Topics in Computer Science; Computer Graphics (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Computer Graphics. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECS 189I—Special Topics in Computer Science; Networks (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Networks. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECS 189J—Special Topics in Computer Science; Computer-Aided Design (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Computer-Aided Design. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECS 189K—Special Topics in Computer Science; Scientific Computing (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Scientific Computing. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECS 189L—Special Topics in Computer Science; Computer Science (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Computer Science. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECS 189M—Special Topics in Computer Security; Computer Security (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Computer Security. May be repeated for credit when topic differs. Effective: 2009 Spring Quarter.

ECS 189N—Special Topics in Bioinformatics and Computational Biology (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Bioinformatics and Computational Biology. May be repeated for credit when topic differs. Effective: 2009 Spring Quarter.

ECS 190C—Research Group Conferences in Computer Science (1) 
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Upper division standing in Computer Science and Engineering. Research group conferences. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

ECS 190C—Research Group Conferences in Computer Science (1) 
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Upper division standing in Computer Science or Computer Science and Engineering. Research group conferences. May be repeated for credit. (P/NP grading only.) Effective: 2019 Winter Quarter.

ECS 190X—Senior Seminar (2)
Seminar—2 hours. Prerequisite(s): Senior standing. Examination of a special topic in a small group setting. Effective: 1997 Winter Quarter.
ECS 192—Internship in Computer Science (1-5)
Internship. Prerequisite(s): Completion of a minimum of 84 units; project approval prior to period of internship. Supervised work experience in computer science. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

ECS 193A—Senior Design Project (3)
Lecture/Discussion—3 hours. Prerequisite(s): ECS 160 (can be concurrent); Senior standing in Computer Science or Computer Science and Engineering or consent of instructor. Pass One open to Computer Science Engineering Majors only; Pass Two open to Computer Science and Computer Science Engineering Majors only. Responding to real-life client design challenges, student teams plan, implement, and evaluate large-scale projects involving computer and computational systems. The project is supervised by a faculty member. Students must take course 193A and 193B to receive credit. GE credit: SE. Effective: 2017 Winter Quarter.

ECS 193B—Senior Design Project (3)
Lecture/Discussion—3 hours. Prerequisite(s): ECS 193A IP or better Pass One open to Computer Science Engineering Majors only; Pass Two open to Computer Science and Computer Science Engineering Majors only. Responding to real-life client design challenges, student teams plan, implement, and evaluate large-scale projects involving computer and computational systems. The project is supervised by a faculty member. Students must take course 193A and 193B to receive credit. GE credit: SE. Effective: 2017 Spring Quarter.

ECS 197T—Tutoring in Computer Science (1-3)
Discussion—1 hour; Discussion/Laboratory—3-6 hours. Prerequisite(s): Consent of Instructor. Restricted to upper-division standing. Tutoring in computer science courses, especially introductory courses. (P/NP grading only.) Effective: 2014 Fall Quarter.

ECS 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

ECS 198F—Student Facilitated Course (1-4)
Variable—1-4 hours. Prerequisite(s): Consent of Instructor. Student facilitated course intended primarily for upper division students. (P/NP grading only.) Effective: 2016 Winter Quarter.

ECS 199—Special Study for Advanced Undergraduates (1-5)
Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

ECS 199FA—Student Facilitated Course Development (1-4)
Variable—1-4 hours. Under the supervision of a faculty member, an undergraduate student plans and develops the course they will offer under 98F/198F. (P/NP grading only.) Effective: 2016 Winter Quarter.

ECS 199FB—Student Facilitated Teaching (1-4)
Variable—1-4 hours. Prerequisite(s): ECS 199FA; Consent of Instructor. STU FAC. Under the supervision of a faculty member, an undergraduate student teaches a course under 98F/198F. (P/NP grading only.) Effective: 2016 Winter Quarter.

ECS 201A—Advanced Computer Architecture (4)
Lecture—3 hours; Term Paper. Prerequisite(s): (ECS 154B or EEC 170); ECS 150 Pass 1 and Pass 2 open to Graduate Students in Computer Science only. Modern research topics and methods in computer architecture. Design implications of memory latency and bandwidth limitations. Performance enhancement via within-processor and between-processor parallelism. Term project involving student-proposed extensions/modifications of work in the research literature. Not open for credit to students who have completed ECS 250A. Effective: 2016 Spring Quarter.

ECS 201B—High-Performance Uniprocessing (4)
Lecture—3 hours; Term Paper. Prerequisite(s): ECS 201A Pass 1 and Pass 2 open to Graduate Students in Computer Science only. Maximizing uniprocessor performance. Barriers to high performance; solutions to the problems; historical and current processor designs. Not open for credit to students who have completed ECS 250B. Effective: 2016 Spring Quarter.

ECS 201C—Parallel Architectures (4)
Lecture—3 hours; Project (Term Project). Prerequisite(s): ECS 201A Evolution of parallel architectures from special-purpose machines to commodity servers. Emphasis on recent machines and applications that drive them. Not open for credit to students who have completed ECS 250C. Effective: 2003 Spring Quarter.

ECS 203—Novel Computing Technologies (4)
Lecture—3 hours; Project (Term Project)—1 hour. Prerequisite(s): ECS 201A Pass One and Pass Two open to
Graduate Students in Computer Science only. Novel computing technologies that could revolutionize computer architecture. Quantum computing technologies, including algorithms, devices, and fault tolerance. A survey of other unconventional technologies including nanoscale electronics, MEMS devices, biological devices, and nanotechnology. Effective: 2016 Spring Quarter.

**ECS 220—Theory of Computation (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 120; ECS 122A Pass 1 and Pass 2 open to Graduate Students in Computer Science only. Time and space complexity classes. Reductions, completeness, and the role of randomness. Logic and undecidability. Effective: 2016 Spring Quarter.

**ECS 221—Computational Methods in Systems and Synthetic Biology (4)**

**ECS 222A—Design and Analysis of Algorithms (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 122A; STA 031A recommended. Pass One and Pass Two open to Graduate Students in Computer Science only. Techniques for designing efficient algorithms, analyzing their complexity and applying these algorithms to a broad range of applications. Methods for recognizing and dealing with difficult problems. Effective: 2016 Spring Quarter.

**ECS 222B—Advanced Design and Analysis of Algorithms (4)**
Lecture—3 hours; Project (Term Project)—1 hour. Prerequisite(s): ECS 222A Pass One and Pass Two open to Graduate Students in Computer Science only. Advanced topics in complexity theory. Problem classification. The classes P, NP, P-space, co-NP. Matching and network flow algorithms. Matrix multiplication. Approximation algorithms. Effective: 2016 Spring Quarter.

**ECS 223—Parallel Algorithms (4)**
Discussion/Laboratory—3 hours; Project (Term Project)—1 hour. Prerequisite(s): ECS 222A Pass One and Pass Two open to Graduate Students in Computer Science only. Models of parallel computer systems including PRAMs, loosely coupled systems and interconnection networks. Parallel algorithms for classical problems and general techniques for their design and analysis. Proving lower bounds on parallel computation in several settings. Effective: 2016 Spring Quarter.

**ECS 224—String Algorithms and Applications in Computational Biology (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 122A Pass One and Pass Two open to Graduate Students in Computer Science only. Algorithms that operate on strings. Pattern matching, sets of patterns, regular expression pattern matching, suffix trees and applications, inexact similarity, parametric sequence alignment, applications to DNA sequencing and protein database searching. Effective: 2016 Spring Quarter.

**ECS 225—Graph Theory (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Graduate standing in electrical engineering or computer science or consent of instructor. Open to Graduate Students in Computer Science only. Fundamental concepts. Planar graphs: Kuratowski's theorem. Packings and coverings. Menger's theorem, representation of cuts, Hamilton graphs, rigid graphs, chordal graphs, graph coloring, graph isomorphism, applications and some algorithms. Effective: 2018 Winter Quarter.

**ECS 226—Computational Geometry (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 175; ECS 222A Pass One and Pass Two open to Graduate Students in Computer Science only. Mathematics of unstructured data. Algorithms for data structures such as Voronoi diagrams, oct-trees, and arrangements. Applications in computer graphics, concentrating on problems in three-dimensions. Effective: 2016 Spring Quarter.

**ECS 227—Modern Cryptography (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 220 or ECS 222A Pass One and Pass Two open to Graduate Students in Computer Science only. Modern cryptography as a discipline emphasizing formal definitions and proofs of security. One-way functions, pseudo-randomness, encryption, digital signatures, zero-knowledge, secure protocols. Effective: 2016 Spring Quarter.

**ECS 228—Cryptography for E-Commerce (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 222A Pass One and Pass Two open to Graduate Students in Computer Science only. Cryptographic primitives and protocols of importance to e-commerce, present
and future, including content distribution mechanisms, payment mechanisms, pricing mechanisms, anonymity and privacy mechanisms, fair exchange mechanisms. Effective: 2016 Spring Quarter.

ECS 229—Advanced Computational Structural Bioinformatics (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Graduate standing. Pass One and Pass Two open to Graduate Students in Computer Science only. Algorithmic problems in structural biology; protein structure classification; protein structure prediction (including comparative modeling and ab initio protein structure prediction); molecular simulations (molecular dynamics and Monte Carlo simulations). Effective: 2016 Spring Quarter.

ECS 230—Applied Numerical Linear Algebra (4)
Discussion—1 hour; Discussion/Laboratory—3 hours. Prerequisite(s): ECS 130 or EAD 209 or MAT 167 Pass One and Pass Two open to Graduate Students in Computer Science only. Numerical linear algebra (NLA) with emphasis on applications in engineered systems; matrix factorizations; perturbation and rounding error analyses of fundamental NLA algorithms. Effective: 2016 Spring Quarter.

ECS 231—Large-Scale Scientific Computation (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 130 Pass One and Pass Two open to Graduate Students in Computer Science only. Algorithms and techniques for large-scale scientific computation, including basics for high performance computing, iterative methods, discrete approximation, fast Fourier transform, Poisson solvers, particle methods, spectral graph partition and its applications. Effective: 2016 Spring Quarter.

ECS 234—Computational Functional Genomics (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 124; Graduate standing in Computer Science or Life Sciences. Pass One and Pass Two open to Graduate Students in Computer Science only. Bioinformatics methods for analysis and inference of functional relationships among genes using large-scale genomic data, including methods for integration of gene expression, promoter sequence, TF-DNA binding and other data, and approaches in modeling of biological networks. Effective: 2016 Spring Quarter.

ECS 235A—Computer and Information Security (4)
Lecture—3 hours; Project (Term Project). Prerequisite(s): ECS 150; ECS 152A recommended. Pass One and Pass Two open to Graduate Students in Computer Science only. Modern topics in computer security, including: protection, access control, operating systems security, network security, applied cryptography, cryptographic protocols, secure programming practices, safe languages, mobile code, malware, privacy and anonymity, and case studies from real-world systems. Not open for credit to students who have taken ECS 235. Effective: 2016 Fall Quarter.

ECS 235B—Foundations of Computer and Information Security (4)
Lecture—3 hours; Project (Term Project). Prerequisite(s): ECS 120 and ECS 150 recommended. Pass One and Pass Two open to Graduate Students in Computer Science only. Theoretical foundations of methods used to protect data in computer and communication systems. Access control matrix and undecidability of security; policies; Bell-LaPadula, Biba, Chinese Wall models; non-interference and non-deducibility; information flow and the confinement problem. Not open for credit to students who have taken ECS 235. Effective: 2016 Fall Quarter.

ECS 236—Computer Security: Intrusion Detection Based Approach (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 150; ECS 153 recommended. Pass One and Pass Two open to Graduate Students in Computer Science only. Concepts of intrusion detection, anomaly detection based on machine learning, signature-based detection using pattern matching, automated response to attacks using artificial intelligence planning, tracing intruders based on principal component analysis, security policy languages. Effective: 2016 Spring Quarter.

ECS 240—Programming Languages (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 140A; ECS 142 Pass One and Pass Two open to Graduate Students in Computer Science only. Advanced topics in programming languages, including formal syntax and semantics, the relation between formal semantics and verification, an introduction to the lambda calculus. Additional topics will include language design principles, alternative programming languages, in-depth semantic theory and models of language implementation. Effective: 2016 Spring Quarter.

ECS 242—Translation of Programming Languages (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ECS 240 Pass One and Pass Two open to Graduate Students in Computer Science only. Lexical analysis, parsing, storage management, symbol table design, semantic analysis and code generation. LR, LALR grammars. Compilers/Compilers. Effective: 2016 Spring Quarter.

ECS 243—Code Generation and Optimization (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 201A or EEC 270 Pass One and Pass Two open to
Graduate Students in Computer Science only. Compiler optimizations for performance, code size and power reduction. Topics include control- and data-flow analysis, redundancy elimination, loop and cache optimizations, register allocation, local and global instruction scheduling, and modulo scheduling. Effective: 2016 Fall Quarter.

**ECS 244—Principles of Concurrent Programming (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ECS 020; ECS 150 Pass One and Pass Two open to Graduate Students in Computer Science only. Fundamental concepts and applications of concurrent programs; concurrent program verification and derivation; synchronization mechanisms in programming languages; distributed programming techniques; case studies of languages. Effective: 2016 Spring Quarter.

**ECS 247—Concurrent Programming Languages (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ECS 140A; ECS 150 Pass One and Pass Two open to Graduate Students in Computer Science only. Language design parameters. Models of parallel machines. Load balancing. Scalability. Portability. Efficiency measures. Design and implementation techniques for several classes of concurrent programming languages (such as object-oriented, functional, logic, and constraint programming languages). Effective: 2016 Fall Quarter.

**ECS 251—Operating Systems (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 150 Pass One and Pass Two open to Graduate Students in Computer Science only. Models, design, implementation, performance evaluation in operating systems. Algorithms, internal architectures for single processor OS and distributed systems. Concurrency control, recovery, security. OS kernel-level programming. Special topics embedded systems, real-time system, device driver, NPU (Network Processor Unit). Effective: 2016 Spring Quarter.

**ECS 252—Computer Networks (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ECS 152B Pass 1 and Pass 2 open to Graduate Students in Computer Science only. Internet protocol based computer networks applications, transport, network layer protocols. High speed LAN technologies: Ethernet, Asynchronous Transfer Mode (ATM). Delay models in data networks: analysis of multiaccess techniques in polling, ring, random access networks. Multimedia applications requirements and design. Effective: 2016 Spring Quarter.

**ECS 253—Network Theory and Applications (4)**
Lecture/Discussion—4 hours. Prerequisite(s): MAT 022A; MAT 022B; (STA 013 or STA 013Y or STA 120); Experience with computer software, or consent of instructor. Pass One and Pass Two open to Graduate Students in Mechanical and Aerospace Engineering and Computer Science only. Develops the mathematical theory underlying growth, structure and function of networks with applications to physical, social, biological and engineered systems. Topics include network growth, resilience, epidemiology, phase transitions, software and algorithms, routing and search control, cascading failures. (Same course as Mechanical & Aeronautical Engineering 253.) Effective: 2018 Spring Quarter.

**ECS 255—Resource Management in Wireless Communication Networks (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 252A Advanced research issues in wireless communication networks, including multi-user diversity and cross-layer optimization, basic network information theory, MIMO systems and the impact on networks, and dynamics spectrum management. Effective: 2009 Winter Quarter.

**ECS 256—Performance Evaluation (4)**
Lecture—3 hours; Project (Term Project)—1 hour. Prerequisite(s): ECS 020; ECS 152A; STA 131A; (EEC 170 or (ECS 154A, ECS 154B)); ECS 150 recommended. Pass One and Pass Two open to Graduate Students in Computer Science only. Use of simulation and queueing theory in computer and communication system design. Applications to processor scheduling, memory hierarchies; I/O systems; packet and circuit switched networks; fault-tolerance; computer networks applications. Not open for credit to students who have completed ECS 256A. Effective: 2016 Fall Quarter.
ECS 256—Probability Models for Computer Science (4) Review all entries
Extensive Problem Solving; Lecture—3 hours; Project (Term Project). Prerequisite(s): A calculus-based course in probability, such as ECS132, STA 131A, or EEC 161; programming skills and familiarity with matrix algebra. Pass One and Pass Two open to graduate students in Computer Science only. Probabilistic and statistical models useful in computer/data science. Applications to networks, bioinformatics, database management, machine learning, software engineering and image processing. Not open for credit to students who have completed ECS 256A. Effective: 2019 Spring Quarter.

ECS 257—Mobile and Wireless Networks (4)
Independent Study—1 hour; Lecture—3 hours. Prerequisite(s): ECS 252 Pass One and Pass Two open to Graduate Students in Computer Science only. Fundamental techniques in design of second generation wireless networks: cellular network and protocols, medium access techniques, handoff control, signaling and mobility management, wireless data works, Internet mobility and Personal Communication Services (PCS). Third generation wideband systems, novel technologies, adhoc networks. Effective: 2016 Fall Quarter.

ECS 258—Networking Architecture and Resource Management (4)
Lecture—3 hours; Project (Term Project). Prerequisite(s): ECS 152A or EEC 173A Pass One and Pass Two open to Graduate Students in Computer Science and Electrical and Computer Engineering only. Concepts and design principles of computer networks. Network architectures, protocol mechanisms and implementation principles (transport/network/data-link layers), network algorithms, router mechanisms, design requirements of applications, network simulation, modeling and performance analysis. (Same course as EEC 273.) Effective: 2016 Fall Quarter.

ECS 259—Optical Networks (4)

ECS 260—Software Engineering (4)
Lecture—3 hours; Project (Term Project)—3 hours. Prerequisite(s): ECS 142; ECS 160 recommended. Pass One and Pass Two open to Graduate Students in Computer Science only. Advanced techniques for domain-specific software reuse. Effective: 2016 Fall Quarter.

ECS 261—Program Verification (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): PHI 112; or MAT 125 or familiarity with first-order logic; knowledge of an integrative and functional programming language. Methods of proving correctness of programs with respect to formal specifications, with attention to those suited for employing automated deduction. Logic background, symbolic execution, techniques suited to iterative programming, methods from denotational semantics, termination, dynamic logic and proofs of concurrent programs. Effective: 1997 Fall Quarter.

ECS 262—Formal Specification (3)
Lecture—3 hours. Prerequisite(s): ECS 261 Pass One and Pass Two open to Graduate Students in Computer Science only. Formal specification of modules, and its relationship to topdown programming development and verification. Abstract data types, together with methods for specifying them. Implementations and proofs of implementation. Using specifications to reason about programs. Parameterized types. Constructing good formal specifications. Effective: 2016 Fall Quarter.

ECS 265—Distributed Database Systems (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 152B or ECS 165A Pass One and Pass Two open to Graduate Students in Computer Science only. Concepts of distributed database systems and architectures, distributed database design, distributed query processing and optimization, transaction management and concurrency control, heterogeneous and multidatabase systems. Effective: 2016 Fall Quarter.

ECS 266—Spatial Databases (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 165A Concepts, models, and architectures for spatial databases, spatial access methods, query processing, spatio-temporal data management, moving objects, spatial data mining. Effective: 2008 Winter Quarter.

ECS 267—Wide-Area Distributed Information Systems (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 152B or ECS 165A Pass One and Pass Two open to Graduate Students in Computer Science only. Wide-area distributed information systems, data broadcast, multicast, publish/subscribe, service differentiation, information retrieval, Web caching. Effective: 2016 Fall Quarter.
ECS 268—Scientific Data And Workflow Management (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 165A Scientific data integration, metadata, knowledge representation, ontologies, scientific workflow design and management. Effective: 2008 Winter Quarter.

ECS 269—Visual Recognition (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 171 or ECS 174; or equivalent. Graduate seminar course on computer vision with an emphasis on object recognition, activity recognition, and scene understanding. Effective: 2018 Fall Quarter.

ECS 270—Artificial Intelligence (3)
Lecture—3 hours. Prerequisite(s): ECS 140A; ECS 172 Pass One and Pass Two open to Graduate Students in Computer Science only. Concepts and techniques underlying the design and implementation of models of human performance on intelligent tasks. Representation of high-level knowledge structures. Models of memory and inference. Natural language and story understanding. Common sense planning and problem solving. Effective: 2016 Fall Quarter.

ECS 271—Machine Learning and Discovery (4)
Lecture—3 hours; Project (Term Project)—1 hour. Prerequisite(s): ECS 170 Pass One and Pass Two open to Graduate Students in Computer Science only. Artificial intelligence techniques for knowledge acquisition by computers. Fundamental problems in machine learning and discovery. Systems that learn from examples, analogies, and solved problems. Systems that discover numerical laws and qualitative relationships. Projects centering on implementation and evaluation. Effective: 2016 Fall Quarter.

ECS 272—Information Visualization (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ECS 163 or ECS 175 recommended. Pass One and Pass Two open to Graduate Students in Computer Science only. Advanced topics in information visualization: perceptually effective display methods, color design and selection, interaction models and techniques, focus-context techniques, distortion methods, large graph visualization techniques, visual data mining methods, and evaluation methods. Effective: 2016 Fall Quarter.

ECS 273—Applied Visual Computing (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): Graduate standing. Visual computing paradigms, current visualization technologies, principles of 3-d graphics, user interface designs, and exploratory visualization. Effective: 2002 Winter Quarter.

ECS 274—Automated Deduction (4)
Lecture—3 hours. Prerequisite(s): PHI 112; or MAT 125 or familiarity with first order logic. Techniques of mechanical theorem proving. Methods based on resolution and term rewriting. Decision procedures. Induction. Applications to program verification, question/answering and plan generation. Study existing mechanical theorem provers. Effective: 1997 Fall Quarter.

ECS 275A—Advanced Computer Graphics (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ECS 175 or ECS 177 or ECS 178 Pass One and Pass Two open to Graduate Students in Computer Science only. Advanced topics in computer graphics. Hidden surface models, rendering of various surface types, subdivision methods, shading techniques, anti-aliasing, modeling techniques. Effective: 2016 Fall Quarter.

ECS 275B—Advanced Computer Graphics (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ECS 175 or ECS 177 or ECS 178 Pass 1 and Pass 2 open to Graduate Students in Computer Science only. Advanced topics in computer graphics and geometric modeling. Topics taken from advanced research papers in computer graphics, image synthesis, visualization and geometric modeling. Discussion of current research in the field. Effective: 2016 Spring Quarter.

ECS 276—Advanced Volume Visualization (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 177 Pass One and Pass Two open to Graduate Students in Computer Science only. Applications, available tools and techniques, the challenges confronting the field of volume visualization, and some of the advanced topics in the field. Primary emphasis on advanced software and hardware techniques to achieve interactive visualization. Effective: 2016 Fall Quarter.

ECS 277—Advanced Visualization (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 177 Visualization of 3D data, including scalar fields, vector fields, and medical data. Effective: 2000 Fall Quarter.
ECS 278—Computer-Aided Geometric Design (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ECS 175 Pass One and Pass Two open to Graduate Students in Computer Science only. Mathematical techniques for the definition and manipulation of curves and surfaces. Bezier curves and surfaces, B-spline curves and surfaces, subdivision surfaces, wavelets. Integration into various computer graphics rendering models, visualization systems and computer-aided design systems. Effective: 2016 Fall Quarter.

ECS 279—Computer Animation (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 175; or ECS 275. Pass One and Pass Two open to Graduate Students in Computer Science only. Course surveys current research and fundamental techniques that lie behind character animation tools. Emphasis on improving expressive aspects of movement and how physics, motion capture data, the arts and psychology literature, and interactive techniques can be used towards this goal. Effective: 2016 Fall Quarter.

ECS 280—Virtual Reality Technology (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 175 Pass One and Pass Two open to Graduate Students in Computer Science only. Fundamentals and principles of Virtual Reality (VR) technology. Potential and limits for its useful application. Developing a complete virtual reality application. Effective: 2016 Spring Quarter.

ECS 289A—Special Topics in Computer Science; Computer Science Theory (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Computer Science Theory. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

ECS 289B—Special Topics in Computer Science; Architecture (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Architecture. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

ECS 289C—Special Topics in Computer Science; Programming Languages and Compilers (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Programming Languages and Compilers. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

ECS 289D—Special Topics in Computer Science; Operating Systems (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Operating Systems. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

ECS 289E—Special Topics in Computer Science; Software Engineering (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Software Engineering. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

ECS 289F—Special Topics in Computer Science; Databases (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Databases. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

ECS 289G—Special Topics in Computer Science (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Artificial Intelligence. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

ECS 289H—Special Topics in Computer Science; Computer Graphics (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Computer Graphics. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

ECS 289I—Special Topics in Computer Science (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Networks. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

ECS 289J—Special Topics in Computer Science; Computer-Aided Design (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Computer-Aided Design. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

ECS 289K—Special Topics in Computer Science; Scientific Computing (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Scientific Computing. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

ECS 289L—Special Topics in Computer Science (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Computer Science. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.
ECS 289M—Special Topics in Computer Science; Security (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Security. May be repeated for credit when topic differs. Effective: 2001 Winter Quarter.

ECS 289N—Special Topics in Bioinformatics and Computational Biology (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topic in Bioinformatics and Computational Biology. May be repeated for credit when topic differs. Effective: 2009 Spring Quarter.

ECS 290—Seminar in Computer Science (1)
Seminar—1 hour. Participating seminar; discussion and presentation of current research and development in computer science. (S/U grading only.) Effective: 1997 Winter Quarter.

ECS 290C—Graduate Research Group Conference (1)
Discussion—1 hour. Research problems, progress and techniques in computer science. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

ECS 293A—Research in Computer Science (1)
Lecture—1 hour. Prerequisite(s): Graduate standing in computer science. Pass One and Pass Two open to Graduate Students in Computer Science only. Study of research topics in computer science, PhD level research methodologies (experimental, applied and theoretical). Study skills necessary to successfully find/solve significant research problems. Finding and successful interacting with a research advisor. Ethical issues in research/collaborative work. (S/U grading only.) Effective: 2016 Fall Quarter.

ECS 293B—Research in Computer Science (1)
Lecture—1 hour. Prerequisite(s): Graduate standing in computer science; ECS 293A recommended. Pass One and Pass Two open to Graduate Students in Computer Science only. Study of PhD level research methodologies (experimental, applied and theoretical), presenting research results for the computer science community. Study skills necessary to successfully find/solve significant research problems. (S/U grading only.) Effective: 2016 Fall Quarter.

ECS 298—Group Study (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

ECS 299—Research (1-12)
Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

ECS 390—The Teaching of Computer Science (1)
Discussion—1 hour. Prerequisite(s): Meet qualifications for teaching assistant and/or associate-in in Computer Science. Pass One and Pass Two open to Graduate Students in Computer Science only. Participation as a teaching assistant or associate-in in a designated engineering course. Methods of leading discussion groups or laboratory sections, writing and grading quizzes, use of laboratory equipment, and grading laboratory reports. May be repeated for credit. (S/U grading only.) Effective: 2016 Spring Quarter.

ECS 396—Teaching Assistant Training Practicum (1-4)
Variable. Prerequisite(s): Graduate standing. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

Construction Engineering & Management Minor; Civil & Environmental Engineering

Construction Engineering & Management Minor; Civil & Environmental Engineering | Construction Engineering & Management Minor

(College of Engineering)
Amit M. Kanvinde, Ph.D., Chairperson of the Department; 530-754-9471

Department Office. 2001 Ghausi Hall; 530-752-0586; http://cee.engr.ucdavis.edu

Faculty. http://cee.engr.ucdavis.edu/people/faculty-directory/

California's construction industry continues to experience high growth as it continues to accommodate increasing population and as it faces renewal of much of the infrastructure built by previous generations. At the same time,
the construction industry faces challenges of scarce materials, a need for decreased environmental impact in terms of the construction process itself and operation of the completed project, and a more complex operational, regulatory and social context in which it must do its work.

The purpose of this minor is to better prepare professional civil and environmental engineers to thrive in this challenging industry, and to improve the efficiency of delivery and sustainability of the civil infrastructure in the state through their future efforts.

It is expected that engineering students will enroll in this minor program, including Civil, Mechanical, Chemical, and Materials Science majors. Students from other colleges can also complete this minor, but it is recommended that they review the requirements with one of the advisors before enrolling. Students who are interested in construction of infrastructure in their discipline can make use of the skills that will be learned through completion of this minor.

All courses must be taken for a letter grade. A grade of C- or better is required for all courses used to satisfy minor requirements, with an overall GPA of 2.000 or better. All prerequisites for courses must have been taken for a letter grade; no grade lower than a C- will be accepted in any prerequisite course. Students must complete ENG 106 with a C- or better.

The online Minor Declaration form is available via the Online Advising Student Information System (OASIS) at https://students.ucdavis.edu/.

Transcript notation must be requested no later than the quarter preceding graduation, and will appear as a minor in Construction Engineering and Management.

**Minor advisors.** J.L. Darby, J.T. Harvey, J.R. Lund

### Construction Engineering & Management Minor; Civil & Environmental Engineering | ECI Courses

#### Courses in ECI:

**ECI 003—Civil Infrastructure and Society (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): MAT 021A (can be concurrent) Pass One restricted to lower division students; Civil Engineering majors. Introduction to civil infrastructure and its relationship with society and the natural environment. Exposure to innovative research on civil engineering and environmental systems. Participation in laboratory experiments illustrative of the solution of representative but simplified engineering problems. Not open for credit to upper division students. GE credit: OL, SE, SS. Effective: 2016 Winter Quarter.

**ECI 016—Spatial Data Analysis (2)**
Laboratory—3 hours; Lecture—1 hour. Restricted to Civil Engineering and Biological Systems Engineering majors;
non-majors accommodated on a space-available basis. Computer-aided design and geographic information systems in civil engineering practice. GE credit: QL, SE. Effective: 2010 Spring Quarter.

ECI 019—C Programming for Civil and Environmental Engineers (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): MAT 021A (can be concurrent) Pass One open to Civil Engineering majors and Optical Science and Engineering majors. Computational problem solving techniques for Civil and Environmental Engineering applications using structured C programming. Algorithm design applied to realistic problems. GE credit: SE. Effective: 2011 Winter Quarter.

ECI 040—Introduction to Environmental Engineering (4)
Lecture—4 hours. Prerequisite(s): CHE 002B Pass One open to students in the College of Engineering. Introduction to topics in environmental engineering; discussion on influence of literary work, art, and media on the evolution of environmental engineering practice, relevant laws, and regulations; presentations of historical case studies. GE credit: AH. Effective: 2017 Winter Quarter.

ECI 090X—Lower Division Seminar (1-4)
Seminar—1-4 hours. Prerequisite(s): Consent of Instructor. Examination of a special topic in a small group setting. May be repeated for credit. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 092—Internship for Engineering (1-5)
Internship. Prerequisite(s): Lower division standing; approval of project prior to period of internship. Supervised work experience in civil engineering. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

ECI 098—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Lower division standing. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

ECI 099—Special Study for Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. Lower division standing. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

ECI 100—Introduction to Fluid Mechanics for Civil and Environmental Engineers (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ENG 035 C- or better; MAT 022B C- or better; PHY 009B C- or better Pass One restricted to Civil Engineering, Environmental Engineering and Hydrology majors. Fluid flow in civil & environmental engineering, basis for design, buoyancy, hydrostatics, gravity dams, hydraulic modeling: similarity & scaling, conservation laws, flow in bends, nozzles, pipes, pumps, turbines, complimentary lab experiments. Not open for credit to students who have taken ENG 103. GE credit: SE. Effective: 2017 Fall Quarter.

ECI 114—Probabilistic Systems Analysis for Civil Engineers (4)
Lecture—4 hours. Prerequisite(s): MAT 021C C- or better Probabilistic concepts and models in engineering. Statistical analysis of engineering experimental and field data. Introduction to stochastic processes and models of engineering systems. Not open for credit to students who have completed STA 120. GE credit: QL, SE. Effective: 2013 Fall Quarter.

ECI 115—Computer Methods in Civil & Environmental Engineering (4)
Review all entries
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): (ENG 006 or ECS 030); MAT 022B Open to Civil Engineering majors only. Presentation, implementation and application of numerical algorithms and computer models for the solution of practical problems in Civil and Environmental Engineering. GE credit: SE. Effective: 2013 Fall Quarter.

ECI 115—Computer Methods in Civil & Environmental Engineering (4)
Review all entries
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): (ENG 006 C- or better or ECS 030 C- or better or ECS 032A C- or better); MAT 022B C- or better Open to Civil Engineering majors only. Presentation, implementation and application of numerical algorithms and computer models for the solution of practical problems in Civil and Environmental Engineering. GE credit: SE. Effective: 2020 Winter Quarter.

ECI 119—Parallel Processing for Engineering Applications. (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): C programming or consent of instructor. Fundamental skills in parallel computing for engineering applications; emphasis on structured parallel programming for distributed memory parallel clusters. No credit allowed for students who have taken ECI 119B. GE credit: SE. Effective: 2005 Spring Quarter.

ECI 123—Urban Systems and Sustainability (4)
Lecture—4 hours. Prerequisite(s): Upper division standing. Systems-level approach of how to evaluate and then
modify sustainability of urban systems based on interaction with natural environments. Topics include: definition/ metrics of urban sustainability; system analyses of urban systems; enabling technology, policies, legislation; measures and modification of ecological footprints. GE credit: ACGH, DD, SE, SL, SS, WE. Effective: 2006 Fall Quarter.

ECI 125—Building Energy Performance (4)
Lecture—4 hours. Prerequisite(s): Upper division standing in Engineering. Open to students in the College of Engineering. Mechanisms of energy consumption in buildings including end uses, thermal loads, ventilation, air infiltration, thermal energy distribution, and HVAC systems; energy performance simulation; methods and strategies of energy efficiency. GE credit: SE. Effective: 2011 Winter Quarter.

ECI 130—Structural Analysis (4)
Lecture—4 hours. Prerequisite(s): ENG 104 C- or better; MAT 022A Open to Civil Engineering majors. Elastic structural analysis of determinate and indeterminate trusses, beams and frames. Plastic bending and limit analysis. GE credit: QL, SE. Effective: 2013 Fall Quarter.

ECI 131—Matrix Structural Analysis (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ENG 104 C- or better; ENG 006 Open to Engineering majors only. Matrix formulation and computer analysis of statically indeterminate structures. Stiffness and flexibility formulations for elastic structures. Finite element methods for elasticity and bending problems. GE credit: SE. Effective: 2013 Fall Quarter.

ECI 132—Structural Design: Metallic Elements (4) Review all entries
Lecture—4 hours. Prerequisite(s): ECI 130 Design of metallic beams, columns, and other members for various types of loading and boundary conditions; design of connections between members; member performance within structural systems. GE credit: SE, VL. Effective: 2013 Fall Quarter.

ECI 132—Structural Design: Metallic Elements (4) Review all entries
Lecture—4 hours. Prerequisite(s): ECI 130 C- or better Design of metallic beams, columns, and other members for various types of loading and boundary conditions; design of connections between members; member performance within structural systems. GE credit: SE, VL. Effective: 2019 Winter Quarter.

ECI 135—Structural Design: Concrete Elements (4) Review all entries
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ECI 130 Restricted to Civil Engineering, Civil Engineering/Materials Science and Engineering, and Materials Science and Engineering majors only. Strength design procedures for columns, rectangular beams, T-beams and beams of general cross-section. Building code requirements for bending, shear, axial load, combined stresses and bond. Introduction to prestressed concrete. GE credit: QL, SE. Effective: 2013 Fall Quarter.

ECI 135—Structural Design: Concrete Elements (4) Review all entries
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ECI 130 C- or better Restricted to Civil Engineering, Civil Engineering/Materials Science and Engineering, and Materials Science and Engineering majors only. Strength design procedures for columns, rectangular beams, T-beams and beams of general cross-section. Building code requirements for bending, shear, axial load, combined stresses and bond. Introduction to prestressed concrete. GE credit: QL, SE. Effective: 2019 Winter Quarter.

ECI 136—Building Design (4) Review all entries
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): (ECI 130 or ECI 131); (ECI 135 or ECI 132) Design of a building structure for a specific need under the multiple constraints of safety, serviceability, cost and aesthetics. GE credit: SE. Effective: 2017 Fall Quarter.

ECI 136—Building Design (4) Review all entries
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): (ECI 130 C- or better or ECI 131 C- or better); (ECI 135 or ECI 132) Design of a building structure for a specific need under the multiple constraints of safety, serviceability, cost and aesthetics. GE credit: SE. Effective: 2019 Winter Quarter.

ECI 137—Construction Principles and Project Management (4)
Laboratory—3 hours; Lecture—3 hours. Restricted to upper division standing in Engineering. Project management, with civil engineering construction and design applications, including project scope, schedule, resources, cost, quality, risk, and control. Construction industry overview. Interactions between planning, design, construction, operations. Construction operations analysis. Contract issues. Project management software, field trips, guest lectures. GE credit: ACGH, OL, QL, SE, SS, VL, WE. Effective: 2013 Fall Quarter.
ECI 138—Earthquake Loads on Structures (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECI 130 or ECI 131 Determination of loads on structures due to earthquakes. Methods of estimating equivalent static lateral forces; response spectrum and time history analysis. Concepts of mass, damping and stiffness for typical structures. Design for inelastic behavior. Numerical solutions and Code requirements. GE credit: SE. Effective: 2013 Fall Quarter.

ECI 138—Earthquake Loads on Structures (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECI 130 C- or better or ECI 131 C- or better Determination of loads on structures due to earthquakes. Methods of estimating equivalent static lateral forces; response spectrum and time history analysis. Concepts of mass, damping and stiffness for typical structures. Design for inelastic behavior. Numerical solutions and Code requirements. GE credit: SE. Effective: 2019 Winter Quarter.

ECI 139—Advanced Structural Mechanics (4)
Lecture—4 hours. Prerequisite(s): ENG 104 C- or better Review of stress, strain, equilibrium, compatibility, and elastic material behavior. Plane stress and plane strain problems in elasticity; energy methods. Theories for unsymmetric bending, straight and curved beams. Beams on elastic foundations; stresses in plates and shells; elastic stability. GE credit: QL, SE. Effective: 2013 Fall Quarter.

ECI 140A—Environmental Analysis of Aqueous Systems (4) Review all entries
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): CHE 002B C- or better Pass One restricted to Environmental Engineering majors. Introduction to "wet chemical" and instrumental techniques commonly used in the examination of water and wastewater and associated data analysis. Not open for credit to students who have taken ECH 140 or CHE 100. GE credit: SE. Effective: 2018 Winter Quarter.

ECI 140A—Environmental Analysis of Aqueous Systems (4) Review all entries
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): CHE 002B C- or better; ECI 040 (can be concurrent) Pass One restricted to Environmental Engineering majors. Introduction to "wet chemical" and instrumental techniques commonly used in the examination of water and wastewater and associated data analysis. Not open for credit to students who have taken ECI 140 or CHE 100. GE credit: SE. Effective: 2020 Winter Quarter.

ECI 140B—Chemical Principles for Environmental Engineers (4)
Lecture—4 hours. Prerequisite(s): CHE 002B C- or better Aqueous chemistry; equilibrium relationships; carbonate system; thermodynamics; kinetics & rate laws; precipitation, adsorption, & volatilization phenomenon; oxidation & reduction reactions; pH, pE and predominance diagrams; organic chemicals. Not open for credit to students who have taken ECI 140. GE credit: SE. Effective: 2017 Fall Quarter.

ECI 140C—Biological Principles for Environmental Engineering (4) Review all entries
Lecture—4 hours. Prerequisite(s): ECI 140A C- or better or ECI 140B C- or better Fundamental microbiology concepts for environmental engineers; provides background needed for the application of water and wastewater treatment, bioremediation, air pollution control and biotransformations in environmental engineered systems. Only two units of credit for students who have taken MIC 101 or MIC 102. GE credit: SE. Effective: 2018 Winter Quarter.

ECI 140C—Biological Principles for Environmental Engineering (4) Review all entries
Lecture—4 hours. Prerequisite(s): (ECI 140A C- or better or ECI 140B C- or better); ECI 040 Fundamental microbiology concepts for environmental engineers; provides background needed for the application of water and wastewater treatment, bioremediation, air pollution control and biotransformations in environmental engineered systems. Only two units of credit for students who have taken MIC 101 or MIC 102. GE credit: SE. Effective: 2020 Winter Quarter.

ECI 140D—Water and Wastewater Treatment System Design (4) Review all entries
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): (ENG 103 C- or better or ECI 100 C- or better); (ECI 140 C- or better or ECI 140A C- or better or ECI 140B C- or better or ECI 140C C- or better or ECI 148A C- or better) Evaluation and design of water and wastewater treatment systems. Not open for credit to students who have taken ECI 148B. GE credit: SE. Effective: 2018 Winter Quarter.

ECI 140D—Water & Wastewater Treatment System Design (4) Review all entries
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): (ENG 103 C- or better or ECI 100 C- or better); (ECI 140 C- or better or ECI 140A C- or better or ECI 140B C- or better or ECI 140C C- or better or ECI 148A C- or better); ECI 040 Evaluation and design of water and wastewater treatment systems. Not open for credit to students who have taken ECI 148B. GE credit: SE. Effective: 2020 Winter Quarter.

ECI 141—Engineering Hydraulics (3)
Lecture—3 hours. Prerequisite(s): ENG 103 C- or better or ECI 100 C- or better Nature of flow of a real fluid; flow in
pipes; open channel flow; turbomachinery; fluid forces on objects: boundary layers, lift and drag. GE credit: SE. Effective: 2018 Winter Quarter.

ECI 141L—Engineering Hydraulics Laboratory (1)
Laboratory—3 hours. Prerequisite(s): ECI 141 (can be concurrent) Open to Engineering students only. Laboratory experiments and demonstrations on flow measurements, sluice gates, hydraulic jump, flow characteristics, and centrifugal pumps. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 142—Engineering Hydrology (4)
Lecture—4 hours. Prerequisite(s): ECI 141 (can be concurrent) Restricted to students in the College of Engineering. The hydrologic cycle. Evapotranspiration, interception, depression storage and infiltration. Streamflow analysis and modeling. Flood routing through channels and reservoirs. Frequency analysis of hydrologic variables. Precipitation analysis for hydrologic design. Hydrologic design. GE credit: QL, SE. Effective: 2013 Fall Quarter.

ECI 143—Green Engineering Design and Sustainability (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Upper division standing. Restricted to upper division standing; Pass One restricted to Civil Engineering majors. Application of concepts, goals and metrics of sustainability, green engineering and industrial ecology to engineering design. Other course topics include life-cycle assessments, analysis of environmental management systems, and economics of pollution prevention and sustainability. GE credit: QL, SE, SL, SS. Effective: 2017 Winter Quarter.

ECI 144—Groundwater Systems Design (4)
Lecture—4 hours. Prerequisite(s): ECI 141 Groundwater occurrence, distribution, and movement; groundwater flow systems; radial flow to wells and aquifer testing; aquifer management; groundwater contamination; solute transport by groundwater; fate and transport of subsurface contaminants. Groundwater supply and transport modeling. GE credit: SE. Effective: 2005 Spring Quarter.

ECI 144L—Groundwater Systems Design Laboratory (1)
Laboratory—3 hours. Prerequisite(s): ECI 144 (can be concurrent); ECI 144 required concurrently. Computer modeling of groundwater flow under regional gradient, well injection/withdrawal, and natural and engineered boundary conditions. Use of Groundwater Vistas computer program. Effective: 2010 Fall Quarter.

ECI 145—Hydraulic Structure Design (4)
Discussion—1 hour; Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): ECI 141 C- or better Project-based course on the design of an integrated urban drainage system with focus on consideration of design alternatives, multiple realistic constraints, quantification of uncertainty, codes and standards, technical drawing and cost analysis. GE credit: SE. Effective: 2017 Fall Quarter.

ECI 146—Water Resources Simulation (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ENG 103 C- or better or ECI 100 C- or better Computer simulation techniques in the analysis, design and operation of surface water systems; modeling concepts and practices with application to surface runoff; water quality in rivers and streams and dispersion of contaminants in water bodies. GE credit: SE. Effective: 2018 Winter Quarter.

ECI 148A—Water Quality Management (4)
Lecture—4 hours. Prerequisite(s): CHE 002B C- or better Basic concepts of water quality measurements and regulations. Introduction to physical, biological and chemical processes in natural waters. Fundamentals of mass balances in water and wastewater treatment. GE credit: SE. Effective: 2013 Fall Quarter.

ECI 149—Air Pollution (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MAT 021D; MAT 022B; CHE 002B C- or better; (ATM 121A or ENG 103 C- or better or ECI 100 C- or better) Physical and technical aspects of air pollution. Emphasis on geophysical processes and air pollution meteorology as well as physical and chemical properties of pollutants. (Same course as ATM 149.) GE credit: QL, SE, SL. Effective: 2018 Winter Quarter.

ECI 150—Air Pollution Control System Design (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECI 149 C- or better or ATM 149 C- or better Design and evaluation of air pollution control devices and systems. GE credit: SE. Effective: 2017 Fall Quarter.

ECI 153—Deterministic Optimization and Design (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): MAT 021C; MAT 022A; Computer programming course. Operations research. Optimization techniques such as linear programming, dynamic programming, and non-linear programming. Applications in civil engineering disciplines, including multiple realistic constraints, through computer-based course projects. GE credit: QL, SE, SL. Effective: 2013 Fall Quarter.
ECI 155—Water Resources Engineering Planning (4)
Lecture—4 hours. Prerequisite(s): (ENG 106 or ECN 001A or ECN 001AV); ECI 114 Basic engineering planning concepts; role of engineering, economic, environmental and social information and analysis; institutional, political and legal aspects. Case studies and computer models illustrate the planning of water resource systems. GE credit: QL, SE, SL, SS, WE. Effective: 2018 Winter Quarter.

ECI 161—Transportation System Operations (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MAT 021C C- or better; PHY 009A C- or better Principles of transportation system operations; traffic characteristics and methods of measurement; models of transportation operations and congestion applied to urban streets and freeways. GE credit: QL, SE. Effective: 2016 Fall Quarter.

ECI 163—Energy and Environmental Aspects of Transportation (4)
Extensive Writing; Lecture—3 hours. Prerequisite(s): ECN 001A or ECN 001AV or ENG 106 Engineering, economic, and systems planning concepts. Analysis and evaluation of energy, air quality and selected environmental attributes of transportation technologies. Strategies for reducing pollution and petroleum consumption in light of institutional and political constraints. Evaluation of vehicle emission models. (Same course as ESP 163.) GE credit: SE, SL, SS, WE. Effective: 2018 Spring Quarter.

ECI 165—Transportation Policy (3)
Lecture—3 hours. Transportation and associated environmental problems confronting urban areas, and prospective technological and institutional solutions. Draws upon concepts and methods from economics, engineering, political science and environmental studies. GE credit: QL, SE, SS. Effective: 2013 Fall Quarter.

ECI 171—Soil Mechanics (4)
Lecture—4 hours. Prerequisite(s): (ENG 103 (can be concurrent) or ECI 100 (can be concurrent)); ENG 104 C- or better; ECI 171L (can be concurrent); ECI 171L required concurrently. Restricted to Civil Engineering and Environmental Engineering majors only. Soil formations, mass-volume relationships, soil classification, effective stress, soil-water-void relationships, compaction, seepage, capillarity, compressibility, consolidation, strength, states of stress and failure, lateral earth pressures, and slope stability. GE credit: SE. Effective: 2018 Spring Quarter.

ECI 171L—Soil Mechanics Laboratory (1)
Laboratory—3 hours. Prerequisite(s): ECI 171 (can be concurrent); ECI 171 required concurrently. Laboratory studies utilizing standard testing methods to determine physical, mechanical and hydraulic properties of soil and demonstration of basic principles of soil behavior. GE credit: SE. Effective: 2018 Winter Quarter.

ECI 173—Foundation Design (4)
Lecture—4 hours. Prerequisite(s): ECI 171 Foundation analysis and design, including site characterization, evaluation of shallow and deep foundation alternatives, evaluation of bearing capacity and settlements, design of retaining structures, and case-based design experiences. GE credit: SE. Effective: 2018 Winter Quarter.

ECI 175—Geotechnical Earthquake Engineering (4)
Lecture—4 hours. Prerequisite(s): ECI 171 C- or better Tectonics, faults, site response, and probabilistic ground motion prediction equations. Cyclic loading and liquefaction of soil elements and layers. Empirical procedures and field tests for evaluation of triggering and consequences, of liquefaction. GE credit: SE. Effective: 2017 Fall Quarter.

ECI 179—Pavement Engineering (4)
Discussion/Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ENG 104 C- or better Pavement types (rigid, flexible, unsurfaced, rail), their applications (roads, airfields, ports, rail) and distress mechanisms. Materials, traffic and environment characterization. Empirical and mechanistic-empirical design procedures. Maintenance, rehabilitation and reconstruction; construction quality; asphalt concrete mix design. GE credit: QL, SE, SL, VL. Effective: 2013 Fall Quarter.

ECI 189A—Selected Topics in Civil Engineering; Environmental Engineering (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Environmental Engineering. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 189B—Selected Topics in Civil Engineering; Hydraulics and Hydrologic Engineering (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Hydraulics and Hydrologic Engineering. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 189C—Selected Topics in Civil Engineering; Engineering Planning (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Engineering Planning. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.
ECI 189D—Selected Topics in Civil Engineering; Geotechnical Engineering (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Geotechnical Engineering. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 189E—Selected Topics in Civil Engineering; Structural Engineering (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Structural Engineering. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 189F—Selected Topics in Civil Engineering; Structural Mechanics (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Structural Mechanics. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 189G—Selected Topics in Civil Engineering; Transportation Engineering (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Transportation Engineering. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 189H—Selected Topics in Civil Engineering; Transportation Planning (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Transportation Planning. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 189I—Selected Topics in Civil Engineering; Water Resources Engineering (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Water Resources Engineering. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 189J—Selected Topics in Civil Engineering; Water Resources Planning (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Water Resources Planning. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 190C—Research Group Conferences in Civil and Environmental Engineering (1)
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Upper division standing in Civil and Environmental Engineering. Research group conferences. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

ECI 192—Internship in Engineering (1-5)
Internship. Prerequisite(s): Upper division standing; approval of project prior to the period of the internship. Supervised work experience in civil engineering. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

ECI 193A—Civil and Environmental Engineering Senior Design (4) Review all entries
Laboratory—2 hours; Lecture—2 hours. Prerequisite(s): (ECI 140D C- or better) or (ECI 171 C- or better, ECI 171L C- or better) or (ECI 132 C- or better or ECI 135 C- or better) or (ECI 161 C- or better or ECI 163 C- or better) or (ECI 141 C- or better, ECI 141L C- or better); and Consent of Instructor. And one ECI major depth course with a C- or better. Students must be in final year of study. Open to seniors in Civil Engineering and Environmental Engineering only; students must be in their final year of study. Culminating design experience for civil engineering and environmental engineering majors. Student teams work closely with faculty, city officials or consulting clients to propose, implement and validate a unique solution to a real-world problem. GE credit: OL, SE, WE. Effective: 2018 Winter Quarter.

ECI 193B—Civil and Environmental Engineering Senior Design (4)
Laboratory—3 hours; Lecture—1 hour. Prerequisite(s): ECI 193A Open to seniors in Civil Engineering and Environmental Engineering only. Culminating design experience for civil engineering and environmental engineering majors. Student teams work closely with faculty, city officials or consulting clients to propose, implement and validate a unique solution to a real-world problem. GE credit: OL, SE, WE. Effective: 2018 Fall Quarter.

ECI 193C—Civil and Environmental Engineering Senior Design (4)
Laboratory—2 hours; Lecture—2 hours. Prerequisite(s): (ECI 140D C- or better) or (ECI 171 C- or better, ECI 171L C- or better) or (ECI 132 C- or better or ECI 135 C- or better) or (ECI 161 C- or better or ECI 163 C- or better) or (ECI 141 C- or better, ECI 141L C- or better); and Consent of Instructor. And one other ECI major depth course with a C- or better; students must be in their final year of study. Open to seniors in Civil Engineering and Environmental Engineering only. Culminating design experience for civil engineering and environmental engineering majors. Student teams work closely with faculty, city officials or consulting clients to propose, implement and validate a unique solution to a real-world problem. GE credit: OL, SE, WE. Effective: 2018 Winter Quarter.

ECI 193D—Civil and Environmental Engineering Senior Design (4)
Laboratory—2 hours; Lecture—2 hours. Prerequisite(s): (ECI 140D C- or better) or (ECI 171 C- or better, ECI 171L C- or better) or (ECI 132 C- or better or ECI 135 C- or better) or (ECI 161 C- or better or ECI 163 C- or better) or (ECI 141 C- or better, ECI 141L C- or better); and Consent of Instructor. And one other ECI major depth course with a C- or better; students must be in their final year of study. Open to seniors in Civil Engineering and Environmental Engineering only. Culminating design experience for civil engineering and environmental engineering majors. Student teams work closely with faculty, city officials or consulting clients to propose, implement and validate a unique solution to a real-world problem. GE credit: OL, SE, WE. Effective: 2018 Fall Quarter.
ECI 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

ECI 199—Special Study for Advanced Undergraduates (1-5)
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. Special study. (P/NP grading only.) GE credit: SE. Effective: 2016 Fall Quarter.

ECI 201—Introduction to Theory of Elasticity (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ENG 104 Fundamental equations of elasticity in three dimensions; plane stress and plane strain; flexure and torsion of bars of various shapes. Introduction to variational and approximate methods. Effective: 1997 Winter Quarter.

ECI 203—Inelastic Behavior of Solids (3)
Lecture—3 hours. Prerequisite(s): ECI 201 Fundamentals of theories of plasticity, viscoelasticity and viscoplasticity for solids. Macroscopic constitutive modelling for engineering materials, e.g., metals, polymers, soils, etc., and microscopic motivation. Effective: 1997 Winter Quarter.

ECI 205—Continuum Mechanics (3)
Lecture—3 hours. Prerequisite(s): ECI 201 Tensor formulation of the field equations for continuum mechanics, including large deformation effects. Invariance and symmetry requirements. Introduction to nonlinear thermoelasticity and thermodynamics. Solution of three-dimensional problems. Selected topics. Effective: 1998 Winter Quarter.

ECI 206—Fracture Mechanics (4)
Lecture—4 hours. Prerequisite(s): ECI 201; ENG 104 Linear and nonlinear fracture mechanics, stress analysis, energy concepts, brittle fracture criteria, path independent integrals, Dugdale-Barenblatt model, general cohesive zone models, ductile fracture criteria, crack tip fields for stationary and propagating cracks, fatigue. Application of numerical methods for fracture mechanics. Effective: 2006 Winter Quarter.

ECI 211—Advanced Matrix Structural Analysis (4)
Lecture—4 hours. Prerequisite(s): ECI 131 Analysis of complex frameworks by the displacement method; treatment of tapered beams, curved beams, and beams on elastic foundations; partially rigid connections; geometric and material nonlinearities; buckling; flexibility-based formulations; FEM-software for nonlinear analysis of structures. Effective: 2003 Winter Quarter.

ECI 212A—Finite Element Procedures in Applied Mechanics (4)
Lecture—4 hours. Prerequisite(s): EAD 115 or (MAT 128A, MAT 128B (can be concurrent)) Weighted-residual and Rayleigh-Ritz methods. Weak/variational formulation and development of discrete equations using finite element approximations. Application to one- and two-dimensional problems (heat conduction). Effective: 2003 Winter Quarter.

ECI 212B—Finite Elements: Application to Linear and Non-Linear Structural Mechanics Problems (4)

ECI 213—Analysis of Structures Subjected to Dynamic Loads (4)
Lecture—4 hours. Prerequisite(s): ECI 211 (can be concurrent) Analysis of structures subjected to earthquake, wind and blast loading; distributed, consistent and lumped mass techniques; computer implementation; nonlinear response spectrum; frequency and time domain analysis; seismic protection of structures; numerical methods in linear and nonlinear structural dynamics. Effective: 2012 Fall Quarter.

ECI 214—Probabilistic Seismic Hazard Analysis and Design Ground Motions (4)
Lecture—4 hours. Probabilistic seismic hazard analysis for use in developing design spectra and for seismic risk analyses, including the development of earthquake ground motion time series for use in dynamic analyses of structures. Effective: 2016 Winter Quarter.

ECI 216—Meshfree Methods and Partition of Unity Finite Elements (4)
Lecture—4 hours. Prerequisite(s): ECI 201; ECI 212A Advanced discretization techniques such as meshfree methods and partition of unity finite elements for the Galerkin solution of boundary-value problems in solid and structural mechanics. Application of meshfree and extended finite element methods in computational fracture. Effective: 2016 Winter Quarter.
ECI 221—Theory of Plates and Introduction to Shells (3)

ECI 223—Advanced Dynamics, Signal Processing, and Smart Structures Technology (4)
Lecture—4 hours. Prerequisite(s): ECI 213; Or equivalent. Signal processing and system identification of structures under dynamic excitations; Fourier and Laplace transforms; data acquisition and sensor design fundamentals; sensor technologies/techniques for nondestructive evaluation; structural control; actuators and dampers for smart structures; piezoelectrics and acoustic emissions; micro- and nano-fabrication. Effective: 2011 Winter Quarter.

ECI 232—Advanced Topics in Concrete Structures (4)
Lecture—4 hours. Prerequisite(s): ECI 130; ECI 135; ECI 138; Graduate standing. Ductility of reinforced concrete; strength of two-way slabs; modified compression field theory. Effective: 2001 Fall Quarter.

ECI 233—Advanced Design of Steel Structures (4)
Lecture—4 hours. Prerequisite(s): (ECI 130 or ECI 131); ECI 132 Review of Load and Resistance Factor Design (LRFD); steel-plate girder design; plastic design of indeterminate systems; moment frames and bracing systems; connection design; seismic design of steel structures; vibration of flooring systems; steel-concrete composite design. Effective: 2004 Winter Quarter.

ECI 234—Prestressed Concrete (4)
Lecture—4 hours. Prerequisite(s): ECI 135; (ECI 130 or ECI 131) Survey of methods and applications; prestressing materials and systems; prestress losses; flexural design; design for shear and torsion; deflection computation and control; continuous beams and indeterminate structures; floor systems; partial prestressing; design of compression members; strut-and-tie models. Effective: 2003 Fall Quarter.

ECI 235—Cement Composites (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ENG 104 Applications of cement composites; materials selection and proportioning; component and composite properties; hydration reactions and microstructure development; mechanisms of failure; nondestructive test methods; fiber reinforcement; concrete durability; novel reinforcing materials; ferrocement; repair and retrofit technologies; applications to structural design. Effective: 2002 Fall Quarter.

ECI 236—Design of Fiber Reinforced Polymer Composite Structures (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ECI 135 Basics of mechanics and design of polymer matrix composites: composite classification, manufacturing process, micromechanical property determination, classical lamination theory, strength theories, first-ply-failure, test methods, design practice, strengthening and retrofitting of existing reinforced concrete structures. Effective: 2008 Winter Quarter.

ECI 237—Bridge Design (4)
Lecture—4 hours. Prerequisite(s): ECI 130; ECI 135; ECI 234 recommended. Open to Graduate Students only. Bridge types, behavior and construction characteristics; design philosophy, details according to Caltrans and American Association of State Highway and Transportation Officials codes, principles; seismic design and retrofit of concrete bridges; modern bridges using advanced fiber reinforced polymer composites; fieldtrip required. Effective: 2007 Fall Quarter.

ECI 238—Performance-Based Seismic Engineering (4)

ECI 240—Water Quality (4)
Lecture—4 hours. Prerequisite(s): ECI 141; ECI 142 Quality requirements for beneficial uses of water. Hydrologic cycle of quality. Hydromechanics in relation to quality of surface and groundwaters; transport and fate of waterborne pollutants. Heat budget for surface waters; predictive methods; introduction to water quality modeling. Effective: 2000 Fall Quarter.

ECI 241—Environmental Reactive Chemical Transport Modeling (4)
Lecture—4 hours. Prerequisite(s): CHE 002A or CHE 002B or ECI 149; Or equivalent. Modeling of reactive chemical transport in air and water including kinetic reactions, equilibrium reactions, and phase partitioning. Emphasis on
numerical solution schemes and programming techniques to provide deeper insight into model performance and limitations. Effective: 2014 Fall Quarter.

**ECI 242—Air Quality (4)**
Lecture—4 hours. Prerequisite(s): ENG 105; ECI 141; ECI 149; Or equivalents. Factors determining air quality. Effects of air pollutants. Physical and chemical fundamentals of atmospheric transport and reaction. Introduction to dispersion modeling. Effective: 2002 Fall Quarter.

**ECI 243A—Water and Waste Treatment (4) Review all entries**
Lecture—4 hours. Prerequisite(s): ECI 148A; Or the equivalent. Characteristics of water and airborne wastes; treatment processes and process kinetics; treatment system design. Effective: 1999 Fall Quarter.

**ECI 243A—Water and Waste Treatment (4) Review all entries**
Lecture—4 hours. Prerequisite(s): ECI 148A; Or the equivalent. Open to Graduate majors only. Characteristics of water and airborne wastes; treatment processes and process kinetics; treatment system design. Effective: 2019 Spring Quarter.

**ECI 243B—Water and Waste Treatment (4) Review all entries**
Lecture—4 hours. Prerequisite(s): ECI 243A Continuation of course 243A. Aeration, thickening, biological processes, design of biological treatment systems. Effective: 2000 Winter Quarter.

**ECI 243B—Water and Waste Treatment (4) Review all entries**
Lecture—4 hours. Prerequisite(s): ECI 243A Open to graduate majors only. Continuation of course 243A. Aeration, thickening, biological processes, design of biological treatment systems. Effective: 2019 Spring Quarter.

**ECI 243L—Pilot Plant Laboratory (4) Review all entries**
Discussion—1 hour; Laboratory—6 hours; Lecture—1 hour. Prerequisite(s): ECI 243A; ECI 243B (can be concurrent); or Consent of Instructor. Graduate standing. Laboratory investigation of physical, chemical, and biological processes for water and wastewater treatment. Effective: 2016 Winter Quarter.

**ECI 243L—Pilot Plant Laboratory (4) Review all entries**
Discussion—1 hour; Laboratory—6 hours; Lecture—1 hour. Prerequisite(s): ECI 243A; ECI 243B (can be concurrent); or Consent of Instructor. Graduate standing. Open to graduate majors only. Laboratory investigation of physical, chemical, and biological processes for water and wastewater treatment. Effective: 2019 Spring Quarter.

**ECI 244—Life Cycle Assessment for Sustainable Engineering (4) Review all entries**
Lecture—4 hours. Prerequisite(s): Graduate standing. Life cycle assessment methodology is taught emphasizing applications to infrastructure and energy systems. Life cycle design, life cycle cost methods, other tools from industrial ecology, and links to policy are covered as well. Effective: 2011 Fall Quarter.

**ECI 244—Life Cycle Assessment for Sustainable Engineering (4) Review all entries Discontinued**
Lecture—4 hours. Prerequisite(s): Graduate standing. Life cycle assessment methodology is taught emphasizing applications to infrastructure and energy systems. Life cycle design, life cycle cost methods, other tools from industrial ecology, and links to policy are covered as well. Effective: 2019 Winter Quarter.

**ECI 244A—Life Cycle Assessment for Sustainable Engineering (4)**
Lecture—4 hours. Enrollment restricted to graduate students. Life cycle assessment methodology. Emphasis on applications to infrastructure and energy systems. Life cycle design, life cycle cost methods, other tools from industrial ecology, and links to policy. Not open to students who have taken ECI 244. (Same course as EGG 201.) Effective: 2019 Winter Quarter.

**ECI 245A—Applied Environmental Chemistry: Inorganic (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ENG 105; ECI 140; CHE 002B; Or the equivalent of CHE 002B; CHE 002C or CHE 107A recommended. Chemistry of natural and polluted waters. Topics include chemical, kinetic and equilibrium principles, redox reactions, gas solution and solid-solution equilibria, thermodynamics, carbonate systems, coordination chemistry, interfacial phenomena. Effective: 2000 Spring Quarter.

**ECI 245B—Applied Environmental Chemistry: Organic (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): CHE 128A; CHE 128B; CHE 128C; Or the equivalent; CHE 002C or CHE 107A recommended. Transport and transformation of organic chemicals in the environment. Topics include application of thermodynamics to predict solubility and activity coefficients; distribution of organic chemicals between the aqueous phase and air, solvent, or solid phases; chemical, photochemical and biological transformation reactions. Effective: 2001 Spring Quarter.
ECI 246N—Understanding Climate Change: Causes and Consequences (4)
Lecture—4 hours. Open to graduate students. Diverse physical processes that govern climate and drive climate change. Observational, experimental and modeling techniques and methods used in the development of our scientific understanding of the Earth system. Effective: 2016 Spring Quarter.

ECI 247—Aerosols (4)
Lecture—4 hours. Prerequisite(s): ENG 103; ENG 105; ECI 141; ECI 149 Behavior of airborne particles including particle formation, modification, and removal processes. Effective: 2002 Fall Quarter.

ECI 247L—Aerosols Laboratory (4)
Laboratory—6 hours; Lecture—2 hours. Prerequisite(s): ECI 247 Methods of generation and characterization of aerosols. Detailed topics may include flow rate measurement, aerosol generation, aerosol collection, ions measurement, metals measurement, and carbon measurement. May be repeated up to 1 time(s). Effective: 2002 Fall Quarter.

ECI 248—Biofilm Processes (4)
Lecture—4 hours. Prerequisite(s): SSC 111 or SSC 211 or ECI 243B; or Consent of Instructor. Calculus and basic cell molecular biology are recommended. Natural and engineered biofilms, including biofilm occurrence and development, spatial structure, microbial processes, fundamental and applied research tools, biofilm reactors, beneficial uses, and detrimental effects. Effective: 2004 Spring Quarter.

ECI 249—Probabilistic Design and Optimization (4)
Lecture—4 hours. Prerequisite(s): ECI 114; ECI 153; ENG 106; Or equivalents. Design by optimization for probabilistic systems, decision theory, the value of information, probabilistic linear programming, probabilistic dynamic programming, nonlinear probabilistic optimization. Applications in civil engineering design, project evaluation, and risk management. Effective: 2004 Spring Quarter.

ECI 250—Civil Infrastructure System Optimization and Identification (4)
Lecture—4 hours. Prerequisite(s): MAT 021C; MAT 022A; Programming course; EAD 115 and mathematical modeling course recommended. Restricted to graduate standing. Applied mathematics with a focus on modeling, identifying, and controlling dynamic, stochastic, and underdetermined systems. Applications in transportation networks, water resource planning, and other civil infrastructure systems. Effective: 2005 Spring Quarter.

ECI 251—Transportation Demand Analysis (4)

ECI 252—Sustainable Transportation Technology and Policy (3) Review all entries
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): ECI 165 Role of technical fixes and demand management in creating a sustainable transportation system. Emphasis on technology options, including alternative fuels, electric propulsion, and IVHS. Analysis of market demand and travel behavior, environmental impacts, economics and politics. (Same course as ESP 252.) Effective: 2000 Fall Quarter.

ECI 252—Sustainable Transportation Technology and Policy (3) Review all entries Discontinued
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): ECI 165 Role of technical fixes and demand management in creating a sustainable transportation system. Emphasis on technology options, including alternative fuels, electric propulsion, and IVHS. Analysis of market demand and travel behavior, environmental impacts, economics and politics. (Same course as ESP 252.) Effective: 2018 Fall Quarter.

ECI 253—Dynamic Programming and Multistage Decision Processes (4)
Lecture—4 hours. Prerequisite(s): MAT 021C; MAT 022A; Programming course; EAD 115 recommended. Operations research. Optimization techniques with a focus on dynamic programming in treating deterministic, stochastic, and adaptive multistage decision processes. Brief review of linear programming and non-linear programming. Applications in transportation networks and other civil infrastructure systems. Effective: 2005 Spring Quarter.

ECI 254—Exploring Data from Built Environment Using R (4)
Laboratory—3 hours; Lecture—3 hours. Introduction to modern data science, specifically data acquisition, exploratory data analysis, visualization, and beginning data analysis using R. Emphasizes computational reasoning and working with tabular and non-standard data. Focus will be on data generated in the built environment. (Same course as GEO 279.) Effective: 2017 Fall Quarter.
ECI 256—Urban Traffic Management and Control (4)
Lecture—4 hours. Prerequisite(s): ECI 114; Basic concepts, models, and methods related to the branch of traffic science that deals with the movement of vehicles on a road network, including travel speed, travel time, congestion concepts, car-following and hydrodynamic traffic models. Effective: 2000 Fall Quarter.

ECI 257—Flow in Transportation Networks (4)
Lecture—4 hours. Prerequisite(s): ECI 153; ECI 161 or ECI 256 recommended. Elements of graph theory, a survey of pertinent optimization techniques, extremal principles in network flow problems, deterministic equilibrium assignment, stochastic equilibrium assignment, extensions of equilibrium assignments and dynamic transportation network assignment. Effective: 2000 Winter Quarter.

ECI 259—Asphalt and Asphalt Mixes (4)
Lecture—4 hours. Prerequisite(s): ECI 179; or Consent of Instructor. Asphalts and asphalt mix types and their use in civil engineering structures, with primary emphasis on pavements. Asphalt, aggregate properties and effects on mix properties. Design, construction, recycling. Recent developments and research. Effective: 2006 Winter Quarter.

ECI 260—Sediment Transport (4)
Lecture—4 hours. Prerequisite(s): ECI 141; Or equivalent. Sediment transport in hydrologic systems. Process-oriented course which will emphasize how sediment moves and the physical processes that affect sediment transport. Field trip. Effective: 2006 Winter Quarter.

ECI 261—Cohesive Particle Transportation (3) Review all entries Discontinued

ECI 261—Colloids in Soil and Water (4) Review all entries
Lecture—4 hours. Prerequisite(s): CHE 002B; (ENG 103 or ECI 100); Upper division or graduate standing. Pass One restricted to graduate standing; Pass Two restricted to upper division standing or graduate standing. Colloid occurrence, properties, behavior in different environments, and transport mechanisms in water and soils. Emphasis on their role in water contamination. Effective: 2018 Fall Quarter.

ECI 264A—Transport, Mixing and Water Quality in River and Lakes (4)
Lecture—4 hours. Prerequisite(s): ECI 141; ECI 240; Principal causes of mixing and transport in rivers, lakes and reservoirs, and their impacts on water quality. Case studies of specific lakes and rivers. Effective: 2000 Fall Quarter.

ECI 264B—Transport, Mixing and Water Quality in Estuaries and Wetlands (4)
Lecture—4 hours. Prerequisite(s): ECI 141; ECI 240; Principal causes of mixing and transport in estuaries and wetlands, and their impacts on water quality. Topics include advection/diffusion; tides; transverse mixing; longitudinal dispersion; sediment transport; nutrient cycling; computer modeling of estuaries. Case studies of specific systems. Effective: 2000 Spring Quarter.

ECI 265—Stochastic Hydrology and Hydraulics (4)
Lecture—4 hours. Prerequisite(s): ECI 266; or Consent of Instructor. Physics-based stochastic methods in modeling hydrologic and hydraulic processes; theory for modeling hydrologic-hydraulic governing equations as stochastic partial differential equations applied to various hydrologic-hydraulic processes under uncertainty, including transport, open channel flow, overland flow, soil water flow, and groundwater. Effective: 2015 Winter Quarter.

ECI 266—Applied Stochastic Methods in Engineering (4)
Lecture—4 hours. Prerequisite(s): ECI 114 or MAT 131 or STA 130A or STA 131A or MAT 118A (can be concurrent) Stochastic processes classification; Gaussian random fields; stochastic calculus in mean square; Ito and Stratonovich stochastic differential equations; Fokker-Planck equation; stochastic differential equations with random coefficients. Effective: 1999 Fall Quarter.

ECI 267—Water Resource Management (3)
Lecture—3 hours. Prerequisite(s): ECI 114; ECI 141; ECI 142; ECI 153 recommended. Engineering, institutional, economic, and social basis for managing local and regional water resources. Examples in the context of California's water development and management. Uses of computer modeling to improve water management. (Same course as GEO 212.) Effective: 2013 Fall Quarter.

ECI 268—Infrastructure Economics (3)
Lecture—3 hours. Prerequisite(s): (ECN 001A or ECN 001AV); ENG 106; Or the equivalent. Economics applied to infrastructure engineering planning, operations, maintenance, and management problems; microeconomic and macroeconomic theories; benefit-cost analysis; effect of uncertainty; optimization economics; non-classical economics; public finance. Effective: 2018 Spring Quarter.
ECI 269—Transportation-Air Quality: Theory and Practice (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ECI 149; Or the equivalent. Health and regulatory aspects of airborne pollutants. Principles of modeling vehicle emissions. Conformity issues and the regulatory framework. Regional and micro-scale modeling. Effective: 1999 Fall Quarter.

ECI 270—Advanced Water Resources Management (3)
Lecture—3 hours. Prerequisite(s): ECI 153; ECI 267; Or the equivalent. Discussion of technical papers related to planning theory, system maintenance, regionalization, multi-objective methods, risk analysis, institutional issues, pricing model application, economic development, forecasting, operations, and other topics. Effective: 1997 Winter Quarter.

ECI 271—Inverse Problems (4)
Lecture—4 hours. Prerequisite(s): ECI 114; ECI 144; Or equivalents. Inverse calibration of distributed parameter models, using data representing model outputs. Forward and inverse mappings, stability, uniqueness, identifiability. Optimization formulation of inverse problems, maximum likelihood and other objective functions, indirect and direct approaches, solution by UCODE in hands-on project format. Effective: 2010 Fall Quarter.

ECI 272A—Advanced Hydrogeology (4)

ECI 272B—Advanced Hydrogeology (4)

ECI 272C—Multiphase Reactive Transport (4)
Lecture—4 hours. Prerequisite(s): ECI 142; ECI 144; ECI 148A Multicomponent reactive transport including multiple phases. Advective/dispersive transport, chemical equilibria, and mass transformation kinetics. Natural chemical/microbiological processes including sorption, complexation, biodegradation, and diffusive mass transfer. Eulerian and Lagrangean averaging methods. Applications to contaminant remediation problems in river and subsurface hydrology. Effective: 2004 Fall Quarter.

ECI 273—Water Resources Systems Engineering (4)
Lecture—4 hours. Prerequisite(s): ECI 114; ECI 153; Or the equivalent. Planning and management of water resource systems. Deterministic and stochastic simulation and optimization techniques. Capacity design and operation of reservoir systems for water supply, hydropower, flood control, and environmental objectives. Effective: 2018 Winter Quarter.

ECI 275—Hydrologic Time-Series Analysis (4)
Lecture—4 hours. Prerequisite(s): ECI 114; ECI 142 Application of statistical methods for analysis and modeling of hydrologic series. Statistical simulation and prediction of hydrologic sequences using time series methodology. Effective: 2003 Fall Quarter.

ECI 276—Watershed Hydrology (4)

ECI 277A—Computational River Mechanics I (4)
Lecture—4 hours. Prerequisite(s): EAD 115 (can be concurrent); ECI 141 (can be concurrent) Unsteady open channel flows, computation of water surface profiles, shallow water equations, St. Venant equations, method of characteristics, finite difference methods, stability and accuracy of explicit and implicit schemes, flood routing in simple and compound channels, advection of plumes. Not open for credit to students who have taken ECI 277. Effective: 2004 Fall Quarter.

ECI 277B—Computational River Mechanics II (4)
Lecture—4 hours. Prerequisite(s): ECI 277A Open channel flows, physical aspects of river mechanics, formulation of depth-averaged equations, boundary conditions, coordinates transformation and grid generation, finite-difference
solution techniques, applications to two-dimensional momentum and pollutant transport in rivers. Effective: 2004 Fall Quarter.

**ECI 277C—Turbulence and Mixing Processes (4)**
Lecture—4 hours. Prerequisite(s): Graduate standing. Nature of turbulent flows, conservation equations, momentum, heat and mass transport in free and wall-bounded flows, body forces and mixing, roughness effects, turbulence modeling and simulation. Effective: 2004 Fall Quarter.

**ECI 278—Hydrodynamics (3)**

**ECI 279—Advanced Mechanics of Fluids (4)**

**ECI 280A—Nonlinear Finite Elements for Elastic-Plastic Problems (4)**
Lecture—4 hours. Prerequisite(s): Consent of Instructor. State of the art finite element methods and tools for elastic-plastic problems, including computational techniques based on the finite element method and the theory of elastoplasticity. Effective: 2008 Spring Quarter.

**ECI 280B—Nonlinear Dynamic Finite Elements (4)**
Lecture—4 hours. Prerequisite(s): Consent of Instructor. State of the art computational methods and tools for analyzing linear and nonlinear dynamics problems. Effective: 2009 Spring Quarter.

**ECI 281A—Advanced Soil Mechanics (4)**

**ECI 281B—Advanced Soil Mechanics (5)**
Laboratory—3 hours; Lecture—4 hours. Prerequisite(s): ECI 281A Site investigation and soil characterization within the context of slope stability analysis. Effective: 2014 Spring Quarter.

**ECI 282—Pavement Design and Rehabilitation (4)**
Lecture—4 hours. Prerequisite(s): ECI 179; or Consent of Instructor. Advanced pavement design and structural/functional condition evaluation for concrete and asphalt pavements. Highways, airfields, port facilities; new facilities, rehabilitation, reconstruction. Mechanistic-empirical procedures, materials, climate and traffic characterization. Use of current design methods; recent developments and research. Effective: 2004 Winter Quarter.

**ECI 283—Physico-Chemical Aspects of Soil Behavior (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ECI 171 Study of the geotechnical behavior of soils considering formation, transport, mineralogy, soil-fluid-electrolyte systems, surface tension, particle mechanics, shape, fabric, and structure. Laboratories demonstrate effects of fundamental interparticle forces (contact, Van Der Waals, capillarity and chemical). Effective: 2012 Fall Quarter.

**ECI 284—Theoretical Geomechanics (4)**

**ECI 286—Advanced Foundation Design (4)**
Lecture—4 hours. Prerequisite(s): ECI 173 Design and analysis of pile and pier foundations, including seismic effects; deep excavation systems; tie-back, nailing, and anchor systems; coffer dams; loads on buried conduits; ground modification techniques; and other related topics. Effective: 2004 Spring Quarter.

**ECI 287—Geotechnical Earthquake Engineering (4)**
Lecture—4 hours. Prerequisite(s): ECI 138; ECI 281A Characteristics and estimation of earthquake ground motions; wave propagation and local site response; liquefaction potential and remediation; residual strength and stability considerations; ground deformations; dynamic soil-structure interaction. Effective: 2004 Spring Quarter.
ECI 288—Earth and Rockfill Dams (4)
Lecture—4 hours. Prerequisite(s): ECI 281A; ECI 281B (can be concurrent) Site selection; design considerations; layout; seismic effects including considerations of fault movements; construction; environmental considerations, instrumentation; maintenance remediation and retrofit of existing dams. Effective: 2004 Winter Quarter.

ECI 289A—Selected Topics in Civil Engineering; Environmental Engineering (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Environmental Engineering. May be repeated for credit. Effective: 1997 Winter Quarter.

ECI 289B—Selected Topics in Civil Engineering; Hydraulics and Hydrologic Engineering (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Hydraulics and Hydrologic Engineering. May be repeated for credit. Effective: 1997 Winter Quarter.

ECI 289C—Selected Topics in Civil Engineering; Engineering Planning (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Engineering Planning. May be repeated for credit. Effective: 1997 Winter Quarter.

ECI 289D—Selected Topics in Civil Engineering; Geotechnical Engineering (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Geotechnical Engineering. May be repeated for credit. Effective: 1997 Winter Quarter.

ECI 289E—Selected Topics in Civil Engineering; Structural Engineering (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Structural Engineering. May be repeated for credit. Effective: 1997 Winter Quarter.

ECI 289F—Selected Topics in Civil Engineering; Structural Mechanics (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Structural Mechanics. May be repeated for credit. Effective: 1997 Winter Quarter.

ECI 289G—Selected Topics in Civil Engineering; Transportation Engineering (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Transportation Engineering. May be repeated for credit. Effective: 1997 Winter Quarter.

ECI 289H—Selected Topics in Civil Engineering; Transportation Planning (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Transportation Planning. May be repeated for credit. Effective: 1997 Winter Quarter.

ECI 289I—Selected Topics in Civil Engineering; Water Resources Engineering (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Directed group study in Water Resources Engineering. May be repeated for credit. Effective: 1997 Winter Quarter.

ECI 290—Seminar (1)
Seminar—1 hour. Discussion of current graduate research, and guest lectures on recent advances. Oral presentation of individual study. Course required of graduate degree candidates. (S/U grading only.) Effective: 1997 Winter Quarter.

ECI 290C—Graduate Research Group Conference (1)
Discussion—1 hour. Research problems, progress, and techniques in civil engineering. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

ECI 296—Topics in Water and Environmental Engineering (1)
Seminar—2 hours. Seminars presented by visiting lecturers, UC Davis faculty and, graduate students. May be repeated for credit. (S/U grading only.) Effective: 2000 Winter Quarter.

ECI 298—Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

ECI 299—Research (1-12)
Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

ECI 390—The Teaching of Civil Engineering (1)
Discussion—1 hour. Prerequisite(s): Meet qualifications for teaching assistant and/or associate-in in Civil Engineering. Participation as teaching assistant or associate-in in a designated engineering course. Methods of leading discussion groups or laboratory sections, writing and grading quizzes, use of laboratory equipment, and grading laboratory reports. May be repeated up to 9 unit(s). (S/U grading only.) Effective: 1997 Winter Quarter.
Consumer Science

Consumer Science | Consumer Science Information
(College of Agricultural and Environmental Sciences)
Faculty. http://foodscience.ucdavis.edu/people/faculty/
Graduate Study. See Graduate Studies.

Consumer Science | CNS Courses
Questions pertaining to the following courses should be directed to the Food Science Advising office in 1204 RMI South.

Courses in CNS:

CNS 092—Internship in Consumer Science (1-12)
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Internship on and off campus in a consumer science related area. (P/NP grading only.) Effective: 1997 Winter Quarter.

CNS 100—Consumer Behavior (3)
Lecture—3 hours. Prerequisite(s): Preparation in areas of psychology or sociology and economics recommended. Provides a set of behavioral concepts and theories useful in understanding consumer behavior on the part of the individual, business, and social organizations. Conceptual models to help guide and understand consumer research will be presented. GE credit: SS, WE. Effective: 1997 Winter Quarter.

CNS 192—Internship in Consumer Science (1-12)
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Completion of a minimum of 84 units. Internship on and off campus in a consumer science related area (P/NP grading only.) Effective: 1997 Winter Quarter.

CNS 198—Directed Group Study (1-5)
(P/NP grading only.) Effective: 1997 Winter Quarter.

CNS 199—Special Study for Advanced Undergraduates (1-5)
Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

CNS 299—Research (1-12)
Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

CNS 396—Teaching Assistant Training Practicum (1-4)
Variable. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

Contemporary Leadership Minor; Science & Society

Contemporary Leadership Minor; Science & Society | Contemporary Leadership Minor
(College of Agricultural and Environmental Sciences)
Science and Society Program. https://sas.ucdavis.edu/
Program Office. 160 Hutchison Hall; 530-754-7277

The Science and Society Program offers a minor in Contemporary Leadership, open to all undergraduate students regardless of major. The minor provides a broad overview of leadership theory and practice, and engages students in critical thinking, self-reflection, problem solving and multicultural education. Students should contact the minor advisor for course selection and plan approval.

Consult advisors often to insure timely enrollment in SAS 192 and 190X only offered in spring quarter once a year.

Minor Advisor. The list of appropriate courses may change over time. To request an advising appointment, consult Elvira Galvan Hack in Science and Society (Plant Pathology) at eghack@ucdavis.edu.

Contemporary Leadership

Core Leadership Courses
SAS 130 Contemporary Leadership 4

Units: 24
SAS 192 Internship in Science and Society 1-12
SAS 192 must be taken concurrently with an approved internship for 2 units.
SAS 190X Science & Society Seminar 1-4
2 units of SAS 190X is required.

Preparatory Subject Matter 16

Students are required to complete four units from each of the following four categories.
All courses are four units except where noted:

Ethics and Values:

<table>
<thead>
<tr>
<th>Course</th>

Critical Theory

Critical Theory | Critical Theory Information

Jeff Fort, Ph.D., Chairperson of the Program

Program Office. 207 Sproul Hall; 530-752-2115; http://crittheory.ucdavis.edu

Faculty. http://crittheory.ucdavis.edu/people

Graduate Study. The program in Critical Theory offers study and research leading to the Ph.D. with a designated emphasis in Critical Theory. The program provides theoretical emphasis and interdisciplinary perspective to students already preparing for the Ph.D. in one of 14 participating graduate programs (Anthropology, Comparative Literature, Cultural Studies, Education, English, French, German, History, Music, Psychology, Sociology, Spanish, Study of Religion, and Performance Studies). Students complete all requirements for the Ph.D., including the dissertation, in one of the participating departments. Minimum coursework for the Critical Theory Designated Emphasis consists of four courses. The first three of these, CRI 200A, 200B, and 200C are taught by affiliated faculty, with 200A normally being taken first. For the fourth course, students have the option of taking another section of CRI 200B or an approved course from any affiliated department.

Graduate Advisor. Consult Critical Theory Program office.

Critical Theory | CRI Courses

Courses in CRI:

CRI 101—Introduction to Critical Theoretical Approaches to Literature and Culture (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR). Introduction to critical theory and its use for interpreting literary texts, film, and media forms in our present global culture. (Same course as COM 141.) GE credit: AH, WC, WE. Effective: 2016 Fall Quarter.

CRI 200A—Approaches to Critical Theory (4)
Seminar—3 hours; Term Paper. Restricted to Graduate students. Critical overview of modern theoretical texts (e.g., semiotics, hermeneutics, deconstruction, social and cultural critique, feminist theory, psychoanalysis). Effective: 2016 Spring Quarter.

CRI 200B—Problems in Critical Theory (4)
Seminar—3 hours; Term Paper. Restricted to Graduate students. Focused study of a particular critical theoretical approach, school or perspective. Topics may include but are not limited to: critical approaches to the study of literature, culture, film, historiography, visual culture, the body, and aesthetics. May be repeated for credit when topic differs and with consent of instructor. Effective: 2016 Spring Quarter.

CRI 200C—History of Critical Theory (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate student standing. Restricted to Graduate students. Critical analysis and discussion of pre-twentieth century theories of literary and cultural criticism. Topics may include but are not limited to: ancient and early modern philosophy; nature and culture in the Renaissance; theories of Mimesis from antiquity to the Renaissance. May be repeated for credit when topic differs and with consent of instructor. Effective: 2016 Spring Quarter.

CRI 201—Critical Theory Special Topics (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate student standing. Application of theoretical principles to one specific research topic. May be repeated for credit with consent of instructor when topic differs. Effective: 2016 Spring Quarter.
CRI 202—Visual Culture (4)
Lecture/Discussion—4 hours. Restricted to Graduate student standing. Analysis of image production in the contemporary world (photography, film, television, advertising, etc.) and their effects on individual subjectivities and collective social identities. Effective: 2016 Spring Quarter.

CRI 298—Directed Group Study (1-5)
Seminar—3 hours. Prerequisite(s): Consent of Instructor. Restricted to Graduate student standing. Effective: 2016 Spring Quarter.

CRI 299—Individual Study (1-12)
Variable—3-36 hours. Prerequisite(s): Consent of Instructor. Graduate student standing. (S/U grading only.) Effective: 2016 Spring Quarter.

Cultural Studies (Graduate Group)

Cultural Studies (Graduate Group) | CST Information
Wendy Ho, Ph.D., Graduate Group Chair
Group Office. 3129 Hart Hall; 530-754-9765; https://culturalstudies.ucdavis.edu/

Cultural Studies (Graduate Group) | CST M.A.
Wendy Ho, Ph.D., Graduate Group Chair
Group Office. 3129 Hart Hall; 530-754-9765; https://culturalstudies.ucdavis.edu/

Graduate Study. The Graduate Group in Cultural Studies at UC Davis offers an interdisciplinary approach to the study of culture and society that highlights how sexuality, race, ability, citizenship, gender, nationality, class and language organize embodied identities, social relations and cultural objects. With the close guidance and supervision of a faculty committee, students in the program pursue interdisciplinary research in areas including studies of comparative and critical race, ecocriticism, fashion, queer theory, media and popular cultural representation, science and technology, Marxist theory, travel and tourism, food, physical and cognitive abilities, cultural geography, transnational culture and politics, globalization, religion, rhetoric, performance, and critical theory. Although both the Ph.D. and M.A. are offered, applications are only accepted for the Ph.D. program, and the M.A. is available as a terminal degree en route to the Ph.D.

Preparation. Normal preparation for the program is a bachelor's degree in a related field. Terminal M.A. students must pass an examination. Ph.D. students must pass a qualifying examination, a comprehensive examination, and complete a dissertation demonstrating original research in an area approved by the Graduate Group. In addition to the standard UC Davis graduate application (which requires a statement of purpose), we also require three letters of recommendation, transcripts, GRE scores, writing sample (ten-page minimum, not exceeding twenty pages), and a fellowship application.

The Master of Art degree is offered as a terminal degree in route to the Ph.D.. Applicants may only apply for the Ph.D. program.

Graduate Advisors. Omnia El Shakry (History), Elizabeth Freeman (English), Cristiana Giordano (Anthropology), Wendy Ho (Asian American Studies & Gender, Sexuality, and Women's Studies), Caren Kaplan (American Studies), Sudipta Sen (History), Robyn Rodriguez (Asian American Studies)

Cultural Studies (Graduate Group) | CST Ph.D.
Wendy Ho, Ph.D., Graduate Group Chair
Group Office. 3129 Hart Hall; 530-754-9765; https://culturalstudies.ucdavis.edu/
Graduate Study. The Graduate Group in Cultural Studies at UC Davis offers an interdisciplinary approach to the study of culture and society that highlights how sexuality, race, ability, citizenship, gender, nationality, class and language organize embodied identities, social relations and cultural objects. With the close guidance and supervision of a faculty committee, students in the program pursue interdisciplinary research in areas including studies of comparative and critical race, ecocriticism, fashion, queer theory, media and popular cultural representation, science and technology, Marxist theory, travel and tourism, food, physical and cognitive abilities, cultural geography, transnational culture and politics, globalization, religion, rhetoric, performance, and critical theory. Although both the Ph.D. and M.A. are offered, applications are only accepted for the Ph.D. program, and the M.A. is available as a terminal degree in route to the Ph.D.

Preparation. Normal preparation for the program is a bachelor's degree in a related field. Terminal M.A. students must pass an examination. Ph.D. students must pass a qualifying examination, a comprehensive examination, and complete a dissertation demonstrating original research in an area approved by the Graduate Group. In addition to the standard UC Davis graduate application (which requires a statement of purpose), we also require three letters of recommendation, transcripts, GRE scores, writing sample (ten-page minimum, not exceeding twenty pages), and a fellowship application.

Graduate Advisors. Omnia El Shakry (History), Elizabeth Freeman (English), Cristiana Giordano (Anthropology), Wendy Ho (Asian American Studies & Gender, Sexuality, and Women’s Studies), Caren Kaplan (American Studies), Sudipta Sen (History), Robyn Rodriguez (Asian American Studies)

Cultural Studies (Graduate Group) | CST Courses

Courses in CST:

CST 200A—Histories of Cultural Studies (4)
Lecture/Discussion—4 hours. Prerequisite(s): Graduate standing or consent of instructor required. Undergraduate coursework in the humanities or social sciences recommended. Histories and traditions of cultural studies internationally; multiple legacies of cultural studies as a field of inquiry in various geographical contexts; foregrounds important critical perspectives resulting from social and intellectual movements world-wide. Effective: 2000 Fall Quarter.

CST 200B—Theories of Cultural Studies (4)
Lecture/Discussion—4 hours. Prerequisite(s): CST 200A; or Consent of Instructor. Definitions of "critical" scholarship and examination of various contexts in which cultural studies theory has emerged worldwide. Both mainstream and alternative theoretical traditions, such as those developed by people of color and by other minoritized groups. Effective: 2000 Fall Quarter.

CST 200C—Practices of Cultural Studies (4)
Lecture/Discussion—4 hours. Prerequisite(s): CST 200A; CST 200B; or Consent of Instructor. Methodological and practical applications of cultural studies research. Critical analyses of ethnography, textual analysis, social change, community development, and identity formation. Emphasis given to students' unique versions of cultural studies practices. Effective: 2000 Fall Quarter.

CST 204—History and Theory of Sexualities (4)
Lecture/Discussion—4 hours. Prerequisite(s): CST 200A (can be concurrent); or Consent of Instructor. Studies of sexuality in feminist, literary, historical, and cultural studies research, specifically examining the emergence of "sexuality" as a field of research and the relationship of sexuality studies to cultural forms, subjectivity, and social relations generally. May be repeated up to 2 time(s). Effective: 2014 Spring Quarter.

CST 206—Studies in Race Theory (4)
Lecture/Discussion—4 hours. Prerequisite(s): CST 200A (can be concurrent); or Consent of Instructor. Theoretical framework for the critical study of race, drawing on contemporary cultural studies and postcolonial scholarship in order to understand the social production of "race" as a category for organizing social groups and determining group processes. Effective: 2000 Fall Quarter.

CST 208—Studies in Nationalism, Transnationalism, and Late Capitalism (4)
Lecture/Discussion—4 hours. Prerequisite(s): CST 200A (can be concurrent); or Consent of Instructor. Contemporary theories of nation, nationalism, postcolonialism, and transnationalism. Specific attention to the relationship between cultural production and the formation of ideas about nation and nationalism, including examination of both "legitimizing" and resistant discourses. Effective: 2000 Fall Quarter.
CST 210—Memory, Culture, and Human Rights (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Restricted to graduate students. Explores the multiple convergences among memory, culture, and human rights. Discusses diverse approaches to how societal actors in different historical, cultural, and national settings, construct meanings of past political violence, inter-group conflicts, and human rights struggles. (Same course as HMR 200B.) Effective: 2013 Fall Quarter.

CST 212—Studies in the Rhetorics of Culture (4)
Lecture/Discussion—4 hours. Prerequisite(s): CST 200A (can be concurrent); or Consent of Instructor. Survey of critical and analytical approaches to the study of texts. Examination of multi-mediated objects to understand their cultural import by focusing on discursive production, dispersal, and reception processes, and related shifts in power relations. Effective: 2000 Fall Quarter.

CST 214—Studies in Political and Cultural Representations (4)
Lecture/Discussion—4 hours. Prerequisite(s): CST 200A (can be concurrent); Consent of graduate advisor required. Framework for the analysis of political and popular cultural representations. Emphasis on concepts, theories, and methodologies illuminating dominant and vernacular cultural representation, appropriation, and innovation in transnational contexts. May be repeated up to 4 time(s) when topic differs. Effective: 2003 Fall Quarter.

CST 250—Research Seminar (4)
Seminar—4 hours. Prerequisite(s): CST 200A; CST 200B; CST 200C; or Consent of Instructor. Designed to facilitate student interaction and promote student research by guiding students through the production of a publishable essay. Essays submitted, distributed, and discussed by seminar participants. May be repeated up to 12 unit(s). Effective: 2000 Fall Quarter.

CST 270A—Individually Guided Research in Cultural Studies (4)
Discussion—1 hour; Extensive Writing; Independent Study—2 hours. Prerequisite(s): CST 200C; CST 250; and Consent of Instructor. Individually guided research, under the supervision of a faculty member, on a Cultural Studies topic related to the student's proposed dissertation project to produce a dissertation prospectus. Effective: 2003 Fall Quarter.

CST 270B—Individually Guided Research in Cultural Studies (4)
Discussion—1 hour; Extensive Writing; Independent Study—2 hours. Prerequisite(s): CST 200C; CST 250; and Consent of Instructor. Individually guided research, under the supervision of a faculty member, on a Cultural Studies topic related to the student's proposed dissertation project to produce a dissertation prospectus. Effective: 2003 Fall Quarter.

CST 270C—Individually Guided Research in Cultural Studies (4)
Discussion—1 hour; Extensive Writing; Independent Study—2 hours. Prerequisite(s): CST 200C; CST 250; and Consent of Instructor. Individually guided research, under the supervision of a faculty member, on a Cultural Studies topic related to the student's proposed dissertation project to produce a dissertation prospectus. Effective: 2003 Fall Quarter.

CST 290—Colloquium (1)
Lecture—1 hour. Prerequisite(s): Graduate standing or consent of instructor. Designed to provide cohort identity and faculty student exchange. Opportunity to present papers, hear guest lecturers, and see faculty presentations, gather for organizational and administrative news, exchange information, and make announcements. May be repeated up to 12 unit(s). (S/U grading only.) Effective: 2000 Fall Quarter.

CST 295—Special Topics (4)
Lecture/Discussion—4 hours. Prerequisite(s): Graduate standing or consent of instructor. Special topics courses offered according to faculty and student interests and demands. May be repeated for credit with consent of advisor. Effective: 2000 Fall Quarter.

CST 298—Group Research (1-5)
May be repeated for credit. (S/U grading only.) Effective: 2002 Spring Quarter.

CST 299—Directed Research (1-5)
May be repeated for credit. (S/U grading only.) Effective: 2002 Spring Quarter.

CST 299D—Dissertation Research (1-12)
Independent Study—3-36 hours. Prerequisite(s): Advancement to doctoral candidacy. May be repeated for credit. (S/U grading only.) Effective: 2004 Winter Quarter.
CST 396—Teaching Assistant Training Practicum (1-4)
Variable—3-12 hours. Prerequisite(s): Graduate standing. May be repeated for credit. (S/U grading only.) Effective: 2004 Winter Quarter.

The Major Program

The Department of Design offers a creative, challenging, and flexible approach to the study of design with emphasis on socially responsible, human centered, and sustainable practice.

The Program. Foundation courses: Design and Visual Culture; Design Drawing, Form and Color, and Graphic Design and Computer Technology; are required of all design majors. One additional course in the student’s area of interest is required for Preparatory Subject Matter. Depth Subject Matter courses provide: (1) further exploration of design principles and conceptual, formal and technical issues; (2) conceptual and critical development through a series of history and theory classes; (3) in-depth studio experience with projects that demonstrate a research-based, iterative design process. Optional capstone class. A more detailed explanation is available through the Design Advising office in 101 Art Building; 530-752-0890.

Portfolios. Portfolios are not required for admission to the major. However, it is highly recommended that design students maintain an updated portfolio of visual work for faculty and professional evaluation and consideration for enrollment in specialized courses, including independent study, group study and internship.

Internships, Careers, and Study Abroad. Design students are encouraged to supplement their coursework with internships in design firms, museums, and design related businesses. Design graduates go directly from this program into further graduate study, or professional work including exhibition, fashion, information, interior architecture and product (lighting and furniture), textiles, visual communications (digital, environmental and print) and sustainable design. In addition, students have become entrepreneurs through freelance and commissioned work in many related areas. The Department of Design encourages students to experience design education abroad through a variety of sponsored programs.

DES 160  Textile Surface Design: Patterns and Resists  
DES 161  Textile Surface Design: Screen and Digital Printing  
DES 170  Experimental Fashion & Textile Design  
DES 171  Fashion Drawing: Technical and Illustration  
DES 177  Computer-Assisted Fashion Design  
DES 180A  Advanced Interior Design: Institutional Spaces  
DES 185  Exhibition Design  
DES 186  Environmental Graphic Design  

One from the following approved list may count:
  AHI 110A (Nonexistent)  
  ART 113  Interdisciplinary Art  
  ART 114A  Intermediate Video: Animation  
  CHI 172  Chicana/o Voice/Poster Silk Screen Workshop  
  DRA 124A  Principles of Theatrical Design: Scenery  
  DRA 124B  Principles of Theatrical Design: Scenery  
  DRA 124C  Principles of Theatrical Design: Lighting  
  DRA 124D  Principles of Theatrical Design: Costume  
  DRA 124E  Costume Design for Film  
  DRA 128  Principles of Theatre Sound  
  DRA 130  Approaches to Theatrical Design: Practice and Theory  
  DRA 170  Media Theatre  
  TCS 100  Experimental Digital Cinema I (Discontinued)  
  TCS 104  Documentary Production  
  TCS 125  Advanced Sound: Performance and Improvisation (Discontinued)  
  TCS 131  Character Animation (Discontinued)  
  TXC 163  Textile Coloration and Finishing  
  TXC 163L  Textile Coloration and Finishing Laboratory  
  LDA 141  Community Participation and Design  

List C:  

Capstone Course Option; these courses are the most advanced in the major and prerequisites are strictly enforced:
  DES 154  Visual Communication: Message Campaign Design  
  DES 157  Interactive Media II  
  DES 159  Design for Understanding

Graduate Study. The graduate program in Design leading to the Master of Fine Arts.

The UC Davis Master of Fine Arts (MFA) in Design unites theory and practice. This two-year program encourages an interdisciplinary approach with emphases on socially responsible, human-centered, and sustainable design practice. Students collaborate with outstanding faculty within the department, and the greater University, whose work covers a broad array of disciplines and interests. Design faculty expertise includes design theory, exhibition, fashion, history, information, interaction, interior architecture, immersion, lighting, product, textiles, time-base, visual communication and wearables, among others. Students blend individual focused research and creative practice with an understanding of key design issues in history, theory and research methodology. The MFA degree culminates in a project-based thesis and exhibition. For more information, see http://arts.ucdavis.edu/design-graduate-program.

Graduate Advisor. Please contact the Program at 530-752-8710.

Design | DES Courses

Questions pertaining to the following courses should be directed to the instructor or to the Design Advising office in 107 Art; 530-752-6244. Scheduling of classes is subject to change; please contact the Advising office to confirm when a course is offered.

Courses in DES:

DES 001—Introduction to Design (4)
Discussion—1 hour; Lecture—3 hours. Priority given to Design majors. Introduction to design discipline through readings, writing, visual problem solving, and critical analysis. Topics: design principles and elements, vocabulary, color theory, Gestalt principles, conceptualization strategies. Role of designer and products in contemporary culture including social responsibility and sustainability. GE credit: AH, VL. Effective: 2013 Spring Quarter.

DES 014—Design Drawing (4)
Lecture/Discussion—2 hours; Studio—4 hours. Prerequisite(s): DES 001 (can be concurrent); Students with a background in drawing or Advanced Placement Art Studio units are encouraged to submit a portfolio for review to waive this course. Priority given to Design majors. Drawing as a tool for design. Basic skills in objective observation and representation, including line, shape, tone, and space. Drawing as a tool for formulating and working through design problems. GE credit: AH, VL. Effective: 2016 Fall Quarter.

DES 015—Form and Color (4)
Lecture/Discussion—2 hours; Studio—4 hours. Prerequisite(s): DES 001 (can be concurrent); or Consent of Instructor. Priority given to Design majors. Understanding color, form and composition as ways of communicating design concepts and content. Color theory, color mixing, interaction of color. Design principles and elements. Gestalt theory. Explores a variety of materials, media and presentation techniques. GE credit: AH, VL. Effective: 2016 Fall Quarter.
DES 016—Graphic Design and Computer Technology (4)
Lecture/Discussion—2 hours; Studio—4 hours. Prerequisite(s): DES 001 (can be concurrent); or Consent of Instructor. Priority given to Design majors. Introduction to digital tools with emphasis on graphic design including theory, practice and technology. Includes principles of color, resolution, pixels, vectors, image enhancement, layout, visual organization, visual hierarchy, typography. GE credit: AH, VL. Effective: 2016 Fall Quarter.

DES 021—Drafting and Perspective (4)
Lecture/Discussion—2 hours; Studio—4 hours. Prerequisite(s): DES 001 (can be concurrent); or Consent of Instructor. Priority given to Design majors. Introduction to mechanical drafting, including scaled drawing, orthogonal projection, isometric, axonometric and perspective. Includes basic rendering techniques. GE credit: AH, VL. Effective: 2016 Fall Quarter.

DES 040A—Energy, Materials, and Design Over Time (4)
Discussion—1 hour; Lecture—3 hours. Global history of design across time, viewed through the lens of the effects of the creation and discovery of new energy sources, processes, and materials on design. (Same course as SAS 043.) GE credit: AH, WC. Effective: 2018 Spring Quarter.

DES 040B—Ideologies of Design (4)
Discussion—1 hour; Lecture—3 hours. Priority to Design majors. Introduction to the history and theory of design in particular relation to political, philosophical, cultural, economic, and environmental debates and objectives. GE credit: AH, WE. Effective: 2014 Spring Quarter.

DES 040C—Design for Aesthetics and Experience (4)
Discussion—1 hour; Lecture—3 hours. Priority to Design majors. Global historical survey of design's engagement with changing notions of aesthetics and experience. Relates transformations in the theory, production, and reception of all aspects of design (objects, landscapes, architectures, etc.) to larger cultural, social, and political contexts. Not open for credit to students who have taken DES 40 or DES 140. GE credit: AH, DD, WE. Effective: 2014 Spring Quarter.

DES 050—Introduction to Three-Dimensional Design (4)
Lecture/Discussion—2 hours; Studio—4 hours. Prerequisite(s): DES 001; or Consent of Instructor. Priority given to Design majors. Design concept development and detailing as it relates to the making of objects, structures and models using form, scale and materials. Product design and rapid prototyping methods using a range of techniques for advancing the design process. GE credit: AH, VL. Effective: 2016 Fall Quarter.

DES 051—Computer-Assisted Drawing for Designers (4)
Studio—6 hours. Prerequisite(s): DES 001 (can be concurrent); or Consent of Instructor. Computer-assisted drawing (CAD) and modeling using a mid-level, multi-use CAD program. Basic architectural drawing and modeling technique in both two-dimensional and three-dimensional CAD environments. Not open for credit to students who have taken DES 150A. GE credit: AH, VL. Effective: 2019 Fall Quarter.

DES 070—Introduction to Textile Design Structures (4)
Lecture/Discussion—2 hours; Studio—4 hours. Prerequisite(s): DES 001 (can be concurrent); or Consent of Instructor. Priority to Design majors. Introduction to diverse methods for creating textile structures. Exploration of the creative potential of hand-constructed textiles, manipulation of fabric to create dimensional surfaces, and the basics of building and joining fabric structures. Only two units of credit to students who have completed DES 023 or DES 24; not open for credit for students who have completed both DES 023 and DES 024. GE credit: AH, VL. Effective: 2016 Fall Quarter.

DES 077—Introduction to Structural Design for Fashion (4)
Lecture/Discussion—2 hours; Studio—4 hours. Prerequisite(s): DES 001 (can be concurrent); or Consent of Instructor. Priority given to Design majors. Study and practice of designing clothing for the human body. Emphasis on flat pattern development, structural joining sequences and the development of three-dimensional garments from two-dimensional drawings. Not open for credit to students who have completed DES 077A. GE credit: AH, VL. Effective: 2016 Fall Quarter.

DES 099—Special Study for Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

DES 107—Advanced Structural Design for Fashion (4)
Lecture/Discussion—2 hours; Studio—4 hours. Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; DES 077; or Consent of Instructor. Priority given to Design majors. Advanced study and practice of designing
clothing for the human body through pattern development and structural joining. Emphasis on draping techniques and advanced conceptualization for fashion design. GE credit: AH, VL. Effective: 2017 Spring Quarter.

**DES 111—Coding for Designers (4)**
Studio—6 hours. Prerequisite(s): DES 001; DES 015; DES 016; or Consent of Instructor. Pass One restricted to Design majors. Programming concepts/skills for design. Algorithm-based design and development flowcharts. Pseudo-code entry level programming. Principles of coding logic syntax structure. Analysis of history. Development iteration presentation of design projects. Not open for credit to students who completed DES 037. GE credit: SE, VL. Effective: 2018 Spring Quarter.

**DES 112—UI/UX Design: Principles and Practices (4)**
Studio—6 hours. Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016 Pass One restricted to Design Majors. Conceptual approaches, technical practice for interactive media using the front-end stack (html, css, js). Conceptual framework, user experience, visual interface and interaction design. Research and written pre-production materials required. May be repeated up to 1 time(s). GE credit: AH. Effective: 2018 Fall Quarter.

**DES 113—Photography and Digital Imaging (4)**
Studio—6 hours. Prerequisite(s): DES 001; DES 015; DES 016 Pass One restricted to Design majors. Digital imaging techniques using black/white and color. Critical analysis of photographs and the role of photography in society. Explore use and meaning of single, sequence and single composite images. Not open for credit to students who have taken DES 031. GE credit: AH, VL. Effective: 2017 Fall Quarter.

**DES 115—Letterforms and Typography (4)**
Lecture/Discussion—2 hours; Studio—4 hours. Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; or Consent of Instructor. Priority given to Design majors. Fundamentals of letterforms and typography. Characteristics of typefaces; formatting and composition of type. Principles of legibility, visual hierarchy, grid systems, and the integration of type and image. Not available for credit to students who have completed DES 022. GE credit: AH, VL. Effective: 2016 Fall Quarter.

**DES 116—Visual Communication: Graphic Design Studio (4)**
Lecture/Discussion—2 hours; Studio—4 hours. Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; DES 115; or Consent of Instructor. Priority given to Design majors. Multiple, conceptually-linked assignments focusing on the fundamental choices designers make in translating concepts into effective graphic form. Problem finding and analysis of audience needs. Design process from research and initial concepts to project prototypes. Not open for credit to students who have completed DES 152 or DES 152A. GE credit: AH, VL. Effective: 2016 Fall Quarter.

**DES 117—Interactive Media I (4)**
Lecture/Discussion—2 hours; Studio—4 hours. Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; or Consent of Instructor. Priority to Design majors. Practice of creating interactive visual media for network-based applications and principles of human computer interaction. Responsive design. User-centered research, information architecture, interface and interaction. Analysis of usability. Development and presentation of design production materials and completed interactive projects. GE credit: AH, VL. Effective: 2016 Fall Quarter.

**DES 126—Design Ethnography (4)**
Lecture/Lab—6 hours. Prerequisite(s): DES 001; or Consent of Instructor. Pass One restricted to Design majors. Practical introduction to design ethnography through project-based work. Tools and methods, observation, interviews, fieldnotes, and synthesis of qualitative data. Exploration of participatory design. Examination of the ethical questions. GE credit: AH. Effective: 2017 Spring Quarter.

**DES 127A—Sustainable Design (4)**
Review all entries
Lecture/Discussion—4 hours. Prerequisite(s): DES 001 Priority to Design majors. Principles, practice and materials of contemporary sustainable design in the context of environmental crisis. History of sustainable design in relation to the fields of textiles, visual communication, interior architecture, exhibition design and lighting. GE credit: AH, VL. Effective: 2015 Winter Quarter.

**DES 127A—Sustainable Design (4)**
Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): DES 001 Pass One open to Design Majors. Principles, practice and materials of contemporary sustainable design in the context of environmental crisis. History of sustainable design in relation to the fields of product design, material science, energy, architecture, and transportation. GE credit: AH, VL. Effective: 2019 Fall Quarter.
DES 127B—Studio Practice in Sustainable Design (4)
Lecture/Discussion—2 hours; Studio—4 hours. Prerequisite(s): DES 127A; DES 001; or Consent of Instructor. Priority to Design majors. Analysis and practice of sustainable design within studio context. Design project that incorporate the reuse of post consumer waste; standard materials vs. sustainable materials; Cradle to Cradle philosophy and practice. Field trips required. GE credit: AH, VL. Effective: 2016 Fall Quarter.

DES 128—BioDesign Theory and Practice (4)
Lecture/Discussion—3 hours; Term Paper. Pass One restricted to Design and Art History majors. Recent biological theories and their influence upon design theory and practice; includes bio-based materials in contemporary design. GE credit: VL. Effective: 2017 Winter Quarter.

DES 131—Global Fashion and Product Design (4)
Lecture/Discussion—2 hours; Studio—4 hours. Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; or Consent of Instructor. Priority given to Design majors. Exploration of materials, embellishments, and structural techniques derived from historic and contemporary world cultures. Emphasis on unique qualities of individual expression applied to hand made textiles, fashion and textile products. GE credit: AH, VL. Effective: 2016 Fall Quarter.

DES 132A—Textile Design: Woven Structures (4)
Lecture/Discussion—2 hours; Studio—4 hours. Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; or Consent of Instructor. Foundation course in handwoven textile structure and design, emphasizing yarn identification, basic drafting, basic weaves and their derivatives explored in context of original color effects and yarn combinations. May be repeated up to 1 time(s) with consent of instructor. GE credit: AH, VL. Effective: 2016 Fall Quarter.

DES 132B—Loom-Constructed Textile Design (4)
Lecture/Discussion—2 hours; Studio—4 hours. Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; DES 132A; or Consent of Instructor. Intermediate level study of complex fabric structure with emphasis on pattern in relation to surface, dimension, and material. May be repeated up to 1 time(s) with consent of instructor. GE credit: AH, VL. Effective: 2016 Fall Quarter.

DES 134A—Introduction to Interior Design - Residential (4)
Lecture/Discussion—2 hours; Studio—4 hours. Prerequisite(s): DES 001; (DES 021 or DES 150A); or Consent of Instructor. Priority to Design majors. Introduction to the theory and practice of interior design with focus on residential spaces. Basic methods of design conceptualization, development, and presentation. GE credit: AH, VL. Effective: 2016 Fall Quarter.

DES 135A—Furniture Design and Detailing (4)
Lecture/Discussion—2 hours; Studio—4 hours. Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; or Consent of Instructor. Development of designs for contemporary furniture. Consideration of behavioral and physical requirements, cultural and historic expression, and structural and aesthetic qualities. Process includes research, drawings, and construction of scale models. Required field trip. GE credit: AH, VL. Effective: 2016 Fall Quarter.

DES 135B—Furniture Design and Prototyping (4)
Lecture/Discussion—2 hours; Studio—4 hours. Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; or Consent of Instructor. Design and construction of full size prototype furniture based on preliminary work completed in course 135A. Material technology, construction methods, and finishes discussed. Development of shop drawings and furniture construction. Required field trip. GE credit: AH, VL. Effective: 2016 Fall Quarter.

DES 136A—Lighting Technology and Design (4)
Laboratory—4 hours; Lecture/Discussion—2 hours. Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; or Consent of Instructor. Introduction to lighting design and technology. Understanding the role of lighting and vision in the development of functional and aesthetically pleasing environments. GE credit: AH, VL. Effective: 2016 Fall Quarter.
DES 136B—Designing with Light - Industrial Design (4)
Laboratory—4 hours; Lecture/Discussion—2 hours. Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; DES 136A; or Consent of Instructor. Priority to Design majors. Design and manipulation of light sources, luminaires, and lighting controls to enhance the functional and aesthetic impact of interior and exterior spaces. Industrial design projects explore lighting effects, light distribution characteristics, and luminaire design. GE credit: AH, VL. Effective: 2016 Fall Quarter.

DES 137A—Daylighting and Interior Design (4)
Lecture/Discussion—2 hours; Studio—4 hours. Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; or Consent of Instructor. Priority to Design majors. Emphasis on understanding the effect of daylight on the perception of interior designs as well as on vision, luminous and thermal comfort, health and energy efficiency. GE credit: AH, VL. Effective: 2016 Fall Quarter.

DES 137B—Daylighting Design Studio (4)
Lecture/Discussion—2 hours; Studio—4 hours. Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; or Consent of Instructor. Priority to Design majors. Introduction to daylighting through observation of its effects on interior designs using scale models of interior designs of choice and photographing them outdoors and in CLTC's Heliodon to understand year-round performance. GE credit: AH, VL. Effective: 2016 Fall Quarter.

DES 138—Materials and Methods in Interior Design (4)
Lecture/Discussion—3 hours; Project (Term Project)—1 hour. Prerequisite(s): DES 001; or Consent of Instructor. Priority to Design majors. Introduction to the finish materials used for interior design with special emphasis on sustainable and recycled products. Performance factors, relative costs and energy impacts, installation conditions and construction details, and design potential for a full range of interior materials. GE credit: AH, VL, WE. Effective: 2016 Fall Quarter.

DES 142B—World Textiles: Western Hemisphere (4)
Lecture—4 hours. Social context, aesthetics, stylistic developments and methods significant in western hemisphere textiles. Emphasis on the Middle East, Europe, and the Americas up to contemporary times. Two required field trips. GE credit: AH. Effective: 2016 Fall Quarter.

DES 143—History of Fashion (4)
Discussion—1 hour; Lecture—3 hours. Priority to Design majors. History of fashion design from the earliest times to the present focusing on the ancient Middle East and Common Era North America and Europe. Emphasis on aesthetic, functional, social, economic, political and cultural aspects of clothing and personal adornment. GE credit: AH, VL. Effective: 2016 Fall Quarter.

DES 144—History of Interior Architecture (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Consent of Instructor. Pass One priority to Design majors. Thematic survey of interior architecture. Emphasis on dwellings in their cultural settings and development of modern interior design theories. Interiors considered in relation to buildings' exteriors, sites, and uses. GE credit: AH, WE. Effective: 2017 Fall Quarter.

DES 145—History of Visual Communication (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): DES 001; or Consent of Instructor. Priority to Design majors. Historical developments of visual communication, concentrating on the technological and aesthetic development of graphic design; origins and manifestations of current issues in visual communication; provide framework for analysis of current and future trends in visual communication. GE credit: AH, VL, WE. Effective: 2016 Fall Quarter.

DES 149—Information Design: Principles and Practice (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Upper division standing or consent of instructor. Restricted to students with upper division standing. Design principles and visual strategies for effective information display; analysis of contemporary and historical examples of visual representations and visual narratives in science, humanities, and the arts; emergence of digital methods for interactive data presentation. GE credit: AH, VL. Effective: 2014 Winter Quarter.

DES 150A—Computer-Assisted Drawing for Designers (4)
Lecture/Discussion—2 hours; Studio—4 hours. Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; or
Consent of Instructor. DES 021 preferred. Priority given to Design majors. Computer assisted drawing and modeling using a mid-level, multi-use CAD program. Basic architectural drawing and modeling technique in both two-dimensional and three-dimensional CAD environments. Not open for credit to students who have taken DES 150. GE credit: AH, VL. Effective: 2016 Fall Quarter.

**DES 150B—Computer-Assisted Presentations for Interior Architecture (4)**
Lecture/Discussion—2 hours; Studio—4 hours. Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; DES 150A; or Consent of Instructor. DES 021 recommended. Priority given to Design majors. Computer-assisted architectural presentation including the development of complex 3D models, techniques of photo-realistic rendering and computer simulation of movement through architectural and interior space. GE credit: AH, VL. Effective: 2016 Fall Quarter.

**DES 151—Type in Motion (4)**
Lecture/Discussion—2 hours; Studio—4 hours. Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; or Consent of Instructor. DES 115 recommended. Priority given to Design majors. Fundamentals of creating motion-based, screen-based typography. Consideration of narrative structures, movement assemblage, and other visual languages, synthesized within a nuanced understanding of typography within digital space. GE credit: AH, VL. Effective: 2016 Fall Quarter.

**DES 154—Visual Communication: Message Campaign Design (4)**
Lecture/Discussion—2 hours; Studio—4 hours. Prerequisite(s): DES 115; DES 116; DES 001; (DES 014 or DES 021); DES 015; DES 016; or Consent of Instructor. Priority given to Design majors. Principles and application of visual design strategies for projects that address a broad public audience. Emphasis on design for social awareness/interaction/benefit. Creation of public visual-media campaign. Not open for credit to students who have completed DES 152B. GE credit: AH, VL. Effective: 2016 Fall Quarter.

**DES 155A—Pattern, Form and Surface (4)**
Lecture/Discussion—2 hours; Studio—4 hours. Prerequisite(s): DES 001; DES 115; (DES 014 or DES 021); DES 015; DES 016; (DES 031 or DES 113); or Consent of Instructor. Priority given to Design majors. Experimental approaches to form-making through an examination of pattern, form, and surface in historical and contemporary contexts. Explorations of alternative design processes, methods, and materials that open up new possibilities for content creation and invention in design practice. GE credit: VL. Effective: 2017 Fall Quarter.

**DES 156—Graphitecture: Architecture in the Age of New Media (4)**
Studio—6 hours. Prerequisite(s): DES 001; DES 014; DES 015; DES 016 Priority to Design majors. New media and its impact on environmental design; analysis of contemporary projects at the intersection of architecture and new media; time-based strategies of representation; digital narrative. GE credit: AH, VL. Effective: 2016 Fall Quarter.

**DES 157—Interactive Media II (4)**
Review all entries
Lecture/Discussion—2 hours; Studio—4 hours. Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; (DES 037 or DES 111); DES 117; or Consent of Instructor. Priority to Design majors. Technical and conceptual aspects of creating web sites that address current trends, such as CSS for type and position and interactivity with ActionScript. Attention to conceptual framework, visual design and user interaction design. Research and written pre-production materials required. GE credit: AH, VL. Effective: 2016 Fall Quarter.

**DES 158—Interactive Media II (4)**
Review all entries
Studio—6 hours. Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; (DES 037 or DES 111); DES 117; or Consent of Instructor. Priority to Design majors. Conceptual approaches, technical practice for interactive media using the front-end stack (html, css, js). Conceptual framework, user experience, visual interface and interaction design. Research and written pre-production materials required. GE credit: AH, VL. Effective: 2016 Fall Quarter.

**DES 159—Design for Understanding (4)**
Lecture/Discussion—2 hours; Studio—4 hours. Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; DES 115; DES 116; or Consent of Instructor. DES 117 recommended. Pass One open to Design majors. Principles of effective information display including aspects of language, structure, legibility, sequencing, and context. Analysis of historical examples of typographic, diagrammatic, and cartographic excellence. User-centered research. Development and presentation of iterative design prototypes. Design that informs, connects, and inspires. GE credit: AH, VL. Effective: 2016 Fall Quarter.

**DES 160—Textile Surface Design: Patterns and Resists (4)**
Studio—6 hours. Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; or Consent of Instructor. Pass one restricted to Design majors. Use of traditional and contemporary processes to create images and patterns on fabric
using a variety of dyes, including direct applications, bound and mechanical resists, and surface additives. GE credit: AH, VL. Effective: 2017 Fall Quarter.

DES 161—Textile Surface Design: Screen and Digital Printing (4)
Studio—6 hours. Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016 Pass One restricted to Design majors. Design of textiles and screen printing on fabrics; soft-product development; integration of hand-produced and digitally generated imagery on cloth. GE credit: AH, VL. Effective: 2017 Spring Quarter.

DES 165—Studio Practices in Industrial Design (4)
Studio—6 hours. Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; (DES 051 or DES 150A); or Consent of Instructor. Pass One restricted to Design majors. 3D studio methods for design, including: historic and contemporary developments in industrial design; innovation in material and fabrication technology; design based projects for everyday objects including soft goods, electronics, transportation. GE credit: SE, VL. Effective: 2018 Winter Quarter.

DES 165—Studio Practices in Industrial Design (4)
Studio—6 hours. Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 050; or Consent of Instructor. Pass One restricted to Design majors. 3D studio methods for design, including: historic and contemporary developments in industrial design; innovation in material and fabrication technology; design based projects for everyday objects including soft goods, electronics, transportation. GE credit: SE, VL. Effective: 2018 Fall Quarter.

DES 166—Human Centered Design (4)
Studio—6 hours. Prerequisite(s): DES 001; DES 014; DES 015 Pass One restricted to Design majors. Human-centered approach to problem solving, ethnography, ideation, project framing, rapid prototypes, visual communication, and experiential learning. Creative approaches to graphic design, industrial design, fashion, business, and entrepreneurship. GE credit: AH, VL. Effective: 2017 Fall Quarter.

DES 167—Prototyping: From Objects to Systems (4)
Studio—6 hours. Prerequisite(s): DES 001; DES 014; DES 015; DES 050; or Consent of Instructor. Pass One restricted to Design majors. Exploration of rapid prototyping techniques for objects, interactive experiences, services and organizations. Understanding of additive manufacturing, foam models, digital interfaces and business models. GE credit: SE, VL. Effective: 2017 Fall Quarter.

DES 167—Prototyping: From Objects to Systems (4)
Studio—6 hours. Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; or Consent of Instructor. Pass One restricted to Design majors. Exploration of rapid prototyping techniques for objects, interactive experiences, services and organizations. Understanding of additive manufacturing, foam models, digital interfaces and business models. GE credit: SE, VL. Effective: 2018 Fall Quarter.

DES 169—Advanced Explorations in Textile Design (4)
Studio—6 hours. Prerequisite(s): DES 001; DES 014 or DES 021; DES 015; DES 016; DES 160 or DES 161; or Consent of Instructor. DES 070 recommended. Pass One restricted to Design majors. Advanced exploration of textile design aimed at developing unique textiles for a specific end product such as a fashion collection, functional interior design, art textile or surface design competition. May be repeated up to 1 time(s) with consent of instructor; topics and themes change yearly; criteria is 1) space with first priority to students not previously taken the course and 2) course content must be sufficiently different from the previous time the student took the course. GE credit: AH. Effective: 2017 Spring Quarter.

DES 170—Experimental Fashion & Textile Design (4)
Lecture/Discussion—2 hours; Studio—4 hours. Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; or Consent of Instructor. Priority to Design majors. Experimental approaches to fashion and textile design. Emphasis on developing conceptual ideas and translating them into one-of-a-kind garments and soft products. Exploration of a variety of current topics including sustainability, pattern design, new technologies, and social activism. May be repeated up to 1 time(s) with consent of instructor. GE credit: AH, VL. Effective: 2016 Fall Quarter.

DES 171—Fashion Drawing: Technical and Illustration (4)
Lecture/Discussion—2 hours; Studio—4 hours. Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; or Consent of Instructor. Priority to Design majors. Exploration of fashion design processes for industry within the social and physical context. Emphasis on two-dimensional conceptualization of ideas, garment construction, and ideation processes utilizing commercial textiles. Field trip required. GE credit: AH, VL. Effective: 2016 Fall Quarter.

DES 171—Fashion Drawing: Technical and Illustration (4)
Consent of Instructor. DES 014 recommended. Priority to Design majors. Exploration of fashion design processes for industry within the social and physical context. Emphasis on two-dimensional conceptualization of ideas, garment construction, and ideation processes utilizing commercial textiles. Field trip required. GE credit: AH, VL. Effective: 2019 Spring Quarter.

**DES 177—Computer-Assisted Fashion Design (4)**
Lecture/Discussion—2 hours; Studio—4 hours. Prerequisite(s): DES 077; DES 001; (DES 014 or DES 021); DES 015; DES 016; or Consent of Instructor. Priority to Design majors. Advanced exploration of apparel design processes for industry and personal expression with emphasis on computer-assisted design applications. Field trip required. GE credit: AH, VL. Effective: 2016 Fall Quarter.

**DES 178—Design and Wearable Technology (4)**
Studio—6 hours. Prerequisite(s): DES 001; DES 014; DES 015; DES 016; or Consent of Instructor. Pass One restricted to Design majors. Introduction to wearable technology and related technologies. Emphasis on designing, and fabricating prototypes of wearable technology for value-added designs and to improve quality of life. GE credit: AH, VL. Effective: 2017 Spring Quarter.

**DES 179—Fashion Design: Signature Collection (4)**
Lecture/Discussion—2 hours; Studio—4 hours. Prerequisite(s): DES 077; (DES 107 or DES 177); DES 001; (DES 014 or DES 021); DES 015; DES 016; or Consent of Instructor. Priority to Design majors. Advanced exploration of fashion design with an emphasis on professional portfolio development and presentation. Emphasis on conceptualizing, designing, and fabricating a cohesive line of wearable garments suitable for presenting in a public fashion show. May be repeated up to 1 time(s). Not open for credit to students who have taken more than 8 units of DES 191A. GE credit: AH, VL. Effective: 2016 Fall Quarter.

**DES 180A—Advanced Interior Design: Institutional Spaces (4)**
Lecture/Discussion—2 hours; Studio—4 hours. Prerequisite(s): DES 001; (DES 021 or DES 150A); or Consent of Instructor. Priority to Design majors. Advanced interior design problems focused on complex institutional spaces. Introduction to building codes related to interior design. Integration of building systems with interior design solutions. GE credit: AH, VL. Effective: 2016 Fall Quarter.

**DES 180B—Advanced Interior Architecture (4)**
Lecture/Discussion—2 hours; Studio—4 hours. Prerequisite(s): (DES 180A or DES 134B); DES 134A; or Consent of Instructor. Priority to Design majors. Advanced problems in interior architectural design emphasizing space planning for corporate and institutional environments. Field trips required. GE credit: AH, VL. Effective: 2016 Fall Quarter.

**DES 185—Exhibition Design (4)**
Lecture/Discussion—2 hours; Studio—4 hours. Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; or Consent of Instructor. DES 150A recommended. Priority to Design majors. Design of cultural and commercial exhibition environments, including exhibition development and object selection, spatial planning and architectural finishes, object placement and staging, interpretive strategies, exhibition and promotional graphics. GE credit: AH, VL. Effective: 2016 Fall Quarter.

**DES 186—Environmental Graphic Design (4)**
Lecture/Discussion—2 hours; Studio—4 hours. Prerequisite(s): DES 001; (DES 014 or DES 021); DES 015; DES 016; or Consent of Instructor. DES 115 recommended. Priority to Design majors. Design of informational and directional graphics for the built environment. Application and integration of typography, imagery and symbols into the architectural landscape. Development of universal wayfinding and graphic navigational systems to help people find their way. GE credit: AH, VL. Effective: 2016 Fall Quarter.

**DES 187—Narrative Environments (4)**
Lecture/Discussion—2 hours; Studio—4 hours. Prerequisite(s): (DES 185 or DES 186); (DES 014 or DES 021); DES 001; DES 015; DES 016; or Consent of Instructor. Priority to Design majors. Design of storytelling environments and multi-sensory experiences for cultural, commercial, entertainment and public spaces. Interpretive planning and design for
specific exhibit audiences. Manipulation of objects and the communication of complex ideas in the exhibition environment. GE credit: AH, VL. Effective: 2016 Fall Quarter.

**DES 190—Proseminar (1)**
Seminar—1 hour. Prerequisite(s): Design major or consent of instructor. Philosophies of design explored through discussion and presentation of research results. May be repeated up to 3 time(s). (P/NP grading only.) Effective: 1997 Winter Quarter.

**DES 191A—Workshops in Design (4-12)**
Seminar—1 hour; Studio—3 hours. Prerequisite(s): DES 014; DES 015; and Consent of Instructor. Upper division standing. Faculty initiated workshops featuring advanced studies and applications of original work in Design: Costume. Letter grading by contract. Field trips included. Credit limited to 12 units in one section or a combination of sections. Effective: 1997 Winter Quarter.

**DES 191B—Workshops in Design (4-12)**
Seminar—1 hour; Studio—3 hours. Prerequisite(s): DES 014; DES 015; and Consent of Instructor. Upper division standing. Faculty initiated workshops featuring advanced studies and applications of original work in Design: Environment. Letter grading by contract. Field trips included. Credit limited to 12 units in one section or a combination of sections. Effective: 1997 Winter Quarter.

**DES 191C—Workshops in Design (4-12)**
Seminar—1 hour; Studio—3 hours. Prerequisite(s): DES 014; DES 015; and Consent of Instructor. Upper division standing. Faculty initiated workshops featuring advanced studies and applications of original work in Design: Graphics. Letter grading by contract. Field trips included. Credit limited to 12 units in one section or a combination of sections. Effective: 1997 Winter Quarter.

**DES 191D—Workshops in Design (4-12)**
Seminar—1 hour; Studio—3 hours. Prerequisite(s): DES 014; DES 015; and Consent of Instructor. Upper division standing. Faculty initiated workshops featuring advanced studies and applications of original work in Design: Textiles. Letter grading by contract. Field trips included. Credit limited to 12 units in one section or a combination of sections. Effective: 1997 Winter Quarter.

**DES 192—Internship (1-6)**
Internship—3-18 hours. Prerequisite(s): Consent of Instructor. Completion of 84 units. Enrollment limited to 3 units per quarter or 6 units per IV session. Supervised internship, off and on campus, in areas of design including environmental, costume, textile, museum, display and interior design. (P/NP grading only.) Effective: 1997 Winter Quarter.

**DES 194HA—Special Study for Honors Students (3)**
Independent Study—9 hours. Prerequisite(s): Consent of Instructor. Qualification for Letters and Science Honors Program; senior standing; approval of Design Honors Program proposal by the Curriculum Committee and major advisor. Limited enrollment. Preparation and presentation of a culminating project. Supervision of an instructor in one of the creative or scholarly areas of Design. Effective: 2013 Spring Quarter.

**DES 194HB—Special Study for Honors Students (3)**
Independent Study—9 hours. Prerequisite(s): DES 194HA; and Consent of Instructor. Qualification for Letters and Science Honors Program; senior standing. Limited enrollment. Preparation and presentation of a culminating project. Supervision of an instructor in one of the creative or scholarly areas of Design. Effective: 2013 Spring Quarter.

**DES 197T—Tutoring in Design (1-5)**
Discussion—3-15 hours. Prerequisite(s): Consent of Instructor. Upper division standing. Leading of small discussion groups or studio meetings affiliated with one of the department's regular courses. (P/NP grading only.) Effective: 1997 Winter Quarter.

**DES 198—Directed Group Study (1-5)**
Variable. Prerequisite(s): Consent of Instructor. Upper division standing. (P/NP grading only.) Effective: 1997 Winter Quarter.

**DES 198F—Student-Taught Course (1-4)**
Variable—1-4 hours. Student-facilitated (taught) course intended for upper division students (P/NP grading only.) Effective: 2016 Fall Quarter.
DES 199—Special Study of Advanced Undergraduates (1-5)
Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

DES 199FA—Student Facilitated Course Development (1-4)
Variable—1-4 hours. Prerequisite(s): Consent of Instructor. Planning and development for student led course 198F under the supervision of a faculty member. (P/NP grading only.) Effective: 2017 Fall Quarter.

DES 199FB—Student Facilitated Teaching (1-4)
Variable—1-4 hours. Prerequisite(s): DES 199FA; and Consent of Instructor. Student-facilitated course under the supervision of a faculty member, an undergraduate student teaching a course under 98F/198F. (P/NP grading only.) Effective: 2018 Spring Quarter.

DES 221—Theory and Issues in Design (4)
Independent Study; Seminar—3 hours. Prerequisite(s): Graduate standing in Design or consent of instructor. Perspectives on theoretical and aesthetic issues related to the design professions such as methodology in historical and contemporary contexts, implications of technology on design theory and practice, and design relationships to environmental sustainability, recycling, and other social issues. Effective: 2011 Spring Quarter.

DES 222—Research Methods and Critical Writing for Design (4)
Independent Study; Seminar—3 hours. Prerequisite(s): DES 221; Graduate standing in Design or consent of instructor. Focused on research methods and critical writing related to design topics including case studies, original and secondary sources, critical reviews. Expectation of a paper meeting professional standards suitable for publication from each student at end of course. May be repeated up to 1 time(s). Effective: 2006 Fall Quarter.

DES 223—Professional Practice and Ethics in Design (4)
Independent Study; Seminar—3 hours. Prerequisite(s): DES 221; DES 222; Graduate standing in Design or consent of instructor. Introduce students to issues of professional design practice: business ethics, contracts and business practices, social responsibility through case studies, guest lectures and field trips, and readings. Short written assignments and presentations will be required. Effective: 2006 Fall Quarter.

DES 224—Seminar in Design Research and Teaching (4)
Discussion—2 hours; Extensive Writing—4 hours; Independent Study—6 hours. Prerequisite(s): DES 221; DES 222; DES 223; and Consent of Instructor. Concurrent academic appointment (TA) in DES 142A, DES 142B, DES 143, DES 144, DES 145; graduate standing in Design. Student will work closely with instructor on a research and writing project related to subject matter of undergraduate history courses noted above with the goal of introducing student to advanced historical research processes and development of writing skills. May be repeated up to 2 time(s). Effective: 2007 Fall Quarter.

DES 225—Studio Practice in Design (4)
Studio—6 hours. Prerequisite(s): DES 221 Restricted to graduate standing in Design or consent of instructor. Students work together on a collective project to experience the multiple phases of design through an iterative process. Design projects will be geared towards relevance in contemporary social, cultural and political contexts. May be repeated up to 2 time(s). Effective: 2017 Fall Quarter.

DES 290—Seminar in Design (4)
Seminar—4 hours. Prerequisite(s): Graduate standing or consent of instructor. Selected topics in design methodology, research, communication, and education. May be repeated for credit. Effective: 1997 Winter Quarter.

DES 292—Practicum in Design (1-12)
Variable—3-36 hours. Prerequisite(s): Graduate standing in Design or consent of instructor. Interaction with a working professional in the student's field of interest to apply theories and concepts to working practice. (S/U grading only) Effective: 2014 Fall Quarter.

DES 298—Directed Group Study for Graduate Students (1-5)
Studio. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

DES 299—Individual Focused Study (1-12)
Variable—3-36 hours. Prerequisite(s): Graduate standing in Design or consent of instructor. Advanced study in studio practice on independent projects with faculty consultation. May be repeated for credit. (S/U grading only.) Effective: 2017 Winter Quarter.

DES 299D—Project Concentration (1-12)
Variable—3-36 hours. Prerequisite(s): Graduate standing in Design or consent of instructor; minimum of 22 units must be taken in Project Concentration and Individual Focused Study. Student creates a body of original work at a
professional level, with written and visual documentation of process and concepts underlying the project, culminating in public presentation. (S/U grading only.) Effective: 2014 Fall Quarter.

DES 396—Teaching Assistant Training Practicum (1-4)
Variable. Prerequisite(s): Graduate standing. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

Dramatic Art

Dramatic Art | Dramatic Art M.F.A.

(College of Letters and Science)

Department of Theatre and Dance. 216A Art Building; 530-752-8710; http://arts.ucdavis.edu/mfa-dramatic-art

Faculty. http://arts.ucdavis.edu/theatre-dance-faculty

Graduate Study. The Department of Theatre and Dance offers programs of study and research leading to the M.F.A. in Theatre and Dance (the interdisciplinary weaving of acting, directing, design, choreography and practice and research) and contributing to the Graduate Group Ph.D. in Performance Studies. Detailed information may be obtained by contacting the Graduate Program Administrators: for the M.F.A. in Theatre and Dance, 530-752-8710; Graduate Group in Performance Studies, 530-754-6973.

See department website at http://arts.ucdavis.edu/general-information/mfa-program-dramatic-art.

Dramatic Art | DRA Courses

Courses in DRA:

DRA 001—Theatre, Performance and Culture (4)
Discussion—1 hour; Lecture—3 hours. Not open to students who have completed DRA 001S. Introductory investigation of the nature of performance, moving from performance theory to consideration of various manifestations of performance including theatre, film and media, performance art, dance, sports, rituals, political and religious events, and other "occasions." GE credit: AH, DD, VL, WE. Effective: 2013 Fall Quarter.

DRA 001S—Theatre, Performance and Culture (4)
Discussion—1 hour; Lecture—3 hours. Not open to students who have completed DRA 001. Introductory investigation of the nature of performance, moving from performance theory to consideration of various manifestations of performance including theatre, film and media, performance art, dance, sports, rituals, political and religious events, and other "occasions." For Short Term Programs Abroad. Effective: 2005 Spring Quarter.

DRA 002—Acting: The Basics: History and Practice (4)

DRA 005—Understanding Performance: Appreciation of Modern Theatre, Dance, Film and Performance Art for the Humanities and Sciences (4)
Discussion/Laboratory—1 hour; Lecture/Discussion—3 hours. Relevance of theatre and performance to modern culture, science and society. Approaches to theatre/dance/media/ performance art, integrated into Mondavi Centre for the Arts and Theatre and Dance Department programs. (Same course as SAS 041.) GE credit: AH, DD, OL, VL, WC, WE. Effective: 2015 Winter Quarter.

DRA 010—Introduction to Acting (4)
Discussion/Laboratory—4 hours. Fundamentals of movement, speech, theatre games, and improvisation. Selected reading and viewing of theatre productions. Intended for students not specializing in Dramatic Art. GE credit: OL, VL. Effective: 2015 Spring Quarter.

DRA 011—Introduction to Presentation Skills (2)
Lecture/Lab—4 hours. Class size limited to 20 students. Development of clear oral and physical communication skills that build confidence, presentational style and clarity for students whose command of English is at a basic level. Effective: 2013 Spring Quarter.

DRA 014—Introduction to Contemporary Dance (4)
Laboratory—3 hours; Lecture—3 hours. Introduction to basic issues and methods in contemporary dance. Focus on
preparing the student for dancing and dance-making through basic techniques of improvisation and composition. Consideration of dance as a cultural practice. GE credit: VL. Effective: 2012 Fall Quarter.

DRA 020—Introduction to Dramatic Art (4)
Discussion—1 hour; Lecture—3 hours. Understanding and appreciation of both the distinctive and collaborative contributions of playwright, actor, director, and designer to the total work of dramatic art. Study of plays from the major periods of dramatic art in their cultural contexts. GE credit: AH, VL, WC, WE. Effective: 2013 Fall Quarter.

DRA 021A—Fundamentals of Acting (4)
Laboratory—4 hours; Lecture—2 hours. Open to students planning to major in Theatre and Dance. Physical and psychological resources of the actor. Experience in individual and group contact and communication, theatre games, advanced improvisation, sound and movement dynamics. Viewing of theatre productions. GE credit: OL, VL. Effective: 2016 Fall Quarter.

DRA 024—Visual Aspects of Dramatic Art (4)
Lecture/Discussion—4 hours. Understanding and appreciation of the visual aspects of dramatic art: theatre architecture, scenery, lighting, costume, and makeup. GE credit: AH, VL. Effective: 2013 Fall Quarter.

DRA 025—Technical Aspects of Dramatic Production (3)
Lecture—3 hours. Technical principles of dramatic production emphasizing the three areas of scenic, costume and lighting studios. Subjects covered include basic tools, materials and equipment, production practices; and the interdisciplinary and collaborative nature of dramatic production. Effective: 1997 Winter Quarter.

DRA 026—Performing Arts Production Management (3)
Lecture—3 hours. Theoretical study of performing arts administration and backstage operations from audition through performance. Techniques of scheduling, production management, stage management, technical direction, audience control, box office, promotion, safety, accommodations for persons with disabilities and emergency procedures. Effective: 1997 Winter Quarter.

DRA 028—Entertainment Engineering and Management: Stagecraft to Stage Management (4)
Lecture/Discussion—4 hours. Introduction to technical production and management in theatre and dance. Topics include stage management, theatrical mechanics, backstage protocols, scenic construction, properties, lighting, basic shop tools, costume shop use and construction, basic make-up, sound equipment, graphics and robotics for theatre. GE credit: AH. Effective: 2015 Spring Quarter.

DRA 030—Theatre Laboratory (1-5)
Project (Term Project)—2 hours. Prerequisite(s): Consent of Instructor. Projects in acting, production, scene design, costuming, lighting, directing, and playwriting. Participation in departmental productions. May be repeated up to 11 unit(s). Effective: 2016 Spring Quarter.

DRA 040A—Beginning Modern Dance (2)
Discussion/Laboratory—4 hours. Fundamentals of modern dance focusing primarily on the development of techniques and creative problem solving. Basic anatomy, dance terminology, and a general overview of modern dance history. May be repeated up to 2 time(s) Non-dance majors can only repeat the course once; dance majors may apply to the dance faculty advisor for permission to repeat more times; dance is a repetitive practice that involves constant reiteration and demands this for improvement and better understanding of the somatic and proprioceptive skills. GE credit: AH, VL. Effective: 2017 Spring Quarter.

DRA 040B—Intermediate Modern Dance (2)
Discussion/Laboratory—4 hours. Prerequisite(s): DRA 040A; or Consent of Instructor. Modern dance techniques. Basic anatomy, dance terminology and a general overview of modern dance history. May be repeated up to 1 time(s) For Dance majors, further repeats negotiated with faculty advisor in dance. GE credit: AH, VL. Effective: 2016 Spring Quarter.

DRA 041A—Beginning Jazz Dance (2)
Discussion/Laboratory—4 hours. Fundamentals of jazz dance; includes warm-ups, dance techniques and combinations. Basic anatomy, dance terminology and general overview of jazz dance history. May be repeated up to 1 time(s). Effective: 2017 Spring Quarter.

DRA 041B—Intermediate Jazz Dance (2)
Discussion/Laboratory—4 hours. Prerequisite(s): DRA 041A; or Consent of Instructor. Warm-ups, dance techniques and combinations at the intermediate level. Basic anatomy, dance terminology and a general overview of jazz styles of historically significant jazz choreographers and leading contemporary jazz choreographers. May be repeated up to 1 time(s) with consent of instructor. Effective: 2016 Spring Quarter.
DRA 042A—Beginning Ballet (2)
Discussion/Laboratory—4 hours. Fundamentals of ballet, focusing on the development of technique through proper alignment, quality, and rhythm. Basic anatomy, ballet terminology, and dance history. May be repeated for credit with consent of instructor. GE credit: AH, VL. Effective: 2016 Spring Quarter.

DRA 042B—Intermediate Ballet (2)
Discussion/Laboratory—4 hours. Prerequisite(s): DRA 042A; or Consent of Instructor. Barre and center work at the intermediate level. Development and refinement of technique through proper alignment, rhythmic, and qualitative understanding. Anatomy, ballet terminology, and dance history. May be repeated for credit with consent of instructor. GE credit: AH, VL. Effective: 2016 Spring Quarter.

DRA 043A—Contact Improvisation Dance (2)
Lecture/Lab—4 hours. Fundamentals of contact improvisation and its applications to all forms of dance, performance, sports, physical safety and health. Solo improvisation, safety, communication, alignment, basic lifting and weight-sharing, intuition, developing relaxed readiness and personal expression. May be repeated up to 2 time(s). GE credit: AH, VL. Effective: 2014 Fall Quarter.

DRA 043B—Intermediate Contact Improvisation (2)
Lecture/Lab—4 hours. Prerequisite(s): DRA 043A; or Consent of Instructor. Building on the fundamentals. Reviewing basics, extended improvising, skillfully working with partners of different sizes and abilities, advanced lifting, advanced safety practices, embracing risk and disorientation, subtle nuances of communication. May be repeated up to 2 time(s). GE credit: AH, VL. Effective: 2016 Spring Quarter.

DRA 044A—Beginning Hip Hop Dance (2)
Discussion/Laboratory—4 hours. Fundamentals of Hip Hop dance focusing on developing a fluid movement vocabulary, facility in body isolations, intricate rhythmic patterning, quick shifts of weight and mastering dance combinations. Discussions on Hip Hop dance history, styles and terminology. May be repeated up to 1 time(s). Effective: 2002 Fall Quarter.

DRA 044B—Intermediate Hip Hop Dance (2)
Discussion/Laboratory—4 hours. Prerequisite(s): DRA 044A; or Consent of Instructor. Expansion of Hip Hop dance vocabulary by focusing on mastering body isolations and intricate rhythmic techniques, complex dance combinations, advanced across the floor sequences. May be repeated up to 1 time(s). Effective: 2002 Fall Quarter.

DRA 055—Contemporary Local, National and Global Theatre, Dance and Performance (4)
Lecture/Discussion—4 hours. Introduction a range of contemporary theatre, dance and performance in local, national and international settings. Training in critical approaches to and aesthetic appreciation of these forms. Emphasis varies based on instructor. GE credit: AH, DD, VL, WC. Effective: 2015 Fall Quarter.

DRA 056A—History of Theatre and Dance I: Myth, Magic and Madness (4)
Lecture/Discussion—4 hours. Exploration of aesthetic movements in various disciplines of theatre and dance from the origins to 1550. Examination of Greek, Roman, Sanskrit, Kathakali, Chinese, Japanese, Mesopotamian, Medieval European, and Indigenous theatre and dance including oral, ritual and shamanic performance. Offered once a year. GE credit: AH, VL, WC. Effective: 2015 Fall Quarter.

DRA 056B—History of Theatre and Dance II: Romance, Revenge and Rebellion (4)
Lecture/Discussion—4 hours. Exploration of aesthetic movements in various disciplines of theatre and dance from 1550 to 1850. Examination of genres related to romance, revenge and rebellion using European, North and South American, and Asian examples. Offered once a year. GE credit: AH, VL, WC. Effective: 2015 Winter Quarter.

DRA 056C—History of Theatre and Dance III: Sex, Society and the State (4)

DRA 092—Internship in Dramatic Art (1-12)
Variable—1-12 hours. Prerequisite(s): Consent of instructor and department chairperson. Restricted to lower division students with less than 84 units completed. Internship outside the Department of Theatre and Dance enabling students to practice their skills. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 2006 Fall Quarter.

DRA 098—Directed Group Study (1-5)
Primarily for lower division students. (P/NP grading only.) Effective: 1997 Winter Quarter.
DRA 099—Special Study for Undergraduates (1-5)
(P/NP grading only.) Effective: 1997 Winter Quarter.

DRA 111—Advanced Presentation Skills (2)
Lecture/Lab—4 hours. Class size limited 20 students. Development of clear oral and physical communication skills that build confidence, presentational style and clarity for students whose command of English is at a competent to fluent level. GE credit: OL. Effective: 2013 Spring Quarter.

DRA 111S—Representation and Identity in Culture and Cinema (4)
Film Viewing—4 hours; Lecture/Discussion—2 hours. Issues of personal and collective identity via study of film narratives from different cultures. Reflection of dominant cultural identities in film. Taught in Australia. Effective: 2006 Spring Quarter.

DRA 114—Theatre on Film (4)
Film Viewing—2 hours; Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. Study of six/eight plays on film, using mixed casts and raising issues of diversity. Focus: sociohistorical context for production and reception, interpretation and analysis of topics (gender, ethnicity, age, politics, philosophy), and filming, screenwriting, design, and acting/directing for film. GE credit: AH, SS, VL. Effective: 2016 Fall Quarter.

DRA 115—Advanced Study of Major Film Makers (4)
Film Viewing—2 hours; Lecture/Discussion—3 hours. Analysis of the contribution of some outstanding film creators. Study of diverse aesthetic theories of the cinema and their application to selected films. May be repeated for credit when different film creator studied, or studied with a different methodological approach. GE credit: VL. Effective: 2016 Spring Quarter.

DRA 116—Design on Screen (4)
Film Viewing—3 hours; Lecture/Discussion—3 hours. Analysis of the contribution of outstanding designers for cinema, television and filmed entertainment. Study of diverse aesthetic theories of production design and art direction, costume design, or cinematography. Introductory principles and practice, history. May be repeated up to 2 time(s) when topic differs. (Same course as CTS 116.) GE credit: AH, VL. Effective: 2013 Fall Quarter.

DRA 120—Intermediate Acting/Gateway: The Actor's Toolkit (4)
Lecture/Lab—6 hours. Prerequisite(s): DRA 021A; or Consent of Instructor. Limited enrollment. Implementation of acting tools drawn predominantly from Stanislavsky’s ‘system’. Gateway into the Advanced Acting courses. GE credit: OL, VL. Effective: 2013 Spring Quarter.

DRA 121A—Advanced Acting: Scene Study and Script Analysis (4)
Lecture/Lab—6 hours. Prerequisite(s): DRA 120; and Consent of Instructor. Limited enrollment. In-depth study, analysis and performance of texts from different eras, genres and styles. Implementation of tools to undertake independent preparation of character creation. May be repeated up to 8 unit(s) Since acting requires repetition to habituate the body and imagination to new practices, this course may be taken twice. New scripts and scenes must be undertaken in the repetition. GE credit: OL, VL. Effective: 2013 Spring Quarter.

DRA 121B—Advanced Acting: Rehearsal Processes and Practices (4)
Lecture/Lab—6 hours. Prerequisite(s): DRA 120; and Consent of Instructor. Limited enrollment. Development of rehearsal practice and etiquette, using a variety of scenes from different eras and genres. May be repeated up to 8 unit(s) The course has been established to enable visiting artists in residence to undertake the instruction, as well as faculty. Therefore, this course may be taken twice, as students will be exposed to different professional practitioners’ working processes. New etudes, scripts and scenes must be undertaken in the repetition. GE credit: OL, VL. Effective: 2013 Spring Quarter.

DRA 121C—Advanced Acting: Character and Style (4)
Lecture/Lab—6 hours. Prerequisite(s): DRA 120; and Consent of Instructor. Limited enrollment. Study of psychological techniques to create characters with an emphasis on non-realistic styles. May be repeated up to 8 unit(s) Since acting requires repetition to habituate the body and imagination to new practices, this course may be taken twice. New scripts and scenes must be undertaken in the repetition. GE credit: OL, VL. Effective: 2012 Fall Quarter.

DRA 122A—Advanced Acting: Devising and Collaboration (4)
Lecture/Lab—6 hours. Prerequisite(s): DRA 120; and Consent of Instructor. Limited enrollment. Study and practice of various devising techniques, to collaborate on and produce a series of short etudes and dramatic scenes/short plays. May be repeated up to 8 unit(s) Since acting requires repetition to habituate the body and imagination to new practices, this course may be taken twice. New scripts and scenes must be undertaken in the repetition. GE credit: OL, VL. Effective: 2016 Spring Quarter.
DRA 122B—Advanced Acting: Shakespeare and His Contemporaries (4)
Lecture/Lab—6 hours. Prerequisite(s): DRA 120; and Consent of Instructor. Limited enrollment. Study and performance of classical texts (monologues and dialogues), with a focus on Shakespeare and the Elizabethan world view. May be repeated up to 8 unit(s) Since acting requires repetition to habituate the body and imagination to new practices, this course may be taken twice. New monologues and scenes must be undertaken in the repetition. GE credit: OL, VL. Effective: 2013 Spring Quarter.

DRA 122C—Advanced Acting: Special Topics in Acting (4)
Lecture/Lab—6 hours. Prerequisite(s): DRA 120; and Consent of Instructor. Restricted to Theatre and Dance majors; limited enrollment. Intensive study and practical exploration of a specialized area; for example, World Theatre, Social Theatre, Physical Theatre, Musical Theatre, the Ancient Greeks, etc. May be repeated up to 8 unit(s). GE credit: AH, OL, VL. Effective: 2016 Fall Quarter.

DRA 124A—Principles of Theatrical Design: Scenery (4) Review all entries
Lecture/Discussion—4 hours. Prerequisite(s): Consent of Instructor. Pass One restricted to Theatre and Dance majors. Scene design processes, working drawings, sketching techniques, scale models, methods and materials of scenery construction. GE credit: AH, VL. Effective: 2018 Winter Quarter.

DRA 124B—Principles of Theatrical Design: Scenery (4) Review all entries
Lecture/Discussion—4 hours. Prerequisite(s): Consent of Instructor. Upper division standing; Pass One restricted to Theatre and Dance majors. Scene design processes, working drawings, sketching techniques, scale models, methods and materials of scenery construction. GE credit: AH, VL. Effective: 2019 Winter Quarter.

DRA 124C—Principles of Theatrical Design: Lighting (4) Review all entries
Lecture/Lab—4 hours. Prerequisite(s): Consent of Instructor. Pass One restricted to Theatre and Dance majors. Analysis of plays in terms of scene design, elements of design, execution of designs for modern and period plays. GE credit: AH, VL. Effective: 2018 Winter Quarter.

DRA 124C—Principles of Theatrical Design: Lighting (4) Review all entries
Lecture/Lab—4 hours. Prerequisite(s): Consent of Instructor. Upper division standing; Pass One restricted to Theatre and Dance majors. Theories of lighting the stage, equipment and control systems, execution of lighting plots. GE credit: AH, VL. Effective: 2019 Winter Quarter.

DRA 124D—Principles of Theatrical Design: Costume (4) Review all entries
Lecture/Discussion—4 hours. Prerequisite(s): DRA 024; Consent of Instructor. Pass one restricted to Theatre and Dance majors. Source materials for theatrical costuming, selecting fabrics, elements of design, analysis of plays in terms of costume design, execution of designs for modern and period plays. GE credit: AH, OL, VL. Effective: 2018 Winter Quarter.

DRA 124E—Costume Design for Film (4)
Lecture/Discussion—4 hours. Prerequisite(s): Consent of Instructor. Pass One restricted to Theatre and Dance majors. Theory and practice of the art and business of film costume design. Script analysis, costume research,
developing design concepts, budgeting, and current production practices and methods. Execution of designs for period and contemporary films. Viewing of current films. (Same course as CTS 124E.) GE credit: AH, OL, VL. Effective: 2018 Winter Quarter.

**DRA 125—Scenic Painting: Studio (4)**
Laboratory—3 hours; Lecture—2 hours; Studio—1 hour. Prerequisite(s): DRA 024 or DRA 028; or Consent of Instructor. upper division standing in Theatre and Dance, Art Studio, or Design. Scene painting techniques, practices and materials including color mixing and matching, wood graining, faux painting techniques, glazing, creating foliage, stone and brick. May be repeated up to 1 time(s) with consent of instructor. GE credit: AH, VL. Effective: 2016 Spring Quarter.

**DRA 126—Principles of Performing Arts Stage Management (4)**
Laboratory—3 hours; Lecture/Discussion—3 hours. Stage management principles for theatre, dance, musical theatre, music, and concerts. The dynamical role of the stage manager in the performing arts, upper-management team. Effective: 2014 Fall Quarter.

**DRA 127A—Principles of Directing (4)**
Laboratory—4 hours; Lecture—2 hours. Prerequisite(s): Consent of Instructor. Director's creative approach to the play and to its staging. GE credit: VL. Effective: 2016 Spring Quarter.

**DRA 127B—Principles of Directing (4)**
Laboratory—4 hours; Lecture—2 hours; Rehearsal. Prerequisite(s): DRA 127A; or Consent of Instructor. Director's creative approach to the actor. GE credit: VL. Effective: 2016 Spring Quarter.

**DRA 128—Principles of Theatre Sound (3)**
Laboratory—3 hours; Lecture/Discussion—2 hours. Fundamentals of sound, sound equipment, and sound design as used in modern theatre and other performance venues. Assembly, set-up, and operation of basic theatre sound reinforcement system, recording system, and theatrical playback system. Effective: 2004 Winter Quarter.

**DRA 130—Approaches to Theatrical Design: Practice and Theory (4)**
Seminar—2 hours; Studio—4 hours. Prerequisite(s): DRA 124A or DRA 124B or DRA 124C or DRA 124D or DRA 124E; Upper division standing in Theatre and Dance, Art Studio or Design; or consent of instructor. Advanced design study in specific areas including but not limited to: research, design styles and concepts, new materials and techniques, scenery, lighting, costume, makeup, photography, projections, computer technology, spectacle and special effects, and alternative theatre forms and genres. May be repeated up to 3 time(s) when topic differs; when instructor differs. GE credit: AH, VL. Effective: 2016 Spring Quarter.

**DRA 135—Voice in Performance (2)**
Performance Instruction—4 hours. Prerequisite(s): DRA 021B; or Consent of Instructor. Progression of exercises to free, develop and strengthen the voice, as a human and then as an actor's instrument with emphasis on how the voice works, to freeing the channel for sound, to interpersonal communication. May be repeated up to 2 time(s). Effective: 2009 Fall Quarter.

**DRA 140A—Dance Composition (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): DRA 040A or DRA 041A or DRA 042A; or Consent of Instructor. Introduction to the craft of choreography. Compose phrases and present movement studies based on the elements of choreography: motivation, space, time, force/energy. GE credit: VL. Effective: 2016 Spring Quarter.

**DRA 140B—Dance Composition (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): DRA 140A Continuation of the study of choreography, focusing on the development of group choreography: duets, trios, quartets and group work, form, and accompaniment. Effective: 1999 Spring Quarter.

**DRA 140C—Dance Composition (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): DRA 140A; DRA 140B Continuation of study of choreography focusing on sequencing movements for groups. The relation between dance and allied mediums of music, sets, costumes and lighting. Students conceptualize a choreographic issue and explore it through creation of short dance studies. Effective: 1999 Spring Quarter.

**DRA 141—Introduction to the Fundamentals of Movement (4)**
Lecture/Discussion—4 hours. Introduction to fundamentals of movement that combines intellectual and kinesthetic understanding of the body's skeletal and muscular systems. Explorations based on theories of various body mind specialists including Laban, Feldenkrais, Bartenieff and Sweigard as well as the eastern discipline of Yoga. GE credit: VL. Effective: 2014 Fall Quarter.
DRA 142—History of Modern Dance (4)
Lecture/Discussion—4 hours. Modern Dance tradition, focusing on its theorizations of individual and social identity. Students will write and choreograph analyses of principle dances in this tradition. GE credit: AH, VL, WE. Effective: 2015 Winter Quarter.

DRA 143—Dance and Movement Studio (1-4)
Discussion/Laboratory—2-8 hours. Prerequisite(s): Consent of Instructor. Special studies in dance and movement such as African, Balinese, Baroque, Chinese, European, and stage combat. Offered as needed for stage productions. May be repeated up to 8 unit(s). GE credit: AH, VL. Effective: 2016 Spring Quarter.

DRA 144—Introduction to Traditional Chinese Physical Culture (4)
Lecture/Discussion—4 hours. Traditional Chinese Wushu practices, explored through practical work in dance laboratory conditions. Integration of practice with conceptual analysis; contemporary social, educational and artistic applications. GE credit: AH, SS. Effective: 2011 Fall Quarter.

DRA 144A—Introduction to Traditional Chinese Embodied Culture (4)
Lecture/Discussion—4 hours. Traditional Chinese Wushu practices, explored through practical work in dance laboratory conditions. Integration of practice with conceptual analysis; contemporary social, educational and artistic applications. GE credit: AH, DD, SS, VL, WC. Effective: 2014 Winter Quarter.

DRA 144B—Traditional Chinese Physical Culture (4)
Lecture/Discussion—4 hours. Prerequisite(s): DRA 144A Traditional Chinese Wushu practices, explored through practical work in dance laboratory conditions. Integration of practice with conceptual analysis; contemporary social, educational and artistic applications. May be repeated up to 2 time(s) when content and instructor varies and if student progression is required. GE credit: AH, DD, SS, VL, WC. Effective: 2014 Winter Quarter.

DRA 144C—Daoist Philosophy in Traditional Chinese Movement Culture (4)
Lecture/Discussion—4 hours. Prerequisite(s): DRA 144B Daoist practices of movement and their relation to daoist philosophy, explored through work in dance laboratory conditions. Integration of practice with conceptual analysis, and critical philosophy around values and ethical action. May be repeated up to 2 time(s) when content or instructor varies and if student progression is required. GE credit: AH, DD, SS, VL, WC. Effective: 2014 Winter Quarter.

DRA 145—Directed Choreography Projects (4)
Lecture/Lab—6 hours. Prerequisite(s): DRA 140A; DRA 140B; DRA 140C; or Consent of Instructor. Conceptualization, creation, casting, rehearsing, and concert presentation of complete dances, with students integrating elements of stagcraft and directing the on-stage rehearsals. Effective: 1999 Winter Quarter.

DRA 146A—Professional Track Modern Dance I (4)
Lecture/Lab—6 hours. Prerequisite(s): Consent of Instructor. Professionally oriented performance training. Rigorous, consistent training regimen based on traditional modern dance technique. Breath and voice, skeletal and muscular placement, moving from the spine, contraction technique, movement intention. May be repeated up to 2 time(s). GE credit: VL. Effective: 2016 Spring Quarter.

DRA 146B—Professional Track Modern Dance II (4)
Lecture/Lab—6 hours. Prerequisite(s): DRA 146A; and Consent of Instructor. Body and space relationships in solos, duets and group work; stylistic variations of Graham technique; works of Paul Taylor. May be repeated up to 1 time(s). GE credit: VL. Effective: 2016 Spring Quarter.

DRA 146C—Professional Track Modern Dance III (4)
Lecture/Lab—6 hours. Prerequisite(s): DRA 146A; DRA 146B; and Consent of Instructor. Continuation of course 146B. Time as a theatrical device, sustaining movement and non-movement, phrasing, musicality. May be repeated up to 1 time(s). GE credit: VL. Effective: 2017 Winter Quarter.

DRA 150—American Theatre and Drama (4)

DRA 151S—Australian Performance and Culture (4)

DRA 154—Asian Theatre and Drama: Contexts and Forms (4)
Lecture/Discussion—4 hours. Selected Asian plays and performance forms in their cultural and artistic contexts;
myth, ritual and the theatre; performance training, visual presentation of the text; political theatre; intercultural performance-the fusion of Asian and Western traditions. GE credit: AH, WC, WE. Effective: 2016 Spring Quarter.

DRA 155—Representing Race in Performance (4)
Lecture—4 hours. Representation and performance of "race" in American culture featuring different sub-headings such as "African American Theatre" or "Asian-Americans on Stage." May be repeated up to 1 time(s) when topic differs. GE credit: AH, DD, WE. Effective: 2012 Spring Quarter.

DRA 155A—African American Dance and Culture in the United States, Brazil and the Caribbean (4)
Lecture/Discussion—4 hours. Comparative study of the African American dance forms in the U.S.A., Brazil, Haiti, Cuba, Jamaica, Barbados, and Trinidad. Examination of ritual, folk, and popular dance forms and the socio/historical factors that have influenced these forms. (Same course as AAS 155A.) GE credit: AH, VL, WC. Effective: 2012 Fall Quarter.

DRA 155B—Ancient and Contemporary Greek Theatre and Dance (6)
Discussion/Laboratory—10 hours; Performance Instruction—10 hours; Seminar—13 hours. Origins of early theatres and the first actors, playwrights and dancers and their powerful influence on western performance and thought up to present day. Offered in Greece. GE credit: AH. Effective: 2011 Fall Quarter.

DRA 156AN—Performance Analysis (4)
Discussion—1 hour; Lecture—3 hours. Performance on the stage, in the street, in everyday life, ritual, and in politics. Satire, irony, creative protest and performance. Social movements, the state, and performance as tactical intervention. GE credit: AH, DD, WE. Effective: 2016 Spring Quarter.

DRA 156B—Theatre in History and Place: Local, National and Global Conditions for Production (4)
Discussion—1 hour; Lecture—3 hours. Exploration of local, national and global issues in theatre production, with special attention to historical changes in social and political contexts for performance. GE credit: AH, WC, WE. Effective: 2016 Spring Quarter.

DRA 156C—Modern Aesthetic Movements in Performance (4)
Discussion—1 hour; Discussion/Laboratory—3 hours. Important movements in performance, especially theatre and dance, from realism to the present. Primary emphasis on Western traditions though others may be studied. GE credit: AH, WE. Effective: 2017 Spring Quarter.

DRA 156D—Theatre History Through Shakespeare (4)
Extensive Writing; Lecture—4 hours. Shakespeare's plays, theatre history, and theatre today. European contexts from 1590-2004 and international theatre from 20th century. Stagecraft, different media (print, stage, film), social/political environments, design, and cultural change (gender, sexuality and ethnicity). May be repeated up to 1 time(s). GE credit: AH, OL, WC, WE. Effective: 2014 Spring Quarter.

DRA 158—Performance Studies Undergraduate Seminar (4)
Seminar—4 hours. Prerequisite(s): Consent of Instructor. DRA 156AN recommended. Focused inquiry into a particular genre, period, movement, artist, or theme in performance. Philosophical and aesthetic issues as well as historical and cultural performance contexts. In-depth research projects in relationship to the subject of inquiry. May be repeated for credit. GE credit: WE. Effective: 2014 Spring Quarter.

DRA 159—Contemporary Experimental Performance, Theatre and Drama (4)
Extensive Writing; Lecture/Discussion—3 hours. Evaluation and examination of the "New Theatre;" its experimental and innovative nature since the 1960s. Dance, film, stage, performance art and public acts of a performative nature. May be repeated up to 3 time(s) if content differs. GE credit: AH, DD, VL, WC, WE. Effective: 2014 Spring Quarter.

DRA 160A—Principles of Playwriting (4)
Lecture/Discussion—4 hours. Prerequisite(s): Consent of Instructor. Analysis of dramatic structure; preparation of scenarios; the composition of plays. GE credit: WE. Effective: 2018 Winter Quarter.

DRA 160B—Principles of Playwriting (4)
Lecture—4 hours. Prerequisite(s): DRA 160A; and Consent of Instructor. Analysis of dramatic structure; preparation of scenarios; the composition of plays. GE credit: WE. Effective: 2016 Spring Quarter.
DRA 170—Media Theatre (4)
Lecture—1 hour; Performance Instruction—1 hour; Rehearsal—2 hours. New media and application of in theatre devising and performance. Emphasis on collaborative process in relationship to integration of emerging technologies and formation of new theatrical works. Development of collaborative performance through lecture, demonstration, improvisation and experimentation. May be repeated up to 1 time(s). GE credit: AH, VL. Effective: 2017 Spring Quarter.

DRA 174—Acting for Camera (4)
Lecture/Lab—6 hours. Prerequisite(s): Consent of Instructor. Analysis and practice of acting skills required for camera work and digital media. May be repeated up to 8 unit(s) when instructor differs. (Same course as CTS 174.) Effective: 2013 Spring Quarter.

DRA 175—Small Scale Film Production (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): Consent of Instructor. Lecture and intensive workshop teaching small-scale film production. Appointments as a(n) director, director of photography, actor, writer, lighting designer, sound designer and other critical positions are used to produce and submit a short film to a film festival. May be repeated up to 2 time(s). (Same course as TCS 175.) Effective: 2011 Fall Quarter.

DRA 180—Theatre Laboratory (1-5)
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. Projects in acting, production, scene design, costuming, lighting, directing, and playwriting. Participation in departmental productions. May be repeated for credit. Effective: 2016 Spring Quarter.

DRA 180A—Theatre Laboratory: Performance (1-5)
Rehearsal—12 hours. Prerequisite(s): Consent of Instructor. Limited enrollment. Rehearsal and performance of a production directed or choreographed by visiting Granada Artists-in-Residence and/or faculty, and/or the UG Edge Festival. May be repeated for credit Since each production involves different scripts, directions, challenges of rehearsal practices and performance processes, it is possible for students to appear in a variety of productions in the course of their education. Admission by audition. Effective: 2013 Spring Quarter.

DRA 180B—Theatre Laboratory: Design (1-4)
Variable—1-4 hours. Prerequisite(s): Consent of Instructor. Design-related participation in theatre and dance productions involves research, creation and implementation of design concept in collaboration with the director and other members of the production team. May be repeated for credit Because each theatrical piece is conceived and produced afresh with new source material, scripts, and production style the challenges and assignments for the designers will be new each and every time they design a show. GE credit: AH, VL. Effective: 2016 Spring Quarter.

DRA 180C—Theatre Laboratory: Management, Directing, other Production Team (1-5) Review all entries
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. Participation in theatre and dance production in management, direction, choreography, dramaturgy, writing or other production related role; research, creation and implementation of production concept in collaboration with members of the production team and cast. May be repeated up to 5 unit(s) May repeat multiple times but only for a total of five units. Permission to repeat is required from the Dramatic Art department. Effective: 2014 Fall Quarter.

DRA 180D—Theatre Laboratory: Crew (2-4)
Laboratory—6-12 hours. Prerequisite(s): Consent of Instructor. Participation in theatre and dance productions as backstage running crew which will involve skill development, rehearsal and execution of performance. May be repeated for credit. Effective: 2013 Spring Quarter.

DRA 180E—Theatre Laboratory: Scenic (1-4)
Laboratory—3-12 hours. Prerequisite(s): Consent of Instructor. Practical experience working on scenery and properties for theatre and dance department productions. Study and execution of basic scenery and prop engineering, construction, painting, rigging. Study of techniques, materials, tools, and equipment use. Skill
development, professional etiquette. Safety training requirement. May be repeated for credit. Effective: 2013 Spring Quarter.

DRA 180F—Theatre Laboratory: Costume (1-4)
Laboratory—3-12 hours. Prerequisite(s): Consent of Instructor. Practical experience working on costumes for theatre and dance department productions. Study and execution of basic costume construction techniques and materials, tools, and equipment use. Skills development, professional etiquette. Safety training requirement. May be repeated for credit. Effective: 2013 Spring Quarter.

DRA 180G—Theatre Laboratory: Lighting/Sound/Projection (1-4)
Laboratory—3-12 hours. Prerequisite(s): Consent of Instructor. Practical experience working on lighting, sound or projections for theatre and dance department productions. Study and execution of basic techniques, materials, tools, and equipment use. Skill development, professional etiquette. Safety training requirement. May be repeated for credit. Effective: 2013 Spring Quarter.

DRA 192—Internships in Theatre and Dance (1-12)
Internship—3-36 hours. Theatre production experience in creative, technical or management areas. Experience in galleries, performance sites, or theatre/dance/physical theatre companies. May be repeated up to 12 unit(s). Not open to students who have completed DRA 192S. (P/NP grading only.) Effective: 2004 Fall Quarter.

DRA 192S—Internships in Theatre and Dance (1-12)
Internship—3-36 hours. Theatre production experience in creative, technical or management areas. Experience in galleries, performance sites, or theatre/dance/physical theatre companies. This course is offered in Sydney, Australia. May be repeated up to 12 unit(s). Not open to students who have completed DRA 192. (P/NP grading only.) Effective: 2005 Spring Quarter.

DRA 194HA—Special Study for Honors Students (3)
Independent Study—9 hours. Prerequisite(s): Qualification for Letters and Science Honors Program and admission to Theatre and Dance Senior Honors Program. Preparation and presentation of a culminating project, under the supervision of an instructor, in one of the creative or scholarly areas of Theatre and Dance. (P/NP grading only.) Effective: 2016 Spring Quarter.

DRA 194HB—Special Study for Honors Students (3)
Independent Study—9 hours. Prerequisite(s): Qualification for Letters and Science Honors Program and admission to Theatre and Dance Senior Honors Program. Preparation and presentation of a culminating project, under the supervision of an instructor, in one of the creative or scholarly areas of Theatre and Dance. Effective: 2016 Spring Quarter.

DRA 195—Senior Capstone Experience (2)
Lecture/Discussion—1 hour; Project (Term Project). Open to Theatre and Dance Majors who have completed 135 or more units. Capstone experience for majors. Examination, reflection and synthesis on development. Discussion of professional development and translatable skills. Individual project and development of portfolio. (P/NP grading only.) GE credit: AH, WE. Effective: 2016 Fall Quarter.

DRA 197T—Tutoring in Dramatic Art (1-5)
Tutorial—1-5 hours. Prerequisite(s): Consent of Instructor. Upper division or graduate standing with major in Theatre and Dance; consent of department chairperson. Leading of small voluntary groups affiliated with one of the department's regular courses. May be repeated for credit. (P/NP grading only.) Effective: 2016 Spring Quarter.

DRA 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

DRA 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

DRA 200—Methods and Materials in Theatre Research (4)
Seminar—3 hours; Term Paper. Essential research tools in theatre and related fields; bibliographies, primary sources; methods of evaluating and presenting evidence; delineating research areas in the field. Effective: 1997 Winter Quarter.

DRA 211—Advanced Voice and Speech (3)
Laboratory—2 hours; Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Open only to Dramatic Arts Students and Ph.D. students with an emphasis in Performance and Theatre. Review a progression of exercises to free, develop and strengthen the voice, first as a human instrument, and then as an actor's instrument using
DRA 212—Advanced Stage Movement (3)
Laboratory—6 hours. Prerequisite(s): Consent of Instructor. Graduate standing in the MFA Program. Open to advanced undergraduates by consent of instructor. Application of modes of exploration, breath placement, and the use of imagery as well as Laban's effort/shape system as a method of analysis in classic and modern plays. May be repeated for credit. Effective: 2016 Spring Quarter.

DRA 221—Special Problems in Advanced Acting (4)
Laboratory—4 hours; Seminar—2 hours. Prerequisite(s): Consent of Instructor. Advanced acting problems arising from differences in the type and style of plays selected from Greece to the present. May be repeated for credit. Effective: 1997 Winter Quarter.

Project (Term Project)—2 hours; Seminar—2 hours. Prerequisite(s): Consent of Instructor. Group study while focusing primarily on one discipline: scenic, costume or lighting design. Periods covered: Greek, Medieval, Renaissance, Shakespearean, Jacobean, early 17th century. Design projects include script analysis, research of period style, fashion, character development, developing design concepts, presentation skills. Effective: 2016 Spring Quarter.

DRA 224B—Seminar in Theatrical Design: Mid 17th Century to 1900 (4)
Project (Term Project)—2 hours; Seminar—2 hours. Prerequisite(s): Consent of Instructor. Group study focusing primarily on one discipline: scenic, costume or lighting design. Periods covered: Cavalier, Restoration 18th century opera and ballet, 19th century drama. Design projects include script analysis, research of period style, fashion, character development, developing design concepts, presentation skills. Effective: 2016 Spring Quarter.

DRA 224C—Seminar in Theatrical Design: the 20th Century (4)
Project (Term Project)—2 hours; Seminar—2 hours. Prerequisite(s): Consent of Instructor. Group study focusing primarily on one discipline-scenic, costume or lighting design. 20th century genres covered: Realism, Brecht, Musicals, Contemporary Dance, short narrative film. Design projects include script analysis, research of period style, fashion, character development, developing design concepts, presentation skills. Effective: 2016 Spring Quarter.

DRA 224D—Seminar in Theatrical Design: Contemporary Concepts (4)
Project (Term Project)—2 hours; Seminar—2 hours. Prerequisite(s): Consent of Instructor. Group study focusing primarily on one discipline: scenic, costume or lighting design. Emphasis on contemporary design concepts for new works and classics: Shakespeare, modern dance, concept plays and musicals. Script and character analysis for design in performance, research, design projects. Effective: 2016 Spring Quarter.

DRA 225—Performance Design Studio: Techniques and Media (2)
Studio—2 hours. Prerequisite(s): DRA 224A (can be concurrent) or DRA 224B (can be concurrent) or DRA 224C (can be concurrent) or DRA 224D (can be concurrent) or DRA 224E (can be concurrent); Consent of Instructor. Exploration and development of techniques and skills in the performance design process. Drafting, model building, drawing, painting and rendering, costume drawing, color theory, lighting techniques, design portfolio preparation and presentation. May be repeated up to 5 time(s). Effective: 2016 Spring Quarter.

DRA 228—Seminar in Directing Theory: Non-Realism (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. Modern directing theory as it applies to non-realistic theatre; development of directorial concepts for production of selected non-realistic plays-Greek to the present; emphasis on textual analysis. Effective: 2016 Spring Quarter.

DRA 229—Special Problems in Directing (4)
Laboratory—2 hours; Rehearsal—4 hours; Seminar—2 hours. Prerequisite(s): Consent of Instructor. Projects in directing scenes selected from plays from ancient Greece to the present. May be repeated up to 2 time(s). Effective: 2014 Spring Quarter.

DRA 230—Advanced Problems in Choreography and Performance (2)
Discussion/Laboratory—2 hours. Prerequisite(s): Consent of Instructor. Explores contemporary issues of
choreography and performance in depth and how those issues pertain to performance work. Focus will include contemporary thought on representation, legibility, new forms, and cultural attitudes. May be repeated up to 6 time(s). Effective: 2012 Winter Quarter.

**DRA 244—Critical Approaches to Traditional Systems of Body Movement (4)**
Discussion/Laboratory—6 hours; Project (Term Project); Term Paper. Prerequisite(s): Consent of Instructor. Introduction to traditional systems for body movement, development of critical approaches to them, and experiments in how they inform training and practice in theatre, dance, and performance. May be repeated up to 5 time(s). Effective: 2016 Fall Quarter.

**DRA 250—Modern Theatre (4)**
Seminar—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. Theatre of Europe and America, 1860-1940, with emphasis on the relationship of the dramas of the period to the physical circumstances under which they were produced. Effective: 2016 Spring Quarter.

**DRA 251—Scoring and Scripting in Performance (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): Consent of Instructor. Process of weaving together various performance elements brought into play by the artists in their respective disciplines. The "script" is the thread from which the artists' "scores" will layer and transform the "script" into performance for specific time, place, spectators. Effective: 2016 Spring Quarter.

**DRA 252—Performance: Concepts of Space, Place, and Time (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): Consent of Instructor. Innovative theories of creating performance spaces, establishing a sense of place, and communicating the concept of time explored through collaborative interaction. Research includes traditional principles, site-specific spaces and consideration of various tempi from music and movement. Effective: 2016 Spring Quarter.

**DRA 253—Approaches to Collaboration (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): Consent of Instructor. Exploration of different approaches to collaboration among artists in different media and their influence on the creative process. Effective: 2016 Spring Quarter.

**DRA 254—Performing Identities/Personae (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): Consent of Instructor. Historical and contemporary theories of constructing stage identities. Discussion and project collaborations based on theories. Questions of identity related to ethnicity, gender or sexual orientation. Effective: 2016 Spring Quarter.

**DRA 255—Composition in the Arts (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): Consent of Instructor. Examine manner in which specific elements utilized by actors, dancers, directors, choreographers, and designers are combined or related to form a whole in space and time, as well as methods of sequencing used by each discipline to produce artistic products. May be repeated up to 1 time(s). Effective: 2016 Spring Quarter.

**DRA 256—Visual Language for Performance (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): Consent of Instructor. Restricted to graduate students. Exploration of different approaches and methods to the visual elements of performance. Focus on design and style for different media and genres, storytelling through visual elements of performance. Effective: 2016 Spring Quarter.

**DRA 257—Interdisciplinary Seminar in Theatre, Dance and Performance (1)**
Project (Term Project)—1.5 hours; Seminar—1.5 hours. Prerequisite(s): Consent of Instructor. Restricted to students enrolled in the MFA in Dramatic Art; students taking the PhD in Performance Studies or the DE in Studies in Performance and Practice may apply to enroll. Interdisciplinary seminar for first and second year MFA students in Theatre and Dance. Topics range from current practice in dance, theatre, film and performance, to leading edge developments by outstanding practitioners in the field. May be repeated up to 2 time(s). Effective: 2017 Winter Quarter.

**DRA 259—Topics in Contemporary Theatre and Performance (4)**
Seminar—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. Special topics designed to study in depth aspects of contemporary performance including performance analysis, cultural and historical context, modes of production, theoretical and political entailments, and issues of spectatorship (e.g., "Brecht and After," "British Theater," "Race and Gender in Performance." May be repeated up to 5 time(s). Effective: 2016 Spring Quarter.

**DRA 260—Approaches and Methodologies to Studies in Performance and Practice (4)**
Project (Term Project); Seminar—3 hours; Term Paper. Prerequisite(s): Admission to any graduate program in the
University and consent of instructor. Preference to students enrolled in the Designated Emphasis in Studies in Performance and Practice. Instruction is offered a variety of disciplinary approaches and methodologies in Performance and Practice, with a focus on cross-disciplinary learning and research. Usually offered each quarter. May be repeated for credit when content differs. Effective: 2016 Fall Quarter.

**DRA 265A—Performance Studies: Modes of Production (4)**
Project (Term Project); Seminar—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. Introduces students to the literature of performance production in a variety of media: theatre, dance, film, video, computer-based, looking at cultural, aesthetic, rhetorical and political theory. Usually offered in alternate years. Maybe repeated for credit with different topical matter/instructor. May be repeated up to 3 time(s) when topic differs. Effective: 2016 Fall Quarter.

**DRA 265B—Performance Studies: Signification and the Body (4)**
Project (Term Project); Seminar—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. Introduces students to analysis of the body in performance, drawing on theoretical models from several fields. May be repeated up to 3 time(s) when topic differs. Effective: 2016 Fall Quarter.

**DRA 265C—Performance Studies: Performance and Society (4)**
Project (Term Project); Seminar—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. Introduces students to the role of performance (broadly defined), in everyday life, sociopolitical negotiation, identity, social movements, the media, and the state. May be repeated up to 3 time(s) when topic differs. Effective: 2016 Fall Quarter.

**DRA 265D—Performance Studies: Theory, History, Criticism (4)**
Project (Term Project); Seminar—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. Introduction to the theory, history and criticism, informing performance studies. May be repeated up to 3 time(s) when topic differs. Effective: 2016 Fall Quarter.

**DRA 280—Theatre Laboratory (1-12)**
Variable. Prerequisite(s): Consent of Instructor. Advanced practice in acting, designing, directing, playwriting, and technical theatre. May be repeated for credit. Effective: 2016 Fall Quarter.

**DRA 298—Group Study (1-5)**
Prerequisite(s): Consent of Instructor. Effective: 1997 Winter Quarter.

**DRA 299—Individual Study (1-12)**
Variable. Prerequisite(s): Consent of Instructor. Individual study. (S/U grading only.) Effective: 2016 Fall Quarter.

**DRA 299D—Dissertation Research (1-12)**
Variable. Prerequisite(s): Consent of Instructor. Dissertation research. (S/U grading only.) Effective: 2016 Fall Quarter.

**DRA 396—Teaching Assistant Training Practicum (1-4)**
Variable. Prerequisite(s): Consent of Instructor. May be repeated for credit. (P/NP grading only.) Effective: 2016 Spring Quarter.

**DRA 413—Stage Make-up (1)**
Lecture/Lab—2 hours. Prerequisite(s): Consent of Instructor. Approved for graduate degree credit. Lectures, demonstrations, and practical work in aspects of theatrical make-up. Effective: 1997 Winter Quarter.

**Faculty.** [http://geology.ucdavis.edu/people/faculty/index.php](http://geology.ucdavis.edu/people/faculty/index.php)

**Major Programs.** See Geology, Marine and Coastal Science, and Natural Sciences.

**Courses.** See courses listed under Geology.

**Earth & Planetary Sciences | GEL Courses**
Courses in GEL:

**GEL 001—The Earth (4)**  
Review all entries  
Discussion—1 hour; Lecture—3 hours. Introduction to the study of the Earth. Earth's physical and chemical structure; internal and surface processes that mold the Earth; geological hazards and resources. Not open for credit to students who have taken GEL 050; only 2 credits for students who have taken GEL 002. GE credit: SE, SL, WE. Effective: 2013 Fall Quarter.

**GEL 002—Earth System Science (3)**  
Lecture—3 hours. Solid and fluid earth and its place in the solar system. How the solid earth interacts with the atmosphere, hydrosphere, biosphere, and extraterrestrial environment. Only 2 units credit for students who have taken GEL 050; only 2 units credit for students who have taken GEL 001. GE credit: SE, SL. Effective: 2017 Winter Quarter.

**GEL 002G—The Blue Planet: Introduction to Earth Science - Discussion (1)**  
Discussion—1 hour. Prerequisite(s): GEL 002 (can be concurrent); GEL 002 required concurrently. Small group discussion and preparation of short papers for course 2. GE credit: SE. Effective: 2013 Fall Quarter.

**GEL 002G—Earth System Science Discussion (1)**  
Discussion—1 hour. Prerequisite(s): GEL 002 (can be concurrent); GEL 002 required concurrently. Small group discussion and preparation of short papers for GEL 002. GE credit: SE. Effective: 2018 Fall Quarter.

**GEL 003—History of Life (3)**  
Lecture—3 hours. Prerequisite(s): GEL 001 recommended. The history of life during the three and onehalf billion years from its origin to the present day. Origin of life and processes of evolution; how to visualize and understand living organisms from their fossil remains. GE credit: SE. Effective: 2013 Fall Quarter.

**GEL 003G—History of Life: Discussion (1)**  
Discussion—1 hour. Prerequisite(s): GEL 003 (can be concurrent); GEL 003 required concurrently. Small group discussion and preparation of short papers for course 3. GE credit with concurrent enrollment in course 3: Wrt. GE credit: SE, WE. Effective: 2013 Fall Quarter.

**GEL 003L—History of Life Laboratory (1)**  
Laboratory—3 hours. Prerequisite(s): GEL 003 (can be concurrent); GEL 003 required concurrently. Exercises in understanding fossils as the clues to interpreting ancient life, including their functional morphology, paleoecology, and evolution. GE credit: SE. Effective: 2013 Fall Quarter.

**GEL 004—Evolution: Science and World View (3)**  
Discussion—1 hour; Lecture—2 hours. Introduction to biological evolution. Emphasis on historical development, major lines of evidence and causes of evolution; relationships between evolution and Earth history; the impact of evolutionary thought on other disciplines. GE credit: SE, SL, WE. Effective: 2013 Fall Quarter.

**GEL 009—Geology Field Experience (1)**  
Fieldwork—1 session. Prerequisite(s): Consent of Instructor. At least one previous GEL class, or concurrent enrollment. Pass One open to non-Geology Majors only. Exposure to geologic features and earth processes in the field. Experiential instruction in earth-science concepts, spatial visualization, landscape evolution, deep time, critical thinking skills, and integrative scientific themes. One 4-5 day field trip. May be repeated up to 1 time(s) when field trip destination differs. (P/NP grading only.) GE credit: SE. Effective: 2018 Fall Quarter.

**GEL 010—Modern and Ancient Global Environmental Change (3)**  
Lecture—3 hours. Fundamental scientific concepts underlying issues such as global warming, pollution, and the future of nonsustainable resources presented in the context of anthropogenic processes as well as natural forcing of paleoenvironmental change throughout Earth's history. GE credit: SE, SL, VL. Effective: 2013 Fall Quarter.

**GEL 012—Evolution and Paleobiology of Dinosaurs (2)**  
Lecture—2 hours. Introduction to evolutionary biology, paleobiology, ecology and paleoecology, using dinosaurs as case studies. GE credit: SE. Effective: 2013 Fall Quarter.
GEL 016—The Oceans (3)
Lecture—3 hours. Introductory survey of the marine environment. Oceanic physical phenomena, chemical constituents and chemistry of water, geological history, the seas biota and human utilization of marine resources. Not open for credit to students who have taken GEL 116. GE credit: SE, SL. Effective: 2013 Fall Quarter.

GEL 016G—The Oceans: Discussion (2)
Discussion/Laboratory—2 hours; Term Paper/Discussion—4 hours. Prerequisite(s): GEL 016 (can be concurrent) Scientific method applied to discovery of the processes, biota and history of the oceans. Group discussion and preparation of term paper. Not open for credit to students who have taken GEL 116G. GE credit: SE, WE. Effective: 2016 Fall Quarter.

GEL 017—Earthquakes and Other Earth Hazards (2)
Lecture—2 hours. Impact of earthquakes, tsunami, volcanoes, landslides, and floods on humans, structures, and the environment. Discussion of the causes and effects of disasters and catastrophes, and on prediction, preparation, and mitigation of natural hazards. GE credit: SE, SL. Effective: 2013 Fall Quarter.

GEL 018—Energy and the Environment (3)

GEL 018V—Energy and the Environment (3)
Web Electronic Discussion—1.5 hours; Web Virtual Lecture—1.5 hours. Conventional and alternative energy resources and their environmental impacts. Basic principles, historical development, current advantages and disadvantages, future prospects. Oil, natural gas, coal, nuclear, wind, geothermal, water, tidal, solar, hydrogen, and other sources of energy for the 21st century. GE credit: SE, SL, WE. Effective: 2015 Spring Quarter.

GEL 020—Geology of California (2)
Lecture—2 hours. The geologic history of California, the origin of rocks and the environments in which they were formed, the structure of the rocks and the interpretation of their structural history, mineral resources, and appreciation of the California landscape. Offered in alternate years. GE credit: SE, SL, VL. Effective: 2013 Fall Quarter.

GEL 025—Geology of National Parks (3)
Lecture—3 hours. Appreciation of the geologic framework underlying the inherent beauty of U.S. National Parks. Relationship of individual parks to geologic processes such as mountain building, volcanism, stream erosion, glacial action and landscape evolution. GE credit: SE, SL, VL. Effective: 2014 Winter Quarter.

GEL 025V—Geology of National Parks (3)
Web Electronic Discussion—2 hours; Web Virtual Lecture—1 hour. Appreciation of the geologic framework underlying the inherent beauty of U.S. National Parks. Relationship of individual parks to geologic processes such as mountain building, volcanism, stream erosion, glacial action and landscape evolution. No credit for students who have completed GEL 025. GE credit: SE. Effective: 2015 Spring Quarter.

GEL 028—Astrobiology (3)

GEL 030—Fractals, Chaos and Complexity (3)
Lecture/Discussion—3 hours. Prerequisite(s): MAT 016A or MAT 021A Modern ideas about the unifying ideas of fractal geometry, chaos and complexity. Basic theory and applications with examples from physics, earth sciences, mathematics, population dynamics, ecology, history, economics, biology, computer science, art and architecture. Offered in alternate years. (Same course as PHY 030.) GE credit: QL, SE. Effective: 2013 Fall Quarter.

GEL 032—Volcanoes (3)
Lecture—3 hours. Role of eruptions, and eruptive products of volcanoes in shaping the planet's surface, influencing its environment, and providing essential human resources. GE credit: SE. Effective: 2013 Fall Quarter.

GEL 035—Rivers (3)
Lecture—3 hours. Introduction to geomorphology, climate and geology of rivers and watersheds, with case examples from California. Assessment of impacts of logging, agriculture, mining, urbanization and water supply on river processes. Optional river field trips. GE credit: SE, SL. Effective: 2013 Fall Quarter.
GEL 036—The Solar System (4)
Discussion—1 hour; Lecture—3 hours. Nature of the sun, moon, and planets as determined by recent manned and unmanned exploration of the solar system. Comparison of terrestrial, lunar, and planetary geological processes. Search for life on other planets. Origin and evolution of the solar system. (Former course 113-113G.) GE credit: SE, VL, WE. Effective: 2013 Fall Quarter.

GEL 050—Physical Geology (3)
Lecture—3 hours. Prerequisite(s): High school physics and chemistry. The Earth, its materials, its internal and external processes, its development through time by sea-floor spreading and global plate tectonics. Students with credit for GEL 001 or the equivalent may receive only 2 units for GEL 050. GE credit: SE, SL. Effective: 2013 Fall Quarter.

GEL 050L—Physical Geology Laboratory (2)
Laboratory—6 hours. Prerequisite(s): GEL 050 (can be concurrent) Introduction to classification and recognition of minerals and rocks and to interpretation of topographic and geologic maps and aerial photographs. Students with credit for GEL 001L or the equivalent may receive only 1 unit for GEL 050L. GE credit: SE. Effective: 2016 Fall Quarter.

GEL 055—Introduction to Geochemistry (3)
Lecture—3 hours. Prerequisite(s): (GEL 001 or GEL 002 or GEL 050); (CHE 002A or CHE 002AH); (CHE 002B or CHE 002BH) Introduction to key geochemical principles in Earth & Planetary Sciences; chemical bonding, geochemical affinity of elements, redox & acid base equilibria in geological systems, radioactive decay, isotopic fractionation and paleoclimate records. GE credit: QL, SE, VL. Effective: 2020 Winter Quarter.

GEL 056—Introduction to Geophysics (4)
Laboratory—2 hours; Lecture/Discussion—3 hours. Prerequisite(s): (GEL 001 or GEL 050); (PHY 007B or PHY 009B) Introduction to geophysical topics essential to all aspects of Earth and planetary sciences: theory of plate tectonics, gravitational field of planets, diffusion, rheology, seismology, and earthquakes. GE credit: QL, SE, VL. Effective: 2019 Spring Quarter.

GEL 060—Earth Materials: Introduction (4) Review all entries
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): CHE 002A; (MAT 016A or MAT 017A or MAT 021A); (GEL 001 or GEL 050, GEL 050L) Physical and chemical properties of rocks, minerals and other earth materials; structure and composition of rock-forming minerals; formation of minerals by precipitation from silicate liquids and aqueous fluids and by solid state transformations. GE credit: SE. Effective: 2016 Fall Quarter.

GEL 062—Optical Mineralogy (2)
Laboratory—3 hours; Lecture—1 hour. Prerequisite(s): GEL 060 (can be concurrent) Optical properties of inorganic crystals; techniques of mineral identification using the polarizing microscope; strategies for studying rocks in thin section. GE credit: SE, VL. Effective: 2016 Fall Quarter.

GEL 081—Learning in Science and Mathematics (2)
Fieldwork—2 hours; Lecture/Discussion—2 hours. Limited to 26 students per section. Exploration of how students learn and develop understanding in science and mathematics classrooms. Introduction to case studies and interview techniques and their use in K-6 classrooms to illuminate factors that affect student learning. (Same course as EDU 081.) (P/NP grading only.) GE credit: SS, VL, WE. Effective: 2013 Fall Quarter.

GEL 092—Internship (1-12)
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Lower division standing. Work-learn experience on and off campus in all subject areas offered by the department. Internships supervised by a member of the faculty. May be repeated up to 12 unit(s). (P/NP grading only.) GE credit: SE. Effective: 2013 Fall Quarter.

GEL 098—Directed Group Study (1-5)
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. Directed group study. May be repeated up to 3 time(s) content changes. (P/NP grading only.) GE credit: SE. Effective: 2013 Fall Quarter.
GEL 099—Special Study for Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. Lower division standing. Special study for undergraduates. (P/NP grading only.) GE credit: SE. Effective: 2013 Fall Quarter.

GEL 101—Structural Geology (3)
Lecture—3 hours. Prerequisite(s): GEL 050; GEL 050L; (PHY 007A or PHY 009A); (MAT 016A or MAT 017A or MAT 021A); Consent of Instructor. Class size limited to 35 students. Study of processes and products of rock deformation. Introduction to structural geology through a survey of the features and geometries of faults and folds, techniques of strain analysis, and continuum mechanics of rock deformation. GE credit: SE. Effective: 2016 Fall Quarter.

GEL 101L—Structural Geology Lab (2)
Fieldwork—2 hours; Laboratory—6 hours. Prerequisite(s): GEL 050; GEL 050L; (PHY 007A or PHY 009A); GEL 101 (can be concurrent); Consent of Instructor. Class size limited to 15 students per session. Laboratory study of the processes and products of rock deformation. Introduction to the practice of structural geology through observations and analysis of rock deformation, including field measurement techniques and geologic mapping. GE credit: SE, VL. Effective: 2016 Fall Quarter.

GEL 103—Field Geology (3) Review all entries
Fieldwork; Laboratory. Prerequisite(s): GEL 101L; GEL 101; Consent of Instructor. Field mapping projects and writing geological reports. Weekly classroom meetings devoted to preparation of maps, cross sections, stratigraphic sections, rock descriptions, and reports. Seven-eight days on weekends during quarter. GE credit: SE, VL, WE. Effective: 2016 Fall Quarter.

GEL 103—Field Geology (4) Review all entries
Fieldwork—6 hours; Lecture—1 hour; Term Paper. Prerequisite(s): GEL 101; GEL 101L Field mapping projects and writing geological reports. Weekly classroom meetings devoted to preparation of maps, cross sections, stratigraphic sections, rock descriptions, and reports. Seven-eight days for field trips will occur on weekends during the quarter. GE credit: SE, VL, WE. Effective: 2016 Fall Quarter.

GEL 105—Earth Materials: Igneous Rocks (4)
Laboratory—6 hours; Lecture—2 hours. Prerequisite(s): GEL 060; GEL 062; (MAT 016A or MAT 017A or MAT 021A); CHE 002B (can be concurrent) Origin and occurrence of igneous rocks. Laboratory exercises emphasize the study of these rocks in hand specimen and thin section. GE credit: SE, WE. Effective: 2016 Fall Quarter.

GEL 106—Earth Materials: Metamorphic Rocks (4)
Laboratory—6 hours; Lecture—2 hours. Prerequisite(s): GEL 105 Physical and chemical properties of metamorphic rocks; interpretation of metamorphic environments. Laboratory exercises emphasize the study of these rocks in hand specimen and thin section. GE credit: SE, WE. Effective: 2016 Fall Quarter.

GEL 107—Earth History: Paleobiology (3)
Lecture—3 hours. Prerequisite(s): GEL 003 or BIS 002A or BIS 010 Evolution and ecological structure of the biosphere from the origin of life to the present. GE credit: SE. Effective: 2016 Fall Quarter.

GEL 107L—Earth History: Paleobiology Laboratory (2)
Laboratory—6 hours. Prerequisite(s): (GEL 003, GEL 003L) or BIS 002B; GEL 107 (can be concurrent) Exercises in determining the ecological functions and evolution of individuals, populations, and communities of fossil organisms in field and laboratory. GE credit: SE. Effective: 2016 Fall Quarter.

GEL 108—Earth History: Paleoclimates (3)
Lecture—3 hours. Prerequisite(s): (GEL 001 or GEL 050 or GEL 116N or ESP 116N); CHE 002A; Consent of Instructor. Geological and environmental factors controlling climate change, the greenhouse effect with a detailed analysis of the history of Earth's climate fluctuations over the last 600 million years. Past and present climate records are used to examine potential future climatic scenarios. GE credit: SE, SL, WE. Effective: 2016 Fall Quarter.

GEL 109—Earth History: Sediments and Strata (2) Review all entries
Lecture—2 hours. Prerequisite(s): GEL 050; GEL 050L Principles of stratigraphic and sedimentologic analysis. Evaluation of historical and modern global changes in sedimentation within terrestrial and marine environments. Examination of the plate tectonic, climatic and oceanographic factors controlling the distribution and exploitation of economic fluids within sedimentary rocks. GE credit: SE. Effective: 2016 Fall Quarter.

GEL 109—Earth History: Sediments and Strata (3) Review all entries
Lecture—3 hours. Prerequisite(s): (GEL 001 or GEL 050); GEL 050L Sediment formation, transport, and deposition. Interpretations of sedimentary processes across landscapes and through time in the context of environmental and
geological problems. Reconstruction of ancient environmental change from sedimentary rocks. GE credit: SE. Effective: 2019 Fall Quarter.

GEL 109L—Earth History: Sediments and Strata Laboratory (2)
Laboratory—6 hours. Prerequisite(s): GEL 109 (can be concurrent) Methods of stratigraphic and sedimentologic analysis of modern and ancient sediments. Identification of major sediment and sedimentary rock types. Outcrop and subsurface analysis of sedimentary basins. GE credit with concurrent enrollment in course 109. Includes four one-day field trips. GE credit: SE, WE. Effective: 2016 Fall Quarter.

GEL 110—Summer Field Geology (8)
Fieldwork. Prerequisite(s): GEL 060; GEL 103; GEL 109; GEL 105 recommended. Advanced application of geologic and geophysical field methods to the study of rocks. Includes development and interpretation of geologic maps and cross sections; gravity, magnetic, electrical resistivity and seismic surveys; and field analysis of plutonic and volcanic rock suites. Eight hours/day, six days/week for six weeks. GE credit: SE, VL, WE. Effective: 2017 Spring Quarter.

GEL 115—Earth Science, History, and People (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): GEL 001 or GEL 050 Study of interplay between the Earth and its human inhabitants through history, including consideration of acute events such as earthquakes and eruptions as well as the geology of resources, topography, and water. GE credit: OL, SE, WE. Effective: 2017 Winter Quarter.

GEL 116N—Oceanography (3)
Fieldwork; Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): GEL 001 or GEL 002 or GEL 016 or GEL 050 Advanced oceanographic topics: Chemical, physical, geological, and biological processes; research methods and data analysis; marine resources, anthropogenic impacts, and climate change; integrated earth/ocean/atmosphere systems; weekly lab and one weekend field trip. (Same course as ESP 116N.) GE credit: SE, SL. Effective: 2017 Winter Quarter.

GEL 120—Origins: From the Big Bang to Today (3)
Lecture—3 hours. Limited enrollment. Long-term and large-scale perspectives on the origins of the universe, stars and planets, life, human evolution, the rise of civilization and the modern world. Multi-disciplinary approach to ‘Big History’ involving cosmology, astronomy, geology, climatology, biology, anthropology, archeology and traditional history. GE credit: SE. Effective: 2013 Fall Quarter.

GEL 130—Non-Renewable Natural Resources (3)
Lecture—3 hours. Prerequisite(s): GEL 001 or GEL 050 Origin, occurrence, and distribution of non-renewable resources, including metallic, nonmetallic, and energy-producing materials. Problems of discovery, production, and management. Estimations and limitations of reserves, and their sociological, political, and economic effects. GE credit: SE, SL. Effective: 2016 Fall Quarter.

GEL 131—Risk: Natural Hazards and Related Phenomena (3)
Lecture—3 hours. Risk, prediction, prevention and response for earthquakes, volcanic eruptions, landslides, floods, storms, fires, impacts, global warming. GE credit: SE, SL. Effective: 2016 Fall Quarter.

GEL 132—Introductory Inorganic Geochemistry (3)
Lecture—3 hours. Prerequisite(s): GEL 060 (can be concurrent); CHE 002B Nucleosynthesis of chemical elements, physical and chemical properties of elements, ionic substitution, elemental partition, distribution and transport among planetary materials, basic thermodynamics and phase diagrams, isotopic geochronometers, stable isotope fractionation, mixing and dilution, advection and diffusion, geochemical cycles. Effective: 2016 Fall Quarter.

GEL 133—Environmental Geochemistry (3)
Lecture—3 hours. Prerequisite(s): CHE 002A; CHE 002B Introduction to Earth surface processes with a focus on topics of current environmental interest such as nuclear power and waste disposal, acid mine drainage, carbon sequestration, history of polar ice sheets and sea level change. Effective: 2020 Spring Quarter.

GEL 134—Environmental Geology and Land Use Planning (3)
Lecture—3 hours. Prerequisite(s): GEL 001 or GEL 050; Consent of Instructor. One course in Geology. Geologic aspects of land use and development planning. Geologic problems concerning volcanic and earthquake hazards, land stability, floods, erosion, coastal hazards, non-renewable resource extraction, waste disposal, water resources. GE credit: SE, WE. Effective: 2016 Fall Quarter.

GEL 136—Ecogeomorphology of Rivers and Streams (5)
Discussion/Laboratory—2 hours; Fieldwork; Lecture—1 hour; Term Paper. Prerequisite(s): Consent of Instructor. Upper division or graduate standing in any physical science, biological science, or engineering. Restricted to
advanced students in the physical sciences, biological sciences, or engineering. Integrative multidisciplinary field
analysis of streams. Class project examines hydrology, geomorphology, water quality and aquatic and riparian
ecology of degraded and pristine stream systems. Includes cooperative two-week field survey in remote wilderness
settings with students from diverse scientific backgrounds. GE credit: SE, WE. Effective: 2013 Fall Quarter.

GEL 138—Introductory Volcanology (4)
Fieldwork—6 hours; Lecture—2 hours. Prerequisite(s): GEL 060; GEL 109; Consent of Instructor. Principles of
physical and chemical volcanology. Taught in a volcanically active setting (e.g., Hawaii) with a strong field
component. GE credit: SE. Effective: 2016 Fall Quarter.

GEL 139—Rivers: Form, Function and Management (4)
Fieldwork—3 hours; Lecture—3 hours. Prerequisite(s): GEL 050 or GEL 050L; MAT 016B or 021B recommended.
Analysis of river form and processes, emphasis on fluvial geomorphology, and river and stream restoration; case
studies to illustrate concepts and applications. Two weekend field trips required. Offered irregularly. GE credit: SE.
Effective: 2016 Fall Quarter.

GEL 140—Introduction to Process Geomorphology (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): (GEL 001 or GEL 050); (MAT 016B or MAT 021B) Quantitative
description and interpretation of landscapes with emphasis on the relationships between physical processes, mass
conservation, and landform evolution. Topics covered include physical and chemical weathering, hillslopes, debris
flows, fluvial systems, alluvial fans, pedogenesis, eolian transport, glaciation and Quaternary geochronology.
Effective: 2016 Fall Quarter.

GEL 141—Evolutionary History of Vertebrates (3)
Lecture—3 hours. Prerequisite(s): GEL 003 or BIS 002A Evolutionary history of vertebrates; fossil record and
phylogeny; timing of major evolutionary events; appearance of major vertebrate groups; physical constraints in
vertebrate evolution; paleobiogeography of vertebrates; effect of continental movement on vertebrate evolution;
dinosaurs and other strange vertebrates. Offered in alternate years. GE credit: SE. Effective: 2016 Fall Quarter.

GEL 141L—Evolutionary History of Vertebrates Laboratory (1)
Laboratory—3 hours. Prerequisite(s): GEL 141 (can be concurrent) Augments lecture course 141 through handling of
specimens enabling in-person examination of three dimensional features observed in vertebrate skeletons, both
fossil and living. Offered in alternate years. GE credit: SE. Effective: 2016 Fall Quarter.

GEL 142—Basin Analysis (3)
Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): GEL 050; GEL 050L; GEL 109 Analysis of sedimentary
basins from initiation to maturity, including controls on sedimentary fill, subsidence analysis, sequence stratigraphy,
core logs, and applications to petroleum exploration and hydrology. One two-day field trip. Offered irregularly. GE
credit: SE, VL. Effective: 2013 Fall Quarter.

GEL 143—Advanced Igneous Petrology (5)
Laboratory—6 hours; Lecture—3 hours. Prerequisite(s): GEL 105; (MAT 016C or MAT 021C); CHE 002C Physical and
chemical properties of magmatic environments and processes of igneous rock formation. Laboratory study of
representative igneous rocks. Offered irregularly. GE credit: SE. Effective: 2013 Fall Quarter.

GEL 144—Historical Ecology (3)
Lecture—3 hours. Prerequisite(s): Upper division course in environmental science or ecology, or an introductory
course in paleobiology. Ancient ecosystems and the factors that caused them to change. Species, expansion,
evolution of new modes of life, geologically induced variations in resource supply, and extinction provide historical
perspective on the biosphere of future. GE credit: SE, WE. Effective: 2013 Fall Quarter.

GEL 145—Advanced Metamorphic Petrology (5)
Laboratory—6 hours; Lecture—3 hours. Prerequisite(s): GEL 106; (HYD 134 or CHE 002C); (MAT 016C or MAT 021C)
Metamorphic processes and the origin of metamorphic rocks. Laboratory study of representative rock suites.
Offered irregularly. GE credit: SE. Effective: 2013 Fall Quarter.

GEL 146—Radiogenic Isotope Geochemistry and Cosmochemistry (3)
Lecture—3 hours. Prerequisite(s): CHE 002C; PHY 007C; MAT 016C Basic principles of nuclear chemistry and
physics applied to geology to determine the ages of terrestrial rocks, meteorites, archeological objects, age of the
Earth, to trace geological/environmental processes, and explain formation of the chemical elements in the
Universe. Offered irregularly. GE credit: QL, SE. Effective: 2013 Fall Quarter.

GEL 147—Geology of Ore Deposits (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): (CHE 002C or HYD 134); GEL 060; GEL 062; GEL 105
Tectonic, lithologic and geochemical setting of major metallic ore deposit types emphasizing ore deposit genesis, water/rock interaction and the environmental effects of mining. Offered irregularly. GE credit: QL, SE. Effective: 2013 Fall Quarter.

**GEL 148—Stable Isotopes and Geochemical Tracers (3)**
Lecture—3 hours. Prerequisite(s): (CHE 002C or HYD 134); GEL 050; GEL 050L; GEL 060 Use of oxygen and hydrogen isotopes in defining hydrologic processes; carbon, nitrogen, and sulfur isotopes as indicators of exchange between the lithosphere, hydrosphere, atmosphere and biosphere. Radiogenic, cosmogenic, and noble gas isotope tracers. Offered irregularly. GE credit: QL, SE. Effective: 2013 Fall Quarter.

**GEL 149—Geothermal Systems (3)**
Fieldwork; Lecture—3 hours. Prerequisite(s): GEL 050; GEL 050L; CHE 002B Geology, geochemistry, and geophysics of geothermal systems, including electrical power generation and direct use applications. Includes one day field trip on a weekend during the quarter. Offered irregularly. GE credit: QL, SE. Effective: 2016 Fall Quarter.

**GEL 150A—Physical and Chemical Oceanography (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ESP 116N or GEL 116N); PHY 009B; MAT 021D; CHE 002C; and Consent of Instructor. Physical and chemical properties of seawater, fluid dynamics, air-sea interaction, currents, waves, tides, mixing, major oceanic geochemical cycles. (Same course as ESO 150A.) GE credit: QL, SE. Effective: 2017 Winter Quarter.

**GEL 150B—Geological Oceanography (3)**
Lecture—3 hours. Prerequisite(s): GEL 050 or (GEL 116N or ESP 116N) Introduction to the origin and geologic evolution of ocean basins. Composition and structure of oceanic crust; marine volcanism; and deposition of marine sediments. Interpretation of geologic history of the ocean floor in terms of sea-floor spreading theory. (Same course as ESP 150B.) GE credit: SE. Effective: 2017 Winter Quarter.

**GEL 150C—Biological Oceanography (4)**
Discussion—1 hour; Fieldwork; Lecture—3 hours. Prerequisite(s): BIS 002A; Consent of Instructor. A course in general ecology. Ecology of major marine habitats, including intertidal, shelf benthic, deep-sea and plankton communities. Existing knowledge and contemporary issues in research. Segment devoted to human use. One weekend field trip required. (Same course as ESP 150C.) GE credit: SE, SL. Effective: 2017 Winter Quarter.

**GEL 152—Paleobiology of Protista (4)**
Laboratory—6 hours; Lecture—2 hours. Prerequisite(s): GEL 107 or BIS 002A; Consent of Instructor. Morphology, systematics, evolution, and ecology of single-celled organisms that are preserved in the fossil record. Offered irregularly. GE credit: SE. Effective: 2016 Fall Quarter.

**GEL 156—Hydrogeology and Contaminant Transport (5)**
Laboratory—3 hours; Lecture—3 hours; Term Paper—1 hour. Prerequisite(s): HYD 145; ECI 144; Or equivalent of ECI 144. Physical and chemical processes affecting groundwater flow and contaminant transport, with emphasis on realistic hydrogeologic systems. Groundwater geology and chemistry. Fundamentals of groundwater flow and transport analysis. Laboratory includes field pumping test and work with physical and computer models. (Same course as HYD 146.) GE credit: SE. Effective: 2013 Fall Quarter.

**GEL 160—Geological Data Analysis (3)**
Lecture/Discussion—3 hours. Prerequisite(s): MAT 021A Introduction to quantitative methods in analyzing geological data including basic principles of statistics and probability, error analysis, hypothesis testing, inverse theory, time series analysis and directional data analyses. Use of computer in lectures and homework. GE credit: QL, SE. Effective: 2016 Fall Quarter.

**GEL 161—Geophysical Field Methods (3)**
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): MAT 021C; (GEL 001 or GEL 050); (PHY 007C or PHY 009C) Geophysical methods applied to determining subsurface structure in tectonics, hydrogeology, geotechnical engineering, hydrocarbon and mineral exploration. Theory, survey design and interpretation of gravity, electrical resistivity, electromagnetic, reflection and refraction seismology, and ground-penetrating radar measurements. GE credit: QL, SE. Effective: 2016 Fall Quarter.

**GEL 162—Geophysics of the Solid Earth (3)**
Lecture—3 hours. Prerequisite(s): MAT 021C; (PHY 007C or PHY 009C); Consent of Instructor. Theory and use of physics in the study of the solid earth. Gravity, magnetism, paleomagnetism, and heat flow. Application to the interpretation of the regional and large-scale structure of the earth and to plate tectonics. Offered irregularly. GE credit: QL, SE. Effective: 2016 Fall Quarter.
GEL 163—Planetary Geology and Geophysics (3) Review all entries
Lecture—3 hours. Prerequisite(s): MAT 021C; (PHY 007C or PHY 009C); (GEL 050 or GEL 036 or AST 010G or AST 010L or AST 010S); Consent of Instructor. Principles of planetary science. Planetary dynamics, including orbital mechanics, tidal interactions and ring dynamics. Theory of planetary interiors, gravitational fields, rotational dynamics. Physics of planetary atmospheres. Geological processes, landforms and their modification. Methods of analysis from Earth-based observations and spacecraft. GE credit: QL, SE. Effective: 2016 Fall Quarter.

GEL 163—Planetary Geology and Geophysics (3) Review all entries
Lecture—3 hours. Prerequisite(s): (GEL 001 or GEL 002 or GEL 028 or GEL 036 or GEL 050 or AST 010G or AST 010L or AST 010S or AST 025); (MAT 016A or MAT 017A or MAT 021A); (PHY 007A or PHY 009A); or High School Physics. Principles of planetary science. Planetary dynamics, including orbital mechanics, tidal interactions and ring dynamics. Theory of planetary interiors, gravitational fields, rotational dynamics. Physics of planetary atmospheres. Geological processes, landforms and their modification. Methods of analysis from Earth-based observations and spacecraft. GE credit: QL, SE. Effective: 2019 Winter Quarter.

GEL 175—Advanced Field Geology (3)
Discussion—3 hours; Fieldwork—6 hours. Prerequisite(s): Consent of Instructor. Advanced field studies of selected geologic terrains, interpretation and discussion of field observations. Offered irregularly. May be repeated up to 2 times when instructors vary. (P/NP grading only.) GE credit: SE. Effective: 2013 Fall Quarter.

GEL 181—Teaching in Science and Mathematics (2)
Fieldwork—2 hours; Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Major in mathematics, science, or engineering; or completion of a one-year sequence of science or calculus. Class size limited to 40 students per section. Exploration of effective teaching practices based on examination of how middle school students learn math and science. Selected readings, discussion and field experience in middle school classrooms. (Same course as EDU 181.) (P/NP grading only.) GE credit: SS, WE. Effective: 2013 Fall Quarter.

GEL 182—Field Studies in Marine Geochemistry (2-8)
Fieldwork—6-40 hours; Laboratory—1-3 hours; Lecture—3 hours. Prerequisite(s): Consent of Instructor. Marine geochemistry with the opportunity of going to sea or into the field on land. Techniques of sea-floor mapping using bottom photography, marine geochemical sampling, and method of data reduction and sample analysis. Analysis of data/samples collected. Offered irregularly. GE credit: SS, WE. Effective: 2013 Fall Quarter.

GEL 183—Teaching High School Mathematics and Science (3) Review all entries
Fieldwork; Lecture/Discussion—2 hours. Prerequisite(s): Major in mathematics, science, or engineering; or consent of instructor with completion of a one-year sequence of science or calculus. Limited to 40 students per section. Exploration and creation of effective teaching practices based on examination of how high school students learn mathematics and science. Field experience in high school classrooms. (Same course as Education 183.) GE credit: OL, SS, WE. Effective: 2017 Fall Quarter.

GEL 183—Teaching High School Mathematics and Science (3) Review all entries
Fieldwork; Lecture/Discussion—2 hours. Prerequisite(s): Major in mathematics, science, or engineering; or completion of a one-year sequence of science or calculus and consent of the instructor. Limited to 40 students per section. Exploration and creation of effective teaching practices based on examination of how high school students learn mathematics and science. Field experience in high school classrooms. (Same course as EDU 183.) GE credit: OL, SS, WE. Effective: 2018 Fall Quarter.

GEL 185A—Conceptual Integrated Science for Non-Science Majors: The Physical World (2)

GEL 185B—Conceptual Integrated Science for Non-Science Majors: Earth System Science (2)
Discussion/Laboratory—3 hours; Lecture—1 hour. Conceptual, inquiry-based integrated science course. Topics in the Next Generation Science Standards. Elementary school level teaching practice. Earth, space and environmental science, and science inquiry. GE credit: SE, SL. Effective: 2016 Fall Quarter.

GEL 186—Facilitating Learning in STEM Classrooms (1)
Lecture/Discussion—1 hour. STEM Learning Assistant Seminar. Theoretical and practical issues of effective teaching in discussion/labs: student-centered, active, cooperative learning environments, responsive teaching, and differentiated classroom instruction. GE credit: SS. Effective: 2016 Fall Quarter.
GEL 190—Seminar in Geology (1)
Discussion—1 hour; Seminar—1 hour. Presentation and discussion of current topics in geology by visiting lecturers, staff, and students. Written abstracts. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 2016 Fall Quarter.

GEL 192—Internship in Geology (1-12)
Internship. Prerequisite(s): Upper division standing; project approval prior to internship. Supervised work experience in geology. May be repeated for credit for a total of 10 units. May be repeated up to 10 unit(s). (P/NP grading only.) GE credit: SE. Effective: 2013 Fall Quarter.

GEL 194A—Senior Thesis (3)
Variable. Prerequisite(s): Open to Geology majors who have completed 135 units and who do not qualify for the Honors Program. Guided independent study of a selected topic, leading to the writing of a senior thesis. GE credit: SE, WE. Effective: 2013 Fall Quarter.

GEL 194B—Senior Thesis (3)
Variable. Prerequisite(s): Open to Geology majors who have completed 135 units and who do not qualify for the Honors Program. Guided independent study of a selected topic, leading to the writing of a senior thesis. GE credit: SE, WE. Effective: 2013 Fall Quarter.

GEL 194HA—Senior Honors Project (3)
Independent Study—9 hours. Prerequisite(s): Open to Geology majors who have completed 135 units and who qualify for the Honors Program. Guided independent study of a selected topic, leading to the writing of an honors thesis. GE credit: SE, WE. Effective: 2013 Fall Quarter.

GEL 194HB—Senior Honors Project (3)
Independent Study—9 hours. Prerequisite(s): Open to Geology majors who have completed 135 units and who qualify for the Honors Program. Guided independent study of a selected topic, leading to the writing of an honors thesis. GE credit: SE, WE. Effective: 2013 Fall Quarter.

GEL 198—Directed Group Study (1-5)
Variable—3-15 hours. Prerequisite(s): Senior standing in Geology or consent of instructor. Group study focused on topics in Geology. (P/NP grading only.) GE credit: SE. Effective: 2016 Spring Quarter.

GEL 199—Special Study for Advanced Undergraduates (1-5)
Variable. Special study for advanced undergraduates. (P/NP grading only.) GE credit: SE. Effective: 2013 Fall Quarter.

GEL 205—Advanced Field Stratigraphy (3)
Fieldwork—2 hours; Lecture—1 hour. Prerequisite(s): GEL 109; GEL 110; or Consent of Instructor. GEL 206 recommended. Fieldwork over spring break. Application of stratigraphic techniques to research problems. Collection, compilation, and interpretation of field data. Integration of data with models for deposition and interpretations of Earth history. Topics will vary. Offered irregularly. May be repeated for credit. Effective: 2013 Fall Quarter.

GEL 206—Stratigraphic Analysis (3)
Lecture—3 hours. Prerequisite(s): GEL 109; GEL 109L; or Consent of Instructor. GEL 144 recommended. Topics in advanced methods of stratigraphic analysis, regional stratigraphy and sedimentation, and sedimentary basin analysis. Emphasis on techniques used to interpret stratigraphic record and on current issues in stratigraphy and sedimentation. Offered irregularly. May be repeated for credit when topic differs. Effective: 2013 Fall Quarter.

GEL 214—Active Tectonics (3)
Lecture/Discussion—3 hours. Prerequisite(s): Graduate standing or consent of instructor. Active deformation associated with faults, landslides, and volcanoes. Geodetic measurement techniques such as triangulation, trilateration, leveling, Global Positioning System (GPS), and radar interferometry. GPS data acquisition and analysis. Inversion of geodetic data and mechanical models of crustal deformation. Offered irregularly. Effective: 2013 Fall Quarter.

GEL 216—Tectonics (3)
Lecture/Discussion—3 hours. Prerequisite(s): GEL 101; or Consent of Instructor. Nature and evolution of tectonic features of the Earth. Causes, consequences, and evolution of plate motion, with selected examples from the Earth's deformed belts. Offered irregularly. Effective: 2013 Fall Quarter.
GEL 217—Topics in Geophysics (3)
Lecture—1 hour; Seminar—2 hours. Prerequisite(s): Consent of Instructor. Discussion and evaluation of current research in a given area of geophysics. Topic will change from year to year. Offered in alternate years. May be repeated for credit. Effective: 2013 Fall Quarter.

GEL 218—Analysis of Structures in Deformed Rocks (3)
Seminar—3 hours. Prerequisite(s): GEL 100; GEL 100L; GEL 101; GEL 101L; GEL 170; or Consent of Instructor. Recent advances in the understanding and analysis of structures in brittlely and ductilely deformed rocks. Detailed investigation of the characteristics of the structures, models for their formation, and applications to inferring the kinematics of larger scale tectonics. Offered irregularly. Effective: 2013 Fall Quarter.

GEL 219—Fracture and Flow of Rocks (3)
Lecture—3 hours. Prerequisite(s): GEL 100; GEL 101; or Consent of Instructor. Origins of those structures in rocks associated with brittle and ductile deformation. Theoretical analysis, using continuum mechanics, and experimental evidence for the origin of the structures with emphasis on deformational processes in the earth. Offered irregularly. Effective: 2013 Fall Quarter.

GEL 220—Mechanics of Geologic Structures (3)
Lecture—3 hours. Prerequisite(s): MAT 021C; (PHY 009A; or PHY 005A); GEL 170; or Consent of Instructor; MAT 021D and MAT 022A recommended. Development in tensor notation of the balance laws of continuum mechanics, and constitutive theories of elasticity, viscosity, and plasticity and their application to understanding development of geologic structures such as fractures, faults, dikes, folds, foliations, and boudinage. Offered irregularly. Effective: 2013 Fall Quarter.

GEL 226—Advanced Sedimentary Petrology (3)
Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): GEL 144; or Consent of Instructor. Advanced petrography and geochemistry of sediments and sedimentary rocks. Geochemical, textural and mineralogical evolution of sedimentary rocks reflecting depositional or burial processes. Laboratory work emphasizes thin section study of rocks. Offered irregularly. May be repeated for credit when topic differs. Effective: 2013 Fall Quarter.

GEL 227—Stable Isotopes Biogeochemistry (4)
Laboratory—6 hours; Lecture—2 hours. Prerequisite(s): Consent of Instructor. Graduate standing. Discussion and application of stable isotope techniques for scientific research problems. Course emphasizes carbon, oxygen, nitrogen, hydrogen and sulfur isotopes. Laboratory will develop basic skills of cryogenic gas extraction and specific techniques for individual research using stable isotopes. Offered irregularly. Effective: 2013 Fall Quarter.

GEL 228—Topics in Paleoceanography (3)
Lecture—3 hours. Prerequisite(s): GEL 108; GEL 150A; or Consent of Instructor. Critical discussion and review of selected topics in paleoceanography and paleoclimatology relating to the history of the processes controlling and affecting climate change and ocean circulation throughout the geologic record. Topics vary. Offered irregularly. May be repeated for credit. Effective: 2013 Fall Quarter.

GEL 230—Geomorphology and River Management (3)
Seminar—3 hours. Prerequisite(s): GEL 139; Or equivalent; graduate standing. Impacts of management and land use activities on the geomorphology of rivers and streams. Evaluation and use of analytical tools for river assessment. Assessment of river and stream restoration strategies and emerging issues in river management. May be repeated for credit when topic differs. Effective: 2013 Fall Quarter.

GEL 232—The Oceans and Climate Change (3)
Lecture/Discussion—3 hours. Prerequisite(s): Graduate standing or consent of instructor. Modern climate change and linkages between the ocean-atmosphere-cryosphere-terrestrial climate system. Importance of the ocean in forcing climate change, and the impacts of anthropogenic processes on the ocean. Topics vary. Offered irregularly. May be repeated up to 3 time(s). Effective: 2013 Fall Quarter.

GEL 235—Surface Processes (3)
Seminar—3 hours. Prerequisite(s): GEL 050; GEL 050L; GEL 139; MAT 021B or MAT 016B recommended. Recent advances in the analysis of landforms and their evolution. Detailed investigation of the tools used to document surface processes. Evaluation of concepts and processes that govern landscape evolution. Offered irregularly. May be repeated for credit. Effective: 2013 Fall Quarter.

GEL 236—Inverse Theory in Geology and Geophysics (3)
Lecture—3 hours. Prerequisite(s): Consent of Instructor. Inversion of data for model parameters. Evaluation of

GEL 238—Theoretical Seismology (3)
Lecture—3 hours. Prerequisite(s): Consent of Instructor. Elastodynamic wave equation. Greens functions and source representations. Ray theory. Plane and spherical waves and boundary conditions. Elastic wave propagation in stratified media. (P/F grading only.) Effective: 2013 Fall Quarter.

GEL 240—Geophysics of the Earth (3)

GEL 241—Geomagnetism (3)

GEL 242—Paleomagnetism (3)

GEL 246—Physical Chemistry of Metamorphic Processes (3)
Lecture—3 hours. Prerequisite(s): GEL 145; CHE 110A; or Consent of Instructor. Physiochemical principles of metamorphic mineral assemblages and methods of interpreting the paragenesis of metamorphic rocks. Offered irregularly. Effective: 2013 Fall Quarter.

GEL 247—Metamorphic Petrology Seminar (3)
Seminar—3 hours. Prerequisite(s): GEL 145; or Consent of Instructor. GEL 246 recommended. Selected topics in metamorphic petrology (e.g., mass transport processes, tectonic settings, geothermometry, thermal structure of metamorphic belts, regional studies). Offered irregularly. May be repeated for credit. (S/U grading only.) Effective: 2013 Fall Quarter.

GEL 250—Advanced Geochemistry Seminar (3)
Seminar—3 hours. Prerequisite(s): GEL 146; or Consent of Instructor. Critical review of selected topics in geochemistry including: ore genesis, hydrothermal and geothermal fluids, recent and ancient sediments, isotope geology, origin and chemistry of the oceans. Subject varies yearly depending on student interest. May be repeated for credit. May be repeated for credit. Effective: 2013 Fall Quarter.

GEL 251—Advanced Topics in Isotope Geochemistry and Cosmochemistry (3)
Lecture/Discussion—2 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Astrophysical context on origin of Solar System, synthesis of chemical elements, condensation sequence, star and planet formation, cosmochronology, building blocks of planets, development on planets' layered structure, atmosphere and hydrosphere and the role of comets/asteroids for volatile delivery. Offered irregularly. May be repeated up to 3 times when topics differs. Effective: 2013 Fall Quarter.

GEL 253—Current Topics in Igneous Petrology (3)
Seminar—3 hours. Prerequisite(s): GEL 143; or Consent of Instructor. Graduate standing in Geology. Topical seminar designed to help graduate students develop and maintain familiarity with current and past literature related to igneous rock petrogenesis. May be repeated for credit when topic differs. May be repeated for credit when topic differs. (S/U grading only.) Effective: 2013 Fall Quarter.

GEL 254—Physical Chemistry of Igneous Processes (3)
Lecture—3 hours. Prerequisite(s): CHE 110A; GEL 143; and Consent of Instructor. GEL 143 or consent of instructor; CHE 110B and CHE 110C recommended. Introduction of modern concepts in chemical thermodynamics and kinetics, and fluid dynamics of magmatic systems for graduate students in petrology. Offered irregularly. Effective: 2013 Fall Quarter.

GEL 255—Experimental Petrology (3)
Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): GEL 143; or Consent of Instructor. Introduction to techniques
and methods of design and executing experiments on Earth-forming minerals and rocks. Problems and examples from igneous and metamorphic petrology will be utilized. Offered irregularly. Effective: 2013 Fall Quarter.

**GEL 260—Paleontology (3)**
Seminar—3 hours. Prerequisite(s): Graduate standing in geology or a biological science. Selected problems in paleontology. Subject to be studied will be decided at an organizational meeting. Offered irregularly. May be repeated for credit when topic differs. Effective: 2013 Fall Quarter.

**GEL 261—Paleobiology Graduate Seminar 1: Evolutionary aspects (3)**
Lecture—1 hour; Seminar—2 hours. Prerequisite(s): Graduate standing in Geology or a biological science; qualified undergraduates will be accepted on an exception-only basis. This course will treat one or more of several topics in paleobiology from a phylogenetic perspective, including major patterns in evolution, building the tree of life, extinction and phylogeny, phylogeny of major phyla, and the relation between taxonomy and phylogeny. May be repeated for credit when topic varies. Effective: 2013 Fall Quarter.

**GEL 262—Paleobiology Graduate Seminar: Methodological aspects (3)**
Lecture—1 hour; Seminar—2 hours. One or more major methods used in the study of fossils: Morphometrics and three-dimensional reconstruction of fossils, phylogenetic methodology, the application of geochemical techniques, and electron microscopy. May be repeated up to 4 time(s) topic varies. Effective: 2013 Fall Quarter.

**GEL 281N—Instrumental Techniques for Earth Scientists (3)**
Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): MAT 021A; MAT 021B; MAT 021C; ((PHY 007A, PHY 007B, PHY 007C) or (PHY 009A, PHY 009B, PHY 009C)); or Consent of Instructor. Laboratory research techniques for new graduate students in Geology. Demonstration of and exposure to appropriate techniques in research. Effective: 2013 Fall Quarter.

**GEL 285—Field Studies in Marine Geochemistry (2-8)**
Fieldwork—6-40 hours; Laboratory—1-3 hours; Lecture—3 hours. Prerequisite(s): Consent of Instructor. Marine geochemistry with the opportunity of going to sea or into the field on land. Techniques of seafloor mapping using bottom photography, marine geochemical sampling, and method of data reduction and sample analysis. Analysis of data/samples collected. Effective: 2013 Fall Quarter.

**GEL 290—Seminar in Geology (1)**
Discussion—1 hour; Seminar—1 hour. Presentation and discussion of current topics in geology by visiting lecturers, staff, and students. (S/U grading only.) Effective: 2013 Fall Quarter.

**GEL 291—Geology of the Sierra Nevada (1)**
Seminar. Prerequisite(s): Consent of Instructor. Short oral presentations by students and faculty concerning results of their past work and plans for future work in the Sierra. A written abstract is required following the format required at professional meetings. Offered irregularly. (S/U grading only.) Effective: 2013 Fall Quarter.

**GEL 292—River Forum (1)**
Seminar—1 hour. Prerequisite(s): Graduate standing. Review and discussion of latest research and fundamental issues surrounding riverine systems, with emphasis on physical processes. Topics vary. Offered irregularly. (S/U grading only.) Effective: 2013 Fall Quarter.

**GEL 293—Geologic Event of the Week (1)**
Discussion—0.5 hours; Seminar—0.5 hours. Prerequisite(s): Graduate standing. Seminar/discussion group to review and discuss recent earthquakes, volcanic eruptions, and other significant geologic events. The focus is on understanding the available observations, the physical processes behind each event, the geological setting, and societal consequences. Offered irregularly. May be repeated up to 3 time(s) for up to 3 units. (S/U grading only.) Effective: 2013 Fall Quarter.

**GEL 294—Structure/Tectonics Forum (1)**
Seminar—1 hour. Prerequisite(s): Graduate student in geology or consent of instructor. Seminar/discussion group to review and discuss latest research in structural geology and tectonics, and on-going research of participants. Topics will vary each quarter depending on the interests of the group. Occasional field trips to areas of current interest. May be repeated for credit when topic differs. (S/U grading only.) Effective: 2013 Fall Quarter.

**GEL 295—Geophysics Forum (1)**
Discussion—0.5 hours; Seminar—0.5 hours. Prerequisite(s): GEL 100; GEL 101; or Consent of Instructor. Seminar/discussion group to review and discuss latest research in geophysics, and on-going research of participants. Topics will change each quarter depending on the interests of the group. Offered irregularly. May be repeated for credit when topic differs. (S/U grading only.) Effective: 2013 Fall Quarter.
GEL 296—Advanced Problems in Tectonics (3)
Seminar—3 hours. Prerequisite(s): GEL 101; and Consent of Instructor. Seminar dealing with current problems in tectonics of selected regions. Topics will change from year to year. Emphasis on study of recent literature. Offered irregularly. May be repeated for credit. (S/U grading only.) Effective: 2013 Fall Quarter.

GEL 297—Geophysics Forum (1)
Discussion—0.5 hours; Seminar—0.5 hours. Prerequisite(s): Graduate student status in the Geology Department, or consent of instructor. Seminar/discussion group to review and discuss latest research in geophysics, and on-going research of participants. Topics will change each quarter depending on the interests of the group. Offered irregularly. May be repeated up to 3 time(s). (S/U grading only.) Effective: 2013 Fall Quarter.

GEL 298—Group Study (1-5)
Variable. Group study. Effective: 2013 Fall Quarter.

GEL 299—Research (1-12)
Variable. Research. (S/U grading only.) Effective: 2013 Fall Quarter.

GEL 390—Methods of Teaching Geology (2)
Extensive Writing/Discussion—2 hours. Prerequisite(s): Graduate student standing in Geology. Introduction to graduate-level writing and undergraduate-level teaching skills in geology. Persuasive (proposal) writing workshop; discussions on campus teaching resources, presenting information, managing classroom dynamics, evaluating student performance. Participation in teaching program required for Ph.D. in Geology. (S/U grading only.) Effective: 2014 Spring Quarter.

GEL 391—Ethical Issues in Earth Science (1)
Seminar—1 hour. Prerequisite(s): Graduate standing in Geology or consent of instructor. Reading and discussion of ethical issues arising in the earth sciences. Topics include scientific misconduct, gender equity in science, authorship of scientific papers, establishing priorities in research, and related issues. Offered irregularly. (S/U grading only.) Effective: 2013 Fall Quarter.

GEL 396—Teaching Assistant Training Practicum (1-4)
Variable. Teaching assistant training. May be repeated for credit. (P/NP grading only.) Effective: 2013 Fall Quarter.

Faculty. https://ealc.ucdavis.edu/people

The Major Program
The department offers a core language program in both Chinese and Japanese, and courses in literature and culture. The core language program in Chinese has two tracks: one for students who have no background whatsoever and one for students with prior language background.

East Asian Languages & Cultures | CHN Courses

Courses in CHN:
CHN 001—Elementary Chinese (5)
Lecture/Discussion—5 hours. Prerequisite(s): No background in Chinese or placement exam or consent of instructor. Developing elementary level skills of listening, speaking, reading and writing in Mandarin Chinese in everyday communication settings. Introduction of fundamentals of pronunciation, grammar, and Chinese characters will be introduced. GE credit: AH, OL, WC. Effective: 2016 Fall Quarter.
CHN 001A—Accelerated Intensive Elementary Chinese (15)
Lecture/Discussion—15 hours. Prerequisite(s): No background in Chinese or placement exam or consent of instructor. Introduction and practice in contexts of pronunciation, writing system, basic grammar and vocabulary as basis of communicative competency in Mandarin Chinese within a special nine-week intensive course which combines courses 1, 2 and 3. Not open for credit to students who have completed CHN 001, CHN 002, or CHN 003. GE credit: AH, OL, WC. Effective: 2016 Fall Quarter.

CHN 001BL—Accelerated Written Chinese I (5)
Lecture—5 hours. Prerequisite(s): Placement exam or consent of instructor. Trainings on all the communicative skills of listening, speaking, reading, and writing for students who already have elementary level ability to understand or speak Mandarin Chinese. Emphases on standard Mandarin pronunciation, Chinese characters, and discourse level conversations. Not open for credit to students who have completed CHN 008. GE credit: AH, OL, WC. Effective: 2016 Fall Quarter.

CHN 001CN—Mandarin for Cantonese Speakers I (5)
Lecture—5 hours. Prerequisite(s): Placement exam or consent of instructor. Training in spoken Mandarin, particularly in the phonetic transcription system known as pinyin, for students who already read and write Chinese. Not open for credit to students who have completed CHN 007. GE credit: AH, OL, WC. Effective: 2016 Fall Quarter.

CHN 002—Elementary Chinese (5)
Lecture/Discussion—5 hours. Prerequisite(s): CHN 001; Or placement exam or consent of instructor. Continuation of elementary level skill development in listening, speaking, reading and writing Mandarin Chinese in everyday communication settings. Continued introduction of basic vocabulary and characters as well as core grammar, and further train pronunciation. GE credit: AH, OL, WC. Effective: 2016 Fall Quarter.

CHN 002BL—Accelerated Written Chinese II (5)
Lecture—5 hours. Prerequisite(s): CHN 001BL; Or placement exam or consent of instructor. Further trainings on all the communicative skills of listening, speaking, reading, and writing for students that already have elementary level ability to understand or speak Mandarin Chinese. Emphases on standard Mandarin pronunciation, Chinese characters, and discourse level conversations. Not open for credit to students who have completed CHN 018. GE credit: AH, OL, WC. Effective: 2016 Spring Quarter.

CHN 002CN—Mandarin for Cantonese Speakers II (5)
Lecture—5 hours. Prerequisite(s): CHN 001CN; Or placement exam or consent of instructor. Continuation of course 1CN. Training in spoken Mandarin for students who can already read and write Chinese. Not open for credit to students who have completed CHN 017. GE credit: AH, OL, WC. Effective: 2016 Spring Quarter.

CHN 003—Elementary Chinese (5)
Lecture/Discussion—5 hours. Prerequisite(s): CHN 002; Or placement exam or consent of instructor. Continuation of elementary level skill development in listening, speaking, reading and writing Mandarin Chinese in everyday communication settings. Continued introduction of basic vocabulary and characters as well as core grammar, and further train pronunciation. GE credit: AH, OL, WC. Effective: 2016 Spring Quarter.

CHN 003BL—Accelerated Written Chinese III (5)
Lecture—5 hours. Prerequisite(s): CHN 002BL; Or placement exam or consent of instructor. Continuation of course 2BL with further trainings on all the communicative skills of listening, speaking, reading, and writing with emphases on standard Mandarin pronunciation, Chinese characters, and discourse level conversations in more communication settings. Not open for credit to students who have completed CHN 028. GE credit: AH, OL, WC. Effective: 2016 Spring Quarter.

CHN 003CN—Mandarin for Cantonese Speakers III (5)
Lecture—5 hours. Prerequisite(s): CHN 002CN; Or placement exam or consent of instructor. Continuation of course 2CN. Prepares students for entering upper division courses in Chinese. Not open for credit to students who have completed CHN 027. GE credit: AH, OL, WC. Effective: 2016 Spring Quarter.

CHN 004—Intermediate Chinese (5)
Lecture/Discussion—5 hours. Prerequisite(s): CHN 003 or placement exam or consent of instructor. Continuation of intermediate-level communication skills in spoken and written Mandarin, based on language skills developed in course 3. GE credit: AH, OL, WC. Effective: 2016 Spring Quarter.

CHN 004A—Accelerated Intensive Intermediate Chinese (15)
Lecture/Discussion—15 hours. Prerequisite(s): CHN 003 or CHN 001A or placement exam or consent of instructor. Special nine-week accelerated, intensive summer session course that combines the work of courses 4, 5, and 6.
Intermediate-level training in spoken and written Chinese in cultural and communicative contexts, based on language skills developed in course 3 or 1A. Not open to students who have completed CHN 004, CHN 005, or CHN 006. GE credit: AH, OL, WC. Effective: 2016 Spring Quarter.

CHN 005—Intermediate Chinese (5)
Lecture/Discussion—5 hours. Prerequisite(s): CHN 004 or placement exam or consent of instructor. Training continues at intermediate-level in spoken and written Chinese in cultural contexts, based on language skills developed in course 4. GE credit: AH, OL, WC. Effective: 2016 Spring Quarter.

CHN 006—Intermediate Chinese (5)
Lecture/Discussion—5 hours. Prerequisite(s): CHN 005; CHN 005 or placement exam or consent of instructor. Intermediate-level training in spoken and written Chinese in cultural contexts, based on language skills developed in course 5. GE credit: AH, OL, WC. Effective: 2016 Spring Quarter.

CHN 007—Chinese Business Culture (4)
Lecture/Discussion—4 hours. Prerequisite(s): Consent of Instructor. Open to non-heritage students who have no prior knowledge of, or background in, the Chinese language; anyone who has taken Chinese language classes before or after being enrolled at UC Davis, or anyone who is currently enrolled in a Chinese language class, or who speaks any Mandarin or Chinese dialect (e.g., Cantonese), cannot take the course for credit without the instructor's permission. Introduction to business culture of China. Basic conversation and Romanization of Chinese words. GE credit: AH, OL, SS, WC. Effective: 2015 Winter Quarter.

CHN 010—Modern Chinese Literature (In English) (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Introductory course requiring no knowledge of Chinese language or history. Reading and discussion of short stories and novels and viewing of two films. Designed to convey a feeling for what China has experienced in the twentieth century. Not open for credit to students who have already taken, or are taking concurrently, CHN 104. GE credit: AH, WC. Effective: 2008 Spring Quarter.

CHN 011—Great Books of China (in English) (4)
Discussion—1 hour; Lecture—3 hours. Selected readings in English translation are supplemented with background information on periods, authors and the interrelationships of culture, literature and social change. Methods of analysis are introduced and applied in class discussions. GE credit: AH, WC. Effective: 1997 Winter Quarter.

CHN 050—Introduction to the Literature of China and Japan (4)
Lecture/Discussion—4 hours. Methods of literary analysis and their application to major works from the various genres of Chinese and Japanese literature (in translation), including film. East Asian cultural traditions will also be introduced. (Same course as JPN 050.) GE credit: AH, WC. Effective: 1997 Winter Quarter.

CHN 098—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

CHN 099—Special Study for Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

CHN 100A—Chinese Intellectual Traditions: Daoist Traditions (4)
Lecture/Discussion—4 hours. Prerequisite(s): A course in Chinese history recommended. English-language survey of key Daoist texts and scholarship. Topics include Daoist concepts of the cosmos, the natural world, scripture, the body, and immortality; Daoist divinities; Daoism and the state. (Same course as RST 175A.) GE credit: AH, WC. Effective: 2016 Spring Quarter.

CHN 100B—Confucian Traditions (4)
Lecture/Discussion—4 hours. Key aspects of the Confucian tradition in dynastic China. Major themes addressed include ritual, classical studies, and Confucian influences on the Chinese family and state. GE credit: AH, WC. Effective: 2014 Fall Quarter.

CHN 101—Chinese Film (4)
Film Viewing—3 hours; Lecture/Discussion—3 hours. English language survey of Chinese film, from its inception to the end of the twentieth century. Chinese films as important texts for understanding national, transnational, racial, gender, and class politics of modern China. (Same course as CTS 147A.) GE credit: AH, VL, WC. Effective: 2016 Spring Quarter.

CHN 102—Chinese American Literature (In English) (4)
Lecture/Discussion—3 hours; Term Paper/Discussion—1 hour. English language survey of Chinese American literature which reflects cultural roots in China before immigration and the diaspora experience in the United States.
after immigration. Memory, nostalgia, national identities, cross-cultural communication, globalization, and transnational politics. GE credit: AH, WC. Effective: 2016 Spring Quarter.

**CHN 103—Modern Chinese Drama (4)**

**CHN 104—Modern Chinese Fiction (in English) (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. English language survey of Chinese fiction as it evolved amidst the great historical, social and cultural changes of the twentieth century. Thorough study of the most influential writers and genres. GE credit: AH, WC. Effective: 2016 Fall Quarter.

**CHN 105—Western Influences on Twentieth-Century Chinese Literature (in English) (4)**
Discussion—1 hour; Lecture—3 hours. Introduction of Western literary thought into modern China, the experimentation with Western literary forms and techniques, and the development of Marxism in contemporary literary writing. GE credit: AH, WC. Effective: 2016 Spring Quarter.

**CHN 106—Chinese Poetry (in English) (4)**
Discussion—1 hour; Lecture—3 hours. Organized topically and chronologically, the lyric tradition is explored from the dawn of folk songs down to modern expressions of social protest. Topics include friendship, love, oppression, war, parting, death, ecstasy and beauty. All readings are in English. GE credit: AH, WC. Effective: 2016 Spring Quarter.

**CHN 107—Traditional Chinese Fiction (in English) (4)**
Discussion—1 hour; Lecture—3 hours. English-language course studying the dawn of Chinese fiction and its development down to modern times. Combines survey history with close reading of representative works such as *The Story of the Stone* and famous Ming-Qing short stories. GE credit: AH, WC. Effective: 2016 Spring Quarter.

**CHN 108—Poetry of China and Japan (in English) (4)**
Discussion—1 hour; Lecture—3 hours. A comparative approach to Chinese and Japanese poetry, examining poetic practice in the two cultures; includes a general outline of the two traditions, plus study of poetic forms, techniques, and distinct treatments of universal themes: love, nature, war, etc. (Same course as JPN 108.) GE credit: AH, WC. Effective: 1997 Winter Quarter.

**CHN 109A—Topics in Chinese Literature; Crime and Punishment (4)**
Discussion—1 hour; Lecture—3 hours. Topics in Chinese literature; crime and punishment. GE credit: AH, WC. Effective: 2016 Spring Quarter.

**CHN 109C—Topics in Chinese Literature; Women Writers (in English) (4)**
Discussion—1 hour; Lecture—3 hours. Topics in Chinese literature; women writers. GE credit: AH, WC. Effective: 2016 Spring Quarter.

**CHN 109D—Topics in Chinese Literature; The Knight-Errant (in English) (4)**
Discussion—1 hour; Lecture—3 hours. Topics in Chinese literature; the knight-errant. GE credit: AH, WC. Effective: 2016 Spring Quarter.

**CHN 109E—Topics in Chinese Literature; The City in Fiction (in English) (4)**
Discussion—1 hour; Lecture—3 hours. Topics in Chinese literature; the city in fiction. GE credit: AH, WC. Effective: 2016 Spring Quarter.

**CHN 109G—Topics in Chinese Literature; The Literature of Twentieth-Century Taiwan (in English) (4)**
Discussion—1 hour; Lecture—3 hours. Topics in Chinese literature; the literature of twentieth-century Taiwan. GE credit: AH, WC. Effective: 2016 Spring Quarter.

**CHN 109H—Topics in Chinese Literature; Popular Literature (in English) (4)**
Discussion—1 hour; Lecture—3 hours. Topics in Chinese literature; popular literature. GE credit: AH, WC. Effective: 2016 Spring Quarter.

**CHN 109I—Topics in Chinese Literature; Scholar & The Courtesan (in English) (4)**
Discussion—1 hour; Lecture—3 hours. Topics in Chinese literature; the scholar and the courtesan. GE credit: AH, WC. Effective: 2016 Spring Quarter.

**CHN 110—Great Writers of China: Texts and Context (in English) (4)**
Discussion—1 hour; Lecture—3 hours. Examination of major theoretical concepts and interpretive methods in the study of literature by using examples from the Chinese tradition; discussions of classical and modern works with an
emphasis on the relations between literature, author, society, and culture. GE credit: AH, WC. Effective: 2017 Spring Quarter.

CHN 111—Modern Chinese: Reading and Discussion (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): CHN 006 C- or better or CHN 003BL C- or better or CHN 004A C- or better; Or placement exam or consent of instructor. Building on Chinese 6/3BL, further development of communication skills in Modern Standard Mandarin-speaking environments. Reading of dialogues/articles pertaining to contemporary China. GE credit: AH, OL, WC. Effective: 2017 Spring Quarter.

CHN 111A—Intensive Third-Year Chinese (12)
Lecture/Discussion—13.3 hours. Prerequisite(s): CHN 006 or CHN 003BL or CHN 004A; Or placement exam or consent of instructor. Not open to students who have completed course 111, 112, or 113. Nine-week intensive summer course combines courses 111, 112, and 113. Training at intermediate-high and advanced-low level in spoken and written Chinese in cultural and communicative contexts based on language skills developed in course 6. GE credit: AH, OL, WC. Effective: 2016 Spring Quarter.

CHN 112—Modern Chinese: Reading and Discussion (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): CHN 111; Or placement exam or consent of instructor. Further development of communication skills from course 111 in Modern Standard Mandarin-speaking environments. Reading dialogues/articles pertaining to contemporary China issues and discussing ethical, moral, aesthetic, social, and cultural concerns. GE credit: AH, OL, WC. Effective: 2016 Spring Quarter.

CHN 113—Modern Chinese: Reading and Discussion (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): CHN 112; Or placement exam or consent of instructor. Continuation of course 112, further developing communication skills in Modern Standard Mandarin-speaking environments. Read dialogues/articles pertaining to contemporary China issues and discuss ethical, moral, aesthetic, social, and cultural concerns. Study strategies for moving between simplified and traditional Chinese characters. GE credit: AH, OL, WC. Effective: 2018 Winter Quarter.

CHN 114—Introduction to Classical Chinese (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): CHN 112; Consent of Instructor. Or equivalent language proficiency. Introduction to the language in which, until the twentieth century, most official, documentary, scholarly, and belle-lettristic Chinese literature was written. GE credit: AH, WC. Effective: 2016 Spring Quarter.

CHN 115—Introduction to Classical Chinese II (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): CHN 114; or Consent of Instructor. Continuation of enhancing classical Chinese reading skills with literature ranging from the prose found in Han dynasty historical works, Six Dynasties anecdotal literature, and Tang occasional texts, as well as the poetic shi and fu genres. GE credit: AH, WC. Effective: 2016 Spring Quarter.

CHN 116—Introduction to Classical Chinese III (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): CHN 115; or Consent of Instructor. Translations of extended readings in the original sources and brief analyses of syntax. These sources will include texts written by well-known figures from the eighth through fifteenth centuries, composing in a wide variety of genres. GE credit: AH, WC. Effective: 2016 Spring Quarter.

CHN 120—Advanced Chinese (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): CHN 113; Or placement exam or consent of instructor. Evaluation of readings from various genres (literature, newspapers, TV and movies, etc.) develop advanced reading, writing, aural comprehension, and formal/professional speech skills in Mandarin Chinese. Chinese society/cultural studies, especially those sociocultural issues reflected in the language used in learning materials. May be repeated up to 1 time(s) Course material is different for each quarter of an academic year. Students may repeat course one time but repeat class cannot be for the same quarter taken in a previous academic year. GE credit: AH, OL, WC. Effective: 2016 Spring Quarter.

CHN 130—Readings in Traditional Chinese Fiction (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): CHN 111; Or equivalent language proficiency. Examination of representative works of traditional Chinese fiction popular from the 12th Century until the 17th and 18th centuries. Translations in English of the Chinese texts will be available to students as reference. May be repeated up to 1 time(s). GE credit: AH, VL, WC. Effective: 2016 Spring Quarter.

CHN 131—Readings in Traditional Chinese Poetry (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): CHN 111; Consent of Instructor. Or equivalent language
proficiency. Traditional Chinese poetry from its beginnings to the golden ages of Tang and Song, surveying forms and poets that best reveal the Chinese poetic sensibility and the genius of the language of Chinese poetry. GE credit: AH. Effective: 2016 Spring Quarter.

**CHN 132—Readings in Modern Chinese Poetry (4)**

Discussion—1 hour; Lecture—3 hours. Prerequisite(s): CHN 111; Consent of Instructor. Or equivalent language proficiency. Chinese poetry from the Literary Revolution of 1917 to the present, surveying works that embody exciting innovations and reflect the modernity of twentieth-century Chinese society and culture. GE credit: AH, WC. Effective: 2016 Spring Quarter.

**CHN 133—Readings in Modern Chinese Prose and Drama (4)**

Lecture—4 hours. Prerequisite(s): CHN 111; Or equivalent language proficiency. Literary works and scholarly essays on selected topics of Chinese prose and drama, development of a deep understanding of Chinese culture and society through sophisticated reading materials of these two important genres of the modern period. Conducted in Chinese. May be repeated up to 2 unit(s) when topic differs. GE credit: AH, WC. Effective: 2016 Spring Quarter.

**CHN 134—Chinese Film in Chinese Language (4)**

Film Viewing—3 hours; Lecture—3 hours. Prerequisite(s): CHN 111; Or equivalent language proficiency. Chinese film and scholarly essays on Chinese cinema and film history. Develop a deep understanding of Chinese culture and society through viewing and studying Chinese films in the Chinese language. GE credit: AH, OL, SS, VL, WC. Effective: 2016 Spring Quarter.

**CHN 140—Readings in Classical Chinese (4)**

Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. Study and philological analysis of selected texts from the first millennium of Imperial China. May be repeated up to 2 time(s). GE credit: AH. Effective: 1997 Winter Quarter.

**CHN 150—Fifth-Year Chinese: Selected Topics in Chinese Language, Literature, and Culture (4)**

Lecture/Discussion—4 hours. Prerequisite(s): CHN 120; Or placement exam or consent of instructor. Examination of literary works and scholarly essays on selected topics of Chinese culture and society. Development of a deep understanding of Chinese culture and society through viewing and studying Chinese films in the Chinese language. GE credit: AH, OC, SS, VL, WC. Effective: 2016 Spring Quarter.

**CHN 160—The Chinese Language (4)**

Review all entries

Lecture/Discussion—4 hours. Prerequisite(s): CHN 006 (can be concurrent) or CHN 003BL (can be concurrent) or CHN 003CN (can be concurrent) or CHN 004A (can be concurrent); Or placement exam or consent of instructor. LIN 001 recommended. Introduction to structural features of Chinese (Mandarin) sounds, lexicon, grammar, and writing (characters), as well as relevant dialectal and sociolinguistic issues of the language. GE credit: AH, WC. Effective: 2016 Spring Quarter.

**Elective Requirement**

Units: 16

Choose 16 units:

Any EAS special course (approved courses: EAS 190, 192, 194H, 196A-B, 198—maximum 12 units from this list); any CHN or JPN upper division course; any Depth Subject Matter course; any upper division EAP course focusing on East Asia or Southeast Asia.

**Total: 61-62**

### East Asian Studies | EAS Minor

(College of Letters and Science)

Xiaoling Shu, Ph.D., Program Director

**Program Office.** 1277 Social Science and Humanities Building; 530-752-3406; [http://eastasian.ucdavis.edu](http://eastasian.ucdavis.edu)

Courses taken for the minor are expected to reflect a predominant interest in East Asia or Southeast Asia. All upper division courses counting towards the East Asian Studies major, may be used to fulfill the requirements for the minor program, as long as they deal predominantly with East Asia or Southeast Asia.

### East Asian Studies

Units: 20

Choose any five upper division courses from the Depth Subject Matter list for the major, or from the following list:

Any CHN or JPN upper division course.

Any EAS special course; approved courses:
### Courses in EAS:

**EAS 088**—Korean Society: Late 19th Century to the Present (4) *Review all entries*

Lecture/Discussion—4 hours. Modern Korean society (late 19th Century to contemporary period), emphasizing the perseverance and transformations of traditional social and cultural patterns. Effective: 2001 Winter Quarter.

**EAS 088**—Korean Culture and Society: From Ancient Three Kingdoms to the Global K-Pop (4) *Review all entries*

Lecture/Discussion—4 hours. Evolution of Korean society from Three Kingdoms period (B.C.E 57 to C.E. 676) to the contemporary era emphasizing the perseverance and transformations of traditional social and cultural patterns. (Same course as HIS 009C.) GE credit: AH, WC. Effective: 2019 Winter Quarter.

**EAS 113**—Cinema and Society in China (4)

Discussion—1 hour; Lecture—3 hours. Prerequisite(s): HIS 190C; HIS 193; or Consent of Instructor. Knowledge of Chinese not required. Viewing and analysis of one Chinese film with English subtitles each week, followed by discussion and short essays. Cinematic technique, social values and film topics from 1930s to today. Not open for credit to students who have completed CHN 113. Effective: 1997 Winter Quarter.

**EAS 190**—East Asian Studies Seminar (4)

Seminar—3 hours; Term Paper. Prerequisite(s): Upper division standing or consent of instructor. Political, social, cultural, and economic issues in East Asia. Topic varies each year. May be repeated for credit when topic differs. Effective: 2004 Summer Session 2.

**EAS 192**—East Asian Studies Seminar (1-12)

Internship—3-36 hours; Term Paper. Prerequisite(s): Consent of Instructor. Upper division standing. Work experience in the East Asian Studies field, with analytical term paper on a topic approved by the instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

**EAS 194H**—Special Study for Honors Students (1-5)

Independent Study—1-5 hours. Prerequisite(s): Open only to majors of senior standing who qualify for Honors Program. Guided research, under the direction of a faculty member, leading to a senior honors thesis on a topic in East Asian Studies culture, society, or language. (P/NP grading only.) Effective: 1997 Winter Quarter.

**EAS 196A**—Honors Seminar (4)

Conference—2 hours; Seminar—2 hours. Prerequisite(s): Consent of Instructor. GPA of 3.500 in the major; senior standing. A two-quarter research project culminating in an Honors thesis. A grade of B or higher must be earned to qualify the student for honors distinction at graduation. (P/NP grading only.) Effective: 1997 Winter Quarter.

**EAS 196B**—Honors Seminar (4)

Conference—2 hours; Seminar—2 hours. Prerequisite(s): Consent of Instructor. GPA of 3.500 in the major, senior standing. A two-quarter research project culminating in an Honors thesis. A grade of B or higher must be earned to qualify the student for honors distinction at graduation. (P/NP grading only.) Effective: 1997 Winter Quarter.

**EAS 198**—Directed Group Study (1-5)

Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

### Ecological Management & Restoration

**Ecological Management & Restoration**

Ecological Management & Restoration | Ecological Management & Restoration B.S.
---
(College of Agricultural and Environmental Sciences)

Faculty. [http://www.plantsciences.ucdavis.edu/plantsciences/databases/directory/faculty.aspx](http://www.plantsciences.ucdavis.edu/plantsciences/databases/directory/faculty.aspx)
The Major Program

This major is designed for students who are interested in understanding how to manage and restore wildland and rangeland plant communities. Courses are selected to provide an interdisciplinary background that encompasses ecology, applied plant biology, and the social sciences. Students will acquire a core understanding of natural and managed ecosystems and how they function, interact with the natural environment, are connected with human society and social change, and are restored and managed.

The Program. The curriculum provides depth in the ecological and botanical sciences directed toward an integrated understanding of how communities and ecosystems function and how this knowledge can assist in their management and restoration. Courses in environmental policy and law expose the students to the social drivers and constraints of ecosystem management. All students gain practical experience through practical field courses and a required internship. Students may also pursue an Honors thesis in their senior year.

Major Advisor. T.P. Young

Advising Center for the major, including peer advising, is located in 1220 Plant and Environmental Sciences 530-752-9770.

Career Alternatives. Graduates from this program are prepared to pursue a wide range of careers, including positions in ecological restoration and ecosystem management; rangeland and reserve management; environmental consulting; public, private, or non-profit agencies concerned with restoration and natural resource management; Cooperative Extension; teaching; information and communication services. Graduates are qualified to pursue advanced studies in fields such as ecology, agroecology, environmental studies, geography or weed science.

Ecology (Graduate Group)

Ecology (Graduate Group) | ECL Information
Edwin Grosholz, Ph.D., Chairperson of the Group
Group Office. 1005 Wickson Hall 530-752-6752; http://ecology.ucdavis.edu
Faculty. http://ecology.ucdavis.edu/people/faculty.html

Ecology (Graduate Group) | ECL M.S.
Edwin Grosholz, Ph.D., Chairperson of the Group
Group Office. 1005 Wickson Hall 530-752-6752; http://ecology.ucdavis.edu
Faculty. http://ecology.ucdavis.edu/people/faculty.html

Graduate Study. The Graduate Group in Ecology offers the M.S. and Ph.D. degrees. Ecology is a science that integrates numerous fields of study to attain deep understanding of natural and societal influences on the distribution, abundances, behaviors, traits, and ecosystem functions of organisms. In order to accommodate varied student interests, the Group has developed several ‘areas of emphasis’ with specialized programs of study: agricultural ecology, conservation ecology, ecosystems and landscape ecology, ecotoxicology, environmental policy and human ecology, integrative ecology, marine ecology, physiological ecology and restoration ecology. For further details, contact the Group office.

Preparation. Appropriate preparation is undergraduate work in any of the biological, social or behavioral, and physical sciences, mathematics or engineering. Applicants will normally be expected to have completed the following courses during the undergraduate years or shortly after matriculating: two courses each in introductory biology, general chemistry and physical science; one course each in calculus, an upper division introduction to ecology course, and introductory statistics. Students that choose the environmental policy and human ecology area of emphasis are only required to complete one course in general chemistry. They may also substitute one quantitative course in social science such as micro- or macro-economics for one chemistry or physics requirement.

ECL 203—Physiological Ecology (3)
Lecture—3 hours. Prerequisite(s): EVE 101 or EST 100; NPB 110 or PLB 111 or EST 129; elementary calculus. A comparative examination of several animal groups addressing fundamental physiological mechanisms that shape the ecology of each animal group. Effective: 1997 Winter Quarter.

ECL 205—Community Ecology (4)
Discussion—2 hours; Lecture—2 hours. Prerequisite(s): An upper division course in Ecology. Introduction to literature and contemporary research into processes structuring ecological communities. Effective: 1997 Winter Quarter.

ECL 206—Concepts and Methods in Plant Community Ecology (4)
Laboratory—4 hours; Lecture—3 hours. Prerequisite(s): Consent of Instructor. Introductory courses in statistics and plant ecology. Principles and techniques of vegetation analysis, including structure, composition, and dynamics. Emphasis given to sampling procedures, association analysis, ordination, processes and mechanisms of succession, and classification. Most techniques are demonstrated or conducted during field trips and laboratories. Effective: 1997 Winter Quarter.

ECL 207—Plant Population Biology (3)
Discussion/Laboratory—1 hour; Lecture—2 hours. Prerequisite(s): Advanced undergraduate ecology course (e.g., ESP 100, EVE 101, ENT 104 or PLB 117), and advanced undergraduate course in genetics and/or evolution (e.g., BIS 101 or EVE 100). Introduction to theoretical and empirical research in plant population biology. Emphasis placed on linking ecological ecological and genetic approaches to plant population biology. (Same course as PBG 207.) Effective: 2000 Winter Quarter.

ECL 208—Issues in Conservation Biology (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Introductory biology (e.g. BIS 002B) and an upper division organismal biology class. Graduate-level introduction to current research in conservation biology. Course will emphasize reading and discussing primary literature. Specific topics will reflect the research interests of UC Davis conservation biology faculty. Effective: 1997 Winter Quarter.

ECL 210N—Environmental Policy and Human Ecology (4)
Lecture—3 hours; Term Paper. Prerequisite(s): Graduate standing in Anthropology, Ecology, Political Science, Sociology Graduate Groups, or consent of instructor. Principles drawn from social science, ecology and evolution to study of human populations and behavior, emphasizing environmental/resource issues. These principles form a synthetic framework that articulates elements drawn from the social sciences as well as biology. Effective: 2013 Spring Quarter.

ECL 212A—Environmental Policy Process (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Course in public policy (e.g., ESP 160); environmental law (e.g., ESP 161); course in statistics (e.g., SOC 106 or ARE 106). Introduction to selected topics of the policy process and applications to the field of environmental policy. Develops critical reading skills, understanding of policy theory, and an ability to apply multiple theories to the same phenomena. (Same course as ESP 212A and ENV 200C.) Effective: 2017 Fall Quarter.

ECL 212B—Environmental Policy Evaluation (4)
Discussion—1 hour; Lecture—2 hours; Seminar—2 hours. Prerequisite(s): (STA 108 or ARE 106); ARE 176; Intermediate microeconomics (e.g., ECN 100); policy analysis (e.g., ESP 168A or the equivalent). Method and practice, philosophical basis, and political role of policy analysis. Reviews basic concepts from economic theory; how and why environmental problems emerge in a market economy; and tools necessary for solving environmental problems. (Same course as ESP 212B and ENV 200B.) Effective: 2018 Winter Quarter.

ECL 214—Marine Ecology: Concepts and Practice (3)
Discussion—1.5 hours; Fieldwork—1.5 hours; Lecture—1 hour. Prerequisite(s): Consent of Instructor. Graduate standing or one course in ecology, one course in evolution or genetics; survey course in marine ecology recommended. Critical review and analysis of concepts and practices in modern marine ecology at the interface of several fields of study including oceanography, evolution, behavior, and physiology. Emphasis on critical thinking, problem solving, and hands-on study. Two field trips required. Effective: 2016 Fall Quarter.

ECL 215—Social Ecological Systems (3)
Lecture/Discussion—3 hours. Prerequisite(s): Completion of core courses for specific graduate programs, for example Ecology 200A/B. Overview of social-ecological systems that links environmental policy and decision-
making to ecological processes. Delves deeper into different social science topics related to this broader idea. Applying of course readings to case studies chosen by students and a final paper. Effective: 2016 Fall Quarter.

**ECL 216—Ecology and Agriculture (4)**
Lecture—3 hours; Term Paper. Prerequisite(s): EVE 011; or Consent of Instructor. Ecological principles as relevant to agriculture. Integration of ecological approaches into agricultural research to increase ecosystem functions and services. Topics include crop autoecology, biotic interactions among crops and pests, ecosystem and landscape ecology. Not open for credit to students who have completed VCR 216. (Former course VCR 216). Effective: 2011 Fall Quarter.

**ECL 219—Ecosystem Biogeochemistry (4)**
Discussion/Laboratory—2 hours; Lecture—3 hours. Prerequisite(s): Introductory courses in ecology/biology and soils are recommended; undergraduates accepted with consent of instructor. Multi-disciplinary analysis of energy and nutrient transfers within terrestrial ecosystems. Examination of processes and inter- and intra-system interactions between the atmosphere, biosphere, lithosphere, and hydrosphere. Laboratory section uses biogeochemical simulation models to examine case studies. (Same course as SSC 219.) Effective: 1997 Winter Quarter.

**ECL 225—Terrestrial Field Ecology (4)**
Fieldwork—12 hours; Seminar—1 hour. Prerequisite(s): Introductory ecology and introductory statistics or consent of instructor. A field course conducted over spring break and four weekends at Bodega Bay, emphasizing student projects. Ecological hypothesis testing, data gathering, analysis, and written and oral presentation of results will be stressed. (Same course as ENT 225 and PBG 225.) Effective: 1997 Winter Quarter.

**ECL 231—Mathematical Methods in Population Biology (3)**
Lecture—3 hours. Prerequisite(s): MAT 016C or MAT 021C; Or the equivalent. Mathematical methods used in population biology. Linear and nonlinear difference equation and differential equation models are studied, using stability analysis and qualitative methods. Partial differential equation models are introduced. Applications to population biology models are stressed. (Same course as PBG 231.) Effective: 1997 Spring Quarter.

**ECL 232—Theoretical Ecology (3)**
Lecture—3 hours. Examination of major conceptual and methodological issues in theoretical ecology. Model formulation and development will be emphasized. Topics will vary from year to year. May be repeated for credit. Effective: 1997 Winter Quarter.

**ECL 233—Computational Methods in Population Biology (3)**
Discussion/Laboratory—1 hour; Lecture/Lab—2 hours. Prerequisite(s): A course in theoretical ecology (e.g., ECL 231 or an equivalent to ESP 121 from your undergraduate institution) or consent of instructor; no programming experience required. Numerical methods for simulating population dynamics using the computational software package R. Emphasis placed on model formulation and development, theoretical concepts and philosophical principles to guide simulation efforts, model parameterization, and implementing simulations with R. (Same course as PBG 233.) (S/U grading only.) Effective: 2013 Fall Quarter.

Discussion—0.5 hours; Laboratory—0.5 hours; Lecture—2 hours. Prerequisite(s): Undergraduate genetics and ecology/conservation biology courses recommended. Restricted to graduate students, 2nd or 3rd year veterinary students; advanced undergraduate students with consent of instructor. Introduction to the field of applied ecological genetics to include applications in conservation ecology, population genetics, population biology, wildlife health and disease ecology. Effective: 2017 Spring Quarter.

**ECL 243—Ecological Genomics (4)**
Lecture/Discussion—3 hours; Term Paper/Discussion. Prerequisite(s): ECL 242; Or equivalent training in ecology and genetics according to the discretion of the instructors. Genomics concepts, technologies, and analyses for ecology research. Mixture of lecture, discussion of recent literature, hands-on training in data analysis and experimental design, and research proposal preparation and evaluation. One all-day field trip is required. Effective: 2015 Fall Quarter.

**ECL 245—Climate Change, Water and Society (4)**
Lecture—4 hours. Class size limited to 25 students. Integration of climate science and hydrology with policy to understand hydroclimatology and its impact upon natural and human systems. Assignments: readings, take-home examination on climate and hydrologic science, paper that integrates course concepts into a research prospectus or review article. (Same course as HYD 245 and ATM 245.) Effective: 2015 Spring Quarter.
ECL 262—Advanced Population Dynamics (3)
Lecture—3 hours. Prerequisite(s): Graduate standing; advanced course in ecology (e.g., Evolution and Ecology 101), population dynamics (e.g., Wildlife, Fish, and Conservation 122), and one year of calculus; familiarity with matrix algebra and partial differential equations recommended. Logical basis for population models, evaluation of simple ecological models, current population models with age, size, and stage structure, theoretical basis for management and exemplary case histories. Emphasis on development and use of realistic population models in ecological research. (Same course as WFC 262.) Effective: 2016 Spring Quarter.

ECL 271—Research Conference in Ecology (1)
Seminar—1 hour. Prerequisite(s): Consent of Instructor. Critical presentation and evaluation of current literature and ongoing research in ecology. Requirements include active participation in weekly discussions and the presentation of a paper or chapter once per quarter. May be repeated for credit. (Same course as PBG 271.) (S/U grading only.) Effective: 2014 Winter Quarter.

ECL 280—Current Anthropology Journal Editorial Workshop (4)
Independent Study—3 hours; Workshop—1 hour. Prerequisite(s): Consent of Instructor. Students must enroll for all three quarters. Reading and offering workshop critiques of manuscripts submitted for publication, and reading and discussion of other relevant work in anthropology and human ecology. Track and edit published comments and authors’ replies that accompany major features. Participation in the development of new sections for the electronic edition of the journal, including a "news and views" section and a debate section. May be repeated up to 12 unit(s) with consent of instructor. (Same course as ANT 280.) (S/U grading only.) Effective: 2000 Fall Quarter.

ECL 290—Seminar in Ecology (1-4)
Seminar—1-4 hours. Prerequisite(s): Consent of Instructor. Topics in ecology. Students are expected to present an oral seminar on a particular aspect of the general topic under consideration. (S/U grading only.) Effective: 2011 Fall Quarter.

ECL 296—Topics in Ecology and Evolution (1)
Seminar—1 hour. Prerequisite(s): Graduate standing. Seminars presented by visiting lecturers, UC Davis faculty, and graduate students. May be repeated for credit. (Same course as PBG 292.) (S/U grading only.) Effective: 1997 Winter Quarter.

ECL 297T—Tutoring in Ecology (1-4)
Discussion—1 hour; Lecture—1 hour. Prerequisite(s): Consent of Instructor. Graduate standing in ecology. Teaching ecology including conducting discussion groups for regular departmental courses under direct guidance of staff. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

ECL 298—Group Study (1-5)
Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

ECL 299—Research (1-12)
Variable. Prerequisite(s): Consent of Instructor. Graduate standing. (S/U grading only.) Effective: 1997 Winter Quarter.

Economics

Economics | ECN Information
(College of Letters and Science)

Department Office. 2216 Social Sciences and Humanities Building; 530-752-9241; http://www.econ.ucdavis.edu

Economics | ECN A.B.
(College of Letters and Science)
Giovanni Peri, Ph.D., Chairperson of the Department
Department Office. 2216 Social Sciences and Humanities Building; 530-752-9241; http://www.econ.ucdavis.edu

The Major Program
Economics is the study of how individuals, organizations, and societies choose among alternative uses of resources and how these resources are turned into the things people want.

**The Program.** Economics majors complete an introductory course sequence in economics, in addition to several courses in quantitative methods. Intermediate theory and economic history are taken on the upper division level and then students are free to concentrate the remainder of their units in various areas of interest, including more courses in economic theory or history, international economics, labor, industry, alternative economic systems, economic development, public finance, econometrics, or mathematical economics.

**Major Advisors.** Contact Department office at ecnugadvisor@ucdavis.edu or 530-752-9142.

**Internships and Career Alternatives.** Internships for economics majors have been arranged at banks, brokerages, other business enterprises, and governmental units. The internships must complement the student's course work. A degree in economics is excellent preparation for students who want to go on to law school, business school, advanced work in economics, or graduate work in international relations. It is also a good background for careers in management and positions with the government.

**Course Limits.** Except under extraordinary circumstances, not more than two economics courses should be taken in any one quarter. In special cases, the department will accept a limited number of related upper division courses from other departments in satisfaction of the economics upper division course requirements. Approval from a departmental advisor is required in all such cases.

**Graduation with High or Highest Honors.** To be eligible for departmental recommendation for High or Highest Honors in Economics at graduation, a student must take all upper division courses in Economics for a letter grade, earn at least a 3.500 grade point average in those courses, and complete at least eight units of course work that result in the submission of an Honors project. Consult the College of Letters and Science section of this catalog and contact the Department for more information.

**Study Abroad.** The Economics Department wishes to accommodate students who would like to complement their economics degree with a study abroad experience. Up to 20 units of upper division credit from foreign campuses (excluding ECN 100 and 101) may be used towards the completion of the degree. To ensure that foreign courses will apply towards the economics degree, students need to select courses from the pre-approved list at the UC Davis Study Abroad office or seek pre-approval in the economics department for the foreign courses they wish to complete.

**Graduate Advisors.** Contact Department office.

**Recommended.** Students considering graduate study in economics are strongly urged to take MAT 021A-021B-021C and 022A.

**American History and Institutions.** This University requirement can be satisfied by completion of ECN 111A, 111B; see also under Bachelor’s Degree Requirements.

Economics | ECN M.A.
(College of Letters and Science)

Giovanni Peri, Ph.D., Chairperson of the Department

Department Office. 2216 Social Sciences and Humanities Building; 530-752-9241; http://www.econ.ucdavis.edu

Graduate Study. Students who meet the admission requirements of Graduate Studies and the Department of Economics may pursue studies leading to the M.A. and Ph.D. degrees. Fields of emphasis for graduate study include: Economic Theory, Monetary Economics, Economic Development, Economic History, International Economics, Labor Economics, Industrial Organization, Economic Systems, Public Finance, Mathematical Economics,
Economics Units: 20

- ECN 100A Intermediate Micro Theory: Consumer and Producer Theory 4
- ECN 101 Intermediate Macro Theory 4
- ECN 100B Intermediate Micro Theory: Imperfect Competition and Market Failure 4
- ECN 103 Economics of Uncertainty and Information 4
- ECN 106 Decision Making 4
- ECN 116 Comparative Economic Systems 4
- ECN 121A Industrial Organization 4
- ECN 121B Industrial Organization 4
- ECN 122 Theory of Games and Strategic Behavior 4

Choose eight units: 8

The Master of Arts degree is offered only en route to the Ph.D.

**Graduate Advisors.** Contact Department office.

**Recommended.** Students considering graduate study in economics are strongly urged to take MAT 021A-021B-021C and 022A.

**Economics | ECN Ph.D.**

(College of Letters and Science)

Giovanni Peri, Ph.D., Chairperson of the Department

**Department Office.** 2216 Social Sciences and Humanities Building; 530-752-9241; http://www.econ.ucdavis.edu

**Graduate Advisors.** Contact Department office.

**Recommended.** Students considering graduate study in economics are strongly urged to take MAT 021A-021B-021C and 022A.

**Economics | ECN Minor**

(College of Letters and Science)

Giovanni Peri, Ph.D., Chairperson of the Department

**Department Office.** 2216 Social Sciences and Humanities Building; 530-752-9241; http://www.econ.ucdavis.edu

**Faculty.** http://www.econ.ucdavis.edu/directory-of-people/econ-faculty

Economics is the study of how individuals, organizations, and societies choose among alternative uses of resources and how these resources are turned into the things people want.

**Course Limits.** Except under extraordinary circumstances, not more than two economics courses should be taken in any one quarter. In special cases, the department will accept a limited number of related upper division courses from other departments in satisfaction of the economics upper division course requirements. Approval from a departmental advisor is required in all such cases.

**Preparation.** ECN 001A, 001B; STA 013, 032, or 102; MAT106A, 016B or 021A, 021B. MAT 016A, 016B or 021A, 021B should be completed before taking ECN 100 and 101. Students need to complete ECN 100 and 101 before taking the advanced courses.

Upper division Economics courses  

Total: 20

**Economics | ECN Courses**

**Courses in ECN:**

**ECN 001A—Principles of Microeconomics (4)**  
Discussion—1 hour; Lecture—3 hours. Course 1A and 1B may be taken in either order. Analysis of the allocation of resources and the distribution of income through a price system; competition and monopoly; the role of public policy; comparative economic systems. GE credit: ACGH, QL, SS. Effective: 2004 Fall Quarter.

**ECN 001AV—Principles of Microeconomics (4)**  
Web Electronic Discussion—1 hour; Web Virtual Lecture—3 hours. Analysis of the allocation of resources and the distribution of income through a price system; competition and monopoly; the role of public policy; comparative economic systems. GE credit: ACGH, QL, SS. Effective: 2017 Fall Quarter.

**ECN 001B—Principles of Macroeconomics (4)**  
Discussion—1 hour; Lecture—3 hours. Course 1A and 1B may be taken in either order. Analysis of the economy as a whole; determinants of the level of income, employment and prices; money and banking, economic fluctuations, international trade, economic development; the role of public policy. GE credit: ACGH, QL, SS. Effective: 2004 Fall Quarter.

**ECN 090X—Lower Division Seminar (1-2)**  
Seminar—1-2 hours. Prerequisite(s): Consent of Instructor. Lower division standing. Limited enrollment. Examination of a special topic in Economics through shared readings, discussions, and written assignments. Effective: 1997 Winter Quarter.

**ECN 092—Internship and Field Work (1-12) Review all entries**  
Internship—3-36 hours; Term Paper. Prerequisite(s): MGT 011A; MGT 011B; and Consent of Instructor. Junior or senior standing; availability of internship position or approved field work project; stock-brokerage interns must have completed Management 11A-11B. Intensive study of practical application of concepts in economics, stressing research methods and empirical analysis. (P/NP grading only.) Effective: 1997 Winter Quarter.

**ECN 092—Internship and Field Work (1-12) Review all entries**  
Internship—3-36 hours; Term Paper. Prerequisite(s): Consent of Instructor. Intensive study of practical application of concepts in economics, stressing research methods and empirical analysis. (P/NP grading only.) Effective: 2019 Winter Quarter.
ECN 098—Group Study for Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. Primarily for lower division students. (P/NP grading only.) Effective: 1997 Winter Quarter.

ECN 099—Individual Study for Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

ECN 100—Intermediate Micro Theory (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECN 001A C- or better or ECN 001AV C- or better); ECN 001B C- or better; (MAT 016A C- or better, MAT 016B C- or better) or (MAT 021A C- or better, MAT 021B C- or better) or (MAT 017A C- or better, MAT 017B C- or better) Price and distribution theory under conditions of perfect and imperfect competition. General equilibrium and welfare economics. Not open for credit to students who have taken ARE 100A or ARE 100B. Effective: 2018 Spring Quarter.

ECN 100A—Intermediate Micro Theory: Consumer and Producer Theory (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECN 001A C- or better or ECN 001AV C- or better); ECN 001B C- or better; (MAT 016A C- or better or MAT 017A C- or better or MAT 021A C- or better); (MAT 016B C- or better or MAT 017B C- or better or MAT 021B C- or better) Consumer and producer theory. Equilibrium and welfare analysis. Topics include competitive markets, consumer and producer surplus at an intermediate level. Not open for credit to students that have taken ARE 100A or ECN 100. Effective: 2018 Winter Quarter.

ECN 100B—Intermediate Micro Theory: Imperfect Competition and Market Failure (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECN 100A Imperfect competition and market failure. Topics include exchange, monopoly, game theory, uncertainty, asymmetric information, and public goods. Not open for credit to students that have taken ARE 100B. Effective: 2017 Fall Quarter.

ECN 101—Intermediate Macro Theory (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECN 001A C- or better or ECN 001AV C- or better); ECN 001B C- or better; (MAT 016A C- or better, MAT 016B C- or better) or (MAT 021A C- or better, MAT 021B C- or better) or (MAT 017A C- or better, MAT 017B C- or better)) Theory of income, employment and prices under static and dynamic conditions, and long term growth. Effective: 2018 Winter Quarter.

ECN 102—Analysis of Economic Data (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECN 001A or ECN 001AV); ECN 001B; (STA 013 or STA 013Y or STA 032); (MAT 016A or MAT 017A or MAT 021A); (MAT 016B or MAT 017B or MAT 021B); or Consent of Instructor. Analysis of economic data to investigate key relationships emphasized in introductory micro and macro economics. Obtaining, transforming, displaying data; statistical analysis of economic data; basic univariate and multivariate regression analysis. Only two units of credit for students who have completed ECN 140 or ARE 106, and STA 108. GE credit: VL. Effective: 2018 Winter Quarter.

ECN 103—Economics of Uncertainty and Information (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECN 100 or (ARE 100A, ARE 100B)), (MAT 016A or MAT 017A or MAT 021A), (MAT 016B or MAT 017B or MAT 021B) Optimal decisions under uncertainty, expected utility theory, economics of insurance, asymmetric information, signalling in the job market, incentives and Principal-Agent theory, optimal search strategies and the reservation price principle. Effective: 2018 Winter Quarter.

ECN 103—Economics of Uncertainty and Information (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECN 100 or ECN 100A or (ARE 100A, ARE 100B)), ECN 100B, (MAT 016A or MAT 017A or MAT 021A), (MAT 016B or MAT 017B or MAT 021B) Optimal decisions under uncertainty, expected utility theory, economics of insurance, asymmetric information, signalling in the job market, incentives and Principal-Agent theory, optimal search strategies and the reservation price principle. Effective: 2019 Winter Quarter.

ECN 106—Decision Making (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ((MAT 016A C- or better, MAT 016B C- or better) or (MAT 017A C- or better, MAT 017B C- or better) or (MAT 021A C- or better, MAT 021B C- or better)); (STA 013 C- or better or STA 013Y C- or better or STA 032 C- or better)); or Consent of Instructor. Descriptive and normative analysis of individual decision making, with applications to personal, professional, financial, and public policy decisions. Emphasis on decision making under uncertainty and over time. Heuristics and biases in the psychology of decisions; overcoming decision traps. Effective: 2018 Winter Quarter.

ECN 107—Neuroeconomics/Reinforcement Learning and Decision Making (4)
Lecture—3 hours; Term Paper. Prerequisite(s): (PSC 100 or PSC 100Y or PSC 135 or ARE 100A or ECN 100A or NPB 162 or NPB 163); (STA 013 or STA 013Y or STA 100 or PSC 103A); or Consent of Instructor. Theoretical and empirical
approaches to neuroeconomics (neuroscience of decision making) from psychology, neuroscience, economics, and computer science. Neuroscience of judgment and decision making, behavioral economics, and reinforcement learning. (Same course as PSC 133 and CGS 107.) GE credit: SL, SS. Effective: 2018 Spring Quarter.

ECN 110A—World Economic History Before the Industrial Revolution (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECN 001A or ECN 001AV); ECN 001B Development and application of analytical models to explain the nature and functioning of economies before the Industrial Revolution. Examples will be drawn from a variety of societies, including England, China, Polynesia, and Pre-Columbian America. GE credit: SS. Effective: 2018 Spring Quarter.

ECN 110B—World Economic History Since the Industrial Revolution (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECN 001A or ECN 001AV); ECN 001B Development and application of analytical models to explain the nature and functioning of economies since the Industrial Revolution. Examples will be drawn from a variety of societies, including England, China, Germany, and India. GE credit: SS. Effective: 2018 Winter Quarter.

ECN 111A—Economic History (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECN 001A or ECN 001AV); ECN 001B; or Consent of Instructor. Survey of economic change in the United States from Colonial times to 1865; reference to other regions in the Western Hemisphere. GE credit: SS. Effective: 2018 Spring Quarter.

ECN 111B—Economics History (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECN 001A or ECN 001AV) or ECN 001B; or Consent of Instructor. Survey of economic change in the United States from 1865 to the post World War II era. GE credit: SS. Effective: 2018 Spring Quarter.

ECN 115A—Economic Development (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECN 001A or ECN 001AV); ECN 001B Major issues encountered in emerging from international poverty, including problems of growth and structural change, human welfare, population growth and health, labor markets and internal migration. Important issues of policy concerning international trade and industrialization. (Same course as ARE 115A.) GE credit: SS, WC. Effective: 2018 Winter Quarter.

ECN 115B—Economic Development (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECN 001A or ECN 001AV); ECN 001B Major macroeconomic issues of developing countries. Issues include problems in generating capital, conduct of monetary and fiscal policies, foreign aid and investment. Important issues of policy concerning international borrowing and external debt of developing countries. (Same course as ARE 115B.) GE credit: SS, WC. Effective: 2018 Spring Quarter.

ECN 115BY—Economic Development (4)
Lecture—1.5 hours; Term Paper; Web Virtual Lecture—1.5 hours. Prerequisite(s): ECN 001A; ECN 001B Major macroeconomic issues of developing countries. Issues include problems in generating capital, conduct of monetary and fiscal policies, foreign aid and investment. Important issues of policy concerning international borrowing and external debt of developing countries. GE credit: SS. Effective: 2016 Fall Quarter.

ECN 116—Comparative Economic Systems (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECN 100 or (ARE 100A, ARE 100B)), (MAT 016B or MAT 017B or MAT 021B) Economics analysis of the relative virtues of capitalism and socialism, including welfare economics. Marxian exploitation theory, the socialist calculation debate (Hayek and Lange), alternative capitalist systems (Japan, Germany, U.S.) and contemporary models of market socialism. GE credit: WC. Effective: 2016 Fall Quarter.

ECN 116—Comparative Economic Systems (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECN 100 or ECN 100A or ARE 100A); (ECN 100B or ARE 100B) Economics analysis of the relative virtues of capitalism and socialism, including welfare economics. Marxian exploitation theory, the socialist calculation debate (Hayek and Lange), alternative capitalist systems (Japan, Germany, U.S.) and contemporary models of market socialism. GE credit: WC. Effective: 2019 Winter Quarter.

ECN 121A—Industrial Organization (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECN 001A or ECN 001AV); ECN 001B; (ECN 100 or (ARE 100A, ARE 100B)); or Consent of Instructor. Appraisal of the role of competition and monopoly in the American economy; market structure, conduct, and economic performance of a variety of industries. GE credit: SS. Effective: 2018 Winter Quarter.
ECN 121A—Industrial Organization (4)  
**Review all entries**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECN 100 or ECN 100A or ARE 100A); (ECN 100B or ARE 100B) Appraisal of the role of competition and monopoly in the American economy; market structure, conduct, and economic performance of a variety of industries. GE credit: SS. Effective: 2019 Winter Quarter.

ECN 121B—Industrial Organization (4)  
**Review all entries**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECN 001A or ECN 001AV); ECN 001B; (ECN 100 or (ARE 100A, ARE 100B)); or Consent of Instructor. Study of antitrust and economic regulation. Emphasis on applying theoretical models to U.S. industries and case studies, including telecommunications, software, and electricity markets. Topics include natural monopoly, optimal and actual regulatory mechanisms, deregulation, mergers, predatory pricing, and monopolization. GE credit: ACGH. Effective: 2018 Winter Quarter.

ECN 122—Theory of Games and Strategic Behavior (4)  
**Review all entries**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (MAT 016A, MAT 016B) or (MAT 021A, MAT 021B) or (MAT 017A, MAT 017B); or Consent of Instructor. Introduction to game theory. Explanation of the behavior of rational individuals with interacting and often conflicting interests. Non-cooperative and cooperative theory. Applications to economics, political science and other fields. Effective: 2016 Fall Quarter.

ECN 125—Energy Economics (4)  
**Review all entries**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECN 100 or (ARE 100A, ARE 100B); or Consent of Instructor. Pass One open to Economics and Graduate School of Management majors. Application of theoretical and empirical models to examine efficiency in energy production and use. Energy and environmental policy, market structure and power, global climate change, optimal regulation, and real-world applications; e.g., California electricity crisis. GE credit: SS. Effective: 2017 Spring Quarter.

ECN 125—Energy Economics (4)  
**Review all entries**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECN 100 or ECN 100A or ARE 100A); (ECN 100B or ARE 100B) Pass One open to Economics and Graduate School of Management majors. Application of theoretical and empirical models to examine efficiency in energy production and use. Energy and environmental policy, market structure and power, global climate change, optimal regulation, and real-world applications; e.g., California electricity crisis. GE credit: SS. Effective: 2019 Winter Quarter.

ECN 130—Public Microeconomics (4)  
**Review all entries**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECN 100 or (ARE 100A, ARE 100B); or Consent of Instructor. Public expenditures; theory and applications. Efficiency and equity of competitive markets; externalities, public goods, and market failures; positive and normative aspects of public policy for expenditure, including benefit-cost analysis. Topics include consumer protection, pollution, education, poverty and crime. Effective: 2016 Fall Quarter.

ECN 130—Public Microeconomics (4)  
**Review all entries**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECN 100 or ECN 100A or ARE 100A); (ECN 100B or ARE 100B) Public expenditures; theory and applications. Efficiency and equity of competitive markets; externalities, public goods, and market failures; positive and normative aspects of public policy for expenditure, including benefit-cost analysis. Topics include consumer protection, pollution, education, poverty and crime. Effective: 2019 Winter Quarter.

ECN 131—Public Finance (4)  
**Review all entries**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECN 100 or (ARE 100A, ARE 100B) Economic burden of taxation; equity and efficiency considerations in tax design; structure and economic effects of the U.S. tax system.
(including personal income tax, corporation income tax, and property tax); tax loopholes; recent developments; tax reform proposals. Effective: 2016 Fall Quarter.

**ECN 131—Public Finance (4)** Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECN 100 or ECN 100A or ARE 100A); (ECN 100B or ARE 100B) Economic burden of taxation; equity and efficiency considerations in tax design; structure and economic effects of the U.S. tax system (including personal income tax, corporation income tax, and property tax); tax loopholes; recent developments; tax reform proposals. Effective: 2019 Winter Quarter.

**ECN 132—Health Economics (4)** Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECN 100 or ARE 100A, ARE 100B), (ECN 102 or ECN 140 or ARE 106 or STA 108); or Consent of Instructor. The health care market, emphasizing the role and use of economics. Individual demand, provision of services by doctors and hospitals, health insurance, managed care and competition, the role of government access to health care. Effective: 2018 Winter Quarter.

**ECN 132—Health Economics (4)** Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECN 100 or ECN 100A or ARE 100A); (ECN 102 or ECN 140 or ARE 106 or STA 108); or Consent of Instructor. The health care market, emphasizing the role and use of economics. Individual demand, provision of services by doctors and hospitals, health insurance, managed care and competition, the role of government access to health care. Effective: 2018 Winter Quarter.

**ECN 133Y—Poverty, Inequality and Public Policy (4)** Review all entries
Discussion—2 hours; Web Virtual Lecture—2 hours. Prerequisite(s): (ECN 001A or ECN 001AV) or ECN 001B Class size limited to 99; 3 sections of 33 each. Examination of the economics of poverty and inequality in the United States, including measurement, trends, and related policies. Effective: 2018 Spring Quarter.

**ECN 133Y—Poverty, Inequality and Public Policy (4)** Review all entries
Discussion—2 hours; Web Virtual Lecture—2 hours. Prerequisite(s): (ECN 001A or ECN 001AV); ECN 001B Class size limited to 99; 3 sections of 33 each. Examination of the economics of poverty and inequality in the United States, including measurement, trends, and related policies. Effective: 2019 Winter Quarter.

**ECN 134—Financial Economics (4)** Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECN 100 or ECN 100A or ARE 100A); (ECN 100B or (ARE 100A, ARE 100B)), (MAT 016A or MAT 017A or MAT 021A), STA 013 General background and rationale of corporation; finance as resource allocation over time; decision making under uncertainty and the role of information; capital market and interest rate structure; financial decisions. Students who have completed ARE 171A may not receive credit for this course. Effective: 2018 Winter Quarter.

**ECN 135—Money, Banks, and Financial Institutions (4)** Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECN 100 or (ARE 100A, ARE 100B)), ECN 101, (STA 013 or STA 013Y) Banks and the banking system. Uncertainty and asymmetric information in the lending process; efficiency of competitive equilibrium in lending markets. Regulation and the conduct of monetary policy. Effective: 2018 Winter Quarter.

**ECN 135—Money, Banks, and Financial Institutions (4)** Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECN 100 or (ARE 100A, ARE 100B)), ECN 101 (STA 013 or STA 013Y) Banks and the banking system. Uncertainty and asymmetric information in the lending process; efficiency of competitive equilibrium in lending markets. Regulation and the conduct of monetary policy. Effective: 2018 Winter Quarter.

**ECN 136—Topics in Macroeconomic Theory (4)** Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECN 101 Advanced Topics in macroeconomics theory. The
course develops the theoretical and empirical analysis of a specific field of macroeconomics. Possible topics include, business cycle theories, growth theory, monetary economics, political economics and theories of unemployment and inflation. Effective: 2007 Fall Quarter.

**ECN 137—Macroeconomic Policy (4) Review all entries**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECN 100 or (ARE 100A, ARE 100B)), ECN 101, (STA 013 or STA 013Y) Theory and practice of macroeconomic policy, both monetary and fiscal. Effective: 2018 Spring Quarter.

**ECN 137—Macroeconomic Policy (4) Review all entries**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECN 100 or ECN 100A or ARE 100A); (ECN 100B or ARE 100B); ECN 101; (STA 013 or STA 013Y) Theory and practice of macroeconomic policy, both monetary and fiscal. Effective: 2019 Winter Quarter.

**ECN 140—Econometrics (4) Review all entries**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECN 100 or (ARE 100A, ARE 100B)), ECN 101, (STA 013 or STA 013Y), (MAT 016A or MAT 017A or MAT 021A), (MAT 016B or MAT 017B or MAT 021B) Pass One open to Economics Majors. Problems of observation, estimation and hypotheses testing in economics through the study of the theory and application of linear regression models. Critical evaluation of selected examples of empirical research and exercises in applied economics. Only two units of credit allowed to students who have completed two or more of the following courses: ECN 102, ARE 106 or STA 108. Effective: 2018 Winter Quarter.

**ECN 140—Econometrics (4) Review all entries**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECN 100 or ECN 100A or ARE 100A); (ECN 102, STA 108); or Consent of Instructor. Problems of observation, estimation and hypotheses testing in economics through the study of the theory and application of linear regression models. Critical evaluation of selected examples of empirical research and exercises in applied economics. Only two units of credit allowed to students who have completed two or more of the following courses: ECN 102, ARE 106 or STA 108. Effective: 2019 Fall Quarter.

**ECN 145—Transportation Economics (4) Review all entries**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECN 100 or (ARE 100A, ARE 100B)), ((MAT 016A, MAT 016B) or (MAT 017A, MAT 017B)), (STA 013 or STA 013Y), ECN 102, ECN 140, (ARE 106 or STA 108); or Consent of Instructor. Intended for advanced Economics undergraduates. Examination of fundamental problems of planning and financing transportation "infrastructure" (roads, ports, airports). The economics of the automobile industry, as well as the impact of government regulation and deregulation in the airlines and trucking industries. Effective: 2018 Spring Quarter.

**ECN 145—Transportation Economics (4) Review all entries**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECN 100 or ECN 100A or ARE 100A); (ECN 102, STA 108); or Consent of Instructor. Examination of fundamental problems of planning and financing transportation "infrastructure" (roads, ports, airports). The economics of the automobile industry, as well as the impact of government regulation and deregulation in the airlines and trucking industries. Intended for advanced Economics undergraduates. Effective: 2019 Fall Quarter.

**ECN 151A—Economics of the Labor Market (4) Review all entries**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECN 100 or (ARE 100A, ARE 100B) Theory of labor supply and demand; determination of wages and employment in the labor market. Policy issues: labor force participation by married women; minimum wages and youth unemployment; effect of unions on wages. Effective: 2016 Fall Quarter.

**ECN 151A—Economics of the Labor Market (4) Review all entries**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECN 100 or ECN 100A or ARE 100A Theory of labor supply and demand; determination of wages and employment in the labor market. Policy issues: labor force participation by married women; minimum wages and youth unemployment; effect of unions on wages. Effective: 2019 Winter Quarter.
ECN 151B—Economics of Human Resources (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECN 100 or (ARE 100A, ARE 100B) Human resource analysis; introduction to human capital theory and economics of education; the basic theory of wage differentials, including theories of labor market discrimination; income distribution; poverty. Policy issues; negative income tax; manpower training programs; incomes policy. Effective: 2016 Fall Quarter.

ECN 151B—Economics of Human Resources (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECN 100 or ECN 100A or ARE 100A Human resource analysis; introduction to human capital theory and economics of education; the basic theory of wage differentials, including theories of labor market discrimination; income distribution; poverty. Policy issues; negative income tax; manpower training programs; incomes policy. Effective: 2019 Winter Quarter.

ECN 152—Economics of Education (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECN 100 C- or better or (ARE 100A C- or better, ARE 100B C- or better)), ECN 102 C- or better, (MAT 016B C- or better or MAT 017B C- or better or MAT 021B C- or better), (STA 013 C- or better or STA 013Y C- or better or STA 032 C- or better); or Consent of Instructor. Application of theoretical and empirical tools of economics to the education sector. Demand for Education; Education Production and Market Structures in Education. Policy applications: class size reduction, school finance equalization, accountability, and school choice. Effective: 2018 Spring Quarter.

ECN 152—Economics of Education (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECN 100 C- or better or ECN 100A or ARE 100A C- or better); (ECN 100B or ARE 100B C- or better); ECN 102 C- or better; (STA 013 C- or better or STA 013Y C- or better or STA 032 C- or better); or Consent of Instructor. Application of theoretical and empirical tools of economics to the education sector. Demand for Education; Education Production and Market Structures in Education. Policy applications: class size reduction, school finance equalization, accountability, and school choice. Effective: 2019 Winter Quarter.

ECN 160A—International Microeconomics (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECN 100 or (ARE 100A, ARE 100B); or Consent of Instructor. International grade theory: impact of trade on the domestic and world economies; public policy toward external trade. Only 2 units of credit allowed to students who have completed ECN 162. Effective: 2016 Fall Quarter.

ECN 160A—International Microeconomics (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECN 100 or ECN 100A or ARE 100A International grade theory: impact of trade on the domestic and world economies; public policy toward external trade. Only 2 units of credit allowed to students who have completed ECN 162. Effective: 2019 Winter Quarter.

ECN 160B—International Macroeconomics (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECN 001A or ECN 001AV); ECN 001B; (ECN 100 or (ARE 100A, ARE 100B)), ECN 101; or Consent of Instructor. Macroeconomic theory of an open economy. Balance of payments adjustment mechanism, international monetary economics issues; international financial institutions and their policies. Only 2 units of credit allowed to students who have completed ECN 162. Effective: 2018 Winter Quarter.

ECN 160B—International Macroeconomics (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECN 101 Macroeconomic theory of an open economy. Balance of payments adjustment mechanism, international monetary economics issues; international financial institutions and their policies. Only 2 units of credit allowed to students who have completed ECN 162. Effective: 2019 Winter Quarter.

ECN 162—International Economic Relations (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECN 001A or ECN 001AV); ECN 001B; or Consent of Instructor. International trade and monetary relations, trade policy, exchange rate policy, policies toward international capital migration and investment. Emphasis on current policy issues. Course intended especially for non-majors. Not open for credit to students who have completed course 160A or 160B. GE credit: SS, WC. Effective: 2018 Winter Quarter.

ECN 171—Economy of East Asia (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECN 001A or ECN 001AV); ECN 001B; or Consent of Instructor. Intensive reading, discussion and research on selected topics from the economies of the countries of East Asia. Consult department for course scheduling. Effective: 2018 Spring Quarter.
ECN 190—Topics in Economics (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Consent of Instructor. Selected topics in economic analysis and public policy. Variable content. May be repeated for credit topics differ. Effective: 2007 Fall Quarter.

ECN 190X—Upper-Division Seminar (1-4)
Seminar—1-4 hours. Prerequisite(s): ECN 100; ECN 101; and Consent of Instructor. In-depth examination at an upper division level of a special topic in Economics. Emphasis on focused analytical work. May not be repeated for credit. Limited enrollment. Effective: 2007 Fall Quarter.

ECN 192—Internship (1-6)
Internship—3-18 hours. Prerequisite(s): Consent of Instructor. Upper division standing. Internship experience off and on campus in all subject areas offered in the Department of Economics. Supervised by a member of the staff. May be repeated for credit. (P/NP grading only.) Effective: 2014 Winter Quarter.

ECN 192—Internship (1-6)
Internship—3-18 hours. Prerequisite(s): Consent of Instructor. Upper division standing. Internship experience off and on campus in all subject areas offered in the Department of Economics. Supervised by a member of the staff. May be repeated for credit. (P/NP grading only.) Effective: 2019 Winter Quarter.

ECN 194HA—Special Study for Honors Students (4)
Independent Study—3 hours; Seminar—1 hour. Prerequisite(s): Major in Economics with senior standing; consent of instructor and completion of 135 units with a minimum GPA of 3.500 in courses counted toward the major. A program of research culminating in the writing of a senior honors thesis under the direction of a faculty advisor. Effective: 1997 Winter Quarter.

ECN 194HB—Special Study for Honors Students (4)
Independent Study—3 hours; Seminar—1 hour. Prerequisite(s): Major in Economics with senior standing; consent of instructor and completion of 135 units with a minimum GPA of 3.500 in courses counted toward the major. A program of research culminating in the writing of a senior honors thesis under the direction of a faculty advisor. Effective: 1997 Winter Quarter.

ECN 197T—Tutoring in Economics (1-5)
Tutorial—3-15 hours. Prerequisite(s): Consent of instructor and chairperson. Undergraduates assist the instructor by tutoring students in one of the department's regularly scheduled courses. May be repeated up to 10 unit(s). (P/NP grading only.) Effective: 2004 Fall Quarter.

ECN 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

ECN 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

ECN 200A—Microeconomic Theory (5)
Discussion—1 hour; Lecture—4 hours. Prerequisite(s): Graduate standing. Linear and non-linear optimization theory applied to develop the theory of the profit-maximizing firm and the utility-maximizing consumer. (Same course as Agricultural and Resource Economics 200A.) Effective: 1997 Winter Quarter.

ECN 200A—Microeconomic Theory (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Graduate standing. Linear and non-linear optimization theory applied to develop the theory of the profit-maximizing firm and the utility-maximizing consumer. (Same course as ARE 200A.) Effective: 2018 Fall Quarter.

ECN 200B—Microeconomic Theory (5)
Discussion—1 hour; Lecture—4 hours. Prerequisite(s): ECN 200A Characteristics of market equilibrium under perfect competition, simple monopoly and monopsony. Emphasis on general equilibrium and welfare economics; the sources of market success and market failure. (Same course as Agricultural and Resource Economics 200B.) Effective: 1997 Winter Quarter.

ECN 200B—Microeconomic Theory (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECN 200A Characteristics of market equilibrium under perfect competition, simple monopoly and monopsony. Emphasis on general equilibrium and welfare economics; the sources of market success and market failure. (Same course as ARE 200B.) Effective: 1997 Winter Quarter.

ECN 200B—Microeconomic Theory (4)
competition, simple monopoly and monopsony. Emphasis on general equilibrium and welfare economics; the sources of market success and market failure. (Same course as ARE 200B.) Effective: 2018 Fall Quarter.

ECN 200C—Microeconomic Theory (5) Review all entries
Discussion—1 hour; Lecture—4 hours. Prerequisite(s): ECN 200B Uncertainty and information economics. Individual decision making under uncertainty. Introduction to game theory, with emphasis on applications to markets with firms that are imperfect competitors or consumers that are imperfectly informed. (Same course as Agricultural and Resource Economics 200C.) Effective: 1997 Winter Quarter.

ECN 200C—Microeconomic Theory (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECN 200B Uncertainty and information economics. Individual decision making under uncertainty. Introduction to game theory, with emphasis on applications to markets with firms that are imperfect competitors or consumers that are imperfectly informed. (Same course as ARE 200C.) Effective: 2018 Fall Quarter.

ECN 200D—Macroeconomic Theory (5) Review all entries
Discussion—1 hour; Lecture—4 hours. Prerequisite(s): ECN 101; MAT 021A; MAT 021B; MAT 021C Macro static theory of income, employment, and prices. Effective: 1997 Winter Quarter.

ECN 200D—Macroeconomic Theory (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECN 101; MAT 021A; MAT 021B; MAT 021C; or equivalent courses. Macro static theory of income, employment, and prices. Effective: 2018 Fall Quarter.

ECN 200E—Macroeconomic Theory (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECN 200B (can be concurrent); ECN 200D Macrodynami theory of income, employment, and prices. Effective: 1997 Winter Quarter.

ECN 201A—History of Economic Thought (4)
Discussion—1 hour; Lecture—3 hours. Economic thought from the classical Greece era to modern times. Effective: 1997 Winter Quarter.

ECN 201B—History of Economic Thought II (4)
Discussion—1 hour; Lecture—3 hours. Origins and emergence of modern economic analysis. Effective: 1997 Winter Quarter.

ECN 203A—Advanced Economic Theory (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECN 200A; ECN 200B Advanced topics in general equilibrium theory and welfare economics: existence, determinateness and efficiency; intertemporal economies; uncertainty. Effective: 2007 Fall Quarter.

ECN 203B—Advanced Economic Theory: Game Theory (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECN 200A; ECN 200B; ECN 200C Covers the most recent developments in game theory, with the focus changing from year to year. Main topics are: refinements Nash equilibrium, repeated games, evolution, social situations, bounded rationality, and bargaining theory. Effective: 1997 Winter Quarter.

ECN 203C—Topics in Economic Theory (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECN 200A; ECN 200B; ECN 200C Selected topics in contemporary microeconomic theory. May be repeated for credit with the consent of the Graduate Studies Committee. May be repeated for credit. Effective: 1997 Winter Quarter.

ECN 210A—Economic History (4)
Lecture/Discussion—4 hours. Economic history of the eastern hemisphere in the modern period. Medieval Europe or other regions may be studied, depending on student interest. Effective: 1997 Winter Quarter.

ECN 210B—Economic History (4)
Lecture/Discussion—4 hours. The United States from Colonial times to the present. Other areas of the western hemisphere may be studied, according to student interest. Effective: 1997 Winter Quarter.

ECN 210C—Economic History (4)
Seminar—4 hours. Prerequisite(s): A graduate course in economic history. Selected topics and issues, emphasis on current research. (Quarter offered to be flexible.) Effective: 1997 Winter Quarter.

ECN 214—Development Economics (4)
Lecture—4 hours. Prerequisite(s): ARE 100A; ARE 100B; ECN 101; ECN 204/ECN 204 and ECN 160A-ECN 160B recommended. Review of the principal theoretical and empirical issues whose analysis has formed development
Analysis of economic development theories and development strategies and their application to specific policy issues in developing country contexts. (Same course as ARE 214.) Effective: 1997 Winter Quarter.

**ECN 215A—Microdevelopment Theory and Methods I (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECN 200A or ECN 204; ECN 240A recommended. Agricultural development theory, with a focus on microeconomics. Agricultural household behavior with and without market imperfections and uncertainty. Analysis of rural land, labor, credit and insurance markets, institutions, and contracts. (Same course as ARE 215A.) Effective: 1999 Fall Quarter.

**ECN 215B—Open Macroeconomics of Development (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ARE 200A or ECN 200A); (ARE 204 or ECN 204); (ECN 214 or ECN 215A); ECN 200D or ECN 205 Models and policy approaches regarding trade, monetary and fiscal issues, capital flows and debt are discussed in the macroeconomic framework of an open developing country. The basic analytical focus is real exchange rate and its impact on sectoral allocation of resources. (Same course as ARE 215B.) Effective: 1997 Winter Quarter.

**ECN 215C—Microdevelopment Theory and Methods II (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECN 215A Extension of development theory and microeconomic methods. Agricultural growth and technological change; poverty and income inequality; multisectoral, including village and regional models. Computable general equilibrium methods and applications. (Same course as ARE 215C.) Effective: 1999 Fall Quarter.

**ECN 215D—Environmental and Economic Development (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECN 200A; (ECN 204 or ARE 275) Interdisciplinary course drawing on theoretical and empirical research on interactions between environmental resource use and economic development processes. Analysis of issues emerging at the interface of environmental and development economics. (Same course as ARE 215D.) Effective: 1998 Spring Quarter.

**ECN 216—Energy and Climate Policy (4)**
Extensive Writing/Discussion; Lecture—3 hours. Prerequisite(s): ECN 100A or ARE 100A; or Consent of Instructor. Pass One restricted to graduate students in the following programs: Economics, Energy Graduate Group, and Transportation Technology and Policy Graduate Group. Fundamentals of energy technology, economics, and policy. Survey and analysis of current and prospective climate policies at the local and global level, including but not limited to cap-and-trade, emissions offsets, intensity standards, technology standards, mandates and subsidies. (Same course as EGG 202.) Effective: 2018 Spring Quarter.

**ECN 221A—The Theory of Industrial Organization (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECN 200A; ECN 200B; ECN 200C Game theory is used to analyze strategic interaction of firms in industries. Topics include models of competition, product differentiation, entry-deterring strategies, contractual arrangements, vertical control and antitrust issues. Effective: 2001 Fall Quarter.

**ECN 221B—Empirical Analysis in Industrial Organization (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECN 221A; ECN 240B Recent empirical work in industrial organization. Topics include empirical analysis of cartels, product differentiation, innovation and technological change, and imperfect competition in international markets. Effective: 2002 Winter Quarter.

**ECN 221C—Industrial Organization and Regulation (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECN 221A; ECN 240B Optimal regulation of natural monopoly. Topics include regulatory mechanisms for single and multiple output firms under symmetric and asymmetric information, optimality without regulation, the economic theory of regulation, and empirical studies of regulation and deregulation. Effective: 2002 Spring Quarter.

**ECN 230A—Public Economics (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECN 200C Measures of deadweight loss and consumer surplus; optimal commodity and income taxation; tax incidence; policy issues in personal taxation, corporate taxation, and social insurance; the evaluation of effective tax rates. Effective: 2001 Fall Quarter.

**ECN 230B—Public Economics (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECN 240A; ECN 240B Effects of government policies on economic behavior; labor supply, program participation, investment, consumption and savings. Effective: 2016 Fall Quarter.
ECN 230C—Public Economics (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECN 200C; ECN 240B Advanced topics in economics of the public sector, with emphasis on current research. Topics may vary from year to year. Effective: 2001 Fall Quarter.

ECN 233—Poverty and Public Policy (4)
Lecture/Discussion—4 hours. Interdisciplinary course covering qualitative and quantitative U.S. based poverty research. Topics include measurement, statistics, theories and evidence on the causes and consequences of poverty, and the history and efficacy of major anti-poverty programs. Effective: 2016 Fall Quarter.

ECN 235A—Macroeconomics (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECN 200D; or Consent of Instructor. Frontiers of applied/empirical macroeconomics. Evidence and lessons from macroeconomic history for The Great Depression, financial crises, efficient markets, parity conditions, capital flows, default, financial crises, exchange rates, growth, and other current empirical research topics. Effective: 2016 Fall Quarter.

ECN 235B—Macroeconomics (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECN 200D; or Consent of Instructor. Search theory, theory of real-world markets characterized by search frictions, with applications: Labor economics: models of unemployment and wages differentials; Financial economics: determination of asset prices in OTC financial markets; Monetary Economics: foundations for money as a medium of exchange. Effective: 2016 Fall Quarter.

ECN 235C—Macroeconomics (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECN 200D; or Consent of Instructor. Basic numerical methods for analytically intractable problems in economics. Techniques presented applicable in a wide range of fields including macroeconomics, econometrics, resource economics, labor economics, economic theory, international trade, finance, game theory, public finance, contract theory, and others. Effective: 2016 Fall Quarter.

ECN 235D—Macroeconomics (4)
Discussion—1 hour; Lecture—3 hours. Selected topics in Macroeconomics. May be repeated for credit May be repeated for credit with the approval of the Economics Graduate Studies Committee. Effective: 2017 Winter Quarter.

ECN 239—Econometric Foundations (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Graduate standing or consent of instructor. Course will prepare students for econometric theory and empirical work by examining the statistical foundation of econometrics. Special attention is paid to problems specific to non-experimental data common to social sciences. Topics from matrix algebra are also covered. (Same course as ARE 239.) Effective: 2016 Fall Quarter.

ECN 240A—Econometric Methods (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECN 239; or Consent of Instructor. Least squares, instrumental variables, and maximum likelihood estimation and inference for single equation linear regression model; linear restrictions; heteroskedasticity; autocorrelation; lagged dependent variables. (Same course as ARE 240A.) Effective: 2017 Fall Quarter.

ECN 240B—Econometric Methods (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECN 240A Topics include asymptotic theory and instrumental variables, pooled time-series cross-section estimation, seemingly unrelated regression, classical hypothesis tests, identification and estimation of simultaneous equation models, cointegration, error-correction models, and qualitative and limited dependent variable models. (Same course as ARE 240B.) Effective: 2000 Spring Quarter.

ECN 240C—Time Series Econometrics (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECN 240B; or Consent of Instructor. Probability theory; estimation, inference and forecasting of time series models; trends and non-standard asymptotic theory; vector time series methods and cointegration; time series models for higher order moments and transition data; state-space modeling and the Kalman filter. (Same course as ARE 240C.) Effective: 2016 Fall Quarter.

ECN 240D—Cross Section Econometrics (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECN 240B; or Consent of Instructor. Estimation and inference for nonlinear regression models for cross-section data; models for discrete data and for limited dependent variables; models for panel data; additional topics such as bootstrap and semiparametric regression. (Same course as Agricultural & Resource Economics 240D) (Same course as ARE 240D.) Effective: 2016 Fall Quarter.

ECN 240E—Topics in Time Series Econometrics (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECN 240C; or Consent of Instructor. Modern econometric
techniques for time series data. Expand on topics covered in Economics 240A, 240B and 240C. Contents may vary
from year to year. (Same course as ARE 240E.) Effective: 2016 Fall Quarter.

**ECN 240F—Topics in Cross Section Econometrics (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECN 240D; or Consent of Instructor. Modern econometrics
techniques for cross-section data. Expand on topics covered in Economics 240A, 240B and 240D. Contents may
vary from year to year. (Same course as ARE 240F.) Effective: 2016 Fall Quarter.

**ECN 250A—Labor Economics (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECN 150A and ECN 150B) or the equivalent. Philosophy,
theory and history of American and foreign labor movements; union structure, organization and collective
bargaining under changing labor market conditions; current labor market issues. Effective: 1997 Winter Quarter.

**ECN 250B—Labor Economics (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECN 151A; or Consent of Instructor. ECN 204 or ECN 200A
recommended. Microeconomic theory of labor supply and labor demand, estimation of labor supply and demand
functions; human capital theory; labor market analysis. Effective: 1997 Winter Quarter.

**ECN 260A—International Economics (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECN 200A or ECN 204 Theory of trade determinants; gains
from trade; tariffs and effective protection; economic unions. Effective: 1997 Winter Quarter.

**ECN 260B—International Economics (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECN 200D; ECN 200E Balance of payments adjustment
mechanisms; foreign exchange markets theories of balance of payments policy and international monetary

**ECN 260CN—International Investment and Trade (4)**
Seminar—4 hours. Prerequisite(s): ECN 260A Analysis of foreign investment and its links to trade; theories of the
firm as they relate to firm’s export and investment decisions; and an introduction to the political economy of trade
policies. Effective: 1999 Winter Quarter.

**ECN 260D—Topics in International Macroeconomics (4)**
Seminar—4 hours. Prerequisite(s): ECN 260B; or Consent of Instructor. Survey of current literature in international

**ECN 260E—Topics in International Trade (4)**
Seminar—4 hours. Prerequisite(s): ECN 260A; ECN 260B Current literature in international trade theory. Effective:
1999 Winter Quarter.

**ECN 260F—International Macroeconomic Policy (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECN 260B Theory and practice of international
macroeconomic policy. Topics include exchange rate regimes, international financial institutions, crises and current
topics. Effective: 2011 Fall Quarter.

**ECN 270A—Economics of Growth (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECN 200D; ECN 200E Modern theories and empirics of
economic growth beginning with the neoclassical theories up to current endogenous growth models. Emphasis on
the analysis of human capital and growth, technological innovation, its diffusion and empirical evidence on growth.
Effective: 2002 Fall Quarter.

**ECN 270B—Economics of Growth (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECN 200D; ECN 200E Empirical analysis of growth patterns
and growth models. Emphasis on the relationship between macroeconomic management and long-term growth;
the use of foreign capital in accelerating growth and its occasional mishaps; the comparison of growth performance
in East Asia and Latin America since WW2; the experiences of centrally-planned economies and transitions to
market-based growth; and the transformation from an industrial economy to a knowledge economy. Effective: 2003
Winter Quarter.

**ECN 270C—Economics of Growth (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECN 200D; ECN 200E Institutional bases; politics; contracts
and commitment; money and finance; malthusian dynamics; modern economic growth; transition of
industrialization; dual economies, core and periphery; sources of convergence and divergence; openness and
growth; resources, demography, and geography; institutions, imperialism, and class conflicts. Effective: 2003 Spring Quarter.

**ECN 280—Orientation to Economic Research (2)**
Discussion—2 hours. Course tries to bridge the gap between students’ classwork and their subsequent research. It deals with topics such as the origination of a research project, some mechanics of empirical research and hints on the submission of research papers. (S/U grading only.) Effective: 1997 Winter Quarter.

**ECN 290—Topics in Economics (4)**
Seminar—4 hours. Prerequisite(s): Consent of Instructor. Selected topics in economic analysis and public policy, focusing on current research. May be repeated for credit. Effective: 1997 Winter Quarter.

**ECN 291—Contemporary Economics Seminar (2)**
Seminar—2 hours. Prerequisite(s): Graduate standing in Economics. Seminar series on topics of current interest. May be repeated for credit. (S/U grading only.) Effective: 2007 Fall Quarter.

**ECN 298—Group Study (1-5)**
Discussion—1-5 hours. Prerequisite(s): Consent of Instructor. Graduate standing. (S/U grading only.) Effective: 1997 Winter Quarter.

**ECN 299—Individual Study (1-12)**
Variable. Prerequisite(s): Consent of Instructor. Graduate standing. (S/U grading only.) Effective: 1997 Winter Quarter.

**ECN 299D—Dissertation Research (1-12)**
Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

**ECN 397—Teaching of Economics (2)**
Lecture/Discussion—2 hours. Prerequisite(s): Graduate standing in economics. Teaching of economics: methods of instruction, organization of courses, examination and evaluation procedures. (S/U grading only.) Effective: 1997 Winter Quarter.

(School of Education)

Lauren E. Lindstrom, Ph.D., Dean

Cynthia Carter Ching, Ph.D., Associate Dean for Academic Programs and Instruction

Peter C. Mundy, Ph.D., Associate Dean for Academic Personnel and Research

530-752-8258; Fax 530-754-8019; http://education.ucdavis.edu

**Faculty.** http://education.ucdavis.edu/faculty

**Program Coordinator.** 530-752-2367

**Minor Requirements:**

The UC Davis School of Education is committed to developing informed citizens and advocates for productive educational environments in a democratic society. Education courses are designed for undergraduate students from all majors.

A Minor in Education will help students:

- Develop an understanding of the issues and concerns of public and private education.
- Complete prerequisites for the teaching credential program.
- Work towards a master's degree or doctoral degree in education or related field.
- Seek employment in policy, advocacy, or other education related careers.

**Courses.** Students must complete 20 units the Minor program in Education. At least 12 units of the 20-unit minimum for the minor must be in Education. The remaining units for the minor may be in education or a related field as approved on the electives list.
**Minor Advisors.** A designated faculty member in the School of Education may advise students and give final approval on the minor. For additional information contact the Student Services office in School of Education Building.

** EDU 181 and 183-4 units or AED 100-3 units may serve as course substitutes for EDU 100; if EDU 100 is taken, EDU 181, 183 and/or AED 100 MAY not be taken as electives.

* Internship (192, 195A or B, 195TC, 197TC) and Independent Study (199), or a combination of both, may not exceed a total of four units. Elective courses may include only one internship.

Total: 20

Education Minor | EDU Courses

Courses in EDU:

EDU 065A—Foundations for University Success; Introduction to the University System (2)
Fieldwork; Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Student must be a part of an approved Foundations for University Success program. Introduction to resources supporting first year student academic success and transition to a tier one research university. (P/NP grading only.) Effective: 2017 Summer Session 2.

EDU 065B—Foundations for University Success; Introduction to Research at a Tier 1 University (2)
Fieldwork; Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Student must be a part of an approved Foundations for University Success program. Development of important skills necessary for research including critical thinking, study skills, writing skills, and presentation skills. (P/NP grading only.) Effective: 2017 Summer Session 2.

EDU 065C—Foundations for University Success; Internships, Graduate School and Careers (2)
Fieldwork; Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Student must be a part of an approved Foundations for University Success program. Resources to explore academic and career connections and opportunities including internships, volunteer opportunities, graduate schools and careers. (P/NP grading only.) Effective: 2017 Summer Session 2.

EDU 081—Learning in Science and Mathematics (2)
Fieldwork—2 hours; Lecture/Discussion—2 hours. Limited to 26 students per section. Exploration of how students learn and develop understanding in science and mathematics classrooms. Introduction to case studies and interview techniques and their use in K-6 classrooms to illuminate factors that affect student learning. (Same course as GEL 081.) (P/NP grading only.) GE credit: SS, VL, WE. Effective: 2007 Winter Quarter.

EDU 092—Internship (1-3)
Internship—3-9 hours. Prerequisite(s): Consent of Instructor. Enrollment dependent on availability of intern placements. Internship as a teacher’s aide or tutor in K-12 classrooms under the supervision of a faculty member. May be repeated for credit. (P/NP grading only.) Effective: 2001 Fall Quarter.

EDU 098—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Primarily for lower division students. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

EDU 100—Introduction to Schools (4)
Fieldwork—3 hours; Lecture—3 hours. Study of occupational concerns of teachers; skills for observing classroom activities; school organization and finance; school reform movement; observing, aiding, and tutoring in schools. GE credit: ACGH, DD, OL, SS. Effective: 2016 Fall Quarter.

EDU 110—Educational Psychology: General (4)
Lecture/Discussion—4 hours. Learning processes, cognitive development, individual differences, testing and evaluation. GE credit: SS, WE. Effective: 2016 Fall Quarter.
EDU 114—Quantitative Methods in Educational Research (4)
Lecture/Discussion—4 hours. Problems and methods in data analysis. Design of research projects. Some consideration of procedures suited to digital computers. GE credit: QL. Effective: 2016 Fall Quarter.

EDU 115—Educating Children with Disabilities (2)
Lecture—2 hours. Educational issues and processes involved in teaching children with disabilities. The course will focus on the structure of special education, with an emphasis on meeting the educational needs of children who are mainstreamed in regular classes. GE credit: SS. Effective: 2016 Fall Quarter.

EDU 119—The Use and Misuse of Standardized Tests (4)
Discussion—1 hour; Lecture—3 hours. Principles underlying educational and psychological testing. Purposes of testing for individual achievement and evaluation of school programs. Interpretation and misinterpretations of outcomes. Analysis of SAT, GRE and other common tests. Experience in test administration and outcome interpretation. GE credit: QL, SS, WE. Effective: 2016 Fall Quarter.

EDU 120—Philosophical and Social Foundations of Education (4)
Discussion—1 hour; Lecture—3 hours. Philosophical, historical, and sociological study of education and the school in our society. GE credit: ACGH, SS, WE. Effective: 2016 Fall Quarter.

EDU 121—Introduction to Education Policy Analysis: Tools, Methods and Frameworks (4)
Discussion—1 hour; Lecture—3 hours. Introduces students to the field of education policy analysis with a specific emphasis on the quantitative frameworks and analytical tools—drawn primarily from economics and statistics—that are used to guide and inform educational policymaking. GE credit: QL, SS. Effective: 2014 Fall Quarter.

EDU 122—Children, Learning and Material Culture (4)
Extensive Writing/Discussion—1 hour; Fieldwork; Lecture/Discussion—3 hours. How material artifacts shape what and how children learn in school, at home, and in the community. Artifacts examined include books, computers, household appliances, toys and games, entertainment media, collectibles, sports equipment, clothing, folk arts and crafts, and neighborhood space. GE credit: SS, VL, WE. Effective: 2017 Summer Session 1.

EDU 130—Issues in Higher Education (4)
Discussion—3 hours; Fieldwork—3 hours. Analysis of current issues in higher education and of some practical implications of varying philosophical approaches to the role of the university. GE credit: SS, WE. Effective: 2017 Summer Session 1.

EDU 142—Introduction to Environmental Education (4)
Fieldwork; Lecture/Discussion—3 hours. Study of history, philosophy, principles and approaches to environmental education (EE) and outreach; learning theories, teaching strategies and techniques in EE and outreach; evaluation of EE curricula in non-formal and in-school contexts; observing, aiding and facilitating local environmental education programs. GE credit: OL, SS. Effective: 2009 Fall Quarter.

EDU 147—Anglos, Latinos and the Spanish Black Legend: The Origins and Educational Implications of Anti-Hispanic Prejudice (4)
Fieldwork; Lecture/Discussion—3 hours; Term Paper. Examination of anti-Hispanic prejudice in the United States focusing on the "Black Legend," a 16th Century anti-Spanish myth underpinning the doctrine of "Manifest Destiny." Exploration of the Legend's presence in contemporary American society through interviews and analysis of school textbooks. (Same course as SPA 147.) GE credit: ACGH, AH, DD, WE. Effective: 2016 Fall Quarter.

EDU 150—Cultural Diversity and Education in a Sociopolitical Context (4)
Extensive Writing; Lecture/Discussion—4 hours. Introduction to cultural diversity and education in a sociopolitical context. Interactive course. Small and large-group discussions explore, extend, and apply readings; range of writing genres for responses to assignments and course themes; lectures, slide shows, speakers, brief fieldwork, and presentations. GE credit: DD, SS, WE. Effective: 2011 Fall Quarter.

EDU 151—Language Development in the Chicano Child (3)
Lecture/Discussion—3 hours. Bilingualism, first and second language acquisition, bilingual education, language assessment, Chicano Spanish and the role of dialect varieties in the classroom. Not open for credit to students who have completed EDU 151T. Effective: 2016 Fall Quarter.
EDU 151T—Language Development in the Chicano Child (3)
Lecture/Discussion—3 hours. Prerequisite(s): Acceptance in Teaching Credential Program. Open to UC Davis Teacher Credential candidates only. Bilingualism, first and second language acquisition, bilingual education, language assessment, Chicano Spanish and the role of dialect varieties in the classroom. Not open for credit to students who have completed EDU 151. Effective: 2016 Fall Quarter.

EDU 152—Academic Spanish for Bilingual Teachers (3)
Fieldwork; Lecture/Discussion—3 hours; Recitation—3 hours. Prerequisite(s): Acceptance in Teaching Credential Program or consent of instructor. Communicative class taught in Spanish focused on the development of Spanish communication skills for current and/or future bilingual teachers. Main topics are related to school content areas in bilingual settings, with an emphasis on standard and Southwest Spanish dialects. GE credit: AH, OL, SS, WE. Effective: 2016 Fall Quarter.

EDU 153—Diversity in the K-12 Classroom (2)
Lecture/Discussion—2 hours. Prerequisite(s): Acceptance in Teaching Credential Program. Analysis of research on learning styles among culturally diverse students with review and evaluation of responsive curricula and classroom teaching techniques. The ethnographic interview as a research tool. Effective: 2016 Fall Quarter.

EDU 160A—Introduction to Peer Counseling (2)
Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Introduction to peer counseling techniques and development of peer counseling skills. (P/NP grading only.) Effective: 2016 Fall Quarter.

EDU 160B—Issues in Peer Counseling (2)
Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. In-depth review and development of skills for specific counseling topics. May be repeated once for credit when topic differs. May be repeated up to 1 time(s) May be repeated once for credit when topic differs. (P/NP grading only.) Effective: 2016 Fall Quarter.

EDU 163—Guidance and Counseling (4)
Lecture—4 hours. Nature and scope of pupil personnel services; basic tools and techniques of guidance; theory and practice of counseling psychology, with emphasis on educational and vocational adjustment. Effective: 2016 Fall Quarter.

EDU 173—Language Development (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): LIN 001 or LIN 001Y; or Consent of Instructor. LIN 103A, LIN 103B recommended. Theory and research on children's acquisition of their native language, including the sound system, grammatical systems, and basic semantic categories. (Same course as LIN 173.) GE credit: SS. Effective: 2018 Spring Quarter.

EDU 180A—Computers in Education (1)
Laboratory—2 hours; Lecture/Discussion—1 hour; Project (Term Project)—3 hours. Prerequisite(s): Acceptance in Teacher Credential Program. Restricted to Teaching Credential Majors. Applications of computers in education as instructional, intellectual, and communication tools. Effective: 2013 Fall Quarter.

EDU 180B—Computers in Education (1)
Laboratory—2 hours; Lecture/Discussion—1 hour; Project (Term Project)—3 hours. Prerequisite(s): EDU 180A; Acceptance in Teacher Credential Program. Restricted to Teaching Credential Majors. Applications of computers in education as instructional, intellectual, and communication tools. Effective: 2013 Fall Quarter.

EDU 180C—Computers in Education (1)
Laboratory—2 hours; Lecture/Discussion—1 hour; Project (Term Project)—3 hours. Prerequisite(s): EDU 180B; Acceptance in Teacher Credential Program. Restricted to Teaching Credential Majors. Applications of computers in education as instructional, intellectual, and communication tools. Effective: 2013 Fall Quarter.

EDU 181—Teaching in Science and Mathematics (2)
Fieldwork—2 hours; Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Major in mathematics, science, or engineering; or completion of a one-year sequence of science or calculus. Class size limited to 40 students per section. Exploration of effective teaching practices based on examination of how middle school students learn math and science. Selected readings, discussion and field experience in middle school classrooms. (Same course as GEL 181.) (P/NP grading only.) GE credit: SS, WE. Effective: 2011 Fall Quarter.

EDU 182—Computer Project for Curricular Integration (1)
Seminar—1 hour. Prerequisite(s): Consent of Instructor. Design and implementation of a curricular unit to integrate computer technology into a K-12 classroom setting. A project-based seminar intended for students with substantial
prior experience with instructional use of computers and related technologies. Not open for credit to students who have completed EDU 180 or EDU 181. Effective: 2016 Fall Quarter.

**EDU 183—Teaching High School Mathematics and Science (3)** *Review all entries*
Fieldwork; Lecture/Discussion—2 hours. Prerequisite(s): Major in mathematics, science, or engineering; or consent of instructor with completion of a one-year sequence of science or calculus. Limited to 40 students per section. Exploration and creation of effective teaching practices based on examination of how high school students learn mathematics and science. Field experience in high school classrooms. (Same course as Geology 183.) GE credit: OL, SS, WE. Effective: 2017 Fall Quarter.

**EDU 183—Teaching High School Mathematics and Science (3)** *Review all entries*
Fieldwork; Lecture/Discussion—2 hours. Prerequisite(s): Major in mathematics, science, or engineering; or completion of a one-year sequence of science or calculus and consent of the instructor. Limited to 40 students per section. Exploration and creation of effective teaching practices based on examination of how high school students learn mathematics and science. Field experience in high school classrooms. (Same course as GEL 183.) GE credit: OL, SS, WE. Effective: 2018 Fall Quarter.

**EDU 185—Learning in a Digital Age: Information, Schooling, and Society (4)**
Lecture/Discussion—2 hours; Lecture/Lab—2 hours. Focus on the changing nature of learning in a digital age: social media, ubiquitous connectivity, online education, electronic communication, writing, gaming, and youth culture. Readings will be drawn from major recent works detailing fundamental shifts in information, schooling, and society. GE credit: OL, SS, VL. Effective: 2013 Fall Quarter.

**EDU 192—Internship (1-3)**
Discussion—1 hour; Internship—2-8 hours. Prerequisite(s): Consent of Instructor. Internship as a tutor, teacher's aide, or peer counselor in a school or educational counseling setting under the supervision of a faculty member. May be repeated for credit. (P/NP grading only.) Effective: 2016 Fall Quarter.

**EDU 197T—Tutoring in Education (1-2)**
Tutorial—1-2 hours. Prerequisite(s): Consent of Instructor. Leading of small voluntary discussion groups affiliated with the School's upper division courses under the supervision of, and at the option of, the course instructor, who will submit a written evaluation of the student's work. May be repeated up to 1 time(s) for a total of 4 units. (P/NP grading only.) Effective: 2016 Fall Quarter.

**EDU 198—Directed Group Study (1-5)**
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

**EDU 199—Special Study for Advanced Undergraduates (1-5)**
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 2016 Fall Quarter.

**EDU 200—Educational Research (4)**
Discussion—2 hours; Lecture—2 hours. Prerequisite(s): Introductory statistics or consent of instructor. Defining educational research questions, reviewing relevant literature, developing research designs, developing research instruments, selecting appropriate data analysis procedures, and writing research projects. A case problem will provide practice in designing and reporting research. Effective: 2016 Fall Quarter.

**EDU 201—Qualitative Research in Education (4)**
Lecture—2 hours; Seminar—2 hours. Prerequisite(s): Graduate standing or consent of instructor. Examines the design and conduct of educational research using non-numerical data (e.g., text, discourse, imagery and artifacts). Focuses on issues (e.g., validity, reliability, generalizability, ethics) and reporting genres (e.g., narrative accounts, case studies, and arguments). Effective: 1997 Fall Quarter.

**EDU 202N—Computer Analysis of Qualitative Data (4)**
Laboratory—2 hours; Seminar—3 hours. Critical and practical understanding of how to use computer software programs to analyze qualitative data (text, images, and videotape) in conducting social research. Effective: 2016 Fall Quarter.

**EDU 203—Educational Testing and Evaluation (4)**
Lecture/Discussion—4 hours. Prerequisite(s): Graduate standing or consent of instructor. Introduces the theoretical assumptions underlying traditional test construction, as well as the basic statistical principles involved in the design, evaluation, and interpretation of standardized tests. Also introduces the debates surrounding the uses of different kinds of tests and evaluation tools. Effective: 1997 Winter Quarter.
EDU 204A—Quantitative Methods in Educational Research: Analysis of Correlational Designs (4)
Discussion—2 hours; Discussion/Laboratory—2 hours. Prerequisite(s): Introductory statistics or consent of instructor. Methods for analysis of correlational data in educational research. Topics include multiple correlation and regression, discriminant analysis, logistic regression, and canonical correlation. Emphasis on conceptual understanding of the techniques and use of statistical software. Effective: 2016 Fall Quarter.

EDU 204B—Quantitative Methods in Educational Research: Experimental Designs (4)
Discussion—2 hours; Discussion/Laboratory—2 hours. Prerequisite(s): Introductory statistics or consent of instructor. Methods for analysis of experimental data in educational research. Topics include ANOVA, fixed v. random effects models, repeated measures ANOVA, analysis of co-variance, MANOVA, chi square tests, small sample solutions to t and ANOVA. Effective: 2016 Fall Quarter.

EDU 205A—Ethnographic Research in Schools I: Current Theory and Practice (4)
Lecture—4 hours. Current literature from anthropology and society related to schools. Emphasis on the organizational structure of institutions and the analysis of face-to-face interaction. Will explore the relationship between field-based research and theory development on the acquisition of knowledge in specific social and cultural contexts. Effective: 2016 Fall Quarter.

EDU 205B—Ethnographic Research in Schools II: Field-Based Research Projects (4)
Discussion—4 hours. Prerequisite(s): EDU 205A. Student research projects in specific schools with cooperative critical analysis of the design, data collection, and inference by researchers. Students will continue to meet with instructor as a group throughout the quarter to discuss specific projects. Effective: 2016 Fall Quarter.

EDU 206A—Inquiry into Classroom Practice: Traditions and Approaches (2)
Fieldwork; Lecture/Discussion—2 hours. Prerequisite(s): Acceptance in Teacher Credential Program. Introduction to traditions and approaches of teachers conducting research in their own classrooms: purposes, focal areas, methods of data collection and analysis, and written genre conventions. Effective: 2016 Fall Quarter.

EDU 206B—Inquiry into Classroom Practice: Application of Teacher Research Approaches (4)
Fieldwork—1 hour; Lecture/Discussion—3 hours. Prerequisite(s): EDU 206A; or Consent of Instructor. Open to Graduate Teaching Credential students. Analysis and application of teacher research through the development, implementation and evaluation of a short-term classroom research-based intervention. Particular attention to research that enhances learning of English language learners and under-performing students. Effective: 2007 Spring Quarter.

EDU 206C—Inquiry into Classroom Practice: Study Design (4)
Fieldwork—1 hour; Seminar—3 hours. Prerequisite(s): EDU 206B; or Consent of Instructor. Open to Graduate MA Credential students. Proposal development for classroom-based inquiry designed to address student learning needs. Mixed methods research design and preliminary data collection approaches. Design and application of baseline student assessment for proposal development. Literature review. Data collection in K-12 classrooms required. Effective: 2007 Spring Quarter.

EDU 206D—Inquiry into Classroom Practice: Data Analysis and Research Reporting (4)
Extensive Writing/Discussion—1 hour; Fieldwork—1 hour; Seminar—2 hours. Prerequisite(s): EDU 206C; or Consent of Instructor. Open to Graduate MA Credential students. Support of the inquiry begun in course 206C through continuous collaborative critique and feedback resulting in the writing and presentation of a research study. Effective: 2007 Winter Quarter.

EDU 207—Concepts of the Curriculum (4)
Discussion—2 hours; Lecture—2 hours. Prerequisite(s): Consent of Instructor. Development of the skills of philosophical analysis and argument for the establishment of a point of view, in the consideration of curriculum theory and practice. Classical and contemporary approaches to subject matter and activity emphases, hidden curriculum, and moral education. Effective: 2016 Fall Quarter.

EDU 208—Presenting Educational Research in Written Reports (4)
Extensive Writing; Seminar—3 hours. Prerequisite(s): Consent of Instructor. Rhetorical and substantive challenges of presenting educational research through written reports; research rhetoric and genres; competing discourse conventions of educational research, policy, and practice; the social organization of publishing educational research. May be repeated up to 1 time(s). Effective: 2016 Fall Quarter.

EDU 209—Image-based Field Research (4)
Fieldwork—2 hours; Lecture/Discussion—3 hours. Critical and practical understanding of video tape and still
photography as resources for enhancing field research in schools and other social setting. Effective: 2016 Fall Quarter.

**EDU 210—Psychological Perspectives on School Learning (4)**
Extensive Writing; Lecture/Discussion—3 hours. Study of human learning theory and research related to learning of academic content. Review of contemporary issues of constructivism, problem solving, expertise, conceptual change, transfer, and metacognition. Effective: 2016 Fall Quarter.

**EDU 211—Sociocultural and Situative Perspectives on Learning and Cognition (4)**

**EDU 213—Individual Assessment (4)**
Lecture—4 hours. Prerequisite(s): Introductory statistics or consent of instructor. Theories of intellectual functioning and the measurement of cognitive abilities in school-aged children. Supervised practice in administration and scoring of contemporary tests for children including the WISC-R, the WAIS-R, the Stanford Binet, the McCarthy Scales of Children's Ability. Effective: 2016 Fall Quarter.

**EDU 215—Research on Achievement Motivation in Education (4)**
Seminar—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. Analysis and critique of recent research on cognitive processes related to achievement motivation in school settings. Topics include self-determination theory, attribution theory, goal theory, intrinsic and extrinsic motivation, learned helplessness, psychological reactance, gender and culture, and research design. Effective: 2016 Fall Quarter.

**EDU 220—Concepts and Methods of Policy Analysis (4)**
Fieldwork; Seminar—3 hours; Term Paper. Introduction to concepts and methods of policy analysis. Emphasis on the relationship between educational issues and problems; policy development; constructing persuasive policy analyses; issues related to policy process. Effective: 2016 Fall Quarter.

**EDU 221—Culture and Social Organization of Schools (4)**
Seminar—4 hours. Prerequisite(s): Consent of Instructor. Culture and social organization of schools. Examines perspectives of social researchers, educational policy-makers, and school members and their implications for educational research, policy and practice. Effective: 2016 Fall Quarter.

**EDU 222—School Change and Educational Reform (4)**
Lecture/Discussion—2 hours; Seminar—2 hours. Analysis of models, processes, and case studies of school change and educational reform with respect to variable characteristics of schools and schooling, planned and unplanned change, the moral evaluation of school change, and the role of educational research. Effective: 2016 Fall Quarter.

**EDU 223—Education and Social Policy (4)**
Seminar—4 hours. Prerequisite(s): Consent of Instructor. Focuses on understanding the social and political context of education in the U.S. and California and how education policy is formed in the broader public arena. Develops skills in educational policy analysis. (Former course 237.) Effective: 2016 Fall Quarter.

**EDU 225—Education Policy and Law (4)**
Lecture/Discussion—4 hours. Examination of law as an instrument of social policy. Specific focus on the legalization of education decision making, its causes, dimensions, and effects on administrative and teacher authority. Effective: 2016 Fall Quarter.

**EDU 226—Culture and Social Organization of Higher Education (4)**
Fieldwork—1 hour; Seminar—3 hours. Prerequisite(s): Consent of Instructor. Critical study of culture and social organization of higher education institutions policies and functions in the U.S., with some attention to other countries. Effective: 2016 Fall Quarter.

**EDU 228—Politics and Governance of Education (4)**
Seminar—3 hours; Term Paper. Examination of political power, representation, influence, decision-making and inter-governmental relations in the public schools. Effective: 2016 Fall Quarter.

**EDU 229—Education Finance Policy (4)**
Seminar—3 hours; Term Paper. Examination of (1) United States financing public education, (2) the relationship between school finance and education policy, and (3) the relationship between education finance and education practice. Effective: 2016 Fall Quarter.
EDU 230—Special Topics in Education Policy (4)
Seminar—3 hours; Term Paper. Selected topics in education policy. Designed to facilitate preparation for the qualifying examination or dissertation. Students will critically analyze scholarly work including their own works in progress. May be repeated for credit for credit when topic differs. Effective: 2016 Fall Quarter.

EDU 235—Critical Pedagogy (4)
Seminar—4 hours. A socio-cultural critique, from an interdisciplinary perspective, of educational reform and change. The critique will include an analysis of the influence of text content on the perpetuation of social power differences. Effective: 2016 Fall Quarter.

EDU 236—Application of Hierarchical Linear Models in Education Research (4)
Discussion/Laboratory—2 hours; Lecture—2 hours; Term Paper. Prerequisite(s): EDU 204A; Or similar course with permission of the instructor. Application of hierarchical linear models in education research across multiple areas, such as policy, curriculum, and assessment. Develop working knowledge of hierarchical linear modeling and an understanding of its use in existing research as well as student's work. Effective: 2009 Spring Quarter.

EDU 237—Survey Research Methods (4)
Fieldwork—1 hour; Lecture/Discussion—3 hours; Term Paper. Theories, principles and application of survey research methodology. Students develop, validate, and administer survey instruments; select representative samples; conduct focus groups; and collect, organize, and analyze survey data. Familiarity with introductory concepts in descriptive and inferential statistics is assumed. Effective: 2016 Fall Quarter.

EDU 238—Participatory Action Research (PAR) (4)
Fieldwork—1 hour; Lecture/Discussion—3 hours. Prerequisite(s): Introductory research methods course recommended. Principles and strategies of PAR and related methodologies that emphasize collaborating with those affected by the issue being researched in order to educate, take action or effect social change. Conduct interviews with potential collaborators, case analyses and research proposals. Effective: 2016 Fall Quarter.

EDU 239—Interview Methods (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): EDU 201 or equivalent course recommended. Introduction to qualitative interviewing, focused in particular on narrative and self-story as both practical method and theoretical stance. Students complete a case-focused interview project during the course: designing an interview protocol, conducting the interview, transcribing, analyzing, and presenting their research. Effective: 2015 Winter Quarter.

EDU 242—Research on Text Comprehension (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. Analysis of recent research related to cognitive processing of written texts. Topics include word decoding, schema theory, background knowledge, assimilation, accommodation, working memory, processing depth, vocabulary acquisition, sentence-level processes, text-level processes, text structure, implications for curriculum and instruction. Effective: 2016 Fall Quarter.

EDU 243—Research on the Teaching and Learning of Writing (4)
Seminar—4 hours. Prerequisite(s): Consent of Instructor. Study of issues in research on composition; history of composition studies; data analysis techniques; product and process approaches; cognitive and social perspectives. Effective: 2016 Fall Quarter.

EDU 244—Topical Seminar in Language, Literacy and Culture (4)
Project (Term Project)—1 hour; Seminar—3 hours. Critical study of selected issues of language, literacy, and culture as they relate to education. May be repeated up to 2 time(s) topics differ. Effective: 2016 Fall Quarter.

EDU 245—Theory and Research in Early Literacy (4)
Fieldwork—1 hour; Seminar—3 hours. Analysis of children's initial processes in learning to read extending from the preschool years into second grade. Topics include emergent literacy, phonological awareness, word recognition, decoding, spelling, vocabulary, comprehension, second language reading, assessment, intervention, and instruction. GE credit: SS. Effective: 2016 Fall Quarter.

EDU 246—Reading as a Social and Cultural Process (4)
Fieldwork—1 hour; Lecture—3 hours. Prerequisite(s): EDU 211 recommended. Recent theoretical and empirical work on reading in social contexts. Topics include reading as an individual interactive process; reading as a social and cultural process; critical perspectives on reading; implications of contrastive theoretical perspectives for curriculum and instruction in reading. Effective: 2016 Fall Quarter.

EDU 247—Research on Response to Culturally Diverse Literature, K-12 (4)
Fieldwork—1 hour; Seminar—3 hours. Research on response to culturally diverse literature in classrooms and other
K-12 settings. Topics include reader response theories, values in expanding the literary canon, problems of cultural authenticity, resistance to multicultural literature, and instruction for diverse texts and learners. Effective: 2006 Fall Quarter.

**EDU 248—Academic Language and Literacies (4)**
Fieldwork; Project (Term Project); Seminar—3 hours. Exploration of theories and research on academic language and literacies for the schooling of first and second language learners. Students use basic qualitative methods to collect and analyze classroom language and literacy data. Effective: 2011 Fall Quarter.

**EDU 249—Discourse Analysis in Educational Settings (4)**
Seminar—3 hours; Term Paper. Prerequisite(s): An introductory linguistics or sociolinguistics course or consent of instructor. Examines form and type in discourse (e.g., narration, conversation, routines), approaches to discourse analysis, and research on classroom discourse (lessons, teaching/learning interactional sequences). Final term paper is an analysis of discourse data tape-recorded by student in a field setting. Effective: 2016 Fall Quarter.

**EDU 251—Research in Bilingual and Second Language Education (3)**
Seminar—3 hours. Discussion and analysis of recent research in bilingual and second language education. Topics include: language acquisition in second language learners and bilinguals, second language teaching methods, language-use models in bilingual education, interaction analysis in bilingual/cross-cultural classrooms, use of the vernacular in classrooms. Effective: 2016 Fall Quarter.

**EDU 253—Language and Literacy in Linguistic Minorities (3)**
Fieldwork—3 hours; Seminar—2 hours. Prerequisite(s): Acceptance in Teacher Credential Program. Analysis and application of research on oral language development and literacy in language minority students, through the development, implementation, and evaluation of research-based language arts curriculum. Effective: 2016 Fall Quarter.

**EDU 255—Curriculum Development and Evaluation in Mathematics (4)**
Seminar—4 hours. Prerequisite(s): Consent of Instructor. Analysis of curricular issues and goals in mathematics education, including long-term trends, current status and influences, proposed changes, and evaluation issues. Selected curriculum projects will be examined. Effective: 2016 Fall Quarter.

**EDU 256A—Research in Mathematics Education (4)**
Seminar—4 hours. Prerequisite(s): Consent of Instructor. Examination of research process in mathematics education; review of critical productive problems identified by researchers; evolution of trends, issues, theories and hypotheses in various areas of mathematics education research. Course emphasizes foundations. Effective: 2016 Fall Quarter.

**EDU 256B—Research in Mathematics Education (4)**

**EDU 257—Computer Technology in Mathematics Education (4)**
Seminar—4 hours. Prerequisite(s): Consent of Instructor. Roles of calculators, computers, and graphing calculators in mathematics education will be addressed, with emphasis on the impact of these technologies on curriculum reform. Selected efforts to integrate technology into mathematics instruction will be examined. Effective: 2016 Fall Quarter.

**EDU 260—The Modern History of Science Education (4)**
Seminar—4 hours. Prerequisite(s): Consent of Instructor. History of curricular issues and goals in science education from the late 19th century forward, including long-term trends, current status and influences, proposed changes, and evaluation issues. National science standards and curriculum projects. Effective: 2016 Fall Quarter.

**EDU 262A—Research Topics in Science Education I (4)**
Seminar—4 hours. Prerequisite(s): Consent of Instructor. Research process and product in science education; review of critical science education issues; evolution of trends, theories and hypotheses in various areas of science education research. Survey of current major research in science education. Effective: 2016 Fall Quarter.

**EDU 262B—Research Topics in Science Education II (4)**
Seminar—4 hours. Current research issues and activities in science education: status, trends, theories and hypotheses. Formulation of research questions, design of studies and critical, in-depth review of literature related to the student’s research interests. Effective: 2016 Fall Quarter.
EDU 264—Scientific Literacy and Science Education Reform (4)
Seminar—4 hours. Prerequisite(s): Consent of Instructor. Current trends in science education reform locally, regionally, and nationally focusing on scientific literacy. Equity, access and "science for all." Effective: 2016 Fall Quarter.

EDU 270—Research on Teacher Education and Development (4)
Project (Term Project); Seminar—3 hours. Research on teacher preparation in university credential programs and on professional development of in-service teachers, with special attention to teacher preparation for work with culturally and linguistically diverse youth. Effective: 2016 Fall Quarter.

EDU 271—Supervision of Student Teachers: Research, Theory & Practice (4)
Fieldwork—1 hour; Lecture/Discussion—3 hours. Research, theory and practice in the preparation and supervision of teachers. Practice in the supervision of candidates in university teaching credential programs during the student teaching field placement and the mentoring of novice teachers by expert teachers. Effective: 2016 Fall Quarter.

EDU 275A—Effective Instruction: Curriculum and Assessment—Theory, Research, and Practice (2)
Lecture/Discussion—2 hours. Prerequisite(s): Acceptance in Teacher Credential Program. Restricted to Teaching Credential majors. Examination of contemporary theories of curriculum development, research about the relationship among instructional planning, classroom assessment, and student learning to guide teaching practice. Effective: 2013 Fall Quarter.

EDU 275B—Effective Instruction: English Language Development and Instructing English Language Learners (2)
Lecture/Discussion—2 hours. Prerequisite(s): Acceptance in the Teaching Credential Program. Analysis and application of English language acquisition and development research to teaching practice. Particular attention to research that enhances learning of English language learners and under-performing students. Effective: 2016 Fall Quarter.

EDU 280A—Inquiry and Practice: Qualitative Research for Educational Leaders (4)
Fieldwork; Lecture/Discussion—4 hours; Project (Term Project). Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor. Prepares students to understand the nature/assumptions/logic of qualitative methodology as applied to educational settings, focusing on issues of design/conceptualization/interpretation/application of qualitative research procedures. Students will use these methods in conducting studies in their educational settings. Effective: 2009 Fall Quarter.

EDU 280B—Inquiry and Practice: Quantitative Research for Educational Leaders (4)
Fieldwork; Lecture/Discussion—4 hours; Project (Term Project). Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor. Field-based and general quantitative research methods in education will focus this course. Students acquire skills and knowledge to collect, organize, analyze, and interpret univariate and multivariate quantitative data in educational research, dissertation projects, and field-based projects. Effective: 2010 Winter Quarter.

EDU 280C—Inquiry and Practice: Research Design and Application for Educational Leaders (4)
Fieldwork; Lecture—4 hours; Project (Term Project). Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor. Educational leaders are introduced to qualitative, quantitative, and mixed-methods educational research methods and learn to frame research questions, identify data/data sources, use descriptive statistics, critically examine research studies, make sense of educational research/policy, and conduct independent studies. Effective: 2010 Spring Quarter.

EDU 281A—Problem-Based Learning Courses: Part 1 (4)
Extensive Writing/Discussion; Fieldwork; Lecture/Discussion—4 hours. Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor. Students identify problems from their educational settings, engage in data collection/analysis, write-up the process/results, and present to class. Work may become a dissertation proposal, if the problem or its extension is of sufficient interest and value. Effective: 2009 Fall Quarter.

EDU 281B—Problem-Based Learning Courses: Part 2 (4)
Extensive Writing/Discussion; Fieldwork; Lecture/Discussion—4 hours. Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor. Continuation of part one. Effective: 2010 Winter Quarter.

EDU 281C—Problem-Based Learning Courses: Part 3 (4)
Extensive Writing/Discussion; Fieldwork; Lecture/Discussion—4 hours. Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor. Continuation of part two. Effective: 2010 Spring Quarter.
EDU 282A—Beginning Issues and Practices: Contemporary Educational Leadership (4)
Fieldwork; Lecture/Discussion—4 hours; Project (Term Project). Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor. Students explore the history and emergent relationships among leadership theories/practice and their application to current educational settings. Students will reflect on and refine their personal theory of leadership. Effective: 2009 Fall Quarter.

EDU 282B—Beginning Issues and Practices: Diversity Issues for Educational Leaders (4)
Fieldwork; Lecture/Discussion—4 hours; Project (Term Project). Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor. The diversity of stakeholders and community issues in California schools and colleges will be explored. Emphasis will be placed on the interaction between underrepresented segments of society and educational institutions. Best Practices in leading diverse schools will be explored. Effective: 2010 Winter Quarter.

EDU 283A—Advanced Issues and Practices: Leadership Across Communities (4)
Fieldwork; Lecture/Discussion—4 hours; Project (Term Project). Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor. Students examine the theory/practice/process of leadership in community-building and collaboration in/across communities, while addressing the utilization of human and material resources and the creation of partnerships, community linkages, and collaborative efforts. Effective: 2010 Spring Quarter.

EDU 283B—Advanced Issues and Practices: Leadership and Student Services (4)
Fieldwork; Lecture/Discussion—4 hours; Project (Term Project). Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor. Practical and theoretical perspectives for building a sense of vision to lead the profession of student affairs and to meet the needs of the whole student. Effective: 2010 Spring Quarter.

EDU 284A—Policy: History and Theory of Educational Policy (4)
Fieldwork; Lecture/Discussion—4 hours; Project (Term Project). Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor. Students learn/analyze the history/theory of educational policy. They see how education leaders have/can positively influence the process and implement effective policies in their local institutions. Policy issues covered: educational opportunity, equity, access, regulation, testing, tenure, accountability. Effective: 2009 Fall Quarter.

EDU 284B—Policy: Formulating and Influencing Policy (4)
Fieldwork; Lecture/Discussion—4 hours; Project (Term Project). Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor. Students will conduct critical analyses of policy at the federal, judicial, state, regional and local levels. Specific California and federal policy environment structures, processes and people will be examined for intended consequences, ethical dilemmas, social justice and equity issues. Effective: 2010 Winter Quarter.

EDU 284C—Policy: Possibilities and Limitations of Educational Policy in a Democracy (4)
Fieldwork; Lecture/Discussion—4 hours; Project (Term Project). Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor. Students will critically examine the democratic purposes of education in light of existing National, State, and local policy reform efforts. Questions like, In what ways are these reforms and policies guided by democratic ideas and challenged by those ideals. Effective: 2010 Winter Quarter.

Fieldwork; Lecture/Discussion—4 hours; Project (Term Project). Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor. Topics include: education finance theory, contemporary finance policy issues, intergovernmental relations, effective resource management, budget analysis and preparation. Effective: 2010 Spring Quarter.

Fieldwork; Lecture/Discussion—4 hours; Project (Term Project). Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor. Human resource and legal concepts and activities governing decisions of school leaders in public education. Attention to theory, application, and practice of personnel and risk management, curriculum, student services, teacher rights, torts, student rights. Effective: 2009 Fall Quarter.

Fieldwork; Lecture/Discussion—4 hours; Project (Term Project). Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor. Human resource management research and theory and for applying human resource techniques in the educational setting. Effective: 2010 Spring Quarter.
EDU 286A—Organizational Structures and Change: Data-Driven Decision-Making for Change (4)
Fieldwork; Lecture/Discussion—4 hours; Project (Term Project). Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor. Students use and examine multiple sources of information and data and trends found in making quality decisions to improve P-12/community college settings and addressing problems at sites. Students learn limitations of these data sources. Effective: 2009 Fall Quarter.

EDU 286B—Organizational Structures and Change: Curriculum & Instruction Issues in Education (4)
Fieldwork; Lecture/Discussion—4 hours; Project (Term Project). Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor. This course addresses the historical development of various curriculum and instructional methodologies found in public and private schools and colleges, and their impact on current curriculum development and reform efforts at the national, state and local level. Effective: 2010 Winter Quarter.

EDU 287—CANDEL Dissertation Seminars (6-12)
Variable—18-36 hours. Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor. Third year seminars encourage students to complete dissertations within the year. Cohort members meet together in every three-week meetings with faculty members and share their writing, data collection, analysis, discussion of results, development of conclusions/implications. May be repeated up to 9 time(s) until completion of dissertation. (S/U grading only.) Effective: 2009 Fall Quarter.

EDU 287D—CANDEL Dissertation (6-12)
Variable—18-36 hours. Prerequisite(s): Consent of Instructor. Passing of qualifying exams in CANDEL program and advancement to candidacy. Cohort members continue to meet with faculty and share their writing, data collection, analysis, development of conclusions/implications. May be repeated up to 9 time(s) until completion of dissertation. (S/U grading only.) Effective: 2016 Fall Quarter.

EDU 291—Proseminar in Education (4)
Fieldwork—3 hours; Seminar—3 hours. Prerequisite(s): Admission to the M.A. or Ph.D. graduate program in Education. Professional induction into educational research field and Graduate Group in Education at UC Davis. Introduction to landscape of educational research methodologies, purposes and theories. Analysis of debates within field. Investigation of K-12 educational outreach efforts at UC Davis. May be repeated up to 2 time(s) May take the course one time as an MA student and one time as a PhD student. Effective: 2016 Fall Quarter.

EDU 292—Special Topics in Education (2-4)
Variable—2-4 hours. Prerequisite(s): Consent of Instructor. Selected topics in education. Designed to facilitate preparation for the qualifying examination or dissertation. Students will critically analyze scholarly work including their own works in progress. May be repeated for credit. Effective: 2016 Fall Quarter.

EDU 294—Special Topics in Science, Agriculture and Mathematics Education (4)
Project (Term Project); Seminar—3 hours; Term Paper. Critical study of special topics of research relevant to science, agricultural and mathematics education. Students and faculty present work-in-progress on a major research project, and critically analyze and discuss one another's developing scholarly work. May be repeated for credit topic differs. Effective: 2016 Fall Quarter.

EDU 295—Special Topics in Learning and Mind Science (4)
Seminar—3 hours; Term Paper. Critical study of selected issues in the learning sciences, neurodevelopmental disorders, and psychometrics and measurement, as they relate to education. May be repeated for credit when topics differs. Effective: 2016 Fall Quarter.

EDU 298—Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Group study. (S/U grading only.) Effective: 2016 Fall Quarter.

EDU 299—Individual Study (1-6)
Variable—3-18 hours. Prerequisite(s): Consent of Instructor. Individual study under the direction of a faculty member. (S/U grading only.) Effective: 2016 Fall Quarter.

EDU 299D—Research (1-12)
Independent Study—3-36 hours. Prerequisite(s): Consent of Instructor. Research for individual graduate students. (S/U grading only.) Effective: 2016 Fall Quarter.

EDU 300—Reading in the Elementary School (4)
Fieldwork—3 hours; Lecture—3 hours. Prerequisite(s): Acceptance in Teacher Credential Program. Principles, procedures, and curriculum materials for teaching of reading. Includes decoding skills with a special emphasis on phonics, comprehension skills, study skills, and reading in the content areas. Effective: 2016 Fall Quarter.
EDU 300A—Reading in the Elementary School, Part A (1)
Seminar—3 hours. Prerequisite(s): Acceptance in Teacher Credential Program. Principles, procedures, and curriculum materials for teaching of reading. Includes decoding skills with a special emphasis on phonics, comprehension skills, study skills, and reading in the content areas. (P/NP grading only.) Effective: 2018 Summer Quarter.

EDU 300B—Reading in the Elementary Schools, Part B (3)
Seminar—3 hours. Prerequisite(s): Acceptance in Teacher Credential Program. Principles, procedures, and curriculum materials for teaching of reading. Includes decoding skills with a special emphasis on phonics, comprehension skills, study skills, and reading in the content areas Effective: 2018 Summer Quarter.

EDU 301—Reading in the Secondary School (4)
Discussion—4 hours. Prerequisite(s): Graduate standing, enrollment in the secondary credential program or consent of instructor. Principles, procedures, and materials to help secondary school teachers improve the reading competence of students. Strategies for enhancing learning through reading and writing in all disciplines, with special attention to linguistically diverse populations. Effective: 1997 Winter Quarter.

EDU 301A—Teaching Literacy in High School Contexts (2)
Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Acceptance in Teacher Credential Program. Restricted to students enrolled in the secondary credential program. Focuses on secondary school literacy practices and strategies for engaging English-speaking and bilingual students with textual, image, and digital literacies across content areas. Covers reading and writing, the Common Core and Language Proficiency standards. Effective: 2016 Fall Quarter.

EDU 301B—Teaching Literacy in High School Contexts (2)
Lecture/Discussion—2 hours. Prerequisite(s): Acceptance in Teacher Credential Program. Restricted to students enrolled in the secondary credential program. Focuses on secondary school literacy practices and strategies for engaging English-speaking and bilingual students with textual, image, and digital literacies across content areas. Covers reading and writing, the Common Core and Language Proficiency standards. Effective: 2016 Fall Quarter.

EDU 302—Language Arts in the Elementary School (2)
Lecture—2 hours. Prerequisite(s): Acceptance in Teacher Credential Program. Principles, procedures, and materials for the teaching of oral and written expression, listening skills, drama, and children's literature in elementary schools. Effective: 2016 Fall Quarter.

EDU 303—Art Education in the Elementary School (2)
Laboratory—2 hours; Lecture/Discussion—2 hours. Prerequisite(s): Acceptance in Teacher Credential Program. Understanding the principles of education in the arts through participation. Development of concepts, introduction to media, and techniques suitable for the elementary school with emphasis on cross-discipline exploration. Effective: 2016 Fall Quarter.

EDU 304A—Teaching in the Elementary Schools (2-18)
Fieldwork—9-48 hours; Lecture/Discussion—2 hours. Prerequisite(s): Acceptance in Teacher Credential Program. Supervised teaching in regular classrooms in elementary schools. Selection and organization of teaching materials. Introduction to techniques of diagnosing school achievement of children. Effective: 2016 Fall Quarter.

EDU 304B—Teaching in the Elementary Schools (2-18)
Fieldwork—9-48 hours; Lecture/Discussion—2 hours. Prerequisite(s): Acceptance in Teacher Credential Program. Supervised teaching in regular classrooms in elementary schools. Current conceptions of elementary school curriculum, emphasis on contributions from the social, biological, and physical sciences. Emphasis on effective teaching methods. Effective: 2016 Fall Quarter.

EDU 304C—Teaching in the Elementary Schools (2-18)
Fieldwork—9-48 hours; Lecture/Discussion—2 hours. Prerequisite(s): Acceptance in Teacher Credential Program. Supervised teaching in regular classrooms in elementary schools. Evaluation of teaching materials including instructional technology. Current elementary school curriculum with emphasis on contributions from fine arts and humanities. Effective: 2016 Fall Quarter.

EDU 305A—Teaching in the Middle Grades (5-8)
Lecture—2 hours; Seminar—2 hours; Variable—15-30 hours. Prerequisite(s): Acceptance in Teacher Credential Program. Supervised teaching in regular or special education classrooms in middle grades. Current conceptions of the middle-grades curriculum with emphasis on social, biological, and physical sciences. Effective teaching methods. Effective: 2016 Fall Quarter.
EDU 306A—Teaching in the Secondary Schools (2-18)
Fieldwork—9-48 hours; Lecture/Discussion—2 hours. Prerequisite(s): Acceptance in Teacher Credential Program. Supervised teaching in regular secondary classrooms. Techniques for classroom communications; constructing goals and objectives; assessment of learning; special problems of adolescents; instructional technology. Effective: 2016 Fall Quarter.

EDU 306B—Teaching in the Secondary Schools (2-18)
Fieldwork—9-48 hours; Lecture/Discussion—2 hours. Prerequisite(s): Acceptance in Teacher Credential Program. Supervised teaching in regular secondary classrooms. Techniques for classroom communications; constructing goals and objectives; assessment of learning; special problems of adolescents; instructional technology. Effective: 2016 Fall Quarter.

EDU 306C—Teaching in the Secondary Schools (2-18)
Fieldwork—9-48 hours; Lecture/Discussion—2 hours. Prerequisite(s): Acceptance in Teacher Credential Program. Supervised teaching in regular secondary classrooms. Techniques for classroom communications; constructing goals and objectives; assessment of learning; special problems of adolescents; instructional technology. Effective: 2016 Fall Quarter.

EDU 307—Methods in Elementary Science (2)
Lecture/Discussion—2 hours. Prerequisite(s): Acceptance in Teacher Credential Program. Principles, procedures, and materials for teaching the biological and physical sciences in elementary schools. Effective: 2016 Fall Quarter.

EDU 308—Methods in Elementary Social Studies (2)
Lecture/Discussion—2 hours. Prerequisite(s): Acceptance in Teacher Credential Program. Principles, procedures, and materials for teaching history and the social sciences in elementary schools. Effective: 2016 Fall Quarter.

EDU 309—The Teaching of Mathematics, K-9 (3)
Lecture/Discussion—3 hours. Prerequisite(s): Acceptance in Teacher Credential Program. Mathematics curriculum and teaching methods for K-9 reflecting the needs of California's diverse student populations. Effective: 2016 Fall Quarter.

EDU 309A—The Teaching of Mathematics, K–9, Part A (1)
Seminar—3 hours. Prerequisite(s): Acceptance in Teacher Credential Program. Mathematics curriculum and teaching methods for K–9 reflecting the needs of California's diverse student populations. (P/NP grading only.) Effective: 2018 Summer Quarter.

EDU 309B—The Teaching of Mathematics, K–9, Part B (2)
Seminar—2 hours. Prerequisite(s): Acceptance in Teacher Credential Program Mathematics curriculum and teaching methods for K–9 reflecting the needs of California's diverse student populations. Effective: 2018 Summer Quarter.

EDU 310—Teaching as Reflective Practice (1)
Lecture/Discussion—1 hour. Prerequisite(s): Consent of Instructor. Acceptance in Teacher Credential Program. Presentation of issues related to classroom instruction and professional practice, reflections on classroom instruction and other documentation related to student teaching experience. May be repeated up to 6 time(s). Effective: 2016 Fall Quarter.

EDU 320—Creating Classroom Communities (1)
Fieldwork—30 hours; Lecture/Discussion—2 hours. Acceptance in Teacher Credential Program. Observation of classrooms at beginning of academic year for first-hand experience with teachers’ approaches to creating communities and setting routines. Candidates are placed with students they will teach during student teaching. Candidates may take on teaching tasks as appropriate. Effective: 2016 Summer Special Session.

EDU 322A—Pedagogical Preparation for Secondary Social Science I (3)
Discussion—1 hour; Lecture/Discussion—2 hours. Prerequisite(s): Acceptance in Teacher Credential Program. Introduction to teaching methods and curriculum approaches for secondary social science teaching. State and national curriculum standards; application of learning theory to effective instruction; interdisciplinary teaching and active learning approaches; effective teaching strategies for English learners. Effective: 2016 Fall Quarter.

EDU 322B—Pedagogical Preparation for Secondary Social Science II (3)
Discussion—2 hours; Lecture/Discussion—1 hour. Prerequisite(s): Acceptance in Teacher Credential Program. Intermediate teaching methods and curriculum approaches for secondary social science teaching. Interdisciplinary approaches to teaching major themes across social science content areas; teaching potentially controversial social science topics; teaching democratic civic values, student assessment and evaluation. Effective: 2016 Fall Quarter.
EDU 323A—Physical Science in the Secondary School (3)
Discussion/Laboratory—1 hour; Discussion/Laboratory—2 hours. Prerequisite(s): Acceptance in Teacher Credential Program. Activity-based overview of concepts and processes in secondary school physical sciences. Emphasis upon philosophy, appropriate teaching methods, materials, assessment and evaluation of learning. Effective: 2016 Fall Quarter.

EDU 323B—Life Sciences in the Secondary School (3)
Discussion/Laboratory—2 hours; Discussion/Laboratory—1 hour. Prerequisite(s): Acceptance in Teacher Credential Program. Activity-based overview of concepts and processes in secondary school biology and life sciences. Emphasis on philosophy, appropriate teaching methods, materials, assessment and evaluation of learning, and issues. Effective: 2016 Fall Quarter.

EDU 324A—Methods and Technology in Secondary Mathematics I (4)
Lecture/Discussion—4 hours. Prerequisite(s): Consent of Instructor. Acceptance in Teacher Credential Program. Introduction to methods and curriculum for teaching mathematics at the secondary level. Introduction to applications of computer technology as instructional, intellectual, and communication tools for mathematics teachers. Effective: 2016 Fall Quarter.

EDU 324B—Methods in Secondary Mathematics II (3)
Lecture/Discussion—3 hours. Prerequisite(s): Consent of Instructor. Acceptance in Teacher Credential Program. Expansion of methods and curriculum for teaching mathematics at the secondary level. Intermediate applications of computer technology as instructional, intellectual, and communication tools in mathematics teaching. Effective: 2016 Fall Quarter.

EDU 325—Research and Methods in Secondary English Language Arts (4)
Discussion—4 hours. Prerequisite(s): Consent of Instructor. Acceptance in Teacher Credential Program. Research on teaching and learning in the language arts. Principles, procedures and materials for improving the writing, reading and oral language of secondary students, with special attention to students from culturally and linguistically diverse populations. Effective: 2016 Fall Quarter.

EDU 326—Teaching Language Minority Students in Secondary Schools: Methods and Research (4)
Fieldwork—3 hours; Seminar—3 hours. Prerequisite(s): Consent of Instructor. Acceptance in Teacher Credential Program. Research on principles, procedures and curricula for teaching discipline-specific concepts to language-minority students in secondary schools. Second-language acquisition principles and instructional strategies. Effective: 2016 Fall Quarter.

EDU 327A—Teaching Methods for Secondary Foreign Language/Spanish, Part I (3)
Lecture—3 hours. Prerequisite(s): Acceptance in Teacher Credential Program. Introduction to methods for teaching Spanish as a foreign and a heritage language in secondary schools. State and National Standards. Theories on second language acquisition. Lesson plans. Effective teaching strategies and class management. Effective: 2016 Fall Quarter.

EDU 327B—Teaching Methods for Secondary Foreign Language/Spanish, Part II (3)
Lecture—3 hours. Prerequisite(s): Acceptance in Teacher Credential Program. Continuation to methods for teaching Spanish as a foreign and a heritage language in secondary schools. Research and practice on foreign and heritage language teaching. Expansion of effective teaching strategies and class management. Effective: 2016 Fall Quarter.

EDU 398—Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

EDU 399—Individual Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

Education (Graduate Group)

Education (Graduate Group) | EDU (Graduate Group) Information
(School of Education)

Lee Martin, Chairperson of the Group

Group Office. School of Education Building; 530-752-7259; Fax 530-754-6672; phdeduadvising@ucdavis.edu

Faculty. https://education.ucdavis.edu/graduate-group-education-faculty
Admissions for the 2018-19 academic year have been suspended while our faculty review the program's current topical focus and requirements. We will not be offering the Master of Arts General Track for this admissions cycle.

The Master of Arts in Education provides a course of study for examining research and theory about learners, teachers, schools, and related social institutions. The program prepares professionals to conduct research about the education of children, youth, and adults in a multicultural society. Graduates may assume leadership positions in school districts, state education agencies, and private organizations concerned with instructional research, policy and practice.

Graduate Study. The Graduate Group in Education offers programs of study and research leading to the Ph.D. degree. Students may concentrate in; language, literacy and culture; learning and mind sciences; mathematics education; school organization and educational policy; or science and agriculture education. Students may also combine these fields of study with designated emphasis areas such as Critical Theory; Second Language Acquisition, Women's Studies, and Writing, Rhetoric, and Composition Studies. Detailed information regarding graduate study may be obtained by writing the Graduate Coordinator or at http://education.ucdavis.edu/programs/PhDoverview.html.

Preparation. Students should have earned a Bachelor's or M.A. degree or the equivalent in a discipline relevant to their proposed emphasis program. For example, students applying for the mathematics education emphasis should have earned the B.A. or M.A. or M.A.T. degree in mathematics or mathematics education.

Graduate Advisers. Danny Martinez, Kevin Gee, Alexis Patterson

Graduate Coordinator. Mary M. Reid

Courses. See Education, School of.

Education (Graduate Group) | EDU Courses

Courses in EDU:

EDU 065A—Foundations for University Success; Introduction to the University System (2)
Fieldwork; Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Student must be a part of an approved Foundations for University Success program. Introduction to resources supporting first year student academic success and transition to a tier one research university. (P/NP grading only.) Effective: 2017 Summer Session 2.

EDU 065B—Foundations for University Success; Introduction to Research at a Tier 1 University (2)
Fieldwork; Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Student must be a part of an approved Foundations for University Success program. Development of important skills necessary for research including critical thinking, study skills, writing skills, and presentation skills. (P/NP grading only.) Effective: 2017 Summer Session 2.

EDU 065C—Foundations for University Success; Internships, Graduate School and Careers (2)
Fieldwork; Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Student must be a part of an
approved Foundations for University Success program. Resources to explore academic and career connections and opportunities including internships, volunteer opportunities, graduate schools and careers. (P/NP grading only.) Effective: 2017 Summer Session 2.

**EDU 081—Learning in Science and Mathematics (2)**
Fieldwork—2 hours; Lecture/Discussion—2 hours. Limited to 26 students per section. Exploration of how students learn and develop understanding in science and mathematics classrooms. Introduction to case studies and interview techniques and their use in K-6 classrooms to illuminate factors that affect student learning. (Same course as GEL 081.) (P/NP grading only.) GE credit: SS, VL, WE. Effective: 2007 Winter Quarter.

**EDU 092—Internship (1-3)**
Internship—3-9 hours. Prerequisite(s): Consent of Instructor. Enrollment dependent on availability of intern placements. Internship as a teacher’s aide or tutor in K-12 classrooms under the supervision of a faculty member. May be repeated for credit. (P/NP grading only.) Effective: 2001 Fall Quarter.

**EDU 098—Directed Group Study (1-5)**
Variable. Prerequisite(s): Consent of Instructor. Primarily for lower division students. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

**EDU 100—Introduction to Schools (4)**
Fieldwork—3 hours; Lecture—3 hours. Study of occupational concerns of teachers; skills for observing classroom activities; school organization and finance; school reform movement; observing, aiding, and tutoring in schools. GE credit: ACGH, DD, OL, SS. Effective: 2016 Fall Quarter.

**EDU 110—Educational Psychology: General (4)**
Lecture/Discussion—4 hours. Learning processes, cognitive development, individual differences, testing and evaluation. GE credit: SS, WE. Effective: 2016 Fall Quarter.

**EDU 114—Quantitative Methods in Educational Research (4)**
Lecture/Discussion—4 hours. Problems and methods in data analysis. Design of research projects. Some consideration of procedures suited to digital computers. GE credit: QL. Effective: 2016 Fall Quarter.

**EDU 115—Educating Children with Disabilities (2)**
Lecture—2 hours. Educational issues and processes involved in teaching children with disabilities. The course will focus on the structure of special education, with an emphasis on meeting the educational needs of children who are mainstreamed in regular classes. GE credit: SS. Effective: 2016 Fall Quarter.

**EDU 119—The Use and Misuse of Standardized Tests (4) Review all entries**
Discussion—1 hour; Lecture—3 hours. Principles underlying educational and psychological testing. Purposes of testing for individual achievement and evaluation of school programs. Interpretation and misinterpretations of outcomes. Analysis of SAT, GRE and other common tests. Experience in test administration and outcome interpretation. GE credit: QL, SS, WE. Effective: 2016 Fall Quarter.

**EDU 119—The Use & Misuse of Standardized Tests (4) Review all entries**
Discussion—1 hour; Lecture—3 hours. Principles underlying educational and psychological testing. Purposes of testing for individual achievement and evaluation of school programs. Interpretation and misinterpretations of outcomes. Analysis of SAT, GRE and other common tests. Experience in test administration and outcome interpretation. GE credit: QL, SS. Effective: 2019 Fall Quarter.

**EDU 120—Philosophical and Social Foundations of Education (4)**
Discussion—1 hour; Lecture—3 hours. Philosophical, historical, and sociological study of education and the school in our society. GE credit: ACGH, SS, WE. Effective: 2016 Fall Quarter.

**EDU 121—Introduction to Education Policy Analysis: Tools, Methods and Frameworks (4)**
Discussion—1 hour; Lecture—3 hours. Introduces students to the field of education policy analysis with a specific emphasis on the quantitative frameworks and analytical tools—drawn primarily from economics and statistics—that are used to guide and inform educational policymaking. GE credit: QL, SS. Effective: 2014 Fall Quarter.

**EDU 122—Children, Learning and Material Culture (4)**
Extensive Writing/Discussion—1 hour; Fieldwork; Lecture/Discussion—3 hours. How material artifacts shape what and how children learn in school, at home, and in the community. Artifacts examined include books, computers, household appliances, toys and games, entertainment media, collectibles, sports equipment, clothing, folk arts and crafts, and neighborhood space. GE credit: SS, VL, WE. Effective: 2017 Summer Session 1.
EDU 130—Issues in Higher Education (4)
Discussion—3 hours; Fieldwork—3 hours. Analysis of current issues in higher education and of some practical implications of varying philosophical approaches to the role of the university. GE credit: SS, WE. Effective: 2017 Summer Session 1.

EDU 142—Introduction to Environmental Education (4)
Fieldwork; Lecture/Discussion—3 hours. Study of history, philosophy, principles and approaches to environmental education (EE) and outreach; learning theories, teaching strategies and techniques in EE and outreach; evaluation of EE curricula in non-formal and in-school contexts; observing, aiding and facilitating local environmental education programs. GE credit: OL, SS. Effective: 2009 Fall Quarter.

EDU 147—Anglos, Latinos and the Spanish Black Legend: The Origins and Educational Implications of Anti-Hispanic Prejudice (4)
Fieldwork; Lecture/Discussion—3 hours; Term Paper. Examination of anti-Hispanic prejudice in the United States focusing on the "Black Legend," a 16th Century anti-Spanish myth underpinning the doctrine of "Manifest Destiny." Exploration of the Legend's presence in contemporary American society through interviews and analysis of school textbooks. (Same course as SPA 147.) GE credit: ACGH, AH, DD, WE. Effective: 2016 Fall Quarter.

EDU 150—Cultural Diversity and Education in a Sociopolitical Context (4)
Extensive Writing; Lecture/Discussion—4 hours. Introduction to cultural diversity and education in a sociopolitical context. Interactive course. Small and large-group discussions explore, extend, and apply readings; range of writing genres for responses to assignments and course themes; lectures, slide shows, speakers, brief fieldwork, and presentations. GE credit: DD, SS, WE. Effective: 2011 Fall Quarter.

EDU 151—Language Development in the Chicano Child (3)
Lecture/Discussion—3 hours. Bilingualism, first and second language acquisition, bilingual education, language assessment, Chicano Spanish and the role of dialect varieties in the classroom. Not open for credit to students who have completed EDU 151T. Effective: 2016 Fall Quarter.

EDU 151T—Language Development in the Chicano Child (3)
Lecture/Discussion—3 hours. Prerequisite(s): Acceptance in Teaching Credential Program. Open to UC Davis Teacher Credential candidates only. Bilingualism, first and second language acquisition, bilingual education, language assessment, Chicano Spanish and the role of dialect varieties in the classroom. Not open for credit to students who have completed EDU 151. Effective: 2016 Fall Quarter.

EDU 152—Academic Spanish for Bilingual Teachers (3)
Fieldwork; Lecture/Discussion—3 hours; Recitation—3 hours. Prerequisite(s): Acceptance in Teaching Credential Program or consent of instructor. Communicative class taught in Spanish focused on the development of Spanish communication skills for current and/or future bilingual teachers. Main topics are related to school content areas in bilingual settings, with an emphasis on standard and Southwest Spanish dialects. GE credit: AH, OL, SS, WE. Effective: 2016 Fall Quarter.

EDU 153—Diversity in the K-12 Classroom (2)
Lecture/Discussion—2 hours. Prerequisite(s): Acceptance in Teaching Credential Program. Analysis of research on learning styles among culturally diverse students with review and evaluation of responsive curricula and classroom teaching techniques. The ethnographic interview as a research tool. Effective: 2016 Fall Quarter.

EDU 160A—Introduction to Peer Counseling (2)
Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Introduction to peer counseling techniques and development of peer counseling skills. (P/NP grading only.) Effective: 2016 Fall Quarter.

EDU 160B—Issues in Peer Counseling (2)
Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. In-depth review and development of skills for specific counseling topics. May be repeated once for credit when topic differs. May be repeated up to 1 time(s) May be repeated once for credit when topic differs. (P/NP grading only.) Effective: 2016 Fall Quarter.

EDU 163—Guidance and Counseling (4)
Lecture—4 hours. Nature and scope of pupil personnel services; basic tools and techniques of guidance; theory and practice of counseling psychology, with emphasis on educational and vocational adjustment. Effective: 2016 Fall Quarter.

EDU 173—Language Development (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): LIN 001 or LIN 001Y; or Consent of Instructor. LIN 103A, LIN 103B recommended. Theory and research on children's acquisition of their native language, including the sound
system, grammatical systems, and basic semantic categories. (Same course as LIN 173.) GE credit: SS. Effective: 2018 Spring Quarter.

EDU 180A—Computers in Education (1)
Laboratory—2 hours; Lecture/Discussion—1 hour; Project (Term Project)—3 hours. Prerequisite(s): Acceptance in Teacher Credential Program. Restricted to Teaching Credential Majors. Applications of computers in education as instructional, intellectual, and communication tools. Effective: 2013 Fall Quarter.

EDU 180B—Computers in Education (1)
Laboratory—2 hours; Lecture/Discussion—1 hour; Project (Term Project)—3 hours. Prerequisite(s): EDU 180A; Acceptance in Teacher Credential Program. Restricted to Teaching Credential Majors. Applications of computers in education as instructional, intellectual, and communication tools. Effective: 2013 Fall Quarter.

EDU 180C—Computers in Education (1)
Laboratory—2 hours; Lecture/Discussion—1 hour; Project (Term Project)—3 hours. Prerequisite(s): EDU 180B; Acceptance in Teacher Credential Program. Restricted to Teaching Credential Majors. Applications of computers in education as instructional, intellectual, and communication tools. Effective: 2013 Fall Quarter.

EDU 181—Teaching in Science and Mathematics (2)
Fieldwork—2 hours; Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Major in mathematics, science, or engineering; or completion of a one-year sequence of science or calculus. Class size limited to 40 students per section. Exploration of effective teaching practices based on examination of how middle school students learn math and science. Selected readings, discussion and field experience in middle school classrooms. (Same course as GEL 181.) (P/NP grading only.) GE credit: SS, WE. Effective: 2011 Fall Quarter.

EDU 182—Computer Project for Curricular Integration (1)
Seminar—1 hour. Prerequisite(s): Consent of Instructor. Design and implementation of a curricular unit to integrate computer technology into a K-12 classroom setting. A project-based seminar intended for students with substantial prior experience with instructional use of computers and related technologies. Not open for credit to students who have completed EDU 180 or EDU 181. Effective: 2016 Fall Quarter.

EDU 183—Teaching High School Mathematics and Science (3) Review all entries
Fieldwork; Lecture/Discussion—2 hours. Prerequisite(s): Major in mathematics, science, or engineering; or consent of instructor with completion of a one-year sequence of science or calculus. Limited to 40 students per section. Exploration and creation of effective teaching practices based on examination of how high school students learn mathematics and science. Field experience in high school classrooms. (Same course as Geology 183.) GE credit: OL, SS, WE. Effective: 2017 Fall Quarter.

EDU 183—Teaching High School Mathematics and Science (3) Review all entries
Fieldwork; Lecture/Discussion—2 hours. Prerequisite(s): Major in mathematics, science, or engineering; or completion of a one-year sequence of science or calculus and consent of the instructor. Limited to 40 students per section. Exploration and creation of effective teaching practices based on examination of how high school students learn mathematics and science. Field experience in high school classrooms. (Same course as GEL 183.) GE credit: OL, SS, WE. Effective: 2018 Fall Quarter.

EDU 185—Learning in a Digital Age: Information, Schooling, and Society (4)
Lecture/Discussion—2 hours; Lecture/Lab—2 hours. Focus on the changing nature of learning in a digital age: social media, ubiquitous connectivity, online education, electronic communication, writing, gaming, and youth culture. Readings will be drawn from major recent works detailing fundamental shifts in information, schooling, and society. GE credit: OL, SS, VL. Effective: 2013 Fall Quarter.

EDU 192—Internship (1-3)
Discussion—1 hour; Internship—2-8 hours. Prerequisite(s): Consent of Instructor. Internship as a tutor, teacher's aide, or peer counselor in a school or educational counseling setting under the supervision of a faculty member. May be repeated for credit. (P/NP grading only.) Effective: 2016 Fall Quarter.

EDU 197T—Tutoring in Education (1-2)
Tutorial—1-2 hours. Prerequisite(s): Consent of Instructor. Leading of small voluntary discussion groups affiliated with the School's upper division courses under the supervision of, and at the option of, the course instructor, who will submit a written evaluation of the student's work. May be repeated up to 1 time(s) for a total of 4 units. (P/NP grading only.) Effective: 2016 Fall Quarter.

EDU 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.
EDU 199—Special Study for Advanced Undergraduates (1-5)
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 2016 Fall Quarter.

EDU 200—Educational Research (4)
Discussion—2 hours; Lecture—2 hours. Prerequisite(s): Introductory statistics or consent of instructor. Defining educational research questions, reviewing relevant literature, developing research designs, developing research instruments, selecting appropriate data analysis procedures, and writing research projects. A case problem will provide practice in designing and reporting research. Effective: 2016 Fall Quarter.

EDU 201—Qualitative Research in Education (4)
Lecture—2 hours; Seminar—2 hours. Prerequisite(s): Graduate standing or consent of instructor. Examines the design and conduct of educational research using non-numerical data (e.g., text, discourse, imagery and artifacts). Focuses on issues (e.g., validity, reliability, generalizability, ethics) and reporting genres (e.g., narrative accounts, case studies, and arguments). Effective: 1997 Fall Quarter.

EDU 202N—Computer Analysis of Qualitative Data (4)
Laboratory—2 hours; Seminar—3 hours. Critical and practical understanding of how to use computer software programs to analyze qualitative data (text, images, and videotape) in conducting social research. Effective: 2016 Fall Quarter.

EDU 203—Educational Testing and Evaluation (4)
Lecture/Discussion—4 hours. Prerequisite(s): Graduate standing or consent of instructor. Introduces the theoretical assumptions underlying traditional test construction, as well as the basic statistical principles involved in the design, evaluation, and interpretation of standardized tests. Also introduces the debates surrounding the uses of different kinds of tests and evaluation tools. Effective: 1997 Winter Quarter.

EDU 204A—Quantitative Methods in Educational Research: Analysis of Correlational Designs (4)
Discussion—2 hours; Discussion/Laboratory—2 hours. Prerequisite(s): Introductory statistics or consent of instructor. Methods for analysis of correlational data in educational research. Topics include multiple correlation and regression, discriminant analysis, logistic regression, and canonical correlation. Emphasis on conceptual understanding of the techniques and use of statistical software. Effective: 2016 Fall Quarter.

EDU 204B—Quantitative Methods in Educational Research: Experimental Designs (4)
Discussion—2 hours; Discussion/Laboratory—2 hours. Prerequisite(s): Introductory statistics or consent of instructor. Methods for analysis of experimental data in educational research. Topics include ANOVA, fixed v. random effects models, repeated measures ANOVA, analysis of co-variance, MANOVA, chi square tests, small sample solutions to t and ANOVA. Effective: 2016 Fall Quarter.

EDU 205A—Ethnographic Research in Schools I: Current Theory and Practice (4)
Lecture—4 hours. Current literature from anthropology and society related to schools. Emphasis on the organizational structure of institutions, and the analysis of face-to-face interaction. Will explore the relationship between field-based research and theory development on the acquisition of knowledge in specific social and cultural contexts. Effective: 2016 Fall Quarter.

EDU 205B—Ethnographic Research in Schools II: Field-Based Research Projects (4)
Discussion—4 hours. Prerequisite(s): EDU 205A Student research projects in specific schools with cooperative critical analysis of the design, data collection, and inferencing by researchers. Students will continue to meet with instructor as a group throughout the quarter to discuss specific projects. Effective: 2016 Fall Quarter.

EDU 206A—Inquiry into Classroom Practice: Traditions and Approaches (2)
Fieldwork; Lecture/Discussion—2 hours. Prerequisite(s): Acceptance in Teacher Credential Program. Introduction to traditions and approaches of teachers conducting research in their own classrooms: purposes, focal areas, methods of data collection and analysis, and written genre conventions. Effective: 2016 Fall Quarter.

EDU 206B—Inquiry into Classroom Practice: Application of Teacher Research Approaches (4)
Fieldwork—1 hour; Lecture/Discussion—3 hours. Prerequisite(s): EDU 206A; or Consent of Instructor. Open to Graduate Teaching Credential students. Analysis and application of teacher research through the development, implementation and evaluation of a short-term classroom research-based intervention. Particular attention to research that enhances learning of English language learners and under-performing students. Effective: 2007 Spring Quarter.

EDU 206C—Inquiry into Classroom Practice: Study Design (4)
Fieldwork—1 hour; Seminar—3 hours. Prerequisite(s): EDU 206B; or Consent of Instructor. Open to Graduate MA Credential students. Proposal development for classroom-based inquiry designed to address student learning

EDU 206D—Inquiry into Classroom Practice: Data Analysis and Research Reporting (4)
Extensive Writing/Discussion—1 hour; Fieldwork—1 hour; Seminar—2 hours. Prerequisite(s): EDU 206C; or Consent of Instructor. Open to Graduate MA Credential students. Support of the inquiry begun in course 206C through continuous collaborative critique and feedback resulting in the writing and presentation of a research study. Effective: 2007 Winter Quarter.

EDU 207—Concepts of the Curriculum (4)
Discussion—2 hours; Lecture—2 hours. Prerequisite(s): Consent of Instructor. Development of the skills of philosophical analysis and argument for the establishment of a point of view, in the consideration of curriculum theory and practice. Classical and contemporary approaches to subject matter and activity emphases, hidden curriculum, and moral education. Effective: 2016 Fall Quarter.

EDU 208—Presenting Educational Research in Written Reports (4)
Extensive Writing; Seminar—3 hours. Prerequisite(s): Consent of Instructor. Rhetorical and substantive challenges of presenting educational research through written reports; research rhetoric and genres; competing discourse conventions of educational research, policy, and practice; the social organization of publishing educational research. May be repeated up to 1 time(s). Effective: 2016 Fall Quarter.

EDU 209—Image-based Field Research (4)
Fieldwork—2 hours; Lecture/Discussion—3 hours. Critical and practical understanding of video tape and still photography as resources for enhancing field research in schools and other social setting. Effective: 2016 Fall Quarter.

EDU 210—Psychological Perspectives on School Learning (4)
Extensive Writing; Lecture/Discussion—3 hours. Study of human learning theory and research related to learning of academic content. Review of contemporary issues of constructivism, problem solving, expertise, conceptual change, transfer, and metacognition. Effective: 2016 Fall Quarter.

EDU 211—Sociocultural and Situative Perspectives on Learning and Cognition (4)

EDU 213—Individual Assessment (4)
Lecture—4 hours. Prerequisite(s): Introductory statistics or consent of instructor. Theories of intellectual functioning and the measurement of cognitive abilities in school-aged children. Supervised practice in administration and scoring of contemporary tests for children including the WISC-R, the WAIS-R, the Stanford Binet, the McCarthy Scales of Children's Ability. Effective: 2016 Fall Quarter.

EDU 215—Research on Achievement Motivation in Education (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. Analysis and critique of recent research on cognitive processes related to achievement motivation in school settings. Topics include self-determination theory, attribution theory, goal theory, intrinsic and extrinsic motivation, learned helplessness. psychological reactance, gender and culture, and research design. Effective: 2016 Fall Quarter.

EDU 220—Concepts and Methods of Policy Analysis (4)
Fieldwork; Seminar—3 hours; Term Paper. Introduction to concepts and methods of policy analysis. Emphasis on the relationship between educational issues and problems; policy development; constructing persuasive policy analyses; issues related to policy process. Effective: 2016 Fall Quarter.

EDU 221—Culture and Social Organization of Schools (4)
Seminar—4 hours. Prerequisite(s): Consent of Instructor. Culture and social organization of schools. Examines perspectives of social researchers, educational policy-makers, and school members and their implications for educational research, policy and practice. Effective: 2016 Fall Quarter.

EDU 222—School Change and Educational Reform (4)
Lecture/Discussion—2 hours; Seminar—2 hours. Analysis of models, processes, and case studies of school change and educational reform with respect to variable characteristics of schools and schooling, planned and unplanned change, the moral evaluation of school change, and the role of educational research. Effective: 2016 Fall Quarter.
EDU 223—Education and Social Policy (4)
Seminar—4 hours. Prerequisite(s): Consent of Instructor. Focuses on understanding the social and political context of education in the U.S. and California and how education policy is formed in the broader public arena. Develops skills in educational policy analysis. (Former course 237.) Effective: 2016 Fall Quarter.

EDU 225—Education Policy and Law (4)
Lecture/Discussion—4 hours. Examination of law as an instrument of social policy. Specific focus on the legalization of education decision making, its causes, dimensions, and effects on administrative and teacher authority. Effective: 2016 Fall Quarter.

EDU 226—Culture and Social Organization of Higher Education (4)
Fieldwork—1 hour; Seminar—3 hours. Prerequisite(s): Consent of Instructor. Critical study of culture and social organization of higher education institutions policies and functions in the U.S., with some attention to other countries. Effective: 2016 Fall Quarter.

EDU 228—Politics and Governance of Education (4)
Seminar—3 hours; Term Paper. Examination of political power, representation, influence, decision-making and inter-governmental relations in the public schools. Effective: 2016 Fall Quarter.

EDU 229—Education Finance Policy (4)
Seminar—3 hours; Term Paper. Examination of (1) United States financing public education, (2) the relationship between school finance and education policy, and (3) the relationship between education finance and education practice. Effective: 2016 Fall Quarter.

EDU 230—Special Topics in Education Policy (4)
Seminar—3 hours; Term Paper. Selected topics in education policy. Designed to facilitate preparation for the qualifying examination or dissertation. Students will critically analyze scholarly work including their own works in progress. May be repeated for credit for credit when topic differs. Effective: 2016 Fall Quarter.

EDU 235—Critical Pedagogy (4)
Seminar—4 hours. A socio-cultural critique, from an interdisciplinary perspective, of educational reform and change. The critique will include an analysis of the influence of text content on the perpetuation of social power differences. Effective: 2016 Fall Quarter.

EDU 236—Application of Hierarchical Linear Models in Education Research (4)
Discussion/Laboratory—2 hours; Lecture—2 hours; Term Paper. Prerequisite(s): EDU 204A; Or similar course with permission of the instructor. Application of hierarchical linear models in education research across multiple areas, such as policy, curriculum, and assessment. Develop working knowledge of hierarchical linear modeling and an understanding of its use in existing research as well as student's work. Effective: 2009 Spring Quarter.

EDU 237—Survey Research Methods (4)
Fieldwork—1 hour; Lecture/Discussion—3 hours; Term Paper. Theories, principles and application of survey research methodology. Students develop, validate, and administer survey instruments; select representative samples; conduct focus groups; and collect, organize, and analyze survey data. Familiarity with introductory concepts in descriptive and inferential statistics is assumed. Effective: 2016 Fall Quarter.

EDU 238—Participatory Action Research (PAR) (4)
Fieldwork—1 hour; Lecture/Discussion—3 hours. Prerequisite(s): Introductory research methods course recommended. Principles and strategies of PAR and related methodologies that emphasize collaborating with those affected by the issue being researched in order to educate, take action or effect social change. Conduct interviews with potential collaborators, case analyses and research proposals. Effective: 2016 Fall Quarter.

EDU 239—Interview Methods (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): EDU 201 or equivalent course recommended. Introduction to qualitative interviewing, focused in particular on narrative and self-story as both practical method and theoretical stance. Students complete a case-focused interview project during the course: designing an interview protocol, conducting the interview, transcribing, analyzing, and presenting their research. Effective: 2015 Winter Quarter.

EDU 242—Research on Text Comprehension (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. Analysis of recent research related to cognitive processing of written texts. Topics include word decoding, schema theory, background knowledge, assimilation, accommodation, working memory, processing depth, vocabulary acquisition, sentence-level processes, text-level processes, text structure, implications for curriculum and instruction. Effective: 2016 Fall Quarter.
EDU 243—Research on the Teaching and Learning of Writing (4)
Seminar—4 hours. Prerequisite(s): Consent of Instructor. Study of issues in research on composition; history of composition studies; data analysis techniques; product and process approaches; cognitive and social perspectives. Effective: 2016 Fall Quarter.

EDU 244—Topical Seminar in Language, Literacy and Culture (4)
Project (Term Project)—1 hour; Seminar—3 hours. Critical study of selected issues of language, literacy, and culture as they relate to education. May be repeated up to 2 time(s) topics differ. Effective: 2016 Fall Quarter.

EDU 245—Theory and Research in Early Literacy (4)
Fieldwork—1 hour; Seminar—3 hours. Analysis of children's initial processes in learning to read extending from the preschool years into second grade. Topics include emergent literacy, phonological awareness, word recognition, decoding, spelling, vocabulary, comprehension, second language reading, assessment, intervention, and instruction. GE credit: SS. Effective: 2016 Fall Quarter.

EDU 246—Reading as a Social and Cultural Process (4)
Fieldwork—1 hour; Lecture—3 hours. Prerequisite(s): EDU 211 recommended. Recent theoretical and empirical work on reading in social contexts. Topics include reading as an individual interactive process; reading as a social and cultural process; critical perspectives on reading; implications of contrastive theoretical perspectives for curriculum and instruction in reading. Effective: 2016 Fall Quarter.

EDU 247—Research on Response to Culturally Diverse Literature, K-12 (4)
Fieldwork—1 hour; Seminar—3 hours. Research on response to culturally diverse literature in classrooms and other K-12 settings. Topics include reader response theories, values in expanding the literary canon, problems of cultural authenticity, resistance to multicultural literature, and instruction for diverse texts and learners. Effective: 2006 Fall Quarter.

EDU 248—Academic Language and Literacies (4)
Fieldwork; Project (Term Project); Seminar—3 hours. Exploration of theories and research on academic language and literacies for the schooling of first and second language learners. Students use basic qualitative methods to collect and analyze classroom language and literacy data. Effective: 2011 Fall Quarter.

EDU 249—Discourse Analysis in Educational Settings (4)
Seminar—3 hours; Term Paper. Prerequisite(s): An introductory linguistics or sociolinguistics course or consent of instructor. Examines form and type in discourse (e.g., narration, conversation, routines), approaches to discourse analysis, and research on classroom discourse (lessons, teaching/learning interactional sequences). Final term paper is an analysis of discourse data tape-recorded by student in a field setting. Effective: 2016 Fall Quarter.

EDU 251—Research in Bilingual and Second Language Education (3)
Seminar—3 hours. Discussion and analysis of recent research in bilingual and second language education. Topics include language acquisition in second language learners and bilinguals, second language teaching methods, language-use models in bilingual education, interaction analysis in bilingual/cross-cultural classrooms, use of the vernacular in classrooms. Effective: 2016 Fall Quarter.

EDU 253—Language and Literacy in Linguistic Minorities (3)
Fieldwork—3 hours; Seminar—2 hours. Prerequisite(s): Acceptance in Teacher Credential Program. Analysis and application of research on oral language development and literacy in language minority students, through the development, implementation, and evaluation of research-based language arts curriculum. Effective: 2016 Fall Quarter.

EDU 255—Curriculum Development and Evaluation in Mathematics (4)
Seminar—4 hours. Prerequisite(s): Consent of Instructor. Analysis of curricular issues and goals in mathematics education, including long-term trends, current status and influences, proposed changes, and evaluation issues. Selected curriculum projects will be examined. Effective: 2016 Fall Quarter.

EDU 256A—Research in Mathematics Education (4)
Seminar—4 hours. Prerequisite(s): Consent of Instructor. Examination of research process in mathematics education; review of critical productive problems identified by researchers; evolution of trends, issues, theories and hypotheses in various areas of mathematics education research. Course emphasizes foundations. Effective: 2016 Fall Quarter.

EDU 256B—Research in Mathematics Education (4)
Seminar—4 hours. Prerequisite(s): Consent of Instructor. Current research issues and activities in mathematics

**EDU 257—Computer Technology in Mathematics Education (4)**
Seminar—4 hours. Prerequisite(s): Consent of Instructor. Roles of calculators, computers, and graphing calculators in mathematics education will be addressed, with emphasis on the impact of these technologies on curriculum reform. Selected efforts to integrate technology into mathematics instruction will be examined. Effective: 2016 Fall Quarter.

**EDU 260—The Modern History of Science Education (4)**
Seminar—4 hours. Prerequisite(s): Consent of Instructor. History of curricular issues and goals in science education from the late 19th century forward, including long-term trends, current status and influences, proposed changes, and evaluation issues. National science standards and curriculum projects. Effective: 2016 Fall Quarter.

**EDU 262A—Research Topics in Science Education I (4)**
Seminar—4 hours. Prerequisite(s): Consent of Instructor. Research process and product in science education; review of critical science education issues; evolution of trends, theories and hypotheses in various areas of science education research. Survey of current major research in science education. Effective: 2016 Fall Quarter.

**EDU 262B—Research Topics in Science Education II (4)**
Seminar—4 hours. Current research issues and activities in science education: status, trends, theories and hypotheses. Formulation of research questions, design of studies and critical, in-depth review of literature related to the student's research interests. Effective: 2016 Fall Quarter.

**EDU 264—Scientific Literacy and Science Education Reform (4)**
Seminar—4 hours. Prerequisite(s): Consent of Instructor. Current trends in science education reform locally, regionally, and nationally focusing on scientific literacy. Equity, access and "science for all." Effective: 2016 Fall Quarter.

**EDU 270—Research on Teacher Education and Development (4)**
Project (Term Project); Seminar—3 hours. Research on teacher preparation in university credential programs and on professional development of in-service teachers, with special attention to teacher preparation for work with culturally and linguistically diverse youth. Effective: 2016 Fall Quarter.

**EDU 271—Supervision of Student Teachers: Research, Theory & Practice (4)**
Fieldwork—1 hour; Lecture/Discussion—3 hours. Research, theory and practice in the preparation and supervision of teachers. Practice in the supervision of candidates in university teaching credential programs during the student teaching field placement and the mentoring of novice teachers by expert teachers. Effective: 2016 Fall Quarter.

**EDU 275A—Effective Instruction: Curriculum and Assessment-Theory, Research, and Practice (2)**
Lecture/Discussion—2 hours. Prerequisite(s): Acceptance in Teacher Credential Program. Restricted to Teaching Credential majors. Examination of contemporary theories of curriculum development, research about the relationship among instructional planning, classroom assessment, and student learning to guide teaching practice. Effective: 2013 Fall Quarter.

**EDU 275B—Effective Instruction: English Language Development and Instructing English Language Learners (2)**
Lecture/Discussion—2 hours. Prerequisite(s): Acceptance in the Teaching Credential Program. Analysis and application of English language acquisition and development research to teaching practice. Particular attention to research that enhances learning of English language learners and under-performing students. Effective: 2016 Fall Quarter.

**EDU 280A—Inquiry and Practice: Qualitative Research for Educational Leaders (4)**
Fieldwork; Lecture/Discussion—4 hours; Project (Term Project). Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor. Prepares students to understand the nature/assumptions/logic of qualitative methodology as applied to educational settings, focusing on issues of design/conceptualization/ interpretation/application of qualitative research procedures. Students will use these methods in conducting studies in their educational settings. Effective: 2009 Fall Quarter.

**EDU 280B—Inquiry and Practice: Quantitative Research for Educational Leaders (4)**
Fieldwork; Lecture/Discussion—4 hours; Project (Term Project). Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor. Field-based and general quantitative research methods in education will focus this course. Students acquire skills and knowledge to collect, organize, analyze, and interpret univariate and

**EDU 280C—Inquiry and Practice: Research Design and Application for Educational Leaders (4)**
Fieldwork; Lecture—4 hours; Project (Term Project). Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor. Educational leaders are introduced to qualitative, quantitative, and mixed-methods educational research methods and learn to frame research questions, identify data/data sources, use descriptive statistics, critically examine research studies, make sense of educational research/policy, and conduct independent studies. Effective: 2010 Spring Quarter.

**EDU 281A—Problem-Based Learning Courses: Part 1 (4)**
Extensive Writing/Discussion; Fieldwork; Lecture/Discussion—4 hours. Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor. Students identify problems from their educational settings, engage in data collection/analysis, write-up the process/results, and present to class. Work may become a dissertation proposal, if the problem or its extension is of sufficient interest and value. Effective: 2009 Fall Quarter.

**EDU 281B—Problem-Based Learning Courses: Part 2 (4)**
Extensive Writing/Discussion; Fieldwork; Lecture/Discussion—4 hours. Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor. Continuation of part one. Effective: 2010 Winter Quarter.

**EDU 281C—Problem-Based Learning Courses: Part 3 (4)**
Extensive Writing/Discussion; Fieldwork; Lecture/Discussion—4 hours. Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor. Continuation of part two. Effective: 2010 Spring Quarter.

**EDU 282A—Beginning Issues and Practices: Contemporary Educational Leadership (4)**
Fieldwork; Lecture/Discussion—4 hours; Project (Term Project). Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor. Students explore the history and emergent relationships among leadership theories/practice and their application to current educational settings. Students will reflect on and refine their personal theory of leadership. Effective: 2009 Fall Quarter.

**EDU 282B—Beginning Issues and Practices: Diversity Issues for Educational Leaders (4)**
Fieldwork; Lecture/Discussion—4 hours; Project (Term Project). Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor. The diversity of stakeholders and community issues in California schools and colleges will be explored. Emphasis will be placed on the interaction between underrepresented segments of society and educational institutions. Best Practices in leading diverse schools will be explored. Effective: 2010 Winter Quarter.

**EDU 283A—Advanced Issues and Practices: Leadership Across Communities (4)**
Fieldwork; Lecture/Discussion—4 hours; Project (Term Project). Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor. Students examine the theory/practice/process of leadership in community-building and collaboration in/across communities, while addressing the utilization of human and material resources and the creation of partnerships, community linkages, and collaborative efforts. Effective: 2010 Spring Quarter.

**EDU 283B—Advanced Issues and Practices: Leadership and Student Services (4)**
Fieldwork; Lecture/Discussion—4 hours; Project (Term Project). Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor. Practical and theoretical perspectives for building a sense of vision to lead the profession of student affairs and to meet the needs of the whole student. Effective: 2010 Spring Quarter.

**EDU 284A—Policy: History and Theory of Educational Policy (4)**
Fieldwork; Lecture/Discussion—4 hours; Project (Term Project). Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor. Students learn/analyze the history/theory of educational policy. They see how education leaders have/can positively influence the process and implement effective policies in their local institutions. Policy issues covered: educational opportunity, equity, access, regulation, testing, tenure, accountability. Effective: 2009 Fall Quarter.

**EDU 284B—Policy: Formulating and Influencing Policy (4)**
Fieldwork; Lecture/Discussion—4 hours; Project (Term Project). Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor. Students will conduct critical analyses of policy at the federal, judicial, state, regional and local levels. Specific California and federal policy environment structures, processes and people will be examined for intended consequences, ethical dilemmas, social justice and equity issues. Effective: 2010 Winter Quarter.

**EDU 284C—Policy: Possibilities and Limitations of Educational Policy in a Democracy (4)**
Fieldwork; Lecture/Discussion—4 hours; Project (Term Project). Prerequisite(s): Admission into the CANDEL EdD
program or consent of instructor. Students will critically examine the democratic purposes of education in light of existing National, State, and local policy reform efforts. Questions like, In what ways are these reforms and policies guided by democratic ideas and challenged by those ideals. Effective: 2010 Winter Quarter.

Fieldwork; Lecture/Discussion—4 hours; Project (Term Project). Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor. Topics include: education finance theory, contemporary finance policy issues, intergovernmental relations, effective resource management, budget analysis and preparation. Effective: 2010 Spring Quarter.

Fieldwork; Lecture/Discussion—4 hours; Project (Term Project). Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor. Human resource and legal concepts and activities governing decisions of school leaders in public education. Attention to theory, application, and practice of personnel and risk management, curriculum, student services, teacher rights, torts, student rights. Effective: 2009 Fall Quarter.

Fieldwork; Lecture/Discussion—4 hours; Project (Term Project). Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor. Human resource management research and theory and for applying human resource techniques in the educational setting. Effective: 2010 Spring Quarter.

**EDU 286A—Organizational Structures and Change: Data-Driven Decision-Making for Change (4)**
Fieldwork; Lecture/Discussion—4 hours; Project (Term Project). Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor. Students use and examine multiple sources of information and data and trends found in making quality decisions to improve P-12/community college settings and addressing problems at sites. Students learn limitations of these data sources. Effective: 2009 Fall Quarter.

**EDU 286B—Organizational Structures and Change: Curriculum & Instruction Issues in Education (4)**
Fieldwork; Lecture/Discussion—4 hours; Project (Term Project). Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor. This course addresses the historical development of various curriculum and instructional methodologies found in public and private schools and colleges, and their impact on current curriculum development and reform efforts at the national, state and local level. Effective: 2010 Winter Quarter.

**EDU 287—CANDEL Dissertation Seminars (6-12)**
Variable—18-36 hours. Prerequisite(s): Admission into the CANDEL EdD program or consent of instructor. Third year seminars encourage students to complete dissertations within the year. Cohort members meet together in every three-week meetings with faculty members and share their writing, data collection, analysis, discussion of results, development of conclusions/implications. May be repeated up to 9 time(s) until completion of dissertation. (S/U grading only.) Effective: 2009 Fall Quarter.

**EDU 287D—CANDEL Dissertation (6-12)**
Variable—18-36 hours. Prerequisite(s): Consent of Instructor. Passing of qualifying exams in CANDEL program and advancement to candidacy. Cohort members continue to meet with faculty and share their writing, data collection, analysis, development of conclusions/implications. May be repeated up to 9 time(s) until completion of dissertation. (S/U grading only.) Effective: 2016 Fall Quarter.

**EDU 291—Proseminar in Education (4)**
Fieldwork—3 hours; Seminar—3 hours. Prerequisite(s): Admission to the M.A. or Ph.D. graduate program in Education. Professional induction into educational research field and Graduate Group in Education at UC Davis. Introduction to landscape of educational research methodologies, purposes and theories. Analysis of debates within field. Investigation of K-12 educational outreach efforts at UC Davis. May be repeated one time as an MA student and one time as a PhD student. Effective: 2016 Fall Quarter.

**EDU 292—Special Topics in Education (2-4)**
Variable—2-4 hours. Prerequisite(s): Consent of Instructor. Selected topics in education. Designed to facilitate preparation for the qualifying examination or dissertation. Students will critically analyze scholarly work including their own works in progress. May be repeated for credit. Effective: 2016 Fall Quarter.

**EDU 294—Special Topics in Science, Agriculture and Mathematics Education (4)**
Project (Term Project); Seminar—3 hours; Term Paper. Critical study of special topics of research relevant to science, agricultural and mathematics education. Students and faculty present work-in-progress on a major research project,
and critically analyze and discuss one another's developing scholarly work. May be repeated for credit topic differs. Effective: 2016 Fall Quarter.

**EDU 295—Special Topics in Learning and Mind Science (4)**
Seminar—3 hours; Term Paper. Critical study of selected issues in the learning sciences, neurodevelopmental disorders, and psychometrics and measurement, as they relate to education. May be repeated for credit when topics differs. Effective: 2016 Fall Quarter.

**EDU 298—Group Study (1-5)**
Variable. Prerequisite(s): Consent of Instructor. Group study. (S/U grading only.) Effective: 2016 Fall Quarter.

**EDU 299—Individual Study (1-6)**
Variable—3-18 hours. Prerequisite(s): Consent of Instructor. Individual study under the direction of a faculty member. (S/U grading only.) Effective: 2016 Fall Quarter.

**EDU 299D—Research (1-12)**
Independent Study—3-36 hours. Prerequisite(s): Consent of Instructor. Research for individual graduate students. (S/U grading only.) Effective: 2016 Fall Quarter.

**EDU 300—Reading in the Elementary School (4)**
Fieldwork—3 hours; Lecture—3 hours. Prerequisite(s): Acceptance in Teacher Credential Program. Principles, procedures, and curriculum materials for teaching of reading. Includes decoding skills with a special emphasis on phonics, comprehension skills, study skills, and reading in the content areas. Effective: 2016 Fall Quarter.

**EDU 300A—Reading in the Elementary School, Part A (1)**
Seminar—3 hours. Prerequisite(s): Acceptance in Teacher Credential Program. Principles, procedures, and curriculum materials for teaching of reading. Includes decoding skills with a special emphasis on phonics, comprehension skills, study skills, and reading in the content areas. (P/NP grading only.) Effective: 2018 Summer Quarter.

**EDU 300B—Reading in the Elementary Schools, Part B (3)**
Seminar—3 hours. Prerequisite(s): Acceptance in Teacher Credential Program. Principles, procedures, and curriculum materials for teaching of reading. Includes decoding skills with a special emphasis on phonics, comprehension skills, study skills, and reading in the content areas. Effective: 2018 Summer Quarter.

**EDU 301—Reading in the Secondary School (4)**
Discussion—4 hours. Prerequisite(s): Graduate standing, enrollment in the secondary credential program or consent of instructor. Principles, procedures, and materials to help secondary school teachers improve the reading competence of students. Strategies for enhancing learning through reading and writing in all disciplines, with special attention to linguistically diverse populations. Effective: 1997 Winter Quarter.

**EDU 301A—Teaching Literacy in High School Contexts (2)**
Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Acceptance in Teacher Credential Program. Restricted to students enrolled in the secondary credential program. Focuses on secondary school literacy practices and strategies for engaging English-speaking and bilingual students with textual, image, and digital literacies across content areas. Covers reading and writing, the Common Core and Language Proficiency standards. Effective: 2016 Fall Quarter.

**EDU 301B—Teaching Literacy in High School Contexts (2)**
Lecture/Discussion—2 hours. Prerequisite(s): Acceptance in Teacher Credential Program. Restricted to students enrolled in the secondary credential program. Focuses on secondary school literacy practices and strategies for engaging English-speaking and bilingual students with textual, image, and digital literacies across content areas. Covers reading and writing, the Common Core and Language Proficiency standards. Effective: 2016 Fall Quarter.

**EDU 302—Language Arts in the Elementary School (2)**
Lecture—2 hours. Prerequisite(s): Acceptance in Teacher Credential Program. Principles, procedures, and materials for the teaching of oral and written expression, listening skills, drama, and children's literature in elementary schools. Effective: 2016 Fall Quarter.

**EDU 303—Art Education in the Elementary School (2)**
Laboratory—2 hours; Lecture/Discussion—2 hours. Prerequisite(s): Acceptance in Teacher Credential Program. Understanding the principles of education in the arts through participation. Development of concepts, introduction to media, and techniques suitable for the elementary school with emphasis on cross-discipline exploration. Effective: 2016 Fall Quarter.
EDU 304A—Teaching in the Elementary Schools (2-18)
Fieldwork—9-48 hours; Lecture/Discussion—2 hours. Prerequisite(s): Acceptance in Teacher Credential Program. Supervised teaching in regular classrooms in elementary schools. Selection and organization of teaching materials. Introduction to techniques of diagnosing school achievement of children. Effective: 2016 Fall Quarter.

EDU 304B—Teaching in the Elementary Schools (2-18)
Fieldwork—9-48 hours; Lecture/Discussion—2 hours. Prerequisite(s): Acceptance in Teacher Credential Program. Supervised teaching in regular classrooms in elementary schools. Current conceptions of elementary school curriculum, emphasis on contributions from the social, biological, and physical sciences. Emphasis on effective teaching methods. Effective: 2016 Fall Quarter.

EDU 304C—Teaching in the Elementary Schools (2-18)
Fieldwork—9-48 hours; Lecture/Discussion—2 hours. Prerequisite(s): Acceptance in Teacher Credential Program. Supervised teaching in regular classrooms in elementary schools. Evaluation of teaching materials including instructional technology. Current elementary school curriculum with emphasis on contributions from fine arts and humanities. Effective: 2016 Fall Quarter.

EDU 305A—Teaching in the Middle Grades (5-8)
Lecture—2 hours; Seminar—2 hours; Variable—15-30 hours. Prerequisite(s): Acceptance in Teacher Credential Program. Supervised teaching in regular or special education classrooms in middle grades. Current conceptions of the middle-grades curriculum with emphasis on social, biological, and physical sciences. Effective teaching methods. Effective: 2016 Fall Quarter.

EDU 306A—Teaching in the Secondary Schools (2-18)
Fieldwork—9-48 hours; Lecture/Discussion—2 hours. Prerequisite(s): Acceptance in Teacher Credential Program. Supervised teaching in regular secondary classrooms. Techniques for classroom communications; constructing goals and objectives; assessment of learning; special problems of adolescents; instructional technology. Effective: 2016 Fall Quarter.

EDU 306B—Teaching in the Secondary Schools (2-18)
Fieldwork—9-48 hours; Lecture/Discussion—2 hours. Prerequisite(s): Acceptance in Teacher Credential Program. Supervised teaching in regular secondary classrooms. Techniques for classroom communications; constructing goals and objectives; assessment of learning; special problems of adolescents; instructional technology. Effective: 2016 Fall Quarter.

EDU 306C—Teaching in the Secondary Schools (2-18)
Fieldwork—9-48 hours; Lecture/Discussion—2 hours. Prerequisite(s): Acceptance in Teacher Credential Program. Supervised teaching in regular secondary classrooms. Techniques for classroom communications; constructing goals and objectives; assessment of learning; special problems of adolescents; instructional technology. Effective: 2016 Fall Quarter.

EDU 307—Methods in Elementary Science (2)
Lecture/Discussion—2 hours. Prerequisite(s): Acceptance in Teacher Credential Program. Principles, procedures, and materials for teaching the biological and physical sciences in elementary schools. Effective: 2016 Fall Quarter.

EDU 308—Methods in Elementary Social Studies (2)
Lecture/Discussion—2 hours. Prerequisite(s): Acceptance in Teacher Credential Program. Principles, procedures, and materials for teaching history and the social sciences in elementary schools. Effective: 2016 Fall Quarter.

EDU 309—The Teaching of Mathematics, K-9 (3)
Lecture/Discussion—3 hours. Prerequisite(s): Acceptance in Teacher Credential Program. Mathematics curriculum and teaching methods for K-9 reflecting the needs of California's diverse student populations. Effective: 2016 Fall Quarter.

EDU 309A—The Teaching of Mathematics, K–9, Part A (1)
Seminar—3 hours. Prerequisite(s): Acceptance in Teacher Credential Program. Mathematics curriculum and teaching methods for K–9 reflecting the needs of California's diverse student populations. (P/NP grading only.) Effective: 2018 Summer Quarter.

EDU 309B—The Teaching of Mathematics, K–9, Part B (2)
Seminar—2 hours. Prerequisite(s): Acceptance in Teacher Credential Program Mathematics curriculum and teaching methods for K–9 reflecting the needs of California's diverse student populations. Effective: 2018 Summer Quarter.
EDU 310—Teaching as Reflective Practice (1)  
Lecture/Discussion—1 hour. Prerequisite(s): Consent of Instructor. Acceptance in Teacher Credential Program. Presentation of issues related to classroom instruction and professional practice, reflections on classroom instruction and other documentation related to student teaching experience. May be repeated up to 6 time(s). Effective: 2016 Fall Quarter.

EDU 320—Creating Classroom Communities (1)  
Fieldwork—30 hours; Lecture/Discussion—2 hours. Acceptance in Teacher Credential Program. Observation of classrooms at beginning of academic year for first-hand experience with teachers’ approaches to creating communities and setting routines. Candidates are placed with students they will teach during student teaching. Candidates may take on teaching tasks as appropriate. Effective: 2016 Summer Special Session.

EDU 322A—Pedagogical Preparation for Secondary Social Science I (3)  
Discussion—1 hour; Lecture/Discussion—2 hours. Prerequisite(s): Acceptance in Teacher Credential Program. Introduction to teaching methods and curriculum approaches for secondary social science teaching. State and national curriculum standards; application of learning theory to effective instruction; interdisciplinary teaching and active learning approaches; effective teaching strategies for English learners. Effective: 2016 Fall Quarter.

EDU 322B—Pedagogical Preparation for Secondary Social Science II (3)  
Discussion—2 hours; Lecture/Discussion—1 hour. Prerequisite(s): Acceptance in Teacher Credential Program. Intermediate teaching methods and curriculum approaches for secondary social science teaching. Interdisciplinary approaches to teaching major themes across social science content areas; teaching potentially controversial social science topics; teaching democratic civic values, student assessment and evaluation. Effective: 2016 Fall Quarter.

EDU 323A—Physical Science in the Secondary School (3)  
Discussion/Laboratory—1 hour; Discussion/Laboratory—2 hours. Prerequisite(s): Acceptance in Teacher Credential Program. Activity-based overview of concepts and processes in secondary school physical sciences. Emphasis upon philosophy, appropriate teaching methods, materials, assessment and evaluation of learning. Effective: 2016 Fall Quarter.

EDU 323B—Life Sciences in the Secondary School (3)  
Discussion/Laboratory—2 hours; Discussion/Laboratory—1 hour. Prerequisite(s): Acceptance in Teacher Credential Program. Activity-based overview of concepts and processes in secondary school biology and life sciences. Emphasis on philosophy, appropriate teaching methods, materials, assessment and evaluation of learning, and issues. Effective: 2016 Fall Quarter.

EDU 324A—Methods and Technology in Secondary Mathematics I (4)  
Lecture/Discussion—4 hours. Prerequisite(s): Consent of Instructor. Acceptance in Teacher Credential Program. Introduction to methods and curriculum for teaching mathematics at the secondary level. Introduction to applications of computer technology as instructional, intellectual, and communication tools for mathematics teachers. Effective: 2016 Fall Quarter.

EDU 324B—Methods in Secondary Mathematics II (3)  
Lecture/Discussion—3 hours. Prerequisite(s): Consent of Instructor. Acceptance in Teacher Credential Program. Expansion of methods and curriculum for teaching mathematics at the secondary level. Intermediate applications of computer technology as instructional, intellectual, and communication tools in mathematics teaching. Effective: 2016 Fall Quarter.

EDU 325—Research and Methods in Secondary English Language Arts (4)  
Discussion—4 hours. Prerequisite(s): Consent of Instructor. Acceptance in Teacher Credential Program. Research on teaching and learning in the language arts. Principles, procedures and materials for improving the writing, reading and oral language of secondary students, with special attention to students from culturally and linguistically diverse populations. Effective: 2016 Fall Quarter.

EDU 326—Teaching Language Minority Students in Secondary Schools: Methods and Research (4)  
Fieldwork—3 hours; Seminar—3 hours. Prerequisite(s): Consent of Instructor. Acceptance in Teacher Credential Program. Research on principles, procedures and curricula for teaching discipline-specific concepts to language-minority students in secondary schools. Second-language acquisition principles and instructional strategies. Effective: 2016 Fall Quarter.

EDU 327A—Teaching Methods for Secondary Foreign Language/Spanish, Part I (3)  
Lecture—3 hours. Prerequisite(s): Acceptance in Teacher Credential Program. Introduction to methods for teaching Spanish as a foreign and a heritage language in secondary schools. State and National Standards. Theories on
second language acquisition. Lesson plans. Effective teaching strategies and class management. Effective: 2016 Fall Quarter.

**EDU 327B—Teaching Methods for Secondary Foreign Language/Spanish, Part II (3)**
Lecture—3 hours. Prerequisite(s): Acceptance in Teacher Credential Program. Continuation to methods for teaching Spanish as a foreign and a heritage language in secondary schools. Research and practice on foreign and heritage language teaching. Expansion of effective teaching strategies and class management. Effective: 2016 Fall Quarter.

**EDU 398—Group Study (1-5)**
Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

**EDU 399—Individual Study (1-5)**
Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

The Department of Electrical and Computer Engineering prepares graduate students to do meaningful research and acquire skills and insights vital to solving some of the world's most complex technological problems. Our graduate program offers a challenging and stimulating environment, covering optical, wireline and wireless communications, telecommunication networks, computer engineering, circuits, electromagnetics, physical electronics, optoelectronics, control, and signal processing. The depth of resources in the study of circuit design alone, with one of the largest faculty groups in the field in the UC system, distinguishes us from other programs, while our program in microwave communications and devices is unique.

The Electrical and Computer Engineering Graduate Program benefits from the highly interdisciplinary culture at UC Davis and attracts faculty from biomedical, chemical, electrical, computer, civil, and mechanical engineering, as well as computer science and mathematics.

Many of our graduates go on to leadership and technology management roles in industry, returning each year for our industrial affiliates meeting to network with other industry representatives, current students and faculty.

Generous financial support is available in the form of research assistantships, teaching assistantships, fellowships and financial aid.

**Research Highlights:**
- Communications, control, networking, and signal processing

Electrical & Computer Engineering; Electrical & Computer Engineering | EEC Courses

Courses in EEC:

**EEC 001—Introduction to Electrical and Computer Engineering (1)**
Lecture—1 hour. Electrical and Computer Engineering as a professional activity. What Electrical and Computer Engineers know and how they use their knowledge. (P/NP grading only.) GE credit: SE. Effective: 2012 Fall Quarter.

**EEC 007—Introduction to Programming and Microcontrollers (4)**
Laboratory—2 hours; Lecture—3 hours. Pass One restricted to Electrical Engineering majors only. Programming computers using C/C++ languages. Software engineering and object-oriented design. Programming for hardware devices. Only two units of credit for students who have previously taken ECS 036A or ECS 032A. Effective: 2019 Winter Quarter.

**EEC 010—Introduction to Digital and Analog Systems (4)**
Laboratory—3 hours; Lecture—2 hours; Project (Term Project). Prerequisite(s): ECS 030; (PHY 009C can be concurrent) or PHY 009HD (can be concurrent); and Consent of Instructor. Open to Electrical and Computer Engineering sophomores. Interactive and practical introduction to fundamental concepts of electrical and computer engineering by implementing electronic systems, which can be digitally controlled and interrogated, with a programmable microcontroller with the ability to program the electrical connections between analog and digital components. GE credit: SE. Effective: 2017 Winter Quarter.

**EEC 010—Introduction to Digital and Analog Systems (4)**
Laboratory—3 hours; Lecture—2 hours; Project (Term Project). Prerequisite(s): (PHY 009C can be concurrent) or PHY 009HD (can be concurrent); (ECS 030 or ECS 036B or EEC 007); ENG 017; Consent of Instructor. Open to Electrical and Computer Engineering sophomores. Interactive and practical introduction to fundamental concepts of electrical and computer engineering by implementing electronic systems, which can be digitally controlled and interrogated, with a programmable microcontroller with the ability to program the electrical connections between analog and digital components. GE credit: SE. Effective: 2019 Winter Quarter.

**EEC 018—Digital Systems I (5)**
Laboratory—4 hours; Lecture—3 hours. Prerequisite(s): ENG 017 Introduction to digital system design including combinational logic design, sequential and asynchronous circuits, computer arithmetic, memory systems and algorithmic state machine design; computer aided design (CAD) methodologies and tools. No credit to students who have previously completed EEC 180A. Effective: 2019 Winter Quarter.

**EEC 089A—Special Topics in Electromagnetics (1-5)**
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Electromagnetics. May be repeated for credit if topic differs. GE credit: SE. Effective: 2011 Winter Quarter.

**EEC 089B—Special Topics in Physical Electronics (1-5)**
Variable. Prerequisite(s): Consent of Instructor. Special topics in Physical Electronics. May be repeated for credit if topic differs. GE credit: SE. Effective: 2011 Winter Quarter.

**EEC 089C—Special Topics in Active and Passive Circuits (1-5)**
Variable. Prerequisite(s): Consent of Instructor. Special topics in Active and Passive Circuits. May be repeated for credit if topic differs. GE credit: SE. Effective: 2011 Winter Quarter.

**EEC 089D—Special Topics in Signals and Systems (1-5)**
Variable. Prerequisite(s): Consent of Instructor. Special topics in Signals and Systems. May be repeated for credit if topic differs. GE credit: SE. Effective: 2011 Winter Quarter.
EEC 089E—Special Topics in Computer Systems and Software (1-5)
Variable. Prerequisite(s): Consent of Instructor. Special topics in Computer Systems and Software. May be repeated for credit if topic differs. GE credit: SE. Effective: 2011 Winter Quarter.

EEC 089F—Special Topics in Digital System Design (1-5)
Variable. Prerequisite(s): Consent of Instructor. Special topics in Digital System Design. May be repeated for credit if topic differs. GE credit: SE. Effective: 2011 Winter Quarter.

EEC 090C—Research Group Conference in Electrical and Computer Engineering (1)
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Lower division standing. Research group conferences. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

EEC 090X—Lower Division Seminar (1-4)
Seminar—1-4 hours. Prerequisite(s): Consent of Instructor. Examination of a special topic in a small group setting. May be repeated for credit. Effective: 1997 Winter Quarter.

EEC 092—Internship in Electrical and Computer Engineering (1-5)
Internship—3-15 hours. Prerequisite(s): Lower division standing; project approval prior to period of internship. Supervised work experience in Electrical and Computer Engineering. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

EEC 098—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

EEC 099—Special Study for Lower Division Students (1-5)
Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

EEC 100—Circuits II (5)
Discussion—1 hour; Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ENG 017 C- or better Restricted to the following majors: Electrical Engineering, Computer Engineering, Computer Science & Engineering, Electronic Materials Engineering, Electrical Engineering/Materials Science, Optical Science & Engineering, Biomedical Engineering, Applied Physics, Electrical & Computer Engineering graduate students. Theory, application, and design of analog circuits. Methods of analysis including frequency response, SPICE simulation, and Laplace transform. Operational amplifiers and design of active filters. Students who have completed Engineering 100 may receive 3.5 units of credit. GE credit: QL, SE, VL. Effective: 2018 Fall Quarter.

EEC 105A—EE-Emerge 1 (1)
Workshop—1 hour. Pass One restricted to Electrical & Computer Engineering Junior and Sophomore-level students. Work in groups to conceive, design and prototype electronic exhibits to promote engineering to the public. (P/NP grading only.) Effective: 2019 Fall Quarter.

EEC 105B—EE-Emerge 2 (2)
Workshop—2 hours. Pass One restricted to Electrical & Computer Engineering Junior and Sophomore-level students. Work in groups to construct electronic exhibits. (P/NP grading only.) Effective: 2019 Fall Quarter.

EEC 105C—EE-Emerge 3 (1)
Workshop—1 hour. Prerequisite(s): EEC 105B Work in groups to present electronic exhibits to the public. (P/NP grading only.) Effective: 2019 Fall Quarter.

EEC 110A—Electronic Circuits I (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EEC 100; EEC 140A (can be concurrent) Use and modeling of nonlinear solid-state electronic devices in basic analog and digital circuits. Introduction to the design of transistor amplifiers and logic gates. GE credit: SE, VL. Effective: 2018 Winter Quarter.

EEC 110B—Electronic Circuits II (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): EEC 110A Analysis and design of integrated circuits. Single-
stage amplifiers, cascaded amplifier stages, differential amplifiers, current sources, frequency response, and return-ratio analysis of feedback amplifiers. GE credit: SE, VL. Effective: 2009 Fall Quarter.

**EEC 112—Communication Electronics (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): EEC 110A; EEC 150A; EEC 110B recommended. Electronic circuits for analog and digital communication, including oscillators, mixers, tuned amplifiers, modulators, demodulators, and phase-locked loops. Circuits for amplitude modulation (AM) and frequency modulation (FM) are emphasized. GE credit: SE. Effective: 2014 Spring Quarter.

**EEC 116—VLSI Design (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): EEC 110A; EEC 180A recommended. CMOS devices, layout, circuits, and functional units; VLSI fabrication and design methodologies. GE credit: SE. Effective: 2014 Spring Quarter.

**EEC 118—Digital Integrated Circuits (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): EEC 110A; EEC 180A recommended. CMOS devices, layout, circuits, and functional units; VLSI fabrication and design methodologies. GE credit: SE. Effective: 2019 Winter Quarter.

**EEC 119A—Integrated Circuit Design Project (3)**
Laboratory—6 hours; Workshop—1 hour. Prerequisite(s): EEC 116 or EEC 118 Design course involving architecture, circuit design, physical design, and validation through extensive simulation of a digital or mixed-signal integrated circuit of substantial complexity under given design constraints. Team project that includes a final report. GE credit: SE. Effective: 2014 Fall Quarter.

**EEC 119B—Integrated Circuit Design Project (3)**
Laboratory—6 hours; Workshop—1 hour. Prerequisite(s): EEC 119A Design course involving architecture, circuit design, physical design, and validation through extensive simulation of a digital or mixed-signal integrated circuit of substantial complexity under given design constraints. Team project that includes a final report. GE credit: SE. Effective: 2014 Fall Quarter.

**EEC 130A—Electromagnetics I (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MAT 021D; (PHY 009C or PHY 009HD); ENG 017 Basics of static electric and magnetic fields and fields in materials. Work and scalar potential. Maxwell's equations in integral and differential form. Plan waves in lossless media. Lossless transmission lines. GE credit: SE. Effective: 2016 Fall Quarter.

**EEC 130B—Introductory Electromagnetics II (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EEC 130A Plane wave propagation in lossy media, reflections, guided waves, simple modulated waves and dispersion, and basic antennas. GE credit: SE. Effective: 1997 Winter Quarter.

**EEC 132A—RF and Microwaves in Wireless Communication (5)**
Discussion—1 hour; Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): EEC 110A; EEC 130B Study of Radio Frequency and Microwave theory and practice for design of wireless electronic systems. Transmission lines, microwave integrated circuits, circuit analysis of electromagnetic energy transfer systems, the scattering parameters. GE credit: SE. Effective: 2015 Winter Quarter.

**EEC 132B—RF and Microwaves in Wireless Communication (5)**
Discussion—1 hour; Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): EEC 132A Passive RF and microwave device analysis, design, fabrication, and testing for wireless applications. RF and microwave filter and coupler
design. Introductory analysis and design of RF and microwave transistor amplifiers. GE credit: SE. Effective: 2007 Winter Quarter.

EEC 132C—RF and Microwaves in Wireless Communications (5)
Discussion—1 hour; Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): EEC 132B RF and microwave amplifier theory and design, including transistor circuit models, stability considerations, noise models and low noise design. Theory and design of microwave transistor oscillators and mixers. Wireless system design and analysis. GE credit: SE. Effective: 2009 Spring Quarter.

EEC 133—Electromagnetic Radiation and Antenna Analysis (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EEC 130B Properties of electromagnetic radiation; analysis and design of antennas: ideal cylindrical, small loop, aperture, and arrays; antenna field measurements. GE credit: SE. Effective: 1999 Fall Quarter.

EEC 134A—RF/Microwave Systems Design (3)
Laboratory—6 hours; Workshop—3 hours. Prerequisite(s): EEC 130B or EEC 110B or EEC 150A Class size limited to 24 students. Board-level RF design, fabrication, and characterization of an RF/microwave system, including the antenna, RF front-end, baseband, mix-signal circuits, and digital signal processing models. GE credit: SE. Effective: 2014 Fall Quarter.

EEC 134B—RF/Microwave Systems Design (3)
Laboratory—6 hours; Workshop—3 hours. Prerequisite(s): EEC 134A Class size limited to 24 students. Board-level RF design, fabrication, and characterization of an RF/microwave system, including the antenna, RF front-end, baseband, mix-signal circuits, and digital signal processing models. GE credit: SE. Effective: 2015 Winter Quarter.

EEC 135—Optical Communications I: Fibers (4) Review all entries

EEC 135—Optoelectronics for High-Speed Data Networking and Computing Systems (4) Review all entries

EEC 136A—Electronic Design Project (3) Review all entries
Laboratory—6 hours; Workshop—1 hour. Prerequisite(s): ECS 030; EEC 100; EEC 180A; (EEC 110B or EEC 157A (can be concurrent) or EEC 180B) Pass One restricted to major. Optical, electronic and communication-engineering design of an opto-electronic system operating under performance and economic constraints. Measurement techniques will be designed and implemented, and the system will be characterized. GE credit: SE. Effective: 2015 Fall Quarter.

EEC 136A—Electronic Design Project (3) Review all entries
Laboratory—6 hours; Workshop—1 hour. Prerequisite(s): ECS 036B or ECS 030 or ECS 034 or EEC 007; EEC 100; (EEC 018 or EEC 180A); (EEC 110B or EEC 157A (can be concurrent) or EEC 180 or EEC 180B) Pass One restricted to major. Optical, electronic and communication-engineering design of an opto-electronic system operating under performance and economic constraints. Measurement techniques will be designed and implemented, and the system will be characterized. GE credit: SE. Effective: 2019 Winter Quarter.

EEC 136B—Electronic Design Project (3) Review all entries
Laboratory—6 hours; Workshop—1 hour. Prerequisite(s): EEC 136A Optical, electronic and communication-engineering design of an opto-electronic system operating under performance and economic constraints. Measurement techniques will be designed and implemented, and the system will be characterized. GE credit: SE. Effective: 2014 Fall Quarter.
EEC 140A—Principles of Device Physics I (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ENG 017; (PHY 009D or PHY 009HE) Semiconductor device fundamentals, equilibrium and non-equilibrium statistical mechanics, conductivity, diffusion, electrons and holes, p-n and Schottky junctions, first-order metal-oxide-semiconductor (MOS) field effect transistors, bipolar junction transistor fundamentals. GE credit: SE, SL. Effective: 2016 Fall Quarter.

EEC 140A—Principles of Device Physics I (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ENG 017 (can be concurrent); (PHY 009D or PHY 009HE) Semiconductor device fundamentals, equilibrium and non-equilibrium statistical mechanics, conductivity, diffusion, electrons and holes, p-n and Schottky junctions, first-order metal-oxide-semiconductor (MOS) field effect transistors, bipolar junction transistor fundamentals. GE credit: SE, SL. Effective: 2018 Fall Quarter.

EEC 140B—Principles of Device Physics II (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EEC 140A Electrical properties, designs, models and advanced concepts for MOS, Bipolar, and Junction Field-Effect Transistors, including scaling, minority-carrier distributions, non-ideal effects, and device fabrication methods. MESFET and heterojunction bipolar transistors (HBTs). Fundamentals of solar cells, photodetectors, LEDs and semiconductor lasers. GE credit: SE. Effective: 2010 Spring Quarter.

EEC 145—Electronic Materials (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EEC 140A Electronic and physical properties of materials used in electronics, ICs, optoelectronics and MEMS. Semiconductors, dielectrics, metals, optical materials, organic semiconductive, optical and nonlinear properties, as well as their synthesis and deposition methods. GE credit: SE. Effective: 2015 Fall Quarter.

EEC 146A—Integrated Circuits Fabrication (4)
Laboratory—4 hours; Lecture—2 hours. Prerequisite(s): EEC 140A Theoretical and experimental study of basic fabrication processes for metal oxide semiconductor integrated circuits, including oxidation, photolithography, impurity diffusion, metallization, wet chemical etching, and characterization. GE credit: SE. Effective: 1997 Winter Quarter.

EEC 146B—Advanced Integrated Circuits Fabrication (3)
Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): EEC 146A Restricted to Electrical, Computer, and Electrical/Materials Science majors and Electrical Engineering graduate students; non-majors accommodated when space available. Fabrication processes for CMOS VLSI. Laboratory projects examine deposition of thin films, ion implantation, process simulation, anisotropic plasma etching, sputter metallization, and C-V analysis. Topics include isolation, projection alignment, epilayer growth, thin gate oxidation, and rapid thermal annealing. GE credit: SE. Effective: 1997 Winter Quarter.

EEC 150A—Introduction to Signals and Systems I (4)
Lecture—4 hours. Prerequisite(s): EEC 100; (ENG 006 (can be concurrent) or MAT 022AL (can be concurrent)) Characterization and analysis of continuous-time linear systems. Fourier series and transforms with applications. Introduction to communication systems. Transfer functions and block diagrams. Elements of feedback systems. Stability of linear systems. GE credit: QL, SE. Effective: 2013 Fall Quarter.

EEC 150B—Introduction to Signals and Systems II (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EEC 150A Characterization and analysis of discrete time systems. Difference equation models. Ztransform analysis methods. Discrete and fast Fourier transforms. Introduction to digital filter design. GE credit: QL, SE. Effective: 2012 Fall Quarter.

EEC 152—Digital Signal Processing (4)
Laboratory—6 hours; Lecture—2 hours. Prerequisite(s): EEC 150B; (EEC 070 or ECS 050) Theory and practice of real-time digital signal processing. Fundamentals of real-time systems. Programmable architectures including I/O, memory, peripherals, interrupts, DMA. Interfacing issues with A/D and D/A converters to a programmable DSP. Specification driven design and implementation of simple DSP applications. GE credit: SE. Effective: 2014 Fall Quarter.

EEC 157A—Control Systems (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): EEC 100 Analysis and design of feedback control systems. Examples are drawn from electrical and mechanical systems as well as other engineering fields. Mathematical modeling of systems, stability criteria, root-locus and frequency domain design methods. GE credit: SE. Effective: 2013 Fall Quarter.
EEC 157B—Control Systems (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): EEC 157A Control system design; transfer-function and state-space methods; sampled-data implementation, digital control. Laboratory includes feedback system experiments and simulation studies. GE credit: SE. Effective: 1997 Winter Quarter.

EEC 160—Signal Analysis and Communications (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EEC 150A Signal analysis based on Fourier methods. Fourier series and transforms; time-sampling, convolution, and filtering; spectral density; modulation: carrier-amplitude, carrier-frequency, and pulse-amplitude. GE credit: SE. Effective: 1997 Winter Quarter.

EEC 161—Probabilistic Analysis of Electrical & Computer Systems (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EEC 100; (ENG 006 or MAT 022AL) Probabilistic and statistical analysis of electrical and computer systems. Discrete and continuous random variables, expectation and moments. Transformation of random variables. Joint and conditional densities. Limit theorems and statistics. Noise models, system reliability and testing. GE credit: SE. Effective: 2016 Spring Quarter.

EEC 165—Statistical and Digital Communication (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): EEC 160; EEC 161 Introduction to random process models of modulated signals and noise, and analysis of receiver performance. Analog and digitally modulated signals. Signal-to-noise ratio, probability of error, matched filters. Intersymbol interference, pulse shaping and equalization. Carrier and clock synchronization. GE credit: SE. Effective: 2017 Winter Quarter.

EEC 170—Introduction to Computer Architecture (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EEC 180A; ECS 030 Introduces basic aspects of computer architecture, including computer performance measurement, instruction set design, computer arithmetic, pipelined/non-pipelined implementation, and memory hierarchies (cache and virtual memory). Presents a simplified Reduced Instruction Set Computer using logic design methods from the prerequisite course. GE credit: SE. Effective: 2015 Winter Quarter.

EEC 171—Parallel Computer Architecture (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EEC 170 or ECS 154B Organization and design of parallel processors including shared-memory multiprocessors, cache coherence, memory consistency, snooping protocols, synchronization, scalable multiprocessors, message passing protocols, distributed shared memory and interconnection networks. GE credit: SE. Effective: 2019 Winter Quarter.

EEC 172—Embedded Systems (4)
Laboratory—6 hours; Lecture—2 hours. Prerequisite(s): (EEC 170 or ECS 154A); EEC 100 Introduction to embedded-system hardware and software. Topics include: embedded processor and memory architecture; input/output hardware and software, including interrupts and direct memory access; interfacing with sensors and actuators; wired and wireless embedded networking. GE credit: SE. Effective: 2014 Fall Quarter.

EEC 173A—Computer Networks (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EEC 060; (ECS 132 or EEC 161 or MAT 135A or STA 131A or STA 120 or STA 032) Pass One open to Computer Science, Computer Science Engineering and Computer Engineering Majors only. Overview of computer networks, TCP/IP protocol suite, computer-networking applications and protocols, transport-layer protocols, network architectures, Internet Protocol (IP), routing, link-layer protocols, local area and wireless networks, medium access control, physical aspects of data transmission, and network-performance analysis. Only 2 units of credit for students who have taken ECS 157. (Same course as ECS 152A.) GE credit: SE. Effective: 2016 Winter Quarter.

EEC 173A—Computer Networks (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECS 060 or ECS 032B or ECS 036C); (ECS 132 or EEC 161 or MAT 135A or STA 131A or STA 120 or STA 032) Pass One open to Computer Science, Computer Science Engineering and Computer Engineering Majors only. Overview of computer networks, TCP/IP protocol suite, computer-networking applications and protocols, transport-layer protocols, network architectures, Internet Protocol
(IP), routing, link-layer protocols, local area and wireless networks, medium access control, physical aspects of data transmission, and network-performance analysis. Only 2 units of credit for students who have taken ECS 157. (Same course as ECS 152A.) GE credit: SE. Effective: 2019 Winter Quarter.

EEC 173B—Design Projects in Communication Networks (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EEC 173A or ECS 152A Advanced topics and design projects in communication networks. Example topics include wireless networks, multimedia networking, network design and management, traffic analysis and modeling, network simulations and performance analysis. Offered in alternate years. (Same course as ECS 152C.) GE credit: SE. Effective: 2005 Spring Quarter.

EEC 180—Digital Systems II (5)
Laboratory—4 hours; Lecture—3 hours. Prerequisite(s): EEC 018 or EEC 180A Computer-aided design of digital systems with emphasis on hardware description languages (VHDL), logic synthesis, and field-programmable gate arrays (FPGA). May cover advanced topics in digital system design such as static timing analysis, pipelining, memory system design, testing digital circuits. No credit to students who have previously completed EEC 180B. Effective: 2019 Winter Quarter.

EEC 180A—Digital Systems I (5) Review all entries
Laboratory—6 hours; Lecture—3 hours. Prerequisite(s): PHY 009C or PHY 009HD Introduction to digital system design including combinational logic design, sequential and asynchronous circuits, computer arithmetic, memory systems and algorithmic state machine design; computer aided design (CAD) methodologies and tools. GE credit: SE. Effective: 2014 Spring Quarter.

EEC 180A—Digital Systems I (5) Review all entries Discontinued
Laboratory—6 hours; Lecture—3 hours. Prerequisite(s): PHY 009C or PHY 009HD Introduction to digital system design including combinational logic design, sequential and asynchronous circuits, computer arithmetic, memory systems and algorithmic state machine design; computer aided design (CAD) methodologies and tools. GE credit: SE. Effective: 2019 Winter Quarter.

EEC 180B—Digital Systems II (5) Review all entries
Laboratory—6 hours; Lecture—3 hours. Prerequisite(s): EEC 180A Computer-aided design of digital systems with emphasis on hardware description languages (VHDL), logic synthesis, and field-programmable gate arrays (FPGA). May cover advanced topics in digital system design such as static timing analysis, pipelining, memory system design, testing digital circuits. GE credit: SE. Effective: 2013 Fall Quarter.

EEC 180B—Digital Systems II (5) Review all entries Discontinued
Laboratory—6 hours; Lecture—3 hours. Prerequisite(s): EEC 180A Computer-aided design of digital systems with emphasis on hardware description languages (VHDL), logic synthesis, and field-programmable gate arrays (FPGA). May cover advanced topics in digital system design such as static timing analysis, pipelining, memory system design, testing digital circuits. GE credit: SE. Effective: 2019 Winter Quarter.

EEC 181A—Digital Systems Design Project (3) Review all entries
Laboratory—6 hours; Workshop—1 hour. Prerequisite(s): EEC 170 Digital-system and computer-engineering design course involving architecture, design, implementation and testing of a prototype application-specific processor under given design constraints. This is a team project that includes a final presentation and report. GE credit: SE. Effective: 2018 Winter Quarter.

EEC 181A—Digital Systems Design Project (3) Review all entries
Laboratory—6 hours; Workshop—1 hour. Prerequisite(s): (EEC 180 or EEC 180B); EEC 170 Digital-system and computer-engineering design course involving architecture, design, implementation and testing of a prototype application-specific processor under given design constraints. This is a team project that includes a final presentation and report. GE credit: SE. Effective: 2019 Winter Quarter.

EEC 181B—Digital Systems Design Project (3)
Laboratory—6 hours; Workshop—1 hour. Prerequisite(s): EEC 181A Digital-system and computer-engineering design course involving architecture, design, implementation and testing of a prototype application-specific processor under given design constraints. This is a team project that includes a final presentation and report. GE credit: SE. Effective: 2015 Winter Quarter.

EEC 183—Testing and Verification of Digital Systems (5)
Laboratory—4 hours; Lecture—3 hours. Prerequisite(s): EEC 170; EEC 180B Computer aided-testing and design verification techniques for digital systems; physical fault testing; simulation-based design verification; formal verification; timing analysis. GE credit: SE. Effective: 2012 Spring Quarter.
EEC 189A—Special Topics in Electrical Engineering and Computer Science; Computer Science (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Computer Science. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189B—Special Topics in Electrical Engineering and Computer Science; Programming Systems (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Programming Systems. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189C—Special Topics in Electrical Engineering and Computer Science; Digital Systems (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Digital Systems. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189D—Special Topics in Electrical Engineering and Computer Science; Communications (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Communications. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189E—Special Topics in Electrical Engineering and Computer Science; Signal Transmission (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Signal Transmission. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189F—Special Topics in Electrical Engineering and Computer Science; Digital Communication (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Digital Communication. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189G—Special Topics in Electrical Engineering and Computer Science; Control Systems (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Control Systems. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189H—Special Topics in Electrical Engineering and Computer Science; Robotics (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Robotics. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189I—Special Topics in Electrical Engineering and Computer Science; Signal Processing (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Signal Processing. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189J—Special Topics in Electrical Engineering and Computer Science; Image Processing (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Image Processing. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189K—Special Topics in Electrical Engineering and Computer Science; High-Frequency Phenomena and Devices (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in High-Frequency Phenomena and Devices. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189L—Special Topics in Electrical Engineering and Computer Science; Solid-State Devices and Physical Electronics (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Solid-State Devices and Physical Electronics. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189M—Special Topics in Electrical Engineering and Computer Science; Systems Theory (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Systems Theory. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189N—Special Topics in Electrical Engineering and Computer Science; Active and Passive Circuits (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Active and Passive Circuits. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189O—Special Topics in Electrical Engineering and Computer Science; Integrated Circuits (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Integrated Circuits. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189P—Special Topics in Electrical Engineering and Computer Science; Computer Software (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Computer Software. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.
EEC 189Q—Special Topics in Electrical Engineering and Computer Science; Computer Engineering (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Computer Engineering. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189R—Special Topics in Electrical Engineering and Computer Science; Microprocessing (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Microprocessing. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189S—Special Topics in Electrical Engineering and Computer Science; Electronics (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Electronics. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189T—Special Topics in Electrical Engineering and Computer Science; Electromagnetics (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Electromagnetics. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189U—Special Topics in Electrical Engineering and Computer Science; Opto-Electronics (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Opto-Electronics. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189W—Special Topics in Electrical and Computer Engineering; Computer Networks (1-5)
Variable. Prerequisite(s): Consent of Instructor. Special topics in Computer Networks. May be repeated for credit when topic differs. GE credit: SE. Effective: 2018 Winter Quarter.

EEC 190C—Research Group Conferences in Electrical and Computer Engineering (1)
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Upper division standing in Electrical and Computer Engineering. Research group conferences. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 2013 Spring Quarter.

EEC 192—Internship in Electrical and Computer Engineering (1-5)
Internship—3-15 hours. Prerequisite(s): Consent of Instructor. Completion of a minimum of 84 units; project approval before period of internship. Supervised work experience in electrical and computer engineering. May be repeated for credit project is different. (P/NP grading only.) GE credit: SE. Effective: 2012 Fall Quarter.

EEC 192—Internship in Electrical and Computer Engineering (1-6)
Internship—3-18 hours. Prerequisite(s): Consent of Instructor. Completion of a minimum of 84 units; project approval before period of internship. Supervised work experience in electrical and computer engineering. May be repeated for credit if project differs. (P/NP grading only.) GE credit: SE. Effective: 2018 Fall Quarter.

EEC 193A—Senior Design Project (3)
Laboratory—6 hours; Workshop—1 hour. Prerequisite(s): EEC 196 (can be concurrent); and Consent of Instructor. Restricted to senior standing in Electrical or Computer Engineering. Team design project for seniors in Electrical or Computer Engineering. Project involves analysis, design, implementation and evaluation of an Electrical Engineering or Computer Engineering system. Project is supervised by a faculty member. GE credit: SE. Effective: 2014 Fall Quarter.

EEC 193B—Senior Design Project (3)
Laboratory—6 hours; Workshop—1 hour. Prerequisite(s): EEC 193A Team design project for seniors in Electrical Engineering or Computer Engineering. Project involves analysis, design, implementation and evaluation of an Electrical Engineering or Computer Engineering system. Project supervised by a faculty member. GE credit: SE. Effective: 2015 Winter Quarter.

EEC 193A—Autonomous Vehicle Design Project (3)
Laboratory—6 hours; Workshop—1 hour. Prerequisite(s): ECS 030; EEC 180A; (EEC 110B or EEC 157A (can be concurrent) or EEC 180B or ECS 060) Pass One restricted to major. Design and construct an autonomous race car. Work in groups to design, build and test speed control circuits, track sensing circuits, and a steering control loop. GE credit: SE. Effective: 2015 Fall Quarter.

EEC 193A—Autonomous Vehicle Design Project (3)
Laboratory—6 hours; Workshop—1 hour. Prerequisite(s): (ECS 030 or ECS 036B or ECS 034 or EEC 007); (EEC 018 or EEC 180A); (EEC 110B or EEC 157A (can be concurrent) or ECS 060 or (EEC 180B or EEC 180)) Pass One restricted to major. Design and construct an autonomous race car. Work in groups to design, build and test speed control circuits, track sensing circuits, and a steering control loop. GE credit: SE. Effective: 2019 Winter Quarter.
EEC 195B—Autonomous Vehicle Design Project (3)
Laboratory—6 hours; Workshop—1 hour. Prerequisite(s): EEC 195A Design and construct an autonomous race car. Students work in groups to design, build and test speed control circuits, track sensing circuits, and a steering control loop. GE credit: SE. Effective: 2015 Winter Quarter.

EEC 196—Issues in Engineering Design (1)
Seminar—1 hour. Prerequisite(s): Senior standing in Electrical or Computer Engineering. The course covers various electrical and computer engineering standards and realistic design constraints including economic, manufacturability, sustainability, ethical, health and safety, environmental, social, and political. GE credit: SE. Effective: 2008 Fall Quarter.

EEC 197T—Tutoring in Electrical and Computer Engineering (1-3)
Discussion—1 hour; Discussion/Laboratory—2-8 hours. Prerequisite(s): Consent of Instructor. Upper division standing. Tutoring in Electrical and Computer Engineering courses, especially introductory circuits. For upper-division undergraduate students who will provide tutorial assistance. (P/NP grading only.) Effective: 2007 Fall Quarter.

EEC 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. May be repeated up to 3 time(s). (P/NP grading only.) GE credit: SE. Effective: 2007 Fall Quarter.

EEC 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 2007 Fall Quarter.

EEC 201—Digital Signal Processing (4)
Lecture—4 hours. Prerequisite(s): EEC 150B; STA 120 or MAT 131 or MAT 167 recommended. Theory and design of digital filters. Classification of digital filters, linear phase systems, all-pass functions, FIR and IIR filter design methods and optimality measures, numerically robust structures for digital filters. Effective: 2006 Winter Quarter.

EEC 202—Advanced Digital Signal Processing (4)
Review all entries
Lecture—4 hours. Prerequisite(s): EEC 201, EEC 260 and EEC 265, and MAT 167 are recommended. Multirate DSP theory and wavelets, optimal transform and subband coders in data compressions, advanced sampling theory and oversampled A/D converters, transmultiplexers and precoders in digital communication systems, genomic signal processing. Effective: 2006 Spring Quarter.

EEC 202—Advanced Digital Signal Processing (4) Discontinued
Review all entries

EEC 205—Computational Methods in Biomedical Imaging (4)
Lecture—4 hours. Prerequisite(s): (BIM 105 or STA 120); (BIM 108 or EEC 150A) Analytic tomographic reconstruction from projections in 2D and 3D; model-based image reconstruction methods; maximum likelihood and Bayesian methods; applications to CT, PET, and SPECT. (Same course as BIM 252.) Effective: 2011 Fall Quarter.

EEC 206—Digital Image Processing (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): EEC 150B Two-dimensional systems theory, image perception, sampling and quantization, transform theory and applications, enhancement, filtering and restoration, image analysis, and image processing systems. Effective: 1997 Winter Quarter.

EEC 210—MOS Analog Circuit Design (3)
Lecture—3 hours. Prerequisite(s): EEC 110B; EEC 140A Analysis and design of MOS amplifiers, bias circuits, voltage references and other analog circuits. Stability and compensation of feedback amplifiers. Introduction to noise analysis in MOS circuits. Effective: 2016 Winter Quarter.

EEC 211—Advanced Analog Circuit Design (3)
Lecture—3 hours. Prerequisite(s): EEC 210; STA 131A and EEC 112 recommended. Noise and distortion in electronic circuits and systems. Application to communication circuits. Specific applications include mixers, low-noise amplifiers, power amplifiers, phase-locked loops, oscillators and receiver architectures. Effective: 2002 Winter Quarter.

EEC 212—Analog MOS IC Design for Signal Processing (3)
Lecture—3 hours. Prerequisite(s): EEC 210 Analysis and design of analog MOS integrated circuits. Passive

EEC 213—Data-Conversion Techniques and Circuits (3)

EEC 214—Computer-Aided Circuit Analysis and Design (3) Review all entries
Lecture—3 hours. Prerequisite(s): EEC 110A; EEC 110B; And knowledge of FORTRAN or C. Network equation formulations. Nonlinear DC, linear AC, timedomain (both linear and nonlinear), steady-state (nonlinear) and harmonic analysis. DC, AC, and time-domain sensitivities of linear and nonlinear circuits. Gradient-based design optimization. Behavioral simulations. Extensive CAD project. Effective: 1997 Winter Quarter.

EEC 214—Computer-Aided Circuit Analysis and Design (3) Review all entries Discontinued
Lecture—3 hours. Prerequisite(s): EEC 110A; EEC 110B; And knowledge of FORTRAN or C. Network equation formulations. Nonlinear DC, linear AC, timedomain (both linear and nonlinear), steady-state (nonlinear) and harmonic analysis. DC, AC, and time-domain sensitivities of linear and nonlinear circuits. Gradient-based design optimization. Behavioral simulations. Extensive CAD project. Effective: 2000 Winter Quarter.

EEC 215—Circuits for Digital Communications (3)
Lecture—3 hours. Prerequisite(s): EEC 150B; EEC 210 (can be concurrent); EEC 165, EEC 166, or EEC 265 recommended. Analog, digital, and mixed-signal CMOS implementations of communication-circuit blocks: gain control, adaptive equalizers, sampling detectors, clock recovery. Effective: 2000 Fall Quarter.

EEC 216—Low Power Digital Integrated Circuit Design (3) Review all entries

EEC 216—Low Power Digital Integrated Circuit Design (4) Review all entries

EEC 217—Biomedical Electronics (4) Review all entries
Lecture—3 hours; Project (Term Project). Prerequisite(s): EEC 210; or Consent of Instructor. Special consideration and accommodation will be made for biomedical or signal processing majors who have not taken EEC 210. Circuit design for medical applications including weak inversion amplifiers; integrated ULF filters; chopper stabilization; electrochemical interfaces; neurostimulation pulse generation; wireless powering of and communication with implantable devices. Electrophysiological signaling and aspects of signal processing for biomedical systems. Effective: 2013 Spring Quarter.

EEC 217—Biomedical Electronics (4) Review all entries Discontinued
Lecture—3 hours; Project (Term Project). Prerequisite(s): EEC 210; or Consent of Instructor. Special consideration and accommodation will be made for biomedical or signal processing majors who have not taken EEC 210. Circuit design for medical applications including weak inversion amplifiers; integrated ULF filters; chopper stabilization; electrochemical interfaces; neurostimulation pulse generation; wireless powering of and communication with implantable devices. Electrophysiological signaling and aspects of signal processing for biomedical systems. Effective: 2019 Spring Quarter.

EEC 219—Advanced Digital Circuit Design (3) Review all entries

EEC 219—Advanced Digital Circuit Design (3) Review all entries Discontinued
EEC 221—Analog Filter Design (3) Review all entries
Lecture—3 hours. Prerequisite(s): EEC 100; EEC 150A Design of active and passive filters including filter specification and approximation theory. Passive LC filter design will cover doubly-terminated reactance two-port synthesis. Active filter design will include sensitivity, op-amp building blocks, cascade, multi-loop, ladder and active-R filter design. Effective: 1997 Fall Quarter.

EEC 221—Radio Frequency & Microwave Filter Design (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EEC 132A; or Consent of Instructor. Design of radio frequency and microwave filters including filter specification and approximation theory. Passive LC filter design covers doubly-terminated reactance two-port synthesis and coupling matrix based synthesis. Active filter design includes sensitivity, op-amp building blocks, and cascade filter design. Effective: 2019 Fall Quarter.

EEC 222—RF IC Design (3)
Lecture—3 hours. Prerequisite(s): EEC 132C; EEC 210 Radio frequency (RF) solid-state devices, RF device modeling and design rules; non-linear RF circuit design techniques; use of non-linear computer-aided (CAD) tools; RF power amplifier design. Effective: 2004 Winter Quarter.

EEC 223—RF Integrated Circuits for Wireless Communications (4)
Lecture—3 hours; Project (Term Project). Integrated RF front end circuit design of receivers and synthesizers for wireless communications, such as LNA, mixers, PLL; noise and linearity analysis and specifications; theory and working mechanism of synthesizers and phase noise analysis. Effective: 2018 Fall Quarter.

EEC 224—Terahertz and mm-Wave Integrated Circuit Design (4)
Lecture—3 hours; Project (Term Project). Prerequisite(s): EEC 132A; EEC 112; or Consent of Instructor. Fundamental theory of RF transmitter and receiver, including noise analysis, transceiver architectures, and antenna arrays. Fundamental limitations, theory and design of amplifiers, oscillators and signal sources at THz and mm-wave frequencies Effective: 2018 Winter Quarter.

EEC 225—Advanced Microwave Circuit and Device Design Techniques (4)

EEC 226—RF-MEMS and Adaptive Wireless Frontends (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EEC 130A Focuses on the modeling, design, fabrication, and characterization of RF-MEMS while providing a thorough introduction to the technology with an emphasis on how it will benefit the design of adaptive RF/microwave wireless systems. Effective: 2015 Fall Quarter.

EEC 230—Electromagnetics (3)
Lecture—3 hours. Prerequisite(s): EEC 130B Maxwell's equations, plane waves, reflection and refraction, complex waves, waveguides, resonant cavities, and basic antennas. Effective: 2001 Fall Quarter.

EEC 231A—Plasma Physics and Controlled Fusion (3)
Lecture—3 hours. Prerequisite(s): Consent of Instructor. Equilibrium plasma properties; single particle motion; fluid equations; waves and instabilities in a fluid plasma; plasma kinetic theory and transport coefficients; linear and nonlinear Vlasov theory; fluctuations, correlations and radiation; inertial and magnetic confinement systems in controlled fusion. Effective: 2015 Spring Quarter.

EEC 231B—Plasma Physics and Controlled Fusion (3)
Lecture—3 hours. Prerequisite(s): EEC 231A; and Consent of Instructor. Equilibrium plasma properties; single particle motion; fluid equations; waves and instabilities in a fluid plasma; plasma kinetic theory and transport coefficients; linear and nonlinear Vlasov theory; fluctuations, correlations and radiation; inertial and magnetic confinement systems in controlled fusion. Effective: 2015 Spring Quarter.

EEC 231C—Plasma Physics and Controlled Fusion (3)
Lecture—3 hours. Prerequisite(s): EEC 231B; and Consent of Instructor. Equilibrium plasma properties; single particle motion; fluid equations; waves and instabilities in a fluid plasma; plasma kinetic theory and transport coefficients; linear and nonlinear Vlasov theory; fluctuations, correlations and radiation; inertial and magnetic confinement systems in controlled fusion. Effective: 2015 Spring Quarter.

EEC 232A—Advanced Applied Electromagnetics I (3)
Lecture—3 hours. Prerequisite(s): EEC 132B The exact formulation of applied electromagnetic problems using Green's functions. Applications of these techniques to transmission circuits. Effective: 2000 Fall Quarter.
EEC 232B—Advanced Applied Electromagnetics II (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): EEC 132B. An advanced treatment of electromagnetics with applications to passive microwave devices and antennas. Effective: 2000 Fall Quarter.

EEC 233—High Speed Signal Integrity (3)
Lecture—3 hours. Prerequisite(s): EEC 130B. Design and analysis of interconnects in high-speed circuits and subsystems; understanding of high-speed signal propagation and signal integrity concepts; electromagnetic modeling tools and experimental techniques. Effective: 2008 Fall Quarter.

EEC 234A—Physics and Technology of Microwave Vacuum Electron Beam Devices I (4)
Lecture—4 hours. Prerequisite(s): B.S. degree in physics or electrical engineering or the equivalent background. Physics and technology of electron beam emissions, flow and transport, electron gun design, space charge waves and klystrons. Effective: 2015 Fall Quarter.

EEC 234B—Physics and Technology of Microwave Vacuum Electron Beam Devices II (4)
Lecture—4 hours. Prerequisite(s): EEC 234A. Theory and experimental design of traveling wave tubes, backward wave oscillators, and extended interaction oscillators. Effective: 2016 Spring Quarter.

EEC 234C—Physics and Technology of Microwave Vacuum Electron Beam Devices III (4)
Lecture—4 hours. Prerequisite(s): EEC 234B. Physics and technology of gyrotrons, gyro-amplifiers, free electron lasers, magnetrons, crossfield amplifiers and relativistic devices. Effective: 2015 Fall Quarter.

EEC 235—Photonics (4)
Lecture—3 hours; Project (Term Project)—1 hour. Prerequisite(s): EEC 230 (can be concurrent). Optical propagation of electromagnetic waves and beams in photonic components and the design of such devices using numerical techniques. Effective: 2004 Fall Quarter.

EEC 236—Nonlinear Optical Applications (3)
Lecture—3 hours. Prerequisite(s): EEC 130B; EEC 230 (can be concurrent). Nonlinear optical interactions in optical communication, optical information processing and integrated optics. Basic concepts underlying optical nonlinear interactions in materials and guided media. Not open for credit to students who have completed EEC 233. Effective: 2000 Fall Quarter.

EEC 237A—Lasers (3)
Lecture—3 hours. Prerequisite(s): EEC 235; EEC 130B; Or the equivalent of EEC 130B. Not open for credit to students who have completed course 226A. Theoretical and practical description of lasers. Theory of population inversion, amplification and oscillation using semiclassical oscillator model and rate equations. Description and design of real laser system (Not open for credit to students who have completed course 226A.) Effective: 1998 Winter Quarter.

EEC 237B—Laser Physics II (4)

EEC 238—Semiconductor Diode Lasers (3) Review all entries
Lecture—3 hours. Prerequisite(s): EEC 245A. Understanding of fundamental optical transitions in semiconductor and quantum-confined systems are applied to diode lasers and selected photonic devices. The importance of radiative and non-radiative recombination, simulated emission, excitons in quantum wells, and strained quantum layers are considered. Effective: 1998 Spring Quarter.

EEC 238—Semiconductor Lasers & Photonic Integration (4) Review all entries
Lecture—4 hours. Prerequisite(s): EEC 140A. Understanding of fundamental optical transitions in semiconductors and quantum-confined systems are applied to diode & unipolar lasers and selected photonic devices. The importance of radiative and non-radiative recombination, simulated emission, excitons in quantum wells, and strained quantum layers are considered. Photonic integrated circuits based on active (with optical gain) and passive (without optical gain). Effective: 2019 Fall Quarter.

EEC 239A—Optical Fiber Communications Technologies (4) Review all entries
Lecture—4 hours. Prerequisite(s): EEC 130B. Physical layer issues for component and system technologies in optical fiber networks. Sources of physical layer impairments and limitations in network scalability. Enabling technologies

**EEC 239A—Optical Communication Technologies for High-Speed Data Networking (4) Review all entries**

**EEC 239B—Optical Fiber Communications Systems and Networking (4) Review all entries**

**EEC 240—Semiconductor Device Physics (3)**

Lecture—3 hours. Prerequisite(s): EEC 140B Physical principles, characteristics and models of fundamental semiconductor device types, including P-N and Schottky diodes, MOSFETs and MESFETs Bipolar Junction Transistors, and light emitters/detectors. Effective: 1998 Fall Quarter.

**EEC 241—Introduction to Molecular Electronics (4)**

**EEC 242—Advanced Nanostructured Devices (3)**

Lecture—3 hours. Prerequisite(s): EEC 130A; EEC 140A Physics of nano-structured materials and device operation. Overview of new devices enabled by nanotechnology; fabrication and characterization methods; applications of nano-structures and devices. Effective: 2005 Fall Quarter.

**EEC 244A—Design of Microelectromechanical Systems (MEMS) (3)**

Lecture—3 hours. Prerequisite(s): EEC 140A; EEC 140B; or Consent of Instructor. Theory and practice of MEMS design. Micromechanical fundamentals, CAD tools, and case studies. A MEMS design project is required. The designs will be fabricated in a commercial foundry and tested in course 244B. Effective: 1997 Fall Quarter.

**EEC 244B—Microsciences (4)**

Lecture/Discussion—4 hours. Introduction to the theory of physical and chemical principles at the microscale. Scale effects, surface tension, microfluidic mechanics, micromechanical properties, intermolecular interactions and microtribology. (Same course as BIM 218.) Effective: 2011 Fall Quarter.

**EEC 245—Micro- and Nano-Technology in Life Sciences (4) Review all entries**

Lecture/Discussion—4 hours. Prerequisite(s): Graduate standing or consent of instructor. Survey of biomedical device design from the engineering and biological perspectives; micro-/nano-fabrication and characterization techniques; surface chemistry and mass transfer; essential biological processes and models; proposal development skills to merge aforementioned themes in a multidisciplinary project. (Same course as ECH 245 and EMS 245.) Effective: 2016 Winter Quarter.

**EEC 245—Micro- and Nano-Technology in Life Sciences (4) Review all entries**

Lecture/Discussion—4 hours. Prerequisite(s): Graduate standing or consent of instructor. Survey of biodevice design from engineering and biological perspectives; micro-/nano-fabrication techniques; surface science and mass transport; essential biological processes and models; proposal development skills on merging aforementioned themes. (Same course as ECH 245, EMS 245, and MAE 245.) Effective: 2019 Winter Quarter.
EEC 246—Advanced Projects in IC Fabrication (3)
Discussion—1 hour; Laboratory—6 hours. Prerequisite(s): EEC 146B Individualized projects in the fabrication of analog or digital integrated circuits. Effective: 1997 Winter Quarter.

EEC 247—Advanced Semiconductor Devices (4)
Lecture—3 hours; Project (Term Project). Prerequisite(s): Graduate standing in Engineering. Semiconductor devices, including MOSFETs, heterojunction transistors, light-emitting diodes, lasers, sensors, detectors, power and high-voltage transistors, MEMS resonators, organic semiconductors and photovoltaics. All material is from recent literature, encouraging students to utilize search methods and critically assess the latest research. Effective: 2011 Fall Quarter.

EEC 248—Photovoltaics and Solar Cells (3)
Lecture—3 hours. Prerequisite(s): EEC 140B; or Consent of Instructor. Or equivalent. Physics and application of photovoltaics and solar cells, including design, fabrication technology, and grid incorporation. Mono and microcrystalline silicon devices; thin-film technologies, heterojunction and organic-semiconductor technologies. Collectors, electrical inverters and infrastructure issues. Challenges and concerns. (Same course as EMS 246.) Effective: 2014 Fall Quarter.

EEC 249—Nanofabrication (3)
Lecture—3 hours. Prerequisite(s): Graduate standing in Engineering. Theory and practices of nanofabrication used for producing ICs, electronic devices, optoelectronics, sensors, and microstructures. Major topics include electron-, photon-, and ion-beams and their interactions with solids, chemical vapor depositions, plasma processing and micromachining. Effective: 2014 Winter Quarter.

EEC 250—Linear Systems and Signals (4)

EEC 251—Nonlinear Systems (3)

EEC 252—Multivariable Control System Design (3)
Lecture—3 hours. Prerequisite(s): EEC 250 Modern control system design, theory, and techniques. Topics will include single-loop feedback design; stability, performance and robustness of multivariable control systems; LQG design; H-infinity design; frequency response methods; and optimization-based design. Effective: 2005 Fall Quarter.

EEC 254—Optimization (3)
Lecture—3 hours. Prerequisite(s): MAT 022A; Knowledge of FORTRAN or C. Modeling optimization problems in engineering design and other applications; optimality conditions; unconstrained optimization (gradient, Newton, conjugate gradient and quasi-Newton methods); duality and Lagrangian relaxation constrained optimization. (Primal method and an introduction to penalty and augmented Lagrangian methods.) Effective: 1997 Winter Quarter.

EEC 255—Robotic Systems (3)

EEC 256—Stochastic Optimization in Dynamic Systems (4)
Lecture—4 hours. Prerequisite(s): EEC 260; Or the equivalent. Markov Decision Processes (MDP), dynamic programming, multi-armed bandit, Partially observable MDP, optimal stopping, stochastic scheduling, sequential detection and quickest change detection, competitive MDP and game theory, applications in dynamic systems such as queueing networks, communication systems, and multi-agent systems. Effective: 2012 Spring Quarter.

EEC 260—Random Signals and Noise (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): STA 120; EEC 150A; EEC 250 recommended. Random processes as probabilistic models for signals and noise. Review of probability, random variables, and expectation. Study of correlation function and spectral density, ergodicity and duality between time averages and expected values, filters and dynamical systems. Applications. Effective: 1997 Winter Quarter.
EEC 261—Signal Processing for Communications (4)
Lecture—4 hours. Prerequisite(s): EEC 165; EEC 260; or Consent of Instructor. Signal processing in wireless and wireline communication systems. Characterization and distortion of wireless and wireline channels. Channel equalization and maximum likelihood sequence estimation. Channel precoding and pre-equalization. OFDM and transmit diversity. Array processing. Effective: 2003 Spring Quarter.

EEC 262—Multi-access Communications Theory (4)
Lecture—3 hours; Project (Term Project). Prerequisite(s): (EEC 173A or ECS 152A); STA 120; Or equivalent of STA 120. Maximum stable throughput of Poisson collision channels. Classic collision resolution algorithms. Carrier sensing multiple access and its performance analysis. System stability analysis. Joint design of the physical/medium access control layers. Capacity region of multi-access channels. Multi-access with correlated sources. Effective: 2006 Spring Quarter.

EEC 263—Optimal and Adaptive Filtering (4)

EEC 264—Estimation and Detection of Signals in Noise (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EEC 260 Introduction to parameter estimation and detections of signals in noise. Bayes and Neyman-Pearson likelihood-ratio tests for signal detection. Maximum-likelihood parameter estimation. Detection of known and Gaussian signals in white or colored noise. Applications to communications, radar, signal processing. Effective: 2007 Fall Quarter.

EEC 265—Principles of Digital Communications (4)

EEC 266—Information Theory and Coding (3)
Lecture—3 hours. Prerequisite(s): STA 120 Information theory and coding. Measure of information. Redundancy reduction encoding of an information source. Capacity of a communication channel, errorfree communications. Effective: 1997 Winter Quarter.

EEC 267—Mobile Communications (4)
Lecture/Lab—3 hours. Prerequisite(s): EEC 260; EEC 265 (can be concurrent) Time-varying multi-path fading channel models and receiver performance in fading channels; multiple access techniques and multiple access receivers design and performance; optimum design and the capacity of wireless channels. Effective: 2013 Spring Quarter.

EEC 269A—Error Correcting Codes I (3)
Lecture—3 hours. Prerequisite(s): MAT 022A; EEC 160 Introduction to the theory and practice of block codes, linear block codes, cyclic codes, decoding algorithms, coding techniques. Effective: 2001 Fall Quarter.

EEC 269B—Error Correcting Codes II (3)
Lecture—3 hours. Prerequisite(s): EEC 165; EEC 269A Introduction to convolutional codes, turbo codes, trellis and block coded modulation codes,soft-decision decoding algorithms, the Viterbi algorithm, reliability-based decoding, trellis-based decoding, multistage decoding. Effective: 2002 Spring Quarter.

EEC 270—Computer Architecture (3)
Lecture—3 hours. Prerequisite(s): EEC 170 or ECS 154B Introduction to modern techniques for high-performance single and multiple processor systems. Topics include advanced pipeline design, advanced memory hierarchy design, optimizing pipeline and memory use, and memory sharing among multiprocessors. Case studies of recent single and multiple processor systems. Effective: 1999 Winter Quarter.

EEC 272—High-Performance Computer Architecture (4)
Lecture—4 hours. Prerequisite(s): EEC 270 or ECS 201A Designing and analysis of high performance computer architecture with emphasis on vector processing, on-chip interconnect networks, chip-level multiprocessors, memory and storage subsystem design and impact of technological advances on computer architecture. Effective: 2015 Spring Quarter.
EEC 273—Networking Architecture and Resource Management (4)
Lecture—3 hours; Project (Term Project). Prerequisite(s): ECS 152A or EEC 173A Pass One and Pass Two open to Graduate Students in Computer Science and Electrical and Computer Engineering only. Concepts and design principles of computer networks. Network architectures, protocol mechanisms and implementation principles (transport/network/data-link layers), network algorithms, router mechanisms, design requirements of applications, network simulation, modeling and performance analysis. (Same course as ECS 258.) Effective: 2016 Fall Quarter.

EEC 274—Internet Measurements, Modeling and Analysis (4)
Lecture—3 hours; Project (Term Project). Prerequisite(s): ECS 252 or EEC 273 Advanced topics in the theoretical foundations of network measurements, modeling, and statistical inferencing. Applications to Internet engineering, routing optimization, load balancing, traffic engineering, fault tolerance, anomaly detection, and network security. Individual project requirement. Effective: 2007 Winter Quarter.

EEC 276—Fault-Tolerant Computer Systems: Design and Analysis (3)
Lecture—3 hours. Prerequisite(s): EEC 170; EEC 180A Introduces fault-tolerant digital system theory and practice. Covers recent and classic fault-tolerant techniques based on hardware redundancy, time redundancy, information redundancy, and software redundancy. Examines hardware and software reliability analysis, and example fault-tolerant designs. Not open for credit to students who have completed EEC 276A. Effective: 1997 Fall Quarter.

EEC 276—Fault-Tolerant Computer Systems: Design and Analysis (3) Review all entries
Lecture—3 hours. Prerequisite(s): EEC 170; (EEC 018 or EEC 180A) Introduces fault-tolerant digital system theory and practice. Covers recent and classic fault-tolerant techniques based on hardware redundancy, time redundancy, information redundancy, and software redundancy. Examines hardware and software reliability analysis, and example fault-tolerant designs. Not open for credit to students who have completed EEC 276A. Effective: 2019 Winter Quarter.

EEC 277—Graphics Architecture (3)
Lecture—3 hours. Prerequisite(s): (ECS 154B or EEC 170); ECS 175 Design and analysis of the architecture of computer graphics systems. Topics include the graphics pipeline with a concentration on hardware techniques and algorithms, exploiting parallelism in graphics, and case studies of noteworthy and modern graphics architectures. Effective: 2004 Winter Quarter.

EEC 278—Computer Arithmetic for Digital Implementation (3) Review all entries
Lecture—3 hours. Prerequisite(s): EEC 170; EEC 180A The design and implementation of computer arithmetic logic units are studied with particular emphasis on high-speed performance requirements. Addition (subtraction), multiplication and division operations are covered, and fixed and floating-point representations are examined. Effective: 1997 Winter Quarter.

EEC 278—Computer Arithmetic for Digital Implementation (3) Review all entries
Lecture—3 hours. Prerequisite(s): EEC 170; (EEC 018 or EEC 180A) Design and implementation of computer arithmetic logic units are studied with particular emphasis on high-speed performance requirements. Addition (subtraction), multiplication and division operations are covered, and fixed and floating-point representations are examined. Effective: 2019 Winter Quarter.

EEC 278—Computer Arithmetic for Digital Implementation (3) Review all entries Discontinued
Lecture—3 hours. Prerequisite(s): EEC 170; (EEC 018 or EEC 180A) Design and implementation of computer arithmetic logic units are studied with particular emphasis on high-speed performance requirements. Addition (subtraction), multiplication and division operations are covered, and fixed and floating-point representations are examined. Effective: 2019 Spring Quarter.

EEC 279—Modern Parallel Computing (3)
Lecture—3 hours. Prerequisite(s): ECS 036B or ECS 034; optional but desirable: EEC 170 or ECS 154A. Exploration of the architecture of modern parallel computers, their programming models, and their programming systems. Effective: 2019 Spring Quarter.

EEC 281—VLSI Digital Signal Processing (4) Review all entries
Lecture—3 hours; Project (Term Project). Prerequisite(s): EEC 150B; EEC 170; EEC 180B; or Consent of Instructor. Digital signal processors, building blocks, and algorithms. Design and implementation of processor algorithms, architectures, control, functional units, and circuit topologies for increased performance and reduced circuit size and power dissipation. Effective: 2011 Spring Quarter.

EEC 281—VLSI Digital Signal Processing (4) Review all entries
Lecture—3 hours; Project (Term Project). Prerequisite(s): EEC 150B; EEC 170; (EEC 180 or EEC 180B); or Consent of
Instructor. Digital signal processors, building blocks, and algorithms. Design and implementation of processor algorithms, architectures, control, functional units, and circuit topologies for increased performance and reduced circuit size and power dissipation. Effective: 2019 Winter Quarter.

**EEC 282—Hardware Software Codesign (3)** [Review all entries]
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): EEC 170; EEC 180B Specification and design of embedded systems; modeling and performance estimation; hardware/software partitioning; co-simulation; design re-use; platform-based design; reconfigurable computing. Effective: 2003 Spring Quarter.

**EEC 282—Hardware Software Codesign (3)** [Review all entries]
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): EEC 170; (EEC 180 or EEC 180B) Specification and design of embedded systems; modeling and performance estimation; hardware/software partitioning; co-simulation; design re-use; platform-based design; reconfigurable computing. Effective: 2019 Winter Quarter.

**EEC 282—Hardware Software Codesign (3)** [Review all entries Discontinued]
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): EEC 170; (EEC 180 or EEC 180B) Specification and design of embedded systems; modeling and performance estimation; hardware/software partitioning; co-simulation; design re-use; platform-based design; reconfigurable computing. Effective: 2019 Winter Quarter.

**EEC 283—Advanced Design Verification of Digital Systems (4)** [Review all entries]
Lecture—3 hours; Project (Term Project)—1 hour. Prerequisite(s): EEC 170; EEC 180A Design verification techniques for digital systems; simulation-based design verification techniques; formal verification techniques, including equivalence checking, model checking, and theorem proving; timing analysis and verification; application of design certification techniques to microprocessors. Effective: 2000 Winter Quarter.

**EEC 283—Advanced Design Verification of Digital Systems (4)** [Review all entries]
Lecture—3 hours; Project (Term Project)—1 hour. Prerequisite(s): EEC 170; (EEC 018 or EEC 180A) Design verification techniques for digital systems; simulation-based design verification techniques; formal verification techniques, including equivalence checking, model checking, and theorem proving; timing analysis and verification; application of design certification techniques to microprocessors. Effective: 2019 Spring Quarter.

Lecture—4 hours. Prerequisite(s): EEC 170; EEC 180B; or Consent of Instructor. ECS 122A recommended. Introduction to design and optimization of digital computing systems for embedded applications. Topics include combinatorial optimization techniques, performance and energy optimization in embedded systems, compilation and architecture-specific mapping, programmable and reconfigurable platforms; design automation and algorithmic improvements to design process. Effective: 2007 Winter Quarter.

Lecture—4 hours. Prerequisite(s): EEC 170; (EEC 180 or EEC 180B); or Consent of Instructor. ECS 122A recommended. Introduction to design and optimization of digital computing systems for embedded applications. Topics include combinatorial optimization techniques, performance and energy optimization in embedded systems, compilation and architecture-specific mapping, programmable and reconfigurable platforms; design automation and algorithmic improvements to design process. Effective: 2019 Winter Quarter.

**EEC 286—Introduction to Digital System Testing (3)** [Review all entries]
Lecture—3 hours. Prerequisite(s): EEC 180A; (STA 120 or STA 131A) A review of several current techniques used to diagnose faults in both combinational and sequential circuits. Topics include path sensitization procedures, Boolean difference, D-algorithm random test generation, TC testing and an analysis of the effects of intermittent faults. Not open for credit to students who have completed EEC 276A. Effective: 1998 Winter Quarter.

**EEC 286—Introduction to Digital System Testing (3)** [Review all entries]
Lecture—3 hours. Prerequisite(s): (STA 120 or STA 131A); (EEC 018 or EEC 180A) Review of several current techniques used to diagnose faults in both combinational and sequential circuits. Topics include path sensitization procedures, Boolean difference, D-algorithm random test generation, TC testing and an analysis of the effects of intermittent faults. Not open for credit to students who have completed EEC 276A. Effective: 1998 Winter Quarter.

**EEC 289A—Special Topics in Electrical and Computer Engineering; Computer Science (1-5)**
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Computer Science. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

**EEC 289B—Special Topics in Electrical and Computer Engineering; Programming Systems (1-5)**
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Programming Systems. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.
EEC 289C—Special Topics in Electrical and Computer Engineering; Digital Systems (1-5)
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Digital Systems. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289D—Special Topics in Electrical and Computer Engineering; Digital Systems (1-5)
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Digital Systems. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289E—Special Topics in Electrical and Computer Engineering; Signal Transmission (1-5)
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Signal Transmission. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289F—Special Topics in Electrical and Computer Engineering; Digital Communication (1-5)
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Digital Communication. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289G—Special Topics in Electrical and Computer Engineering; Control Systems (1-5)
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Control Systems. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289H—Special Topics in Electrical and Computer Engineering; Robotics (1-5)
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Robotics. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289I—Special Topics in Electrical and Computer Engineering; Signal Processing (1-5)
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Signal Processing. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289J—Special Topics in Electrical and Computer Engineering; Image Processing (1-5)
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Image Processing. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289K—Special Topics in Electrical and Computer Engineering; High Frequency Phenomena and Devices (1-5)
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in High Frequency Phenomena and Devices. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289L—Special Topics in Electrical and Computer Engineering; Solid-State Devices and Physical Electronics (1-5)
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Solid-State Devices and Physical Electronics. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289M—Special Topics in Electrical and Computer Engineering; Systems Theory (1-5)
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Systems Theory. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289N—Special Topics in Electrical and Computer Engineering; Active and Passive Circuits (1-5)
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Active and Passive Circuits. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289O—Special Topics in Electrical and Computer Engineering; Integrated Circuits (1-5)
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Integrated Circuits. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289P—Special Topics in Electrical and Computer Engineering; Computer Software (1-5)
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Computer Software. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289Q—Special Topics in Electrical and Computer Engineering; Computer Engineering (1-5)
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Computer Engineering. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289R—Special Topics in Electrical and Computer Engineering; Microprocessing (1-5)
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Microprocessing. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.
EEC 289S—Special Topics in Electrical and Computer Engineering; Electronics (1-5)
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Electronics. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289T—Special Topics in Electrical and Computer Engineering; Electromagnetics (1-5)
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Electromagnetics. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289U—Special Topics in Electrical and Computer Engineering; Optoelectronics (1-5)
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Optoelectronics. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289W—Special Topics in Electrical and Computer Engineering; Computer Networks (1-5)
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Computer Networks. May be repeated for credit when topic differs. Effective: 2018 Winter Quarter.

EEC 290—Seminar in Electrical and Computer Engineering (1)
Seminar—1 hour. Discussion and presentation of current research and development in Electrical and Computer Engineering. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

EEC 290C—Graduate Research Group Conference in Electrical and Computer Engineering (1)
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Research problems, progress, and techniques in electrical and computer engineering. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

EEC 290P—Capstone Project For MS Plan II (4)
Extensive Problem Solving; Lecture—1 hour; Term Paper. Prerequisite(s): Consent of Instructor. Conducting research projects in electrical and computer engineering. Communicating research results in written reports and oral presentations. Systemic project implementation to answer a comprehensive scientific or technical question in the area of electrical and computer engineering. (S/U grading only.) Effective: 2019 Spring Quarter.

EEC 291—Solid-State Circuit Research Laboratory Seminar (1)
Seminar—1 hour. Prerequisite(s): Graduate standing. Lectures on solid-state circuit and system design by various visiting experts in the field. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

EEC 292—Seminar in Solid-State Technology (1)
Seminar—1 hour. Prerequisite(s): Graduate standing. Lectures on solid-state technology by various visiting experts in the field. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

EEC 293—Computer Engineering Research Seminar (1)
Seminar—1 hour. Prerequisite(s): Graduate standing or consent of instructor. Lectures, tutorials and seminars on topics in computer engineering. May be repeated up to 4 time(s). (S/U grading only.) Effective: 2000 Winter Quarter.

EEC 294—Communications, Signal and Image Processing Seminar (1)
Seminar—1 hour. Prerequisite(s): Graduate standing. Communications, signal and image processing, video engineering and computer vision. May be repeated for credit. (S/U grading only.) Effective: 2003 Winter Quarter.

EEC 295—Systems, Control and Robotics Seminar (1)
Seminar—1 hour. Prerequisite(s): Graduate standing. Seminars on current research in systems and control by faculty and visiting experts. Technical presentations and lectures on current topics in robotics research and robotics technology. May be repeated for credit. (S/U grading only.) Effective: 1998 Winter Quarter.

EEC 296—Photonics Research Seminar (1)
Seminar—1 hour. Prerequisite(s): Graduate standing. Lectures on photonics and related areas by faculty and visiting experts. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 1998 Winter Quarter.

EEC 298—Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

EEC 299—Research (1-12)
Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

EEC 390—The Teaching of Electrical Engineering (1)
Discussion—1 hour. Prerequisite(s): Meet qualifications for teaching assistant and/or associate-in in Electrical Engineering. Participation as a teaching assistant or associate-in in a designated engineering course. Methods of
leading discussion groups or laboratory sections, writing and grading quizzes, use of laboratory equipment, and grading laboratory reports. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

EEC 396—Teaching Assistant Training Practicum (1-4)
Variable. Prerequisite(s): Graduate standing. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

The Electrical and Computer Engineering Undergraduate Programs

The department administers two undergraduate curricula in the College of Engineering: (1) the Electrical Engineering curriculum and (2) the Computer Engineering curriculum.

Integrated Degree Program (IDP). The IDP leads to both the Bachelor of Science and the Master of Science degrees. The program provides a student the opportunity to obtain superior breadth and depth of technical material. The IDP program in the Department of Electrical and Computer Engineering is available only to UC Davis undergraduates with strong academic records enrolled in the Electrical Engineering, Computer Engineering, Electronic Materials Engineering or Applied Physics curricula. Applicants in their junior year must apply for the IDP by March 31. For more information on IDP, see http://www.ece.ucdavis.edu.

Mission. Under its land grant status, the University of California has a mission to provide the state with the trained workforce it needs and to advance knowledge and research in directions that contribute to the general welfare of the state and the nation. The Department of Electrical and Computer Engineering contributes to the mission of the University in three ways. First, its undergraduate and graduate education programs seek to provide students with an understanding of the fundamental principles of electrical and computer engineering, the skills needed to solve the complex technological problems of modern society and the ability to continue to learn and develop throughout their careers. Second, through its research programs, the department contributes to the development and progress of electronics, communications, and computer technology. Finally, the department helps to transfer research results to industry through publication, public service and professional activities.

Objectives. Teaching—To provide undergraduate students with sufficient breadth to allow them to participate in teams, continue their own education after graduation and select a focus area intelligently; to provide undergraduate students with sufficient depth in a narrower discipline to allow them to develop the ability to solve complex engineering problems; to educate the students in the graduate program to be leaders in industry or to do meaningful research in industry, government or academia. Research—To develop and maintain research programs that produce useful technological advances while simultaneously training the next generation of researchers and leaders; to update and/or shift the foci of these programs frequently in response to the needs of our constituency
and the nation; to provide a stimulating environment that encourages our graduate students to develop their abilities as far as possible.

**Electrical Engineering Undergraduate Program**

The Electrical Engineering program is accredited by the Engineering Accreditation Commission of ABET; see [http://www.abet.org](http://www.abet.org).

Electrical engineering involves the design, analysis, and effective use of electrical systems including electronic computers. Electrical systems and computers play a central role in nearly all aspects of modern life, including communication, medicine, education, environmental protection, space exploration, defense, and home entertainment.

Students who complete the Electrical Engineering curriculum will obtain a Bachelor of Science in Electrical Engineering, one of the engineering degrees recognized in all fifty states as eligible for registration as a Professional Engineer.

**Objectives.** The Electrical Engineering program has adopted the following objectives to serve the long-term interests of our students and the industries of Northern California and the nation. *Foundation*—To provide our graduates with a solid foundation in engineering science, including mathematics, physical science, and the fundamentals of electrical engineering. This foundation is necessary to succeed in more advanced engineering courses and to be able to continue learning throughout a career. *Breadth*—To provide our graduates the sufficient breadth in electrical engineering in order to understand engineering tradeoffs that cross disciplines, to contribute effectively to multidisciplinary projects and to make an informed decision about their area of specialization. *Depth*—To provide our graduates with sufficient depth in a specific area of electrical engineering necessary to solve complex real-world engineering problems and to contribute to a specific discipline within electrical engineering. *Ethics*—To provide our graduates with a basic understanding of, and ability to handle correctly, ethical problems that may arise during their careers. To provide them with an understanding of their obligations to society at large.

Exclusive of General Education units, the minimum number of units for the Electrical Engineering major is 146. Students are encouraged to adhere carefully to all prerequisite requirements. The instructor is authorized to drop students from a course for which stated prerequisites have not been completed.

**Electrical Engineering Curriculum**

**Areas of Specialization**

For updated recommended courses, see the department website at [http://www.ece.ucdavis.edu/undergrad/undergradhandbook.html](http://www.ece.ucdavis.edu/undergrad/undergradhandbook.html).

**Physical Electronics:** Solid-state devices, circuits and fabrication and the theory courses supporting those subjects.

- Recommended elective courses:
  - Core electives: Electrical and Computer Engineering 130B, 140B
  - Design Electives with Lab: Electrical and Computer Engineering 118, or 132A, 132B or 135. Select remaining upper-division design electives from Electrical and Computer Engineering 110B, 146A, 146B
  - Technical electives: Electrical and Computer Engineering 112, 180

  **Suggested Advisors.** S. Chowdhury, E. Seker, J. Hihath, C.E. Hunt, S. Islam, J.M. Woodall

**Electromagnetics:** Microwave circuits and systems, and fiber optical systems.

- Recommended elective courses:
  - Core electives: Electrical and Computer Engineering 130B, 140B
  - Design Electives with Lab: Electrical and Computer Engineering 132A, 132B. Select remaining upper division design electives from Electrical and Computer Engineering 110B, 132C, 135
  - Technical electives: Select from Electrical and Computer Engineering 112 and 133

  **Suggested Advisors.** G.R. Branner, A. Knoesen, X. Liu, N. Luhmann, O. Momeni, A. Pham, B. Yoo

Analog Electronics: Transistor- and system-level analog circuit design.

**Recommended elective courses:**

Core electives: Electrical and Computer Engineering 110B, 140B, 150B

Design Electives with Lab: at least two from Electrical and Computer Engineering 112, 157A, 165, 195A-195B

Technical electives: Select from Electrical and Computer Engineering 130B, 146A

**Suggested Advisors.** R. Amirtharajah, Q.J. Gu, P.J. Hurst, S.H. Lewis, O. Momeni

Digital Electronics: Transistor- and system-level digital circuit design.

**Recommended elective courses:**

Core electives: Electrical and Computer Engineering 110B, 140B, 150B

Design Electives with Lab: Electrical and Computer Engineering 118 and 180 or 172 or 183 or 195A-195B

Select remaining upper division design electives from Electrical and Computer Engineering 116, 170 or 171

Technical electives: Select from Electrical and Computer Engineering 130B and 112 or 146A or 157A or 160 or 210

**Suggested Advisors.** R. Amirtharajah, P.J. Hurst, S.H. Lewis

Communication Controls and Signal Processing: Digital communication, robotics, classical controls and communication, wireless and cellular digital communication systems, signal and image processing, and computer vision.

**Recommended elective courses:**

Core electives: Electrical and Computer Engineering 150B, 180

Design Electives with lab: Electrical and Computer Engineering 157A and 157B or 165

Select remaining upper division design electives from Electrical and Computer Engineering 160

Technical Electives: Select from Electrical and Computer Engineering 112, 195A-195B

**Suggested Advisors.** S. Cui, Z. Ding, A.N. Gündes, B.C. Levy

- ENG 160 Environmental Physics and Society 3
- ENG 190 Professional Responsibilities of Engineers 3
- ECS 188 Ethics in an Age of Technology 4

**Upper-Division Electives**

Choose at least eight courses for a minimum of 32 units:

After completion of the upper division elective requirement (at least 8 courses, 2 core, 2 with labs, 1 project) any units in excess of 32 will count toward the Technical Elective requirement.

Two Core Electives:

A maximum of one course appearing on both the Core Elective list and the Design Elective list may be counted in both categories.

- EEC 165 Statistical and Digital Communication 4
- EEC 172 Embedded Systems 4
- EEC 180 Digital Systems II 5
- EEC 183 Testing and Verification of Digital Systems 5

Choose at least one Design Project course:

All Design Project courses are also considered Design Laboratory courses and may be counted in both categories simultaneously.

- EEC 119A Integrated Circuit Design Project 3
- EEC 119B Integrated Circuit Design Project 3
- EEC 134A RF/Microwave Systems Design 3
- EEC 134B RF/Microwave Systems Design 3
- EEC 136A Electronic Design Project 3
- EEC 136B Electronic Design Project 3
- EEC 181A Digital Systems Design Project 3
- EEC 181B Digital Systems Design Project 3
- EEC 193A Senior Design Project 3
- EEC 193B Senior Design Project 3
- EEC 195A Autonomous Vehicle Design Project 3
- EEC 195B Autonomous Vehicle Design Project 3

The remaining electives may be any letter-graded upper division Electrical and Computer Engineering course not used to satisfy another major requirement:

- ECS 040 Software Development and Object-Oriented Programming (Discontinued) 4
- ECS 150 Operating Systems and System Programming 4
- ECS 152B Computer Networks 4
- ECS 163 Information Interfaces 4
- ECS 175 Computer Graphics 4
- ECS 177 Scientific Visualization 4
- ECS 178 Geometric Modeling 4

Technical Electives

After completion of the upper division elective requirement (at least 8 courses, 2 core, 2 with labs, 1 project) any units in excess of 32 will count toward the technical elective requirement.

CHE 002B, 002C and any upper-division course; except CHE 195, 197.
ENG 035, 045, and any upper-division engineering course not used in satisfaction of core degree requirements, excluding ENG 100, 160, 190 (each restricted to one unit of technical elective), 198, ECS 132, 155, 157, 188, 154A, & 154B (ECS 154AB courses may be used by EEEL majors who did not take EEC 170).

A maximum of 6 units for any combination of engineering courses numbered 190C, 192, 198, and 199 may be used.
**Mathematics:**
Any upper-division course except MAT 135A & 197TC.

**Physics:**
Any upper-division PHY course, except 116, 137, 160 (restricted to one unit of technical elective), 195, 197T.

**Statistics:**
Any upper-division course, except STA 100, 102, 103, 104, 106, 108, 120, 130A.

Faculty. http://www.ece.ucdavis.edu/people/faculty/

Electrical Engineering Minor

There has been an increasing need for professionals in most engineering disciplines to understand the fundamentals of electronic circuits, electronic signals, semiconductor devices, applied electromagnetics, control systems, computer systems, and communication systems.

The objective of this minor program is to prepare students with the necessary theoretical and practical training in one or many of the above mentioned fields. The minor program curriculum is designed to allow flexibility while ensuring a solid foundation of fundamental electrical engineering concepts. The program is expected to accommodate students of diverse backgrounds.

The minor must be outside the department or program of your major and no more than one course may be counted toward both your minor and your major. The courses you take to satisfy the requirements of a minor, including those completed elsewhere, must be approved by an advisor in the Department of Electrical and Computer Engineering. You must have a minimum overall GPA of 2.000 and satisfy the minor course requirements, listed below. To receive notation of this minor on your diploma, you must obtain a minor petition and file it no later than the deadline for filing for graduation.

Choose at least one of the following combinations:

Analog circuits:

- EEC 110A  Electronic Circuits I 4
- EEC 110B  Electronic Circuits II 4

Electromagnetics:

- EEC 130A  Electromagnetics I 4
- EEC 130B  Introductory Electromagnetics II 4

Physical Electronics:

- EEC 140A  Principles of Device Physics I 4
- EEC 140B  Principles of Device Physics II 4

Signals and Systems:

- EEC 150A  Introduction to Signals and Systems I 4
- EEC 150B  Introduction to Signals and Systems II 4

Communication:

- EEC 150A  Introduction to Signals and Systems I 4
- EEC 160   Signal Analysis and Communications 4

Control Systems:

- EEC 150A  Introduction to Signals and Systems I 4
- EEC 157A  Control Systems 4

Digital Systems:

- EEC 018   Digital Systems I 5
- EEC 180   Digital Systems II 5

Total: 146
Choose at least eight additional units of EEC courses numbered 101 or above; except 190, 192, 196, 197, 198, 199, 298, 299, 390, 396. If you elect to do a design project, you must be registered for both quarters.

Total: 21

**Electrical Engineering; Electrical & Computer Engineering | EEC Courses**

**Courses in EEC:**

**EEC 001—Introduction to Electrical and Computer Engineering (1)**
Lecture—1 hour. Electrical and Computer Engineering as a professional activity. What Electrical and Computer Engineers know and how they use their knowledge. (P/NP grading only.) GE credit: SE. Effective: 2012 Fall Quarter.

**EEC 007—Introduction to Programming and Microcontrollers (4)**
Laboratory—2 hours; Lecture—3 hours. Pass One restricted to Electrical Engineering majors only. Programming computers using C/C++ languages. Software engineering and object-oriented design. Programming for hardware devices. Only two units of credit for students who have previously taken ECS 036A or ECS 032A. Effective: 2019 Winter Quarter.

**EEC 010—Introduction to Digital and Analog Systems (4)**
Laboratory—3 hours; Lecture—2 hours; Project (Term Project). Prerequisite(s): EEC 030; (PHY 009C (can be concurrent) or PHY 009HD (can be concurrent)); and Consent of Instructor. Open to Electrical and Computer Engineering sophomores. Interactive and practical introduction to fundamental concepts of electrical and computer engineering by implementing electronic systems, which can be digitally controlled and interrogated, with a programmable microcontroller with the ability to program the electrical connections between analog and digital components. GE credit: SE. Effective: 2019 Winter Quarter.

**EEC 018—Digital Systems I (5)**
Laboratory—4 hours; Lecture—3 hours. Prerequisite(s): ENG 017 Introduction to digital system design including combinational logic design, sequential and asynchronous circuits, computer arithmetic, memory systems and algorithmic state machine design; computer aided design (CAD) methodologies and tools. No credit to students who have previously completed EEC 180A. Effective: 2019 Winter Quarter.

**EEC 089A—Special Topics in Electromagnetics (1-5)**
Variable—1.5 hours. Prerequisite(s): Consent of Instructor. Special topics in Electromagnetics. May be repeated for credit if topic differs. GE credit: SE. Effective: 2011 Winter Quarter.

**EEC 089B—Special Topics in Physical Electronics (1-5)**
Variable. Prerequisite(s): Consent of Instructor. Special topics in Physical Electronics. May be repeated for credit if topic differs. GE credit: SE. Effective: 2011 Winter Quarter.

**EEC 089C—Special Topics in Active and Passive Circuits (1-5)**
Variable. Prerequisite(s): Consent of Instructor. Special topics in Active and Passive Circuits. May be repeated for credit if topic differs. GE credit: SE. Effective: 2011 Winter Quarter.

**EEC 089D—Special Topics in Signals and Systems (1-5)**
Variable. Prerequisite(s): Consent of Instructor. Special topics in Signals and Systems. May be repeated for credit if topic differs. GE credit: SE. Effective: 2011 Winter Quarter.

**EEC 089E—Special Topics in Computer Systems and Software (1-5)**
Variable. Prerequisite(s): Consent of Instructor. Special topics in Computer Systems and Software. May be repeated for credit if topic differs. GE credit: SE. Effective: 2011 Winter Quarter.
EEC 089F—Special Topics in Digital System Design (1-5)
Variable. Prerequisite(s): Consent of Instructor. Special topics in Digital System Design. May be repeated for credit if topic differs. GE credit: SE. Effective: 2011 Winter Quarter.

EEC 090C—Research Group Conference in Electrical and Computer Engineering (1)
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Lower division standing. Research group conferences. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

EEC 090X—Lower Division Seminar (1-4)
Seminar—1-4 hours. Prerequisite(s): Consent of Instructor. Examination of a special topic in a small group setting. May be repeated for credit. Effective: 1997 Winter Quarter.

EEC 092—Internship in Electrical and Computer Engineering (1-5)
Internship—3-15 hours. Prerequisite(s): Lower division standing; project approval prior to period of internship. Supervised work experience in Electrical and Computer Engineering. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

EEC 098—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

EEC 099—Special Study for Lower Division Students (1-5)
Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

EEC 100—Circuits II (5)
Review all entries
Discussion—1 hour; Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ENG 017 C- or better Restricted to the following majors: Electrical Engineering, Computer Engineering, Computer Science & Engineering, Electronic Materials Engineering, Electrical Engineering/Materials Science, Optical Science & Engineering, Biomedical Engineering, Applied Physics, Electrical & Computer Engineering graduate students. Theory, application, and design of analog circuits. Methods of analysis including frequency response, SPICE simulation, and Laplace transform. Operational amplifiers and design of active filters. Students who have completed Engineering 100 may receive 3.5 units of credit. GE credit: QL, SE, VL. Effective: 2018 Fall Quarter.

EEC 105A—EE-Emerge 1 (1)
Workshop—1 hour. Pass One restricted to Electrical & Computer Engineering Junior and Sophomore-level students. Work in groups to conceive, design and prototype electronic exhibits to promote engineering to the public. (P/NP grading only.) Effective: 2019 Fall Quarter.

EEC 105B—EE-Emerge 2 (2)
Workshop—2 hours. Pass One restricted to Electrical & Computer Engineering Junior and Sophomore-level students. Work in groups to construct electronic exhibits. (P/NP grading only.) Effective: 2019 Fall Quarter.

EEC 105C—EE-Emerge 3 (1)
Workshop—1 hour. Prerequisite(s): EEC 105B Work in groups to present electronic exhibits to the public. (P/NP grading only.) Effective: 2019 Fall Quarter.

EEC 110A—Electronic Circuits I (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EEC 100; EEC 140A (can be concurrent) Use and modeling of nonlinear solid-state electronic devices in basic analog and digital circuits. Introduction to the design of transistor amplifiers and logic gates. GE credit: SE, VL. Effective: 2018 Winter Quarter.

EEC 110B—Electronic Circuits II (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): EEC 110A Analysis and design of integrated circuits. Single-stage amplifiers, cascaded amplifier stages, differential amplifiers, current sources, frequency response, and return-ratio analysis of feedback amplifiers. GE credit: SE, VL. Effective: 2009 Fall Quarter.
EEC 112—Communication Electronics (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): EEC 110A; EEC 150A; EEC 110B recommended. Electronic circuits for analog and digital communication, including oscillators, mixers, tuned amplifiers, modulators, demodulators, and phase-locked loops. Circuits for amplitude modulation (AM) and frequency modulation (FM) are emphasized. GE credit: SE. Effective: 2014 Spring Quarter.

EEC 116—VLSI Design (4) Review all entries
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): EEC 110A; EEC 180A recommended. CMOS devices, layout, circuits, and functional units; VLSI fabrication and design methodologies. GE credit: SE. Effective: 2014 Spring Quarter.

EEC 116—VLSI Design (4) Review all entries
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): EEC 110A; EEC 018 or 180A recommended. CMOS devices, layout, circuits, and functional units; VLSI fabrication and design methodologies. GE credit: SE. Effective: 2019 Winter Quarter.

EEC 118—Digital Integrated Circuits (4) Review all entries
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): EEC 110A; EEC 180A Analysis and design of digital integrated circuits. Emphasis on MOS logic circuit families. Logic gate construction, voltage transfer characteristics, propagation delay, and power consumption. Regenerative circuits, sequential elements, interconnect, RAMs, ROMs, and PLAs. GE credit: SE. Effective: 2011 Spring Quarter.

EEC 118—Digital Integrated Circuits (4) Review all entries
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): EEC 110A; (EEC 018 or EEC 180A) Analysis and design of digital integrated circuits. Emphasis on MOS logic circuit families. Logic gate construction, voltage transfer characteristics, propagation delay, and power consumption. Regenerative circuits, sequential elements, interconnect, RAMs, ROMs, and PLAs. GE credit: SE. Effective: 2019 Spring Quarter.

EEC 119A—Integrated Circuit Design Project (3)
Laboratory—6 hours; Workshop—1 hour. Prerequisite(s): EEC 116 or EEC 118 Design course involving architecture, circuit design, physical design, and validation through extensive simulation of a digital or mixed-signal integrated circuit of substantial complexity under given design constraints. Team project that includes a final report. GE credit: SE. Effective: 2014 Fall Quarter.

EEC 119B—Integrated Circuit Design Project (3)
Laboratory—6 hours; Workshop—1 hour. Prerequisite(s): EEC 119A Design course involving architecture, circuit design, physical design, and validation through extensive simulation of a digital or mixed-signal integrated circuit of substantial complexity under given design constraints. Team project that includes a final report. GE credit: SE. Effective: 2014 Fall Quarter.

EEC 130A—Electromagnetics I (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MAT 021D; (PHY 009C or PHY 009HD); ENG 017 Basics of static electric and magnetic fields and fields in materials. Work and scalar potential. Maxwell's equations in integral and differential form. Plan waves in lossless media. Lossless transmission lines. GE credit: SE. Effective: 2016 Fall Quarter.

EEC 130B—Introductory Electromagnetics II (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EEC 130A Plane wave propagation in lossy media, reflections, guided waves, simple modulated waves and dispersion, and basic antennas. GE credit: SE. Effective: 1997 Winter Quarter.

EEC 132A—RF and Microwaves in Wireless Communication (5)
Discussion—1 hour; Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): EEC 110A; EEC 130B Study of Radio Frequency and Microwave theory and practice for design of wireless electronic systems. Transmission lines, microwave integrated circuits, circuit analysis of electromagnetic energy transfer systems, the scattering parameters. GE credit: SE. Effective: 2015 Winter Quarter.

EEC 132B—RF and Microwaves in Wireless Communication (5)
Discussion—1 hour; Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): EEC 132A Passive RF and microwave device analysis, design, fabrication, and testing for wireless applications. RF and microwave filter and coupler design. Introductory analysis and design of RF and microwave transistor amplifiers. GE credit: SE. Effective: 2007 Winter Quarter.
EEC 132C—RF and Microwaves in Wireless Communications (5)
Discussion—1 hour; Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): EEC 132B RF and microwave amplifier theory and design, including transistor circuit models, stability considerations, noise models and low noise design. Theory and design of microwave transistor oscillators and mixers. Wireless system design and analysis. GE credit: SE. Effective: 2009 Spring Quarter.

EEC 133—Electromagnetic Radiation and Antenna Analysis (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EEC 130B Properties of electromagnetic radiation; analysis and design of antennas: ideal cylindrical, small loop, aperture, and arrays; antenna field measurements. GE credit: SE. Effective: 1999 Fall Quarter.

EEC 133—Electromagnetic Radiation and Antenna Analysis (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EEC 130B Properties of electromagnetic radiation; analysis and design of antennas: ideal cylindrical, small loop, aperture, and arrays; antenna field measurements. GE credit: SE. Effective: 2018 Fall Quarter.

EEC 134A—RF/Microwave Systems Design (3)
Laboratory—6 hours; Workshop—3 hours. Prerequisite(s): EEC 130B or EEC 110B or EEC 150A Class size limited to 24 students. Board-level RF design, fabrication, and characterization of an RF/microwave system, including the antenna, RF front-end, baseband, mix-signal circuits, and digital signal processing models. GE credit: SE. Effective: 2014 Fall Quarter.

EEC 134B—RF/Microwave Systems Design (3)
Laboratory—6 hours; Workshop—3 hours. Prerequisite(s): EEC 134A Class size limited to 24 students. Board-level RF design, fabrication, and characterization of an RF/microwave system, including the antenna, RF front-end, baseband, mix-signal circuits, and digital signal processing models. GE credit: SE. Effective: 2015 Winter Quarter.

EEC 135—Optical Communications I: Fibers (4) Review all entries

EEC 135—Optoelectronics for High-Speed Data Networking and Computing Systems (4) Review all entries

EEC 136A—Electronic Design Project (3) Review all entries
Laboratory—6 hours; Workshop—1 hour. Prerequisite(s): ECS 030; EEC 100; EEC 180A; (EEC 110B or EEC 157A (can be concurrent) or EEC 180B) Pass One restricted to major. Optical, electronic and communication-engineering design of an opto-electronic system operating under performance and economic constraints. Measurement techniques will be designed and implemented, and the system will be characterized. GE credit: SE. Effective: 2015 Fall Quarter.

EEC 136A—Electronic Design Project (3) Review all entries
Laboratory—6 hours; Workshop—1 hour. Prerequisite(s): (ECS 036B or ECS 030 or ECS 034 or EEC 007); EEC 100; (EEC 018 or EEC 180A); (EEC 110B or EEC 157A (can be concurrent) or EEC 180 or EEC 180B) Pass One restricted to major. Optical, electronic and communication-engineering design of an opto-electronic system operating under performance and economic constraints. Measurement techniques will be designed and implemented, and the system will be characterized. GE credit: SE. Effective: 2019 Winter Quarter.

EEC 136B—Electronic Design Project (3)
Laboratory—6 hours; Workshop—1 hour. Prerequisite(s): EEC 136A Optical, electronic and communication-engineering design of an opto-electronic system operating under performance and economic constraints. Measurement techniques will be designed and implemented, and the system will be characterized. GE credit: SE. Effective: 2014 Fall Quarter.

EEC 140A—Principles of Device Physics I (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ENG 017; (PHY 009D or PHY 009HE) Semiconductor device fundamentals, equilibrium and non-equilibrium statistical mechanics, conductivity, diffusion, electrons and holes, p-n
and Schottky junctions, first-order metal-oxide-semiconductor (MOS) field effect transistors, bipolar junction transistor fundamentals. GE credit: SE, SL. Effective: 2016 Fall Quarter.

**EEC 140A—Principles of Device Physics I (4)**

Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ENG 017 (can be concurrent); (PHY 009D or PHY 009HE) Semiconductor device fundamentals, equilibrium and non-equilibrium statistical mechanics, conductivity, diffusion, electrons and holes, p-n and Schottky junctions, first-order metal-oxide-semiconductor (MOS) field effect transistors, bipolar junction transistor fundamentals. GE credit: SE, SL. Effective: 2018 Fall Quarter.

**EEC 140B—Principles of Device Physics II (4)**

Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EEC 140A Electrical properties, designs, models and advanced concepts for MOS, Bipolar, and Junction Field-Effect Transistors, including scaling, minority-carrier distributions, non-ideal effects, and device fabrication methods. MESFET and heterojunction bipolar transistors (HBTs). Fundamentals of solar cells, photodetectors, LEDs and semiconductor lasers. GE credit: SE. Effective: 2010 Spring Quarter.

**EEC 145—Electronic Materials (4)**

Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EEC 140A Electronic and physical properties of materials used in electronics, ICs, optoelectronics and MEMS. Semiconductors, dielectrics, metals, optical materials, organic semiconductive, optical and nonlinear properties, as well as their synthesis and deposition methods. GE credit: SE. Effective: 2015 Fall Quarter.

**EEC 146A—Integrated Circuits Fabrication (4)**

Laboratory—4 hours; Lecture—2 hours. Prerequisite(s): EEC 140A Theoretical and experimental study of basic fabrication processes for metal oxide semiconductor integrated circuits, including oxidation, photolithography, impurity diffusion, metallization, wet chemical etching, and characterization. GE credit: SE. Effective: 2018 Winter Quarter.

**EEC 146B—Advanced Integrated Circuits Fabrication (3)**

Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): EEC 146A Restricted to Electrical, Computer, and Electrical/Materials Science majors and Electrical Engineering graduate students; non-majors accommodated when space available. Fabrication processes for CMOS VLSI. Laboratory projects examine deposition of thin films, ion implantation, process simulation, anisotropic plasma etching, sputter metallization, and C-V analysis. Topics include isolation, projection alignment, epilayer growth, thin gate oxidation, and rapid thermal annealing. GE credit: SE. Effective: 1997 Winter Quarter.

**EEC 150A—Introduction to Signals and Systems I (4)**

Lecture—4 hours. Prerequisite(s): EEC 100; (ENG 006 (can be concurrent) or MAT 022AL (can be concurrent)) Characterization and analysis of continuous-time linear systems. Fourier series and transforms with applications. Introduction to communication systems. Transfer functions and block diagrams. Elements of feedback systems. Stability of linear systems. GE credit: QL, SE. Effective: 2013 Fall Quarter.

**EEC 150B—Introduction to Signals and Systems II (4)**

Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EEC 150A Characterization and analysis of discrete time systems. Difference equation models. Ztransform analysis methods. Discrete and fast Fourier transforms. Introduction to digital filter design. GE credit: QL, SE. Effective: 2012 Fall Quarter.

**EEC 152—Digital Signal Processing (4)**

Laboratory—6 hours; Lecture—2 hours. Prerequisite(s): EEC 150B; (EEC 070 or ECS 050) Theory and practice of real-time digital signal processing. Fundamentals of real-time systems. Programmable architectures including I/O, memory, peripherals, interrupts, DMA. Interfacing issues with A/D and D/A converters to a programmable DSP. Specification driven design and implementation of simple DSP applications. GE credit: SE. Effective: 2014 Fall Quarter.

**EEC 157A—Control Systems (4)**

Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): EEC 100 Analysis and design of feedback control systems. Examples are drawn from electrical and mechanical systems as well as other engineering fields. Mathematical modeling of systems, stability criteria, root-locus and frequency domain design methods. GE credit: SE. Effective: 2013 Fall Quarter.

**EEC 157B—Control Systems (4)**

Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): EEC 157A Control system design; transfer-function and state-
space methods; sampled-data implementation, digital control. Laboratory includes feedback system experiments and simulation studies. GE credit: SE. Effective: 1997 Winter Quarter.

EEC 160—Signal Analysis and Communications (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EEC 150A Signal analysis based on Fourier methods. Fourier series and transforms; time-sampling, convolution, and filtering; spectral density; modulation: carrier-amplitude, carrier-frequency, and pulse-amplitude. GE credit: SE. Effective: 1997 Winter Quarter.

EEC 161—Probabilistic Analysis of Electrical & Computer Systems (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EEC 100; (ENG 006 or MAT 022AL) Probabilistic and statistical analysis of electrical and computer systems. Discrete and continuous random variables, expectation and moments. Transformation of random variables. Joint and conditional densities. Limit theorems and statistics. Noise models, system reliability and testing. GE credit: SE. Effective: 2016 Spring Quarter.

EEC 165—Statistical and Digital Communication (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): EEC 160; EEC 161 Introduction to random process models of modulated signals and noise, and analysis of receiver performance. Analog and digitally modulated signals. Signal-to-noise ratio, probability of error, matched filters. Intersymbol interference, pulse shaping and equalization. Carrier and clock synchronization. GE credit: SE. Effective: 2017 Winter Quarter.

EEC 170—Introduction to Computer Architecture (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EEC 180A; ECS 030 Introduces basic aspects of computer architecture, including computer performance measurement, instruction set design, computer arithmetic, pipelined/ non-pipelined implementation, and memory hierarchies (cache and virtual memory). Presents a simplified Reduced Instruction Set Computer using logic design methods from the prerequisite course. GE credit: SE. Effective: 2015 Winter Quarter.

EEC 170—Introduction to Computer Architecture (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECS 036B or ECS 030 or ECS 034 or EEC 007); (EEC 018 or EEC 180A) Introduces basic aspects of computer architecture, including computer performance measurement, instruction set design, computer arithmetic, pipelined/non-pipelined implementation, and memory hierarchies (cache and virtual memory). Presents a simplified Reduced Instruction Set Computer using logic design methods from the prerequisite course. GE credit: SE. Effective: 2019 Winter Quarter.

EEC 171—Parallel Computer Architecture (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EEC 170 or ECS 154B Organization and design of parallel processors including shared-memory multiprocessors, cache coherence, memory consistency, snooping protocols, synchronization, scalable multiprocessors, message passing protocols, distributed shared memory and interconnection networks. GE credit: SE. Effective: 2014 Fall Quarter.

EEC 172—Embedded Systems (4)
Laboratory—6 hours; Lecture—2 hours. Prerequisite(s): (EEC 170 or ECS 154A); EEC 100 Introduction to embedded-system hardware and software. Topics include: embedded processor and memory architecture; input/output hardware and software, including interrupts and direct memory access; interfacing with sensors and actuators; wired and wireless embedded networking. GE credit: SE. Effective: 2016 Winter Quarter.

EEC 173A—Computer Networks (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECS 060; (ECS 132 or EEC 161 or MAT 135A or STA 131A or STA 120 or STA 032) Pass One open to Computer Science, Computer Science Engineering and Computer Engineering Majors only. Overview of computer networks, TCP/IP protocol suite, computer-networking applications and protocols, transport-layer protocols, network architectures, Internet Protocol (IP), routing, link-layer protocols, local area and wireless networks, medium access control, physical aspects of data transmission, and network-performance analysis. Only 2 units of credit for students who have taken ECS 157. (Same course as ECS 152A.) GE credit: SE. Effective: 2016 Fall Quarter.

EEC 173A—Computer Networks (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ECS 060 or ECS 032B or ECS 036C); (ECS 132 or EEC 161 or MAT 135A or STA 131A or STA 120 or STA 032) Pass One open to Computer Science, Computer Science Engineering and Computer Engineering Majors only. Overview of computer networks, TCP/IP protocol suite, computer-networking applications and protocols, transport-layer protocols, network architectures, Internet Protocol (IP), routing, link-layer protocols, local area and wireless networks, medium access control, physical aspects of data transmission, and network-performance analysis. Only 2 units of credit for students who have taken ECS 157. (Same course as ECS 152A.) GE credit: SE. Effective: 2016 Fall Quarter.
transmission, and network-performance analysis. Only 2 units of credit for students who have taken ECS 157. (Same course as ECS 152A.) GE credit: SE. Effective: 2019 Winter Quarter.

EEC 173B—Design Projects in Communication Networks (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EEC 173A or ECS 152A Advanced topics and design projects in communication networks. Example topics include wireless networks, multimedia networking, network design and management, traffic analysis and modeling, network simulations and performance analysis. Offered in alternate years. (Same course as ECS 152C.) GE credit: SE. Effective: 2005 Spring Quarter.

EEC 180—Digital Systems II (5)
Laboratory—4 hours; Lecture—3 hours. Prerequisite(s): EEC 018 or EEC 180A Computer-aided design of digital systems with emphasis on hardware description languages (VHDL), logic synthesis, and field-programmable gate arrays (FPGA). May cover advanced topics in digital system design such as static timing analysis, pipelining, memory system design, testing digital circuits. No credit to students who have previously completed EEC 180B. Effective: 2019 Winter Quarter.

EEC 180B—Digital Systems II (5) Review all entries
Laboratory—6 hours; Lecture—3 hours. Prerequisite(s): EEC 180A Computer-aided design of digital systems with emphasis on hardware description languages (VHDL), logic synthesis, and field-programmable gate arrays (FPGA). May cover advanced topics in digital system design such as static timing analysis, pipelining, memory system design, testing digital circuits. GE credit: SE. Effective: 2013 Fall Quarter.

EEC 180B—Digital Systems II (5) Review all entries Discontinued
Laboratory—6 hours; Lecture—3 hours. Prerequisite(s): EEC 180A Computer-aided design of digital systems with emphasis on hardware description languages (VHDL), logic synthesis, and field-programmable gate arrays (FPGA). May cover advanced topics in digital system design such as static timing analysis, pipelining, memory system design, testing digital circuits. GE credit: SE. Effective: 2019 Winter Quarter.

EEC 181A—Digital Systems Design Project (3) Review all entries
Laboratory—6 hours; Workshop—1 hour. Prerequisite(s): EEC 180B; EEC 170 Digital-system and computer-engineering design course involving architecture, design, implementation and testing of a prototype application-specific processor under given design constraints. This is a team project that includes a final presentation and report. GE credit: SE. Effective: 2018 Winter Quarter.

EEC 181A—Digital Systems Design Project (3) Review all entries
Laboratory—6 hours; Workshop—1 hour. Prerequisite(s): EEC 180 or EEC 180B); EEC 170 Digital-system and computer-engineering design course involving architecture, design, implementation and testing of a prototype application-specific processor under given design constraints. This is a team project that includes a final presentation and report. GE credit: SE. Effective: 2019 Winter Quarter.

EEC 181B—Digital Systems Design Project (3)
Laboratory—6 hours; Workshop—1 hour. Prerequisite(s): EEC 181A Digital-system and computer-engineering design course involving architecture, design, implementation and testing of a prototype application-specific processor under given design constraints. This is a team project that includes a final presentation and report. GE credit: SE. Effective: 2015 Winter Quarter.

EEC 183—Testing and Verification of Digital Systems (5)
Laboratory—4 hours; Lecture—3 hours. Prerequisite(s): EEC 170; EEC 180B Computer aided-testing and design verification techniques for digital systems; physical fault testing; simulation-based design verification; formal verification; timing analysis. GE credit: SE. Effective: 2012 Spring Quarter.
EEC 189A—Special Topics in Electrical Engineering and Computer Science; Computer Science (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Computer Science. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189B—Special Topics in Electrical Engineering and Computer Science; Programming Systems (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Programming Systems. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189C—Special Topics in Electrical Engineering and Computer Science; Digital Systems (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Digital Systems. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189D—Special Topics in Electrical Engineering and Computer Science; Communications (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Communications. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189E—Special Topics in Electrical Engineering and Computer Science; Signal Transmission (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Signal Transmission. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189F—Special Topics in Electrical Engineering and Computer Science; Digital Communication (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Digital Communication. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189G—Special Topics in Electrical Engineering and Computer Science; Control Systems (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Control Systems. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189H—Special Topics in Electrical Engineering and Computer Science; Robotics (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Robotics. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189I—Special Topics in Electrical Engineering and Computer Science; Signal Processing (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Signal Processing. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189J—Special Topics in Electrical Engineering and Computer Science; Image Processing (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Image Processing. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189K—Special Topics in Electrical Engineering and Computer Science; High-Frequency Phenomena and Devices (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in High-Frequency Phenomena and Devices. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189L—Special Topics in Electrical Engineering and Computer Science; Solid-State Devices and Physical Electronics (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Solid-State Devices and Physical Electronics. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189M—Special Topics in Electrical Engineering and Computer Science; Systems Theory (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Systems Theory. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189N—Special Topics in Electrical Engineering and Computer Science; Active and Passive Circuits (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Active and Passive Circuits. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189O—Special Topics in Electrical Engineering and Computer Science; Integrated Circuits (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Integrated Circuits. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189P—Special Topics in Electrical Engineering and Computer Science; Computer Software (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Computer Software. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.
EEC 189Q—Special Topics in Electrical Engineering and Computer Science; Computer Engineering (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Computer Engineering. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189R—Special Topics in Electrical Engineering and Computer Science; Microprocessing (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Microprocessing. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189S—Special Topics in Electrical Engineering and Computer Science; Electronics (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Electronics. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189T—Special Topics in Electrical Engineering and Computer Science; Electromagnetics (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Electromagnetics. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189U—Special Topics in Electrical Engineering and Computer Science; Opto-Electronics (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Special topics in Opto-Electronics. May be repeated for credit when topic differs. GE credit: SE. Effective: 2007 Fall Quarter.

EEC 189W—Special Topics in Electrical and Computer Engineering; Computer Networks (1-5)
Variable. Prerequisite(s): Consent of Instructor. Special topics in Computer Networks. May be repeated for credit when topic differs. GE credit: SE. Effective: 2018 Winter Quarter.

EEC 190C—Research Group Conferences in Electrical and Computer Engineering (1)
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Upper division standing in Electrical and Computer Engineering. Research group conferences. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 2013 Spring Quarter.

EEC 192—Internship in Electrical and Computer Engineering (1-5) Review all entries
Internship—3-15 hours. Prerequisite(s): Consent of Instructor. Completion of a minimum of 84 units; project approval before period of internship. Supervised work experience in electrical and computer engineering. May be repeated for credit project is different. (P/NP grading only.) GE credit: SE. Effective: 2012 Fall Quarter.

EEC 192—Internship in Electrical and Computer Engineering (1-6) Review all entries
Internship—3-18 hours. Prerequisite(s): Consent of Instructor. Completion of a minimum of 84 units; project approval before period of internship. Supervised work experience in electrical and computer engineering. May be repeated for credit if project differs. (P/NP grading only.) GE credit: SE. Effective: 2018 Fall Quarter.

EEC 193A—Senior Design Project (3)
Laboratory—6 hours; Workshop—1 hour. Prerequisite(s): EEC 196 (can be concurrent); and Consent of Instructor. Restricted to senior standing in Electrical or Computer Engineering. Team design project for seniors in Electrical or Computer Engineering. Project involves analysis, design, implementation and evaluation of an Electrical Engineering or Computer Engineering system. Project is supervised by a faculty member. GE credit: SE. Effective: 2014 Fall Quarter.

EEC 193B—Senior Design Project (3)
Laboratory—6 hours; Workshop—1 hour. Prerequisite(s): EEC 193A Team design project for seniors in Electrical Engineering or Computer Engineering. Project involves analysis, design, implementation and evaluation of an Electrical Engineering or Computer Engineering system. Project supervised by a faculty member. GE credit: SE. Effective: 2015 Winter Quarter.

EEC 195A—Autonomous Vehicle Design Project (3) Review all entries
Laboratory—6 hours; Workshop—1 hour. Prerequisite(s): ECS 030; EEC 180A; (EEC 110B or EEC 157A (can be concurrent) or EEC 180B or ECS 060) Pass One restricted to major. Design and construct an autonomous race car. Work in groups to design, build and test speed control circuits, track sensing circuits, and a steering control loop. GE credit: SE. Effective: 2015 Fall Quarter.

EEC 195A—Autonomous Vehicle Design Project (3) Review all entries
Laboratory—6 hours; Workshop—1 hour. Prerequisite(s): (ECS 030 or ECS 036B or ECS 034 or EEC 007); (EEC 018 or EEC 180A); (EEC 110B or EEC 157A (can be concurrent) or ECS 060 or (EEC 180B or EEC 180)) Pass One restricted to major. Design and construct an autonomous race car. Work in groups to design, build and test speed control circuits, track sensing circuits, and a steering control loop. GE credit: SE. Effective: 2019 Winter Quarter.
EEC 195B—Autonomous Vehicle Design Project (3)
Laboratory—6 hours; Workshop—1 hour. Prerequisite(s): EEC 195A Design and construct an autonomous race car. Students work in groups to design, build and test speed control circuits, track sensing circuits, and a steering control loop. GE credit: SE. Effective: 2015 Winter Quarter.

EEC 196—Issues in Engineering Design (1)
Seminar—1 hour. Prerequisite(s): Senior standing in Electrical or Computer Engineering. The course covers various electrical and computer engineering standards and realistic design constraints including economic, manufacturability, sustainability, ethical, health and safety, environmental, social, and political. GE credit: SE. Effective: 2008 Fall Quarter.

EEC 197T—Tutoring in Electrical and Computer Engineering (1-3)
Discussion—1 hour; Discussion/Laboratory—2-8 hours. Prerequisite(s): Consent of Instructor. Upper division standing. Tutoring in Electrical and Computer Engineering courses, especially introductory circuits. For upper-division undergraduate students who will provide tutorial assistance. (P/NP grading only.) Effective: 2007 Fall Quarter.

EEC 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. May be repeated up to 3 time(s). (P/NP grading only.) GE credit: SE. Effective: 2007 Fall Quarter.

EEC 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 2007 Fall Quarter.

EEC 201—Digital Signal Processing (4)
Lecture—4 hours. Prerequisite(s): EEC 150B; STA 120 or MAT 131 or MAT 167 recommended. Theory and design of digital filters. Classification of digital filters, linear phase systems, all-pass functions, FIR and IIR filter design methods and optimality measures, numerically robust structures for digital filters. Effective: 2006 Winter Quarter.

EEC 202—Advanced Digital Signal Processing (4)
Review all entries
Lecture—4 hours. Prerequisite(s): EEC 201, EEC 260 and EEC 265, and MAT 167 are recommended. Multirate DSP theory and wavelets, optimal transform and subband coders in data compressions, advanced sampling theory and oversampled A/D converters, transmultiplexers and precoders in digital communication systems, genomic signal processing. Effective: 2006 Spring Quarter.

EEC 202—Advanced Digital Signal Processing (4)
Review all entries Discontinued

EEC 205—Computational Methods in Biomedical Imaging (4)
Lecture—4 hours. Prerequisite(s): (BIM 105 or STA 120); (BIM 108 or EEC 150A) Analytic tomographic reconstruction from projections in 2D and 3D; model-based image reconstruction methods; maximum likelihood and Bayesian methods; applications to CT, PET, and SPECT. (Same course as BIM 252.) Effective: 2011 Fall Quarter.

EEC 206—Digital Image Processing (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): EEC 150B Two-dimensional systems theory, image perception, sampling and quantization, transform theory and applications, enhancement, filtering and restoration, image analysis, and image processing systems. Effective: 1997 Winter Quarter.

EEC 210—MOS Analog Circuit Design (3)
Lecture—3 hours. Prerequisite(s): EEC 110B; EEC 140A Analysis and design of MOS amplifiers, bias circuits, voltage references and other analog circuits. Stability and compensation of feedback amplifiers. Introduction to noise analysis in MOS circuits. Effective: 2016 Winter Quarter.

EEC 211—Advanced Analog Circuit Design (3)
Lecture—3 hours. Prerequisite(s): EEC 210; STA 131A and EEC 112 recommended. Noise and distortion in electronic circuits and systems. Application to communication circuits. Specific applications include mixers, low-noise amplifiers, power amplifiers, phase-locked loops, oscillators and receiver architectures. Effective: 2002 Winter Quarter.

EEC 212—Analog MOS IC Design for Signal Processing (3)
Lecture—3 hours. Prerequisite(s): EEC 210 Analysis and design of analog MOS integrated circuits. Passive

EEC 213—Data-Conversion Techniques and Circuits (3)

EEC 214—Computer-Aided Circuit Analysis and Design (3)
Review all entries
Lecture—3 hours. Prerequisite(s): EEC 110A; EEC 110B; And knowledge of FORTRAN or C. Network equation formulations. Nonlinear DC, linear AC, timedomain (both linear and nonlinear), steady-state (nonlinear) and harmonic analysis. DC, AC, and time-domain sensitivities of linear and nonlinear circuits. Gradient-based design optimization. Behavioral simulations. Extensive CAD project. Effective: 2000 Winter Quarter.

EEC 214—Computer-Aided Circuit Analysis and Design (3) Review all entries Discontinued
Lecture—3 hours. Prerequisite(s): EEC 110A; EEC 110B; And knowledge of FORTRAN or C. Network equation formulations. Nonlinear DC, linear AC, timedomain (both linear and nonlinear), steady-state (nonlinear) and harmonic analysis. DC, AC, and time-domain sensitivities of linear and nonlinear circuits. Gradient-based design optimization. Behavioral simulations. Extensive CAD project. Effective: 2019 Spring Quarter.

EEC 215—Circuits for Digital Communications (3)
Lecture—3 hours. Prerequisite(s): EEC 150B; EEC 210 (can be concurrent); EEC 165, EEC 166, or EEC 265 recommended. Analog, digital, and mixed-signal CMOS implementations of communication-circuit blocks: gain control, adaptive equalizers, sampling detectors, clock recovery. Effective: 2000 Fall Quarter.

EEC 216—Low Power Digital Integrated Circuit Design (3)
Review all entries

EEC 216—Low Power Digital Integrated Circuit Design (4) Review all entries

EEC 217—Biomedical Electronics (4)
Review all entries
Lecture—3 hours; Project (Term Project). Prerequisite(s): EEC 210; or Consent of Instructor. Special consideration and accommodation will be made for biomedical or signal processing majors who have not taken EEC 210. Circuit design for medical applications including weak inversion amplifiers; integrated ULF filters; chopper stabilization; electrochemical interfaces; neurostimulation pulse generation; wireless powering of and communication with implantable devices. Electrophysiological signaling and aspects of signal processing for biomedical systems. Effective: 2013 Spring Quarter.

EEC 217—Biomedical Electronics (4) Review all entries Discontinued
Lecture—3 hours; Project (Term Project). Prerequisite(s): EEC 210; or Consent of Instructor. Special consideration and accommodation will be made for biomedical or signal processing majors who have not taken EEC 210. Circuit design for medical applications including weak inversion amplifiers; integrated ULF filters; chopper stabilization; electrochemical interfaces; neurostimulation pulse generation; wireless powering of and communication with implantable devices. Electrophysiological signaling and aspects of signal processing for biomedical systems. Effective: 2019 Spring Quarter.

EEC 219—Advanced Digital Circuit Design (3)
Review all entries

EEC 219—Advanced Digital Circuit Design (3) Review all entries Discontinued
EEC 221—Analog Filter Design (3) **Review all entries**
Lecture—3 hours. Prerequisite(s): EEC 100; EEC 150A Design of active and passive filters including filter specification and approximation theory. Passive LC filter design will cover doubly-terminated reactance two-port synthesis. Active filter design will include sensitivity, op-amp building blocks, cascade, multi-loop, ladder and active-R filter design. Effective: 1997 Fall Quarter.

EEC 221—Radio Frequency & Microwave Filter Design (4) **Review all entries**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EEC 132A; or Consent of Instructor. Design of radio frequency and microwave filters including filter specification and approximation theory. Passive LC filter design covers doubly-terminated reactance two-port synthesis and coupling matrix based synthesis. Active filter design includes sensitivity, op-amp building blocks, and cascade filter design. Effective: 2019 Fall Quarter.

EEC 222—RF IC Design (3)
Lecture—3 hours. Prerequisite(s): EEC 132C; EEC 210 Radio frequency (RF) solid-state devices, RF device modeling and design rules; non-linear RF circuit design techniques; use of non-linear computer-aided (CAD) tools; RF power amplifier design. Effective: 2004 Winter Quarter.

EEC 223—Integrated Circuits for Wireless Communications (4)
Lecture—3 hours; Project (Term Project). Integrated RF front end circuit design of receivers and synthesizers for wireless communications, such as LNA, mixers, PLL; noise and linearity analysis and specifications; theory and working mechanism of synthesizers and phase noise analysis. Effective: 2018 Fall Quarter.

EEC 224—Terahertz and mm-Wave Integrated Circuit Design (4)
Lecture—3 hours; Project (Term Project). Prerequisite(s): EEC 132A; EEC 112; or Consent of Instructor. Fundamental theory of RF transmitter and receiver, including noise analysis, transceiver architectures, and antenna arrays. Fundamental limitations, theory and design of amplifiers, oscillators and signal sources at THz and mm-wave frequencies Effective: 2018 Winter Quarter.

EEC 225—Advanced Microwave Circuit and Device Design Techniques (4)

EEC 226—RF-MEMS and Adaptive Wireless Frontends (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EEC 130A Focuses on the modeling, design, fabrication, and characterization of RF-MEMS while providing a thorough introduction to the technology with an emphasis on how it will benefit the design of adaptive RF/microwave wireless systems. Effective: 2015 Fall Quarter.

EEC 230—Electromagnetics (3)
Lecture—3 hours. Prerequisite(s): EEC 130B Maxwell's equations, plane waves, reflection and refraction, complex waves, waveguides, resonant cavities, and basic antennas. Effective: 2001 Fall Quarter.

EEC 231A—Plasma Physics and Controlled Fusion (3)
Lecture—3 hours. Prerequisite(s): Consent of Instructor. Equilibrium plasma properties; single particle motion; fluid equations; waves and instabilities in a fluid plasma; plasma kinetic theory and transport coefficients; linear and nonlinear Vlasov theory; fluctuations, correlations and radiation; inertial and magnetic confinement systems in controlled fusion. Effective: 2015 Spring Quarter.

EEC 231B—Plasma Physics and Controlled Fusion (3)
Lecture—3 hours. Prerequisite(s): EEC 231A; and Consent of Instructor. Equilibrium plasma properties; single particle motion; fluid equations; waves and instabilities in a fluid plasma; plasma kinetic theory and transport coefficients; linear and nonlinear Vlasov theory; fluctuations, correlations and radiation; inertial and magnetic confinement systems in controlled fusion. Effective: 2015 Spring Quarter.

EEC 231C—Plasma Physics and Controlled Fusion (3)
Lecture—3 hours. Prerequisite(s): EEC 231B; and Consent of Instructor. Equilibrium plasma properties; single particle motion; fluid equations; waves and instabilities in a fluid plasma; plasma kinetic theory and transport coefficients; linear and nonlinear Vlasov theory; fluctuations, correlations and radiation; inertial and magnetic confinement systems in controlled fusion. Effective: 2015 Spring Quarter.

EEC 232A—Advanced Applied Electromagnetics I (3)
Lecture—3 hours. Prerequisite(s): EEC 132B The exact formulation of applied electromagnetic problems using Green's functions. Applications of these techniques to transmission circuits. Effective: 2000 Fall Quarter.
EEC 232B—Advanced Applied Electromagnetics II (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): EEC 132B An advanced treatment of electromagnetics with applications to passive microwave devices and antennas. Effective: 2000 Fall Quarter.

EEC 233—High Speed Signal Integrity (3)
Lecture—3 hours. Prerequisite(s): EEC 130B Design and analysis of interconnects in high-speed circuits and subsystems; understanding of high-speed signal propagation and signal integrity concepts; electromagnetic modeling tools and experimental techniques. Effective: 2008 Fall Quarter.

EEC 234A—Physics and Technology of Microwave Vacuum Electron Beam Devices I (4)
Lecture—4 hours. Prerequisite(s): B.S. degree in physics or electrical engineering or the equivalent background. Physics and technology of electron beam emissions, flow and transport, electron gun design, space charge waves and klystrons. Effective: 2015 Fall Quarter.

EEC 234B—Physics and Technology of Microwave Vacuum Electron Beam Devices II (4)
Lecture—4 hours. Prerequisite(s): EEC 234A Theory and experimental design of traveling wave tubes, backward wave oscillators, and extended interaction oscillators. Effective: 2016 Spring Quarter.

EEC 234C—Physics and Technology of Microwave Vacuum Electron Beam Devices III (4)
Lecture—4 hours. Prerequisite(s): EEC 234B Physics and technology of gyrotrons, gyro-amplifiers, free electron lasers, magnetrons, crossfield amplifiers and relativistic devices. Effective: 2015 Fall Quarter.

EEC 235—Photonics (4)
Lecture—3 hours; Project (Term Project)—1 hour. Prerequisite(s): EEC 230 (can be concurrent) Optical propagation of electromagnetic waves and beams in photonic components and the design of such devices using numerical techniques. Effective: 2004 Fall Quarter.

EEC 236—Nonlinear Optical Applications (3)
Lecture—3 hours. Prerequisite(s): EEC 130B; EEC 230 (can be concurrent) Nonlinear optical interactions in optical communication, optical information processing and integrated optics. Basic concepts underlying optical nonlinear interactions in materials and guided media. Not open for credit to students who have completed EEC 233. Effective: 2000 Fall Quarter.

EEC 237A—Lasers (3)
Lecture—3 hours. Prerequisite(s): EEC 235; EEC 130B; Or the equivalent of EEC 130B. Not open for credit to students who have completed course 226A. Theoretical and practical description of lasers. Theory of population inversion, amplification and oscillation using semiclassical oscillator model and rate equations. Description and design of real laser system (Not open for credit to students who have completed course 226A.) Effective: 1998 Winter Quarter.

EEC 237B—Laser Physics II (4)

EEC 238—Semiconductor Diode Lasers (3) Review all entries
Lecture—3 hours. Prerequisite(s): EEC 245A Understanding of fundamental optical transitions in semiconductor and quantum-confined systems are applied to diode lasers and selected photonic devices. The importance of radiative and non-radiative recombination, simulated emission, excitons in quantum wells, and strained quantum layers are considered. Effective: 1998 Spring Quarter.

EEC 238—Semiconductor Lasers & Photonic Integration (4) Review all entries
Lecture—4 hours. Prerequisite(s): EEC 140A Understanding of fundamental optical transitions in semiconductors and quantum-confined systems are applied to diode & unipolar lasers and selected photonic devices. The importance of radiative and non-radiative recombination, simulated emission, excitons in quantum wells, and strained quantum layers are considered. Photonic integrated circuits based on active (with optical gain) and passive (without optical gain). Effective: 2019 Fall Quarter.

EEC 239A—Optical Fiber Communications Technologies (4) Review all entries
Lecture—4 hours. Prerequisite(s): EEC 130B Physical layer issues for component and system technologies in optical fiber networks. Sources of physical layer impairments and limitations in network scalability. Enabling technologies

**EEC 239A—Optical Communication Technologies for High-Speed Data Networking (4)** [Review all entries]

**EEC 239B—Optical Fiber Communications Systems and Networking (4)** [Review all entries]

**EEC 239B—High-Capacity Optical Data Systems & Networks (4)** [Review all entries]
Lecture—4 hours. Prerequisite(s): EEC 239A High-capacity optical data systems and networks, built-on modern optical communication technologies. Technologies behind data center networking, software defined networking, and RF-optical networking. Physical layer issues in light of networking architectures and protocols. Optical communications systems design and integration. Systems technologies and higher-level network architecture, case studies. WDM, TDM, and EON networking, optical and wireless access technologies based on PON and ROF. Effective: 2019 Fall Quarter.

**EEC 240—Semiconductor Device Physics (3)**
Lecture—3 hours. Prerequisite(s): EEC 140B Physical principles, characteristics and models of fundamental semiconductor device types, including P-N and Schottky diodes, MOSFETs and MESFETs Bipolar Junction Transistors, and light emitters/detectors. Effective: 1998 Fall Quarter.

**EEC 241—Introduction to Molecular Electronics (4)**

**EEC 242—Advanced Nanostructured Devices (3)**
Lecture—3 hours. Prerequisite(s): EEC 130A; EEC 140A Physics of nano-structured materials and device operation. Overview of new devices enabled by nanotechnology; fabrication and characterization methods; applications of nano-structures and devices. Effective: 2005 Fall Quarter.

**EEC 244A—Design of Microelectromechanical Systems (MEMS) (3)**
Lecture—3 hours. Prerequisite(s): EEC 140A; EEC 140B; or Consent of Instructor. Theory and practice of MEMS design. Micromechanical fundamentals, CAD tools, and case studies. A MEMS design project is required. The designs will be fabricated in a commercial foundry and tested in course 244B. Effective: 1997 Fall Quarter.

**EEC 244B—Microsciences (4)**
Lecture/Discussion—4 hours. Introduction to the theory of physical and chemical principles at the microscale. Scale effects, surface tension, microfluidic mechanics, micromechanical properties, intermolecular interactions and microtribology. (Same course as BIM 218.) Effective: 2011 Fall Quarter.

**EEC 245—Micro- and Nano-Technology in Life Sciences (4)** [Review all entries]
Lecture/Discussion—4 hours. Prerequisite(s): Graduate standing or consent of instructor. Survey of biomedical device design from the engineering and biological perspectives; micro-/nano-fabrication and characterization techniques; surface chemistry and mass transfer; essential biological processes and models; proposal development skills to merge aforementioned themes in a multidisciplinary project. (Same course as ECH 245 and EMS 245.) Effective: 2016 Winter Quarter.

**EEC 245—Micro- and Nano-Technology in Life Sciences (4)** [Review all entries]
Lecture/Discussion—4 hours. Prerequisite(s): Graduate standing or consent of instructor. Survey of biodevice design from engineering and biological perspectives; micro-/nano-fabrication techniques; surface science and mass transport; essential biological processes and models; proposal development skills on merging aforementioned themes. (Same course as ECH 245, EMS 245, and MAE 245.) Effective: 2019 Winter Quarter.
EEC 246—Advanced Projects in IC Fabrication (3)
Discussion—1 hour; Laboratory—6 hours. Prerequisite(s): EEC 146B Individualized projects in the fabrication of analog or digital integrated circuits. Effective: 1997 Winter Quarter.

EEC 247—Advanced Semiconductor Devices (4)
Lecture—3 hours; Project (Term Project). Prerequisite(s): Graduate standing in Engineering. Semiconductor devices, including MOSFETs, heterojunction transistors, light-emitting diodes, lasers, sensors, detectors, power and high-voltage transistors, MEMS resonators, organic semiconductors and photovoltaics. All material is from recent literature, encouraging students to utilize search methods and critically assess the latest research. Effective: 2011 Fall Quarter.

EEC 248—Photovoltaics and Solar Cells (3)
Lecture—3 hours. Prerequisite(s): EEC 140B; or Consent of Instructor. Or equivalent. Physics and application of photovoltaics and solar cells, including design, fabrication technology, and grid incorporation. Mono and microcrystalline silicon devices; thin-film technologies, heterojunction and organic-semiconductor technologies. Collectors, electrical inverters and infrastructure issues. Challenges and concerns. (Same course as EMS 246.) Effective: 2014 Fall Quarter.

EEC 249—Nanofabrication (3)
Lecture—3 hours. Prerequisite(s): Graduate standing in Engineering. Theory and practices of nanofabrication used for producing ICs, electronic devices, optoelectronics, sensors, and microstructures. Major topics include electron-, photon-, and ion-beams and their interactions with solids, chemical vapor depositions, plasma processing and micromachining. Effective: 2014 Winter Quarter.

EEC 250—Linear Systems and Signals (4)

EEC 251—Nonlinear Systems (3)

EEC 252—Multivariable Control System Design (3)
Lecture—3 hours. Prerequisite(s): EEC 250 Modern control system design, theory, and techniques. Topics will include single-loop feedback design; stability, performance and robustness of multivariable control systems; LQG design; H-infinity design; frequency response methods; and optimization-based design. Effective: 2005 Fall Quarter.

EEC 254—Optimization (3)
Lecture—3 hours. Prerequisite(s): MAT 022A; Knowledge of FORTRAN or C. Modeling optimization problems in engineering design and other applications; optimality conditions; unconstrained optimization (gradient, Newton, conjugate gradient and quasi-Newton methods); duality and Lagrangian relaxation constrained optimization. (Primal method and an introduction to penalty and augmented Lagrangian methods.) Effective: 1997 Winter Quarter.

EEC 255—Robotic Systems (3)

EEC 256—Stochastic Optimization in Dynamic Systems (4)
Lecture—4 hours. Prerequisite(s): EEC 260; Or the equivalent. Markov Decision Processes (MDP), dynamic programming, multi-armed bandit, Partially observable MDP, optimal stopping, stochastic scheduling, sequential detection and quickest change detection, competitive MDP and game theory, applications in dynamic systems such as queueing networks, communication systems, and multi-agent systems. Effective: 2012 Spring Quarter.

EEC 260—Random Signals and Noise (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): STA 120; EEC 150A; EEC 250 recommended. Random processes as probabilistic models for signals and noise. Review of probability, random variables, and expectation. Study of correlation function and spectral density, ergodicity and duality between time averages and expected values, filters and dynamical systems. Applications. Effective: 1997 Winter Quarter.
EEC 261—Signal Processing for Communications (4)
Lecture—4 hours. Prerequisite(s): EEC 165; EEC 260; or Consent of Instructor. Signal processing in wireless and wireline communication systems. Characterization and distortion of wireless and wireline channels. Channel equalization and maximum likelihood sequence estimation. Channel precoding and pre-equalization. OFDM and transmit diversity. Array processing. Effective: 2003 Spring Quarter.

EEC 262—Multi-access Communications Theory (4)
Lecture—3 hours; Project (Term Project). Prerequisite(s): (EEC 173A or ECS 152A); STA 120; Or equivalent of STA 120. Maximum stable throughput of Poisson collision channels. Classic collision resolution algorithms. Carrier sensing multiple access and its performance analysis. System stability analysis. Joint design of the physical/medium access control layers. Capacity region of multi-access channels. Multi-access with correlated sources. Effective: 2006 Spring Quarter.

EEC 263—Optimal and Adaptive Filtering (4)

EEC 264—Estimation and Detection of Signals in Noise (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EEC 260 Introduction to parameter estimation and detections of signals in noise. Bayes and Neyman-Pearson likelihood-ratio tests for signal detection. Maximum-likelihood parameter estimation. Detection of known and Gaussian signals in white or colored noise. Applications to communications, radar, signal processing. Effective: 2007 Fall Quarter.

EEC 265—Principles of Digital Communications (4)

EEC 266—Information Theory and Coding (3)
Lecture—3 hours. Prerequisite(s): STA 120 Information theory and coding. Measure of information. Redundancy reduction encoding of an information source. Capacity of a communication channel, errorfree communications. Effective: 1997 Winter Quarter.

EEC 267—Mobile Communications (4)
Lecture/Lab—3 hours. Prerequisite(s): EEC 260; EEC 265 (can be concurrent) Time-varying multi-path fading channel models and receiver performance in fading channels; multiple access techniques and multiple access receivers design and performance; optimum design and the capacity of wireless channels. Effective: 2013 Spring Quarter.

EEC 269A—Error Correcting Codes I (3)
Lecture—3 hours. Prerequisite(s): MAT 022A; EEC 160 Introduction to the theory and practice of block codes, linear block codes, cyclic codes, decoding algorithms, coding techniques. Effective: 2001 Fall Quarter.

EEC 269B—Error Correcting Codes II (3)
Lecture—3 hours. Prerequisite(s): EEC 165; EEC 269A Introduction to convolutional codes, turbo codes, trellis and block coded modulation codes,soft-decision decoding algorithms, the Viterbi algorithm, reliability-based decoding, trellis-based decoding, multistage decoding. Effective: 2002 Spring Quarter.

EEC 270—Computer Architecture (3)
Lecture—3 hours. Prerequisite(s): EEC 170 or ECS 154B Introduction to modern techniques for high-performance single and multiple processor systems. Topics include advanced pipeline design, advanced memory hierarchy design, optimizing pipeline and memory use, and memory sharing among multiprocessors. Case studies of recent single and multiple processor systems. Effective: 1999 Winter Quarter.

EEC 272—High-Performance Computer Architecture (4)
Lecture—4 hours. Prerequisite(s): EEC 270 or ECS 201A Designing and analysis of high performance computer architecture with emphasis on vector processing, on-chip interconnect networks, chip-level multiprocessors, memory and storage subsystem design and impact of technological advances on computer architecture. Effective: 2015 Spring Quarter.
EEC 273—Networking Architecture and Resource Management (4)
Lecture—3 hours; Project (Term Project). Prerequisite(s): ECS 152A or EEC 173A Pass One and Pass Two open to Graduate Students in Computer Science and Electrical and Computer Engineering only. Concepts and design principles of computer networks. Network architectures, protocol mechanisms and implementation principles (transport/network/data-link layers), network algorithms, router mechanisms, design requirements of applications, network simulation, modeling and performance analysis. (Same course as ECS 258.) Effective: 2016 Fall Quarter.

EEC 274—Internet Measurements, Modeling and Analysis (4)
Lecture—3 hours; Project (Term Project). Prerequisite(s): ECS 252 or EEC 273 Advanced topics in the theoretical foundations of network measurements, modeling, and statistical inferencing. Applications to Internet engineering, routing optimization, load balancing, traffic engineering, fault tolerance, anomaly detection, and network security. Individual project requirement. Effective: 2007 Winter Quarter.

EEC 276—Fault-Tolerant Computer Systems: Design and Analysis (3)
Lecture—3 hours. Prerequisite(s): EEC 170; (EEC 018 or EEC 180A) Introduces fault-tolerant digital system theory and practice. Covers recent and classic fault-tolerant techniques based on hardware redundancy, time redundancy, information redundancy, and software redundancy. Examines hardware and software reliability analysis, and example fault-tolerant designs. Not open for credit to students who have completed EEC 276A. Effective: 1997 Fall Quarter.

EEC 277—Graphics Architecture (3)
Lecture—3 hours. Prerequisite(s): (ECS 154B or EEC 170); ECS 175 Design and analysis of the architecture of computer graphics systems. Topics include the graphics pipeline with a concentration on hardware techniques and algorithms, exploiting parallelism in graphics, and case studies of noteworthy and modern graphics architectures. Effective: 2004 Winter Quarter.

EEC 278—Computer Arithmetic for Digital Implementation (3)
Lecture—3 hours. Prerequisite(s): EEC 170; ECS 175 The design and implementation of computer arithmetic logic units are studied with particular emphasis on high-speed performance requirements. Addition (subtraction), multiplication and division operations are covered, and fixed and floating-point representations are examined. Effective: 1997 Winter Quarter.

EEC 279—Modern Parallel Computing (3)
Lecture—3 hours. Prerequisite(s): ECS 036B or ECS 034; optional but desirable: EEC 170 or ECS 154A. Exploration of the architecture of modern parallel computers, their programming models, and their programming systems. Effective: 2019 Spring Quarter.

EEC 281—VLSI Digital Signal Processing (4)
Lecture—3 hours; Project (Term Project). Prerequisite(s): EEC 150B; EEC 170; EEC 180B; or Consent of Instructor. Design and implementation of processor algorithms, architectures, control, functional units, and circuit topologies for increased performance and reduced circuit size and power dissipation. Effective: 2011 Spring Quarter.
Instructor. Digital signal processors, building blocks, and algorithms. Design and implementation of processor algorithms, architectures, control, functional units, and circuit topologies for increased performance and reduced circuit size and power dissipation. Effective: 2019 Winter Quarter.

**EEC 282—Hardware Software Codesign (3)** Review all entries
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): EEC 170; EEC 180B Specification and design of embedded systems; modeling and performance estimation; hardware/software partitioning; co-simulation; design re-use; platform-based design; reconfigurable computing. Effective: 2003 Spring Quarter.

**EEC 282—Hardware Software Codesign (3)** Review all entries
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): EEC 170; (EEC 180 or EEC 180B) Specification and design of embedded systems; modeling and performance estimation; hardware/software partitioning; co-simulation; design re-use; platform-based design; reconfigurable computing. Effective: 2019 Winter Quarter.

**EEC 282—Hardware Software Codesign (3)** Review all entries Discontinued
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): EEC 170; (EEC 180 or EEC 180B) Specification and design of embedded systems; modeling and performance estimation; hardware/software partitioning; co-simulation; design re-use; platform-based design; reconfigurable computing. Effective: 2019 Spring Quarter.

**EEC 283—Advanced Design Verification of Digital Systems (4)** Review all entries
Lecture—3 hours; Project (Term Project)—1 hour. Prerequisite(s): EEC 170; EEC 180A Design verification techniques for digital systems; simulation-based design verification techniques; formal verification techniques, including equivalence checking, model checking, and theorem proving; timing analysis and verification; application of design certification techniques to microprocessors. Effective: 2000 Winter Quarter.

**EEC 283—Advanced Design Verification of Digital Systems (4)** Review all entries
Lecture—3 hours; Project (Term Project)—1 hour. Prerequisite(s): EEC 170; (EEC 018 or EEC 180A) Design verification techniques for digital systems; simulation-based design verification techniques; formal verification techniques, including equivalence checking, model checking, and theorem proving; timing analysis and verification; application of design certification techniques to microprocessors. Effective: 2019 Winter Quarter.

Lecture—4 hours. Prerequisite(s): EEC 170; EEC 180B; or Consent of Instructor. ECS 122A recommended. Introduction to design and optimization of digital computing systems for embedded applications. Topics include combinatorial optimization techniques, performance and energy optimization in embedded systems, compilation and architecture-specific mapping, programmable and reconfigurable platforms; design automation and algorithmic improvements to design process. Effective: 2007 Winter Quarter.

Lecture—4 hours. Prerequisite(s): EEC 170; (EEC 180 or EEC 180B); or Consent of Instructor. ECS 122A recommended. Introduction to design and optimization of digital computing systems for embedded applications. Topics include combinatorial optimization techniques, performance and energy optimization in embedded systems, compilation and architecture-specific mapping, programmable and reconfigurable platforms; design automation and algorithmic improvements to design process. Effective: 2019 Winter Quarter.

**EEC 286—Introduction to Digital System Testing (3)** Review all entries
Lecture—3 hours. Prerequisite(s): EEC 180A; (STA 120 or STA 131A) A review of several current techniques used to diagnose faults in both combinational and sequential circuits. Topics include path sensitization procedures, Boolean difference, D-algorithm random test generation, TC testing and an analysis of the effects of intermittent faults. Not open for credit to students who have completed EEC 276A. Effective: 1998 Winter Quarter.

**EEC 286—Introduction to Digital System Testing (3)** Review all entries
Lecture—3 hours. Prerequisite(s): (STA 120 or STA 131A); (EEC 018 or EEC 180A) Review of several current techniques used to diagnose faults in both combinational and sequential circuits. Topics include path sensitization procedures, Boolean difference, D-algorithm random test generation, TC testing and an analysis of the effects of intermittent faults. Not open for credit to students who have completed EEC 276A. Effective: 1998 Winter Quarter.

**EEC 289A—Special Topics in Electrical and Computer Engineering; Computer Science (1-5)**
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Computer Science. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

**EEC 289B—Special Topics in Electrical and Computer Engineering; Programming Systems (1-5)**
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Programming Systems. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.
EEC 289C—Special Topics in Electrical and Computer Engineering; Digital Systems (1-5)
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Digital Systems. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289D—Special Topics in Electrical and Computer Engineering; Digital Systems (1-5)
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Digital Systems. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289E—Special Topics in Electrical and Computer Engineering; Signal Transmission (1-5)
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Signal Transmission. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289F—Special Topics in Electrical and Computer Engineering; Digital Communication (1-5)
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Digital Communication. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289G—Special Topics in Electrical and Computer Engineering; Control Systems (1-5)
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Control Systems. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289H—Special Topics in Electrical and Computer Engineering; Robotics (1-5)
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Robotics. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289I—Special Topics in Electrical and Computer Engineering; Signal Processing (1-5)
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Signal Processing. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289J—Special Topics in Electrical and Computer Engineering; Image Processing (1-5)
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Image Processing. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289K—Special Topics in Electrical and Computer Engineering; High Frequency Phenomena and Devices (1-5)
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in High Frequency Phenomena and Devices. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289L—Special Topics in Electrical and Computer Engineering; Solid-State Devices and Physical Electronics (1-5)
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Solid-State Devices and Physical Electronics. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289M—Special Topics in Electrical and Computer Engineering; Systems Theory (1-5)
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Systems Theory. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289N—Special Topics in Electrical and Computer Engineering; Active and Passive Circuits (1-5)
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Active and Passive Circuits. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289O—Special Topics in Electrical and Computer Engineering; Integrated Circuits (1-5)
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Integrated Circuits. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289P—Special Topics in Electrical and Computer Engineering; Computer Software (1-5)
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Computer Software. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289Q—Special Topics in Electrical and Computer Engineering; Computer Engineering (1-5)
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Computer Engineering. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289R—Special Topics in Electrical and Computer Engineering; Microprocessing (1-5)
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Microprocessing. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.
EEC 289S—Special Topics in Electrical and Computer Engineering; Electronics (1-5)
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Electronics. May be repeated for
credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289T—Special Topics in Electrical and Computer Engineering; Electromagnetics (1-5)
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Electromagnetics. May be repeated
for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289U—Special Topics in Electrical and Computer Engineering; Optoelectronics (1-5)
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Optoelectronics. May be repeated
for credit when topic differs. Effective: 1997 Winter Quarter.

EEC 289W—Special Topics in Electrical and Computer Engineering; Computer Networks (1-5)
Lecture/Lab—1-5 hours. Prerequisite(s): Consent of Instructor. Special topics in Computer Networks. May be
repeated for credit when topic differs. Effective: 2018 Winter Quarter.

EEC 290—Seminar in Electrical and Computer Engineering (1)
Seminar—1 hour. Discussion and presentation of current research and development in Electrical and Computer
Engineering. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

EEC 290C—Graduate Research Group Conference in Electrical and Computer Engineering (1)
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Research problems, progress, and techniques in electrical
and computer engineering. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective:
1997 Winter Quarter.

EEC 290P—Capstone Project For MS Plan II (4)
Extensive Problem Solving; Lecture—1 hour; Term Paper. Prerequisite(s): Consent of Instructor. Conducting research
projects in electrical and computer engineering. Communicating research results in written reports and oral
presentations. Systemic project implementation to answer a comprehensive scientific or technical question in the
area of electrical and computer engineering. (S/U grading only.) Effective: 2019 Spring Quarter.

EEC 291—Solid-State Circuit Research Laboratory Seminar (1)
Seminar—1 hour. Prerequisite(s): Graduate standing. Lectures on solid-state circuit and system design by various
visiting experts in the field. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective:
1997 Winter Quarter.

EEC 292—Seminar in Solid-State Technology (1)
Seminar—1 hour. Prerequisite(s): Graduate standing. Lectures on solid-state technology by various visiting experts in
the field. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

EEC 293—Computer Engineering Research Seminar (1)
Seminar—1 hour. Prerequisite(s): Graduate standing or consent of instructor. Lectures, tutorials and seminars on
topics in computer engineering. May be repeated up to 4 time(s). (S/U grading only.) Effective: 2000 Winter Quarter.

EEC 294—Communications, Signal and Image Processing Seminar (1)
Seminar—1 hour. Prerequisite(s): Graduate standing. Communications, signal and image processing, video
engineering and computer vision. May be repeated for credit. (S/U grading only.) Effective: 2003 Winter Quarter.

EEC 295—Systems, Control and Robotics Seminar (1)
Seminar—1 hour. Prerequisite(s): Graduate standing. Seminars on current research in systems and control by faculty
and visiting experts. Technical presentations and lectures on current topics in robotics research and robotics
technology. May be repeated for credit. (S/U grading only.) Effective: 1998 Winter Quarter.

EEC 296—Photonics Research Seminar (1)
Seminar—1 hour. Prerequisite(s): Graduate standing. Lectures on photonics and related areas by faculty and visiting
experts. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 1998 Winter Quarter.

EEC 298—Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

EEC 299—Research (1-12)
Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

EEC 390—The Teaching of Electrical Engineering (1)
Discussion—1 hour. Prerequisite(s): Meet qualifications for teaching assistant and/or associate-in in Electrical
Engineering. Participation as a teaching assistant or associate-in in a designated engineering course. Methods of
leading discussion groups or laboratory sections, writing and grading quizzes, use of laboratory equipment, and grading laboratory reports. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

EEC 396—Teaching Assistant Training Practicum (1-4)
Variable. Prerequisite(s): Graduate standing. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

Bryan M. Jenkins, Ph.D., Chairperson of the Department

Department Office. 2030 Bainer Hall; 530-752-0102; http://bae.engineering.ucdavis.edu

Energy Minor Programs

There is an urgent need to develop and commercialize technologies for the sustainable conversion and use of energy. The goal of these minors is to prepare students for careers that require training in energy science and technology, efficiency, and policy. Clean technologies and green technologies including energy are some of the fastest growing markets for new investments. Well-trained individuals in all related fields are needed to provide the level of expertise required to advance technology and policy and to satisfy national and global objectives for greater energy sustainability. The minors are designed to accommodate persons of diverse backgrounds with educational interests in areas that may include engineering, science, policy, economics, planning, and management.

Energy Efficiency Minor

All courses must be taken for a letter grade. A grade of C- or better is required for all courses used to satisfy minor requirements with an overall GPA in the required minor courses of 2.000 or better. Only one course overlap allowed between major and minor.

Minor Advisors. F. Loge (Civil and Environmental Engineering), D. Sperling (Institute of Transportation Studies), M. Modera (Western Cooling Efficiency Center)

Energy Minor Programs

There is an urgent need to develop and commercialize technologies for the sustainable conversion and use of energy. The goal of these minors is to prepare students for careers that require training in energy science and
technology, efficiency, and policy. Clean technologies and green technologies including energy are some of the fastest growing markets for new investments. Well-trained individuals in all related fields are needed to provide the level of expertise required to advance technology and policy and to satisfy national and global objectives for greater energy sustainability. The minors are designed to accommodate persons of diverse backgrounds with educational interests in areas that may include engineering, science, policy, economics, planning, and management.

All courses must be taken for a letter grade. A grade of C- or better is required for all courses used to satisfy minor requirements with an overall GPA in the required minor courses of 2.00 or better. Only one course overlap allowed between major and minor.

**Minor Advisors.** D. Niemeier (Department of Civil and Environmental Engineering), J. Ogden (Environmental Science and Policy)

Faculty. https://eec.ucdavis.edu/energy-graduate-group/egg-faculty/

Graduate Study. The Energy Graduate Group offers the M.S. (Plan 1—Thesis, and Plan II—Exam) and Ph.D. degrees in two tracks of study: Energy Science & Technology, and Energy Policy & Management. The program is designed to meet the world’s growing needs for highly qualified, thoughtful and dedicated leaders in sustainable energy systems. Both tracks are aimed at a wide range of students, though Energy Science and technology students are expected to come from disciplinary backgrounds in engineering or the physical sciences, while Energy Management and Policy students are expected to come from a wider range of disciplines interested in economic, policy, business and social aspects of energy systems.

Graduate Advisors. Adam Moule (Energy Science & Technology), Katrina Jessoe (Energy Policy & Management), Julia Fan (Admissions)

**Energy Systems (Graduate Group) | EGG Courses**

**Courses in EGG:**

**EGG 200—Energy Systems (4)**  
Lecture/Discussion—4 hours. Prerequisite(s): ENG 105; or equivalent. Theory and application of energy systems. Systems analysis, energy conversion technologies, environmental considerations, economics and system optimization. (Same course as EBS 216) Effective: 2018 Spring Quarter.

**EGG 201—Life Cycle Assessment for Sustainable Engineering (4)**  
Lecture—4 hours. Enrollment restricted to graduate students. Life cycle assessment methodology. Emphasis on applications to infrastructure and energy systems. Life cycle design, life cycle cost methods, other tools from industrial ecology, and links to policy. Not open to students who have taken ECI 244. (Same course as ECI 244A.) Effective: 2019 Winter Quarter.

**EGG 202—Energy and Climate Policy (4)**  
Extensive Writing/Discussion; Lecture—3 hours. Prerequisite(s): ECN 100A or ARE 100A; or Consent of Instructor. Pass One restricted to graduate students in the following programs: Economics, Energy Graduate Group, and Transportation Technology and Policy Graduate Group. Fundamentals of energy technology, economics, and policy. Survey and analysis of current and prospective climate policies at the local and global level, including but not limited to cap-and-trade, emissions offsets, intensity standards, technology standards, mandates and subsidies. (Same course as ECN 216.) Effective: 2018 Spring Quarter.

**EGG 290—Energy Seminar (1)**  
Seminar—1 hour. Prerequisite(s): Graduate standing or consent of instructor. Selected topics of current interest in energy. Topics vary and will be announced at the beginning of each quarter. Seminar speakers include invited speakers from outside the university as well as faculty. May be repeated for credit when topic differs. (S/U grading only.) Effective: 2018 Fall Quarter.

**EGG 299—Research (1-12)**  
Variable—1-12 hours. Prerequisite(s): Consent of Instructor. Research May be repeated for credit. (S/U grading only.) Effective: 2017 Fall Quarter.

**Engineering**

**Engineering | Engineering Information**

(College of Engineering)

Jennifer Sinclair Curtis, Ph.D., Dean

S. Felix Wu, Ph.D., Associate Dean—Academic Personnel and Planning

Jean S. VanderGheynst, Ph.D., Executive Associate Dean—Research and Graduate Studies

James A. Schaaf Ph.D., Associate Dean—Undergraduate Studies
Undergraduate Study

The college has eight departments:

- Biological and Agricultural Engineering
- Biomedical Engineering
- Chemical Engineering
- Civil and Environmental Engineering
- Computer Science Engineering
- Electrical and Computer Engineering
- Materials Science and Engineering
- Mechanical and Aerospace Engineering

Graduate Study

Graduate degrees (M.S and Ph.D.) are offered in the following engineering disciplines:

- Biological Systems Engineering
- Biomedical Engineering
- Chemical Engineering
- Civil and Environmental Engineering
- Computer Science
- Electrical and Computer Engineering
- Materials Science and Engineering
- Mechanical and Aerospace Engineering
- Transportation Technology and Policy

The Major Programs

Twelve majors, leading to the B.S. degree, are open to students:

- Aerospace Science & Engineering
- Biochemical Engineering
- Biological Systems Engineering
- Biomedical Engineering
- Chemical Engineering
- Civil Engineering
- Computer Engineering
- Computer Science and Engineering
- Electrical Engineering
- Environmental Engineering
- Materials Science and Engineering
- Mechanical Engineering

Minor Programs

The College of Engineering offers nine undergraduate minors:

- Biomedical Engineering (Department of Biomedical Engineering)
- Computational Biology (Department of Computer Science)
- Construction Engineering and Management (Department of Civil and Environmental Engineering)
- Electrical Engineering (Department of Electrical and Computer Engineering)
- Energy Science and Technology (Department of Biological and Agricultural Engineering)
- Energy Policy (Department of Biological and Agricultural Engineering)
- Energy Efficiency (Department of Biological and Agricultural Engineering)
- Materials Science (Department of Materials Science and Engineering)
- Sustainability in the Built Environment (Department of Civil and Environmental Engineering)
Engineering | ENG Courses

Students are encouraged to carefully adhere to all prerequisite requirements. The instructor is authorized to drop students from a course for which stated prerequisites have not been completed.

Courses in ENG:

ENG 001—Introduction to Engineering (1)
Lecture—1 hour. Open to first year students only. Introduction to the role of engineers in the acquisition and development of engineering knowledge, the differences and similarities among engineering fields, and the work ethic and skills required for engineering. (P/NP grading only.) GE credit: SE. Effective: 2011 Fall Quarter.

ENG 002—Creativity and Entrepreneurship for Engineers (3)
Discussion—3 hours. Introduction to entrepreneurial thinking from an engineer's perspective. Focus on identifying entrepreneurial opportunities, developing prototypes, and generating business models. Emphasis on developing a creative and entrepreneurial mindset. GE credit: SE, SS. Effective: 2015 Fall Quarter.

ENG 003—Introduction to Engineering Design (4) Review all entries
Lecture—2 hours; Project (Term Project)—4 hours; Studio—2 hours. Prerequisite(s): Must have satisfied the Entry Level Writing Requirement (ELWR). Pass One restricted to lower division College of Engineering students; Pass Two restricted to lower division students. Introduction to the engineering design process that incorporates the development of oral and written communication skills integral to the design process. Conducted in workshop format with hands-on engagement in the design process. GE credit: OL, SE, SS. Effective: 2017 Winter Quarter.

ENG 004—Engineering Graphics in Design (3)
Laboratory—3 hours; Lecture—2 hours. Engineering design, descriptive geometry, pictorial sketching, computer-aided graphics, and their application in the solution of engineering problems. GE credit: SE, VL. Effective: 2003 Spring Quarter.

ENG 006—Engineering Problem Solving (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (MAT 016A C- or better or MAT 017A C- or better or MAT 021A C- or better); (MAT 016B C- or better (can be concurrent) or MAT 017B C- or better (can be concurrent) or MAT 021B C- or better (can be concurrent)) Methodology for solving engineering problems. Engineering computing and visualization based on MATLAB. Engineering examples and applications. GE credit: QL, SE. Effective: 2013 Spring Quarter.

ENG 007—Technology & Culture of the Internet (4) Review all entries Discontinued
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Basic computer experience recommended. Technology and culture of networked computing and the Internet. Topics include the history and development of networked computing; Internet architecture and services; basics of Web page design and hypertext markup language; political, social, cultural, economic and ethical issues related to the Internet. GE credit: SE. Effective: 2001 Fall Quarter.

ENG 008—Introduction to Entrepreneurship (3)
Lecture—3 hours. Students from all majors will learn the processes involved in modern entrepreneurship and identify an opportunity for innovation. The 3 C's of the entrepreneurial mindset (developed by KEEN) will be covered: Curiosity, Connections, and Creating Values. GE credit: SS. Effective: 2018 Fall Quarter.

ENG 010—The Science Behind the Technology in Our Lives (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): High school algebra. Understanding of how the technology in our lives works using only basic concepts and rudimentary mathematics. GE credit: SE, SS. Effective: 2001 Fall Quarter.
ENG 011—Issues in Engineering (1)  
Review all entries  
Lecture—1 hour. Prerequisite(s): Participation in the MESA Engineering Program or consent of instructor. Designed to broaden the student's understanding of the engineering profession, its methods, principles, design and development process, career opportunities, and professional resources. Effective: 1999 Fall Quarter.

ENG 011—Issues in Engineering (1) Review all entries Discontinued  
Lecture—1 hour. Prerequisite(s): Participation in the MESA Engineering Program or consent of instructor. Designed to broaden the student's understanding of the engineering profession, its methods, principles, design and development process, career opportunities, and professional resources. Effective: 2019 Spring Quarter.

ENG 011A—Issues in Engineering (1)  
Lecture—1 hour. Prerequisite(s): Consent of Instructor. Engineering profession and its role in society; engineering design and development process; introduction to the engineering grand challenges; and professional resources for students. (P/NP grading only.) GE credit: SE. Effective: 2019 Spring Quarter.

ENG 011B—Issues in Engineering (1)  
Lecture—1 hour. Prerequisite(s): Consent of Instructor. Engineering disciplines; the engineering profession's methods, principles, and career opportunities; professional resources for students. No credit for students who have completed ENG 001. (P/NP grading only.) GE credit: SE. Effective: 2019 Spring Quarter.

ENG 017—Circuits I (4)  
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (MAT 022A, MAT 022B (can be concurrent)); (PHY 009C or PHY 009HD); C- or better recommended for each course. Basic electric circuit analysis techniques, including electrical quantities and elements, resistive circuits, transient and steady-state responses of RLC circuits, sinusoidal excitation and phasors, and complex frequency and network functions. GE credit: SE, VL. Effective: 2014 Spring Quarter.

ENG 017—Circuits I (4) Review all entries  
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MAT 021C; C- or better recommended. Basic electric circuit analysis techniques, including electrical quantities and elements, resistive circuits, transient and steady-state responses of RLC circuits, sinusoidal excitation and phasors, and complex frequency and network functions. GE credit: SE, VL. Effective: 2018 Fall Quarter.

ENG 020—Introduction to Space Exploration: Understanding the Technological and Environmental Challenges to Our Exploration of the Solar System (4)  
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): High school level Algebra, Geometry, General Science (Physics and Chemistry). Introductory overview of the space environment. Discussion of space exploration technology including propulsion, orbital mechanics, and spacecraft engineering. GE credit: QL, SE, SL. Effective: 2014 Winter Quarter.

ENG 035—Statics (4)  
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): PHY 009A C- or better; MAT 021D C- or better (can be concurrent) Force systems and equilibrium conditions with emphasis on engineering problems. GE credit: SE. Effective: 2016 Fall Quarter.

ENG 035—Statics (4) Review all entries  
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): PHY 009A C- or better or PHY 009HA C- or better); MAT 021D C- or better (can be concurrent) Force systems and equilibrium conditions with emphasis on engineering problems. GE credit: SE. Effective: 2018 Fall Quarter.

ENG 045—Properties of Materials (4)  
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): (MAT 016C C- or better or MAT 021C C- or better); (CHE 002A C- or better, PHY 009A C- or better) Introductory course on the properties of engineering materials and their relation to the internal structure of materials. Not open for credit to students who have taken ENG 045Y. GE credit: QL, SE, SL, WE. Effective: 2013 Winter Quarter.

ENG 045H—Honors Properties of Materials (1)  
Discussion—1 hour. Prerequisite(s): ENG 045 (can be concurrent) or ENG 045Y (can be concurrent); Enrollment in the Materials Science and Engineering Honors Program; ENG 045 or ENG 045Y required concurrently. Open only to students in the Materials Science and Engineering Honors Program. Examination of special materials science and engineering topics through additional readings, discussions, collaborative work, or special activities which may include projects, laboratory experience or computer simulations. Effective: 2018 Spring Quarter.
ENG 045Y—Properties of Materials (4)  
Laboratory; Web Virtual Lecture. Prerequisite(s): (MAT 016C C- or better or MAT 021C C- or better); CHE 002A; PHY 009A Introductory course on the properties of engineering materials and their relation to the internal structure of materials. Not open for credit to students who have taken ENG 045. GE credit: QL, SE, SL. Effective: 2013 Summer Session 2.

ENG 098—Directed Group Study (1-4)  
Variable. Restricted to College of Engineering students only. May be repeated up to 3 time(s) when content differs. (P/NP grading only.) Effective: 2001 Spring Quarter.

ENG 100—Electronic Circuits and Systems (3)  
Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): ENG 017; C- or better recommended. Introduction to analog and digital circuit and system design through hands on laboratory design projects. Students who have completed EEC 100 may receive only 1.5 units of credit. GE credit: SE, VL. Effective: 2014 Spring Quarter.

ENG 102—Dynamics (4)  
Discussion—1 hour; Lecture—4 hours. Prerequisite(s): ENG 035 C- or better; MAT 022B C- or better Open to College of Engineering students only. Kinematics and kinetics of particles, systems of particles, and of rigid bodies; application of these topics are applied to engineering problems. Only two units of credit allowed to students who have previously taken ENG 036. GE credit: SE, VL. Effective: 2017 Fall Quarter.

ENG 103—Fluid Mechanics (4)  
Discussion—1 hour; Lecture—4 hours. Prerequisite(s): ENG 035 C- or better; MAT 022B C- or better; PHY 009B C- or better Open to students in the College of Engineering and Hydrology majors. Fluid properties, fluid statics, continuity and linear momentum equations for control volumes, flow of incompressible fluids in pipes, dimensional analysis and boundary-layer flows. Not open for credit to students who have completed Chemical Engineering 150A. GE credit: SE. Effective: 2017 Winter Quarter.

ENG 103—Fluid Mechanics (4)  
Discussion—1 hour; Lecture—4 hours. Prerequisite(s): ENG 035 C- or better; MAT 022B C- or better; PHY 009B C- or better Open to students in the College of Engineering and Hydrology majors. Fluid properties, fluid statics, continuity and linear momentum equations for control volumes, flow of incompressible fluids in pipes, dimensional analysis and boundary-layer flows. Not open for credit to students who have completed ECH 150A. GE credit: SE. Effective: 2018 Fall Quarter.

ENG 104—Mechanics of Materials (4)  
Lecture—4 hours. Prerequisite(s): ENG 035 C- or better; MAT 022B C- or better Open to Engineering majors only. Uniaxial loading and deformation. General concepts of stress-strain-temperature relations and yield criteria. Torsion of shafts. Bending of beams. Deflections due to bending. Introduction to stability and buckling. GE credit: QL, SE. Effective: 2010 Summer Session 1.

ENG 104L—Mechanics of Materials Laboratory (1)  
Laboratory—3 hours. Prerequisite(s): ENG 104 Experiments which illustrate the basic principles and verify the analysis procedures used in the mechanics of materials are performed using the basic tools and techniques of experimental stress analysis. GE credit: SE. Effective: 1997 Winter Quarter.

ENG 105—Thermodynamics (4)  
Discussion—1 hour; Lecture—4 hours. Prerequisite(s): MAT 022B C- or better; PHY 009B C- or better Open to College of Engineering students only. Fundamentals of thermodynamics: heat energy and work, properties of pure substances, First and Second Law for closed and open systems, reversibility, entropy, thermodynamic temperature scales. Applications of thermodynamics to engineering systems. GE credit: SE, VL. Effective: 2017 Fall Quarter.

ENG 106—Engineering Economics (3)  
Lecture—3 hours. Prerequisite(s): Upper division standing in Engineering. The analysis of problems in engineering economy; the selection of alternatives; replacement decisions. Compounding, tax, origins and cost of capital, economic life, and risk and uncertainty are applied to methods of selecting most economic alternatives. GE credit: QL, SE, SL, SS, VL. Effective: 1997 Winter Quarter.

ENG 111—Electric Machinery Fundamentals (4)  
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ENG 017 C- or better Principles of AC and DC electric motors and generators, their control systems and power sources. Selection of electric power equipment components based on their construction features and performance characteristics. GE credit: QL, SE, SL, VL. Effective: 2017 Winter Quarter.
ENG 121—Fluid Power Actuators and Systems (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ENG 100 C- or better; ENG 102 C- or better Hydraulic and pneumatic systems with emphasis on analysis and control of actuators. Design of hydraulic and pneumatic systems, specification and sizing of components, and selection of electro-hydraulics/electro-pneumatics, servo valves, and closed loop systems to solve basic control problems. GE credit: QL, SE, SL, VL, WE. Effective: 2011 Fall Quarter.

ENG 122—Introduction to Mechanical Vibrations (4)
Lecture—4 hours. Prerequisite(s): ENG 102 C- or better; (ENG 006 C- or better or ENG 005 C- or better or ECS 030 C- or better); Ability to program in MATLAB. Free and forced vibrations in lumped-parameter systems with and without damping; vibrations in coupled systems; electromechanical analogs; use of energy conservation principles. GE credit: SE. Effective: 2017 Fall Quarter.

ENG 160—Environmental Physics and Society (3)
Lecture—3 hours. Prerequisite(s): (PHY 009D or PHY 010 or PHY 001B); MAT 016B; Or the equivalent of MAT 016B. Impact of humankind on the environment will be discussed from the point of view of the physical sciences. Calculations based on physical principles will be made, and the resulting policy implications will be considered. In the College of Engineering, students may receive only one unit of credit towards the Technical Electives requirement. (Same course as PHY 160.) GE credit: SE, SL. Effective: 1997 Winter Quarter.

ENG 180—Engineering Analysis (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ENG 006 C- or better or EME 005 C- or better or ECS 030 C- or better); (MAT 021D C- or better, MAT 022B C- or better) Solutions of systems of linear and nonlinear algebraic equations; approximation methods; solutions of ordinary differential equations; initial and boundary value problems; solutions of partial differential equations of Elliptic, parabolic, and hyperbolic types; Eigen value problems. GE credit: SE. Effective: 2013 Fall Quarter.

ENG 188—Science and Technology of Sustainable Power Generation (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): PHY 007C or PHY 009C; Upper-division standing. Focus on scientific understanding and development of power generation that is the basis of modern society. Concentration on power generation methods that are sustainable, in particular, discussion of the most recent innovations. GE credit: SS. Effective: 2012 Fall Quarter.

ENG 190—Professional Responsibilities of Engineers (3)
Lecture—3 hours. Restricted to upper-division students in the College of Engineering. Organization of the engineering profession; introduction to contracts, specifications, business law, patents, and liability; discussion of professional, ethical, societal, and political issues related to engineering. GE credit: SS. Effective: 2013 Winter Quarter.

ENG 198—Directed Group Study (1-5)
May be repeated up to 3 time(s) content changes. (P/NP grading only.) GE credit: SE. Effective: 2001 Winter Quarter.

ENG 250—Technology Management (3)

English

English | ENL Information
(College of Letters and Science)

Faculty. http://english.ucdavis.edu/people/faculty

English | ENL A.B.
(College of Letters and Science)
John Marx, Ph.D., Chairperson of the Department
The study of English develops skills in reading analytically and perceptively and in writing clearly and effectively.

The Program. The English department offers three kinds of courses: composition courses, undergraduate courses, and graduate courses. Composition courses develop skills in reading analytically and in writing persuasively. Undergraduate and graduate courses cover the entire range of English and American literature, as well as creative writing. Students majoring in English may elect a creative writing emphasis or a literature, criticism, and theory emphasis. All majors take courses introducing them to the literatures of various periods and places, to critical theory, and to frontiers of literary expression, such as the relationship of literature to environmentalism or the emergence of new media. The creative writing emphasis focuses on fiction, poetry, and article writing. The literature, criticism, and theory emphasis focuses on advanced critical analysis and research. All majors have the opportunity to work with distinguished writers, critics, scholars, and teachers.

Career Alternatives. Graduates have found the major excellent pre-professional training for careers in teaching, writing, law, medicine, library work, journalism, and more. Many graduates are employed in publishing, marketing, advertising, or the tech sector. Others have worked in local, state, and federal government agencies, as well as in industry. Many have gone on to graduate study in a wide range of fields including English, education, counseling, and more.

English Majors. Up to four upper division units in a national literature other than English or American, or in Comparative Literature, may count toward the requirements of the major.

Major Advising. All new and prospective English majors are encouraged to see an undergraduate staff advisor, individually, once per year, at minimum.

Foreign Languages. Students who contemplate advanced study in English should prepare for foreign language requirements for higher degrees and should consult with the graduate advisor.

Undergraduate Advisor. See Department website at http://english.ucdavis.edu or the Departmental Advising Office in 177/179 Voorhies Hall.

Honors and Honors Program. A Senior Honors Program is available to an invited group of English majors, who prepare and write a Senior Thesis (either a research paper or creative writing) in their final year. The critical honors program consists of four units of 194H and four units of 195H, normally taken during Winter and Spring quarters of the senior year. The creative writing honors program consists of four units of 100FA or 100PA, normally taken during Spring quarter of the junior year, and four units of 195H, normally taken Winter quarter of the senior year. Completion of the program is a prerequisite for High or Highest Honors at graduation. Eligibility criteria and application materials may be obtained at the Undergraduate Advising office in 177 Voorhies Hall or by accessing the Department website at http://english.ucdavis.edu. For more details, see Graduation Honors.

Education Abroad Options. The department strongly encourages interested students to pursue their studies abroad. It is possible for students to complete significant portions of the English major provided that the course is evaluated as at least four UC Davis units; the course is considered upper division by the standards set forth by UC Davis Study Abroad; the student presents copies of the coursework, syllabus, and writing assignments to the department’s advising staff.

Teaching Credential Subject Representative. See the Teacher Education program.

Graduate Study. The Department of English offers programs of study and research leading to the M.A. in literature and creative writing and the Ph.D. in literature. Detailed information may be obtained from the graduate advisor or the Chairperson of the Department.
The department’s affiliation with the Critical Theory Program also provides the opportunity for students in English to prepare for the designated emphasis in Critical Theory (an interdisciplinary program in theories and methodologies in the humanities and social sciences).

**Graduate Director.** Desiree Martin, Ph.D.

**Entry Level Writing.** Students must have met the Entry Level Writing requirement before taking any course in English.

**Prerequisites.** ENL 003 or UWP 001 is required for admission into all preparatory courses (040, 043, 044, 045, 010A, 010B, 010C), and all upper division courses, unless otherwise stated in the course listings. COM 001, 002, 003, or 004 or NAS 005 may normally be substituted for ENL 003 or UWP 001.

**Historical Distribution Requirements**

Choose three courses focusing on literature written in English before 1800, at least one of which must be on literature written primarily before 1500:

**Before 1500**

- ENL 111 Topics in Medieval Literature
- ENL 113A Chaucer: Troilus and the "Minor" Poems
- ENL 113B Chaucer: The Canterbury Tales

**1500-1800**

- ENL 115 Topics in Sixteenth and Seventeenth Century Literature
- ENL 117 Shakespeare
- ENL 122 Milton
- ENL 123 18th-Century British Literature
- ENL 142 Early American Literature
- ENL 150A British Drama to 1800
- ENL 155A 18th-Century British Novel
- ENL 185A Women’s Writing I

Choose one course focusing on literature written in English between 1800 and 1900:

- ENL 130 British Romantic Literature
- ENL 133 19th-Century British Literature
- ENL 143 19th-Century American Literature to the Civil War
- ENL 144 Post-Civil War American Literature
- ENL 155B 19th-Century British Novel
- ENL 158A The American Novel to 1900
- ENL 181A African American Literature to 1900
- ENL 185B Women’s Writing II
Choose one course focusing on literature written in English between 1900 and present:

The Major Program

The study of English develops skills in reading analytically and perceptively and in writing clearly and effectively.

The Program. The English department offers three kinds of courses: composition courses, undergraduate courses, and graduate courses. Composition courses develop skills in reading analytically and in writing persuasively. Undergraduate and graduate courses cover the entire range of English and American literature, as well as creative writing. Students majoring in English may elect a creative writing emphasis or a literature, criticism, and theory emphasis. All majors take courses introducing them to the literatures of various periods and places, to critical theory, and to frontiers of literary expression, such as the relationship of literature to environmentalism or the emergence of new media. The creative writing emphasis focuses on fiction, poetry, and article writing. The literature, criticism, and theory emphasis focuses on advanced critical analysis and research. All majors have the opportunity to work with distinguished writers, critics, scholars, and teachers.

Career Alternatives. Graduates have found the major excellent pre-professional training for careers in teaching, writing, law, medicine, library work, journalism, and more. Many graduates are employed in publishing, marketing, advertising, or the tech sector. Others have worked in local, state, and federal government agencies, as well as in industry. Many have gone on to graduate study in a wide range of fields including English, education, counseling, and more.

English

Five upper division courses; at least four of which will be literature courses.

Units: 20

Total: 20

English | ENL Courses

Courses in ENL:

ENL 003—Introduction to Literature (4)
Lecture/Discussion—4 hours. Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR). Introductory study of several genres of English literature, emphasizing both analysis of particular works and the range of forms and styles in English prose and poetry. Frequent writing assignments will be made. GE credit: AH, WE. Effective: 2012 Winter Quarter.

ENL 003A—Writers’ Workshop (2)
Discussion/Laboratory—2 hours. Concurrent enrollment in a lower division writing course required, preferably ENL 003; if necessary, based upon demand and academic advisor approval, students may concurrently enroll in an equivalent course instead; e.g., UWP 001 or NAS 005. Writing course focuses on the development of writing and
revision strategies, exploring ways to understand a writing task; to develop appropriate content for a writing task; to revise content to reflect competence as a communicator. Effective: 2018 Fall Quarter.

**ENL 004**—Critical Inquiry and Literature: Freshman Seminar (4)
Seminar—4 hours. Prerequisite(s): Consent of Instructor. Completion of Entry Level Writing Requirement (ELWR). Enrollment limited to freshmen. Critical inquiry into significant literary texts. Emphasis on close reading, classroom dialogue, and the writing of several papers or a longer seminar paper. GE credit: AH, WE. Effective: 2018 Fall Quarter.

**ENL 005F**—Introduction to Creative Writing: Fiction (4)
Lecture/Discussion—4 hours. Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR). Elementary principles of writing fiction. Write both in prescribed forms and in experimental forms of their own choosing. No final examination. May be repeated up to 1 time(s). GE credit: AH, WE. Effective: 2017 Winter Quarter.

**ENL 005NF**—Introduction to Creative Writing: Non-Fiction (4)
Lecture/Discussion—4 hours. Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR). Elementary principles of writing creative non-fiction. Work in prescribed literary forms (such as essay, meditation, biography, memoir, book review, documentary, or experimental non-fiction forms) and forms of students' choosing. No final examination. May be repeated up to 1 time(s) when instructor differs. GE credit: AH, WE. Effective: 2014 Winter Quarter.

**ENL 005P**—Introduction to Creative Writing: Poetry (4)
Lecture/Discussion—4 hours. Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR). Elementary principles of writing poetry. Write both in prescribed forms and in experimental forms of their own choosing. No final examination. May be repeated up to 1 time(s). GE credit: AH. Effective: 2014 Winter Quarter.

**ENL 010A**—Literatures in English I: To 1700 (4)
Extensive Writing/Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y; Or equivalent. Historical introduction to English language and literature from 800-1700. Linguistic borrowing, innovation, and change. Emergence of key literary genres. Colonial America as a new site of English literary production and consumption. GE credit: AH, WE. Effective: 2018 Winter Quarter.

**ENL 010B**—Literatures in English II: 1700-1900 (4)
Extensive Writing/Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y; Or equivalent. Historical introduction to English language and literature from 1700-1900. Linguistic borrowing, innovation, colonization, and change. Emergence and development of key literary genres. America, Britain, Ireland, Scotland, and India as important sites of English literary production and consumption. GE credit: AH, WE. Effective: 2018 Winter Quarter.

**ENL 010C**—Literatures in English III: 1900 to Present (4)
Extensive Writing/Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y; Or equivalent. Historical introduction to English language and literature from 1900-present. Linguistic borrowing, innovation, and change. Emergence and development of key literary genres. Formal experimentation. Modernism as transnational phenomenon. GE credit: AH, WE. Effective: 2018 Winter Quarter.

**ENL 040**—Introductory Topics in Literature (4)
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y; Or equivalent. Study of a special topic. Literature written in English in any period or place or genre. Thematic, formal, or temporal focus. May be repeated up to 2 time(s) content differs. GE credit: AH, WE. Effective: 2018 Winter Quarter.

**ENL 041**—Introductory Topics in Literature and Media (4)
Film Viewing—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): ENL 003 or (UWP 001 or UWP 001V or UWP 001Y); Or equivalent. Study of a topic centered on the relationships between literature and moving-image media. May be repeated up to 2 time(s) when content differs. GE credit: AH, VL, WE. Effective: 2018 Spring Quarter.

**ENL 042**—Approaches to Reading (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ENL 003 or (UWP 001 or UWP 001V or UWP 001Y); Or equivalent. Close reading and interpretation of literature from a variety of traditional and contemporary approaches. Topics include traditional textual and historical approaches; new criticism; formalism; psychological criticism; feminism and gender; reader-response; materialist approaches. Frequent written assignments. GE credit: AH, WE. Effective: 2018 Spring Quarter.

**ENL 043**—Introductory Topics in Drama (4)
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y;
Or equivalent. Close reading of, and topics relating to selected works of British and American drama from a range of historical periods. May be repeated up to 2 time(s) when content differs. GE credit: AH, WE. Effective: 2018 Winter Quarter.

ENL 044—Introductory Topics in Fiction (4)
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): ENL 003 or (UWP 001 or UWP 001V or UWP 001Y); Or equivalent. Close reading of, and topics relating to, British and American Fiction: short stories, novellas, novels. May be repeated up to 2 time(s) when content differs. GE credit: AH, WE. Effective: 2018 Spring Quarter.

ENL 045—Introductory Topics in Poetry (4)
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): ENL 003 or (UWP 001 or UWP 001V or UWP 001Y); Or equivalent. Topical study and close reading of selections from English and American poetry. May be repeated up to 2 time(s) when content differs. GE credit: AH, WE. Effective: 2018 Spring Quarter.

ENL 051—Hot Bars, Supreme Lyrics, and Rhymes for Days: Hip Hop as Poetry (3)
Lecture/Discussion—3 hours. Literary approaches to hip hop as poetry. Formal examination of rap lyrics in relation to technology, visual expression, dance, and knowledge production. Historical and cultural consideration of race, ethnicity, gender, urban culture, and politics. GE credit: ACGH, AH, DD. Effective: 2018 Winter Quarter.

ENL 052—Pop Culture Shakespeare (3)
Lecture/Discussion—3 hours. Critical approaches to the study of Shakespeare's afterlife in contemporary American media. Focus on visual, audio, and kinesthetic modes of analysis and presentation. Relation of Shakespeare to contemporary society, politics, media, and economics. GE credit: AH, DD, VL. Effective: 2018 Winter Quarter.

ENL 053—Youth in Revolt (3)

ENL 072—Introduction to Games (4)
Extensive Writing/Discussion—1 hour; Lecture—3 hours. Introduction to the history, theory, and practice of play. Survey of both analog and digital games. Overview of gaming cultures, aesthetics, industries, and technologies. (Same course as CDM 072.) GE credit: AH, VL. Effective: 2017 Fall Quarter.

ENL 092—Internship in English (1-12)
Internship—3-36 hours. Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y; and Consent of Instructor. Internships in fields where students can practice their skills. May be repeated for credit for a total of 12 units. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 2018 Winter Quarter.

ENL 098—Directed Group Study (1-5)
Variable. Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y; and Consent of Instructor. (P/NP grading only.) Effective: 2018 Winter Quarter.

ENL 098F—Student Facilitated Course (1-4)
Variable—1-4 hours. Prerequisite(s): ENL 003 or (UWP 001 or UWP 001V or UWP 001Y); Consent of Instructor. Student facilitated course intended primarily for lower division students. (P/NP grading only.) Effective: 2018 Winter Quarter.

ENL 099—Special Study for Undergraduates (1-5)
(P/NP grading only.) Effective: 1997 Winter Quarter.

ENL 100F—Creative Writing: Fiction (4)
Discussion—4 hours. Prerequisite(s): ENL 005F or ENL 005P; ENL 005NF; and Consent of Instructor. Priority given to English (Creative Writing) majors. Writing of fiction. May be repeated for credit with consent of instructor. No final examination. Effective: 2017 Winter Quarter.

ENL 100FA—Creative Writing Advanced Fiction (4)
Discussion—4 hours. Prerequisite(s): ENL 100F Priority given to English majors; admission by application only. Development and evaluation of students' work in prose, primarily in the workshop format. Some reading and discussion of published novels and short stories. Conferences with individual students once per quarter. May be repeated up to 1 time(s) with consent of instructor. Effective: 2011 Fall Quarter.

ENL 100NF—Creative Writing: Non-Fiction (4)
Discussion—4 hours. Prerequisite(s): ENL 005F or ENL 005P or ENL 005NF; and Consent of Instructor. Priority
given to English (Creative Writing) majors. Writing of non-fiction. May be repeated for credit with consent of instructor. No final examination. Effective: 2017 Winter Quarter.

**ENL 100P—Creative Writing: Poetry (4)**
Discussion—4 hours. Prerequisite(s): ENL 005F or ENL 005P or ENL 005NF; and Consent of Instructor. Priority given to English (Creative Writing) majors. Writing of poetry. May be repeated for credit with consent of instructor. Effective: 2007 Winter Quarter.

**ENL 100PA—Creative Writing Advanced Poetry (4)**
Discussion—4 hours. Prerequisite(s): ENL 100P Priority to English majors; admission by application only. Development and evaluation of students' work in poetry, primarily in the workshop format. Some reading and discussion of published works of poetry. Conferences with individual students once per quarter. May be repeated up to 1 time(s) with consent of instructor. Effective: 2011 Fall Quarter.

**ENL 105—History of the English Language (4)**
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): ENL 003 or (UWP 001 or UWP 001V or UWP 001Y); Or the equivalent. History of the English language. Examination of the language as recorded from Old English to present-day English. Relationship of English to other languages; development of vocabulary, phonology, and grammatical patterns. GE credit: AH, WE. Effective: 2018 Spring Quarter.

**ENL 106—English Grammar (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ENL 003 or LIN 001 or UWP 001 or UWP 001V or UWP 001Y; or Consent of Instructor. Survey of present-day English grammar as informed by contemporary linguistic theories. The major syntactic structures of English; their variation across dialects, styles, and registers; their development; and their usefulness in describing the conventions of English. (Same course as LIN 106 and UWP 106.) GE credit: AH. Effective: 2018 Winter Quarter.

**ENL 106P—English Grammar Practicum (2)**
Discussion—2 hours. Prerequisite(s): ENL 106; LIN 106 (can be concurrent) Practice in teaching the principles of grammar to the kinds of audiences teachers encounter in California. Discussions with teachers who teach in these areas. Examination of pedagogical research on teaching grammar. (P/NP grading only.) Effective: 2000 Fall Quarter.

**ENL 107—Freedom of Expression (4)**
Lecture—3 hours; Term Paper. Prerequisite(s): ENL 003 or (UWP 001 or UWP 001V or UWP 001Y); Or the equivalent. Historical development of fundamental issues and contemporary controversies about freedom of expression, with emphasis on literary and artistic censorship. GE credit: AH, WE. Effective: 2018 Spring Quarter.

**ENL 110A—Introduction to Literary Theory (4)**
Extensive Writing/Discussion—1 hour; Lecture/Discussion—3 hours. Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y Key theoretical terms, concepts, and thinkers from the Greeks to the modern era. GE credit: AH, WE. Effective: 2018 Winter Quarter.

**ENL 110B—Introduction to Modern Literary and Critical Theory (4)**
Extensive Writing/Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y History of literary criticism in the modern era, with emphasis on the ties with the past and the special problems presented by modern literary theory. GE credit: AH, WE. Effective: 2018 Spring Quarter.

**ENL 111—Topics in Medieval Literature (4)**
Extensive Writing/Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y; Or the equivalent. Historically or thematically focused intensive examination of selected topics in Medieval British literature. GE credit: AH, WC, WE. Effective: 2018 Spring Quarter.

**ENL 113A—Chaucer: Troilus and the "Minor" Poems (4)**
Extensive Writing/Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y; Or the equivalent. Development of the poet's artistry and ideas from his first work to his masterpiece, "Troilus and Criseyde." GE credit: AH, WC, WE. Effective: 2018 Spring Quarter.

**ENL 113B—Chaucer: The Canterbury Tales (4)**
Extensive Writing/Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y; Or the equivalent. Literary analysis of the complete "Canterbury Tales." Courtly love, literary forms, medieval science and astrology, theology and dogma as they inform the reading of Chaucer's work. GE credit: AH, WC, WE. Effective: 2018 Winter Quarter.
ENL 115—Topics in Sixteenth and Seventeenth Century Literature (4)
Extensive Writing/Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y
Historically or thematically focused study of works of the Renaissance. GE credit: AH, WC, WE. Effective: 2018 Spring Quarter.

ENL 117—Shakespeare (4)
Extensive Writing/Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y; Or the equivalent. Historically, generically, or thematically focused study of Shakespeare’s works. May be repeated up to 2 time(s) content differs. GE credit: AH, WC, WE. Effective: 2018 Winter Quarter.

ENL 120—Law and Literature (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y; Or the equivalent. Historically, thematically, or generically focused study of the relationship between law and literature. GE credit: ACGH, AH, DD, OL, WE. Effective: 2018 Spring Quarter.

ENL 122—Milton (4)
Extensive Writing/Discussion—1 hour; Lecture/Discussion—3 hours. Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y Selected major works, including Paradise Lost. GE credit: AH, WC, WE. Effective: 2018 Winter Quarter.

ENL 123—18th-Century British Literature (4)
Extensive Writing/Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y Historically or thematically focused study of 18th century English literature. GE credit: AH, WC, WE. Effective: 2018 Spring Quarter.

ENL 125—Topics in Irish Literature (4)
Extensive Writing/Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y; Or the equivalent. Intensive study or treatment of special topics relating to the emergence, invention, and re-invention of Irish literature. May be repeated up to 2 time(s) when content differs. GE credit: AH, WC, WE. Effective: 2018 Spring Quarter.

Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

**ENL 199FA—Student Facilitated Course Development (1-4)**
Variable—1-4 hours. Prerequisite(s): ENL 003 or UWP 001 or UWP 001V or UWP 001Y; Consent of Instructor. Under the supervision of a faculty member, an undergraduate student plans and develops the course they will offer under 98F/198F. (P/NP grading only.) Effective: 2018 Winter Quarter.

**ENL 200—Introduction to Graduate Studies in English (4)**
Seminar—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): Graduate standing. Introduction to literary scholarship with special attention to the elements of professionalism and to different modes of literary investigation. (S/U grading only.) Effective: 1997 Winter Quarter.

**ENL 205—Anglo-Saxon Language and Culture (4)**
Lecture—3 hours; Term Paper/Discussion. The language and culture of Anglo-Saxon England; readings in Old English prose and poetry. (S/U grading only.) Effective: 1997 Winter Quarter.

**ENL 206—Beowulf (4)**
Conference; Discussion—3 hours; Term Paper/Discussion. Prerequisite(s): ENL 205; Or the equivalent. A study of the poem and the Heroic Age of Germanic literature. Effective: 1997 Winter Quarter.

**ENL 207—Middle English (4)**
Discussion—3 hours; Term Paper. Study of the phonology, morphology, syntax, and lexicon between 1100 and 1500 with investigation of the regional dialects; pertinent facts on both the internal and external linguistic history; intensive reading of texts. Effective: 1997 Winter Quarter.

**ENL 210—Readings in English and American Literature (4)**
Conference—1 hour; Seminar—3 hours. Prerequisite(s): Upper division course in area studied. Content varies according to specialty of instructor. May be repeated for credit topic differs. Effective: 2005 Winter Quarter.

**ENL 225—Topics in Irish Literature (4)**
Conference—1 hour; Seminar—3 hours. Prerequisite(s): Graduate standing. Varied topics, including the nineteenth-century novel, contemporary Irish poetry, rise of the drama, or a study of a major author. May be repeated for credit topic differs. Effective: 2004 Fall Quarter.

**ENL 230—Study of a Major Writer (4)**
Conference—1 hour; Seminar—3 hours. Artistic development of one major writer and his intellectual and literary milieu. May be repeated for credit different writer is studied. Effective: 1997 Winter Quarter.

**ENL 232—Problems in English Literature (4)**
Conference—1 hour; Seminar—3 hours. Selected issues in the current study and critical assessment of a limited period or topic in English literature. May be repeated for credit different period or topic is studied. Effective: 1997 Winter Quarter.

**ENL 233—Problems in American Literature (4)**
Conference—1 hour; Seminar—3 hours. Selected topics for intensive investigation. May be repeated for credit different topic or period is studied. Effective: 1997 Winter Quarter.

**ENL 234—Dramatic Literature (4)**
Conference—1 hour; Lecture—3 hours. Historical introduction to dramatic theory; the genres of tragedy, comedy, and tragi-comedy. May be repeated for credit topic differs. Effective: 2004 Fall Quarter.

**ENL 235—Theory of Fiction (4)**
Conference—1 hour; Seminar—3 hours. Prerequisite(s): Graduate standing. Theories of fiction as they relate to the professional writer's practice of the craft. For students in the Creative Writing Program. May be repeated for credit focus differs. Effective: 1998 Spring Quarter.

**ENL 236—Poetics (4)**
Conference—1 hour; Seminar—3 hours. Prerequisite(s): Graduate standing. Theories of poetry as revealed in structure, prosody, and idiom of British and American poems, variably approached-through intensive study of a single poet, historically, or theoretically-at the instructor's discretion. For students in the Creative Writing Program. May be repeated for credit focus differs. Effective: 1998 Spring Quarter.
ENL 237—Seminar for Writers (4)
Extensive Writing; Seminar—3 hours. Prerequisite(s): Graduate standing. Varied topics in the study of literature and literary culture craft and poetics from the perspective of the writer/practitioner. May be repeated up to 2 time(s) if focus differs. Effective: 2015 Fall Quarter.

ENL 238—Special Topics in Literary Theory (4)
Seminar—3 hours; Term Paper. Prerequisite(s): ENL 237; Or the equivalent. Advanced topics in literary theory and criticism. Preparation and evaluation of research paper. May be repeated for credit when topic and/or reading list differs. Effective: 1997 Winter Quarter.

ENL 240—Medieval Literature (4)
Conference—1 hour; Seminar—3 hours. Studies of Medieval literature. Course materials to be selected by the instructor. Preparation and evaluation of research papers. May be repeated for credit different topic is studied. Effective: 1998 Fall Quarter.

ENL 242—Sixteenth-Century Literature (4)
Conference—1 hour; Seminar—3 hours. Studies in sixteenth-century literature. Course materials to be selected by the instructor. Preparation and evaluation of research papers. May be repeated for credit different topic is studied. Effective: 1997 Winter Quarter.

ENL 244—Shakespeare (4)
Conference—1 hour; Seminar—3 hours. Studies in Shakespeare. Course materials to be selected by the instructor. Preparation and evaluation of research papers. May be repeated for credit different topic is studied. Effective: 1998 Fall Quarter.

ENL 246—Seventeenth-Century Literature (4)
Conference—1 hour; Seminar—3 hours. Studies in seventeenth-century literature. Course materials to be selected by the instructor. Preparation and evaluation of research papers. May be repeated for credit different topic is studied. Effective: 1998 Fall Quarter.

ENL 248—Eighteenth-Century Literature (4)
Conference—1 hour; Seminar—3 hours. Studies in eighteenth-century literature. Course materials to be selected by the instructor. Preparation and evaluation of research papers. May be repeated for credit different topic is studied. Effective: 1997 Winter Quarter.

ENL 250—Romantic Literature (4)
Conference—1 hour; Seminar—3 hours. Studies in Romantic literature. Course materials to be selected by the instructor. Preparation and evaluation of research papers. May be repeated for credit different topic is studied. Effective: 1997 Winter Quarter.

ENL 252—Victorian Literature (4)
Conference—1 hour; Seminar—3 hours. Studies in Victorian literature. Course materials to be selected by the instructor. Preparation and evaluation of research papers. May be repeated for credit different topic is studied. Effective: 1997 Winter Quarter.

ENL 254—Twentieth-Century British Literature (4)
Conference—1 hour; Seminar—3 hours. Studies in twentieth-century British literature. Course materials to be selected by the instructor. Preparation and evaluation of research papers. May be repeated for credit different topic is studied. Effective: 1997 Winter Quarter.

ENL 256—Early American Literature (4)
Conference—1 hour; Seminar—3 hours. Studies in Early American literature. Course materials to be selected by the instructor. Preparation and evaluation of research papers. May be repeated for credit different topic is studied. Effective: 1997 Winter Quarter.

ENL 258—American Literature: 1800 to the Civil War (4)
Conference—1 hour; Seminar—3 hours. Studies in American literature from 1800 to Civil War. Course materials to be selected by the instructor. Preparation and evaluation of research papers. May be repeated for credit different topic is studied. Effective: 1997 Winter Quarter.

ENL 260—American Literature: Civil War to 1914 (4)
Conference—1 hour; Seminar—3 hours. Studies in American literature from the Civil War to 1914. Course materials to be selected by the instructor. Preparation and evaluation of research papers. May be repeated for credit different topic is studied. Effective: 1997 Winter Quarter.
ENL 262—American Literature after 1914 (4)
Conference—1 hour; Seminar—3 hours. Studies in American literature after 1914. Course materials to be selected by the instructor. Preparation and evaluation of research papers. May be repeated for credit different topic is studied. Effective: 1998 Fall Quarter.

ENL 264—Studies in Modern British and American Literature (4)
Conference—1 hour; Seminar—3 hours. Studies in modern British and American literature. Course materials to be selected by the instructor. Preparation and evaluation of research papers. May be repeated for credit different topic is studied. Effective: 1998 Fall Quarter.

ENL 270—Studies in Contemporary World Literature (4)
Conference—1 hour; Seminar—3 hours. Prerequisite(s): Graduate standing, consent of instructor, with preference given to those enrolled in the masters program in Creative Writing. Emerging global, international or transnational techniques, theories, and individual works of contemporary world prose or poetry. Discussion, seminar reports, research papers. May be repeated for credit topic differs. Effective: 1998 Spring Quarter.

ENL 275—Proseminar in Research Practices (2)
Lecture/Discussion—2 hours. Must have passed Departmental Preliminary Exam. Study of various practical and technical skills needed to perform research in literary studies. Materials to be selected by the instructor. Evaluation based on student projects that involve hands-on application of skills taught in the proseminar. May be repeated for credit when content differs. Effective: 2016 Fall Quarter.

ENL 280—Seminar in Research Practices (4)
Lecture/Discussion—3 hours; Project (Term Project). Must have passed Departmental Preliminary Exam. Study of various practical and technical skills needed to perform research in literary studies. Course materials to be selected by the instructor. Evaluation based on student projects that involve hands-on application of skills taught in the seminar. May be repeated for credit when content differs. Effective: 2016 Fall Quarter.

ENL 285—Literature by Women (4)
Conference—1 hour; Seminar—3 hours. Studies in literature by women and the theoretical approaches to literature by women. Course materials to be selected by the instructor. Preparation and evaluation of research papers. May be repeated for credit topic and/or reading list differs. Effective: 1997 Winter Quarter.

ENL 287—Topics in Literature and Media (4)
Film Viewing—3 hours; Seminar—3 hours. Prerequisite(s): Graduate standing. Study of a topic centered on film or other moving-image media. Course materials to be selected by the instructor. Preparation and evaluation of research papers. May be repeated for credit topic and/or material differs. Effective: 2009 Fall Quarter.

ENL 288—Prospectus Workshop (2)
Conference—2 hours. Must have passed Departmental Preliminary Exam. Training in writing the dissertation prospectus. Participation in group discussions of preparatory assignments and final proposal. (S/U grading only.) Effective: 2011 Fall Quarter.

ENL 289—Article Writing Workshop (2)
Conference—2 hours. Prerequisite(s): Consent of Instructor. Class size limited to 12 students; nomination for admission by Dissertation Director. Training in preparing an article for publication. Participation in group discussions of article drafts. May be repeated up to 1 time(s). (S/U grading only.) Effective: 2011 Fall Quarter.

ENL 290—Creative Writing: Special Topic (4)
Conference—1 hour; Seminar—3 hours. Prerequisite(s): Consent of Instructor. Writing that falls outside the generic confines of traditional genres (fiction, poetry, and nonfiction) or traditional workshop formats. Evaluation of written materials and individual student conferences. May be repeated for credit. Effective: 2015 Fall Quarter.

ENL 290F—Creative Writing: Fiction (4)
Conference—1 hour; Seminar—3 hours. Prerequisite(s): Consent of Instructor. Graduate standing, with preference given to those enrolled in master's program in Creative Writing. Writing of prose fiction. Evaluation of written materials and individual student conferences. May be repeated for credit. Effective: 2016 Winter Quarter.

ENL 290NF—Creative Writing: Non-Fiction (4)
Conference—1 hour; Seminar—3 hours. Prerequisite(s): Consent of Instructor. Graduate standing; with preference given to those enrolled in the master's program in Creative Writing. Writing of literary non-fiction, with emphasis on autobiography, biography, memoir, the occasional or nature essay, or other non-fiction prose narratives. May be repeated for credit. Effective: 2016 Winter Quarter.
ENL 290P—Creative Writing: Poetry (4)
Conference—1 hour; Seminar—3 hours. Prerequisite(s): Consent of Instructor. Graduate standing, with preference
given to those enrolled in master's program in Creative Writing. Writing of poetry. Evaluation of written materials
and individual student conferences. May be repeated for credit. Effective: 2016 Winter Quarter.

ENL 298—Directed Group Study (1-5)
Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

ENL 299—Individual Study (1-12)
Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

ENL 299D—Special Study for the Doctoral Dissertation (1-12)
Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

ENL 391—Teaching Creative Writing (2)
Discussion—2 hours. Prerequisite(s): Graduate standing; appointment as Teaching Assistant in the English
Department. Designed for new instructors of English 5F or 5P; discussion of ways to facilitate creative writing
workshops and to respond to student manuscripts. (S/U grading only.) Effective: 2007 Winter Quarter.

ENL 393—Teaching Literature and Composition (2)
Discussion—2 hours. Prerequisite(s): Graduate standing; appointment as Teaching Assistant in the English
Department. Designed for new instructors of English 3 or the equivalent courses; discussion of problems related to
teaching literature and composition to lower division students. (S/U grading only.) Effective: 2007 Winter Quarter.

ENL 396—Teaching Assistant Training Practicum (1-4)
Variable. Prerequisite(s): Graduate standing. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter
Quarter.

Faculty. http://entomology.ucdavis.edu/Faculty/ 

The Major Program
The Entomology major is a general biological science program. The curriculum is designed to develop an
understanding of fundamental biological concepts by studying insects. Insects offer unique opportunities to study
biological systems and are model experimental animals. Many insects are either pests, or beneficial species that
have great importance to the economy, environment or public health. Students may focus on specific areas of
interest including agricultural entomology, insect systematics and evolution; behavior and ecology; medical
entomology; and insect molecular biology, physiology and toxicology.
The Program. Students begin their study in entomology with selected insect biology courses. After completing these courses, students may enroll in courses in their particular area of interest. The Entomology Faculty encourages students to do research internships in their laboratories.

Career Alternatives. Entomology graduates find careers in many different areas of applied or basic biology. Graduates have the opportunity to continue in professional graduate programs such as veterinary or human medicine, or get advanced degrees leading to careers in biotechnology, conservation biology, or academic teaching and research. Many graduates have participated in internship programs with the California Department of Food and Agriculture and found careers in insect diagnostic laboratories, conducting insect surveys, and/or developing entomological collections. Other graduates have worked in agriculture in the area of insect pest management. Graduates are prepared for managerial and technical positions with state and federal agencies and in agricultural production and supporting industries. Some entomology graduates pursue careers in primary, secondary, and college level science education.

Major Advisors. S. Lawler, S. Nadler

Minor Requirements:

The Department of Entomology has five minor programs open to students in other disciplines who are interested in rounding out their academic study with a concentration in the area of entomology.

Minor Adviser. S. Lawler, S. Nadler

Graduate Study. The Department of Entomology offers a program of study and research leading to the M.S. and Ph.D. degrees. See Graduate Studies and the Graduate Announcement, for further details.

Graduate Advisor. See http://entomology.ucdavis.edu/Graduate/.

Related Courses. See courses in Nematology.

Entomology | ENT Courses

Courses in ENT:

ENT 001—Art, Science and the World of Insects (3)
Laboratory—3 hours; Lecture—3 hours. Fusion of entomology and art to create an appreciation of insect biology, ecology, interactions with humans and importance in human culture. Multidisciplinary approaches in education and career paths in entomology and art will be highlighted. GE credit: AH, OL, SE, SS, VL, WE. Effective: 2013 Fall Quarter.

ENT 002—Biodiversity (3)
Lecture—2 hours; Lecture/Discussion—1 hour. Introduction to nature, scope and geographical distribution of biodiversity (diversity of life, with emphasis on plants and animals, especially insects). Humans and biodiversity - domestication, aesthetics, ethics and valuation. Species richness and "success". Biodiversity through time; monitoring, evaluation and conservation. Biomes-global, continental and Californian. (Same course as EVE 002.) GE credit: SE, SL, WE. Effective: 2013 Fall Quarter.

ENT 010—Natural History of Insects (3)
Lecture—3 hours. Introduction to the insects detailing their great variety, structures and functions, habits, and their significance in relation to plants and animals including man. Designed for students not specializing in entomology. Not open for credit to students who have had ENT 100, but students who have taken this course may take ENT 100 for credit. GE credit: SE, SL. Effective: 2013 Fall Quarter.

ENT 090X—Special Topics in Entomology (2)
Seminar—2 hours. Prerequisite(s): Consent of Instructor. Freshman seminar course for indepth examination of a special topic within the subject area. May be repeated up to 2 time(s). (P/NP grading only.) Effective: 2013 Fall Quarter.

ENT 092—Internship (1-12)
Variable—3-36 hours. Prerequisite(s): Consent of Instructor. Work-learn experience on and off campus in all subject areas offered by the department, supervised by a member of the faculty. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 2013 Fall Quarter.

ENT 099—Special Study for Undergraduates (1-5)
Effective: 2013 Fall Quarter.

ENT 100—General Entomology (4) Review all entries
Lecture—3 hours; Term Paper—1 hour. Prerequisite(s): BIS 001B Biology, anatomy, physiology, development, classification, ecology and relation of insects to human welfare. GE credit: WE. Effective: 2013 Fall Quarter.

ENT 100—General Entomology (4) Review all entries
Lecture—3 hours; Term Paper—1 hour. Prerequisite(s): BIS 002B; or Consent of Instructor. Biology, anatomy,
physiology, development, classification, ecology and relation of insects to human welfare. GE credit: WE. Effective: 2019 Winter Quarter.

**ENT 100L—General Entomology Laboratory (2)**
Laboratory—6 hours. Prerequisite(s): ENT 100 (can be concurrent) Anatomy, development, population ecology, methods of collecting, classification and identification of insects of all orders and of major families. GE credit: VL. Effective: 2013 Fall Quarter.

**ENT 101—Functional Insect Morphology (3)**
Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): ENT 100 Study of the basic external and internal structures, organs and tissues of insects, with emphasis on functional systems. Functional anatomy, histology and fine structures of important organs and tissues will be discussed. Effective: 2013 Fall Quarter.

**ENT 102—Insect Physiology (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ENT 100; Or course in physiology or invertebrate zoology. Processes by which insects maintain themselves, reproduce, and adapt to environment. Insects as models for basic/applied research through detailed analysis of metabolic, physiological, and behavioral processes. Emphasis on analysis of methodology, fact, and theory. GE credit: SE, WE. Effective: 2013 Fall Quarter.

**ENT 103—Insects Systematics (3)**
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): Introductory course in zoology or entomology. Principles and methods of systematics, with particular reference to insects. Emphasis on different theories of classification, and analysis of phylogenetic relationships. Effective: 2013 Fall Quarter.

**ENT 104—Behavioral Ecology of Insects (3)**
Lecture—3 hours. Prerequisite(s): Introductory biology or zoology. Basic principles and mechanisms of insect behavior and ecology. An evolutionary approach to understanding behavioral ecology of insects. Effective: 2013 Fall Quarter.

**ENT 105—Insect Ecology (4)**
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): BIS 002B (can be concurrent); Consent of Instructor. Introduction to insect ecology combining fundamental concepts and questions in ecology with ideas, hypotheses and insights from insects. Integrates aspects of individual, population, community and ecosystem ecology. GE credit: OL, SE, SL, WE. Effective: 2017 Fall Quarter.

**ENT 105—Insect Ecology (4)**
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): BIS 002B (can be concurrent); or Consent of Instructor. Introduction to insect ecology combining fundamental concepts and questions in ecology with ideas, hypotheses and insights from insects. Integrates aspects of individual, population, community and ecosystem ecology. GE credit: OL, SE, SL, WE. Effective: 2019 Spring Quarter.

**ENT 107—California Insect Diversity (5)**
Fieldwork—6 hours; Laboratory—6 hours; Lecture—1 hour. Prerequisite(s): An introductory course in entomology. Survey of the diversity of insects from selected ecological zones in California with emphasis on collection, identification, and natural history. GE credit: SE. Effective: 2013 Fall Quarter.

**ENT 109—Field Taxonomy and Ecology (7)**
Laboratory—36 hours; Lecture—2 hours. Prerequisite(s): An introductory course in entomology or consent of instructor. GE credit: SE. Effective: 2013 Fall Quarter.

**ENT 110—Arthropod Pest Management (5)**
Laboratory—6 hours; Lecture—3 hours. Prerequisite(s): BIS 001B Development of the ecological basis for the integrated pest management paradigm with emphasis on agriculture. Ecological and practical aspects of control tactics. Laboratory emphasizes identification of pests and beneficials of agriculture and urban situations. GE credit: SE, WE. Effective: 2013 Fall Quarter.

**ENT 116—Freshwater Macroinvertebrates (3)**
Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): BIS 002B; Or equivalent. Limited enrollment. Biology, ecology and taxonomy of freshwater macroinvertebrates, including insects, crustaceans, molluscs, worms, leeches, flatworms and others. Adaptations to life in freshwater. Aquatic food webs. Uses of macroinvertebrates in water quality monitoring. Field trips during regular lab hours. GE credit: SE, SL. Effective: 2013 Fall Quarter.

**ENT 116L—Aquatic Insect Collection (2)**
Fieldwork—2 hours; Laboratory—4 hours. Prerequisite(s): ENT 100L or ENT 116 (can be concurrent); Or prior
experience with insect/arthropod identification to Family level. Restricted to 25 students. Collection of aquatic insects and identification to the Family level. Collections will require two, one-day weekend field trips (by arrangement). Collection requirement is 40 Families. Effective: 2016 Fall Quarter.

**ENT 117—Longevity (4)**
Lecture—3 hours; Term Paper—1 hour. Prerequisite(s): Upper division standing or consent of instructor. Nature, origin, determinants, and limits of longevity with particular reference to humans; emphasis on implications of findings from non-human model systems including natural history, ecology and evolution of life span; description of basic demographic techniques including life table methods. (Same course as HDE 117) GE credit: SE, SL, WE. Effective: 2013 Fall Quarter.

**ENT 119—Apiculture (3)**
Lecture—3 hours. Biology and behavior of honeybees; communication, orientation, social organization, foraging activities, honey production, pollination activities. GE credit: OL, SE, VL, WE. Effective: 2016 Fall Quarter.

**ENT 123—Plant-Virus-Vector Interaction (3)**
Lecture—3 hours. Prerequisite(s): BIS 002A; BIS 101; PLB 105, PLP 120, and ENT 100 recommended. Analysis of interactions necessary for viruses to infect plants. Interactions among insect vectors and host plants involved in the plant-virus life cycle. Evolutionary aspects of the molecular components in viral infection and modern approaches to the interdiction of viral movement. (Same course as PBI 123 and PLP 123.) GE credit: SE, SL, WE. Effective: 2014 Winter Quarter.

**ENT 135—Introduction to Biological Control (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ENT 100 or ENT 110 Effective: 2013 Fall Quarter.

**ENT 153—Medical Entomology (3)**
Review all entries
Lecture—3 hours. Prerequisite(s): BIS 001A; BIS 001B; Upper division standing in one of the biological sciences, or consent of instructor. Basic biology and classification of medically important arthropods with special emphasis on the ecology of arthropodborne diseases and principles of their control. Relationships of arthropods to human health. GE credit: SE, SL, WE. Effective: 2013 Fall Quarter.

**ENT 156—Biology of Parasitism (3)**
Review all entries
Lecture/Discussion—3 hours. Prerequisite(s): BIS 001A; or Consent of Instructor. Lectures on the biological and ecological aspects affecting host-parasite relationships using selected examples from protozoan and metazoan fauna. GE credit: SE. Effective: 2019 Winter Quarter.

**ENT 158—Forensic Entomology (3)**
Laboratory—4 hours; Lecture—2 hours. Prerequisite(s): BIS 001B or ENT 100; Upper division standing. Arthropods, their general biology, succession, developmental cycles and population biology in matters of criminal prosecution and civil litigation. Emphasis on basic arthropod biology, ecological and developmental concepts and methods, development of reasoning abilities, implication, development of opinions and evidence. GE credit: WE. Effective: 2013 Fall Quarter.

**ENT 159—Apiculture (3)**
Review all entries
Laboratory—4 hours; Lecture—2 hours. Prerequisite(s): ENT 100; or Consent of Instructor. Upper division standing. Arthropods, their general biology, succession, developmental cycles and population biology in matters of criminal prosecution and civil litigation. Emphasis on basic arthropod biology, ecological and developmental concepts and methods, development of reasoning abilities, implication, development of opinions and evidence. GE credit: WE. Effective: 2013 Fall Quarter.
methods, development of reasoning abilities, implication, development of opinions and evidence. GE credit: WE. Effective: 2019 Winter Quarter.

**ENT 180A—Experimental Ecology and Evolution in the Field (4) Review all entries**
Fieldwork—3 hours; Lecture/Lab—3 hours. Prerequisite(s): (ENT 105 or ESP 100); EVE 100; EVE 101 Experimental design in field ecology. Examination of primary literature, experimental design, independent and collaborative research, analysis of data, development of original research paper based on field experiments. (Same course as EVE 180A.) GE credit: QL, SE, VL. Effective: 2014 Winter Quarter.

**ENT 180A—Experimental Ecology and Evolution in the Field (4) Review all entries**
Fieldwork—3 hours; Lecture/Lab—3 hours. Prerequisite(s): EVE 100 (can be concurrent); (ENT 105 (can be concurrent) or ESP 100 (can be concurrent) or EVE 101 (can be concurrent)); Due to the unusual nature of this course, all prospective students are strongly encouraged to contact the instructor. Experimental design in field ecology. Examination of primary literature, experimental design, independent and collaborative research, analysis of data, development of original research paper based on field experiments. (Same course as EVE 180A.) GE credit: QL, SE, VL, WE. Effective: 2019 Winter Quarter.

**ENT 180B—Experimental Ecology and Evolution in the Field (4) Review all entries**
Fieldwork—3 hours; Lecture/Lab—3 hours. Prerequisite(s): EVE 180A or ENT 180A; (EVE 100 or EVE 101 or ESP 100); ENT 105 Experimental design in field ecology. Examination of primary literature, experimental design, independent and collaborative research, analysis of data, development of original research paper based on field experiments. (Same course as EVE 180B.) GE credit: QL, SE, VL, WE. Effective: 2014 Winter Quarter.

**ENT 180B—Experimental Ecology and Evolution in the Field (4) Review all entries**
Fieldwork—3 hours; Lecture/Lab—3 hours. Prerequisite(s): EVE 180A or ENT 180A Experimental design in field ecology. Examination of primary literature, experimental design, independent and collaborative research, analysis of data, development of original research paper based on field experiments. (Same course as EVE 180B.) GE credit: QL, SE, VL, WE. Effective: 2019 Spring Quarter.

**ENT 192—Internship (1-12)**
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Completion of 84 units. Laboratory experience or fieldwork off and on campus in all subject areas offered in the Department of Entomology. Internships supervised by a member of the faculty. (P/NP grading only.) Effective: 2013 Fall Quarter.

**ENT 197T—Tutoring in Entomology (1-3)**
Discussion—1-3 hours. Leading small discussion groups. Preview assignments and prepare guidelines for discussion. (P/NP grading only.) Effective: 2013 Fall Quarter.

**ENT 198—Directed Group Study (1-5)**
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 2013 Fall Quarter.

**ENT 199—Special Study for Advanced Undergraduates (1-5)**
Variable. (P/NP grading only.) Effective: 2013 Fall Quarter.

**ENT 212—Molecular Biology of Insects and Insect Viruses (3)**

**ENT 214—Vector-borne Infectious Diseases: Changing Patterns (2)**
Lecture/Discussion—2 hours. Prerequisite(s): Open to graduate students, MPVM and MPH students, DVM and medical students with second- or third-year standing. Open to upper division undergraduate students with consent of instructor(s). Vector-borne infectious diseases especially as they relate to changing patterns associated with climatic changes, trade and population movement. (Same course as PMI 214.) Effective: 2013 Fall Quarter.

**ENT 225—Terrestrial Field Ecology (4)**
Fieldwork—12 hours; Seminar—1 hour. Prerequisite(s): Introductory ecology and introductory statistics or consent of instructor. A field course conducted over spring break and four weekends at Bodega Bay, emphasizing student projects. Ecological hypothesis testing, data gathering, analysis and written and oral presentation of results. (Same course as ECK 225 and PBG 225.) Effective: 2013 Fall Quarter.

**ENT 230—Advanced Biological Control (4)**
Laboratory—6 hours; Lecture—2 hours. Prerequisite(s): Graduate or upper division standing in biological science or
consent of instructor. Principles and current issues in biological control of arthropod pests and weeds; laboratory devoted to identification and life history of the major groups of parasitic and predaceous arthropods. Effective: 2013 Fall Quarter.

**ENT 253—Advanced Medical Entomology (3)**
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): One upper division course in Entomology (other than ENT 153) and one course in Microbiology: ENT 153 strongly recommended. An analysis of several anthropod-borne human diseases with emphasis on the relationships of the biology of the vector to the ecology of the disease. Discussion includes demonstration of vectors and techniques. Effective: 2013 Fall Quarter.

**ENT 290—Exploratory Topics in Entomology (2)**
Seminar—2 hours. Interdisciplinary topics in entomology, including innovative applications of entomological concepts to other fields of research and human endeavor (e.g. medicine, technology, art, criminology). May be repeated up to 8 unit(s) when topic differs. Effective: 2013 Fall Quarter.

**ENT 291—Current topics in Medical and Veterinary Entomology (2)**
Seminar—2 hours. Prerequisite(s): ENT 153 Discussions of parasitology, ecology and epidemiology related to vectors of pathogens causing disease in humans and animals. May be repeated up to 1 time(s). Effective: 2013 Fall Quarter.

**ENT 292—Current Topics in Insect Physiology and Behavior (2)**
Seminar—2 hours. Prerequisite(s): ENT 102 if topic is physiology, a course in behavior if topic is behavior, or either if topic bridges both. Analysis of contemporary advances in insect physiology, biochemistry and/or behavior. Interpretation and description of physiological and behavioral mechanisms and functions. Application of general principles to solution of problems in the laboratory and field. May be repeated up to 8 unit(s) topic differs. Effective: 2013 Fall Quarter.

**ENT 293N—Current Topics in Insect Biotechnology and Genomics (2)**
Seminar—2 hours. Prerequisite(s): ENT 212 Discussion of advances in insect biotechnology, including genetic engineering and genomics. May be repeated up to 6 unit(s) topic differs. Effective: 2013 Fall Quarter.

**ENT 294—Current topics in Insect Ecology, Evolution, and Systematics (2)**
Seminar—2 hours. Prerequisite(s): ENT 103; General course in ecology or evolution. Discussions of advanced topics in ecology, evolution and systematics with emphasis on analysis of factors influencing the distribution, abundance, adaptations and evolutionary relationships of insects. Includes consideration of applications of basic theory (e.g. biological control). May be repeated up to 8 unit(s) topic differs. Effective: 2013 Fall Quarter.

**ENT 295—Current Topics in Agricultural Entomology and Bee Biology (2)**
Seminar—2 hours. Prerequisite(s): ENT 110 if topic relates to pests and beneficial predators; ENT 119 if topic is bee biology, either if topic bridges both. Discussion of advanced topics about the biology, ecology, behavior, and management of pest and beneficial insects. May be repeated up to 8 unit(s) if topic differs. Effective: 2013 Fall Quarter.

**ENT 297N—Seminar in Entomology (1)**
Seminar—1 hour. Weekly Entomology seminar. May be repeated up to 9 unit(s) topic differs. (S/U grading only.) Effective: 2013 Summer Quarter.

**ENT 298—Group Study (1-5)**
Variable. (S/U grading only.) Effective: 2013 Fall Quarter.

**ENT 299—Research (1-12)**
Variable. (S/U grading only.) Effective: 2013 Fall Quarter.

**Environmental Engineering**

**Environmental Engineering | Environmental Engineering B.S.**

(College of Engineering)

Amit M. Kanvinde, Ph.D., Chairperson of the Department; 530-754-9471

**Department Office.** 2001 Ghausi Hall; 530-752-0586; [http://cee.engr.ucdavis.edu](http://cee.engr.ucdavis.edu)

**Faculty.** [http://cee.engr.ucdavis.edu/people/faculty-directory/](http://cee.engr.ucdavis.edu/people/faculty-directory/)
Environmental engineers are responsible for designing processes and infrastructure to ensure society has access to safe water, clean air, and healthy ecosystems. Environmental engineers apply knowledge from physics, chemistry, biology and the social sciences to problems in a variety of areas including water and wastewater treatment and ecosystem remediation, analysis of chemical fate and transport in the natural environment, and modeling of hydrologic and atmospheric flows. As climate change creates new challenges, such as in the form of droughts and intense weather events, the field of environmental engineering evolves to meet society’s needs. As an environmental engineering student at UC Davis, you will gain skills that enable you to design sustainable solutions for society.

The Environmental Engineering major started in 2017 and has not yet undergone accreditation review, therefore students who are interested in majoring in environmental engineering are highly encouraged to double major in civil engineering.

Students are encouraged to adhere carefully to all prerequisite requirements. The instructor is authorized to drop students from a course for which stated prerequisites have not been completed. Exclusive of General Education units, the minimum number of units required for the Environmental Engineering major is 136 (72-73 units in lower division and 64-68 units in upper division).

**Total: 136-141**

**Environmental Engineering | ECI Courses**

**Courses in ECI:**

**ECI 003—Civil Infrastructure and Society (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): MAT 021A (can be concurrent) Pass One restricted to lower division students; Civil Engineering majors. Introduction to civil infrastructure and its relationship with society and the natural environment. Exposure to innovative research on civil engineering and environmental systems. Participation in laboratory experiments illustrative of the solution of representative but simplified engineering problems. Not open for credit to upper division students. GE credit: OL, SE, SS. Effective: 2016 Winter Quarter.

**ECI 016—Spatial Data Analysis (2)**
Laboratory—3 hours; Lecture—1 hour. Restricted to Civil Engineering and Biological Systems Engineering majors; non-majors accommodated on a space-available basis. Computer-aided design and geographic information systems in civil engineering practice. GE credit: QL, SE. Effective: 2010 Spring Quarter.

**ECI 019—C Programming for Civil and Environmental Engineers (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): MAT 021A (can be concurrent) Pass One open to Civil Engineering majors and Optical Science and Engineering majors. Computational problem solving techniques for
Civil and Environmental Engineering applications using structured C programming. Algorithm design applied to realistic problems. GE credit: SE. Effective: 2011 Winter Quarter.

**ECI 040—Introduction to Environmental Engineering (4)**
Lecture—4 hours. Prerequisite(s): CHE 002B Pass One open to students in the College of Engineering. Introduction to topics in environmental engineering; discussion on influence of literary work, art, and media on the evolution of environmental engineering practice, relevant laws, and regulations; presentations of historical case studies. GE credit: AH. Effective: 2017 Winter Quarter.

**ECI 090X—Lower Division Seminar (1-4)**
Seminar—1-4 hours. Prerequisite(s): Consent of Instructor. Examination of a special topic in a small group setting. May be repeated for credit. GE credit: SE. Effective: 1997 Winter Quarter.

**ECI 092—Internship for Engineering (1-5)**
Internship. Prerequisite(s): Lower division standing; approval of project prior to period of internship. Supervised work experience in civil engineering. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

**ECI 098—Directed Group Study (1-5)**
Variable. Prerequisite(s): Consent of Instructor. Lower division standing. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

**ECI 099—Special Study for Undergraduates (1-5)**
Variable. Prerequisite(s): Consent of Instructor. Lower division standing. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

**ECI 100—Introduction to Fluid Mechanics for Civil and Environmental Engineers (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ENG 035 C- or better; MAT 022B C- or better; PHY 009B C- or better Pass One restricted to Civil Engineering, Environmental Engineering and Hydrology majors. Fluid flow in civil & environmental engineering, basis for design, buoyancy, hydrostatics, gravity dams, hydraulic modeling: similarity & scaling, conservation laws, flow in bends, nozzles, pipes, pumps, turbines, complimentary lab experiments. Not open for credit to students who have taken ENG 103. GE credit: SE. Effective: 2017 Fall Quarter.

**ECI 114—Probabilistic Systems Analysis for Civil Engineers (4)**
Lecture—4 hours. Prerequisite(s): MAT 021C C- or better Probabilistic concepts and models in engineering. Statistical analysis of engineering experimental and field data. Introduction to stochastic processes and models of engineering systems. Not open for credit to students who have completed STA 120. GE credit: QL, SE. Effective: 2013 Fall Quarter.

**ECI 115—Computer Methods in Civil & Environmental Engineering (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): (ENG 006 or ECS 030); MAT 022B Open to Civil Engineering majors only. Presentation, implementation and application of numerical algorithms and computer models for the solution of practical problems in Civil and Environmental Engineering. GE credit: SE. Effective: 2013 Fall Quarter.

**ECI 115—Computer Methods in Civil & Environmental Engineering (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): (ENG 006 C- or better or ECS 030 C- or better or ECS 032A C- or better); MAT 022B C- or better Open to Civil Engineering majors only. Presentation, implementation and application of numerical algorithms and computer models for the solution of practical problems in Civil and Environmental Engineering. GE credit: SE. Effective: 2020 Winter Quarter.

**ECI 119—Parallel Processing for Engineering Applications. (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): C programming or consent of instructor. Fundamental skills in parallel computing for engineering applications; emphasis on structured parallel programming for distributed memory parallel clusters. No credit allowed for students who have taken ECI 119B. GE credit: SE. Effective: 2005 Spring Quarter.

**ECI 123—Urban Systems and Sustainability (4)**
Lecture—4 hours. Prerequisite(s): Upper division standing. Systems-level approach of how to evaluate and then modify sustainability of urban systems based on interaction with natural environments. Topics include: definition/ metrics of urban sustainability; system analyses of urban systems; enabling technology, policies, legislation; measures and modification of ecological footprints. GE credit: ACGH, DD, SE, SL, SS, WE. Effective: 2006 Fall Quarter.
ECI 125—Building Energy Performance (4)
Lecture—4 hours. Prerequisite(s): Upper division standing in Engineering. Open to students in the College of Engineering. Mechanisms of energy consumption in buildings including end uses, thermal loads, ventilation, air infiltration, thermal energy distribution, and HVAC systems; energy performance simulation; methods and strategies of energy efficiency. GE credit: SE. Effective: 2011 Winter Quarter.

ECI 130—Structural Analysis (4)
Lecture—4 hours. Prerequisite(s): ENG 104 C- or better; MAT 022A Open to Civil Engineering majors. Elastic structural analysis of determinate and indeterminate trusses, beams and frames. Plastic bending and limit analysis. GE credit: QL, SE. Effective: 2014 Winter Quarter.

ECI 131—Matrix Structural Analysis (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ENG 104 C- or better; ENG 006 Open to Engineering majors only. Matrix formulation and computer analysis of statically indeterminate structures. Stiffness and flexibility formulations for elastic structures. Finite element methods for elasticity and bending problems. GE credit: SE. Effective: 2013 Fall Quarter.

ECI 132—Structural Design: Metallic Elements (4) Review all entries
Lecture—4 hours. Prerequisite(s): ECI 130 Design of metallic beams, columns, and other members for various types of loading and boundary conditions; design of connections between members; member performance within structural systems. GE credit: SE, VL. Effective: 2013 Fall Quarter.

ECI 135—Structural Design: Concrete Elements (4) Review all entries
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ECI 130 Restricted to Civil Engineering, Civil Engineering/Materials Science and Engineering, and Materials Science and Engineering majors only. Strength design procedures for columns, rectangular beams, T-beams and beams of general cross-section. Building code requirements for bending, shear, axial load, combined stresses and bond. Introduction to prestressed concrete. GE credit: QL, SE. Effective: 2013 Fall Quarter.

ECI 136—Building Design (4) Review all entries
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): (ECI 130 or ECI 131); (ECI 135 or ECI 132) Design of a building structure for a specific need under the multiple constraints of safety, serviceability, cost and aesthetics. GE credit: SE. Effective: 2017 Fall Quarter.

ECI 137—Construction Principles and Project Management (4)
Laboratory—3 hours; Lecture—3 hours. Restricted to upper division standing in Engineering. Project management, with civil engineering construction and design applications, including project scope, schedule, resources, cost, quality, risk, and control. Construction industry overview. Interactions between planning, design, construction, operations. Construction operations analysis. Contract issues. Project management software, field trips, guest lectures. GE credit: ACGH, OL, QL, SE, SS, VL, WE. Effective: 2013 Fall Quarter.

ECI 138—Earthquake Loads on Structures (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECI 130 or ECI 131 Determination of loads on structures due to earthquakes. Methods of estimating equivalent static lateral forces; response spectrum and time history analysis. Concepts of mass, damping and stiffness for typical structures. Design for inelastic behavior. Numerical solutions and Code requirements. GE credit: SE. Effective: 2013 Fall Quarter.
**ECI 138—Earthquake Loads on Structures (4)**  
*Review all entries*
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECI 130 C- or better or ECI 131 C- or better. Determination of loads on structures due to earthquakes. Methods of estimating equivalent static lateral forces; response spectrum and time history analysis. Concepts of mass, damping and stiffness for typical structures. Design for inelastic behavior. Numerical solutions and Code requirements. GE credit: SE. Effective: 2019 Winter Quarter.

**ECI 139—Advanced Structural Mechanics (4)**  
Lecture—4 hours. Prerequisite(s): ENG 104 C- or better. Review of stress, strain, equilibrium, compatibility, and elastic material behavior. Plane stress and plane strain problems in elasticity; energy methods. Theories for unsymmetric bending, straight and curved beams. Beams on elastic foundations; stresses in plates and shells; elastic stability. GE credit: QL, SE. Effective: 2013 Fall Quarter.

**ECI 140A—Environmental Analysis of Aqueous Systems (4)**  
*Review all entries*
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): CHE 002B C- or better. Introduction to "wet chemical" and instrumental techniques commonly used in the examination of water and wastewater and associated data analysis. Not open for credit to students who have taken ECH 140 or CHE 100. GE credit: SE. Effective: 2018 Winter Quarter.

**ECI 140A—Environmental Analysis of Aqueous Systems (4)**  
*Review all entries*
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): CHE 002B C- or better; ECI 040 (can be concurrent). Pass One restricted to Environmental Engineering majors. Introduction to "wet chemical" and instrumental techniques commonly used in the examination of water and wastewater and associated data analysis. Not open for credit to students who have taken ECH 140 or CHE 100. GE credit: SE. Effective: 2020 Winter Quarter.

**ECI 140B—Chemical Principles for Environmental Engineers (4)**  
Lecture—4 hours. Prerequisite(s): CHE 002B C- or better. Aqueous chemistry; equilibrium relationships; carbonate system; thermodynamics; kinetics & rate laws; precipitation, adsorption, & volatilization phenomenon; oxidation & reduction reactions; pH, pE and predominance diagrams; organic chemicals. Not open for credit to students who have taken ECI 140. GE credit: SE. Effective: 2017 Fall Quarter.

**ECI 140C—Biological Principles for Environmental Engineering (4)**  
*Review all entries*
Lecture—4 hours. Prerequisite(s): ECI 140A C- or better or ECI 140B C- or better. Fundamental microbiology concepts for environmental engineers; provides background needed for the application of water and wastewater treatment, bioremediation, air pollution control and biotransformations in environmental engineered systems. Only two units of credit for students who have taken MIC 101 or MIC 102. GE credit: SE. Effective: 2018 Winter Quarter.

**ECI 140C—Biological Principles for Environmental Engineering (4)**  
*Review all entries*
Lecture—4 hours. Prerequisite(s): (ECI 140A C- or better or ECI 140B C- or better); ECI 040 Fundamental microbiology concepts for environmental engineers; provides background needed for the application of water and wastewater treatment, bioremediation, air pollution control and biotransformations in environmental engineered systems. Only two units of credit for students who have taken MIC 101 or MIC 102. GE credit: SE. Effective: 2020 Winter Quarter.

**ECI 140D—Water and Wastewater Treatment System Design (4)**  
*Review all entries*
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): (ENG 103 C- or better or ECI 100 C- or better); (ECI 140 C- or better or ECI 140A C- or better or ECI 140B C- or better or ECI 140C C- or better or ECI 148A C- or better) Evaluation and design of water and wastewater treatment systems. Not open for credit to students who have taken ECI 148B. GE credit: SE. Effective: 2018 Winter Quarter.

**ECI 140D—Water & Wastewater Treatment System Design (4)**  
*Review all entries*
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): (ENG 103 C- or better or ECI 100 C- or better); (ECI 140 C- or better or ECI 140A C- or better or ECI 140B C- or better or ECI 140C C- or better or ECI 148A C- or better); ECI 040 Evaluation and design of water and wastewater treatment systems. Not open for credit to students who have taken ECI 148B. GE credit: SE. Effective: 2020 Winter Quarter.

**ECI 141—Engineering Hydraulics (3)**  
Lecture—3 hours. Prerequisite(s): ENG 103 C- or better or ECI 100 C- or better. Nature of flow of a real fluid; flow in pipes; open channel flow; turbomachinery; fluid forces on objects: boundary layers, lift and drag. GE credit: SE. Effective: 2018 Winter Quarter.

**ECI 141L—Engineering Hydraulics Laboratory (1)**  
Laboratory—3 hours. Prerequisite(s): ECI 141 (can be concurrent). Open to Engineering students only. Laboratory
experiments and demonstrations on flow measurements, sluice gates, hydraulic jump, flow characteristics, and centrifugal pumps. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 142—Engineering Hydrology (4)
Lecture—4 hours. Prerequisite(s): ECI 141 (can be concurrent) Restricted to students in the College of Engineering. The hydrologic cycle. Evapotranspiration, interception, depression storage and infiltration. Streamflow analysis and modeling. Flood routing through channels and reservoirs. Frequency analysis of hydrologic variables. Precipitation analysis for hydrologic design. Hydrologic design. GE credit: QL, SE. Effective: 2013 Fall Quarter.

ECI 143—Green Engineering Design and Sustainability (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Upper division standing. Restricted to upper division standing; Pass One restricted to Civil Engineering majors. Application of concepts, goals and metrics of sustainability, green engineering and industrial ecology to engineering design. Other course topics include life-cycle assessments, analysis of environmental management systems, and economics of pollution prevention and sustainability. GE credit: QL, SE, SL, SS. Effective: 2017 Winter Quarter.

ECI 144—Groundwater Systems Design (4)
Lecture—4 hours. Prerequisite(s): ECI 141 Groundwater occurrence, distribution, and movement; groundwater flow systems; radial flow to wells and aquifer testing; aquifer management; groundwater contamination; solute transport by groundwater; fate and transport of subsurface contaminants. Groundwater supply and transport modeling. GE credit: SE. Effective: 2005 Spring Quarter.

ECI 144L—Groundwater Systems Design Laboratory (1)
Laboratory—3 hours. Prerequisite(s): ECI 144 (can be concurrent); ECI 144 required concurrently. Computer modeling of groundwater flow under regional gradient, well injection/withdrawal, and natural and engineered boundary conditions. Use of Groundwater Vistas computer program. Effective: 2010 Fall Quarter.

ECI 145—Hydraulic Structure Design (4)
Discussion—1 hour; Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): ECI 141 C- or better Project-based course on the design of an integrated urban drainage system with focus on consideration of design alternatives, multiple realistic constraints, quantification of uncertainty, codes and standards, technical drawing and cost analysis. GE credit: SE. Effective: 2017 Fall Quarter.

ECI 146—Water Resources Simulation (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ENG 103 C- or better or ECI 100 C- or better Computer simulation techniques in the analysis, design and operation of surface water systems; modeling concepts and practices with application to surface runoff; water quality in rivers and streams and dispersion of contaminants in water bodies. GE credit: SE. Effective: 2018 Winter Quarter.

ECI 148A—Water Quality Management (4)
Lecture—4 hours. Prerequisite(s): CHE 002B C- or better Basic concepts of water quality measurements and regulations. Introduction to physical, biological and chemical processes in natural waters. Fundamentals of mass balances in water and wastewater treatment. GE credit: SE. Effective: 2013 Fall Quarter.

ECI 149—Air Pollution (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MAT 021D; MAT 022B; CHE 002B C- or better; (ATM 121A or ENG 103 C- or better or ECI 100 C- or better) Physical and technical aspects of air pollution. Emphasis on geophysical processes and air pollution meteorology as well as physical and chemical properties of pollutants. (Same course as ATM 149.) GE credit: QL, SE, SL. Effective: 2018 Winter Quarter.

ECI 150—Air Pollution Control System Design (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECI 149 C- or better or ATM 149 C- or better Design and evaluation of air pollution control devices and systems. GE credit: SE. Effective: 2017 Fall Quarter.

ECI 153—Deterministic Optimization and Design (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): MAT 021C; MAT 022A; Computer programming course. Operations research. Optimization techniques such as linear programming, dynamic programming, and non-linear programming. Applications in civil engineering disciplines, including multiple realistic constraints, through computer-based course projects. GE credit: QL, SE, SL. Effective: 2013 Fall Quarter.

ECI 155—Water Resources Engineering Planning (4)
Lecture—4 hours. Prerequisite(s): (ENG 106 or ECN 001A or ECN 001AV); ECI 114 Basic engineering planning concepts; role of engineering, economic, environmental and social information and analysis; institutional, political
and legal aspects. Case studies and computer models illustrate the planning of water resource systems. GE credit: QL, SE, SL, SS, WE. Effective: 2018 Winter Quarter.

**ECI 161—Transportation System Operations (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MAT 021C C- or better; PHY 009A C- or better Principles of transportation system operations; traffic characteristics and methods of measurement; models of transportation operations and congestion applied to urban streets and freeways. GE credit: QL, SE. Effective: 2016 Fall Quarter.

**ECI 163—Energy and Environmental Aspects of Transportation (4)**
Extensive Writing; Lecture—3 hours. Prerequisite(s): ECN 001A or ECN 001AV or ENG 106 Engineering, economic, and systems planning concepts. Analysis and evaluation of energy, air quality and selected environmental attributes of transportation technologies. Strategies for reducing pollution and petroleum consumption in light of institutional and political constraints. Evaluation of vehicle emission models. (Same course as ESP 163.) GE credit: SE, SL, SS, WE. Effective: 2018 Spring Quarter.

**ECI 165—Transportation Policy (3)**
Lecture—3 hours. Transportation and associated environmental problems confronting urban areas, and prospective technological and institutional solutions. Draws upon concepts and methods from economics, engineering, political science and environmental studies. GE credit: QL, SE, SS. Effective: 2013 Fall Quarter.

**ECI 171—Soil Mechanics (4)**
Lecture—4 hours. Prerequisite(s): (ENG 103 (can be concurrent) or ECI 100 (can be concurrent)); ENG 104 C- or better; ECI 171L (can be concurrent); ECI 171L required concurrently. Restricted to Civil Engineering and Environmental Engineering majors only. Soil formations, mass-volume relationships, soil classification, effective stress, soil-water-void relationships, compaction, seepage, capillarity, compressibility, consolidation, strength, states of stress and failure, lateral earth pressures, and slope stability. GE credit: SE. Effective: 1997 Winter Quarter.

**ECI 171L—Soil Mechanics Laboratory (1)**
Laboratory—3 hours. Prerequisite(s): ECI 171 (can be concurrent); ECI 171 required concurrently. Laboratory studies utilizing standard testing methods to determine physical, mechanical and hydraulic properties of soil and demonstration of basic principles of soil behavior. GE credit: SE. Effective: 2018 Spring Quarter.

**ECI 173—Foundation Design (4)**
Lecture—4 hours. Prerequisite(s): ECI 171 Foundation analysis and design, including site characterization, evaluation of shallow and deep foundation alternatives, evaluation of bearing capacity and settlements, design of retaining structures, and case-based design experiences. GE credit: SE. Effective: 1997 Winter Quarter.

**ECI 175—Geotechnical Earthquake Engineering (4)**
Lecture—4 hours. Prerequisite(s): ECI 171 C- or better Tectonics, faults, site response, and probabilistic ground motion prediction equations. Cyclic loading and liquefaction of soil elements and layers. Empirical procedures and field tests for evaluation of triggering and consequences, of liquefaction. GE credit: SE. Effective: 2017 Fall Quarter.

**ECI 179—Pavement Engineering (4)**
Discussion/Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ENG 104 C- or better Pavement types (rigid, flexible, unsurfaced, rail), their applications (roads, airfields, ports, rail) and distress mechanisms. Materials, traffic and environment characterization. Empirical and mechanistic-empirical design procedures. Maintenance, rehabilitation and reconstruction; construction quality; asphalt concrete mix design. GE credit: QL, SE, SL, VL. Effective: 2013 Fall Quarter.

**ECI 189A—Selected Topics in Civil Engineering; Environmental Engineering (1-5)**
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Environmental Engineering. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

**ECI 189B—Selected Topics in Civil Engineering; Hydraulics and Hydrologic Engineering (1-5)**
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Hydraulics and Hydrologic Engineering. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

**ECI 189C—Selected Topics in Civil Engineering; Engineering Planning (1-5)**
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Engineering Planning. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

**ECI 189D—Selected Topics in Civil Engineering; Geotechnical Engineering (1-5)**
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Geotechnical Engineering. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.
ECI 189E—Selected Topics in Civil Engineering; Structural Engineering (1-5)  
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Structural Engineering. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 189F—Selected Topics in Civil Engineering; Structural Mechanics (1-5)  
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Structural Mechanics. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 189G—Selected Topics in Civil Engineering; Transportation Engineering (1-5)  
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Transportation Engineering. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 189H—Selected Topics in Civil Engineering; Transportation Planning (1-5)  
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Transportation Planning. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 189I—Selected Topics in Civil Engineering; Water Resources Engineering (1-5)  
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Water Resources Engineering. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 189J—Selected Topics in Civil Engineering; Water Resources Planning (1-5)  
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Water Resources Planning. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 190C—Research Group Conferences in Civil and Environmental Engineering (1)  
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Upper division standing in Civil and Environmental Engineering. Research group conferences. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

ECI 192—Internship in Engineering (1-5)  
Internship. Prerequisite(s): Upper division standing; approval of project prior to the period of the internship. Supervised work experience in civil engineering. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

ECI 193A—Civil and Environmental Engineering Senior Design (4)  
Laboratory—2 hours; Lecture—2 hours. Prerequisite(s): (ECI 140D C- or better) or (ECI 171 C- or better, ECI 171L C- or better) or (ECI 132 C- or better or ECI 135 C- or better) or (ECI 161 C- or better or ECI 163 C- or better) or (ECI 141 C- or better, ECI 141L C- or better); and Consent of Instructor. And one ECI major depth course with a C- or better. Students must be in final year of study. Open to seniors in Civil Engineering and Environmental Engineering only; students must be in their final year of study. Culminating design experience for civil engineering and environmental engineering majors. Student teams work closely with faculty, city officials or consulting clients to propose, implement and validate a unique solution to a real-world problem. GE credit: OL, SE, WE. Effective: 2018 Winter Quarter.

ECI 193B—Civil and Environmental Engineering Senior Design (4)  
Laboratory—3 hours; Lecture—1 hour. Prerequisite(s): ECI 193A Open to seniors in Civil Engineering and Environmental Engineering only. Culminating design experience for civil engineering and environmental engineering majors. Student teams work closely with faculty, city officials or consulting clients to propose, implement and validate a unique solution to a real-world problem. GE credit: OL, SE, VL, WE. Effective: 2017 Fall Quarter.

ECI 198—Directed Group Study (1-5)  
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.
ECI 199—Special Study for Advanced Undergraduates (1-5)
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. Special study. (P/NP grading only.) GE credit: SE.
Effective: 2016 Fall Quarter.

ECI 201—Introduction to Theory of Elasticity (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ENG 104 Fundamental equations of elasticity in three
dimensions; plane stress and plane strain; flexure and torsion of bars of various shapes. Introduction to variational

ECI 203—Inelastic Behavior of Solids (3)
Lecture—3 hours. Prerequisite(s): ECI 201 Fundamentals of theories of plasticity, viscoelasticity and viscoplasticity
for solids. Macroscopic constitutive modelling for engineering materials, e.g., metals, polymers, soils, etc., and

ECI 205—Continuum Mechanics (3)
Lecture—3 hours. Prerequisite(s): ECI 201 Tensor formulation of the field equations for continuum mechanics,
including large deformation effects. Invariance and symmetry requirements. Introduction to nonlinear
Winter Quarter.

ECI 206—Fracture Mechanics (4)
Lecture—4 hours. Prerequisite(s): ECI 201; ENG 104 Linear and nonlinear fracture mechanics, stress analysis, energy
concepts, brittle fracture criteria, path independent integrals, Dugdale-Barenblatt model, general cohesive zone
models, ductile fracture criteria, crack tip fields for stationary and propagating cracks, fatigue. Application of

ECI 211—Advanced Matrix Structural Analysis (4)
Lecture—4 hours. Prerequisite(s): ECI 131 Analysis of complex frameworks by the displacement method; treatment
of tapered beams, curved beams, and beams on elastic foundations; partially rigid connections; geometric and
material nonlineairties; buckling; flexibility-based formulations; FEM-software for nonlinear analysis of structures.
Effective: 2003 Winter Quarter.

ECI 212A—Finite Element Procedures in Applied Mechanics (4)
Lecture—4 hours. Prerequisite(s): EAD 115 or (MAT 128A, MAT 128B (can be concurrent)) Weighted-residual and
Rayleigh-Ritz methods. Weak/variational formulation and development of discrete equations using finite element
approximations. Application to one- and two-dimensional problems (heat conduction). Effective: 2003 Winter
Quarter.

ECI 212B—Finite Elements: Application to Linear and Non-Linear Structural Mechanics Problems (4)
Lecture—4 hours. Prerequisite(s): ECI 212A Application to linear and nonlinear structural mechanics problems.
Linear elasticity, weak form, and finite element approximation. Incompressible media problems. Non-linear
problems with material nonlinearity. Effective: 2003 Winter Quarter.

ECI 213—Analysis of Structures Subjected to Dynamic Loads (4)
Lecture—4 hours. Prerequisite(s): ECI 211 (can be concurrent) Analysis of structures subjected to earthquake, wind
and blast loading; distributed, consistent and lumped mass techniques; computer implementation; nonlinear
response spectrum; frequency and time domain analysis; seismic protection of structures; numerical methods in
linear and nonlinear structural dynamics. Effective: 2012 Fall Quarter.

ECI 214—Probabilistic Seismic Hazard Analysis and Design Ground Motions (4)
Lecture—4 hours. Probabilistic seismic hazard analysis for use in developing design spectra and for seismic risk
analyses, including the development of earthquake ground motion time series for use in dynamic analyses of
structures. Effective: 2016 Winter Quarter.

ECI 216—Meshfree Methods and Partition of Unity Finite Elements (4)
Lecture—4 hours. Prerequisite(s): ECI 201; ECI 212A Advanced discretization techniques such as meshfree methods
and partition of unity finite elements for the Galerkin solution of boundary-value problems in solid and structural
Winter Quarter.

ECI 221—Theory of Plates and Introduction to Shells (3)
Lecture—3 hours. Prerequisite(s): ECI 201 (can be concurrent) Development of classical and refined plate theories.
Application to isotropic, orthotropic and composite plates. Solutions for rectangular and circular plates. Membrane
ECI 223—Advanced Dynamics, Signal Processing, and Smart Structures Technology (4)
Lecture—4 hours. Prerequisite(s): ECI 213; Or equivalent. Signal processing and system identification of structures under dynamic excitations; Fourier and Laplace transforms; data acquisition and sensor design fundamentals; sensor technologies/techniques for nondestructive evaluation; structural control; actuators and dampers for smart structures; piezoelectrics and acoustic emissions; micro- and nano-fabrication. Effective: 2011 Winter Quarter.

ECI 232—Advanced Topics in Concrete Structures (4)
Lecture—4 hours. Prerequisite(s): ECI 130; ECI 135; ECI 138; Graduate standing. Ductility of reinforced concrete; strength of two-way slabs; modified compression field theory. Effective: 2001 Fall Quarter.

ECI 233—Advanced Design of Steel Structures (4)
Lecture—4 hours. Prerequisite(s): (ECI 130 or ECI 131); ECI 132 Review of Load and Resistance Factor Design (LRFD); steel-plate girder design; plastic design of indeterminate systems; moment frames and bracing systems; connection design; seismic design of steel structures; vibration of flooring systems; steel-concrete composite design. Effective: 2004 Winter Quarter.

ECI 234—Prestressed Concrete (4)
Lecture—4 hours. Prerequisite(s): ECI 135; (ECI 130 or ECI 131) Survey of methods and applications; prestressing materials and systems; prestress losses; flexural design; design for shear and torsion; deflection computation and control; continuous beams and indeterminate structures; floor systems; partial prestressing; design of compression members; strut-and-tie models. Effective: 2003 Fall Quarter.

ECI 235—Cement Composites (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ENG 104 Applications of cement composites; materials selection and proportioning; component and composite properties; hydration reactions and microstructure development; mechanisms of failure; nondestructive test methods; fiber reinforcement; concrete durability; novel reinforcing materials; ferrocement; repair and retrofit technologies; applications to structural design. Effective: 2002 Fall Quarter.

ECI 236—Design of Fiber Reinforced Polymer Composite Structures (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ECI 135 Basics of mechanics and design of polymer matrix composites: composite classification, manufacturing process, micromechanical property determination, classical lamination theory, strength theories, first-ply-failure, test methods, design practice, strengthening and retrofitting of existing reinforced concrete structures. Effective: 2008 Winter Quarter.

ECI 237—Bridge Design (4)
Lecture—4 hours. Prerequisite(s): ECI 130; ECI 135; ECI 234 recommended. Open to Graduate Students only. Bridge types, behavior and construction characteristics; design philosophy, details according to Caltrans and American Association of State Highway and Transportation Officials codes, principles; seismic design and retrofit of concrete bridges; modern bridges using advanced fiber reinforced polymer composites; fieldtrip required. Effective: 2007 Fall Quarter.

ECI 238—Performance-Based Seismic Engineering (4)
Lecture—4 hours. Prerequisite(s): ECI 138; ECI 213 Modern seismic design; performance-based seismic design; seismic hazard; seismic demands: linear and nonlinear procedures; performance assessment; deterministic and probabilistic procedure; review of FEMA-350, FEMA-356, ATC-40 and other performance-based guidelines. Effective: 2007 Fall Quarter.

ECI 240—Water Quality (4)
Lecture—4 hours. Prerequisite(s): ECI 141; ECI 142 Quality requirements for beneficial uses of water. Hydrologic cycle of quality. Hydromechanics in relation to quality of surface and groundwaters; transport and fate of waterborne pollutants. Heat budget for surface waters; predictive methods; introduction to water quality modeling. Effective: 2000 Fall Quarter.

ECI 241—Environmental Reactive Chemical Transport Modeling (4)
Lecture—4 hours. Prerequisite(s): CHE 002A or CHE 002B or ECI 149; Or equivalent. Modeling of reactive chemical transport in air and water including kinetic reactions, equilibrium reactions, and phase partitioning. Emphasis on numerical solution schemes and programming techniques to provide deeper insight into model performance and limitations. Effective: 2014 Fall Quarter.

ECI 242—Air Quality (4)
Lecture—4 hours. Prerequisite(s): ENG 105; ECI 141; ECI 149; Or equivalents. Factors determining air quality. Effects

**ECI 243A—Water and Waste Treatment (4)** Review all entries
Lecture—4 hours. Prerequisite(s): ECI 148A; Or the equivalent. Characteristics of water and airborne wastes; treatment processes and process kinetics; treatment system design. Effective: 1999 Fall Quarter.

**ECI 243A—Water and Waste Treatment (4)** Review all entries
Lecture—4 hours. Prerequisite(s): ECI 148A; Or the equivalent. Open to Graduate majors only. Characteristics of water and airborne wastes; treatment processes and process kinetics; treatment system design. Effective: 2019 Spring Quarter.

**ECI 243B—Water and Waste Treatment (4)** Review all entries
Lecture—4 hours. Prerequisite(s): ECI 243A Continuation of course 243A. Aeration, thickening, biological processes, design of biological treatment systems. Effective: 2000 Winter Quarter.

**ECI 243B—Water and Waste Treatment (4)** Review all entries
Lecture—4 hours. Prerequisite(s): ECI 243A Open to graduate majors only. Continuation of course 243A. Aeration, thickening, biological processes, design of biological treatment systems. Effective: 2019 Spring Quarter.

**ECI 243L—Pilot Plant Laboratory (4)** Review all entries
Discussion—1 hour; Laboratory—6 hours; Lecture—1 hour. Prerequisite(s): ECI 243A; ECI 243B (can be concurrent); or Consent of Instructor. Graduate standing. Laboratory investigation of physical, chemical, and biological processes for water and wastewater treatment. Effective: 2016 Winter Quarter.

**ECI 243L—Pilot Plant Laboratory (4)** Review all entries
Discussion—1 hour; Laboratory—6 hours; Lecture—1 hour. Prerequisite(s): ECI 243A; ECI 243B (can be concurrent); or Consent of Instructor. Graduate standing. Open to graduate majors only. Laboratory investigation of physical, chemical, and biological processes for water and wastewater treatment. Effective: 2019 Spring Quarter.

**ECI 244—Life Cycle Assessment for Sustainable Engineering (4)** Review all entries
Lecture—4 hours. Prerequisite(s): Graduate standing. Life cycle assessment methodology is taught emphasizing applications to infrastructure and energy systems. Life cycle design, life cycle cost methods, other tools from industrial ecology, and links to policy are covered as well. Effective: 2011 Fall Quarter.

**ECI 244—Life Cycle Assessment for Sustainable Engineering (4)** Review all entries Discontinued
Lecture—4 hours. Prerequisite(s): Graduate standing. Life cycle assessment methodology is taught emphasizing applications to infrastructure and energy systems. Life cycle design, life cycle cost methods, other tools from industrial ecology, and links to policy are covered as well. Effective: 2019 Winter Quarter.

**ECI 244A—Life Cycle Assessment for Sustainable Engineering (4)**
Lecture—4 hours. Enrollment restricted to graduate students. Life cycle assessment methodology. Emphasis on applications to infrastructure and energy systems. Life cycle design, life cycle cost methods, other tools from industrial ecology, and links to policy are covered as well. Effective: 2019 Winter Quarter.

**ECI 245A—Applied Environmental Chemistry: Inorganic (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ENG 105; ECI 140; CHE 002B; Or the equivalent of CHE 002B; CHE 002C or CHE 107A recommended. Chemistry of natural and polluted waters. Topics include chemical, kinetic and equilibrium principles, redox reactions, gas solution and solid-solution equilibria, thermodynamics, carbonate systems, coordination chemistry, interfacial phenomena. Effective: 2000 Spring Quarter.

**ECI 245B—Applied Environmental Chemistry: Organic (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): CHE 128A; CHE 128B; CHE 128C; Or the equivalent; CHE 002C or CHE 107A recommended. Transport and transformation of organic chemicals in the environment. Topics include application of thermodynamics to predict solubility and activity coefficients; distribution of organic chemicals between the aqueous phase and air, solvent, or solid phases; chemical, photochemical and biological transformation reactions. Effective: 2001 Spring Quarter.

**ECI 246N—Understanding Climate Change: Causes and Consequences (4)**
Lecture—4 hours. Open to graduate students. Diverse physical processes that govern climate and drive climate change. Observational, experimental and modeling techniques and methods used in the development of our scientific understanding of the Earth system. Effective: 2016 Spring Quarter.
ECI 247—Aerosols (4)
Lecture—4 hours. Prerequisite(s): ENG 103; ENG 105; ECI 141; ECI 149 Behavior of airborne particles including particle formation, modification, and removal processes. Effective: 2002 Fall Quarter.

ECI 247L—Aerosols Laboratory (4)
Laboratory—6 hours; Lecture—2 hours. Prerequisite(s): ECI 247 Methods of generation and characterization of aerosols. Detailed topics may include flow rate measurement, aerosol generation, aerosol collection, ions measurement, metals measurement, and carbon measurement. May be repeated up to 1 time(s). Effective: 2002 Fall Quarter.

ECI 248—Biofilm Processes (4)
Lecture—4 hours. Prerequisite(s): SSC 111 or SSC 211 or ECI 243B; or Consent of Instructor. Calculus and basic cell molecular biology are recommended. Natural and engineered biofilms, including biofilm occurrence and development, spatial structure, microbial processes, fundamental and applied research tools, biofilm reactors, beneficial uses, and detrimental effects. Effective: 2004 Spring Quarter.

ECI 249—Probabilistic Design and Optimization (4)
Lecture—4 hours. Prerequisite(s): ECI 114; ECI 153; ENG 106; Or equivalents. Design by optimization for probabilistic systems, decision theory, the value of information, probabilistic linear programming, probabilistic dynamic programming, nonlinear probabilistic optimization. Applications in civil engineering design, project evaluation, and risk management. Effective: 2006 Winter Quarter.

ECI 250—Civil Infrastructure System Optimization and Identification (4)
Lecture—4 hours. Prerequisite(s): MAT 021C; MAT 022A; Programming course; EAD 115 and mathematical modeling course recommended. Restricted to graduate standing. Applied mathematics with a focus on modeling, identifying, and controlling dynamic, stochastic, and underdetermined systems. Applications in transportation networks, water resource planning, and other civil infrastructure systems. Effective: 2005 Spring Quarter.

ECI 251—Transportation Demand Analysis (4)

ECI 252—Sustainable Transportation Technology and Policy (3) Review all entries
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): ECI 165 Role of technical fixes and demand management in creating a sustainable transportation system. Emphasis on technology options, including alternative fuels, electric propulsion, and IVHS. Analysis of market demand and travel behavior, environmental impacts, economics and politics. (Same course as ESP 252.) Effective: 2000 Fall Quarter.

ECI 252—Sustainable Transportation Technology and Policy (3) Review all entries Discontinued
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): ECI 165 Role of technical fixes and demand management in creating a sustainable transportation system. Emphasis on technology options, including alternative fuels, electric propulsion, and IVHS. Analysis of market demand and travel behavior, environmental impacts, economics and politics. (Same course as ESP 252.) Effective: 2018 Fall Quarter.

ECI 253—Dynamic Programming and Multistage Decision Processes (4)
Lecture—4 hours. Prerequisite(s): MAT 021C; MAT 022A; Programming course; EAD 115 recommended. Operations research. Optimization techniques with a focus on dynamic programming in treating deterministic, stochastic, and adaptive multistage decision processes. Brief review of linear programming and non-linear programming. Applications in transportation networks and other civil infrastructure systems. Effective: 2005 Spring Quarter.

ECI 254—Exploring Data from Built Environment Using R (4)
Laboratory—3 hours; Lecture—3 hours. Introduction to modern data science, specifically data acquisition, exploratory data analysis, visualization, and beginning data analysis using R. Emphasizes computational reasoning and working with tabular and non-standard data. Focus will be on data generated in the built environment. (Same course as GEO 279.) Effective: 2017 Fall Quarter.

ECI 256—Urban Traffic Management and Control (4)
Lecture—4 hours. Prerequisite(s): ECI 114 Basic concepts, models, and methods related to the branch of traffic science that deals with the movement of vehicles on a road network, including travel speed, travel time, congestion concepts, car-following and hydrodynamic traffic models. Effective: 2000 Fall Quarter.
ECI 257—Flow in Transportation Networks (4)
Lecture—4 hours. Prerequisite(s): ECI 153; ECI 161 or ECI 256 recommended. Elements of graph theory, a survey of pertinent optimization techniques, extremal principles in network flow problems, deterministic equilibrium assignment, stochastic equilibrium assignment, extensions of equilibrium assignments and dynamic transportation network assignment. Effective: 2000 Winter Quarter.

ECI 259—Asphalt and Asphalt Mixes (4)
Lecture—4 hours. Prerequisite(s): ECI 179; or Consent of Instructor. Asphalts and asphalt mix types and their use in civil engineering structures, with primary emphasis on pavements. Asphalt, aggregate properties and effects on mix properties. Design, construction, recycling. Recent developments and research. Effective: 2006 Winter Quarter.

ECI 260—Sediment Transport (4)
Lecture—4 hours. Prerequisite(s): ECI 141; Or equivalent. Sediment transport in hydrologic systems. Process-oriented course which will emphasize how sediment moves and the physical processes that affect sediment transport. Field trip. Effective: 2006 Winter Quarter.

ECI 261—Cohesive Particle Transportation (3) Review all entries Discontinued

ECI 261—Colloids in Soil and Water (4) Review all entries
Lecture—4 hours. Prerequisite(s): CHE 002B; (ENG 103 or ECI 100); Upper division or graduate standing. Pass One restricted to graduate standing; Pass Two restricted to upper division standing or graduate standing. Colloid occurrence, properties, behavior in different environments, and transport mechanisms in water and soils. Emphasis on their role in water contamination. Effective: 2018 Fall Quarter.

ECI 264A—Transport, Mixing and Water Quality in River and Lakes (4)
Lecture—4 hours. Prerequisite(s): ECI 141; ECI 240 Principal causes of mixing and transport in rivers, lakes and reservoirs, and their impacts on water quality. Case studies of specific lakes and rivers. Effective: 2000 Fall Quarter.

ECI 264B—Transport, Mixing and Water Quality in Estuaries and Wetlands (4)
Lecture—4 hours. Prerequisite(s): ECI 141; ECI 240 Principal causes of mixing and transport in estuaries and wetlands, and their impacts on water quality. Topics include advection/diffusion; tides; transverse mixing; longitudinal dispersion; sediment transport; nutrient cycling; computer modeling of estuaries. Case studies of specific systems. Effective: 2000 Spring Quarter.

ECI 265—Stochastic Hydrology and Hydraulics (4)
Lecture—4 hours. Prerequisite(s): ECI 266; or Consent of Instructor. Physics-based stochastic methods in modeling hydrologic and hydraulic processes; theory for modeling hydrologic-hydraulic governing equations as stochastic partial differential equations applied to various hydrologic-hydraulic processes under uncertainty, including transport, open channel flow, overland flow, soil water flow, and groundwater. Effective: 2015 Winter Quarter.

ECI 266—Applied Stochastic Methods in Engineering (4)
Lecture—4 hours. Prerequisite(s): ECI 114 or MAT 131 or STA 130A or STA 131A or MAT 118A (can be concurrent) Stochastic processes classification; Gaussian random fields; stochastic calculus in mean square; Ito and Stratonovich stochastic differential equations; Fokker-Planck equation; stochastic differential equations with random coefficients. Effective: 1999 Fall Quarter.

ECI 267—Water Resource Management (3)
Lecture—3 hours. Prerequisite(s): ECI 114; ECI 141; ECI 142; ECI 153 recommended. Engineering, institutional, economic, and social basis for managing local and regional water resources. Examples in the context of California's water development and management. Uses of computer modeling to improve water management. (Same course as GEO 212.) Effective: 2013 Fall Quarter.

ECI 268—Infrastructure Economics (3)
Lecture—3 hours. Prerequisite(s): (ECN 001A or ECN 001AV); ENG 106; Or the equivalent. Economics applied to infrastructure engineering planning, operations, maintenance, and management problems; microeconomic and macroeconomic theories; benefit-cost analysis; effect of uncertainty; optimization economics; non-classical economics; public finance. Effective: 2018 Spring Quarter.

ECI 269—Transportation-Air Quality: Theory and Practice (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ECI 149; Or the equivalent. Health and regulatory aspects of airborne pollutants. Principles of modeling vehicle emissions. Conformity issues and the regulatory framework. Regional and micro-scale modeling. Effective: 1999 Fall Quarter.
ECI 270—Advanced Water Resources Management (3)
Lecture—3 hours. Prerequisite(s): ECI 153; ECI 267; Or the equivalent. Discussion of technical papers related to planning theory, system maintenance, regionalization, multi-objective methods, risk analysis, institutional issues, pricing model application, economic development, forecasting, operations, and other topics. Effective: 1997 Winter Quarter.

ECI 271—Inverse Problems (4)
Lecture—4 hours. Prerequisite(s): ECI 114; ECI 144; Or equivalents. Inverse calibration of distributed parameter models, using data representing model outputs. Forward and inverse mappings, stability, uniqueness, identifiability. Optimization formulation of inverse problems, maximum likelihood and other objective functions, indirect and direct approaches, solution by UCODE in hands-on project format. Effective: 2010 Fall Quarter.

ECI 272A—Advanced Hydrogeology (4)

ECI 272B—Advanced Hydrogeology (4)

ECI 272C—Multiphase Reactive Transport (4)
Lecture—4 hours. Prerequisite(s): ECI 142; ECI 144; ECI 148A Multicomponent reactive transport including multiple phases. Advection/dispersive transport, chemical equilibria, and mass transformation kinetics. Natural chemical/microbiological processes including sorption, complexation, biodegradation, and diffusive mass transfer. Eulerian and Lagrangean averaging methods. Applications to contaminant remediation problems in river and subsurface hydrology. Effective: 2004 Fall Quarter.

ECI 273—Water Resources Systems Engineering (4)
Lecture—4 hours. Prerequisite(s): ECI 114; ECI 153; Or the equivalent. Planning and management of water resource systems. Deterministic and stochastic simulation and optimization techniques. Capacity design and operation of reservoir systems for water supply, hydropower, flood control, and environmental objectives. Effective: 2018 Winter Quarter.

ECI 275—Hydrologic Time-Series Analysis (4)
Lecture—4 hours. Prerequisite(s): ECI 114; ECI 142 Application of statistical methods for analysis and modeling of hydrologic series. Statistical simulation and prediction of hydrologic sequences using time series methodology. Effective: 2003 Fall Quarter.

ECI 276—Watershed Hydrology (4)

ECI 277A—Computational River Mechanics I (4)
Lecture—4 hours. Prerequisite(s): EAD 115 (can be concurrent); ECI 141 (can be concurrent) Unsteady open channel flows, computation of water surface profiles, shallow water equations, St. Venant equations, method of characteristics, finite difference methods, stability and accuracy of explicit and implicit schemes, flood routing in simple and compound channels, advection of plumes. Not open for credit to students who have taken ECI 277. Effective: 2004 Fall Quarter.

ECI 277B—Computational River Mechanics II (4)
Lecture—4 hours. Prerequisite(s): ECI 277A Open channel flows, physical aspects of river mechanics, formulation of depth-averaged equations, boundary conditions, coordinates transformation and grid generation, finite-difference solution techniques, applications to two-dimensional momentum and pollutant transport in rivers. Effective: 2004 Fall Quarter.

ECI 277C—Turbulence and Mixing Processes (4)
Lecture—4 hours. Prerequisite(s): Graduate standing. Nature of turbulent flows, conservation equations, momentum,
heat and mass transport in free and wall-bounded flows, body forces and mixing, roughness effects, turbulence modeling and simulation. Effective: 2004 Fall Quarter.

ECI 278—Hydrodynamics (3)

ECI 279—Advanced Mechanics of Fluids (4)

ECI 280A—Nonlinear Finite Elements for Elastic-Plastic Problems (4)
Lecture—4 hours. Prerequisite(s): Consent of Instructor. State of the art finite element methods and tools for elasticplastic problems, including computational techniques based on the finite element method and the theory of elastoplasticity. Effective: 2008 Spring Quarter.

ECI 280B—Nonlinear Dynamic Finite Elements (4)
Lecture—4 hours. Prerequisite(s): Consent of Instructor. State of the art computational methods and tools for analyzing linear and nonlinear dynamics problems. Effective: 2009 Spring Quarter.

ECI 281A—Advanced Soil Mechanics (4)

ECI 281B—Advanced Soil Mechanics (5)
Laboratory—3 hours; Lecture—4 hours. Prerequisite(s): ECI 281A Site investigation and soil characterization within the context of slope stability analysis. Effective: 2014 Spring Quarter.

ECI 282—Pavement Design and Rehabilitation (4)
Lecture—4 hours. Prerequisite(s): ECI 179; or Consent of Instructor. Advanced pavement design and structural/functional condition evaluation for concrete and asphalt pavements. Highways, airfields, port facilities; new facilities, rehabilitation, reconstruction. Mechanistic-empirical procedures, materials, climate and traffic characterization. Use of current design methods; recent developments and research. Effective: 2004 Winter Quarter.

ECI 283—Physico-Chemical Aspects of Soil Behavior (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ECI 171 Study of the geotechnical behavior of soils considering formation, transport, mineralogy, soil-fluid-electrolyte systems, surface tension, particle mechanics, shape, fabric, and structure. Laboratories demonstrate effects of fundamental interparticle forces (contact, Van Der Waals, capillarity and chemical). Effective: 2012 Fall Quarter.

ECI 284—Theoretical Geomechanics (4)

ECI 286—Advanced Foundation Design (4)
Lecture—4 hours. Prerequisite(s): ECI 173 Design and analysis of pile and pier foundations, including seismic effects; deep excavation systems; tie-back, nailing, and anchor systems; coffer dams; loads on buried conduits; ground modification techniques; and other related topics. Effective: 2004 Spring Quarter.

ECI 287—Geotechnical Earthquake Engineering (4)
Lecture—4 hours. Prerequisite(s): ECI 138; ECI 281A Characteristics and estimation of earthquake ground motions; wave propagation and local site response; liquefaction potential and remediation; residual strength and stability considerations; ground deformations; dynamic soil-structure interaction. Effective: 2004 Spring Quarter.

ECI 288—Earth and Rockfill Dams (4)
Lecture—4 hours. Prerequisite(s): ECI 281A; ECI 281B (can be concurrent) Site selection; design considerations; layout; seismic effects including considerations of fault movements; construction; environmental considerations, instrumentation; maintenance remediation and retrofit of existing dams. Effective: 2004 Winter Quarter.
ECI 289A—Selected Topics in Civil Engineering; Environmental Engineering (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Environmental Engineering. May be repeated for credit. Effective: 1997 Winter Quarter.

ECI 289B—Selected Topics in Civil Engineering; Hydraulics and Hydrologic Engineering (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Hydraulics and Hydrologic Engineering. May be repeated for credit. Effective: 1997 Winter Quarter.

ECI 289C—Selected Topics in Civil Engineering; Engineering Planning (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Engineering Planning. May be repeated for credit. Effective: 1997 Winter Quarter.

ECI 289D—Selected Topics in Civil Engineering; Geotechnical Engineering (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Geotechnical Engineering. May be repeated for credit. Effective: 1997 Winter Quarter.

ECI 289E—Selected Topics in Civil Engineering; Structural Engineering (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Structural Engineering. May be repeated for credit. Effective: 1997 Winter Quarter.

ECI 289F—Selected Topics in Civil Engineering; Structural Mechanics (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Structural Mechanics. May be repeated for credit. Effective: 1997 Winter Quarter.

ECI 289G—Selected Topics in Civil Engineering; Transportation Engineering (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Transportation Engineering. May be repeated for credit. Effective: 1997 Winter Quarter.

ECI 289H—Selected Topics in Civil Engineering; Transportation Planning (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Transportation Planning. May be repeated for credit. Effective: 1997 Winter Quarter.

ECI 289I—Selected Topics in Civil Engineering; Water Resources Engineering (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Directed group study in Water Resources Engineering. May be repeated for credit. Effective: 1997 Winter Quarter.

ECI 290—Seminar (1)
Seminar—1 hour. Discussion of current graduate research, and guest lectures on recent advances. Oral presentation of individual study. Course required of graduate degree candidates. (S/U grading only.) Effective: 1997 Winter Quarter.

ECI 290C—Graduate Research Group Conference (1)
Discussion—1 hour. Research problems, progress, and techniques in civil engineering. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

ECI 296—Topics in Water and Environmental Engineering (1)
Seminar—2 hours. Seminars presented by visiting lecturers, UC Davis faculty and, graduate students. May be repeated for credit. (S/U grading only;) Effective: 2000 Winter Quarter.

ECI 298—Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

ECI 299—Research (1-12)
Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

ECI 390—The Teaching of Civil Engineering (1)
Discussion—1 hour. Prerequisite(s): Meet qualifications for teaching assistant and/or associate-in in Civil Engineering. Participation as teaching assistant or associate-in in a designated engineering course. Methods of leading discussion groups or laboratory sections, writing and grading quizzes, use of laboratory equipment, and grading laboratory reports. May be repeated up to 9 unit(s). (S/U grading only.) Effective: 1997 Winter Quarter.

Environmental Geology Minor; Geology

Environmental Geology Minor; Geology | Environmental Geology Minor

(College of Letters and Science)
The minor in Environmental Geology examines the multidisciplinary factors of geology and related earth science fields, and planning and resources oriented programs. Students in the minor are encouraged to participate in internship programs that assist them in solidifying the Environmental Geology minor with their Geology major or other major field areas that include geologic components.

The minor is sponsored by the Department of Earth and Planetary Sciences.

Minor Advisor. See Geology major advisors.

Environmental Horticulture & Urban Forestry

Environmental Horticulture & Urban Forestry | Environmental Horticulture & Urban Forestry B.S.

(College of Agricultural and Environmental Sciences)

The Major Program. Students majoring in Environmental Horticulture and Urban Forestry learn how plants improve the environment and the quality of our lives. The major focuses on the biological and physical concepts and horticultural principles of plant production, management of plants and plant ecosystems in landscape settings and sociological aspects of plant/people interactions in the urban environment. Plants are used to revegetate and restore disturbed landscapes, control erosion and reduce energy and water consumption. The ornamental use of plants to improve the aesthetic quality of urban and rural landscapes, recreational areas, interiorscapes and commercial sites is an important aspect of this major. Students may select one or more of the following three areas of specialization: Floriculture/Nursery, Plant Biodiversity/Restoration, or Urban Landscape Management.

Internships and Career Opportunities. Students are encouraged to develop internships on or off campus to augment their activities in the classroom and laboratory. Internships are available with the department's greenhouse facility, the UC Davis Arboretum, landscape designers, local nurseries, government agencies, regional non-profits, and restoration firms. Career opportunities in this field include growing and/or managing plants in a variety of settings, including nurseries and arboreta, consulting as an arborist, or as an urban, landscape, or restoration horticulturist; business ownership; park management and landscape contracting; working in the public or private sector, or for non-profit organizations.
Communications 1 recommended as part of the College English Composition Requirement or the Words and Images Core Literacy Component.

ENH 001 Introduction to Environmental Horticulture/Urban Forestry 3
ENH 006 Introduction to Environmental Plants 4

### Environmental Horticulture Minor; Plant Sciences | ENH Courses

Questions pertaining to the following courses should be directed to the instructor or to the Plant Sciences Advising Office in 1224 Plant and Environmental Sciences Building; 530-752-7738.

**Courses in ENH:**

**ENH 001—Introduction to Environmental Horticulture/Urban Forestry (3)**
Lecture—3 hours. Introduction to the use of plants to enhance the physical, visual and social environment, the use of ecological principles in developing sustainable, low maintenance landscape systems, and the career opportunities in these areas. GE credit: SE, SL. Effective: 2016 Winter Quarter.

**ENH 006—Introduction to Environmental Plants (4)**
Discussion—2 hours; Laboratory—3 hours; Lecture—1 hour. Classification, nomenclature and variation of environmental plants. The use of floral and vegetative characteristics and terminology to key unknown plants. Characteristics of plant groups and basics of climate, soils and plant selection. Identification of 150 common landscape plants. GE credit: SE, VL. Effective: 1999 Fall Quarter.

**ENH 100—Urban Forestry (4)**
Laboratory—3 hours; Lecture—2 hours; Term Paper. Prerequisite(s): ENH 001 or PLS 002 or BIS 002B Principles and practices of planning and managing urban vegetation. Basics of tree appraisal, natural resource inventory, and development of long term urban forest management plans. GE credit: SE. Effective: 2017 Winter Quarter.

**ENH 101—Trees of the Urban Forest (2)**
Laboratory—2 hours; Lecture—1 hour. Prerequisite(s): ENH 006; or Consent of Instructor. Identification and evaluation of 200 tree species of the urban forest on campus, in the Arboretum, and in the city of Davis; appraised and aesthetic values, condition, and branch structure; contribution of trees to this ecosystem. Bicycle required. GE credit: SE, VL. Effective: 2004 Fall Quarter.
ENH 102—Physiological Principles in Environmental Horticulture (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): BIS 001C Physiological principles and processes essential to floriculture, nursery crop production, turfculture and landscape horticulture. Emphasis on the control of vegetative and reproductive development for a broad species range in greenhouse and extensive landscape environments. GE credit: SE. Effective: 1997 Winter Quarter.

ENH 105—Taxonomy and Ecology of Environmental Plant Families (4)
Laboratory—6 hours; Lecture—2 hours. Prerequisite(s): ENH 006; or Consent of Instructor. Classification and identification of introduced and native species used in urban forests, with emphasis on floral and vegetative characteristics of the prominent families of angiosperms and gymnosperms, adaptations to environmental variations in western landscapes, and horticultural classification. GE credit: SE, VL. Effective: 1998 Spring Quarter.

ENH 120—Management of Container Media (3)
Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): SSC 010 or SSC 100 Principles of soil science and practices related to management of container media are taught, emphasizing appropriate use of soils and amendments, irrigation, and fertilizers. Physical and chemical properties are tested and effects of management on crops are evaluated in the laboratory. GE credit: QL, SE, WE. Effective: 2017 Winter Quarter.

ENH 125—Greenhouse and Nursery Crop Production (5)
Discussion—1 hour; Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): PLS 002 or BIS 002C Principles and techniques for the production of ornamental greenhouse and nursery crops. Hands-on experience producing greenhouse crops. Optional weekend field trip. GE credit: SE, WE. Effective: 2017 Winter Quarter.

ENH 133—Woody Plants in the Landscape: Growth, Ecology and Management (4)
Discussion—1 hour; Laboratory—2 hours; Lecture—3 hours. Prerequisite(s): PLS 002 or BIS 002C Principles and practices of managing trees and shrubs in the urban landscape and other managed environments. Topics include woody plant form; growth response and adaptation; tree management in relation to soil, moisture, climate; plant problems. GE credit: SE. Effective: 2017 Winter Quarter.

ENH 150—Genetics and Plant Conservation: The Biodiversity Crisis (3)
Lecture/Discussion—3 hours. Prerequisite(s): BIS 001C; Or the equivalent. Conservation of genic diversity, measurement of diversity, threats to diversity and reasons for protection, the process of extinction, distribution of diversity, determination of what to conserve and means of conservation. Examples drawn largely from forest tree species. GE credit: SE, SL. Effective: 1998 Winter Quarter.

ENH 160—Restoration Ecology (3) Review all entries
Lecture—3 hours. Prerequisite(s): PLB 117 or EVE 117 or PLB 147; or equivalent course in ecology/plant ecology. Application of ecological complexity to restoration design, implementation and monitoring across variable environments and under changing environmental conditions. Integration of physiology, population, community, ecosystem, and landscape ecology. GE credit: SE, SL. Effective: 2018 Fall Quarter.

ENH 160L—Restoration Ecology Laboratory (1)
Discussion/Laboratory—3 hours. Prerequisite(s): ENH 160 (can be concurrent); and Consent of Instructor. Companion field course to course 160. A series of part-day and all day visits to various field sites, involving site evaluations, guest field presentations by local restorationists, and actual restoration activities. Not open for credit to students who completed ENH 160 prior to spring 2004. GE credit: SE, SL. Effective: 2004 Spring Quarter.

Environmental Policy & Management

Environmental Policy & Management

John Muir Institute of the Environment

Program Coordinators: Jessica Penrose

Program Chair: Michael Springborn

The Master of Science in Environmental Policy & Management (EPM) program provides training in applying environmental science to real-world environmental policy and management issues. Graduates of this program are
equipped to integrate technical and scientific expertise in a social-political-natural context to provide effective environmental policy and management solutions; for more information, see Environmental Policy and Management.

Environmental Policy Analysis & Planning

Environmental Policy Analysis & Planning | EPA&P Information

The Major Program

The major in environmental policy analysis and planning develops skills for designing and assessing sustainable policies for environmental quality and natural resource management.

Any student in good standing is eligible to transfer to the major; to do so, please see the staff advisor, Melissa Whaley, in 2134 Wickson Hall, or the master advisor, Prof. J. Sanchirico, in 2102 Wickson Hall.

The Program. This major provides students with a strong background in policy analysis, including the evaluation of policy alternatives and the study of factors affecting policy formulation and implementation. Key components of this interdisciplinary training include a general background in the natural sciences relevant to environmental policy, economics, political science, statistics, and research methodology to quantitatively analyze environmental problems and policy options. In addition, students are encouraged to develop substantive knowledge in a specific field of environmental policy, such as urban and regional planning, water policy, transportation and energy, climate policy, or conservation management.

Careers. Environmental policy analysis and planning graduates are prepared for employment in environmental, natural resource, energy, and transportation focused public agencies, consulting firms, non-governmental organizations, and businesses, or as legislative aides for elected representatives. The major is also excellent preparation for students who want to go on to graduate work in law, planning, public policy, political science, economics, or business.

Major Advisor. J. Sanchirico (Environmental Science and Policy)

### Integrative Policy

Students choosing this individualized track must consult with a faculty adviser to identify an area of emphasis within this track and to select four upper division courses with a common theme. Possible areas of emphasis are marine policy, pollutants in the environment, planning in the presence of environmental hazards, sustainable development, or environmental and natural resource economics. If you are considering this track, please contact the major adviser as soon as possible.

Environmental Policy Analysis & Planning | EPA&P Minor

(College of Agricultural and Environmental Sciences)

Faculty. http://desp.ucdavis.edu/faculty

The faculty for environmental policy analysis and planning offers the following minor. The Environmental Policy Analysis minor is for natural and social science students desiring basic training in policy analysis theory and methods.

Minor Advisor. J. Sanchirico (Environmental Science and Policy)

Environmental Policy Analysis

Units: 23-25

Preparation:

ECN 001A Principles of Microeconomics 4
(Not included in units required for the minor)

Basic course in political science.

ESN 001 Environmental Analysis 4
ESN 160 The Policy Process 4
ESN 161 Environmental Law 4
ESN 168A Methods of Environmental Policy Evaluation 5

Choose two:

ESN 163 Energy and Environmental Aspects of Transportation 4
ESN 165N Climate Policy (Discontinued) 3
ESN 166N Ocean and Coastal Policy (Discontinued) 3
ESN 167 Energy Policy 4
ESN 168B Methods of Environmental Policy Analysis 4
ESN 169 Water Policy and Politics 3
ESN 171 Urban and Regional Planning 4
ESN 172 Public Lands Management 4
ESN 179 Environmental Impact Assessment 4

Total: 23-25

Environmental Science & Management

Environmental Science & Management | ESM B.S.

(College of Agricultural and Environmental Sciences)

Randy Southard, Chairperson

Department Office. 1110 Plant and Environmental Sciences Building; 530-752-1130; http://lawr.ucdavis.edu

Faculty. http://www.lawr.ucdavis.edu/people/faculty

The Major Program

The Environmental Science and Management (ESM) major is designed for students who are interested in solving environmental problems from an interdisciplinary perspective linking the natural and social sciences.

Students who choose this major will study the interaction of physical, biological, and social components of environmental problems. Students completing the program will understand the scientific basis for environmental decision making and the legal, economic, and political issues involved in management of the environment.
**The Program.** Courses in biology, chemistry, physics, economics, geology, and calculus form the lower-division preparatory foundation of the curriculum. These are then tied together with Environmental Science and Policy 1, "Environmental Analysis" which provides an inter-disciplinary analysis of several environmental problems. The upper-division core consists of foundation courses in physical, biological, and social sciences, as well as applied courses in environmental monitoring, GIS, impact reporting, and statistical analysis. In their junior year, students must choose a specialized track from the following six options:

(a) Ecology, Biodiversity, and Conservation  
(b) Natural Resource Management  
(c) Climate Change and Air Quality  
(d) Geospatial Information Science  
(e) Watershed Science  
(f) Soils and Biogeochemistry  

A capstone course is required for all seniors and serves to integrate the science, policy/management and biology aspects of the ESM major. All students gain practical experience through field courses and a required internship. Selected students may also pursue an honors thesis in their senior year.

The ESM major is jointly administered by the Departments of Environmental Science and Policy (ESP) and Land, Air and Water Resources (LAWR). Any student in good standing is eligible to transfer to the major; to do so, please see the student affairs officers in 2134 Wickson Hall or in 1150 Plant and Environmental Sciences Building.  

**Careers.** Graduates from this program are prepared to pursue careers as practicing environmental scientists, resource analysts and planners working for public agencies and private firms specializing in environmental quality, natural resources or ecological research. The major is also an excellent preparation for graduate or professional training in physical and/or biological environmental science graduate programs, as well as in environmental law, administration and environmental policy.

**Major Advisors.** Marcel Holyoak (Environmental Science and Policy) and Terrance Nathan (Land, Air and Water Resources)

**Advising centers** for the major, including peer advising, are located in both the Environmental Science and Policy and Land, Air and Water Resources departments. Students whose last names begin with the letters A-L, please see Melissa Whaley in 2134 Wickson Hall. Students whose last names begin with the letters M-Z, please see Lacole Brooks in 1150 Plant and Environmental Sciences.

Environmental Science & Management | ESM Courses

Courses in ESM:

**ESM 008—Water Quality at Risk (3)**
Discussion—1 hour; Lecture—2 hours. Not open to students who have successfully completed Environmental and Resource Sciences 8. (Formerly Environmental and Resource Sciences 8.) Natural and human threats to water quality. Balance of science and policy in all aspects of attaining, maintaining, and managing water quality, water contamination. Decoding popular media coverage of water quality and water contamination. (Same course as SAS 008.) GE credit: SE, SL, SS, WE. Effective: 2011 Fall Quarter.

**ESM 030—World Ecosystems & Geography (3)**
Lecture—3 hours. Not open to students who have successfully completed Environmental and Resource Sciences 30. (Formerly Environmental and Resource Sciences 30.) Introduction to the earth's major geographic regions and associated ecosystems, such as deserts, temperate forests, and oceans with an examination of how climate, vegetation regimes, ecological processes, agriculture and other human activities interact in different regions of the world. (Same course as ESP 030.) GE credit: SE, SL, WC. Effective: 2011 Fall Quarter.

**ESM 092—Internship (1-12)**
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Lower division standing. Work experience off and on campus in resource sciences. Internship supervised by a member of the faculty. May be repeated for credit. (P/NP grading only.) Effective: 2011 Fall Quarter.

**ESM 098—Directed Group Study (1-5)**
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. Primarily for lower division students. (P/NP grading only.) Effective: 2011 Fall Quarter.
ESM 098F—Student Facilitated Course Development (1-3)
Variable—1-3 hours. Prerequisite(s): Consent of Instructor. Student-facilitated (taught) course intended for lower division students. (P/NP grading only.) Effective: 2016 Winter Quarter.

ESM 099—Special Study for Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. May be repeated for credit. (P/NP grading only.) Effective: 2011 Fall Quarter.

ESM 100—Principles of Hydrologic Science (4)
Lecture—4 hours. Prerequisite(s): CHE 002B; MAT 016B; (PHY 007A or PHY 009A) Not open to students who have successfully completed Environmental and Resource Sciences 100. (Formerly Environmental and Resource Sciences 100.) Topics include hydrology (surface and ground water), hydraulic flow through porous media, water in the soil-plant-atmosphere continuum, water quality, flow through open channels, and representative water-resource problems. GE credit: QL, SE, SL. Effective: 2011 Fall Quarter.

ESM 108—Environmental Monitoring (3)
Fieldwork; Laboratory—2 hours; Lecture/Discussion—2 hours. Prerequisite(s): EVE 101; ESP 100; ETX 101; WFC 100; ERS 100; SSC 100; ENH 100; LDA 050; Or the equivalent for any of theses courses. Not open to students who have successfully completed Environmental and Resource Sciences 108. (Formerly Environmental and Resource Sciences 108.) Instrumentation and methods for environmental and ecological monitoring; GPS, sensors, datalogging, and GIS. Wide range of measurement techniques for environmental parameters. GE credit: SE, SL. Effective: 2011 Fall Quarter.

ESM 120—Global Environmental Interactions (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): One college level chemistry course; one college level biology course. Limited to 25 students per discussion section. Not open to students who have successfully completed Environmental Resources Sciences 60 or 120. (Formerly Environmental Resources Sciences 60 and 120.) Relationships among climate, hydrology, biogeochemical cycles, soils and vegetation distribution in diverse landscapes and biomes. Emphasis on physical, chemical, and biological processes affecting ecosystems from the poles to the equator, and human impacts on the environment. Effective: 2010 Fall Quarter.

ESM 121—Water Science and Management (3)
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): PHY 010 or GEL 001 Not open to students who have successfully completed Environmental and Resource Sciences 121. (Formerly Environmental and Resource Sciences 121.) Role of water as an essential natural resource in contemporary society. Aspects of the scientific method, including descriptions of natural phenomena and underlying physical causes. Water for cities, agriculture, industry, wildlife and recreation; case studies of water management. GE credit: QL, SE, SL. Effective: 2011 Fall Quarter.

ESM 131—Air as a Resource (3) Review all entries
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): CHE 010 Not open to students who have successfully completed Environmental and Resource Sciences 131. (Formerly Environmental and Resource Sciences 131.) Degradation of the atmospheric resource, historical aspects and effects of air pollution examined. Evaluation of primary gaseous and particulate pollutants and discussion of their impact. GE credit: QL, SE, SL. Effective: 2011 Fall Quarter.

ESM 141—Role of Fire in Natural Ecosystems (4)
Lecture—3 hours; Term Paper. Prerequisite(s): (BIS 002A or PLS 002); (BIS 002B or BIS 002C); Basic biological, ecology/evolution concepts. Not open to students who have successfully completed Environmental and Resource Sciences 141. (Formerly Environmental and Resource Sciences 141.) Fire regimes and roles in major North American vegetation types, especially in the west. Physics of fire, fire effects on organisms and ecosystem functioning, reconstructing fire histories, fire in resource management, and fire use by indigenous people. GE credit: SE, SL, WE. Effective: 2011 Fall Quarter.

ESM 144—Trees and Forests (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): PLS 002 or BIS 001C or BIS 002C Biological structure and
function of trees as organisms; understanding of forests as communities and as ecosystems; use of forests by humans; tree phenology, photosynthesis, respiration, soil processes, life histories, dormancy, forest biodiversity, and agroforestry. Not open for credit to students who have completed PLB 144 or ENH 144 or ERS 144. (Former course PLB/ENH/ERS 144.) (Same course as PLS 144.) GE credit: SE, VL. Effective: 2011 Fall Quarter.

ESM 185—Aerial Photo Interpretation and Remote Sensing (4)
Laboratory—4 hours; Lecture—2 hours. Prerequisite(s): Upper division standing. Not open to students who have successfully completed Environmental Resource Science 185. (Formerly Environmental Resource Science 185.) Basics of remote sensing and photogrammetry, grids and map projections, aerial photo interpretation, sensors and platforms for aerial and space photography and non-photographic imaging systems, aerial thermography, microwave sensing, and introduction to remote sensing applications. Effective: 2011 Fall Quarter.

ESM 186—Environmental Remote Sensing (5)
Laboratory—6 hours; Lecture—3 hours. Prerequisite(s): MAT 016B; (PHY 007C or PHY 009B); Upper division standing; LDA 150 recommended. Not open to students who have successfully completed Hydrologic Science 186 or Environmental and Resource Sciences 186. (Formerly Hydrologic Science 186 and formerly Environmental and Resource Sciences 186.) Overview of satellite, airborne, and ground-based remote sensing, building on properties of electromagnetic radiation. Applications include hydrologic processes, weather and climate, ecology and land use, soils, geology, forestry, and agriculture. Computer based analysis and visualization of images and processing techniques. GE credit: QL, SE, VL. Effective: 2014 Winter Quarter.

ESM 192—Internship (1-12)
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Completion of 84 units. Work experience off and on campus in resource sciences. Internship supervised by a member of the faculty. (P/NP grading only.) Effective: 2011 Fall Quarter.

ESM 194H—Senior Honor Thesis (2-6)
Independent Study—2-6 hours. Prerequisite(s): Senior standing, overall GPA of 3.50 or higher and consent of master advisor. Independent study, guided research on an environmentally related subject of special interest to the student. May be repeated for credit. GE credit: SE, WE. Effective: 2011 Fall Quarter.

ESM 195—Integrating Environmental Science and Management (2)
Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Senior status in Environmental Science and Management major or other environmental science major (e.g. Environmental Resource Science; Environmental Biology and Management; Environmental Toxicology; Environmental Policy Analysis and Planning, Wildlife, Fish, and Conservation Biology; Hydrologic Science). Practical aspects of environmental improvement through integrated analyses of contemporary issues or problems associated with advocacy, regulation, science and resource management from the perspectives of the physical and ecological sciences and current policy/management. May be repeated up to 2 time(s). GE credit: SE, SS. Effective: 2011 Fall Quarter.

ESM 198—Directed Group Study (1-5)
Variable. May be repeated for credit. (P/NP grading only.) Effective: 2011 Fall Quarter.

ESM 198F—Student Facilitated Course (1-3)
Variable—1-3 hours. Prerequisite(s): Consent of Instructor. Restricted to upper division standing or consent of instructor. Student-facilitated (taught) course intended for upper division students. (P/NP grading only.) Effective: 2011 Fall Quarter.

ESM 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. May be repeated for credit. (P/NP grading only.) Effective: 2011 Fall Quarter.

ESM 199FA—Student Teaching Course Development (1-3)
Variable—1-3 hours. Prerequisite(s): Consent of Instructor. Restricted to upper division standing. Under the supervision of a faculty member, an undergraduate student plans and develops the course they will teach under 98F/198F. (P/NP grading only.) Effective: 2016 Winter Quarter.

ESM 199FB—Student Teaching Course Development (1-3)
Variable—1-3 hours. Prerequisite(s): Consent of Instructor. Student facilitated. Under the supervision of a faculty member, an undergraduate student teaches a course under 98F/198F. (P/NP grading only.) Effective: 2016 Winter Quarter.
The Program of Study

Environmental Science and Policy is a teaching and research department offering courses, workshops, and directed group study classes that focus on the complex trade-offs that arise from interdependencies between natural and human systems. The department offers Bachelor of Science degrees in Environmental Science and Management and in Environmental Policy Analysis and Planning. Courses in Environmental Science and Policy also supplement major programs in a wide variety of established disciplines.

Current Information. Through its continuing contacts with many other departments and teaching divisions on the campus, the department develops a variety of special courses and workshops each year. Check with the Department office for up-to-date information about our courses and workshops.

Graduate Study. The Graduate Group in Ecology which is housed in Environmental Science & Policy offers an M.S. and Ph.D. degree program. Further information about graduate programs in ecology should be obtained from the chairperson of the Graduate Group in Ecology.

Group Office. 1005 Wickson Hall; 530-752-6752; http://ecology.ucdavis.edu/

Environmental Science & Policy | ESP Courses

Courses in ESP:

**ESP 001—Environmental Analysis (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): UWP 001 (can be concurrent) or UWP 001Y (can be concurrent) or UWP 001V (can be concurrent) or ENL 003 (can be concurrent); Or equivalent; sophomore standing; ECN 001A and BIS 002B recommended. Analysis of the physical, biological, and social interactions which constitute environmental problems. Emphasis on analysis of environmental problems, the consequences of proposed solutions, and the interaction of environmental science and public policy in creating solutions. GE credit: SE, SL, SS. Effective: 2018 Spring Quarter.

**ESP 010—Current Issues in the Environment (3)**
Lecture—3 hours. Prerequisite(s): Elementary biology recommended. The science behind environmental issues, and policies affecting our ability to solve domestic and international environmental problems. Resources, environmental quality, regulation, environmental perception and conservation. Integrative case studies. Not open for credit to students who have completed ESP 1. GE credit: SE, SL, SS, WE. Effective: 2004 Fall Quarter.

**ESP 030—World Ecosystems & Geography (3) Review all entries**
Lecture—3 hours. Not open to students who have successfully completed Environmental and Resource Sciences 30. (Formerly Environmental and Resource Sciences 30.) Introduction to the earth's major geographic regions and associated ecosystems, such as deserts, temperate forests, and oceans with an examination of how climate, vegetation regimes, ecological processes, agriculture and other human activities interact in different regions of the world. (Same course as ESM 030.) GE credit: SE, SL, WC. Effective: 2011 Fall Quarter.

**ESP 030—World Ecosystems & Geography (3) Review all entries Discontinued**
Lecture—3 hours. Not open to students who have successfully completed Environmental and Resource Sciences 30. (Formerly Environmental and Resource Sciences 30.) Introduction to the earth's major geographic regions and associated ecosystems, such as deserts, temperate forests, and oceans with an examination of how climate, vegetation regimes, ecological processes, agriculture and other human activities interact in different regions of the world. (Same course as ESM 030.) GE credit: SE, SL, WC. Effective: 2019 Winter Quarter.

**ESP 092—Internship (1-12)**
Variable. Prerequisite(s): Consent of Instructor. Lower division standing. Work experience off and on campus in all
subject areas offered in the College of Agricultural and Environmental Sciences. Internship supervised by member of the faculty. (P/NP grading only.) Effective: 1997 Winter Quarter.

ESP 098—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Primarily for lower division students. (P/NP grading only.) Effective: 1997 Winter Quarter.

ESP 100—General Ecology (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (BIS 002A, BIS 002B, BIS 002C); ((MAT 016A, MAT 016B) or (MAT 017A, MAT 017B) or (MAT 021A, MAT 021B)); STA 013 recommended. Theoretical and experimental analysis of the distribution, growth and regulation of species populations; predator-prey and competitive interactions; and the organization of natural communities. Application of evolutionary and ecological principles to selected environmental problems. GE credit: SE, SL. Effective: 2016 Fall Quarter.

Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ANT 001 or ANT 002 or ESP 030 or EVE 100 or BIS 101 recommended. Interdisciplinary study of diversity and change in human societies, using frameworks from anthropology, evolutionary ecology, history, archaeology, psychology, and other fields. Topics include population dynamics, subsistence transitions, family organization, disease, economics, warfare, politics, and resource conservation. (Same course as ANT 101.) GE credit: SS, WC, WE. Effective: 2016 Fall Quarter.

ESP 105—Evolution of Societies and Cultures (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ANT 001 or ANT 002 or ESP 030 or EVE 100 or BIS 101 recommended. Interdisciplinary study of social and cultural evolution in humans. Culture as a system of inheritance, psychology of cultural learning, culture as an adaptive system, evolution of maladaptations, evolution of technology and institutions, evolutionary transitions in human history, coevolution of genetic and cultural variation. Only two units of credit for students who took ESP 101 or ANT 101 prior to fall 2004. (Same course as ANT 105.) GE credit: QL, SS, WC, WE. Effective: 2016 Fall Quarter.

ESP 105—Evolution of Societies and Cultures (4) Review all entries Discontinued
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ANT 001 or ANT 002 or ESP 030 or EVE 100 or BIS 101 recommended. Interdisciplinary study of social and cultural evolution in humans. Culture as a system of inheritance, psychology of cultural learning, culture as an adaptive system, evolution of maladaptations, evolution of technology and institutions, evolutionary transitions in human history, coevolution of genetic and cultural variation. Only two units of credit for students who took ESP 101 or ANT 101 prior to fall 2004. (Same course as ANT 105.) GE credit: QL, SS, WC, WE. Effective: 2019 Winter Quarter.

ESP 110—Principles of Environmental Science (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (PHY 001A or PHY 007A); (MAT 016B or MAT 017B or MAT 021B); BIS 002A or BIS 010 recommended; upper division standing. Application of physical and chemical principles, ecological concepts, and systems approach to policy analysis of atmospheric environments, freshwater and marine environments, land use, energy supplies and technology, and other resources. GE credit: QL, SE, SL. Effective: 2018 Winter Quarter.

ESP 111—Marine Environmental Issues (1)
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Examination of critical environmental issues occurring in coastal waters including the effects of climate change, overfishing, and other human impacts. Through readings and group discussions, students will develop an integrative understanding of the oceanographic and ecological processes. May be repeated up to 2 time(s) when topics differ. (Same course as EVE 111.) GE credit: SE, SL. Effective: 2015 Summer Session 1.

ESP 116N—Oceanography (3)
Fieldwork; Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): GEL 001 or GEL 002 or GEL 016 or GEL 050 Advanced oceanographic topics: Chemical, physical, geological, and biological processes; research methods and data analysis; marine resources, anthropogenic impacts, and climate change; integrated earth/ocean/atmosphere systems; weekly lab and one weekend field trip. (Same course as GEL 116N) GE credit: SE, SL. Effective: 2017 Winter Quarter.

ESP 121—Population Ecology (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): BIS 002A; BIS 002B; BIS 002C; (MAT 016B or MAT 017B or MAT 021B or MAT 021BH) Development of exponential and logistic growth models for plant and animal populations, analysis of age structure and genetic structure, analysis of competition and predator-prey systems. Emphasis is on
developing models and using them to make predictions and solve problems. GE credit: QL, SE, SL. Effective: 2016 Fall Quarter.

ESP 123—Introduction to Field and Laboratory Methods in Ecology (4)
Fieldwork—4 hours; Laboratory—2 hours; Lecture—2 hours. Prerequisite(s): (ESP 100 or EVE 101); STA 100; Or equivalent of EVE 101 and STA 100. Introduces students to methods used for collecting ecological data in field and laboratory situations. Methods used by population ecologists and community ecologists; emphasis on experimental design, scientific writing and data analysis. GE credit: SE, SL. Effective: 2015 Spring Quarter.

ESP 124—Marine and Coastal Field Ecology (3)
Discussion—1 hour; Fieldwork—3 hours; Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): Upper division standing or consent of instructor. Introductory animal biology (BIS 001B) recommended; residence at or near Bodega Marine Lab required. Enrollment restricted to application at http://www.bml.ucdavis.edu. Ecology of marine populations and communities living in diverse habitats along the California coast. Hands-on learning using scientific process and tools of the biological trade to address ecological questions arising during field trips. Critical thinking through discussing scientific literature. GE credit: SE, SL. Effective: 2006 Summer Session 1.

ESP 127—Plant Conservation Biology (4)
Discussion—1 hour; Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): ESP 100 or EVE 101; Or equivalent upper division general ecology. Principles governing the conservation of plant species and plant communities, including the roles of fire, exotic species, grazing, pollination, soils, and population genetics; analytic and practical techniques for plant conservation; and introduction to relevant legal, ethical, and policy issues. GE credit: SE, SL. Effective: 2016 Fall Quarter.

ESP 150A—Physical and Chemical Oceanography (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ESP 116N or GEL 116N); PHY 009B; MAT 021D; CHE 002C; and Consent of Instructor. Physical and chemical properties of seawater, fluid dynamics, air-sea interaction, currents, waves, tides, mixing, major oceanic geochemical cycles. (Same course as GEL 150A.) GE credit: QL, SE. Effective: 2017 Winter Quarter.

ESP 150B—Geological Oceanography (3)
Lecture—3 hours. Prerequisite(s): GEL 050 or (GEL 116N or ESP 116N) Introduction to the origin and geologic evolution of ocean basins. Composition and structure of oceanic crust; marine volcanism; and deposition of marine sediments. Interpretation of geologic history of the ocean floor in terms of sea-floor spreading theory. (Same course as GEL 150B.) GE credit: SE. Effective: 2017 Winter Quarter.

ESP 150C—Biological Oceanography (4)
Discussion—1 hour; Fieldwork; Lecture—3 hours. Prerequisite(s): BIS 002A; Consent of Instructor. A course in general ecology. Ecology of major marine habitats, including intertidal, shelf benthic, deep-sea and plankton communities. Existing knowledge and contemporary issues in research. Segment devoted to human use. One weekend field trip required. (Same course as GEL 150C.) GE credit: SE, SL. Effective: 2017 Winter Quarter.

ESP 151—Limnology (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): BIS 002A; BIS 002B; (BIS 002C and ESP 100 or EVE 101 recommended.) Biology and productivity of inland waters with emphasis on the physical and chemical environment. GE credit: SE. Effective: 2017 Spring Quarter.

ESP 151L—Limnology Laboratory (3)
Laboratory—6 hours. Prerequisite(s): ESP 151 (can be concurrent); Junior, senior, or graduate standing. Limnological studies of lakes, streams, and reservoirs with interpretation of aquatic ecology. GE credit: SE. Effective: 1997 Winter Quarter.

ESP 152—Coastal Oceanography (3)
Discussion—1 hour; Fieldwork—3 hours; Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): Upper division standing or consent of the instructor; physics (PHY 009B), calculus (MAT 021B) and exposure to physical and chemical oceanography (GEL 150A and ESP 150A) are recommended; residence at or near Bodega Marine Laboratory required. Enrollment restricted to application at http://www.bml.ucdavis.edu. Oceanography of coastal waters, including bays, river plumes, nearshore and estuaries; focus on transport patterns, how they are forced and implications for ecological and environmental problems. Pertinent for students in oceanography, ecology, environmental engineering, geology and hydrology. GE credit: SE, SL. Effective: 2006 Summer Special Session.

ESP 155—Wetland Ecology (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): BIS 002A; Or equivalent of BIS 002A; ESP 100 or EVE 101
recommended. Introduction to wetland ecology. The structure and function of major wetland types and principles that are common to wetlands and that distinguish them from terrestrial and aquatic ecosystems. GE credit: SE. Effective: 2016 Fall Quarter.

**ESP 155L—Wetland Ecology Laboratory (3)**
Fieldwork; Laboratory—6 hours; Lecture—1 hour. Prerequisite(s): ESP 155 (can be concurrent) Modern and classic techniques in wetland field ecology. Emphasis on sampling procedures, vegetation analysis, laboratory analytical procedures, and examples of successful wetland restoration techniques. GE credit: SE, SL. Effective: 1997 Winter Quarter.

**ESP 160—The Policy Process (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): POL 001; ECN 001A and STA 013 recommended. Alternative models of public policymaking and application to case studies in the U.S. and California. GE credit: SS. Effective: 2016 Fall Quarter.

**ESP 161—Environmental Law (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Upper division standing and one course in environmental science or political science recommended. Introduction for non-Law School students to some of the principal issues in environmental law and the judicial interpretation of some important environmental statutes, e.g., NEPA. GE credit: SS. Effective: 1997 Winter Quarter.

**ESP 162—Environmental Policy (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECN 001A or ECN 001AV Compares economic with socio-cultural approaches to understanding the causes of environmental problems and strategies for addressing them. Includes different approaches to the policy process, policy instruments, and environmental behavior. Applies these principles to several problems. GE credit: SS. Effective: 2018 Winter Quarter.

**ESP 163—Energy and Environmental Aspects of Transportation (4)**
Extensive Writing; Lecture—3 hours. Prerequisite(s): ECN 001A or ECN 001AV or ENG 106 Engineering, economic, and systems planning concepts. Analysis and evaluation of energy, air quality and selected environmental attributes of transportation technologies. Strategies for reducing pollution and petroleum consumption in light of institutional and political constraints. Evaluation of vehicle emission models. (Same course as ECI 163.) GE credit: SE, SL, SS, WE. Effective: 2018 Spring Quarter.

**ESP 164—Ethical Issues in Environmental Policy (3)**
Lecture—3 hours. Prerequisite(s): ESP 160; ESP 168A; Seniors only in Environmental Policy Analysis and Planning or by consent of instructor. Basic modes of ethical reasoning and criteria of distributive justice applied to selected topics in environmental policymaking. GE credit: SS. Effective: 1997 Winter Quarter.

**ESP 165—Climate Policy (3)**
Lecture—3 hours. Prerequisite(s): ESP 001 or ECN 001A or ECN 001AV; or Consent of Instructor. Models, data and assumptions behind competing arguments regarding societal response to the prospect of climate change at the state, national and international level from economic, ethical and policy science perspectives. Effective: 2018 Spring Quarter.

**ESP 166—Ocean and Coastal Policy (3)**
Lecture—3 hours. Prerequisite(s): ESP 001; or Consent of Instructor. Limited enrollment. Overview of U.S. and International ocean and coastal policy, including energy, coastal land-use and water quality, protected areas and species. GE credit: SS. Effective: 2017 Spring Quarter.

**ESP 167—Energy Policy (4)**
Lecture—4 hours; Term Paper. Prerequisite(s): (ECN 001A or ECN 001AV); (MAT 016B or MAT 017B or MAT 021B); or Consent of Instructor. Survey of primary energy resources (fossil, renewable, nuclear), energy conversion methods,
future energy demand scenarios, and environmental impacts of energy. Overview of energy policy in the U.S. Analysis of policy alternatives for addressing energy-related environmental and national security issues. GE credit: SS. Effective: 2018 Spring Quarter.

ESP 168A—Methods of Environmental Policy Evaluation (5) Review all entries
Discussion—1 hour; Lecture—3 hours; Term Paper. Prerequisite(s): (ESP 001 or ESP 010); (STA 013 or STA 100); ECN 001A; ECN 100 recommended. Evaluation of alternatives for solution of complex environmental problems; impact analysis, benefit/cost analysis, distributional analysis, decision making under uncertainty, and multi-objective evaluation. GE credit: SS. Effective: 2018 Spring Quarter.

ESP 168A—Methods of Environmental Policy Evaluation (5) Review all entries
Discussion—1 hour; Lecture—3 hours; Term Paper. Prerequisite(s): (ESP 001 or ESP 010); (STA 013 or STA 013Y or STA 100); (ECN 001A or ECN 001AV); ECN 100 recommended. Evaluation of alternatives for solution of complex environmental problems; impact analysis, benefit/cost analysis, distributional analysis, decision making under uncertainty, and multi-objective evaluation. GE credit: SS. Effective: 2018 Summer Quarter.

ESP 168B—Methods of Environmental Policy Analysis (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ESP 168A Continuation of course 168A, with emphasis on examination of the literature for applications of research and evaluation techniques to problems of transportation, air and water pollution, land use, and energy policy. GE credit: SS. Effective: 1997 Winter Quarter.

ESP 169—Water Policy and Politics (3)
Lecture—3 hours. Prerequisite(s): ECN 001A or POL 001 recommended. Governance of water, including issues of water pollution/quality and water supply. The politics of water decision-making and effectiveness of water policy. Broad focus on federal water policy, with case examples from nationally significant U.S. watersheds. GE credit: SS. Effective: 2016 Fall Quarter.

ESP 170—Conservation Biology Policy (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): One course in environmental science (e.g., ESP 1), conservation (e.g., WFC 11 or WFC 154), or government (e.g., POL 1) recommended. Analysis of policies designed to conserve species and their habitats. Emphasis on how individual incentives affect the success of conservation policies. Valuation of endangered species and biodiversity. Criteria for deciding conservation priorities. GE credit: SE, SS. Effective: 2016 Fall Quarter.

ESP 171—Urban and Regional Planning (4)
Discussion—1 hour; Lecture—3 hours; Term Paper. Prerequisite(s): ESP 001 recommended. How cities plan for growth in ways that minimize environmental harm. Standard city planning tools (general plan, zoning ordinance) and innovative new approaches. Focus on planning requirements and practices in California. Relationships between local, regional, state, and federal policy. GE credit: SS, WE. Effective: 2016 Fall Quarter.

ESP 172—Public Lands Management (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECN 001A recommended. Investigation of alternative approaches to public lands management by Federal and state agencies. The role each agency's legislation plays in determining the range of resource allocations. GE credit: ACGH, SS. Effective: 2016 Fall Quarter.

ESP 172—Public Lands Management (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): POL 001 and ECN 001A recommended. Investigation of alternative approaches to public lands management by Federal and state agencies. The role each agency's legislation plays in determining the range of resource allocations. GE credit: ACGH, SS. Effective: 2019 Spring Quarter.

ESP 173—Land Use and Growth Controls (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Upper division standing; one course in environmental policy. Exposes students to the economic, political, and legal factors affecting land use and growth controls, and helps students critically evaluate written materials in terms of their arguments and supporting data. GE credit: SS. Effective: 2016 Fall Quarter.

ESP 175—Natural Resource Economics (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ARE 100B or ECN 100; Or the equivalent. Pass One open to Managerial Economics (AMGE) and Environmental Policy Analysis and Planning (AEPP) Majors and Agricultural and Resource Economics (GARE) Graduate Majors. Economic concepts and policy issues associated with natural resources, renewable resources (ground water, forests, fisheries, and wildlife populations) and non-renewable
resources (minerals and energy resources, soil). (Same course as Agricultural and Resource Economics 175.) GE credit: SS. Effective: 2017 Winter Quarter.

**ESP 175—Natural Resource Economics (4)**  
Review all entries  
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ARE 100A C- or better or ECN 100A C- or better or ECN 100 C- or better Pass One open to Managerial Economics (AMGE) and Environmental Policy Analysis and Planning (AEPP) Majors and Agricultural and Resource Economics (GARE) Graduate Majors. Economic concepts and policy issues associated with natural resources, renewable resources (ground water, forests, fisheries, and wildlife populations) and non-renewable resources (minerals and energy resources, soil). (Same course as ARE 175.) GE credit: SS. Effective: 2018 Fall Quarter.

**ESP 178—Applied Research Methods (4)**  
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): STA 103 or STA 100 or STA 108 or SOC 106 or ARE 106; Or the equivalent. Research methods for analysis of urban and regional land use, transportation, and environmental problems. Survey research and other data collection techniques; demographic analysis; basic forecasting, air quality, and transportation models. Collection, interpretation, and critical evaluation of data. GE credit: QL, SS. Effective: 2016 Fall Quarter.

**ESP 179—Environmental Impact Assessment (4)**  
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ESP 001; Or the equivalent. Introduction to the information resources and methods typically used in environmental impact analysis. Emphasis on how environmental information is applied to planning, environmental regulation, and public policymaking, with case studies from California land use and natural resource policy. GE credit: SS. Effective: 2016 Fall Quarter.

**ESP 179L—Environmental Impact Reporting Using Geographic Information (2)**  
Discussion/Laboratory—2 hours; Laboratory—4 hours. Prerequisite(s): ESP 179 (can be concurrent); ESP 179 required concurrently. Introduction to Geographic Information Systems (GIS) by using ArcView for assessment and environmental planning. Not open for credit to students who have completed ABT 180, ABT 181, or ASE 132. GE credit: SE. Effective: 2002 Fall Quarter.

**ESP 190—Workshops on Environmental Problems (1-8)**  
Laboratory—2-16 hours. Prerequisite(s): Consent of Instructor. Open to all upper division and graduate students on application. Workshops featuring empirical analyses of contemporary environmental problems by multidisciplinary student teams. Guided by faculty and lay professionals, the teams seek to develop an integrated view of a problem and outline a series of alternative solutions. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

**ESP 191A—Workshop on Food System Sustainability (3)**  
Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): PLS 015; CRD 020; ARE 121; PLS 150; or Consent of Instructor. Upper division standing. Priority enrollment for seniors in the sustainable agriculture and food systems major; limited to 25 students per section. First in a two-quarter senior capstone course sequence. Identify projects addressing specific problems and opportunities of sustainable agriculture and food systems, form multidisciplinary teams, and identify and consult with key stakeholders to understand their needs and concerns. GE credit: SE. Effective: 2009 Fall Quarter.

**ESP 191B—Workshop on Food System Sustainability (3)**  
Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): ESP 191A Priority enrollment for seniors in the sustainable agriculture and food systems major; limited to 25 students per section. Continuation of course 191A. Student teams conduct analyses of a specific issue in sustainable agriculture or food systems, prepare a critical assessment of technological, economic, environmental, and social dimensions of options for action and present their results to stakeholders. GE credit: SE. Effective: 2010 Winter Quarter.

**ESP 192—Internship (1-12)**  
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Completion of 84 units. Work experience off and on campus in all subject areas offered in the College of Agricultural and Environmental Sciences. Internships supervised by a member of the faculty. (P/NP grading only.) Effective: 1997 Winter Quarter.

**ESP 197T—Tutoring in Environmental Science and Policy (1-5)**  
Tutorial—2-6 hours. Prerequisite(s): Consent of Instructor. Upper division standing. Experience in teaching under guidance of faculty member. (P/NP grading only.) Effective: 2014 Winter Quarter.

**ESP 198—Directed Group Study (1-5)**  
Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.
ESP 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

ESP 212A—Environmental Policy Process (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Course in public policy (e.g., ESP 160); environmental law (e.g., ESP 161); course in statistics (e.g., SOC 106 or ARE 106). Introduction to selected theories of the policy process and applications to the field of environmental policy. Develops critical reading skills, understanding of policy theory, and an ability to apply multiple theories to the same phenomena. (Same course as ECL 212A and ENV 200C.) Effective: 2017 Fall Quarter.

ESP 212B—Environmental Policy Evaluation (4)
Discussion—1 hour; Lecture—2 hours; Seminar—2 hours. Prerequisite(s): (STA 108 or ARE 106); ARE 176; Intermediate microeconomics (e.g., ECN 100); policy analysis (e.g., ESP 168A or the equivalent). Method and practice, philosophical basis, and political role of policy analysis. Reviews basic concepts from economic theory; how and why environmental problems emerge in a market economy; and tools necessary for solving environmental problems. (Same course as ECL 212B and ENV 200B.) Effective: 2018 Winter Quarter.

ESP 220—Tropical Ecology (3)
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): ESP 100; EVE 101; EVE 117; EVE 138 recommended. Open to graduate and undergraduate students who meet requirement subject to consent of instructor. An overview of present status of knowledge on structure and processes of major tropical ecosystems. Differences and similarities among tropical and temperate systems stressed. Effective: 1997 Winter Quarter.

ESP 228—Advanced Simulation Modeling (3)
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): (STA 108 or ARE 106); (ESP 128 and ESP 128L) Advanced techniques in simulation modeling; optimization and simulation, dynamic parameter estimation, linear models, error propagation, and sensitivity testing. Latter half of course will introduce model evaluation in ecological and social system models. Effective: 1997 Winter Quarter.

ESP 252—Sustainable Transportation Technology and Policy (3)
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): ESP 160; Or the equivalent. Role of technical fixes and demand management in creating a sustainable transportation system. Emphasis on technology options, including alternative fuels, electric propulsion, and IVHS. Analysis of market demand and travel behavior, environmental impacts, economics and politics. (Same course as ECI 252.) Effective: 1997 Winter Quarter.

ESP 252—Sustainable Transportation Technology and Policy (3) Review all entries Discontinued
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): ESP 160; Or the equivalent. Role of technical fixes and demand management in creating a sustainable transportation system. Emphasis on technology options, including alternative fuels, electric propulsion, and IVHS. Analysis of market demand and travel behavior, environmental impacts, economics and politics. (Same course as ECI 252.) Effective: 2018 Fall Quarter.

ESP 275—Economic Analysis of Resource and Environmental Policies (4)
Lecture/Discussion—4 hours. Prerequisite(s): ARE 204 or ECN 204 Development of externality theory, market failure concepts, welfare economics, theory of renewable and non-renewable resource use, and political economic models. Applications to policy issues regarding the agricultural/environment interface and managing resources in the public domain. (Same course as ARE 275.) Effective: 1999 Spring Quarter.

ESP 278—Research Methods in Environmental Policy (3)
Lecture/Discussion—3 hours. Prerequisite(s): ARE 106; Or the equivalent. Introduction to scientific research in environmental policy. Major issues in the philosophy of the social sciences. How to design research that acknowledges theoretical assumptions and that is likely to produce evidence in an intersubjectively reliable fashion with explicit recognition of its uncertainties. Effective: 1998 Winter Quarter.

ESP 298—Directed Group Study (1-5)

ESP 299—Research (1-12)
Variable. Prerequisite(s): Consent of Instructor. Graduate standing. (S/U grading only.) Effective: 1997 Winter Quarter.

ESP 396—Teaching Assistant Training Practicum (1-4)
Variable—3-12 hours. Prerequisite(s): Consent of Instructor. Open to graduate students only. Teaching assistant training practicum. May be repeated for credit. (S/U grading only.) Effective: 2017 Spring Quarter.

The Major Program

Toxic agents in the environment include pesticides, food additives, industrial waste, and metals as well as chemicals produced by animals, plants, fungi and bacteria. Students in the Environmental Toxicology major learn how toxicants produce adverse effects by understanding their environmental fates and biological activities. They learn about monitoring concentrations and the distribution and persistence of agents found in water, soil, air and foods. Toxicity testing procedures and exposure assessments are used to help evaluate potential for harm to humans and other species. By understanding the cellular targets and biochemical mechanisms of perturbation by toxicants, toxicologists can better estimate adverse effects. Overall, students learn mechanisms by which toxic agents act, their origin and fate and how toxicologists evaluate the risk of adverse effects and balance them against the benefits.

The Program. Preparatory courses in biology, chemistry, mathematics, and physics are required to provide fundamental principles that underlie toxicology. Students in the major are expected to understand the environmental fates and biological activities of different classes of toxic substances, and the legislative issues that arise from chemical use. Opportunities are available to develop in-depth understanding in areas of emphasis through selection of electives.

Emphases. Elective course work in many disciplines can complement the required core courses. Providing a framework for selecting restricted electives, the major offers specializations in (1) Ecotoxicology and Environmental Chemistry, (2) Forensic Science and Regulatory Toxicology, and (3) Molecular and Biomedical Toxicology. The first category includes topics in chemical fate, transport and degradation, as well as ecology, wildlife, and aquatic toxicology. The second category includes forensic science, environmental policy and management, and public health. The third category includes pharmacology, biotechnology, medicine, veterinary medicine, and food toxicology. Students are encouraged to select course work from these Emphases and beyond to match their interests.

Internships and Career Alternatives. Occupations that use environmental toxicology include risk assessment, pharmaceutical development, food additive toxicity testing, managing regulatory compliance, residue or forensic analysis, pest control, monitoring and field sampling, industrial hygiene, and environmental health and safety. A substantial proportion of graduates elect to pursue advanced training in graduate or professional schools. Others with the B.S. degree go on to law, medical, pharmacy, or veterinary medical school, as well as to graduate programs in pharmacology, toxicology, agricultural and environmental chemistry, or public health. During undergraduate study, optional internships or research projects are recommended to provide training and work experience to help students pursue future goals.

Major Advisor. Matthew Wood

Advising Center for the major is in 4111 Meyer Hall. Contact the Academic Program Advisor at 530-752-1042.

**Restricted Electives; 3-4 courses**  
**Units:** 12-16

Electives selected for area of Emphasis with faculty advisor's approval with six unit combined maximum of 190, 192, 198, and 199 with advisor approval; see department website for details.

**Total:** 118-129

**Environmental Toxicology | ETX Minor**  
*(College of Agricultural and Environmental Sciences)*

Robert H. Rice, Ph.D., Chairperson of the Department

**Department Office.** 4138 Meyer Hall; 530-752-1142; [http://etox.ucdavis.edu](http://etox.ucdavis.edu)

**Faculty,** [http://etox.ucdavis.edu/directory/faculty/](http://etox.ucdavis.edu/directory/faculty/)

Environmental Toxicology explores the effects of toxicants (both human made and naturally occurring) on the normal biochemical, cellular, and physiological functioning of biological systems. The minor will complement your course of study by enhancing your appreciation of the complexity and resiliency of biological systems when challenged by chemical agents and the fate and impact of chemicals in the environment. The science underlying a variety of current environmental issues is presented.
Environmental Toxicology

ETX 101 Principles of Environmental Toxicology 4
ETX 102A Environmental Fate of Toxicants 4
ETX 103A Biological Effects of Toxicants 4

Choose two; six units minimum:
ETX 104 Environmental and Nutritional Factors in Cellular Regulation and Nutritional Toxicants 4
ETX 120 Perspectives in Aquatic Toxicology 4
ETX 127 Environmental Stress and Development in Marine Organisms 10
ETX 128 Food Toxicology 3
ETX 130 The Role and Applications of Toxicology in Modern Industry 3
ETX 131 Environmental Toxicology of Air Pollutants 3
ETX 135 Health Risk Assessment of Toxicants 3
ETX 138 Legal Aspects of Environmental Toxicology 3
ETX 146 Exposure and Dose Assessment 3

Total: 18-26

Environmental Toxicology | ETX Courses

Courses in ETX:

**ETX 010—Introduction to Environmental Toxicology (3)**
Lecture—3 hours. Hazardous substances, their effects on humans and their actions and movement in the environment. Emphasis on substances of current concern. GE credit: SE, SL. Effective: 2000 Fall Quarter.

**ETX 020—Introduction to Forensic Science (3)**
Lecture—3 hours. Basic principles of forensic science, types of information on which investigations focus, how information is obtained and used in criminal investigations, types of scientific skills required to practice forensic science, guidance on training. Real cases discussed; demonstrations of methods provided. GE credit: SE, SL, VL. Effective: 2012 Spring Quarter.

**ETX 030—Chemical and Drug Use and Abuse (3)**
Lecture—3 hours. An overview of chemical use and abuse in our society. The effects of chemicals (therapeutic drugs, pesticides, food additives, herbal remedies, environmental contaminants, and recreational drugs) on humans and other living systems. GE credit: SE. Effective: 2006 Winter Quarter.

**ETX 092—Iternship (1-12)**
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Lower division standing. Work experience off and on campus in all subject areas offered in the College of Agricultural and Environmental Sciences. Internships supervised by a member of the faculty. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

**ETX 099—Special Study for Undergraduates (1-5)**
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

**ETX 101—Principles of Environmental Toxicology (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (CHE 008B or CHE 118B or CHE 128B); BIS 001A Principles of toxicology with a focus on environmental, industrial, and natural chemicals. Topics include fate and effects of chemicals in organisms and the environment, air pollutants, insecticides, aquatic toxicology, endocrine disruptors, biomarkers and bioassays, and risk assessment. GE credit: SE, SL. Effective: 2003 Fall Quarter.

**ETX 102A—Environmental Fate of Toxicants (4)** Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): CHE 008B; CHE 118B; CHE 128B; or Consent of Instructor. Properties of toxic chemicals influencing their distribution and transformations; action of environmental forces affecting toxicant breakdown, movement, and accumulation; sources and occurrence of major classes of
environmental toxicants. Not open for credit to students who have completed ETX 112A. GE credit: QL, SE, SL, VL, WE. Effective: 2004 Winter Quarter.

ETX 102A—Environmental Fate of Toxicants (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): CHE 008B or CHE 118B or CHE 128B; or Consent of Instructor. Properties of toxic chemicals influencing their distribution and transformations; action of environmental forces affecting toxicant breakdown, movement, and accumulation; sources and occurrence of major classes of environmental toxicants. Not open for credit to students who have completed ETX 112A. GE credit: QL, SE, SL, VL, WE. Effective: 2019 Fall Quarter.

ETX 102B—Quantitative Analysis of Environmental Toxicants (5)
Discussion—1 hour; Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ETX 102A Sample preparation methods for trace analysis of environmental toxicants. Concept and techniques of advanced analytical instrumentation. Interpretation and use of analytical data. Not open for credit to students who have completed course ETX 112B. GE credit: SE, VL. Effective: 2004 Spring Quarter.

ETX 103A—Biological Effects of Toxicants (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): BIS 102; ETX 101 and NPB 101 recommended. Biological effects of toxic substances in living organisms. Metabolism, cellular and tissue targets, mechanisms of action, and pathological effects. Not open for credit to students who have taken ETX 114A. GE credit: SE. Effective: 2004 Winter Quarter.

ETX 103B—Biological Effects of Toxicants: Experimental Approaches (5)
Discussion—1 hour; Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ETX 103A Experimental approaches for assessing the biological effects of toxicants. Not open for credit to students who have taken ETX 114B. GE credit: SE, VL, WE. Effective: 2004 Spring Quarter.

ETX 104—Environmental and Nutritional Factors in Cellular Regulation and Nutritional Toxicants (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): BIS 101; (BIS 103 or ABI 103) Cellular regulation from nutritional/toxicological perspective. Emphasis: role of biofactors on modulation of signal transduction pathways, role of specific organelles in organization/regulation of metabolic transformations, major cofactor functions, principles of pharmacology/toxicology important to understanding nutrient/toxicant metabolism. (Same course as NUT 104.) GE credit: OL, SE, SL. Effective: 2005 Spring Quarter.

ETX 110—Toxic Tragedies and Their Impact on Society (2)
Lecture—2 hours. Prerequisite(s): BIS 010; or Consent of Instructor. Or equivalent; CHE 118A recommended. Examination of toxic tragedies, their origins, consequences, and effects on toxic regulation. GE credit: OL, SE, SL, WE. Effective: 2004 Winter Quarter.

ETX 111—Introduction to Mass Spectrometry (3)
Lecture—3 hours. Prerequisite(s): CHE 118C Introduction to mass spectrometry, including ionization techniques, mass analyzers, interpretation of mass spectra, and applications of mass spectrometry. Emphasis on fundamental concepts of mass spectrometry necessary to identify and quantify organic molecules. GE credit: SE. Effective: 2004 Winter Quarter.

ETX 120—Perspectives in Aquatic Toxicology (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): CHE 008B; (CHE 118B or CHE 128B); BIS 001A; or Consent of Instructor. Toxic substances, their fate in marine and freshwater systems, and their effects on aquatic organisms, populations, and ecosystems. Emphasis will be on substances and issues of current concern. GE credit: OL, SE, SL, VL, WE. Effective: 2004 Winter Quarter.

ETX 127—Environmental Stress and Development in Marine Organisms (10)
Discussion—2 hours; Laboratory—12 hours; Lecture—4 hours. Prerequisite(s): ETX 101 or BIS 102 or BIS 104; and Consent of Instructor. Or the equivalent; ETX 114A or NUT 114 recommended. Course taught at Bodega Marine Laboratory. Effects of environmental and nutritional stress, including pollutants, on development and function in embryos and larvae of marine organisms. Emphasis on advanced experimental methods. (Same course as NUT 127.) GE credit: OL, QL, SE, SL, VL, WE. Effective: 2002 Summer Session 1.
ETX 128—Food Toxicology (3)
Lecture—3 hours. Prerequisite(s): BIS 102; BIS 103 Chemistry and biochemistry of toxins occurring in foods, including plant and animal toxins, intentional and unintentional food additives. The assessment of food safety and toxic hazards. (Same course as FST 128.) GE credit: SE. Effective: 1997 Winter Quarter.

ETX 130—The Role and Applications of Toxicology in Modern Industry (3)
Lecture—3 hours. Prerequisite(s): ETX 101; ETX 103A recommended. Role of toxicology in industry research and development, human health and environmental protection, hazard and risk evaluations, risk management and communications, product stewardship, and regulatory compliance. Scientific principles and methods of toxicology in chemical, energy, pharmaceutical, pesticide, biotechnology industries. GE credit: OL, SE, SL, VL, WE. Effective: 2008 Spring Quarter.

ETX 131—Environmental Toxicology of Air Pollutants (3)
Lecture—3 hours. Prerequisite(s): CHE 008B (can be concurrent); Or the equivalent; BIS 102 recommended. Field trip required. Toxicology of air pollutants in the ambient, indoor, and occupational environments. Health effects, sources, environmental fates, pulmonary responses, sampling and analyses, and air-quality criteria and standards. Field trip required. GE credit: SE, VL. Effective: 2003 Fall Quarter.

ETX 135—Health Risk Assessment of Toxicants (3)
Lecture—3 hours. Prerequisite(s): ETX 101; ETX 114A recommended. Current practices of health risk assessment of environmental chemicals using toxicological principles and their application to regulatory control of these chemicals. GE credit: QL, SE, SL, VL. Effective: 1997 Winter Quarter.

ETX 138—Legal Aspects of Environmental Toxicology (3)
Lecture—3 hours. Prerequisite(s): Consent of Instructor. ETX 010 or ETX 101 recommended. Federal and California legislation concerning air and water pollution, pesticide use, food and feed additives, consumer protection, and occupational exposure to toxic substances; roles of federal regulatory agencies; alternatives to government control. GE credit: SE, VL, WE. Effective: 2001 Fall Quarter.

ETX 140—Genes and the Environment (3)
Lecture/Discussion—3 hours. Prerequisite(s): BIS 101; Biological Science 101 required or permission of instructor; coursework in genetics and molecular biology and/or environmental toxicology recommended. Evaluation of evidence that human health and disease susceptibility result from complex interactions between genes and the environment. Emphasis on cancer, metabolic, cardiovascular, and neurological health outcomes assessed by genotoxicity and toxicogenomic methods. Effective: 2015 Fall Quarter.

ETX 146—Exposure and Dose Assessment (3)
Lecture—3 hours. Prerequisite(s): ETX 112A; ETX 135 recommended. The exposure component of risk assessment; specifically, the presence and/or formation of toxic substances in environmental media, their movement within and between contaminated media, and the contacts of human populations with those media. GE credit: QL, SE, SL, VL. Effective: 1997 Winter Quarter.

ETX 190—Seminar (1)
Seminar—1 hour. Prerequisite(s): Consent of Instructor. Selected topics presented by students, faculty, or outside speakers covering current research and instructional activities within environmental toxicology. Reports and discussion concerning oral and written presentations, literature sources, and career opportunities. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

ETX 190C—Research Group Conference (1)
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Weekly conference of advanced research methods and the interpretation of research results. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

ETX 190S—Environmental Toxicology Career Seminar (1)
Seminar—1 hour. Careers in environmental toxicology; discussions with graduates from the Department of Environmental Toxicology and other experts in the field. (P/NP grading only.) GE credit: SE. Effective: 2003 Fall Quarter.

ETX 192—Internship (1-12)
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Completion of 84 units. Work experience off and on campus in all subject areas offered in the College of Agricultural and Environmental Sciences. Internships supervised by a member of the faculty. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

ETX 194HA—Honors Research (3)
Discussion—1 hour; Laboratory—6 hours. Prerequisite(s): Consent of Instructor. Senior standing; minimum GPA of
3.250. Specific research project conducted under the supervision of a faculty sponsor. Experience to include experimental design, learning new techniques, data analysis and interpretation of findings. GE credit: SE. Effective: 1997 Winter Quarter.

**ETX 194HB—Honors Research (3)**
Discussion—1 hour; Laboratory—6 hours. Prerequisite(s): Consent of Instructor. Senior standing; minimum GPA of 3.250. Specific research project conducted under the supervision of a faculty sponsor. Experience to include experimental design, learning new techniques, data analysis and interpretation of findings. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

**ETX 194HC—Honors Research (3)**
Discussion—1 hour; Laboratory—9 hours. Prerequisite(s): Consent of Instructor. Senior standing, minimum GPA of 3.250. Continuation of course 194HA-194HB. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

**ETX 197T—Tutoring in Environmental Toxicology (1-5)**
Variable. Prerequisite(s): Consent of Instructor. Advanced standing in Environmental Toxicology, a related major, or the equivalent experience. Teaching toxicology including conducting discussion groups for regular departmental courses under direct guidance of staff. May be repeated up to 5 unit(s). (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

**ETX 198—Directed Group Study (1-5)**
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

**ETX 199—Special Study for Advanced Undergraduates (1-5)**
Variable. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

**ETX 203—Environmental Toxicants (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): CHE 008B or CHE 128C; and Consent of Instructor. Or the equivalent of CHE 128C. Toxic chemicals: selected topics illustrating their occurrence, structure, and the reactions underlying detection, toxicity, fate, and ecological importance. Effective: 1997 Winter Quarter.

**ETX 214—Mechanisms of Toxic Action (3)**
Lecture—3 hours. Prerequisite(s): BIS 102; BIS 103; and Consent of Instructor. Chemical, biochemical, and molecular mechanisms underlying the adverse effects of toxic chemicals. Students are required to write a grant proposal and participate in a grant review panel. Effective: 1999 Spring Quarter.

**ETX 220—Analysis of Toxicants Laboratory (2)**
Laboratory—6 hours. Prerequisite(s): ETX 220 (can be concurrent); and Consent of Instructor. Laboratory techniques for microanalysis of toxicants. Separation, detection, and quantitative determination of toxicants using chemical and instrumental methods. Effective: 1997 Winter Quarter.

**ETX 221—Mechanisms of Toxic Action (3)**
Lecture—3 hours. Prerequisite(s): CHE 008B or CHE 128C; and Consent of Instructor. Or the equivalent of CHE 128C. Toxic chemicals: selected topics illustrating their occurrence, structure, and the reactions underlying detection, toxicity, fate, and ecological importance. Effective: 1997 Winter Quarter.

**ETX 222—Gas Chromatography/Mass Spectrometry of Toxic Chemicals (3)**
Discussion—1 hour; Laboratory—3 hours; Lecture—1 hour. Prerequisite(s): ETX 220; CHE 129C; and Consent of Instructor. Application of GC/MS techniques to investigate toxic chemicals. Mass spectral fragmentations and their application to the structural elucidation. Practical application of GC/MS in current research. Preference given to environmental toxicology graduate students. Effective: 1997 Winter Quarter.

**ETX 234—Current Topics in Neurotoxicology (3)**
Lecture—3 hours. Prerequisite(s): Core courses in one of the following graduate programs: Pharmacology and Toxicology, Agricultural and Environmental Chemistry, Biochemistry and Molecular Biology, Cell and Developmental Biology, Immunology, Molecular Cellular and Integrative Physiology or Neuroscience. Restricted to upper level undergraduate students must obtain permission from the course coordinator. General principles of neurotoxicology, the cell and molecular mechanisms and health impacts of specific neurotoxicants and the contribution of neurotoxic compounds to complex neurodevelopmental disorders and neurodegenerative diseases. (Same course as VMB 234 and MCP 234.) Effective: 2010 Fall Quarter.

**ETX 240—Ecotoxicology (3)**
Lecture—3 hours. Prerequisite(s): or Consent of Instructor. Elementary course in toxicology and ecology or the equivalent. Principles of toxicology as applied to chemical action on natural populations, communities, and...
ecosystems. Physical, chemical, and biological characteristics which influence ecotoxic effects, modeling, and field research. Selected case histories are analyzed and presented in class. Effective: 1997 Winter Quarter.

**ETX 250—Reproductive Toxicology (3)**
Lecture—1.5 hours; Lecture/Discussion—1.5 hours. Prerequisite(s): PTX 203 Application of toxicological principles in reproductive studies. Effects of toxicants on the male, female, and developing embryo/fetus. Critical evaluation of reproductive toxicity studies and development of mechanistic approaches to understanding how chemical exposure can adversely affect reproduction. Effective: 2000 Winter Quarter.

**ETX 260—Immunotoxicology (3)**
Lecture—3 hours. Prerequisite(s): Undergraduate or graduate introduction to immunology coursework recommended but not required; graduate standing or consent of instructor. Provides students with skills and knowledge for evaluating and applying research on the impact of environmental toxicants on immunological function in human and wildlife populations. Effective: 2005 Fall Quarter.

**ETX 270—Toxicology of Pesticides (3)**
Lecture—3 hours. Prerequisite(s): ETX 101; One course each in (a) Organic Chemistry, (b) Biochemistry, (c) Toxicology (ETX 101 or equivalent), or with consent of instructor; graduate standing. Classification and chemical properties of pesticides, their mode of action, metabolism and disposition, pesticide resistance, effects on human health and ecological health and methods of risk benefit analyses. Effective: 2007 Winter Quarter.

**ETX 278—Molecular Techniques (3)**
Lecture—3 hours. Prerequisite(s): Graduate standing or consent of instructor. Recombinant DNA technology and its applications. (Same course as FOR 278.) Effective: 2002 Spring Quarter.

**ETX 280—Forensic DNA Analysis (3)**
Lecture—3 hours. Prerequisite(s): Coursework in genetics and molecular biology. Graduate standing; consent of instructor required for all students not enrolled in the MS Forensics program. Foundation in theory and practice of forensic DNA analysis; past, present, and emerging technologies; legal and quality assurance issues. DNA extraction, DNA quantitation, multiplex amplification of STR loci, capillary electrophoresis of amplified products, and analysis of STR typing data. (Same course as FOR 280.) Effective: 2003 Spring Quarter.

**ETX 281—Principles and Practice of Forensic Serology and DNA Analysis (3)**
Discussion/Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): (FOR 278 or ETX 278) or (FOR 280 or ETX 280); Or equivalent; consent of instructor. Restricted to students enrolled in the M.S. in Forensic Science Program or by consent of Forensic Science Program Director. Comprehensive overview of forensic serology and DNA typing techniques and technologies. Strong emphasis on real-world applications, including preservation and tracking of biological evidence, detection and identification of bodily fluids, and methods to extract, quantify, and type human DNA. (Same course as FOR 281.) Effective: 2011 Spring Quarter.

**ETX 284—Non-Human Forensic DNA--Theory and Casework Application (2)**
Lecture—2 hours. Prerequisite(s): Consent of instructor required for all students not enrolled in the MS Forensics program; upper division Molecular Biology and Genetics or its equivalent. Restricted to graduate standing. Provides a comprehensive understanding of plant and animal forensic biology in terms of sample collection, preservation, analytical methods, and of the invaluable lines of inquiry these forensic evidence may permit. (Same course as FOR 284.) Effective: 2010 Fall Quarter.

**ETX 290—Seminar (1)**

**ETX 290C—Advanced Research Conference (1)**
Lecture/Discussion—1 hour. Prerequisite(s): Consent of Instructor. Presentation and critical discussion of advanced research methods and interpretation of research results. Designed primarily for graduate students. (S/U grading only.) Effective: 1997 Winter Quarter.

**ETX 297T—Tutoring in Environmental Toxicology (1-5)**
Variable. Prerequisite(s): Consent of Instructor. Graduate standing in Environmental Toxicology, a related major, or the equivalent experience. Teaching toxicology including conducting discussion groups for regular departmental courses under direct guidance of staff. May be repeated up to 5 unit(s). (S/U grading only.) Effective: 1997 Winter Quarter.

**ETX 298—Group Study (1-5)**
Variable. Prerequisite(s): Consent of Instructor. Effective: 1997 Winter Quarter.
ETX 299—Research (1-12)
Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

ETX 396—Teaching Assistant Training Practicum (1-4)
Variable. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

Epidemiology (Graduate Group)

Epidemiology (Graduate Group) | EPI Information
Lorena Garcia, M.P.H., Dr.P.H. Chairperson of the Group

Group Office. 1022 SVM Administrative Building; 530-752-2657; Fax 530-754-0225; http://www.epi.ucdavis.edu

Epidemiology (Graduate Group) | EPI M.S.
Lorena Garcia, M.P.H., Dr.P.H. Chairperson of the Group

Group Office. 1022 SVM Administrative Building; 530-752-2657; Fax 530-754-0225; http://www.epi.ucdavis.edu

Graduate Study. The Graduate Group in Epidemiology offers programs of study and research leading to the M.S. and Ph.D. degrees. Areas of emphasis include environmental/occupational epidemiology; infectious disease epidemiology; zoonotic and vector-borne diseases; epidemiologic methods and biostatistics; health services and health economics; nutritional epidemiology; reproductive, perinatal, developmental and pediatric epidemiology; wildlife epidemiology; and social and behavioral epidemiology. For detailed information regarding the program, address the chairperson of the group or see the website.

Graduate Advisors. Christopher Barker, (Population Health & Reproduction) Diana Cassady (Department of Public Health Sciences), Janet Foley (Medicine and Epidemiology), Lihong Qi (Public Health Sciences)

Required Courses for the Program

Epidemiology (Graduate Group) | EPI Ph.D.

Lorena Garcia, M.P.H., Dr.P.H. Chairperson of the Group

Group Office. 1022 SVM Administrative Building; 530-752-2657; Fax 530-754-0225; http://www.epi.ucdavis.edu

Graduate Study. The Graduate Group in Epidemiology offers programs of study and research leading to the M.S. and Ph.D. degrees. Areas of emphasis include environmental/occupational epidemiology; infectious disease epidemiology; zoonotic and vector-borne diseases; epidemiologic methods and biostatistics; health services and health economics; nutritional epidemiology; reproductive, perinatal, developmental and pediatric epidemiology; wildlife epidemiology; and social and behavioral epidemiology. For detailed information regarding the program, address the chairperson of the group or see the website.

Graduate Advisors. Christopher Barker, (Population Health & Reproduction) Diana Cassady (Department of Public Health Sciences), Janet Foley (Medicine and Epidemiology), Lihong Qi (Public Health Sciences)

Required Courses for the Program  
Units: 58.5-65.5

Prerequisite Courses
Prerequisites may be taken concurrently with required courses below.

Epidemiology (Graduate Group) | EPI Courses

880
Courses in EPI:

EPI 202—Quantitative Epidemiology I: Probability (5)
Laboratory—2 hours; Lecture—4 hours. Prerequisite(s): ((MAT 016A, MAT 016B) or (MAT 017A, MAT 017B) or (MAT 021A, MAT 021B)); STA 102; STA 108; or Population Health and Reproduction 402 and 403 or equivalent of any listed course; concurrent or previous enrollment in a basic epidemiology course (e.g., course 205). Foundations in probability for epidemiologists. Emphasis on properties of and relationships between distributions and application of probability concepts to epidemiology. Includes a mathematical skills laboratory to assist in solution of epidemiologic problems. Effective: 2013 Fall Quarter.

EPI 203—Quantitative Epidemiology II: Statistical Inference (4)
Discussion/Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): (EPI 202 or STA 130A or STA 131A or STA 133); EPI 205; A basic course in Epidemiology (EPI 205 or equivalent). Provides the mathematical statistics foundation for statistical models, methods, and data analysis. Effective: 2014 Winter Quarter.

EPI 204—Quantitative Epidemiology III: Statistical Models (4)
Discussion/Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): (EPI 203 or STA 130B or STA 131B or STA 133); EPI 205; STA 108 recommended; a basic course in Epidemiology (EPI 205 or equivalent); consent of instructor. Introduces statistical models, methods, and data analysis in the areas of generalized linear model and survival analysis methodology. Effective: 2014 Spring Quarter.

EPI 204A—Foundation of Statistical Models, Methods, and Data Analysis for Scientists (4)
Discussion/Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): STA 130A or STA 131A or STA 133; EPI 228 recommended. Provides the mathematical statistics foundation for statistical models, methods, and data analysis. Effective: 2006 Winter Quarter.

EPI 204B—Statistical Models, Methods, and Data Analysis for Scientists (4)
Discussion/Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): EPI 204A; STA 108 recommended. Introduces statistical models, methods, and data analysis in the areas of generalized linear, survival, and correlated data methodology. Effective: 2006 Winter Quarter.

EPI 205—Principles of Epidemiology (4)
Lecture—4 hours. Prerequisite(s): MPM 202; or Consent of Instructor. An introductory statistics course. Basic epidemiologic concepts and approaches to epidemiologic research, with examples from veterinary and human medicine, including outbreak investigation, infectious disease epidemiology, properties of tests, and an introduction to epidemiologic study design and surveillance. (Same course as MPM 205.) Effective: 2017 Winter Quarter.

EPI 205B—Integration of Epidemiologic Concepts (2)
Discussion—2 hours. In-depth analysis and integration of basic epidemiologic concepts and approaches to epidemiologic research presented in Preventive Veterinary Medicine 405/course 205A, with more mathematical and theoretical basis and examples from veterinary and human medicine, including outbreak investigation, infectious disease epidemiology, properties of diagnostic tests, study design, and surveillance. Effective: 1999 Fall Quarter.

EPI 206—Epidemiologic Study Design (4)
Discussion—9 hours; Laboratory—2 hours; Lecture—30 hours. Prerequisite(s): EPI 205; or Consent of Instructor. Builds on concepts presented in course 205. Concepts of epidemiologic study design—clinical trials, observational cohort studies, case control studies—introduced in course 205A are covered in more depth, using a problem-based format. Discussion of published epidemiologic studies. (Same course as MPM 206.) Effective: 2014 Spring Quarter.

EPI 207—Advanced Epidemiologic Methodology (4)
Lecture/Discussion—4 hours. Prerequisite(s): EPI 206 In-depth integration of advanced epidemiological concepts. Theory, methods, and applications for observational studies including random and systematic error, confounding, counterfactuals, causal inference, effect modification, internal and external validity, estimability, and interpretation of effect measures, and advanced study designs. (Same course as SPH 207) Effective: 2016 Winter Quarter.

EPI 208—Analysis and Interpretation of Epidemiologic Data (3)
Laboratory—21 hours; Lecture—16 hours; Project (Term Project). Prerequisite(s): EPI 204 (can be concurrent); EPI 207; (STA 144 or PHR 202); And entry level skill in standard statistical software (eg. SPSS, BMDP, SAS, Stata, MinTab, S-Plus). Application of theory and concepts of statistics and epidemiology to analysis and interpretation of data typically found in veterinary and human epidemiologic research. Effective: 2001 Spring Quarter.
EPI 209—History of Epidemiology in Public Health (2)
Discussion—1.5 hours; Lecture—0.5 hours. Introduction to the history of epidemiology in solving major public health problems. Original historical articles will be read/discussed. Topics may include: infectious disease, accidents/adverse events, nutritional deficiencies, community vaccination trials, occupational exposures, cancer, birth defects, cardiovascular disease, and smoking. (Same course as SPH 209.) Effective: 2014 Fall Quarter.

EPI 220—Problems in Epidemiologic Study Design (4)
Lecture—3 hours; Term Paper. Prerequisite(s): MPM 405; STA 102; STA 106; or the equivalent; MPM 406 or the equivalent; PHR 207 required concurrently. Design and development of research protocols and funding applications for peer review. Application of research methods data collection and management and statistical analysis in research proposals. Methods of evaluating research proposals, mechanisms of funding, specifying human subjects considerations. Effective: 1997 Winter Quarter.

EPI 222—Epidemiological Modeling (3)
Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): MPM 405 Techniques of model building and simulation of infectious diseases will be explored. Epidemiologic modeling philosophy, construction and validation will be emphasized. Effective: 1997 Winter Quarter.

EPI 223—Spatial Epidemiology (3)
Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): EPI 205A or MPM 205 Geographic Information Systems (GIS) and spatial statistics. Students are expected to complete a term project based on their graduate research. Effective: 1997 Winter Quarter.

EPI 224—Health and Ecological Risk Analysis (4)
Laboratory—4 hours; Lecture—2 hours. Methodological approach to risk analysis for human and animal-related health and ecological issues. Basic principles of risk analysis, including perception, communication, assessment and management. Emphasis on the assessment of risk. Effective: 2017 Winter Quarter.

EPI 225—Advanced Topics in Epidemiology Methods (2)
Discussion—2 hours. Prerequisite(s): EPI 205B; EPI 206; EPI 207; Or equivalents, with consent of instructor. An in-depth study of topics in epidemiology theory and methods, selected from: causal inference, confounding, study design, or other related areas, with year to year variation. Readings are assigned and students are expected to lead discussions on them. May be repeated for credit when topic differs. Effective: 2006 Winter Quarter.

EPI 226—Methods for Longitudinal and Repeated Measurement Data (3)
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): EPI 204; or Consent of Instructor. Mixed models for longitudinal data (LD)/repeated measurements; Mean and covariance models; General linear LD models; Random coefficients models; Linear mixed effects models for continuous outcome; Generalized linear mixed effects model for discrete outcome including binary, ordinal and count data. Effective: 2009 Fall Quarter.

EPI 227—Meta Analysis (4)
Lecture—3 hours; Term Paper. Prerequisite(s): A course in basic statistics or consent of instructor. Systematic review, standard and advanced statistical methods for meta-analysis and syntheses of knowledge and evidence. Quantitative analysis of published data, primarily in aggregate form. Students demonstrate skills in study design, protocol, analysis, and results reporting through presentation of drafted first author paper. Effective: 2018 Fall Quarter.

EPI 229—Geographic Information Systems for Health Professionals (4)
Laboratory—6 hours; Lecture—2 hours. Emphasis on basic geographic and data management principles. Focus on software proficiency in application to analyzing/solving health-related problems. For graduate and professional students in epidemiology, public health, preventive veterinary medicine, health informatics with interest in spatial techniques in research. Effective: 2010 Spring Quarter.

EPI 230—Introduction to Molecular Epidemiology (3)
Lecture/Discussion—3 hours. Prerequisite(s): EPI 205 Overview of the modern field of molecular epidemiology. Integrates molecular biology into traditional epidemiologic research by identifying pathways, molecules and genes that influence the risk of developing disease. Effective: 2014 Fall Quarter.

EPI 231—Infectious Disease Epidemiology (3)
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): Introductory epidemiology course (e.g., EPI 205). Infectious disease epidemiology and prevention, with emphasis on human and veterinary diseases of global health importance. Major global health epidemics and challenges of infectious diseases, by mode of transmission. Effective: 2017 Spring Quarter.

882
EPI 232—Advanced Data Analysis with SAS (3)
Lecture—3 hours. Prerequisite(s): EPI 202; EPI 203; EPI 204; or the equivalent, or Consent of Instructor. Provide an overview of common advanced statistical methods as well as a treatment of how to use SAS to implement them. Learn the ideas of reproducible research and reporting of statistical analyses. Effective: 2017 Winter Quarter.

EPI 240—Principles of Injury Epidemiology (3)
Lecture/Discussion—3 hours. Overview of the epidemiology of human injury, including general principles, surveillance methods, behavioral factors, environmental factors, treatment issues and engineering and legal interventions related to vehicular injuries, drownings, falls, fires and burns, poisonings, firearm injuries, and other intentional injuries. Effective: 1997 Winter Quarter.

EPI 242—Critical Thinking in Epidemiology (3)
Discussion—3 hours. Prerequisite(s): EPI 205 B or better; EPI 206 B or better; EPI 207 (can be concurrent) Open to Epidemiology Graduate Group students or advanced medical students only; limited to 15 students. Critical thinking in Epidemiology. Effective: 2018 Fall Quarter.

EPI 251—Environmental Epidemiology (3)
Lecture—3 hours. Prerequisite(s): MPM 405 (can be concurrent); Upper division undergraduates who have completed EST 126; or the equivalent. Examination of the human health effects and the risk of disease from community, occupational, and personal exposure to toxic substances. Effective: 1997 Winter Quarter.

EPI 252—Social Epidemiology (2)
Lecture/Discussion—2 hours. Prerequisite(s): EPI 205A; and Consent of Instructor. Social determinants of health; psychosocial and physiological pathways; health and social inequality; gender and racial/ethnic disparities in health; social support, social cohesion and health; social gradient in behavioral risk factors; social ecological approaches to health intervention; interventions addressing social determinants. (Same course as SPH 252.) Effective: 2009 Spring Quarter.

EPI 260—Epidemiology of Chronic Diseases and Aging (3)

EPI 270—Research Methods in Occupational Epidemiology (3)
Lecture/Discussion—3 hours. Prerequisite(s): (EPI 205A or MPM 205); (MPM 202 or STA 102) Methods used in epidemiologic research on occupational hazards. Topics include design and analysis of cohort and case-control studies, sample size, measuring dose, choosing a control group, validation of employment and health data, interpreting negative studies, and analysis software. Effective: 1997 Winter Quarter.

EPI 272—Cancer Epidemiology (2)
Discussion—1 hour; Recitation—1 hour. Prerequisite(s): EPI 205A; EPI 205B; EPI 206 (can be concurrent); STA 102; Must have basic understanding of epidemiologic and statistical concepts covered in the above courses. We will cover the underlying concepts essential to understanding cancer epidemiology, such as trends in incidence and survival, epidemiologic methods used to assess cancer etiology, prevention and control, and an introduction to the cancer initiation and progression multi-stage model. Effective: 2005 Winter Quarter.

EPI 277—Mathematical Models in Epidemiology (3)
Laboratory—2 hours; Lecture/Discussion—2 hours. Prerequisite(s): MPM 403; MPM 405; and Consent of Instructor. Although not required, students encouraged to refresh their knowledge of high school calculus and differential equations. Class size limited to 30 students. Theory of epidemics and mathematical modeling concepts for infectious diseases to include discrete and continuous time models, their use to explore disease dynamics and investigate prevention and control strategies for human and veterinary infectious diseases. (Same course as PHR 277.) Effective: 2013 Fall Quarter.

EPI 280—Introduction to SAS Programming (3)
Discussion/Laboratory—1 hour; Lecture—2 hours. Prerequisite(s): Introductory statistics course (e.g., MPM 402, STA 102). Introduction to SAS, an integrated software system for data retrieval and management, data manipulation and programming. (Same course as SPH 280.) Effective: 2016 Fall Quarter.

EPI 290—Seminars in Epidemiology (0.5)
Seminar—0.5 hours. Faculty and students will present and lead discussion of ongoing or published epidemiologic research. (S/U grading only.) Effective: 2015 Winter Quarter.
EPI 291—Seminars in Human Health Services Research and Clinical Epidemiology (1)
Seminar—1 hour. Critical review, evaluation, and discussion of research in health services and clinical epidemiology. Presentation of statistical, epidemiologic, and econometric methods. Students present their own research and critique the work of others. May be repeated for credit. May be repeated for credit. (Same course as GMD 291.) (S/U grading only.) Effective: 1998 Fall Quarter.

EPI 298—Group Study (1-5)
Seminar—1-5 hours. Group study in selected areas of epidemiology. Effective: 1997 Winter Quarter.

EPI 299—Research (1-12)
Variable. Research in selected areas of epidemiology. (S/U grading only.) Effective: 1997 Winter Quarter.

Evolution & Ecology

Department Office. 2320 Storer Hall; 530-752-1272; http://www.eve.ucdavis.edu

The Evolution, Ecology and Biodiversity Major Program

The major in Evolution, Ecology and Biodiversity offers the student a broad background in the theoretical and empirical basis of our understanding of the diversity and distribution of living organisms.

The Program. The program of study for the major begins with a core of introductory courses in mathematics, physical sciences, and biology. These are followed by survey courses in biodiversity, evolution and ecology and various more specialized courses that focus the student on particular disciplines or organisms, with an emphasis on problem-solving and critical thinking. Evolution, Ecology and Biodiversity majors may earn either a Bachelor of Science or a Bachelor of Arts degree. The requirements for the B.S. degree program include more science courses, such as biochemistry, whereas those for the A.B. degree program allow room for more electives within the humanities and social sciences. The A.B. degree is especially appropriate for those students who wish to combine arts or languages with evolution and ecology for career preparation in such areas as scientific writing, translating or illustration.

Major Advisor. Students transferring to UC Davis from another institution and majoring in Evolution, Ecology and Biodiversity must consult an advisor immediately upon matriculation so that their transfer credits can be applied to the major requirements. All new students in the major should contact the Biology Academic Success Center for advisor assignment. Substitutions of courses not on the above list for major requirements are arranged through the advisor.

Advising Center for the major is located at the Biology Academic Success Center (BASC); 1023 Sciences Laboratory Building; 530-752-0410; http://basc.ucdavis.edu/.

Career Alternatives. A degree in Evolution, Ecology and Biodiversity prepares the student for career opportunities in research, teaching, health professions, veterinary medicine, agriculture, environmental management, and industry. Many students gain some research experience while at UC Davis and choose to continue their training at the graduate level. This track offers careers in academics, government, environmental organizations, or business.
Teaching Credential Subject Representative. Students planning for a teaching career should consult the School of Education in regards to preparation for certification; see the Teaching Credential/M.A. Program.

Note: A maximum of four units of variable-unit courses (numbered 192, 198, 199) may be applied to upper division elective unit requirements. Courses numbered 197T are not applicable to the upper division elective unit requirement.

Total: 77-81
arts or languages with evolution and ecology for career preparation in such areas as scientific writing, translating or illustration.

**Major Advisor.** Students transferring to UC Davis from another institution and majoring in Evolution, Ecology and Biodiversity must consult an advisor immediately upon matriculation so that their transfer credits can be applied to the major requirements. All new students in the major should contact the Biology Academic Success Center for advisor assignment. Substitutions of courses not on the above list for major requirements are arranged through the advisor.

**Advising Center** for the major is located at the Biology Academic Success Center (BASC); 1023 Sciences Laboratory Building; 530-752-0410; [http://basc.ucdavis.edu/](http://basc.ucdavis.edu/).

**Career Alternatives.** A degree in Evolution, Ecology and Biodiversity prepares the student for career opportunities in research, teaching, health professions, veterinary medicine, agriculture, environmental management, and industry. Many students gain some research experience while at UC Davis and choose to continue their training at the graduate level. This track offers careers in academics, government, environmental organizations, or business.

**Teaching Credential Subject Representative.** Students planning for a teaching career should consult the School of Education in regards to preparation for certification; see the [Teaching Credential/M.A. Program](#).

The Evolution, Ecology and Biodiversity Major Program

The major in Evolution, Ecology and Biodiversity offers the student a broad background in the theoretical and empirical basis of our understanding of the diversity and distribution of living organisms.

The Program. The program of study for the major begins with a core of introductory courses in mathematics, physical sciences, and biology. These are followed by survey courses in biodiversity, evolution and ecology and various more specialized courses that focus the student on particular disciplines or organisms, with an emphasis on problem-solving and critical thinking. Evolution, Ecology and Biodiversity majors may earn either a Bachelor of Science or a Bachelor of Arts degree. The requirements for the B.S. degree program include more science courses, such as biochemistry, whereas those for the A.B. degree program allow room for more electives within the humanities and social sciences. The A.B. degree is especially appropriate for those students who wish to combine arts or languages with evolution and ecology for career preparation in such areas as scientific writing, translating or illustration.

Career Alternatives. A degree in Evolution, Ecology and Biodiversity prepares the student for career opportunities in research, teaching, health professions, veterinary medicine, agriculture, environmental management, and industry. Many students gain some research experience while at UC Davis and choose to continue their training at the graduate level. This track offers careers in academics, government, environmental organizations, or business.

Major Advisor. Students transferring to UC Davis from another institution and majoring in Evolution, Ecology and Biodiversity must consult an advisor immediately upon matriculation so that their transfer credits can be applied to the major requirements. All new students in the major should contact the Biology Academic Success Center for advisor assignment. Substitutions of courses not on the above list for major requirements are arranged through the advisor.

Advising Center for the major is located at the Biology Academic Success Center (BASC); 1023 Sciences Laboratory Building; 530-752-0410; http://basc.ucdavis.edu/.

Teaching Credential Subject Representative. Students planning for a teaching career should consult the School of Education in regards to preparation for certification; see the Teaching Credential/M.A. Program.

Laboratory or field course: At least one of the courses taken to fulfill these requirements must include a 6 hour per week laboratory or field component or two courses with a 3 hour per week laboratory or field component.

Total: 18

**Evolution & Ecology | EVE Courses**

**Courses in EVE:**

**EVE 002—Biodiversity (3)**
Lecture—2 hours; Lecture/Discussion—1 hour. Introduction to nature, scope and geographical distribution of biodiversity (the diversity of life, with emphasis on plants and animals, especially insects). Humans and biodiversity - domestication, aesthetics, ethics and valuation. Species richness and "success." Biodiversity through time: monitoring, evaluation and conservation. Biomes - global, continental and Californian. (Same course as ENT 002.) GE credit: SE, SL, WE. Effective: 2001 Fall Quarter.

**EVE 010—Evolution for Non-Biologists (3)**
Lecture—3 hours. Introduction to evolutionary biology for the general population. GE credit: QL, SE, SL. Effective: 2013 Fall Quarter.

**EVE 011—Principles of Ecology (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Elementary biology recommended. Ecological principles with emphasis on humans and their interactions with the environment; how humans affect and depend on natural ecosystems; the future of the Earth's biosphere. GE credit: OL, SE, SL, WE. Effective: 2004 Spring Quarter.
EVE 012—Life in the Sea (3)
Lecture—3 hours. Diversity of life in the sea; adaptations to physical/chemical ocean environment; marine science research methods; utilization of living marine resources by humans; factors and processes that influence diversity of sea life, including humans. GE credit: SE, SL. Effective: 2015 Spring Quarter.

EVE 013—Sex in the Natural World (3)
Lecture/Discussion—3 hours. Explores the diversity, mechanisms and evolution of sexual behaviors across the kingdoms of life. GE credit: SE, SL, VL. Effective: 2014 Fall Quarter.

EVE 016—Wild Davis: A California Naturalist Certification Course (4)
Fieldwork; Lecture—3 hours. Natural history and urban ecology of Davis. Basics of ecological observation, community science and service, and California’s unique natural communities. If fee is paid, completion of the course provides certification in the UC California Naturalist Program. GE credit: SE, SL, WE. Effective: 2019 Spring Quarter.

EVE 017—Dining with Darwin: Evolutionary Insights Into Your Diet (3)
Lecture—3 hours. Crave salty, fatty, sugary foods? Want to know why? Evolution of cravings, metabolism and dentition, and of cooking our food. Relate Paleo, South Beach, and vegan diets to ancestral and global diets and current metabolism. For majors and nonmajors. GE credit: SE, SS, WC. Effective: 2016 Fall Quarter.

EVE 020—Darwinian Medicine (3)
Lecture—3 hours. Introduction for non-biologists to the evolved traits of humans and pathogens that influence human biological variation, health, and disease. GE credit: SE, SL, WE. Effective: 2017 Fall Quarter.

EVE 092—Internship (1-12)
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Lower division standing. Work experience off and on campus in all subject areas offered in the Department of Evolution and Ecology. Internships supervised by a member of the faculty. May be repeated for credit. (P/NP grading only.) Effective: 2010 Spring Quarter.

EVE 098—Directed Group Study (1-5)
Prerequisite(s): Consent of Instructor. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 2004 Winter Quarter.

EVE 099—Special Study for Lower Division Students (1-5)
Variable. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

EVE 100—Introduction to Evolution (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (BIS 002A, BIS 002B, BIS 002C); (MAT 016A or MAT 017A or MAT 021A); (MAT 016B or MAT 017B or MAT 021B); STA 100 recommended. General survey of the origins of biological diversity and evolutionary mechanisms. GE credit: QL, SE, SL. Effective: 2018 Winter Quarter.

EVE 101—Introduction to Ecology (4)
Lecture—3 hours; Lecture/Discussion—1 hour. Prerequisite(s): (BIS 002A, BIS 002B, BIS 002C); (MAT 016A or MAT 017A or MAT 021A); (MAT 016B or MAT 017B or MAT 021B); STA 100 or the equivalent. General survey of the principles of ecology. GE credit: QL, SE, SL, VL. Effective: 2018 Winter Quarter.

EVE 101Q—Introduction to Computer Models in Ecology (1)
Auto Tutorial—1.5 hours; Extensive Problem Solving—1.5 hours. Prerequisite(s): EVE 101 (can be concurrent); EVE 101 required concurrently. Computational methods and mathematical models used to study ecological phenomena. Effective: 2006 Fall Quarter.

EVE 102—Population and Quantitative Genetics (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): BIS 101; (STA 100 or STA 102); EVE 100 Evolution as caused by random mating, genetic drift, natural selection, inbreeding, migration, and mutation in theory and actuality. The resemblance between relatives and consequences of selection for quantitative traits. Application of these ideas to topics such as the evolution of sex. GE credit: SE. Effective: 1997 Winter Quarter.

EVE 103—Phylogeny, Speciation and Macroevolution (4)
Discussion/Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): EVE 100 Statistical inference of evolutionary patterns and processes above the species level. Topics include estimation of phylogenies and divergence times, character evolution, biogeographic history, and rates and patterns of lineage diversification, with an emphasis on the origin of species. GE credit: QL, SE, SL. Effective: 2012 Winter Quarter.

EVE 104—Community Ecology (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EVE 101 or ESP 100 Population growth and density
dependence; predation; exploitative, interference and apparent competition; coexistence mechanisms; niches, spatial and temporal variation; stability, diversity, and productivity of food webs; applications to conservation and biological control. Emphasis on quantitative understanding through models, concepts, and empirical evidence. GE credit: SE, SL, VL. Effective: 1999 Spring Quarter.

**EVE 105—Phylogenetic Analysis of Vertebrate Structure (4)**
Laboratory—6 hours; Lecture—2 hours. Prerequisite(s): (BIS 001A, BIS 001B) or (BIS 002B, BIS 002C) The structure of the classes and subclasses of vertebrates is described and interpreted in terms of phylogeny. GE credit: SE. Effective: 2008 Fall Quarter.

**EVE 106—Mechanical Design in Organisms (3)**
Discussion—1 hour; Fieldwork—3 hours; Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): Upper division standing or consent of instructor; introductory animal biology (BIS 001B or BIS 002B), invertebrate zoology (EVE 112), and/or ecology (EVE 101) are recommended; residence at or near Bodega Marine Lab required. Enrollment restricted to application at http://www.bml.ucdavis.edu. Explores fundamental principles in the form and function of organisms, examining how basic properties of size, shape, structure, and habitat constrain ways in which plants and animals interact and cope with their physical surroundings. GE credit: QL, SE, VL, WE. Effective: 2008 Summer Session 1.

**EVE 107—Animal Communication (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): BIS 002B How animals use songs, dances, colors, chemicals, electricity and vibrations to communicate. Mechanisms of signal production and detection (sensory systems), theory of information transfer and signal design, and the role of natural selection in shaping communication. GE credit: QL, SE, VL. Effective: 2013 Fall Quarter.

**EVE 108—Systematics and Evolution of Angiosperms (5)**
Laboratory—6 hours; Lecture—3 hours. Prerequisite(s): (BIS 001A, BIS 001B, BIS 001C) or (BIS 002A, BIS 002B, BIS 002C) Diversity and classification of angiosperms (flowering plants) on a world scale, and current understanding of the origin of angiosperms and evolutionary relationships and trends within them based on morphological and molecular evidence. (Same course as PLB 108.) Effective: 2008 Spring Quarter.

**EVE 110—Running, Swimming and Flying (3)**
Discussion—1 hour; Fieldwork—3 hours; Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): Upper division standing or consent of instructor; introductory animal biology (BIS 001B or BIS 002B), invertebrate zoology (EVE 112), and/or ecology (EVE 101) are recommended; residence at or near Bodega Marine Lab required. Enrollment restricted to application at http://www.bml.ucdavis.edu. Examines the bases of organism movement in terrestrial, aquatic, and aerial environments, emphasizing both the unifying principles underlying locomotion, as well as a range of strategies employed across diverse groups of organisms. GE credit: QL, SE, VL, WE. Effective: 2008 Summer Session 1.

**EVE 111—Marine Environmental Issues (1)**
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Examination of critical environmental issues occurring in coastal waters including the effects of climate change, overfishing, and other human impacts. Through readings and group discussions, students will develop an integrative understanding of the oceanographic and ecological processes. May be repeated up to 2 time(s) when topics differ. (Same course as ESP 111.) GE credit: SE, SL. Effective: 2015 Summer Session 1.

**EVE 112—Biology of Invertebrates (3)**
Lecture—3 hours. Prerequisite(s): BIS 001B or (BIS 002B, BIS 002C); Courses in systematics, ecology, and evolution recommended. Limited enrollment. Survey of the invertebrate phyla, emphasizing aquatic forms, and focusing on morphology, development, natural history, ecology, and phylogenetic relationships. Effective: 2008 Fall Quarter.

**EVE 112L—Biology of Invertebrates Laboratory (2)**
Laboratory—6 hours. Prerequisite(s): (BIS 001B or (BIS 002B, BIS 002C)), EVE 112 (can be concurrent); EVE 112 required concurrently. Enrollment limited to 50 students. Field and laboratory experience with representative members of the major invertebrate phyla discussed in course 112. Emphasis on comparative morphology, natural history, ecology, and behavior of living invertebrates. Two field trips required. Effective: 2008 Fall Quarter.

**EVE 114—Experimental Invertebrate Biology (3)**
Discussion—1 hour; Fieldwork—3 hours; Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): Upper division standing or consent of instructor; introductory cell, animal and plant biology (BIS 001A and BIS 001B and BIS 001C, or BIS 002B), invertebrate zoology (EVE 112), ecology (EVE 101), and/or evolution (EVE 100) are recommended;
residence at or near Bodega Marine Lab required. Enrollment restricted to application at http://www.bml.ucdavis.edu. Biology, ecology, and evolution of local marine invertebrates with a focus on adaptations to environmental and biological factors encountered on the California coast. Hands-on field and laboratory learning with an emphasis on generating and testing hypotheses. GE credit: QL, SE, VL, WE. Effective: 2008 Summer Session 1.

EVE 115—Marine Ecology (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): EVE 101 or ESP 100 or BIS 002B; or Consent of Instructor. Processes affecting the distribution, abundance, and diversity of plant and animal life in the sea. Introduction to marine habitat diversity and human impacts on marine ecosystems. GE credit: SE, SL, VL, WE. Effective: 2008 Fall Quarter.

EVE 117—Plant Ecology (4)
Fieldwork—3 hours; Lecture—3 hours. Prerequisite(s): (BIS 001A, BIS 001B, BIS 001C) or (BIS 002A, BIS 002B, BIS 002C); PLB 111 recommended. The study of the interactions between plants, plant populations or vegetation types and their physical and biological environment. Special emphasis on California. Four full-day field trips and brief write-up of class project required. (Same course as PLB 117.) GE credit: SE. Effective: 2008 Fall Quarter.

EVE 119—Population Biology of Invasive Plants and Weeds (3)
Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): (BIS 001A, BIS 001B, BIS 001C) or (BIS 002A, BIS 002B, BIS 002C); Introductory statistics recommended. Origin and evolution of invasive plant species and weeds, reproduction and dispersal, seed ecology, modeling of population dynamics, interactions between invasive species, native species, and crops, biological control. Laboratories emphasize design of competition experiments and identification of weedy species. (Same course as PLB 119.) GE credit: SE. Effective: 2010 Spring Quarter.

EVE 120—Global Change Ecology (3)
Lecture/Discussion—3 hours. Prerequisite(s): EVE 100; EVE 101; Or equivalents. Treatment of historical evolution of the biosphere resulting from physical, chemical, and biological influences. Special focus upon changes caused by humans. Topics pertain to biodiversity, resources, conservation, and ecosystem services. Effective: 2010 Spring Quarter.

EVE 131—Human Genetic Variation and Evolution (3)
Lecture—3 hours. Prerequisite(s): BIS 001B or BIS 002B Introduction to genome-wide nucleotide sequence variation in human populations and computational methods for its analysis. Topics to include forensics, disease gene mapping, and studies of human evolutionary history. Misuses, such as eugenics, and ethical/legal issues will be discussed. Effective: 2010 Spring Quarter.

EVE 138—Ecology of Tropical Latitudes (5)
Discussion—1 hour; Extensive Writing; Lecture—3 hours. Prerequisite(s): and Consent of Instructor. One course in Biological Sciences, Entomology, Wildlife, Fish, and Conservation Biology, Geography, or tropical experience. Biological, physical, and human-related aspects of the ecology of low latitudes. Distribution, numbers, and relationships of tropical organisms. Problems of development and conservation in the context of ecological and evolutionary theory. GE credit: SE, SL, WE. Effective: 1999 Spring Quarter.

EVE 140—Paleobotany (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): (BIS 001A, BIS 001B, BIS 001C) or (BIS 002A, BIS 002B, BIS 002C) Introduction to plant fossil record, beginning with invasion of land in the Silurian, emphasizing origin and evolution of major groups and adaptations and changing composition and distribution of floras in relation to plate tectonics and climatic change. Effective: 2008 Fall Quarter.

EVE 141—Principles of Systematics (3)
Independent Study; Lecture—2 hours. Prerequisite(s): BIS 001B or BIS 001C or BIS 002B; EVE 100 recommended. Historical background, philosophical rationale, contemporary approaches, and working rules of biosystematics, including International Code of Zoological Nomenclature. GE credit: OL, QL, SE, SL, VL, WE. Effective: 2008 Fall Quarter.

EVE 147—Biogeography (4)
Lecture—3 hours; Term Paper. Prerequisite(s): BIS 002B or (BIS 001A, BIS 001B) Movements of terrestrial organisms. The role of geologic, climatic, and biologic changes in the geographic distribution of organisms. GE credit: QL, SE, SL, VL, WE. Effective: 2008 Fall Quarter.

EVE 149—Evolution of Ecological Systems (4)
Lecture—3 hours; Term Paper. Prerequisite(s): (EVE 101 or ESP 100); EVE 100; Or equivalent courses. Evolution as an

**EVE 150—Evolution of Animal Development (3)**
Lecture—3 hours. Prerequisite(s): BIS 101; EVE 100; EVE 100 (may be waived for graduate students with consent of instructor). Comparative analysis of animal development and the genetic basis of morphological diversification. GE credit: SE, WE. Effective: 2013 Winter Quarter.

**EVE 161—Microbial Phylogenomics - Genomic Perspectives on the Diversity and Diversification of Microbes (3)**
Lecture—3 hours. Prerequisite(s): BIS 002A; BIS 002B; BIS 002C; Or equivalent. Use of DNA and genomic sequencing in studies of the diversity of microorganisms. Diversity of microbes, phylogenetics, genome sequencing, comparative genomics, phylogenomics, lateral gene transfer, molecular ecology, metagenomics, and studies of the human microbiome. GE credit: SE. Effective: 2013 Spring Quarter.

**EVE 175—Computational Genetics (3)**
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): BIS 101; (STA 100 or STA 102) The use of computers to solve problems in genetics and evolution. Introduction to a general purpose computer language (Python), computational statistical methods, and applications such as QTL mapping, linkage detection, estimation of rates of evolution, and gene finding. Effective: 2004 Winter Quarter.

**EVE 180A—Experimental Ecology and Evolution in the Field (4)**
Fieldwork—3 hours; Lecture/Lab—3 hours. Prerequisite(s): EVE 100; (EVE 101 or ESP 100); ENT 105 Experimental design in field ecology. Examination of primary literature, experimental design, independent and collaborative research, analysis of data, development of original research paper based on field experiments. (Same course as ENT 180A.) GE credit: QL, SE, VL. Effective: 2019 Winter Quarter.

**EVE 180B—Experimental Ecology and Evolution in the Field (4)**
Fieldwork—3 hours; Lecture/Lab—3 hours. Prerequisite(s): EVE 180A or ENT 180A; EVE 100; (EVE 101 or ESP 100); ENT 105 Experimental design in field ecology. Examination of primary literature, experimental design, independent and collaborative research, analysis of data, development of original research paper based on field experiments. (Same course as ENT 180B.) GE credit: QL, SE, VL, WE. Effective: 2019 Spring Quarter.

**EVE 181—Ecology and Evolution of Animal-Plant Interactions (4)**
Extensive Writing/Discussion; Lecture—1.5 hours; Lecture/Discussion—1.5 hours; Term Paper. Prerequisite(s): BIS 002B; BIS 002C (can be concurrent) Animal adaptations for eating plants, pollinating flowers, dispersing seeds. Plant adaptations to herbivore defense, attraction of mutualists; role of coevolutionary arms race, mutualists and cheaters in plant/animal speciation. Exploration through lectures, original scientific literature, discussions and term paper. GE credit: OL, QL, SE, SL, WE. Effective: 2010 Fall Quarter.

**EVE 189—Introduction to Biological Research (1)**
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Upper division standing in Evolution and Ecology or related biological science. Introduction to research methods in biology. Presentation and discussion of research by faculty, graduate, and undergraduate students. May be repeated up to 6 unit(s). (P/NP grading only.) GE credit: SE. Effective: 2010 Winter Quarter.

**EVE 190—Undergraduate Seminar (2)**
Seminar—2 hours. Prerequisite(s): Upper division standing in the biological sciences or a related discipline. Student reports on current topics with emphasis on integration of concepts, synthesis, and state-of-the-art research
approaches. Reviews of literature and reports of undergraduate research may be included. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

**EVE 192—Internship (1-12)**
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Completion of 84 units. Work experience off and on campus in all subject areas offered in the Department of Evolution and Ecology. Internships supervised by a member of the faculty. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

**EVE 194HA—Research Honors (2)**
Laboratory—6 hours. Prerequisite(s): Students who have completed 135 units and qualify for the Honors Program (as defined by the current catalog). Students pursue intensive research under the guidance of a faculty advisor. Students are expected to complete the full three-quarter sequence culminating in the writing of an honors thesis. GE credit: SE, WE. Effective: 1997 Winter Quarter.

**EVE 194HB—Research Honors (2)**
Laboratory—6 hours. Prerequisite(s): Students who have completed 135 units and qualify for the Honors Program (as defined by the current catalog). Students pursue intensive research under the guidance of a faculty advisor. Students are expected to complete the full three-quarter sequence culminating in the writing of an honors thesis. GE credit: SE, WE. Effective: 1997 Winter Quarter.

**EVE 194HC—Research Honors (2)**
Laboratory—6 hours. Prerequisite(s): Students who have completed 135 units and qualify for the Honors Program (as defined by the current catalog). Students pursue intensive research under the guidance of a faculty advisor. Students are expected to complete the full three-quarter sequence culminating in the writing of an honors thesis. GE credit: SE, WE. Effective: 1997 Winter Quarter.

**EVE 197T—Tutoring in Biological Sciences 2B (1-2)**
Tutorial—3 hours. Prerequisite(s): BIS 001B B or better Assisting the instructor by tutoring students in a Biological Sciences 2B laboratory. Tutoring is voluntary and is supervised by a Laboratory Teaching Assistant and the Laboratory Coordinator. May be repeated up to 3 time(s). (P/NP grading only.) GE credit: SE. Effective: 2008 Fall Quarter.

**EVE 198—Directed Group Study (1-5)**
Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

**EVE 199—Special Study for Advanced Undergraduates (1-5)**
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

**EVE 210—Molecular Phylogenetic Analysis (3)**
Laboratory—3 hours; Lecture—2 hours. Theory and practice of inferring phylogenetic trees using molecular sequence data. Practical techniques for obtaining sequence data, advantages and disadvantages of common approaches for inferring trees, statistical methods for comparing alternative hypotheses. (Same course as NEM 210.) Effective: 2001 Spring Quarter.

**EVE 211—Applied Phylogenetics (3)**
Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): EVE 103 or EVE 210 or PBG 200C; Or equivalent, graduate standing. Applications of phylogenetic methods to fields outside of systematics. Core lectures/labs in remedial phylogenetics, phylogeography, conservation and comparative morphology. Special topics vary yearly. May be repeated up to 1 time(s). Effective: 2002 Spring Quarter.

**EVE 220—Species and Speciation (3)**
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): EVE 100 or PHI 108; Or the equivalent; HPS 130B recommended. Current status of species concepts, models of speciation, current research on speciation, and relevance of species to conservation biology. Effective: 2005 Winter Quarter.

**EVE 231—Principles of Biological Data Analysis (3)**
Laboratory—3 hours; Lecture—2 hours. Introduction to the principles of data analysis, experimental design, statistical modeling, inference, and hypothesis tests. Statistical methods of particular importance in biological applications will be emphasized. Examples will be presented from the fields of ecology and evolutionary genetics. (S/U grading only.) Effective: 2006 Winter Quarter.

**EVE 240—Paleobotany and Angiosperm Evolution (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): PLB 108 or PLB 116 or EVE 140 Critical analysis of the plant fossil record as a source of evidence on origin, evolution, and phylogeny of the angio-sperms. Cretaceous and

**EVE 290C—Research Conference (1)**
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Graduate standing. Presentation and discussion of faculty and graduate student research in biology. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

**EVE 298—Group Study (1-5)**
Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

**EVE 299—Research (1-12)**
Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

**EVE 390—Methods of Teaching (2)**
Discussion—1 hour; Lecture—1 hour. Prerequisite(s): Consent of Instructor. Graduate standing. Practical experience in the methods and problems of teaching. Includes analyses of texts and supporting material, discussion of teaching techniques and preparing and conducting of laboratory and discussion sections. May be repeated up to 8 unit(s). (S/U grading only.) Effective: 1997 Winter Quarter.

### Exercise Biology Minor; Neurobiology, Physiology, & Behavior | EXB Courses

Courses in EXB:

896
EXB 010—Exercise and Fitness: Principles and Practice (3)  
Lecture—3 hours. Human movement from physiological, psychological, sociological, and historical perspectives. Biology and psychology of exercise across the human lifespan. Not open for credit to students who have taken an upper division EXB course. GE credit: SE, SL. Effective: 2004 Winter Quarter.

EXB 010—Exercise and Fitness: Principles and Practice (3)  
Review all entries Discontinued
Lecture—3 hours. Human movement from physiological, psychological, sociological, and historical perspectives. Biology and psychology of exercise across the human lifespan. Not open for credit to students who have taken an upper division Exercise Biology course. GE credit: SE, SL. Effective: 2019 Fall Quarter.

EXB 090C—Research Conference (1)  
Discussion—1 hour. Prerequisite(s): EXB 099 (can be concurrent); Lower division standing in Exercise Biology or related biological science and consent of instructor; EXB 099 required concurrently. Research findings and methods in exercise biology. Presentation and discussion of research by faculty and students. May be repeated for credit. (P/NP grading only.) Effective: 2006 Fall Quarter.

EXB 090X—Lower Division Seminar (1-2)  
Lecture—1-2 hours. Prerequisite(s): Consent of Instructor. Lower division standing. Gives freshman or sophomore level students the opportunity to study a special topic in the general area of Exercise Biology in a small class setting. GE credit: SE. Effective: 1997 Winter Quarter.

EXB 092—Exercise Biology Internship (1-5)  
Internship—3-15 hours. Prerequisite(s): Consent of Instructor. Enrollment dependent on availability of intern positions. Work experience in the application of physical activity programs to teaching, recreational, clinical or research situations under department faculty supervision. May be repeated up to 1 time(s). No internship units will be counted towards the Exercise Biology major. (P/NP grading only.) Effective: 2003 Spring Quarter.

EXB 097T—Tutoring in Exercise Biology (1-5)  
Tutorial—3-15 hours. Prerequisite(s): Consent of Instructor. Lower division standing. Assisting the professor by tutoring students in exercise biology course-related projects. May be repeated up to 10 unit(s) including courses EXB 097TC, EXB 197T and EXB 197TC. No tutorial units will be counted towards the Exercise Biology major. (P/NP grading only.) Effective: 2004 Fall Quarter.

EXB 097TC—Tutoring Exercise Biology in the Community (1-5)  
Tutorial—3-15 hours. Prerequisite(s): Consent of instructor and chairperson. Tutoring in the community in exercise biology related projects under the guidance of the faculty. May be repeated up to 1 time(s). (P/NP grading only.) Effective: 2003 Spring Quarter.

EXB 098—Directed Group Study (1-5)  
Variable. Prerequisite(s): Consent of instructor and chairperson. (P/NP grading only.) Effective: 1997 Winter Quarter.

EXB 099—Special Study for Undergraduates (1-5)  
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

EXB 101—Exercise Physiology (4)  
Review all entries
Lecture—4 hours. Prerequisite(s): NPB 101 or NPB 110C Physiologic responses to acute exercise, and physiologic adaptations to both chronic exercise (training) and selected environmental stresses. Emphasis is placed on the muscular, metabolic, cardiovascular, respiratory and renal responses and adaptations to exercise. Only 1 unit of credit allowed to students who have completed EXS 101; only 3 units of credit allowed to students who have completed EXS 102; not open for credit to students who have completed EXS 101 and EXS 102. GE credit: SE, SL. Effective: 2018 Winter Quarter.

EXB 101—Exercise Physiology (4)  
Review all entries
Lecture—4 hours. Prerequisite(s): NPB 101 or NPB 110C; or Consent of Instructor. Physiology of Exercise; acute responses and adaptations to training. Neuromuscular function; bioenergetics; metabolic responses to acute exercise; adaptation to trainings; cardiorespiratory; and, applications to environmental physiology, and human health. GE credit: SE. Effective: 2019 Spring Quarter.

EXB 102—Introduction to Motor Learning and the Psychology of Sport and Exercise (4)  
Lecture—4 hours. Prerequisite(s): PSC 001 recommended. Theoretical and practical issues in motor learning, sport psychology, and exercise psychology are examined. Emphasis is placed on how motor skills are acquired and retained, and on the application of social psychology and human motivation studies to human performance. Only 2 units of credit allowed for students who have completed EXB 104; only 2 units of credit allowed for students who
have completed EXB 105; not open for credit to students who have completed EXS 104 and EXS 105. GE credit: SS. Effective: 2002 Winter Quarter.

**EXB 104L—Exercise Biology Laboratory (3)**
Discussion—1 hour; Laboratory—3 hours; Lecture—1 hour. Prerequisite(s): EXB 101 (can be concurrent); EXB 102 (can be concurrent); EXB 103 (can be concurrent); The last taken of the three courses may be taken concurrently. Principles and analytical procedures for assessing fundamental physiological, biomechanical, motor learning and motor control factors which underlie human movement and performance. Only 1 unit of credit allowed to students who have completed EXS 101L; only 1 unit of credit allowed to students who have completed EXS 103; not open for credit to students who have completed EXS 101L and EXS 103. (Former EXS 101L and EXS 103.). GE credit: SE, WE. Effective: 2004 Winter Quarter.

**EXB 106—Human Gross Anatomy (4)**
Lecture—4 hours. Prerequisite(s): BIS 002A; Concurrent enrollment in EXB 106L or CHA 101L strongly recommended. Upper division students only; Pass One open to upper division Exercise Biology or Anthropology majors only; Pass Two open to Seniors in any major; open enrollment at the start of the quarter for upper division students in any major. Detailed study of the gross anatomical structure of the human body, with emphasis on function and clinical relevance to students entering health care professions. (Same course as CHA 101.) GE credit: SE. Effective: 2010 Fall Quarter.

**EXB 106L—Human Gross Anatomy Laboratory (3)**
Laboratory—9 hours. Prerequisite(s): BIS 002A; EXB 106 (can be concurrent) or CHA 101 (can be concurrent); Must have completed EXB 106 or CHA 101 or required concurrently. Upper division students only; Pass One open to upper division Exercise Biology or Anthropology majors only; Pass Two open to Seniors in any major; open enrollment at the start of the quarter for upper division students in any major; mandatory attendance on first day of lab. Detailed study of prosected human cadavers in small group format with extensive hands-on experience. (Same course as CHA 101L.) GE credit: SE. Effective: 2010 Fall Quarter.

**EXB 110—Exercise Metabolism (3)**
Lecture—3 hours. Prerequisite(s): EXB 101 or NPB 101 or NPB 110C Exercise metabolism, with emphasis on skeletal muscle and cardiac muscle metabolism during activity and inactivity. Basics of bioenergetics, substrate utilization, and cell signaling; mechanisms that regulate these properties, and differences between skeletal muscle and cardiac muscle metabolism. GE credit: SE. Effective: 2018 Winter Quarter.

**EXB 111—Environmental Effects on Physical Performance (3)**
Discussion/Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): EXB 101; or Consent of Instructor. The effects of thermal, barometric and gravitational conditions on physiological function and physical performance of humans. Acute and chronic effects, emphasizing physiological adaptations and limitations, will be studied. GE credit: QL, SE. Effective: 2007 Winter Quarter.

**EXB 112—Clinical Exercise Physiology (4)**
Discussion/Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): EXB 101; or Consent of Instructor. Physical activity as a therapeutic modality in normal and diseased populations (cardiovascular, pulmonary, diabetic). Effects of exercise and inactivity in terms of normal physiology, pathophysiology, and therapeutic benefit. Exercise fitness and disease assessment methods. GE credit: SE, SL. Effective: 2009 Spring Quarter.

**EXB 115—Biomechanical Bases of Movement (3)**
Discussion—1 hour; Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): EXB 103; or Consent of Instructor. Biomechanical bases of human movement investigated; topics include musculo-skeletal mechanics, tissue mechanics, electromyography, and measurement and analysis techniques. Application made to sport, clinical, and work environments, including extensive analysis of locomotion. GE credit: QL, SE, VL, WE. Effective: 1997 Winter Quarter.

**EXB 116—Nutrition for Physically Active Persons (3)**
Lecture—3 hours. Prerequisite(s): EXB 101; NPB 101 The role of nutrition and exercise in modifying metabolism, body composition, performance and health of humans. GE credit: SE. Effective: 1997 Winter Quarter.

898
EXB 117—Exercise and Aging in Health and Disease (3) [Review all entries]
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): EXB 101 or EXB 113 (can be concurrent) Etiology of and standard therapy for various diseases associated with aging (e.g., cardiovascular, pulmonary, and renal diseases, diabetes, obesity, lipemias, etc.). Exercise will then be considered as a protective and/or therapeutic modality. GE credit: SE. Effective: 2007 Spring Quarter.

EXB 117—Exercise & Aging in Health & Disease (3) [Review all entries]
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): NPB 101 or NPB 110C; or Consent of Instructor. Etiology of and standard therapy for various diseases associated with inactivity and aging; e.g., cardiovascular, pulmonary, diabetes, obesity, lipemias, etc. Exercise will then be considered as a protective and/or therapeutic modality. GE credit: SE. Effective: 2019 Spring Quarter.

EXB 120—Sport in American Society (3)
Lecture—3 hours. Sociological approaches to the study of sport and contemporary American culture, including sport interaction with politics, economics, religion, gender, race, media and ethics. Socialization factors involving youth, scholastic, collegiate, and Olympic sport. (Same course as PHE 120.) GE credit: SS. Effective: 2009 Summer Session 1.

EXB 121—Advanced Sport Psychology (3)
Lecture—3 hours. Prerequisite(s): EXB 102; PSC 001 recommended. Advanced study and consideration of major theoretical and practical issues in sport psychology. Emphasis on practical application to sport and human performance. Effective: 2010 Winter Quarter.

EXB 122—Psychological Effects of Physical Activity (3)
Lecture—3 hours. Prerequisite(s): PSC 001 or PSC 001Y Upper division standing. Physical activity is evaluated in terms of its ability to enhance the quality of life. Topics studied include: individual factors (self concept, type A); special populations (elderly, cardiovascular); and mental health changes (depression, anxiety). Effective: 2018 Spring Quarter.

EXB 124—Physiology of Maximal Human Performance (4)
Lecture—3 hours; Practice—4 hours. Prerequisite(s): EXB 101; or Consent of Instructor. BIS 101, BIS 102, and BIS 103 recommended. Molecular mechanisms underlying adaptation to training. Learn how to exercise to maximize their own performance as well as learning how the frequency, intensity and timing of exercise and nutrition affect the molecular signals that underlie performance. GE credit: SE. Effective: 2011 Winter Quarter.

EXB 125—Neuromuscular and Behavioral Aspects of Motor Control (3)
Discussion/Laboratory—2 hours; Lecture—2 hours. Prerequisite(s): EXB 101 Factors which affect control of movement from neuropsychological, physiological, behavioral, and mechanical viewpoints. Topics include central vs. peripheral control mechanisms, open and closed loop theories, motor programming, cognitive learning strategies, and the effects of biochemical and biomechanical influences. GE credit: SE. Effective: 2010 Winter Quarter.

EXB 148—Theory and Practice of Exercise Testing (1)
Lecture/Discussion—1 hour. Prerequisite(s): EXB 112 (can be concurrent) Theory and practice of exercise testing applied to older adult populations. Physiological responses to and limitations of exercise testing. Application of exercise testing and training to healthy and diseased populations. (P/NP grading only.) GE credit: SE. Effective: 2006 Fall Quarter.

EXB 148L—Adult Fitness Testing Laboratory (1)
Laboratory—3 hours. Prerequisite(s): EXB 148 (can be concurrent); EXB 148 required concurrently. Testing symptomatic and asymptomatic older adults for functional aerobic capacity, body composition, blood lipids, pulmonary function, and cardiovascular disease risk. Counseling adults in appropriate exercise programs and lifestyle modifications. Two quarters minimum; third quarter permitted. (Former course Physical Education 148L). May be repeated up to 2 time(s). (P/NP grading only.) GE credit: QL, SE. Effective: 2006 Fall Quarter.

EXB 179—Frontiers in Exercise Biology (3)
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): EXB 101; EXB 102; EXB 103 (can be concurrent); EXB 104L recommended. Lectures by leading authorities and discussion of the latest research in newly emerging areas in exercise biology. Offered every fourth year. GE credit: SE. Effective: 2007 Spring Quarter.

EXB 189—International Perspectives in Exercise Biology (4)
Lecture—4 hours. Prerequisite(s): EXB 010; Or upper division standing in Exercise Biology; consent of instructor: students will be accepted based upon academic merit, personal experience, and academic discipline in order to provide multidisciplinary perspectives. Restricted to 22 students. Compare and contrast exercise science issues
between the US and an international location. Identify political, economic, cultural, technological and environmental issues that impact human exercise, physical activity, wellness, and sport from a global perspective. Effective: 2009 Summer Session 1.

EXB 190C—Research Conference (1)
Discussion—1 hour. Prerequisite(s): EXB 099 (can be concurrent); Upper division standing in Exercise Biology or related biological science and consent of instructor; EXB 199 required concurrently. Restricted to upper division students. Research findings and methods in exercise biology. Presentation and discussion of research by faculty and students. May be repeated for credit. (P/NP grading only.) Effective: 2006 Fall Quarter.

EXB 192—Exercise Biology Internship (1-12)
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Enrollment dependent on availability of intern positions. Work experience in the application of physical activity programs to teaching, recreational, clinical or research situations under program faculty supervision. Written report required. May be repeated up to 15 unit(s) including course 92. (P/NP grading only.) Effective: 2003 Spring Quarter.

EXB 194H—Research Honors (2)
Independent Study—6 hours. Prerequisite(s): Senior standing, minimum of 6 units of EXB 199, 3.50 GPA or greater in major courses, consent of honors thesis advisor. Completion of individual honors research project in Exercise Biology, under the guidance of an Exercise Biology faculty advisor, culminating in written honors thesis. (P/NP grading only.) GE credit: SE. Effective: 2004 Fall Quarter.

EXB 197T—Tutoring in Exercise Biology (1-5)
Tutorial—3-15 hours. Prerequisite(s): Consent of Instructor. Upper division standing. Assisting the instructor by tutoring students in exercise biology course-related projects. May be repeated up to 10 unit(s) including courses EXB 097T, EXB 097TC and EXB 197TC. No tutorial units will be counted towards the Exercise Biology major. (P/NP grading only.) Effective: 2004 Fall Quarter.

EXB 197TC—Tutoring Exercise Biology in the Community (1-5)
Tutorial—3-15 hours. Prerequisite(s): Consent of instructor and chairperson. Tutoring in the community in exercise biology related projects under the guidance of the faculty. May be repeated up to 10 unit(s) including courses 97T, 97TC and 197T. (P/NP grading only.) Effective: 2003 Spring Quarter.

EXB 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of instructor and chairperson. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

EXB 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of chairperson. (P/NP grading only.) Effective: 1997 Winter Quarter.

Exercise Biology Minor; Neurobiology, Physiology, & Behavior | NPB Courses

Courses in NPB:

NPB 010—Elementary Human Physiology (3)
Lecture—3 hours. Introduction to physiology for non-science majors. Includes basic cell physiology and survey of major organ systems and how they function in homeostasis and human health. Not open for credit to students who have completed NPB 101. GE credit: SE. Effective: 2016 Winter Quarter.

NPB 011—Exercise and Fitness: Principles and Practice (3)
Lecture—3 hours. Human movement from physiological, psychological, sociological, and historical perspectives. Biology and psychology of exercise across the human lifespan. Not open for credit to students who have taken EXB 010 or an upper division Exercise Biology or Neurology, Physiology & Behavior course. GE credit: SE, SL. Effective: 2019 Fall Quarter.

NPB 012—The Human Brain and Disease (3)
Lecture—3 hours. Normal function and diseases of the human brain and nervous system. Diseases discussed include Parkinson's, Alzheimer's, leprosy, amnesia and schizophrenia. Intended for non-science majors. Not open for credit to students who have completed NPB 100, NPB 101, NPB 112, or PSC 121. GE credit: SE, SL. Effective: 1997 Spring Quarter.

NPB 013—Extreme Animal Athletes (3)
Lecture—3 hours. Overview of biomechanics, focusing on animal locomotion. Physical principles underlying traits such as speed, maneuverability, endurance, and precision. Comparisons of animals and human athletes performing
similar feats, with animals often outperforming humans by a wide margin. Biomechanical concepts through hands-on exercises, problem sets, and readings from the scientific literature. GE credit: QL, SE, SL. Effective: 2018 Fall Quarter.

NPB 014—Illusions: Fooling the Brain (3)
Lecture—3 hours. Introduction to perceptual processing in the human nervous system; illusions. GE credit: QL, SE, SL. Effective: 2012 Winter Quarter.

NPB 015—The Biology and Physiology of Aging (4)
Discussion—1 hour; Lecture—3 hours. Broad examination of age-associated changes in body functions. Includes basic cell physiology, a survey of major organ systems and the age-induced alterations in system function. Some age-associated diseases will also be examined. Intended for non-science majors. Not open for credit to students who have completed NPB 15V. GE credit: SE. Effective: 2012 Fall Quarter.

NPB 015V—The Biology and Physiology of Aging (4)
Web Electronic Discussion—1 hour; Web Virtual Lecture—3 hours. Broad examination of the biological and physiological basis of aging in animals and plants. Concepts in demographic, evolutionary, genetic, and cell aging. Major human organ systems, age-related alterations in system function, and age-related diseases. Intended for non-science majors. Not open for credit to students who have completed NPB 15. GE credit: SE, SL. Effective: 2012 Fall Quarter.

NPB 017—The Path to Cyborgs: Introduction to Prostheses and Human Machine Interfaces (3)

NPB 018—Biological Science for Social Justice (3)
Lecture—3 hours. Broad survey of the many ways one can use the biological sciences to better the lives of others and break down barriers that have restricted social mobility. GE credit: DD, SE, SL, SS. Effective: 2018 Spring Quarter.

NPB 068—Biology of Drug Addiction and Abuse (3)
Lecture—3 hours. Broad examination of addictive substances and their use/abuse. Topics include historical perspective, physiological effects, etiology, neurobiology of addiction and the impact of drugs on contemporary society. Intended for non-science majors. Not open for credit to students having completed NPB 168. Effective: 2008 Spring Quarter.

NPB 090A—Lower Division Seminar: Issues in Body Weight Regulation (2)

NPB 090B—Human Color Perception (2)
Seminar—2 hours; Term Paper. Prerequisite(s): Lower division standing. Class size limited to 15 students with lower division standing. Neural determinants of color appearance, and why we see the world in the way we do. Discussions center around demonstrations of color phenomena and what they tell us about the human brain. Effective: 2008 Spring Quarter.

NPB 090C—Current Issues in Animal Behavior (2)
Seminar—2 hours. Prerequisite(s): Lower division standing. Limited enrollment. The mechanisms and outcomes of sexual selection (mate choice and mate competition). Theory, current models and evidence that supports or refutes the models. Effective: 2003 Winter Quarter.

NPB 090D—Lower Division Seminar: Current Issues in Reproductive Endocrinology (2)
Seminar—2 hours. Prerequisite(s): Lower division standing. The integrative roles of reproductive hormones in mammalian reproduction and health. Current theory and models regarding hormone function and use in reproductive health and contraception, and evidence that supports or refutes the models. Effective: 2002 Fall Quarter.

NPB 090E—Biology of Aging (2)
NPB 090F—Visual Impairment and Blindness: A World Wide Problem (2)
Seminar—2 hours. Prerequisite(s): Lower division standing. Examination of various abnormalities of the eye and the important geographic and cultural factors that influence the epidemiology of those abnormalities. Effective: 2007 Winter Quarter.

NPB 091C—Research Conference (1)
Discussion—1 hour. Prerequisite(s): NPB 099 (can be concurrent); and Consent of Instructor. Lower division standing in Neurobiology, Physiology and Behavior or related biological science; NPB 099 required concurrently. Restricted to lower division students. Research findings and methods in neurobiology, physiology, and/or behavior. Presentation and discussion of research by faculty and students. May be repeated for credit. (P/NP grading only.) Effective: 2003 Fall Quarter.

NPB 092—Internship (1-12)
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Lower division standing. Work experience off and on campus in all subject areas offered in the Department of Neurobiology, Physiology, and Behavior. Internships supervised by a member of the faculty. May be repeated for credit. (P/NP grading only.) Effective: 2008 Fall Quarter.

NPB 098—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Lower division standing. (P/NP grading only.) Effective: 2000 Winter Quarter.

NPB 099—Special Study for Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. Lower division standing. (P/NP grading only.) Effective: 1999 Winter Quarter.

NPB 100—Neurobiology (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): BIS 002A; PHY 009A, PHY 009B or PHY 007A, PHY 007B recommended. Brains and nervous systems, neurons and neural circuits. Coordination of movement. Development of nervous systems. Vision, hearing, and feature extraction by the central nervous system. The cell biology of learning and memory. Perception, cognition, and disorders of the brain. Not open for credit to students who have completed NPB 110B, NPB 112, NPB 160, NPB 161 or NPB 162, or NSC 221 or NSC 222. GE credit: QL, SE. Effective: 2018 Spring Quarter.

NPB 100L—Neurobiology Laboratory (3)
Extensive Writing/Discussion; Laboratory—3 hours; Lecture—1 hour. Prerequisite(s): NPB 100 (can be concurrent) or NPB 110B (can be concurrent) Experimental basis of neurobiology principles discussed in course 100. Topics include neurophysiology, sensory systems, motor systems, cellular neuroscience, cognitive neuroscience, and quantitative data analysis and modeling techniques. GE credit: SE. Effective: 2017 Winter Quarter.

NPB 100Q—Quantitative Foundations of Neurobiology (1)
Auto Tutorial—1.5 hours; Extensive Problem Solving—1.5 hours. Prerequisite(s): NPB 100 (can be concurrent) Computational methods and mathematical models used to study phenomena in neurobiology. GE credit: QL, VL. Effective: 2010 Spring Quarter.

NPB 101—Systemic Physiology (5) Review all entries
Lecture—5 hours. Prerequisite(s): BIS 001A or BIS 002A; CHE 002B; PHY 001B or PHY 007C strongly recommended. Systemic physiology with emphasis on aspects of human physiology. Functions of major organ systems, with the structure of those systems described as a basis for understanding the functions. Not open for credit to students who have completed NSC 110C. GE credit: SE. Effective: 2017 Winter Quarter.

NPB 101—Systemic Physiology (5) Review all entries
Lecture—5 hours. Prerequisite(s): BIS 002A; (CHE 002B or CHE 002BH); PHY 001B or PHY 007C strongly recommended. Systemic physiology with emphasis on aspects of human physiology. Functions of major organ systems, with the structure of those systems described as a basis for understanding the functions. Not open for credit to students who have completed NPB 110C. GE credit: SE. Effective: 2019 Winter Quarter.

NPB 101D—Systemic Physiology Discussion (1.5)
Discussion—1.5 hours. Prerequisite(s): NPB 101 (can be concurrent); Consent of Instructor. Discussion and problem solving related to fundamental principles of systemic physiology as presented in course 101. (P/NP grading only.) Effective: 2017 Spring Quarter.

NPB 101L—Systemic Physiology Laboratory (3)
Discussion—2 hours; Laboratory—3 hours; Term Paper. Prerequisite(s): NPB 101 or NPB 110C Selected experiments to illustrate functional characteristics of organ systems discussed in course 101. Effective: 2017 Winter Quarter.
NPB 102—Animal Behavior (3)
Lecture—3 hours. Prerequisite(s): (BIS 001A, BIS 001B, BIS 001C) or (BIS 002A, BIS 002B, BIS 002C) Basic principles of behavioral organization in vertebrate and invertebrate animals. Underlying physiological and ethological mechanisms. The evolution of behavior, with special emphasis on behavior under natural conditions. Not open for credit to students who have completed NPB 155. (Former NPB 155.). GE credit: SL. Effective: 2008 Fall Quarter.

NPB 102Q—Quantitative Topics in Animal Behavior (1)
Auto Tutorial—1.5 hours; Extensive Problem Solving—1.5 hours. Prerequisite(s): MAT 016B; NPB 102 (can be concurrent) Study of the quantitative concepts and exemplar models used in animal behavior. Effective: 2009 Spring Quarter.

NPB 103—Cellular Physiology/Neurobiology (3)
Lecture—3 hours. Prerequisite(s): (BIS 103 or BIS 105); BIS 104; PHY 007C recommended. Cellular physiology with emphasis on membrane transport processes and neuronal physiology. Fundamental physical-chemical and biological mechanisms of membrane transport will be considered in relation to cytoplasmic homeostasis, communication between cells, and the cellular mechanisms of sensory and motor transduction. Not open for credit to students who have completed NPB 100B. (Former NPB 100B.). Effective: 2008 Spring Quarter.

NPB 104L—Cellular Physiology/Neurobiology Laboratory (4)
Discussion—1 hour; Laboratory—3 hours; Lecture—1 hour; Term Paper/Discussion. Prerequisite(s): NPB 101L; (BIS 103 or BIS 105) Experiments in the physical and chemical processes of cells and tissues. Effective: 2018 Winter Quarter.

NPB 105—Introduction to Computer Models (4)
Lecture—3 hours; Lecture/Lab—1 hour. Prerequisite(s): CHE 002C; PHY 007C; (NPB 100 or NPB 101); MAT 016C; Or the equivalent to MAT 016C. Introduction to the ideas, mathematical techniques and computer tools required for developing models of cellular processes in physiology and neurobiology. Applications include membrane transport, ionic channels, action potentials, Ca2+ oscillations, respiration, and muscle contraction. Effective: 1997 Winter Quarter.

NPB 106—Experiments in Neurobiology, Physiology, and Behavior: Design and Execution (3)
Discussion—0.5 hours; Laboratory—7.5 hours. Prerequisite(s): (NPB 110A or NPB 100 or NPB 101 or NPB 102); NPB 199; and Consent of Instructor. Design and execution of experiments in neurobiology, physiology, and/or behavior. Students choose and design a project in consultation with the sponsoring faculty member. May be repeated once for credit to complete the project, with consent of instructor. May be repeated up to 1 time(s). (P/NP grading only.) GE credit: OL, QL, VL, WE. Effective: 2018 Winter Quarter.

NPB 107—Cell Signaling in Health and Disease (3)
Lecture—3 hours. Prerequisite(s): BIS 102 or BIS 105 Basics of cell signaling pathways, their disruption in disease, and their current utility and future potential as therapeutic targets. Focus is on signaling pathways specific to nervous, endocrine and immune systems, and those fundamental to all cells. GE credit: SL. Effective: 2009 Winter Quarter.

NPB 108Y—Animal Behavior Laboratory (3)
Lecture—3 hours; Web Electronic Discussion—12 hours. Hybrid course, consisting of limited in-person lectures and the rest laboratory exercises. The laboratory exercises will be online, and will require students to view and score videos of animal behavior in order to test behavioral hypotheses. Effective: 2016 Summer Session 2.

NPB 109—Kinesiology—Analysis and Control of Human Movement (4)
Lecture—4 hours. Prerequisite(s): PHY 007A; PHY 007B; NPB 101 or NPB 110C recommended; CHA 101 and CHA 101L (same as EXB 106 and EXB 106L) or equivalent recommended. Functional anatomy, motor control, and biomechanics of human movement understood in the context of body structures, basic principles of physics, and functional characteristics of muscle. GE credit: SE. Effective: 2018 Spring Quarter.

NPB 110A—Foundations 1: From Molecules to Individuals (5)
Discussion—1 hour; Lecture—4 hours. Prerequisite(s): (BIS 002A, BIS 002B); (CHE 002B or CHE 003A); PHY 007A and PHY 007B recommended; BIS 002C recommended. Pass One restricted to majors in Neurobiology, Physiology and Behavior. Major concepts in cell biology with special emphasis on connections between cell biology and behavior. Includes: cellular metabolism, cellular sensing and signaling, membrane structure-function, molecular switches, electrical and chemical signaling, endocrine signaling, cell cycle and differentiation, cytoskeleton, and integrative examples. Credit limited to 3 units for students who have taken BIS 104. GE credit: SE. Effective: 2018 Winter Quarter.
NPB 110B—Foundations 2: Neurobiology (5)
Discussion—1 hour; Lecture—4 hours. Prerequisite(s): NPB 110A C- or better; PHY 007A and PHY 007B recommended. Open to declared NPB majors only. Core concepts of neurobiology including single-neuron biophysics, synapses and transmitters, neuronal development, motor systems, central pattern generation, neuronal circuits, intracellular signal transduction, sensory processing, multisensory integration, autonomic nervous system, neuromodulation, learning and memory, and higher cognition and disease. Credit limited to 2 units for students who have taken NPB 100. GE credit: SE. Effective: 2017 Winter Quarter.

NPB 110C—Foundations 3: Physiology (5) Review all entries
Discussion—1 hour; Lecture—4 hours. Prerequisite(s): NPB 110A C- or better; PHY 007A; PHY 007B and PHY 007C recommended. Open to declared NPB majors only. Focuses on the structure, function, and interactions of animal organ systems in homeostasis and reproduction, and the response to perturbations of homeostasis; neural and endocrine signaling; skeletal muscle and movement; cardiovascular and respiratory systems; renal, digestive, immune, and reproductive physiology. Credit limited to 2 units for students who have taken NPB 101. GE credit: SE. Effective: 2018 Winter Quarter.

NPB 111L—Advanced Systemic Physiology Laboratory (4)
Discussion—2 hours; Laboratory—6 hours; Lecture—1 hour; Term Paper. Prerequisite(s): NPB 101L Selected comprehensive experiments in the autonomic nervous system and the cardiovascular, respiratory, and neuromuscular systems. Emphasis on conceptual and methodological approaches in demonstrating the physiology of organ systems. Effective: 2018 Winter Quarter.

NPB 113—Cardiovascular, Respiratory, and Renal Physiology (4)
Lecture—4 hours. Prerequisite(s): (NPB 110C or NPB 101); CHE 008B, PHY 007B and PHY 007C recommended. An intense and advanced presentation of concepts in cardiovascular, respiratory, and renal physiology including discussion of acid-base balance. Effective: 2018 Winter Quarter.

NPB 114—Gastrointestinal Physiology (3)
Lecture—3 hours. Prerequisite(s): (NPB 110C or NPB 101); BIS 105 or BIS 103 recommended, BIS 105 preferred. Gastrointestinal anatomy and physiology. Digestion, secretion, absorption, motility, comparative physiology and pathology. Strong emphasis on neural and hormonal regulation and on cellular mechanisms of secretion and absorption. Effective: 2018 Winter Quarter.

NPB 116—Stress Physiology in Health and Disease (3)
Lecture—3 hours. Prerequisite(s): BIS 002A C- or better; or Consent of Instructor. Adaptive and maladaptive physiological responses to acute and chronic stress in mammals, with emphasis on humans. Role of endocrine and autonomic nervous system in stress response. Prenatal and postnatal effects of stress on cognitive and affective development. Wellness interventions. Effective: 2018 Winter Quarter.

NPB 117—Avian Physiology (3)
Lecture—3 hours. Prerequisite(s): (BIS 002A, BIS 002B); CHE 002B; NPB 101 or NPB 110C strongly recommended. Physiology of the various systems of birds with emphasis on digestion, respiration, excretion, and endocrine systems. Effective: 2018 Spring Quarter.

NPB 121—Physiology of Reproduction (4)
Lecture/Discussion—4 hours. Prerequisite(s): NPB 101 or NPB 110C or ANS 100 Physiological mechanisms related to reproduction, breeding efficiency and fertility, with special reference to domestic animals. GE credit: QL, SL. Effective: 2018 Spring Quarter.

NPB 121L—Physiology of Reproduction Laboratory (1)
Laboratory—3 hours. Prerequisite(s): NPB 121 (can be concurrent) Experiments on the reproductive systems of domestic animals including male and female gametes. (P/NP grading only.) Effective: 2017 Spring Quarter.

NPB 122—Developmental Endocrinology (3)
Lecture—3 hours. Prerequisite(s): NPB 101 Restricted to upper division standing. Hormonal control of development,
maturation and senescence from the cellular to organismal level, with emphasis on the human. Prenatal and neonatal life, childhood and adolescence, adulthood and pregnancy, as well as the endocrinology of aging. Effective: 2003 Spring Quarter.

**NPB 123—Comparative Vertebrate Organology (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): (BIS 001A, BIS 001B) or (BIS 002A, BIS 002B) Functional anatomy of major organ systems in vertebrates. Each system examined from cellular to gross level in fish, birds, and mammals. Emphasis on how differentiated cell types are integrated into tissues and organs to perform diverse physiological functions. (Same course as APC 100.) Effective: 2008 Winter Quarter.

**NPB 124—Comparative Neuroanatomy (4)**
Review all entries
Laboratory—2 hours; Lecture—3 hours. Prerequisite(s): PSC 101 or NPB 100 or NPB 101 Overview of the neuroanatomy of the nervous system in a variety of mammalian and non-mammalian vertebrates. Examine changes or modifications to neural structures as a result of morphological or behavioral specializations. (Same course as Psychology 124) GE credit: SL. Effective: 1997 Fall Quarter.

**NPB 124—Comparative Neuroanatomy (3)**
Review all entries
Lecture—3 hours. Prerequisite(s): NPB 101 or NPB 100 or NPB 110B or PSC 121 Overview of the neuroanatomy in mammalian vertebrates, focusing on the cerebral cortex and experimental techniques. Examine changes or modifications to neural structures as a result of morphological or behavioral specializations. (Same course as PSC 124.) Effective: 2018 Fall Quarter.

**NPB 124L—Comparative Neuroanatomy Laboratory (2)**
Laboratory—6 hours. Prerequisite(s): NPB 124 (can be concurrent) Pass One restricted to PSC and NPB majors; must be concurrently enrolled in NPB 124. Comparative neuroanatomy laboratory illustrating modern neuroanatomical techniques in determining neural connections within the mammalian brain. Includes experiment and presentation of results. (Same course as PSC 124L.) Effective: 2018 Fall Quarter.

**NPB 126—Comparative Physiology: Sensory Systems (3)**
Lecture—3 hours. Prerequisite(s): NPB 100 or NPB 101 Basic physiological mechanisms involved in sensory systems. Comparative approach to considerations of mechanosensitive systems (audition, lateral lines, touch, echolocation, equilibrium), chemosensitive systems (olfaction, taste, pheromones), photosensitive systems (vision, infrared detection, UV detection), electoreception, and pain. Emphasis on receptors. Effective: 1997 Winter Quarter.

**NPB 128—Comparative Physiology: Endocrinology (3)**
Lecture—3 hours. Prerequisite(s): NPB 101 Comparison of physiological functions in the animal kingdom: animal hormones and their functions. Effective: 1997 Winter Quarter.

**NPB 130—Physiology of the Endocrine Glands (4)**
Lecture—4 hours. Prerequisite(s): NPB 110C or NPB 101 Advanced presentation of concepts in endocrinology with emphasis on the role of hormones in reproduction, metabolism, and disease. GE credit: VL. Effective: 2018 Winter Quarter.

**NPB 132—Nature vs. Nurture: Physiological Interactions Among Genes, Nutrients and Health (3)**
Lecture—3 hours. Prerequisite(s): BIS 001A or BIS 002A; or Consent of Instructor. Biochemical, physiological, genetic, and nutritional causes of important medical problems such as obesity, anorexia, heart disease and diabetes. One unit of credit allowed to students who have completed NPB 131. Effective: 2008 Fall Quarter.

**NPB 133—Genes and the Brain (4)**
Lecture—4 hours. Prerequisite(s): NPB 110B or NPB 100; or Consent of Instructor. BIS 101 recommended. Genetic contributions to brain evolution, development and disorders. Topics include evolution of genomic programs of neurodevelopment and the role of genetics in autism, intellectual disability, and schizophrenia. GE credit: SE. Effective: 2018 Fall Quarter.

**NPB 134—General Immunology for Physiologists (3)**
Lecture—2 hours; Lecture/Discussion—1 hour. Prerequisite(s): NPB 101 C- or better or NPB 110C C- or better; or Consent of Instructor. Immunology for undergrads interested in physiology aimed at understanding the physiological role of immune responses. Illustrated with examples of human diseases including diabetes, allergies and asthma, and emerging diseases such as Ebola and Zika. GE credit: SE. Effective: 2017 Fall Quarter.

**NPB 139—Frontiers in Physiology (3)**
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): NPB 100; NPB 101; NPB 102 (can be concurrent) Lectures by leading authorities and discussion of the latest research in newly emerging areas in physiology. Offered every fourth year. GE credit: QL, SE. Effective: 2010 Fall Quarter.
NPB 140—Principles of Environmental Physiology (3)  
Lecture—3 hours. Prerequisite(s): NPB 101; BIS 102 recommended. Physiological aspects of interactions of organisms and environmental, cellular, system, and organismal levels. Emphasis on regulatory responses/mechanisms to thermal, pressure, gravity and light environmental variables. Not open for credit to students who have completed course 148. (Former course 148.). GE credit: WE. Effective: 1997 Winter Quarter.

NPB 140—Principles of Environmental Physiology (3)  
Lecture—3 hours. Prerequisite(s): NPB 101 or NPB 110C; BIS 102 recommended. Physiological aspects of interactions of organisms and environmental, cellular, system, and organismal levels. Emphasis on regulatory responses/mechanisms to thermal, pressure, gravity and light environmental variables. Not open for credit to students who have completed NPB 148. (Former NPB 148.). GE credit: WE. Effective: 2018 Fall Quarter.

NPB 141—Physiological Adaptation of Marine Organisms (3)  

NPB 141P—Physiological Adaptation of Marine Organisms/Advanced Laboratory Topics (5)  
Discussion—1 hour; Laboratory—12 hours. Prerequisite(s): NPB 141 (can be concurrent); Residence at Bodega Marine Laboratory required; NPB 141 required concurrently. Students must submit application available at http://www.bml.ucdavis.edu. Training in scientific research from hypothesis to publication, including methods of library research. Research related to a topic covered in course 141. GE credit: VL, WE. Effective: 2006 Spring Quarter.

NPB 142—Environmental Endocrinology: Mechanisms for Life Cycles (3)  
Lecture—3 hours. Prerequisite(s): BIS 002A; BIS 002B; BIS 002C Effects of environmental factors on endocrine responses that affect vertebrate life history and fitness. Introduction to finite state machine theory and allostaticity in life histories and coping strategies. Focus on life history stages including non-breeding, hibernation, reproduction, migration and molt. GE credit: SE, WE. Effective: 2015 Winter Quarter.

NPB 150—Advanced Animal Behavior (4)  
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): NPB 102 or PSC 101; or Consent of Instructor. Advanced integrative survey of biological principles of behavioral organization, emphasizing historical roots, current research directions, conceptual issues and controversies. Laboratory exercises on the description and analysis of the behavior of captive and free-living animals. (Same course as PSC 122.) Effective: 2018 Winter Quarter.

NPB 152—Hormones and Behavior (3)  
Lecture—3 hours. Prerequisite(s): (NPB 101 or NPB 110C); (NPB 102 or PSC 101) Endocrine physiology with an emphasis on the principles of behavior. Fundamental relationships between hormones and various behaviors engaged in by the organism during its lifetime. Role of hormones in behavioral homeostasis, social behavior, reproductive behavior, parental behavior, adaptation to stress. (Same course as PSC 123.) Effective: 2018 Winter Quarter.

NPB 157—Advanced Physiology of Animal/Human Disease (3)  
Lecture—1 hour; Lecture/Discussion—2 hours. Prerequisite(s): NPB 101 B+ or better or NPB 110C B+ or better; Consent of Instructor. Limited to 35 students initially. Centers on fundamental mechanisms and pathophysiological basis for animal and human diseases. Course is case-based and uses animal and human diseases to help exemplify the physiological consequences of organ dysfunction. (Same course as HPH 157.) Effective: 2017 Spring Quarter.

NPB 159—Frontiers in Behavior (3)  
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): NPB 100; NPB 101; NPB 102 Lectures by leading authorities and discussion of the latest research in newly emerging areas in behavioral biology. Offered every fourth year. GE credit: QL, SE. Effective: 2017 Fall Quarter.

NPB 159—Frontiers in Behavior (3)  
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): (NPB 100, NPB 101, NPB 102) or (NPB 110A, NPB 110B, NPB 110C) Lectures by leading authorities and discussion of the latest research in newly emerging areas in behavioral biology. Offered every fourth year. GE credit: QL, SE. Effective: 2019 Spring Quarter.

NPB 161—Developmental Neurobiology (3)  
Lecture—3 hours. Prerequisite(s): NPB 100 or NPB 101 or NPB 110B Issues, theoretical concepts, and methodologies in developmental neurobiology. Topics include prenatal and postnatal differentiation of neurons, and plasticity in
the mature and aging brain. Integration of neurochemical, structural, physiological and behavioral perspectives. GE credit: SE. Effective: 2018 Winter Quarter.

NPB 162—Neural Mechanisms of Behavior (3)
Lecture—3 hours. Prerequisite(s): NPB 100 or NPB 101 or NPB 110B Relationship between brain and behavior. Identification and analysis of the relevant neural circuits involved. Examples of systems to be considered are birdsong, locomotion, echolocation. Effective: 2018 Winter Quarter.

NPB 163—Systems Neuroscience (4)
Lecture—3 hours; Lecture/Discussion—1 hour. Prerequisite(s): NPB 100 or NPB 110B; Or equivalent basic neuroscience training with consent of instructor. Concepts and techniques in systems neuroscience: e.g., measuring and manipulating neural activity, structure of neocortex, sensory processing, motor control, storage of information, neural codes, neural mechanisms underlying cognitive functions. GE credit: SE. Effective: 2018 Winter Quarter.

NPB 164—Mammalian Vision (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): NPB 100 or NPB 110B or PSC 101 Structure and function of the mammalian visual system, from the formation of images on the retina through visually guided behavior and perception. Emphasis on biological mechanisms underlying vision. Effective: 2017 Spring Quarter.

NPB 165—Neurobiology of Speech Perception (3)
Lecture—3 hours. Prerequisite(s): NPB 100 or NPB 101; or Consent of Instructor. Interdisciplinary approach to speech perception with emphasis on functional neuroanatomy and behavior. Topics include auditory processing in time and space, intelligibility in noisy environments, visual speech, evolution of vocal communication, models of speech perception, development, and hearing impairment. GE credit: SL. Effective: 2018 Winter Quarter.

NPB 166—Math Tools for Neuroscience (4)
Lecture—4 hours. Prerequisite(s): (NPB 100 or NPB 110B); (MAT 016A, MAT 016B, MAT 016C) or (MAT 017A, MAT 017B, MAT 017C) or (MAT 021A, MAT 021B, MAT 021C); or Consent of Instructor. Introduction to mathematics techniques used in neuroscience. Applications to neuroscience of differential equations, linear algebra, Fourier transforms, correlation and convolution, and probability theory. GE credit: QL. Effective: 2018 Winter Quarter.

NPB 167—Computational Neuroscience (5)
Lecture—4 hours; Lecture/Lab—3 hours. Prerequisite(s): (NPB 100 or NPB 110B); (MAT 016A, MAT 016B, MAT 016C) or (MAT 017A, MAT 017B, MAT 017C) or (MAT 021A, MAT 021B, MAT 021C); or Consent of Instructor. PHY 007A, PHY 007B or equivalent recommended. Mathematical models and data analysis techniques used to describe computations performed by nervous systems. Lecture topics include single neuron biophysics, neural coding, network dynamics, memory, plasticity, and learning. Lab topics include programming mathematical models and data analysis techniques in MATLAB. GE credit: QL, SE. Effective: 2018 Winter Quarter.

NPB 168—Neurobiology of Addictive Drugs (4)
Lecture/Discussion—4 hours. Prerequisite(s): NPB 100 or NPB 110B or NPB 110C or NPB 101; Or equivalents. Neurobiological basis for the effects and mechanisms of action of drugs with addictive potential, including opiates (morphine, heroin, methadone), amphetamines, cocaine, nicotine, marijuana (cannabinoids), alcohol, caffeine, and mind-altering drugs such as LSD and antidepressants. GE credit: SL, VL. Effective: 2018 Winter Quarter.

NPB 169—Frontiers in Neurobiology (3)
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): NPB 100; NPB 101; NPB 102 (can be concurrent) Lectures by leading authorities and discussion of the latest research in newly emerging areas in neurobiology. Offered every fourth year. GE credit: QL. Effective: 2010 Fall Quarter.

NPB 171—Physiology of Neuroimmune Interactions (4)
Lecture—3 hours; Lecture/Discussion—1 hour. Prerequisite(s): BIS 002A; (NPB 012 (can be concurrent) or NPB 100 (can be concurrent) or NPB 110B (can be concurrent)); or Consent of Instructor. Completion of PMI 126 or MMI 188 recommended prior to this course. Explores the complex interactions of the nervous and immune systems, and examine how the systems function together to serve homeostasis, behavior, and disease (such as Alzheimer’s, autism, and multiple sclerosis). GE credit: SL. Effective: 2017 Fall Quarter.

NPB 172—Map Formation in the Brain (3)
Lecture—3 hours. Prerequisite(s): NPB 100 C- or better or NPB 110B C- or better; or equivalent basic neuroscience training with consent of instructor. Topographic map connection is a fundamental principle for establishing neural network in the brain. This course will provide comprehensive understanding of the current concepts of map formation in various sensory and motor nervous systems. GE credit: SE. Effective: 2017 Spring Quarter.
NPB 173—Neurobiology of Brain Disorders (3)
Lecture—3 hours. Prerequisite(s): NPB 110B or NPB 100; or Consent of Instructor. Examination of brain disorders from a basic science perspective to gain insights into the mechanisms of their action. Genetic, molecular, cellular, circuit, and environmental basis of a variety of brain disorders. How insights about underlying mechanisms may lead to the development of improved therapies. Effective: 2018 Spring Quarter.

NPB 190C—Research Conference (1)
Discussion—1 hour. Prerequisite(s): NPB 199 (can be concurrent); and Consent of Instructor. Upper division standing in Neurobiology, Physiology, and Behavior or related biological science; NPB 199 required concurrently. Research findings and methods in neurobiology, physiology, and/or behavior. Presentation and discussion of research by faculty and students. May be repeated for credit. May be repeated for credit. (P/NP grading only.) Effective: 1999 Spring Quarter.

NPB 192—Internship (1-12)
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Completion of 84 units. Work experience off and on campus in all subject areas offered in neurobiology, physiology, & behavior. May be repeated for credit. (P/NP grading only.) Effective: 2008 Fall Quarter.

NPB 194HA—Neurobiology, Physiology, and Behavior—Honors (1)
Laboratory—12 hours. Prerequisite(s): Senior standing; minimum 3.500 GPA in courses counted toward major; approval by the master advisor. Honors project in Neurobiology, Physiology, and Behavior. Laboratory research on a specific question. The project is developed with the sponsoring faculty member and approved by the student's Honors Thesis Committee. Honors thesis to be submitted upon completion of the project. (P/NP grading only.) Effective: 1997 Winter Quarter.

NPB 194HB—Neurobiology, Physiology and Behavior—Honors (4)
Laboratory—12 hours. Prerequisite(s): Senior standing; minimum 3.500 GPA in courses counted toward major; approval by the master advisor. Honors project in Neurobiology, Physiology, and Behavior. Laboratory research on a specific question. The project is developed with the sponsoring faculty member and approved by the student's Honors Thesis Committee. Honors thesis to be submitted upon completion of the project. (P/NP grading only.) Effective: 2003 Spring Quarter.

NPB 194HC—Neurobiology, Physiology, and Behavior—Honors (2)
Laboratory—12 hours. Prerequisite(s): Senior standing; minimum 3.500 GPA in courses counted toward major; approval by the master advisor. Honors project in Neurobiology, Physiology, and Behavior. Laboratory research on a specific question. The project is developed with the sponsoring faculty member and approved by the student's Honors Thesis Committee. Honors thesis to be submitted upon completion of the project. (P/NP grading only.) Effective: 1997 Winter Quarter.

NPB 197T—Tutoring in Neurobiology, Physiology, and Behavior (1-5)
Discussion—2-6 hours. Prerequisite(s): Consent of Instructor. Upper division standing. Assisting the instructor by tutoring students in one of the Department's regular courses. May be repeated for credit. (P/NP grading only.) Effective: 2008 Fall Quarter.

NPB 198—Directed Group Study (1-5)
Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

NPB 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

NPB 211—Advanced Topics in Neuroimaging (3)
Laboratory—1 hour; Seminar—2 hours. Prerequisite(s): PSC 210; or Consent of Instructor. Restricted to 16 students. Critical presentation and discussion of the most influential advanced issues in neuroimaging, emphasizing fMRI design/analysis and the integration of fMRI with EEG/MEG. May be repeated for credit. Course may be repeated when topics differ. (Same course as NSC 211 and PSC 211.) (S/U grading only.) Effective: 2017 Spring Quarter.

NPB 212—Light and Fluorescence Microscopy (3)
Laboratory—1 hour; Lecture—2 hours. Prerequisite(s): Consent of Instructor. Restricted to maximum 16 students. Theory and practical application of light and fluorescence microscopy in the biological sciences. Laboratory component will focus on an optics bench, where we build simple compound and confocal microscopes on an optical rail. Effective: 2017 Spring Quarter.

NPB 217—Advanced Avian Physiology (1)
Project (Term Project)—1 hour. Prerequisite(s): NPB 117; and Consent of Instructor. Graduate standing; NPB 117
required concurrently. Study in depth of a topic in avian physiology through development of a lecture with associated instructional materials such as lesson plan, readings, presentation, and evaluation aids. Effective: 2009 Summer Session 1.

NPB 221—Cellular Neuroscience (4)
Discussion—1.5 hours; Lecture—3 hours. Advanced course on cellular and subcellular organization of the nervous system. Membrane channels, sensory transduction, synaptic transmission and cellular aspects of development and learning. Effective: 2015 Winter Quarter.

NPB 222—Systems Neuroscience (5)
Discussion—1 hour; Lecture—4 hours. Prerequisite(s): Graduate standing or consent of instructor. Integrative and information-processing aspects of nervous system organization. Topics include sensory systems, motor function, sensorimotor integration, the limbic system, and the neurobiology of learning and memory. (Same course as NSC 222.) Effective: 2002 Winter Quarter.

NPB 245—Computational Models of Cellular Signaling (3)
Lecture—3 hours. Prerequisite(s): Consent of Instructor. Computational and mathematical techniques in modeling of regulatory and signaling phenomena in neurobiology and cell physiology, focusing on linear and nonlinear ordinary differential equation models. Applications include ion channel kinetics, electrical activity, signal transduction, calcium oscillations, and simple neural circuits. Effective: 1997 Winter Quarter.

NPB 247—Topics in Functional Neurogenomics (2)
Discussion—1 hour; Lecture—1 hour. Prerequisite(s): Graduate standing or consent of instructor. The theory, methods and principles of functional neurogenomics with emphasis on the relationship to molecular mechanisms involved in development and disease of the nervous system. (Same course as NSC 247.) Effective: 2003 Spring Quarter.

NPB 261A—Topics in Vision: Eyes and Retinal Mechanisms (2)
Lecture/Discussion—2 hours. Prerequisite(s): NPB 100 or NPB 112; Or the equivalent; graduate standing. Structure and function of the visual system, with emphasis on the eye and retina, including optics, anatomy, transduction, retinal synapses, adaptation, and parallel processing. (Same course as NSC 261A and MCP 261A.) (S/U grading only.) Effective: 2004 Winter Quarter.

NPB 261B—Topics in Vision: Systems, Psychophysics, Computational Models (2)
Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. NPB 261A recommended. Functions of the central visual pathways and their underlying mechanisms. Recent research on aspects of anatomy, biochemistry, electrophysiology, psychophysics, development, and genetics of the visual system. (Same course as NSC 261B and MCP 261B.) (S/U grading only.) Effective: 2004 Winter Quarter.

NPB 261C—Topics in Vision: Clinical Vision Science (2)
Lecture/Discussion—2 hours. Prerequisite(s): NPB 261A; NPB 261B; or Consent of Instructor. Causes and mechanistic bases of major blinding diseases. Recent research on aspects of anatomy, biochemistry, electrophysiology, psychophysics, development, and genetics of the visual system related to disease. (Same course as NSC 261C and MCP 261C.) (S/U grading only.) Effective: 2005 Spring Quarter.

NPB 263—Modeling in Systems Neuroscience (4)
Lecture—3 hours; Lecture/Lab—1 hour. Prerequisite(s): Consent of Instructor. Modeling as a tool in systems neuroscience. Mathematical techniques will be introduced and used to explore advanced topics in echolocation, sound localization, electrophysiology, communications, and motor systems. Other topics include transforms, modeling assumptions, scales and linearity. Effective: 1997 Winter Quarter.

NPB 267—Computational Neuroscience (5)
Lecture—4 hours; Lecture/Lab—3 hours. Prerequisite(s): One course in general Neuroscience at the level of NPB 100 or NPB 110B; one year college-level Calculus at the level of MAT 016A, MAT 016B, MAT 016C or higher; one year Physics at the level of PHY 007A, PHY 007B, PHY 007C recommended; or Consent of Instructor. Mathematical models and data analysis techniques used to describe computations performed by nervous systems. Lecture topics include single-neuron biophysics, neural coding, network dynamics, memory, plasticity, and learning. Lab topics include programming mathematical models and data analysis techniques in MATLAB. (Same course as NSC 267.) Effective: 2018 Winter Quarter.

NPB 270—How to Write a Fundable Grant Proposal in the Biomedical Sciences (2)
Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Restricted to members of the Neuroscience and BMCDB graduate groups; graduate students in other biomedical programs may enroll with instructor permission.
Teaches the do’s and don’ts of writing grants in the biomedical sciences and the mechanisms of the review process. May be repeated for credit. (Same course as NSC 270.) Effective: 2016 Spring Quarter.

NPB 271A—Core Concepts & Methods in Learning, Memory, and Plasticity (2)
Lecture/Discussion—2 hours. Prerequisite(s): Graduate Standing or Consent of Instructor. Core concepts and methods used in studies of learning, memory and plasticity. Behavioral paradigms and measurement approaches in human and animal studies of learning and plasticity, as well as a consideration of the functional, anatomical and neuronal mechanisms underlying brain plasticity. (Same course as PSC 271A, NSC 271A.) (S/U grading only.) Effective: 2019 Fall Quarter.

NPB 271B—Core Concepts & Methods in Learning, Memory, & Plasticity (2)
Lecture/Discussion—2 hours. Prerequisite(s): NPB 271A or NSC 271A or PSC 271A Core concepts and detailed survey methods used in studies of learning, memory and plasticity, from the cellular and molecular level to the level of neural circuits. Areas of learning, memory, and plasticity research where recent progress has been made in linking across these levels of analysis. (Same course as PSC 271B, NSC 271B.) (S/U grading only.) Effective: 2020 Winter Quarter.

NPB 271C—Translational Approaches to Learning, Memory, & Plasticity Disorders (2)
Lecture/Discussion—2 hours. Prerequisite(s): NPB 271B or NSC 271B or PSC 271B Neurological disorders, the effect of these disorders on learning, memory and plasticity, approved therapeutic options and current research designed to improve understanding and treatment of these diseases: (i) the clinical presentation, diagnostic criteria, and existing therapies, (ii) mechanistic studies in humans and animal models, and (iii) molecular pathways involved in the disease and approaches for drug discovery. (Same course as PSC 271C, NSC 271C.) (S/U grading only.) Effective: 2020 Spring Quarter.

NPB 285—Literature in Visual Neuroscience (2)
Seminar—2 hours. May be repeated for credit. (Same course as NSC 285.) (S/U grading only.) Effective: 2008 Fall Quarter.

NPB 287A—Topics in Theoretical Neuroscience (2)
Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. In-depth exploration of topics in theoretical neuroscience. Topic varies each year. Fall quarter (287A): foundational material from books and review articles. Spring quarter (287B): continuation of year’s topic through readings of seminal articles from the primary literature. May be repeated for credit. (Same course as NSC 287A.) (S/U grading only.) Effective: 2017 Spring Quarter.

NPB 287B—Topics in Theoretical Neuroscience (2)
Seminar—2 hours. Prerequisite(s): Consent of Instructor. In-depth exploration of topics in theoretical neuroscience. Topic varies each year. Fall quarter (287A): foundational material from books and review articles. Spring quarter (287B): continuation of year’s topic through readings of seminal articles from the primary literature. May be repeated for credit. (Same course as NSC 287B.) (S/U grading only.) Effective: 2009 Spring Quarter.

NPB 291—Auditory Neuroscience (1)
Discussion—0.5 hours; Seminar—0.5 hours. Prerequisite(s): NPB 100 or NPB 112 or NSC 222; Or the equivalent. Exploration of various important aspects of auditory physiology, behavior and psychophysics through review of original literature. New topic each quarter. May be repeated for credit with consent of instructor. May be repeated for credit. (S/U grading only.) Effective: 1998 Spring Quarter.

Family Nurse Practitioner Program; Nursing

Family Nurse Practitioner Program; Nursing | Family Nurse Practitioner Program M.S.

Heather M. Young, Ph.D., R.N., F.A.A.N.; Associate Vice Chancellor for Nursing, UC Davis; Dean and Professor, Betty Irene Moore School of Nursing
Theresa A. Harvath, Ph.D., R.N., F.A.A.N.; Executive Associate Dean
Elizabeth Rice, Ph.D., P.M.H.N.P.-B.C., R.N.; Associate Dean for Clinical Education and Practice, Director for the Master of Science—Family Nurse Practitioner Degree Program

Betty Irene Moore Hall
2570 48th St., Sacramento, CA 95817

Faculty. http://nursing.ucdavis.edu

Mission Statement

The Betty Irene Moore School of Nursing at UC Davis cultivates academic excellence through immersive, interprofessional and interdisciplinary education and research in partnership with the communities serves. Faculty, staff and students discover and disseminate knowledge to advance health, improve quality of care and shape policy.

Nursing Science and Health-Care Leadership Graduate Degree Program

Irene Moore School of Nursing at UC Davis, the Nursing Science and Health-Care Leadership Graduate Degree Programs prepare nurse leaders, physician assistants, nurse practitioners, researchers and faculty in a unique interdisciplinary and interprofessional environment. The full-time, academic, doctoral program prepares graduates as leaders in health care, health policy and nurse faculty/researchers at the university level. The master's degree Physician Assistant Studies program prepares graduates to deliver care as physician assistants. Graduates of the professional master's degree leadership program are prepared for health-care leadership roles in a variety of organizations and as nurse faculty at the community college and prelicensure education levels. Graduates of the master's degree Nurse Practitioner Program are prepared to deliver care as nurse practitioners.

Faculty

The UC Davis Nursing Science and Health-Care Leadership Graduate Group includes a wide cross-section of academic disciplines with faculty from the Betty Irene Moore School of Nursing as well as UC Davis Health System and other UC Davis schools, colleges, and departments. Within the graduate group faculty are experts in nursing, medicine, health informatics, nutrition, biostatistics, public health and other fields.

The Master of Science—Family Nurse Practitioner Degree Program prepares graduates to deliver care as family nurse practitioners (FNP). In alignment with the school's vision to advance health, the mission of the family nurse practitioner program is to educate health care professionals to lead clinical programs in collaborative teams and to improve the availability of culturally relevant primary health care to underserved populations throughout California.

Feminist Theory & Research

Feminist Theory & Research | Feminist Theory & Research (Designated Emphasis)

Wendy Ho, Ph.D., Advisor

Program Office. 1219 Hart Hall; 530-752-6429; http://gsws.ucdavis.edu/welcome

Graduate Study. The Gender, Sexuality and Women's Studies Program at UC Davis offers a Designated Emphasis in Feminist Theory & Research. Currently graduate students in the following fourteen affiliated Ph.D. programs are eligible to participate: Anthropology, Comparative Literature, Cultural Studies, Education, English, French, German, Geography, History, Native American Studies, Performance Studies, Psychology, Sociology, Spanish, and the Study of Religion.

The Designated Emphasis in Feminist Theory and Research affords graduate students in affiliated programs the opportunity to augment their Ph.D. in a given discipline with a specialization in Feminist Theory and Research. Typically a doctoral student in good standing may seek admission to the Designated Emphasis in Feminist Theory and Research and enroll in Designated Emphasis in Feminist Theory and Research courses. Those students in affiliated Ph.D. programs who complete the requirements of the Designated Emphasis will have this noted on their transcripts and their Ph.D. diploma will note the “Special Emphasis in Feminist Theory & Research.”

Students must complete all the requirements for the Ph.D. in their home department. The requirements for the Designated Emphasis in Feminist Theory and Research are the successful completion of the two core courses, Women's Studies 200A and Women's Studies 200B, and two additional courses focusing on gender, sexuality and women's studies; one in the student's home department and one outside their home department. A member of the DE affiliated faculty must be a member of the student's qualifying examination. As with the Qualifying Exam, one member of the candidate's dissertation committee must be a member of the DE. Analysis of gender or sexuality is expected to be a central component of both the student's qualifying examination and doctoral research.

Students should consult with the Chair of the Designated Emphasis in Feminist Theory and Research before enrolling in a graduate course for which they wish to receive credit to ensure that it will count toward fulfilling the
requirements of the Designated Emphasis. If possible, please bring a copy of the syllabus or an expanded course
description to your meeting.

**Graduate Advisor.** Wendy Ho; 1219 Hart Hall; 530-752-6429; waho@ucdavis.edu.

**Fiber & Polymer Science**

**Fiber & Polymer Science | FPS Information**

(College of Agricultural and Environmental Sciences)

**Faculty.** [https://textiles.ucdavis.edu/faculty](https://textiles.ucdavis.edu/faculty)

**Fiber & Polymer Science | FPS B.S.**

(College of Agricultural and Environmental Sciences)

**Faculty.** [https://textiles.ucdavis.edu/faculty](https://textiles.ucdavis.edu/faculty)

**The Major Program**

The Fiber and Polymer Science major is concerned with the physical, chemical, and structural properties of fibers
and polymers and how these relate to fiber and polymer performance and end-use.

**The Program.** All students in this major take a common core of course work in chemistry, physics, and
mathematics, and depth subject matter in fiber and polymer science, organic and physical chemistry, and technical
writing. In the restricted electives, students select courses from areas such as computer science and mathematics,
chemistry, marketing and management, material and advanced fiber and polymer science, and textiles.

**Career Alternatives.** The major prepares the student for a career in a wide range of industries in the areas of
research and development, technical marketing and management, production, quality control, and science
teaching (on completion of an additional year in the teaching credential program). The companies employing Fiber
and Polymer Science graduates are in the fiber, polymer, industrial product, textile and/or chemical business.
Graduates are prepared to enter the graduate program in textiles or agricultural and environmental chemistry with
a specialization in fiber and polymer chemistry, fiber and materials science and polymer engineering programs at
other universities.

**Major Advisor.** Y. L. Hsieh (Textiles and Clothing)

**Advising Center** for the major is located in 1204 RMI south 530-752-3250 or 129B Everson Hall 530-754-8368.

Fiber & Polymer Science | FPS Courses

Courses in FPS:

FPS 100—Principles of Polymer Materials Science (3)
Lecture—3 hours. Prerequisite(s): CHE 002A; CHE 002B; ((CHE 008A, CHE 008B) or (ENG 045 or ENG 045Y)); Introductory physics. Basic principles of polymer science are presented including polymer structure and synthesis; polymerization mechanisms, polymer classes, properties, and reactions; polymer morphology, rheology, and characterization; polymer processing. (Same course as EMS 147.) GE credit: QL, SE. Effective: 2018 Winter Quarter.

FPS 110—Plastics in Society and the Environment (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): CHE 010; Or introductory course in physical sciences. Basic concepts and methodologies in the study of plastics. Formation, classification, structure, properties, processing, and formulation. Their application to societal needs, and their impact on society and the environment. GE credit: SE, SL, SS, WE. Effective: 1997 Winter Quarter.

FPS 150—Polymer Syntheses and Reactions (3)
Lecture—3 hours. Prerequisite(s): (CHE 128B or CHE 008B); CHE 107A Organic and physical chemistry aspects of polymer syntheses and reactions including polymerization mechanisms, kinetics and thermodynamics for major types of organic high polymers. GE credit: OL, QL, SE, SL, VL, WE. Effective: 1997 Winter Quarter.

FPS 161—Structure and Properties of Fibers (3)
Lecture—3 hours. Prerequisite(s): TXC 006; CHE 008B The structure, properties and reactions of natural- and man-made fibers; the relations between molecular structure of fibers and their physical properties; interactions of fibers and detergents. GE credit: OL, QL, SE, SL, VL, WE. Effective: 1997 Winter Quarter.

FPS 161L—Textile Chemical Analysis Laboratory (1)
Laboratory—3 hours. Prerequisite(s): FPS 161 (can be concurrent) Laboratory methods and procedures employed in qualitative and quantitative analysis of textile fibers and auxiliaries. GE credit: OL, QL, SE, SL, VL, WE. Effective: 1997 Winter Quarter.

FPS 180A—Introduction to Research in Fiber and Polymer Science (2)
Lecture/Discussion—6 hours. Prerequisite(s): Consent of Instructor. Senior standing in major related to Fiber and Polymer Science. Senior thesis on independent problems. Research begun in course 180A will be continued and completed in course 180B. GE credit: QL, SE, VL, WE. Effective: 1998 Fall Quarter.

FPS 180B—Introduction to Research in Fiber and Polymer Science (2)
Lecture/Discussion—6 hours. Prerequisite(s): Consent of Instructor. Senior standing in major related to Fiber and Polymer Science. Senior thesis on independent problems. Research begun in course 180A will be continued and completed in course 180B. GE credit: QL, SE, VL, WE. Effective: 1998 Fall Quarter.

FPS 192—Internship in Fiber and Polymer Science (1-12)
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Work experience off campus in a fiber and polymer science related area. Supervision by a member of the Textiles and Clothing faculty. (P/NP grading only.) Effective: 1998 Fall Quarter.

FPS 197T—Tutoring in Fiber and Polymer Science (1-5)
Tutorial—3-15 hours. Prerequisite(s): Consent of Instructor. Upper division fiber and polymer science related major. Tutoring of students in Fiber and Polymer Science courses. Assistance with discussion groups and laboratory sections under supervision of instructor. May be repeated for credit tutoring in another Fiber and Polymer Science course. (P/NP grading only.) Effective: 1998 Fall Quarter.

FPS 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1998 Fall Quarter.
FPS 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. Upper division standing. (P/NP grading only.) Effective: 1998 Fall Quarter.

FPS 250A—Special Topics in Polymer and Fiber Science (3)
Lecture—3 hours. Prerequisite(s): FPS 100; or Consent of Instructor. Selected topics of current interest in polymer and fiber science. Topics will vary each time the course is offered. (Same course as EMS 250A.) Effective: 1997 Winter Quarter.

FPS 250B—Special Topics in Polymer and Fiber Science (3)
Lecture—3 hours. Prerequisite(s): FPS 100; or Consent of Instructor. Selected topics of current interest in polymer and fiber science. Topics will vary each time the course is offered. (Same course as EMS 250B.) Effective: 1997 Winter Quarter.

FPS 250C—Special Topics in Polymer and Fiber Science (3) Review all entries
Lecture—3 hours. Prerequisite(s): FPS 100; or Consent of Instructor. Selected topics of current interest in polymer and fiber science. Topics will vary each time the course is offered. (Same course as EMS 250C.) Effective: 1997 Winter Quarter.

FPS 250C—Special Topics in Polymer and Fiber Science (3) Review all entries Discontinued
Lecture—3 hours. Prerequisite(s): FPS 100; or Consent of Instructor. Selected topics of current interest in polymer and fiber science. Topics will vary each time the course is offered. (Same course as EMS 250C.) Effective: 2019 Fall Quarter.

FPS 250D—Special Topics in Polymer and Fiber Science (3) Review all entries
Lecture—3 hours. Prerequisite(s): FPS 100; or Consent of Instructor. Selected topics of current interest in polymer and fiber science. Topics will vary each time the course is offered. (Same course as EMS 250D.) Effective: 1997 Winter Quarter.

FPS 250D—Special Topics in Polymer and Fiber Science (3) Review all entries Discontinued
Lecture—3 hours. Prerequisite(s): FPS 100; or Consent of Instructor. Selected topics of current interest in polymer and fiber science. Topics will vary each time the course is offered. (Same course as EMS 250D.) Effective: 2019 Fall Quarter.

FPS 250E—Special Topics in Polymer and Fiber Science (3)
Lecture—3 hours. Prerequisite(s): FPS 100; or Consent of Instructor. Selected topics of current interest in polymer and fiber science. Topics will vary each time the course is offered. (Same course as EMS 250E.) Effective: 1997 Winter Quarter.

FPS 250F—Special Topics in Polymer and Fiber Science (3) Review all entries
Lecture—3 hours. Prerequisite(s): FPS 100; or Consent of Instructor. Selected topics of current interest in polymer and fiber science. Topics will vary each time the course is offered. (Same course as EMS 250F.) Effective: 1997 Winter Quarter.

FPS 250F—Special Topics in Polymer and Fiber Science (3) Review all entries Discontinued
Lecture—3 hours. Prerequisite(s): FPS 100; or Consent of Instructor. Selected topics of current interest in polymer and fiber science. Topics will vary each time the course is offered. (Same course as EMS 250F.) Effective: 2019 Fall Quarter.

FPS 299—Research (1-12)
Independent Study—3-36 hours. (S/U grading only.) Effective: 1998 Fall Quarter.

FPS 396—Teaching Assistant Training Practicum (1-4)
Variable. Prerequisite(s): Graduate standing. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

The Film Studies Major Program

Major is closed to new students as of 2015-2016.

Interested students are encouraged to explore the Film Studies minor which is open to new and current students, and the Cinema and Digital Media major which incorporates many of the courses previously offered through Film Studies.

The Program. The interdisciplinary major in Film Studies takes one of the most influential art forms of the twentieth century and today as its object of study. The field of Film Studies addresses the history, theory, and culture of this art form and asks questions about film texts themselves: modes of production (including everything from filmmakers’ aesthetic choices to the role of the global economy); historical, national, and cultural contexts; and spectators and audiences. Questions of gender, race, sexuality, and nationality, in all of these areas, have been central to Film Studies almost since its inception and continue to shape much of the work in the field. While the program emphasizes film history, criticism, and theory, students also have opportunities to explore film/video production.

Students majoring in Film Studies take upper-division courses in film history and film theory, as well as in at least three of five general areas of study. Students also develop a thematic emphasis, in consultation with an advisor, that draws on courses from at least two different departments/programs and that allows them to pursue their particular interests within the field of Film Studies. Students have the option of completing a senior thesis (either a written paper or an original film/video) within this emphasis.

Major Advisor. Information on the current Academic Advisors can be obtained by contacting the Arts Group Advising Center at 530-752-0616 or http://arts.ucdavis.edu/arts-group-undergraduate-advising.

Career Alternatives. The A.B. degree in Film Studies prepares students for a variety of careers in media industries: for example, local and national film and television production companies, local television newsrooms, community television stations, computer graphic companies, advertising and marketing companies, public relations departments, and film distribution companies. Students wishing to pursue graduate work will be prepared to go on in film studies, as well as a variety of other fields that draw on interdisciplinary study: for example, American studies, English, literatures and languages, drama, communication, computer science, cultural studies, women and gender studies, and ethnic studies programs. Many film students also choose to go on to law school, and the analytical skills, writing abilities, and familiarity with theoretical thought developed through the film major prepare them well for the study and practice of law.

**Depth Subject Matter**

**Units: 36-40**

Choose one:
- ENL 161A Film History I: Origins to 1945 4
- ENL 161B Film History II: 1945 to present 4
- FMS 124 Topics in U.S. Film History 4

Choose one:
- ENL 162 Film Theory and Criticism 4
- FMS 127 Film Theory 4
- WMS 162 Feminist Film Theory and Criticism 4

Choose one from three of these topic areas:
- Cinematic Traditions and Movements.
- Visual and Popular Culture.
- Gender/Sexuality/Class.
- Race/Ethnicity/Class.
- Production and Performance.

A current list of approved classes is available from the Advising office and from the faculty advisor.

16-20 units in one of the two breadth areas not used to satisfy the breadth requirement, or development of a thematic area in consultation with a faculty advisor.

Qualified students who complete 20 units and have an overall GPA of 3.500 may choose the senior thesis option (194H-196H) for 8 of those 20 units.

No course may be counted for more than one requirement for the major.

**Total: 56-80**

**Film Studies**

**Units: 24**

FMS 001 Introduction to Film Studies 4

Choose no more than two from any one category:

(a) Problems and Themes in Cinema:
- ANT 136 Ethnographic Film 4
- CLA 102 Film and the Classical World 4
- DRA 115 Advanced Study of Major Film Makers 4
- ENL 160 Film as Narrative 4
- ENL 161A Film History I: Origins to 1945 4
- ENL 161B Film History II: 1945 to present 4
- ENL 162 Film Theory and Criticism 4
- FMS 124 Topics in U.S. Film History 4
- FMS 125 Topics in Film Genres 4
WMS 162 Feminist Film Theory and Criticism 4

(b) Cinema, Nation and Nationality:
GER 119 From German Fiction to German Film 4
GER 142 New German Cinema 4
FMS 176A Classic Weimar Cinema 4
FMS 176B Postwar German Cinema 4
ITA 150 Studies in Italian Cinema 4
JPN 106 Japanese Culture Through Film 4
RUS 129 Russian Film 4
SPA 148 Cinema in the Spanish-Speaking World in Translation 4

(c) Film and Social Identities:
AAS 170 African-American Film and Video 4
AAS 171 Black African and Black European Film and Video 4
FMS 120 Italian-American Cinema 4
JST 120 Cinema and the American Jewish Experience 4
WMS 160 Women, ‘Race’ and Sexuality in Postcolonial Cinema 4
WMS 164 Topics in Gender and Cinematic Representation 4

(d) Film/Video Production:
ART 117 Advanced Video and Electronic Arts 4
ART 150 Theory and Criticism of Electronic Media 4

(e) Popular and Visual Culture:
AMS 130 American Popular Culture 4
AMS 139 Feminist Cultural Studies 4
ART 150 Theory and Criticism of Electronic Media 4
CMN 140 Introduction to Mass Communication 4
POL 165 Mass Media and Politics 4
TXC 107 Social and Psychological Aspects of Clothing 4
WMS 139 Feminist Cultural Studies 4

Total: 24

Film Studies | FMS Courses

Courses in FMS:

FMS 001—Introduction to Film Studies (4)
Discussion—1 hour; Film Viewing—3 hours; Lecture—2 hours. Analysis of film form and narrative, including cinematography, editing, and sound. Issues in film studies, including authorship, stardom, race, gender, class, and cultural identity. Includes introduction to selected cinematic movements and national film traditions. Not open for credit to students who have taken HUM 010. GE credit: AH, OL, VL, WC, WE. Effective: 2012 Fall Quarter.

FMS 045—Vampires and Other Horrors in Film and Media (4)
Discussion—1 hour; Film Viewing—3 hours; Lecture—2 hours. History of representations of vampires and horror generally from the 19th through 21st centuries. Emphasis on transnational history of the horror genre; psychologies of horror effects; issues of race, gender, and class; intersections with prejudice, medicine, modernity. (Same course as GER 045.) GE credit: ACGH, AH, DD, OL, VL, WC, WE. Effective: 2012 Fall Quarter.

FMS 090X—Lower Division Seminar (4)
Seminar—4 hours. Prerequisite(s): Consent of Instructor. Lower division standing. Study of a special topic in Film Studies in a small class setting. May be repeated for credit if topics differs. (P/NP grading only.) Effective: 2012 Fall Quarter.

FMS 092—Internship (1-12) Review all entries
Internship—3-36 hours. Supervised internship off and on campus in areas of Film Studies. May be repeated for credit. (P/NP grading only.) Effective: 2012 Fall Quarter.

FMS 092—Internship (1-12) Review all entries Discontinued
Internship—3-36 hours. Supervised internship off and on campus in areas of Film Studies. May be repeated for credit. (P/NP grading only.) Effective: 2018 Fall Quarter.
FMS 098—Directed Group Study (1-5) Review all entries
Variable—3-15 hours. Directed Group Study (P/NP grading only.) Effective: 2012 Fall Quarter.

FMS 098—Directed Group Study (1-5) Review all entries Discontinued
Variable—3-15 hours. Directed Group Study (P/NP grading only.) Effective: 2018 Summer Session 1.

FMS 099—Special Study for Undergraduates (1-5) Review all entries
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. Special Study for Undergraduates (P/NP grading only.) Effective: 2012 Fall Quarter.

FMS 099—Special Study for Undergraduates (1-5) Review all entries Discontinued
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. Special Study for Undergraduates (P/NP grading only.) Effective: 2018 Summer Session 1.

FMS 120—Italian-American Cinema (4)
Film Viewing—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): FMS 001 Exploration of representations of Italian-American identity in American (U.S.) cinema. Analysis of both Hollywood and independently produced films, especially as they represent ethnicity, gender, and social class of Italian Americans. Not open for credit to students who have taken HUM 120. GE credit: ACGH, AH, DD, OL, VL, WC, WE. Effective: 2012 Fall Quarter.

FMS 121—New Italian Cinema (4)
Film Viewing—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): FMS 001; And upper-division standing, or consent of instructor. Italian cinema of the 21st century in the context of profound cultural and social changes in Italy since World War II. Productions by representative directors such as Amelio, Giordana, Moretti, Muccino are included. Knowledge of Italian not required. (Same course as ITA 121.) GE credit: AH, OL, VL, WC, WE. Effective: 2012 Fall Quarter.

FMS 121S—New Italian Cinema (4)
Film Viewing—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): FMS 001; And upper-division standing or consent of instructor. Italian cinema of the 21st century in the context of profound cultural and social changes in Italy since World War II. Productions by representative directors such as Amelio, Giordana, Moretti, Muccino are included. Knowledge of Italian not required. (Same course as ITA 121S.) GE credit: AH, OL, VL, WC, WE. Effective: 2012 Fall Quarter.

FMS 124—Topics in U.S. Film History (4)
Film Viewing—3 hours; Lecture—3 hours. Prerequisite(s): FMS 001 Study of an aspect of American film history (such as the silent era; the studio system; U.S. avant-garde cinema), including the influences of technological, economic, regulatory, cultural, and artistic forces. May be repeated up to 2 time(s) when topic differs. Not open for credit to students who have completed HUM 124, unless topic differs. GE credit: ACGH, AH, DD, OL, VL, WC, WE. Effective: 2012 Fall Quarter.

FMS 125—Topics in Film Genres (4)
Film Viewing—3 hours; Lecture—3 hours. Prerequisite(s): FMS 001 A study of one or more of the film genres (such as the documentary, the musical, film noir, screwball comedy, or the western), including genre theory and the relationship of the genre(s) to culture, history, and film industry practices. May be repeated up to 2 time(s) when topic differs. Not open for credit to students who have completed HUM 125, unless topic differs. GE credit: ACGH, AH, OL, VL, WE. Effective: 2012 Fall Quarter.

FMS 127—Film Theory (4)
Film Viewing—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): FMS 001; or Consent of Instructor. Survey of the conceptual frameworks used to study film (including semiotics, psychoanalysis, spectatorship, auteur, genre and narrative theories). Historical survey of major film theorists. GE credit: AH, OL, VL, WC, WE. Effective: 2012 Fall Quarter.

FMS 129—Russian Film (4)
Film Viewing—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): Completion of Subject A requirement. History of Russian film; film and social revolution, the cult of Stalin, dissident visions; film and the collapse of the Soviet empire; gender and the nation in Russian film. Course taught in English; films are in Russian with English subtitles. (Same course as RUS 129.) GE credit: AH, VL, WC, WE. Effective: 2012 Fall Quarter.

FMS 142—New German Cinema (4)
Extensive Writing; Lecture/Discussion—3 hours. German filmmakers of the 1960s-1980s such as Fassbinder, Herzog, Syberberg, Brückner, Schlöndorf, Kluge, Wenders. Knowledge of German is not required. May be repeated
for credit with consent of instructor. (Same course as GER 142.) GE credit: AH, OL, VL, WC, WE. Effective: 2012 Fall Quarter.

**FMS 176A—Classic Weimar Cinema (4)**
Film Viewing—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): HUM 001 German Weimar (1919-1933) cinema. Fritz Lang, F.W. Murnau, and G.W. Pabst among others. Influence on world-wide (esp. Hollywood) film genres such as film noir, horror, science fiction, and melodrama. Not open for credit to students who have taken HUM 176. (Same course as GER 176A.) GE credit: AH, OL, VL, WC, WE. Effective: 2012 Fall Quarter.

**FMS 176B—Postwar German Cinema (4)**
Film Viewing—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): FMS 001 Exploration of German cinema from 1945 to 1980, when the Nazi past was a central theme. Includes study of postwar "rubble films," escapist "homeland films," and New German Cinema of the 1970s (including films by Fassbinder, Kluge, Syberberg, and Herzog). Not open for credit to students who have taken HUM 177. GE credit: AH, OL, VL, WC, WE. Effective: 2012 Fall Quarter.

**FMS 179—Special Topics in Film Studies (4)**
Film Viewing—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): FMS 001; or Consent of Instructor. Upper division standing. Group study of a special topic in film, focusing on a national tradition, a major filmmaker, or a specific era. May be repeated up to 3 time(s). GE credit: AH, OL, VL, WE. Effective: 2012 Fall Quarter.

**FMS 190X—Upper Division Seminar (4)**
Seminar—4 hours. Prerequisite(s): Upper division standing or consent of instructor. Study of a special topic in film studies in a small class setting. May be repeated for credit if topic differs. (P/NP grading only.) Effective: 2012 Fall Quarter.

**FMS 192—Internship (1-12)**
Variable—3-36 hours. Prerequisite(s): Consent of Instructor. Supervised internship off and on campus in areas of film studies. May be repeated for credit. (P/NP grading only.) Effective: 2012 Fall Quarter.

**FMS 192—Internship (1-12) Discontinued**
Variable—3-36 hours. Prerequisite(s): Consent of Instructor. Supervised internship off and on campus in areas of film studies. May be repeated for credit. (P/NP grading only.) Effective: 2018 Fall Quarter.

**FMS 194H—Special Study for Honors Students (1-5)**
Independent Study—3-15 hours. Prerequisite(s): Consent of Instructor. Senior standing; GPA of at least 3.500. Guided research on a topic in Film Studies in preparation for the writing of an honors thesis in course 195H or the creation of an honors project in course 196H. May be repeated up to 2 time(s). (P/NP grading only.) Effective: 2012 Fall Quarter.

**FMS 195H—Honors Thesis (1-5)**
Independent Study—3-15 hours. Prerequisite(s): FMS 194H; and Consent of Instructor. GPA of at least 3.500; senior standing. Writing of an honors thesis on a topic in Film Studies under the direction of a faculty member. May be repeated up to 2 time(s). (P/NP grading only.) GE credit: AH, VL, WE. Effective: 2012 Fall Quarter.

**FMS 196H—Honors Project (1-5)**
Project (Term Project)—3-15 hours. Prerequisite(s): FMS 194H; and Consent of Instructor. Senior standing, GPA of at least 3.500. Creation of an honors film, video, or mixed-media project under the direction of a faculty member. May be repeated up to 2 time(s). (P/NP grading only.) GE credit: AH, VL, WE. Effective: 2012 Fall Quarter.

**FMS 197T—Tutoring in Film Studies (1-5)**
Tutorial—3-15 hours. Prerequisite(s): Consent of program director. Leading of small voluntary discussion groups affiliated with one of the program's regular courses. May be repeated for credit. (P/NP grading only.) Effective: 2012 Fall Quarter.

**FMS 197T—Tutoring in Film Studies (1-5) Discontinued**
Tutorial—3-15 hours. Prerequisite(s): Consent of program director. Leading of small voluntary discussion groups affiliated with one of the program's regular courses. May be repeated for credit. (P/NP grading only.) Effective: 2018 Summer Session 1.

**FMS 198—Directed Group Study (1-5) Review all entries**
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. Directed Group Study (P/NP grading only.) Effective: 2012 Fall Quarter.

922
FMS 198—Directed Group Study (1-5) Review all entries Discontinued
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. Directed Group Study (P/NP grading only.) Effective: 2018 Fall Quarter.

FMS 199—Special Study for Advanced Undergraduates (1-5) Review all entries
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. Special Study for Advanced Undergraduates (P/NP grading only.) Effective: 2012 Fall Quarter.

FMS 199—Special Study for Advanced Undergraduates (1-5) Review all entries Discontinued
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. Special Study for Advanced Undergraduates (P/NP grading only.) Effective: 2018 Fall Quarter.

FMS 396—Teaching Assistant Training Practicum (1-4) Review all entries
Variable—3-12 hours. Prerequisite(s): Consent of Instructor. Graduate standing. Teaching Assistant Training Practicum May be repeated for credit. (S/U grading only.) Effective: 2012 Fall Quarter.

FMS 396—Teaching Assistant Training Practicum (1-4) Review all entries Discontinued
Variable—3-12 hours. Prerequisite(s): Consent of Instructor. Graduate standing. Teaching Assistant Training Practicum May be repeated for credit. (S/U grading only.) Effective: 2018 Summer Session 1.

First-Year Seminar Program

First-Year Seminar Program | First-Year Seminar Program

First-Year Seminar Program | FRS Courses

Questions pertaining to the following courses should be directed to the instructor or to the First-Year Seminar Office in Undergraduate Education.

Courses in FRS:
FRS 001—First-Year Seminar (1)
Seminar—1 hour. Open only to: students who have completed fewer than 45 quarter units; transfer students in their first academic year at UC Davis. Investigation of a special topic through shared readings, discussions, written assignments, term papers, and special activities (such as fieldwork, site visits, laboratory work, etc.). Emphasis placed upon student participation in learning. Students may take more than one First-Year Seminar, but may not take more than one in any given quarter. May be repeated for credit if topics differ. Effective: 2009 Fall Quarter.

FRS 002—First-Year Seminar (2)
Seminar—2 hours. Open only to: students who have completed fewer than 45 quarter units; transfer students in their first academic year at UC Davis. Investigation of a special topic through shared readings, discussions, written assignments, term papers, and special activities (such as fieldwork, site visits, laboratory work, etc.). Emphasis placed upon student participation in learning. Students may take more than one First-Year Seminar, but may not take more than one in any given quarter. May be repeated for credit if topics differ. Effective: 2009 Fall Quarter.

FRS 003—First-Year Seminar (1)
Seminar—1 hour. Open only to: students who have completed fewer than 45 quarter units; transfer students in their first academic year at UC Davis. Investigation of a special topic through shared readings, discussions, written assignments, term papers, and special activities (such as fieldwork, site visits, laboratory work, etc.). Emphasis placed upon student participation in learning. Students may take more than one First-Year Seminar, but may not take more than one in any given quarter. May be repeated for credit if topics differ. (P/NP grading only.) Effective: 2009 Fall Quarter.

FRS 004—First-Year Seminar (2)
Seminar—2 hours. Open only to: students who have completed fewer than 45 quarter units; transfer students in their first academic year at UC Davis. Investigation of a special topic through shared readings, discussions, written assignments, term papers, and special activities (such as fieldwork, site visits, laboratory work, etc.). Emphasis placed upon student participation in learning. Students may take more than one First-Year Seminar, but may not take more than one in any given quarter. May be repeated for credit if topics differ. (P/NP grading only.) Effective: 2009 Fall Quarter.

Food Science
Preparatory Subject Matter Units: 65

Choose one:

UWP 102F Writing in the Disciplines: Food Science and Technology 4
UWP 104A Writing in the Professions: Business Writing 4
UWP 104E Writing in the Professions: Science 4

The upper-division composition exam will satisfy this requirement.

CMN 001 Introduction to Public Speaking 4
MAT 016A Short Calculus 3
MAT 016B Short Calculus 3
MAT 016C Short Calculus 3
BIS 002A Introduction to Biology: Essentials of Life on Earth 5

Brewing Science Option

The Brewing Science option prepares Food Science students for careers in production or quality assurance within the brewing industry or other food fermentation industries. The option also prepares students for graduate study in food science or related programs, and exposes the students to diverse disciplines, including chemistry, biochemistry, microbiology, and processing.

Specific course requirements:

- FST 102A Malting and Brewing Science 4
- FST 102B Practical Malting and Brewing 4
- FST 123 Introduction to Enzymology 3

Selected additional courses:

- FST 003 Introduction to Brewing and Beer 3
- FST 109 Principles of Quality Assurance in Food Processing 3
- FST 159 New Food Product Ideas 3
- FST 160 Food Product Development 4

Total: 133

Food Science | FST Courses

Courses in FST:

**FST 001—Principles of Food Science (3)**
Discussion—1 hour; Lecture—2 hours. Not open for credit to students who have completed any Food Science and Technology course except course 10. Food science fundamentals. Fresh and processed food technologies; world food problems; food composition; food microbiological and toxicological safety; food laws; evaluation of acceptability and nutritional value. GE credit: SE, VL. Effective: 2001 Winter Quarter.

**FST 003—Introduction to Brewing and Beer (3)**
Lecture—3 hours. Basic description of brewing and associated processes, from raw materials to final product; history of brewing and brewing science; types of beer worldwide; world beer markets; basics of beer quality, including wholesomeness; role of scientist in brewing. Not open for credit to students who have taken FST 003V. GE credit: SE, SL. Effective: 2017 Fall Quarter.

**FST 003V—Introduction to Brewing and Beer (3)**
Project (Term Project); Web Electronic Discussion—1.5 hours; Web Virtual Lecture—1 hour. Basic description of brewing and associated processes, from raw materials to final product; history of brewing and brewing science; types of beer worldwide; world beer markets; basics of beer quality, including wholesomeness; role of scientist in brewing. Not open for credit to students who have taken FST 003. GE credit: SE, SL. Effective: 2017 Spring Quarter.

**FST 010—Food Science, Folklore and Health (3)**
Lecture—3 hours. Not open for credit to students who have completed course 2. Ancient and modern food folklore in relation to health and well-being. Food safety, organic food, herbalism, food preservation, and nutritional enhancement. GE credit: SE, SL, SS, VL, WC. Effective: 2000 Fall Quarter.

**FST 050—Introduction to Food Preservation (3) Review all entries**
Laboratory—2 hours; Lecture—2 hours. Prerequisite(s): CHE 002A; STA 013 (can be concurrent); BIS 002A (can be concurrent) Restricted to Food Science Majors. Introduction to modes of fresh food preservation including use of chemicals and microbes, heat and energy, control of water and atmosphere, and by indirect approaches such as packaging, hygienic design and sanitation. GE credit: QL, SE. Effective: 2018 Winter Quarter.

**FST 050—Introduction to Food Preservation (3) Review all entries**
Laboratory—2 hours; Lecture—2 hours. Prerequisite(s): CHE 002A; BIS 002A (can be concurrent); (STA 013 (can be concurrent) or STA 013Y (can be concurrent) or STA 100 (can be concurrent)) Pass One restricted to Food Science majors; Pass Two open to all students. Introduction to modes of fresh food preservation including use of chemicals and microbes, heat and energy, control of water and atmosphere, and by indirect approaches such as packaging, hygienic design and sanitation. GE credit: QL, SE. Effective: 2018 Fall Quarter.
FST 055—Food in American Culture (4)
Discussion—1 hour; Lecture—3 hours. Relationship between food and culture; relationship between food and the social order; influences on eating habits and the tensions between them including identity, convenience, and responsibility; multiple disciplines and genres. (Same course as AMS 055.) GE credit: ACGH, AH, DD, SS, WE. Effective: 2018 Winter Quarter.

FST 099—Special Study for Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

FST 100A—Food Chemistry (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): CHE 008B; BIS 002A recommended. Chemical aspects of food composition. Emphasis on the functional properties and chemical reactions of the major components of foods: carbohydrates, lipids, proteins, and water. GE credit: SE, VL. Effective: 2017 Winter Quarter.

FST 100B—Food Properties (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): FST 100A; CHE 008B; and Consent of Instructor. Sensory quality, chemical and microbial safety, and nutritional properties of foods. Effects of food processing and preparation on these properties. Selected properties of food commodities. GE credit: QL, SE, VL. Effective: 2017 Winter Quarter.

FST 100C—Food Physical Chemistry (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): FST 100A Fundamentals of thermodynamics and kinetics related to food physical chemistry. Phase behavior, crystallization, water activity and food stability, solubility, aroma volatility, formation of glasses, gels and dispersions, biopolymers and rheology. Effective: 2019 Winter Quarter.

FST 101A—Food Chemistry Laboratory (3) Review all entries
Discussion—1 hour; Laboratory—3 hours; Lecture—1 hour. Concurrent enrollment in FST 100A required. Study of basic chemical and physical properties that influence the reactivity and functional properties of components in food systems. GE credit: QL, SE, VL, WE. Effective: 2017 Spring Quarter.

FST 101B—Food Properties Laboratory (2)
Lecture/Lab—3 hours. Prerequisite(s): FST 100B (can be concurrent); Must be taken concurrently. Study of properties of food described in course 100B. GE credit: QL, SE, VL, WE. Effective: 2018 Fall Quarter.

FST 102A—Malting and Brewing Science (4) Review all entries
Lecture—4 hours. Prerequisite(s): BIS 102; BIS 103; Senior standing recommended. The technology of the malting, brewing and fermentation processes is integrated with the chemistry, biochemistry and microbiology that determine industrial practices and product quality. Not open for credit to students who have taken course 102. GE credit: SE. Effective: 1997 Winter Quarter.

FST 102B—Practical Malting and Brewing (4)
Laboratory—6 hours; Lecture/Discussion—2 hours. Prerequisite(s): FST 102A; CHE 002C Open to seniors only in Fermentation Science or Food Science and Technology. Provides practical working knowledge of analytical methods used in malting and brewing and experience with brewing materials and processes, by analysis of samples that illustrate the range of values experienced in practice and pilot scale brewing. GE credit: QL, SE. Effective: 2017 Winter Quarter.
FST 103—Physical and Chemical Methods for Food Analysis (4)
Discussion—1 hour; Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): CHE 002C; CHE 008B; BIS 103; FST 100B Theory and application of physical and chemical methods for determining the constituents of foods. Modern separation and instrumental analysis techniques are stressed. GE credit: QL, SE, WE. Effective: 2017 Winter Quarter.

FST 104—Food Microbiology (3) Review all entries
Lecture—3 hours. Prerequisite(s): BIS 002A; BIS 103; MIC 102; MIC 103L Microorganisms in food safety, spoilage, and production. Food-borne disease agents and their control. Growth parameters of food spoilage agents. Destruction of microbes in food. Food fermentations. The development of microbes as a resource for the food industry. GE credit: QL, SE, VL. Effective: 2017 Winter Quarter.

FST 104—Food Microbiology (3) Review all entries
Lecture—3 hours. Prerequisite(s): BIS 002A; BIS 103 Microorganisms in food safety, spoilage, and production. Food-borne disease agents and their control. Growth parameters of food spoilage agents. Destruction of microbes in food. Food fermentations. The development of microbes as a resource for the food industry. GE credit: QL, SE, VL. Effective: 2019 Winter Quarter.

FST 104L—Food Microbiology Laboratory (4)
Discussion—1 hour; Laboratory—6 hours; Lecture—1 hour. Prerequisite(s): BIS 002A; BIS 103; FST 104 Cultural and morphological characteristics of microorganisms involved in food spoilage, in foodborne disease, and food fermentation. Analysis of microbiological quality of foods. GE credit: QL, SE, VL, WE. Effective: 2017 Spring Quarter.

FST 106—Food Chemistry for Clinical Nutrition (5) Review all entries
Discussion—1 hour; Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): CHE 008B C or better or CHE 118C C or better or CHE 128C C or better; Concurrent with FST 100A recommended. Only open to Clinical Nutrition majors. Chemical and physical principles that influence functional properties, nutrient content, safety, and sensory aspects of food. Emphasis on the application of these concepts in clinical nutrition. Not open to students who have completed FST 101A and/or FST 101B. (Same course as NUT 106.) GE credit: SE, SL, WE. Effective: 2018 Fall Quarter.

FST 106—Food Chemistry for Clinical Nutrition (5) Review all entries
Discussion—1 hour; Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): CHE 008B C- or better or CHE 118B C- or better or CHE 128B C- or better; Concurrent with FST 100A recommended. Only open to Clinical Nutrition majors. Chemical and physical principles that influence functional properties, nutrient content, safety, and sensory aspects of food. Emphasis on the application of these concepts in clinical nutrition. Not open to students who have completed FST 101A and/or FST 101B. (Same course as NUT 106.) GE credit: SE, SL, WE. Effective: 2019 Spring Quarter.

FST 107—Food Sensory Science (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): FST 117 (can be concurrent); (STA 013 or STA 013Y) Critical examination of techniques and theories of sensory measurement of food; measures of consumer perception and acceptance. An introduction to the sensory and cognitive systems associated with the perception of food. Not open for credit to students who have completed FST 107A. GE credit: QL, SL, WE. Effective: 2018 Spring Quarter.

FST 109—Principles of Quality Assurance in Food Processing (3)
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): STA 013 or STA 013Y Quality assurance measurement techniques applied to selected food processed products emphasized. Rationale for establishing valid quality assurance programs including selection of samples at critical points. Statistical problems in quality assurance programs used by the food industry. GE credit: QL, SL, SE, VL. Effective: 2018 Spring Quarter.

FST 110—Food Processing (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): PHY 007A; PHY 007B; PHY 007C; MAT 016A; MAT 016B; MAT 016C; Or equivalent to PHY 007 series or MAT 016 series. Application of the conservation of mass and energy to food processing. Elements of engineering thermodynamics, fluid mechanics, heat and mass transfer. Quantitative analysis through problem solving and simulation. Not open for credit to students enrolled in College of Engineering. GE credit: QL, SE, VL. Effective: 2017 Spring Quarter.
FST 110—Food Processing (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): PHY 007A; PHY 007B; PHY 007C (can be concurrent); (MAT 016C or MAT 017C or MAT 021C) Application of the conservation of mass and energy to food processing. Elements of engineering thermodynamics, fluid mechanics, heat and mass transfer. Quantitative analysis through problem solving and simulation. Not open for credit to students enrolled in College of Engineering. GE credit: QL, SE, VL. Effective: 2018 Fall Quarter.

FST 110L—Food Processing Laboratory (2) Review all entries
Discussion—1 hour; Laboratory—3 hours. Prerequisite(s): FST 110 (can be concurrent); FST 050 Open to Food Science majors only. Laboratory exercises to gain experience with common food processing operations at the bench and pilot plant scales. GE credit: QL, SE, SL, VL. Effective: 2017 Spring Quarter.

FST 115—Fermented Foods (4)
Lecture—4 hours. Prerequisite(s): BIS 103; MIC 102; or Consent of Instructor. Pass One restricted to upper division or graduate level Food Science and Viticulture and Enology majors. Physiology, biochemistry, and genetics of microorganisms important in food fermentations. How microorganisms are used in fermentations and how raw materials are converted into finished fermented foods and beverages. Effective: 2017 Spring Quarter.

FST 117—Design and Analysis for Sensory Food Science (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): STA 013 Basic concepts of experimental design and analysis for sensory food science. Use of statistical methods to develop and analyze experimental designs. Application of statistical analysis software to the analysis of data. Quality assurance of sensory measurement systems. GE credit: QL, SE. Effective: 2017 Spring Quarter.

FST 119—Chemistry and Technology of Milk and Dairy Products (4)
Lecture—4 hours. Prerequisite(s): BIS 002A; BIS 102; Consent of Instructor. Composition, structure and properties of milk and products derived from milk. Relates chemical, microbiological, and technological principles to commercial practices in processing of milk and its products. GE credit: QL, SE, VL. Effective: 2017 Spring Quarter.

FST 123—Introduction to Enzymology (3)
Lecture—3 hours. Prerequisite(s): FST 123L (can be concurrent); BIS 102; BIS 103 Principles of physical, chemical and catalytic properties of enzymes and their importance. Purification, characterization, and quantitative evaluation of reaction conditions on activity are stressed. Specificity and mechanism of action illustrated by use of selected enzymes. (Former course Biochemistry and Biophysics 123.) GE credit: QL, SE, VL. Effective: 2017 Spring Quarter.

FST 123L—Enzymology Laboratory (2)
Laboratory—3 hours; Lecture—1 hour. Prerequisite(s): BIS 103; FST 123 (can be concurrent); FST 123 required concurrently. Laboratory procedures involved in detection, purification and characterization of enzymes. (Former course Biochemistry and Biophysics 123L.) GE credit: QL, SE, VL, WE. Effective: 1997 Winter Quarter.

FST 127—Sensory Evaluation of Foods (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): FST 117 Critical examination of methods of sensory measurement applied to food and beverage systems; descriptive analysis and consumer tests and their application to quality assurance, product development and optimization. GE credit: QL, SE, WE. Effective: 2017 Winter Quarter.

FST 128—Food Toxicology (3)
Lecture—3 hours. Prerequisite(s): BIS 102; BIS 103 Chemistry and biochemistry of toxins occurring in foods, including plant and animal toxins, intentional and unintentional food additives. The assessment of food safety and toxic hazards. (Same course as ETX 128.) GE credit: SE. Effective: 1997 Winter Quarter.

FST 131—Food Packaging (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): CHE 008B; BIS 001B; PHY 007C Class size limited to 50 students. Principles of food packaging. Functions of packaging. Properties of metal, glass, paper and plastic materials and packages. Design, fabrication, and applications of food packaging. Packaging of fresh and processed foods, including fruits and vegetables, dairy foods, beer and wine. GE credit: SE. Effective: 2016 Summer Session 1.

FST 151Y—Food Freezing (1)
Discussion—1 hour; Web Virtual Lecture. Prerequisite(s): FST 110A; Or the equivalent. Mechanisms of ice
crystallization, interpretation of freezing diagrams, and modes of heat transfer. Food properties at sub-freezing temperatures, refrigeration requirements, and estimation of freezing times. Industrial systems used in freezing foods. GE credit: QL, SE. Effective: 2013 Fall Quarter.

FST 159—New Food Product Ideas (3)
Lecture—3 hours. Prerequisite(s): FST 050; BIS 002A; PHY 007A; PHY 007B; PHY 007C; CHE 002A; CHE 002B; CHE 002C Create, refine, test and present viable ideas for new food products. Activities include trend monitoring, consumer research, idea generation, concept screening, and new product concept presentations. GE credit: AH, OL, SS, WE. Effective: 2017 Spring Quarter.

FST 160—Food Product Development (4)
Discussion—1 hour; Laboratory—6 hours; Lecture—1 hour. Prerequisite(s): FST 050; FST 103; FST 104; FST 110 Product implementation stage of food product development including preliminary product description, prototype development, product testing, and formal presentation of a new product development. GE credit: OL, SE, VL. Effective: 2017 Winter Quarter.

FST 190—Senior Seminar (1)
Seminar—1 hour. Prerequisite(s): Senior standing or consent of instructor. Selected topics presented by students on recent advances in food science and technology. Reports and discussions concerning oral and written presentations, literature sources and career opportunities. GE credit: OL, SE. Effective: 1997 Winter Quarter.

FST 192—Internship for Advanced Undergraduates (1-12)
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Work experience on or off campus in the practical application of food science. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

FST 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

FST 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

FST 201—Food Chemistry and Biochemistry (4)
Lecture—4 hours. Prerequisite(s): Undergraduate courses in organic chemistry and biochemistry; undergraduate course in food chemistry is recommended. Restricted to Food Science graduate level standing or consent of instructor. Advanced topics in food chemistry and biochemistry, emphasizing the application of the basic principles of chemistry and biochemistry to food composition, properties, preservation and processing. Chemical structures, interactions, reaction mechanisms and experimental methods are stressed. Effective: 2017 Fall Quarter.

FST 202—Physical Chemistry of Foods (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): CHE 107A; CHE 107B; BIS 102 recommended. Fundamental principles of chemistry and physics are applied to a study of changes in water binding properties and activity, changes in proteins, nutrients, toxic constituents, and other compounds during storage, heating, freezing, dehydrating, and concentrating of food materials. Effective: 2017 Winter Quarter.

FST 203—Food Processing (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): FST 110A; PHY 007C); CHE 107B; or Consent of Instructor. Principles of food engineering applied to food processing. Relationship of Newtonian and non-Newtonian fluid properties to heat and momentum transfer. Application of mass transfer in controlling kinetics and quality changes of foods. Effective: 2013 Spring Quarter.

FST 204—Advanced Food Microbiology (3) Review all entries
Lecture—3 hours. Prerequisite(s): BIS 001C; BIS 103; FST 104; Or a course in microbiology. Principles of and recent developments in food microbiology, including food pathogen virulence and detection, parameters of microbial growth in food, and the microbiology of food and beverage fermentations. Effective: 1997 Winter Quarter.

FST 204—Advanced Food Microbiology (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Undergraduate level coursework in microbiology, or consent of instructor. Principles and recent developments in food microbiology. Mechanisms of foodborne disease, pathogen detection, parameters of microbial growth and control in foods, intestinal microbiology including probiotics and prebiotics, and the microbiology of food and beverage fermentations. Effective: 2019 Winter Quarter.

FST 205—Industrial Microbiology (3)
Lecture—3 hours. Prerequisite(s): BIS 001A; BIS 102; BIS 103; MIC 130A and MIC 130B or BIS 101 recommended. Use of microorganisms for producing substances such as amino acids, peptides, enzymes, antibiotics and organic acids.
Emphasis on metabolic regulation of pathways leading to fermentation products, on yeast fermentations, and on genetic manipulations (including recombinant DNA techniques) of industrial microorganisms. Effective: 1997 Winter Quarter.

**FST 207—Advanced Sensory-Instrumental Analyses (3)**
Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): FST 107; and Consent of Instructor. Basic principles of measurement of color, texture, and flavor of foods by sensory and instrumental methods. Advanced statistical analysis of relation of colorimetry, texturometry, and chemistry of volatile compounds to perception of appearance, texture, flavor. Effective: 1997 Winter Quarter.

**FST 210—Proteins: Functional Activities and Interactions (3)**
Lecture—3 hours. Prerequisite(s): BIS 103 The relationships of structure of proteins to their biological functions. Structural proteins, complexing proteins, and catalytic proteins in plant and animal materials and products. Effective: 1997 Winter Quarter.

**FST 211—Lipids: Chemistry and Nutrition (3)**
Lecture—3 hours. Prerequisite(s): BIS 103; CHE 107B; CHE 128B Chemistry of lipids as it pertains to research in food and nutrition. Relations between lipid structure and their physical properties in tissues and foods. Regulation of absorption, transport, and metabolism of lipids. Implications of dietary fats and health. Effective: 1997 Winter Quarter.

**FST 213—Flavor Chemistry of Foods and Beverages (3)**
Lecture/Discussion—3 hours. Prerequisite(s): CHE 008B; VEN 123; (VEN 123L or FST 103); or Consent of Instructor. Students will become familiar with basic principles of flavor chemistry, analysis, and formation in fresh and processed foods. Students will be required to read and critically evaluate flavor chemistry literature. (Same course as VEN 213.) Effective: 2009 Spring Quarter.

**FST 217—Advanced Food Sensory Science (3)**
Lecture—3 hours. Prerequisite(s): FST 107 (can be concurrent); or Consent of Instructor. Advanced study of the techniques and theory of the sensory measurement of food as an analytical tool and as a measure of consumer perception and acceptance. Advanced examination of the sensory and cognitive systems associated with the perception of food. Effective: 2010 Fall Quarter.

**FST 219—Biochemistry, Microbiology and Technology of Cheeses of the World (4)**
Lecture—4 hours. Prerequisite(s): FST 119; (BIS 103 or FST 100A); FST 123; BIS 103; CHE 107B; CHE 128B; or Consent of Instructor. Restricted to graduate level students or senior undergraduate students with appropriate background in biochemistry and microbiology. Compositional and physico-chemical aspects of milk and their implications on cheesemaking; enzymatic, microbiological and physical aspects of cheesemaking; cheese as a biological composite; designing cheese quality attributes; cheese aging. Cheese from all over the world will be tasted and discussed. Effective: 2008 Fall Quarter.

**FST 227—Food Perception and the Chemical Senses (2)**
Lecture—2 hours. Prerequisite(s): FST 107B (can be concurrent); and Consent of Instructor. Examination of the anatomy and physiology of the chemical senses (taste, smell, and the trigeminal senses) and how they are involved in the perception of food and food intake. Effective: 1997 Winter Quarter.

**FST 228—Sustainable Food Systems (3)**

**FST 230—Food & Gut Microbiota (4)**
Discussion—1.5 hours; Lecture—1.5 hours; Term Paper. Prerequisite(s): Microbiology and molecular biology undergraduate coursework or Consent of Instructor. Upper division or graduate standing. Impact of specific food structures on the structure and function of the animal gut microbiota. How food is transformed by, and modulates, the gut microbiota to provide the host with nutrients and protection. Effective: 2017 Spring Quarter.

**FST 290—Seminar (1)**
Seminar—1 hour. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

**FST 290C—Advanced Research Conference (1)**
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Graduate standing. Critical presentation and evaluation of original research by graduate students. Planning of research programs and proposals. Discussion led by individual major instructors for their research group. (S/U grading only.) Effective: 1997 Winter Quarter.
FST 291—Advanced Food Science Seminar (1)
Seminar—1 hour. Prerequisite(s): FST 290; Completion of at least one quarter of FST 290. Oral presentation of student's original research, discussion, and critical evaluation. (S/U grading only.) Effective: 1997 Winter Quarter.

FST 298—Group Study (1-5)
Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

FST 299—Research (1-12)
Variable. Prerequisite(s): Consent of Instructor. Graduate standing. (S/U grading only.) Effective: 1997 Winter Quarter.

FST 396—Teaching Assistant Training Practicum (1-4)
Variable. Prerequisite(s): Graduate standing. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

Food Science (Graduate Group)

Food Science (Graduate Group) | Food Science Information
Gary M. Smith, Ph.D., Chairperson of the Group

Group Office. 1204 RMI South Building; 530-752-3250; bftvadvising@ucdavis.edu; https://foodscience.ucdavis.edu/

Faculty. Includes members from twelve departments in the Colleges of Agricultural and Environmental Sciences and Engineering, and the Schools of Medicine and Veterinary Medicine.

Food Science (Graduate Group) | Food Science M.S.
Gary M. Smith, Ph.D., Chairperson of the Group

Group Office. 1204 RMI South Building; 530-752-3250; bftvadvising@ucdavis.edu; https://foodscience.ucdavis.edu/

Faculty. Includes members from twelve departments in the Colleges of Agricultural and Environmental Sciences and Engineering, and the Schools of Medicine and Veterinary Medicine.

Graduate Study. The interdepartmental Graduate Group in Food Science offers programs of study leading to the M.S. degree and to the Ph.D. degree. Graduate studies stress the application of the biological, chemical, physical, and behavioral sciences to processing, preservation, quality evaluation, public health aspects, and utilization of foods. For the M.S. degree, there are five areas of specialization: chemistry-biochemistry, microbiology, engineering-technology, brewing and sensory science. Individually designed programs are also acceptable. For the Ph.D., there are four areas of emphasis: biochemistry, chemistry, microbiology/fermentation, and sensory science. Detailed information regarding graduate study is available through the Group Chairperson or the Group office.

Graduate Advisor. Contact the Food Science Graduate Group office at bftvadvising@ucdavis.edu.

Food Science (Graduate Group) | Food Science Ph.D.
Gary M. Smith, Ph.D., Chairperson of the Group

Major Program and Graduate Study. See the major in Food Science; and for graduate study, see Graduate Studies.

Related Courses. See courses in Consumer Science, Engineering, Molecular & Cellular Biology, Nutrition, Viticulture & Enology, Environmental Toxicology, Population Health & Reproduction, and Plant Biology.

Food Science & Technology | FST Courses

Courses in FST:

FST 001—Principles of Food Science (3)
Discussion—1 hour; Lecture—2 hours. Not open for credit to students who have completed any Food Science and Technology course except course 10. Food science fundamentals. Fresh and processed food technologies; world food problems; food composition; food microbiological and toxicological safety; food laws; evaluation of acceptability and nutritional value. GE credit: SE, VL. Effective: 2001 Winter Quarter.

FST 003—Introduction to Brewing and Beer (3)
Lecture—3 hours. Basic description of brewing and associated processes, from raw materials to final product; history of brewing and brewing science; types of beer worldwide; world beer markets; basics of beer quality, including wholesomeness; role of scientist in brewing. Not open for credit to students who have taken FST 003V. GE credit: SE, SL. Effective: 2017 Fall Quarter.

FST 003V—Introduction to Brewing and Beer (3)
Project (Term Project); Web Electronic Discussion—1.5 hours; Web Virtual Lecture—1 hour. Basic description of brewing and associated processes, from raw materials to final product; history of brewing and brewing science; types of beer worldwide; world beer markets; basics of beer quality, including wholesomeness; role of scientist in brewing. Not open for credit to students who have taken FST 003. GE credit: SE, SL. Effective: 2017 Spring Quarter.

FST 010—Food Science, Folklore and Health (3)
Lecture—3 hours. Not open for credit to students who have completed course 2. Ancient and modern food folklore in relation to health and well-being. Food safety, organic food, herbalism, food preservation, and nutritional enhancement. GE credit: SE, SL, SS, VL, WC. Effective: 2000 Fall Quarter.

FST 050—Introduction to Food Preservation (3)
Laboratory—2 hours; Lecture—2 hours. Prerequisite(s): CHE 002A; STA 013 (can be concurrent); BIS 002A (can be concurrent) Restricted to Food Science Majors. Introduction to modes of fresh food preservation including use of chemicals and microbes, heat and energy, control of water and atmosphere, and by indirect approaches such as packaging, hygienic design and sanitation. GE credit: QL, SE. Effective: 2018 Winter Quarter.

FST 050—Introduction to Food Preservation (3)
Laboratory—2 hours; Lecture—2 hours. Prerequisite(s): CHE 002A; BIS 002A (can be concurrent); STA 013 (can be concurrent) or STA 013Y (can be concurrent) or STA 100 (can be concurrent) Pass One restricted to Food Science majors; Pass Two open to all students. Introduction to modes of fresh food preservation including use of chemicals and microbes, heat and energy, control of water and atmosphere, and by indirect approaches such as packaging, hygienic design and sanitation. GE credit: QL, SE. Effective: 2018 Fall Quarter.

FST 055—Food in American Culture (4)
Discussion—1 hour; Lecture—3 hours. Relationship between food and culture; relationship between food and the social order; influences on eating habits and the tensions between them including identity, convenience, and responsibility; multiple disciplines and genres. (Same course as AMS 055.) GE credit: ACGH, AH, DD, SS, WE. Effective: 2018 Winter Quarter.
FST 099—Special Study for Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

FST 100A—Food Chemistry (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): CHE 008B; BIS 002A recommended. Chemical aspects of food composition. Emphasis on the functional properties and chemical reactions of the major components of foods: carbohydrates, lipids, proteins, and water. GE credit: SE, VL. Effective: 2017 Winter Quarter.

FST 100A—Food Chemistry (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): CHE 008B or CHE 118B or CHE 128B; BIS 002A recommended. Open to Food Science, Clinical Nutrition, and Nutrition Science majors only. Chemical aspects of food composition. Emphasis on the functional properties and chemical reactions of the major components of foods: carbohydrates, lipids, proteins, and water. GE credit: SE, VL. Effective: 2018 Fall Quarter.

FST 100B—Food Properties (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): FST 100A; CHE 008B; and Consent of Instructor. Sensory quality, chemical and microbial safety, and nutritional properties of foods. Effects of food processing and preparation on these properties. Selected properties of food commodities. GE credit: QL, SE, VL. Effective: 2017 Winter Quarter.

FST 101A—Food Chemistry Laboratory (3) Review all entries
Discussion—1 hour; Laboratory—3 hours; Lecture—1 hour. Concurrent enrollment in FST 100A required. Study of basic chemical and physical properties that influence the reactivity and functional properties of components in food systems. GE credit: QL, SE, VL, WE. Effective: 2017 Spring Quarter.

FST 101A—Food Chemistry Laboratory (3) Review all entries
Discussion—1 hour; Laboratory—3 hours; Lecture—1 hour. Prerequisite(s): FST 100A (can be concurrent) Open to Food Science and Clinical Nutrition majors only. Study of basic chemical and physical properties that influence the reactivity and functional properties of components in food systems. GE credit: QL, SE, VL, WE. Effective: 2018 Fall Quarter.

FST 102A—Malting and Brewing Science (4)
Lecture—4 hours. Prerequisite(s): BIS 102; BIS 103; Senior standing recommended. The technology of the malting, brewing and fermentation processes is integrated with the chemistry, biochemistry and microbiology that determine industrial practices and product quality. Not open for credit to students who have taken course 102. GE credit: SE. Effective: 1997 Winter Quarter.

FST 102A—Malting and Brewing Science (4) Review all entries
Lecture—4 hours. Prerequisite(s): (BIS 102, BIS 103) or BIS 105; Senior standing recommended. The technology of the malting, brewing and fermentation processes is integrated with the chemistry, biochemistry and microbiology that determine industrial practices and product quality. Not open for credit to students who have taken FST 102. GE credit: SE. Effective: 2018 Fall Quarter.

FST 102B—Practical Malting and Brewing (4)
Laboratory—6 hours; Lecture/Discussion—2 hours. Prerequisite(s): FST 102A; CHE 002C Open to seniors only in Fermentation Science or Food Science and Technology. Provides practical working knowledge of analytical methods used in malting and brewing and experience with brewing materials and processes, by analysis of samples that illustrate the range of values experienced in practice and pilot scale brewing. GE credit: QL, SE. Effective: 2017 Winter Quarter.

FST 103—Physical and Chemical Methods for Food Analysis (4)
Discussion—1 hour; Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): CHE 002C; CHE 008B; BIS 103; FST 100B Theory and application of physical and chemical methods for determining the constituents of foods. Modern separation and instrumental analysis techniques are stressed. GE credit: QL, SE, WE. Effective: 2017 Winter Quarter.
FST 104—Food Microbiology (3) Review all entries
Lecture—3 hours. Prerequisite(s): BIS 002A; BIS 103; MIC 102; MIC 103L Microorganisms in food safety, spoilage, and production. Food-borne disease agents and their control. Growth parameters of food spoilage agents. Destruction of microbes in food. Food fermentations. The development of microbes as a resource for the food industry. GE credit: QL, SE, VL. Effective: 2017 Winter Quarter.

FST 104—Food Microbiology (3) Review all entries
Lecture—3 hours. Prerequisite(s): BIS 002A; BIS 103 Microorganisms in food safety, spoilage, and production. Food-borne disease agents and their control. Growth parameters of food spoilage agents. Destruction of microbes in food. Food fermentations. The development of microbes as a resource for the food industry. GE credit: QL, SE, VL. Effective: 2019 Winter Quarter.

FST 104L—Food Microbiology Laboratory (4)
Discussion—1 hour; Laboratory—6 hours; Lecture—1 hour. Prerequisite(s): BIS 002A; BIS 103; FST 104 Cultural and morphological characteristics of microorganisms involved in food spoilage, in foodborne disease, and food fermentation. Analysis of microbiological quality of foods. GE credit: QL, SE, VL, WE. Effective: 2017 Spring Quarter.

FST 106—Food Chemistry for Clinical Nutrition (5) Review all entries
Discussion—1 hour; Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): CHE 008B C or better or CHE 118C C or better or CHE 128C C or better; Concurrent with FST 100A recommended. Only open to Clinical Nutrition majors. Chemical and physical principles that influence functional properties, nutrient content, safety, and sensory aspects of food. Emphasis on the application of these concepts in clinical nutrition. Not open to students who have completed FST 101A and/or FST 101B. (Same course as NUT 106.) GE credit: SE, SL, WE. Effective: 2018 Fall Quarter.

FST 106—Food Chemistry for Clinical Nutrition (5) Review all entries
Discussion—1 hour; Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): CHE 008B C- or better or CHE 118B C- or better or CHE 128B C- or better; Concurrent with FST 100A recommended. Only open to Clinical Nutrition majors. Chemical and physical principles that influence functional properties, nutrient content, safety, and sensory aspects of food. Emphasis on the application of these concepts in clinical nutrition. Not open to students who have completed FST 101A and/or FST 101B. (Same course as NUT 106.) GE credit: SE, SL, WE. Effective: 2019 Spring Quarter.

FST 107—Food Sensory Science (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): FST 117 (can be concurrent); (STA 013 or STA 013Y) Critical examination of techniques and theories of sensory measurement of food; measures of consumer perception and acceptance. An introduction to the sensory and cognitive systems associated with the perception of food. Not open for credit to students who have completed FST 107A. GE credit: QL, SE, WE. Effective: 2018 Spring Quarter.

FST 109—Principles of Quality Assurance in Food Processing (3)
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): STA 013 or STA 013Y Quality assurance measurement techniques applied to selected food processed products emphasized. Rationale for establishing valid quality assurance programs including selection of samples at critical points. Statistical problems in quality assurance programs used by the food industry. GE credit: QL, SE, SL, VL. Effective: 2018 Spring Quarter.

FST 110—Food Processing (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): PHY 007A; PHY 007B; PHY 007C; MAT 016A; MAT 016B; MAT 016C; Or equivalent to PHY 007 series or MAT 016 series. Application of the conservation of mass and energy to food processing. Elements of engineering thermodynamics, fluid mechanics, heat and mass transfer. Quantitative analysis through problem solving and simulation. Not open for credit to students enrolled in College of Engineering. GE credit: QL, SE, VL. Effective: 2017 Spring Quarter.

FST 110—Food Processing (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): PHY 007A; PHY 007B; PHY 007C (can be concurrent); (MAT 016C or MAT 017C or MAT 021C) Application of the conservation of mass and energy to food processing. Elements of engineering thermodynamics, fluid mechanics, heat and mass transfer. Quantitative analysis through problem

937
FST 110L—Food Processing Laboratory (2) **Review all entries**
Discussion—1 hour; Laboratory—3 hours. Prerequisite(s): FST 110 (can be concurrent); FST 050 Open to Food Science majors only. Laboratory exercises to gain experience with common food processing operations at the bench and pilot plant scales. GE credit: QL, SE, SL, VL. Effective: 2017 Spring Quarter.

FST 110L—Food Processing Laboratory (2) **Review all entries**
Discussion—1 hour; Laboratory—3 hours. Prerequisite(s): FST 110 (can be concurrent) Open to Food Science majors only. Laboratory exercises to gain experience with common food processing operations at the bench and pilot plant scales. GE credit: QL, SE, SL, VL. Effective: 2018 Fall Quarter.

FST 115—Fermented Foods (4)
Lecture—3 hours; Term Paper/Discussion. Prerequisite(s): BIS 103; MIC 102; or Consent of Instructor. Pass One restricted to upper division or graduate level Food Science and Viticulture and Enology majors. Physiology, biochemistry, and genetics of microorganisms important in food fermentations. How microorganisms are used in fermentations and how raw materials are converted into finished fermented foods and beverages. Effective: 2017 Fall Quarter.

FST 117—Design and Analysis for Sensory Food Science (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): STA 013 Methods of design and analysis for sensory food science. Experimental design strategies. Use of taste panels and consumer testing. Data analysis and computation including the relative merits and limitations of parametric and nonparametric approaches. Modifications for quality assurance. GE credit: QL, SE. Effective: 2017 Spring Quarter.

FST 119—Chemistry and Technology of Milk and Dairy Products (4)
Lecture—4 hours. Prerequisite(s): BIS 002A; BIS 102; Consent of Instructor. Composition, structure and properties of milk and products derived from milk. Relates chemical, microbiological, and technological principles to commercial practices in processing of milk and its products. GE credit: QL, SE, VL. Effective: 2017 Spring Quarter.

FST 123—Introduction to Enzymology (3)
Lecture—3 hours. Prerequisite(s): FST 123L (can be concurrent); BIS 102; BIS 103 Principles of physical, chemical and catalytic properties of enzymes and their importance. Purification, characterization, and quantitative evaluation of reaction conditions on activity are stressed. Specificity and mechanism of action illustrated by use of selected enzymes. (Former course Biochemistry and Biophysics 123.) GE credit: QL, SE, VL. Effective: 2017 Spring Quarter.

FST 123L—Enzymology Laboratory (2)
Laboratory—3 hours; Lecture—1 hour. Prerequisite(s): BIS 103; FST 123 (can be concurrent); FST 123 required concurrently. Laboratory procedures involved in detection, purification and characterization of enzymes. (Former course Biochemistry and Biophysics 123L.) GE credit: QL, SE, VL, WE. Effective: 1997 Winter Quarter.

FST 127—Sensory Evaluation of Foods (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): FST 117 Critical examination of methods of sensory measurement applied to food and beverage systems; descriptive analysis and consumer tests and their application to quality assurance, product development and optimization. GE credit: QL, SE, WE. Effective: 2017 Winter Quarter.

FST 128—Food Toxicology (3)
Lecture—3 hours. Prerequisite(s): BIS 102; BIS 103 Chemistry and biochemistry of toxins occurring in foods, including plant and animal toxins, intentional and unintentional food additives. The assessment of food safety and toxic hazards. (Same course as ETX 128.) GE credit: SE. Effective: 1997 Winter Quarter.

FST 131—Food Packaging (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): CHE 008B; BIS 001B; PHY 007C Class size limited to 50 students. Principles of food packaging. Functions of packaging. Properties of metal, glass, paper and plastic materials and packages. Design, fabrication, and applications of food packaging. Packaging of fresh and processed foods, including fruits and vegetables, dairy foods, beer and wine. GE credit: SE. Effective: 2016 Summer Session 1.

FST 151Y—Food Freezing (1)
Discussion—1 hour; Web Virtual Lecture. Prerequisite(s): FST 110A; Or the equivalent. Mechanisms of ice crystallization, interpretation of freezing diagrams, and modes of heat transfer. Food properties at sub-freezing temperatures, refrigeration requirements, and estimation of freezing times. Industrial systems used in freezing foods. GE credit: QL, SE. Effective: 2013 Fall Quarter.
FST 159—New Food Product Ideas (3)
Lecture—3 hours. Prerequisite(s): FST 050; BIS 002A; PHY 007A; PHY 007B; PHY 007C; CHE 002A; CHE 002B; CHE 002C Create, refine, test and present viable ideas for new food products. Activities include trend monitoring, consumer research, idea generation, concept screening, and new product concept presentations. GE credit: AH, OL, SS, WE. Effective: 2017 Spring Quarter.

FST 160—Food Product Development (4)
Discussion—1 hour; Laboratory—6 hours; Lecture—1 hour. Prerequisite(s): FST 050; FST 103; FST 104; FST 110 Product implementation stage of food product development including preliminary product description, prototype development, product testing, and formal presentation of a new product development. GE credit: OL, SE, VL. Effective: 2017 Winter Quarter.

FST 190—Senior Seminar (1)
Seminar—1 hour. Prerequisite(s): Senior standing or consent of instructor. Selected topics presented by students on recent advances in food science and technology. Reports and discussions concerning oral and written presentations, literature sources and career opportunities. GE credit: OL, SE. Effective: 1997 Winter Quarter.

FST 192—Internship for Advanced Undergraduates (1-12)
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Work experience on or off campus in the practical application of food science. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

FST 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

FST 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

FST 201—Food Chemistry and Biochemistry (4)
Lecture—4 hours. Prerequisite(s): Undergraduate courses in organic chemistry and biochemistry; undergraduate course in food chemistry is recommended. Restricted to Food Science graduate level standing or consent of instructor. Advanced topics in food chemistry and biochemistry, emphasizing the application of the basic principles of chemistry and biochemistry to food composition, properties, preservation and processing. Chemical structures, interactions, reaction mechanisms and experimental methods are stressed. Effective: 2017 Fall Quarter.

FST 202—Physical Chemistry of Foods (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): CHE 107A; CHE 107B; BIS 102 recommended. Fundamental principles of chemistry and physics are applied to a study of changes in water binding properties and activity, changes in proteins, nutrients, toxic constituents, and other compounds during storage, heating, freezing, dehydrating, and concentrating of food materials. Effective: 2017 Winter Quarter.

FST 203—Food Processing (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): FST 110A; PHY 007C; CHE 107B; or Consent of Instructor. Principles of food engineering applied to food processing. Relationship of Newtonian and non-Newtonian fluid properties to heat and momentum transfer. Application of mass transfer in controlling kinetics and quality changes of foods. Effective: 2013 Spring Quarter.

FST 204—Advanced Food Microbiology (3) Review all entries
Lecture—3 hours. Prerequisite(s): BIS 001C; BIS 103; FST 104; Or a course in microbiology. Principles of and recent developments in food microbiology, including food pathogen virulence and detection, parameters of microbial growth in food, and the microbiology of food and beverage fermentations. Effective: 1997 Winter Quarter.

FST 204—Advanced Food Microbiology (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Undergraduate level coursework in microbiology, or consent of instructor. Principles and recent developments in food microbiology. Mechanisms of foodborne disease, pathogen detection, parameters of microbial growth and control in foods, intestinal microbiology including probiotics and prebiotics, and the microbiology of food and beverage fermentations. Effective: 2019 Winter Quarter.

FST 205—Industrial Microbiology (3)
Lecture—3 hours. Prerequisite(s): BIS 001A; BIS 102; BIS 103; MIC 130A and MIC 130B or BIS 101 recommended. Use of microorganisms for producing substances such as amino acids, peptides, enzymes, antibiotics and organic acids. Emphasis on metabolic regulation of pathways leading to fermentation products, on yeast fermentations, and on genetic manipulations (including recombinant DNA techniques) of industrial microorganisms. Effective: 1997 Winter Quarter.
FST 207—Advanced Sensory-Instrumental Analyses (3)
Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): FST 107; and Consent of Instructor. Basic principles of measurement of color, texture, and flavor of foods by sensory and instrumental methods. Advanced statistical analysis of relation of colorimetry, texturometry, and chemistry of volatile compounds to perception of appearance, texture, flavor. Effective: 1997 Winter Quarter.

FST 210—Proteins: Functional Activities and Interactions (3)
Lecture—3 hours. Prerequisite(s): BIS 103 The relationships of structure of proteins to their biological functions. Structural proteins, complexing proteins, and catalytic proteins in plant and animal materials and products. Effective: 1997 Winter Quarter.

FST 211—Lipids: Chemistry and Nutrition (3)
Lecture—3 hours. Prerequisite(s): BIS 103; CHE 107B; CHE 128B Chemistry of lipids as it pertains to research in food and nutrition. Relations between lipid structure and their physical properties in tissues and foods. Regulation of absorption, transport, and metabolism of lipids. Implications of dietary fats and health. Effective: 1997 Winter Quarter.

FST 213—Flavor Chemistry of Foods and Beverages (3)
Lecture/Discussion—3 hours. Prerequisite(s): CHE 008B; VEN 123; (VEN 123L or FST 103); or Consent of Instructor. Students will become familiar with basic principles of flavor chemistry, analysis, and formation in fresh and processed foods. Students will be required to read and critically evaluate flavor chemistry literature. (Same course as VEN 213.) Effective: 2009 Spring Quarter.

FST 217—Advanced Food Sensory Science (3)
Lecture—3 hours. Prerequisite(s): FST 107 (can be concurrent); or Consent of Instructor. Advanced study of the techniques and theory of the sensory measurement of food as an analytical tool and as a measure of consumer perception and acceptance. Advanced examination of the sensory and cognitive systems associated with the perception of food. Effective: 2010 Fall Quarter.

FST 219—Biochemistry, Microbiology and Technology of Cheeses of the World (4)
Lecture—4 hours. Prerequisite(s): FST 119; (BIS 103 or FST 100A); FST 123; BIS 103; CHE 107B; CHE 128B; or Consent of Instructor. Restricted to graduate level students or senior undergraduate students with appropriate background in biochemistry and microbiology. Compositional and physico-chemical aspects of milk and their implications on cheesemaking; enzymatic, microbiological and physical aspects of cheesemaking; cheese as a biological composite; designing cheese quality attributes; cheese aging. Cheese from all over the world will be tasted and discussed. Effective: 2008 Fall Quarter.

FST 227—Food Perception and the Chemical Senses (2)
Lecture—2 hours. Prerequisite(s): FST 107B (can be concurrent); and Consent of Instructor. Examination of the anatomy and physiology of the chemical senses (taste, smell, and the trigeminal senses) and how they are involved in the perception of food and food intake. Effective: 1997 Winter Quarter.

FST 228—Sustainable Food Systems (3)

FST 230—Food & Gut Microbiota (4)
Discussion—1.5 hours; Lecture—1.5 hours; Term Paper. Prerequisite(s): Microbiology and molecular biology undergraduate coursework or Consent of Instructor. Upper division or graduate standing. Impact of specific food structures on the structure and function of the animal gut microbiota. How food is transformed by, and modulates, the gut microbiota to provide the host with nutrients and protection. Effective: 2017 Spring Quarter.

FST 290—Seminar (1)
Seminar—1 hour. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

FST 290C—Advanced Research Conference (1)
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Graduate standing. Critical presentation and evaluation of original research by graduate students. Planning of research programs and proposals. Discussion led by individual major instructors for their research group. (S/U grading only.) Effective: 1997 Winter Quarter.

FST 291—Advanced Food Science Seminar (1)
Seminar—1 hour. Prerequisite(s): FST 290; Completion of at least one quarter of FST 290. Oral presentation of student's original research, discussion, and critical evaluation. (S/U grading only.) Effective: 1997 Winter Quarter.
**FST 298—Group Study (1-5)**
Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

**FST 299—Research (1-12)**
Variable. Prerequisite(s): Consent of Instructor. Graduate standing. (S/U grading only.) Effective: 1997 Winter Quarter.

**FST 396—Teaching Assistant Training Practicum (1-4)**
Variable. Prerequisite(s): Graduate standing. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

## Food Service Management Minor; Nutrition

### Food Service Management Minor; Nutrition | FSM Minor Information

(College of Agricultural and Environmental Sciences)

Francene M. Steinberg, Ph.D., RD., Chair of the Department
Sheri Zidenberg-Cherr, Ph.D., Vice Chairperson of the Department

**Department Office.** 3135 Meyer Hall; 530-752-4630; [http://nutrition.ucdavis.edu](http://nutrition.ucdavis.edu)

**Faculty.** [http://nutrition.ucdavis.edu/people/faculty/index.html](http://nutrition.ucdavis.edu/people/faculty/index.html)

The Department of Nutrition offers four minor programs open to students majoring in other disciplines who wish to complement their study programs with a concentration in the area of food and nutrition.

**Graduate Study.** Programs of study leading to the M.S. and Ph.D. degrees are available in Nutrition. For information on graduate study contact the [Nutrition Graduate Group](http://nutrition.ucdavis.edu).

**Minor Advisor.** 3202 Meyer Hall; 530-752-2512

---

### Food Service Management

**Preparation.**

Plan in advance to include the required course prerequisites.

- FST 100A Food Chemistry 4
- FST 100B Food Properties 4
- FST 101A Food Chemistry Laboratory 3
- FST 101B Food Properties Laboratory 2
- FSM 120 Principles of Quantity Food Production 4
- FSM 120L Quantity Food Production Laboratory 2
- FSM 122 Food Service Systems Management 3
- ARE 112 Fundamentals of Organization Management 4

**Replacement courses; see note below:**

Note: If the student’s major program requires the same course in biochemistry and physiology, only one of the courses may duplicate credit toward the minor.

Each program below lists replacement courses to fulfill the minimum unit requirement.

- NUT 010 Discoveries and Concepts in Nutrition 3
- NUT 111AY Introduction to Nutrition and Metabolism 3
- NUT 111B Recommendations & Standards for Human Nutrition 2
- NUT 114 Developmental Nutrition 4
- NUT 116A Clinical Nutrition 3
- NUT 116B Clinical Nutrition 3
- NUT 120AN Nutritional Anthropology 4
- NUT 120BN Nutritional Geography 4
- ECN 001A Principles of Microeconomics 4
Courses in NUT:

NUT 010—Discoveries and Concepts in Nutrition (3)
Lecture—3 hours; Project (Term Project). Nutrition as a science; historical development of nutrition concepts; properties of nutrients and foods. Not open for credit to students who have taken an upper division course in nutrition. No credit will be granted to students who have completed NUT 010Y or NUT 010V or an upper-division nutrition course. GE credit: SE, SL. Effective: 2018 Winter Quarter.

NUT 010V—Discoveries and Concepts in Nutrition (3)
Project (Term Project); Web Virtual Lecture—3 hours. Nutrition as a science; historical development of nutrition concepts; properties of nutrients and foods. Not open for credit to students who have taken an upper division course in nutrition. No credit will be granted to students who have completed NUT 010 or NUT 010Y or an upper-division nutrition course. GE credit: SE, SL. Effective: 2018 Winter Quarter.

NUT 010Y—Discoveries and Concepts in Nutrition (3)
Project (Term Project); Web Virtual Lecture—3 hours. Nutrition as a science; historical development of nutrition concepts; properties of nutrients and foods. Not open for credit to students who have taken an upper division course in nutrition. No credit will be granted to students who have completed NUT 010 or NUT 010V or an upper-division nutrition course. GE credit: SE, SL. Effective: 2018 Winter Quarter.

NUT 011—Current Topics and Controversies in Nutrition (2)
Discussion—1.5 hours; Term Paper. Exploration of current applications and controversies in nutrition. Students read scientific journal articles and write summaries, as well as give brief oral presentations. Topics change to reflect current interests and issues. GE credit: OL, SE, WE. Effective: 2010 Winter Quarter.

NUT 099—Individual Study for Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

NUT 104—Environmental & Nutritional Factors in Cellular Regulation and Nutritional Toxicants (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): BIS 101; (BIS 103 or ABI 103) Cellular regulation from nutritional/toxicological perspective. Emphasis: role of biofactors on modulation of signal transduction pathways, role of specific organelles in organization/regulation of metabolic transformations, major cofactor functions, principles of pharmacology/toxicology important to understanding nutrient/toxicant metabolism. (Same course as ETX 104.) GE credit: OL, SE, SL. Effective: 2008 Fall Quarter.

NUT 105—Nutrition and Aging (3)
Lecture—3 hours. Prerequisite(s): (NUT 111AV or NUT 111AY); ABI 103; Or the equivalent course to ABI 103. Role of nutrition in the aging process from both an organismal/cell perspective, including demographics, theories of aging, nutrition and evolution, nutritional manipulation and life-span extension, and nutrition's impact on the diseases of aging. GE credit: SE. Effective: 2017 Spring Quarter.

NUT 106—Food Chemistry for Clinical Nutrition (5) Review all entries
Discussion—1 hour; Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): CHE 008B C or better or CHE 118C C or better or CHE 128C C or better; Concurrent with FST 100A recommended. Only open to Clinical Nutrition majors. Chemical and physical principles that influence functional properties, nutrient content, safety, and sensory aspects of food. Emphasis on the application of these concepts in clinical nutrition. Not open to students who have completed FST 101A and/or FST 101B. (Same course as FST 106.) GE credit: SE, SL, WE. Effective: 2018 Fall Quarter.

NUT 106—Food Chemistry for Clinical Nutrition (5) Review all entries
Discussion—1 hour; Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): CHE 008B C- or better or CHE 118B C- or better or CHE 128B C- or better; Concurrent with FST 100A recommended. Only open to Clinical Nutrition majors. Chemical and physical principles that influence functional properties, nutrient content, safety, and sensory aspects of food. Emphasis on the application of these concepts in clinical nutrition. Not open to students who have completed FST 101A and/or FST 101B. (Same course as FST 106.) GE credit: SE, SL, WE. Effective: 2019 Spring Quarter.

NUT 111AY—Introduction to Nutrition and Metabolism (3)
Lecture/Discussion—1 hour; Web Virtual Lecture—2 hours. Prerequisite(s): CHE 008B; NPB 101; Or the equivalent of 942
NPB 101. Restricted to upper division or graduate level students only. Introduction to metabolism of protein, fat and carbohydrate: the biological role of vitamins and minerals; nutrient requirements during the life cycle; assessment of dietary intake and nutritional status. Not open for credit to students who have completed NUT 101 or NUT 111AV. GE credit: SE. Effective: 2016 Fall Quarter.

NUT 111B—Recommendations and Standards for Human Nutrition (2) Review all entries
Lecture—2 hours. Prerequisite(s): CHE 008B; NPB 101; (NUT 111AV or NUT 111AY); Or the equivalent of NPB 101. Critical analysis of the development of nutritional recommendations for humans. Topics include: history of modern recommendations, development of the Recommended Dietary Allowance (RDA) and other food guides; the Dietary Reference Intakes (DRI); administrative structure of regulatory agencies pertinent to nutrition recommendations; introduction to scientific methods used to determine the recommendations; food labeling laws; nutrition recommendations in other countries and cultures. Not open for credit to students who have completed NUT 111. Effective: 2017 Spring Quarter.

NUT 111B—Recommendations & Standards for Human Nutrition (2) Review all entries
Lecture—2 hours. Prerequisite(s): (CHE 008B or CHE 118B or CHE 128B); NUT 111AY; NPB 101 recommended Critical analysis of the development of nutritional recommendations for humans. Topics include: history of modern recommendations, development of the Recommended Dietary Allowance (RDA) and other food guides; the Dietary Reference Intakes (DRI); administrative structure of regulatory agencies pertinent to nutrition recommendations; introduction to scientific methods used to determine the recommendations; food labeling laws; nutrition recommendations in other countries and cultures. Not open for credit to students who have completed NUT 111. Effective: 2019 Fall Quarter.

NUT 112—Nutritional Assessment (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ((ABI 102, ABI 103) or (BIS 102, BIS 103)); NUT 111AY; (STA 013 or STA 013Y or PLS 120) Restricted to upper division or graduate level Nutrition students only. Methods of human nutritional assessment, including dietary, anthropometric, biochemical methods. Principles of precision, accuracy, and interpretation of results for individuals and populations. GE credit: QL, SE. Effective: 2018 Spring Quarter.

NUT 113—Principles of Epidemiology in Nutrition (4) Review all entries
Lecture/Discussion—4 hours. Prerequisite(s): PLS 120; Or equivalent. Introduction to epidemiology as it relates to the field of nutrition, including study design, principles of epidemiologic inference, criteria for causality, and interpreting measures of disease risk. GE credit: QL, SE. Effective: 2014 Fall Quarter.

NUT 113—Principles of Epidemiology in Nutrition (4) Review all entries
Lecture/Discussion—4 hours. Prerequisite(s): STA 013 or STA 013Y or PLS 120 or STA 100 Introduction to epidemiology as it relates to the field of nutrition, including study design, principles of epidemiologic inference, criteria for causality, and interpreting measures of disease risk. GE credit: QL, SE. Effective: 2018 Fall Quarter.

NUT 114—Developmental Nutrition (4)
Lecture—4 hours. Prerequisite(s): ABI 102; ABI 103; (NUT 111AV or NUT 111AY); NUT 111B Role of nutritional factors in embryonic and postnatal development. GE credit: SE. Effective: 2017 Winter Quarter.

NUT 115—Animal Nutrition (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): CHE 008B or CHE 118B; or Consent of Instructor. Comparative differences among animals in digestion and metabolism of nutrients. Nutrient composition of feeds, digestive systems, digestion, absorption, feeding strategies. GE credit: OL, QL, SE, SL, VL, WE. Effective: 2017 Winter Quarter.

NUT 116A—Clinical Nutrition (3)
Lecture—3 hours. Prerequisite(s): (NUT 111AV or NUT 111AY); NUT 111B; NUT 112; NPB 101; Or the equivalent to NPB 101. Biochemical and physiological bases for therapeutic diets. Problems in planning diets for normal and pathological conditions. GE credit: SE. Effective: 2016 Fall Quarter.

NUT 116AL—Clinical Nutrition Practicum (3)
Discussion—1 hour; Laboratory—3 hours; Lecture—1 hour. Prerequisite(s): NUT 116A (can be concurrent) Fundamental principles of planning and evaluating therapeutic diets and patient education for pathological conditions covered in 116A. GE credit: SE. Effective: 1997 Fall Quarter.

NUT 116B—Clinical Nutrition (3)
Lecture—3 hours. Prerequisite(s): (NUT 111AV or NUT 111AY); NUT 111B; NUT 112; NPB 101; Or the equivalent to NPB 101. Biochemical and physiological bases for therapeutic diets. Problems in planning diets for normal and pathological conditions. GE credit: SE. Effective: 2017 Winter Quarter.
NUT 116BL—Clinical Nutrition Practicum (3)
Discussion—1 hour; Laboratory—3 hours; Lecture—1 hour. Prerequisite(s): NUT 116AL; NUT 116B (can be concurrent)
Fundamental principles of planning and evaluating therapeutic diets and patient education for pathological conditions covered in 116B. Continuation of course 116AL. GE credit: SE. Effective: 2017 Winter Quarter.

NUT 117—Experimental Nutrition (6)
Extensive Writing; Laboratory—6 hours; Lecture—3 hours. Prerequisite(s): (NUT 111AV or NUT 111AY); NUT 112; BIS 102; BIS 103; MCB 120L or other laboratory course in biochemistry is recommended. Methods of assessing nutritional status. Application of chemical, microbiological, chromatographic and enzymatic techniques to current problems in nutrition. GE credit: SE, WE. Effective: 2016 Fall Quarter.

NUT 118—Community Nutrition (4)
Lecture—4 hours. Prerequisite(s): NUT 116A; (NUT 111AV or NUT 111AY); NUT 111B Nutrition problems in contemporary communities and of selected target groups in the United States and in developing countries. Nutrition programs and policy, principles of nutrition education. GE credit: SE, SL. Effective: 2017 Winter Quarter.

NUT 119A—International, community-based nutritional assessment. (1)
Lecture/Discussion—1 hour. Prerequisite(s): NUT 112 (can be concurrent); and Consent of Instructor. Issues and problems related to community-based nutritional assessment in a low-income country, major nutritional problems in low-income countries; ethical issues in human investigation; survey design, data collection techniques, and data analysis; preparation for international travel; cross-cultural communication, health, and safety while living abroad. Effective: 2002 Spring Quarter.

NUT 119B—International, Community-Based Nutritional Assessment (6)
Fieldwork—12 hours; Lecture—2 hours. Prerequisite(s): NUT 119A; and Consent of Instructor. Restricted to upper division students in Clinical Nutrition, Community Nutrition, Dietetics, and Nutrition Science. A six-week summer course in Peru. Implementation of a community-based nutritional assessment survey, including development of the survey instrument, selection. Effective: 2002 Summer Special Session.

NUT 120AN—Nutritional Anthropology (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): NUT 010 and ANT 002 recommended. Nutritional anthropology from historical and contemporary perspectives; the anthropological approach to food and diet; field work methods; case histories that explore food patterns and their nutritional implications. GE credit: SE, SS. Effective: 2017 Spring Quarter.

NUT 120BN—Nutritional Geography (4)
Discussion—1 hour; Lecture—3 hours. Nutritional geography from historical and contemporary perspectives; the geographical approach to food and diet; cultural and environmental factors that influence dietary practices; food-related landscapes and patterns. GE credit: SE, SS. Effective: 2016 Fall Quarter.

NUT 122—Ruminant Nutrition and Digestive Physiology (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): (ABI 103 or BIS 103); BIS 002A; BIS 002B; BIS 002C; (ANS 100 or NPB 101); or Consent of Instructor. MAT 016B recommended. Study of nutrient utilization as influenced by the unique aspects of digestion and fermentation in ruminants, both domestic and wild. Laboratories include comparative anatomy, feed evaluation, digestion kinetics using fistulated cows, computer modeling, and microbial exercises. GE credit: QL, SE. Effective: 2017 Spring Quarter.

NUT 123—Comparative Animal Nutrition (3)
Lecture—3 hours. Prerequisite(s): ABI 103 or BIS 103 Restricted to upper division and graduate level students. Comparative nutrition of animals; including laboratory, companion, zoo, and wild, animals. Digestion and metabolic adaptations required for animal species to consume diverse diets. Relation of nutrition to metabolic adaptations and physiological states, including growth, reproduction, and diseases. GE credit: SE. Effective: 2017 Spring Quarter.

NUT 123L—Comparative Animal Nutrition Laboratory (1)
Laboratory—3 hours. Prerequisite(s): ABI 103 or BIS 103 Laboratory exercises leading to written reports on establishment of nutritional requirements and formulation of complete diets for laboratory, companion, zoo and wild animals. Effective: 2017 Spring Quarter.

NUT 124—Nutrition and Feeding of Finfishes (3)
Lecture—3 hours. Prerequisite(s): BIS 103 or ABI 103 Principles of nutrition and feeding of fishes under commercial situations; implication of fish nutrition to the environment and conservation of endangered species. GE credit: QL, SE, SL. Effective: 2016 Fall Quarter.
NUT 127—Environmental Stress and Development in Marine Organisms (10)
Discussion—2 hours; Laboratory—12 hours; Lecture—4 hours. Prerequisite(s): ETX 101 or BIS 102 or BIS 104; or equivalent course. ETX 114A or NUT 114 recommended. Course taught at Bodega Marine Laboratory. Effects of environmental and nutritional stress, including pollutants, on development and function in embryos and larvae of marine organisms. Emphasis on advanced experimental methods. (Same course as ETX 127.) GE credit: OL, QL, SE, SL, VL, WE. Effective: 2002 Summer Session 1.

NUT 129—Journalistic Practicum in Nutrition (3)
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): (NUT 111AV or NUT 111AY); NUT 111B; or Consent of Instructor. A course in written or oral expression. Critical analysis and discussion of current, controversial issues in nutrition; use of journalistic techniques to interpret scientific findings for the lay public. Students required to write several articles for campus media. May be repeated up to 1 time(s). GE credit: OL, SE, SL, WE. Effective: 2017 Spring Quarter.

NUT 130—Experiments in Nutrition: Design and Execution (2)
Laboratory—6 hours. Prerequisite(s): Consent of Instructor. NUT 111AV, NUT 111AY, NUT 111B or NUT 114 recommended. Experiments in current nutritional problems. Experimental design: students choose project and, independently or in groups of two-three, design a protocol, complete the project, and report findings. May be repeated for credit up to six times (three times per instructor) with consent of instructor. May be repeated up to 6 time(s) three times per instructor with consent of instructor. GE credit: SE. Effective: 2016 Fall Quarter.

NUT 141—Comparative Animal Nutrition and Metabolism (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ABI 103; (NUT 115 or NUT 116A or NUT 116B); or Consent of Instructor. Foundational principles of nutrition, nutrient composition of feed ingredients, digestive systems of domestic and exotic animals, nutrient digestibility and absorption, nutrient metabolism. GE credit: SE, SL, WE. Effective: 2018 Fall Quarter.

NUT 190—Proseminar in Nutrition (1)
Seminar—1 hour. Prerequisite(s): (NUT 111AV or NUT 111AY); NUT 111B Restricted to senior standing. Discussion of human nutrition problems. Each term will involve a different emphasis among experimental, clinical, and dietetic problems of community, national and international scope. May be repeated twice for credit with consent of instructor. May be repeated up to 2 time(s). GE credit: OL, SE, VL. Effective: 1997 Winter Quarter.

NUT 190C—Nutrition Research Conference (1)
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Upper division standing in Nutrition or related biological science. Introduction to research findings and methods in nutrition. Presentation and discussion of research by faculty and students. May be repeated for credit. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

NUT 192—Internship (1-12)
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. One upper division course in nutrition. Work experience on or off campus in practical application of nutrition, supervised by a faculty member. (P/NP grading only.) Effective: 1997 Winter Quarter.

NUT 197T—Tutoring in Nutrition (1-2)
Discussion/Laboratory—3-6 hours. Prerequisite(s): Consent of Instructor. Nutrition Science, Clinical Nutrition or related major. Tutoring of students in nutrition courses, assistance with discussion groups or laboratory sections, weekly conference with instructor in charge of course: written evaluations. May be repeated if tutoring a different course. May be repeated for credit. (P/NP grading only.) Effective: 2016 Fall Quarter.

NUT 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

NUT 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

NUT 219A—International Nutrition (3)
Lecture—3 hours. Prerequisite(s): NUT 111AV; NUT 111AY; Graduate Standing; undergraduates only admitted with consent of instructor. Epidemiology, etiology, and consequences of undernutrition, with particular focus on the nutritional problems of children and women in low income populations. Effective: 2018 Spring Quarter.

NUT 219B—International Nutrition (3)
Lecture—3 hours. Prerequisite(s): NUT 219A Intervention programs to prevent or ameliorate nutritional problems in
low-income populations. Planning, implementing, and evaluating nutrition intervention programs. Effective: 2004 Fall Quarter.

**NUT 230—Experiments in Nutrition: Design and Execution (2)**
Laboratory—6 hours. Prerequisite(s): Consent of Instructor. NUT 201, NUT 202, NUT 203, NUT 204, or the equivalent recommended. Student selected projects to enhance laboratory skills. Independently, or in groups of two-three students, design a protocol, carry out the project, analyze the results and report the findings. May be repeated up to 6 time(s) with consent of instructor (limit of three times per instructor). Effective: 1999 Fall Quarter.

**NUT 250—Metabolic Homeostasis (3)**
Discussion—1.5 hours; Lecture—2 hours. Prerequisite(s): Passing the Nutrition Graduate Group Preliminary Examination or consent of instructor. Preference given to students in advanced standing in the Nutrition Graduate Group. Regulatory mechanisms of carbohydrate, lipid, and protein homeostasis; mechanisms of metabolic enzyme regulation and of the metabolic hormones; homeostatic mechanisms and interactions; fuel-fuel interactions; nutrition-energy balance. Effective: 2001 Spring Quarter.

**NUT 251—Nutrition and Immunity (2)**
Lecture/Discussion—2 hours. Prerequisite(s): PMI 126; ABI 102; MMI 107; Or the equivalent to MMI 107. Cellular and molecular mechanisms underlying interactions of nutrition and immune function, including modulation of immunocompetence by diet and effects of immune responses on nutritional needs. Lectures and discussion explore implications for resistance to infection, autoimmunity and cancer. Effective: 2000 Winter Quarter.

**NUT 252—Nutrition and Development (3)**
Lecture—3 hours. Prerequisite(s): NUB 210A, NUB 210B, and NUB 210C recommended. Relationship of nutrition to prenatal and early postnatal development. Effective: 2018 Spring Quarter.

**NUT 253—Control of Energy Balance and Body Weight (3)**
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): Consent of Instructor. Comprehensive study of the biochemical, nutritional and physiological mechanisms controlling food intake, body composition and energy expenditure. Subject matter will be approached through lectures and discussions where students and staff will critically evaluate the literature. Effective: 2016 Spring Quarter.

**NUT 254—Applications of Systems Analysis in Nutrition (3)**
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): NUT 202; Or the equivalent. Quantitative aspects of digestion and metabolism; principles of systems analysis. Evolution of models of energy metabolism as applied in current feeding systems. Critical evaluations of mechanistic models used analytically in support of nutritional research. Effective: 1997 Winter Quarter.

**NUT 255—Field Research Methods in International Nutrition (3)**
Lecture/Discussion—3 hours. Prerequisite(s): Graduate standing or consent of instructor. Issues and problems related to implementation of nutrition field research in less-developed countries, including ethics; relationships with local governments, communities, and scientists; data collection techniques and quality assurance; field logistics; research budgets; and other administrative and personal issues. Effective: 1997 Winter Quarter.

**NUT 256—Nutrition and Aging (2)**
Lecture—2 hours. Prerequisite(s): NUT 201; NUT 202; NUT 203; NUT 204; Three courses. Interaction between nutrition and aging. Topics include physiological/biochemical basis of aging, age-related changes affecting nutritional requirements, nutrition and mortality rate, assessment of nutritional status in the elderly, and relationship between developmental nutrition and the rate of aging. Effective: 1997 Fall Quarter.

**NUT 270—Scientific Ethics in Biomedical Studies: Emphasis on Nutrition (3)**
Discussion—1 hour; Lecture—1 hour; Term Paper. Restricted to graduate standing or consent of instructor. Scientific ethics in biomedical studies, especially nutrition. Discussion and case study presentations on scientific integrity, fraud, misconduct, conflict of interest, human and animal research protections. Not open for credit to students who have completed NUT 492B. Effective: 2003 Spring Quarter.

**NUT 290—Beginning Nutrition Seminar (2)**
Lecture/Discussion—1 hour; Seminar—1 hour. Prerequisite(s): First-year graduate standing. Discussion and critical evaluation of topics in nutrition with emphasis on literature review and evaluation in this field. Students give oral presentations on relevant topics. Effective: 1997 Fall Quarter.
discussions with their graduate students. Research papers are reviewed and project proposals presented and evaluated. Format will combine seminar and discussion style. (S/U grading only.) Effective: 1997 Winter Quarter.

**NUT 291—Advanced Nutrition Seminar (1)**
Seminar—1 hour. Prerequisite(s): Second-year graduate standing. Advanced topics in nutrition research. Multiple sections may be taken concurrently for credit. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

**NUT 293A—Current Topics in Obesity, Food Intake and Energy Balance (3)**
Discussion—1 hour; Lecture—1 hour; Seminar—1 hour. Prerequisite(s): NUT 129; Or graduate standing; Undergraduates with upper division standing with at least one writing course may enroll with consent of instructor. Current research and its evaluation. Principles of experimental design and scientific background for given article. Articles summarized for posting on Internet for use by healthcare professionals. May be repeated for credit with consent of instructor. May be repeated for credit. Effective: 1997 Fall Quarter.

**NUT 293B—Current Topics in Obesity, Food Intake, and Energy Balance with Special Topics (3)**
Discussion—1 hour; Lecture—1 hour; Seminar—1 hour. Prerequisite(s): NUT 129; Graduate standing. Undergraduates with upper division standing with at least one writing course may enroll with consent of instructor. A continuation of course 293A, with additional special topics. May be repeated for credit up to 3 times with consent of instructor. May be repeated up to 3 time(s). Effective: 1997 Fall Quarter.

**NUT 294A—Current Topics in Developmental Nutrition (2)**
Seminar—2 hours. Prerequisite(s): NUT 114 or NUT 252; or Consent of Instructor. Restricted to graduate standing or consent of instructor. Effects of nutrition on embryology, morphogenesis, and developmental mechanisms. May be repeated for credit when topic differs. Effective: 2004 Winter Quarter.

**NUT 297T—Supervised Teaching in Nutrition (1-3)**
Variable. Prerequisite(s): Graduate standing or consent of instructor. Practical experience in teaching nutrition at the university level; curriculum design and evaluation; preparation and presentation of material. Assistance in laboratories, discussion sections, and evaluation of student work. (S/U grading only.) Effective: 1997 Winter Quarter.

**NUT 298—Group Study (1-5)**
Variable. Prerequisite(s): Consent of Instructor. Effective: 1997 Winter Quarter.

**NUT 299—Research (1-12)**
Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

**NUT 492A—Professionalism: An Academic Perspective (2)**
Lecture/Discussion—2 hours. Prerequisite(s): Graduate standing. For graduate students in their initial quarter of residence. Professionalism topics are presented and examples drawn from both the biological and social sciences. Effective: 1997 Fall Quarter.

**NUT 492C—Grant Writing (3)**
Discussion—1.5 hours; Lecture—1.5 hours. Prerequisite(s): Graduate standing in Nutrition or consent of instructor. Preparation of grants for governmental agencies (particularly NIH and USDA) and private foundations. Students will write a research grant or fellowship application. May be repeated once for credit with consent of instructor. May be repeated up to 1 time(s). Effective: 1997 Fall Quarter.

**Food Service Management; Nutrition**

**Food Service Management; Nutrition | Food Service Management Information**
(College of Agricultural and Environmental Sciences)

**Faculty.** [http://nutrition.ucdavis.edu/people/faculty/](http://nutrition.ucdavis.edu/people/faculty/)

**The Major Program and Graduate Study.** Food Service Management is incorporated within the major of Clinical Nutrition. If you are interested in preparing for a career in commercial organizations such as hotels, restaurants, industrial cafeterias, or contract food services, as well as in public or private institutions such as hospitals, correctional institutions, schools, or colleges, consult the Department of Nutrition.

**Related Courses.** See Nutrition.

**Food Service Management; Nutrition | FSM Courses**
Questions pertaining to the following courses should be directed to the instructor or to the Nutrition Department Advising office in 3202 Meyer Hall; 530-752-2512.

Courses in FSM:

**FSM 120—Principles of Quantity Food Production (4)** Review all entries
Independent Study—1 hour; Lecture—3 hours. Prerequisite(s): FST 100B; FST 101B Restricted to upper division Clinical Nutrition students only. Fundamental principles of food service management, including quantity food preparation, institutional equipment, receiving and storage, service, menu planning, merchandising, and safety. Students will earn food safety certification. Effective: 2008 Spring Quarter.

**FSM 120—Principles of Quantity Food Production (4)** Review all entries
Independent Study—1 hour; Lecture—3 hours. Prerequisite(s): FST 100B; (FST 101B or NUT 106) Restricted to upper division Clinical Nutrition students only. Fundamental principles of food service management, including quantity food preparation, institutional equipment, receiving and storage, service, menu planning, merchandising, and safety. Students earn food safety certification. Effective: 2019 Fall Quarter.

**FSM 120L—Quantity Food Production Laboratory (2)**
Laboratory—6 hours. Prerequisite(s): FSM 120 Laboratory experience in quantity food production and service. Effective: 1997 Winter Quarter.

**FSM 122—Food Service Systems Management (3)**
Lecture—3 hours. Prerequisite(s): ARE 112; FSM 120 Principles of quantity food production management: production schedules, portion control, financial management, layout and equipment planning, evaluation of alternative systems, and computer applications. Effective: 2017 Winter Quarter.

**FSM 192—Internship (1-12)**
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. One upper division course in Food Service Management. Work experience on or off campus in practical aspects of food service management, supervised by a faculty member. (P/NP grading only.) Effective: 1997 Winter Quarter.

**FSM 197T—Tutoring in Food Service Management (1-2)**
Discussion/Laboratory—3-6 hours. Prerequisite(s): Dietetics or related major; completion of the Food Service Management course in which tutoring is done. Tutoring of students in food service management, assistance with discussion groups or laboratory sections; weekly conference with instructor in charge of course; written evaluations. May be repeated if tutoring a different course. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

**FSM 198—Directed Group Study (1-5)**
Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

**FSM 199—Special Study for Advanced Undergraduates (1-5)**
Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

**Forensic Entomology Minor; Entomology & Nematology**

**Forensic Entomology Minor; Entomology & Nematology | Forensic Entomology Minor**

Formerly the departments of Entomology and Nematology

Forensic Science (Graduate Group)

Forensic Science (Graduate Group) | Forensic Science M.S.

Kent Pinkerton, Ph.D., Chairperson of the Group

Group Office. 1909 Galileo Ct., Suite B; Davis, CA 95618; 530-747-3922; http://forensicscience.ucdavis.edu

Faculty. http://forensicscience.ucdavis.edu/administration/

Graduate Study. The Forensic Science Graduate Group offers the degree of MS in Forensic Science. This program, offering a Plan I-Thesis option, has two tracks, DNA or Criminalistics, enabling the student to take core courses emphasizing the physical or biological sciences. Each track requires the student to take eight to nine core courses, totaling 24-27 units, three units of seminar, and the appropriate number of elective/research units for a total of 54 units. Students can take courses outside their specializations, but they must complete the courses required for their own track. The FOR seminar course in the fall quarter is required for new students. The FOR spring seminar can be taken in any spring quarter before graduation. Students must also take one additional seminar course in another department or program.

Preparation. Appropriate preparation is an undergraduate degree in physical or natural sciences, engineering or a closely related field with a GPA of 3.000 or higher. Examples include Biochemistry, Chemistry, Molecular Biology, Biology, Genetics, and Engineering. Applicants must have completed at least one year each of general chemistry, organic chemistry, general physics, math through calculus and a class in statistics. Other recommended courses include general biology, biochemistry and genetics.

Graduate Advisors. Ruth Dickover (Forensic Science), You-Lo Hsieh (Division of Textiles and Clothing), Robert B. Kimsey (Entomology), Donald Land (Chemistry), Terence Murphy (Plant Biology), Ben Sacks (Population Health & Reproduction/Canid Diversity and Conservation Laboratory-Center for Veterinary Genetics), Bahram Ravani (Mechanical & Aeronautical Engineering), Moshe Rosenberg (Food Science and Technology), Matt Wood (Environmental Toxicology)

Forensic Science (Graduate Group) | FOR Courses

Courses in FOR:

FOR 200—Fundamental Concepts in Forensic Science (3)
Fieldwork—0.25 hours; Lecture—2 hours; Lecture/Lab—0.25 hours; Seminar—0.5 hours. Restricted to students enrolled in the M.S. in Forensic Science Program. Overview of Forensic Science. Problem definition, strategies for problem solving, analytical tools, and professional and ethical considerations. Effective: 2003 Winter Quarter.

FOR 201A—Forensic Science Fundamentals-A (3)
Lecture—3 hours. Prerequisite(s): Consent of Instructor. Enrolled in the Forensic Science Graduate Program. Open to Forensic Science Graduate Program students only. Professional responsibilities and ethics, physical evidence concepts, drug chemistry and toxicology, controlled substances and analytical chemistry and instrumentation as practiced in the forensic sciences. First of three courses that, in part, covers the curriculum requirements of the Forensic Education Program Accreditation Committee (FEPAC). Effective: 2018 Spring Quarter.
FOR 201B—Forensic Science Fundamentals-B (3)
Lecture—3 hours. Prerequisite(s): Consent of Instructor. Enrolled in the Forensic Science Graduate Program. Open to Forensic Science Graduate Program students only. Forensic biology and DNA, microscopy and materials analysis and pattern evidence as practiced in the forensic sciences. Second in a series of three courses which covers the curriculum requirements of the Forensic Education Program Accreditation Committee (FEPAC). Effective: 2018 Spring Quarter.

FOR 201C—Forensic Science Fundamentals-C (3)
Lecture—3 hours. Prerequisite(s): Consent of Instructor. Enrolled in the Forensic Science Graduate Program. Arson and explosives, quality assurance and accreditation, the law and science interface and court testimony as practiced in the forensic sciences. This course is the third in a series of three courses that covers the curriculum requirements of the Forensic Education Program Accreditation Committee (FEPAC). Effective: 2018 Spring Quarter.

FOR 205—Microscopy and Microanalytical Methods in Forensic Science (3)
Laboratory—1 hour; Lecture—2 hours. Prerequisite(s): Consent of Instructor. Restricted to students enrolled in the M.S. in Forensic Science Program; a minimum, year each of the following chemistry, organic chemistry, calculus, & physics. Introduction to optical and electron microscopy. Transmission, diffraction, reflection and absorption; polarized light and polarizing crystals; phase contrast. Radiography; image recording, SEM analysis of gunshot residues, paints, glass. EDS, XRF analysis, signal-to-noise ratios, minimum detectable levels and homogeneity. Effective: 2006 Spring Quarter.

FOR 207—Advanced Spectroscopy Methods in Forensic Science (3)
Lecture—3 hours. Restricted to Forensic Science Graduate program or consent of instructor. Discuss, evaluate and interpret advanced molecular spectra/structure, Infrared Spectroscopy, such as chemical applications of spectroscopic methods, vibrational, rotational spectra; electronic spectra, photoelectron spectroscopy generated by various analytical instruments used in forensic science community. Effective: 2014 Fall Quarter.

FOR 208—Forensic Toxicology (3)
Lecture—3 hours. Forensic toxicology as related to driving under the influence of drugs (DUID) investigations, detection, and evaluation through the use of standardized field sobriety tests and drug recognition protocols. Effective: 2018 Spring Semester.

FOR 209—Forensic Alcohol (3)
Lecture—3 hours. Prerequisite(s): FOR 220 (can be concurrent); and Consent of Instructor. Analytical methods used in the determination and quantitation of ethanol in biological matrices commonly encountered in cases involving operating a motor vehicle. Effective: 2018 Fall Quarter.

FOR 210—Personal Identification Methods In Forensic Science (3)
Lecture—3 hours. Restricted to students enrolled in the M.S. in Forensic Science Program or by consent of instructor. Methods for identifying individuals from evidence collected at crime scenes, suspects or victims, crime scene examination and analytical methods used to support such investigations. Topics include forensic anthropology and odontology; latent prints; shoe prints; facial reconstruction/recognition; eyewitness identifications; biometric systems. Effective: 2003 Spring Quarter.

FOR 212—Scientific Evidence and Courtroom Testimony (3)
Discussion—1 hour; Lecture—2 hours. Restricted to graduate students enrolled in the MS Forensic Science program or by the consent of the instructor. Explores the relationship between science and the criminal justice system. Admissibility of scientific testimony and documentary proof during the trial, concepts of relevancy, hearsay and opinion rule, examination of expert witnesses, impact of Kelley-Fry and Daubert decisions & court testimony. Effective: 2007 Fall Quarter.

FOR 215—Forensic Fire and Arson Investigation (3)
Lecture—3 hours. Restricted to students enrolled in the M.S. Forensic Science Program or by consent of the Forensic Science Program Director Principles and techniques of scientific investigation of fires and related crimes; offer peer-reviewed protocols for processing fire and explosion scenes; discuss recognition, collection, analysis of physical evidence, and describe the scientific method for decision-making in fire/arson investigation. Effective: 2007 Fall Quarter.

FOR 218—Technical Writing in Forensic Science (3)
Extensive Writing/Discussion—1 hour; Lecture—2 hours. Prerequisite(s): Consent of the instructor required for all students not enrolled in the Forensic Science program. Restricted to graduate standing in the Forensic Science
program. How to write clear, credible forensic science reports and scientific articles, that (a) serve the ends of the justice system, (b) meet their readers’ varying needs and (c) reflect well on the author. Effective: 2011 Fall Quarter.

FOR 220—Analysis of Toxicants (3)
Lecture—3 hours. Prerequisite(s): Coursework in organic chemistry. Principles of microanalysis of toxicants. Theoretical considerations regarding separation, detection and quantitative determination of toxicants using chemical and instrumental techniques. (Same course as ETX 220.) Effective: 2006 Winter Quarter.

FOR 221L—Forensic Science Analytical Instrumentation (2)
Discussion/Laboratory—1 hour; Laboratory—3 hours. Enrollment limited to students accepted in the Forensic Science Graduate program or subject to the approval of the instructor if the student has the appropriate chemistry, calculus and physics courses required of students in the graduate forensic science program. Methodology and instruments used for the analysis of substances of interest in the discipline of Forensic Science. Practical experience with modern instrumental techniques & methodologies used in the advanced forensic science laboratory. Effective: 2007 Fall Quarter.

FOR 240—Homicide Crime Scene Investigation (3)
Laboratory—3 hours; Lecture—2 hours. Restricted to Forensic Science Masters Program Students; enrollment is limited to 15 students per class. Processing and evaluating complex homicide scenes. Functions and activities of police agencies. Recognition, documentation, identification, and collection of evidence. Event sequence reconstruction. Evidence collection, preservation, report writing. Courtroom presentation. Effective: 2004 Winter Quarter.

FOR 263—Forensic Computer Science Investigations (3)
Lecture—3 hours. Prerequisite(s): Consent of Instructor. Graduate student. Restricted to students in the Forensic Science Graduate program unless approved by instructor. Discuss the threats to the security of any kind of evidence that is captured, transmitted, or stored digitally and develop critical thinking and basic knowledge of computer forensic science issues in the evaluation of digital evidence. Effective: 2013 Fall Quarter.

FOR 268—Statistics in Forensic Science (3)
Lecture—3 hours. Restricted to students enrolled in the M.S. in Forensic Science Program or by consent of forensic program director. Statistics that are used by the forensic scientist, their limitations/applications in presenting evidential results in such areas as DNA-STR results, trace evidence correlation, fingerprint statistics, population sampling and the Bayes method. Effective: 2006 Spring Quarter.

FOR 276—Population Genetics (3)
Lecture—3 hours. Prerequisite(s): FOR 280; FOR 281; or Consent of Instructor. Open only to majors in Forensic Science Program unless by consent of the Chair Forensic Science Graduate group. Principles, theories, and models of population genetics as they apply to forensic science. Effective: 2018 Fall Quarter.

FOR 277—Forensic Genetics; Next Generation Techniques and Applications (3)
Lecture—3 hours. Prerequisite(s): Undergraduate courses in fundamental and applied principles of: genetics, biochemistry, and molecular biology, or consent of instructor. Restricted to Forensic Science Graduate students (GFOR) or consent of instructor. Review organization/function of the human genome, recent developments, next generation sequencing techniques including the preparation of DNA samples, principles of the new generation sequencing assay formats and biochemical reactions. Will include quality control parameter, and bioinformatic approaches. Effective: 2013 Fall Quarter.

FOR 278—Molecular Techniques (3)
Lecture—3 hours. Prerequisite(s): Graduate standing or consent of instructor. Recombinant DNA technology and its applications. (Same course as ETX 278.) Effective: 2002 Spring Quarter.

FOR 280—Forensic DNA Analysis (3)
Lecture—3 hours. Prerequisite(s): Coursework in genetics and molecular biology. Graduate standing; consent of instructor required for all students not enrolled in the MS Forensics program. Foundation in theory and practice of forensic DNA analysis; past, present, and emerging technologies; legal and quality assurance issues. DNA extraction, DNA quantitation, multiplex amplification of STR loci, capillary electrophoresis of amplified products, and analysis of STR typing data. (Same course as ETX 280.) Effective: 2003 Spring Quarter.

FOR 281—Principles and Practice of Forensic Serology and DNA Analysis (3)
Discussion/Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): (FOR 278 or ETX 278) or (FOR 280 or ETX 280); and Consent of Instructor. Or equivalent of FOR 280/ETX 280. Restricted to students enrolled in the M.S. in Forensic Science Program or by consent of Forensic Science Program Director. Comprehensive overview of
forensic serology and DNA typing techniques and technologies. Strong emphasis on real-world applications, including preservation and tracking of biological evidence, detection and identification of bodily fluids, and methods to extract, quantify, and type human DNA. (Same course as ETX 281.) Effective: 2011 Spring Quarter.

FOR 283—Forensic Biology (3)
Discussion—1 hour; Lecture—2 hours. Restricted to students enrolled in the M.S. in Forensic Science program or by consent of the Forensic Science Program Director. Overview to the foundational concepts in forensic biology: chemistry and molecular biology of biological evidence, genetic basis of biological uniqueness, evolutionary basis of species differences, patterns and dynamics of evidence deterioration, and the legal/professional considerations associated with biological evidence. Effective: 2009 Fall Quarter.

FOR 284—Non-Human Forensic DNA--Theory and Casework Application (2)
Lecture—2 hours. Prerequisite(s): Consent of instructor required for all students not enrolled in the MS Forensics program; upper division Molecular Biology and Genetics or its equivalent. Restricted to graduate standing. Provides a comprehensive understanding of plant and animal forensic biology in terms of sample collection, preservation, analytical methods, and of the invaluable lines of inquiry these forensic evidence may permit. (Same course as ETX 284.) Effective: 2010 Fall Quarter.

FOR 289—Survey in Forensic Science (3)
Lecture—3 hours. Restricted to students enrolled in the M.S. in Forensic Science Program. Analytical methods in contemporary forensic science. Clandestine laboratories in California, crime scene management, examination and analysis of human hair, forensic ballistics/trajectory reconstruction, shoe/tire print impressions, serial number restoration, forensic aspects of alcohol impairment, bloodstain pattern interpretation, microscopy of building materials, biological aspect of forensic science. May be repeated for credit when topics differ. Effective: 2002 Fall Quarter.

FOR 290—Seminar in Forensic Science (1)
Seminar—3 hours. Restricted to students enrolled in the M.S. in Forensic Science Program. Students will be exposed to topical areas in Forensic Science by presentations conducted by expert guest speakers. The seminar will also serve as a medium whereby the exiting students will present the research conducted as part of their thesis requirement. May be repeated for credit when topic differs. (S/U grading only.) Effective: 2006 Spring Quarter.

FOR 290C—Graduate Research Conference in Forensic Science (1)
Independent Study—1 hour. Restricted to students enrolled in the M.S. in Forensic Science Program. Individual and/or group conference on problems, progress and techniques in forensic science and research. May be repeated for credit when topic differs. (S/U grading only.) Effective: 2003 Winter Quarter.

FOR 293—Forensic Science Research Methodology (2)
Extensive Writing/Discussion—0.5 hours; Lecture—1.5 hours. Restricted to students enrolled in the Graduate Forensic Science program or by consent of the instructor. Introduction to identification, formulation, and solution of meaningful scientific problems encountered in the Forensic Science area including experimental design and/or theoretical analysis of new and prevailing techniques, theories and hypotheses. Students will present and defend their thesis research/journal article proposals. (S/U grading only.) Effective: 2007 Fall Quarter.

FOR 298—Group Study in Forensic Science (1-5)
Independent Study—1-5 hours. Restricted to students enrolled in the M.S. in Forensic Science Program. May be repeated for credit when topic differs. (P/NP grading only.) Effective: 2002 Fall Quarter.

FOR 299—Research in Forensic Science (1-12)
Independent Study—1-12 hours. Prerequisite(s): Consent of Instructor. Restricted to students enrolled in the M.S. in Forensic Science Program. May be repeated for credit. (P/NP grading only.) Effective: 2002 Fall Quarter.

The Major Program
The major program assures proficiency in all four language skills—speaking, listening, reading, and writing—and acquaints students with the intellectual and cultural contributions of the French-speaking world through the study of its literatures, traditions, and institutions.

The Program. The department encourages its students to work closely with the academic advisor in designing a major tailored to their needs and interests within the broad requirements prescribed by the program and to avail themselves of the guidance of an excellent teaching faculty. Each year, a substantial number of students with good preparation in French participate in the university’s very popular Education Abroad Program, which maintains centers in Bordeaux, Lyon, and Paris.

Career Alternatives. Foreign language teachers, a cardiologist, a veterinarian, a naval commander at the Pentagon, a professor of Political Science, lawyers, sales representatives, journalists, a speech pathologist, a law professor, translators, a senior applications programmer, travel agents, independent business owners, a senior museum curator, nurses, financial managers, stock brokers, and an industrial attaché for a French trade commission—all graduated with an A.B. in French from UC Davis. These represent only a small fraction of the career choices documented in a survey of department graduates.

Major Advisor. T. Warner

Honors Program. Candidates for high or highest honors in French must write a senior thesis under the direction of a faculty member. For this purpose, honors candidates must enroll in FRE 194H (4 units) and FRE 195H (4 units). Normally, a student will undertake the honors project during the first two quarters of the senior year; other arrangements must be authorized by the department chair. Only students who, at the end of the junior year (135 units), have attained a cumulative grade-point average of 3.500 in courses required for the major will be eligible for the honors program. The requirements for earning high and highest honors in French are in addition to the regular requirements for the major in French.

Education Abroad Program. The department of French and Italian encourages students to study abroad in the Education Abroad Program. With the approval of a major advisor, applicable courses taken abroad may be accepted in the major or minor programs.

Graduate Study. The department offers programs of study and research leading to the M.A. and Ph.D. degrees in French. Candidates for the Ph.D. have the option of enriching their degree program by preparing a designated emphasis in African American and African Studies, Classics and Classical Receptions, Critical Theory, Feminist Theory and Research, Second Language Acquisition, or Studies in Performance and Practice. Detailed information may be obtained from the graduate advisor or the department chairperson.

Graduate Advisor. C. Goldstein

Prerequisite Credit. Credit will not normally be given for a course if it is the prerequisite of a course already successfully completed. Exceptions can be made by the department chairperson only.

(College of Letters and Science)
Noah Guynn, Ph.D., Chairperson of the Department

Department Office. 213 Sproul Hall; 530-752-1219; http://french.ucdavis.edu

Faculty. http://frenchanditalian.ucdavis.edu/people-french

The Minor Program

The minor program develops proficiency in all four language skills—speaking, listening, reading, and writing—and acquaints students with the intellectual and cultural contributions of the French-speaking world through the study of its literature, traditions, and institutions.

The Program. The department encourages its students to work closely with the academic advisor in designing a minor tailored to their needs and interests within the broad requirements prescribed by the program and to avail themselves of the guidance of an excellent teaching faculty.

Minor Advisor. T. Warner

Education Abroad Program. With the approval of a minor advisor, applicable courses taken abroad may be accepted in the minor programs.

Prerequisite Credit. Credit will not normally be given for a course if it is the prerequisite of a course already successfully completed. Exceptions can be made by the department chairperson only.

French | FRE Courses

Courses in FRE:

FRE 001—Elementary French (5) Review all entries
Discussion—5 hours; Laboratory—1 hour. Introduction to French grammar and development of all language skills in a cultural context with special emphasis on communication. Not open for credit to students who have taken FRE 001A; students who have successfully completed FRE 002 or FRE 003 in the 10th or higher grade in high school may receive unit credit for this course on a P/NP grading basis only, although a passing grade will be charged to the student's P/NP option, no petition is required; all other students will receive a letter grade unless a P/NP petition is filed. GE credit: AH, WC. Effective: 2014 Winter Quarter.

FRE 001—Elementary French (5) Review all entries
Discussion—5 hours; Laboratory—1 hour. Introduction to French grammar and development of all language skills in a cultural context with special emphasis on communication. Not open for credit to students who have taken FRE 001A; students who have successfully completed French 2 or 3 in the 10th or higher grade in high school or who have successfully completed two or more years of high school in a French-speaking country or in a French-language high school may receive unit credit for this course on a P/NP grading basis only, although a passing grade will be charged to the student's P/NP option, no petition is required; all other students will receive a letter grade unless a P/NP petition is filed. GE credit: AH, WC. Effective: 2019 Spring Quarter.

FRE 001A—Accelerated Intensive Elementary French (15)
Lecture/Discussion—15 hours. Prerequisite(s): Placement exam required. Introduction to French grammar and development of all language skills in a cultural context with special emphasis on communication. Special 12-week, accelerated, intensive summer session course that combines the work of courses 1, 2, and 3. Not open for credit to students who have completed FRE 001, FRE 001S, FRE 002, FRE 002S, FRE 003, or FRE 003S. GE credit: AH, WC. Effective: 2014 Winter Quarter.

FRE 001S—Elementary French (5) Review all entries
Discussion—5 hours; Laboratory—1 hour. Introduction to French grammar and development of all language skills in a cultural context with special emphasis on communication. Course is taught abroad. Students who have successfully completed FRE 002 or 003 in the 10th or higher grade in high school may receive unit credit for this course on a P/NP grading basis only, although a passing grade will be charged to the student's P/NP option, no petition is required; all other students will receive a letter grade unless a P/NP petition is filed; not open for credit to students who have completed FRE 001 or FRE 001A. GE credit: AH, WC. Effective: 2013 Fall Quarter.

FRE 001S—Elementary French (5) Review all entries Discontinued
Discussion—5 hours; Laboratory—1 hour. Introduction to French grammar and development of all language skills in a cultural context with special emphasis on communication. Course is taught abroad. Students who have successfully completed FRE 002 or 003 in the 10th or higher grade in high school may receive unit credit for this course on a P/NP grading basis only, although a passing grade will be charged to the student's P/NP option, no petition is required; all other students will receive a letter grade unless a P/NP petition is filed; not open for credit to students who have completed FRE 001 or FRE 001A. GE credit: AH, WC. Effective: 2019 Spring Quarter.

FRE 002—Elementary French (5) Review all entries
Discussion—5 hours; Laboratory—1 hour. Prerequisite(s): FRE 001 Continuation of course 1. Not open for credit to students who have taken FRE 001A. GE credit: AH, WC. Effective: 2014 Winter Quarter.

FRE 002—Elementary French (5) Review all entries
Discussion—5 hours; Laboratory—1 hour. Prerequisite(s): FRE 001 Continuation of FRE 001. Not open for credit to students who have taken FRE 001A; students who have successfully completed two or more years of high school in a French-speaking country or in a French language high school may receive unit credit for this course on a P/NP grading basis only. GE credit: AH, WC. Effective: 2019 Spring Quarter.

FRE 002S—Elementary French (5) Review all entries
Discussion—5 hours; Laboratory—1 hour. Prerequisite(s): FRE 001 or FRE 001S Continuation of course 1. Course is taught abroad. Not open for credit to students who have completed FRE 001A or FRE 002. GE credit: AH, WC. Effective: 2013 Fall Quarter.

FRE 002S—Elementary French (5) Review all entries Discontinued
Discussion—5 hours; Laboratory—1 hour. Prerequisite(s): FRE 001 or FRE 001S Continuation of course 1. Course is
taught abroad. Not open for credit to students who have completed FRE 001A or FRE 002. GE credit: AH, WC. Effective: 2019 Spring Quarter.

FRE 003—Elementary French (5) Review all entries
Discussion—5 hours; Laboratory—1 hour. Prerequisite(s): FRE 002 Continuation of course 2. Not open for credit to students who have taken FRE 001A. GE credit: AH, WC. Effective: 2014 Winter Quarter.

FRE 003—Elementary French (5) Review all entries
Discussion—5 hours; Laboratory—1 hour. Prerequisite(s): FRE 002 Continuation of course 2. Not open for credit to students who have completed two or more years of high school in a French-speaking country or in a French-language high school may receive unit credit for this course on a P/NP grading basis only. GE credit: AH, WC. Effective: 2019 Spring Quarter.

FRE 003S—Elementary French (5) Review all entries
Discussion—5 hours; Laboratory—1 hour. Prerequisite(s): FRE 002 or FRE 002S Continuation of course 2. Course is taught abroad. Not open for credit to students who have completed FRE 001A or FRE 003. GE credit: AH, WC. Effective: 2013 Fall Quarter.

FRE 003S—Elementary French (5) Review all entries Discontinued
Discussion—5 hours; Laboratory—1 hour. Prerequisite(s): FRE 002 or FRE 002S Continuation of course 2. Course is taught abroad. Not open for credit to students who have completed FRE 001A or FRE 003. GE credit: AH, WC. Effective: 2019 Spring Quarter.

FRE 021—Intermediate French (5)
Laboratory—1 hour; Lecture/Discussion—4 hours. Prerequisite(s): FRE 001A or FRE 003 or FRE 003S Review of grammar and vocabulary acquired in the elementary sequence, as well as the study of new grammatical structures and a continuing enrichment of vocabulary through oral work in class, written exercises, readings and compositions. Not open for credit to students who have completed FRE 021S. GE credit: AH, OL, WC, WE. Effective: 2014 Winter Quarter.

FRE 021S—Intermediate French (5) Review all entries
Laboratory—1 hour; Lecture/Discussion—4 hours. Prerequisite(s): FRE 001A or FRE 003 or FRE 003S Review of grammar and vocabulary acquired in the elementary sequence, as well as the study of new grammatical structures and a continuing enrichment of vocabulary through oral work in class, written exercises, readings and compositions. Not open for credit to students who have completed FRE 021. GE credit: AH, OL, WC, WE. Effective: 2013 Fall Quarter.

FRE 021S—Intermediate French (5) Review all entries Discontinued
Laboratory—1 hour; Lecture/Discussion—4 hours. Prerequisite(s): FRE 001A or FRE 003 or FRE 003S Review of grammar and vocabulary acquired in the elementary sequence, as well as the study of new grammatical structures and a continuing enrichment of vocabulary through oral work in class, written exercises, readings and compositions. Not open for credit to students who have completed FRE 021. GE credit: AH, OL, WC, WE. Effective: 2019 Spring Quarter.

FRE 022—Intermediate French (5)
Laboratory—1 hour; Lecture/Discussion—4 hours. Prerequisite(s): FRE 021 or FRE 021S Continuation of course 21 or 21S. Review of grammar and vocabulary, as well as the study of new grammatical structures and a continuing enrichment of vocabulary. Not open for credit to students who have completed FRE 022S. GE credit: AH, OL, WC, WE. Effective: 2014 Winter Quarter.

FRE 022S—Intermediate French (5) Review all entries
Laboratory—1 hour; Lecture/Discussion—4 hours. Prerequisite(s): FRE 021 or FRE 021S Continuation of course 21 or 21S. Review of grammar and vocabulary, as well as the study of new grammatical structures and a continuing enrichment of vocabulary. Not open for credit to students who have completed FRE 022. GE credit: AH, OL, WC, WE. Effective: 2013 Fall Quarter.

FRE 022S—Intermediate French (5) Review all entries Discontinued
Laboratory—1 hour; Lecture/Discussion—4 hours. Prerequisite(s): FRE 021 or FRE 021S Continuation of course 21 or 21S. Review of grammar and vocabulary, as well as, the study of new grammatical structures and a continuing enrichment of vocabulary. Not open for credit to students who have completed FRE 022. GE credit: AH, OL, WC, WE. Effective: 2019 Spring Quarter.

FRE 023—Intermediate French (5)
Laboratory—1 hour; Lecture/Discussion—4 hours. Prerequisite(s): FRE 022 or FRE 022S Continuation of course 22
FRE 023S—Intermediate French (5) **Review all entries**
Laboratory—1 hour; Lecture/Discussion—4 hours. Prerequisite(s): FRE 022 or FRE 022S Continuation of course 22 or 22S. Review of grammar and vocabulary, as well as, the study of new grammatical structures and a continuing enrichment of vocabulary. Not open for credit to students who have completed FRE 023. GE credit: AH, OL, WC, WE. Effective: 2014 Winter Quarter.

FRE 023S—Intermediate French (5) **Review all entries Discontinued**
Laboratory—1 hour; Lecture/Discussion—4 hours. Prerequisite(s): FRE 022 or FRE 022S Continuation of course 22 or 22S. Review of grammar and vocabulary, as well as, the study of new grammatical structures and a continuing enrichment of vocabulary. Not open for credit to students who have completed FRE 023. GE credit: AH, OL, WC, WE. Effective: 2013 Fall Quarter.

FRE 050—French Film (4)
Discussion—2 hours; Lecture—1 hour; Term Paper. Introduction to the tradition of French cinema from its invention by Méliès and the Lumière brothers through New Wave (especially the works of Truffaut and Godard) and more recent developments in French and Francophone film. Taught in English. GE credit: AH, VL, WC, WE. Effective: 1997 Winter Quarter.

FRE 051—Major Works of French Literature in Translation (4)
Discussion—1 hour; Lecture—2 hours; Term Paper—1 hour. Readings in English translation of key works of French and Francophone literature from the Middle Ages to the Present. Particular attention is given to the long-standing interest of French writers in issues of social, regional, gender, sexual, and ethnic identity. GE credit: AH, WC, WE. Effective: 2002 Fall Quarter.

FRE 052—France and the French-Speaking World (4)
Discussion—1 hour; Lecture—2 hours; Term Paper—1 hour. This course is taught in English. A survey of the history and culture of France and the French-speaking world, especially Canada, the Caribbean and Africa. Study of social, historical and cultural issues that occupy the French-speaking world, with particular attention to mass media. GE credit: AH, WC, WE. Effective: 2002 Spring Quarter.

FRE 053—French as a World Language (4)

FRE 098—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

FRE 099—Special Study for Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

FRE 100—Composition in French (4)
Lecture—3 hours; Term Paper. Prerequisite(s): FRE 023 Instruction and practice in expository writing in French, with emphasis on organization, correct syntax, and vocabulary building. GE credit: AH, WC, WE. Effective: 2004 Spring Quarter.

FRE 101—Introduction to French Poetry (4)
Lecture—3 hours. Prerequisite(s): FRE 100; or Consent of Instructor. Analysis and evaluation of works representing the main types of French poetry. Study of French poetic conventions and versification. GE credit: AH, WC, WE. Effective: 1997 Winter Quarter.

FRE 102—Introduction to French Drama (4)

FRE 224—Francophone Literatures (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. Graduate standing. Study of cultural
productions (literature, film, visual arts) by Francophone peoples such as found in North Africa, West Africa, the Caribbean, South-East Asia, the Americas, and Metropolitan France. May be repeated for credit when topic differs and with consent of instructor. Effective: 2016 Spring Quarter.

FRE 250A—French Linguistics I (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. Graduate standing. Theoretical approach to the forms and functions of French, with emphasis on phonology and morphology. Overview of current linguistic theories and their application to French. Offered in alternate years. Effective: 2016 Spring Quarter.

FRE 250B—French Linguistics II (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. Graduate standing. Theoretical approach to the forms and functions of French, with emphasis on syntax and semantics. Overview of current linguistic theories and their application to French. Offered in alternate years. Effective: 2016 Spring Quarter.

FRE 251—Topics in the Linguistic Study of French (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. Graduate standing. Questions relevant to the linguistic study of French, such as language acquisition, sociolinguistics, or theoretical examination of structure. Intended for students in French Linguistics and those applying linguistic models to literature or teaching. Repeatable for credit when topic differs. May be repeated for credit topic differs. Effective: 2016 Spring Quarter.

FRE 291—Foreign Language Learning in the Classroom (4)
Project (Term Project); Seminar—3 hours. Prerequisite(s): Consent of Instructor. Graduate standing. Overview of approaches to university-level foreign language instruction and the theoretical notions underlying current trends in classroom practices across commonly taught foreign languages. (Same course as GER 291 and SPA 291.) Effective: 2016 Spring Quarter.

FRE 297—Individual Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Graduate standing. (S/U grading only.) Effective: 2016 Spring Quarter.

FRE 298—Group Study (1-5)
Seminar—1-5 hours. Prerequisite(s): Consent of Instructor. Graduate standing. May be repeated for credit with consent of instructor. May be repeated for credit. Effective: 2016 Spring Quarter.

FRE 299—Research (1-12)
Variable. Prerequisite(s): Consent of Instructor. Graduate standing. (S/U grading only.) Effective: 2016 Spring Quarter.

FRE 299D—Dissertation Research (1-12)
Variable—3-36 hours. Prerequisite(s): Consent of Instructor. Graduate standing. (S/U grading only.) Effective: 1997 Winter Quarter.

FRE 300—Teaching of a Modern Foreign Language (3)
Lecture/Discussion—3 hours. Prerequisite(s): Senior or graduate standing; a major or minor in a modern foreign language. Effective: 1997 Winter Quarter.

FRE 390A—The Teaching of French in College (2)
Lecture/Discussion—2 hours. Prerequisite(s): Graduate standing or consent of instructor. Course designed for graduate teaching assistants with emphasis on problems and procedures encountered by teachers of lower division classes at the university. May be repeated for credit with consent of instructor. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

FRE 390B—The Teaching of French in College (2)
Lecture/Discussion—2 hours. Prerequisite(s): Graduate standing or consent of instructor. Course designed for graduate teaching assistants with emphasis on problems and procedures encountered by teachers of lower division classes at the university. (S/U grading only.) Effective: 1997 Winter Quarter.

FRE 396—Teaching Assistant Training Practicum (1-4)
Variable. Prerequisite(s): Graduate standing. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

Fungal Biology & Ecology Minor; Plant Pathology

Fungal Biology & Ecology Minor; Plant Pathology | Fungal Biology & Ecology Minor

(College of Agricultural and Environmental Sciences)
The minor in Fungal Biology and Ecology is open to all students interested in a concentrated exposure to and knowledge of the fungi and allied organisms. The minor is sponsored by the Plant Pathology Department.

**Minor Advisor.** T. Gordon

#### Gender, Sexuality & Women's Studies | WMS A.B.

(College of Letters and Science)

Maxine Craig, Ph.D., Department Chairperson

**Department Office.** 1200 Hart Hall; 530-752-6429; [http://gsws.ucdavis.edu/](http://gsws.ucdavis.edu/)

**Faculty.** [http://gsws.ucdavis.edu/faculty](http://gsws.ucdavis.edu/faculty)

#### The Major Program

Gender, Sexuality and Women's Studies is an interdisciplinary major founded on the understanding that the social production of gender is inseparable from that of race, sexuality, class, nationality, ability and other categories of difference. Our curriculum places feminist concerns within a transnational context, while respecting the need for geographic and historical specificity. These frameworks inform our teaching, our research, our institutional and community practices, and the principles we bring to our classrooms. Gender, Sexuality and Women's Studies offers a wide range of classes that use the lens of gender to examine colonialism and post colonialism, globalization, history, sexuality, queer theory, literature, popular culture, feminist video production, area studies, film fashion and food. The Department offers both an undergraduate major and minor. We also work collaboratively with other units on campus to sponsor two undergraduate minors, Sexuality Studies and Social and Ethnic Relations, and an undergraduate concentration in transnational production and consumption.

**The Department.** One of the most exciting and challenging aspects of the Gender, Sexuality and Women's Studies Department is that students, in consultation with the peer and faculty advisors, can pursue their particular academic interests and design their course of study accordingly. In devising their major plan, students will draw on courses offered in African American and African Studies, American Studies, Anthropology, Asian American Studies, Chicana/
o Studies, Comparative Literature, English, French, German and Italian Studies, History, Linguistics, Native American Studies, Political Science, Psychology, Sociology, Spanish, Textiles and Clothing, and other related disciplines.

In addition to offering a broad array of courses that deal with gender, class, race, ethnicity, and sexuality, the Gender, Sexuality and Women's Studies Department affords interested students the opportunity to earn internship credit and conduct independent research as well as take advantage of the Honors Thesis option.

Students design a program of study in consultation with an adviser that is in accordance with their individual career goals. Many Gender, Sexuality and Women's Studies majors find it advantageous to pursue a double major, or to minor in another field of study. Upon successful completion of the degree requirements, students majoring in the department will graduate with a Bachelor of Arts in Gender, Sexuality and Women's Studies.

**Career Alternatives.** A degree in Gender, Sexuality and Women's Studies opens many possibilities for future employment. The major introduces students to relevant social issues, fosters critical thinking, develops strong verbal, writing and research skills and encourages social advocacy.

Pre-professional students will discover that a major in Gender, Sexuality and Women's Studies offers useful preparatory training for medical or law school. It is particularly suitable for those interested in specializing in social policy, international development, social justice or gender-related work in a wide range of institutions and contexts. Students who plan to do practical work in counseling, clinical psychology, social services, education, media or politics will also find a major in Gender, Sexuality and Women's Studies provides a strong foundation. Those who wish to pursue graduate level research in such fields as anthropology, comparative literature, cultural studies, economics, education, ethnic studies, English, film studies, history, languages and literatures, performance studies, philosophy, political science, and sociology will also benefit from a strong Gender, Sexuality and Women's Studies undergraduate background in critical theory, social analysis, history and a sound understanding of cultural representation and narratives of difference.

Increasingly, media and cultural institutions, corporations, and personnel firms are hiring specialists in women and gender studies trained in understanding the complex cultural challenges and demands arising from diverse communities. State and federal agencies need people who have special understanding of the problems that diverse groups of women face in society, industry, and the professions. Educational institutions across the spectrum need specialists to develop and administer women and gender studies programs, multi-cultural community centers, LGBTQ organizations and other organizations designed specifically to deal with gender, social diversity and inequality, and a growing range of old and new social challenges arising in the context of globalization.

Some of our alumni have developed careers other than those described above. Gender, Sexuality and Women's Studies faculty and peer advisors can provide even more ideas about possible future careers. Doing internships related to coursework enables students to integrate theory with hands-on practice and service in the community.

**Graduate Study.** The Gender, Sexuality and Women's Studies Department offers a designated emphasis in Feminist Theory and Research for students enrolled in the Ph.D. programs of fifteen other affiliated departments.

**Major Advisor.** All Gender, Sexuality and Women's Studies majors and minors must consult with a faculty advisor, individually, at least once each academic year.

Gender, Sexuality & Women's Studies | WMS Minor

(College of Letters and Science)

Maxine Craig, Ph.D., Program Director

Program Office. 1200 Hart Hall; 530-752-6429; http://gsws.ucdavis.edu/

Faculty. http://gsws.ucdavis.edu/faculty

The Major Program

Gender, Sexuality and Women's Studies is an interdisciplinary major founded on the understanding that the social production of gender is inseparable from that of race, sexuality, class, nationality, ability and other categories of difference. Our curriculum places feminist concerns within a transnational context, while respecting the need for geographic and historical specificity. These frameworks inform our teaching, our research, our institutional and community practices, and the principles we bring to our classrooms. Gender, Sexuality and Women's Studies offers a wide range of classes that use the lens of gender to examine colonialism and post colonialism, globalization, history, sexuality, queer theory, literature, popular culture, feminist video production, area studies, film fashion and food. The Program offers both an undergraduate major and minor. We also work collaboratively with other units on campus to sponsor two undergraduate minors, Sexuality Studies and Social and Ethnic Relations, and an undergraduate concentration in transnational production and consumption.

The Program. One of the most exciting and challenging aspects of the Gender, Sexuality and Women's Studies Program is that students, in consultation with the peer and faculty advisors, can pursue their particular academic interests and design their course of study accordingly. In devising their major plan, students will draw on courses offered in African American and African Studies, American Studies, Anthropology, Asian American Studies, Chicana/o Studies, Comparative Literature, English, French, German and Italian Studies, History, Linguistics, Native American Studies, Political Science, Psychology, Sociology, Spanish, Textiles and Clothing, and other related disciplines.

In addition to offering a broad array of courses that deal with gender, class, race, ethnicity, and sexuality, the Gender, Sexuality and Women's Studies Program affords interested students the opportunity to earn internship credit and conduct independent research as well as take advantage of the Honors Thesis option.

Students design a program of study in consultation with an adviser that is in accordance with their individual career goals. Many Gender, Sexuality and Women's Studies majors find it advantageous to pursue a double major, or to minor in another field of study. Upon successful completion of the degree requirements, students majoring in the program will graduate with a Bachelor of Arts in Gender, Sexuality and Women's Studies.

Career Alternatives. A degree in Gender, Sexuality and Women's Studies opens many possibilities for future employment. The major introduces students to relevant social issues, fosters critical thinking, develops strong verbal, writing and research skills and encourages social advocacy.

Pre-professional students will discover that a major in Gender, Sexuality and Women's Studies offers useful preparatory training for medical or law school. It is particularly suitable for those interested in specializing in social policy, international development, social justice or gender-related work in a wide range of institutions and contexts. Students who plan to do practical work in counseling, clinical psychology, social services, education, media or politics will also find a major in Gender, Sexuality and Women's Studies provides a strong foundation. Those who wish to pursue graduate level research in such fields as anthropology, comparative literature, cultural studies, economics, education, ethnic studies, English, film studies, history, languages and literatures, performance studies, philosophy, political science, and sociology will also benefit from a strong Gender, Sexuality and Women's Studies undergraduate background in critical theory, social analysis, history and a sound understanding of cultural representation and narratives of difference.

Increasingly, media and cultural institutions, corporations, and personnel firms are hiring specialists in women and gender studies trained in understanding the complex cultural challenges and demands arising from diverse communities. State and federal agencies need people who have special understanding of the problems that diverse groups of women face in society, industry, and the professions. Educational institutions across the spectrum...
need specialists to develop and administer women and gender studies programs, multi-cultural community centers, LGBTQ organizations and other organizations designed specifically to deal with gender, social diversity and inequality, and a growing range of old and new social challenges arising in the context of globalization.

Some of our alumni have developed careers other than those described above. Gender, Sexuality and Women’s Studies faculty and peer advisors can provide even more ideas about possible future careers. Doing internships related to coursework enables students to integrate theory with hands-on practice and service in the community.

Graduate Study. The Gender, Sexuality and Women’s Studies Program offers a designated emphasis in Feminist Theory and Research for students enrolled in the Ph.D. programs of fifteen other affiliated departments.

Major Advisor. All Gender, Sexuality and Women’s Studies majors and minors must consult with a faculty advisor, individually, at least once each academic year.

Choose additional electives from approved list of upper division cross-listed and Women's Studies courses.

Note: With prior consultation with an advisor, other upper division courses may be accepted toward the minor program. Under no circumstances may more than one lower division course be offered in satisfaction of requirements for the minor.

**Total: 24**

**Gender, Sexuality & Women's Studies | WMS Courses**

**Courses in WMS:**

**WMS 020—Cultural Representations of Gender (4)**
Lecture/Discussion—4 hours. Interdisciplinary investigation of how specific cultures represent gender difference. Examine a variety of cultural forms and phenomena including film, television, literature, music, popular movements, and institutions. GE credit: ACGH, AH, DD, SS, VL, WC, WE. Effective: 2016 Spring Quarter.

**WMS 025—Gender and Global Cinema (4)**
Film Viewing—3 hours; Lecture—3 hours. The role gender plays in film history/culture in various geographical contexts and in aspects of contemporary globalization. Films from nations such as China, Colombia, Cuba, Ethiopia, India, Iran, Korea, New Zealand, and the U.S. GE credit: AH, VL, WC, WE. Effective: 2016 Fall Quarter.

**WMS 050—Introduction to Critical Gender Studies (4)**
Discussion—1 hour; Lecture—3 hours. Introduction to interdisciplinary, critical gender studies. Addresses the emergence of women's, gender and feminist studies internationally, its links to women's movements, and its influence within the various arts, humanities and social science disciplines. GE credit: ACGH, AH, DD, SS, VL, WE. Effective: 2016 Fall Quarter.

**WMS 060—Feminist Critiques of Western Thought (4)**
Lecture/Discussion—4 hours. Critical introduction to major traditions of social thinking in the West from a feminist perspective. GE credit: ACGH, AH, DD, SS, WE. Effective: 2016 Spring Quarter.

**WMS 070—Theory and History of Sexualities (4)**
Lecture/Discussion—4 hours. Key issues in the social construction, organization, and reproduction of sexualities such as the intersection of sexual identity with gender, race, ethnicity, and class, and the relation between movements for sexual liberation and the regulation of the body. GE credit: ACGH, AH, DD, SS, WE. Effective: 2016 Fall Quarter.

**WMS 080—Special Topics in Women's Studies (4) Review all entries**
Lecture/Discussion—4 hours. Limited enrollment. In-depth examination of a women's studies topic related to the research interest of the instructor. May be repeated for credit when topic differs. May be repeated for credit. Effective: 2016 Fall Quarter.

**WMS 080—Special Topics in Critical Gender Studies (4) Review all entries**
Lecture/Discussion—4 hours. In-depth examination of a women and gender studies topic related to the research interest of the instructor. May be repeated up to 1 time(s) when topic differs. GE credit: SS, WE. Effective: 2018 Fall Quarter.

**WMS 090X—Lower Division Seminar (2)**
Seminar—2 hours. Examination of a special topic in Womens Studies through shared readings, discussions, and written assignments. Effective: 2016 Fall Quarter.

**WMS 091—Research Seminar in the Transnational Production and Consumption of Fashion (1-2)**
Seminar—1-2 hours. Preparation for a research conference. May be repeated for credit when topic differs. Effective: 2016 Fall Quarter.

**WMS 098—Directed Group Study (1-5)**
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 2016 Fall Quarter.

**WMS 099—Special Study for Undergraduates (1-5)**
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 2016 Fall Quarter.

**WMS 102—Gender and Post Colonialism (4)**
Lecture/Discussion—4 hours; Term Paper. Explores changing configurations of race, gender, sexuality, class and
implications for governmentality in one or more colonial or postcolonial regimes in one or more societies. GE credit: AH, DD, SS, WC, WE. Effective: 2018 Winter Quarter.

WMS 103—Introduction to Feminist Theory (4)
Lecture/Discussion—4 hours. Prerequisite(s): WMS 050 recommended or consent of instructor. Introduction to the emergence of feminist theory and to key concepts in feminist theorizing. Examination of past and current debates over sexuality, race, identity politics, and the social construction of women's experience. GE credit: AH, DD, SS, WE. Effective: 2016 Fall Quarter.

WMS 104—Feminist Research (4)
Lecture/Discussion—4 hours. Prerequisite(s): Required for Women's Studies major. Introduction to feminist applications and transformations of traditional disciplinary research practices; initial training in methodologies for feminist interdisciplinary work. GE credit: AH, DD, OL, SS, WE. Effective: 2018 Winter Quarter.

WMS 130—Globalization and Politics of Family Change (4)
Lecture/Discussion—4 hours. Political/cultural changes, conflicts, and economic disparities that have led to greater mobility and dispersal of families. Transnationalism on gender relations, sexualities, and the meaning of family. GE credit: AH, OL, SS, WC, WE. Effective: 2018 Spring Quarter.

WMS 136—Critical Food Studies (4)
Lecture/Discussion—4 hours. Production and consumption of food at the intersections of gender, race, ethnicity, nation, and body. Individual and familial experiences as part of larger economic and political structures in the U.S. and globally. GE credit: ACGH, AH, DD, OL, SS, WE. Effective: 2018 Spring Quarter.

WMS 137—Contemporary Debates in Western Feminist Theory (4)
Lecture/Discussion—4 hours. Prerequisite(s): WMS 060; or Consent of Instructor. Interpretations of poststructuralist, postmodern, and postcolonial thought from a critical feminist perspective; includes methods of applying theory to concrete social/cultural problems of gender, race, sexuality, class. GE credit: ACGH, AH, DD, SS, WE. Effective: 2018 Spring Quarter.

WMS 138—Critical Fashion Studies (4)

WMS 139—Feminist Cultural Studies (4)
Lecture/Discussion—4 hours. Histories, theories, and practices of feminist traditions within Cultural Studies. (Same course as AMS 139.) GE credit: ACGH, AH, DD, SS, VL, WE. Effective: 2016 Fall Quarter.

WMS 140—Gender and Law (4)
Lecture/Discussion—4 hours. Exploration of women's legal rights in historical and contemporary context, discussing a variety of legal issues and applicable feminist theories. Topics include constitutional equal protection, discrimination in employment and education, sexual orientation discrimination, and the regulation of abortion. GE credit: ACGH, DD, SS. Effective: 2016 Fall Quarter.

WMS 145—Women's Movements in Transnational Perspective (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): WMS 050 recommended. Class size limited to 90 students. Transnational perspectives on twentieth and twenty-first century women's movements in Western, colonial and post-colonial contexts, examining movement's forms and political orientations and relationships between women's movements and other forces for change. GE credit: AH, OL, SS, WC, WE. Effective: 2016 Fall Quarter.

WMS 146—Gender, War and Peace (4)
Lecture/Discussion—4 hours. Prerequisite(s): Consent of Instructor. Applies a critical gender perspective to militarism as manifest in contexts of military rule, war, conflict, peacebuilding and security post-conflict. Addresses the changing configurations of gender and sexuality in military institutions and militarized economies and cultures from an interdisciplinary perspective. GE credit: ACGH, AH, DD, SS, WC, WE. Effective: 2018 Winter Quarter.

WMS 148—Science, Gender, and Social Justice (4)
Lecture/Discussion—4 hours; Term Paper. Class size limited to 60 students. Critical reading and reflection on the history of Western science, scientific institutions and the changing role of science in relation to inequalities of class, race, gender and sexuality, and global struggles for equality and justice. GE credit: AH, DD, SS, WC, WE. Effective: 2016 Spring Quarter.
WMS 158—Masculinities (4)
Lecture/Discussion—3 hours; Term Paper. Cultural, economic, and political forces which shape historical and contemporary masculinities. Impact of race, class, ability, nation and sexuality on experiences and cultural representations of masculinity. GE credit: ACGH, AH, DD, SS, WE. Effective: 2018 Spring Quarter.

WMS 160—Women, ‘Race’ and Sexuality in Postcolonial Cinema (4)
Film Viewing—3 hours; Lecture/Discussion—3 hours. Class size limited to 90 students. Feminist analysis of race, sexuality and class in the representation of women in commercial and/or independent films. GE credit: AH, VL, WC, WE. Effective: 2016 Spring Quarter.

WMS 162—Feminist Film Theory and Criticism (4)
Film Viewing—3 hours; Lecture/Discussion—3 hours. Historical overview of and contemporary issues in feminist film theory, including representation, spectatorship, and cultural production. Film stars, women filmmakers, and the intersections of gender, race, sexuality, and class in films and their audiences. GE credit: ACGH, AH, DD, VL, WC, WE. Effective: 2016 Spring Quarter.

WMS 164—Topics in Gender and Cinematic Representation (4)
Film Viewing—3 hours; Lecture/Discussion—3 hours. Examination of a specific topic within the broad rubric of gender and cinema. Possible topics include Latinas in Hollywood; gender, nation, cinema; and gender and film genre. Topics vary. May be repeated up to 2 time(s) when topic differs. GE credit: AH, VL, WC, WE. Effective: 2016 Spring Quarter.

WMS 165—Feminist Media Production (6)
Fieldwork—6 hours; Laboratory—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): CTS 020; or equivalent. One course in Women and Gender Studies or consent of instructor. Media production as a mode of cultural criticism, furthering feminist/ social justice activist goals. Fundamentals of camera, editing and distribution via a social engagement model. Study and hands-on response to key historic and contemporary feminist and social justice media discourses. (Same course as CDM 105) GE credit: ACGH, AH, DD, SS, VL. Effective: 2017 Winter Quarter.

WMS 170—Queer Studies (4)
Lecture/Discussion—4 hours. Prerequisite(s): WMS 070 recommended or consent of instructor. Study of queer sexualities, identities, theories, practices. Alternative sexualities as historical, social, and cultural constructions in intersections with race, gender, class, nationality. Interdisciplinary exploration of sexual liberation and the regulation of sexuality through history, theory and expressive cultural forms. GE credit: ACGH, AH, DD, SS, WE. Effective: 2016 Fall Quarter.

WMS 174—Body Politics (4)
Lecture/Discussion—4 hours. The body as a site where status inequalities are formed and resisted. Self-making through bodywork, history of gendered and racial meanings of the body, and analysis of normalizing discourses and practices. GE credit: AH, DD, SS, WE. Effective: 2018 Winter Quarter.

WMS 175—Gender and Experience of Race (4)
Lecture/Discussion—4 hours. Exploration of the co-construction of “race” and gender in comparative national historical contexts and contemporary lived experience. Study of intersections of race and gender in identities and how institutions, labor migration, social movements and consumption shape racialized gendered identities. GE credit: ACGH, AH, DD, SS, WE. Effective: 2016 Fall Quarter.

WMS 176—Autobiography, Narrative, Memoir (4)
Discussion—1 hour; Lecture—2 hours; Term Paper. Prerequisite(s): Consent of Instructor. Class size limited to 30 students. Life narrative writings by women. Transgressive voices exploring issues of race, class, and sexuality, women's silence and marginalization. Theories of autobiography, autoethnography and memoir included. May be repeated for credit if subject matter differs. GE credit: AH, DD, SS, WE. Effective: 2018 Summer Session 1.

WMS 178A—Women Writers and the Transnational Imaginary; The Arab World (4)
Lecture/Discussion—4 hours. Prerequisite(s): Consent of Instructor. Writings by women from diverse regions and cultures, understood in their cultural, socio-economic, and historical contexts, with each course offering a focus on
women’s writing in specific geographic/national locations and their diasporas: The Arab World. GE credit: AH, WC, WE. Effective: 2016 Fall Quarter.

WMS 178B—Women Writers and the Transnational Imaginary; Asia (4)
Lecture/Discussion—4 hours. Writings by women from diverse regions and cultures, understood in their cultural, socio-economic, and historical contexts, with each course offering a focus on women’s writing in specific geographic/national locations and their diasporas: Asia. GE credit: AH, WC, WE. Effective: 2016 Fall Quarter.

WMS 178C—Women Writers and the Transnational Imaginary; The Caribbean (4)
Lecture/Discussion—4 hours. Writings by women from diverse regions and cultures, understood in their cultural, socio-economic, and historical contexts, with each course offering a focus on women’s writing in specific geographic/national locations and their diasporas: The Caribbean. GE credit: AH, WC, WE. Effective: 2016 Fall Quarter.

WMS 178D—Women Writers and the Transnational Imaginary; Africa (4)
Lecture/Discussion—4 hours. Writings by women from diverse regions and cultures, understood in their cultural, socio-economic, and historical contexts, with each course offering a focus on women’s writing in specific geographic/national locations and their diasporas: Africa. GE credit: AH, WC, WE. Effective: 2016 Fall Quarter.

WMS 178E—Women Writers and the Transnational Imaginary; Diasporic Women Writers in Europe (4)
Lecture/Discussion—4 hours. Writings by women from diverse regions and cultures, understood in their cultural, socio-economic, and historical contexts, with each course offering a focus on women’s writing in specific geographic/national locations and their diasporas: Diasporic Women Writers in Europe. GE credit: AH, WC, WE. Effective: 2016 Fall Quarter.

WMS 178F—Transnationalism and Writing by Women of Color (4)
Lecture/Discussion—4 hours. Writings by women of color in a transnational framework, understood in their cultural, socio-economic, and historical contexts. The interrelation among gender, writing, nationalism, and transnationalism with focus on women’s writing in specific geographic/national locations and their diasporas: Topics on Women Writers of Color. GE credit: AH, WC, WE. Effective: 2016 Fall Quarter.

WMS 179—Literature as Aesthetics of Resistance (4) Review all entries
Lecture/Discussion—4 hours. Literature by women and other marginal groups which embody dissent and subversion as a means of challenging the status quo and to affect social transformation. GE credit: AH, WC, WE. Effective: 2019 Winter Quarter.

WMS 179—Gender and Literature (4) Review all entries
Lecture/Discussion—4 hours. Prerequisite(s): One course in Women’s Studies or consent of instructor. Role of literature, especially novels, in constructing, challenging, and transforming normative genders in society. Transhistorical and transnational focus on gender in its intersections with race, class, sexuality, and politics. GE credit: AH, WC, WE. Effective: 2016 Fall Quarter.

WMS 180—Women of Color Writing in the United States (4)
Lecture/Discussion—4 hours. Literature, especially novels, written by contemporary women of color in the United States, understood in their socio-economic, cultural and historical contexts. GE credit: ACGH, AH, DD, WE. Effective: 2016 Fall Quarter.

WMS 182—Globalization, Gender and Culture (4)

WMS 184—Gender in the Arab World (4)
Lecture/Discussion—4 hours. Examination of the history, culture, and social/political/economic dynamics of gender relations and gendering in the Arab world. GE credit: SS, WC, WE. Effective: 2016 Fall Quarter.

WMS 185—Women and Islamic Discourses (4)
Lecture/Discussion—4 hours. Prerequisite(s): WMS 050; Or comparable course. Introduction to debate/discourses about women and Islam. Transformations in debate/discourses in colonial and postcolonial periods in the Middle East & South Asia. Comparative study of debate/discourses on family, work, law, sexuality, religion, comportment, human rights, feminist and religious movements. (Same course as MSA 150.) GE credit: AH, SS, WC. Effective: 2016 Fall Quarter.
WMS 187—Gender and Public Policy (4)
Lecture/Discussion—3 hours; Term Paper. Role of gender in the creation of social policies, especially with respect to issues brought into the policy arena by contemporary feminism. GE credit: ACGH, DD, SS, WE. Effective: 2018 Winter Quarter.

WMS 189—Special Topics in Critical Gender Studies (4)
Lecture/Discussion—4 hours. In-depth examination of a women's studies topic related to the research interests of the instructor. May be repeated up to 1 time(s) when topic differs. GE credit: AH, SS, WE. Effective: 2016 Fall Quarter.

WMS 190—Senior Seminar (4)
Seminar—4 hours. Capstone course for senior Womens Studies majors, which focuses on current issues on feminism as they impact theory, public policy, and practice. GE credit: ACGH, AH, DD, SS. Effective: 2016 Fall Quarter.

WMS 191—Capstone Seminar (4)
Seminar—4 hours. Revision, completion, and presentation of senior research or creative project. Creating a multimedia website for publishing research and creative projects. GE credit: ACGH, AH, DD, SS, WE. Effective: 2016 Fall Quarter.

WMS 192—Internship in Women's Studies (1-12)
Internship—3-36 hours; Term Paper. Prerequisite(s): Completion of a minimum of 84 units and consent of instructor; enrollment dependent on availability of intern positions with priority to Women's Studies majors. Supervised internship and study in positions/institutional settings dealing with gender-related problems or issues, as for example, a women's center, affirmative action office, advertising agency, or social welfare agency. Final written report on internship experience. (P/NP grading only.) Effective: 2016 Fall Quarter.

WMS 193—Feminist Leadership Seminar (2)
Seminar—2 hours. Use feminist methods to critically reflect on the ethical, methodological and strategic aspects of an organization, project, campaign, movement or other social change initiative. May be repeated for credit. (P/NP grading only.) GE credit: ACGH, AH, DD, SS, WE. Effective: 2016 Fall Quarter.

WMS 194HA—Senior Honors Project in Women's Studies (4-6)
Independent Study—12 hours. Prerequisite(s): Senior standing, Women's Studies major, and advisor's approval. In consultation with an advisor, students complete a substantial research paper or significant creative project on a Womens Studies topic. GE credit: AH, SS, WE. Effective: 2016 Fall Quarter.

WMS 194HB—Senior Honors Project in Women's Studies (4-6)
Independent Study—12 hours. Prerequisite(s): Senior standing, Women's Studies major, and advisor's approval. In consultation with an advisor, students complete a substantial research paper or significant creative project on a Women's Studies topic. GE credit: AH, SS, WE. Effective: 2016 Fall Quarter.

WMS 195—Thematic Seminar in Critical Gender and Women's Studies (4)
Seminar—4 hours. Group study of a topic, issue or area in feminist theory and research involving intensive reading and writing. May be repeated for credit. GE credit: ACGH, AH, DD, SS, WE. Effective: 2016 Spring Quarter.

WMS 197T—Tutoring in Women's Studies (1-4)
Tutorial—3-12 hours. Prerequisite(s): Consent of director. Leading small, voluntary discussion groups affiliated with a Womens Studies course. May be repeated for credit for a total of 8 units. May be repeated up to 8 unit(s). (P/NP grading only.) Effective: 2016 Fall Quarter.

WMS 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Upper division standing. (P/NP grading only.) Effective: 2016 Fall Quarter.

WMS 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. Upper division standing. (P/NP grading only.) Effective: 2016 Fall Quarter.

WMS 200A—Current Issues in Feminist Theory (4)
Seminar—4 hours. Current issues in feminist theory; techniques employed to build feminist theory in various fields. Effective: 2016 Fall Quarter.

WMS 200B—Problems in Feminist Research (4)
Seminar—4 hours. Prerequisite(s): WMS 200A B+ or better Application of feminist theoretical perspectives to the
interdisciplinary investigation of a problem or question chosen by the instructor(s). May be repeated for credit when subject area differs. May be repeated for credit. Effective: 2016 Fall Quarter.

**WMS 201—Special Topics in Feminist Theory and Research (4)**
Lecture/Discussion—4 hours. Limited enrollment. Explores in depth a topic in feminist theory and research related to the research interests of the instructor. May be repeated for credit when topic differs. Limited enrollment. May be repeated for credit. Effective: 2016 Fall Quarter.

**WMS 250—Cultural Study of Masculinities (4)**
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Interdisciplinary approaches to understanding the social and cultural construction of masculinities; attention to the effects of biology, gender, race, class, sexual and national identities; criticism of oral, printed, visual, and mass mediated texts, and of social relations and structures. (Same course as AMS 250.) Effective: 2016 Fall Quarter.

**WMS 299—Special Study for Graduate Students (1-12)**
Variable. (P/NP grading only.) Effective: 2016 Fall Quarter.

**WMS 299D—Dissertation Research and Writing (4)**
Extensive Writing/Discussion—3 hours. Prerequisite(s): WMS 200A; WMS 200B; Fulfillment of course requirements for the DE in Feminist Theory and Research, advancement to candidacy. (S/U grading only.) Effective: 2016 Fall Quarter.

**WMS 396—Teaching Assistant Training Practicum (1-4)**
Variable. Prerequisite(s): Graduate standing. May be repeated for credit. (P/NP grading only.) Effective: 2016 Fall Quarter.

**General Linguistics Minor; Linguistics**

**General Linguistics Minor; Linguistics | General Linguistics Minor**

(College of Letters and Science)

Raul Aranovich, Ph.D., Chairperson of the Department

**Department Office.** 469 Kerr Hall; 530-752-0966; [http://linguistics.ucdavis.edu](http://linguistics.ucdavis.edu)

**Faculty.** [http://linguistics.ucdavis.edu/directory-of-people/lin-faculty](http://linguistics.ucdavis.edu/directory-of-people/lin-faculty)

Linguistics offers two minor programs:

- **General Linguistics**, which provides the student with basic knowledge of language structure and linguistic analysis.
- **Linguistics for Language Teachers**, which especially complements the major in English with the Teaching Area of emphasis; it is also of relevance to students interested in teaching foreign languages.

**Minor Advisor.** Kenji Sagae

General Linguistics Minor; Linguistics | LIN Courses

Courses in LIN:

**LIN 001—Introduction to Linguistics (4)**
Discussion—1 hour; Lecture—3 hours. Introduction to the study of language; its nature, diversity, and structure. GE credit: AH, SS. Effective: 1997 Winter Quarter.

**LIN 001Y—Introduction to Linguistics (4)**
Discussion—1 hour; Web Virtual Lecture—3 hours. Introduction to the study of language; its nature, diversity, and structure. Students may not take both LIN 001 and LIN 001Y for credit. GE credit: AH, SS. Effective: 2014 Spring Quarter.

**LIN 003—Language and the Body (4)**
Discussion—2 hours; Lecture—2 hours. Open to all students regardless of major. Enrollment will be restricted to 80-100 students. Perspectives on the role of language in issues about bodies. Language-related disabilities. Social implications of language use in discussing body-related conditions. GE credit: OL, SS. Effective: 2018 Winter Quarter.

**LIN 005—Global English and Communication (4)**
Discussion—2 hours; Lecture—2 hours. English as a global language and its uses in intercultural communication. Cultural, historical, and political dimensions of varieties of English spoken around the world. Experiential grounding in strategies for increasing interpretive and verbal communicative competence for a globalized world. (Same course as CMN 005.) GE credit: AH, OL, SS, WC. Effective: 2012 Spring Quarter.

**LIN 006—Language and Society (4)**
Discussion—1 hour; Lecture—3 hours. Language as a social phenomenon. Topics include linguistic diversity, language policy, language and identity, language and social structure, speech communities and social networks, the effect of social factors on language variation, linguistic consequences of language contact. GE credit: ACGH, DD, SS, WE. Effective: 2008 Fall Quarter.

**LIN 015—Academic Oral Communication (3)**
Discussion—2 hours; Lecture—1 hour. Structure of oral communication, critical thinking, and persuasion in classroom discourse in American English and in cross-cultural perspective. GE credit: AH, OL, SS. Effective: 2014 Fall Quarter.

**LIN 020—Oral English for International Students (3)** Review all entries
Lecture/Discussion—3 hours. Open to non-native speakers of English with priority enrollment to international teaching assistants with qualifying placement exam scores. Intensive work in oral English for international students, to increase fluency, accuracy, and use of appropriate discourse strategies in academic settings (e.g., seminar, discussion, laboratory). Training in segmental features of English sounds, intonation, stress, non-verbal cues, and register. May be repeated for credit. (P/NP grading only.) Effective: 2011 Fall Quarter.

**LIN 020—Oral English for International Students (3)** Review all entries Discontinued
Lecture/Discussion—3 hours. Open to non-native speakers of English with priority enrollment to international teaching assistants with qualifying placement exam scores. Intensive work in oral English for international students, to increase fluency, accuracy, and use of appropriate discourse strategies in academic settings (e.g., seminar, discussion, laboratory). Training in segmental features of English sounds, intonation, stress, non-verbal cues, and register. May be repeated for credit. (P/NP grading only.) Effective: 2018 Summer Session 2.

**LIN 024—English Structures and Strategies in Academic Writing (4)** Review all entries
Lecture/Discussion—4 hours. Prerequisite(s): LIN 023 Open to students from language backgrounds other than English. Practice in academic writing designed to prepare undergraduate students from language backgrounds other than English for successful academic work. Development of academic writing, critical thinking, and reading skills. Development of clear, accurate language for presenting an effective argument. Effective: 2006 Fall Quarter.

**LIN 024—English Structures and Strategies in Academic Writing (4)** Review all entries Discontinued
Lecture/Discussion—4 hours. Prerequisite(s): LIN 023 Open to students from language backgrounds other than English. Practice in academic writing designed to prepare undergraduate students from language backgrounds other than English for successful academic work. Development of academic writing, critical thinking, and reading skills. Development of clear, accurate language for presenting an effective argument. Effective: 2019 Winter Quarter.
LIN 025—English for International/ESL Graduate Students (4) Review all entries
Lecture/Discussion—4 hours. Prerequisite(s): Admission by placement examination or consent of coordinator; open to international and ESL graduate students and limited status international undergraduates (Education Abroad Program participants). Multi-skills ESL course designed to help international/ESL students improve their English language skills for successful academic study. Emphasis on writing, speaking, listening, reading, and academic culture. (P/NP grading only.) Effective: 2003 Fall Quarter.

LIN 025—English for International/ESL Graduate Students (4) Review all entries Discontinued
Lecture/Discussion—4 hours. Prerequisite(s): Admission by placement examination or consent of coordinator; open to international and ESL graduate students and limited status international undergraduates (Education Abroad Program participants). Multi-skills ESL course designed to help international/ESL students improve their English language skills for successful academic study. Emphasis on writing, speaking, listening, reading, and academic culture. (P/NP grading only.) Effective: 2019 Winter Quarter.

LIN 026—Writing for International Graduate Students (3) Review all entries
Lecture—3 hours. Prerequisite(s): Satisfactory completion of LIN 025 if held for it, or consent of instructor. Admission limited to international graduate students. Focuses on writing needed for academic work, including summaries, critiques, research and grant proposals, memos, resumes, and research papers. Includes a review of grammar needed for writing and some focus on reading skills and American vocabulary and idioms. (P/NP grading only.) Effective: 1997 Winter Quarter.

LIN 026—Writing for International Graduate Students (3) Review all entries Discontinued
Lecture—3 hours. Prerequisite(s): Satisfactory completion of LIN 025 if held for it, or consent of instructor. Admission limited to international graduate students. Focuses on writing needed for academic work, including summaries, critiques, research and grant proposals, memos, resumes, and research papers. Includes a review of grammar needed for writing and some focus on reading skills and American vocabulary and idioms. (P/NP grading only.) Effective: 2019 Winter Quarter.

LIN 096—Directed Group Study in English as a Second Language (1-5)
Variable—1.5 hours. Prerequisite(s): Consent of Instructor. Directed group study of topic in English as a Second Language (ESL). May be repeated for credit May be repeated for credit by consent of the ESL coordinator. (P/NP grading only.) Effective: 1997 Winter Quarter.

LIN 098—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Intended for lower division students. (P/NP grading only.) Effective: 1997 Winter Quarter.

LIN 099—Special Study for Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. Intended for lower division students. (P/NP grading only.) Effective: 1997 Winter Quarter.

LIN 103A—Linguistic Analysis I: Phonetics, Phonology, Morphology (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): LIN 001 recommended. Introduction to fundamental methods and concepts used in linguistic analysis, focusing on phonetic, phonological, and morphological phenomena. Emphasizes development of analytical skills and appreciation of structural regularities and differences among languages. Not open for credit to students who have completed LIN 139. GE credit: AH. Effective: 2017 Winter Quarter.

LIN 103B—Linguistic Analysis II: Morphology, Syntax, Semantics (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): LIN 001 recommended. Introduction to fundamental methods and concepts used in linguistic analysis, focusing on morphological, syntactic, and semantic phenomena. Emphasizes development of analytical skills and appreciation of structural regularities and differences among languages. Not open for credit to students who have completed LIN 140. GE credit: AH. Effective: 2017 Winter Quarter.

LIN 105—Topics in Language and Linguistics (4)
Lecture—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. LIN 001 recommended. Detailed examination of a major contemporary linguistic theory, a major contemporary issue or related set of issues in linguistics, or the structure of a particular language or language family. May be repeated for credit when topic differs. May be repeated for credit. Effective: 2017 Winter Quarter.

LIN 106—English Grammar (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): LIN 001 or LIN 001Y or ENG 003 or UWP 001; or Consent of
Instructor. Survey of present-day English grammar as informed by contemporary linguistic theories. The major syntactic structures of English; their variation across dialects, styles, and registers; their development; and their usefulness in describing the conventions of English. (Same course as ENL 106 and UWP 106.) GE credit: AH. Effective: 2018 Winter Quarter.

**LIN 111—Introduction to Phonological Theory (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): LIN 103A recommended. Contemporary phonological theory with emphasis on syllable structure, metrical structure, phonology-morphology interaction, and typological variation in these areas, from the perspective of optimality-theoretic approaches. GE credit: AH. Effective: 2017 Winter Quarter.

**LIN 112—Phonetics (4)**
Lecture—3 hours; Term Paper—1 hour. Prerequisite(s): LIN 001 recommended. Detailed examination of articulatory and acoustic phonetics. GE credit: SE. Effective: 2017 Winter Quarter.

**LIN 121—Morphology (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): LIN 103A, 103B recommended. Introduction to the analysis of word structure and the relation of word structure to the lexicon and other grammatical components. GE credit: AH. Effective: 2017 Winter Quarter.

**LIN 127—Text Processing and Corpus Linguistics (4)**
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): LIN 001, LIN 005, LIN 006, or ANT 004 recommended. Investigation of the lexical organization of human languages through corpus linguistics. Application of principles of linguistic analysis, automatic text processing, and statistical research to solving problems of textual evaluation and classification, as well as information retrieval and extraction. GE credit: AH, QL, SS. Effective: 2017 Winter Quarter.

**LIN 131—Introduction to Syntactic Theory (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): LIN 103B recommended. Introduction to syntactic theory, primarily through the examination of a major theory of syntax, emphasizing theoretical reasoning, argumentation, and problems of theory building in syntax. GE credit: AH. Effective: 2017 Winter Quarter.

**LIN 141—Semantics (4)**
Lecture—3 hours; Term Paper. Prerequisite(s): LIN 103B recommended. Linguistic study of meanings of words and phrases. Meanings expressed by lexical items and derivational and inflectional morphology. Contribution of argument structure, quantification, and coordination to meaning. GE credit: AH. Effective: 2017 Winter Quarter.

**LIN 150—Languages of the World (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): LIN 001 or ANT 004 recommended. Survey of the world’s languages, their geographical distribution and classification, both genetic and typological. Illustrative descriptions of several major languages from different geographical areas; pidgins and creoles, lingua francas and other languages of widespread use. Not open for credit to students who have completed LIN 050. GE credit: AH, SS, WC. Effective: 2017 Winter Quarter.

**LIN 151—Historical Linguistics (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): LIN 103A recommended. Description and methods of the historical study of language, including the comparative method and internal reconstruction; sound change, morphological change, syntactic change, semantic change. GE credit: AH. Effective: 2017 Winter Quarter.

**LIN 152—Language Universals and Typology (4)**
Lecture—3 hours; Term Paper. Prerequisite(s): LIN 103B recommended. Investigation into common features of all human languages and the classification of languages in terms of their structural features. Theories of universal grammar. Detailed discussion of non-Indo-European languages and comparison with English. GE credit: AH. Effective: 2017 Winter Quarter.

**LIN 160—American Voices (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): LIN 001 or LIN 001Y or ANT 004; Or upper division standing recommended. Explores the forms of American English: traditional notions of regional dialects and increasingly important social dialects, reflecting age, class, gender, race, ethnicity, and sexual orientation. The influence of language attitudes on perception of dialect speakers; dialect in media, education, and GE credit: SS, WE. Effective: 2018 Winter Quarter.

**LIN 163—Language, Gender, and Society (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): LIN 001 or ANT 004 recommended. Investigation of real and
putative (stereotyped) gender-linked differences in language structure and usage, with a consideration of some social and psychological consequences of such differences. Focus is on English, but other languages are also discussed. GE credit: ACGH, DD, SS, WE. Effective: 2017 Winter Quarter.

**LIN 165—Introduction to Applied Linguistics (4)**
Discussion—1 hour; Lecture—3 hours. Applications of linguistic principles and the analysis of language-related issues in the world. Exploration of a range of language-related problems including issues related to language learning and teaching to issues concerning language and gender, race, class and the media. GE credit: SS, WE. Effective: 2002 Winter Quarter.

**LIN 166—The Spanish Language in the United States (4)**
Lecture—3 hours; Term Paper. Prerequisite(s): LIN 001 or LIN 001Y or SPA 111N; SPA 023; Or equivalent to SPA 023 recommended. Linguistic features of the varieties of the Spanish language spoken throughout the United States; phonology, morphology, syntax, vocabulary. Focus on the relationship between United States Spanish and other world varieties of Spanish, within a historical framework. GE credit: SS. Effective: 2018 Spring Quarter.

**LIN 171—Introduction to Psycholinguistics (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (LIN 001 or LIN 001Y); LIN 103A, LIN 103B recommended. Introduction to psychological issues relating to the implementation of language and linguistic structure during speech production and comprehension and to the implications of research in psychology and related fields for linguistic theory. GE credit: SS. Effective: 2018 Spring Quarter.

**LIN 173—Language Development (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (LIN 001 or LIN 001Y); or Consent of Instructor. LIN 103A, 103B recommended. Theory and research on children's acquisition of their native language, including the sound system, grammatical systems, and basic semantic categories. (Same course as EDU 173.) GE credit: SS. Effective: 2018 Spring Quarter.

**LIN 175—Biological Basis of Language (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Consent of Instructor. LIN 001 recommended. Overview of issues in the field of neurolinguistics and techniques used to explore representation of language in the human brain. GE credit: SE. Effective: 2017 Winter Quarter.

**LIN 177—Computational Linguistics (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Consent of Instructor. LIN 001 recommended. Understanding the nature of language through computer modeling of linguistic abilities. Relationships between human cognition and computer representations of cognitive processing. Not open for credit to students who have taken LIN 007. GE credit: SE. Effective: 2017 Winter Quarter.

**LIN 180—Second Language Learning and Teaching (4)**
Lecture/Discussion—4 hours. Prerequisite(s): LIN 001 or LIN 001Y; Or equivalent recommended. Psycholinguistic and sociolinguistic theories of second language learning. Connections between theoretical perspectives and pedagogical practices in formal and informal second language settings, with focus on tutoring. Impact of sociocontextual factors (e.g., gender, ethnicity). Fieldwork requirement. GE credit: SS, WE. Effective: 2018 Winter Quarter.

**LIN 182—Multilingualism (4)**
Lecture/Discussion—4 hours. Limited enrollment. Issues in multilingualism from a global perspective: e.g., multilingual communities; multilingualism and identity (gender, ethnicity, nationality); language ideologies and educational and sociopolitical policies surrounding multilingualism; acquisition of multilingualism; discursive practices of multilinguals. GE credit: SS, WC, WE. Effective: 2006 Spring Quarter.

**LIN 192—Internship in Linguistics (1-12)**
Internship—3-36 hours. Prerequisite(s): LIN 001 or LIN 001Y; Or equivalent course; consent of instructor. Internship applying linguistic-related skills to a fieldwork project in areas such as media, law, or industry, in approved organizations or institutions. Maximum of four units applicable toward major. (P/NP grading only.) Effective: 2006 Winter Quarter.

**LIN 194H—Special Study for Honors Students (1-5)**
Independent Study—1-5 hours. Prerequisite(s): Consent of Instructor. Open only to linguistics majors of senior standing who qualify for Honors Program. Guided research, under the direction of a faculty member approved by the Program Director, leading to a senior honors thesis. May be repeated for credit for up to 6 units. May be repeated up to 6 unit(s). (P/NP grading only.) Effective: 1997 Winter Quarter.
LIN 197T—Tutoring in Linguistics (1-4)
Discussion—1-4 hours. Prerequisite(s): Consent of Instructor. Upper division standing and consent of department chairperson. Leading of small voluntary discussion groups affiliated with one of the department's regular courses. May be repeated for credit. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

LIN 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

LIN 199—Special Study for Advanced Undergraduates (1-5)
Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

LIN 200A—Foundations of Linguistics I (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Graduate standing. Survey of fundamental issues raised by pre-generative linguistics in the twentieth century, with emphasis on issues crucial to applications of linguistics. Not open for credit to students who have completed LIN 203A. Effective: 2005 Spring Quarter.

LIN 200B—Foundations of Linguistics II (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Graduate standing. Survey of fundamental issues raised by orthodox generative linguistics, with emphasis on issues crucial to applications of linguistics. Not open for credit to students who have completed LIN 203B. Effective: 2005 Spring Quarter.

LIN 200C—Foundations of Linguistics III (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Graduate standing. Survey of fundamental issues raised by contemporary linguistic theories lying outside the generative grammar orthodoxy, with emphasis on issues crucial to applications of linguistics. Effective: 2005 Spring Quarter.

LIN 201—Proseminar (1)
Seminar—1 hour. Introduction to research activity of faculty in the Graduate Group in Linguistics and guest speakers. May be repeated up to 4 unit(s). (S/U grading only.) Effective: 2011 Fall Quarter.

LIN 205A—Topics in Linguistic Theory and Methods (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. Advanced study of current problems in linguistic theory and methodology. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

LIN 205B—Topics in Linguistic Theory and Methods (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. Advanced study of current problems in linguistic theory and methodology. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

LIN 205C—Topics in Linguistic Theory and Methods (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. Advanced study of current problems in linguistic theory and methodology. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

LIN 205D—Topics in Linguistic Theory and Methods (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. Advanced study of current problems in linguistic theory and methodology. May be repeated for credit when topic differs. Effective: 1997 Winter Quarter.

LIN 211—Advanced Phonological Theory and Analysis (4)
Lecture—3 hours; Term Paper. Prerequisite(s): LIN 111 Critical examination of current phonological theories. Effective: 1997 Winter Quarter.

LIN 212—Advanced Phonetics (4)
Lecture—3 hours; Term Paper. Prerequisite(s): LIN 112 Advanced investigation of the physiological basis of speech articulation and acoustic phonetics. Effective: 1997 Winter Quarter.

LIN 231—Advanced Syntactic Theory and Analysis (4)
Lecture—3 hours; Term Paper. Prerequisite(s): LIN 131 Critical survey of contemporary theories of syntax. Effective: 1997 Winter Quarter.

LIN 241—Advanced Syntactic Theory and Analysis (4)
Lecture—3 hours; Term Paper. Prerequisite(s): LIN 141; or Consent of Instructor. Advanced critical exploration of contemporary theories of linguistic semantics. Effective: 1997 Winter Quarter.

LIN 250—Principles of Typological Linguistics (4)
Seminar—3 hours; Term Paper. Cross-linguistic comparison and typology, including word order, morphological typology, complex clauses, semantic categories and their grammaticalization, and applications of typology to language acquisition. Effective: 2011 Fall Quarter.

986
LIN 251—Principles of Historical Linguistics (4)
Lecture—3 hours; Term Paper. Prerequisite(s): LIN 151 Advanced analysis of the theory and methods of historical linguistics. Effective: 1997 Winter Quarter.

LIN 252—Romance Linguistics (4)
Lecture—3 hours; Term Paper. Prerequisite(s): LIN 151 Examination of the development of the Romance languages from Proto-Romance to the modern era. Application and critical examination of methods of historical and comparative linguistics in particular areas of structural change in Romance. Effective: 1997 Winter Quarter.

LIN 253—Speech Perception (4)
Discussion—3 hours; Extensive Writing. Investigation into how listeners map a continuous and variable acoustic signal to a linguistic interpretation. Phonetic context, variation, linguistic knowledge, and sociolinguistics as factors in perceiving speech. Effective: 2017 Winter Quarter.

LIN 260—Variation in Speech Communities (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): LIN 281; or Consent of Instructor. Linguistic variability in time, space, and society. Theoretical issues related to social and linguistic constraints in variation; issues and methods in the quantitative analysis of variation. Speech community, quantitative analytic methods, and the scope of sociolinguistic competence. Effective: 2005 Spring Quarter.

LIN 263—Discourse Analysis: Text in Context (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Graduate standing. Introduction to and application of leading theoretical approaches to the analysis of discourse. Approaches to the analysis of (spoken and written) text in context, tools for analyzing different types of texts (narration, conversation, etc.). Theme/rheme, given/new, anaphora, discourse markers, and Effective: 2005 Spring Quarter.

LIN 264—Current Issues in Language and Gender (4)
Project (Term Project); Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing; prior coursework in Linguistics, Gender Studies, or Cultural Studies is desirable; no expectation of bilingual proficiency. Exploration of the construction and performance of gender through language in cross-cultural perspective and in a variety of contexts: informal conversations, narratives, workplaces, schools, households, the mass media. Special topics may include: language acquisition; multilingualism; ecofeminism; queer theory. May be repeated up to 1 time(s) when topic differs. Effective: 2005 Fall Quarter.

LIN 265—Language, Performance, and Power (4)
Seminar—3 hours; Term Paper. Restricted to graduate standing or consent of instructor. Exploration of the intersection between linguistic and social theories in the language-state relation and the performance of identity. Ideological sources of language differentiation; nation-building and linguistic difference. Political economic, sociolinguistic, and ethnographic approaches to understanding linguistic inequality. (Same course as ANT 265.) Effective: 2003 Fall Quarter.

LIN 275—Neurobiology of Language (4)

LIN 280—Theories of Second Language Acquisition (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Covers theoretical perspectives that direct or have directed research in second language acquisition; explores the relationship between linguistics and language teaching and deals with the individual variables that influence second language learning. Effective: 1998 Fall Quarter.

LIN 281—Research Methods in TESOL/SLD (4)
Lecture—3 hours; Term Paper—1 hour. Prerequisite(s): LIN 280 Students will study a variety of research methods in second language research; evaluate research designs and methods of analyses, formulate research questions and hypotheses and design a study of their own, think about various kinds of data they can collect. Effective: 2000 Winter Quarter.

LIN 282—Individual and Social Aspects of Bilingualism (4)
Lecture—3 hours; Term Paper. Broad overview of bi-and multilingualism, with focus on theoretical and descriptive research; topics covered range from language processing in bilinguals to code-switching to language as political issue in multilingual states. Effective: 1997 Winter Quarter.
LIN 283—Politics of Bi and Multilingual Literacies (4)

LIN 289—Pedagogical Applications of Second Language Acquisition Theory (4)
Seminar—3 hours; Term Paper. Prerequisite(s): LIN 280 Pedagogical implications of various theories of second language acquisition, facilitation of language acquisition in classroom settings, and techniques for conducting classroom-based research in language learning. Effective: 1999 Winter Quarter.

LIN 297T—English as a Second Language Teaching/Tutoring (1-4)
Tutorial—1-4 hours. Prerequisite(s): LIN 300 or LIN 301 or LIN 302 (can be concurrent); and Consent of Instructor. Teaching classes for ESL graduate students. Aiding the ESL undergraduate composition classes; tutoring foreign graduate student Teaching Assistants in pronunciation. Does not fulfill requirement toward the M.A. degree. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

LIN 298—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Graduate standing. (S/U grading only.) Effective: 1997 Winter Quarter.

LIN 299—Research (1-12)
Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

LIN 300—Language Pedagogy (4)
Lecture/Discussion—4 hours. Prerequisite(s): Graduate standing in Linguistics or consent of instructor; concurrent enrollment in LIN 297T recommended. Methods of teaching second languages to nonnative speakers, stressing particularly recent linguistic methodology and techniques, as related to teaching and tutoring in the UC Davis ESL program. Effective: 2013 Fall Quarter.

LIN 301—Teaching Academic Literacy (4)
Practice; Project (Term Project); Seminar—3 hours; Tutorial—14 hours. Prerequisite(s): LIN 300; or Consent of Instructor. Graduate standing. Methods of teaching advanced academic literacy in a second language, with a focus on ESL composition. Lesson development, teaching and tutoring in the UC Davis ESL program. Effective: 2007 Fall Quarter.

LIN 302—Recent Research and Special Projects in TESOL (4)
Lecture—4 hours. Prerequisite(s): LIN 300; LIN 301 Review of recent research in second language acquisition and the teaching of English to speakers of other languages. Continued teaching and tutoring in the UCD ESL clinic. Each student also designs and reports on a classroom research project. Effective: 1997 Winter Quarter.

LIN 305—Second Language Literacy and Technology (4)
Lecture/Discussion—1.5 hours; Web Electronic Discussion—1.5 hours. Prerequisite(s): LIN 002 or equivalent coursework/experience in second language pedagogy; consent of instructor; graduate students only. Limited enrollment. Exploration of literacy theory and critical pedagogy in relation to new instructional and communication technologies. Practicum experience in teaching second language literacy; reflection on connections between theory and practice. Fieldwork requirement. Effective: 2007 Fall Quarter.

LIN 310—Language Pedagogy for Teacher Educators (4)
Fieldwork; Project (Term Project); Seminar—3 hours; Tutorial. Prerequisite(s): Admission to Ph.D. program in Linguistics or Foreign Languages, or permission of instructor; significant language teaching experience. Current issues in second language pedagogy, with a focus on communicative methodology, participatory curriculum design, academic literacy, and the social contexts of teaching. Emphasis on reflective teaching and action research. Mentoring of new language teachers. May be repeated up to 12 unit(s). Effective: 2007 Fall Quarter.

LIN 391—Oral English for ESL Students (3)
Laboratory—2 hours; Lecture—2 hours. Prerequisite(s): Open only to non-native speakers of English with priority enrollment to international student teaching assistants; completion of any required ESL courses or consent of instructor. Course gives non-native English-speaking students, particularly international student teaching assistants, intensive work in oral English to increase fluency, accuracy, and use of appropriate discourse strategies in academic settings(e.g., seminar, discussion, laboratory). Course may be repeated for credit with consent of coordinator. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

LIN 391—Oral English for ESL Students (3) Discontinued
Laboratory—2 hours; Lecture—2 hours. Prerequisite(s): Open only to non-native speakers of English with priority enrollment to international student teaching assistants; completion of any required ESL courses or consent of
instructor. Course gives non-native English-speaking students, particularly international student teaching assistants, intensive work in oral English to increase fluency, accuracy, and use of appropriate discourse strategies in academic settings (e.g., seminar, discussion, laboratory). Course may be repeated for credit with consent of coordinator. May be repeated for credit. (S/U grading only.) Effective: 2019 Winter Quarter.

**LIN 396—Teaching Assistant Training Practicum (1-4)**
Variable. Prerequisite(s): Graduate standing. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

### Genetics & Genomics; Molecular & Cellular Biology

#### Genetics & Genomics; Molecular & Cellular Biology | Genetics & Genomics B.S.

(College of Biological Sciences)

Jodi Nunnari, Ph.D., Professor, Chairperson of the Department

**Department Office.** 149 Briggs Hall; 530-752-3611; http://www.mcb.ucdavis.edu

**Faculty.** http://biosci3.ucdavis.edu/Faculty/Profile/FacultyByDept/MCB

**The Genetics and Genomics Major Program**

The Genetics and Genomics major provides a broad background in the biological, mathematical, and physical sciences basic to the study of heredity, gene expression and evolution. The major is sufficiently flexible to accommodate students interested in the subject either as a basic discipline in the biological sciences or in terms of its applied aspects such as biotechnology, medicine, and agriculture.

**The Program.** The Genetics and Genomics program begins with the four-course, upper division core curriculum that provides an introduction to the principles of genetics, biochemistry, and cell biology. Students then take additional upper division courses in specialized areas of modern genetics including gene expression, evolution, development, human genetics and genomics, as well as a laboratory courses in the principles of genetics and genomics. Additional upper division courses in biological sciences, as well as internship/research coursework can be chosen to fulfill required elective units.

**Career Alternatives.** The Genetics and Genomics degree provides suitable preparation for a wide variety of careers, including teaching, research, work with biotechnology companies, medicine, and all the health sciences. It is also an excellent background for students wishing to continue their education in a graduate program, a teaching-training program, medical school, veterinary school, or other professional schools.

**Master Advisor.** Ted Powers

**Advising.** Biology Academic Success Center (BASC); 1023 Sciences Laboratory Building; 530-752-0410; http://www.biosci.ucdavis.edu/BASC.

**Graduate Study.** See Integrative Genetics and Genomics (Graduate Group).

Upper division courses in genetics or other fields relevant to the student's interest chosen in consultation with the adviser. No more than four units of 192, 193, 194H, 198, or 199 may be used for credit in this category.

**Total: 96-114**

### Genetics & Genomics; Molecular & Cellular Biology | MCB Courses

#### Courses in MCB:

**MCB 010—Introduction to Human Heredity (4)**
Discussion—1 hour; Lecture—3 hours. Topics in human heredity and human gene structure and function, including the genetic basis of human development, causes of birth defects, mental retardation, genetic diseases, sexual determination, development, and behavior. GE credit: QL, SE, SL. Effective: 2004 Spring Quarter.

**MCB 023—Biography of Cancer: Past, Present and Future (3)**

**MCB 099—Special Study (1-5)**
Independent Study—3-15 hours. Prerequisite(s): Consent of Instructor. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

**MCB 110Y—iBioseminars in Cell and Molecular Biology (3)**
Lecture/Discussion—2 hours; Web Electronic Discussion—1.5 hours; Web Virtual Lecture—1.5 hours. Prerequisite(s): BIS 101; BIS 102; (BIS 103 or BIS 105); BIS 104 Hybrid course in Cell and Molecular Biology for senior level (1) Biochemistry/Molecular Biology; (2) Genetics; or (3) Cell Biology majors. Face-to-face instruction combined with online lectures available at iBioseminars website delivered by leading researchers in Cell and Molecular Biology. Students who have previously taken MCB 110V cannot receive credit for MCB 110Y. GE credit: SE, SL. Effective: 2014 Fall Quarter.

**MCB 120—Molecular Biology and Biochemistry Laboratory Associated Lecture (3)**
Discussion/Laboratory—1 hour; Lecture—2 hours. Prerequisite(s): BIS 102; or Consent of Instructor. Pass One restricted to upper division Biochemistry & Molecular Biology majors; concurrent enrollment in MCB 120L required; on-time attendance for first lecture is mandatory. Introduction to laboratory methods and procedures employed in studying molecular biology and biochemical processes. Lecture component for MCB 120L. GE credit: SE, SL. Effective: 2018 Winter Quarter.
MCB 120L—Molecular Biology and Biochemistry Laboratory (3)
Laboratory—10 hours. Prerequisite(s): BIS 102; or Consent of Instructor. Must be taken concurrently with MCB 120. Pass One restricted to upper division Biochemistry & Molecular Biology majors; concurrent enrollment in MCB 120 required; on-time attendance for first lab is mandatory. Introduction to laboratory methods and procedures employed in studying molecular biology and biochemical processes. Designed for students who need experience in use of molecular biology and biochemical techniques as research and analytical tools. GE credit: QL, SE, VL, WE. Effective: 2018 Winter Quarter.

MCB 121—Advanced Molecular Biology (3)
Lecture—3 hours. Prerequisite(s): BIS 101; (BIS 102 (can be concurrent) or BIS 105 (can be concurrent) or ABI 102 (can be concurrent)); BIS 102 or BIS 105 or ABI 102 can be concurrent although prior completion is recommended. Structure, expression, and regulation of eukaryotic genes. Chromosome structure and replication; gene structure, transcription, and RNA processing; protein synthesis and translation control; development, immune system, and oncogenes. Not open for credit to students who have completed MCB 161. GE credit: QL, SE, SL. Effective: 2014 Fall Quarter.

MCB 123—Behavior and Analysis of Enzyme and Receptor Systems (3)
Lecture—3 hours. Prerequisite(s): BIS 103 Introduction to the principles of enzyme kinetics and receptor-ligand interactions with emphasis on metabolic regulation and data analysis. Topics include simultaneous equilibria, chemical and steady-state kinetics, allosteric enzymes, multireactant systems, enzyme assays, membrane transport and computer-assisted simulations and analyses. GE credit: QL, SE. Effective: 1997 Winter Quarter.

MCB 124—Macromolecular Structure and Function (4)
Lecture—4 hours. Prerequisite(s): BIS 103; CHE 118C An in-depth investigation into protein and nucleic acid structure and thermodynamics and how these properties influence their biological functions. Key examples of important functional classes of these molecules will be examined. Not open for credit to students who have completed MCB 122 or CHE 108. GE credit: SE. Effective: 2012 Fall Quarter.

MCB 126—Plant Biochemistry (3)
Lecture—3 hours. Prerequisite(s): BIS 103 or BIS 105 The biochemistry of important plant processes and metabolic pathways. Discussion of methods used to understand plant processes, including use of transgenic plants. (Same course as PLB 126.) GE credit: SE, SL. Effective: 2008 Spring Quarter.

MCB 138—Undergraduate Seminar in Biochemistry (1)
Seminar—1 hour. Prerequisite(s): BIS 103 Discussion of the historical developments of modern biochemistry or current major research problems. May be repeated twice for credit when topic differs. May be repeated up to 2 time(s). (P/NP grading only.) GE credit: OL, SE. Effective: 1997 Winter Quarter.

MCB 139—Undergraduate Seminar in Biochemistry (2)
Seminar—2 hours. Prerequisite(s): BIS 103 Discussion of the historical developments of modern biochemistry or current major research problems. May be repeated up to 2 time(s) when topic differs. (P/NP grading only.) GE credit: OL, SE. Effective: 2015 Spring Quarter.

MCB 140—Cell Biology Laboratory Associated Lecture (3)
Discussion/Laboratory—1 hour; Lecture—2 hours. Prerequisite(s): BIS 104; or Consent of Instructor. Pass One restricted to upper division Cell Biology majors; concurrent enrollment in MCB 140L required; on-time attendance for first lecture is mandatory. Lectures illustrating the principles of cell biology with emphasis on light microscopy. Accompanies MCB 140L. GE credit: OL, SE, SL, WE. Effective: 2020 Winter Quarter.

MCB 140L—Cell Biology Laboratory (5)
Discussion—1 hour; Laboratory—6 hours; Lecture—2 hours. Prerequisite(s): BIS 104 (can be concurrent) Exercises illustrating the principles of cell biology with emphasis on light microscopy. GE credit: OL, QL, SE, SL, VL. Effective: 2009 Winter Quarter.

MCB 142—Advanced Cell Biology: Contractile and Motile Systems (4)
Lecture—3 hours; Term Paper. Prerequisite(s): BIS 102; BIS 104 (can be concurrent); MAT 016B Advanced cell biology with emphasis on molecular, biophysical and cellular properties of contractile and motile systems. GE credit: SE. Effective: 1998 Spring Quarter.

MCB 143—Cell and Molecular Biophysics (3)
Lecture—3 hours. Prerequisite(s): BIS 101; BIS 102; BIS 103; BIS 104 Physical chemical principles by which molecules form living, moving, reproducing cells. Physical nature of cytoplasm; molecular structure/bonding in macromolecules, macromolecular assemblies and protein machines. Physical techniques and modeling of
cytoskeletal polymer-motor dynamics and function during intracellular transport, mitosis and motility. GE credit: QL, SE. Effective: 2008 Fall Quarter.

MCB 144—Mechanisms of Cell Division (3)
Lecture—3 hours. Prerequisite(s): BIS 101; BIS 102; BIS 104 The molecules and mechanisms that allow eukaryotic cells to coordinate cell growth, DNA replication, segregation of chromosomes and cell division. GE credit: SE, WE. Effective: 2002 Winter Quarter.

MCB 145—Assembly and Function of Cell Signaling Machinery (3)
Lecture—3 hours. Prerequisite(s): BIS 101; BIS 102; BIS 104 Molecular basis of cell signaling, including positioning of cellular machinery, components of various signaling pathways, and downstream effects of signaling on cell adhesion, cell differentiation, and programmed cell death. GE credit: SE. Effective: 2002 Spring Quarter.

MCB 148—Undergraduate Seminar in Cell Biology (2)
Seminar—2 hours. Prerequisite(s): Upper division standing in the biological sciences or a related discipline. Student reports on current topics in cell biology with emphasis on integration of concepts, synthesis, and state-of-the-art research approaches. Reviews of literature and reports of undergraduate research may be included. May be repeated for credit. (P/NP grading only.) GE credit: OL, SE. Effective: 1997 Winter Quarter.

MCB 150—Developmental Biology (4)
Lecture—4 hours. Prerequisite(s): BIS 101 Analysis of the mechanistic basis for animal development with a focus on experimental evidence and the relevant fundamental experimental strategies. Fertilization and early development, morphogenesis and patterning, cell differentiation, regulation of cell proliferation and tissue growth. GE credit: SE, SL. Effective: 2012 Fall Quarter.

MCB 158—Undergraduate Seminar in Developmental Biology (2)
Seminar—2 hours. Prerequisite(s): Upper division standing in the biological sciences or a related discipline. Student reports on current topics in cell biology with emphasis on integration of concepts, synthesis, and state-of-the-art research approaches. Reviews of literature and reports of undergraduate research may be included. May be repeated for credit. May be repeated for credit. (P/NP grading only.) GE credit: OL, SE. Effective: 1997 Winter Quarter.

MCB 160—Genetics Laboratory Associated Lecture (3)
Discussion/Laboratory—1 hour; Lecture—2 hours. Prerequisite(s): BIS 101; or Consent of Instructor. Pass One restricted to upper division Genetics and Genomics majors; concurrent enrollment in MCB 160L required; on-time attendance for first lecture is mandatory. Lecture instruction in the theoretical basis of laboratory techniques in transmission and molecular genetics, discussion of lab results and experiment interpretation. GE credit: QL, SE, WE. Effective: 2019 Spring Quarter.

MCB 160L—Principles of Genetics Laboratory (5)
Discussion/Laboratory—1 hour; Laboratory—6 hours; Lecture—2 hours. Prerequisite(s): BIS 101 Laboratory work in basic and molecular genetics including gene mapping, isolation and characterization of mutants in eukaryotic model systems, reverse genetics, gel electrophoresis, recombinant DNA techniques, and PCR. GE credit: QL, SE, VL, WE. Effective: 2012 Fall Quarter.

MCB 162—Human Genetics and Genomics (3)
Lecture—3 hours. Prerequisite(s): BIS 101 The human genome and genetic variation in human populations, molecular and genomic approaches in the practice of human genetics, epigenetic gene regulation, personal genetics and genomic medicine. GE credit: QL, SE, SL. Effective: 2016 Fall Quarter.

MCB 163—Developmental Genetics (3)
Lecture—3 hours. Prerequisite(s): MCB 121 (can be concurrent) Current aspects of developmental genetics. Historical background and current genetic approaches to the study of development of higher animals. GE credit: SE. Effective: 2017 Fall Quarter.

MCB 164—Advanced Eukaryotic Genetics (3)
Lecture—3 hours. Prerequisite(s): MCB 121 Five basic operations of genetic analysis: mutation, segregation, recombination, complementation, and regulation. Emphasis on the theory and practice of isolating and analyzing mutations, as well as understanding mechanisms underlying both Mendelian and epigenetic inheritance. GE credit: SE, SL. Effective: 2011 Fall Quarter.

MCB 178—Undergraduate Seminar in Molecular Genetics (1)
Seminar—1 hour. Prerequisite(s): BIS 101; MCB 121 (can be concurrent); Upper division standing, and completion or concurrent enrollment in MCB 121. Discussion of current topics in molecular genetics to show advanced
applications of basic principles and to highlight professional career opportunities. May be repeated up to 1 time(s) when topic differs. (P/NP grading only.) GE credit: OL, SE. Effective: 2011 Fall Quarter.

**MCB 182—Principles of Genomics (3)**
Lecture—3 hours. Prerequisite(s): BIS 101 Fundamentals of genomics, including structural genomics, functional genomics, proteomics, and bioinformatics, focusing on the impact of these disciplines on research in the biological sciences. Social impacts of genomic research. GE credit: SE. Effective: 2017 Winter Quarter.

**MCB 190C—Undergraduate Research Conference (1)**
Discussion—1 hour. Prerequisite(s): MCB 193 (can be concurrent) or MCB 199 (can be concurrent); and Consent of Instructor. Upper division standing; MCB 193 or MCB 199 required concurrently. Presentation and discussion of current research by faculty and students. May be repeated for credit. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

**MCB 191—Introduction to Research (1)**
Seminar—1 hour. Prerequisite(s): BIS 102 (can be concurrent); or Consent of Instructor. Various topics in molecular and cellular biology including biochemistry, genetics, and cell biology will be discussed, along with ways undergraduates can participate in research projects of faculty members. May be repeated for credit. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

**MCB 192—Internship (1-12)**
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Completion of 84 units. Technical and/or practical experience on and off campus, supervised by a member of the Section of Molecular and Cellular Biology faculty. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

**MCB 193—Advanced Research (3)**
Discussion—1 hour; Laboratory—6 hours. Prerequisite(s): Consent of Instructor. Upper division standing, completion of an upper division Molecular and Cellular Biology laboratory course. Research project carried out under the supervision of a faculty sponsor. Discussion and analysis of results and proposed experiments on a weekly basis with faculty sponsor. May include presentation of a seminar to a research group. May be repeated for credit. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

**MCB 194—Thesis Research (3)**
Independent Study—9 hours. Prerequisite(s): Consent of Instructor. 6 units of course 193 and/or 199 with faculty director; senior standing. Continuation of an intensive, individual laboratory research project in biochemistry, genetics, or cell biology culminating with the presentation of the work in a written thesis and in a seminar. (P/NP grading only.) GE credit: OL, SE, WE. Effective: 2015 Fall Quarter.

**MCB 194H—Research Honors (3)**
Independent Study—9 hours. Prerequisite(s): Consent of Instructor. 6 units of MCB 193 and/or MCB 199 with faculty director; senior standing; GPA of at least 3.250. Honors project. Continuation of an intensive, individual laboratory research project in biochemistry, genetics, or cell biology culminating with the presentation of the work in a written thesis and in a seminar. (P/NP grading only.) GE credit: OL, SE, WE. Effective: 1997 Winter Quarter.

**MCB 197T—Tutoring in Molecular and Cellular Biology (1-5)**
Tutorial—2-6 hours. Prerequisite(s): Consent of Instructor. Upper division standing, completion of course to be tutored. Assisting the instructor in one of the section's regular courses by tutoring individual or small groups of students in a laboratory, in voluntary discussion groups, or other voluntary course activities. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 2004 Fall Quarter.

**MCB 198—Directed Group Study (1-5)**
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

**MCB 199—Special Study for Advanced Undergraduates (1-5)**
Independent Study—3-15 hours. Prerequisite(s): Consent of Instructor. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

**MCB 248—Seminar in Cell Biology (2)**
Seminar—2 hours. Prerequisite(s): Consent of Instructor. Discussion of recent literature on the physical and chemical aspects of organization and function of living systems, topics of current interest in ultrastructure and function of cells. Organizational and functional properties of the molecular and cellular levels of biological systems. May be repeated for credit. Effective: 1997 Winter Quarter.
Geographic Information Systems Minor; Biological & Agricultural Engineering

Geographic Information Systems Minor; Biological & Agricultural Engineering | Geographic Information Systems Minor

(College of Agricultural and Environmental Sciences)

The Department of Biological and Agricultural Engineering offers a minor in Geographic Information Systems with an emphasis on spatial analysis. This minor is ideal for students interested in information processing of spatial data related to remote sensing, land information systems, marine cartography, thematic mapping, surface modeling, environmental modeling resources management, public utility planning, emergency response, geomarketing, geotechnics, precision agriculture, archaeology, military exercises, and computer-aided design. Prerequisites include MAT 016A-016B, STA 013 or PLS 120 or ECI 114, and PLS 021 or ECS 015.

Minor Advisors. S. K. Upadhyaya, S.G. Vougioukas (Biological and Agricultural Engineering Department)

Geographic Studies Minor; Environmental Design

(Office of Agricultural and Environmental Sciences)

(Department of Human Ecology)

The minor in Geographic Studies is defined by its concern with place. Geographers strive to answer spatial questions regarding the Earth’s surface; to describe and explain the character of regions; to ascertain the ways in which historical and contemporary humans have used and shaped the Earth’s surface; and to understand the interactions of physical, biotic, and human systems within our global environment. The minor is compatible with a variety of environmental majors in the college.

The minor is sponsored by the Department of Human Ecology, Landscape Architecture and Environmental Design Program.

Minor Advisor. S. E. Greco; see staff advisor Sharla Cheney, 135 Hunt Hall, scheney@ucdavis.edu.

Geography (Graduate Group)

Geography (Graduate Group) | GEO Information
Robert Hijmans, Ph.D., Chairperson of the Group

Group Office. Carrie Armstrong-Ruport, Student Affairs Officer; 133 Hunt Hall 530-752-4119; caruport@ucdavis.edu; http://geography.ucdavis.edu

Faculty, http://geography.ucdavis.edu/people/faculty

Geography (Graduate Group) | GEO M.A.
Robert Hijmans, Ph.D., Chairperson of the Group

Group Office. Carrie Armstrong-Ruport, Student Affairs Officer; 133 Hunt Hall 530-752-4119; caruport@ucdavis.edu; http://geography.ucdavis.edu

Faculty, http://geography.ucdavis.edu/people/faculty

Graduate Study. The Graduate Group in Geography (GGG) offers programs of study and research leading to the M.A. and Ph.D. degrees. Faculty and students share a common interest in spatial interaction between humans and the biophysical environment. The wide faculty interests attract a diverse set of students in such areas as biogeography, urban forestry and related natural science and engineering fields, as well as human geography and related social science fields. A number of faculty members use and teach geographic information systems, remote
sensing, and related geographic techniques, and most have a strong field orientation. The strengths of the Davis campus and its faculty enable the program to focus on important issues including people, place and power, community and regional identity and change, people-environment interaction, agricultural sustainability, landscape architecture, environmental change, biogeography, natural resource management, and technological innovations in computing and the use of geographic information systems. Students are mentored by faculty across the many colleges of the university.

**Preparation.** Most students considered for admission will have an undergraduate major in geography or in a closely related field. Generally, a student without an undergraduate degree in geography will be required to complete the equivalent of a minor in geography, consisting of one course each in human geography, physical geography and geographic methods, plus any additional undergraduate coursework required as background for the student's research emphasis, as determined by the student's guidance committee.

**Graduate Advisors.** Ryan Galt (Human Ecology), Robert Hijmans (Environmental Science and Policy), Jay Lund (Civil and Environmental Engineering), James Quinn (Environmental Science and Policy)

**Geography (Graduate Group) | GEO Ph.D.**

Robert Hijmans, Ph.D., Chairperson of the Group

**Geography (Graduate Group) | GEO Courses**

Courses in GEO:

**GEO 200A—Research Trends in Geography (1)**

Seminar—1 hour. Major current research themes and trends in geography. (S/U grading only.) Effective: 1999 Fall Quarter.

**GEO 200AN—Geographical Concepts (4)**

Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Graduate standing in Geography or consent of instructor. Concepts and thematic content of the discipline, including contemporary research questions. A brief review of the history of geographic thought and practice is done at the beginning of the course. Effective: 2011 Fall Quarter.

**GEO 200BN—Theory & Practice of Geography (4)**

Lecture/Discussion—4 hours. Prerequisite(s): Graduate standing. Class size limited to 20. Development, application, and philosophical background of theory in discipline of geography and geographical knowledge production. Similarities and differences in theories employed in physical and human geography and cartography. Geographic

998
contributions to interdisciplinary theory bridging biophysical sciences, social sciences, and humanities. Effective: 2011 Fall Quarter.

**GEO 200CN—Quantitative Geography (4)**
Laboratory—6 hours; Lecture—2 hours. Class size limited to 25 students. Provides an overview of quantitative approaches in spatial data analysis. Overview of different approaches used for inference, modeling, and prediction. Also learn how to write computer programs to implement these methods. Effective: 2012 Spring Quarter.

**GEO 200DN—Socio-Spatial Analysis in Geography (4)**
Lecture/Discussion—4 hours. Class size limited to 25. Introduction to methodologies of socio-spatial analysis in interviews, and ethnographic fieldwork. Students develop a critical understanding of different methodological and theoretical approaches, and their appropriate applications in overall research design. Effective: 2011 Fall Quarter.

**GEO 200E—Advanced Research Design in Geography (2)**
Lecture/Discussion—2 hours. Prerequisite(s): GEO 200AN; GEO 200BN; GEO 200CN; GEO 200DN; Graduate standing. Class size limited to 15. Helps Ph.D. students develop their research question, design their research plan and complete a full dissertation research proposal. Effective: 2011 Fall Quarter.

**GEO 201—Sources and General Literature of Geography (4)**
Discussion—4 hours. Prerequisite(s): Consent of Instructor. Graduate standing in geography. Designed for students preparing for higher degrees in geography. May be repeated for credit in one or more of the following subfields: physical, cultural, economic, urban, historical, political, conservation, and regional geography. May be repeated for credit. Effective: 1997 Winter Quarter.

**GEO 210—Topics in Biogeography (3)**
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): EVE 147 or WFC 156 (can be concurrent); Or equivalent. Consent of instructor required for undergraduates. Current topics in historical and ecological biogeography, including macroecology and areography, GIS and remote sensing, phylogeography, vegetation, plant and animal community and species geography. Systematics, climate change, and conservation will be addressed. Effective: 2004 Fall Quarter.

**GEO 211—Physical Geography Traditions and Methods (3)**
Discussion/Laboratory—2 hours; Term Paper. Prerequisite(s): Introductory course in physical geography. Graduate-level standing in geography or related discipline. Discussion of the physical science tradition in geography, including key concepts and current research in climatology, geomorphology, soils geography, biogeography, climate change, watershed science, and coastal studies. Research paradigms, programs, and methods as used by physical geographers will be discussed. May be repeated up to 3 time(s). Effective: 2008 Fall Quarter.

**GEO 212—Water Resource Management (3)**
Lecture—3 hours. Prerequisite(s): GEO 114; GEO 141; GEO; 142; GEO 153 recommended. Engineering, institutional, economic, and social basis for managing local and regional water resources. Examples in the context of California's water development and management. Uses of computer modeling to improve water management. (Same course as ECI 267) Effective: 2013 Fall Quarter.

**GEO 214—Seminar in Geographical Ecology (2)**
Seminar—2 hours. Prerequisite(s): EVE 100 or EVE 101; or Consent of Instructor. Recent developments in theoretical and experimental biogeography, historical biogeography and related themes in systematics, the biology of colonizing species, and related topics. May be repeated for credit. (Same course as PBG 296.) (S/U grading only.) Effective: 2013 Spring Quarter.

**GEO 215—Ecologies of Infrastructure (4)**
Seminar—4 hours. Open to graduate standing or consent of instructor. Focus on design practices and theory associated with ecological conceptions of infrastructure, including networked infrastructure, region, bioregion, regionalization, ecological engineering, reconciliation ecology, novel ecosystems, and theory/articulation of landscape change. (Same course as LDA 215.) Effective: 2016 Winter Quarter.

**GEO 220—Topics in Human Geography (4)**
Seminar—4 hours. Prerequisite(s): Graduate standing or consent of instructor. Class size limited to 20 students. Examination of philosophy and theory in human geography with an emphasis on contemporary debates and concepts in social, cultural, humanistic, political, and economic geographies. Specific discussion of space, place, scale and landscape; material and imagined geographies. Effective: 2016 Winter Quarter.

**GEO 230—Citizenship, Democracy, & Public Space (4)**
Seminar—4 hours. Prerequisite(s): Graduate standing or consent of instructor. Introduction to seminal works in
political theory, philosophy, and the social sciences that focus on citizenship and the public sphere; development of critical perspective regarding restructuring of public space in a pluralistic and global culture; discussion of contemporary case studies. (Same course as LDA 200.) Effective: 2012 Fall Quarter.

**GEO 233—Urban Planning and Design (4)**
Discussion—2 hours; Lecture—2 hours. Limited to graduate students. Regulation, design, and development of the built landscape, planning and land development processes, zoning and subdivision regulation, site planning, urban design goals and methods, public participation strategies, creatively designing landscapes to meet community and ecological goals. (Same course as LDA 205.) Effective: 2016 Winter Quarter.

**GEO 236—Transportation Planning and Policy (4)**
Lecture/Discussion—4 hours. Limited enrollment. Transportation planning process at the regional level, including the role of federal policy in shaping regional transportation planning, tools and techniques used in regional transportation planning, issues facing regional transportation planning agencies, pros and cons of potential solutions and strategies. Students taking this course previously as TTP 289 cannot repeat it for credit; taking other TTP 289 offerings does not preclude taking TTP 220 for credit. (Same course as TTP 220.) Effective: 2013 Winter Quarter.

**GEO 240—Community Development Theory (4)**
Lecture/Discussion—4 hours. Introduction to theories of community development and different concepts of community, poverty, and development. Emphasis on building theory, linking applied development techniques to theory, evaluating development policy, and examining case studies of community development organizations and projects. (Same course as CRD 240.) Effective: 2014 Winter Quarter.

**GEO 241—The Economics of Community Development (4)**
Seminar—4 hours. Prerequisite(s): Graduate standing. Economic theories and methods of planning for communities. Human resources, community services and infrastructure, industrialization and technological change, and regional growth. The community's role in the greater economy. (Same course as CRD 241.) Effective: 2015 Spring Quarter.

**GEO 245—The Political Economy of Urban and Regional Development (4)**
Lecture—4 hours. Prerequisite(s): CRD 157; CRD 244; Or the equivalent. How global, political and economic restructuring and national and state policies are mediated by community politics; social production of urban form; role of the state in uneven development; dynamics of urban growth and decline; regional development in California. (Same course as CRD 245.) Effective: 2014 Spring Quarter.

**GEO 246—The Political Economy of Transnational Migration (4)**
Lecture—4 hours. Prerequisite(s): Graduate standing. Theoretical perspectives and empirical research on social, cultural, political, and economic processes of transnational migration to the U.S. Discussion of conventional theories will precede contemporary comparative perspectives on class, race, ethnicity, citizenship, and the ethnic economy. (Same course as CRD 246.) Effective: 2014 Winter Quarter.

**GEO 248—Social Policy, Welfare Theories and Communities (4)**
Seminar—4 hours. Prerequisite(s): Graduate standing. Theories and comparative histories of modern welfare states and social policy in relation to legal/normative, organizational, and administrative aspects. Analysis of specific social issues within the U.S./California context. Not open for credit to students having completed CRD 248A and CRD 248B. (Same course as CRD 248.) Effective: 2011 Fall Quarter.

**GEO 254—Political Ecology of Community Development (4)**
Lecture—4 hours. Prerequisite(s): Graduate standing. Community development from the perspective of geographical political ecology. Social and environmental outcomes of the dynamic relationship between communities and land-based resources, and between social groups. Cases of community conservation and development in developing and industrialized countries. (Same course as CRD 244.) Effective: 2014 Winter Quarter.

**GEO 260—Global Political Ecology (4)**
Seminar—3 hours; Term Paper/Discussion—1 hour. Open to graduate students only or consent of instructor. Background, genesis, current debates in political ecology. Examination of political-economic and social-cultural causes of environmental change. Introduction to development theory, globalization, history of science and power/knowledge. Cases of social movements, justice, resistance, gender, race and class. Focus outside North America. Effective: 2014 Fall Quarter.

**GEO 279—Exploring Data from Built Environment Using R (4)**
Laboratory—3 hours; Lecture—3 hours. Introduction to modern data science, specifically data acquisition, exploratory data, visualization, and beginning data analysis using R. Emphasizes computational reasoning and
working with tabular and non-standard data. Focus will be on data generated in the built environment. (Same course as ECI 254.) Effective: 2017 Fall Quarter.

**GEO 280—Field Studies in Geography (3)**
Fieldwork—6 hours; Lecture—1 hour. Prerequisite(s): Consent of Instructor. Undergraduate or graduate coursework in geography. Limited to 20 students. A topic or subdiscipline of geography will form the theme for the course in any given offering, with a focus on current research on this topic, field methodologies, and data analysis in human and physical geography. May be repeated up to 2 time(s). Effective: 2005 Spring Quarter.

**GEO 281—Transportation Survey Methods (4)**
Lecture—4 hours. Prerequisite(s): (STA 013 or STA 013Y); ECI 251 recommended. Description of types of surveys commonly used in transportation demand modeling, including travel and activity diaries, attitudinal, panel, computer, and stated-response surveys. Discussion of sampling, experimental design, and survey design issues. Analysis methods, including factor, discriminant and cluster analysis. Not open for credit to students who have taken ECI 255. (Same course as TTP 200.) Effective: 2018 Spring Quarter.

**GEO 286—Selected Topics in Environmental Remote Sensing (3)**
Discussion—2 hours; Lecture—1 hour; Project (Term Project). Prerequisite(s): ERS 186; and Consent of Instructor. Or equivalent required; ERS 186L recommended. In depth investigation of advanced topics in remote sensing applications, measurements, and theory. May be repeated for credit. (Same course as HYD 286.) Effective: 2014 Fall Quarter.

**GEO 290—Seminar in Geography (1-3)**
Seminar—1-3 hours. Prerequisite(s): Graduate standing or consent of instructor. Seminar focuses on specified topical areas within geography, which will vary quarter to quarter. Students expected to present an oral seminar on an aspect of the general topic under discussion. May be repeated up to 6 time(s). (S/U grading only.) Effective: 2008 Fall Quarter.

**GEO 291—Seminar in Cultural Geography (4)**
Seminar—3 hours. Effective: 1997 Winter Quarter.

**GEO 293—Graduate Internship (1-12)**
Variable—3-36 hours. Prerequisite(s): Consent of Instructor. Individually designed, supervised internship, off campus, in community or institutional setting. Developed with advice of faculty mentor. May be repeated for credit. (S/U grading only.) Effective: 2004 Spring Quarter.

**GEO 295—Seminar in Urban Geography (4)**
Seminar—3 hours. Effective: 1997 Winter Quarter.

**GEO 297—Graduate Group in Geography (2)**
Lecture/Discussion—1 hour; Term Paper. Prerequisite(s): Graduate standing. Seminars by UC Davis faculty and prominent national and international scholars; research presentations by Graduate Group in Geography Ph.D. candidates. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

**GEO 298—Group Study (1-5)**
Seminar—1 hour. Prerequisite(s): Graduate standing or consent of instructor. May be repeated up to 10 unit(s). (S/U grading only.) Effective: 2000 Spring Quarter.

**GEO 299—Research (1-12)**
Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

**GEO 299D—Individual Study (1-12)**
Variable. Prerequisite(s): and Consent of Instructor. Graduate student status in Geography. (S/U grading only.) Effective: 1997 Winter Quarter.

**GEO 396—Teaching Assistant Training Practicum (1-4)**
Review all entries
Variable. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

**GEO 396—Teaching Assistant Training Practicum (1-4)**
Review all entries Discontinued
Variable. May be repeated for credit. (P/NP grading only.) Effective: 2019 Winter Quarter.

**Geology**

Geology | GEL Information
“Civilization exists by geological consent—subject to change without notice.”—Will Durant

Geology is the study of the Earth, and in particular its history, structure, and the processes that have molded our planet and its biosphere. Geology involves the origin of continents and ocean basins, earthquakes and volcanoes, variations in global climate, and how these physical changes impact the evolution of life. All of these planetary processes are viewed through the prism of “deep time,” a perspective unique to geologists and one that distinguishes geology from most of the other physical sciences.

A significant component of geology is oriented toward the interaction between humans and the Earth. This aspect includes the study of resources such as minerals, oil, and water; identification and mitigation of Earth hazards such as earthquakes, landslides, floods, and volcanic eruptions; identification and mitigation of polluted ground water; land use planning; and the study of ancient and modern climate change.

The Program. Students interested in becoming professional geologists or continuing their geological studies at the graduate level should choose the Bachelor of Science degree program. The Bachelor of Arts program is for students interested in an interdisciplinary program of study, or who plan to go into pre-college teaching. Both programs allow students to emphasize an aspect of the field of particular interest to them. The upper division electives are not restricted to geology courses but must be chosen to provide a relevant, coherent, and in-depth program of study. Transfer students should have completed as much as possible of the preparatory subject matter listed below.

Internships and Career Alternatives. In recent years in California, the largest employers of geologists have been environmental and geotechnical consulting firms, with oil companies, research laboratories and government agencies also providing opportunities. Students graduating with a Bachelor's degree may get entry-level positions in the private sector or they may go on to attain their teaching credential to fill the growing need for science teachers at all pre-college levels. A Master's degree is the most versatile professional level degree, and a Ph.D. is generally required for research and academic positions. Internships are strongly encouraged for undergraduates and are a means of exploring potential career opportunities that can lead to positions after graduation. UC Davis students have interned at the California Division of Mines and Geology, the State Department of Water Resources, CAL-EPA, and various consulting firms. For more information, see http://geology.ucdavis.edu/students/careers/index.php.

Education Abroad Options. The department strongly encourages interested students to pursue a portion of their studies abroad. Within the constraints of the campus and College residence requirements, it is possible for students to complete significant portions of the Geology major at an international institution provided that the student consults with one of the undergraduate advisors and carefully plans a course of study abroad that will complement their coursework at Davis. In recent years, UC Davis Geology majors have spent their junior or senior years completing upper division coursework at EAP partner institutions in New Zealand, Ghana, Chile, and the United Kingdom. For more information, see http://geology.ucdavis.edu/students/undergrad/eap.php.

**Geology | GEL Courses**

**Courses in GEL:**

**GEL 001—The Earth (4)** *[Review all entries]*
Discussion—1 hour; Lecture—3 hours. Introduction to the study of the Earth. Earth's physical and chemical structure; internal and surface processes that mold the Earth; geological hazards and resources. Not open for credit to students who have taken GEL 050; only 2 credits for students who have taken GEL 002. GE credit: SE, SL, WE. Effective: 2013 Fall Quarter.

**GEL 001—The Earth (4)** *[Review all entries]*
Discussion—1 hour; Lecture—3 hours. Introduction to the study of the Earth. Earth's physical and chemical structure; internal and surface processes that mold the Earth; geological hazards and resources. Not open for credit to students who have taken GEL 050; only 2 credits for students who have taken GEL 002. GE credit: SE, SL. Effective: 2019 Winter Quarter.

**GEL 002—Earth System Science (3)**
Lecture—3 hours. Solid and fluid earth and its place in the solar system. How the solid earth interacts with the atmosphere, hydrosphere, biosphere, and extraterrestrial environment. Only 2 units credit for students who have taken GEL 050; only 2 units credit for students who have taken GEL 001. GE credit: SE, SL. Effective: 2017 Winter Quarter.

**GEL 002G—The Blue Planet: Introduction to Earth Science - Discussion (1)** *[Review all entries]*
Discussion—1 hour. Prerequisite(s): GEL 002 (can be concurrent); GEL 002 required concurrently. Small group discussion and preparation of short papers for course 2. GE credit: SE. Effective: 2013 Fall Quarter.

**GEL 002G—Earth System Science Discussion (1)** *[Review all entries]*
Discussion—1 hour. Prerequisite(s): GEL 002 (can be concurrent); GEL 002 required concurrently. Small group discussion and preparation of short papers for GEL 002. GE credit: SE. Effective: 2018 Fall Quarter.

**GEL 003—History of Life (3)**
Lecture—3 hours. Prerequisite(s): GEL 001 recommended. The history of life during the three and onehalf billion years from its origin to the present day. Origin of life and processes of evolution; how to visualize and understand living organisms from their fossil remains. GE credit: SE. Effective: 2013 Fall Quarter.

**GEL 003G—History of Life: Discussion (1)**
Discussion—1 hour. Prerequisite(s): GEL 003 (can be concurrent); GEL 003 required concurrently. Small group discussion and preparation of short papers for course 3. GE credit with concurrent enrollment in course 3: Wrt. GE credit: SE, WE. Effective: 2013 Fall Quarter.

**GEL 003L—History of Life Laboratory (1)**
Laboratory—3 hours. Prerequisite(s): GEL 003 (can be concurrent); GEL 003 required concurrently. Exercises in understanding fossils as the clues to interpreting ancient life, including their functional morphology, paleoecology, and evolution. GE credit: SE. Effective: 2013 Fall Quarter.

**GEL 004—Evolution: Science and World View (3)**
Discussion—1 hour; Lecture—2 hours. Introduction to biological evolution. Emphasis on historical development, major lines of evidence and causes of evolution; relationships between evolution and Earth history; the impact of evolutionary thought on other disciplines. GE credit: SE, SL, WE. Effective: 2013 Fall Quarter.

**GEL 009—Geology Field Experience (1)**
Fieldwork—1 session. Prerequisite(s): Consent of Instructor. At least one previous GEL class, or concurrent enrollment. Pass One open to non-Geology Majors only. Exposure to geologic features and earth processes in the field. Experiential instruction in earth-science concepts, spatial visualization, landscape evolution, deep time, critical thinking skills, and integrative scientific themes. One 4-5 day field trip. May be repeated up to 1 time(s) when field trip destination differs. (P/NP grading only.) GE credit: SE. Effective: 2018 Fall Quarter.
GEL 010—Modern and Ancient Global Environmental Change (3)
Lecture—3 hours. Fundamental scientific concepts underlying issues such as global warming, pollution, and the future of nonsustainable resources presented in the context of anthropogenic processes as well as natural forcing of paleoenvironmental change throughout Earth's history. GE credit: SE, SL, VL. Effective: 2013 Fall Quarter.

GEL 012—Evolution and Paleobiology of Dinosaurs (2)
Lecture—2 hours. Introduction to evolutionary biology, paleobiology, ecology and paleoecology, using dinosaurs as case studies. GE credit: SE. Effective: 2013 Fall Quarter.

GEL 016—The Oceans (3)
Lecture—3 hours. Introductory survey of the marine environment. Oceanic physical phenomena, chemical constituents and chemistry of water, geological history, the seas biota and human utilization of marine resources Not open for credit to students who have taken GEL 116. GE credit: SE, SL. Effective: 2013 Fall Quarter.

GEL 016G—The Oceans: Discussion (2)
Discussion/Laboratory—2 hours; Term Paper/Discussion—4 hours. Prerequisite(s): GEL 016 (can be concurrent) Scientific method applied to discovery of the processes, biota and history of the oceans. Group discussion and preparation of term paper. Not open for credit to students who have taken GEL 116G. GE credit: SE, WE. Effective: 2016 Fall Quarter.

GEL 017—Earthquakes and Other Earth Hazards (2)
Lecture—2 hours. Impact of earthquakes, tsunami, volcanoes, landslides, and floods on humans, structures, and the environment. Discussion of the causes and effects of disasters and catastrophes, and on prediction, preparation, and mitigation of natural hazards. GE credit: SE, WE. Effective: 2013 Fall Quarter.

GEL 018—Energy and the Environment (3)

GEL 018V—Energy and the Environment (3)
Web Electronic Discussion—1.5 hours; Web Virtual Lecture—1.5 hours. Conventional and alternative energy resources and their environmental impacts. Basic principles, historical development, current advantages and disadvantages, future prospects. Oil, natural gas, coal, nuclear, wind, geothermal, water, tidal, solar, hydrogen, and other sources of energy for the 21st century. GE credit: SE, SL, WE. Effective: 2015 Winter Quarter.

GEL 020—Geology of California (2)
Lecture—2 hours. The geologic history of California, the origin of rocks and the environments in which they were formed, the structure of the rocks and the interpretation of their structural history, mineral resources, and appreciation of the California landscape. Offered in alternate years. GE credit: SE, SL, VL. Effective: 2013 Fall Quarter.

GEL 025—Geology of National Parks (3)
Lecture—3 hours. Appreciation of the geologic framework underlying the inherent beauty of U.S. National Parks. Relationship of individual parks to geologic processes such as mountain building, volcanism, stream erosion, glacial action and landscape evolution. GE credit: SE, SL, VL. Effective: 2013 Fall Quarter.

GEL 025V—Geology of National Parks (3)
Web Electronic Discussion—2 hours; Web Virtual Lecture—1 hour. Appreciation of the geologic framework underlying the inherent beauty of U.S. National Parks. Relationship of individual parks to geologic processes such as mountain building, volcanism, stream erosion, glacial action and landscape evolution. No credit for students who have completed GEL 025. GE credit: SE, SL. Effective: 2014 Winter Quarter.

GEL 028—Astrobiology (3)

GEL 030—Fractals, Chaos and Complexity (3)
Lecture/Discussion—3 hours. Prerequisite(s): MAT 016A or MAT 021A Modern ideas about the unifying ideas of fractal geometry, chaos and complexity. Basic theory and applications with examples from physics, earth sciences, mathematics, population dynamics, ecology, history, economics, biology, computer science, art and architecture. Offered in alternate years. (Same course as PHY 030.) GE credit: QL, SE. Effective: 2013 Fall Quarter.
GEL 032—Volcanoes (3)
Lecture—3 hours. Role of eruptions, and eruptive products of volcanoes in shaping the planet's surface, influencing its environment, and providing essential human resources. GE credit: SE. Effective: 2013 Fall Quarter.

GEL 035—Rivers (3)
Lecture—3 hours. Introduction to geomorphology, climate and geology of rivers and watersheds, with case examples from California. Assessment of impacts of logging, agriculture, mining, urbanization and water supply on river processes. Optional river field trips. GE credit: SE, SL. Effective: 2013 Fall Quarter.

GEL 036—The Solar System (4)
Discussion—1 hour; Lecture—3 hours. Nature of the sun, moon, and planets as determined by recent manned and unmanned exploration of the solar system. Comparison of terrestrial, lunar, and planetary geological processes. Search for life on other planets. Origin and evolution of the solar system. (Former course 113-113G.) GE credit: SE, VL, WE. Effective: 2013 Fall Quarter.

GEL 050—Physical Geology (3)
Lecture—3 hours. Prerequisite(s): High school physics and chemistry. The Earth, its materials, its internal and external processes, its development through time by sea-floor spreading and global plate tectonics. Students with credit for GEL 001 or the equivalent may receive only 2 units for GEL 050. GE credit: SE, SL. Effective: 2013 Fall Quarter.

GEL 050L—Physical Geology Laboratory (2)
Laboratory—6 hours. Prerequisite(s): GEL 050 (can be concurrent) Introduction to classification and recognition of minerals and rocks and to interpretation of topographic and geologic maps and aerial photographs. Students with credit for GEL 001L or the equivalent may receive only 1 unit for GEL 050L. GE credit: SE. Effective: 2013 Fall Quarter.

GEL 055—Introduction to Geochemistry (3)
Lecture—3 hours. Prerequisite(s): (GEL 001 or GEL 002 or GEL 050); (CHE 002A or CHE 002AH); (CHE 002B or CHE 002BH) Introduction to key geochemical principles in Earth & Planetary Sciences; chemical bonding, geochemical affinity of elements, redox & acid base equilibria in geological systems, radioactive decay, isotopic fractionation and paleoclimate records. GE credit: QL, SE, VL. Effective: 2016 Fall Quarter.

GEL 056—Introduction to Geophysics (4)
Laboratory—2 hours; Lecture/Discussion—3 hours. Prerequisite(s): (GEL 001 or GEL 050); (PHY 007B or PHY 009B) Introduction to geophysical topics essential to all aspects of Earth and planetary sciences: theory of plate tectonics, gravitational field of planets, diffusion, rheology, seismology, and earthquakes. GE credit: QL, SE, VL. Effective: 2020 Winter Quarter.

GEL 060—Earth Materials: Introduction (4) Review all entries
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): CHE 002A; (MAT 016A or MAT 017A or MAT 021A); (GEL 001 or GEL 050, GEL 050L) Physical and chemical properties of rocks, minerals and other earth materials; structure and composition of rock-forming minerals; formation of minerals by precipitation from silicate liquids and aqueous fluids and by solid state transformations. GE credit: SE. Effective: 2016 Fall Quarter.

GEL 060—Earth Materials: Introduction (4) Review all entries
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): CHE 002A; (MAT 016A or MAT 017A or MAT 021A); (GEL 001 or GEL 050); GEL 050L Physical and chemical properties of Earth materials; structure, chemical composition, and identification of rock-forming minerals; mineral-rock associations, and their origin from silicate liquids, aqueous fluids, and solid state transformations. GE credit: SE. Effective: 2019 Fall Quarter.

GEL 062—Optical Mineralogy (2)
Laboratory—3 hours; Lecture—1 hour. Prerequisite(s): GEL 060 (can be concurrent) Optical properties of inorganic crystals; techniques of mineral identification using the polarizing microscope; strategies for studying rocks in thin section. GE credit: SE, VL. Effective: 2016 Fall Quarter.

GEL 081—Learning in Science and Mathematics (2)
Fieldwork—2 hours; Lecture/Discussion—2 hours. Limited to 26 students per section. Exploration of how students learn and develop understanding in science and mathematics classrooms. Introduction to case studies and interview techniques and their use in K-6 classrooms to illuminate factors that affect student learning. (Same course as EDU 081.) (P/NP grading only.) GE credit: SS, VL, WE. Effective: 2013 Fall Quarter.

GEL 092—Internship (1-12)
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Lower division standing. Work-learn experience on
and off campus in all subject areas offered by the department. Internships supervised by a member of the faculty. May be repeated up to 12 unit(s). (P/NP grading only.) GE credit: SE. Effective: 2013 Fall Quarter.

**GEL 098—Directed Group Study (1-5)**
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. Directed group study. May be repeated up to 3 time(s) content changes. (P/NP grading only.) GE credit: SE. Effective: 2013 Fall Quarter.

**GEL 099—Special Study for Undergraduates (1-5)**
Variable. Prerequisite(s): Consent of Instructor. Lower division standing. Special study for undergraduates. (P/NP grading only.) GE credit: SE. Effective: 2013 Fall Quarter.

**GEL 101—Structural Geology (3)**
Lecture—3 hours. Prerequisite(s): GEL 050; GEL 050L; (PHY 007A or PHY 009A); (MAT 016A or MAT 017A or MAT 021A); Consent of Instructor. Class size limited to 35 students. Study of processes and products of rock deformation. Introduction to structural geology through a survey of the features and geometries of faults and folds, techniques of strain analysis, and continuum mechanics of rock deformation. GE credit: SE. Effective: 2016 Fall Quarter.

**GEL 101L—Structural Geology Lab (2)**
Fieldwork—2 hours; Laboratory—6 hours. Prerequisite(s): GEL 050; GEL 050L; (PHY 007A or PHY 009A); GEL 101 (can be concurrent); Consent of Instructor. Class size limited to 15 students per session. Laboratory study of the processes and products of rock deformation. Introduction to the practice of structural geology through observations and analysis of rock deformation, including field measurement techniques and geologic mapping. GE credit: SE, VL. Effective: 2016 Fall Quarter.

**GEL 103—Field Geology (3) Review all entries**
Fieldwork; Laboratory. Prerequisite(s): GEL 101L; GEL 101; Consent of Instructor. Field mapping projects and writing geological reports. Weekly classroom meetings devoted to preparation of maps, cross sections, stratigraphic sections, rock descriptions, and reports. Seven-eight days on weekends during quarter. GE credit: SE, VL, WE. Effective: 2016 Fall Quarter.

**GEL 103—Field Geology (4) Review all entries**
Fieldwork—6 hours; Lecture—1 hour; Term Paper. Prerequisite(s): GEL 101; GEL 101L Field mapping projects and writing geological reports. Weekly classroom meetings devoted to preparation of maps, cross sections, stratigraphic sections, rock descriptions, and reports. Seven-eight days for field trips will occur on weekends during the quarter. GE credit: SE, SL, VL, WE. Effective: 2020 Spring Quarter.

**GEL 105—Earth Materials: Igneous Rocks (4)**
Laboratory—6 hours; Lecture—2 hours. Prerequisite(s): GEL 060; GEL 062; (MAT 016A or MAT 017A or MAT 021A); CHE 002B (can be concurrent) Origin and occurrence of igneous rocks. Laboratory exercises emphasize the study of these rocks in hand specimen and thin section. GE credit: SE, WE. Effective: 2016 Fall Quarter.

**GEL 106—Earth Materials: Metamorphic Rocks (4)**
Laboratory—6 hours; Lecture—2 hours. Prerequisite(s): GEL 105 Physical and chemical properties of metamorphic rocks; interpretation of metamorphic environments. Laboratory exercises emphasize the study of these rocks in hand specimen and thin section. GE credit: SE, WE. Effective: 2016 Fall Quarter.

**GEL 107—Earth History: Paleobiology (3)**
Lecture—3 hours. Prerequisite(s): GEL 003 or BIS 002A or BIS 010 Evolution and ecological structure of the biosphere from the origin of life to the present. GE credit: SE. Effective: 2016 Fall Quarter.

**GEL 107L—Earth History: Paleobiology Laboratory (2)**
Laboratory—6 hours. Prerequisite(s): (GEL 003, GEL 003L) or BIS 002B; GEL 107 (can be concurrent) Exercises in determining the ecological functions and evolution of individuals, populations, and communities of fossil organisms in field and laboratory. GE credit: SE. Effective: 2016 Fall Quarter.

**GEL 108—Earth History: Paleoclimates (3)**
Lecture—3 hours. Prerequisite(s): (GEL 001 or GEL 050 or GEL 116N or ESP 116N); CHE 002A; Consent of Instructor. Geological and environmental factors controlling climate change, the greenhouse effect with a detailed analysis of the history of Earth's climate fluctuations over the last 600 million years. Past and present climate records are used to examine potential future climatic scenarios. GE credit: SE, SL, WE. Effective: 2016 Fall Quarter.

**GEL 109—Earth History: Sediments and Strata (2) Review all entries**
Lecture—2 hours. Prerequisite(s): GEL 050; GEL 050L Principles of stratigraphic and sedimentologic analysis.
Evaluation of historical and modern global changes in sedimentation within terrestrial and marine environments. Examination of the plate tectonic, climatic and oceanographic factors controlling the distribution and exploitation of economic fluids within sedimentary rocks. GE credit: SE. Effective: 2016 Fall Quarter.

GEL 109—Earth History: Sediments and Strata (3) Review all entries
Lecture—3 hours. Prerequisite(s): (GEL 001 or GEL 050); GEL 050L Sediment formation, transport, and deposition. Interpretations of sedimentary processes across landscapes and through time in the context of environmental and geological problems. Reconstruction of ancient environmental change from sedimentary rocks. GE credit: SE. Effective: 2019 Fall Quarter.

GEL 109L—Earth History: Sediments and Strata Laboratory (2)
Laboratory—6 hours. Prerequisite(s): GEL 109 (can be concurrent) Methods of stratigraphic and sedimentologic analysis of modern and ancient sediments. Identification of major sediment and sedimentary rock types. Outcrop and subsurface analysis of sedimentary basins. GE credit with concurrent enrollment in course 109. Includes four one-day field trips. GE credit: SE, WE. Effective: 2016 Fall Quarter.

GEL 110—Summer Field Geology (8)
Fieldwork. Prerequisite(s): GEL 060; GEL 103; GEL 109; GEL 105 recommended. Advanced application of geologic and geophysical field methods to the study of rocks. Includes development and interpretation of geologic maps and cross sections; gravity, magnetic, electrical resistivity and seismic surveys; and field analysis of plutonic and volcanic rock suites. Eight hours/day, six days/week for six weeks. GE credit: SE, VL, WE. Effective: 2017 Winter Quarter.

GEL 115—Earth Science, History, and People (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): GEL 001 or GEL 050 Study of interplay between the Earth and its human inhabitants through history, including consideration of acute events such as earthquakes and eruptions as well as the geology of resources, topography, and water. GE credit: OL, SE, WE. Effective: 2017 Winter Quarter.

GEL 116N—Oceanography (3)
Fieldwork; Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): GEL 001 or GEL 002 or GEL 016 or GEL 050 Advanced oceanographic topics: Chemical, physical, geological, and biological processes; research methods and data analysis; marine resources, anthropogenic impacts, and climate change; integrated earth/ocean/atmosphere systems; weekly lab and one weekend field trip. (Same course as ESP 116N.) GE credit: SE, SL. Effective: 2017 Winter Quarter.

GEL 120—Origins: From the Big Bang to Today (3)
Lecture—3 hours. Limited enrollment. Long-term and large-scale perspectives on the origins of the universe, stars and planets, life, human evolution, the rise of civilization and the modern world. Multi-disciplinary approach to ‘Big History’ involving cosmology, astronomy, geology, climatology, biology, anthropology, archeology and traditional history. GE credit: SE. Effective: 2013 Fall Quarter.

GEL 130—Non-Renewable Natural Resources (3)
Lecture—3 hours. Prerequisite(s): GEL 001 or GEL 050 Origin, occurrence, and distribution of non-renewable resources, including metallic, nonmetallic, and energy-producing materials. Problems of discovery, production, and management. Estimations and limitations of reserves, and their sociological, political, and economic effects. GE credit: SE, SL. Effective: 2016 Fall Quarter.

GEL 131—Risk: Natural Hazards and Related Phenomena (3)
Lecture—3 hours. Risk, prediction, prevention and response for earthquakes, volcanic eruptions, landslides, floods, storms, fires, impacts, global warming. GE credit: SE, SL. Effective: 2016 Fall Quarter.

GEL 132—Introductory Inorganic Geochemistry (3)
Lecture—3 hours. Prerequisite(s): GEL 060 (can be concurrent); CHE 002B Nucleosynthesis of chemical elements, physical and chemical properties of elements, ionic substitution, elemental partition, distribution and transport among planetary materials, basic thermodynamics and phase diagrams, isotopic geochronometers, stable isotope fractionation, mixing and dilution, advection and diffusion, geochemical cycles. Effective: 2016 Fall Quarter.

GEL 133—Environmental Geochemistry (3)
Lecture—3 hours. Prerequisite(s): CHE 002A; CHE 002B Introduction to Earth surface processes with a focus on topics of current environmental interest such as nuclear power and waste disposal, acid mine drainage, carbon sequestration, history of polar ice sheets and sea level change. Effective: 2020 Spring Quarter.

GEL 134—Environmental Geology and Land Use Planning (3)
Lecture—3 hours. Prerequisite(s): GEL 001 or GEL 050; Consent of Instructor. One course in Geology. Geologic
aspects of land use and development planning. Geologic problems concerning volcanic and earthquake hazards, land stability, floods, erosion, coastal hazards, non-renewable resource extraction, waste disposal, water resources. GE credit: SE, WE. Effective: 2016 Fall Quarter.

GEL 136—Ecogeomorphology of Rivers and Streams (5)
Discussion/Laboratory—2 hours; Fieldwork; Lecture—1 hour; Term Paper. Prerequisite(s): Consent of Instructor. Upper division or graduate standing in any physical science, biological science, or engineering. Restricted to advanced students in the physical sciences, biological sciences, or engineering. Integrative multidisciplinary field analysis of streams. Class project examines hydrology, geomorphology, water quality and aquatic and riparian ecology of degraded and pristine stream systems. Includes cooperative two-week field survey in remote wilderness settings with students from diverse scientific backgrounds. GE credit: SE, WE. Effective: 2013 Fall Quarter.

GEL 138—Introductory Volcanology (4)
Fieldwork—6 hours; Lecture—2 hours. Prerequisite(s): GEL 060; GEL 109; Consent of Instructor. Principles of physical and chemical volcanology. Taught in a volcanically active setting (e.g., Hawaii) with a strong field component. GE credit: SE. Effective: 2016 Fall Quarter.

GEL 139—Rivers: Form, Function and Management (4)
Fieldwork—3 hours; Lecture—3 hours. Prerequisite(s): GEL 050 or GEL 050L; MAT 016B or 021B recommended. Analysis of river form and processes, emphasis on fluvial geomorphology, and river and stream restoration; case studies to illustrate concepts and applications. Two weekend field trips required. Offered irregularly. GE credit: SE. Effective: 2016 Fall Quarter.

GEL 140—Introduction to Process Geomorphology (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): (GEL 001 or GEL 050); (MAT 016B or MAT 021B) Quantitative description and interpretation of landscapes with emphasis on the relationships between physical processes, mass conservation, and landform evolution. Topics covered include physical and chemical weathering, hillslopes, debris flows, fluvial systems, alluvial fans, pedogenesis, eolian transport, glaciation and Quaternary geochronology. Effective: 2016 Fall Quarter.

GEL 141—Evolutionary History of Vertebrates (3)
Lecture—3 hours. Prerequisite(s): GEL 003 or BIS 002A Evolutionary history of vertebrates; fossil record and phylogeny; timing of major evolutionary events; appearance of major vertebrate groups; physical constraints in vertebrate evolution; paleobiogeography of vertebrates; effect of continental movement on vertebrate evolution; dinosaurs and other strange vertebrates. Offered in alternate years. GE credit: SE. Effective: 2016 Fall Quarter.

GEL 141L—Evolutionary History of Vertebrates Laboratory (1)
Laboratory—3 hours. Prerequisite(s): GEL 141 (can be concurrent) Augments lecture course 141 through handling of specimens enabling in-person examination of three dimensional features observed in vertebrate skeletons, both fossil and living. Offered in alternate years. GE credit: SE, VL. Effective: 2013 Fall Quarter.

GEL 142—Basin Analysis (3)
Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): GEL 050; GEL 050L; GEL 109 Analysis of sedimentary basins from initiation to maturity, including controls on sedimentary fill, subsidence analysis, sequence stratigraphy, core logs, and applications to petroleum exploration and hydrology. One two-day field trip. Offered irregularly. GE credit: SE, VL. Effective: 2013 Fall Quarter.

GEL 143—Advanced Igneous Petrology (5)
Laboratory—6 hours; Lecture—3 hours. Prerequisite(s): GEL 105; (MAT 016C or MAT 021C); CHE 002C Physical and chemical properties of magmatic environments and processes of igneous rock formation. Laboratory study of representative igneous rocks. Offered irregularly. GE credit: SE. Effective: 2013 Fall Quarter.

GEL 144—Historical Ecology (3)
Lecture—3 hours. Prerequisite(s): Upper division course in environmental science or ecology, or an introductory course in paleobiology. Ancient ecosystems and the factors that caused them to change. Species, expansion, evolution of new modes of life, geologically induced variations in resource supply, and extinction provide historical perspective on the biosphere of future. GE credit: SE, WE. Effective: 2013 Fall Quarter.

GEL 145—Advanced Metamorphic Petrology (5)
Laboratory—6 hours; Lecture—3 hours. Prerequisite(s): GEL 106; (HYD 134 or CHE 002C); (MAT 016C or MAT 021C) Metamorphic processes and the origin of metamorphic rocks. Laboratory study of representative rock suites. Offered irregularly. GE credit: SE. Effective: 2013 Fall Quarter.
GEL 146—Radiogenic Isotope Geochemistry and Cosmochemistry (3)
Lecture—3 hours. Prerequisite(s): CHE 002C; PHY 007C; MAT 016C Basic principles of nuclear chemistry and physics applied to geology to determine the ages of terrestrial rocks, meteorites, archeological objects, age of the Earth, to trace geological/environmental processes, and explain formation of the chemical elements in the Universe. Offered irregularly. GE credit: QL, SE. Effective: 2013 Fall Quarter.

GEL 147—Geology of Ore Deposits (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): (CHE 002C or HYD 134); GEL 060; GEL 062; GEL 105 Tectonic, lithologic and geochemical setting of major metallic ore deposit types emphasizing ore deposit genesis, water/rock interaction and the environmental effects of mining. Offered irregularly. GE credit: QL, SE. Effective: 2013 Fall Quarter.

GEL 148—Stable Isotopes and Geochemical Tracers (3)
Lecture—3 hours. Prerequisite(s): (CHE 002C or HYD 134); GEL 050; GEL 050L; GEL 060 Use of oxygen and hydrogen isotopes in defining hydrologic processes; carbon, nitrogen, and sulfur isotopes as indicators of exchange between the lithosphere, hydrosphere, atmosphere and biosphere. Radiogenic, cosmogenic, and noble gas isotope tracers. Offered irregularly. GE credit: QL, SE. Effective: 2013 Fall Quarter.

GEL 149—Geothermal Systems (3)
Fieldwork; Lecture—3 hours. Prerequisite(s): GEL 050; GEL 050L; CHE 002B Geology, geochemistry, and geophysics of geothermal systems, including electrical power generation and direct use applications. Includes one day field trip on a weekend during the quarter. Offered irregularly. GE credit: SE. Effective: 2016 Fall Quarter.

GEL 150A—Physical and Chemical Oceanography (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ESP 116N or GEL 116N); PHY 009B; MAT 021D; CHE 002C; and Consent of Instructor. Physical and chemical properties of seawater, fluid dynamics, air-sea interaction, currents, waves, tides, mixing, major oceanic geochemical cycles. (Same course as ESO 150A.) GE credit: QL, SE. Effective: 2017 Winter Quarter.

GEL 150B—Geological Oceanography (3)
Lecture—3 hours. Prerequisite(s): GEL 050 or (GEL 116N or ESP 116N) Introduction to the origin and geologic evolution of ocean basins. Composition and structure of oceanic crust; marine volcanism; and deposition of marine sediments. Interpretation of geologic history of the ocean floor in terms of sea-floor spreading theory. (Same course as ESP 150B.) GE credit: SE. Effective: 2017 Winter Quarter.

GEL 150C—Biological Oceanography (4)
Discussion—1 hour; Fieldwork; Lecture—3 hours. Prerequisite(s): BIS 002A; Consent of Instructor. A course in general ecology. Ecology of major marine habitats, including intertidal, shelf benthic, deep-sea and plankton communities. Existing knowledge and contemporary issues in research. Segment devoted to human use. One weekend field trip required. (Same course as ESP 150C.) GE credit: SE, SL. Effective: 2017 Winter Quarter.

GEL 152—Paleobiology of Protista (4)
Laboratory—6 hours; Lecture—2 hours. Prerequisite(s): GEL 107 or BIS 002A; Consent of Instructor. Morphology, systematics, evolution, and ecology of single-celled organisms that are preserved in the fossil record. Offered irregularly. GE credit: SE. Effective: 2016 Fall Quarter.

GEL 156—Hydrogeology and Contaminant Transport (5)
Laboratory—3 hours; Lecture—3 hours; Term Paper—1 hour. Prerequisite(s): HYD 145; ECI 144; Or equivalent of ECI 144. Physical and chemical processes affecting groundwater flow and contaminant transport, with emphasis on realistic hydrogeologic systems. Groundwater geology and chemistry. Fundamentals of groundwater flow and transport analysis. Laboratory includes field pumping test and work with physical and computer models. (Same course as HYD 146.) GE credit: SE. Effective: 2013 Fall Quarter.

GEL 160—Geological Data Analysis (3)
Lecture/Discussion—3 hours. Prerequisite(s): MAT 021A Introduction to quantitative methods in analyzing geological data including basic principles of statistics and probability, error analysis, hypothesis testing, inverse theory, time series analysis and directional data analyses. Use of computer in lectures and homework. GE credit: QL, SE. Effective: 2016 Fall Quarter.

GEL 161—Geophysical Field Methods (3)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): MAT 021C; (GEL 001 or GEL 050); (PHY 007C or PHY 009C) Geophysical methods applied to determining subsurface structure in tectonics, hydrogeology, geotechnical engineering, hydrocarbon and mineral exploration. Theory, survey design and interpretation of gravity, electrical
resistivity, electromagnetic, reflection and refraction seismology, and ground-penetrating radar measurements. GE credit: QL, SE. Effective: 2016 Fall Quarter.

GEL 162—Geophysics of the Solid Earth (3)
Lecture—3 hours. Prerequisite(s): MAT 021C; (PHY 007C or PHY 009C); Consent of Instructor. Theory and use of physics in the study of the solid earth. Gravity, magnetism, paleomagnetism, and heat flow. Application to the interpretation of the regional and large-scale structure of the earth and to plate tectonics. Offered irregularly. GE credit: QL, SE. Effective: 2016 Fall Quarter.

GEL 163—Planetary Geology and Geophysics (3) Review all entries
Lecture—3 hours. Prerequisite(s): MAT 021C; (PHY 007C or PHY 009C); (GEL 050 or GEL 036 or AST 010G or AST 010L or AST 010S); Consent of Instructor. Principles of planetary science. Planetary dynamics, including orbital mechanics, tidal interactions and ring dynamics. Theory of planetary interiors, gravitational fields, rotational dynamics. Physics of planetary atmospheres. Geological processes, landforms and their modification. Methods of analysis from Earth-based observations and spacecraft. GE credit: QL, SE. Effective: 2016 Fall Quarter.

GEL 175—Advanced Field Geology (3)
Discussion—3 hours; Fieldwork—6 hours. Prerequisite(s): Consent of Instructor. Advanced field studies of selected geologic terrains, interpretation and discussion of field observations. Offered irregularly. May be repeated up to 2 time(s) when instructors varies. (P/NP grading only.) GE credit: SE. Effective: 2013 Fall Quarter.

GEL 181—Teaching in Science and Mathematics (2) Review all entries
Fieldwork—2 hours; Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Major in mathematics, science, or engineering; or completion of a one-year sequence of science or calculus. Class size limited to 40 students per section. Exploration of effective teaching practices based on examination of how middle school students learn math and science. Selected readings, discussion and field experience in middle school classrooms. (Same course as EDU 181.) (P/NP grading only.) GE credit: SE. Effective: 2013 Fall Quarter.

GEL 182—Field Studies in Marine Geochemistry (2-8)
Fieldwork—6-40 hours; Laboratory—1-3 hours; Lecture—3 hours. Prerequisite(s): Consent of Instructor. Marine geochemistry with the opportunity of going to sea or into the field on land. Techniques of sea-floor mapping using bottom photography, marine geochemical sampling, and method of data reduction and sample analysis. Analysis of data/samples collected. Offered irregularly. GE credit: SS, WE. Effective: 2013 Fall Quarter.

GEL 183—Teaching High School Mathematics and Science (3) Review all entries
Fieldwork; Lecture/Discussion—2 hours. Prerequisite(s): Major in mathematics, science, or engineering; or consent of instructor with completion of a one-year sequence of science or calculus. Limited to 40 students per section. Exploration and creation of effective teaching practices based on examination of how high school students learn mathematics and science. Field experience in high school classrooms. (Same course as Education 183.) GE credit: OL, SS, WE. Effective: 2017 Fall Quarter.

GEL 183—Teaching High School Mathematics and Science (3) Review all entries
Fieldwork; Lecture/Discussion—2 hours. Prerequisite(s): Major in mathematics, science, or engineering; or completion of a one-year sequence of science or calculus and consent of the instructor. Limited to 40 students per section. Exploration and creation of effective teaching practices based on examination of how high school students learn mathematics and science. Field experience in high school classrooms. (Same course as EDU 183.) GE credit: OL, SS, WE. Effective: 2018 Fall Quarter.

GEL 185A—Conceptual Integrated Science for Non-Science Majors: The Physical World (2)

GEL 185B—Conceptual Integrated Science for Non-Science Majors: Earth System Science (2)
Discussion/Laboratory—3 hours; Lecture—1 hour. Conceptual, inquiry-based integrated science course. Topics in
the Next Generation Science Standards. Elementary school level teaching practice. Earth, space and environmental science, and science inquiry. GE credit: SE, SL. Effective: 2016 Fall Quarter.

**GEL 186—Facilitating Learning in STEM Classrooms (1)**
Lecture/Discussion—1 hour. STEM Learning Assistant Seminar. Theoretical and practical issues of effective teaching in discussion/labs: student-centered, active, cooperative learning environments, responsive teaching, and differentiated classroom instruction. GE credit: SS. Effective: 2016 Fall Quarter.

**GEL 190—Seminar in Geology (1)**
Discussion—1 hour; Seminar—1 hour. Presentation and discussion of current topics in geology by visiting lecturers, staff, and students. Written abstracts. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 2016 Fall Quarter.

**GEL 192—Internship in Geology (1-12)**
Internship. Prerequisite(s): Upper division standing; project approval prior to internship. Supervised work experience in geology. May be repeated for credit for a total of 10 units. May be repeated up to 10 unit(s). (P/NP grading only.) GE credit: SE. Effective: 2016 Fall Quarter.

**GEL 194A—Senior Thesis (3)**
Variable. Prerequisite(s): Open to Geology majors who have completed 135 units and who do not qualify for the Honors Program. Guided independent study of a selected topic, leading to the writing of a senior thesis. GE credit: SE, WE. Effective: 2013 Fall Quarter.

**GEL 194B—Senior Thesis (3)**
Variable. Prerequisite(s): Open to Geology majors who have completed 135 units and who do not qualify for the Honors Program. Guided independent study of a selected topic, leading to the writing of a senior thesis. GE credit: SE, WE. Effective: 2013 Fall Quarter.

**GEL 194HA—Senior Honors Project (3)**
Independent Study—9 hours. Prerequisite(s): Open to Geology majors who have completed 135 units and who qualify for the Honors Program. Guided independent study of a selected topic, leading to the writing of an honors thesis. GE credit: SE, WE. Effective: 2013 Fall Quarter.

**GEL 194HB—Senior Honors Project (3)**
Independent Study—9 hours. Prerequisite(s): Open to Geology majors who have completed 135 units and who qualify for the Honors Program. Guided independent study of a selected topic, leading to the writing of an honors thesis. GE credit: SE, WE. Effective: 2013 Fall Quarter.

**GEL 198—Directed Group Study (1-5)**
Variable—3-15 hours. Prerequisite(s): Senior standing in Geology or consent of instructor. Group study focused on topics in Geology. (P/NP grading only.) GE credit: SE. Effective: 2016 Spring Quarter.

**GEL 199—Special Study for Advanced Undergraduates (1-5)**
Variable. Special study for advanced undergraduates. (P/NP grading only.) GE credit: SE. Effective: 2013 Fall Quarter.

**GEL 205—Advanced Field Stratigraphy (3)**
Fieldwork—2 hours; Lecture—1 hour. Prerequisite(s): GEL 109; GEL 110; or Consent of Instructor. GEL 206 recommended. Fieldwork over spring break. Application of stratigraphic techniques to research problems. Collection, compilation, and interpretation of field data. Integration of data with models for deposition and interpretations of Earth history. Topics will vary. Offered irregularly. May be repeated for credit. Effective: 2013 Fall Quarter.

**GEL 206—Stratigraphic Analysis (3)**
Lecture—3 hours. Prerequisite(s): GEL 109; GEL 109L; or Consent of Instructor. GEL 144 recommended. Topics in advanced methods of stratigraphic analysis, regional stratigraphy and sedimentation, and sedimentary basin analysis. Emphasis on techniques used to interpret stratigraphic record and on current issues in stratigraphy and sedimentation. Offered irregularly. May be repeated for credit when topic differs. Effective: 2013 Fall Quarter.

**GEL 214—Active Tectonics (3)**
Lecture/Discussion—3 hours. Prerequisite(s): Graduate standing or consent of instructor. Active deformation associated with faults, landslides, and volcanoes. Geodetic measurement techniques such as triangulation, trilateration, leveling, Global Positioning System (GPS), and radar interferometry. GPS data acquisition and analysis.
Inversion of geodetic data and mechanical models of crustal deformation. Offered irregularly. Effective: 2013 Fall Quarter.

**GEL 216—Tectonics (3)**
Lecture/Discussion—3 hours. Prerequisite(s): GEL 101; or Consent of Instructor. Nature and evolution of tectonic features of the Earth. Causes, consequences, and evolution of plate motion, with selected examples from the Earth’s deformed belts. Offered irregularly. Effective: 2013 Fall Quarter.

**GEL 217—Topics in Geophysics (3)**
Lecture—1 hour; Seminar—2 hours. Prerequisite(s): Consent of Instructor. Discussion and evaluation of current research in a given area of geophysics. Topic will change from year to year. Offered in alternate years. May be repeated for credit. Effective: 2013 Fall Quarter.

**GEL 218—Analysis of Structures in Deformed Rocks (3)**
Seminar—3 hours. Prerequisite(s): GEL 100; GEL 100L; GEL 101; GEL 101L; GEL 170; or Consent of Instructor. Recent advances in the understanding and analysis of structures in brittlely and ductilely deformed rocks. Detailed investigation of the characteristics of the structures, models for their formation, and applications to inferring the kinematics of larger scale tectonics. Offered irregularly. Effective: 2013 Fall Quarter.

**GEL 219—Fracture and Flow of Rocks (3)**
Lecture—3 hours. Prerequisite(s): GEL 100; GEL 101; or Consent of Instructor. Origins of those structures in rocks associated with brittle and ductile deformation. Theoretical analysis, using continuum mechanics, and experimental evidence for the origin of the structures with emphasis on deformational processes in the earth. Offered irregularly. Effective: 2013 Fall Quarter.

**GEL 220—Mechanics of Geologic Structures (3)**
Lecture—3 hours. Prerequisite(s): MAT 021C; (PHY 009A; or PHY 005A); GEL 170; or Consent of Instructor; MAT 021D and MAT 022A recommended. Development in tensor notation of the balance laws of continuum mechanics, and constitutive theories of elasticity, viscosity, and plasticity and their application to understanding development of geologic structures such as fractures, faults, dikes, folds, foliations, and boudinage. Offered irregularly. Effective: 2013 Fall Quarter.

**GEL 226—Advanced Sedimentary Petrology (3)**
Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): GEL 144; or Consent of Instructor. Advanced petrography and geochemistry of sediments and sedimentary rocks. Geochemical, textural and mineralogical evolution of sedimentary rocks reflecting depositional or burial processes. Laboratory work emphasizes thin section study of rocks. Offered irregularly. May be repeated for credit when topic differs. Effective: 2013 Fall Quarter.

**GEL 227—Stable Isotopes Biogeochemistry (4)**
Laboratory—6 hours; Lecture—2 hours. Prerequisite(s): Consent of Instructor. Graduate standing. Discussion and application of stable isotope techniques for scientific research problems. Course emphasizes carbon, oxygen, nitrogen, hydrogen and sulfur isotopes. Laboratory will develop basic skills of cryogenic gas extraction and specific techniques for individual research using stable isotopes. Offered irregularly. Effective: 2013 Fall Quarter.

**GEL 228—Topics in Paleoceanography (3)**
Lecture—3 hours. Prerequisite(s): GEL 108; GEL 150A; or Consent of Instructor. Critical discussion and review of selected topics in paleoceanography and paleoclimatology relating to the history of the processes controlling and affecting climate change and ocean circulation throughout the geologic record. Topics vary. Offered irregularly. May be repeated for credit. Effective: 2013 Fall Quarter.

**GEL 230—Geomorphology and River Management (3)**
Seminar—3 hours. Prerequisite(s): GEL 139; Or equivalent; graduate standing. Impacts of management and land use activities on the geomorphology of rivers and streams. Evaluation and use of analytical tools for river assessment. Assessment of river and stream restoration strategies and emerging issues in river management. May be repeated for credit when topic differs. Effective: 2013 Fall Quarter.

**GEL 232—The Oceans and Climate Change (3)**
Lecture/Discussion—3 hours. Prerequisite(s): Graduate standing or consent of instructor. Modern climate change and linkages between the ocean-atmosphere-cryosphere-terrestrial climate system. Importance of the ocean in forcing climate change, and the impacts of anthropogenic processes on the ocean. Topics vary. Offered irregularly. May be repeated up to 3 time(s). Effective: 2013 Fall Quarter.

**GEL 235—Surface Processes (3)**
Seminar—3 hours. Prerequisite(s): GEL 050; GEL 050L; GEL 139; MAT 021B or MAT 016B recommended. Recent
advances in the analysis of landforms and their evolution. Detailed investigation of the tools used to document surface processes. Evaluation of concepts and processes that govern landscape evolution. Offered irregularly. May be repeated for credit. Effective: 2013 Fall Quarter.

**GEL 236—Inverse Theory in Geology and Geophysics (3)**

**GEL 238—Theoretical Seismology (3)**
Lecture—3 hours. Prerequisite(s): Consent of Instructor. Elastodynamic wave equation. Greens functions and source representations. Ray theory. Plane and spherical waves and boundary conditions. Elastic wave propagation in stratified media. (P/F grading only.) Effective: 2013 Fall Quarter.

**GEL 240—Geophysics of the Earth (3)**

**GEL 241—Geomagnetism (3)**

**GEL 242—Paleomagnetism (3)**

**GEL 246—Physical Chemistry of Metamorphic Processes (3)**
Lecture—3 hours. Prerequisite(s): GEL 145; CHE 110A; or Consent of Instructor. Physiochemical principles of metamorphic mineral assemblages and methods of interpreting the paragenesis of metamorphic rocks. Offered irregularly. Effective: 2013 Fall Quarter.

**GEL 247—Metamorphic Petrology Seminar (3)**
Seminar—3 hours. Prerequisite(s): GEL 145; or Consent of Instructor. GEL 246 recommended. Selected topics in metamorphic petrology (e.g., mass transport processes, tectonic settings, geothermometry, thermal structure of metamorphic belts, regional studies). Offered irregularly. May be repeated for credit. (S/U grading only.) Effective: 2013 Fall Quarter.

**GEL 250—Advanced Geochemistry Seminar (3)**
Seminar—3 hours. Prerequisite(s): GEL 146; or Consent of Instructor. Critical review of selected topics in geochemistry including: ore genesis, hydrothermal and geothermal fluids, recent and ancient sediments, isotope geology, origin and chemistry of the oceans. Subject varies yearly depending on student interest. May be repeated for credit. May be repeated for credit. Effective: 2013 Fall Quarter.

**GEL 251—Advanced Topics in Isotope Geochemistry and Cosmochemistry (3)**
Lecture/Discussion—2 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Astrophysical context on origin of Solar System, synthesis of chemical elements, condensation sequence, star and planet formation, cosmochronology, building blocks of planets, development on planets' layered structure, atmosphere and hydrosphere and the role of comets/asteroids for volatile delivery. Offered irregularly. May be repeated up to 3 time(s) when topics differs. Effective: 2013 Fall Quarter.

**GEL 253—Current Topics in Igneous Petrology (3)**
Seminar—3 hours. Prerequisite(s): GEL 143; or Consent of Instructor. Graduate standing in Geology. Topical seminar designed to help graduate students develop and maintain familiarity with current and past literature related to igneous rock petrogenesis. May be repeated for credit when topic differs. May be repeated for credit when topic differs. (S/U grading only.) Effective: 2013 Fall Quarter.

**GEL 254—Physical Chemistry of Igneous Processes (3)**
Lecture—3 hours. Prerequisite(s): CHE 110A; GEL 143; and Consent of Instructor. GEL 143 or consent of instructor;
CHE 110B and CHE 110C recommended. Introduction of modern concepts in chemical thermodynamics and kinetics, and fluid dynamics of magmatic systems for graduate students in petrology. Offered irregularly. Effective: 2013 Fall Quarter.

**GEL 255—Experimental Petrology (3)**
Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): GEL 143; or Consent of Instructor. Introduction to techniques and methods of design and executing experiments on Earth-forming minerals and rocks. Problems and examples from igneous and metamorphic petrology will be utilized. Offered irregularly. Effective: 2013 Fall Quarter.

**GEL 260—Paleontology (3)**
Seminar—3 hours. Prerequisite(s): Graduate standing in geology or a biological science. Selected problems in paleontology. Subject to be studied will be decided at an organizational meeting. Offered irregularly. May be repeated for credit when topic differs. Effective: 2013 Fall Quarter.

**GEL 261—Paleobiology Graduate Seminar 1: Evolutionary aspects (3)**
Lecture—1 hour; Seminar—2 hours. Prerequisite(s): Graduate standing in Geology or a biological science; qualified undergraduates will be accepted on an exception-only basis. This course will treat one or more of several topics in paleobiology from a phylogenetic perspective, including major patterns in evolution, building the tree of life, extinction and phylogeny, phylogeny of major phyla, and the relation between taxonomy and phylogeny. May be repeated for credit when topic varies. Effective: 2013 Fall Quarter.

**GEL 262—Paleobiology Graduate Seminar: Methodological aspects (3)**
Lecture—1 hour; Seminar—2 hours. One or more major methods used in the study of fossils: Morphometrics and three-dimensional reconstruction of fossils, phylogenetic methodology, the application of geochemical techniques, and electron microscopy. May be repeated up to 4 time(s) topic varies. Effective: 2013 Fall Quarter.

**GEL 281N—Instrumental Techniques for Earth Scientists (3)**
Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): MAT 021A; MAT 021B; MAT 021C; ((PHY 007A, PHY 007B, PHY 007C) or (PHY 009A, PHY 009B, PHY 009C)); or Consent of Instructor. Laboratory research techniques for new graduate students in Geology. Demonstration of and exposure to appropriate techniques in research. Effective: 2013 Fall Quarter.

**GEL 285—Field Studies in Marine Geochemistry (2-8)**
Fieldwork—6-40 hours; Laboratory—1-3 hours; Lecture—3 hours. Prerequisite(s): Consent of Instructor. Marine geochemistry with the opportunity of going to sea or into the field on land. Techniques of seafloor mapping using bottom photography, marine geochemical sampling, and method of data reduction and sample analysis. Analysis of data/samples collected. Effective: 2013 Fall Quarter.

**GEL 290—Seminar in Geology (1)**
Discussion—1 hour; Seminar—1 hour. Presentation and discussion of current topics in geology by visiting lecturers, staff, and students. (S/U grading only.) Effective: 2013 Fall Quarter.

**GEL 291—Geology of the Sierra Nevada (1)**
Seminar. Prerequisite(s): Consent of Instructor. Short oral presentations by students and faculty concerning results of their past work and plans for future work in the Sierra. A written abstract is required following the format required at professional meetings. Offered irregularly. (S/U grading only.) Effective: 2013 Fall Quarter.

**GEL 292—River Forum (1)**
Seminar—1 hour. Prerequisite(s): Graduate standing. Review and discussion of latest research and fundamental issues surrounding riverine systems, with emphasis on physical processes. Topics vary. Offered irregularly. (S/U grading only.) Effective: 2013 Fall Quarter.

**GEL 293—Geologic Event of the Week (1)**
Discussion—0.5 hours; Seminar—0.5 hours. Prerequisite(s): Graduate standing. Seminar/discussion group to review and discuss recent earthquakes, volcanic eruptions, and other significant geologic events. The focus is on understanding the available observations, the physical processes behind each event, the geological setting, and societal consequences. Offered irregularly. May be repeated up to 3 time(s) for up to 3 units. (S/U grading only.) Effective: 2013 Fall Quarter.

**GEL 294—Structure/Tectonics Forum (1)**
Seminar—1 hour. Prerequisite(s): Graduate student in geology or consent of instructor. Seminar/discussion group to review and discuss latest research in structural geology and tectonics, and on-going research of participants. Topics will vary each quarter depending on the interests of the group. Occasional field trips to areas of current interest. May be repeated for credit when topic differs. (S/U grading only.) Effective: 2013 Fall Quarter.
GEL 295—Geophysics Forum (1)
Discussion—0.5 hours; Seminar—0.5 hours. Prerequisite(s): GEL 100; GEL 101; or Consent of Instructor. Seminar/discussion group to review and discuss latest research in geophysics, and on-going research of participants. Topics will change each quarter depending on the interests of the group. Offered irregularly. May be repeated for credit when topic differs. (S/U grading only.) Effective: 2013 Fall Quarter.

GEL 296—Advanced Problems in Tectonics (3)
Seminar—3 hours. Prerequisite(s): GEL 101; and Consent of Instructor. Seminar dealing with current problems in tectonics of selected regions. Topics will change from year to year. Emphasis on study of recent literature. Offered irregularly. May be repeated for credit. (S/U grading only.) Effective: 2013 Fall Quarter.

GEL 297—Geophysics Forum (1)
Discussion—0.5 hours; Seminar—0.5 hours. Prerequisite(s): Graduate student status in the Geology Department, or consent of instructor. Seminar/discussion group to review and discuss latest research in geophysics, and on-going research of participants. Topics will change each quarter depending on the interests of the group. Offered irregularly. May be repeated up to 3 time(s). (S/U grading only.) Effective: 2013 Fall Quarter.

GEL 298—Group Study (1-5)
Variable. Group study. Effective: 2013 Fall Quarter.

GEL 299—Research (1-12)
Variable. Research. (S/U grading only.) Effective: 2013 Fall Quarter.

GEL 390—Methods of Teaching Geology (2)
Extensive Writing/Discussion—2 hours. Prerequisite(s): Graduate student standing in Geology. Introduction to graduate-level writing and undergraduate-level teaching skills in geology. Persuasive (proposal) writing workshop; discussions on campus teaching resources, presenting information, managing classroom dynamics, evaluating student performance. Participation in teaching program required for Ph.D. in Geology. (S/U grading only.) Effective: 2014 Spring Quarter.

GEL 391—Ethical Issues in Earth Science (1)
Seminar—1 hour. Prerequisite(s): Graduate standing in Geology or consent of instructor. Reading and discussion of ethical issues arising in the earth sciences. Topics include scientific misconduct, gender equity in science, authorship of scientific papers, establishing priorities in research, and related issues. Offered irregularly. (S/U grading only.) Effective: 2013 Fall Quarter.

GEL 396—Teaching Assistant Training Practicum (1-4)
Variable. Teaching assistant training. May be repeated for credit. (P/NP grading only.) Effective: 2013 Fall Quarter.

Geophysics Minor; Earth & Planetary Sciences

Geophysics Minor; Earth & Planetary Sciences | Geophysics Minor

(College of Letters and Science)
Michael E. Oskin, Ph.D., Chairperson of the Department
David A. Osleger, Ph.D., Vice-Chairperson, Undergraduate Program
Sujoy Mukhopadhyay, Ph.D., Vice-Chairperson, Graduate Program

Department Office. 2119 Earth and Physical Sciences Building; 530-752-0350; http://www.geology.ucdavis.edu

Faculty. See http://geology.ucdavis.edu/people/faculty/index.php

Geophysics is the study of the physical properties and processes within and surrounding the Earth. Many problems in the Earth Sciences require geophysical techniques for study. The interdisciplinary minor in geophysics is for students with backgrounds in the physical sciences, engineering and other fields who are interested in pursuing a graduate or professional career in geophysics, or those who desire a career in the energy, minerals, or environmental industries.

The minor is sponsored by the Department of Earth and Planetary Sciences.

Minor Advisor. See Geology major advisors.

The Major Program

The German major explores in depth the literature and language, the culture and commerce of the German-speaking world (primarily Germany, Austria and Switzerland). The key to the major lies in the careful balance between solid core requirements and the possibility to explore German subject areas through the lens of other disciplines, such as music, art, philosophy, history, and economics.

The Program. The department offers courses that highlight literary figures, movements and themes. These courses form the core of upper-division literature electives, but we also offer courses that discuss contemporary culture and commerce in German-speaking countries. Regardless of emphasis, students will find maximum practice in spoken and written German as well as in listening comprehension in all upper-division courses offered in German.

Career Alternatives. Completion of the major prepares students for graduate study in German or for career opportunities in international fields ranging from employment in business and government to careers in the fine arts and sciences. Also, it permits admission to professional schools such as law and medicine.

Honors and Honors Program. The honors program consists of two quarters of research (194H) terminating in an honors thesis. For details consult the undergraduate major advisor. Graduation with high or highest honors requires participation in the honors program.

Graduate Study. The Department offers programs of study and research leading to the M.A. degree and to the Ph.D. degree in German Literature. Additional degree options for a designated emphasis are available through departmental affiliations with the programs in Social Theory and Comparative History, Critical Theory, Feminist Theory and Research, and Second Language Acquisition. Detailed information may be obtained by writing to the Department Chairperson or the Graduate Advisor.

Graduate Advisor. Chunjie Zhang

Prerequisite Credit. Credit normally will not be given on the lower-division level for a course that is the prerequisite of a course already successfully completed.

Major Advisor. Elisabeth Krimmer

Units: 20

Total: 20
German | GER Courses

Courses in GER:

GER 001—Elementary German (5)
Discussion—5 hours; Laboratory—1 hour. Not open to students who have taken course 1A. Introduction to German grammar and development of all language skills in a cultural context with special emphasis on communication. Students who have successfully completed GER 002 or GER 003 in the 10th or higher grade in high school may receive unit credit for this course on a P/NP grading basis only; although a passing grade will be charged to the student's P/NP option, no petition is required; all other students will receive a letter grade unless a P/NP petition is filed. GE credit: AH, WC. Effective: 2007 Spring Quarter.

GER 001A—Accelerated Intensive Elementary German (15) Review all entries
Lecture/Discussion—15 hours. Special 12 week accelerated, intensive summer session course that combines the work of courses 1, 2, and 3. Introduction to German grammar and development of all language skills in a cultural context with emphasis on communication. Not open to students who have completed German 1, 2, or 3. Effective: 2006 Summer Special Session.

GER 001A—Accelerated Intensive Elementary German (15) Review all entries
Lecture/Discussion—12.5 hours. Special 12 week accelerated, intensive summer session course that combines the work of courses 1, 2, and 3. Introduction to German grammar and development of all language skills in a cultural context with emphasis on communication. Not open to students who have completed GER 001, GER 002, or GER 003. GE credit: AH, WC. Effective: 2018 Summer Session 1.

GER 002—Elementary German (5)
Discussion—5 hours; Laboratory—1 hour. Prerequisite(s): GER 001 Not open for credit to students who have taken course 1A. Continuation of course 1 in areas of grammar and basic language skills. GE credit: AH, WC. Effective: 2007 Spring Quarter.

GER 003—Elementary German (5)
Discussion—5 hours; Laboratory—1 hour. Prerequisite(s): GER 002 Not open to students who have taken course 1A. Completion of grammar sequence and continuing practice of all language skills through cultural texts. GE credit: AH, OL, WC. Effective: 2015 Winter Quarter.

GER 010—German Fairy Tales from the Grimms to Disney (4)
Lecture/Discussion—3 hours; Term Paper. Introduction to the genre of fairy tale with a focus on the Brothers Grimm and Hans Christian Andersen in their respective political/cultural contexts. Discusses filmic adaptations by Disney, the East German DEFA and Hollywood. GE credit: AH, VL, WC, WE. Effective: 2012 Fall Quarter.

GER 011—Travel and the Modern World (4)
Extensive Writing; Lecture/Discussion—3 hours. Examination of travel as an essential human activity and experience of global modernity and cross-cultural encounters from the 18th to the 21st century with an emphasis on German-speaking culture. Travelogues, literature, art, memoirs, and films in English translation. (Same course as COM 011.) GE credit: AH, VL, WC, WE. Effective: 2016 Spring Quarter.

GER 020—Intermediate German (4)
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): GER 003; can be concurrent with GER 006. Review of grammatical principles by means of written exercises; expanding of vocabulary through readings of modern texts. GE credit: AH, OL, WC, WE. Effective: 2015 Winter Quarter.

GER 021—Intermediate German (4)
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): GER 020 Review of grammatical principles by means of written exercises; expanding of vocabulary through readings of modern texts; addresses social relations and cultural practices in Germany; discusses history of Germany. GE credit: AH, OL, WC, WE. Effective: 2016 Winter Quarter.

GER 022—Intermediate German (4)
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): GER 021 Review of grammatical principles by means of written exercises; expanding of vocabulary through readings of modern texts. GE credit: AH, OL, WC, WE. Effective: 2015 Winter Quarter.

GER 040—Great German Short Stories (in English) (4)
Extensive Writing; Lecture/Discussion—3 hours. Major German short stories from Goethe at the end of the
eighteenth century to Thomas Mann at the beginning of the twentieth century. GE credit: AH, OL, WC, WE. Effective: 2005 Fall Quarter.

**GER 045—Vampires and Other Horrors in Film and Media (4)**
Discussion—1 hour; Film Viewing—3 hours; Lecture—2 hours. History of representations of vampires and horror generally from the 19th through 21st centuries. Emphasis on transnational history of the horror genre; psychologies of horror effects; issues of race, gender, and class; intersections with prejudice, medicine, modernity. (Same course as FMS 045.) GE credit: ACGH, AH, DD, OL, VL, WC, WE. Effective: 2012 Fall Quarter.

**GER 048—Myth and Saga in the Germanic Cultures (4)**
Lecture—3 hours; Term Paper. Knowledge of German not required. English translation from the Norse Eddas, the Volsung and Sigurd-Siegfried cycles, and the Gudrun lays; literary mythology in German Romanticism culminating in Wagner's "total art-work" concept and The Ring of the Nibelung cycle. May not be counted toward major in German. GE credit: AH, VL, WC, WE. Effective: 2015 Winter Quarter.

**GER 049—Freshman Colloquium (2)**
Seminar—2 hours. Prerequisite(s): Open only to students who have completed 40 or fewer quarter units of transferable college level work. Readings, discussion and written projects treating topics such as communist-capitalist tension in German literary culture; masculine "versus" feminine authorial consciousness; disintegration and reconstitution of language reflecting cultural transformation; exorcising post-Holocaust national guilt and individual frustration-Germany's new European "mission." Effective: 1997 Winter Quarter.

**GER 092—Field Work in German (1-12)**
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Lower division standing. Restricted to lower-division standing. Total immersion program in Germany or a German speaking setting in the U.S. to further develop students' proficiency in the German language. (P/NP grading only.) Effective: 2001 Fall Quarter.

**GER 098—Directed Group Study (1-5)**
Variable. Prerequisite(s): Consent of Instructor. Primarily for lower division students. (P/NP grading only.) Effective: 1997 Winter Quarter.

**GER 099—Special Study for Undergraduates (1-5)**
Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

**GER 101A—Survey of German Literature, 800-1800 (4)**
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): GER 022; or Consent of Instructor. German literature from the Middle Ages to Classicism (800-1800) with an overview of major movements and authors. GE credit: AH, OL, VL, WC, WE. Effective: 2016 Spring Quarter.

**GER 101B—Survey of German Literature, 1800-Present (4)**
Lecture/Discussion—3 hours. Prerequisite(s): GER 022 German literature from the Age of Romanticism (1800) to the present with an overview of major movements and authors. GE credit: AH. Effective: 2005 Winter Quarter.

**GER 103—Writing Skills in German (4)**
Extensive Writing—1 hour; Lecture—3 hours. Prerequisite(s): GER 022; or Consent of Instructor. Practice in different kinds of writing, such as abstracts, correspondence, lecture summaries, analysis of or response to short literary texts. GE credit: AH, OL, WC, WE. Effective: 2016 Fall Quarter.

**GER 104—Translation (4)**
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): GER 022; or Consent of Instructor. Exercises in German-to-English, English-to-German translation using texts from the areas of culture and commerce. Not open for credit to students who have completed GER 104A. GE credit: AH, OL, VL, WC, WE. Effective: 2016 Spring Quarter.

**GER 105—The Modern German Language (4)**
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): GER 022; or Consent of Instructor. Introduction to the linguistic analysis of contemporary German, including its phonology, morphology, syntax and semantics, as well as sociolinguistic considerations. GE credit: AH, OL, WC, WE. Effective: 2016 Spring Quarter.

**GER 109A—Business German (4)**
Laboratory—1 hour; Lecture/Discussion—3 hours. Prerequisite(s): GER 022; or Consent of Instructor. Specialized language course using business-oriented information and publications as the basis for discussions, roleplay, reports, compositions and translations. Effective: 2005 Spring Quarter.

**GER 109B—Advanced Business German (4)**
Discussion/Laboratory—1 hour; Lecture/Discussion—3 hours. Prerequisite(s): GER 022; or Consent of Instructor.
Specialized advanced language course providing in-depth study of major business topics with the help of authentic texts and videos. Effective: 2005 Spring Quarter.

**GER 112—Topics in German Literature (4)**
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): Upper-division standing or consent of instructor. Knowledge of German not required. Investigation of significant themes and issues within their European context. May be repeated up to 1 time(s). GE credit: AH, OL, WC, WE. Effective: 2016 Spring Quarter.

**GER 113—Goethe's Faust (4)**
Discussion—3 hours; Term Paper—1 hour. Knowledge of German not required. Intensive study of Goethe's Faust in its entirety. Discussions and readings in English; reading the text in the original is encouraged. GE credit: AH, WC, WE. Effective: 2010 Fall Quarter.

**GER 114—From Marlene Dietrich to Run, Lola Run: German Women and Film (4)**
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): ANT 001 (can be concurrent) Knowledge of German not required. Women in German film from the Weimar Republic to present, with special emphasis on conceptualizations of gender, historical and political context, aesthetic and filmic innovations. GE credit: AH, OL, VL, WC, WE. Effective: 2018 Spring Quarter.

**GER 115—German Literature Since 1945 (4)**
Extensive Writing; Lecture—3 hours. Knowledge of German not required. Major writers of the post-war generation of Austria, Switzerland and Germany: novelists, such as Böll, Grass, Johnson, Walser, Handke; playwrights such as Frisch, Dürenmatt and Hochhuth; and poets, such as Celan, Enzensberger, and Aichinger. May be repeated for credit if topic differs. GE credit: AH, WC, WE. Effective: 1998 Fall Quarter.

**GER 116—Readings in Jewish Writing and Thought in German Culture (4)**
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): RST 023; or Consent of Instructor. Historical tradition of Jewish thought in the German cultural context; unique contributions of Jewish writers to culture of the German-speaking world; what it means to be "other" in the mainstream culture. May be repeated up to 2 time(s) when topic differs. No credit will be given to those students who have completed HUM 121. (Same course as JST 116.) GE credit: AH, OL, WC. Effective: 2016 Fall Quarter.

**GER 117—After the Catastrophe: Jews and Jewish Life in Post-1945 Germany (4)**
Discussion/Laboratory—3 hours; Term Paper. Jews and Jewish culture in post-1945 Germany, with special attention given to literature, historical debates, photography, film, as well as websites and other new media. GE credit: ACGH, AH, DD, OL, VL, WC, WE. Effective: 2007 Spring Quarter.

**GER 118A—Vienna at the Turn of the Twentieth Century (The End of the Habsburg Empire) (4)**
Discussion—2 hours; Extensive Writing—1 hour; Lecture—1 hour. Knowledge of German not required. Cultural ferment in Vienna, capital of the multinational Habsburg empire, at the turn of the century, with consideration of innovations in literature, music, graphic arts, architecture philosophy and psychology, heralding European modernism. GE credit: AH, WC. Effective: 2001 Fall Quarter.

**GER 118B—Weimar Culture: Defeat, the Roaring Twenties, the Rise of Nazism (4)**
Discussion—2 hours; Extensive Writing—1 hour; Lecture—1 hour. Knowledge of German not required. Expressionism in graphic arts, literature, film, New Objectivity, Brecht, and Bauhaus considered in the context of the failure of the German experiment in democracy, the Weimar Republic of 1919-33. GE credit: AH, WC, WE. Effective: 2000 Fall Quarter.

**GER 118C—Germany Under the Third Reich (4)**
Lecture/Discussion—3 hours; Term Paper—1 hour. Prerequisite(s): Background in Modern European History; GER 118B recommended. No knowledge of German required. Interdisciplinary study of German society and culture during the Third Reich (1933-45); readings in aesthetics, history, and philosophy; study of Fascist culture in literature, film, architecture, and the graphic arts; focus on everyday life in Hitler's Germany. GE credit: WC, WE. Effective: 2001 Fall Quarter.

**GER 118E—Contemporary German Culture (4)**
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): GER 022; or Consent of Instructor. Political, economic, social and cultural scene of Germany today. GE credit: WC, WE. Effective: 2001 Fall Quarter.

**GER 119—From German Fiction to German Film (4)**
Discussion—1 hour; Lecture—3 hours; Term Paper. Examines a number of film adaptations of major German prose works and plays to ascertain the types of changes involved in the shift in medium and the positive and negative effects achieved by such transferences. GE credit: AH, OL, VL, WE. Effective: 1997 Winter Quarter.
GER 120—Survey of German Culture (4)  *Review all entries*
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): GER 022; or Consent of Instructor. Major developments in German arts, philosophical thought, social institutions, and political history. GE credit: AH, OL, VL, WC, WE. Effective: 2016 Spring Quarter.

GER 120—Survey of German Culture (4)  *Review all entries*
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): GER 022; or Consent of Instructor. Major developments in German arts, philosophical thought, social institutions, and political history. GE credit: AH, OL, VL, WC, WE. Effective: 2019 Winter Quarter.

GER 121—The Medieval Period in German Literature (4)
Discussion—3 hours; Extensive Writing. Prerequisite(s): GER 022; or Consent of Instructor. Literary-philosophical profile of the Mittelhochdeutsche Blütezeit in terms of the significant epics, romances, and lyric poetry. Readings in German. GE credit: AH. Effective: 2016 Spring Quarter.

GER 122—Reformation and Baroque (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): GER 022; or Consent of Instructor. Exemplary literary works of the 16th and 17th centuries tracing the principal lines of development and showing the reflection in literature of the social, as well as religious, scenes. GE credit: AH, OL, VL, WC, WE. Effective: 2016 Fall Quarter.

GER 123—Literature of the Classical Age (4)
Discussion—3 hours; Term Paper. Prerequisite(s): GER 022; or Consent of Instructor. Critical assessment of principal works of Goethe and Schiller within the historical and philosophical context of their times. GE credit: AH, WC, WE. Effective: 2016 Fall Quarter.

GER 124—Major Movements in German Literature (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): GER 022; or Consent of Instructor. Significant movements and schools in German literary history (e.g., the medieval troubadours, Storm and Stress, the romanticists, the George Circle, the expressionists), with emphasis on the broader cultural dynamics and ideologies as these apply to individual literary works. May be repeated up to 1 time(s) if topic differs. GE credit: AH, WC. Effective: 2016 Fall Quarter.

GER 125—Short Fiction: 1880-1914 (4)
Lecture—3 hours; Term Paper. Prerequisite(s): GER 022; or Consent of Instructor. Reading of short German fiction from the fin-de-siècle period and representative of various prose styles and cultural currents. GE credit: AH, WC, WE. Effective: 2016 Spring Quarter.

GER 126—Modern German Literature (4)
Discussion—3 hours; Extensive Writing. Prerequisite(s): GER 022; or Consent of Instructor. Selections from significant works of major contemporary writers, such as Hesse, Mann, Kafka, Rilke, Brecht, Grass. May be repeated up to 1 time(s) with consent of an advisor. GE credit: AH, WC, WE. Effective: 2016 Spring Quarter.

GER 127—Major Writers in German (4)
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): GER 022; or Consent of Instructor. Examination of representative works by a major writer, set in the broader cultural context of the relevant period or movement. May be repeated up to 1 time(s) when topic differs. GE credit: AH, WC, WE. Effective: 2016 Spring Quarter.

GER 129—Postwar Women Writers (4)
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): GER 022; or Consent of Instructor. Major writers in both Germanies, Austria, and Switzerland since 1945. Topics include the concept of a feminist aesthetics, East vs. West German writers, and the status of minority women writers in Germany (Jewish, Turkish-German, Afro-German). GE credit: AH, WC, WE. Effective: 2016 Spring Quarter.

GER 131—German Lyric Poetry (4)
Lecture—3 hours; Term Paper. Prerequisite(s): GER 022; or Consent of Instructor. Study of the genre of lyric poetry from the late Middle Ages through Renaissance, Baroque, Classical, Romantic, and Modern periods in correlation with other literary forms and the social climate of each period. GE credit: AH, WC, WE. Effective: 2016 Spring Quarter.

GER 132—The German Novelle (4)
Lecture—3 hours; Term Paper. Prerequisite(s): GER 022; or Consent of Instructor. Inquiry into the art of the "Novelle" through analysis of the materials and formal devices of representative authors from Goethe to Kafka. GE credit: AH, WC, WE. Effective: 2016 Spring Quarter.
GER 133—The German Drama (4)
Lecture—3 hours; Term Paper. Prerequisite(s): GER 022; or Consent of Instructor. Readings in the works of Germany's leading dramatists from the eighteenth century to the present day, such as Lessing, Goethe, Schiller, Kleist, Büchner, Hauptmann, Brecht. GE credit: AH, OL, VL, WC, WE. Effective: 2016 Spring Quarter.

GER 134—Topics in German Intellectual History (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): GER 022; or Consent of Instructor. Topics in German intellectual history with materials from a number of periods, genres, and disciplines. May be repeated up to 2 time(s) topic differs. GE credit: AH, WE. Effective: 2016 Spring Quarter.

GER 141—The Holocaust and its Literary Representation (4)

GER 142—New German Cinema (4)
Extensive Writing; Lecture/Discussion—3 hours. Knowledge of German not required. German filmmakers of the 1960s-1980s such as Fassbinder, Herzog, Syberberg, Brückner, Schlöndorf, Kluge, Wenders. May be repeated for credit content changes and with consent of instructor. (Same course as FMS 142.) GE credit: AH, OL, VL, WC, WE. Effective: 2006 Winter Quarter.

GER 143—Language Through Media (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): GER 022; or Consent of Instructor. Study of contemporary German-language news media (press, video, film, CD-ROM, Internet) for insight into political and cultural developments in the German-speaking countries. GE credit: AH, OL, VL, WC, WE. Effective: 2016 Spring Quarter.

GER 144—Marx, Nietzsche, Freud (4)
Lecture/Discussion—3 hours; Term Paper. Study of major texts of Marx, Nietzsche, and Freud, selected with an eye to their impact on 20th-century economics, ethics, and attitudes toward eros. Particular focus on conceptions of the self and the individual's relation to society. (Same course as HUM 144.) GE credit: AH, WC. Effective: 2011 Spring Quarter.

GER 160—Love in the Middle Ages (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): GER 022; or Consent of Instructor. Analysis of the phenomenon of love in selected medieval lyrical poems and romances of the twelfth and thirteenth century Blütezeit. Origins of courtly love, love and individualism, love and the Church, love and adultery. GE credit: AH, WC, WE. Effective: 2016 Spring Quarter.

GER 165E—Nazi and Fascist Cinema: Film and other Visual Media (4)
Discussion—1 hour; Film Viewing; Lecture—2 hours. Analysis of nefarious and noxious cultural products in history: films made under the Nazis and other fascists, 1933-1945. Questions at heart of humanistic studies: relationship of culture to propaganda, politics, and even unfathomable crime. (Same course as CDM 165E.) GE credit: OL, VL, WC, WE. Effective: 2018 Fall Quarter.

GER 176A—Classic Weimar Cinema (4)
Film Viewing—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): HUM 001 "German Weimar (1919-1933) cinema. Fritz Lang, F.W. Murnau, and G.W. Pabst among others. Influence on world-wide (esp. Hollywood) film genres such as film noir, horror, science fiction, and melodrama." Not open for credit to students who have completed HUM 176. (Same course as FMS 176A.) GE credit: AH, OL, VL, WC, WE. Effective: 2006 Fall Quarter.

GER 185—The Age of Bismarck (4)
Discussion—3 hours; Term Paper. Prerequisite(s): GER 022; or Consent of Instructor. Notable literary repercussions of the zenith of Germany's international status at the time of Bismarck's Chancellorship. The poetry of Storm, the prose of Fontane, the drama of Hauptmann. GE credit: AH, WC, WE. Effective: 2016 Spring Quarter.

GER 192—Field Work in German (1-12)
Internship—3-36 hours. Prerequisite(s): GER 109A; or Consent of Instructor. Total immersion program in Germany or a German speaking setting in the U.S. to further develop student proficiency in the German language. May be
repeated up to 2 time(s) or up to 12 units of credit with consent of instructor. (P/NP grading only.) Effective: 2002 Winter Quarter.

**GER 194HA—Honors Program (3)**
Independent Study—2 hours; Term Paper. Prerequisite(s): Open only to majors with a 3.500 minimum GPA in at least 135 graduation units. Research of an integrative nature (in either "General" or "Area Studies Emphasis" fields of major), guided by thesis advisor chosen by student. (P/NP grading only.) Effective: 1997 Winter Quarter.

**GER 194HB—Honors Program (3)**
Independent Study—2 hours; Term Paper. Prerequisite(s): Open only to majors with a 3.500 minimum GPA in at least 135 graduation units. Writing of Honors Thesis on topic selected by student in consultation with thesis advisor. (P/NP grading only.) Effective: 1997 Winter Quarter.

**GER 197T—Tutoring in German (1-4)**
Tutorial—3-12 hours. Prerequisite(s): Consent of German Program Director. Tutoring in undergraduate courses including leadership in small voluntary discussion groups affiliated with department courses. May be repeated up to 8 unit(s). (P/NP grading only.) Effective: 2004 Fall Quarter.

**GER 198—Directed Group Study (1-5)**
Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

**GER 199—Special Study for Advanced Undergraduates (1-5)**
Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

**GER 202—Middle High German (4)**
Discussion—3 hours; Lecture—1 hour. Graduate standing. Outline of grammar; selections from Middle High German epic, romance, and lyric poetry. Effective: 2016 Spring Quarter.

**GER 206—Cognitive Grammar for Applied Linguists (4)**
Lecture/Discussion—3 hours; Term Paper—1 hour. Prerequisite(s): Graduate standing. Analysis of grammar and application of cognitive grammar to language instruction. Syntactical problems and analyses relevant to the language which the student will teach. Effective: 2002 Spring Quarter.

**GER 210—Techniques of Literary Scholarship (4)**
Seminar—3 hours; Term Paper. Graduate standing. Bibliographical, organizational, and methodological tools and resources for advanced, independent research. Effective: 2016 Spring Quarter.

**GER 211—Concepts in Literary Theory (4)**
Seminar—3 hours. Graduate standing. Advanced course in concepts of literary theory and criticism. Discussion of the emergence of theoretical concepts and their impact on the understanding and appreciation of literary works. Discussion in German and English, readings in German. Effective: 2016 Spring Quarter.

**GER 212—Contemporary Approaches to Literary Theory (4)**
Seminar—3 hours; Term Paper. Graduate standing. Study of contemporary theoretical approaches such as structuralism, deconstruction, feminism, Marxism/Frankfurt School, and reception theory in conjunction with the works of major authors. Effective: 2016 Spring Quarter.

**GER 239—Narrative and Narrative Theory (4)**
Seminar—3 hours; Term Paper. Graduate standing. Studies, in a theoretical and literary historical context, major elements of 19th- and 20th-century narrative, such as techniques of framing, refraction, and montage; narrative perspective; mimesis; and self-consciousness. Focuses on paradigmatic prose texts alongside a spectrum of critical approaches. Effective: 2016 Spring Quarter.

**GER 240—Forms of German Verse (4)**
Seminar—3 hours; Term Paper. Graduate standing. Development of German verse from the Middle Ages to the present, with special emphasis on different techniques of text analysis and interpretation. May be repeated for credit with consent of instructor. May be repeated for credit. Effective: 2016 Spring Quarter.

**GER 241—The German Drama (4)**
Seminar—3 hours; Term Paper. Graduate standing. Major forms of German drama from its origins to the middle of the twentieth century. May be repeated for credit with consent of instructor. May be repeated for credit with consent of instructor. Effective: 2016 Spring Quarter.

**GER 242—The German Novelle (4)**
Seminar—3 hours; Term Paper. Graduate standing. The major German Novellisten, with particular emphasis on the
flowering of this genre in the nineteenth century. May be repeated for credit with consent of instructor. May be repeated for credit with consent of instructor. Effective: 2016 Spring Quarter.

GER 243—Fontane and the Rise of the Modern German Novel (4)
Seminar—3 hours; Term Paper. Graduate standing. Fontane, the father of the modern German novel and the chief German representative of the European novel at its greatest, in the context of the nineteenth-century European political and social scene. Effective: 2016 Spring Quarter.

GER 244—Gender and Comedy (4)
Seminar—3 hours; Term Paper. Graduate standing. Studies of genre and gender in German-language comedy by male and female writers from the 18th century to the present. Authors treated include Lessing, Kleist, Büchner, Ebner-Eschenbach, Hauptmann, Hofmannsthal, Frisch, Langner, and Jelinek. Effective: 2016 Spring Quarter.

GER 252—The Writing of Lessing (4)
Seminar—3 hours; Term Paper. Study of Lessing's theory of literature with particular emphasis upon his critical attacks on French drama. Effective: 2016 Spring Quarter.

GER 253—Goethe (4)
Seminar—3 hours; Term Paper. Graduate standing. Study of the origins of Goethe's thought in German Pietism, and his principal artistic, autobiographical, scientific, and philosophical works. Effective: 2016 Spring Quarter.

GER 254—Schiller (4)
Seminar—3 hours; Term Paper. Graduate standing. Critical analysis of Schiller's major works and his impact on the intellectual climate in Germany during the late eighteenth and early nineteenth centuries. Effective: 2016 Spring Quarter.

GER 255—Aesthetics in the Age of Goethe (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Emergence of aesthetic autonomy from eighteenth century normative poetics during the Age of Goethe. The shift from a model based on the imitation of nature (and the Ancients) to a new concept grounded in the individuality of aesthetic experience. Effective: 2003 Spring Quarter.

GER 257—Heinrich von Kleist (4)
Seminar—3 hours; Term Paper. Graduate standing. Kleist's important dramatic and prose works; special attention will be given to the peculiar hermeneutic problems in modern German, French, and Anglo-American Kleist criticism. Effective: 2016 Spring Quarter.

GER 258—The Novels of Thomas Mann (4)
Seminar—3 hours; Term Paper. Graduate standing. Reading of selected novels with emphasis on aesthetic techniques, originality, ethical and political views, and influence on the contemporary literary scene in Germany. Effective: 2016 Spring Quarter.

GER 259—Studies in Kafka (4)
Seminar—3 hours; Term Paper. Graduate standing. Study of Kafkas narrative techniques with special emphasis in the shorter works on the existential development from its roots in Expressionism. Effective: 2016 Spring Quarter.

GER 260—The Poetry of Rilke (4)
Seminar—3 hours; Term Paper. Graduate standing. Study of the principal motifs, myths, images, and problems in the poetry of Rainer Maria Rilke. Effective: 2016 Spring Quarter.

GER 261—Brecht and the Epic Theater (4)
Seminar—3 hours; Term Paper. Graduate standing. Reading of Brechts works with emphasis on the ideas which impelled the development of new literary forms and concepts. Effective: 2016 Spring Quarter.

GER 262—Studies in Turn-of-the-Century Culture (4)
Seminar—3 hours; Term Paper. Graduate standing. Investigates literary currents in turn-of-the-century Germany and Austria against the background of contemporaneous developments in psychology, the visual arts, philosophy, and music. Authors treated include Hauptmann, Holz and Schlaf, Schnitzler, T. Mann, Wedekind, Musil, Hofmannsthal. Effective: 2016 Spring Quarter.

GER 285—Middle High German Literature (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. Graduate standing. Extensive reading of Middle High German texts in the original language. Examines linguistic and literary problems. May be repeated for credit when topic differs. May be repeated for credit. Effective: 2016 Spring Quarter.
GER 288—The Renaissance and Reformation in German Literature (4)
Seminar—3 hours; Term Paper. Restricted to graduate standing. Parabolic and didactic style in Germany's literature during the sixteenth century. May be repeated for credit with consent of instructor. Effective: 2016 Fall Quarter.

GER 289—German Literature of the Baroque (4)
Seminar—3 hours; Term Paper. Graduate standing. The "Elegantiaideal" and the varying methods used to portray it in seventeenth-century German literature. May be repeated for credit with consent of instructor. May be repeated for credit. Effective: 2016 Spring Quarter.

GER 290—The Enlightenment in German Literature (4)
Seminar—3 hours; Term Paper. Revolt against the concept of the Elegantiaideal, and evolution of a new literature based on reason and wit. May be repeated for credit with consent of instructor. May be repeated for credit. Effective: 1997 Winter Quarter.

GER 291—Foreign Language Learning in the Classroom (4)
Project (Term Project); Seminar—3 hours. Overview of approaches to university-level foreign language instruction and the theoretical notions underlying current trends in classroom practices across commonly taught foreign languages. (Same course as FRE 291 and SPA 291.) Effective: 2006 Fall Quarter.

GER 292—Sentimentality and Sturm und Drang in German Literature (4)
Seminar—3 hours. Reaction to overemphasis on Reason: theories of Hamann and Herder and works of poets such as Lenz, Leisewitz, the early Goethe and Schiller. May be repeated for credit consent of instructor. Effective: 1997 Winter Quarter.

GER 293—The Classical Age of German Literature (4)
Seminar—3 hours; Term Paper. Inquiry into the aesthetic and humanistic qualities of Germany's greatest literary epoch. May be repeated for credit with consent of instructor. May be repeated for credit. Effective: 1997 Winter Quarter.

GER 294—The Romantic Period in German Literature (4)
Seminar—3 hours; Term Paper. Survey of the works of early nineteenth-century authors in reaction against the age of classicism. May be repeated for credit with consent of instructor. May be repeated for credit. Effective: 1997 Winter Quarter.

GER 295—Poetic Realism in German Literature (4)
Seminar—3 hours; Term Paper. Outstanding figures in German literature between 1840 and 1890. Important phases in their developments will be treated. May be repeated for credit with consent of instructor. May be repeated for credit. Effective: 1997 Winter Quarter.

GER 296—Twentieth-Century German Literature (4)
Seminar—3 hours; Term Paper. Considers the revolt of the Hauptmann generation, Symbolism, Expressionism, and the chief currents of the contemporary scene. May be repeated for credit with consent of instructor. May be repeated for credit. Effective: 1997 Winter Quarter.

GER 297—Special Topics in German Literature (4)
Seminar—3 hours; Term Paper. Various special topics in German literature, which may cut across the more usual period and genre rubrics. May be repeated for credit when topic differs. May be repeated for credit. Effective: 1997 Winter Quarter.

GER 298—Group Study (1-5)

GER 299—Individual Study (1-12)
Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

GER 299D—Special Study for the Doctoral Dissertation (1-12)
Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

GER 390A—The Teaching of German (2)
Lecture—2 hours. Prerequisite(s): Graduate standing or consent of instructor. Theoretical instruction in modern teaching methods and demonstration of their practical application. Required of new teaching assistants. (S/U grading only.) Effective: 1997 Winter Quarter.

GER 390B—The Teaching of German (2)
Lecture—2 hours. Prerequisite(s): Graduate standing or consent of instructor. Theoretical instruction in modern
teaching methods and demonstration of their practical application. Required of new teaching assistants. (S/U grading only.) Effective: 1997 Winter Quarter.

**GER 390C—The Teaching of German (2)**
Lecture—2 hours. Prerequisite(s): Graduate standing or consent of instructor. Theoretical instruction in modern teaching methods and demonstration of their practical application. Required of new teaching assistants. (S/U grading only.) Effective: 1997 Winter Quarter.

**GER 396—Teaching Assistant Training Practicum (1-4)**
Variable. Prerequisite(s): Graduate standing. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

**GER 400—Tutorial and Instructional Internship (1-3)**
Discussion—1-3 hours. Prerequisite(s): Graduate standing. Apprentice training in ongoing undergraduate literature courses taught by regular staff, with supplementary weekly critique sessions; intern leadership of discussion sections under staff supervision. May be repeated for credit. May be repeated for credit. Effective: 1997 Winter Quarter.

### Global & International Studies Minor; Humanities

**Global & International Studies Minor; Humanities | Global & International Studies Minor**

(College of Letters and Science)

The minor is overseen by a Program Committee. For more information, see [http://studyabroad.ucdavis.edu](http://studyabroad.ucdavis.edu).

The interdisciplinary minor in Global and International Studies will enable students to learn about global and international issues at UC Davis, as well as gain first-hand academic experience abroad. The minor is also designed to give recognition for upper division course work while studying abroad. However, the minor can also be completed with approved course work taken at UC Davis.

Students will be expected to work closely with an academic advisor in developing an intellectually coherent program of study. Each proposal must be approved by the Faculty Directors of UC Davis Study Abroad.

**Study Abroad and International Internships.** The course cluster requirement may be met in one of two ways: (1) completion of a minimum of 16-17 units in the course cluster emphasis by taking approved UC Davis upper division courses in the area of global/international studies and/or approved upper division courses taken while participating in UC Study Abroad or another approved study abroad program, or (2) completion of 12 units of course work in a UC Davis accredited international internship, plus UC Davis courses sufficient to total 16-17 units. Students must meet with the GIS advisor and complete a Course Cluster Worksheet to demonstrate subject interrelatedness.

**Restrictions.** No more than two courses from a single UC Davis Department may be offered in satisfaction of the minor requirements.

**Foreign Language Study.** Students are strongly encouraged to study a foreign language, particularly the language of the country in which and about which they intend to study. However, only upper division coursework may be used to fulfill requirements for the minor.

### Global and International Studies

**Arts and Humanities Emphasis:**

**Choose one:**

</tbody>
</table>

Choose one upper division UC Davis general course on global international studies. See program advisor for a list of approved courses.

**Course cluster requirement**

The minor requires the selection of interrelated courses totaling a minimum of 16-17 upper division units in area and regional studies or thematic course clusters in global and international studies.
Suggested course clusters include:
(1) Country or region-specific courses:
   Western Europe; Russian and East/Central Europe; Asia and the
   Pacific; Latin and South America; Africa and the Middle East;
   Jewish Studies; specific countries.
OR
(2) Courses clustered around a thematic field in global and
international studies:
   People and nationalities; the individual and society, arts,
   language, literature and culture.

Global Disease Biology

Global Disease Biology | GDB Information
(College of Agricultural and Environmental Sciences)
Department of Plant Pathology

Program Office. 150 Hutchison Hall; 530-754-7277; http://gdb.ucdavis.edu/

Master Advisor. Johan H.J. Leveau, Ph.D., Professor (Plant Pathology)

Faculty. Includes members of the Departments of Plant Pathology; Veterinary Medicine, School of; Medicine, School of.

Global Disease Biology | GDB B.S.
(College of Agricultural and Environmental Sciences)
Department of Plant Pathology

Program Office. 150 Hutchison Hall; 530-754-7277; http://gdb.ucdavis.edu/

Master Advisor. Johan H.J. Leveau, Ph.D., Professor (Plant Pathology)

Faculty. Includes members of the Departments of Plant Pathology; Veterinary Medicine, School of; Medicine, School of.

The Major Program
The Global Disease Biology (GDB) major offers students the opportunity to study disease and its relationship to the health of people, animals, plants, and the environment. The program uses an integrated approach to advance student understanding of the concept(s) of disease, the societal and personal impacts of past, present and future diseases, and the science behind disease discoveries, causes, evolution, diagnosis, treatment, and prevention. The program recognizes the interconnectedness of people, animals, plants, and the environment and aims to identify and address the fundamental causes of poor health around the world. Managing global disease problems requires a multifaceted, holistic approach to address the full spectrum of human, animal, plant, and environmental health risks (also known as a One Health approach). Throughout a series of core courses, issues related to human, animal, and plant health, along with tools available to solve these problems, will be introduced to provide students with real-world scenarios in which they can apply and advance their creative and critical thinking skills. The major prepares graduates with the knowledge, leadership skills and experiences required to excel in professions associated with global health, the environment, food safety and security, biological safety and security, and health policy. For more information, see http://gdb.ucdavis.edu.

The Program. The Global Disease Biology major provides students with broad preparatory scientific course work, global disease biology core classes, flexibility in upper division electives, and a strong research experience. Global Disease Biology core classes are intended to be transdisciplinary and focus on concepts that cut across human,
animal, and plant diseases offering a unifying ecological and quantitative perspective on disease. Students plan their chosen emphasis of study as part of a required discussion course and in consultation with their advisor. Students will draw from many undergraduate courses currently offered on disease and health in a way that compliments the core courses required for the Global Disease Biology major. The major includes a senior research project, which each student designs to bridge the disciplines of the major.

**Internships and Career Alternatives.** The program and interests of each student in solving societal problems guides students to a range of internship and career choices. On and off-campus internship opportunities are available in research laboratories, in field situations, with governmental agencies, with private industry, and in international programs. A degree in Global Disease Biology prepares students for careers in research, teaching, governmental regulation, health care industry, or agriculture (food safety/food security) as each relates to disease and health of people, animals, and plants. Students in the major gain research experience and may choose to continue their training at the graduate or professional level in a variety of biological disciplines. Careers in medicine, veterinary medicine, and plant pathology are open to Global Disease Biology majors.

GDB 090—Introduction to Global Disease Biology (1) Review all entries  

Seminar—1 hour. Open to Global Disease Biology majors only. Introduction to the Global Disease Biology major, research and internship opportunities, and potential career paths in human, animal, and plant health. Communication, ethics and the nature of science. (P/NP grading only.) Effective: 2017 Fall Quarter.  

Total: 20-25
GDB 090—Introduction to Global Disease Biology (1)  
Seminar—1 hour. Prerequisite(s): Open to GDB majors only, or Consent of Instructor. Open to Global Disease Biology majors only. Introduction to the Global Disease Biology major, research and internship opportunities, and potential career paths in human, animal, and plant health. Communication, ethics and the nature of science. (P/NP grading only.) Effective: 2019 Fall Quarter.

GDB 101—Epidemiology (4)  
Discussion—1 hour; Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): SAS 013; BIS 002A; BIS 002B; BIS 002C; (STA 013 or STA 013Y); (STA 100 or PLS 120) Principles and practice of epidemiology as applied to human, animal, and plant populations and the environment in which these populations co-exist. Quantitative analysis of both infectious and non-infectious disease. Inter-dependence between epidemiological analysis, decision-making and policy formulation will be highlighted. GE credit: QL, SE. Effective: 2018 Winter Quarter.

GDB 101—Epidemiology (4)  
Discussion—1 hour; Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): SAS 013; BIS 002A; BIS 002B; BIS 002C; ((STA 013 or STA 013Y) or (STA 100 or PLS 120)) Principles and practice of epidemiology as applied to human, animal, and plant populations and the environment in which these populations co-exist. Quantitative analysis of both infectious and non-infectious disease. Inter-dependence between epidemiological analysis, decision-making and policy formulation will be highlighted. GE credit: QL, SE. Effective: 2019 Spring Quarter.

GDB 102—Disease Intervention and Policy (4)  
Discussion—1 hour; Lecture—3 hours; Project (Term Project). Prerequisite(s): GDB 101; SAS 013; BIS 002A; BIS 002B; BIS 002C; PMI 129Y; VME 158 Examination of the prevention and treatment of diseases affecting humans, animals, and plants. Case studies will illustrate the merits of a unified approach to promoting health at local, regional, and global scales. GE credit: OL, SE, SL. Effective: 2014 Fall Quarter.

GDB 102—Disease Intervention & Policy (4)  
Discussion—1 hour; Lecture—3 hours; Project (Term Project). Prerequisite(s): GDB 101; SAS 013; BIS 002A; BIS 002B; BIS 002C; PMI 129Y; VME 158 Pass One restricted to Global Disease Biology majors only. Examination of the prevention and treatment of diseases affecting humans, animals, and plants. Case studies illustrate the merits of a unified approach to promoting health at local, regional, and global scales. GE credit: OL, SE, SL. Effective: 2019 Fall Quarter.

GDB 103—The Microbiome of People, Animals, and Plants (3)  
Lecture—3 hours. Prerequisite(s): BIS 002A; BIS 002B; BIS 002C Examination of the structure and function of microbial communities that live inside and on host organisms. Introduction to general concepts of the microbiome and microbiota, and their relationship to host health and disease. GE credit: SE, SL. Effective: 2015 Fall Quarter.

GDB 187—Global Disease Biology Seminar (3)  
Discussion—1 hour; Seminar—1 hour; Term Paper. Prerequisite(s): GDB 090; SAS 013 Open to junior standing; Global Disease Biology majors. Seminar leading to development of the research proposal and academic plan for the Global Disease Biology major. Effective: 2015 Fall Quarter.

GDB 189—Global Disease Biology Senior Research (3)  
Independent Study—3 hours. Prerequisite(s): GDB 090; GDB 189D (can be concurrent); SAS 013; GDB 189D required concurrently the first time GDB 189 is taken. Restricted to senior standing; Global Disease Biology majors only. Capstone research experience for the Global Disease Biology major. Project may be experimental, library research, or some other creative activity. May be repeated up to 1 time(s) for student research conducted over two quarters; second quarter used to finish writing the research paper. (P/NP grading only.) Effective: 2015 Fall Quarter.

GDB 189D—Global Disease Biology Research Discussion (1)  
Discussion—1 hour. Prerequisite(s): GDB 090; GDB 187; SAS 013; GDB 189 (can be concurrent); GDB 189 required concurrently. Restricted to junior standing; Global Disease Biology majors only. Course helps prevent or solve
problems during the students' research activity. Independent advising and assistance on research proposal. (P/NP grading only.) Effective: 2015 Fall Quarter.

**GDB 189D—Global Disease Biology Research Discussion (1)** Review all entries
Discussion—1 hour. Prerequisite(s): GDB 090; GDB 187; SAS 013; GDB 189; or Consent of Instructor. Restricted to junior standing; Global Disease Biology majors only. Prevent or solve problems during the students’ research activity. Independent advising and assistance on research proposal. (P/NP grading only.) Effective: 2019 Fall Quarter.

**Greek Minor; Classics**

**Greek Minor; Classics | Greek Minor**
(College of Letters and Science)
Carey Seal, Ph.D., Program Director

Department Office. Classics Program; 215 Sproul Hall; 530-752-0835; http://classics.ucdavis.edu

Faculty. http://classics.ucdavis.edu/people

The Department offers minors in Arabic, Classical Civilization, Greek and Latin for those wishing to follow a shorter but formally recognized program of study in Classics.

Three upper division courses in Greek.

One additional upper division course in Classics, Latin, or Greek.

Total: 20

**Greek Minor; Classics | GRK Courses**

**Courses in GRK:**

**GRK 001—Elementary Greek (5)**

**GRK 002—Elementary Greek (5)**
Lecture—5 hours. Prerequisite(s): GRK 001; Or the equivalent. Continuation of course 1. GE credit: AH. Effective: 2016 Spring Quarter.

**GRK 002NT—Elementary New Testament Greek (1)**
Lecture—1 hour. Prerequisite(s): GRK 002 (can be concurrent); Concurrent attendance required. Supplementary study of New Testament Greek. GE credit: AH. Effective: 2016 Spring Quarter.

**GRK 003—Intermediate Greek (5)**
Lecture—5 hours. Prerequisite(s): GRK 002; Or the equivalent. Continuation of course 2. Selected readings from Greek authors. GE credit: AH. Effective: 2016 Spring Quarter.

**GRK 003NT—Elementary New Testament Greek (1)**
Lecture—1 hour. Prerequisite(s): GRK 003 (can be concurrent); or Consent of Instructor. Concurrent attendance required. Supplementary study of New Testament Greek. GE credit: AH. Effective: 2016 Spring Quarter.

**GRK 098—Directed Group Study (1-5)**
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

**GRK 100—Readings in Greek Prose (4)**
