Discussion—10 hours; Lecture—25 hours. Restricted to completion of M.D., D.D.S, D.M.D., O.D., N.D., Pharm.D., D.V.M., Ph.D., or D.N.S. in nursing; application and acceptance into the Clinical Research Graduate Group, K30 program. Anatomy and physiology of conducting clinical epidemiologic research. Familiarity with three basic study designs (cross-sectional, case-control, and cohort). Discussion of principles of measurements in clinical epidemiological studies, basic methods for analyzing data, and ethical issues involved in conducting research. (S/U grading only.) Effective: 2004 Summer Special Session.

**MDS 463CR—Methods in Clinical Research (5)**
Discussion—2 hours; Lecture—3 hours. Restricted to completion of M.D., D.D.S, D.M.D., O.D., N.D., Pharm.D., D.V.M., Ph.D., or D.N.S. in nursing; application and acceptance into the Clinical Research Graduate Group, K30 program. Overview of major approaches to clinical research, including health services research techniques, informatics, the GCRC, and preclinical methodologies to enhance clinical projects. Overview of UC Davis clinical research support infrastructure. Methodologies applicable to clinical research and its multi-disciplinary perspective. (S/U grading only.) Effective: 2007 Spring Quarter.

**MDS 464CR—Responsible Conduct of Research (3)**

**MDS 465CR—Introduction to Medical Statistics (4)**
Laboratory—2 hours; Lecture—3 hours. Restricted to completion of M.D., D.D.S, D.M.D., O.D., N.D., Pharm.D., D.V.M., Ph.D., or D.N.S. in nursing; application and acceptance into the Clinical Research Graduate Group, K30 program. Biomedical applications of statistical methods in clinical, laboratory and population medicine. Graphical/tabular data presentation, probability, binomial, Poisson, normal, t-, F-, and Chi-square distributions, elementary nonparametric methods, simple linear regression/correlation, life tables. Microcomputer applications of statistical procedures in population medicine. (S/U grading only.) Effective: 2005 Summer Special Session.

**MDS 468C—International Clinical Preceptorship (1-12)**
Clinical Activity—30 hours. Prerequisite(s): Consent of Instructor. Medical students. Multidisciplinary preceptorship in a foreign country. Clinical credit will be awarded using this course, once approval has been received from the appropriate governing committee. May be repeated for credit. (H/P/F grading only.) Effective: 2015 Spring Quarter.

**MDS 468D—International Elective (1-12)**
Clinical Activity—10 hours; Independent Study—20 hours. Prerequisite(s): Consent of Instructor. Medical students. Multidisciplinary preceptorship in a foreign country. Course used to award non-clinical credit for international experiences which have been approved by the appropriate governing committee. May be repeated for credit. (H/P/F grading only.) Effective: 2015 Summer Quarter.

**MDS 470—Introduction to Dentistry (3-18)**
Clinical Activity—34 hours; Lecture—6 hours; Variable—3-18 hours. Prerequisite(s): Consent of Instructor. Fourth-year medical student in good standing. Introduction to Dentistry and basic Oral and Maxillofacial Surgery. Course is offered by the Oral and Maxillofacial Surgery department at UC San Francisco. (P/F grading only.) Effective: 2009 Fall Quarter.

**MDS 480—Insights in Clinical Research (1)**
Lecture—1 hour. Prerequisite(s): Medical student in good standing. Seminars on research presented by Medical School faculty; overview of pertinent issues, including medical ethics, human subjects protocols, case control methods, etc. May be repeated for credit. (P/F grading only.) Effective: 2005 Spring Quarter.

**MDS 481—Insights into Clinical Specialties (1)**
Lecture/Discussion—1 hour. Prerequisite(s): Medical student in good standing. Exposure to various medical specialties, their residency programs and ways in which medical students can prepare for and improve their candidacy for such programs. May be repeated for credit. (H/P/F grading only.) Effective: 1998 Winter Quarter.
MDS 482—Lecture Series in Reproductive Health (1)
Lecture—1 hour. Psychosocial and public health aspects of providing quality reproductive health care and application in student-run free clinics and in 3rd year clerkships. May be repeated up to 2 time(s). Only medical students may enroll for credit; undergraduates may audit the course. (P/F grading only.) Effective: 2002 Winter Quarter.

MDS 483—Insights in Political, Legal and Business Aspects of Medicine (1)
Lecture—1 hour. Prerequisite(s): Medical students in good standing. Restricted to Medical student only. The practical aspects of a medical career. May be repeated up to 2 time(s). (P/F grading only.) Effective: 2002 Spring Quarter.

MDS 485—Health Policy Lecture Series (1)
Lecture—1 hour. Lecture series provides an overview of local, state, national and international health policy. The current challenges health care reform implementation is facing provides how medical students can successfully advocate for changes in health policy. May be repeated for credit. (P/F grading only.) Effective: 2011 Fall Quarter.

MDS 486—Topics in Health Care Improvement (0.5)
Lecture/Discussion—15 hours. Lecture series will cover major topics in health care improvement, presented by guest speakers who are leaders in the field. May be repeated for credit. (P/F grading only.) Effective: 2015 Spring Quarter.

MDS 487—History and Ethics of Medicine (1)
Lecture—1.25 hours. Introduction to ethical problems and events in health care in both modern and historical contexts. Eight one-hour and fifteen-minute interactive sessions designed to introduce students to historical topics in medicine and medical ethics. (P/F grading only.) Effective: 2004 Winter Quarter.

MDS 489—Directed Studies (1-9)
Prerequisite(s): Consent of Instructor. Individual directed studies in extended preparation for modified curriculum, USMLE exams, and/or as required by Committee on Student Progress. Independent studies to accommodate modified curriculums, prepare for taking USMLE exams and for remediation course work directed by the Committee on Student Progress. May be repeated for credit. (P/F grading only.) Effective: 2009 Winter Quarter.

MDS 489C—Clinical Reintroduction Experience (1-9)
Clinical Activity—20 hours. Prerequisite(s): Consent of Instructor. Learn and practice basic clinical skills in a supervised clinical setting. Skills include patient interviewing, history, physical examination, diagnostic and clinical reasoning, case presentation, and medical records documentation. Direct observation and individual feedback on clinical skills development is provided. (P/F grading only.) Effective: 2012 Summer Quarter.

MDS 489R—USMLE Directed Remedial Studies (1-9)
Independent Study—20 hours. Prerequisite(s): Recommendation by Committee on Student Progress. Independent studies to accommodate remediation for taking USMLE exams directed by the Committee on Student Progress. May be repeated for credit. (P/F grading only.) Effective: 2011 Spring Quarter.

MDS 490A—Community Health Scholars Seminar A (1.5)
Lecture—1 hour. Prerequisite(s): Consent of Instructor. Longitudinal year-long course starting on July 1 and concluding at the end of Block 2. Focuses on immersing students in their respective communities to understand the strengths and challenges they face in relation to health. May be repeated for credit. (P/F grading only.) Effective: 2017 Summer Quarter.

MDS 490B—Community Health Scholars Seminar B (0.5)
Lecture—1 hour. Prerequisite(s): Consent of Instructor. Longitudinal year-long course starting on July 1 and concluding at the end of Block 2. Focuses on immersing students in their respective communities to understand the strengths and challenges they face in relation to health. May be repeated for credit. (P/F grading only.) Effective: 2017 Summer Quarter.

MDS 490C—Community Health Scholars Seminar C (0.5)
Lecture—1 hour. Prerequisite(s): Consent of Instructor. Longitudinal year-long course starting on July 1 and concluding at the end of Block 2. Focuses on immersing students in their respective communities to understand the strengths and challenges they face in relation to health. May be repeated for credit. (P/F grading only.) Effective: 2017 Summer Quarter.

MDS 490D—Community Health Scholars Seminar D (0.5)
Lecture—1 hour. Prerequisite(s): Consent of Instructor. Longitudinal year-long course starting on July 1 and concluding at the end of Block 2. Focuses on immersing students in their respective communities to understand
MDS 493—Independent Special Study Module (3-12)
Variable—20 hours. Prerequisite(s): Consent of Instructor. FYOC approval required. Student developed alternative to the SSM/SPO Requirement. Approval by FYOC is required. (H/P/F grading only.) Effective: 2015 Winter Quarter.

MDS 493A—International and Comparative Health Care--SSM (6)
Discussion—20 hours; Lecture—10 hours. Prerequisite(s): Consent of Instructor. Restricted to UC Davis School of Medicine students only. Through a series of lectures, seminars and clinical experiences, all occurring in other nations, students will research how health care systems address critical health issues. In 2007, Chronic Disease is the focal issue. SSM Component. (H/P/F grading only.) Effective: 2012 Spring Quarter.

MDS 493B—International and Comparative Health Care--Clinical (3-9)
Clinical Activity—30 hours. Prerequisite(s): Consent of Instructor. Restricted to UC Davis School of Medicine students only. Through a series of lectures, seminars and clinical experiences, all occurring in other nations, students will research how health care systems address critical health issues. In 2007, Chronic Disease is the focal issue. Clinical Component. (H/P/F grading only.) Effective: 2014 Spring Quarter.

MDS 493D—Teaching the Basic Sciences SSM (6)
Laboratory—30 hours; Lecture—6 hours; Lecture/Lab—8 hours; Tutorial—10 hours. Prerequisite(s): MDS 440 (can be concurrent); and Consent of Instructor. MDS 440 required concurrently. Restricted to UC Davis School of Medicine students only. Special Studies Module, a yearlong in progress court to teach lecture and discussion education technique and theory. (H/P/F grading only.) Effective: 2015 Spring Quarter.

MDS 493Q—Improving Quality in Health Care (6)
Discussion/Laboratory—10 hours; Lecture—8 hours; Project (Term Project)—10 hours. Prerequisite(s): Consent of Instructor. Working in interdisciplinary teams, will explore the theory and practical methods being employed to make improvement in health care systems while providing an opportunity for interprofessional educational experience. (H/P/F grading only.) Effective: 2015 Fall Quarter.

MDS 493QA—Improving Quality in Health Care (3)
Discussion/Laboratory—10 hours; Lecture—8 hours; Project (Term Project)—10 hours. Prerequisite(s): Consent of Instructor. Working in interdisciplinary teams, will explore the theory and practical methods being employed to make improvement in health care systems while providing an opportunity for interprofessional educational experience. (H/P/F grading only.) Effective: 2012 Fall Quarter.

MDS 493QB—Improving Quality in Health Care (3)
Discussion/Laboratory—10 hours; Lecture—8 hours; Project (Term Project)—10 hours. Prerequisite(s): Consent of Instructor. Working in interdisciplinary teams, will explore the theory and practical methods being employed to make improvement in health care systems while providing an opportunity for interprofessional educational experience. (H/P/F grading only.) Effective: 2012 Fall Quarter.

MDS 493QC—Enhancing Patient Safety in Health Care (6)
Clinical Activity—8 hours; Discussion—6 hours; Seminar—6 hours. Prerequisite(s): Consent of Instructor. Fourth-year Medical student. Inter-professional module is designed to explore the theory and practical methods being employed to improve patient safety in health care while providing an opportunity for interprofessional educational experience. (H/P/F grading only.) Effective: 2013 Spring Quarter.

MDS 494—Non-Clinical Medical Student Externship (3-9)
Clinical Activity—10 hours; Independent Study—20 hours. Prerequisite(s): Consent of Instructor. Restricted to students with approval of credit by the Fourth Year Oversight Committee. Generic course for awarding externship credit for medical student rotations that are not primarily focused on patient care. May be repeated for credit. (H/P/F grading only.) Effective: 2014 Fall Quarter.

MDS 495—Medicine Literature Review (1-9)
Discussion—3-27 hours. Prerequisite(s): Medical student in good academic standing and permission of the Associate Dean of Curricular Affairs. Independent study: topics for selection include, but are not restricted to, medical ethics, economics and jurisprudence, culture and medicine, ethnicity and medicine, gender and medicine, history of medicine, health manpower, and medical education. A prepared paper on the selected topic will be required. (P/F grading only.) Effective: 1997 Fall Quarter.

MDS 497—Scholarly Project (6)
Independent Study—0.5 hours; Seminar—0.25 hours. Prerequisite(s): Consent of Instructor. Project proposal must
be accepted by the Scholarly Project Executive Committee (SPEC). Restricted to 4th year medical school students only. Develop a research project on a focused topic area, implements the research, writes a publishable paper, and presents an oral summary of the project. (H/P/F grading only.) Effective: 2015 Spring Quarter.

**MDS 499—Research in Medical Education & Curriculum Development (4-9)** Review all entries
Independent Study—10-36 hours. Prerequisite(s): Medical students in good standing and competency with computers. Research and development of an independent project related to expanding computer-assisted resources in support of the MD curriculum at UC Davis. (H/P/F grading only.) Effective: 1997 Fall Quarter.

**MDS 499—Medical Student Research Fellowship (1-9)** Review all entries
Independent Study—10-36 hours. Prerequisite(s): Medical students in good standing and competency with computers. Independent research project as part of the Medical Student Research Fellowship. (H/P/F grading only.) Effective: 2018 Summer Quarter.

**SOM Courses | PHA**

**Courses in PHA:**

**PHA 092—Internship in Pharmacology (1-12)**
Internship—3-36 hours. Prerequisite(s): Lower division student with good academic standing; approval of project prior to period of internship. Supervised work experience in pharmacology and related fields. (P/NP grading only.) Effective: 1997 Winter Quarter.

**PHA 099—Special Study for Undergraduates (1-5)**
Variable. Prerequisite(s): Consent of Instructor. Lower division standing. (P/NP grading only.) Effective: 1997 Winter Quarter.

**PHA 192—Internship in Pharmacology (1-12)**
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Upper division standing; approval of project prior to period of internship. Supervised work experience in pharmacology and related fields. (P/NP grading only.) Effective: 1997 Winter Quarter.

**PHA 198—Directed Group Study (1-5)**
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

**PHA 199—Special Study for Advanced Undergraduates (1-5)**
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

**PHA 205—Problem Solving in Pharmacology (1)**
Lecture/Discussion—1 hour. Restricted to Graduate Students in Pharmacology and Toxicology, Chemistry and Clinical Research Graduate Groups; other students may be accepted with consent of instructor. Students will be introduced to a current biomedical problem that would benefit from a developing drug and will develop an experimental strategy for addressing the issue. Students will develop model systems for testing various classic and recent pharmacological approaches. May be repeated up to 12 time(s) Course changes subjects every quarter; each course is unique and can be taken as often as desirable; certain students (Trainees of the Training Program in Pharmacological Sciences) must take course for at least three years. Effective: 2014 Fall Quarter.

**PHA 207—Drug Discovery and Development (3)**
Extensive Writing—1 hour; Lecture/Discussion—2 hours. Prerequisite(s): An equivalent course in general pharmacology, or knowledge of basic pharmacology. Intended for graduate students in Pharmacology and Toxicology, Chemistry and Clinical Research Graduate Groups; other students, including undergraduates, may be accepted with consent of instructors. Survey of the process by which a drug is discovered, developed and made available to the public. Topics include drug identification and optimization, safety testing, clinical evaluation, regulatory issues, intellectual property, formulation, and the global pharmaceutical industry. May be repeated for credit. Effective: 2010 Winter Quarter.

**PHA 208—Advanced Cardiac Physiology and Pharmacology (3)**
Lecture—2 hours; Lecture/Discussion—1 hour. Prerequisite(s): An equivalent course in general pharmacology or physiology (example, BIM 204), or knowledge of basic pharmacology/physiology. Open to graduate students from the Pharmacology and Toxicology, Molecular, Cellular and Integrated Physiology, Biomedical Engineering and Clinical Research Graduate Groups; other students (including undergraduates) may be accepted upon consultation with the instructors. Detailed characterization of the mechanisms involved in cardiac excitation—contraction coupling, alterations that occur in heart disease and pharmacological interventions. Topics include cardiac...
contractile apparatus, action potential, Ca cycling, excitation–transcription coupling, cardiac inotropy, heart failure and arrhythmias. Effective: 2013 Spring Quarter.

**PHA 225—Gene and Cellular Therapies (3)**
Lecture/Discussion—3 hours. Gene therapy from basic concepts to clinical applications. Topics include the human genome and genetic variation, genetic diseases, methods to manipulate gene expression, viral and non-viral delivery vectors, history and progress of gene therapy, case studies, and ethical issues. (Same course as GGG 225.) Effective: 2017 Winter Quarter.

**PHA 250—Functional Genomics: From Bench to Bedside (3)**
Lecture/Discussion—3 hours. Prerequisite(s): GGG 201C; MCB 214; Or equivalent. Functional genomics (how genetic variation and epigenomics affect gene expression), with an emphasis on clinical relevance and applications. Topics include genetic variation and human disease, cancer therapeutics, and biomarker discovery. (Same course as GGG 250.) Effective: 2015 Spring Quarter.

**PHA 291—Pharmacology Research Seminar Series (1)**
Discussion—1 hour; Seminar—1 hour. Prerequisite(s): Consent of Instructor. Upper division or graduate standing. Research seminars on current topics in Pharmacology. May be repeated for credit when topic differs. (S/U grading only.) Effective: 2007 Fall Quarter.

**PHA 298—Group Study (1-5)**
Variable. Prerequisite(s): Consent of Instructor. Effective: 1997 Winter Quarter.

**PHA 299—Research (1-12)**
Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

**PHA 400A—Pharmacology (2)**
Discussion/Laboratory—0.3 hours; Lecture—1 hour. Prerequisite(s): Approval by School of Medicine Committee on Student Progress. Restricted to Medical student only. Principles in pharmacology, including pharmacokinetics, drug metabolism and the actions, uses and toxicities of the major classes of drugs. (P/F grading only.) Effective: 2012 Winter Quarter.

**PHA 400B—Pharmacology (1.5)**
Discussion—0.25 hours; Lecture—1 hour. Prerequisite(s): Approval by School of Medicine Committee on Student Progress; medical students only. Principles in pharmacology, including autonomic pharmacology, general anesthetics, neuropharmacology and sedative/hypnotics. (P/F grading only.) Effective: 2008 Fall Quarter.

**PHA 400C—Pharmacology (3.5)**
Discussion—0.5 hours; Lecture—2 hours. Prerequisite(s): PHA 400A; PHA 400B; Approval by School of Medicine Committee on Student Progress; medical students only. Treatment of respiratory and cardiovascular disease, central nervous system drugs, GI, Toxicology and chemotherapy. Specific topics include: asthma, chronic obstructive pulmonary disease, hypertension, congestive heart failure, and the treatment of arrhythmias. Pain Management, depression, psychosis, acid reflux, IBS and toxicology. (P/F grading only.) Effective: 2015 Fall Quarter.

**PHA 445—Introduction to Integrative Medicine (1)**
Lecture/Discussion—1 hour. Prerequisite(s): Medical student in good standing. Basic principles of alternative medical systems (e.g., traditional Chinese, Ayurvedic, Tibetan), alternative practices (e.g., chiropractic, osteopathy, naturopathy, homeopathy, herbalism, guided imagery/meditation, massage therapy), and mind/body connection are presented as introduction to integrating alternative treatments into traditional medicinal practice. (H/P/F grading only.) Effective: 2000 Winter Quarter.

**PHA 490—Seminar in Pharmacology for Medical Students (1)**
Seminar—1 hour. Prerequisite(s): Consent of Instructor. Seminar in pharmacology for medical students. (H/P/F grading only.) Effective: 1997 Winter Quarter.

**PHA 497T—Tutoring in Pharmacology (1-5)**
Tutorial—3-15 hours. Prerequisite(s): Advanced standing or consent of instructor. Assist instructor by tutoring medical students in preparation for one of the departmental courses that is a component of the required curriculum of the School of Medicine. (H/P/F grading only.) Effective: 1997 Winter Quarter.

**PHA 498—Special Study for Medical Students (1-5)**
Discussion; Lecture. Prerequisite(s): Consent of Instructor. Special study in pharmacology for medical students. (H/P/F grading only.) Effective: 1997 Winter Quarter.
PHA 499—Directed Research for Medical Students (1-12)
Laboratory—3-36 hours. Prerequisite(s): Consent of Instructor. Directed research in pharmacology for medical
students. May be repeated for credit. (H/P/F grading only.) Effective: 2017 Fall Quarter.

SOM Courses | NEU

Course in NEU:

NEU 103—Human Clinical Neuroanatomy (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): CHA 101; or Consent of Instructor. Open to upper division
students. Clinically relevant anatomy of the normal human nervous system, including external and internal anatomy
of the brain, spinal cord, and cranial nerves. Blood supply to the brain and spinal cord. Functional neuroanatomy of
motor, sensory, and cognitive systems. Application of neuroanatomical principles relevant to clinical problem
solving for students entering health care professions. (Same course as CHA 103;) GE credit: SE. Effective: 2018
Spring Quarter.

NEU 199—Individual Special Study and Research (1-4)
Variable. Prerequisite(s): Consent of Instructor. Individual special study in neurophysiology and biomedical
engineering is offered to qualified students. Studies on psychophysics, single-unit electrophysiology and
instrumentation are offered in Davis. (P/NP grading only.) Effective: 1997 Winter Quarter.

NEU 298—Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. For graduate students desiring to explore particular topics in depth.
Lectures and conferences may be involved. (S/U grading only.) Effective: 1997 Winter Quarter.

NEU 299—Individual Special Study and Research (1-12)
Laboratory—3-36 hours. Prerequisite(s): Consent of Instructor. Individual special study and research in
Neurophysiology and Biomedical engineering is offered at both Davis and Sacramento Medical Center. (S/U
grating only.) Effective: 1997 Winter Quarter.

NEU 420—Clinical Neurosciences (2)
Lecture—1.5 hours; Lecture/Discussion—1 hour. Restricted to Medical Students only. Pathophysiology underlying
neurological disorders, including disorders of development, muscle, nerve, cerebral circulation, metabolism, myelin,
cortical function, movement, cerebrospinal fluid, autonomic function and special senses. Anatomical basis of clinical
testing, nervous system infection, neoplasia and trauma. (P/F grading only.) Effective: 2007 Summer Quarter.

NEU 440—Where Drugs Come From: How They are Discovered, Developed, Regulated, and Marketed (3-6)
Lecture. Includes the following topics: Overview of the Drug Discovery Process; Drug Regulation in the United
States; Patents and Other Forms of Exclusivity; Drug Targets and Pharmacology; Identification of Lead Candidates;
Preclinical Assessment; ADME Including Basic Pharmacokinetic Principles; Principles of Drug Toxicity; Principles of
Drug Safety; Clinical Trials; Generic Drugs; Pharmaceutical Industry; Drug Distribution and Marketing; Dietary
Supplements; Controlled Substances. (H/P/F grading only.) Effective: 2018 Winter Quarter.

NEU 450—Clinical Neurology Clerkship (3-6)
Clinical Activity—24 hours; Conference—12 hours; Independent Study—10 hours; Seminar—4 hours. Prerequisite(s):
Open to all fourth year medical students and third year medical students with consent of instructor. Restricted to six
students per rotation. Critical elements of neurological clinical skills (history & exam) and basic and clinical
neurological concepts expected for general residency preparation. Active, didactic, experiential and independent
learning to encourage maturation of general professional competencies. May be repeated for credit. (H/P/F grading
only.) Effective: 2011 Winter Quarter.

NEU 452—Advanced Clinical Neurology (6)
Clinical Activity. Prerequisite(s): Consent of Instructor. Completion of four-week Neurology selective. Extension of
basic Neurology clerkship. Designed for students with special interest in medical disorders of nervous system. By
arrangement with department, student may serve as an acting intern. Principles of neurological differential
diagnosis and therapeutics emphasized. (H/P/F grading only.) Effective: 1997 Winter Quarter.

NEU 455—Child Neurology (6)
Clinical Activity. Prerequisite(s): IMD 430; OBG 430; PED 430; and Consent of Instructor. Student exposed to
children with disorders of the nervous system, both in outpatient and inpatient services. Cases presented to a
member of full-time faculty who will discuss clinical findings, differential diagnosis, management and therapy. This
course satisfies the fourth year neuroscience requirement. (H/P/F grading only.) Effective: 1997 Winter Quarter.

Review all entries
NEU 455—Child Neurology (1-12)  
Review all entries
Clinical Activity. Prerequisite(s): IMD 430; OBG 430; PED 430; and Consent of Instructor. Exposure to children with disorders of the nervous system, both in outpatient and inpatient services. Cases presented to a member of full-time faculty who will discuss clinical findings, differential diagnosis, management and therapy. Satisfies fourth-year neuroscience requirement. (H/P/F grading only.) Effective: 2019 Spring Quarter.

NEU 460—Externship in Neurology (3-6)
Clinical Activity. Prerequisite(s): Consent of Instructor. Externship course for Neurology rotations not meeting the qualifications to be an Acting Internship. May be repeated for credit. (H/P/F grading only.) Effective: 2017 Summer Quarter.

NEU 462—Externship in Advanced Neurology (3-6)
Clinical Activity. Prerequisite(s): Consent of Instructor. Away rotation in Neurology where coursework meets the standards to be counted as an Acting Internship. (H/P/F grading only.) Effective: 2017 Summer Quarter.

NEU 493F—Issues in Geriatric Care (6)
Seminar. Four-week module teaches an approach to common problems in the elderly through history and exam, with an emphasis on integration of underlying anatomy, physiology, and pathophysiology in common geriatric presentations. May be repeated for credit. (H/P/F grading only.) Effective: 2018 Winter Quarter.

NEU 498NE—Group Study in Neurology (1-6)
Variable—3-5 hours. Prerequisite(s): Medical students with consent of instructor. Directed readings and discussions with a comprehensive written examination at the end of course. (P/F grading only.) Effective: 2002 Summer Session 2.

NEU 499—Research (1-12)
Laboratory—2-24 hours. Prerequisite(s): Consent of Instructor. Approved for graduate degree credit. Laboratory investigation on selected topics. May be repeated for credit. (H/P/F grading only.) Effective: 2017 Fall Quarter.

SOM Courses | NSU

Courses in NSU:

NSU 199—Special Study in Neurosurgery for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Advanced undergraduate standing with consent of instructor. Students may participate in ongoing neurosurgical projects or may pursue and design independent projects. (P/NP grading only.) Effective: 1997 Winter Quarter.

NSU 299—Neurosurgery Research (3-12)
Prerequisite(s): Graduate student with consent of instructor. Student may participate in ongoing neurosurgical projects or may pursue and design independent projects. (S/U grading only.) Effective: 1997 Winter Quarter.

NSU 451—Neurosurgical Critical Care Clerkship (3)
Clinical Activity. Prerequisite(s): Third- or fourth-year medical student having completed a neurosurgical clerkship or consent of instructor. Students participate in the care of neurosurgical patients in the NSICU and in the admission and surgical management of patients admitted through the Emergency Room. (H/P/F grading only.) Effective: 1997 Winter Quarter.

NSU 455—Clinical Pediatric Neurosurgery (6)
Clinical Activity. Prerequisite(s): NSU 460; and Consent of Instructor. Third- or fourth-year medical students. Admission and follow-up of pediatric patients. Neurological history, examination, and diagnostic procedures are emphasized. Students will participate in surgical procedures and are required to attend all pediatric neurosurgery conferences. (H/P/F grading only.) Effective: 1997 Winter Quarter.

NSU 460—Clinical Neurosurgery (6-18)
Clinical Activity. Prerequisite(s): Consent of Instructor. Third- and fourth-year medical students. Approved for graduate degree credit. Admission and follow-up of patients. Neurological history, examination and further diagnostic procedures emphasized. Students participate in meaningful aspects of surgical procedures and attend listed conferences, rounds, and seminars. (H/P/F grading only.) Effective: 1997 Winter Quarter.

NSU 464—Externship (3-9)
Clinical Activity. Prerequisite(s): Fourth-year medical student having completed a neurosurgical clerkship or consent of instructor. Clerkship in neurosurgery to be arranged at another institution with accredited residency program in neurosurgery under proper supervision. (H/P/F grading only.) Effective: 2016 Summer Quarter.
NSU 470—Advanced Clinical Neurosurgery (6-18)
Clinical Activity. Prerequisite(s): Consent of Instructor. Fourth-year medical student in good academic standing. Student will function as acting intern on neurosurgery service. Admission and management of patients. Neurological history, examination, diagnostic procedures, and surgical management are emphasized. Students participate in meaningful aspects of surgical procedures and attend required conferences and rounds. (H/P/F grading only.) Effective: 1997 Winter Quarter.

NSU 480—Insights in Neurosurgery (1-3)
Clinical Activity—3-9 hours. Prerequisite(s): Consent of Instructor. First- and second-year medical students in good academic standing. Observation of neurosurgical care in emergency room, operating room and hospital floors, including manner of treatment of a variety of chronic and acute neurological diseases. (H/P/F grading only.) Effective: 1997 Winter Quarter.

NSU 499—Neurosurgery Research (1-18)
Variable. Prerequisite(s): Medical student with consent of instructor. Student may participate in ongoing neurosurgical projects or may pursue and design independent projects. May be repeated for credit. (H/P/F grading only.) Effective: 2017 Fall Quarter.

SOM Courses | OBG
Courses in OBG:

OBG 192—Shifa Clinic/student volunteer (1)
Clinical Activity—8 hours; Conference—2 hours; Discussion—2 hours. Open to undergraduates only. Supervised work experience in Obstetrics & Gynecology. May be repeated up to 3 time(s). (P/NP grading only.) Effective: 2003 Fall Quarter.

OBG 194—Shifa Clinic Student Volunteer (1)
Clinical Activity—6 hours; Conference—1 hour. Prerequisite(s): Consent of Instructor. The applications will be available for students. Selection of students will be made by selection committee of medical students coordinators and the IOR. Attend clinic every third Sunday performing duties of receptionist, intake, translation, monitor. Students attend a meeting immediately after end of clinic. There is a mandatory Monday meeting with Clinic co-directors. Students are expected to participate on various committees. May be repeated up to 3 time(s). (P/NP grading only.) Effective: 2008 Fall Quarter.

OBG 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

OBG 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

OBG 220—Genetics of Reproduction (3)

OBG 290—Current Topics in Research (1)
Seminar—1 hour. Prerequisite(s): Consent of Instructor. Graduate standing. Selected topics in reproductive biology. (S/U grading only.) Effective: 1997 Winter Quarter.

OBG 298—Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Graduate standing. Effective: 1997 Winter Quarter.

OBG 299—Research (1-12)
Variable. Prerequisite(s): Consent of Instructor. Graduate standing. (S/U grading only.) Effective: 1997 Winter Quarter.

OBG 430—Obstetrics and Gynecology Clerkship (12)
Clinical Activity—45 hours. Prerequisite(s): Approval by School of Medicine Committee on Student Progress. Obstetrics, gynecologic and gynecological oncology experience in the delivery room, operating room, clinics and wards at UCDMC and affiliated sites. Rounds, conferences, interactive student presentations and seminars ongoing. (H/P/F grading only.) Effective: 2001 Summer Quarter.

OBG 430F—SJVP OBGYN Clerkship at UCSF (6-12)
Clinical Activity—45 hours. Prerequisite(s): Approval by School of Medicine Committee on Student Progress. Obstetrics, gynecologic and gynecological oncology experience in the delivery room, operating room, clinics and

1536
wards at UCSF Fresno. Rounds, conferences, interactive student presentations and seminars ongoing. (H/P/F grading only.) Effective: 2017 Spring Quarter.

OBG 430R—Rural PRIME OBGYN Longitudinal Clerkship (2)
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Obstetrics and Gynecology Longitudinal Integrated Clerkship for the Rural PRIME Program. (H/P/F grading only.) Effective: 2017 Spring Quarter.

OBG 430RA—Rural PRIME OBGYN Longitudinal Clerkship (3)
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Obstetrics and Gynecology Longitudinal Integrated Clerkship for the Rural PRIME Program. (H/P/F grading only.) Effective: 2017 Spring Quarter.

OBG 430RB—Rural PRIME OBGYN Longitudinal Clerkship (3)
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Obstetrics and Gynecology Longitudinal Integrated Clerkship for the Rural PRIME Program. (H/P/F grading only.) Effective: 2017 Spring Quarter.

OBG 430RC—Rural PRIME OBGYN Longitudinal Clerkship (3)
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Obstetrics and Gynecology Longitudinal Integrated Clerkship for the Rural PRIME Program. (H/P/F grading only.) Effective: 2017 Spring Quarter.

OBG 430RD—Rural PRIME OBGYN Longitudinal Clerkship (1)
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Obstetrics and Gynecology Longitudinal Integrated Clerkship for the Rural PRIME Program. (H/P/F grading only.) Effective: 2017 Spring Quarter.

OBG 439D—Directed Clinical Studies in OBGYN (1-12)
Clinical Activity—40 hours. Prerequisite(s): Consent of Instructor. Individual directed studies in extended preparation for modified curriculum or to complete a clinical rotation following a leave of absence. May be repeated for credit. (P/F grading only.) Effective: 2011 Spring Quarter.

OBG 439R—Directed Studies in OBGYN (1-12)
Clinical Activity—30 hours; Independent Study—10 hours. Prerequisite(s): Consent of Instructor. Individual directed studies in extended preparation for remediation of all or part of clinical rotation. Clinical studies to accommodate and satisfy remedial work as directed by the Committee on Student Progress and approved by the course IOR. May be repeated for credit. (P/F grading only.) Effective: 2011 Summer Quarter.

OBG 460—Away Clinical Elective in OBGYN (3-18)
Clinical Activity—30 hours; Variable—10 hours. Prerequisite(s): OBG 430; and Consent of Instructor. Or the equivalent; third- or fourth-year medical student. Active participation in inpatient and/or outpatient care. Attendance at specified conferences; student-faculty member informal conferences. May be repeated for credit. (H/P/F grading only.) Effective: 2010 Spring Quarter.

OBG 465—Away Acting Internship in OBGYN (3-18)
Clinical Activity—40 hours; Variable—10 hours. Prerequisite(s): OBG 430; and Consent of Instructor. Other third-year core clerkships. Work at the level of a sub intern in Inpatient and/or Outpatient settings. Students are expected to provide direct patient management. (H/P/F grading only.) Effective: 2010 Summer Quarter.

OBG 470—Gynecologic Oncology Acting Internship (3-18)
Clinical Activity—40 hours; Variable—10 hours. Prerequisite(s): OBG 430; and Consent of Instructor. The third-year core clerkships. Four week elective primarily involves direct inpatient management of women on the UCDMC Gyn/Onc service. Students will be acting at the level of a sub-intern and will work under the supervision of house staff, fellows, and attendings. May be repeated up to 99 unit(s). (H/P/F grading only.) Effective: 2010 Spring Quarter.

OBG 471—Ambulatory Gynecology and Obstetrics Elective (3-18)
Clinical Activity—35 hours. Prerequisite(s): OBG 430; and Consent of Instructor. Third- or fourth-year Medical Student. Conduct examinations, present patients and discuss treatment regimens at the following ambulatory clinics: General Obstetrics & Gynecology, New and Return Obstetrics (including Post-Partum), High-Risk Obstetrics, Pre-Operative Clinic, and other sub-specialty clinics as assigned. May be repeated for credit. (H/P/F grading only.) Effective: 2010 Summer Quarter.

OBG 472—Family Planning and Reproductive Health (1-6) Review all entries
Clinical Activity—30 hours; Seminar—5 hours. Prerequisite(s): OBG 430; and Consent of Instructor. Elective that will focus on the Gynecologic Subspecialty of Family Planning. Counseling and provision of contraceptive methods, experience with pelvic ultrasounds, management of spontaneous, inevitable and induced abortion and post-abortion care by both surgical and medical techniques are included. May be repeated for credit. (H/P/F grading only.) Effective: 2014 Spring Quarter.
OBG 472—Family Planning & Reproductive Health (1-9) **Review all entries**
Clinical Activity—30 hours; Seminar—5 hours. Prerequisite(s): OBG 430; and Consent of Instructor. Elective focuses on the Gynecologic Subspecialty of Family Planning. Counseling and provision of contraceptive methods, experience with pelvic ultrasounds, management of spontaneous, inevitable and induced abortion and post-abortion care by both surgical and medical techniques are included. May be repeated for credit. (H/P/F grading only.) Effective: 2019 Spring Quarter.

OBG 475—Labor & Delivery Acting Internship (3-18)
Clinical Activity—40 hours; Variable—10 hours. Prerequisite(s): OBG 430; and Consent of Instructor. The third-year core clerkships. Four week elective primarily involves direct inpatient management of women on the UCDMC L&D unit. Students will be acting at the level of a sub-intern and will work under the supervision of house staff, fellows, and attendings. May be repeated for credit. (H/P/F grading only.) Effective: 2010 Spring Quarter.

OBG 480—The Birthing Process (1)
Lecture/Discussion—1 hour. Open only to UC Davis medical students. Training to assist in the birthing process as a Doula. Topics not covered in the summer course. (S/U grading only.) Effective: 2000 Fall Quarter.

OBG 493—Gender Specific Medicine SSM (6)
Clinical Activity—4 hours; Laboratory—16 hours; Lecture—5 hours; Lecture/Lab—10 hours. Prerequisite(s): Consent of Instructor. Restricted to UC Davis School of Medicine students only. Special Studies Module, a four week course on the topic: Basic Science Principles Relating to Gender Specific Medicine. (Same course as CAR 493.) (H/P/F grading only.) Effective: 2007 Spring Quarter.

OBG 494—Shifa Clinic (6) **Review all entries**
Clinical Activity—8 hours. Prerequisite(s): Medical student in good standing. Restricted to Medical student only. Interaction with patients from multiple ethnic and cultural backgrounds under the direct supervision of a physician/preceptor. Women's health issues and primary care issues in a diversely mixed population. May be repeated up to 3 times. (P/F grading only.) Effective: 2008 Fall Quarter.

OBG 494—Shifa Clinic (6) **Review all entries**
Clinical Activity—8 hours. Prerequisite(s): Medical student in good standing. Restricted to Medical student only. Interaction with patients from multiple ethnic and cultural backgrounds under the direct supervision of a physician/preceptor. Women's health issues and primary care issues in a diversely mixed population. May be repeated for credit. (P/F grading only.) Effective: 2018 Summer Quarter.

OBG 494—Shifa Clinic (1-12) **Review all entries**
Clinical Activity—8 hours. Prerequisite(s): Medical student in good standing. Restricted to Medical student only. Interaction with patients from multiple ethnic and cultural backgrounds under the direct supervision of a physician/preceptor. Women's health issues and primary care issues in a diversely mixed population. May be repeated for credit. (P/F grading only.) Effective: 2019 Winter Quarter.

OBG 494A—Shifa Clinic (1)
Clinical Activity—8 hours. Prerequisite(s): Consent of Instructor. Medical student in good standing. Interaction with patients from multiple ethnic and cultural backgrounds under the direct supervision of a physician/preceptor. Women's health issues and primary care issues in a diversely mixed population. (H/P/F grading only.) Effective: 2012 Summer Quarter.

OBG 494B—Shifa Clinic (1)
Clinical Activity—8 hours. Prerequisite(s): Consent of Instructor. Medical student in good standing. Interaction with patients from multiple ethnic and cultural backgrounds under the direct supervision of a physician/preceptor. Women's health issues and primary care issues in a diversely mixed population. (H/P/F grading only.) Effective: 2012 Summer Quarter.

OBG 494C—Shifa Clinic (1)
Clinical Activity—8 hours. Prerequisite(s): Consent of Instructor. Medical student in good standing. Interaction with patients from multiple ethnic and cultural backgrounds under the direct supervision of a physician/preceptor. Women's health issues and primary care issues in a diversely mixed population. (H/P/F grading only.) Effective: 2012 Summer Quarter.

OBG 498—Group Study (1-5)
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. Explore particular topics in-depth in Obstetrics and Gynecology. Extensive contact with and oversight by instructor. May be repeated for credit. (H/P/F grading only.) Effective: 2004 Fall Quarter.
OBG 499—Research in Obstetrics & Gynecology (2-12)
Clinical Activity; Variable. Prerequisite(s): Consent of Instructor. Fourth-year medical student. Research in Obstetrics and Gynecology arranged with instructor. May be repeated up to 8 time(s). (H/P/F grading only.) Effective: 2006 Fall Quarter.

SOM Courses | OPT

Courses in OPT:

OPT 192—Research Internship (1-12)
Internship—3-36 hours. Prerequisite(s): Upper division standing; approval of project prior to period of internship by preceptor. Supervised work experience in ophthalmology research. Research staff in Ophthalmology have programs in cell biology, electron microscopy, biochemistry, immunology and visual psychophysics. (P/NP grading only.) Effective: 1997 Winter Quarter.

OPT 199—Special Study for Advanced Undergraduates (1-4)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

OPT 299—Basic Research in Visual Science (1-12)
Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

OPT 442—Introduction to Ophthalmology (3)
Clinical Activity—40 hours. Prerequisite(s): Third- or fourth-year Medical Student with consent of instructor; consent of advisor; completion of third-year clerkships in Medicine and Surgery; consult Course Coordinator. Ocular disease diagnosis and management relevant to the clinical practice of future primary care physicians and others. (H/P/F grading only.) Effective: 2010 Summer Quarter.

OPT 465—Advanced Subspecialty Ophthalmology (3-6)
Clinical Activity—40 hours; Variable—40 hours. Prerequisite(s): IMD 430; and Consent of Instructor. Medical students in third or fourth year. Participation in disciplines of neuro-ophthalmology/pediatric ophthalmology, diseases of the cornea and external eye, glaucoma and retina. (H/P/F grading only.) Effective: 2010 Summer Quarter.

OPT 498—Group Study (1-3)
Variable. Prerequisite(s): Medical students with consent of instructor. Directed reading and discussion. (H/P/F grading only.) Effective: 1997 Winter Quarter.

OPT 499—Research in Ophthalmology (1-12)
Variable—3-36 hours. Prerequisite(s): Medical students with consent of instructor. Individual research on selected topics in optics and visual physiology, cornea and external disease. May be repeated for credit. (H/P/F grading only.) Effective: 2017 Fall Quarter.

SOM Courses | OSU

Course in OSU:

OSU 099—Special Studies for Undergraduates (1-4)
Variable. Prerequisite(s): Consent of Instructor. Lower division standing. (P/NP grading only.) Effective: 1997 Winter Quarter.

OSU 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. Upper division standing. (P/NP grading only.) Effective: 1997 Winter Quarter.

OSU 421—The Musculoskeletal System (2.5)
Discussion—2 hours; Lecture/Discussion—4 hours. Prerequisite(s): Consent of committee on student progress. Restricted to Medical students only. Basic and clinical science of orthopaedic surgery and rheumatology. (P/NP grading only.) Effective: 2012 Summer Quarter.

OSU 428—Ambulatory and Emergency Room Orthopaedics (3-6)
Clinical Activity. Prerequisite(s): Consent of Instructor. Fourth-year medical student in good academic standing. Limited enrollment. Introduction to general orthopaedic problems and trauma and their management in an outpatient environment, including the emergency room. Student will conduct orthopaedic examinations, present patients to staff rotating through trauma, hand, pediatrics, adult and foot clinics. (H/P/F grading only.) Effective: 1997 Winter Quarter.
OSU 462—Community Preceptorship (3-6)
Clinical Activity. Prerequisite(s): Consent of Instructor. Fourth-year medical student in good academic standing; consent of instructor. Acquaints student with private practice of orthopaedics in the community setting. Opportunity to observe and assist private practitioners in office, emergency room, operating room and inpatient environment. Student must provide own transportation. (H/P/F grading only.) Effective: 1997 Winter Quarter.

OSU 464—Acting Internship (6)
Clinical Activity. Prerequisite(s): Consent of Instructor. Fourth-year medical student in good academic standing. Rotation designed to increase basic knowledge of musculoskeletal abnormalities at clinical level. Attention focused on selective case material. For those students who demonstrate proficiency, responsibility will be similar to that of intern. May be repeated for credit. (H/P/F grading only.) Effective: 1997 Winter Quarter.

OSU 465—Externship in Advanced Orthopaedics (3-6)
Clinical Activity—40 hours. Prerequisite(s): Consent of Instructor. Fourth-year medical student in good academic standing. Advanced Orthopaedic rotation done at an approved institution. Topics may include Trauma, Sports, Spine, Pediatrics, Joint and/or Foot/Ankle. Students are expected to perform at the level of an Intern. May be repeated for credit. (H/P/F grading only.) Effective: 2013 Summer Quarter.

OSU 466—Away Clerkship in Orthopaedics (3-9)
Clinical Activity—40 hours. Orthopaedic advanced clerkship at an approved institution. (H/P/F grading only.) Effective: 2019 Spring Quarter.

OSU 480—Insights in Orthopaedic Surgery (1-3)
Clinical Activity—3-9 hours. Prerequisite(s): Consent of Instructor. First- and second-year medical students in good academic standing. Exposure to aims, methods and procedures in orthopaedic surgery via attendance at grand rounds, patient care conferences, and group discussions. (H/P/F grading only.) Effective: 1997 Winter Quarter.

OSU 481—History of Medicine for Medical Students (1.5)
Lecture/Discussion—2.5 hours. Prerequisite(s): Third- or fourth-year students in the School of Medicine or second-year students with consent of instructor. Overview of the history of medicine throughout the world to introduce medical students to landmark accomplishments and key figures in the development of health care and to provide an expanded philosophical perspective on the everchanging field of modern medicine. (H/P/F grading only.) Effective: 1997 Winter Quarter.

OSU 499—Orthopaedics Research (1-12)
Clinical Activity. Prerequisite(s): Consent of Instructor. Third- or fourth-year medical student in good academic standing. Laboratory or clinical investigation on selected topics. May be repeated for credit. (H/P/F grading only.) Effective: 1997 Winter Quarter.

SOM Courses | OTO

Course in OTO:

OTO 192—Internship in Otolaryngology (1-12)
Internship—3-36 hours. Prerequisite(s): Upper division standing; approval of project prior to period of internship by preceptor. Supervised work experience in otolaryngology and related fields. Final project report. (P/NP grading only.) Effective: 1997 Winter Quarter.

OTO 199—Special Study in Otolaryngology for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Advanced undergraduate with consent of instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

OTO 290C—Research Conference in Otolaryngology (1)
Lecture/Discussion—1 hour. Prerequisite(s): Graduate students; medical students; advanced undergraduates with consent of instructor. Presentation and discussion of faculty and student research in otolaryngology. (S/U grading only.) Effective: 1997 Winter Quarter.

OTO 291—Principles of Speech, Hearing and Equilibrium (3)
Lecture/Discussion—3 hours. Prerequisite(s): Graduate students; medical students; advanced undergraduates with consent of instructor. Presentations by faculty and guest lecturers on anatomy, physiology, and behaviors involved in speech production, hearing, and equilibrium. Each student will be expected to make one class presentation. Effective: 1997 Winter Quarter.
OTO 299—Individual Study in Otolaryngology for Advanced Graduate Students (1-12)
Variable. Prerequisite(s): Advanced graduate student with consent of instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

OTO 403—Basic Principles of Reconstructive Surgery (1)
Lecture. Prerequisite(s): Third- or fourth-year medical student with consent of instructor. Formal presentations covering basic principles of reconstructive surgery, including wound healing, treatment of lacerations, skin and bone grafts, flaps, Z-plasties and revision of scars. Laboratory session utilizing animal tissues. Effective: 1997 Winter Quarter.

OTO 440—Otolaryngology Required Clerkship (3-9)
Clinical Activity—30 hours. Prerequisite(s): Consent by Committee on Student Evaluation and Promotion. Provide fundamental knowledge of otorhinolaryngologic diagnosis and principles, develop facility with basic ENT instruments, provide an understanding of treatment for ear, nose and throat problems and provide knowledge of what patients should be referred for otorhinolaryngologic care. May be repeated for credit. (H/P/F grading only.) Effective: 2011 Summer Quarter.

OTO 450—Fourth Year Otolaryngology Elective (6)
Clinical Activity—35 hours; Discussion—1 hour; Film Viewing—0.25 hours; Lecture—2 hours. Prerequisite(s): Consent of Instructor. Third- or fourth-year Medical Students. Participation in Otolaryngology Clinic and operating room. Evaluation and management of common Otolaryngologic diseases. (H/P/F grading only.) Effective: 2001 Fall Quarter.

OTO 460—Clinical Otolaryngology Elective (3-18)
Clinical Activity. Prerequisite(s): Third- and fourth-year medical students with consent of instructor; open to graduate students. Approved for graduate degree credit. Total involvement in clinical activities of the department. (H/P/F grading only.) Effective: 1997 Winter Quarter.

OTO 465—Away Acting Internship in Otolaryngology (3-6)
Clinical Activity. Externship rotation for Acting Internships in Otolaryngology. May be repeated for credit. (H/P/F grading only.) Effective: 2018 Spring Quarter.

OTO 490—Journal Seminar (1)
Lecture/Discussion—10 hours. Prerequisite(s): Fourth-year medical students with consent of instructor; open to graduate students. Approved for graduate degree credit. Monthly review of current otolaryngologic and related literature and recent advances. (H/P/F grading only.) Effective: 1997 Winter Quarter.

OTO 498—Individual or Group Study (1-5)
Laboratory—1-4 hours; Lecture/Discussion—1-2 hours. Prerequisite(s): Consent of Instructor. Introduction to basic research in Otolaryngology. Lectures, discussion and laboratory study of sensory and motor systems. (H/P/F grading only.) Effective: 1997 Winter Quarter.

OTO 499—Research (1-12)
Variable. Prerequisite(s): Medical students with consent of instructor; Open to graduate students. Approved for graduate degree credit. Participation in ongoing projects. May be repeated for credit. (H/P/F grading only.) Effective: 2017 Fall Quarter.

SOM Courses | PMD

Courses in PMD:

PMD 192—Internship in Human Pathology (1-12)
Internship—3-36 hours. Prerequisite(s): Upper division standing; approval of project prior to period of internship by preceptor. Supervised work experience in pathology and related fields. (P/NP grading only.) Effective: 1997 Winter Quarter.

PMD 199—Special Study in Pathology for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. Advanced undergraduates. (P/NP grading only.) Effective: 1997 Winter Quarter.

PMD 290C—Research Group Conferences (1)
Seminar—1 hour. Prerequisite(s): Graduate level standing. Focused around the mechanisms of function of the central nervous system under normal and pathogenic conditions. Seminars lead by various speakers from UC Davis and other Institutions, both domestic and international. May be repeated for credit. (S/U grading only.) Effective: 2017 Fall Quarter.
PMD 296—Neurodevelopment Group Study (1-6)
Variable—1-6 hours. Explore mechanisms that impact perinatal development of the cerebral cortex, and other cortical structures, under normal and pathological conditions. (S/U grading only.) Effective: 2017 Summer Quarter.

PMD 298—Advanced Group Study (1-5)
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. Group Study provides the opportunity for a faculty member to work with students in a focused manner. (S/U grading only.) Effective: 2017 Summer Quarter.

PMD 299—Research (1-12)
Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

PMD 405—Brain Cutting Conference (1-4)
Seminar—1-4 hours. Prerequisite(s): Third- and fourth year medical students or consent of instructor. Current specimens are sectioned, discussed, and clinical correlations proposed. (H/P/F grading only.) Effective: 1997 Winter Quarter.

PMD 407—Advanced Neuropathology (3-18)
Lecture/Discussion—40 hours. Prerequisite(s): Consent of Instructor. Third or fourth year medical student. Restricted to Medical students only. Presents an integrated introduction to mechanisms of the central and peripheral nervous system injury. Gain an understanding of pathological mechanisms underlying disease, the anatomic and molecular manifestations of pathologic processes of the CNS and PNS. (H/P/F grading only.) Effective: 2015 Fall Quarter.

PMD 410A—General and Endocrine Pathology (2.5)
Discussion/Laboratory—4.5 hours; Lecture—4 hours. Restricted to medical students only. Pathologic mechanisms of human disease. Concepts of general pathologic processes, i.e., cell death, inflammation and neoplasia. Endocrine pathology in the context of clinical human disease. Emphasis on integration of clinical practice with gross and histologic images emphasizing team-based learning. (P/F grading only.) Effective: 2015 Winter Quarter.

PMD 410B—Systemic Pathology (1)
Discussion/Laboratory—0.5 hours; Lecture—1 hour. Prerequisite(s): Approval by SOM Committee on Student progress. Restricted to Medical students only. Anatomic and clinical pathology of organ system human disease with an emphasis on integration with clinical medicine. Topics include hematopathology and neuropathology. (P/F grading only.) Effective: 2010 Spring Quarter.

PMD 410C—Systemic Pathology (2)
Discussion—2 hours; Lecture—1 hour. Prerequisite(s): Approval by SOM Committee on Student progress. Restricted to Medical students only. Anatomic and clinical pathology of organ system human disease with an emphasis on integration with clinical medicine. Topics include pulmonary pathology, cardiovascular pathology, hematopathology, oncologic pathology, and nephropathology. (P/F grading only.) Effective: 2010 Spring Quarter.

PMD 410D—Systemic Pathology (2.5)
Discussion—2 hours; Lecture—1 hour. Prerequisite(s): Approval by SOM Committee on Student progress. Restricted to Medical students only. Anatomic and clinical pathology of organ system human disease with emphasis on integration with clinical medicine. Course content parallels concurrent clinical courses with integration of lectures and discussions. Topics include gastrointestinal and gynecologic pathology, hepatopathology, oncologic pathology and musculoskeletal pathology. (P/F grading only.) Effective: 2010 Spring Quarter.

PMD 435—Clinical Patient Care in Pathology (3-9)
Clinical Activity—24 hours; Independent Study—7 hours; Lecture/Discussion—4 hours. Prerequisite(s): and Consent of Instructor. Completed one of the following 3rd year clerkships: Family Medicine, Internal Medicine, Surgery, OB/GYN or Pediatrics. Four-week course is designed to give the third-year medical student an exposure to the diverse roles that pathologists have in clinical patient care. May be repeated for credit. (H/P/F grading only.) Effective: 2015 Summer Quarter.

PMD 440—Surgery-Pathology-Radiology (SPR) Research Laboratory (2)
Discussion/Laboratory—2 hours; Lecture/Discussion—1 hour. Prerequisite(s): Consent of Instructor. Provide future clinicians and scientists with basic clinical and bioengineering laboratory skills to prepare for careers in translational research (P/F grading only.) Effective: 2014 Summer Quarter.

PMD 464—Anatomic Pathology (3-6)
Clinical Activity—40 hours; Variable. Prerequisite(s): Consent of Instructor. Fourth-year Medical Students. Restricted to Medical Students only. Anatomic pathology with an emphasis on autopsy and surgical pathology with application to clinical practice. Specimen grossing, frozen sections, microscopic sign-out and conferences. Exposure to
cytopathology, hematopathology, and clinical pathology is available. (H/P/F grading only.) Effective: 2010 Winter Quarter.

PMD 465—Applied Clinical Laboratory Medicine (3-6)
Variable—40 hours. Prerequisite(s): Consent of Instructor. Emphasis upon laboratory techniques, procedures, and interpretation of laboratory results. Students will be expected to participate fully and in all laboratory operations including bench techniques, laboratory management, and quality control. May be repeated for credit. (H/P/F grading only.) Effective: 2012 Winter Quarter.

PMD 470—Sub-Specialty in Didactic Pathology (3-16)
Lecture/Lab—25 hours. Prerequisite(s): Consent of Instructor. Externship provides in-depth exposure to one of a variety of sub-specialties in Pathology. May be repeated for credit. (H/P/F grading only.) Effective: 2011 Spring Quarter.

PMD 474—Anatomic Pathology Acting Internship (3-9)
Clinical Activity—40-80 hours. Prerequisite(s): Fourth-year medical student or consent of instructor. Restricted to medical students only. Anatomic Pathology AI will permit students to gain skills needed for first year Pathology Residency. Students will perform autopsies and take full responsibility for a variety of surgical pathology cases. A mix of outpatient and inpatient cases is expected. May be repeated for credit. (H/P/F grading only.) Effective: 2011 Summer Quarter.

PMD 475—Anatomic Pathology Acting Internship (3-9)
Clinical Activity—40-80 hours. Prerequisite(s): PMD 410A; PMD 410B; PMD 410C; PMD 410D; and Consent of Instructor. Or equivalent. Successful completion of third-year clinical rotations. Restricted to Medical Students only. Year four level course is designed to provide a concentrated experience in Surgical Pathology and Cytolopathology. Rotate on the surgical and cytopathology sub-specialty teams and assume responsibility for patient cases. May be repeated for credit. (H/P/F grading only.) Effective: 2015 Summer Quarter.

PMD 493—Interdisciplinary Study of Gastrointestinal Cancer (6)
Clinical Activity—12 hours; Discussion/Laboratory—20 hours; Laboratory—3 hours; Lecture—5 hours. Prerequisite(s): Consent of Instructor. In-depth study of gastrointestinal, hepatic and pancreatic cancer. Emphasis on an integration of basic science and clinical medicine. Participating departments include pathology, surgical oncology, medical oncology, gastroenterology, radiology and radiotherapy. (Same course as SUR 493D.) (H/P/F grading only.) Effective: 2012 Summer Quarter.

PMD 497T—Tutoring in Pathology (1-5)
Tutorial—3-15 hours. Prerequisite(s): Advanced standing or consent of instructor. Assist instructor by tutoring medical students in preparation for one of the departmental courses that is a component of the required curriculum of the School of Medicine. (H/P/F grading only.) Effective: 1997 Winter Quarter.

PMD 498—Advanced Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Medical student. Group study in variety of advanced topics in general, special, experimental, or comparative pathology. (H/P/F grading only.) Effective: 1997 Winter Quarter.

PMD 499—Research (1-18)
Variable. Prerequisite(s): Medical student with consent of instructor. Limited enrollment. Research in experimental, molecular, comparative, and applied pathology. May be repeated for credit. (H/P/F grading only.) Effective: 2017 Fall Quarter.

SOM Courses | PED

Courses in PED:

PED 199—Special Study in Pediatric Research (1-5)
Variable. Prerequisite(s): Undergraduate student with consent of instructor based upon adequate preparation as determined by instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

PED 299—Pediatric Research (1-12)
Variable. Prerequisite(s): Consent of Instructor. Graduate students who are candidates for a degree in some area of biology or behavioral sciences. (S/U grading only.) Effective: 1997 Winter Quarter.

PED 401—Preceptorship in Pediatrics (2)
Variable. Prerequisite(s): Second-year medical student or first-year medical student with consent of instructor. Opportunity to observe and participate in primary medical care in a practicing pediatricians office. Participation in
history-taking and physical examination will be at discretion of preceptor and dependent on students experience. Evaluation by student. (H/P/F grading only.) Effective: 1997 Winter Quarter.

PED 402—Clinical Experience in Private Practice (1-18)
Clinical Activity. Prerequisite(s): PED 430; Third-or fourth-year medical student; consent of preceptor and Chairperson. Opportunity to participate in practice of preceptor, performing such tasks as history taking, physical examination, and patient management. (H/P/F grading only.) Effective: 1997 Winter Quarter.

PED 405—Pediatrics Lecture Series (0.5)
Lecture—15 hours. Prerequisite(s): Consent of Instructor. Lecture series covers major topics in pediatrics with case presentations and panels from pediatric subspecialists. Topics include, but are not limited to: cardiology, pulmonology, nephrology, gastroenterology, critical care, and primary care pediatrics. May be repeated for credit. (P/F grading only.) Effective: 1997 Winter Quarter.

PED 415—Fetal and Neonatal Physiology (1)
Independent Study—4 hours; Lecture/Discussion—4 hours. Prerequisite(s): Consent of Instructor. Elective is designed to combine for study a variety of aspects of the physiology, anatomy and biochemistry of the fetus and newborn with relevant clinical examples of disorders in each of the 10 topics that will be discussed. (P/F grading only.) Effective: 2014 Fall Quarter.

PED 430—Pediatric Clerkship (12)
Clinical Activity—45 hours. Prerequisite(s): Approval by School of Medicine Committee on Student Progress. Restricted to Medical students only. Eight week clinical clerkship providing students with the opportunity to learn fundamentals of caring for the pediatric patient by participating in nursery, ambulatory and inpatient services at UCDMC and affiliated clinical sites. Rounds, conferences, student presentations ongoing. (P/NP grading only.) Effective: 2001 Summer Quarter.

PED 430F—SJVP Pediatric Clerkship at UCSF (12)
Clinical Activity—45 hours. Prerequisite(s): Approval by School of Medicine Committee on Student Progress. Restricted to Medical students only. Eight-week clinical clerkship providing students with the opportunity to learn fundamentals of caring for the pediatric patient by participating in nursery, ambulatory and inpatient services at UCSF Fresno. Rounds, conferences, student presentations ongoing. (H/P/F grading only.) Effective: 2013 Fall Quarter.

PED 430FA—SJVP Longitudinal Pediatrics Clerkship (1.5-6)
Clinical Activity—40-60 hours. Prerequisite(s): Consent of Instructor. Longitudinal Pediatrics Clerkship runs concurrently with Internal Medicine, Family Medicine and Psychiatry for 32 weeks. Time is spent in direct patient care situations under the guidance of faculty. (H/P/F grading only.) Effective: 2017 Spring Quarter.

PED 430FB—SJVP Longitudinal Pediatrics Clerkship (1.5-6)
Clinical Activity—40-60 hours. Prerequisite(s): Consent of Instructor. Longitudinal Pediatrics Clerkship runs concurrently with Internal Medicine, Family Medicine and Psychiatry for 32 weeks. Time is spent in direct patient care situations under the guidance of faculty. (H/P/F grading only.) Effective: 2017 Spring Quarter.

PED 430FC—SJVP Longitudinal Pediatrics Clerkship (1.5-6)
Clinical Activity—40-60 hours. Prerequisite(s): Consent of Instructor. Longitudinal Pediatrics Clerkship runs concurrently with Internal Medicine, Family Medicine and Psychiatry for 32 weeks. Time is spent in direct patient care situations under the guidance of faculty. (H/P/F grading only.) Effective: 2017 Spring Quarter.

PED 430FD—SJVP Longitudinal Pediatrics Clerkship (1.5-6)
Clinical Activity—40-60 hours. Prerequisite(s): Consent of Instructor. Longitudinal Pediatrics Clerkship runs concurrently with Internal Medicine, Family Medicine and Psychiatry for 32 weeks. Time is spent in direct patient care situations under the guidance of faculty. (H/P/F grading only.) Effective: 2017 Spring Quarter.

PED 430R—Rural PRIME Pediatrics Longitudinal Clerkship (2)
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Pediatrics Longitudinal Integrated Clerkship for the Rural PRIME Program. (H/P/F grading only.) Effective: 2017 Spring Quarter.

PED 430RA—Rural PRIME Pediatrics Longitudinal Clerkship (3)
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Pediatrics Longitudinal Integrated Clerkship for the Rural PRIME Program. (H/P/F grading only.) Effective: 2017 Spring Quarter.
PED 430RB—Rural PRIME Pediatrics Longitudinal Clerkship (3)
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Pediatrics Longitudinal Integrated Clerkship for the Rural PRIME Program. (H/P/F grading only.) Effective: 2017 Spring Quarter.

PED 430RC—Rural PRIME Pediatrics Longitudinal Clerkship (3)
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Pediatrics Longitudinal Integrated Clerkship for the Rural PRIME Program. (H/P/F grading only.) Effective: 2017 Spring Quarter.

PED 430RD—Rural PRIME Pediatrics Longitudinal Clerkship (1)
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Pediatrics Longitudinal Integrated Clerkship for the Rural PRIME Program. (H/P/F grading only.) Effective: 2017 Spring Quarter.

PED 430TA—TeachMS Longitudinal Pediatrics Clerkship (A) (4)
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Longitudinal Clerkship runs concurrently with Primary Care and Psychiatry for 24 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. (H/P/F grading only.) Effective: 2016 Fall Quarter.

PED 430TB—TeachMS Longitudinal Pediatrics Clerkship (B) (6)
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Longitudinal clerkship runs concurrently with Primary Care and Psychiatry for 24 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. (H/P/F grading only.) Effective: 2016 Fall Quarter.

PED 430TC—TeachMS Longitudinal Pediatrics Clerkship (C) (2)
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Longitudinal clerkship runs concurrently with Primary Care and Psychiatry for 24 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. (H/P/F grading only.) Effective: 2016 Fall Quarter.

PED 439D—Directed Clinical Studies in Pediatrics (1-12)
Clinical Activity—40 hours. Prerequisite(s): Consent of Instructor. Individual directed studies in extended preparation for modified curriculum or to complete a clinical rotation following a leave of absence. May be repeated for credit. (P/F grading only.) Effective: 2011 Spring Quarter.

PED 439R—Directed Studies in Pediatrics (1-12)
Clinical Activity—30 hours; Independent Study—10 hours. Prerequisite(s): Consent of Instructor. Individual directed studies in extended preparation for remediation of all or part of clinical rotation. Clinical studies to accommodate and satisfy remedial work as directed by the Committee on Student Progress and approved by the course IOR. May be repeated for credit. (P/F grading only.) Effective: 2011 Summer Quarter.

PED 460A—Acting Internship: General Inpatient Pediatric Clerkship (3-18)
Clinical Activity. Prerequisite(s): PED 430 B or better; and Consent of Instructor. Letter of recommendation from Pediatrics faculty member. Limited enrollment. The Ward Acting Intern functions in a manner similar to that of a pediatric intern. The Acting Intern takes admissions in the regular sequence and is expected to take night call. (H/P/F grading only.) Effective: 2016 Fall Quarter.

PED 460B—Acting Internship: Outpatient Pediatrics (3-18)
Clinical Activity. Prerequisite(s): PED 430 B or better; and Consent of Instructor. Letter of recommendation from Pediatrics faculty member. Limited enrollment. Supervised experience in pediatric care on outpatient service at UCDMC. Student functions as Acting Intern with appropriate supervision by residents and attending faculty. Limited enrollment. (H/P/F grading only.) Effective: 1997 Winter Quarter.

PED 461—Pediatric Inpatient AI in Hematology/Oncology (6)
Clinical Activity—37.5 hours; Lecture—7.5 hours. Prerequisite(s): PED 430; and Consent of Instructor. Satisfactory completed. Limited Enrollment. Inpatient and outpatient experience in diagnosis and management of oncologic and hematologic disorders in children. Laboratory experience and participation in clinical investigation may be arranged. (H/P/F grading only.) Effective: 2009 Spring Quarter.

PED 462—Elective in Pediatric Endocrinology (3-18)
Clinical Activity. Prerequisite(s): Consent of Instructor. Completion of second-year study or the equivalent. Limited enrollment. Inpatient and outpatient experience in diagnosis and management of endocrine endocrine disorders in children. Laboratory experience and participation in clinical investigation may be arranged. (H/P/F grading only.) Effective: 1997 Winter Quarter.
PED 463—Medical and Mental Health Evaluation of Children at Risk for Maltreatment (3-9)
Clinical Activity—30 hours; Discussion—4 hours. Elective for fourth-year medical students covers basic areas of knowledge needed for child abuse prevention and consultation. Rotation includes legals cases, abuse exams, child and parent interactive therapy and visits to community organizations. May be repeated for credit. (H/P/F grading only.) Effective: 2012 Spring Quarter.

PED 464—Acting Internship in Neonatology (3-12)
Clinical Activity—60 hours. Prerequisite(s): PED 430 B or better; and Consent of Instructor. Letter of recommendation from Pediatrics faculty member. Limited enrollment. Diagnostic and therapeutic aspect of the medical and surgical high-risk neonate. Student expected to take night call. May be repeated for credit. (H/P/F grading only.) Effective: 2014 Fall Quarter.

PED 465—Pediatrics Specialty Clinic Elective (3-18)
Clinical Activity. Prerequisite(s): PED 430; and Consent of Instructor. Satisfactory completed. Limited enrollment. Supervised experience in a variety of pediatric subspecialty clinics. Limited enrollment. (H/P/F grading only.) Effective: 1997 Winter Quarter.

PED 466—Elective in Pediatric Cardiology (3-18)
Clinical Activity. Prerequisite(s): PED 430; Satisfactory completed. Inpatient and outpatient experience in diagnosis and management of cardiologic disorders in children. Laboratory experience and participation in clinical investigation may be arranged. (H/P/F grading only.) Effective: 1997 Winter Quarter.

PED 467—Elective in Pulmonary Medicine (3-18)
Clinical Activity. Prerequisite(s): Pediatric clerkship. Inpatient and outpatient management of pediatric patients with pulmonary diseases. These will include but will not be limited to cystic fibrosis, asthma, and other forms of chronic pulmonary diseases as well as congenital abnormalities. (H/P/F grading only.) Effective: 1997 Winter Quarter.

PED 468—Elective in Pediatrics Nephrology (3-18)
Clinical Activity. Prerequisite(s): PED 430; and Consent of Instructor. Satisfactory completed. Inpatient and outpatient experience in diagnosis and management of renal disorders in children. Laboratory experience and participation in clinical investigation may be arranged. Limited enrollment. (H/P/F grading only.) Effective: 1997 Winter Quarter.

PED 469—Elective in Pediatric Infectious Disease (3-18)
Clinical Activity. Prerequisite(s): PED 430; and Consent of Instructor. Satisfactory completed. Inpatient and outpatient experience in diagnosis and treatment of infectious disease of infants and children. Laboratory and clinical investigation may be arranged. Limited enrollment. (H/P/F grading only.) Effective: 1997 Winter Quarter.

PED 470—Elective in Pediatric Neurology (3-18)
Clinical Activity. Prerequisite(s): PED 430; IMD 430; OBG 430; and Consent of Instructor. All courses satisfactory completed. Limited enrollment. Inpatient and outpatient experience in diagnosis and management of neurological disorders in children. Students will also participate in other pediatric subspecialty clinics which serve children with neurological disorders. This course does not satisfy the fourth year neurology requirement. Limited enrollment. (H/P/F grading only.) Effective: 1997 Winter Quarter.

PED 471—Elective in Pediatric Gastroenterology (3-18)
Clinical Activity. Prerequisite(s): PED 430; and Consent of Instructor. Satisfactory completed. Inpatient and outpatient experience in diagnosis and management of gastroenterology disorders in children. Laboratory experience and participation in clinical investigation may be arranged. Limited enrollment. (H/P/F grading only.) Effective: 1997 Winter Quarter.

PED 472—Clinical Rotation in Adolescent Medicine (3-9)
Clinical Activity—39 hours; Lecture—1 hour. Prerequisite(s): Consent of Instructor. Fourth-year Medical Student. Under supervision, students will see patients in the UCD clinic and at a number of community-based sites. Emphasis on the socially-mediated problems that face adolescents, including substance abuse, STD’s, pregnancy, depression and suicide. One hour of lecture each week. (H/P/F grading only.) Effective: 2011 Summer Quarter.

PED 473—Away Acting Internship in Pediatrics (6-18)
Clinical Activity—40 hours; Lecture—6 hours; Variable. Prerequisite(s): Consent of Instructor. Satisfactory completion of Pediatrics Clerkship. Work at the level of a sub intern in Inpatient and/or Outpatient settings. Expectation is to provide direct patient management. (H/P/F grading only.) Effective: 2010 Spring Quarter.
PED 476—Acting Internship in Pediatric Intensive Care (3-18)
Clinical Activity. Prerequisite(s): PED 430 A is required; or Consent of Instructor. Letter of recommendation from Pediatrics faculty member. Limited enrollment. Evaluation and support of critically ill infants and children. In general, student expected to take night call every third night during rotation. May be repeated for credit. (H/P/F grading only.) Effective: 2016 Fall Quarter.

PED 493—Ethical, Legal and Social Issues in Clinical Genetics (6)
Auto Tutorial—8 hours; Clinical Activity—18 hours; Independent Study—2 hours; Seminar—12 hours. Prerequisite(s): Consent of Instructor. Restricted to UC Davis School of Medicine students only. Develop advanced knowledge, communication skills and attitudes necessary to provide compassionate, knowledgeable, and expert care to patients who may be at increased genetic risk for disease. Seminars cover ethical and legal principles, epidemiology, and genetics. (H/P/F grading only.) Effective: 2010 Summer Quarter.

PED 493B—Living with Intellectual & Developmental Disability in the Community (1-6)
Clinical Activity—4 hours; Fieldwork—4 hours; Lecture—10 hours; Seminar—4 hours. Prerequisite(s): Consent of Instructor. In-depth experience with Intellectual & Developmental Disability across the lifespan. (H/P/F grading only.) Effective: 2012 Summer Quarter.

PED 493C—Fetal and Neonatal Physiology SSM (6)
Clinical Activity—8 hours; Lecture/Discussion—24 hours. Prerequisite(s): Consent of Instructor. Elective is available for students interested in exploring the fascinating world of the fetus and neonate. The elective is designed to combine the basic sciences with relevant clinical examples of disorders. (H/P/F grading only.) Effective: 2014 Fall Quarter.

PED 498—Directed Group Study (1-5)
Variable—3-15 hours. Explore in-depth various topics in Pediatrics. Extensive contact with and oversight by instructor. May be repeated for credit. (H/P/F grading only.) Effective: 2004 Fall Quarter.

PED 499—Research Topics in Pediatrics (1-18)
Variable. Prerequisite(s): Student in Medical School with consent of instructor. Individual research project in pediatric subspecialty areas (cardiology, endocrinology, hematology, metabolism, newborn physiology and others) may be arranged with faculty member. Independent research by student will be emphasized and long-term projects are possible. May be repeated for credit. (H/P/F grading only.) Effective: 2017 Fall Quarter.

SOM Courses | PMR

Courses in PMR:

PMR 100—Research Approaches to Disability and Rehabilitation (2)
Lecture/Discussion—2 hours. Discussion and evaluation of research approaches to medical rehabilitation, community integration, and quality of life of disabled persons, with a focus on the progressive disabilities associated with neuromuscular diseases. Intent is to encourage interest in professions that serve the disabled community and increase awareness of rehabilitation goals. Effective: 2002 Winter Quarter.

PMR 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Advanced standing. (P/NP grading only.) Effective: 1997 Winter Quarter.

PMR 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. Advanced standing. (P/NP grading only.) Effective: 1997 Winter Quarter.

PMR 299—Research (1-12)
Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

PMR 405—Healthy Living: Leading by Example (1.5)
Clinical Activity—1 hour; Discussion—2 hours; Laboratory—4 hours; Lecture—4 hours. Prerequisite(s): Consent of Instructor. Course is to improve the physical and mental health of participating students while supplementing their medical education with specific concepts. May be repeated for credit. (P/F grading only.) Effective: 2014 Fall Quarter.

PMR 405A—Healthy Living: Leading by Example (1)
Clinical Activity—1 hour; Discussion—2 hours; Laboratory—4 hours; Lecture—4 hours. Prerequisite(s): Consent of Instructor. Improve the physical and mental health of participating students while supplementing their medical education with specific concepts. May be repeated for credit. (P/F grading only.) Effective: 2014 Fall Quarter.
PMR 405B—Healthy Living: Leading by Example (0.5)
Clinical Activity—1 hour; Discussion—2 hours; Laboratory—4 hours; Lecture—4 hours. Prerequisite(s): Consent of Instructor. Improve the physical and mental health of participating students while supplementing their medical education with specific concepts. May be repeated for credit. (P/F grading only.) Effective: 2014 Fall Quarter.

PMR 421—Introduction to Sports Medicine (1)
Clinical Activity—4 hours; Fieldwork; Lecture—1 hour. Introduction to basic concepts of Sports Medicine in Physical Medicine and Rehabilitation. Students attend afternoon clinic with Sports Medicine attending; attend lectures focusing on Sports Medicine topics. Students also eligible to cover sporting events with attending physicians where available. (P/F grading only.) Effective: 2007 Summer Quarter.

PMR 440—Rehabilitation Medicine Clerkship (3)
Clinical Activity—36 hours; Lecture/Discussion—4 hours. Prerequisite(s): IMD 430; SUR 430; and Consent of Instructor. Rehabilitation and comprehensive care of physically disabled and physical medicine management of neurologic, neuromuscular and musculoskeletal disorders. Emphasis on evaluation and conservative treatment of spinal disorders, sports injuries and neuromuscular disease. Emphasis on inpatient rehabilitation, pediatrics, spine or sports possible. (H/P/F grading only.) Effective: 2008 Winter Quarter.

PMR 461—Rehabilitation Medicine (6) Review all entries
Clinical Activity—36 hours; Lecture/Discussion—4 hours. Prerequisite(s): IMD 430; SUR 430; and Consent of Instructor. Four-week rotation designed as broad overview of PM&R practice for students interested in residency training in the specialty. Emphasis on evaluation and conservative treatment of spinal disorders, sports injuries, neuromuscular disease, neurological and non-operative orthopedic problems requiring rehabilitative management. May be repeated for credit. (H/P/F grading only.) Effective: 2018 Fall Quarter.

PMR 462—Rehabilitation Medicine Clinical Elective (5-18)
Clinical Activity. Prerequisite(s): IMD 430; SUR 430; and Consent of Instructor. Completion of third year in Medical School. Emphasis on evaluation of patients with neurological or orthopaedic problems requiring rehabilitative techniques for their management. Introduction to management of such patients. Physical Medicine and Rehabilitation at off-campus facility must be approved by Chairperson. (H/P/F grading only.) Effective: 1997 Winter Quarter.

PMR 470—Away Acting Internship in Physical Medicine & Rehabilitation (3-6)
Clinical Activity. Prerequisite(s): Consent of Instructor. Al Externship option for PM&R rotations at other institutions. May be repeated for credit. (H/P/F grading only.) Effective: 2018 Spring Quarter.

PMR 493—Applied Musculoskeletal Anatomy: Sports & Spine SSM (6)
Clinical Activity—4 hours; Laboratory—16 hours; Lecture—5 hours; Lecture/Lab—10 hours. Prerequisite(s): Consent of Instructor. Restricted to UC Davis School of Medicine students only. This four week module will review the anatomy and biomechanics of the musculoskeletal system as well as its associated pathology. The students will be instructed on appropriate musculoskeletal exam techniques and logical approach to the patient in the clinical setting. (H/P/F grading only.) Effective: 2008 Winter Quarter.

PMR 498—Advanced Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Study and experience for medical students in any of a number of areas in physical medicine and rehabilitation. (H/P/F grading only.) Effective: 1997 Winter Quarter.

PMR 499—Research for Medical Students (1-12)
Variable. Prerequisite(s): Consent of Instructor. Research on any of a variety of topics in physical medicine and rehabilitation. May be repeated for credit. (H/P/F grading only.) Effective: 2017 Fall Quarter.

SOM Courses | PSU
Courses in PSU:
PSU 460—Clinical Plastic Surgery Elective (1-18)
Clinical Activity. Prerequisite(s): SUR 430; and Consent of Instructor. Third- or fourth-year medical students. Total
involvement in patient care involving surgical preparation, treatment, operative care, and follow-up. Developing and understanding reconstruction and aesthetic plastic surgery. Microvascular surgery included. Student rotation. (H/P/F grading only.) Effective: 1997 Winter Quarter.

SOM Courses | PSY

Courses in PSY:

PSY 092—Willow Clinic (1-2)
Clinical Activity—2-6 hours; Seminar—1-2 hours; Variable. Open to lower division undergraduate students. Student run clinic for undergraduate students interested in learning about and meeting the unique health care needs for the homeless population. May be repeated for credit. (P/NP grading only.) Effective: 2009 Fall Quarter.

PSY 192—Willow Clinic (1-2)
Clinical Activity—2-6 hours; Lecture—1-2 hours; Seminar—1-2 hours. Prerequisite(s): Consent of Instructor. UC Davis enrollment; upper division standing. Student run clinic for upper division students interested in learning about and meeting the unique health care needs for the homeless population. May be repeated for credit. (P/NP grading only.) Effective: 2009 Winter Quarter.

PSY 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Advanced standing. (P/NP grading only.) Effective: 1997 Winter Quarter.

PSY 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. Advanced standing. (P/NP grading only.) Effective: 1997 Winter Quarter.

PSY 298—Directed Group Study for Graduate Students (1-5)
Variable. Prerequisite(s): Consent of Instructor. Graduate standing. Effective: 1997 Winter Quarter.

PSY 299—Special Study for Graduate Students (1-12)
Variable. Prerequisite(s): Consent of Instructor. Graduate standing. (S/U grading only.) Effective: 1997 Winter Quarter.

PSY 403—Fundamentals of Clinical Psychiatry (3)
Clinical Activity—1 hour; Lecture—3 hours. Prerequisite(s): Approval of SOM Committee on Student Progress. Restricted to medical student only. Psychiatric interviewing, Mental Status Exam and diagnosis. Major child and adult disorders, including substance abuse and dependence. Weekly student interviews of psychiatric patients in small group format. (P/F grading only.) Effective: 2008 Winter Quarter.

PSY 410—Klingenstein Summer Elective (2.5)
Clinical Activity—20 hours. Prerequisite(s): Consent of Instructor. During this "mini-clerkship," fellows will attend clinics, in-patient settings, and clinicians’ offices. They will meet weekly to present cases and review current literature, and will complete a summary narrative at the end of their experience. (P/F grading only.) Effective: 2015 Spring Quarter.

PSY 410L—Klingenstein Longitudinal Elective (2)
Clinical Activity—5 hours; Discussion—2 hours; Discussion/Laboratory—10 hours. Prerequisite(s): Consent of Instructor. Year-long mentoring program provides clinical exposure to child and adolescent psychiatric healthcare during a medical student's pre-clinical years. (P/F grading only.) Effective: 2015 Fall Quarter.

PSY 412—Psychiatry Grand Rounds (1)
Lecture—1 hour. Prerequisite(s): Medical students or staff or other qualified mental health professionals with consent of instructor. Weekly conference at UCDMC for presentation of selected clinical cases, presentation of lecture and research reports. (H/P/F grading only.) Effective: 1997 Winter Quarter.

PSY 413—Outpatient Psychiatry Clerkship (6)
Clinical Activity—36 hours; Conference—2 hours; Lecture—2 hours. Prerequisite(s): PSY 430; And/or consent of coordinator. Experience in clinical management/treatment of adult outpatients with psychiatric and substance abuse disorders; crisis management/intervention, evaluation/development of diagnosis and treatment plan; emphasis on outpatient psychopharmacology/brief psychotherapy; observation of group therapy. Individual supervision by faculty/residents. (H/P/F grading only.) Effective: 2009 Winter Quarter.

PSY 414—Psychosomatic Medicine Clerkship (3-12)
Clinical Activity—32 hours; Discussion—8 hours. Prerequisite(s): Psychiatry Clerkship or consent of instructor; medical students only. A large university hospital service in which the student functions as a member of the team in
evaluation, management and psychiatric liaison with other medical specialties. Intensive supervision from senior staff and psychiatric residents. May be repeated up to 2 time(s). (H/P/F grading only.) Effective: 2007 Winter Quarter.

**PSY 415—Telemedicine Clinical Elective (3-9)**
Clinical Activity—20 hours. Prerequisite(s): Fourth-year medical student with consent of instructor. Fourth-year medical student elective in Telemedicine focusing on psychiatric issues. Align with University, School and Center for Health and Technology mission of rural outreach and public health, particularly in primary care. May be repeated for credit. (H/P/F grading only.) Effective: 2011 Winter Quarter.

**PSY 416—Child Psychiatry Clerkship (6)**
Clinical Activity—36 hours; Conference—2 hours; Lecture/Discussion—2 hours. Prerequisite(s): PSY 430; And/or consent of coordinator. Didactic and clinical inpatient, outpatient, and consultation-liaison experiences with children, adolescents and families. Clinical observations, diagnostic assessment, and treatment will be undertaken with close supervision. Literature review and case conferences presented on a regular basis. (H/P/F grading only.) Effective: 2009 Winter Quarter.

**PSY 417—Jail Psychiatric Clerkship (6)**
Clinical Activity—28 hours; Conference—8 hours; Lecture—4 hours. Prerequisite(s): PSY 430; And/or consent of course coordinator. Students gain experience, under close faculty supervision, assessing acute and chronic mentally ill inmates in both inpatient and clinic settings. (H/P/F grading only.) Effective: 2009 Winter Quarter.

**PSY 418—Off-Campus Clinical Experience (3-9)**
Clinical Activity—20-40 hours. Prerequisite(s): Consent of Instructor. Fourth-year medical students. Clinical or research elective in off-campus medical school or mental health setting. To be arranged with advance approval of instructor and individual in charge of off-campus setting. May be repeated for credit. (H/P/F grading only.) Effective: 2012 Winter Quarter.

**PSY 419—Combined Family Medicine-Psychiatry Clerkship (3-6)**
Clinical Activity—32 hours; Discussion—8 hours. Students rotate through the county Primary Care Clinic under the supervision of dual-boarded Psychiatry and Family Practice Faculty to provide medical care of indigent and uninsured patients as well as primary care for psychiatry patients. May be repeated for credit. (H/P/F grading only.) Effective: 2018 Winter Quarter.

**PSY 420—Acting Internship in Psychiatry (3-6)**
Clinical Activity—40 hours. Prerequisite(s): PSY 430; And/or consent of course coordinator. Acting intern position with close faculty supervision with emphasis on biological psychiatry, psychopharmacology and psychodynamic aspects appropriate to diagnostic and long-term patient management. (H/P/F grading only.) Effective: 2016 Summer Quarter.

**PSY 421—Combined Internal Medicine-Psychiatry Clerkship (3-6)**
Clinical Activity—32 hours; Discussion—8 hours. Prerequisite(s): Psychiatry Clerkship or consent of instructor; medical students only. Students rotate through the county Primary Care Clinic under the supervision of dual-boarded Psychiatry and Internal Medicine Faculty to provide medical care of indigent and uninsured patients as well as primary care for psychiatry patients. May be repeated for credit. (H/P/F grading only.) Effective: 2018 Winter Quarter.

**PSY 422—Readings in Psychiatry (1-3)**
Discussion. Independent reading of a selected topic in psychiatry. Supervision and discussion with a psychiatry faculty member. (H/P/F grading only.) Effective: 1997 Winter Quarter.

**PSY 423—Willow Clinic (3-12)**
Variable—4-10 hours. Prerequisite(s): Open to medical students in all four years of medical school. Student run clinic for medical students interested in learning about and meeting the unique health care needs for the homeless population. May be repeated for credit. (P/F grading only.) Effective: 2009 Spring Quarter.

**PSY 424—Functional Genomics (2)**
Discussion—1 hour; Lecture—1 hour. Prerequisite(s): Graduate standing or consent of instructor. The theory, methods and principles of functional neurogenomics with emphasis on the relationship to molecular mechanisms involved in development and disease of the nervous system. (H/P/F grading only.) Effective: 2009 Spring Quarter.

**PSY 430—Psychiatry Clinical Clerkship (12)**
Clinical Activity—45 hours. Prerequisite(s): Approval by School of Medicine Committee on Student Progress. Assigned to clinical settings, students build upon the skills gained in preclinical years; emphasis on diagnostic,
therapeutic and interpersonal skills. Areas of focus - patient management, interviewing skills, mental status exam, differential diagnosis, basic psychopharmacology, crisis assessment, intervention and case (H/P/F grading only.) Effective: 2001 Summer Quarter.

**PSY 430FA—SJVP Longitudinal Psychiatry Clerkship (1.5-6)**
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Approval by School of Medicine Committee on Student Progress. Longitudinal Clerkship runs concurrently with Family Medicine, Pediatrics and Internal Medicine for 32 weeks. Time is spent in direct patient care situations under the guidance of faculty. (H/P/F grading only.) Effective: 2017 Spring Quarter.

**PSY 430FB—SJVP Longitudinal Psychiatry Clerkship (1.5-6)**
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Approval by School of Medicine Committee on Student Progress. Longitudinal Clerkship runs concurrently with Family Medicine, Pediatrics and Internal Medicine for 32 weeks. Time is spent in direct patient care situations under the guidance of faculty. (H/P/F grading only.) Effective: 2017 Spring Quarter.

**PSY 430FC—SJVP Longitudinal Psychiatry Clerkship (1.5-6)**
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Approval by School of Medicine Committee on Student Progress. Longitudinal Clerkship runs concurrently with Family Medicine, Pediatrics and Internal Medicine for 32 weeks. Time is spent in direct patient care situations under the guidance of faculty. (H/P/F grading only.) Effective: 2017 Spring Quarter.

**PSY 430FD—SJVP Longitudinal Psychiatry Clerkship (1.5-6)**
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Approval by School of Medicine Committee on Student Progress. Longitudinal Clerkship runs concurrently with Family Medicine, Pediatrics and Internal Medicine for 32 weeks. Time is spent in direct patient care situations under the guidance of faculty. (H/P/F grading only.) Effective: 2017 Spring Quarter.

**PSY 430R—Rural PRIME Psychiatry Longitudinal Clerkship (2)**
Clinical Activity—45 hours. Psychiatry Longitudinal Integrated Clerkship for the Rural PRIME Program. (H/P/F grading only.) Effective: 2017 Spring Quarter.

**PSY 430RA—Rural PRIME Psychiatry Longitudinal Clerkship (3)**
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Psychiatry Longitudinal Integrated Clerkship for the Rural PRIME Program. (H/P/F grading only.) Effective: 2017 Spring Quarter.

**PSY 430RB—Rural PRIME Psychiatry Longitudinal Clerkship (3)**
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Psychiatry Longitudinal Integrated Clerkship for the Rural PRIME Program. (H/P/F grading only.) Effective: 2017 Spring Quarter.

**PSY 430RC—Rural PRIME Psychiatry Longitudinal Clerkship (3)**
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Psychiatry Longitudinal Integrated Clerkship for the Rural PRIME Program. (H/P/F grading only.) Effective: 2017 Spring Quarter.

**PSY 430RD—Rural PRIME Psychiatry Longitudinal Clerkship (1)**
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Psychiatry Longitudinal Integrated Clerkship for the Rural PRIME Program. (H/P/F grading only.) Effective: 2017 Spring Quarter.

**PSY 430TA—TeachMS Longitudinal Psychiatry Clerkship (A) (4)**
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Approval by School of Medicine Committee on Student Promotions. Longitudinal Clerkship runs concurrently with Primary Care and Medicine for 24 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only.) Effective: 2013 Fall Quarter.

**PSY 430TB—TeachMS Longitudinal Psychiatry Clerkship (B) (6)**
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Approval by School of Medicine Committee on Student Promotions. Longitudinal Clerkship runs concurrently with Primary Care and Medicine for 24 weeks. Time is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only.) Effective: 2013 Fall Quarter.

**PSY 430TC—TeachMS Longitudinal Psychiatry Clerkship (C) (2)**
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Approval by School of Medicine Committee on Student Promotions. Longitudinal Clerkship runs concurrently with Primary Care and Medicine for 24 weeks. Time
is spent in direct patient care situations under the guidance of faculty. On-going patient write-ups, rounds, conferences are required. May be repeated for credit. (H/P/F grading only.) Effective: 2013 Fall Quarter.

**PSY 439D—Directed Clinical Studies in Psychiatry (1-12)**
Clinical Activity—40 hours. Prerequisite(s): Consent of Instructor. Individual directed studies in extended preparation for modified curriculum or to complete a clinical rotation following a leave of absence. May be repeated for credit. (P/F grading only.) Effective: 2011 Spring Quarter.

**PSY 439R—Directed Studies in Psychiatry (1-12)**
Clinical Activity—30 hours; Independent Study—10 hours. Prerequisite(s): Consent of Instructor. Individual directed studies in extended preparation for remediation of all or part of clinical rotation. Clinical studies to accommodate and satisfy remedial work as directed by the Committee on Student Progress and approved by the course IOR. May be repeated for credit. (P/F grading only.) Effective: 2011 Summer Quarter.

**PSY 480—Insights in Psychiatry (1-3)**
Clinical Activity—3-9 hours. Prerequisite(s): Consent of Instructor. First- or second-year medical student in good academic standing. On individual basis, student provided with an opportunity for gaining insight into various clinical activities in the practice of psychiatry. (H/P/F grading only.) Effective: 1997 Winter Quarter.

**PSY 488—Acting Internship in Inpatient Psychiatry, Away Rotation (6)**
Clinical Activity—40 hours. Prerequisite(s): Psychiatry Clerkship and/or consent of course coordinator. Inpatient acting internship at approved non-UCDHS affiliated training program that provides experience and preparation for ambulatory medical care. Students perform as an intern, with a smaller number of patients, greater supervision, and responsibility for the ongoing care of assigned patients. (H/P/F grading only.) Effective: 2009 Summer Quarter.

**PSY 489—Acting Internship in Ambulatory Psychiatry, Away Rotation (6)**
Clinical Activity—40 hours. Prerequisite(s): Psychiatry Clerkship and/or consent of course coordinator. Outpatient acting internship at an approved non-UCDHS affiliated training program that provides experience and preparation for ambulatory medical care. Students perform as an intern, with a smaller number of patients, greater supervision, and responsibility for the ongoing care of assigned patients. (H/P/F grading only.) Effective: 2009 Summer Quarter.

**PSY 493—Culture, Medicine and Society (6)**
Clinical Activity—16 hours; Discussion—4 hours; Independent Study—8 hours; Seminar—12 hours. Prerequisite(s): Consent of Instructor. Restricted to UC Davis School of Medicine students only. Students will learn about the epidemiological significance of health disparities and barriers to access to health care. The course will cover (1) Epidemiology/Health Disparities; (2) Society and Medicine; (3) Cinemeducation; (4) Reflection/Integration. (H/P/F grading only.) Effective: 2007 Spring Quarter.

**PSY 498—Directed Group Study (1-5)**
Variable. Prerequisite(s): Consent of Instructor. Approved for graduate degree credit. Medical students desiring to explore particular topics in depth. (H/P/F grading only.) Effective: 1997 Winter Quarter.

**PSY 499—Research (1-12)**
Variable. Prerequisite(s): Consent of Instructor. Approved for graduate degree credit. Individual research on selected topics or research projects. May be repeated for credit. (H/P/F grading only.) Effective: 2017 Fall Quarter.

**SOM Courses | RON**

**Course in RON:**

**RON 199—Special Study for Advanced Undergraduates; Research in Radiation Biology (1-5)**
Variable—3-15 hours. Radiation Oncology is a unique discipline combining elements of clinical practice linked to complex physics based dosimetry and treatment planning. Included within this clinical environment is a strong basis in biology that underpins the clinical effectiveness of radiation treatment. May be repeated for credit. (P/NP grading only.) Effective: 2010 Fall Quarter.

**RON 211—Introduction to Radiation Oncology Physics (3-6)**
RON 299—Independent Study and Research (1-12)
Laboratory—3-40 hours. Prerequisite(s): Enrollment with a graduate group for Ph.D. candidacy and consent of group advisor and sponsor. Research under supervision of Radiation Oncology faculty. Work must be appropriate to fulfill the requirements for the Ph.D. degree. (S/U grading only.) Effective: 2012 Fall Quarter.

RON 420—Radiobiology Lecture Course (1)
Lecture—1 hour. Prerequisite(s): BIS 001A; MAT 012; PHY 001A. Radiobiology lectures are designed to engage the physician residents, physics residents and medical students in learning Radiobiology principles and concepts during the year the Radiation Physics course is taught. May be repeated up to 2 times. (H/P/F grading only.) Effective: 2011 Winter Quarter.

RON 463—Radiation Oncology Clerkship (3-9)
Clinical Activity—30 hours. Prerequisite(s): MDS 430; MDS 431; third-year clinical clerkship; consent of instructor required. Introduction to radiation oncology. Students will participate in workup and treatment planning for radiation oncology patients and will be introduced to the concepts involved in clinical radiation oncology, radiation biology, and radiation physics. May be repeated for credit. (H/P/F grading only.) Effective: 2012 Summer Quarter.

RON 465—Externship in Radiation Oncology (3-16)
Clinical Activity—30 hours. Prerequisite(s): Consent of Instructor. Externship provides in-depth exposure to the field of Radiation Oncology for students who rotation through an affiliated institution. May be repeated for credit. (H/P/F grading only.) Effective: 2015 Spring Quarter.

RON 499—Independent Study and Research in Therapeutic Radiology (1-18)
Variable—3-40 hours. Prerequisite(s): Consent of Instructor. Advanced-level research seminar in clinical and/or translational radiation oncology. Work with the course instructor to generate a testable hypothesis. May be repeated for credit. (H/P/F grading only.) Effective: 2014 Fall Quarter.

SOM Courses | RDI
Courses in RDI:

RDI 413—Radiological Diagnosis II (Physics of Diagnostic Radiology) (5)
Laboratory—6 hours; Lecture—49 hours. Prerequisite(s): Consent of Instructor. Physics of diagnostic imaging; x-ray production and interaction; image formation; modulation transfer function; fluoroscopy; cine fluoroscopy; stereoscopy; xeroradiography; computerized and geometrical tomography; magnetic resonance and ultrasound. Principles of radiation protection in imaging will be covered. (H/P/F grading only.) Effective: 1997 Winter Quarter.

RDI 414—Medical Radiation Biology (3)
Lecture—27 hours. Prerequisite(s): Consent of Instructor. Medical radiation biology; molecular cellular and organ system response to acute and chronic irradiation; radiation carcinogenesis and genetic effects; radiation risk assessment; diagnostic ultrasound and magnetic resonance imaging health effects. Medical/legal considerations of radiation exposure. (H/P/F grading only.) Effective: 1997 Winter Quarter.

RDI 430—Introduction to Clinical Radiology (3-6)
Variable. Prerequisite(s): Consent of Instructor. Introduces students to common radiology tests, including limitations and risks by using ACR Appropriateness Criteria and incorporate patient specific clinical data into ordering and interpreting appropriate imaging tests. (H/P/F grading only.) Effective: 2017 Fall Quarter.

RDI 461—Advanced Clinical Clerkship in Diagnostic Radiology (3-6)
Clinical Activity—35 hours; Conference—4 hours; Discussion/Laboratory—1 hour. Prerequisite(s): Consent of Instructor. Satisfactory completion of second year medical school curriculum and of third-year clerkships in Internal Medicine and General Surgery. Restricted to eight students per rotation; open to visiting medical students from accredited programs. Work with clinical Radiologists in image interpretation fluoroscopy angiography image-guided intervention cardiac stress testing radionuclide therapy. Daily conferences in Radiology Diagnosis and Therapy Health Physics Radiation Safety. Prepare two clinical cases for in-class presentation. Assigned readings. May be repeated for credit. (H/P/F grading only.) Effective: 2014 Spring Quarter.

RDI 462—Diagnostic Imaging of Acquired and Congenital Heart Disease (2)
Lecture/Discussion—5 hours. Prerequisite(s): RDI 461 (can be concurrent); Fourth-year medical student in good academic standing. Main emphasis on radiology of acquired and congenital heart disease, but also on magnetic resonance, nuclear medicine, and echocardiography of heart diseases. (H/P/F grading only.) Effective: 1997 Winter Quarter.

1553
RDI 473—Advanced Clinical Clerkship in Neuroradiology (3-6)
Clinical Activity—35 hours; Conference—4 hours; Independent Study—1 hour; Variable—9-18 hours. Prerequisite(s): Fourth-year medical student with interest in Diagnostic Radiology, Neuroradiology, Neurology, Neurosurgery, Psychiatry, Psychology, or related field; satisfactory completion of RDI 461, or the equivalent, is strongly encouraged. Restricted to one student per 2/4 week rotation. Work with Neuroradiologists in image interpretation of CT, MRI, and fluoroscopy. Opportunity to participate in assessment of Neurointerventional patients, and to observe Neurointerventional procedures. Daily conferences in Neuroimaging, General Radiology, Health Physics, and Radiology Safety. Assigned readings. May be repeated for credit. Credit limited to 3 units for 2 weeks; 6 units for 4 weeks. (H/P/F grading only.) Effective: 2014 Spring Quarter.

RDI 474—Advanced Clinical Clerkship in Pediatric Radiology (3-6)
Clinical Activity—30 hours; Conference—5 hours; Film Viewing—3 hours; Independent Study—2 hours. Prerequisite(s): Fourth-year medical students with interest in Radiology and/or Pediatrics; interested third-year medical students who have successfully completed Pediatrics clinical clerkships may enroll, given availability and consent of the instructor of record; prior completion of PDI 461, or the equivalent, encouraged. Restricted to two students per two-week or four-week rotation. Participation in the radiological care of Pediatric patients; evaluate the patient receiving the radiographic study, including pertinent historical/physical findings. Student expected to write up case files on interesting cases encountered during their rotation. May be repeated for credit. Credit limited to 3 units for 2 weeks; 6 units for 4 weeks. (H/P/F grading only.) Effective: 2014 Spring Quarter.

RDI 475—Advanced Clinical Clerkship in Musculoskeletal Radiology (MSK) (3-6)
Clinical Activity—35 hours; Conference—4 hours; Discussion/Laboratory—1 hour; Variable—9-18 hours. Prerequisite(s): Fourth-year medical student with interest in Musculoskeletal Radiology, Orthopedic Surgery, Sports Medicine, PMNR, or related field; satisfactory completion of RDI 461, or the equivalent, is strongly encouraged. Restricted to one student per 2/4 week rotation. Work with Musculoskeletal Radiologists in interpretation of CT, MRI, radiography, and fluoroscopy. Opportunity to assess patients for, and to observe image-guided procedures. Daily conferences in Musculoskeletal Imaging, General Radiology, Health Physics, and Radiology Safety. Assigned readings. May be repeated for credit. Credit limited to 3 units for 2 week; 6 units for 4 weeks. (H/P/F grading only.) Effective: 2014 Spring Quarter.

RDI 476—Advanced Clinical Clerkship Vascular/Interventional Radiology (IR) (3-6)
Clinical Activity—35 hours; Conference—4 hours; Discussion/Laboratory—1 hour; Variable—9-18 hours. Prerequisite(s): Fourth-year medical student with interest in Diagnostic Radiology, Vascular/Interventional Radiology, Cardiovascular Imaging, Cardiology, Cardiovascular Surgery, Surgical Oncology, General Surgery, or related field; satisfactory completion of RDI 461, or the equivalent, is strongly encouraged. Restricted to one student per 2/4 week rotation. Medical student will work with Vascular/Interventional Radiologists in the evaluation of patients for interventional procedures. There will be opportunities to Daily conferences in Neuroimaging, General Radiology, Health Physics, and Radiology Safety. Assigned readings. May be repeated for credit. Credit limited to 3 units for 2 weeks; 6 units for 4 weeks. (H/P/F grading only.) Effective: 2014 Spring Quarter.

RDI 477—Advanced Clinical Clerkship in Ultrasound Radiology (3-6)
Clinical Activity—30 hours; Conference—5 hours; Film Viewing—3 hours; Variable—9-18 hours. Prerequisite(s): Fourth-year medical student with interest in Radiology, OB/GYN, or in other medical or surgical subspecialties employing ultrasound in their clinical practice; prior completion of RDI 461, or the equivalent, is encouraged. Restricted to two students per 2/4 week rotation. Participation as an active team member on a busy clinical ultrasound service. May be repeated for credit. (H/P/F grading only.) Effective: 2016 Summer Quarter.

RDI 478—Advanced Clinical Clerkship Abdominal Imaging (3-6)
Clinical Activity—35 hours; Conference—4 hours; Discussion/Laboratory—1 hour; Variable—9-18 hours. Restricted to one student per 2/4 week rotation. Work with clinical Radiologists on abdominal and pelvic CT, MR, ultrasound, digital radiography, gastrointestinal and genitourinary procedures, image-guided intervention. Offered as a 2-week rotation for third-year medical students and a 2/4-week rotation for fourth-year medical students. May be repeated for credit. Credit limited to 3 units for 2 weeks; 6 units for 4 weeks. (H/P/F grading only.) Effective: 2014 Spring Quarter.

RDI 479—Specialty Externship in Radiology (3-16)
Clinical Activity—25 hours; Discussion—10 hours. Externship provides in-depth exposure to one of a variety of subspecialties in Radiology. May be repeated for credit. (H/P/F grading only.) Effective: 2011 Winter Quarter.
RDI 480—Away Acting Internship in Radiology (3-6)
Clinical Activity—40 hours. Prerequisite(s): Consent of Instructor. Away Acting Internship rotation for Radiology and Nuclear Medicine. May be repeated for credit. (H/P/F grading only.) Effective: 2018 Spring Quarter.

RDI 498—Group Study in Diagnostic Radiology (1-12)
Variable. Prerequisite(s): Consent of Instructor. (H/P/F grading only.) Effective: 1997 Winter Quarter.

RDI 499—Research in Diagnostic Radiology (1-12)
Variable. Prerequisite(s): Consent of Instructor. Approved for graduate degree credit. May be repeated for credit. (H/P/F grading only.) Effective: 2017 Fall Quarter.

SOM Courses | RNU
Courses in RNU:
RNU 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Upper division standing. (P/NP grading only.) Effective: 1997 Winter Quarter.

RNU 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. Upper division standing. (P/NP grading only.) Effective: 1997 Winter Quarter.

RNU 299—Research: Special Study for Graduate Students (1-12)
Variable. Prerequisite(s): Consent of Instructor. Graduate standing. (S/U grading only.) Effective: 1997 Winter Quarter.

RNU 401—Biomedical Radiochemistry (3)
Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): Consent of Instructor. Open to graduate and medical students. Approved for graduate degree credit. Course is designed to combine basic nuclear physics, chemistry, and biology into a comprehensive and vigorous lecture-laboratory experience in biomedical nuclear chemistry. Subjects include choice and purification of appropriate gamma and beta radioisotopes, compounding biological pharmacodynamics and radioimmunoassay. (H/P/F grading only.) Effective: 1997 Winter Quarter.

RNU 411—Radiological Physics I (Physics of Nuclear Medicine) (5)
Laboratory—12 hours; Lecture—43 hours. Prerequisite(s): Consent of Instructor. Physics of diagnostic and therapeutic nuclear medicine, nuclear physics, radioactive decay; interaction of ionizing radiation; dosimeters; attenuation; internal and external dosimetry; health physics; radiation detection and imaging, scintillation cameras, computerized planar and tomographic imaging. Offered at UC Davis Medical Center. (H/P/F grading only.) Effective: 1997 Winter Quarter.

RNU 463—Clinical Clerkship in Nuclear Medicine (3-8)
Clinical Activity. Prerequisite(s): Consent of Instructor. Satisfactory completion of second-year medical school; RDI 461 recommended. Limited enrollment. Clerkship correlates radioisotopic methods with clinical, pathophysiological, and other diagnostic aspects of the patients care. Each patient reviewed with student by faculty member. Reading assignments, informal projects, and research techniques available. (H/P/F grading only.) Effective: 1999 Spring Quarter.

RNU 498—Group Study in Nuclear Medicine (1-12)
Variable. Prerequisite(s): Consent of Instructor. Approved for graduate degree credit. (H/P/F grading only.) Effective: 1997 Winter Quarter.

RNU 499—Research in Nuclear Medicine (1-12)
Variable. Prerequisite(s): Consent of Instructor. Research in Nuclear Medicine. May be repeated for credit. (H/P/F grading only.) Effective: 2017 Fall Quarter.

SOM Courses | SUR
Course in SUR:
SUR 099—Cardiovascular Tissue Engineering Research (1-5)

SUR 192—Internship in General Surgery (1-12)
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Upper division standing; approval of project prior to
period of internship by preceptor. Supervised work experience in general surgery and related fields. (P/NP grading only.) Effective: 1997 Winter Quarter.

SUR 199—Special Study in General Surgery for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Advanced undergraduate student with consent of instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

SUR 299—Research (1-12)
Variable. Prerequisite(s): Consent of Instructor. Graduate standing. (S/U grading only.) Effective: 1997 Winter Quarter.

SUR 430—Surgery Clerkship (12)
Clinical Activity—45 hours. Prerequisite(s): Approval by School of Medicine Committee on Student Progress. Eight week general surgery clerkship includes GI, Burn, Oncology, Plastics, Vascular Cardiothoracic, consult, transplant and trauma. Clerkship assignments are at UCDMC. Daily core material presentations and reading assignments. Student involvement includes work-up and care of surgical patients. (H/P/F grading only.) Effective: 2001 Summer Quarter.

SUR 430F—SJVP Surgery Clerkship at UCSF (6-12)
Clinical Activity—45 hours. Prerequisite(s): Approval by School of Medicine Committee on Student Progress. General surgery clerkship includes GI, Burn, Oncology, Plastics, Vascular Cardiothoracic, consult, transplant and trauma. Clerkship assignments are at UCSF Fresno. Student involvement includes work-up and care of surgical patients. (H/P/F grading only.) Effective: 2017 Winter Quarter.

SUR 430R—Rural PRIME Surgery Longitudinal Clerkship (2)
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Surgery Longitudinal Integrated Clerkship for the Rural PRIME Program. (H/P/F grading only.) Effective: 2017 Spring Quarter.

SUR 430RA—Rural PRIME Surgery Longitudinal Clerkship (3)
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Surgery Longitudinal Integrated Clerkship for the Rural PRIME Program. (H/P/F grading only.) Effective: 2017 Spring Quarter.

SUR 430RB—Rural PRIME Surgery Longitudinal Clerkship (3)
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Surgery Longitudinal Integrated Clerkship for the Rural PRIME Program. (H/P/F grading only.) Effective: 2017 Spring Quarter.

SUR 430RC—Rural PRIME Surgery Longitudinal Clerkship (3)
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Surgery Longitudinal Integrated Clerkship for the Rural PRIME Program. (H/P/F grading only.) Effective: 2017 Spring Quarter.

SUR 430RD—Rural PRIME Surgery Longitudinal Clerkship (1)
Clinical Activity—45 hours. Prerequisite(s): Consent of Instructor. Surgery Longitudinal Integrated Clerkship for the Rural PRIME Program. (H/P/F grading only.) Effective: 2017 Spring Quarter.

SUR 439D—Directed Clinical Studies in Surgery (1-12)
Clinical Activity—40 hours. Prerequisite(s): Consent of Instructor. Partial completion of a Clinical Rotation. Individual directed studies in extended preparation for modified curriculum or to complete a clinical rotation following a leave of absence. May be repeated for credit. (P/F grading only.) Effective: 2011 Spring Quarter.

SUR 439R—Directed Studies in Surgery (1-12)
Clinical Activity—30 hours; Independent Study—10 hours. Prerequisite(s): Consent of Instructor. Individual directed studies in extended preparation for remediation of all or part of clinical rotation. Clinical studies to accommodate and satisfy remedial work as directed by the Committee on Student Progress and approved by the course IOR. May be repeated for credit. (P/F grading only.) Effective: 2011 Summer Quarter.

SUR 450—Surgical Skills Boot Camp (3-6)
Independent Study—30 hours; Workshop—10 hours. Prerequisite(s): Consent of Instructor. Goal of the surgical skills boot camp didactic is to enable students to demonstrate competence in basic surgical skills and theory, using analytical thinking and hands-on simulation. May be repeated for credit. (H/P/F grading only.) Effective: 2015 Spring Quarter.

SUR 461—Surgery Burn Unit Clerkship (6-18)
Clinical Activity. Prerequisite(s): SUR 430; and Consent of Instructor. Fourth-year medical student or third-year medical student. Rotation through Surgery Specialty Clinics: Vascular, GI, GU, Thoracic, Plastic, Radiotherapy. Student works up one new and two return visit patients. Presents consult to on-site faculty. Weekly review with
preceptor and course director. Reading assignments to add perspective for in-depth discussions. (H/P/F grading only.) Effective: 1997 Winter Quarter.

SUR 462—Surgery Trauma Service Clerkship (6-9)
Clinical Activity. Prerequisite(s): SUR 430; and Consent of Instructor. Fourth-year medical student, or third-year medical student. Student works as an extern on one of the two general surgery Trauma teams, participating in resuscitation and management of critically injured patients. Team hours consist of 24 hours on, and 24 hours off. (H/P/F grading only.) Effective: 1997 Winter Quarter.

SUR 463—Surgery Intensive Care Unit (6-9)
Clinical Activity. Prerequisite(s): SUR 430; and Consent of Instructor. Fourth-year medical student, or third-year medical student. Student works as an extern on one of the two general surgery Trauma teams, participating in resuscitation and management of critically injured patients. Team hours consist of 24 hours on, and 24 hours off. (H/P/F grading only.) Effective: 1997 Winter Quarter.

SUR 466—Clinical Plastic Surgery Elective (3-9)
Clinical Activity—50 hours. Prerequisite(s): SUR 430; and Consent of Instructor. Third- or fourth-year medical students. Total involvement in patient care involving surgical preparation, treatment, operative care, and follow-up. Developing and understanding reconstruction and aesthetic plastic surgery. Microvascular surgery included. Student rotation. (H/P/F grading only.) Effective: 2014 Fall Quarter.

SUR 467—Surgical Oncology (3-9)
Clinical Activity. Prerequisite(s): SUR 430; and Consent of Instructor. Fourth-year medical student, or third-year medical student. Students actively participate in management of patients requiring surgery for cancer, endocrine disease and selected general surgical problems. Cases include malignant melanoma, sarcomas, gastrointestinal cancer, head and neck pathology, and metastatic malignancies. Attending rounds daily. Four teaching conferences weekly. (H/P/F grading only.) Effective: 1997 Winter Quarter.

SUR 468—Cardiothoracic Surgery Clerkship (6-9)
Clinical Activity. Prerequisite(s): SUR 430; and Consent of Instructor. Fourth-year medical student, or third-year medical student. Student works as an extern on the Cardiothoracic Surgical Service, participating in perioperative management and operations on the heart, lungs, mediastinum, and other thoracic structures. Regularly scheduled teaching conferences are conducted. (H/P/F grading only.) Effective: 1997 Winter Quarter.

SUR 471—Gastrointestinal Surgery (3-9)
Clinical Activity. Prerequisite(s): SUR 430; IMD 430; PED 430; and Consent of Instructor. Fourth-year medical student or third-year medical student. Student participates on the GI Surgery Service, working under the immediate supervision of the faculty and surgical housestaff, involving the full spectrum of gastrointestinal diseases performed by the medical student. (H/P/F grading only.) Effective: 1997 Winter Quarter.

SUR 472—Vascular Surgery (3-9)
Clinical Activity. Prerequisite(s): SUR 430; IMD 430; PED 430; and Consent of Instructor. Fourth-year medical student or third-year medical student. Student participates on the vascular surgery service and in the management and operations of arterial and venous system, exclusive of diseases that require cardiopulmonary bypass for treatment. Includes patient care responsibilities with appropriate supervision. (H/P/F grading only.) Effective: 1997 Winter Quarter.

SUR 474—Colorectal Surgery (3-6)
Clinical Activity. Prerequisite(s): Consent of Instructor. Fourth-year medical student. Students actively participate in clinic and the operating room on colon and rectal patients. This includes medical and surgical management. Assignments involve work up and care of the surgical patients. May be repeated for credit. (H/P/F grading only.) Effective: 2018 Spring Quarter.

SUR 475—Pediatric Surgery (6-9)
Clinical Activity—4-6 hours. Prerequisite(s): SUR 430; and Consent of Instructor. Fourth-year medical student or third-year medical student. Care of patients with neonatal congenital surgical problems. Fluid and electrolyte management in infants. General experience with acquired surgical diseases in children. (H/P/F grading only.) Effective: 1998 Fall Quarter.

SUR 476—Surgical Consult Service (6-9)
Clinical Activity. Prerequisite(s): SUR 430; and Consent of Instructor. Fourth-year medical student or third-year medical student. Students function as acting interns working in parallel with the interns on the service. They consult
on all non-trauma patients in the emergency room and on the wards and also participate in the operating room. (H/P/F grading only.) Effective: 1998 Fall Quarter.

SUR 477—Clinically Oriented Anatomy (3)
Clinical Activity—40 hours. Prerequisite(s): Completion of three years of medical school. Restricted to fourth-year medical student only. Anatomy of selected regions of the body using cadaver dissection, prosections and interactive CD ROMs. Anatomical relationships relevant to common surgical procedures. Surgical and interventional radiology procedures. (P/NP grading only.) Effective: 2002 Winter Quarter.

SUR 478—Surgical Preceptorship: Off Campus (3-18)
Clinical Activity—60 hours. Prerequisite(s): Consent of Instructor. Fourth-year medical student. Student participates in the preoperative, operative and postoperative care of surgical patients under the supervision of attending staff. (H/P/F grading only.) Effective: 2014 Fall Quarter.

SUR 480—Insights in Surgery (1-3)
Clinical Activity—3-9 hours. Prerequisite(s): Consent of Instructor. Medical student in good academic standing. Individualized activities, including ward rounds, subspecialty clinics and conferences, grand rounds, and observation of a variety of surgical procedures. (H/P/F grading only.) Effective: 1997 Winter Quarter.

SUR 481—Interactive Clinical Case Presentation (ICCP) (3)
Clinical Activity—1 hour. Prerequisite(s): Fourth-year medical students; however, course is open for third and fourth year student observers. Course taught as one session (4 hours) per month for three quarters (July to March); students who enroll can earn up to three credits and the minimum requirements will be to attend at least six sessions; students can do all nine sessions and work toward an honor; for the written part students will have to pick two of the nine case presentations and write a detailed paper with a literature review on “The Current management” of that disease-this can in fact be a manuscript submitted for publication with a faculty member as an advisor; maximum of 10-15 students in good standing. Case presentation of common clinical scenarios (i.e. chestpain/MI; fever/pneumonia; abdo pain/chlecy stites, etc.) from various discipline held in an auditorium with real patients exposure. Interactive session to review history, physical findings and case management. Students will be asked to perform H&P. (H/P/F grading only.) Effective: 2007 Summer Quarter.

SUR 493B—Critically Ill Surgical Patients SSM (6)
Clinical Activity—4 hours; Laboratory—16 hours; Lecture—5 hours; Lecture/Lab—10 hours. Prerequisite(s): Consent of Instructor. Restricted to UC Davis School of Medicine students only. Special Study Module, a four week course on the topic: Application of Basic Cardiopulmonary Physiology to Problems Encountered in Critically Ill Surgical Patients. (H/P/F grading only.) Effective: 2007 Summer Quarter.

SUR 493C—Physiological Principles in SICU SSM (6)
Clinical Activity—4 hours; Laboratory—16 hours; Lecture—5 hours; Lecture/Lab—10 hours. Prerequisite(s): Consent of Instructor. Restricted to UC Davis School of Medicine students only. Special Studies Module, A four week course on the topic: Care of the Critically Ill Surgical Patient: Use of Physiological Principles to Guide Treatment of Patients with Common Surgical Problems. (Same course as HPH 493C.) (H/P/F grading only.) Effective: 2007 Spring Quarter.

SUR 493D—Interdisciplinary Study of Gastrointestinal Cancer (6)
Clinical Activity—12 hours; Discussion/Laboratory—20 hours; Laboratory—3 hours; Lecture—5 hours. Prerequisite(s): Consent of Instructor. In-depth study of gastrointestinal, hepatic and pancreatic cancer. Emphasis on an integration of basic science and clinical medicine. Participating departments include pathology, surgical oncology, medical oncology, gastroenterology, radiology and radiotherapy. (Same course as PMD 493.) (H/P/F grading only.) Effective: 2012 Summer Quarter.

SUR 494H—Fourth-Year Surgical Honors Program (18)
Variable. Prerequisite(s): SUR 430; and Consent of Instructor. Completion of third year of medical school with superior performance on SUR 430. To provide intensive and comprehensive training in surgery to students interested in a postgraduate surgical career, that would enable them to succeed during the internship and residency training. (H/P/F grading only.) Effective: 1997 Winter Quarter.

SUR 495—Intense Introduction to Cardiac Surgery (3)
Clinical Activity—16 hours; Lecture/Discussion—4 hours. Prerequisite(s): Consent of Instructor. Restricted to medical student between first and second year. Close contact with vascular surgeon for two-week period. Includes Sunday mornings. 100% mandatory attendance. Physiology of going on and off cardiopulmonary bypass. Atherosclerotic cardiovascular disease, structural and valvular heart disease and electrical and rhythmic heart disease. May be repeated up to 1 time(s). (P/F grading only.) Effective: 2009 Spring Quarter.
SUR 498—Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Medical student. Directed reading and discussion and/or laboratory investigation on selected topics. (H/P/F grading only.) Effective: 1997 Winter Quarter.

SUR 499—Laboratory Research (1-12)
Laboratory—3-36 hours. Prerequisite(s): Consent of Instructor. Completion of second year of medical school. Laboratory research on surgically related problems. Participation in projects to include the following: burn, nutrition, oncology, transplant and others. May be repeated for credit. (H/P/F grading only.) Effective: 2017 Fall Quarter.

SOM Courses | URO

Courses in URO:

URO 199—Special Study for Advanced Undergraduates (1-5)
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

URO 400—Office Urology (1)
Clinical Activity—4 hours. Prerequisite(s): Fourth-year medical students with consent of instructor. Introduction to ambulatory care of urologic patients including basic therapeutic and diagnostic procedures from case material referred to private clinic. Management of urinary tract infection will be emphasized. (H/P/F grading only.) Effective: 1997 Winter Quarter.

URO 460—Urology Clinical Clerkship (5-18)
Clinical Activity—8-40 hours. Prerequisite(s): Consent of Instructor. Third-year medical student; physical diagnosis or the equivalent. Limited enrollment. Clinical experience in diagnosis and treatment of urologic disease. Student will work closely with house staff, participate in conferences and surgery, and perform initial patient evaluation on new patients. May be repeated for credit. (H/P/F grading only.) Effective: 2010 Winter Quarter.

URO 461—Externship in Urology (3-18)
Clinical Activity—60 hours. Prerequisite(s): Consent of Instructor. Fourth-year medical students. Under supervision, student acting as intern will assume full inpatient responsibility including admission history, physical examination, management of hospitalization, and participate in surgical procedures, outpatient clinic and learning diagnostic and therapeutic procedures. May be repeated for credit. (H/P/F grading only.) Effective: 2014 Fall Quarter.

URO 499—Research in Urology (1-12)
Variable. Prerequisite(s): Medical or veterinary medical students with consent of instructor. Research in oncology, male infertility, urodynamics, neurogenic bladder. Unique opportunity to apply recent technologies (nuclear medicine resonance, flow cytometry, recombinant DNA) in investigation, diagnosis and treatment of GU cancer, infectious disease, male infertility and development of genitourinary bioprosthetics. May be repeated for credit. (H/P/F grading only.) Effective: 2017 Winter Quarter.

Language proficiency is a desideratum. Courses in Latin and other European languages are strongly recommended, particularly for students planning to pursue graduate studies in the medieval or early modern field.

Depth Subject Matter

In consultation with the undergraduate advisor, students choose a total of eleven courses from the following disciplines with at least three courses each from the medieval and early modern periods:

Enlightenment (mid-eighteenth century). An interdisciplinary and interdepartmental program, the major includes studies in history, art history, philosophy, literature, drama, music, national languages, religion, rhetoric, and political theory.

The Program. The major requires interdisciplinary work, while allowing the student to focus on the early Middle Ages, the High Middle Ages, the Renaissance, or the Baroque. The series of medieval and early modern courses in the program provides the foundation for the major and prepares students for advanced work within the individual disciplines. On the upper-division level, students may choose course work in specific areas of History, Comparative Literature, English, French, German, Italian, Spanish, and Latin, philosophy and religion, arts and language, and political thought. In addition, each student may elect to complete a senior thesis on a selected aspect of medieval and/or early modern culture.

Career Alternatives. The major in Medieval and Early Modern Studies is a liberal arts degree providing excellent preparation for the rigors of professional schools as well as careers in law, museology, journalism, and teaching.

Major Advisor. See Program office.

Medieval and Early Modern Studies

The minor in Medieval and Early Modern Studies is a coherent program of interdisciplinary study. Medieval Studies units may be taken in one or more of the traditional fields of concentration, including art, history, literature, music, national languages, philosophy, political theory, and religious studies. Courses must be upper-division with at least two courses each from the medieval and early modern periods. Students may also select a minor with a thematic emphasis. Although there is no foreign language requirement for the minor, knowledge of Latin or a modern European language is recommended. The minor must be designed in consultation with the Undergraduate Advisor.

Total: 24

Medieval & Early Modern Studies; Medieval Studies | MST Courses

Courses in MST:

MST 020A—Early Medieval Culture (5) Review all entries
Discussion—1 hour; Extensive Writing; Lecture—3 hours. Readings (in translation) in medieval culture, such as Codes of Justinian, Confessions of Saint Augustine, Beowulf, the Nibelungenlied, The Song of Roland, the Summa Theologica of Thomas Aquinas, the Chronicles of Froissart, Chaucer's Canterbury Tales, and Dante's Divine Comedy. GE credit: AH, WC, WE. Effective: 2012 Fall Quarter.

MST 020A—Early Medieval Culture (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Readings (in translation) in medieval culture, such as Codes of Justinian, Confessions of Saint Augustine, Beowulf, the Nibelungenlied, The Song of Roland, the Summa Theologica of Thomas Aquinas, the Chronicles of Froissart, Chaucer's Canterbury Tales, and Dante's Divine Comedy. GE credit: AH, WC, WE. Effective: 2018 Fall Quarter.
MST 020B—The Culture of the High Middle Ages (4)
Discussion—1 hour; Lecture—3 hours. Great transformations that created the modern world: Constitutional Government, the Hundred Years War, the Black Death, and the Peasants Revolts, the Renaissance, Reformation and Counter-Reformation, and the Baroque. GE credit: AH, WC, WE. Effective: 2018 Spring Quarter.

MST 098—Directed Group Study (1-5)
Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

MST 098F—Student Facilitated Course (1-4)
Variable—1-4 hours. Prerequisite(s): Consent of Instructor. Student facilitated course intended primarily for lower division students. (P/NP grading only.) Effective: 2017 Winter Quarter.

MST 099—Special Study for Undergraduates (1-5)
Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

MST 130A—Special Themes in Medieval Cultures (4)
Discussion—1 hour; Lecture—3 hours. Each offering concentrates on an interdisciplinary aspect of medieval culture in the Middle East and Europe: the idea of the hero, mysticism, urban development. Extensive readings focused on medieval source material. May be repeated for credit. May be repeated for credit. GE credit: AH, WC, WE. Effective: 1997 Spring Quarter.

MST 130B—Special Themes in Renaissance Culture (4)
Discussion—1 hour; Lecture—3 hours. Each theme illuminates an interdisciplinary aspect of Renaissance culture in the eastern and western hemispheres: exploration, medical pathology, daily life, baroque culture. Immersion in source material from 1500-1650. May be repeated for credit. May be repeated for credit. GE credit: AH, WC, WE. Effective: 1997 Fall Quarter.

MST 131—Cross-Cultural Relations in the Medieval and/or Early Modern World (4)
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): MST 020A or MST 020B; or Consent of Instructor. Medieval and/or Renaissance aspects of cross culturalism. Relations between Christians, Jews, and Muslims: Europeans, Africans, and Asians; Old World and New World. GE credit: WC, WE. Effective: 2011 Fall Quarter.

MST 189—Seminar in Medieval and Early Modern Culture (4)
Seminar—3 hours; Term Paper. Prerequisite(s): MST 020A or MST 020B; or Consent of Instructor. Focus on a particular problem or issue in the Medieval or Early Modern periods. Seminar topics might include (but not limited to) monasticism, origins of the university, chivalry, exploration, the role of women in the Medieval and Early Modern world. GE credit: WE. Effective: 2011 Fall Quarter.

MST 190—Senior Thesis (4)
Seminar—4 hours. Prerequisite(s): Senior standing and major in Medieval Studies. Preparation of a research paper dealing with a selected aspect of medieval culture, under supervision of three members of the Committee in Charge. Effective: 1997 Winter Quarter.

MST 197T—Tutoring in Medieval Studies (1-4)
Seminar—2 hours. Prerequisite(s): MST 020A; MST 020B; Upper division standing; consent of instructor and chairperson of curriculum committee. Tutoring in Medieval Studies 20A and 20B, including leadership in small discussion groups affiliated with the course. May be repeated for credit for a total of 6 units. May be repeated up to 6 unit(s). (P/NP grading only.) Effective: 1997 Winter Quarter.

MST 198—Directed Group Study (1-5)
Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

MST 198F—Student Facilitated Course (1-4)
Variable—1-4 hours. Prerequisite(s): Consent of Instructor. Student facilitated course intended primarily for upper division students. (P/NP grading only.) Effective: 2017 Winter Quarter.

MST 199—Special Study for Advanced Undergraduates (1-5)
Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

MST 199FA—Student Facilitated Course Development (1-4)
Variable—1-4 hours. Prerequisite(s): Consent of Instructor. Under the supervision of a faculty member, an undergraduate student plans and develops the course they will offer under 98F/198F. (P/NP grading only.) Effective: 2017 Winter Quarter.

MST 199FB—Student Facilitated Teaching (1-4)
Variable—1-4 hours. Prerequisite(s): Consent of Instructor. Student facilitated. Under the supervision of a faculty
member, an undergraduate student teaches a course under 98F/198F. (P/NP grading only.) Effective: 2017 Winter Quarter.

**Microbiology (Graduate Group)**

**Microbiology (Graduate Group) | MIB Information**

Renée M. Tsolis, Ph.D., Chairperson of the Group

**Group Office.** 3143 Tupper Hall (Medical: Microbiology and Immunology); 530-752-0262

**Faculty.** [https://mgg.ucdavis.edu/our-faculty](https://mgg.ucdavis.edu/our-faculty)

**Microbiology (Graduate Group) | MIB M.S.**

Renée M. Tsolis, Ph.D., Chairperson of the Group

**Group Office.** 3143 Tupper Hall (Medical: Microbiology and Immunology); 530-752-0262

**Faculty.** [https://mgg.ucdavis.edu/our-faculty](https://mgg.ucdavis.edu/our-faculty)

**Graduate Study.** The Graduate Group in Microbiology offers study and research leading to the M.S. and Ph.D. degrees. Strong preference is given to doctoral applicants. The group offers study in modern molecular approaches to microbiological problems. Areas of research span fundamental, applied, and pathogenic microbiology, including bacterial and viral pathogenesis, eukaryotic microbiology, microbial genomics and genetics, microbial physiology and development, microbial ecology and environmental microbiology, cancer biology, and bioengineering and bioremediation. For information on the graduate study and undergraduate preparation for the program contact a graduate advisor or the chairperson of the group.

The Master of Science degree is offered only en route to the Ph.D.

**Graduate Advisors.** S.C. Dawson (Microbiology & Molecular Genetics), A. Gelli (Med:Pharmacology), S.J. Lin (Microbiology & Molecular Genetics), R.E. Parales (Microbiology & Molecular Genetics), B. Shacklett (Med:Microbiology & Immunology), E.E. Sparger (Vet Med: Medicine), H. Zhou (Animal Science)

**Microbiology (Graduate Group) | MIB Ph.D.**

**Microbiology (Graduate Group) | MIB Courses**

Courses in MIB:

**MIB 200A—Microbial Biology (3)**

Lecture—3 hours. Prerequisite(s): MIC 102; Or equivalent; prior coursework in Microbiology. Designed to provide an overview of various aspects of microbiology and microbial processes. Topics will include microbial genetics and genomics, microbial metabolism, signaling, and adaptations. Effective: 2011 Fall Quarter.

**MIB 201L—Advanced Microbiology Laboratory Rotations (5)**

Laboratory—15 hours. Two five-week assignments in microbiology research laboratories. Individual research
problems with emphasis on methodological/procedural experience and experimental design. May be repeated up to 2 time(s). Effective: 2011 Fall Quarter.

**MIB 210—Microbial Interactions (2)**
Lecture—2 hours. Prerequisite(s): MIB 200A; or Consent of Instructor. Analysis at the molecular level of the interactions of microbes with the environment, microbes with other microbes, and microbes in symbiotic and/or pathogenic associations with eukaryotic hosts. Topics discussed will vary. May be repeated up to 2 time(s). Effective: 2011 Fall Quarter.

**MIB 290C—Advanced Research Conference (1)**
Conference—1 hour; Discussion—1 hour. Prerequisite(s): Graduate standing and/or consent of instructor. Presentation and critical discussion of staff research activities. Designed for advanced graduate students. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

**MIB 298—Group Study (1-5)**
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. Directed reading and discussion on select topics. May be repeated for credit when topic differs. (S/U grading only.) Effective: 2019 Fall Quarter.

**MIB 299—Research (1-12)**
Variable. Research under the guidance of dissertation committee. (S/U grading only.) Effective: 1997 Winter Quarter.

### Microbiology & Molecular Genetics

**Microbiology & Molecular Genetics | MIC Information**

Formerly Microbiology

(College of Biological Sciences)

Wolf-Dietrich Heyer, Ph.D., Chairperson of the Department

**Department Office.** 357 Briggs Hall; 530-752-2626; [http://microbiology.ucdavis.edu](http://microbiology.ucdavis.edu)

**Faculty.** [http://microbiology.ucdavis.edu/people/faculty/](http://microbiology.ucdavis.edu/people/faculty/)

**Microbiology & Molecular Genetics | MIC A.B.**

(College of Biological Sciences)

Wolf-Dietrich Heyer, Ph.D., Chairperson of the Department

**Department Office.** 357 Briggs Hall; 530-752-2626; [http://microbiology.ucdavis.edu](http://microbiology.ucdavis.edu)

**Faculty.** [http://microbiology.ucdavis.edu/people/faculty/](http://microbiology.ucdavis.edu/people/faculty/)

**Microbiology A.B.**

**The Major Program**

Microbiology is the branch of biology that deals with bacteria, yeasts and other fungi, algae, protozoa, and viruses. These microorganisms are ubiquitous in nature and play a crucial role in areas such as agriculture, biotechnology, ecology, medicine, and veterinary science. The field of microbiology contributes to areas of fundamental inquiry such as biochemistry, cell biology, evolution, genetics, molecular biology, pathogenesis, and physiology. The ease and power of simultaneous genetic and biochemical analysis of microbes led to the emergence of the new disciplines of molecular biology and molecular genetics, and spawned the new industry of biotechnology.

**The Program.** The Microbiology Undergraduate Program offers Bachelor of Science and Bachelor of Arts degrees in the College of Biological Sciences. Both degrees are designed to provide students with quantitative skills and knowledge across the breadth of Biological Sciences, while maintaining a focus on the biology of microorganisms. The B.S. degree offers more training in mathematics, biochemistry and laboratory methodology; the A.B. degree incorporates more exposure to the liberal arts. The choice of a major program and its suitability for particular career options should be discussed with a major advisor.

Choose at least one course from each of the areas of study below:

Areas of Study:

1. Microbial Genetics:
   - MIC 115 Recombinant DNA Cloning and Analysis 3
   - MIC 150 Genomes of Pathogenic Bacteria 3
   - MIC 170 Yeast Molecular Genetics 3

2. Virology or Immunology:
   - MIC 162 General Virology 4
   - MMI 188 Human Immunology 3
   - PMI 126 Fundamentals of Immunology 3
   - PMI 128 Biology of Animal Viruses 3

Choose additional course work from the list below, to achieve a total of 36 or more units. Upper division Microbiology courses not used in satisfaction of any other requirement; or:

BIS 104 Cell Biology 3
BIS 181 Comparative Genomics 3
BIS 183 Functional Genomics 3
FST 104 Food Microbiology 3
MCB 121 Advanced Molecular Biology 3
MCB 182 Principles of Genomics 3
PLP 130 Fungal Biotechnology and Biochemistry 3
SSC 111 Soil Microbiology 4

Or upper division courses in related fields, relevant to the student's interest and chosen in consultation with the advisor.

No more than 3 units of variable-unit courses (numbered 192, 198, or 199) may be used for credit in this category.

Note: Although a course may be listed in more than one category, that course may satisfy only one requirement in the entire major.

Total: 81-93
such as biochemistry, cell biology, evolution, genetics, molecular biology, pathogenesis, and physiology. The ease and power of simultaneous genetic and biochemical analysis of microbes led to the emergence of the new disciplines of molecular biology and molecular genetics, and spawned the new industry of biotechnology.

The Program. The Microbiology Undergraduate Program offers Bachelor of Science and Bachelor of Arts degrees in the College of Biological Sciences. Both degrees are designed to provide students with quantitative skills and knowledge across the breadth of Biological Sciences, while maintaining a focus on the biology of microorganisms. The B.S. degree offers more training in mathematics, biochemistry and laboratory methodology; the A.B. degree incorporates more exposure to the liberal arts. The choice of a major program and its suitability for particular career options should be discussed with a major advisor.

Career Alternatives. A bachelor's degree in microbiology serves as the foundation for advanced study in microbiology, entry into the professional schools of all health sciences, or immediate employment in biotechnology, health care and food science industries.

Graduate Study. The Graduate Group in Microbiology offers programs of study and research leading to the M.S. and Ph.D. degrees.

Strong preference is given to doctoral applicants. The group offers study in general microbiology, microbial physiology, microbial genetics, molecular mechanisms of microbial regulation, molecular mechanisms of microbial pathogenesis, immunology, virology, and recombinant DNA technology. For information on the graduate study and undergraduate preparation for the program contact a graduate adviser or the Chairperson of the Group.

Related Courses. The offerings of the Department of Microbiology and Molecular Genetics are augmented by courses in Food Science and Technology; Medical Microbiology; Molecular and Cellular Biology; Pathology, Microbiology, and Immunology; Plant Pathology; and Soil Science.

Faculty of the Department of Microbiology and Molecular Genetics also teach or participate in the following courses: BIS 002A, 101, 104 and 181.

Advising. Biology Academic Success Center (BASC); 1023 Sciences Laboratory Building; 530-752-0410; http://basc.ucdavis.edu/.

Master Advisor. Su-Ju Lin, Ph.D.

Honors and Honors Program. Su-Ju Lin, Ph.D.

Teaching Credential Subject Representative. Su-Ju Lin, Ph.D; see the Teaching Credential/M.A. Program.

Total: 102-112

Microbiology & Molecular Genetics | MIC Courses

Courses in MIC:

MIC 010—Natural History of Infectious Diseases (3)
Lecture—3 hours. Topics in the natural history of infectious diseases principally affecting humans. Introduction to infectious microbial agents, ecology, epidemiology, and induction of disease. Focus on diseases of a contemporary nature. Not open for credit to students who have completed MIC 101, MIC 102, or MIC 104. GE credit: SE. Effective: 2014 Fall Quarter.

MIC 091—Introduction to Research (1)
Seminar—1 hour. Prerequisite(s): BIS 002A; Or equivalent. Restricted to lower division standing. Discussion of faculty research focusing on the biochemistry, genetics, and cell biology of microorganisms, along with ways undergraduates can participate in research projects of faculty members. May be repeated up to 3 time(s). (P/NP grading only.) GE credit: SE. Effective: 2016 Fall Quarter.

MIC 098—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Primarily for lower division students. (P/NP grading only.) Effective: 1997 Winter Quarter.

MIC 099—Special Study for Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. May be repeated for credit. (P/NP grading only.) Effective: 2003 Spring Quarter.

MIC 101—Introductory Microbiology (5)
Discussion—1 hour; Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): (BIS 001A or BIS 002A); CHE 002B (can be concurrent) Survey of microorganisms emphasizing their interactions with humans and diseases. Topics include microscopy, survey of various microbes, the immune system, food microbiology, microbial pathogens, and mechanisms of disease transmission. Designed for students requiring microbiology for professional schools. Not open for credit to students who have completed MIC 102, MIC 102L, MIC 104, or MIC 104L. GE credit: SE, SL. Effective: 2014 Winter Quarter.

MIC 102—Introductory Microbiology (3)
Lecture—3 hours. Prerequisite(s): (BIS 001A or BIS 002A); CHE 002B (can be concurrent) Essentials of microbial biology, emphasizing phylogeny, physiology, genetics, ecology, and pathogenesis. Interactions with other microbes, humans, and the biosphere. Uses of microbes in agriculture and biotechnology. Not open for credit to students who have completed MIC 101 or MIC 104. GE credit: QL, SE, SL. Effective: 2016 Winter Quarter.

MIC 103L—Introductory Microbiology Laboratory (2)
Laboratory—3 hours; Lecture—1 hour. Prerequisite(s): MIC 102 C- or better; CHE 002B Introduction to principles and laboratory methods employed in working with microorganisms. Designed for students requiring microbiology for professional school admission. Not open to students who completed MIC 101 before spring 2016, or who have completed MIC 102L or MIC 104L. Effective: 2016 Fall Quarter.

MIC 104L—General Microbiology Laboratory (3)
Laboratory—6 hours; Lecture—1 hour. Prerequisite(s): MIC 102 C or better; (CHE 008B or CHE 118B or CHE 129A); and Consent of Instructor. Students must complete a petition for consideration of enrollment; petition available on department of Microbiology and Molecular Genetics website. Principles and laboratory methods employed in working with microorganisms. Designed for students continuing in microbiology, genetics, or biochemistry. Only two units of credit for students who completed MIC 101 before spring 2016, or who have completed MIC 103L; not open to students who have completed MIC 102L. GE credit: SE, WE. Effective: 2016 Fall Quarter.

MIC 105—Microbial Diversity (3)
Lecture—3 hours. Prerequisite(s): MIC 102 or MIC 104; BIS 101; BIS 103 or BIS 105 strongly recommended. Survey of the major groups of microorganisms emphasizing diversity of energy metabolism, morphology, evolution, and natural history. GE credit: SE. Effective: 2017 Winter Quarter.
MIC 105L—Microbial Diversity Laboratory (3)
Laboratory—6 hours; Lecture—1 hour. Prerequisite(s): (MIC 102 or MIC 104); (MIC 102L or MIC 104L); MIC 105 (can be concurrent) Classical enrichments for the isolation of metabolically diverse microbes; modern molecular methods for the identification of isolates; cultivation independent analysis of microbial communities from local environmental samples. GE credit: SE, WE. Effective: 2017 Winter Quarter.

MIC 111—Human Microbiology (3)
Lecture—3 hours. Prerequisite(s): MIC 102; BIS 101 Biology of microorganisms that form commensal, mutualistic, and pathogenic relationships with human beings, emphasizing their phylogeny, physiology, genetics, and ecology. Effects on human nutrition, development and physiology. Mechanisms of pathogenesis, immune response evasion, antibiotic action, and antibiotic resistance. GE credit: SE. Effective: 2016 Spring Quarter.

MIC 115—Recombinant DNA Cloning and Analysis (3)
Lecture—3 hours. Prerequisite(s): BIS 101; Or the equivalent. Cloning and analysis of recombinant DNA, with emphasis on Escherichia coli host-vector systems. DNA-modifying enzymes; vectors and their use; manipulation and expression of insert DNA; polymerase chain reaction; and sequence annotation. Graduate students see course 215. GE credit: SE. Effective: 2006 Fall Quarter.

MIC 117—Analysis of Molecular Genetic Circuits (4)
Lecture—4 hours. Prerequisite(s): BIS 002A; MAT 017A; MAT 017B; MAT 017C; or Consent of Instructor. Project-based course focused on problem-solving strategies in biology and medicine. Testing hypotheses by translating real-world problems into an appropriate mathematical model and translating the results into real-world understanding. Not open for credit to students who have taken BIM 117. GE credit: QL, SE, SL. Effective: 2018 Fall Quarter.

MIC 120—Microbial Ecology (3)
Lecture—3 hours. Prerequisite(s): MIC 105; (BIS 102 or BIS 105) Interactions between non-pathogenic microorganisms and their environment, emphasizing physiological and metabolic characteristics of various groups and their adaptation to and modification of specific habitats. GE credit: SE. Effective: 2008 Fall Quarter.

MIC 140—Bacterial Physiology (3)
Lecture—3 hours. Prerequisite(s): (BIS 101, BIS 102, BIS 103 (can be concurrent)) or (BIS 101, BIS 105); MIC 102 recommended. Fundamentals of bacterial growth and bacterial responses to environmental stresses. Topics will include carbon and nitrogen regulation, growth rate control, post-exponential growth, and motility and chemotaxis. Not open for credit to students who have completed MIC 130A. GE credit: SE. Effective: 2008 Fall Quarter.

MIC 150—Genomes of Pathogenic Bacteria (3)
Lecture—3 hours. Prerequisite(s): MIC 102; BIS 101 Molecular genetics and comparative genomics of representative pathogenic bacteria. Roles of mobile genetic elements, lateral gene transfer, and genome rearrangements in pathogen evolution. Mutation, recombination, and complementation as tools for genetic analysis. Content includes close examination of primary research articles. GE credit: SE. Effective: 2016 Fall Quarter.

MIC 155L—Bacterial Physiology Lab (4)
Laboratory—8 hours; Lecture/Discussion—1 hour. Prerequisite(s): (MIC 140 or MIC 150); MIC 120L; and Consent of Instructor. Physiology and genetics of bacteria. Isolation and characterization of mutant strains. Mapping of mutations by conjugation and transduction studies of control of enzyme synthesis by induction, repression, and catabolite repression. Effective: 2016 Spring Quarter.

MIC 162—General Virology (4)
Lecture—4 hours. Prerequisite(s): BIS 101; BIS 102 or BIS 105 recommended. Integrated presentation of the nature of animal, bacterial, and plant viruses, including their structure, replication and genetics. Three units to students who have completed PMI 128. GE credit: SE. Effective: 2017 Winter Quarter.

MIC 170—Yeast Molecular Genetics (3)
Lecture—3 hours. Prerequisite(s): BIS 101; MIC 102 or MIC 105 strongly recommended. Survey of the genetics, cell biology and technologies in yeasts and related lower eukaryotes. Topics include diversity of yeasts; cell structure; metabolism; cell cycle; genetic approaches and genomics; gene expression; yeasts as models to study higher eukaryotes; and contemporary techniques. GE credit: SE. Effective: 2016 Fall Quarter.

MIC 172—Host-Parasite Interactions (3)
Lecture—3 hours. Prerequisite(s): MIC 102 or MIC 101 or MIC 104; BIS 101; Biological Sciences 102 or 105 strongly recommended. Exploration of host-parasite interactions at multiple levels, with an emphasis on global health and medically important human parasites. GE credit: SE, SL. Effective: 2017 Fall Quarter.
MIC 175—Cancer Biology (3)
Lecture—3 hours. Prerequisite(s): BIS 101; (BIS 102 or BIS 105) Exploration of the causes and treatments of cancer at multiple levels: molecular/cell biology, clinical manifestations, epidemiology and prevention. GE credit: SE, SL. Effective: 2016 Spring Quarter.

MIC 190C—Undergraduates Research Conference (1)
Discussion—1 hour. Prerequisite(s): MIC 199 (can be concurrent); and Consent of Instructor. Upper division standing, MIC 199 required concurrently. Presentation and critical discussion of staff research activities: designed for advanced undergraduate students. May be repeated for credit. May be repeated for credit. (P/NP grading only.) Effective: 1997 Fall Quarter.

MIC 191—Introduction to Research for Advanced Undergraduates (1)
Seminar—1 hour. Prerequisite(s): BIS 002A; Or equivalent. Restricted to upper division standing. Discussion of faculty research focusing on the biochemistry, genetics, and cell biology of microorganisms, along with ways undergraduates can participate in research projects of faculty members. May be repeated up to 3 time(s). (P/NP grading only.) GE credit: SE. Effective: 2016 Fall Quarter.

MIC 192—Internship (1-12)
Internship—3-36 hours. Technical and/or professional experience on or off campus. Supervised by a member of the Microbiology Section faculty. (P/NP grading only.) Effective: 1997 Winter Quarter.

MIC 194H—Microbiology Honors Research (2)
Independent Study—6 hours. Prerequisite(s): Senior standing; eligibility for college honors; completion of six units of MIC 199; consent of section. Continuation of an individual microbiological research project culminating in writing of a senior thesis under a faculty director. (P/NP grading only.) Effective: 1997 Winter Quarter.

MIC 197T—Tutoring in Microbiology (1-12)
Variable—3-36 hours. Prerequisite(s): Consent of Instructor. Upper division standing. Assisting the instructor in one of the section’s regular courses by tutoring individual or small groups of students in a laboratory, in voluntary discussion groups, or other voluntary course activities. May be repeated for credit. (P/NP grading only.) Effective: 2004 Spring Quarter.

MIC 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

MIC 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

MIC 200B—Advanced Bacteriology (3)
Lecture—3 hours. Prerequisite(s): MIB 200A Intended for first-year graduate students in Microbiology and closely-related fields. Advanced topics in phylogeny, physiology and diversity of bacteria. Effective: 2001 Winter Quarter.

MIC 215—Recombinant DNA (3)
Lecture—3 hours. Prerequisite(s): BIS 101; BIS 102; BIS 103; Or the equivalent. Application of recombinant DNA technology to modern problems in biology, biochemistry, and genetics, emphasizing molecular cloning strategies, choice of vectors, preparation of insert DNA, and selection procedures. Effective: 1998 Fall Quarter.

MIC 217—Analysis of Molecular Genetic Circuits (4)
Lecture—4 hours. Prerequisite(s): Consent of Instructor. Project-based course focused on problem-solving strategies in biology. Emphasis on testing hypotheses by translating real-world problems into an appropriate mathematical model and translating the results into real-world understanding. Only two units of credit for students who have previously taken BIM 117 or MIC 117. Effective: 2018 Fall Quarter.

MIC 262—Advanced General and Molecular Virology (3)
Lecture—3 hours. Prerequisite(s): Graduate standing. Advanced integrated presentation of animal, bacterial, and plant viruses, including their structure, modes of regulation, expression and replication, and effects on host cells and organisms. Effective: 1997 Winter Quarter.

MIC 263—Principles of Protein-Nucleic Acid Interactions (3)
Lecture—3 hours. Prerequisite(s): Advanced graduate standing and completion of one year of basic graduate course work in biochemistry, biophysics, chemistry, genetics, microbiology, or molecular biology. Physical basis of protein-nucleic acid interaction. Topics include nucleic acid recognition by proteins, thermodynamics of protein-nucleic acid stability, and kinetics of binding process for both non-specific and sequence-specific nucleic acid

**MIC 274—Seminar in Genetic Recombination (1)**

**MIC 275—Seminar in DNA Repair and Recombination (1)**
Seminar—1 hour. Prerequisite(s): Consent of Instructor. Graduate standing in Microbiology or closely-related field. Review and discussion of current research and literature in DNA repair and recombination with presentations by individual students and invited speakers. May be repeated for credit. (S/U grading only.) Effective: 2006 Fall Quarter.

**MIC 276—Advanced Concepts in DNA Metabolism (3)**
Lecture—3 hours. Prerequisite(s): MCB 221C or GGG 201C or equivalent course recommended. DNA damage checkpoints, homologous recombination, and meiotic recombination. An advanced treatment of the clinical and current literature to discuss emerging principles and current models in these research areas. Effective: 2008 Fall Quarter.

**MIC 290C—Advanced Research Conference (1)**
Conference—1 hour; Discussion—1 hour. Prerequisite(s): Graduate standing and/or consent of instructor. Presentation and critical discussion of staff research activities. Designed for advanced graduate students. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

**MIC 291—Selected Topics in Microbiology (1)**
Seminar—1 hour. Prerequisite(s): Consent of Instructor. Graduate standing. Current progress in microbiology and cellular and molecular biology. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

**MIC 292—Seminar in Bacterial Physiology and Genetics (1)**
Seminar—1 hour. Prerequisite(s): Consent of Instructor. Graduate standing in Microbiology or closely-related field. Review and discussion of current research and literature in bacterial physiology and genetics, with presentations by individual students. (S/U grading only.) Effective: 2000 Spring Quarter.

**MIC 298—Group Study (1-5)**
Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

**MIC 299—Research (1-12)**
Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

**MIC 396—Teaching Assistant Training Practicum (1-4)**
Variable. Prerequisite(s): Graduate standing. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

The Major Program

A study of the Middle East and South Asia as a whole allows students to explore a unique set of issues of both historical and contemporary importance. In order to guide students in comparative analysis, faculty help majors deepen their inquiries through coursework on antique, medieval, and early modern empires and political systems. Given the dynamism of modern cultural contexts, majors are invited to concentrate their studies on a wide range of variables including the evolution of states along with new understandings of citizenship, the rise and development of nationalist movements, political conflicts informed by religious majorities, the nuclearization of India and Pakistan, the growth of information societies and computer industries, the production of oil and its social and cultural legacies, labor migrations, urbanization, the emergence of sizeable middle classes, transnational literary movements using sophisticated media technologies, the expansion and intrusion of global security regimes into everyday life, and peace initiatives that shape struggles for justice across the world. Our program’s focus on both the Middle East and South Asia is a pioneering achievement in the United States rivaled by only four other colleges or universities.

By the end of their studies, majors will have acquired an in-depth understanding of the common historical experience shared by many peoples in these regions, and of the legacies of culture, social exchange, power and empowerment across diverse settings. Students are also required to complete at least two years of training in a language appropriate to their area of expertise.

The major in Middle East/South Asia Studies at UC Davis offers a unique opportunity to study exchanges, complementarities, and correspondences in such fields as history, political economy, culture, literature and film, religion, family structures, gender relations, media, anthropology, law, international relations, development, diasporas, and urbanism. Students who complete our major will be well suited to embark on careers in non-governmental organizations, journalism and media industries, education and research, governmental service and diplomacy, and business.

Major Advisor. Consult the Middle East/South Asia Studies Program in 155 Kerr Hall 530-754-4926 or the Middle East/South Asia Studies website at http://mesa.ucdavis.edu.

Programs, Internships, and Career Alternatives. Many internship opportunities are available for the Middle East/South Asia Studies major and minor, consult with your advisor.

Other elective courses toward the minor program. Under no circumstances may more than one lower division course be offered in satisfaction of requirements for the minor.

More than four units of Middle East/South Asia Studies 192, 198, and/or 199 towards the minor program.

Total: 20-24

Middle East/South Asia Studies | MSA Courses

Courses in MSA:

MSA 092—ME/SA 92. Internship in Middle East/South Asia Studies (3-15)
Internship. Prerequisite(s): Consent of Instructor. Work experience on and off campus in all subject areas offered as part of the ME/SA Studies program. Internship supervised by a member of the ME/SA faculty. May be repeated up to 15 unit(s). (P/NP grading only.) Effective: 2007 Fall Quarter.

MSA 098—Directed Group Study (1-5)
Variable—3-15 hours. May be repeated for credit. (P/NP grading only.) Effective: 2006 Fall Quarter.

MSA 099—Special Study for Undergraduates (1-5)
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. May be repeated for credit. (P/NP grading only.) Effective: 2006 Fall Quarter.

MSA 100—Middle East and South Asia: Comparative Perspectives (4)
Extensive Writing; Lecture—3 hours. Ethnographic and historical points of intersection and divergence in various
aspects of the Middle East and South Asia in precolonial, colonial, and postcolonial societies. Anthropological, historical, and theoretical debates surrounding the region. GE credit: AH, SS, WC, WE. Effective: 2004 Summer Session 1.

**MSA 111A—Great Cities of Arab Middle East and South Asia (4)**
Extensive Writing; Lecture—3 hours. Prerequisite(s): Consent of Instructor. Some knowledge of Islamic/Middle Eastern history is very useful. In-depth examination of the great cities of North Africa, the Middle East and South Asia as cultural and historical artifacts. Topics include: the concept of the Islamic city, processes of modernity, and representations that reinforce imagination, memory and personal identity. GE credit: AH, SS, WC, WE. Effective: 2013 Fall Quarter.

**MSA 112—History of South Asian Islam (4)**

**MSA 121A—Shahnameh: The Persian Book of Kings (4)**
Lecture/Discussion—3 hours; Term Paper. In-depth analysis of the Persian Book of Kings (Shahnameh) by Abu al-Qasim Ferdowsi (d. 1020 CE) in its historical context with a comparative perspective on the role of this work in Persian and world literature. (Same course as COM 175.) GE credit: AH, WC, WE. Effective: 2015 Winter Quarter.

**MSA 121C—A Story for a Life: The Arabian Nights (4)**
Lecture/Discussion—3 hours; Term Paper. In-depth exploration of The Arabian Nights, the best-known work of pre-modern Arabic literature and a major work of world literature. Analysis of the work in its historical context and in comparison to other frame tales in world literature. (Same course as COM 172 and ARB 140.) GE credit: AH, WC, WE. Effective: 2016 Winter Quarter.

**MSA 122A—Themes in the Arabic Novel (4)**
Extensive Writing; Independent Study; Lecture/Discussion—3 hours. Class size limited to 30 students. Select modern Arabic fiction (novels and short stories) in translation. Thematically connected readings supplemented by non-fictional writings when appropriate. May be repeated up to 2 time(s) if the texts/theme of required course readings sufficiently change. GE credit: AH, OL, WC, WE. Effective: 2013 Fall Quarter.

**MSA 131A—Modern Iranian Cinema (4)**
Film Viewing—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): Upper division standing, or consent of instructor. Iranian cinema of the 20th century in the context of profound cultural and social changes in Iran especially since the Iranian Revolution. Productions by representative directors such as Kiarostami, Makhmalbaf, Bahram Beizaie are included. Knowledge of Persian not required. (Same course as CTS 146A.) GE credit: AH, OL, VL, WC, WE. Effective: 2013 Fall Quarter.

**MSA 131B—Modern South Asia Cinema (4)**
Film Viewing—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): Upper-division standing or consent of instructor. South Asian cinema of last 100 years in the context of cultural, social, and political changes. South Asian history, Independence, Partition, urban life, class, migration, postcolonial identity, diaspora, gender, sexuality, religion, sport, performance, etc (Same course as CTS 146B and ANT 147.) GE credit: AH, SS, VL, WC, WE. Effective: 2017 Winter Quarter.

**MSA 131C—Religion and Media in Arab World (4)**
Lecture—4 hours. Exploration of the role and experience of media technologies in the Arab world. Study of digital and electronic media as well as alternative media practices. Investigation of new trends in political activism and identity formation. (Same course as RST 166.) GE credit: OL, SS, VL, WC, WE. Effective: 2014 Fall Quarter.

**MSA 131D—Modern Turkish Cinema (4)**
Film Viewing—2 hours; Lecture/Discussion—2 hours. Prerequisite(s): Upper-division standing or consent of instructor. Turkish cinema of the 20th & 21st century in the context of cultural, social, & political changes. Issues covered include history, nationalism, political dissent, identity, migration, diaspora, gender, sexuality, religion, and incorporate viewpoints of Kurdish & other minority members. (Same course as CTS 146D and HIS 193E.) GE credit: AH, OL, SS, VL, WC, WE. Effective: 2016 Winter Quarter.

**MSA 150—Women and Islamic Discourses (4)**
Lecture/Discussion—4 hours. Prerequisite(s): WMS 050; Or comparable course. Introduction to the debates/discourses about women and Islam. Transformations in debates/discourses in colonial and postcolonial periods in the Middle East & South Asia. Comparative study of debates/discourses on family, work, law, sexuality, religion,
comportment, human rights, feminist and religious movements. (Same course as WMS 185.) GE credit: AH, SS, WC. Effective: 2008 Fall Quarter.

**MSA 151A—Iranian Society & Culture (4)**

**MSA 180—Topics in Middle East and South Asian Studies (4)**
Extensive Writing; Lecture—3 hours. Comparative perspective on the Middle East and South Asia. Topics may include: modernity, religious traditions, colonialism, subalternity and social movements, gender and sexuality, history and memory, science and development, ritual and performance, public culture, diasporas. May be repeated up to 1 time(s) topic varies. GE credit: AH, SS, WC, WE. Effective: 2004 Fall Quarter.

**MSA 181A—Topics in Regional ME/SA Studies (4)**
Lecture—3 hours; Term Paper. Iran & Persian topics for students specializing in region-specific Middle East and South Asia Studies. May be repeated up to 3 time(s). GE credit: AH, SS, WC, WE. Effective: 2015 Winter Quarter.

**MSA 181B—Topics in Regional ME/SA Studies (4)**
Lecture—3 hours; Term Paper. Indian/South Asia topics for students specializing in region-specific Middle East and South Asia Studies. May be repeated up to 3 time(s). GE credit: AH, SS, WC, WE. Effective: 2013 Fall Quarter.

**MSA 181C—Topics in Regional ME/SA Studies: Arab Studies (4)**
Lecture—3 hours; Term Paper. Arab Studies topics. May be repeated up to 3 time(s) when different topics and themes are studied. GE credit: AH, SS. Effective: 2013 Fall Quarter.

**MSA 182A—Undergraduate Proseminar in Middle East/South Asia (4)**
Seminar—3 hours; Term Paper. Prerequisite(s): MSA 100 recommended. Class size limited to 15 students. Seminar in Iran & Persian topics specializing in region-specific Middle East and South Asia studies. May be repeated up to 3 time(s). Effective: 2015 Winter Quarter.

**MSA 182B—Undergraduate Proseminar in Middle East/South Asia (4)**
Seminar—3 hours; Term Paper. Prerequisite(s): MSA 100 recommended. Class size limited to 15 students. Seminar in India/South Asia topics specializing in region-specific Middle East and South Asia studies. May be repeated up to 3 time(s) when different topics and themes are studied. Effective: 2012 Fall Quarter.

**MSA 182C—Undergraduate Proseminar in Middle East/South Asia: Arab Studies Seminar (4)**
Seminar—3 hours; Term Paper. Prerequisite(s): MSA 100 recommended. Class size limited to 15 students. Seminar in Arab Studies topics. May be repeated up to 3 time(s). Effective: 2013 Fall Quarter.

**MSA 192—Internship (1-12)**
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Supervised internship on and off campus in the area of Middle East and South Asia Studies. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 2018 Spring Quarter.

**MSA 194H—Special Study for Honors Students (1-5)**
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. Open only to majors of senior standing who qualify for honors program. Independent study of a problem in Middle East/South Asian studies involving the writing of an honors thesis. May be repeated up to 12 unit(s). Effective: 2009 Winter Quarter.

**MSA 198—Directed Group Study (1-5)**
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. May be repeated for credit. (P/NP grading only.) Effective: 2018 Spring Quarter.

**MSA 199—Special Study for Advanced Undergraduates (1-5)**
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. May be repeated for credit. (P/NP grading only.) Effective: 2018 Spring Quarter.

**Military Science**

**Military Science | Military Science**
(College of Letters and Science)

**Reserve Officers' Training Corps (ROTC), Army**
The Military Science Department is a classroom and hands-on leadership and management program. The program stresses the following Army Values: loyalty, duty, respect, selfless-service, honor, integrity, and personal courage. We cover the basics of the Army, including Army ranks, organizational structure, basic skills, and tactics. We also discuss current events, national and international politics, military affairs, ethics, and human relations. Military skills (such as drill and ceremony, map reading, and squad tactics) are taught to the extent necessary to create an environment where students can enter leadership positions and apply theories taught in the classroom. The program assists students in all academic fields to prepare for positions of leadership in military or civilian careers.

The department offers two program tracks: (1) a purely academic track; (2) a pre-commissioning track for those desiring a commission as an Officer in the Active Duty U.S. Army, Army Nation Guard, or Army Reserves. The academic track entails no obligation to the military and is open to all students but is limited to MSC 012 and MSC 022B. Students pursuing the academic track do not wear a uniform or otherwise participate in extra-curricular activities designed as part of the pre-commissioning process.

Students who desire a commission in the U.S. Army participate in both the academic portion of the program and in the leadership laboratories and extra-curricular activities designed to enhance their military leadership and tactical and technical skills. They wear uniforms to leadership laboratories and selected classes and become ROTC cadets. Students may be cadets in the lower division courses without incurring a military obligation. Students must contract with ROTC to participate in the upper division pre-commissioning program and incur a military obligation. Extra-curricular activities for cadets include an intercollegiate sports team (Ranger Challenge), the university color guard, a military honor society, and opportunities to participate in field training exercises.

Department Programs

Students are enrolled in Military Science under one of two programs.

Four-Year Program

There is no military obligation associated with attendance in lower division courses. Students are enrolled in the basic course (lower division) for the first two years on a voluntary basis. Admission to the advanced course (upper division) is by application from second-year lower division students who meet the academic, physical, and military aptitude requirements. Qualified veterans can enter the advanced course immediately based on their military service experience and graduation from Basic Training, upon approval by the Department Chairperson.

During the course, all Military Science textbooks, uniforms and equipment are provided without cost. Contracted students are given leadership development experience at the ROTC Advanced Camp in Fort Knox, Kentucky, between their third and fourth years of the course. Emphasis is on military fitness, tactics, and leadership.

Two-Year Program

The two-year program is for students, including graduate students, who have not attended lower division Military Science classes. In lieu of lower division courses an applicant attends a six-week summer program, Basic Camp, which is voluntary and carries no military obligation. Base Camp attendees are paid and transportation costs covered. Applications are accepted at anytime prior to the student's junior year; graduate students are also accepted, as long as they have two years of academics remaining.

Scholarship Program

There are three and two year scholarship opportunities available at the discretion of the Department Chairperson that covers full tuition and fees and $1200 annually for books. Cadets also receive a $420 monthly stipend.

Army Reserve Officers' Training Corps four-year Active Duty merit scholarships are awarded to qualified high school seniors in a national competition each year. As high school seniors, students compete for the scholarship by submitting their complete application at http://www.goarmy.com/rotc/.

If high school seniors are not awarded the four year National Scholarship, there are still opportunities for campus based three and two year scholarships.
Leadership Laboratory

During the course of the school year, two hours per week are spent conducting practical exercises. Classes emphasize adventure activities including military offense, defense and patrolling, operations, weapons familiarization, rappelling, leadership scenarios, and land navigation. All cadets are required to attend leadership laboratories for practical leadership experience and to prepare for attendance at Advanced Camp.

Academic Credit

**College of Agricultural and Environmental Sciences.** The Bachelor of Science degree in agriculture requires the completion of 180 units. Military Science courses are counted in the unit allowance for electives.

**College of Biological Sciences.** The Bachelor of Science degree requires the completion of 180 units. Military Science courses are counted in the allowance for electives.

**College of Engineering.** Military Science units are acceptable toward the requirements for the Bachelor of Science degree to the extent of the unrestricted elective units available in the curriculum being followed.

**College of Letters and Science.** The Bachelor of Arts and Bachelor of Science degrees require the completion of 180 units. Military Science courses are counted in the allowance for electives.

**School of Veterinary Medicine.** The number of Military Science units acceptable toward the Bachelor of Science degree in Veterinary Medicine is on an individual program basis approved by the Dean of the School. Graduates with the D.V.M. degree may apply for direct commission in the United States Army Veterinary Corps.

Aerospace Studies (Air Force)

The Air Force Reserve Officer’s Training Corps (AFROTC) is an educational program providing training in leadership, management, communications and military proficiency on college and university campuses. It also provides an opportunity to obtain a commission as a second lieutenant in the Air Force and enter the active duty forces after you complete a bachelor’s or a graduate degree. The skills you acquire will become valuable assets for any subsequent career you choose.

The program is normally four years long, but a flexible design allows students to complete the curriculum in as little as two years. Undergraduate scholarships are available, but are not necessary for participation. Until you accept a scholarship or enter your junior year of the program, you have no obligation to join the Air Force. There are no costs for AFROTC uniforms, books, or classes.

UC Davis students have the option of taking the Air Force program on the UC Berkeley or CSU Sacramento campus.

Qualifications

Freshmen/Sophomore applicants must:

- Be full-time college students in good academic standing
- Have good moral character
- Be in strong physical condition
- Be at least 14 years old

Additionally, Juniors/Seniors/Scholarship recipients must:

- Be United States citizens or in the process of applying for citizenship
- Be 18 years old (or 17 years old with consent of parent or guardian)
- Pass the Air Force Officer Qualifying Test
- Pass a medical examination
- Be under the age of 31 at time of graduation (may be waived)

Scholarships

Opportunities for four-year and three-year undergraduate scholarships are better than ever. Scholarships cover the full cost of tuition, books and required fees at the University of California and are available for eligible high school seniors. It also includes $300-$500 monthly stipend during the school year. If you are a junior or senior in high school and plan on attending a college or university in Northern California, you can write, call or visit the local
AFROTC detachments for a scholarship application. Applications are also available from local Air Force recruiters or your high school guidance counselors.

All scholarships are merit-based and consider a variety of factors: cumulative GPA, class standing, SAT/ACT scores, academic awards/achievements, leadership ability, athletic involvement, extracurricular activities, community service and letters of recommendation. A personal interview with an Air Force officer is also part of the application process. Prior to activating a scholarship, students must meet AFROTC medical and physical fitness standards. All scholarships must be used at an accredited college or university that offers AFROTC on campus or through cross-registration. The program is available at more than 1,000 universities and colleges nationwide.

If you are already in college, contact our office directly and apply for enrollment into AFROTC as a cadet. Three- and two-year full tuition scholarships are available for all academic majors, especially scientific and technical majors such as engineering, atmospheric science, math, computer science, and physics. GPA Scholarship requirements for nontechnical majors are slightly higher. Applicants are primarily evaluated on their leadership ability and academic performance.

Challenging Careers

All commissioned officers enter the Air Force as second lieutenants for a 4-year active duty service commitment. Pilots and navigators serve longer commitments, based on training requirements. Once on active duty, you’ll be given instant responsibility in one of 32 primary career fields. Opportunities to fly are better than ever. Whether you are piloting the F-22 fighter, supervising 150 aircraft maintainers on the flightline, or caring for sick personnel in the emergency room, you will be rewarded knowing that you are making a difference.

Air Force ROTC is offered through the Aerospace Studies departments at California State University Sacramento and U.C. Berkeley. Scholarships (including tuition, book allowance, and stipend) are available for qualified students. Students may enroll and attend one course per semester at the U.C. Berkeley or CSU Sacramento campus at no cost. Topics covered in AFROTC courses include Basic Military knowledge (1-credit), Military History (1-credit), Leadership Training (3-credits), and U.S. National Security Affairs and Preparation for Active Duty (3-credits). Additional components of the AFROTC program include 2 hours per week of fitness activities, 2 hours per week of Leadership Lab, and a 4-week Summer Field Training between the Sophomore and Junior years. Upon completion of the program and granting of 4-year degree, students will commission as Second Lieutenants in the United States Air Force. To be eligible for AFROTC, applicants should be a full time student and meet additional fitness, GPA, testing, and other requirements. Interested students, please contact their department of choice:

For CSU Sacramento:  http://www.csus.edu/afrotc

Department of Naval Science

152 Hearst Gymnasium, UC Berkeley
Berkeley, CA 94270-3640
510-642-3551; http://navyrotc.berkeley.edu

UC Davis students may participate in the Navy and Marine Corps ROTC program at UC Berkeley. The program is 4 years long and includes courses and weekly professional development laboratories (drill) at UC Berkeley. Students normally compete for national scholarships as high school seniors, although interested students may enroll as freshmen or sophomores and compete for scholarships based on successful participation in the program. A student whosatisfactorily completes an ROTC program and is awarded a degree from UC Davis receives an active duty commission as a Second Lieutenant in the U.S. Marine Corps or an Ensign in the U.S. Navy.

Navy option students take the following courses:

Freshman year:
NS 1  Introduction to Naval Science
NS 2  Sea Power and Maritime Affairs

Sophomore year:
NS 3  Leadership and Management
NS 10  Naval Ship Systems I
Junior year:
NS 12A Navigation and Naval Operations I
NS 12B Navigation and Naval Operations II

Senior year:
NS 401 Naval Ship Systems II
NS 412 Leadership and Ethics

In lieu of NS401, NS10, NS12A and NS12B, Marine Corps students participate in Marine Seminars and complete MA154, History of Littoral Warfare and MA20, Evolution of Warfare (or a designated equivalent).

Scholarship students are required to complete a number of other courses at Davis, including one year each of calculus, physics, and English, and one quarter each of computer science, and military history or national security policy.

Interested students should contact the Department of Naval Science at UC Berkeley at the address above to obtain information and apply.

Military Science | MSC Courses

Courses in MSC:

MSC 011—U.S. Army Leadership and Personal Development (1)
Lecture—1 hour. Prerequisite(s): Lower division standing. United States Army, its organization, customs, courtesies, and rank structure. Course surveys personal development skills needed for effective leadership such as critical thinking, time management, and health and fitness. Familiarization with the Army ROTC program. Effective: 2011 Fall Quarter.

MSC 012—Introduction to Tactical Military Leadership (1)
Lecture—1 hour. Prerequisite(s): Lower division standing. Military leadership fundamentals to include setting direction, problem-solving, presenting briefs, and using effective writing skills. Basic military tactics, orienteering and land navigation. Dimensions of leadership values, attributes, skills, and actions. Effective: 2008 Fall Quarter.

MSC 013—Introduction to Basic Military Operations (1)
Lecture—1 hour. Prerequisite(s): Lower division standing. Basic military tactical theories and their application at the individual and squad level. Military tactical operations and basic military first aid. Effective: 2008 Fall Quarter.

MSC 014A—Introduction to Military Leadership Skills (0.5)
Laboratory—2 hours. Prerequisite(s): Consent of Instructor. Lower division standing. Personal and organizational leadership skills introduced in leadership laboratory. Extensive supervised leadership experiences conducted in a military environment. Basic military skills necessary to function in a leadership role. (P/NP grading only.) Effective: 2008 Fall Quarter.

MSC 014B—Introduction to Military Leadership Skills (0.5)
Laboratory—2 hours. Prerequisite(s): Consent of Instructor. Lower division standing. Continuation of development of leadership and military skills introduced in course 14A. Emphasis on the role of the individual, the basic organizational element of the Army, the squad. Supervisory controls reduced as students gain capabilities. (P/NP grading only.) Effective: 2008 Fall Quarter.

MSC 014C—Introduction to Military Leadership Skills (0.5)
Laboratory—2 hours. Prerequisite(s): Consent of Instructor. Lower division standing. Development of skills required for promotion to junior non-commissioned officer level. Chain of command from company through individual levels. Interrelationship of squad and platoon organizations. (P/NP grading only.) Effective: 2008 Fall Quarter.

MSC 021—Military History, Study of Battles (2)
Lecture—2 hours. Prerequisite(s): MSC 022B; or Consent of Instructor. Application of the nine Principles of War to key battles in American and World history. Tactics on a strategic and operational level. Evaluation of leadership and decision-making processes of key leaders. Effective: 2008 Fall Quarter.

MSC 022A—Innovative Team Leadership (2)
Lecture—2 hours. Prerequisite(s): Lower division standing or consent of instructor. Leadership values, attributes and theories. Use of basic military skills such as land navigation and squad operations to enhance understanding of the Army. Types of military briefings. Practice in interpersonal skills. Presentation of a briefing. Effective: 2008 Fall Quarter.
MSC 022B—Foundations of Tactical Leadership (2)
Lecture—2 hours. Prerequisite(s): MSC 022A; or Consent of Instructor. Leadership of tactical teams in complex operating environment. Self-assessment of leadership style. Basic military skills: terrain analysis, patrolling and operations orders. Dynamics of adaptive leadership in the context of military operations. Effective: 2008 Fall Quarter.

MSC 024A—Individual Military Leadership Skills (0.5)
Laboratory—2 hours. Prerequisite(s): MSC 014A; MSC 014B; MSC 014C; MSC 022A (can be concurrent); or Consent of Instructor. Development and practice of personal military leadership skills in extensive supervised leadership labs. Cadets perform basic military skills, improve on troop leading procedures and lead subordinates in tactical situations. (P/NP grading only.) Effective: 2008 Fall Quarter.

MSC 024B—Individual Military Leadership Skills (0.5)
Laboratory—2 hours. Prerequisite(s): MSC 014A; MSC 014B; MSC 014C; MSC 022B (can be concurrent); or Consent of Instructor. Development and practice of personal military leadership skills in extensive supervised leadership labs. Performance of basic military skills, improvement on troop-leading procedures, leadership of subordinates in tactical situations. (P/NP grading only.) Effective: 2008 Fall Quarter.

MSC 024C—Individual Military Leadership Skills (0.5)
Laboratory—2 hours. Prerequisite(s): MSC 014A; MSC 014B; MSC 014C; MSC 021 (can be concurrent); or Consent of Instructor. Development and practice of personal military leadership skills in extensive supervised leadership labs. Begin with drill and ceremony, land navigation and individual movement techniques. (P/NP grading only.) Effective: 2008 Fall Quarter.

MSC 131—Military Leadership and Management (2)
Lecture—2 hours. Prerequisite(s): Consent of Instructor. Upper division standing. Leadership and management in organizational context. Team dynamics, leadership styles, professional ethics, development of a leadership framework. Management skills for planning, decision making, and organizing developed through definition of problems, development of courses of action, implementation of solutions. Effective: 2008 Fall Quarter.

MSC 132A—Advanced Military Operations (2)
Lecture—2 hours. Prerequisite(s): MSC 131; or Consent of Instructor. Upper division standing. Military small unit tactical theory as the basis for leadership development. Principles of war, contemporary operating environment, Geneva Law of Land Warfare, military offensive and defensive operations. Emphasis on development of critical thinking, problem solving, and communication skills. Effective: 2008 Fall Quarter.

MSC 132B—Applied Leadership (2)
Lecture—2 hours. Prerequisite(s): MSC 132A; or Consent of Instructor. Upper division standing. Military small unit tactical theory and application as basis for leadership development. Application of leadership styles and skills to complete problem-solving exercises and the development of an adaptable framework applicable to a variety of shifting environments and situations. Effective: 2008 Fall Quarter.

MSC 134A—Adaptive Tactical Leadership (0.5)
Laboratory—2 hours. Prerequisite(s): MSC 131; or Consent of Instructor. Upper division standing. Small unit tactical operations serve as the basis for enhancement of leadership performance through tactical application. Assessment of leadership attributes, skills, and actions through participation in a variety of leadership roles in problem-solving exercises. (P/NP grading only.) Effective: 2008 Fall Quarter.

MSC 134B—Adaptive Tactical Leadership (0.5)
Laboratory—2 hours. Prerequisite(s): MSC 132A; or Consent of Instructor. Upper division standing. Small unit tactical operations serve as the basis for enhancement of leadership performance through tactical application. Assessment of leadership attributes, skills, and actions through participation in a variety of leadership roles in problem-solving exercises. (P/NP grading only.) Effective: 2008 Fall Quarter.

MSC 134C—Adaptive Tactical Leadership (0.5)
Laboratory—2 hours. Prerequisite(s): MSC 132B; or Consent of Instructor. Upper division standing. Small unit tactical operations are taught, serve as basis for students exploration, development. Serve in variety of leadership roles in which leadership attributes, skills, actions are closely assessed and developed while they are faced with series of problem solving exercises. (P/NP grading only.) Effective: 2008 Fall Quarter.
MSC 141—Ethical Leadership (2)
Lecture—2 hours. Prerequisite(s): Consent of Instructor. Upper division standing. Direct influence of leaders on individual motivation and group processes. The complexities of balancing moral, legal, and ethical obligations while applying fundamental business principles in determining the best possible outcome from competing solutions. Effective: 2008 Fall Quarter.

MSC 142—Military Law (2)
Lecture—2 hours. Prerequisite(s): MSC 141; or Consent of Instructor. Upper division standing. The United States Constitution and the Military Justice System. Basic law of war, with an emphasis on issues that might arise on the battlefield or during a national emergency. Effective: 2008 Fall Quarter.

MSC 143—U.S. Army Management Systems (2)
Lecture—2 hours. Prerequisite(s): MSC 142; or Consent of Instructor. Upper division standing. Leadership and management, focusing on four management systems: planning, organizing, leading and controlling. Practical methodologies for assessing management decisions while balancing competing ethical, economic, infrastructure and future growth trade-offs. Effective: 2008 Fall Quarter.

MSC 144A—Military Training Leadership Skills (0.5)
Laboratory—2 hours. Prerequisite(s): MSC 141; or Consent of Instructor. Upper division standing. Enhancement of student leadership performance through practical application. Small unit military tactical operations as the basis for the student exploration and development. (P/NP grading only.) Effective: 2008 Fall Quarter.

MSC 144B—Military Training Leadership Skills (0.5)
Laboratory—2 hours. Prerequisite(s): MSC 142; or Consent of Instructor. Upper division standing. Enhancement of student leadership performance through practical application. Small unit military tactical operations serve as the basis for student exploration and development. (P/NP grading only.) Effective: 2008 Fall Quarter.

MSC 144C—Military Training Leadership Skills (0.5)
Laboratory—2 hours. Prerequisite(s): MSC 143; or Consent of Instructor. Upper division standing. Enhancement of student leadership performance through practical application. Small unit military tactical operations as the basis for student exploration and development. (P/NP grading only.) Effective: 2008 Fall Quarter.

MSC 191—Special Studies in Military Science (2)
Independent Study—6 hours. Prerequisite(s): MSC 131; MSC 132A; MSC 132B; MSC 141; MSC 142; MSC 143; Consent of department chair. Intensive examination of one or more special problems in military science. Possible areas of study include leadership dimensions, principles of war, air-land battle imperatives, military strategy, the operational art and professional ethics. May be repeated up to 2 time(s) when topic differs. (P/NP grading only.) Effective: 1997 Winter Quarter.

Molecular, Cellular, & Integrative Physiology (Graduate Group)

Molecular, Cellular, & Integrative Physiology (Graduate Group) | MCP Information

Julie Bossuyt, Ph.D., Chairperson of the Group

Molecular, Cellular, & Integrative Physiology (Graduate Group) | MCP Courses

Courses in MCP:

MCP 200L—Animal Cell Culture Laboratory (4)
Discussion—2 hours; Laboratory—6 hours. Prerequisite(s): Courses in undergraduate Biochemistry, Cell Biology, or General Physiology, or consent of instructor. Techniques of cell culture, with emphases on cell physiology and the actions of drugs and toxicants on cultured somatic cells. Design, performance and interpretation of experiments with animal cells in vitro. Effective: 2003 Fall Quarter.

MCP 210A—Advanced Physiology (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Physiology Ph.D. program, or consent of instructor. Advanced course in general principles of physiology, surveying homeostasis, cellular and selected topics, and neurophysiology. (Same course as HPH 210A.) Effective: 2003 Fall Quarter.

MCP 210A—Advanced Physiology (5) Review all entries
Discussion—2 hours; Lecture—3 hours. Prerequisite(s): Physiology Ph.D. program or consent of instructor. MCP 210A (or HPH 210A) is a required core course for the MCIP graduate group; course contains thermodynamics discussions and requires substantial math and physics background in order to succeed; approval for registering from Co-IRs is required to get CRN. Advanced course on fundamental principles of cell physiology, transport physiology, signal transduction, physiology of excitable cells, and muscle physiology. (Same course as HPH 210A.) Effective: 2019 Winter Quarter.

MCP 210B—Advanced Physiology (6)
Discussion—1 hour; Lecture—5 hours. Prerequisite(s): Physiology Ph.D. program, or consent of instructor. Advanced course in general principles of physiology, surveying homeostasis, cellular and selected topics, and neurophysiology. Effective: 2003 Fall Quarter.

MCP 210C—Advanced Physiology (5)
Discussion—1 hour; Lecture—5 hours. Prerequisite(s): Doctoral student in the Molecular, Integrative and Comparative Physiology Graduate Group, or consent of instructor. Graduate level instruction in the general principles of physiology and the neural and humoral control of the cardiovascular, renal, respiratory, gastrointestinal, sensory, musculoskeletal, and reproductive systems. Effective: 2008 Spring Quarter.

MCP 210L—Physiology Laboratory Rotations (5)
Lecture—5 hours. Restricted to Molecular, Cellular and Integrative Physiology (MCIP) graduate students. One mandatory rotation and up-to two voluntary rotations. Students learn techniques and perform experiments related to particular research problems. At the end of the rotations students give a short talk and hand in a research paper. May be repeated up to 2 time(s). (S/U grading only.) Effective: 2014 Spring Quarter.

MCP 215—Electrophysiology Techniques and Applications (3)
Discussion—1.5 hours; Lecture—1.5 hours. Broad scope of topics in electrophysiology techniques and applications. (Same course as PHA 215.) (S/U grading only.) Effective: 2015 Spring Quarter.

MCP 216—Neurophysiology Literature (3)
Discussion—2 hours; Lecture—1 hour. Lectures covering experimental and theoretical methods in studying cell
membrane ion channels and the resulting characterization of the physiological functions and structure/function relationships of some of the most important channel types. Discussion of classical and current original papers. Effective: 2003 Fall Quarter.

**MCP 219—Muscle Growth and Development (3)**
Lecture—2 hours; Seminar—1 hour. Prerequisite(s): BIS 103; (BIS 104 or MCB 150); or Consent of Instructor. Integration of growth and development of skeletal muscle; morphology, biochemistry, neural control mechanisms, circulatory and nutritional factors. Prenatal and neonatal differentiation of fiber types. Experimental and hereditary myopathies. Effective: 2003 Fall Quarter.

**MCP 220—Biological Sciences 103, Biological Sciences 104 or Molecular and Cellular Biology 150, or consent of instructor. (3)**
Lecture—3 hours. Prerequisite(s): BIS 103; BIS 101; BIS 103; NPB 110; NPB 110L. Basic phenomena of sexual and asexual reproduction and comparisons of processes in a wide variety of animals; gamete formation, structure, and metabolism; fertilization; neuroendocrine mechanisms in maturation and reproductive cycles; behavioral aspects. Effective: 2003 Fall Quarter.

**MCP 222—Mammalian Gametogenesis and Fertilization (3)**
Lecture—3 hours. Prerequisite(s): NPB 121; Or the equivalent. Course will emphasize our current understanding of events in mammalian gametogenesis and the fertilization process. Published results, conclusions drawn from these results, and their contribution to our understanding will be discussed. Effective: 2003 Fall Quarter.

**MCP 230—Advanced Endocrinology (2)**
Lecture—2 hours. Prerequisite(s): NPB 130; Or the equivalent, and graduate standing. Focus on timely topic of endocrine research. Critical review of current literature and discussion of future research strategies in the area. May be repeated for credit when topic differs. Effective: 2003 Fall Quarter.

**MCP 231—Neuroendocrinology (3)**
Lecture—3 hours. Prerequisite(s): NPB 130; or the equivalent course in endocrinology; NPB 110 or the equivalent course in systemic physiology. Neural-endocrine interactions; neural regulation of the endocrine system, especially in relation to reproduction; the role of hormones and growth factors in sexual differentiation of the brain. Effective: 2003 Fall Quarter.

**MCP 234—Current Topics in Neurotoxicology (3)**
Lecture—3 hours. Prerequisite(s): Core courses in one of the following graduate programs: Pharmacology and Toxicology, Agricultural and Environmental Chemistry, Biochemistry and Molecular Biology, Cell and Developmental Biology, Immunology, Molecular Cellular and Integrative Physiology or Neuroscience. Restricted to upper level undergraduate students must obtain permission from the course coordinator. General principles of neurotoxicology, the cell and molecular mechanisms and health impacts of specific neurotoxicants and the contribution of neurotoxic compounds to complex neurodevelopmental disorders and neurodegenerative diseases. (Same course as ETX 234 and VMB 234.) Effective: 2010 Fall Quarter.

**MCP 242—Biological Rhythms (3)**
Lecture—2 hours; Lecture/Discussion—1 hour. Prerequisite(s): NPB 110 or the equivalent. General aspects and basic mechanisms of biological rhythms; the importance of rhythm desynchronization in areas of pharmacology and space medicine; telemetry; mathematical methods; chronometry; daily, reproductive, and annual periods; shift-work, jet lag and sleep disorders. Effective: 2003 Fall Quarter.

**MCP 255—Physiology of the Stress Response (2)**
Lecture/Discussion—2 hours. Prerequisite(s): Graduate Student Status. Definition of Stress; Physiological mechanisms of adaptation to stress; Hormonal control of the systemic stress response; Mechanisms of the cellular stress response; Discussion of current trends in stress physiology and current methods for studying the stress response; (Same course as ABG 255.) Effective: 2006 Summer Session 2.

**MCP 261A—Topics in Vision: Eyes and Retinal Mechanisms (2)**
Lecture/Discussion—2 hours. Prerequisite(s): NPB 100 or NPB 112; Or the equivalent; graduate standing. Structure and function of the visual system, with emphasis on the eye and retina, including optics, anatomy, transduction, retinal synapses, adaptation, and parallel processing. (Same course as NSC 261A and NPB 261A.) (S/U grading only.) Effective: 2004 Winter Quarter.

**MCP 261B—Topics in Vision: Systems, Psychophysics, Computational Models (2)**
Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. MCP 261A recommended. Functions of the central visual pathways and their underlying mechanisms. Recent research on aspects of anatomy, biochemistry,
electrophysiology, psychophysics, development, and genetics of the visual system. (Same course as NSC 261B and NPB 261B.) (S/U grading only.) Effective: 2004 Winter Quarter.

**MCP 261C—Topics in Vision: Clinical Vision Science (2)**
Lecture/Discussion—2 hours. Prerequisite(s): MCP 261A; MCP 261B; or Consent of Instructor. Causes and mechanistic bases of major blinding diseases. Recent research on aspects of anatomy, biochemistry, electrophysiology, psychophysics, development, and genetics of the visual system related to disease. (Same course as NSC 261C and NPB 261C.) (S/U grading only.) Effective: 2005 Spring Quarter.

**MCP 275—Neurohumoral Regulatory Mechanisms of Thermogenesis (3)**
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): BIS 104; BIS 102; and Consent of Instructor. Designed for graduate and advanced undergraduate students, this course will examine thermogenic systems in homeotherms (primarily mammals) with respect to regulation (hormonal and central nervous control) and effector mechanisms (basis of heat generation at the target cell). Effective: 2003 Fall Quarter.

**MCP 290—Seminar (1)**
Seminar—1 hour. Discussion and critical evaluation of advanced topics and current trends in research. (P/NP grading only.) Effective: 2003 Fall Quarter.

**MCP 290C—Research Conference in Physiology (1)**
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Graduate standing. Presentation and discussion of faculty and graduate student research in physiology. May be repeated for credit. (P/NP grading only.) Effective: 2003 Fall Quarter.

**MCP 291B—Seminar in Cellular Mechanisms of Adaptation (1)**
Discussion—0.5 hours; Seminar—0.5 hours. Prerequisite(s): BIS 103; NPB 100B; Consent of Instructor. Review and evaluation of current literature and research in cellular adaptations to the environment. May be repeated for credit when topic differs. (P/NP grading only.) Effective: 2003 Fall Quarter.

**MCP 291D—Research Approaches in Physiology (2)**
Seminar—2 hours. Current research in physiology. Overall design of experiments and particular research areas. (P/NP grading only.) Effective: 2003 Fall Quarter.

**MCP 293—Current Progress in Physiology (1)**
Seminar—1 hour. Prerequisite(s): Consent of Instructor. Graduate standing. Seminars presented by guest lecturers describing their current research activities. May be repeated for credit. (P/NP grading only.) Effective: 2003 Fall Quarter.

**MCP 298—Group Study (1-5)**
Variable. Effective: 2003 Fall Quarter.

**MCP 299—Research (1-12)**
Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

**MCP 300A—Pedagogical Aspects of Physiology in Higher Education (3)**
Discussion; Laboratory; Lecture. Prerequisite(s): Meet qualifications for teaching assistant in physiology. Participation as a teaching assistant for one quarter in a designated physiology course. Instruction in methods of leading discussion groups, leading laboratory sections, writing and grading quizzes, operation and use of laboratory equipment, and reading and grading laboratory reports. Course meets teaching requirements for Ph.D. program in Physiology. (P/NP grading only.) Effective: 2003 Fall Quarter.

**MCP 300B—Pedagogical Aspects of Physiology in Higher Education (3)**
Discussion; Laboratory; Lecture. Prerequisite(s): Meet qualifications for teaching assistant in physiology. Participation as a teaching assistant for one quarter in a designated physiology course. Instruction in methods of leading discussion groups, leading laboratory sections, writing and grading quizzes, operation and use of laboratory equipment, and reading and grading laboratory reports. Course meets teaching requirements for Ph.D. program in Physiology. (P/NP grading only.) Effective: 2003 Fall Quarter.

**MCP 390—The Teaching of Physiology (1)**
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Teaching Assistant assignment to a physiology lecture course. Practical experience in methods and problems of teaching physiology lecture courses. May include analyses of texts and supporting material, discussion of teaching techniques, preparing for and conducting discussion sessions, and formulation of topics and questions for examinations under supervision of instructor. May be repeated for credit. (P/NP grading only.) Effective: 2003 Fall Quarter.

The Major Program
The Bachelor of Arts degree in music provides both a broad liberal arts education and the skills necessary to explore music through its history, composition, theory, and performance. Students majoring in music may choose from three tracks in the major: (1) composition, (2) music history, theory, and ethnomusicology, or (3) performance. After a common core of courses in the lower division, students pursue their chosen track with specialized courses leading to an appropriate senior project.

All majors are expected to complete a substantial project (composition, research presentation, recital) in the senior year (Music 195). Music majors who intend to pursue graduate studies in music are encouraged to satisfy the requirements of one of the honors programs in music.

Study Abroad and the Music Major. The department encourages students to pursue a portion of their studies abroad. In close collaboration with their undergraduate advisers, students plan a course of study abroad that complements their coursework at Davis. UC Davis Music Majors have completed upper division coursework at EAP partner institutions in Australia, England, France, Germany, and Italy; Music faculty members lead summer programs in Argentina and Austria.

The Program. A fundamental grounding in music theory, music history, and performance during the first two years of study leads to more specialized study of composition, music scholarship, or performance during the last two years of undergraduate work.

Career Alternatives. Students who graduate with a B.A. in music from UC Davis have gone on to careers as composers and performers, in academia, and in the concert, media, and computing industries. Others have continued in medicine, law and business.

Foreign Language. Students contemplating graduate study in music are advised to consider pursuing foreign language study beyond the elementary level.

Diagnostic Exams are given before admission into MUS 006A-006B-006C. As an alternative MUS 003A-003B may be recommended. Diagnostic exams are also given for MUS 016A-016B-016C and 017A-017B-017C at the beginning of each year. Transfer students should take the Music 6 diagnostic exam given during the first class meetings.

Beginning and transfer students are required to take MUS 002A-002B-002C (Keyboard Competence) unless they can pass out of one or more of the classes by demonstrating proficiency through a diagnostic exam given at the beginning of each quarter. Students learn (1) four-part keyboard harmony in all major and minor keys; (2) moderate fluency with figured bass at the keyboard; (3) major and minor scales with proper fingering; (4) ability to sight read simple piano music and Bach chorales.

Student Performing Activities. The Department of Music presents more than 100 concerts each year, offering performance opportunities for both majors and non-majors in the UC Davis Symphony Orchestra, University Chorus, Concert Band and Wind Ensemble, Early Music Ensemble, Baroque Chamber Orchestra, Jazz Band, world
music ensembles (Gamelan, Samba School, Hindustani Vocal Ensemble, Korean Drumming Ensemble) and numerous chamber ensembles. There is a close relationship with the Robert and Margrit Mondavi Center for the Performing Arts, where several of the ensembles are resident.

Chamber ensembles perform frequently in the popular weekly Thursday Noon Concerts. Performance groups have collaborated with the Department of Theatre and Dance in productions of musical theater and opera. Study of instruments and voice with professional performers and teachers is required of all majors. Similar opportunities exist for qualified non-majors.

**Faculty and Facilities.** The faculty is noted for its achievements in a variety of areas. The music scholars are active in research, writing, and performance; the music of the composers is performed and recorded nationally and internationally. The journal, *19th-Century Music*, is housed in the department.

The regular faculty is joined throughout the year by visiting Artists-in-Residence, distinguished performers who give public concerts and lectures and who work with students informally.

The Empyrean Ensemble, a professional new music ensemble, is in residence at UC Davis, where it performs concerts of new music and annually premieres the work of student composers.

The department’s facilities include a collection of Renaissance, Baroque, and modern instruments, along with non-western instruments including a Sundanese gamelan. The arts quadrangle houses the Computer and Electronic Music Studio, practice and rehearsal rooms, and an music library with well over 12,000 CDs, several hundred videos and a collection of music reference materials. The newly-opened Ann E. Pitzer Center, next door to the Music Building, features a 399-seat state-of-the-art concert hall, six practice rooms, and four large teaching/rehearsal studios. Scores and music monographs are housed in the Peter J. Shields Library, adjacent to the Music Building. A partnership of campus libraries affords online access to more than 100,000 tracks of classical and world music by streaming audio.

**Honors.** A student becomes eligible for graduation with honors by meeting the minimum GPA and course requirements established by the College of Letters and Science. To qualify for high or highest honors, students must also complete the Music Department honors program with a GPA of 3.500 or above and write a thesis or submit a portfolio that meets the criteria for high honors or highest honors. Students apply to participate in the department honors program during the latter part of their junior year. Admission to the program is based on GPA, a thesis proposal, examples of previous writing, and the recommendation of a faculty member who is willing to sponsor the student’s project. Students who anticipate seeking admission to the honors program are urged to complete at least one offering of MUS 121 or 122 before the end of their junior year. Interested students are urged to consult with faculty in their field early in their junior year.

**Major Advisors.** A. Triest, J. McGilvray, B. Olivier

A student becomes eligible for graduation with honors by meeting the minimum GPA and course requirements established by the College of Letters and Science. To qualify for high or highest honors, students must also complete the Music Department honors program with a GPA of 3.500 or above and write a thesis or submit a portfolio that meets the criteria for high honors or highest honors. Students apply to participate in the department honors program during the latter part of their junior year. Admission to the program is based on GPA, a thesis proposal, examples of previous writing, and the recommendation of a faculty member who is willing to sponsor the student's project. Students who anticipate seeking admission to the honors program are urged to complete at least one offering of MUS 121 or MUS 122 before the end of their junior year. Interested students are urged to consult with faculty in their field early in their junior year.

The Major Program
The Bachelor of Arts degree in music provides both a broad liberal arts education and the skills necessary to explore music through its history, composition, theory, and performance. Students majoring in music may choose from three tracks in the major: (1) composition, (2) music history, theory, and ethnomusicology, or (3) performance. After a common core of courses in the lower division, students pursue their chosen track with specialized courses leading to an appropriate senior project.

All majors are expected to complete a substantial project (composition, research presentation, recital) in the senior year (Music 195). Music majors who intend to pursue graduate studies in music are encouraged to satisfy the requirements of one of the honors programs in music.

Study Abroad and the Music Major. The department encourages students to pursue a portion of their studies abroad. In close collaboration with their undergraduate advisers, students plan a course of study abroad that complements their coursework at Davis. UC Davis Music Majors have completed upper division coursework at EAP partner institutions in Australia, England, France, Germany, and Italy; Music faculty members lead summer programs in Argentina and Austria.

The Program. A fundamental grounding in music theory, music history, and performance during the first two years of study leads to more specialized study of composition, music scholarship, or performance during the last two years of undergraduate work.

Career Alternatives. Students who graduate with a B.A. in music from UC Davis have gone on to careers as composers and performers, in academia, and in the concert, media, and computing industries. Others have continued in medicine, law and business.

Foreign Language. Students contemplating graduate study in music are advised to consider pursuing foreign language study beyond the elementary level.

Diagnostic Exams are given before admission into MUS 006A-006B-006C. As an alternative MUS 003A-003B may be recommended. Diagnostic exams are also given for MUS 016A-016B-016C and 017A-017B-017C at the beginning of each year. Transfer students should take the Music 6 diagnostic exam given during the first class meetings.

Beginning and transfer students are required to take MUS 002A-002B-002C (Keyboard Competence) unless they can pass out of one or more of the classes by demonstrating proficiency through a diagnostic exam given at the beginning of each quarter. Students learn (1) four-part keyboard harmony in all major and minor keys; (2) moderate fluency with figured bass at the keyboard; (3) major and minor scales with proper fingering; (4) ability to sight read simple piano music and Bach chorales.
Student Performing Activities. The Department of Music presents more than 100 concerts each year, offering performance opportunities for both majors and non-majors in the UC Davis Symphony Orchestra, University Chorus, Concert Band and Wind Ensemble, Early Music Ensemble, Baroque Chamber Orchestra, Jazz Band, world music ensembles (Gamelan, Samba School, Hindustani Vocal Ensemble, Korean Drumming Ensemble) and numerous chamber ensembles. There is a close relationship with the Robert and Margrit Mondavi Center for the Performing Arts, where several of the ensembles are resident.

Chamber ensembles perform frequently in the popular weekly Thursday Noon Concerts. Performance groups have collaborated with the Department of Theatre and Dance in productions of musical theater and opera. Study of instruments and voice with professional performers and teachers is required of all majors. Similar opportunities exist for qualified non-majors.

Faculty and Facilities. The faculty is noted for its achievements in a variety of areas. The music scholars are active in research, writing, and performance; the music of the composers is performed and recorded nationally and internationally. The journal, 19th-Century Music, is housed in the department.

The regular faculty is joined throughout the year by visiting Artists-in-Residence, distinguished performers who give public concerts and lectures and who work with students informally.

The Empyrean Ensemble, a professional ensemble, is in residence at UC Davis, where it performs concerts of new music annually premieres the work of student composers.

The department's facilities include a collection of Renaissance, Baroque, and modern instruments, along with non-western instruments including a Sundanese gamelan. The arts quadrangle houses the Computer and Electronic Music Studio, practice and rehearsal rooms, and an music library with well over 12,000 CDs, several hundred videos and a collection of music reference materials. The newly-opened Ann E. Pitzer Center, next door to the Music Building, features a 399-seat state-of-the-art concert hall, six practice rooms, and four large teaching/rehearsal studios. Scores and music monographs are housed in the Peter J. Shields Library, adjacent to the Music Building. A partnership of campus libraries affords online access to more than 100,000 tracks of classical and world music by streaming audio.

Honors. A student becomes eligible for graduation with honors by meeting the minimum GPA and course requirements established by the College of Letters and Science. To qualify for high or highest honors, students must also complete the Music Department honors program with a GPA of 3.500 or above and write a thesis or submit a portfolio that meets the criteria for high honors or highest honors. Students apply to participate in the department honors program during the latter part of their junior year. Admission to the program is based on GPA, a thesis proposal, examples of previous writing, and the recommendation of a faculty member who is willing to sponsor the student's project. Students who anticipate seeking admission to the honors program are urged to complete at least one offering of MUS 121 or 122 before the end of their junior year. Interested students are urged to consult with faculty in their field early in their junior year.

Major Advisors. A. Triest, J. McGilvray, B. Olivier

Music | MUS Courses

Courses in MUS:

**MUS 002A—Keyboard Competence, Part 1 (2)**
Performance Instruction—2 hours. Prerequisite(s): MUS 006A (can be concurrent); MUS 016A (can be concurrent); Consent of Instructor. MUS 006A and MUS 016A required concurrently. Training to meet the minimum piano requirements for the major in music. Scales and simple harmonic progressions in twelve keys, both major and minor. (P/NP grading only.) GE credit: AH. Effective: 2016 Spring Quarter.

**MUS 002B—Keyboard Competence, Part 2 (2)**
Performance Instruction—2 hours. Prerequisite(s): MUS 002A; (MUS 006B (can be concurrent), MUS 016B (can be concurrent)); Consent of Instructor. MUS 006B and MUS 016B required concurrently. Completion of MUS 002A or demonstration of required keyboard proficiency level on diagnostic exam. Training to meet the minimum piano requirements for the major in music. Harmonic progressions, modulations and score reading at the piano. (P/NP grading only.) GE credit: AH. Effective: 2016 Spring Quarter.

**MUS 002C—Keyboard Competence, Part 3 (2)**
Performance Instruction—2 hours. Prerequisite(s): MUS 002B; (MUS 006C (can be concurrent), MUS 016C (can be concurrent)); Consent of Instructor. MUS 006C and MUS 016C required concurrently; completion of MUS 002B or demonstration of required keyboard proficiency level on diagnostic exam. Training to meet the minimum piano requirements for the major in music. Harmonic progressions, figured bass realization, sight reading and keyboard repertory. (P/NP grading only.) GE credit: AH. Effective: 2016 Spring Quarter.

**MUS 003A—Introduction to Music Theory, Part 1 (4)**
Lecture—1 hour; Recitation—3 hours. Fundamentals of music theory, ear-training, harmony, counterpoint, and analysis directed toward the development of listening and writing techniques. Intended for the general student. GE credit: AH. Effective: 2008 Fall Quarter.

**MUS 003B—Introduction to Music Theory, Part 2 (4)**
Lecture—1 hour; Recitation—3 hours. Prerequisite(s): MUS 003A; or Consent of Instructor. Continuation of course 3A. Development of melodic and harmonic writing skills. Basic analysis training. Intended for the general student. GE credit: AH. Effective: 2016 Spring Quarter.

**MUS 006A—Elementary Theory, Part 1 (3)**
Lecture—3 hours. Prerequisite(s): MUS 002A (can be concurrent); MUS 016A (can be concurrent); Courses required concurrently. Development of music writing and listening skills through the study of music fundamentals, species counterpoint, harmony, analysis of repertory. Intended primarily for music majors. GE credit: AH. Effective: 2016 Fall Quarter.
MUS 006B—Elementary Theory, Part 2 (3)
Lecture—3 hours. Prerequisite(s): MUS 002B (can be concurrent); MUS 016B (can be concurrent); Courses required concurrently. Completion of MUS 006A or demonstration of required proficiency level on diagnostic exam. Continuation of course 6A. GE credit: AH. Effective: 2016 Fall Quarter.

MUS 006C—Elementary Theory, Part 3 (3)
Lecture—3 hours. Prerequisite(s): MUS 002C (can be concurrent); MUS 016C (can be concurrent); Courses 002C and 016C required concurrently. Completion of MUS 006B or demonstration of required proficiency level on diagnostic exam. Continuation of courses 6A-B. GE credit: AH. Effective: 2016 Fall Quarter.

MUS 007A—Intermediate Theory, Part 1 (3)
Lecture—3 hours. Prerequisite(s): MUS 006C; MUS 017A (can be concurrent) Homophonic music of the Classical era with a focus on analysis of music by Haydn, Mozart, and Beethoven. Composition of pieces in the homophonic forms such as minuet and trio, theme and variations, rondo and sonata. Intended for music majors. GE credit: AH. Effective: 2016 Fall Quarter.

MUS 007B—Intermediate Theory, Part 2 (3)
Lecture—3 hours. Prerequisite(s): MUS 007A; MUS 017B (can be concurrent) Nineteenth-century harmony and voice leading through the music of the Romantic era. Focus on analysis of music by Chopin, Schumann, Brahms, Wagner, and Wolf. Composition of character pieces and songs. Intended for Music majors. GE credit: AH. Effective: 2016 Fall Quarter.

MUS 007C—Intermediate Theory, Part 3 (3)
Lecture—3 hours. Prerequisite(s): MUS 007B; MUS 017C (can be concurrent) Music of the first thirty years of the twentieth century and various analytical tools pertaining to it. Works of Debussy, Stravinsky, Schoenberg, Berg, and others. Composition of small pieces for solo instruments, voice and piano. Intended for music majors. GE credit: AH. Effective: 2016 Fall Quarter.

MUS 010—Introduction to Musical Literature (4)
Discussion—1 hour; Lecture—3 hours. Introduction to composers and major styles of Western music. Lectures, listening sections, and selected readings. For non-majors. GE credit: AH, VL, WC. Effective: 2018 Spring Quarter.

MUS 011—Musics of the World (4)
Lecture—3 hours; Listening—1 hour. Survey of selected art, folk, and popular music cultures from different parts of the world. Emphasis on understanding relationship of musical style, aesthetic principles, and performance practice to wider cultural contexts. GE credit: AH, VL, WC. Effective: 2008 Fall Quarter.

MUS 016A—Elementary Musicianship, Part 1 (2)
Lecture/Lab—2 hours. Prerequisite(s): MUS 002A (can be concurrent); MUS 006A (can be concurrent); MUS 002A and MUS 006A required concurrently. Melodic, rhythmic, and harmonic materials of Western music. Includes sight singing, explanations, drills, melodic/rhythmic/harmonic dictations, and listening analysis. GE credit: AH. Effective: 2016 Spring Quarter.

MUS 016B—Elementary Musicianship, Part 2 (2)
Lecture/Lab—2 hours. Prerequisite(s): MUS 016A; (MUS 002B (can be concurrent), MUS 006B (can be concurrent)); MUS 002B and MUS 006B required concurrently. Completion of MUS 016A or demonstration of required proficiency level on diagnostic exam. Melodic, rhythmic, and harmonic materials of Western music. Includes sight singing, explanations, drills, melodic/rhythmic/harmonic dictations, and listening analysis. GE credit: AH. Effective: 2016 Spring Quarter.

MUS 016C—Elementary Musicianship, Part 3 (2)
Lecture/Lab—2 hours. Prerequisite(s): MUS 016B; (MUS 002C (can be concurrent), MUS 006C (can be concurrent)); MUS 002C and MUS 006C required concurrently. Completion of MUS 016B or demonstration of required proficiency level on diagnostic exam. Melodic, rhythmic, and harmonic materials of Western music. Includes sight singing, explanations, drills, melodic/rhythmic/harmonic dictations, and listening analysis. GE credit: AH. Effective: 2016 Spring Quarter.

MUS 017A—Intermediate Musicianship, Part 1 (2)
Lecture/Lab—2 hours. Prerequisite(s): MUS 016C; MUS 007A (can be concurrent); Or demonstrate required proficiency level on diagnostic exam. Melodic, rhythmic, and harmonic materials of Western music. Includes sight singing, explanations, drills, melodic/rhythmic/harmonic dictations, and listening analysis. GE credit: AH. Effective: 2016 Fall Quarter.
MUS 017B—Intermediate Musicianship, Part 2 (2)
Lecture/Lab—2 hours. Prerequisite(s): MUS 017A; (MUS 007B (can be concurrent); MUS 007B required concurrently. Completion of MUS 017A or demonstration of required proficiency level on diagnostic exam. Melodic, rhythmic, and harmonic materials of Western music. Includes sight singing, explanations, drills, melodic/rhythmic/harmonic dictations, and listening analysis. GE credit: AH. Effective: 2017 Winter Quarter.

MUS 017C—Intermediate Musicianship, Part 3 (2)
Lecture/Lab—2 hours. Prerequisite(s): MUS 017B; Completion of MUS 017B or demonstration of required proficiency level on diagnostic exam; MUS 007C required concurrently. The melodic, rhythmic, and harmonic materials of Western music. Includes sight singing, explanations, drills, melodic/rhythmic/harmonic dictations, and listening analysis. GE credit: AH. Effective: 2006 Fall Quarter.

MUS 024A—Introduction to the History of Music I (3)
Lecture—3 hours. Prerequisite(s): MUS 006A (can be concurrent); or Consent of Instructor. History of music from the late Baroque to Beethoven. Intended primarily for majors in music. GE credit: AH, VL, WE. Effective: 2016 Spring Quarter.

MUS 024B—Introduction to the History of Music II (3)
Lecture—3 hours. Prerequisite(s): MUS 024A; or Consent of Instructor. History of music from the Romantic Period to the nineteenth century. Intended primarily for majors in Music. GE credit: AH, VL, WE. Effective: 2016 Spring Quarter.

MUS 024C—Introduction to the History of Music III (3)
Lecture—3 hours. Prerequisite(s): MUS 024B; or Consent of Instructor. History of music of the 20th century. Intended primarily for majors in music. GE credit: AH, VL, WE. Effective: 2016 Spring Quarter.

MUS 028—Introduction to African American Music (4)
Discussion—1 hour; Lecture/Discussion—3 hours; Listening; Project (Term Project). Survey of African American music, such as spirituals, blues, ragtime, jazz, theater, gospel, R&B, rap, and art music. Emphasis on historical and sociocultural contexts, as well as African roots. GE credit: ACGH, AH, DD, VL, WE. Effective: 2011 Fall Quarter.

MUS 098—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study. (P/NP grading only.) GE credit: AH. Effective: 2016 Spring Quarter.

MUS 099—Special Study for Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. Special study for undergraduates. (P/NP grading only.) GE credit: AH. Effective: 2016 Spring Quarter.

MUS 101A—Advanced Theory, Part 1 (4)
Lecture—3 hours; Lecture/Lab—1 hour. Prerequisite(s): MUS 007C Twentieth-century music from 1930 through 1950 and the various analytical tools pertaining to it. Works of Copland, Sessions, Schoenberg, Bartók, and Stravinsky. Composition of small pieces for piano and voice. GE credit: AH. Effective: 2017 Winter Quarter.

MUS 101B—Advanced Theory, Part 2 (4)
Lecture—3 hours; Lecture/Lab—1 hour. Prerequisite(s): MUS 101A Music from 1950 to the present and the analytical tools pertaining to it. Works of Babbitt, Carter, Dallapiccola, Ligeti, Messiaen, Reich and others. Composition of small pieces for ensemble. GE credit: AH. Effective: 2016 Spring Quarter.

MUS 102—Tonal Counterpoint (4)
Lecture—3 hours; Practice—1 hour. Prerequisite(s): MUS 006C; or Consent of Instructor. Imitative tonal counterpoint with an analytical focus on the Two-Part Inventions and fugues from the The Well-Tempered Klavier by J. S. Bach. Composition of exercises and short pieces using contrapuntal techniques. Intended for music majors. GE credit: AH. Effective: 2017 Winter Quarter.

MUS 103—Workshop in Composition (3)
Workshop—3 hours. Prerequisite(s): MUS 006C; or Consent of Instructor. Workshop in musical composition for undergraduates who are interested in pursuing serious compositional studies and intending to follow the composition track of the major. Course will explore the techniques and materials of musical composition. May be repeated for credit. GE credit: AH. Effective: 2016 Spring Quarter.

MUS 105—History and Analysis of Jazz (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MUS 003A or MUS 010 or MUS 028; or Consent of Instructor.
Jazz and the evolution of jazz styles in historical and cultural context. For non-majors. GE credit: ACGH, AH, DD, WE. Effective: 2017 Winter Quarter.

**MUS 105—History & Analysis of Jazz (4)** [Review all entries]
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MUS 003A or MUS 006A or MUS 010 or MUS 011 or MUS 028; or Consent of Instructor. Jazz and the evolution of jazz styles in historical and cultural context. For non-majors. GE credit: ACGH, AH, DD, WE. Effective: 2017 Winter Quarter.

**MUS 106—History of Rock Music (4)** [Review all entries]
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MUS 003A or MUS 010 or MUS 028; or Consent of Instructor. Rock and the evolution of rock styles in historical and cultural context. For non-majors. GE credit: ACGH, AH, VL, WE. Effective: 2017 Winter Quarter.

**MUS 107A—Computer and Electronic Music (3)** [Review all entries]
Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): Consent of Instructor. Limited enrollment. Studies in electronic and computer music composition. The principles and procedures of composition in various electronic media are explored through compositional exercises. Limited enrollment. GE credit: AH. Effective: 2016 Spring Quarter.

**MUS 107A—Introduction to Electronic Music (4)** [Review all entries]

**MUS 107B—Handmade Electronic Music (4)** [Review all entries]
Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): MUS 107A; Consent of Instructor. Hacking, bending, and creating electronic circuits to make sound. Learning to read circuit diagrams, to build prototypes, and to solder components together. Repertoire study. GE credit: AH. Effective: 2018 Winter Quarter.

**MUS 108A—Orchestration (2)**
Lecture—2 hours. Prerequisite(s): MUS 006C; or Consent of Instructor. Techniques of orchestration from study of basic instrumental techniques to analysis of orchestral scores and scoring for various instrumental combinations. GE credit: AH, VL. Effective: 2016 Spring Quarter.

**MUS 108B—Orchestration (2)**
Lecture—2 hours. Prerequisite(s): MUS 108A; or Consent of Instructor. Techniques of orchestration from study of basic instrumental techniques to analysis of orchestral scores and scoring for various instrumental combinations. GE credit: AH, VL. Effective: 2016 Spring Quarter.

**MUS 110A—The Music of a Major Composer: Beethoven (4)** [Review all entries]
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MUS 010 or MUS 003A; or Consent of Instructor. Work of Beethoven will be studied in the context of his time and his contemporaries. Lectures, discussion/guided listening sections, and selected readings. For non-majors. GE credit: AH, VL, WC, WE. Effective: 2016 Spring Quarter.

**MUS 110A—Music of a Major Composer: Beethoven (4)** [Review all entries]
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MUS 003A or MUS 006A or MUS 010; or Consent of Instructor. Work of Beethoven will be studied in the context of his time and his contemporaries. Lectures, discussion/guided listening sections, and selected readings. For non-majors. GE credit: AH, VL, WC, WE. Effective: 2019 Fall Quarter.

**MUS 110B—The Music of a Major Composer: Stravinsky (4)** [Review all entries]
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MUS 010 or MUS 003A; or Consent of Instructor. Work of Stravinsky will be studied in the context of his time and his contemporaries. Lectures, discussion/guided listening sections, and selected readings. For non-majors. GE credit: AH, VL, WC, WE. Effective: 2016 Spring Quarter.
MUS 110B—Music of a Major Composer: Stravinsky (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MUS 003A or MUS 006A or MUS 010; or Consent of Instructor. Work of Stravinsky will be studied in the context of his time and his contemporaries. Lectures, discussion/guided listening sections, and selected readings. For non-majors. GE credit: AH, VL, WC, WE. Effective: 2019 Fall Quarter.

MUS 110C—Music of a Major Composer: Bach (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MUS 010 or MUS 003A; or Consent of Instructor. Work of Bach will be studied in the context of his time and his contemporaries. Lectures, discussion/guided listening sections, and selected readings. For non-majors. GE credit: AH, VL, WC, WE. Effective: 2016 Spring Quarter.

MUS 110C—Music of a Major Composer: Bach (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MUS 003A or MUS 006A or MUS 010; or Consent of Instructor. Work of Bach will be studied in the context of his time and his contemporaries. Lectures, discussion/guided listening sections, and selected readings. For non-majors. GE credit: AH, VL, WC, WE. Effective: 2019 Fall Quarter.

MUS 110D—The Music of a Major Composer: Mozart (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MUS 010 or MUS 003A; or Consent of Instructor. Work of Mozart will be studied in the context of his time and his contemporaries. Lectures, discussion/guided listening sections, and selected readings. For non-majors. GE credit: AH, VL, WC, WE. Effective: 2016 Spring Quarter.

MUS 110D—Music of a Major Composer: Mozart (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MUS 003A or MUS 006A or MUS 010; or Consent of Instructor. Work of Mozart will be studied in the context of his time and his contemporaries. Lectures, discussion/guided listening sections, and selected readings. For non-majors. GE credit: AH, VL, WC, WE. Effective: 2019 Fall Quarter.

MUS 110E—The Music of a Major Composer: Haydn (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MUS 010 or MUS 003A; or Consent of Instructor. Work of Haydn in the context of his time and his contemporaries. Lectures, discussion/guided listening sections, and selected readings. For non-majors. GE credit: AH, VL, WC, WE. Effective: 2016 Spring Quarter.

MUS 110E—Music of a Major Composer: Haydn (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MUS 003A or MUS 006A or MUS 010; or Consent of Instructor. Work of Haydn in the context of his time and his contemporaries. Lectures, discussion/guided listening sections, and selected readings. For non-majors. GE credit: AH, VL, WC, WE. Effective: 2019 Fall Quarter.

MUS 110F—American Masters (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MUS 010 or MUS 003A; or Consent of Instructor. Overview of American concert music by master composers from Charles Ives to the present. Lectures, discussion/guided listening sections, and selected readings. For non-majors. GE credit: ACGH, AH, DD, VL, WE. Effective: 2016 Spring Quarter.

MUS 110F—American Masters (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MUS 003A or MUS 006A or MUS 010 or MUS 011 or MUS 028; or Consent of Instructor. Overview of American concert music by master composers from Charles Ives to the present. Lectures, discussion/guided listening sections, and selected readings. For non-majors. GE credit: ACGH, AH, DD, VL, WE. Effective: 2019 Fall Quarter.

MUS 110G—Music of a Major Composer: Handel (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MUS 010 or MUS 003A; or Consent of Instructor. Work of Handel in the context of his time and his contemporaries. Lectures, discussion/guided listening sections, and selected readings. For non-majors. GE credit: AH, VL, WC, WE. Effective: 2016 Spring Quarter.

MUS 110G—Music of a Major Composer: Handel (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MUS 003A or MUS 006A or MUS 010; or Consent of Instructor. Work of Handel in the context of his time and his contemporaries. Lectures, discussion/guided listening sections, and selected readings. For non-majors. GE credit: AH, VL, WC, WE. Effective: 2019 Fall Quarter.

MUS 112A—Jazz Fundamentals (2)
Lecture/Lab—2 hours. Prerequisite(s): MUS 003A C- or better; or Consent of Instructor. Concurrent enrollment with MUS 140 or MUS 146 required. Fundamentals of Jazz music theory, ear training, harmony and composition
techniques. Designed to complement participation in Jazz Combo or Jazz Band. First course of a three course sequence. GE credit: AH. Effective: 2017 Winter Quarter.

**MUS 112B—Jazz Theory (2)**
Lecture/Lab—2 hours. Prerequisite(s): MUS 112A C- or better; Consent of Instructor. Concurrent enrollment in MUS 140 or MUS 146 required. Intermediate level Jazz music theory, ear training, harmony, and composition techniques including improvisation. Designed to complement participation in Jazz Combo or Jazz Band. Second course of a sequence. GE credit: AH. Effective: 2017 Winter Quarter.

**MUS 112C—Jazz Composition (2)**
Lecture/Lab—2 hours. Prerequisite(s): MUS 112B C- or better; Consent of Instructor. Concurrent enrollment in MUS 140 required. Jazz compositions and arranging in different styles using techniques of Jazz theory, harmony and improvisation. Third course of a sequence. GE credit: AH. Effective: 2017 Winter Quarter.

**MUS 113—Introduction to Conducting (2)**
Lecture—1 hour; Performance Instruction—1 hour. Prerequisite(s): MUS 006C; or Consent of Instructor. Principles and techniques of conducting as they apply to both choral and instrumental ensembles. GE credit: AH. Effective: 2016 Spring Quarter.

**MUS 114—Intermediate Conducting (2)**
Lecture—1 hour; Performance Instruction—1 hour. Prerequisite(s): MUS 113; or Consent of Instructor. Intermediate conducting with a continued focus on principles and techniques as they apply to both choral and instrumental ensembles. GE credit: AH. Effective: 2016 Spring Quarter.

**MUS 115—History of Film Music (4)**
Film Viewing—3 hours; Lecture—3 hours. Prerequisite(s): MUS 003A or MUS 010; or Consent of Instructor. Film music from silent films to movies of the past decade. How music supports and shapes film narrative and structure. Use of jazz, rock and classical music in film. GE credit: AH, VL, WE. Effective: 2016 Spring Quarter.

**MUS 116—Introduction to the Music of The Beatles (4)**
Lecture—3 hours; Listening—1 hour. Prerequisite(s): MUS 003A or MUS 010; or Consent of Instructor. Survey of music of The Beatles, focusing on the songs of Lennon and McCartney. Emphasis on understanding their evolution as musicians, composers and cultural figures. Discussion of their musical influences in wider cultural contexts. GE credit: AH, VL, WC. Effective: 2016 Spring Quarter.

**MUS 117—The Broadway Musical (4)**
Discussion—1 hour; Lecture—3 hours. Exploration of a variety of Broadway and film musicals from different time periods, and how musicals reflect and help create social reality, and the different aspects of the creative process as manifested through music, dance, scenery, and acting. GE credit: AH, DD, VL. Effective: 2019 Winter Quarter.

**MUS 121—Topics in Music Scholarship (4)**
Seminar—4 hours. Prerequisite(s): MUS 006C; MUS 024C; or Consent of Instructor. Sources and problems of a historical period or musical style selected by the instructor and announced in advance. May be repeated for credit. May be repeated for credit. GE credit: AH, OL. Effective: 2016 Spring Quarter.

**MUS 122—Topics in Analysis and Theory (4)**
Seminar—4 hours. Prerequisite(s): MUS 006C; MUS 024C; or Consent of Instructor. Analysis of works of a composer or musical style selected by the instructor and announced in advance. Consideration of theoretical issues. May be repeated for credit. May be repeated for credit. GE credit: AH, OL. Effective: 2016 Spring Quarter.

**MUS 123—Music as Culture (3)**
Lecture/Discussion—3 hours. Prerequisite(s): MUS 024C; or Consent of Instructor. Introduction to the study of music in cross-cultural perspective. Basic theories and frameworks of ethnomusicology; in-depth case studies of three
musical traditions from around the world. Intended for music majors. GE credit: AH, WC, WE. Effective: 2017 Winter Quarter.

MUS 124A—History of Western Music: Middle Ages to 1600 (3)
Lecture—3 hours. Prerequisite(s): MUS 024C; or Consent of Instructor. Historical survey of composers and musical styles from the Middle Ages to the beginning of the 17th century. GE credit: AH, VL, WE. Effective: 2016 Spring Quarter.

MUS 124B—History of Western Music: 1600-1750 (3)
Lecture—3 hours. Prerequisite(s): MUS 124A; or Consent of Instructor. Historical survey of composers and musical styles from the late 1500s to the mid-18th century. GE credit: AH, VL, WE. Effective: 2016 Spring Quarter.

MUS 126—American Music (4)
Lecture—3 hours; Listening—1 hour. Prerequisite(s): MUS 010 or MUS 003A; or Consent of Instructor. Introductory survey of American musics, including Native American music, Hispanic polyphony, New England psalmody, and selected 20th-century composers and styles. GE credit: ACGH, AH, DD, WE. Effective: 2016 Spring Quarter.

MUS 129A—Musics of the Americas (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Consent of Instructor. Survey of music cultures from North, Central, and South America, including the Caribbean, with emphasis on the role of music in society and on the elements of music (instruments, theory, genres and form, etc.). Introduction to ethnomusicological theory, methods, approaches. GE credit: AH, DD, VL, WC, WE. Effective: 2019 Fall Quarter.
Survey of music cultures from Japan, China, Korea, Vietnam, and Indonesia, with special emphasis on the role of music in society and on the elements of music (instruments, theory, genres and form, etc.). Introduction to ethnomusicological theory, methods, approaches. GE credit: AH, VL, WC, WE. Effective: 2016 Spring Quarter.

MUS 129C—Musics of East & Southeast Asia (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MUS 003A or MUS 006A or MUS 010 or MUS 011 or MUS 028; or Consent of Instructor. Survey of music cultures from Japan, China, Korea, Vietnam, and Indonesia, with special emphasis on the role of music in society and on the elements of music (instruments, theory, genres and form, etc.). Introduction to ethnomusicological theory, methods, approaches. GE credit: AH, VL, WC, WE. Effective: 2019 Fall Quarter.

MUS 129D—Folk Musics of Europe (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MUS 003A or MUS 006A or MUS 010 or MUS 011 or MUS 028; or Consent of Instructor. Survey of folk musics from all of Europe, with emphasis on the role of music in society and on the elements of music (instruments, genres, form, etc.). Introduction to ethnomusicological theory, methods, approaches. GE credit: AH, VL, WC, WE. Effective: 2016 Spring Quarter.

MUS 130A—Applied Study of Music: Advanced; Voice (1)
Performance Instruction—1 hour. Prerequisite(s): Consent of Instructor. Admission by audition. Class instruction, arranged by section; Voice. Offered as demand indicates. May be repeated for credit. Effective: 2016 Spring Quarter.

MUS 130B—Applied Study of Music: Advanced; Piano (1)
Performance Instruction—1 hour. Prerequisite(s): Consent of Instructor. Admission by audition. Class instruction, arranged by section; Piano. Offered as demand indicates. May be repeated for credit. Effective: 2016 Spring Quarter.

MUS 130C—Applied Study of Music: Advanced; Harpsichord (1)
Performance Instruction—1 hour. Prerequisite(s): Consent of Instructor. Admission by audition. Class instruction, arranged by section; Harpsichord. Offered as demand indicates. May be repeated for credit. Effective: 2016 Spring Quarter.

MUS 130D—Applied Study of Music: Advanced; Organ (1)
Performance Instruction—1 hour. Prerequisite(s): Consent of Instructor. Admission by audition. Class instruction, arranged by section; Organ. Offered as demand indicates. May be repeated for credit. Effective: 2016 Spring Quarter.

MUS 130E—Applied Study of Music: Advanced; Violin (1)
Performance Instruction—1 hour. Prerequisite(s): Consent of Instructor. Admission by audition. Class instruction, arranged by section; Violin. Offered as demand indicates. May be repeated for credit. Effective: 2016 Spring Quarter.

MUS 130F—Applied Study of Music: Advanced; Viola (1)
Performance Instruction—1 hour. Prerequisite(s): Consent of Instructor. Admission by audition. Class instruction, arranged by section; Viola. Offered as demand indicates. May be repeated for credit. Effective: 2016 Spring Quarter.

MUS 130G—Applied Study of Music: Advanced; Cello (1)
Performance Instruction—1 hour. Prerequisite(s): Consent of Instructor. Admission by audition. Class instruction, arranged by section; Cello. Offered as demand indicates. May be repeated for credit. Effective: 2016 Spring Quarter.

MUS 130H—Applied Study of Music: Advanced; Double Bass (1)
Performance Instruction—1 hour. Prerequisite(s): Consent of Instructor. Admission by audition. Class instruction, arranged by section; Double Bass. Offered as demand indicates. May be repeated for credit. Effective: 2016 Spring Quarter.
MUS 130I—Applied Study of Music: Advanced; Flute (1)
Performance Instruction—1 hour. Prerequisite(s): Consent of Instructor. Admission by audition. Class instruction, arranged by section; Flute. Offered as demand indicates. May be repeated for credit. Effective: 2016 Spring Quarter.

MUS 130J—Applied Study of Music: Advanced; Oboe (1)
Performance Instruction—1 hour. Prerequisite(s): Consent of Instructor. Admission by audition. Class instruction, arranged by section; Oboe. Offered as demand indicates. May be repeated for credit. Effective: 2016 Spring Quarter.

MUS 130K—Applied Study of Music: Advanced; Clarinet (1)
Performance Instruction—1 hour. Prerequisite(s): Consent of Instructor. Admission by audition. Class instruction, arranged by section; Clarinet. Offered as demand indicates. May be repeated for credit. Effective: 2016 Spring Quarter.

MUS 130L—Applied Study of Music: Advanced; Bassoon (1)
Performance Instruction—1 hour. Prerequisite(s): Consent of Instructor. Admission by audition. Class instruction, arranged by section; Bassoon. Offered as demand indicates. May be repeated for credit. Effective: 2016 Spring Quarter.

MUS 130M—Applied Study of Music: Advanced; French Horn (1)
Performance Instruction—1 hour. Prerequisite(s): Consent of Instructor. Admission by audition. Class instruction, arranged by section; French Horn. Offered as demand indicates. May be repeated for credit. Effective: 2016 Spring Quarter.

MUS 130N—Applied Study of Music: Advanced; Trumpet (1)
Performance Instruction—1 hour. Prerequisite(s): Consent of Instructor. Admission by audition. Class instruction, arranged by section; Trumpet. Offered as demand indicates. May be repeated for credit. Effective: 2016 Spring Quarter.

MUS 130O—Applied Study of Music: Advanced; Trombone (1)
Performance Instruction—1 hour. Prerequisite(s): Consent of Instructor. Admission by audition. Class instruction, arranged by section; Trombone. Offered as demand indicates. May be repeated for credit. Effective: 2016 Spring Quarter.

MUS 130P—Applied Study of Music: Advanced; Tuba (1)
Performance Instruction—1 hour. Prerequisite(s): Consent of Instructor. Admission by audition. Class instruction, arranged by section; Tuba. Offered as demand indicates. May be repeated for credit. Effective: 2016 Spring Quarter.

MUS 130Q—Applied Study of Music: Advanced; Percussion (1)
Performance Instruction—1 hour. Prerequisite(s): Consent of Instructor. Admission by audition. Class instruction, arranged by section; Percussion. Offered as demand indicates. May be repeated for credit. Effective: 2016 Spring Quarter.

MUS 130R—Applied Study of Music: Advanced; Classical Guitar (1)
Performance Instruction—1 hour. Prerequisite(s): Consent of Instructor. Admission by audition. Class instruction, arranged by section. Offered as demand indicates. May be repeated for credit. Effective: 2016 Fall Quarter.

MUS 131A—Applied Study of Music: Advanced (Individual) (2)
Independent Study—5 hours; Performance Instruction—0.5 hours. Prerequisite(s): Consent of Instructor. Admission by audition. Individual instruction in voice. May be repeated for credit. Effective: 2016 Fall Quarter.

MUS 131B—Applied Study of Music: Advanced (Individual); Piano (2)
Independent Study—5 hours; Performance Instruction—0.5 hours. Prerequisite(s): Consent of Instructor. Admission by audition. Individual instruction in Piano. May be repeated for credit. Effective: 2016 Spring Quarter.

MUS 131C—Applied Study of Music: Advanced (Individual); Harpsichord (2)
Independent Study—5 hours; Performance Instruction—0.5 hours. Prerequisite(s): Consent of Instructor. Admission by audition. Individual instruction in Harpsichord. May be repeated for credit. Effective: 2016 Winter Quarter.

MUS 131D—Applied Study of Music: Advanced (Individual); Organ (2)
Independent Study—5 hours; Performance Instruction—0.5 hours. Prerequisite(s): Consent of Instructor. Admission by audition. Individual instruction in Organ. May be repeated for credit. Effective: 2016 Spring Quarter.

MUS 131E—Applied Study of Music: Advanced (Individual); Violin (2)
Independent Study—5 hours; Performance Instruction—0.5 hours. Prerequisite(s): Consent of Instructor. Admission by audition. Individual instruction in Violin. May be repeated for credit. Effective: 2016 Spring Quarter.
MUS 131F—Applied Study of Music: Advanced (Individual); Viola (2)
Independent Study—5 hours; Performance Instruction—0.5 hours. Prerequisite(s): Consent of Instructor. Open to Music majors only; admission by audition. Individual instruction in Viola. May be repeated for credit. Effective: 1997 Fall Quarter.

MUS 131G—Applied Study of Music: Advanced (Individual); Cello (2)
Independent Study—5 hours; Performance Instruction—0.5 hours. Prerequisite(s): Consent of Instructor. Admission by audition. Individual instruction in Cello. May be repeated for credit. Effective: 2016 Spring Quarter.

MUS 131H—Applied Study of Music; Advanced (Individual); Double Bass (2)
Independent Study—5 hours; Performance Instruction—0.5 hours. Prerequisite(s): Consent of Instructor. Admission by audition. Individual instruction in Double Bass. May be repeated for credit. Effective: 2016 Spring Quarter.

MUS 131I—Applied Study of Music: Advanced (Individual); Flute (2)
Independent Study—5 hours; Performance Instruction—0.5 hours. Prerequisite(s): Consent of Instructor. Admission by audition. Individual instruction in Flute. May be repeated for credit. Effective: 2016 Spring Quarter.

MUS 131J—Applied Study of Music: Advanced (Individual); Oboe (2)
Independent Study—5 hours; Performance Instruction—0.5 hours. Prerequisite(s): Consent of Instructor. Admission by audition. Individual instruction in Oboe. May be repeated for credit. Effective: 2016 Spring Quarter.

MUS 131K—Applied Study of Music: Advanced (Individual); Clarinet (2)
Independent Study—5 hours; Performance Instruction—0.5 hours. Prerequisite(s): Consent of Instructor. Admission by audition. Individual instruction in Clarinet. May be repeated for credit. Effective: 2016 Spring Quarter.

MUS 131L—Applied Study of Music: Advanced (Individual); Bassoon (2)
Independent Study—5 hours; Performance Instruction—0.5 hours. Prerequisite(s): Consent of Instructor. Admission by audition. Individual instruction in Bassoon. May be repeated for credit. Effective: 2016 Spring Quarter.

MUS 131M—Applied Study of Music: Advanced (Individual); French Horn (2)
Independent Study—5 hours; Performance Instruction—0.5 hours. Prerequisite(s): Consent of Instructor. Admission by audition. Individual instruction in French Horn. May be repeated for credit. Effective: 2016 Spring Quarter.

MUS 131N—Applied Study of Music: Advanced (Individual); Trumpet (2)
Independent Study—5 hours; Performance Instruction—0.5 hours. Prerequisite(s): Consent of Instructor. Admission by audition. Individual instruction in Trumpet. May be repeated for credit. Effective: 2016 Spring Quarter.

MUS 131O—Applied Study of Music: Advanced (Individual); Trombone (2)
Independent Study—5 hours; Performance Instruction—0.5 hours. Prerequisite(s): Consent of Instructor. Admission by audition. Individual instruction in Trombone. May be repeated for credit. Effective: 2016 Spring Quarter.

MUS 131P—Applied Study of Music: Advanced (Individual); Tuba (2)
Independent Study—5 hours; Performance Instruction—0.5 hours. Prerequisite(s): Consent of Instructor. Admission by audition. Individual instruction in Tuba. May be repeated for credit. Effective: 2016 Spring Quarter.

MUS 131Q—Applied Study of Music: Advanced (Individual); Percussion (2)
Independent Study—5 hours; Performance Instruction—0.5 hours. Prerequisite(s): Consent of Instructor. Admission by audition. Individual instruction in Percussion. May be repeated for credit. Effective: 2016 Spring Quarter.

MUS 131R—Applied Study of Music: Advanced (Individual); Classical Guitar (2)
Independent Study—5 hours; Performance Instruction—0.5 hours. Prerequisite(s): Consent of Instructor. Admission by audition. Individual instruction in Classical Guitar. May be repeated for credit. Effective: 2016 Spring Quarter.

MUS 131U—Applied Study of Music: Advanced (Individual); Saxophone (2)
Independent Study—5 hours; Performance Instruction—0.5 hours. Prerequisite(s): Consent of Instructor. Open to Music majors only; admission by audition. Individual instruction in Saxophone. May be repeated for credit. Effective: 2016 Fall Quarter.

MUS 132—Singing for Actors (1)
Performance Instruction—1 hour. Prerequisite(s): Consent of Instructor. Elements of basic singing techniques, through selected exercises, vocalises, and songs. May be repeated for credit. May be repeated for credit. (P/NP grading only.) GE credit: AH. Effective: 2016 Spring Quarter.

MUS 140—University Jazz Band (2)
Practice; Rehearsal—2 hours. Prerequisite(s): Consent of Instructor. Admission by audition. Open to students in any major. rehearsal, study, and performance of jazz band music and full variety of jazz band style, including swing, be-
bob, and contemporary jazz styles. May be repeated for credit. (P/NP grading only.) GE credit: AH. Effective: 2017 Spring Quarter.

**MUS 141—University Symphony (2)**
Rehearsal—4 hours. Prerequisite(s): Consent of Instructor. Admission by audition. Open to any student in the University whose proficiency meets the requirements of concert performance. Sight-reading, rehearsal and performance of music from the orchestral literature. May be repeated for credit. May be repeated for credit. (P/NP grading only.) GE credit: AH. Effective: 2016 Spring Quarter.

**MUS 142—University Chamber Singers (2) Review all entries**
Rehearsal—3 hours. Prerequisite(s): Consent of Instructor. Admission by audition. Rehearsal and performance of works for small choral group. May be repeated for credit. (P/NP grading only.) GE credit: AH. Effective: 2016 Spring Quarter.

**MUS 143—University Concert Band (2)**
Rehearsal—4 hours. Prerequisite(s): Consent of Instructor. Admission by audition. Open to any student in the University whose proficiency meets the requirements of concert performance. Rehearsal and performance of music for band. May be repeated for credit. May be repeated for credit. (P/NP grading only.) GE credit: AH. Effective: 2016 Spring Quarter.

**MUS 144—University Chorus (2)**
Rehearsal—4 hours. Prerequisite(s): Consent of Instructor. Admission by audition. Open to any student in the University. Rehearsal and performance of choral music. May be repeated for credit. May be repeated for credit. (P/NP grading only.) GE credit: AH. Effective: 2016 Spring Quarter.

**MUS 145—Early Music Ensemble (2)**
Rehearsal—4 hours. Prerequisite(s): Consent of Instructor. Admission by audition. Rehearsal and performance of Medieval, Renaissance, and Baroque music for vocal ensemble and historical instruments. May be repeated for credit. May be repeated for credit. (P/NP grading only.) GE credit: AH. Effective: 2016 Fall Quarter.

**MUS 146—Chamber Music Ensemble (1)**
Practice—1 hour; Rehearsal—2 hours. Prerequisite(s): Consent of Instructor. Admission by audition. Open to any student in the University whose proficiency meets the requirements of concert performance. Study, rehearsal, and performance of ensemble music for strings, winds, voice, piano, harpsichord, and organ. May be repeated for credit. May be repeated for credit. (P/NP grading only.) GE credit: AH. Effective: 2016 Fall Quarter.

**MUS 147—University Wind Ensemble (2)**
Rehearsal—4 hours. Prerequisite(s): Consent of Instructor. Rehearsal, study, and performance of a full variety of wind ensemble music; and to have students share their work in public performances. May be repeated for credit. (P/NP grading only.) GE credit: AH. Effective: 2016 Fall Quarter.

**MUS 148—Hindustani Vocal Ensemble (2)**
Rehearsal—2 hours. Prerequisite(s): Consent of Instructor. Basics of Hindustani music through theory and practice. Fundamentals of raga (mode) and tala (rhythms) with special emphasis on improvisation, a central feature of khyal (singing style). Five ragas each quarter. May be repeated up to 6 time(s). (P/NP grading only.) GE credit: AH. Effective: 2016 Fall Quarter.

**MUS 149—Indonesian Gamelan Ensemble (2)**
Rehearsal—2 hours. Prerequisite(s): Consent of Instructor. Indonesian music practice. Basic instrumental technique and repertory. Focus on two styles of Sundanese gamelan (tuned percussion orchestras): salendro and degung. May be repeated for credit. (P/NP grading only.) GE credit: AH. Effective: 2016 Fall Quarter.

**MUS 150—Brasilian Samba School (2)**
Rehearsal—2 hours. Prerequisite(s): Consent of Instructor. Practice of Brasilian music. Basic instrumental technique and repertory. Focus on the percussion traditions of Rio de Janeiro and Bahia. May be repeated up to 6 time(s). (P/NP grading only.) GE credit: AH. Effective: 2016 Spring Quarter.

**MUS 151—Korean Percussion Ensemble (2)**
Listening—2 hours; Practice—2 hours; Rehearsal—2 hours. Prerequisite(s): Consent of Instructor. Class size limited
to 20 students. Practice of Korean percussion styles. Basic instrumental technique and repertory. Focus on the percussion traditions of samulnori and basic concepts of p'ungmul. May be repeated up to 6 time(s). (P/NP grading only.) GE credit: AH. Effective: 2016 Spring Quarter.

**MUS 152—Afro-Cuban Ensemble (2)**
Performance Instruction—2 hours. Prerequisite(s): Consent of Instructor. Performance of African derived folkloric music of Cuba. Basic instrumental technique and repertory. Focus on percussion and song traditions from Havana, Matanzas and Santiago, Cuba. May be repeated up to 6 time(s). (P/NP grading only.) GE credit: AH. Effective: 2016 Fall Quarter.

**MUS 153—Brazilian Capoeira Ensemble (2)**
Listening; Practice; Rehearsal—4 hours. Prerequisite(s): Consent of Instructor. Basic instrumental techniques, songs, and dance movements of Capoeira Angola. Protocols of a Capoeira Angola performance and the meanings of Capoeira in Brazil with its connections to Afro-Brazilian culture. May be repeated up to 6 time(s). (P/NP grading only.) GE credit: AH. Effective: 2018 Spring Quarter.

**MUS 192—Internship in Music (1-4)**
Internship—3-12 hours. Prerequisite(s): Consent of instructor or academic advisor. Student must submit a written proposal to an appropriate Music Department instructor. Internship outside the university related to music. May be repeated up to 8 unit(s). (P/NP grading only.) GE credit: AH. Effective: 2016 Fall Quarter.

**MUS 194HA—Special Study for Honors Students (2-4)**
Independent Study—6-12 hours. Prerequisite(s): MUS 007C; MUS 123; Consent of Instructor. Open only to students who qualify for the honors program and admission to music Senior Honors Program. Preparation and presentation of a culminating project, under the supervision of an instructor, in one of the creative or scholarly areas of music. GE credit: AH. Effective: 2016 Spring Quarter.

**MUS 194HB—Special Study for Honors Students (2-4)**
Independent Study—6-12 hours. Prerequisite(s): MUS 194HA; and Consent of Instructor. Open only to students who qualify for honors program and admission to Music Senior Honors Program. Preparation and presentation of a culminating project, under the supervision of an instructor, in one of the creative or scholarly areas of music. GE credit: AH. Effective: 2016 Spring Quarter.

**MUS 195—Senior Project (2)**
Project (Term Project)—6 hours. Prerequisite(s): MUS 007C; MUS 123; Consent of Instructor. Preparation of a senior project in music composition (public presentation of a new work), in music performance (a public recital), or in music history and theory (public presentation of research results). GE credit: AH. Effective: 2016 Fall Quarter.

**MUS 198—Directed Group Study (1-5)**
Variable. Prerequisite(s): Consent of Instructor. Directed group study. (P/NP grading only.) GE credit: AH. Effective: 2016 Spring Quarter.

**MUS 199—Special Study for Advanced Undergraduates (1-5)**
Variable. Prerequisite(s): Consent of Instructor. Special study for advanced undergraduates. (P/NP grading only.) GE credit: AH. Effective: 2016 Spring Quarter.

**MUS 202—Notation (4)**
Seminar—3 hours; Term Paper. Open to graduate students in music; advanced undergraduates with consent of instructor. Study of musical notation; investigation of techniques for editing Medieval and Renaissance music. Effective: 2016 Spring Quarter.

**MUS 203—Music Composition (4)**
Seminar—3 hours; Term Paper. Open to graduate students in music; advanced undergraduates with consent of instructor. Technical projects that explore compositional problems, the skill and techniques with which to solve them, and free composition. May be repeated for credit. Effective: 2016 Spring Quarter.

**MUS 204—Advanced Conducting (3)**
Practice; Tutorial—2 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in conducting. Technical aspects of conducting and the broader issues in music history and analysis that conductors must face before leading a rehearsal or performance. May be repeated for credit. Effective: 2016 Fall Quarter.

**MUS 207—Advanced Electronic and Computer Music (4)**
Seminar—2 hours. Prerequisite(s): MUS 107A; MUS 107B; MUS 107C; Consent of Instructor. Advanced composition of computer and electronic music. Effective: 2016 Spring Quarter.
MUS 210A—Proseminar in Music (Theory and Analysis) (4)
Seminar—3 hours; Term Paper. Open to graduate students in music; advanced undergraduates with consent of instructor. Voice-leading analysis of tonal music derived from Schenker and pitchclass set theory. Recent work on compositional design, generalizations of the concept of interval, psychologically oriented music theory, and theories of durational structure and timbre. Effective: 2016 Spring Quarter.

MUS 210B—Proseminar in Music (Musicology and Criticism) (4)
Seminar—3 hours; Term Paper. Open to graduate students in music; advanced undergraduates with consent of instructor. Issues and concepts of music history, including performance practice questions for specific repertoires and periods; principles, aims, and methods of archival study; historical theory; evolution of musical styles; philosophical debates about goals and aims of the discipline in general. Effective: 2016 Spring Quarter.

MUS 210C—Proseminar in Music (Ethnomusicology) (4)
Seminar—3 hours; Term Paper. Open to graduate students in music; advanced undergraduates with consent of instructor. Introduction to ethnomusicology through its intellectual history, theoretical approaches, analytical techniques, and methodologies. Effective: 2016 Spring Quarter.

MUS 212—Ethics of Musical Ethnography (4)
Fieldwork; Seminar—3 hours. Open to graduate students in music. Advanced undergraduates with consent of instructor. Role, methodology, perception, and assumptions of the ethnomusicologist in ethnographic scholarship. Examination of complex ethical and political questions in relation to practical fieldwork techniques. Effective: 2016 Fall Quarter.

MUS 213—Transcription and Notation (4)
Project (Term Project); Seminar—3 hours. Open to graduate students in music. Advanced undergraduates with consent of instructor. Practical instruction in the transcription and analysis of primarily non-Western musics. Analytical and theoretical issues, the politics of representation, and the cultural values and ideologies implicit in notation. Effective: 2016 Fall Quarter.

MUS 214—Recent Issues in Ethnomusicology (4)
Seminar—3 hours; Term Paper. Open to graduate students in music; advanced undergraduates with consent of instructor. Issues, schools of thought, and basic literature in ethnomusicology from the 1980s to present. Emphasis on theory and methodology. Effective: 2016 Spring Quarter.

MUS 221—Topics in Music History (4)
Seminar—3 hours. Open to graduate students in music; advanced undergraduates with consent of instructor. Studies in selected areas of music history and theory. May be repeated for credit. Effective: 2016 Spring Quarter.

MUS 222—Techniques of Analysis (4)
Seminar—3 hours. Open to graduate students in music; advanced undergraduates with consent of instructor. Analysis and analytical techniques as applied to music of all historical style periods. May be repeated for credit. Effective: 2016 Spring Quarter.

MUS 223—Topics in Ethnomusicology (4)
Seminar—4 hours. Prerequisite(s): Open to graduate students in Music; Anthropology students may enroll with consent of instructor. In-depth ethnomusicological studies of selected cultures and their musics; study of historical, theoretical, contextual, and cultural features. May be repeated for credit. Effective: 2016 Fall Quarter.

MUS 299—Individual Study (1-12)
Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

MUS 396—Teaching Assistant Training Practicum (1-4)
Variable—3-12 hours. Prerequisite(s): Consent of Instructor. Teaching Assistant Training Practicum May be repeated for credit. (S/U grading only.) Effective: 1998 Winter Quarter.

______________, Chairperson of the Department

Department Office. 2407 Hart Hall; 530-752-3237; http://nas.ucdavis.edu

Faculty. http://nas.ucdavis.edu/people/faculty

The Major Program

Native American Studies provides a multi-disciplinary introduction to the indigenous cultures of North, Central, and South America. It challenges students to consider issues of cultural diversity, sovereignty, and indigenous knowledge systems in preparation for living in a world of constantly increasing social and cultural complexity.

The Program. Students electing a major in Native American Studies may complete Plan I, Plan II, or Plan III. Plan I enables students to concentrate chiefly upon the Native experience in North America (north of Mexico). Plan II encourages interested students to focus upon Meso-America with some course work integrating Meso-America with North America and South America. Plan III focuses upon South America with some course work integrating that region with areas to the north.

Major Advising. All new and prospective Native American Studies majors are encouraged to see the Student Affairs Officer individually, once per year, at minimum.

Career Alternatives. Native American Studies is excellent preparation for a scholarly career or professional career such as teaching, law, human services, health, tribal administration, social work, and inter-ethnic relations. Graduate schools and agencies in these and related areas are looking for students with broad interdisciplinary preparation and who possess knowledge and sensitivity relating to ethnic issues and cultural diversity.

Study Off Campus. Majors have the option of spending one to three quarters elsewhere in the Americas or on or near a reservation as part of the fulfillment of the Area of Specialization. Each student's plan must be approved by the student's adviser and by the chairperson and may fulfill from 12 to 20 of the 28 units required for the emphasis. The courses or field internship taken elsewhere must be focused upon indigenous peoples or indigenous languages and the institution of study shall be located in an area with substantial indigenous population. Students must have upper division standing and, for Plan I, course 107 or the equivalent should have been completed; for Plan II, courses 107 and 133 should have been completed; and for Plan III, courses 107 and 120 should have been completed prior to departure. Several options may be used for receiving academic credit, including course 195. The department strongly encourages students to participate in the UC Education Abroad Program or Short-Term Programs Abroad.

Graduate Study. The Department offers a program of study leading to the M.A. and Ph.D. degrees in Native American Studies, as well as a designated emphasis in Native American Studies for graduate students in approved programs. Further information regarding graduate study may be obtained at the Department office and at Graduate Studies.

Total: 24

Native American Studies | NAS Courses

Courses in NAS:

NAS 001—Introduction to Native American Studies (4)
Discussion—1 hour; Lecture—3 hours. Introduction to Native American Studies with emphasis upon basic concepts relating to Native American historical and political development. GE credit: ACGH, DD, SS, WC, WE. Effective: 2011 Fall Quarter.

NAS 005—Introduction to Native American Literature (4)
Lecture/Discussion—4 hours. Prerequisite(s): Completion of Subject A requirement. Intensive focus on analysis of Native American literary texts, with frequent writing assignments to develop critical thinking and composition skills. GE credit: AH, DD, OL, WE. Effective: 2011 Fall Quarter.

NAS 005A—Writer's Workshop (2)
Discussion—2 hours. Concurrent enrollment in a lower division writing course required, preferably NAS 005; if necessary, based upon demand and academic advisor approval, students may concurrently enroll in an equivalent course (ENL 003 or UWP 001), instead. Disciplinary writing support course that focuses on the development of writing and revision strategies, exploring ways to understand a writing task, to develop appropriate content for a writing task, to revise content to reflect competence as a communicator. Effective: 2019 Winter Quarter.

NAS 007—Indigenous and Minority Languages (4)
Discussion—1 hour; Lecture—3 hours. Survey of the status of indigenous, immigrant, and other minority languages in the Americas and around the world. Topics include linguistic diversity, language endangerment and revitalization, heritage language maintenance in immigrant communities, and language change due to transcultural interactions. GE credit: AH, DD, SS, WC, WE. Effective: 2015 Fall Quarter.

NAS 010—Native American Experience (4)
Discussion—1 hour; Lecture—3 hours. Introduction to the diverse cultures of Native American peoples from North,
Central, and South America. Emphasis on Native American voices in the expression of cultural views and in the experience of conflicting values. GE credit: AH, DD, SS, WC, WE. Effective: 2011 Fall Quarter.

NAS 012—Native American/Indigenous Film (4)
Discussion—1 hour; Film Viewing; Lecture—3 hours. Survey and analysis of the visual colonization of Native American peoples and the contemporary responses by Native American/Indigenous filmmakers claiming visual sovereignty. Examines a range of filmic genres including documentary, features, shorts, festivals, TV and Internet screening. GE credit: ACGH, AH, DD, SS, VL, WC, WE. Effective: 2011 Fall Quarter.

NAS 032—Native American Music and Dance (4) Review all entries
Lecture/Discussion—4 hours. Introduction to the music and dance of the native peoples of the Americas. Students will study secular native music and dance from a cross-section of regions and tribes. Effective: 1997 Winter Quarter.

NAS 032—Native American Music and Dance (4) Review all entries
Lecture/Discussion—3 hours; Term Paper. Introduction to the music and dance of Indigenous peoples across the Americas. Indigenous music and dance from comparative, interdisciplinary, and global perspectives in order to learn about historic and contemporary issues (e.g., social, cultural, economic, technical, and aesthetic) facing Indigenous communities, and the ways in which the issues are expressed through music and dance practices. GE credit: AH, DD, SS, VL. Effective: 2012 Fall Quarter.

NAS 033—Introduction to Native American Art (4)
Lecture—4 hours. Introduction to Native American Art from throughout North America, inclusive of traditional forms, techniques and designs in a range of media including ceramics, basketry, fiberwork, carving, painting, sculpture and photography within a context of social and political history. GE credit: ACGH, AH, DD, OL, SS, VL, WE. Effective: 2012 Fall Quarter.

NAS 034—Native American Art Studio (4)
Lecture—2 hours; Studio—6 hours. Limited enrollment. Studio projects to be influenced by contemporary and traditional Native American arts. Examples of designs and media presented in lectures will be of indigenous origin. Introduction and familiarized with various materials and techniques. GE credit: ACGH, AH, DD, OL, VL, WC. Effective: 2011 Fall Quarter.

NAS 046—Orientation to Research in Native American Studies (4) Review all entries
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Native American Studies major or minor, or consent of instructor. Limited enrollment. Introduces students to basic research resources pertinent to Native American subjects available in the region, including libraries, archives, museums, etc. Emphasis is upon learning to use documentary resources or other collections of data. Students will carry out individual projects. Effective: 1997 Winter Quarter.

NAS 046—Orientation to Research in Native American Studies (4) Review all entries Discontinued
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Native American Studies major or minor, or consent of instructor. Limited enrollment. Introduces students to basic research resources pertinent to Native American subjects available in the region, including libraries, archives, museums, etc. Emphasis is upon learning to use documentary resources or other collections of data. Students will carry out individual projects. Effective: 2018 Fall Quarter.

NAS 098—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. May be repeated for credit. (P/NP grading only.) Effective: 2007 Winter Quarter.

NAS 099—Special Study for Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

NAS 101—Contemporary Native American Art (4)
Extensive Writing; Lecture—3 hours. Examination of contemporary artworks by selected Native American and Indigenous Master artists, in a wide range of media, including ceramics, metal arts, photography, video, painting, installation and performance within a context of political and social histories. GE credit: ACGH, AH, DD, OL, SS, VL, WE. Effective: 2012 Fall Quarter.

NAS 107—Special Topics in Native American Languages (4) Review all entries
Lecture/Discussion—4 hours. Prerequisite(s): Consent of Instructor. Investigation of various subjects in contemporary and historical Native American language studies. May be repeated for credit when a different topic is studied. May be repeated for credit. Effective: 1997 Winter Quarter.
NAS 107—Learning Native American Languages (4)  Review all entries
Lecture/Discussion—4 hours. Self-directed study of a Native American language using revitalization strategies. Origins of language endangerment and the importance of language for cultural reclamation. May be repeated for credit if student works on a different language or if student undertakes more advanced work on a language they have studied previously. GE credit: AH, DD, OL, WC. Effective: 2019 Winter Quarter.

NAS 108—Indigenous Languages of California (4)
Lecture/Discussion—3 hours; Term Paper. Survey of the indigenous languages of the California region: linguistic prehistory, languages at first European contact, subsequent language loss, current efforts at language and cultural revitalization, indigenous languages of recent immigrants to California. GE credit: ACGH, AH, DD, SS, WE. Effective: 2016 Spring Quarter.

NAS 109—Native American Language Spotlight (4)
Discussion—1 hour; Lecture—3 hours. In-depth examination of the history, structure, and sociolinguistics of a particular Native American language or language family. Different language studied each time the course is offered. Oral proficiency component included in some years. May be repeated for credit May be repeated for credit when a different language/language family is the focus of the course. GE credit: AH, SS, WC, WE. Effective: 2018 Winter Quarter.

NAS 110A—Quechua Language and Society, Beginning Level 1 (4)
Lecture/Discussion—4 hours. Not open to students who took course 107 in the Fall quarter of 2007. Quechua language and society emphasizing the practical use of the language. Provides the student with some basic Quechua communication skills and with an initial knowledge about contemporary Andean society and the status of Quechua language today. GE credit: SS. Effective: 2012 Spring Quarter.

NAS 110B—Quechua Language and Society, Beginning Level 2 (4)
Lecture/Discussion—4 hours. Prerequisite(s): NAS 110A Second Level of the teaching of Quechua language and society. Emphasis on development of conversational and reading skills. Continuation of the study of aspects of contemporary Andean society and the status of Quechua language today. GE credit: SS. Effective: 2012 Fall Quarter.

NAS 110C—Quechua Language and Society, Intermediate Level 1 (4)
Lecture/Discussion—4 hours. Prerequisite(s): NAS 110A; NAS 110B Third level of the teaching of Quechua language and society. Emphasis on development of conversational and reading skills. Introduction to more complex grammatical structures. Continuing the study of contemporary Andean society and the status of Quechua language today. GE credit: SS. Effective: 2012 Fall Quarter.

NAS 110D—Quechua Language and Society, Intermediate Level 2 (4)
Lecture/Discussion—4 hours. Prerequisite(s): NAS 110A; NAS 110B; NAS 110C Fourth level of the teaching of Quechua language and society. Emphasis on complex structural patterns while emphasizing conversational skills and improving reading competence. Study of different sociopolitical processes that have affected Andean identity and the status of Quechua language. GE credit: SS. Effective: 2012 Fall Quarter.

NAS 115—Native Americans in the Contemporary World (4)
Lecture/Discussion—4 hours. Prerequisite(s): Upper division standing or consent of instructor. Important issues facing Native Americans in the contemporary world. Focus primarily on the diverse ways of life, histories and realities of indigenous people throughout the Americas as they develop their own cultural and political institutions. GE credit: ACGH, AH, DD, OL, SS, WE. Effective: 2016 Fall Quarter.

NAS 116—Native American Traditional Governments (4)
Lecture—4 hours. Prerequisite(s): NAS 001; ANT 002 Study of selected Native American Tribal Governments, confederations, leagues, and alliance systems. Effective: 1997 Winter Quarter.

NAS 117—Native American Governmental Decision Making (4)
Lecture—4 hours. Prerequisite(s): NAS 116; POL 002; ANT 123 recommended. Native American governmental and community decision making with emphasis on federal and state programs, tribal sovereignty, current political trends and funding for tribal services. Effective: 1997 Winter Quarter.

NAS 118—Native American Politics (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Upper division standing or consent of instructor. Examination of the various interest groups and movements found among Native people and how they relate to the determination of Indian affairs. Study of political action available to Native groups, and local communities, along
with relevant theory relating to underdevelopment. GE credit: ACGH, DD, SS, WC, WE. Effective: 2016 Spring Quarter.

NAS 119—Introduction to Federal Indian Law (4)
Lecture—3 hours; Term Paper. Introduction to the foundational cases and statutes of federal Indian law, from European Contact through the 20th century. GE credit: ACGH, SS, WE. Effective: 2011 Fall Quarter.

NAS 120—Ethnopolitics of South American Indians (4)
Lecture/Discussion—4 hours. Prerequisite(s): NAS 001; (NAS 010 or NAS 055) Social, political, cultural movements of indigenous South Americans in response to establishment, expansion of European colonialism, post-colonial nation-states. Ethnopolitical processes developed through interactions between Indians, Euroamericans. Socioethnographic analysis of main indigenous areas and the development of national societies. Effective: 1997 Winter Quarter.

NAS 121—Corporate Colonialism (4)
Lecture/Discussion—4 hours. Prerequisite(s): NAS 001, NAS 010 or NAS 012 encouraged, but not required. Price of progress and modernity for native and non-native people. History of the corporation and neoliberalism, military and intelligence agencies, debt, Taylorism, education institutions, media, and law. Discussion of alternatives advocated by contemporary and indigenous social movements. GE credit: ACGH, DD, SS, WC, WE. Effective: 2015 Fall Quarter.

NAS 122—Native American Community Development (4)
Lecture—4 hours. Prerequisite(s): NAS 001 or NAS 010 Application of community development theory and techniques to the development problems of Native American communities. GE credit: ACGH, DD, OL, SS, WE. Effective: 2012 Fall Quarter.

NAS 123—Native Foods and Farming of the Americas (4)
Lecture/Discussion—4 hours. Crop domestication, agrodiversity, and cuisines of the Americas. Cultural and social history of native American foods like maize, potatoes, quinoa, chocolate, peppers, beans, avocados, etc. Discussion of socio-economic, environmental, legal challenges facing indigenous and peasant farmers today. GE credit: DD, OL, SE, SS, WC. Effective: 2016 Spring Quarter.

NAS 125—Performance and Culture Among Native Americans (4)
Film Viewing—3 hours; Lecture—3 hours. Prerequisite(s): Consent of Instructor. Interdisciplinary study of public expressive forms among Native Americans. Comparison and analysis of music, dances, rituals, and dramas from throughout North, Central, and South America in their social and cultural contexts. Extensive film viewing. Not open for credit to students who have completed MUS 125. GE credit: AH, SS, WC, WE. Effective: 2018 Spring Quarter.

NAS 130A—Native American Ethno-Historical Development (4)
Lecture—4 hours. Prerequisite(s): Upper division standing or consent of instructor. Study of Native American ethno-history in North America before 1770s. GE credit: ACGH, DD, SS, WC, WE. Effective: 2016 Spring Quarter.

NAS 130B—Native American Ethno-Historical Development (4)
Lecture/Discussion—4 hours. Prerequisite(s): Upper division standing or consent of instructor. Study of Native American ethno-history in North America, 1770-1890. GE credit: ACGH, DD, SS, WE. Effective: 2016 Spring Quarter.

NAS 130C—Native American Ethno-Historical Development (4)
Lecture/Discussion—4 hours. Prerequisite(s): Upper division standing or consent of instructor. Study of Native American ethno-history in North America after 1890. GE credit: ACGH, DD, SS, WE. Effective: 2016 Spring Quarter.

NAS 133—Ethnohistory of Native People of Mexico and Central America (4)
Lecture/Discussion—4 hours. Ethnohistorical development of pre-colonial, colonial, post-colonial Mexican and Central American indigenous people; the impact of economic and political factors on the process of cultural adaptation. Attention is given to the questions of nation-building, forced assimilation, indigenous resistance, organized political responses. GE credit: SS. Effective: 2017 Winter Quarter.

NAS 133A—Ethnohistory of Native Peoples of Mexico and Central America to 1500 (4)
Lecture/Discussion—3 hours; Term Paper. Ethnohistorical development of the indigenous peoples of Mexico and Central America up to and including the earliest period of European contact. Focus is on indigenous written historical records of the Maya, Mixtec, and Nahuatl peoples. May be repeated up to 1 time(s). GE credit: SS. Effective: 2017 Winter Quarter.

NAS 133B—Ethnohistory of Native Peoples of Mexico and Central America 1500 to 2000 (4)
Lecture/Discussion—4 hours. Ethnohistory of indigenous peoples of Mexico and Central America from 1500 to contemporary times. Focus on social and cultural dynamics, particularly the role of indigenous people in the

NAS 134—Race, Culture, and Nation (4) **Review all entries**
Lecture—4 hours. Prerequisite(s): Upper division standing or consent of instructor. Exploration of complexities of Native American racial, cultural and national identities and alliances. Study of tribal and federal citizenship, mixed descent and diasporic people(s), claims to resources, ethnic fraud and contemporary movements of cultural resurgence and political sovereignty and self-determination. GE credit: ACGH, DD, SS, WE. Effective: 2016 Spring Quarter.

NAS 134—Race, Culture, and Nation (4) **Review all entries**
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Upper division standing or consent of instructor. NAS 001 or NAS 010 encouraged, but not required. Exploration of complexities of Native American racial, cultural and national identities and alliances. Study of tribal and federal citizenship, mixed descent and diasporic people(s), claims to resources, ethnic fraud and contemporary movements of cultural resurgence and political sovereignty and self-determination. GE credit: AH, DD, OL, SS, WE. Effective: 2018 Fall Quarter.

NAS 135—Gender Construction in Native Societies (4) **Review all entries**
Lecture—4 hours. Prerequisite(s): Upper division standing or consent of instructor. Historical and traditional Native American constructions of feminine and masculine genders as well as third, fourth, and fifth genders. Examines gender roles and statuses. Addresses the problems with contemporary terminologies and impacts of colonization on contemporary constructions of gender identities. GE credit: AH, DD, OL, SS, WE. Effective: 2016 Spring Quarter.

NAS 135—Gender Construction in Native Societies (4) **Review all entries**
Lecture/Discussion—3 hours; Project (Term Project). Prerequisite(s): Upper division standing or consent of instructor; NAS 001 or NAS 010 encouraged, but not required. Historical and traditional Native American constructions of feminine, masculine, and non-binary genders with attention to culture- and place-based gender roles and statuses. Analysis of problems with contemporary terminologies and impacts of colonization on contemporary constructions of gender identities. GE credit: AH, DD, OL, SS, WE. Effective: 2019 Winter Quarter.

NAS 146—Orientation to Research in Native American Studies (4) **Review all entries**
Lecture/Discussion—4 hours; Term Paper. Prerequisite(s): Native American Studies major or minor, or consent of instructor. Limited enrollment. Introduction to basic research resources pertinent to Native American subjects available in the region, including libraries, archives, museums, etc. Emphasis on learning to use documentary resources or other collections of data. Students will carry out individual projects. GE credit: ACGH, DD, SS, WE. Effective: 2011 Fall Quarter.

NAS 146—Orientation to Research in Native American Studies (4) **Review all entries**
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. Native American Studies major or minor, or consent of instructor; NAS 001 or NAS 010 encouraged, but not required. Introduction to basic research resources pertinent to Native American subjects available in the region, including libraries, archives, museums, etc. Emphasis on learning to use documentary resources or other collections of data. Students will carry out individual projects. GE credit: AH, DD, SS, WE. Effective: 2019 Winter Quarter.

NAS 157—Native American Religion and Philosophy (4)

NAS 161—California Indian Environmental Policy I (4)
Lecture/Discussion—4 hours; Term Paper. Contemporary California Indian environmental policy issues, with a focus on water, minerals, contamination, and alliance-building. Issues will be placed within historical and political context, drawing on theories of Native environmental ethics, environmental justice, and Federal Indian law. GE credit: ACGH, DD, SS, WE. Effective: 2012 Fall Quarter.

NAS 162—California Indian Environmental Policy II (4)
Lecture/Discussion—4 hours; Term Paper. Contemporary California Indian environmental policy issues, with a focus on planning, site protection, and collaborative structures. Issues will be placed within historical and political context, drawing on theories of Native environmental ethics, environmental justice, and Federal Indian law. GE credit: ACGH, DD, SS, WE. Effective: 2013 Spring Quarter.

NAS 180—Native American Women (4)
Lecture/Discussion—4 hours. Native American women's life experiences, cross-cultural comparisons of gender
roles, and Native women's contemporary feminist thought. Utilizes texts from literature, social science, and
autobiography/biography. GE credit: AH, DD, OL, SS, WE. Effective: 2016 Fall Quarter.

NAS 181A—Native American Literature (4)
Lecture/Discussion—4 hours. Prerequisite(s): NAS 005 or ENG 003 or COM 001 or COM 002 or COM 003 Works of
fiction (short story, novel) by contemporary Native American authors, with an emphasis on writers from the United
States. GE credit: ACGH, AH, DD, OL, WE. Effective: 2011 Fall Quarter.

NAS 181B—Native American Literature (4)
Lecture/Discussion—4 hours. Prerequisite(s): NAS 005 or ENG 003 or COM 001 or COM 002 or COM 003 Works by
or about Native Americans including non-fiction novels, biographies and autobiographies. Explore ways Native
Americans create and recreate their culture through the creative process in literature. Examine from a critical
perspective autobiographies and testimonial literature. GE credit: AH, DD, OL, WE. Effective: 2011 Fall Quarter.

NAS 181C—Contemporary Native American Poetry (4)
Lecture—4 hours. Works of poetry by contemporary Native American/indigenous poets, with some attention to
cultural poetic expressions. GE credit: AH, DD, OL, WE. Effective: 2016 Fall Quarter.

NAS 184—Contemporary Indigenous Literature of Mexico (4)
Lecture/Discussion—4 hours. Prerequisite(s): NAS 001 or NAS 010; NAS 181A or NAS 181C recommended; reading
knowledge of Spanish required. Contemporary indigenous literature of Mexico, with a focus on the genres (poetry,
fiction, drama, essay); analysis of cultural, historical, and spiritual themes, imagery, styles and performances;
biographies of and influences on the Native writers themselves. GE credit: AH, OL, SS, WC. Effective: 2011 Fall
Quarter.

NAS 185—Native American Literature in Performance (4)
Performance Instruction—4 hours. Prerequisite(s): Consent of Instructor. Performance of contemporary Native
American literature onstage, through adaptations of selected literature as well as the creation of original pieces.
May be repeated up to 4 unit(s). GE credit: AH, DD, OL, WC. Effective: 2011 Fall Quarter.

NAS 188—Special Topics in Native American Literary Studies (4)
Lecture/Discussion—4 hours. Prerequisite(s): Upper division standing and one of the following recommended: NAS
005, NAS 010, NAS 181A, NAS 181C. Special topics drawn from Native American literature. May be repeated for
credit when topic differs. GE credit: AH, DD, OL, WE. Effective: 2011 Fall Quarter.

NAS 190—Seminar in Native American Studies (2)
Discussion—2 hours. Prerequisite(s): Senior Standing. Seminar of critical issues faced by Native American people.
(P/NP grading only.) Effective: 1997 Winter Quarter.

NAS 191—Topics in Native American Studies (4)
Lecture/Discussion—4 hours. Prerequisite(s): Upper division standing. Selected topics in Native American Studies
related to indigenous knowledges and worldviews from a historical, cultural, hemispheric perspective. May be
repeated for credit when topic differs and/or when offered by a different instructor. GE credit: AH, DD, OL, WE.
Effective: 2013 Spring Quarter.

NAS 192—Internship (1-12)
Internship—1 hour. Prerequisite(s): Consent of Instructor. Enrollment dependent on availability of intern position in
Native American Studies or the CN Gorman Museum, with priority to Native American Studies minors/majors.
Restricted to upper division standing. Supervised internship in the CN Gorman Museum, community, and
institutional settings related to Native American concerns. May be repeated up to 12 unit(s) including course 192
and other internships taken in other departments and institutions. (P/NP grading only.) GE credit: AH. Effective: 2011
Fall Quarter.

NAS 194HA—Special Studies for Honors Students (4)
Independent Study—12 hours. Prerequisite(s): Senior qualifying for honors. Directed reading, research and writing
culminating in the completion of a senior honors thesis or project under direction of faculty advisor. Effective: 1997
Winter Quarter.

NAS 194HB—Special Studies for Honors Students (4)
Independent Study—12 hours. Prerequisite(s): Senior qualifying for honors. Directed reading, research and writing
culminating in the completion of a senior honors thesis or project under direction of faculty advisor. Effective: 1997
Winter Quarter.
NAS 195—Field Experience in Native American Studies (12)
Fieldwork—36 hours. Prerequisite(s): NAS 161; Senior standing and major in Native American Studies, completion of lower division major requirements. Field work with governmental and community groups, under supervision of faculty advisor and sponsor. Knowledge acquired in other courses to be applied in field work. (P/NP grading only.) Effective: 1997 Winter Quarter.

NAS 196—Senior Project in Native American Studies (4)
Discussion—1 hour; Independent Study—3 hours. Prerequisite(s): NAS 195 (can be concurrent); and Consent of Instructor. Senior standing and major in Native American Studies. Guided research project that enables student to apply the theory and research principles from major course work. Final product is to be a major senior project or thesis. (P/NP grading only.) Effective: 1997 Winter Quarter.

NAS 197TC—Community Tutoring in Native American Studies (1-5)
Tutorial—3-15 hours. Prerequisite(s): Consent of major committee; upper division standing with major in Native American Studies. Supervise tutoring in community. (P/NP grading only.) Effective: 1997 Winter Quarter.

NAS 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Upper division standing. (P/NP grading only.) Effective: 1997 Winter Quarter.

NAS 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

NAS 200—Basic Concepts in Native American Studies (4) \textit{Review all entries}
Seminar—4 hours. Prerequisite(s): Consent of Instructor. Graduate standing. Analysis of the characteristics of the discipline of Native American Studies. Concentration is on both traditional and contemporary native scholarship and thought as well as the theoretical and methodological consequences derived from application of these ideas. Effective: 1997 Winter Quarter.

NAS 200—Basic Concepts in Native American Studies (4) \textit{Review all entries}
Seminar—3 hours. Prerequisite(s): Consent of Instructor. Graduate standing. Analysis of characteristics of the discipline of Native American Studies. Concentration of traditional and contemporary native scholarship and thought as well as theoretical and methodological consequences derived from application of these ideas. May be repeated up to 3 time(s) with a different instructor. Effective: 2019 Winter Quarter.

NAS 202—Advanced Topics in Native American Studies (4)
Seminar—4 hours. Prerequisite(s): Graduate standing. Advanced study of selected topics or themes relevant to the field of Native American studies. Topics will be announced at the time of offering. May be repeated for credit when topic differs. May be repeated for credit. Effective: 1997 Winter Quarter.

NAS 207—Leadership Skills and Strategies in California Language Documentation & Revitalization (4)
Seminar—3 hours; Term Paper. Introduction to the indigenous languages of the Americas, with a focus on California; an examination of how contemporary Native communities document and revitalize their heritage languages. Learn to assist and administer language programs. Effective: 2010 Fall Quarter.

NAS 212—Community Development for Sovereignty and Autonomy (4)
Seminar—4 hours. Prerequisite(s): Consent of Instructor. Graduate standing. Examines a sample of contemporary indigenous communities from south, central and north America with the goal of understanding and evaluating the strategies adopted by Native American communities to develop and implement forms of sovereignty or autonomous self-management. Effective: 1997 Winter Quarter.

NAS 213—Native Criminality and (4)
Seminar—4 hours. Prerequisite(s): Graduate standing. Examination of "deviance" in Native communities with focus on Native criminality in North America. Analysis of the concept of deviance from several different world views. Readings from a range of theories to incorporate varying theoretical perspective on criminality and deviance. Effective: 1998 Fall Quarter.

NAS 217—Public Law 83-280: Colonial Termination (4)
Seminar—4 hours. Prerequisite(s): Graduate standing, including school of law students. Examination of the signature law of the Termination Era, Public Law 83-280. Discussions to include termination, societal conformity, political consent, jurisdiction, self-determination & decolonization, and colonial relationship between Native Peoples and the United States. Effective: 2007 Spring Quarter.
NAS 220—Colonialism, Neoliberalism, and Indigenous Self-Determination (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing. History, political economy and legacies of imperial/colonial systems. Continuities and discontinuities with corporate globalization and neoliberalism. Focus on resistance and self-determination of indigenous peoples, but with comparison to other groups. Effective: 2016 Winter Quarter.

NAS 224—Performance in the Americas (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing. Ethnomusicological and anthropological approaches to study of public performance in the Americas. New ways of looking at music, dance, rituals and other forms of public expressive forms normally called "folklore" or "popular culture." Not open for credit to students who have completed MUS 224. (Former course MUS 224.). Effective: 1999 Fall Quarter.

NAS 233—Visual Sovereignty (4)
Film Viewing—2 hours; Seminar—3 hours; Term Paper. Extensively examine the field of contemporary Native American and Indigenous photography, film and performance through research of artworks, writings by artists, theorists, and material in museum collections. May be repeated up to 2 time(s) when topic differs. Effective: 2011 Fall Quarter.

NAS 237—Native American Art Collections and Museums (4)
Seminar—3 hours; Term Paper. Research and examination of regional Native American art held in museums and other public institutions, as well as privately-held collections. Includes onsite viewing and research of museum collections and archives. Effective: 2012 Fall Quarter.

NAS 240—Native American Public Health: Topics and Issues (4)
Seminar—3 hours; Term Paper. Introduction to Native American public health issues and contributing causal factors (including environmental justice and historical trauma); the dimensions of cultural competency in diagnosis and service provision; the structure of Native health care institutions; and debates in Native treatment modalities. Effective: 2011 Fall Quarter.

NAS 246—Native American/Indigenous Research Methodologies (4)
Seminar—3 hours; Term Paper. Introduction to advanced methodologies currently influencing research in Native American Studies and amongst Indigenous communities. Students will develop an original project and course assignments will guide them through the process of research design and implementation. Effective: 2015 Fall Quarter.

NAS 250—Indigenous Critique of Classic Maya Ethnographies (4)
Seminar—4 hours. Prerequisite(s): Graduate standing or consent of instructor. Construction of the Maya world through ethnographic writing during the present century. Deconstruction of ethnographies about the Mayans considering the modern theories and social/anthropological critiques of modern ethnographies. Effective: 1998 Fall Quarter.

NAS 254—Native American Literature (4)
Extensive Writing; Seminar—3 hours. Open to graduate students only. Introduction to the field of Native American Literature, creative works (fiction, poetry, memoir, personal essay), literary studies. May be repeated up to 1 time(s) if the course content (in terms of readings) is completely distinct from the course previously taken. Effective: 2018 Fall Quarter.

NAS 257—Indigenous Religious Traditions in the Americas (4)
Extensive Writing; Seminar—3 hours. Graduate student enrollment only. Religious/spiritual traditions, belief-systems, and world-views of Native American/indigenous peoples in the Americas. Land, ecological knowledge, sacred sites, the role of tricksters, language (revitalization), gender, ethics of representation, cultural revitalization, renewed ancient knowledge and practices, ceremonial (and daily) performance of the sacred, music, the arts, the worlds of the sacred, the rules of the sacred, freedom of religion. May be repeated up to 1 time(s) if the course syllabus is completely distinct (in terms of required readings) from the course previously taken. Effective: 2018 Fall Quarter.

NAS 280—Ethnohistorical Theory and Method (4)
Seminar—3 hours; Term Paper. Discussion of the ethnohistorical method; the utilization of diverse types of data, especially documentary sources, to reconstruct socio-cultural history. Particular attention to the applied area of ethnohistory in the solution of contemporary social problems. Effective: 1997 Winter Quarter.

NAS 298—Group Study for Graduate Students (1-5)
Variable. Prerequisite(s): Consent of Instructor. Graduate standing. (S/U grading only.) Effective: 1997 Winter Quarter.
NAS 299—Special Study for Graduate Students (1-12)
Variable. Prerequisite(s): Consent of Instructor. Graduate standing. (S/U grading only.) Effective: 1997 Winter Quarter.

NAS 396—Teaching Assistant Training Practicum (1-4)
Internship. Prerequisite(s): Graduate standing. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

Natural Sciences; Earth & Planetary Sciences

Natural Sciences; Earth & Planetary Sciences | Natural Sciences B.S.

(College of Letters and Science)

Department Office: Earth and Planetary Sciences; 2119 Earth and Physical Sciences; 530-752-0350; http://naturalsciences.ucdavis.edu/

Faculty: http://geology.ucdavis.edu/people/faculty/index.php

Admission consideration to the Natural Sciences major is closed to freshman and transfer applicants as the major has been discontinued effective fall 2018.

The Natural Sciences major is also closed to on-campus transfers beginning 2017-2018.

Total: 0

Natural Sciences; Earth & Planetary Sciences | GEL Courses

Courses in GEL:

GEL 001—The Earth (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Introduction to the study of the Earth. Earth's physical and chemical structure; internal and surface processes that mold the Earth; geological hazards and resources. Not open for credit to students who have taken GEL 050; only 2 credits for students who have taken GEL 002. GE credit: SE, SL, WE. Effective: 2013 Fall Quarter.

GEL 001—The Earth (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Introduction to the study of the Earth. Earth's physical and chemical structure; internal and surface processes that mold the Earth; geological hazards and resources. Not open for credit to students who have taken GEL 050; only 2 credits for students who have taken GEL 002. GE credit: SE, SL. Effective: 2019 Winter Quarter.

GEL 002—Earth System Science (3)
Lecture—3 hours. Solid and fluid earth and its place in the solar system. How the solid earth interacts with the atmosphere, hydrosphere, biosphere, and extraterrestrial environment. Only 2 units credit for students who have taken GEL 050; only 2 units credit for students who have taken GEL 001. GE credit: SE, SL. Effective: 2017 Winter Quarter.

GEL 002G—The Blue Planet: Introduction to Earth Science - Discussion (1) Review all entries
Discussion—1 hour. Prerequisite(s): GEL 002 (can be concurrent); GEL 002 required concurrently. Small group discussion and preparation of short papers for course 2. GE credit: SE. Effective: 2017 Winter Quarter.

GEL 002G—Earth System Science Discussion (1) Review all entries
Discussion—1 hour. Prerequisite(s): GEL 002 (can be concurrent); GEL 002 required concurrently. Small group discussion and preparation of short papers for GEL 002. GE credit: SE. Effective: 2018 Fall Quarter.

GEL 003—History of Life (3)
Lecture—3 hours. Prerequisite(s): GEL 001 recommended. The history of life during the three and onehalf billion years from its origin to the present day. Origin of life and processes of evolution; how to visualize and understand living organisms from their fossil remains. GE credit: SE. Effective: 2013 Fall Quarter.

GEL 003G—History of Life: Discussion (1)
Discussion—1 hour. Prerequisite(s): GEL 003 (can be concurrent); GEL 003 required concurrently. Small group discussion and preparation of short papers for course 3. GE credit with concurrent enrollment in course 3: Wrt. GE credit: SE, WE. Effective: 2013 Fall Quarter.
GEL 003L—History of Life Laboratory (1)
Laboratory—3 hours. Prerequisite(s): GEL 003 (can be concurrent); GEL 003 required concurrently. Exercises in understanding fossils as the clues to interpreting ancient life, including their functional morphology, paleoecology, and evolution. GE credit: SE. Effective: 2013 Fall Quarter.

GEL 004—Evolution: Science and World View (3)
Discussion—1 hour; Lecture—2 hours. Introduction to biological evolution. Emphasis on historical development, major lines of evidence and causes of evolution; relationships between evolution and Earth history; the impact of evolutionary thought on other disciplines. GE credit: SE, SL, WE. Effective: 2013 Fall Quarter.

GEL 009—Geology Field Experience (1)
Fieldwork—1 session. Prerequisite(s): Consent of Instructor. At least one previous GEL class, or concurrent enrollment. Pass One open to non-Geology Majors only. Exposure to geologic features and earth processes in the field. Experiential instruction in earth-science concepts, spatial visualization, landscape evolution, deep time, critical thinking skills, and integrative scientific themes. One 4-5 day field trip. May be repeated up to 1 time(s) when field trip destination differs. (P/NP grading only.) GE credit: SE. Effective: 2018 Fall Quarter.

GEL 010—Modern and Ancient Global Environmental Change (3)
Lecture—3 hours. Fundamental scientific concepts underlying issues such as global warming, pollution, and the future of nonsustainable resources presented in the context of anthropogenic processes as well as natural forcing of paleoenvironmental change throughout Earth's history. GE credit: SE, SL, VL. Effective: 2013 Fall Quarter.

GEL 012—Evolution and Paleobiology of Dinosaurs (2)
Lecture—2 hours. Introduction to evolutionary biology, paleobiology, ecology and paleoecology, using dinosaurs as case studies. GE credit: SE. Effective: 2013 Fall Quarter.

GEL 016—The Oceans (3)
Lecture—3 hours. Introductory survey of the marine environment. Oceanic physical phenomena, chemical constituents and chemistry of water, geological history, the seas biota and human utilization of marine resources. Not open for credit to students who have taken GEL 116. GE credit: SE, SL. Effective: 2013 Fall Quarter.

GEL 016G—The Oceans: Discussion (2)
Discussion/Laboratory—2 hours; Term Paper/Discussion—4 hours. Prerequisite(s): GEL 016 (can be concurrent). Scientific method applied to discovery of the processes, biota and history of the oceans. Group discussion and preparation of term paper. Not open for credit to students who have taken GEL 116G. GE credit: SE, WE. Effective: 2016 Fall Quarter.

GEL 017—Earthquakes and Other Earth Hazards (2)
Lecture—2 hours. Impact of earthquakes, tsunami, volcanoes, landslides, and floods on humans, structures, and the environment. Discussion of the causes and effects of disasters and catastrophes, and on prediction, preparation, and mitigation of natural hazards. GE credit: SE, SL. Effective: 2013 Fall Quarter.

GEL 018—Energy and the Environment (3)

GEL 018V—Energy and the Environment (3)
Web Electronic Discussion—1.5 hours; Web Virtual Lecture—1.5 hours. Conventional and alternative energy resources and their environmental impacts. Basic principles, historical development, current advantages and disadvantages, future prospects. Oil, natural gas, coal, nuclear, wind, geothermal, water, tidal, solar, hydrogen, and other sources of energy for the 21st century. GE credit: SE, SL, WE. Effective: 2015 Winter Quarter.

GEL 020—Geology of California (2)
Lecture—2 hours. The geologic history of California, the origin of rocks and the environments in which they were formed, the structure of the rocks and the interpretation of their structural history, mineral resources, and appreciation of the California landscape. Offered in alternate years. GE credit: SE, SL, VL. Effective: 2013 Fall Quarter.

GEL 025—Geology of National Parks (3)
Lecture—3 hours. Appreciation of the geologic framework underlying the inherent beauty of U.S. National Parks. Relationship of individual parks to geologic processes such as mountain building, volcanism, stream erosion, glacial action and landscape evolution. GE credit: SE, SL, VL. Effective: 2014 Winter Quarter.
GEL 025V—Geology of National Parks (3)
Web Electronic Discussion—2 hours; Web Virtual Lecture—1 hour. Appreciation of the geologic framework underlying the inherent beauty of U.S. National Parks. Relationship of individual parks to geologic processes such as mountain building, volcanism, stream erosion, glacial action and landscape evolution. No credit for students who have completed GEL 025. GE credit: SE. Effective: 2015 Spring Quarter.

GEL 028—Astrobiology (3)

GEL 030—Fractals, Chaos and Complexity (3)
Lecture/Discussion—3 hours. Prerequisite(s): MAT 016A or MAT 021A Modern ideas about the unifying ideas of fractal geometry, chaos and complexity. Basic theory and applications with examples from physics, earth sciences, mathematics, population dynamics, ecology, history, economics, biology, computer science, art and architecture. Offered in alternate years. (Same course as PHY 030.) GE credit: QL, SE. Effective: 2013 Fall Quarter.

GEL 032—Volcanoes (3)
Lecture—3 hours. Role of eruptions, and eruptive products of volcanoes in shaping the planet's surface, influencing its environment, and providing essential human resources. GE credit: SE. Effective: 2013 Fall Quarter.

GEL 035—Rivers (3)
Lecture—3 hours. Introduction to geomorphology, climate and geology of rivers and watersheds, with case examples from California. Assessment of impacts of logging, agriculture, mining, urbanization and water supply on river processes. Optional river field trips. GE credit: SE, SL. Effective: 2013 Fall Quarter.

GEL 036—The Solar System (4)
Discussion—1 hour; Lecture—3 hours. Nature of the sun, moon, and planets as determined by recent manned and unmanned exploration of the solar system. Comparison of terrestrial, lunar, and planetary geological processes. Search for life on other planets. Origin and evolution of the solar system. (Former course 113-113G.) GE credit: SE, VL, WE. Effective: 2013 Fall Quarter.

GEL 050—Physical Geology (3)
Lecture—3 hours. Prerequisite(s): High school physics and chemistry. The Earth, its materials, its internal and external processes, its development through time by sea-floor spreading and global plate tectonics. Students with credit for GEL 001 or the equivalent may receive only 2 units for GEL 050. GE credit: SE, SL. Effective: 2013 Fall Quarter.

GEL 050L—Physical Geology Laboratory (2)
Laboratory—6 hours. Prerequisite(s): GEL 050 (can be concurrent) Introduction to classification and recognition of minerals and rocks and to interpretation of topographic and geologic maps and aerial photographs. Students with credit for GEL 001L or the equivalent may receive only 1 unit for GEL 050L. GE credit: SE. Effective: 2016 Fall Quarter.

GEL 055—Introduction to Geochemistry (3)
Lecture—3 hours. Prerequisite(s): (GEL 001 or GEL 002 or GEL 050); (CHE 002A or CHE 002AH); (CHE 002B or CHE 002BH) Introduction to key geochemical principles in Earth & Planetary Sciences; chemical bonding, geochemical affinity of elements, redox & acid base equilibria in geological systems, radioactive decay, isotopic fractionation and paleoclimate records. GE credit: QL, SE, VL. Effective: 2020 Winter Quarter.

GEL 056—Introduction to Geophysics (4)
Laboratory—2 hours; Lecture/Discussion—3 hours. Prerequisite(s): (GEL 001 or GEL 050); (PHY 007B or PHY 009B) Introduction to geophysical topics essential to all aspects of Earth and planetary sciences: theory of plate tectonics, gravitational field of planets, diffusion, rheology, seismology, and earthquakes. GE credit: QL, SE, VL. Effective: 2019 Spring Quarter.

GEL 060—Earth Materials: Introduction (4) Review all entries
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): CHE 002A; (MAT 016A or MAT 017A or MAT 021A); (GEL 001 or GEL 050, GEL 050L) Physical and chemical properties of rocks, minerals and other earth materials; structure and composition of rock-forming minerals; formation of minerals by precipitation from silicate liquids and aqueous fluids and by solid state transformations. GE credit: SE. Effective: 2016 Fall Quarter.

GEL 060—Earth Materials: Introduction (4) Review all entries
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): (CHE 002A or CHE 002AH); (MAT 016A or MAT 017A or MAT 021A); (CHE 002A or CHE 002AH); (MAT 016A or MAT 017A or MAT 021A); (GEL 001 or GEL 050, GEL 050L) Physical and chemical properties of rocks, minerals and other earth materials; structure and composition of rock-forming minerals; formation of minerals by precipitation from silicate liquids and aqueous fluids and by solid state transformations. GE credit: SE. Effective: 2016 Fall Quarter.
GEL 062—Optical Mineralogy (2)
Laboratory—3 hours; Lecture—1 hour. Prerequisite(s): GEL 060 (can be concurrent) Optical properties of inorganic crystals; techniques of mineral identification using the polarizing microscope; strategies for studying rocks in thin section. GE credit: SE, VL. Effective: 2016 Fall Quarter.

GEL 081—Learning in Science and Mathematics (2)
Fieldwork—2 hours; Lecture/Discussion—2 hours. Limited to 26 students per section. Exploration of how students learn and develop understanding in science and mathematics classrooms. Introduction to case studies and interview techniques and their use in K-6 classrooms to illuminate factors that affect student learning. (Same course as EDU 081.) (P/NP grading only.) GE credit: SS, VL, WE. Effective: 2013 Fall Quarter.

GEL 092—Internship (1-12)
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Lower division standing. Work-learn experience on and off campus in all subject areas offered by the department. Internships supervised by a member of the faculty. May be repeated up to 12 unit(s). (P/NP grading only.) GE credit: SE. Effective: 2013 Fall Quarter.

GEL 098—Directed Group Study (1-5)
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. Directed group study. May be repeated up to 3 time(s) content changes. (P/NP grading only.) GE credit: SE. Effective: 2013 Fall Quarter.

GEL 099—Special Study for Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. Lower division standing. Special study for undergraduates. (P/NP grading only.) GE credit: SE. Effective: 2013 Fall Quarter.

GEL 101—Structural Geology (3)
Lecture—3 hours. Prerequisite(s): GEL 050; GEL 050L; (PHY 007A or PHY 009A); (MAT 016A or MAT 017A or MAT 021A); Consent of Instructor. Class size limited to 35 students. Study of processes and products of rock deformation. Introduction to structural geology through a survey of the features and geometries of faults and folds, techniques of strain analysis, and continuum mechanics of rock deformation. GE credit: SE. Effective: 2016 Fall Quarter.

GEL 101L—Structural Geology Lab (2)
Fieldwork—2 hours; Laboratory—6 hours. Prerequisite(s): GEL 050; GEL 050L; (PHY 007A or PHY 009A); GEL 101 (can be concurrent); Consent of Instructor. Class size limited to 15 students per session. Laboratory study of the processes and products of rock deformation. Introduction to the practice of structural geology through observations and analysis of rock deformation, including field measurement techniques and geologic mapping. GE credit: SE, VL. Effective: 2016 Fall Quarter.

GEL 103—Field Geology (3) Review all entries
Fieldwork; Laboratory. Prerequisite(s): GEL 101L; GEL 101; Consent of Instructor. Field mapping projects and writing geological reports. Weekly classroom meetings devoted to preparation of maps, cross sections, stratigraphic sections, rock descriptions, and reports. Seven-eight days on weekends during quarter. GE credit: SE, VL, WE. Effective: 2016 Fall Quarter.

GEL 103—Field Geology (4) Review all entries
Fieldwork—6 hours; Lecture—1 hour; Term Paper. Prerequisite(s): GEL 101; GEL 101L Field mapping projects and writing geological reports. Weekly classroom meetings devoted to preparation of maps, cross sections, stratigraphic sections, rock descriptions, and reports. Seven-eight days for field trips will occur on weekends during the quarter. GE credit: SE, SL, VL, WE. Effective: 2020 Spring Quarter.

GEL 105—Earth Materials: Igneous Rocks (4)
Laboratory—6 hours; Lecture—2 hours. Prerequisite(s): GEL 060; GEL 062; (MAT 016A or MAT 017A or MAT 021A); CHE 002B (can be concurrent) Origin and occurrence of igneous rocks. Laboratory exercises emphasize the study of these rocks in hand specimen and thin section. GE credit: SE, WE. Effective: 2016 Fall Quarter.

GEL 106—Earth Materials: Metamorphic Rocks (4)
Laboratory—6 hours; Lecture—2 hours. Prerequisite(s): GEL 105 Physical and chemical properties of metamorphic rocks; interpretation of metamorphic environments. Laboratory exercises emphasize the study of these rocks in hand specimen and thin section. GE credit: SE, WE. Effective: 2016 Fall Quarter.
GEL 107—Earth History: Paleobiology (3)
Lecture—3 hours. Prerequisite(s): GEL 003 or BIS 002A or BIS 010 Evolution and ecological structure of the biosphere from the origin of life to the present. GE credit: SE. Effective: 2016 Fall Quarter.

GEL 107L—Earth History: Paleobiology Laboratory (2)
Laboratory—6 hours. Prerequisite(s): (GEL 003, GEL 003L) or BIS 002B; GEL 107 (can be concurrent) Exercises in determining the ecological functions and evolution of individuals, populations, and communities of fossil organisms in field and laboratory. GE credit: SE. Effective: 2016 Fall Quarter.

GEL 108—Earth History: Paleoclimates (3)
Lecture—3 hours. Prerequisite(s): (GEL 001 or GEL 050 or GEL 116N or ESP 116N); CHE 002A; Consent of Instructor. Geological and environmental factors controlling climate change, the greenhouse effect with a detailed analysis of the history of Earth's climate fluctuations over the last 600 million years. Past and present climate records are used to examine potential future climatic scenarios. GE credit: SE, SL, WE. Effective: 2016 Fall Quarter.

GEL 109—Earth History: Sediments and Strata (2) Review all entries
Lecture—2 hours. Prerequisite(s): GEL 050; GEL 050L Principles of stratigraphic and sedimentologic analysis. Examination of the plate tectonic, climatic and oceanographic factors controlling the distribution and exploitation of economic fluids within sedimentary rocks. GE credit: SE. Effective: 2016 Fall Quarter.

GEL 109L—Earth History: Sediments and Strata Laboratory (2)
Laboratory—6 hours. Prerequisite(s): GEL 109 (can be concurrent) Methods of stratigraphic and sedimentologic analysis of modern and ancient sediments. Identification of major sediment and sedimentary rock types. Outcrop and subsurface analysis of sedimentary basins. GE credit with concurrent enrollment in course 109. Includes four one-day field trips. GE credit: SE, WE. Effective: 2016 Fall Quarter.

GEL 110—Summer Field Geology (8)
Fieldwork. Prerequisite(s): GEL 060; GEL 103; GEL 109; GEL 105 recommended. Advanced application of geologic and geophysical field methods to the study of rocks. Includes development and interpretation of geologic maps and cross sections; gravity, magnetic, electrical resistivity and seismic surveys; and field analysis of plutonic and volcanic rock suites. Eight hours/day, six days/week for six weeks. GE credit: SE, VL, WE. Effective: 2017 Spring Quarter.

GEL 115—Earth Science, History, and People (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): GEL 001 or GEL 050 Study of interplay between the Earth and its human inhabitants through history, including consideration of acute events such as earthquakes and eruptions as well as the geology of resources, topography, and water. GE credit: OL, SE, WE. Effective: 2017 Winter Quarter.

GEL 116N—Oceanography (3)
Fieldwork; Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): GEL 001 or GEL 002 or GEL 016 or GEL 050 Advanced oceanographic topics: Chemical, physical, geological, and biological processes; research methods and data analysis; marine resources, anthropogenic impacts, and climate change; integrated earth/ocean/atmosphere systems; weekly lab and one weekend field trip. (Same course as ESP 116N.) GE credit: SE, SL. Effective: 2017 Winter Quarter.

GEL 120—Origins: From the Big Bang to Today (3)
Lecture—3 hours. Limited enrollment. Long-term and large-scale perspectives on the origins of the universe, stars and planets, life, human evolution, the rise of civilization and the modern world. Multi-disciplinary approach to ‘Big History’ involving cosmology, astronomy, geology, climatology, biology, anthropology, archeology and traditional history. GE credit: SE. Effective: 2013 Fall Quarter.

GEL 130—Non-Renewable Natural Resources (3)
Lecture—3 hours. Prerequisite(s): GEL 001 or GEL 050 Origin, occurrence, and distribution of non-renewable resources, including metallic, nonmetallic, and energy-producing materials. Problems of discovery, production, and management. Estimations and limitations of reserves, and their sociological, political, and economic effects. GE credit: SE, SL. Effective: 2016 Fall Quarter.
GEL 131—Risk: Natural Hazards and Related Phenomena (3)
Lecture—3 hours. Risk, prediction, prevention and response for earthquakes, volcanic eruptions, landslides, floods, storms, fires, impacts, global warming. GE credit: SE, SL. Effective: 2016 Fall Quarter.

GEL 132—Introductory Inorganic Geochemistry (3)
Lecture—3 hours. Prerequisite(s): GEL 060 (can be concurrent); CHE 002B Nucleosynthesis of chemical elements, physical and chemical properties of elements, ionic substitution, elemental partition, distribution and transport among planetary materials, basic thermodynamics and phase diagrams, isotopic geochronometers, stable isotope fractionation, mixing and dilution, advection and diffusion, geochemical cycles. Effective: 2016 Fall Quarter.

GEL 133—Environmental Geochemistry (3)
Lecture—3 hours. Prerequisite(s): CHE 002A; CHE 002B Introduction to Earth surface processes with a focus on topics of current environmental interest such as nuclear power and waste disposal, acid mine drainage, carbon sequestration, history of polar ice sheets and sea level change. Effective: 2020 Spring Quarter.

GEL 134—Environmental Geology and Land Use Planning (3)
Lecture—3 hours. Prerequisite(s): GEL 001 or GEL 050; Consent of Instructor. One course in Geology. Geologic aspects of land use and development planning. Geologic problems concerning volcanic and earthquake hazards, land stability, floods, erosion, coastal hazards, non-renewable resource extraction, waste disposal, water resources. GE credit: SE, WE. Effective: 2016 Fall Quarter.

GEL 136—Ecogeomorphology of Rivers and Streams (5)
Discussion/Laboratory—2 hours; Fieldwork; Lecture—1 hour; Term Paper. Prerequisite(s): Consent of Instructor. Upper division or graduate standing in any physical science, biological science, or engineering. Restricted to advanced students in the physical sciences, biological sciences, or engineering. Integrative multidisciplinary field analysis of streams. Class project examines hydrology, geomorphology, water quality and aquatic and riparian ecology of degraded and pristine stream systems. Includes cooperative two-week field survey in remote wilderness settings with students from diverse scientific backgrounds. GE credit: SE, WE. Effective: 2016 Fall Quarter.

GEL 138—Introductory Volcanology (4)
Fieldwork—6 hours; Lecture—2 hours. Prerequisite(s): GEL 060; GEL 109; Consent of Instructor. Principles of physical and chemical volcanology. Taught in a volcanically active setting (e.g., Hawaii) with a strong field component. GE credit: SE. Effective: 2016 Fall Quarter.

GEL 139—Rivers: Form, Function and Management (4)
Fieldwork—3 hours; Lecture—3 hours. Prerequisite(s): GEL 050 or GEL 050L; MAT 016B or 021B recommended. Analysis of river form and processes, emphasis on fluvial geomorphology, and river and stream restoration; case studies to illustrate concepts and applications. Two weekend field trips required. Offered irregularly. GE credit: SE. Effective: 2016 Fall Quarter.

GEL 140—Introduction to Process Geomorphology (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): (GEL 001 or GEL 050); (MAT 016B or MAT 021B) Quantitative description and interpretation of landscapes with emphasis on the relationships between physical processes, mass conservation, and landform evolution. Topics covered include physical and chemical weathering, hillslopes, debris flows, fluvial systems, alluvial fans, pedogenesis, eolian transport, glaciation and Quaternary geochronology. Effective: 2016 Fall Quarter.

GEL 141—Evolutionary History of Vertebrates (3)
Lecture—3 hours. Prerequisite(s): GEL 003 or BIS 002A Evolutionary history of vertebrates; fossil record and phylogeny; timing of major evolutionary events; appearance of major vertebrate groups; physical constraints in vertebrate evolution; paleobiogeography of vertebrates; effect of continental movement on vertebrate evolution; dinosaurs and other strange vertebrates. Offered in alternate years. GE credit: SE. Effective: 2016 Fall Quarter.

GEL 141L—Evolutionary History of Vertebrates Laboratory (1)
Laboratory—3 hours. Prerequisite(s): GEL 141 (can be concurrent) Augments lecture course 141 through handling of specimens enabling in-person examination of three dimensional features observed in vertebrate skeletons, both fossil and living. Offered in alternate years. GE credit: SE. Effective: 2016 Fall Quarter.

GEL 142—Basin Analysis (3)
Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): GEL 050; GEL 050L; GEL 109 Analysis of sedimentary basins from initiation to maturity, including controls on sedimentary fill, subsidence analysis, sequence stratigraphy, core logs, and applications to petroleum exploration and hydrology. One two-day field trip. Offered irregularly. GE credit: SE, VL. Effective: 2013 Fall Quarter.
GEL 143—Advanced Igneous Petrology (5)
Laboratory—6 hours; Lecture—3 hours. Prerequisite(s): GEL 105; (MAT 016C or MAT 021C); CHE 002C Physical and chemical properties of magmatic environments and processes of igneous rock formation. Laboratory study of representative igneous rocks. Offered irregularly. GE credit: SE. Effective: 2013 Fall Quarter.

GEL 144—Historical Ecology (3)
Lecture—3 hours. Prerequisite(s): Upper division course in environmental science or ecology, or an introductory course in paleobiology. Ancient ecosystems and the factors that caused them to change. Species, expansion, evolution of new modes of life, geologically induced variations in resource supply, and extinction provide historical perspective on the biosphere of future. GE credit: SE, WE. Effective: 2013 Fall Quarter.

GEL 145—Advanced Metamorphic Petrology (5)
Laboratory—6 hours; Lecture—3 hours. Prerequisite(s): GEL 106; (HYD 134 or CHE 002C); (MAT 016C or MAT 021C) Metamorphic processes and the origin of metamorphic rocks. Laboratory study of representative rock suites. Offered irregularly. GE credit: SE. Effective: 2013 Fall Quarter.

GEL 146—Radiogenic Isotope Geochemistry and Cosmochemistry (3)
Lecture—3 hours. Prerequisite(s): CHE 002C; PHY 007C; MAT 016C Basic principles of nuclear chemistry and physics applied to geology to determine the ages of terrestrial rocks, meteorites, archeological objects, age of the Earth, to trace geological/environmental processes, and explain formation of the chemical elements in the Universe. Offered irregularly. GE credit: QL, SE. Effective: 2013 Fall Quarter.

GEL 147—Geology of Ore Deposits (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): (CHE 002C or HYD 134); GEL 060; GEL 062; GEL 105 Tectonic, lithologic and geochemical setting of major metallic ore deposit types emphasizing ore deposit genesis, water/rock interaction and the environmental effects of mining. Offered irregularly. GE credit: QL, SE. Effective: 2013 Fall Quarter.

GEL 148—Stable Isotopes and Geochemical Tracers (3)
Lecture—3 hours. Prerequisite(s): (CHE 002C or HYD 134); GEL 050; GEL 050L; GEL 060 Use of oxygen and hydrogen isotopes in defining hydrologic processes; carbon, nitrogen, and sulfur isotopes as indicators of exchange between the lithosphere, hydrosphere, atmosphere and biosphere. Radiogenic, cosmogenic, and noble gas isotope tracers. Offered irregularly. GE credit: QL, SE. Effective: 2013 Fall Quarter.

GEL 149—Geothermal Systems (3)
Fieldwork; Lecture—3 hours. Prerequisite(s): GEL 050; GEL 050L; CHE 002B Geology, geochemistry, and geophysics of geothermal systems, including electrical power generation and direct use applications. Includes one day field trip on a weekend during the quarter. Offered irregularly. GE credit: SE. Effective: 2016 Fall Quarter.

GEL 150A—Physical and Chemical Oceanography (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (ESP 116N or GEL 116N); PHY 009B; MAT 021D; CHE 002C; and Consent of Instructor. Physical and chemical properties of seawater, fluid dynamics, air-sea interaction, currents, waves, tides, mixing, major oceanic geochemical cycles. (Same course as ESO 150A.) GE credit: QL, SE. Effective: 2017 Winter Quarter.

GEL 150B—Geological Oceanography (3)
Lecture—3 hours. Prerequisite(s): GEL 050 or (GEL 116N or ESP 116N) Introduction to the origin and geologic evolution of ocean basins. Composition and structure of oceanic crust; marine volcanism; and deposition of marine sediments. Interpretation of geologic history of the ocean floor in terms of sea-floor spreading theory. (Same course as ESP 150B.) GE credit: SE. Effective: 2017 Winter Quarter.

GEL 150C—Biological Oceanography (4)
Discussion—1 hour; Fieldwork; Lecture—3 hours. Prerequisite(s): BIS 002A; Consent of Instructor. A course in general ecology. Ecology of major marine habitats, including intertidal, shelf benthic, deep-sea and plankton communities. Existing knowledge and contemporary issues in research. Segment devoted to human use. One weekend field trip required. (Same course as ESP 150C.) GE credit: SE, SL. Effective: 2017 Winter Quarter.

GEL 152—Paleobiology of Protista (4)
Laboratory—6 hours; Lecture—2 hours. Prerequisite(s): GEL 107 or BIS 002A; Consent of Instructor. Morphology, systematics, evolution, and ecology of single-celled organisms that are preserved in the fossil record. Offered irregularly. GE credit: SE. Effective: 2016 Fall Quarter.

GEL 156—Hydrogeology and Contaminant Transport (5)
Laboratory—3 hours; Lecture—3 hours; Term Paper—1 hour. Prerequisite(s): HYD 145; ECI 144; Or equivalent of ECI
144. Physical and chemical processes affecting groundwater flow and contaminant transport, with emphasis on realistic hydrogeologic systems. Groundwater geology and chemistry. Fundamentals of groundwater flow and transport analysis. Laboratory includes field pumping test and work with physical and computer models. (Same course as HYD 146.) GE credit: SE. Effective: 2013 Fall Quarter.

GEL 160—Geological Data Analysis (3)
Lecture/Discussion—3 hours. Prerequisite(s): MAT 021A Introduction to quantitative methods in analyzing geological data including basic principles of statistics and probability, error analysis, hypothesis testing, inverse theory, time series analysis and directional data analyses. Use of computer in lectures and homework. GE credit: QL, SE. Effective: 2016 Fall Quarter.

GEL 161—Geophysical Field Methods (3)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): MAT 021C; (GEL 001 or GEL 050); (PHY 007C or PHY 009C) Geophysical methods applied to determining subsurface structure in tectonics, hydrogeology, geotechnical engineering, hydrocarbon and mineral exploration. Theory, survey design and interpretation of gravity, electrical resistivity, electromagnetic, reflection and refraction seismology, and ground-penetrating radar measurements. GE credit: QL, SE. Effective: 2016 Fall Quarter.

GEL 162—Geophysics of the Solid Earth (3)
Lecture—3 hours. Prerequisite(s): MAT 021C; (PHY 007C or PHY 009C); Consent of Instructor. Theory and use of physics in the study of the solid earth. Gravity, magnetism, paleomagnetism, and heat flow. Application to the interpretation of the regional and large-scale structure of the earth and to plate tectonics. Offered irregularly. GE credit: QL, SE. Effective: 2016 Fall Quarter.

GEL 163—Planetary Geology and Geophysics (3) Review all entries
Lecture—3 hours. Prerequisite(s): MAT 021C; (PHY 007C or PHY 009C); Consent of Instructor. Principles of planetary science. Planetary dynamics, including orbital mechanics, tidal interactions and ring dynamics. Theory of planetary interiors, gravitational fields, rotational dynamics. Physics of planetary atmospheres. Geological processes, landforms and their modification. Methods of analysis from Earth-based observations and spacecraft. GE credit: QL, SE. Effective: 2016 Fall Quarter.

GEL 163—Planetary Geology and Geophysics (3) Review all entries
Lecture—3 hours. Prerequisite(s): (GEL 001 or GEL 002 or GEL 028 or GEL 036 or GEL 050 or AST 010G or AST 010L or AST 010S or AST 025); (MAT 016A or MAT 017A or MAT 021A); (PHY 007A or PHY 009A); or High School Physics. Principles of planetary science. Planetary dynamics, including orbital mechanics, tidal interactions and ring dynamics. Theory of planetary interiors, gravitational fields, rotational dynamics. Physics of planetary atmospheres. Geological processes, landforms and their modification. Methods of analysis from Earth-based observations and spacecraft. GE credit: QL, SE. Effective: 2016 Fall Quarter.

GEL 175—Advanced Field Geology (3)
Discussion—3 hours; Fieldwork—6 hours. Prerequisite(s): Consent of Instructor. Advanced field studies of selected geologic terrains, interpretation and discussion of field observations. Offered irregularly. May be repeated up to 2 times when instructors vary. (P/NP grading only.) GE credit: SE. Effective: 2013 Fall Quarter.

GEL 181—Teaching in Science and Mathematics (2)
Fieldwork—2 hours; Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Major in mathematics, science, or engineering; or completion of a one-year sequence of science or calculus. Class size limited to 40 students per section. Exploration of effective teaching practices based on examination of how middle school students learn math and science. Selected readings, discussion and field experience in middle school classrooms. (Same course as EDU 181.) (P/NP grading only.) GE credit: SS, WE. Effective: 2013 Fall Quarter.

GEL 182—Field Studies in Marine Geochemistry (2-8)
Fieldwork—6-40 hours; Laboratory—1-3 hours; Lecture—3 hours. Prerequisite(s): Consent of Instructor. Marine geochemistry with the opportunity of going to sea or into the field on land. Techniques of sea-floor mapping using bottom photography, marine geochemical sampling, and method of data reduction and sample analysis. Analysis of data/samples collected. Offered irregularly. GE credit: SE. Effective: 2013 Fall Quarter.

GEL 183—Teaching High School Mathematics and Science (3) Review all entries
Fieldwork; Lecture/Discussion—2 hours. Prerequisite(s): Major in mathematics, science, or engineering; or consent of instructor with completion of a one-year sequence of science or calculus. Limited to 40 students per section. Exploration and creation of effective teaching practices based on examination of how high school students learn
mathematics and science. Field experience in high school classrooms. (Same course as Education 183.) GE credit: OL, SS, WE. Effective: 2017 Fall Quarter.

GEL 183—Teaching High School Mathematics and Science (3) Review all entries
Fieldwork; Lecture/Discussion—2 hours. Prerequisite(s): Major in mathematics, science, or engineering; or completion of a one-year sequence of science or calculus and consent of the instructor. Limited to 40 students per section. Exploration and creation of effective teaching practices based on examination of how high school students learn mathematics and science. Field experience in high school classrooms. (Same course as EDU 183.) GE credit: OL, SS, WE. Effective: 2018 Fall Quarter.

GEL 185A—Conceptual Integrated Science for Non-Science Majors: The Physical World (2)

GEL 185B—Conceptual Integrated Science for Non-Science Majors: Earth System Science (2)
Discussion/Laboratory—3 hours; Lecture—1 hour. Conceptual, inquiry-based integrated science course. Topics in the Next Generation Science Standards. Elementary school level teaching practice. Earth, space and environmental science, and science inquiry. GE credit: SE, SL. Effective: 2016 Fall Quarter.

GEL 186—Facilitating Learning in STEM Classrooms (1)
Lecture/Discussion—1 hour. STEM Learning Assistant Seminar. Theoretical and practical issues of effective teaching in discussion/labs: student-centered, active, cooperative learning environments, responsive teaching, and differentiated classroom instruction. GE credit: SS. Effective: 2016 Fall Quarter.

GEL 190—Seminar in Geology (1)
Discussion—1 hour; Seminar—1 hour. Presentation and discussion of current topics in geology by visiting lecturers, staff, and students. Written abstracts. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 2016 Fall Quarter.

GEL 192—Internship in Geology (1-12)
Internship. Prerequisite(s): Upper division standing; project approval prior to internship. Supervised work experience in geology. May be repeated for credit for a total of 10 units. May be repeated up to 10 unit(s). (P/NP grading only.) GE credit: SE. Effective: 2013 Fall Quarter.

GEL 194A—Senior Thesis (3)
Variable. Prerequisite(s): Open to Geology majors who have completed 135 units and who do not qualify for the Honors Program. Guided independent study of a selected topic, leading to the writing of a senior thesis. GE credit: SE, WE. Effective: 2013 Fall Quarter.

GEL 194B—Senior Thesis (3)
Variable. Prerequisite(s): Open to Geology majors who have completed 135 units and who do not qualify for the Honors Program. Guided independent study of a selected topic, leading to the writing of a senior thesis. GE credit: SE, WE. Effective: 2013 Fall Quarter.

GEL 194HA—Senior Honors Project (3)
Independent Study—9 hours. Prerequisite(s): Open to Geology majors who have completed 135 units and who qualify for the Honors Program. Guided independent study of a selected topic, leading to the writing of an honors thesis. GE credit: SE, WE. Effective: 2013 Fall Quarter.

GEL 194HB—Senior Honors Project (3)
Independent Study—9 hours. Prerequisite(s): Open to Geology majors who have completed 135 units and who qualify for the Honors Program. Guided independent study of a selected topic, leading to the writing of an honors thesis. GE credit: SE, WE. Effective: 2013 Fall Quarter.

GEL 198—Directed Group Study (1-5)
Variable—3-15 hours. Prerequisite(s): Senior standing in Geology or consent of instructor. Group study focused on topics in Geology. (P/NP grading only.) GE credit: SE. Effective: 2016 Spring Quarter.

GEL 199—Special Study for Advanced Undergraduates (1-5)
Variable. Special study for advanced undergraduates. (P/NP grading only.) GE credit: SE. Effective: 2013 Fall Quarter.

GEL 205—Advanced Field Stratigraphy (3)
Fieldwork—2 hours; Lecture—1 hour. Prerequisite(s): GEL 109; GEL 110; or Consent of Instructor. GEL 206
recommended. Fieldwork over spring break. Application of stratigraphic techniques to research problems. Collection, compilation, and interpretation of field data. Integration of data with models for deposition and interpretations of Earth history. Topics will vary. Offered irregularly. May be repeated for credit. Effective: 2013 Fall Quarter.

**GEL 206—Stratigraphic Analysis (3)**
Lecture—3 hours. Prerequisite(s): GEL 109; GEL 109L; or Consent of Instructor. GEL 144 recommended. Topics in advanced methods of stratigraphic analysis, regional stratigraphy and sedimentation, and sedimentary basin analysis. Emphasis on techniques used to interpret stratigraphic record and on current issues in stratigraphy and sedimentation. Offered irregularly. May be repeated for credit when topic differs. Effective: 2013 Fall Quarter.

**GEL 214—Active Tectonics (3)**
Lecture/Discussion—3 hours. Prerequisite(s): Graduate standing or consent of instructor. Active deformation associated with faults, landslides, and volcanoes. Geodetic measurement techniques such as triangulation, trilateration, leveling, Global Positioning System (GPS), and radar interferometry. GPS data acquisition and analysis. Inversion of geodetic data and mechanical models of crustal deformation. Offered irregularly. Effective: 2013 Fall Quarter.

**GEL 216—Tectonics (3)**
Lecture/Discussion—3 hours. Prerequisite(s): GEL 101; or Consent of Instructor. Nature and evolution of tectonic features of the Earth. Causes, consequences, and evolution of plate motion, with selected examples from the Earth’s deformed belts. Offered irregularly. Effective: 2013 Fall Quarter.

**GEL 217—Topics in Geophysics (3)**
Lecture—1 hour; Seminar—2 hours. Prerequisite(s): Consent of Instructor. Discussion and evaluation of current research in a given area of geophysics. Topic will change from year to year. Offered in alternate years. May be repeated for credit. Effective: 2013 Fall Quarter.

**GEL 218—Analysis of Structures in Deformed Rocks (3)**
Seminar—3 hours. Prerequisite(s): GEL 100; GEL 100L; GEL 101; GEL 101L; GEL 170; or Consent of Instructor. Recent advances in the understanding and analysis of structures in brittlely and ductilely deformed rocks. Detailed investigation of the characteristics of the structures, models for their formation, and applications to inferring the kinematics of larger scale tectonics. Offered irregularly. Effective: 2013 Fall Quarter.

**GEL 219—Fracture and Flow of Rocks (3)**
Lecture—3 hours. Prerequisite(s): GEL 100; GEL 101; or Consent of Instructor. Origins of those structures in rocks associated with brittle and ductile deformation. Theoretical analysis, using continuum mechanics, and experimental evidence for the origin of the structures with emphasis on deformational processes in the earth. Offered irregularly. Effective: 2013 Fall Quarter.

**GEL 220—Mechanics of Geologic Structures (3)**
Lecture—3 hours. Prerequisite(s): MAT 021C; (PHY 009A; or PHY 005A); GEL 170; or Consent of Instructor; MAT 021D and MAT 022A recommended. Development in tensor notation of the balance laws of continuum mechanics, and constitutive theories of elasticity, viscosity, and plasticity and their application to understanding development of geologic structures such as fractures, faults, dikes, folds, foliations, and boudinage. Offered irregularly. Effective: 2013 Fall Quarter.

**GEL 226—Advanced Sedimentary Petrology (3)**
Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): GEL 144; or Consent of Instructor. Advanced petrography and geochemistry of sediments and sedimentary rocks. Geochemical, textural and mineralogical evolution of sedimentary rocks reflecting depositional or burial processes. Laboratory work emphasizes thin section study of rocks. Offered irregularly. May be repeated for credit when topic differs. Effective: 2013 Fall Quarter.

**GEL 227—Stable Isotopes Biogeochemistry (4)**
Laboratory—6 hours; Lecture—2 hours. Prerequisite(s): Consent of Instructor. Graduate standing. Discussion and application of stable isotope techniques for scientific research problems. Course emphasizes carbon, oxygen, nitrogen, hydrogen and sulfur isotopes. Laboratory will develop basic skills of cryogenic gas extraction and specific techniques for individual research using stable isotopes. Offered irregularly. Effective: 2013 Fall Quarter.

**GEL 228—Topics in Paleoceanography (3)**
Lecture—3 hours. Prerequisite(s): GEL 108; GEL 150A; or Consent of Instructor. Critical discussion and review of selected topics in paleoceanography and paleoclimatology relating to the history of the processes controlling and
affecting climate change and ocean circulation throughout the geologic record. Topics vary. Offered irregularly. May be repeated for credit. Effective: 2013 Fall Quarter.

GEL 230—Geomorphology and River Management (3)
Seminar—3 hours. Prerequisite(s): GEL 139; Or equivalent; graduate standing. Impacts of management and land use activities on the geomorphology of rivers and streams. Evaluation and use of analytical tools for river assessment. Assessment of river and stream restoration strategies and emerging issues in river management. May be repeated for credit when topic differs. Effective: 2013 Fall Quarter.

GEL 232—The Oceans and Climate Change (3)
Lecture/Discussion—3 hours. Prerequisite(s): Graduate standing or consent of instructor. Modern climate change and linkages between the ocean-atmosphere-cryosphere-terrestrial climate system. Importance of the ocean in forcing climate change, and the impacts of anthropogenic processes on the ocean. Topics vary. Offered irregularly. May be repeated up to 3 time(s). Effective: 2013 Fall Quarter.

GEL 235—Surface Processes (3)
Seminar—3 hours. Prerequisite(s): GEL 050; GEL 050L; GEL 139; MAT 021B or MAT 016B recommended. Recent advances in the analysis of landforms and their evolution. Detailed investigation of the tools used to document surface processes. Evaluation of concepts and processes that govern landscape evolution. Offered irregularly. May be repeated for credit. Effective: 2013 Fall Quarter.

GEL 236—Inverse Theory in Geology and Geophysics (3)

GEL 238—Theoretical Seismology (3)
Lecture—3 hours. Prerequisite(s): Consent of Instructor. Elastodynamic wave equation. Greens functions and source representations. Ray theory. Plane and spherical waves and boundary conditions. Elastic wave propagation in stratified media. (P/F grading only.) Effective: 2013 Fall Quarter.

GEL 240—Geophysics of the Earth (3)

GEL 241—Geomagnetism (3)

GEL 242—Paleomagnetism (3)

GEL 246—Physical Chemistry of Metamorphic Processes (3)
Lecture—3 hours. Prerequisite(s): GEL 145; CHE 110A; or Consent of Instructor. Physiochemical principles of metamorphic mineral assemblages and methods of interpreting the paragenesis of metamorphic rocks. Offered irregularly. Effective: 2013 Fall Quarter.

GEL 247—Metamorphic Petrology Seminar (3)
Seminar—3 hours. Prerequisite(s): GEL 145; or Consent of Instructor. GEL 246 recommended. Selected topics in metamorphic petrology (e.g., mass transport processes, tectonic settings, geothermometry, thermal structure of metamorphic belts, regional studies). Offered irregularly. May be repeated for credit. (S/U grading only.) Effective: 2013 Fall Quarter.

GEL 250—Advanced Geochemistry Seminar (3)
Seminar—3 hours. Prerequisite(s): GEL 146; or Consent of Instructor. Critical review of selected topics in geochemistry including: ore genesis, hydrothermal and geothermal fluids, recent and ancient sediments, isotope
geology, origin and chemistry of the oceans. Subject varies yearly depending on student interest. May be repeated for credit. May be repeated for credit. Effective: 2013 Fall Quarter.

GEL 251—Advanced Topics in Isotope Geochemistry and Cosmochemistry (3)
Lecture/Discussion—2 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Astrophysical context on origin of Solar System, synthesis of chemical elements, condensation sequence, star and planet formation, cosmochronology, building blocks of planets, development on planets' layered structure, atmosphere and hydrosshore and the role of comets/asteroids for volatile delivery. Offered irregularly. May be repeated up to 3 time(s) when topics differs. Effective: 2013 Fall Quarter.

GEL 253—Current Topics in Igneous Petrology (3)
Seminar—3 hours. Prerequisite(s): GEL 143; or Consent of Instructor. Graduate standing in Geology. Topical seminar designed to help graduate students develop and maintain familiarity with current and past literature related to igneous rock petrogenesis. May be repeated for credit when topic differs. May be repeated for credit when topic differs. (S/U grading only.) Effective: 2013 Fall Quarter.

GEL 254—Physical Chemistry of Igneous Processes (3)
Lecture—3 hours. Prerequisite(s): CHE 110A; GEL 143; and Consent of Instructor. GEL 143 or consent of instructor; CHE 110B and CHE 110C recommended. Introduction of modern concepts in chemical thermodynamics and kinetics, and fluid dynamics of magmatic systems for graduate students in petrology. Offered irregularly. Effective: 2013 Fall Quarter.

GEL 255—Experimental Petrology (3)
Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): GEL 143; or Consent of Instructor. Introduction to techniques and methods of design and executing experiments on Earth-forming minerals and rocks. Problems and examples from igneous and metamorphic petrology will be utilized. Offered irregularly. Effective: 2013 Fall Quarter.

GEL 260—Paleontology (3)
Seminar—3 hours. Prerequisite(s): Graduate standing in geology or a biological science. Selected problems in paleontology. Subject to be studied will be decided at an organizational meeting. Offered irregularly. May be repeated for credit when topic differs. Effective: 2013 Fall Quarter.

GEL 261—Paleobiology Graduate Seminar 1: Evolutionary aspects (3)
Lecture—1 hour; Seminar—2 hours. Prerequisite(s): Graduate standing in Geology or a biological science; qualified undergraduates will be accepted on an exception-only basis. This course will treat one or more of several topics in paleobiology from a phylogenetic perspective, including major patterns in evolution, building the tree of life, extinction and phylogeny, phylogeny of major phyla, and the relation between taxonomy and phylogeny. May be repeated for credit when topic varies. Effective: 2013 Fall Quarter.

GEL 262—Paleobiology Graduate Seminar: Methodological aspects (3)
Lecture—1 hour; Seminar—2 hours. One or more major methods used in the study of fossils: Morphometrics and three-dimensional reconstruction of fossils, phylogenetic methodology, the application of geochemical techniques, and electron microscopy. May be repeated up to 4 time(s) topic varies. Effective: 2013 Fall Quarter.

GEL 281N—Instrumental Techniques for Earth Scientists (3)
Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): MAT 021A; MAT 021B; MAT 021C; ((PHY 007A, PHY 007B, PHY 007C) or (PHY 009A, PHY 009B, PHY 009C)); or Consent of Instructor. Laboratory research techniques for new graduate students in Geology. Demonstration of and exposure to appropriate techniques in research. Effective: 2013 Fall Quarter.

GEL 285—Field Studies in Marine Geochemistry (2-8)
Fieldwork—6-40 hours; Laboratory—1-3 hours; Lecture—3 hours. Prerequisite(s): Consent of Instructor. Marine geochemistry with the opportunity of going to sea or into the field on land. Techniques of seafloor mapping using bottom photography, marine geochemical sampling, and method of data reduction and sample analysis. Analysis of data/samples collected. Effective: 2013 Fall Quarter.

GEL 290—Seminar in Geology (1)
Discussion—1 hour; Seminar—1 hour. Presentation and discussion of current topics in geology by visiting lecturers, staff, and students. (S/U grading only.) Effective: 2013 Fall Quarter.

GEL 291—Geology of the Sierra Nevada (1)
Seminar. Prerequisite(s): Consent of Instructor. Short oral presentations by students and faculty concerning results of their past work and plans for future work in the Sierra. A written abstract is required following the format required at professional meetings. Offered irregularly. (S/U grading only.) Effective: 2013 Fall Quarter.
GEL 292—River Forum (1)
Seminar—1 hour. Prerequisite(s): Graduate standing. Review and discussion of latest research and fundamental issues surrounding riverine systems, with emphasis on physical processes. Topics vary. Offered irregularly. (S/U grading only.) Effective: 2013 Fall Quarter.

GEL 293—Geologic Event of the Week (1)
Discussion—0.5 hours; Seminar—0.5 hours. Prerequisite(s): Graduate standing. Seminar/discussion group to review and discuss recent earthquakes, volcanic eruptions, and other significant geologic events. The focus is on understanding the available observations, the physical processes behind each event, the geological setting, and societal consequences. Offered irregularly. May be repeated up to 3 time(s) for up to 3 units. (S/U grading only.) Effective: 2013 Fall Quarter.

GEL 294—Structure/Tectonics Forum (1)
Seminar—1 hour. Prerequisite(s): Graduate student in geology or consent of instructor. Seminar/discussion group to review and discuss latest research in structural geology and tectonics, and on-going research of participants. Topics will vary each quarter depending on the interests of the group. Occasional field trips to areas of current interest. May be repeated for credit when topic differs. (S/U grading only.) Effective: 2013 Fall Quarter.

GEL 295—Geophysics Forum (1)
Discussion—0.5 hours; Seminar—0.5 hours. Prerequisite(s): GEL 100; GEL 101; or Consent of Instructor. Seminar/discussion group to review and discuss latest research in geophysics, and on-going research of participants. Topics will change each quarter depending on the interests of the group. Offered irregularly. May be repeated for credit when topic differs. (S/U grading only.) Effective: 2013 Fall Quarter.

GEL 296—Advanced Problems in Tectonics (3)
Seminar—3 hours. Prerequisite(s): GEL 101; and Consent of Instructor. Seminar dealing with current problems in tectonics of selected regions. Topics will change from year to year. Emphasis on study of recent literature. Offered irregularly. May be repeated for credit. (S/U grading only.) Effective: 2013 Fall Quarter.

GEL 297—Geophysics Forum (1)
Discussion—0.5 hours; Seminar—0.5 hours. Prerequisite(s): Graduate student status in the Geology Department, or consent of instructor. Seminar/discussion group to review and discuss latest research in geophysics, and on-going research of participants. Topics will change each quarter depending on the interests of the group. Offered irregularly. May be repeated up to 3 time(s). (S/U grading only.) Effective: 2013 Fall Quarter.

GEL 298—Group Study (1-5)
Variable. Group study. Effective: 2013 Fall Quarter.

GEL 299—Research (1-12)
Variable. Research. (S/U grading only.) Effective: 2013 Fall Quarter.

GEL 390—Methods of Teaching Geology (2)
Extensive Writing/Discussion—2 hours. Prerequisite(s): Graduate student standing in Geology. Introduction to graduate-level writing and undergraduate-level teaching skills in geology. Persuasive (proposal) writing workshop; discussions on campus teaching resources, presenting information, managing classroom dynamics, evaluating student performance. Participation in teaching program required for Ph.D. in Geology. (S/U grading only.) Effective: 2014 Spring Quarter.

GEL 391—Ethical Issues in Earth Science (1)
Seminar—1 hour. Prerequisite(s): Graduate standing in Geology or consent of instructor. Reading and discussion of ethical issues arising in the earth sciences. Topics include scientific misconduct, gender equity in science, authorship of scientific papers, establishing priorities in research, and related issues. Offered irregularly. (S/U grading only.) Effective: 2013 Fall Quarter.

GEL 396—Teaching Assistant Training Practicum (1-4)
Variable. Teaching assistant training. May be repeated for credit. (P/NP grading only.) Effective: 2013 Fall Quarter.

Nematology Minor; Entomology & Nematology

For further information, see Entomology and Nematology.

(College of Agricultural and Environmental Sciences)
Steve Nadler, Ph.D., Chairperson of the Department
Joanna Chiu, Ph.D., Vice Chairperson of the Department

Department Office. 367 Briggs; 530-752-0300; http://entomology.ucdavis.edu/
Faculty. http://entomology.ucdavis.edu/Faculty/
Minor Advisor. S. Nadler

Graduate Study. Graduate degrees specializing in Nematology are offered through the Departments of Entomology and Plant Pathology, and through various Graduate Groups (Biochemistry, Ecology, Genetics, Plant Protection and Pest Management). Refer also to Graduate Studies.

Nematology Minor; Entomology & Nematology | NEM Courses

Courses in NEM:

NEM 010V—General Biology (4) Review all entries
Web Electronic Discussion—1 hour; Web Virtual Lecture—3 hours. Concepts and issues in biology. Emphasis on composition and structure of organisms; regulation and signaling; heredity, evolution and the interaction and interdependence among life forms and their environments. Significant writing is required. Designed for students not specializing in biology. Not open for credit to students who have completed course BIS 001A, BIS 001B, BIS 001C, BIS 002A, BIS 002B, BIS 002C, BIS 010 or BIS 010V. GE credit: SE, SL, WE. Effective: 2015 Fall Quarter.

NEM 010V—General Biology (4) Review all entries
Web Electronic Discussion—1 hour; Web Virtual Lecture—3 hours. Concepts and issues in biology. Emphasis on composition and structure of organisms; regulation and signaling; heredity, evolution and the interaction and
interdependence among life forms and their environments. Designed for students not specializing in biology. Not open for credit to students who have completed course BIS 002A, or BIS 002B, or BIS 002C, or BIS 010 or equivalent. GE credit: SE, SL. Effective: 2019 Winter Quarter.

NEM 100—General Plant Nematology (4)
Laboratory—6 hours; Lecture—2 hours. Prerequisite(s): BIS 001B or BIS 010 An introduction to the classification, morphology, biology, and control of the nematodes attacking cultivated crops. GE credit: SE. Effective: 2013 Fall Quarter.

NEM 100—Introduction to Nematology (2) Review all entries
Lecture—2 hours. Prerequisite(s): BIS 001B; or Consent of Instructor. Or the equivalent. The relationship of nematodes to human environment. Classification, morphology, ecology, distribution, and importance of nematodes occurring in water and soil as parasites of plants and animals. Effective: 2013 Fall Quarter.

NEM 110—Introduction to Nematology (2) Review all entries
Lecture—2 hours. Prerequisite(s): BIS 002B; or Consent of Instructor. Relationship of nematodes to the human environment. Classification, morphology, ecology, distribution, and importance of nematodes occurring in water and soil as parasites of plants and animals. Effective: 2019 Winter Quarter.

NEM 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 2013 Fall Quarter.

NEM 201—Molecular and Physiological Plant Nematology (2)
Discussion—1 hour; Lecture—1 hour. Prerequisite(s): BIS 101; PLP 120; (NEM 100 or NEM 110) Molecular biology and physiology of nematodes using Caenorhabditis elegans as a model, but with emphasis on plant-parasitic species. Plant responses to nematodes. Discussion of current literature emphasized. Effective: 2013 Summer Quarter.

NEM 203—Ecology of Parasitic Nematodes (2)
Discussion—1 hour; Lecture—1 hour. Prerequisite(s): (NEM 100 or NEM 110 or ENT 156); (EVE 101 or PLB 117) Major concepts in population and community ecology of animal- and plant-parasitic nematodes. Current advances in techniques, theory, and basic information about nematode-host dynamics, and application to management of nematode diseases. Effective: 2013 Fall Quarter.

NEM 204—Management of Plant-Parasitic Nematodes (2)
Laboratory—3 hours; Lecture—1 hour. Prerequisite(s): NEM 100 or NEM 110 Theory, foundation, principles and practices of nematode management. Techniques and equipment used to manage nematodes and methods used to analyze their effectiveness. Effective: 2013 Fall Quarter.

NEM 205—Insect Nematology and Biological Control (2)
Discussion—1 hour; Lecture—1 hour. Prerequisite(s): NEM 100; NEM 110; (ENT 100 or ENT 110) The biology of insect-parasitic nematodes, their effect on the host, and their potential as biological control agents of insect and other invertebrate pests. Application of ecological theory in classical and augmentative biological control. Effective: 2013 Fall Quarter.

NEM 206—Nematode Systematics and Evolution (2)
Laboratory—3 hours; Lecture—1 hour. Prerequisite(s): NEM 100 or NEM 110 or ENT 156; EVE 100 recommended. Nematode diversity as revealed by morphological and molecular evidence. Laboratory experience focuses on structural features used in taxonomy. Phylogenetic relationships based on morphological and molecular data used to consider patterns of character change among taxa. Effective: 2013 Fall Quarter.

NEM 210—Molecular Phylogenetic Analysis (3)
Laboratory—3 hours; Lecture—2 hours. Theory and practice of inferring phylogenetic trees using molecular sequence data. Practical techniques for obtaining sequence data, advantages and disadvantages of common approaches for inferring trees, statistical methods for comparing alternative hypotheses. (Same course as EVE 210.) Effective: 2013 Fall Quarter.

NEM 245—Field Nematology (1)
Fieldwork. Prerequisite(s): NEM 100 Sixday demonstration and field study in applied nematology including diagnosis and prediction of nematode field problem strategies for control field plot design, and establishment in association with diverse California crops. (S/U grading only.) Effective: 2013 Fall Quarter.

NEM 290—Seminar (1)
Seminar—1 hour. (S/U grading only.) Effective: 2013 Fall Quarter.
NEM 290C—Advanced Research Conference (1)
Discussion—1 hour. Prerequisite(s): Graduate standing and consent of instructor. Planning and results of research programs, proposals, and experiments. Discussion and critical evaluation of original research being conducted by the group. Discussion led by individual research instructors for research group. (S/U grading only.) Effective: 2013 Fall Quarter.

NEM 298—Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 2013 Fall Quarter.

NEM 299—Research (1-12)
Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 2013 Fall Quarter.

Nematology Minor; Entomology & Nematology | ENT Courses

Courses in ENT:

ENT 001—Art, Science and the World of Insects (3)
Laboratory—3 hours; Lecture—3 hours. Fusion of entomology and art to create an appreciation of insect biology, ecology, interactions with humans and importance in human culture. Multidisciplinary approaches in education and career paths in entomology and art will be highlighted. GE credit: AH, OL, SE, SS, VL, WE. Effective: 2013 Fall Quarter.

ENT 002—Biodiversity (3)
Lecture—2 hours; Lecture/Discussion—1 hour. Introduction to nature, scope and geographical distribution of biodiversity (diversity of life, with emphasis on plants and animals, especially insects). Humans and biodiversity - domestication, aesthetics, ethics and valuation. Species richness and "success". Biodiversity through time; monitoring, evaluation and conservation. Biomes-global, continental and Californian. (Same course as EVE 002.) GE credit: SE, SL, WE. Effective: 2013 Fall Quarter.

ENT 010—Natural History of Insects (3)
Lecture—3 hours. Introduction to the insects detailing their great variety, structures and functions, habits, and their significance in relation to plants and animals including man. Designed for students not specializing in entomology. Not open for credit to students who have had ENT 100, but students who have taken this course may take ENT 100 for credit. GE credit: SE, SL. Effective: 2013 Fall Quarter.

ENT 090X—Special Topics in Entomology (2)
Seminar—2 hours. Prerequisite(s): Consent of Instructor. Freshman seminar course for indepth examination of a special topic within the subject area. May be repeated up to 2 time(s). (P/NP grading only.) Effective: 2013 Fall Quarter.

ENT 092—Internship (1-12)
Variable—3-36 hours. Prerequisite(s): Consent of Instructor. Work-learn experience on and off campus in all subject areas offered by the department, supervised by a member of the faculty. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 2013 Fall Quarter.

ENT 099—Special Study for Undergraduates (1-5)
Effective: 2013 Fall Quarter.

ENT 100—General Entomology (4)
Lecture—3 hours; Term Paper—1 hour. Prerequisite(s): BIS 001B Biology, anatomy, physiology, development, classification, ecology and relation of insects to human welfare. GE credit: WE. Effective: 2013 Fall Quarter.

ENT 100—General Entomology (4)
Lecture—3 hours; Term Paper—1 hour. Prerequisite(s): BIS 002B; or Consent of Instructor. Biology, anatomy, physiology, development, classification, ecology and relation of insects to human welfare. GE credit: WE. Effective: 2019 Winter Quarter.

ENT 100L—General Entomology Laboratory (2)
Laboratory—6 hours. Prerequisite(s): ENT 100 (can be concurrent) Anatomy, development, population ecology, methods of collecting, classification and identification of insects of all orders and of major families. GE credit: VL. Effective: 2013 Fall Quarter.

ENT 101—Functional Insect Morphology (3)
Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): ENT 100 Study of the basic external and internal structures,
organs and tissues of insects, with emphasis on functional systems. Functional anatomy, histology and fine structures of important organs and tissues will be discussed. Effective: 2013 Fall Quarter.

**ENT 102—Insect Physiology (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ENT 100; Or course in physiology or invertebrate zoology. Processes by which insects maintain themselves, reproduce, and adapt to environment. Insects as models for basic/applied research through detailed analysis of metabolic, physiological, and behavioral processes. Emphasis on analysis of methodology, fact, and theory. GE credit: SE, WE. Effective: 2013 Fall Quarter.

**ENT 103—Insects Systematics (3)**
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): Introductory course in zoology or entomology. Principles and methods of systematics, with particular reference to insects. Emphasis on different theories of classification, and analysis of phylogenetic relationships. Effective: 2013 Fall Quarter.

**ENT 104—Behavioral Ecology of Insects (3)**
Lecture—3 hours. Prerequisite(s): Introductory biology or zoology. Basic principles and mechanisms of insect behavior and ecology. An evolutionary approach to understanding behavioral ecology of insects. Effective: 2013 Fall Quarter.

**ENT 105—Insect Ecology (4) Review all entries**
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): BIS 002B (can be concurrent); Consent of Instructor. Introduction to insect ecology combining fundamental concepts and questions in ecology with ideas, hypotheses and insights from insects. Integrates aspects of individual, population, community and ecosystem ecology. GE credit: OL, SE, SL, WE. Effective: 2017 Fall Quarter.

**ENT 105—Insect Ecology (4) Review all entries**
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): BIS 002B (can be concurrent); or Consent of Instructor. Introduction to insect ecology combining fundamental concepts and questions in ecology with ideas, hypotheses and insights from insects. Integrates aspects of individual, population, community and ecosystem ecology. GE credit: OL, SE, SL, WE. Effective: 2019 Spring Quarter.

**ENT 107—California Insect Diversity (5)**
Fieldwork—6 hours; Laboratory—6 hours; Lecture—1 hour. Prerequisite(s): An introductory course in entomology. Survey of the diversity of insects from selected ecological zones in California with emphasis on collection, identification, and natural history. GE credit: OL, SE, SL, WE. Effective: 2013 Fall Quarter.

**ENT 109—Field Taxonomy and Ecology (7)**
Laboratory—36 hours; Lecture—2 hours. Prerequisite(s): An introductory course in entomology or consent of instructor. GE credit: SE. Effective: 2013 Fall Quarter.

**ENT 110—Arthropod Pest Management (5)**
Laboratory—6 hours; Lecture—3 hours. Prerequisite(s): BIS 001B Development of the ecological basis for the integrated pest management paradigm with emphasis on agriculture. Ecological and practical aspects of control tactics. Laboratory emphasizes identification of pests and beneficials of agriculture and urban situations. GE credit: SE, WE. Effective: 2013 Fall Quarter.

**ENT 116—Freshwater Macroinvertebrates (3)**
Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): BIS 002B; Or equivalent. Limited enrollment. Biology, ecology and taxonomy of freshwater macroinvertebrates, including insects, crustaceans, molluscs, worms, leeches, flatworms and others. Adaptations to life in freshwater. Aquatic food webs. Uses of macroinvertebrates in water quality monitoring. Field trips during regular lab hours. GE credit: SE, SL. Effective: 2013 Fall Quarter.

**ENT 116L—Aquatic Insect Collection (2)**
Fieldwork—2 hours; Laboratory—4 hours. Prerequisite(s): ENT 100L or ENT 116 (can be concurrent); Or prior experience with insect/arthropod identification to Family level. Restricted to 25 students. Collection of aquatic insects and identification to the Family level. Collections will require two, one-day weekend field trips (by arrangement). Collection requirement is 40 Families. Effective: 2016 Fall Quarter.

**ENT 117—Longevity (4)**
Lecture—3 hours; Term Paper—1 hour. Prerequisite(s): Upper division standing or consent of instructor. Nature, origin, determinants, and limits of longevity with particular reference to humans; emphasis on implications of findings from non-human model systems including natural history, ecology and evolution of life span; description of basic demographic techniques including life table methods. (Same course as HDE 117) GE credit: SE, SL, WE. Effective: 2013 Fall Quarter.
ENT 119—Apiculture (3)
Lecture—3 hours. Biology and behavior of honeybees; communication, orientation, social organization, foraging activities, honey production, pollination activities. GE credit: OL, SE, VL, WE. Effective: 2016 Fall Quarter.

ENT 123—Plant-Virus-Vector Interaction (3)
Lecture—3 hours. Prerequisite(s): BIS 002A; BIS 101; PLB 105, PLP 120, and ENT 100 recommended. Analysis of interactions necessary for viruses to infect plants. Interactions among insect vectors and host plants involved in the plant-virus life cycle. Evolutionary aspects of the molecular components in viral infection and modern approaches to the interdiction of viral movement. (Same course as PBI 123 and PLP 123.) GE credit: SE, SL, WE. Effective: 2014 Winter Quarter.

ENT 135—Introduction to Biological Control (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ENT 100 or ENT 110 Effective: 2013 Fall Quarter.

ENT 153—Medical Entomology (3) Review all entries
Lecture—3 hours. Prerequisite(s): BIS 001A; BIS 001B; Upper division standing in one of the biological sciences, or consent of instructor. Basic biology and classification of medically important arthropods with special emphasis on the ecology of arthropod borne diseases and principles of their control. Relationships of arthropods to human health. GE credit: SE, SL, WE. Effective: 2013 Fall Quarter.

ENT 156—Biology of Parasitism (3) Review all entries
Lecture/Discussion—3 hours. Prerequisite(s): BIS 001A; or Consent of Instructor. Lectures on the biological and ecological aspects affecting host-parasite relationships using selected examples from protozoan and metazoon fauna. GE credit: SE. Effective: 2013 Fall Quarter.

ENT 156L—Biology of Parasitism Laboratory (1)
Laboratory—3 hours. Prerequisite(s): ENT 156 (can be concurrent); ENT 156 required concurrently or consent of instructor. Laboratory demonstrations using selected examples of protozoan and metazoon organisms along with various techniques used in parasitology to exemplify concepts presented in the lecture course. GE credit: SE. Effective: 2013 Fall Quarter.

ENT 158—Forensic Entomology (3) Review all entries
Laboratory—4 hours; Lecture—2 hours. Prerequisite(s): BIS 001B or ENT 100; Upper division standing. Arthropods, their general biology, succession, developmental cycles and population biology in matters of criminal prosecution and civil litigation. Emphasis on basic arthropod biology, ecological and developmental concepts and methods, development of reasoning abilities, implication, development of opinions and evidence. GE credit: WE. Effective: 2013 Fall Quarter.

ENT 180A—Experimental Ecology and Evolution in the Field (4) Review all entries
Fieldwork—3 hours; Lecture/Lab—3 hours. Prerequisite(s): (ENT 105 or ESP 100); EVE 100; EVE 101 Experimental design in field ecology. Examination of primary literature, experimental design, independent and collaborative research, analysis of data, development of original research paper based on field experiments. (Same course as EVE 180A.) GE credit: QL, SE, VL. Effective: 2014 Winter Quarter.
concurrent) or ESP 100 (can be concurrent) or EVE 101 (can be concurrent)); Due to the unusual nature of this course, all prospective students are strongly encouraged to contact the instructor. Experimental design in field ecology. Examination of primary literature, experimental design, independent and collaborative research, analysis of data, development of original research paper based on field experiments. (Same course as EVE 180A.) GE credit: QL, SE, VL. Effective: 2019 Winter Quarter.

**ENT 180B—Experimental Ecology and Evolution in the Field (4)** Review all entries
Fieldwork—3 hours; Lecture/Lab—3 hours. Prerequisite(s): (EVE 180A or ENT 180A); (EVE 100 or EVE 101 or ESP 100); ENT 105 Experimental design in field ecology. Examination of primary literature, experimental design, independent and collaborative research, analysis of data, development of original research paper based on field experiments. (Same course as EVE 180B.) GE credit: QL, SE, VL, WE. Effective: 2014 Winter Quarter.

**ENT 180B—Experimental Ecology and Evolution in the Field (4)** Review all entries
Fieldwork—3 hours; Lecture/Lab—3 hours. Prerequisite(s): EVE 180A or ENT 180A Experimental design in field ecology. Examination of primary literature, experimental design, independent and collaborative research, analysis of data, development of original research paper based on field experiments. (Same course as EVE 180B.) GE credit: QL, SE, VL, WE. Effective: 2019 Spring Quarter.

**ENT 192—Internship (1-12)**
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Completion of 84 units. Laboratory experience or fieldwork off and on campus in all subject areas offered in the Department of Entomology. Internships supervised by a member of the faculty. (P/NP grading only.) Effective: 2013 Fall Quarter.

**ENT 197T—Tutoring in Entomology (1-3)**
Discussion—1-3 hours. Leading small discussion groups. Preview assignments and prepare guidelines for discussion. (P/NP grading only.) Effective: 2013 Fall Quarter.

**ENT 198—Directed Group Study (1-5)**
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 2013 Fall Quarter.

**ENT 199—Special Study for Advanced Undergraduates (1-5)**
Variable. (P/NP grading only.) Effective: 2013 Fall Quarter.

**ENT 212—Molecular Biology of Insects and Insect Viruses (3)**

**ENT 214—Vector-borne Infectious Diseases: Changing Patterns (2)**
Lecture/Discussion—2 hours. Prerequisite(s): Open to graduate students, MPVM and MPH students, DVM and medical students with second- or third-year standing. Open to upper division undergraduate students with consent of instructor(s). Vector-borne infectious diseases especially as they relate to changing patterns associated with climatic changes, trade and population movement. (Same course as PMI 214.) Effective: 2013 Fall Quarter.

**ENT 225—Terrestrial Field Ecology (4)**
Fieldwork—12 hours; Seminar—1 hour. Prerequisite(s): Introductory ecology and introductory statistics or consent of instructor. A field course conducted over spring break and four weekends at Bodega Bay, emphasizing student projects. Ecological hypothesis testing, data gathering, analysis and written and oral presentation of results. (Same course as ECK 225 and PBG 225.) Effective: 2013 Fall Quarter.

**ENT 230—Advanced Biological Control (4)**
Laboratory—6 hours; Lecture—2 hours. Prerequisite(s): Graduate or upper division standing in biological science or consent of instructor. Principles and current issues in biological control of arthropod pests and weeds; laboratory devoted to identification and life history of the major groups of parasitic and predaceous arthropods. Effective: 2013 Fall Quarter.

**ENT 253—Advanced Medical Entomology (3)**
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): One upper division course in Entomology (other than ENT 153) and one course in Microbiology: ENT 153 strongly recommended. An analysis of several arthropod-borne human diseases with emphasis on the relationships of the biology of the vector to the ecology of the disease. Discussion includes demonstration of vectors and techniques. Effective: 2013 Fall Quarter.
ENT 290—Exploratory Topics in Entomology (2)
Seminar—2 hours. Interdisciplinary topics in entomology, including innovative applications of entomological concepts to other fields of research and human endeavor (e.g. medicine, technology, art, criminology). May be repeated up to 8 unit(s) when topic differs. Effective: 2013 Fall Quarter.

ENT 291—Current topics in Medical and Veterinary Entomology (2)
Seminar—2 hours. Prerequisite(s): ENT 153 Discussions of parasitology, ecology and epidemiology related to vectors of pathogens causing disease in humans and animals. May be repeated up to 1 time(s). Effective: 2013 Fall Quarter.

ENT 292—Current Topics in Insect Physiology and Behavior (2)
Seminar—2 hours. Prerequisite(s): ENT 102 if topic is physiology, a course in behavior if topic is behavior, or either if topic bridges both. Analysis of contemporary advances in insect physiology, biochemistry and/or behavior. Interpretation and description of physiological and behavioral mechanisms and functions. Application of general principles to solution of problems in the laboratory and field. May be repeated up to 8 unit(s) topic differs. Effective: 2013 Fall Quarter.

ENT 293N—Current Topics in Insect Biotechnology and Genomics (2)
Seminar—2 hours. Prerequisite(s): ENT 212 Discussion of advances in insect biotechnology, including genetic engineering and genomics. May be repeated up to 6 unit(s) topic differs. Effective: 2013 Fall Quarter.

ENT 294—Current topics in Insect Ecology, Evolution, and Systematics (2)
Seminar—2 hours. Prerequisite(s): ENT 103; General course in ecology or evolution. Discussions of advanced topics in ecology, evolution and systematics with emphasis on analysis of factors influencing the distribution, abundance, adaptations and evolutionary relationships of insects. Includes consideration of applications of basic theory (e.g. biological control). May be repeated up to 8 unit(s) topic differs. Effective: 2013 Fall Quarter.

ENT 295—Current Topics in Agricultural Entomology and Bee Biology (2)
Seminar—2 hours. Prerequisite(s): ENT 110 if topic relates to pests and beneficial predators; ENT 119 if topic is bee biology; either if topic bridges both. Discussion of advanced topics about the biology, ecology, behavior, and management of pest and beneficial insects. May be repeated up to 8 unit(s) if topic differs. Effective: 2013 Fall Quarter.

ENT 297N—Seminar in Entomology (1)
Seminar—1 hour. Weekly Entomology seminar. May be repeated up to 9 unit(s) topic differs. (S/U grading only.) Effective: 2013 Summer Quarter.

ENT 298—Group Study (1-5)
Variable. (S/U grading only.) Effective: 2013 Fall Quarter.

ENT 299—Research (1-12)
Variable. (S/U grading only.) Effective: 2013 Fall Quarter.

Neurobiology, Physiology, & Behavior

Neurobiology, Physiology, & Behavior | NPB B.S.
(College of Biological Sciences)
W. Martin Usrey, Ph.D., Chairperson of the Department

Department Office. 196 Briggs Hall; 530-752-0203; http://www.npb.ucdavis.edu

Faculty. http://npb.ucdavis.edu/facultyresearch/

The Neurobiology, Physiology, and Behavior Major Program

Neurobiology, Physiology, and Behavior is a major that emphasizes the understanding of vital functions common to all animals. All animals perform certain basic functions—they grow, reproduce, move, respond to stimuli, and maintain homeostasis. The physiological mechanisms upon which these functions depend are precisely regulated and highly integrated. Actions of the nervous and endocrine systems determine behavior and the interaction between organisms and their physical and social environments. Students in this major study functional mechanisms; the control, regulation, and integration of these mechanisms; and the behavior that relates to those mechanisms. They do so at the level of the cell, the organ system, and the organism.
The Program. In the freshman and sophomore years, students majoring in Neurobiology, Physiology, and Behavior build a broad scientific background, taking courses in chemistry, biology, physics, and mathematics. As juniors or seniors, students can enroll in a variety of Neurobiology, Physiology, and Behavior courses and related upper division courses. The NPB major contains three tracks: the Neurobiology track, the Physiology track, and the Organism-Environmental Interactions track.

Master Advisor. Dr. Hwai-Jong Cheng, M.D., Ph.D., Dr. Lee Miller, Ph.D.

Advising Center. Biology Academic Success Center (BASC); 1023 Sciences Laboratory Building; 530-752-0410; http://basc.ucdavis.edu/

Career Alternatives. Completion of the Neurobiology, Physiology, and Behavior major provides the foundation for advanced study leading to careers in high school teaching, college level teaching or research. It also serves as the basis for further training in the health professions, including but not limited to human and veterinary medicine, medical technology, physical therapy, pharmacy, nursing, dentistry and optometry. The major is also appropriate for those intending to seek careers in biotechnology or other biologically related industries.

Graduate Study. Information on graduate study in neuroscience, physiology or behavior may be obtained by writing the Graduate Adviser, College of Biological Sciences, Graduate Academic Programs. See also the graduate course offerings listed under Animal Behavior (Graduate Group), Molecular, Cellular, and Integrative Physiology (Graduate Group), Neuroscience (Graduate Group). See also Graduate Studies.

Units: 56-66
Choose three units of laboratory work from the track-specific list:

**Neurobiology Track:**
- NPB 100L Neurobiology Laboratory 3

**Physiology Track:**
- NPB 101L Systemic Physiology Laboratory 3

**Organism-Environmental Interactions Track:**
- NPB 101L Systemic Physiology Laboratory 3

**Integrative Track:**
- OR
- NPB 100L Neurobiology Laboratory 3

All students must do a minimum of four depth electives; three track-specific depth electives, and one Additional Depth Elective. At least two of these electives must be NPB courses. Up to four units of NPB 199 may be substituted for a single track-specific elective. Substitution must be pre-approved by NPB master advisor.

**Neurobiology Track:**
- NPB 124 Comparative Neuroanatomy 3
- OR
- PSC 124 Comparative Neuroanatomy 3
- NPB 101L Systemic Physiology Laboratory 3
- NPB 106 Experiments in Neurobiology, Physiology, and Behavior: Design and Execution 3
- NPB 107 Cell Signaling in Health and Disease 3
- NPB 161 Developmental Neurobiology 3
- NPB 162 Neural Mechanisms of Behavior 3
- NPB 163 Systems Neuroscience 4
- NPB 164 Mammalian Vision 4
- NPB 165 Neurobiology of Speech Perception 3
- NPB 166 Math Tools for Neuroscience 4
- NPB 167 Computational Neuroscience 5
- NPB 168 Neurobiology of Addictive Drugs 4
- NPB 169 Frontiers in Neurobiology 3
- NPB 171 Physiology of Neuroimmune Interactions 4
- NPB 172 Map Formation in the Brain 3
- NPB 173 Neurobiology of Brain Disorders 3
- PSC 130 Human Learning and Memory 4
- PSC 135 Cognitive Neuroscience: The Biological Foundations of the Mind 4
- PSC 137 Neurobiology of Learning & Memory 4

**Physiology Track:**
- ANS 123 Animal Growth and Development 4
- EXB 106 Human Gross Anatomy 4
- OR
- CHA 101 Human Gross Anatomy 4
- EXB 106L Human Gross Anatomy Laboratory 3

**Integrative Principles Track:**

Needs to be approved by a Master Advisor or BASC Advisor. Any courses in the Neurobiology, Physiology and Organism-Environment Interactions tracks.

One additional Neurobiology, Physiology, and Behavior depth unit requirement. 3-5

All other NPB or EXB courses not used in satisfaction of any other requirement, except NPB 100, 101, 102, and EXB 120; ENT 104; EVE 100; or MIC 102, can be used as additional depth electives. Courses 192, 197T may not be used to satisfy the depth unit requirement.

**Total: 100-115**

**Neurobiology, Physiology, & Behavior | EXB Courses**

**Courses in EXB:**

**EXB 010—Exercise and Fitness: Principles and Practice (3)** *Review all entries*

Lecture—3 hours. Human movement from physiological, psychological, sociological, and historical perspectives. Biology and psychology of exercise across the human lifespan. Not open for credit to students who have taken an upper division EXB course. GE credit: SE, SL. Effective: 2004 Winter Quarter.

**EXB 010—Exercise and Fitness: Principles and Practice (3)** *Review all entries Discontinued*

Lecture—3 hours. Human movement from physiological, psychological, sociological, and historical perspectives. Biology and psychology of exercise across the human lifespan. Not open for credit to students who have taken an upper division Exercise Biology course. GE credit: SE, SL. Effective: 2019 Fall Quarter.

**EXB 090C—Research Conference (1)**

Discussion—1 hour. Prerequisite(s): EXB 099 (can be concurrent); Lower division standing in Exercise Biology or related biological science and consent of instructor; EXB 099 required concurrently. Research findings and methods in exercise biology. Presentation and discussion of research by faculty and students. May be repeated for credit. (P/NP grading only.) Effective: 2006 Fall Quarter.

**EXB 090X—Lower Division Seminar (1-2)**

Lecture—1-2 hours. Prerequisite(s): Consent of Instructor. Lower division standing. Gives freshman or sophomore level students the opportunity to study a special topic in the general area of Exercise Biology in a small class setting. GE credit: SE. Effective: 1997 Winter Quarter.

**EXB 092—Exercise Biology Internship (1-5)**

Internship—3-15 hours. Prerequisite(s): Consent of Instructor. Enrollment dependent on availability of intern positions. Work experience in the application of physical activity programs to teaching, recreational, clinical or
research situations under department faculty supervision. May be repeated up to 1 time(s). No internship units will be counted towards the Exercise Biology major. (P/NP grading only.) Effective: 2003 Spring Quarter.

**EXB 097T—Tutoring in Exercise Biology (1-5)**

Tutorial—3–15 hours. Prerequisite(s): Consent of Instructor. Lower division standing. Assisting the professor by tutoring students in exercise biology course-related projects. May be repeated up to 10 unit(s) including courses EXB 097TC, EXB 197T and EXB 197TC. No tutorial units will be counted towards the Exercise Biology major. (P/NP grading only.) Effective: 2004 Fall Quarter.

**EXB 097TC—Tutoring Exercise Biology in the Community (1-5)**

Tutorial—3–15 hours. Prerequisite(s): Consent of instructor and chairperson. Tutoring in the community in exercise biology related projects under the guidance of the faculty. May be repeated up to 1 time(s). (P/NP grading only.) Effective: 2003 Spring Quarter.

**EXB 098—Directed Group Study (1-5)**

Variable. Prerequisite(s): Consent of instructor and chairperson. (P/NP grading only.) Effective: 1997 Winter Quarter.

**EXB 099—Special Study for Undergraduates (1-5)**

Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

**EXB 101—Exercise Physiology (4)**

Lecture—4 hours. Prerequisite(s): NPB 101 or NPB 110C; or Consent of Instructor. Physiology of Exercise; acute responses and adaptations to training. Neuromuscular function; bioenergetics; metabolic responses to acute exercise; adaptation to trainings; cardiorespiratory; and, applications to environmental physiology, and human health. GE credit: SE. Effective: 2019 Spring Quarter.

**EXB 102—Introduction to Motor Learning and the Psychology of Sport and Exercise (4)**

Lecture—4 hours. Prerequisite(s): PSC 001 recommended. Theoretical and practical issues in motor learning, sport psychology, and exercise psychology are examined. Emphasis is placed on how motor skills are acquired and retained, and on the application of social psychology and human motivation studies to human performance. Only 2 units of credit allowed for students who have completed EXB 104; only 2 units of credit allowed for students who have completed EXB 105; not open for credit to students who have completed EXS 104 and EXS 105. GE credit: SS. Effective: 2002 Winter Quarter.

**EXB 104L—Exercise Biology Laboratory (3)**

Discussion—1 hour; Laboratory—3 hours; Lecture—1 hour. Prerequisite(s): EXB 101 (can be concurrent); EXB 102 (can be concurrent); EXB 103 (can be concurrent); The last taken of the three courses may be taken concurrently. Principles and analytical procedures for assessing fundamental physiological, biomechanical, motor learning and motor control factors which underlie human movement and performance. Only 1 unit of credit allowed to students who have completed EXS 101L; only 1 unit of credit allowed to students who have completed EXS 103; not open for credit to students who have completed EXS 101L and EXS 103. (Former EXS 101L and EXS 103.). GE credit: SE, WE. Effective: 2004 Winter Quarter.

**EXB 106—Human Gross Anatomy (4)**

Lecture—4 hours. Prerequisite(s): BIS 002A; Concurrent enrollment in EXB 106L or CHA 101L strongly recommended. Upper division students only; Pass One open to upper division Exercise Biology or Anthropology majors only; Pass Two open to Seniors in any major; open enrollment at the start of the quarter for upper division students in any major. Detailed study of the gross anatomical structure of the human body, with emphasis on function and clinical relevance to students entering health care professions. (Same course as CHA 101.) GE credit: SE. Effective: 2010 Fall Quarter.

**EXB 106L—Human Gross Anatomy Laboratory (3)**

Laboratory—9 hours. Prerequisite(s): BIS 002A; EXB 106 (can be concurrent) or CHA 101 (can be concurrent); Must have completed EXB 106 or CHA 101 or required concurrently. Upper division students only; Pass One open to upper division Exercise Biology or Anthropology majors only; Pass Two open to Seniors in any major; open...
enrollment at the start of the quarter for upper division students in any major; mandatory attendance on first day of lab. Detailed study of prospected human cadavers in small group format with extensive hands-on experience. (Same course as CHA 101L.) GE credit: SE. Effective: 2010 Fall Quarter.

**EXB 110—Exercise Metabolism (3)**
Lecture—3 hours. Prerequisite(s): EXB 101 or NPB 101 or NPB 110C Exercise metabolism, with emphasis on skeletal muscle and cardiac muscle metabolism during activity and inactivity. Basics of bioenergetics, substrate utilization, and cell signaling; mechanisms that regulate these properties, and differences between skeletal muscle and cardiac muscle metabolism. GE credit: SE. Effective: 2018 Winter Quarter.

**EXB 111—Environmental Effects on Physical Performance (3)**
Discussion/Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): EXB 101; or Consent of Instructor. The effects of thermal, barometric and gravitational conditions on physiological function and physical performance of humans. Acute and chronic effects, emphasizing physiological adaptations and limitations, will be studied. GE credit: QL, SE. Effective: 2007 Winter Quarter.

**EXB 112—Clinical Exercise Physiology (4)**
Review all entries
Discussion/Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): EXB 101; or Consent of Instructor. Physical activity as a therapeutic modality in normal and diseased populations (cardiovascular, pulmonary, diabetic). Effects of exercise and inactivity in terms of normal physiology, pathophysiology, and therapeutic benefit. Exercise fitness and disease assessment methods. GE credit: SE, SL. Effective: 2009 Spring Quarter.

**EXB 115—Biomechanical Bases of Movement (3)**
Discussion—1 hour; Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): EXB 103; or Consent of Instructor. Biomechanical bases of human movement investigated; topics include musculo-skeletal mechanics, tissue mechanics, electromyography, and measurement and analysis techniques. Application made to sport, clinical, and work environments, including extensive analysis of locomotion. GE credit: QL, SE, VL, WE. Effective: 1997 Winter Quarter.

**EXB 116—Nutrition for Physically Active Persons (3)**
Lecture—3 hours. Prerequisite(s): EXB 101; NPB 101 The role of nutrition and exercise in modifying metabolism, body composition, performance and health of humans. GE credit: SE. Effective: 1997 Winter Quarter.

**EXB 117—Exercise and Aging in Health and Disease (3)**
Review all entries
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): EXB 101 or EXB 113 (can be concurrent) Etiology of and standard therapy for various diseases associated with aging (e.g., cardiovascular, pulmonary, renal diseases, diabetes, obesity, lipemias, etc.). Exercise will then be considered as a protective and/or therapeutic modality. GE credit: SE. Effective: 2007 Spring Quarter.

**EXB 120—Sport in American Society (3)**
Lecture—3 hours. Sociological approaches to the study of sport and contemporary American culture, including sport interaction with politics, economics, religion, gender, race, media and ethics. Socialization factors involving youth, scholastic, collegiate, and Olympic sport. (Same course as PHE 120.) GE credit: SS. Effective: 2009 Summer Session 1.

**EXB 121—Advanced Sport Psychology (3)**
Lecture—3 hours. Prerequisite(s): EXB 102; PSC 001 recommended. Advanced study and consideration of major theoretical and practical issues in sport psychology. Emphasis on practical application to sport and human performance. Effective: 2010 Winter Quarter.

**EXB 122—Psychological Effects of Physical Activity (3)**
Lecture—3 hours. Prerequisite(s): PSC 001 or PSC 001Y Upper division standing. Physical activity is evaluated in
terms of its ability to enhance the quality of life. Topics studied include: individual factors (self concept, type A); special populations (elderly, cardiovascular); and mental health changes (depression, anxiety). Effective: 2018 Spring Quarter.

**EXB 124—Physiology of Maximal Human Performance (4)**
Lecture—3 hours; Practice—4 hours. Prerequisite(s): EXB 101; or Consent of Instructor. BIS 101, BIS 102, and BIS 103 recommended. Molecular mechanisms underlying adaptation to training. Learn how to exercise to maximize their own performance as well as learning how the frequency, intensity and timing of exercise and nutrition affect the molecular signals that underlie performance. GE credit: SE. Effective: 2011 Winter Quarter.

**EXB 125—Neuromuscular and Behavioral Aspects of Motor Control (3)**
Discussion/Laboratory—2 hours; Lecture—2 hours. Prerequisite(s): EXB 101 Factors which affect control of movement from neuropsychological, physiological, behavioral, and mechanical viewpoints. Topics include central vs. peripheral control mechanisms, open and closed loop theories, motor programming, cognitive learning strategies, and the effects of biochemical and biomechanical influences. GE credit: SE. Effective: 2006 Fall Quarter.

**EXB 148—Theory and Practice of Exercise Testing (1)**
Lecture/Discussion—1 hour. Prerequisite(s): EXB 112 (can be concurrent) Theory and practice of exercise testing applied to older adult populations. Physiological responses to and limitations of exercise testing. Application of exercise testing and training to healthy and diseased populations. (P/NP grading only.) GE credit: SE. Effective: 2006 Fall Quarter.

**EXB 148L—Adult Fitness Testing Laboratory (1)**
Laboratory—3 hours. Prerequisite(s): EXB 148 (can be concurrent); EXB 148 required concurrently. Testing symptomatic and asymptomatic older adults for functional aerobic capacity, body composition, blood lipids, pulmonary function, and cardiovascular disease risk. Counseling adults in appropriate exercise programs and lifestyle modifications. Two quarters minimum; third quarter permitted. (Former course Physical Education 148L). May be repeated up to 2 time(s). (P/NP grading only.) GE credit: QL, SE. Effective: 2006 Fall Quarter.

**EXB 179—Frontiers in Exercise Biology (3)**
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): EXB 101; EXB 102; EXB 103 (can be concurrent); EXB 104L recommended. Lectures by leading authorities and discussion of the latest research in newly emerging areas in exercise biology. Offered every fourth year. GE credit: SE. Effective: 2007 Spring Quarter.

**EXB 189—International Perspectives in Exercise Biology (4)**
Lecture—4 hours. Prerequisite(s): EXB 010; Or upper division standing in Exercise Biology; consent of instructor: students will be accepted based upon academic merit, personal experience, and academic discipline in order to provide multidisciplinary perspectives. Restricted to 22 students. Compare and contrast exercise science issues between the US and an international location. Identify political, economic, cultural, technological and environmental issues that impact human exercise, physical activity, wellness, and sport from a global perspective. Effective: 2009 Summer Session 1.

**EXB 190C—Research Conference (1)**
Discussion—1 hour. Prerequisite(s): EXB 099 (can be concurrent); Upper division standing in Exercise Biology or related biological science and consent of instructor; EXB 199 required concurrently. Restricted to upper division students. Research findings and methods in exercise biology. Presentation and discussion of research by faculty and students. May be repeated for credit. (P/NP grading only.) Effective: 2006 Fall Quarter.

**EXB 192—Exercise Biology Internship (1-12)**
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Enrollment dependent on availability of intern positions. Work experience in the application of physical activity programs to teaching, recreational, clinical or research situations under program faculty supervision. Written report required. May be repeated up to 15 unit(s) including course 92. (P/NP grading only.) Effective: 2003 Spring Quarter.

**EXB 194H—Research Honors (2)**
Independent Study—6 hours. Prerequisite(s): Senior standing, minimum of 6 units of EXB 199, 3.50 GPA or greater in major courses, consent of honors thesis advisor. Completion of individual honors research project in Exercise Biology, under the guidance of an Exercise Biology faculty advisor, culminating in written honors thesis. (P/NP grading only.) GE credit: SE. Effective: 2004 Fall Quarter.

**EXB 197T—Tutoring in Exercise Biology (1-5)**
Tutorial—3-15 hours. Prerequisite(s): Consent of Instructor. Upper division standing. Assisting the instructor by tutoring students in exercise biology course-related projects. May be repeated up to 10 unit(s) including courses.
EXB 097T, EXB 097TC and EXB 197TC. No tutorial units will be counted towards the Exercise Biology major. (P/NP grading only.) Effective: 2004 Fall Quarter.

**EXB 197TC—Tutoring Exercise Biology in the Community (1-5)**
Tutorial—3-15 hours. Prerequisite(s): Consent of instructor and chairperson. Tutoring in the community in exercise biology related projects under the guidance of the faculty. May be repeated up to 10 unit(s) including courses 97T, 97TC and 197T. (P/NP grading only.) Effective: 2003 Spring Quarter.

**EXB 198—Directed Group Study (1-5)**
Variable. Prerequisite(s): Consent of instructor and chairperson. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

**EXB 199—Special Study for Advanced Undergraduates (1-5)**
Variable. Prerequisite(s): Consent of chairperson. (P/NP grading only.) Effective: 1997 Winter Quarter.

### Neurobiology, Physiology, & Behavior | NPB Courses

**Courses in NPB:**

**NPB 010—Elementary Human Physiology (3)**
Lecture—3 hours. Introduction to physiology for non-science majors. Includes basic cell physiology and survey of major organ systems and how they function in homeostasis and human health. Not open for credit to students who have completed NPB 101. GE credit: SE. Effective: 2016 Winter Quarter.

**NPB 011—Exercise and Fitness: Principles and Practice (3)**
Lecture—3 hours. Human movement from physiological, psychological, sociological, and historical perspectives. Biology and psychology of exercise across the human lifespan. Not open for credit to students who have taken EXB 010 or an upper division Exercise Biology or Neurology, Physiology & Behavior course. GE credit: SE, SL. Effective: 2019 Fall Quarter.

**NPB 012—The Human Brain and Disease (3)**
Lecture—3 hours. Normal function and diseases of the human brain and nervous system. Diseases discussed include Parkinson’s, Alzheimer’s, leprosy, amnesia and schizophrenia. Intended for non-science majors. Not open for credit for students who have completed NPB 100, NPB 101, NPB 112, or PSC 121. GE credit: SE, SL. Effective: 1997 Spring Quarter.

**NPB 013—Extreme Animal Athletes (3)**
Lecture—3 hours. Overview of biomechanics, focusing on animal locomotion. Physical principles underlying traits such as speed, maneuverability, endurance, and precision. Comparisons of animals and human athletes performing similar feats, with animals often outperforming humans by a wide margin. Biomechanical concepts through hands-on exercises, problem sets, and readings from the scientific literature. GE credit: QL, SE, SL. Effective: 2018 Fall Quarter.

**NPB 014—Illusions: Fooling the Brain (3)**
Lecture—3 hours. Introduction to perceptual processing in the human nervous system; illusions. GE credit: QL, SE, SL. Effective: 2012 Winter Quarter.

**NPB 015—The Biology and Physiology of Aging (4)**
Discussion—1 hour; Lecture—3 hours. Broad examination of age-associated changes in body functions. Includes basic cell physiology, a survey of major organ systems and the age-induced alterations in system function. Some age-associated diseases will also be examined. Intended for non-science majors. Not open for credit to students who have completed NPB 15V. GE credit: SE. Effective: 2012 Fall Quarter.

**NPB 015V—The Biology and Physiology of Aging (4)**
Web Electronic Discussion—1 hour; Web Virtual Lecture—3 hours. Broad examination of the biological and physiological basis of aging in animals and plants. Concepts in demographic, evolutionary, genetic, and cell aging. Major human organ systems, age-related alterations in system function, and age-related diseases. Intended for non-science majors. Not open for credit to students who have completed NPB 15. GE credit: SE, SL. Effective: 2012 Fall Quarter.

**NPB 017—The Path to Cyborgs: Introduction to Prostheses and Human Machine Interfaces (3)**
NBP 018—Biological Science for Social Justice (3)
Lecture—3 hours. Broad survey of the many ways one can use the biological sciences to better the lives of others and break down barriers that have restricted social mobility. GE credit: DD, SE, SL, SS. Effective: 2018 Spring Quarter.

NBP 068—Biology of Drug Addiction and Abuse (3)
Lecture—3 hours. Broad examination of addictive substances and their use/abuse. Topics include historical perspective, physiological effects, etiology, neurobiology of addiction and the impact of drugs on contemporary society. Intended for non-science majors. Not open for credit to students having completed NPB 168. Effective: 2008 Spring Quarter.

NBP 090A—Lower Division Seminar: Issues in Body Weight Regulation (2)

NBP 090B—Human Color Perception (2)
Seminar—2 hours; Term Paper. Prerequisite(s): Lower division standing. Class size limited to 15 students with lower division standing. Neural determinants of color appearance, and why we see the world in the way we do. Discussions center around demonstrations of color phenomena and what they tell us about the human brain. Effective: 2008 Spring Quarter.

NBP 090C—Current Issues in Animal Behavior (2)
Seminar—2 hours. Prerequisite(s): Lower division standing. Limited enrollment. The mechanisms and outcomes of sexual selection (mate choice and mate competition). Theory, current models and evidence that supports or refutes the models. Effective: 2003 Winter Quarter.

NBP 090D—Lower Division Seminar: Current Issues in Reproductive Endocrinology (2)
Seminar—2 hours. Prerequisite(s): Lower division standing. Limited enrollment. The integrative roles of reproductive hormones in mammalian reproduction and health. Current theory and models regarding hormone function and use in reproductive health and contraception, and evidence that supports or refutes the models. Effective: 2002 Fall Quarter.

NBP 090E—Biology of Aging (2)

NBP 090F—Visual Impairment and Blindness: A World Wide Problem (2)
Seminar—2 hours. Prerequisite(s): Lower division standing. Examination of various abnormalities of the eye and the important geographic and cultural factors that influence the epidemiology of those abnormalities. Effective: 2007 Winter Quarter.

NBP 091C—Research Conference (1)
Discussion—1 hour. Prerequisite(s): NPB 099 (can be concurrent); and Consent of Instructor. Lower division standing in Neurobiology, Physiology and Behavior or related biological science; NPB 099 required concurrently. Restricted to lower division students. Research findings and methods in neurobiology, physiology, and/or behavior. Presentation and discussion of research by faculty and students. May be repeated for credit. (P/NP grading only.) Effective: 2003 Fall Quarter.

NBP 092—Internship (1-12)
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Lower division standing. Work experience off and on campus in all subject areas offered in the Department of Neurobiology, Physiology, and Behavior. Internships supervised by a member of the faculty. May be repeated for credit. (P/NP grading only.) Effective: 2008 Fall Quarter.

NBP 098—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Lower division standing. (P/NP grading only.) Effective: 2000 Winter Quarter.

NBP 099—Special Study for Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. Lower division standing. (P/NP grading only.) Effective: 1999 Winter Quarter.
NPB 100—Neurobiology (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): BIS 002A; PHY 009A, PHY 009B or PHY 007A, PHY 007B recommended. Brains and nervous systems, neurons and neural circuits. Coordination of movement. Development of nervous systems. Vision, hearing, and feature extraction by the central nervous system. The cell biology of learning and memory. Perception, cognition, and disorders of the brain. Not open for credit to students who have completed NPB 110B, NPB 112, NPB 160, NPB 161 or NPB 162, or NSC 221 or NSC 222. GE credit: QL, SE. Effective: 2018 Spring Quarter.

NPB 100L—Neurobiology Laboratory (3)
Extensive Writing/Discussion; Laboratory—3 hours; Lecture—1 hour. Prerequisite(s): NPB 100 (can be concurrent) or NPB 110B (can be concurrent) Experimental basis of neurobiology principles discussed in course 100. Topics include neurophysiology, sensory systems, motor systems, cellular neuroscience, cognitive neuroscience, and quantitative data analysis and modeling techniques. GE credit: SE. Effective: 2017 Winter Quarter.

NPB 100Q—Quantitative Foundations of Neurobiology (1)
Auto Tutorial—1.5 hours; Extensive Problem Solving—1.5 hours. Prerequisite(s): NPB 100 (can be concurrent) Computational methods and mathematical models used to study phenomena in neurobiology. GE credit: QL, VL. Effective: 2010 Spring Quarter.

NPB 101—Systemic Physiology (5)
Lecture—5 hours. Prerequisite(s): BIS 001A or BIS 002A; CHE 002B; PHY 001B or PHY 007C strongly recommended. Systemic physiology with emphasis on aspects of human physiology. Functions of major organ systems, with the structure of those systems described as a basis for understanding the functions. Not open for credit to students who have completed NSC 110C. GE credit: SE. Effective: 2017 Winter Quarter.

NPB 101—Systemic Physiology (5)
Lecture—5 hours. Prerequisite(s): BIS 002A; (CHE 002B or CHE 002BH); PHY 001B or PHY 007C strongly recommended. Systemic physiology with emphasis on aspects of human physiology. Functions of major organ systems, with the structure of those systems described as a basis for understanding the functions. Not open for credit to students who have completed NPB 110C. GE credit: SE. Effective: 2019 Winter Quarter.

NPB 101D—Systemic Physiology Discussion (1.5)
Discussion—1.5 hours. Prerequisite(s): NPB 101 (can be concurrent); Consent of Instructor. Discussion and problem solving related to fundamental principles of systemic physiology as presented in course 101. (P/NP grading only.) Effective: 2017 Spring Quarter.

NPB 101L—Systemic Physiology Laboratory (3)
Discussion—2 hours; Laboratory—3 hours; Term Paper. Prerequisite(s): NPB 101 or NPB 110C Selected experiments to illustrate functional characteristics of organ systems discussed in course 101. Effective: 2017 Winter Quarter.

NPB 102—Animal Behavior (3)
Lecture—3 hours. Prerequisite(s): (BIS 001A, BIS 001B, BIS 001C) or (BIS 002A, BIS 002B, BIS 002C) Basic principles of behavioral organization in vertebrate and invertebrate animals. Underlying physiological and ethological mechanisms. The evolution of behavior, with special emphasis on behavior under natural conditions. Not open for credit to students who have completed NPB 155. (Former NPB 155.). GE credit: SL. Effective: 2008 Fall Quarter.

NPB 102Q—Quantitative Topics in Animal Behavior (1)
Auto Tutorial—1.5 hours; Extensive Problem Solving—1.5 hours. Prerequisite(s): MAT 016B; NPB 102 (can be concurrent) Study of the quantitative concepts and exemplar models used in animal behavior. Effective: 2009 Spring Quarter.

NPB 103—Cellular Physiology/Neurobiology (3)
Lecture—3 hours. Prerequisite(s): (BIS 103 or BIS 105); BIS 104; PHY 007C recommended. Cellular physiology with emphasis on membrane transport processes and neuronal physiology. Fundamental physical-chemical and biological mechanisms of membrane transport will be considered in relation to cytoplasmic homeostasis, communication between cells,and the cellular mechanisms of sensory and motor transduction. Not open for credit to students who have completed NPB 100B. (Former NPB 100B.). Effective: 2008 Spring Quarter.

NPB 104L—Cellular Physiology/Neurobiology Laboratory (4)
Discussion—1 hour; Laboratory—3 hours; Lecture—1 hour; Term Paper/Discussion. Prerequisite(s): NPB 101L; (BIS 103 or BIS 105) Experiments in the physical and chemical processes of cells and tissues. Effective: 2018 Winter Quarter.

NPB 105—Introduction to Computer Models (4)
Lecture—3 hours; Lecture/Lab—1 hour. Prerequisite(s): CHE 002C; PHY 007C; (NPB 100 or NPB 101); MAT 016C; Or
the equivalent to MAT 016C. Introduction to the ideas, mathematical techniques and computer tools required for developing models of cellular processes in physiology and neurobiology. Applications include membrane transport, ionic channels, action potentials, Ca2+ oscillations, respiration, and muscle contraction. Effective: 1997 Winter Quarter.

NPB 106—Experiments in Neurobiology, Physiology, and Behavior: Design and Execution (3)
Discussion—0.5 hours; Laboratory—7.5 hours. Prerequisite(s): (NPB 110A or NPB 100 or NPB 101 or NPB 102); NPB 199; and Consent of Instructor. Design and execution of experiments in neurobiology, physiology, and/or behavior. Students choose and design a project in consultation with the sponsoring faculty member. May be repeated once for credit to complete the project, with consent of instructor. May be repeated up to 1 time(s). (P/NP grading only.) GE credit: OL, QL, VL, WE. Effective: 2018 Winter Quarter.

NPB 107—Cell Signaling in Health and Disease (3)
Lecture—3 hours. Prerequisite(s): BIS 102 or BIS 105 Basics of cell signaling pathways, their disruption in disease, and their current utility and future potential as therapeutic targets. Focus is on signaling pathways specific to nervous, endocrine and immune systems, and those fundamental to all cells. GE credit: SL. Effective: 2009 Winter Quarter.

NPB 108Y—Animal Behavior Laboratory (3)
Lecture—3 hours; Web Electronic Discussion—12 hours. Hybrid course, consisting of limited in-person lectures and the rest laboratory exercises. The laboratory exercises will be online, and will require students to view and score videos of animal behavior in order to test behavioral hypotheses. Effective: 2016 Summer Session 2.

NPB 109—Kinesiology—Analysis and Control of Human Movement (4)
Lecture—4 hours. Prerequisite(s): PHY 007A; PHY 007B; NPB 101 or NPB 110C recommended; CHA 101 and CHA 101L (same as EXB 106 and EXB 106L) or equivalent recommended. Functional anatomy, motor control, and biomechanics of human movement understood in the context of body structures, basic principles of physics, and functional characteristics of muscle. GE credit: SE. Effective: 2018 Spring Quarter.

NPB 110A—Foundations 1: From Molecules to Individuals (5)
Discussion—1 hour; Lecture—4 hours. Prerequisite(s): (BIS 002A, BIS 002B); (CHE 002B or CHE 003A); PHY 007A and PHY 007B recommended; BIS 002C recommended. Pass One restricted to majors in Neurobiology, Physiology and Behavior. Major concepts in cell biology with special emphasis on connections between cell biology and behavior. Includes: cellular metabolism, cellular sensing and signaling, membrane structure-function, molecular switches, electrical and chemical signaling, endocrine signaling, cell cycle and differentiation, cytoskeleton, and integrative examples. Credit limited to 3 units for students who have taken BIS 104. GE credit: SE. Effective: 2018 Winter Quarter.

NPB 110B—Foundations 2: Neurobiology (5)
Discussion—1 hour; Lecture—4 hours. Prerequisite(s): NPB 110A C- or better; PHY 007A and PHY 007B recommended. Open to declared NPB majors only. Core concepts of neurobiology including single-neuron biophysics, synapses and transmitters, neuronal development, motor systems, central pattern generation, neuronal circuits, intracellular signal transduction, sensory processing, multisensory integration, autonomic nervous system, neuromodulation, learning and memory, and higher cognition and disease. Credit limited to 2 units for students who have taken NPB 100. GE credit: SE. Effective: 2017 Winter Quarter.

NPB 110C—Foundations 3: Physiology (5) Review all entries
Discussion—1 hour; Lecture—4 hours. Prerequisite(s): NPB 110A C- or better; PHY 007A; PHY 007B and PHY 007C recommended. Open to declared NPB majors only. Focuses on the structure, function, and interactions of animal organ systems in homeostasis and reproduction, and the response to perturbations of homeostasis; neural and endocrine signaling; skeletal muscle and movement; cardiovascular and respiratory systems; renal, digestive, immune, and reproductive physiology. Credit limited to 2 units for students who have taken NPB 101. GE credit: SE. Effective: 2018 Winter Quarter.

NPB 110C—Foundations 3: Physiology (5) Review all entries
Discussion—1 hour; Lecture—4 hours. Prerequisite(s): NPB 110A C- or better; PHY 007A; PHY 007B and PHY 007C recommended. Open to declared NPB majors only. Focuses on the structure, function, and interactions of human and other animal organ systems in homeostasis and reproduction, and the response to perturbations of homeostasis; neural and endocrine signaling; skeletal muscle and movement; cardiovascular and respiratory systems; renal, digestive, immune, and reproductive physiology. Credit limited to two units for students who have taken NPB 101. GE credit: SE. Effective: 2019 Winter Quarter.
NPB 111L—Advanced Systemic Physiology Laboratory (4)
Discussion—2 hours; Laboratory—6 hours; Lecture—1 hour. Prerequisite(s): NPB 101L Selected comprehensive experiments in the autonomic nervous system and the cardiovascular, respiratory, and neuromuscular systems. Emphasis on conceptual and methodological approaches in demonstrating the physiology of organ systems. Effective: 2018 Winter Quarter.

NPB 113—Cardiovascular, Respiratory, and Renal Physiology (4)
Lecture—4 hours. Prerequisite(s): (NPB 110C or NPB 101); CHE 008B, PHY 007B and PHY 007C recommended. An intense and advanced presentation of concepts in cardiovascular, respiratory, and renal physiology including discussion of acid-base balance. Effective: 2018 Winter Quarter.

NPB 114—Gastrointestinal Physiology (3)
Lecture—3 hours. Prerequisite(s): (NPB 110C or NPB 101); BIS 105 or BIS 103 recommended, BIS 105 preferred. Gastrointestinal anatomy and physiology. Digestion, secretion, absorption, motility, comparative physiology and pathology. Strong emphasis on neural and hormonal regulation and on cellular mechanisms of secretion and absorption. Effective: 2018 Winter Quarter.

NPB 116—Stress Physiology in Health and Disease (3)
Lecture—3 hours. Prerequisite(s): BIS 002A C- or better; or Consent of Instructor. Adaptive and maladaptive physiological responses to acute and chronic stress in mammals, with emphasis on humans. Role of endocrine and autonomic nervous system in stress response. Prenatal and postnatal effects of stress on cognitive and affective development. Wellness interventions. Effective: 2019 Winter Quarter.

NPB 117—Avian Physiology (3)
Lecture—3 hours. Prerequisite(s): (BIS 002A, BIS 002B); CHE 002B; NPB 101 or NPB 110C strongly recommended. Physiology of the various systems of birds with emphasis on digestion, respiration, excretion, and endocrine systems. Effective: 2018 Spring Quarter.

NPB 121—Physiology of Reproduction (4)
Lecture/Discussion—4 hours. Prerequisite(s): NPB 101 or NPB 110C or ANS 100 Physiological mechanisms related to reproduction, breeding efficiency and fertility, with special reference to domestic animals. GE credit: QL, SL. Effective: 2018 Spring Quarter.

NPB 121L—Physiology of Reproduction Laboratory (1)
Laboratory—3 hours. Prerequisite(s): NPB 121 (can be concurrent) Experiments on the reproductive systems of domestic animals including male and female gametes. (P/NP grading only.) Effective: 2017 Spring Quarter.

NPB 122—Developmental Endocrinology (3)
Lecture—3 hours. Prerequisite(s): NPB 101 Restricted to upper division standing. Hormonal control of development, maturation and senescence from the cellular to organismal level, with emphasis on the human. Prenatal and neonatal life, childhood and adolescence, adulthood and pregnancy, as well as the endocrinology of aging. Effective: 2003 Spring Quarter.

NPB 123—Comparative Vertebrate Organology (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): (BIS 001A, BIS 001B) or (BIS 002A, BIS 002B) Functional anatomy of major organ systems in vertebrates. Each system examined from cellular to gross level in fish, birds, and mammals. Emphasis on how differentiated cell types are integrated into tissues and organs to perform diverse physiological functions. (Same course as APC 100.) Effective: 2008 Winter Quarter.

NPB 124—Comparative Neuroanatomy (4) Review all entries
Laboratory—2 hours; Lecture—3 hours. Prerequisite(s): PSC 101 or NPB 100 or NPB 101 Overview of the neuroanatomy of the nervous system in a variety of mammalian and non-mammalian vertebrates. Examine changes or modifications to neural structures as a result of morphological or behavioral specializations. (Same course as Psychology 124) GE credit: SL. Effective: 1997 Fall Quarter.

NPB 124—Comparative Neuroanatomy (3) Review all entries
Lecture—3 hours. Prerequisite(s): NPB 101 or NPB 100 or NPB 110B or PSC 121 Overview of the neuroanatomy in mammalian vertebrates, focusing on the cerebral cortex and experimental techniques. Examine changes or modifications to neural structures as a result of morphological or behavioral specializations. (Same course as PSC 124.) Effective: 2018 Fall Quarter.

NPB 124L—Comparative Neuroanatomy Laboratory (2)
Laboratory—6 hours. Prerequisite(s): NPB 124 (can be concurrent) Pass One restricted to PSC and NPB majors; must be concurrently enrolled in NPB 124. Comparative neuroanatomy laboratory illustrating modern neuroanatomical
techniques in determining neural connections within the mammalian brain. Includes experimentation and presentation of results. (Same course as PSC 124L.) Effective: 2018 Fall Quarter.

NPB 126—Comparative Physiology: Sensory Systems (3)
Lecture—3 hours. Prerequisite(s): NPB 100 or NPB 101 Basic physiological mechanisms involved in sensory systems. Comparative approach to considerations of mechanosensitive systems (audition, lateral lines, touch, echolocation, equilibrium), chemosensitive systems (olfaction, taste, pheromones), photosensitive systems (vision, infrared detection, UV detection), electoreception, and pain. Emphasis on receptors. Effective: 1997 Winter Quarter.

NPB 128—Comparative Physiology: Endocrinology (3)
Lecture—3 hours. Prerequisite(s): NPB 101 Comparison of physiological functions in the animal kingdom: animal hormones and their functions. Effective: 1997 Winter Quarter.

NPB 130—Physiology of the Endocrine Glands (4)
Lecture—4 hours. Prerequisite(s): NPB 110C or NPB 101 Advanced presentation of concepts in endocrinology with emphasis on the role of hormones in reproduction, metabolism, and disease. GE credit: VL. Effective: 2018 Winter Quarter.

NPB 132—Nature vs. Nurture: Physiological Interactions Among Genes, Nutrients and Health (3)
Lecture—3 hours. Prerequisite(s): BIS 001A or BIS 002A; or Consent of Instructor. Biochemical, physiological, genetic, and nutritional causes of important medical problems such as obesity, anorexia, heart disease and diabetes. One unit of credit allowed to students who have completed NPB 131. Effective: 2008 Fall Quarter.

NPB 133—Genes and the Brain (4)
Lecture—4 hours. Prerequisite(s): NPB 110B or NPB 100; or Consent of Instructor. BIS 101 recommended. Genetic contributions to brain evolution, development and disorders. Topics include evolution of genomic programs of neurodevelopment and the role of genetics in autism, intellectual disability, and schizophrenia. GE credit: SE. Effective: 2018 Fall Quarter.

NPB 134—General Immunology for Physiologists (3)
Lecture—2 hours; Lecture/Discussion—1 hour. Prerequisite(s): NPB 101 C- or better or NPB 110C C- or better; or Consent of Instructor. Immunology for undergrads interested in physiology aimed at understanding the physiological role of immune responses. Illustrated with examples of human diseases including diabetes, allergies and asthma, and emerging diseases such as Ebola and Zika. GE credit: SE. Effective: 2017 Fall Quarter.

NPB 139—Frontiers in Physiology (3)
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): NPB 100; NPB 101; NPB 102 (can be concurrent) Lectures by leading authorities and discussion of the latest research in newly emerging areas in physiology. Offered every fourth year. GE credit: QL, SE. Effective: 2010 Fall Quarter.

NPB 140—Principles of Environmental Physiology (3) Review all entries
Lecture—3 hours. Prerequisite(s): NPB 101; BIS 102 recommended. Physiological aspects of interactions of organisms and environmental, cellular, system, and organismal levels. Emphasis on regulatory responses/mechanisms to thermal, pressure, gravity and light environmental variables. Not open for credit to students who have completed course 148. (Former course 148.). GE credit: WE. Effective: 1997 Winter Quarter.

NPB 140—Principles of Environmental Physiology (3) Review all entries
Lecture—3 hours. Prerequisite(s): NPB 101 or NPB 110C; BIS 102 recommended. Physiological aspects of interactions of organisms and environmental, cellular, system, and organismal levels. Emphasis on regulatory responses/mechanisms to thermal, pressure, gravity and light environmental variables. Not open for credit to students who have completed NPB 148. (Former NPB 148.). GE credit: WE. Effective: 2018 Fall Quarter.

NPB 141—Physiological Adaptation of Marine Organisms (3)

NPB 141P—Physiological Adaptation of Marine Organisms/Advanced Laboratory Topics (5)
Discussion—1 hour; Laboratory—12 hours. Prerequisite(s): NPB 141 (can be concurrent); Residence at Bodega Marine Laboratory required; NPB 141 required concurrently. Students must submit application available at http://www.bml.ucdavis.edu. Training in scientific research from hypothesis to publication, including methods of library research. Research related to a topic covered in course 141. GE credit: VL, WE. Effective: 2006 Spring Quarter.
NPB 142—Environmental Endocrinology: Mechanisms for Life Cycles (3)
Lecture—3 hours. Prerequisite(s): BIS 002A; BIS 002B; BIS 002C Effects of environmental factors on endocrine responses that affect vertebrate life history and fitness. Introduction to finite state machine theory and allostasis in life histories and coping strategies. Focus on life history stages including non-breeding, hibernation, reproduction, migration and moult. GE credit: SE, WE. Effective: 2015 Winter Quarter.

NPB 150—Advanced Animal Behavior (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): NPB 102 or PSC 101; or Consent of Instructor. Advanced integrative survey of biological principles of behavioral organization, emphasizing historical roots, current research directions, conceptual issues and controversies. Laboratory exercises on the description and analysis of the behavior of captive and free-living animals. (Same course as PSC 122.) Effective: 2018 Winter Quarter.

NPB 152—Hormones and Behavior (3)
Lecture—3 hours. Prerequisite(s): (NPB 101 or NPB 110C); (NPB 102 or PSC 101) Endocrine physiology with an emphasis on the principles of behavior. Fundamental relationships between hormones and various behaviors engaged in by the organism during its lifetime. Role of hormones in behavioral homeostasis, social behavior, reproductive behavior, parental behavior, adaptation to stress. (Same course as PSC 123.) Effective: 2018 Winter Quarter.

NPB 157—Advanced Physiology of Animal/Human Disease (3)
Lecture—1 hour; Lecture/Discussion—2 hours. Prerequisite(s): NPB 101 B+ or better or NPB 110C B+ or better; Consent of Instructor. Limited to 35 students initially. Centers on fundamental mechanisms and pathophysiological basis for animal and human diseases. Course is case-based and uses animal and human diseases to help exemplify the physiological consequences of organ dysfunction. (Same course as HPH 157.) Effective: 2017 Spring Quarter.

NPB 159—Frontiers in Behavior (3) Review all entries
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): NPB 100; NPB 101; NPB 102 Lectures by leading authorities and discussion of the latest research in newly emerging areas in behavioral biology. Offered every fourth year. GE credit: QL, SE. Effective: 2010 Fall Quarter.

NPB 161—Developmental Neurobiology (3)
Lecture—3 hours. Prerequisite(s): NPB 100 or NPB 101 or NPB 110B Issues, theoretical concepts, and methodologies in developmental neurobiology. Topics include prenatal and postnatal differentiation of neurons, and plasticity in the mature and aging brain. Integration of neurochemical, structural, physiological and behavioral perspectives. GE credit: SE. Effective: 2018 Winter Quarter.

NPB 162—Neural Mechanisms of Behavior (3)
Lecture—3 hours. Prerequisite(s): NPB 100 or NPB 101 or NPB 10B Relationship between brain and behavior. Identification and analysis of the relevant neural circuits involved. Examples of systems to be considered are birdsong, locomotion, echolocation. Effective: 2018 Winter Quarter.

NPB 163—Systems Neuroscience (4)
Lecture—3 hours; Lecture/Discussion—1 hour. Prerequisite(s): NPB 100 or NPB 110B; Or equivalent basic neuroscience training with consent of instructor. Concepts and techniques in systems neuroscience: e.g., measuring and manipulating neural activity, structure of neocortex, sensory processing, motor control, storage of information, neural codes, neural mechanisms underlying cognitive functions. GE credit: SE. Effective: 2017 Spring Quarter.

NPB 164—Mammalian Vision (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): NPB 100 or NPB 110B or PSC 101 Structure and function of the mammalian visual system, from the formation of images on the retina through visually guided behavior and perception. Emphasis on biological mechanisms underlying vision. Effective: 2017 Spring Quarter.

NPB 165—Neurobiology of Speech Perception (3)
Lecture—3 hours. Prerequisite(s): NPB 110B or NPB 100 or NPB 101; or Consent of Instructor. Interdisciplinary approach to speech perception with emphasis on functional neuroanatomy and behavior. Topics include auditory processing in time and space, intelligibility in noisy environments, visual speech, evolution of vocal communication, models of speech perception, development, and hearing impairment. GE credit: SL. Effective: 2018 Winter Quarter.
NPB 166—Math Tools for Neuroscience (4)
Lecture—4 hours. Prerequisite(s): (NPB 100 or NPB 110B); (MAT 016A, MAT 016B, MAT 016C) or (MAT 017A, MAT 017B, MAT 017C) or (MAT 021A, MAT 021B, MAT 021C); or Consent of Instructor. Introduction to mathematics techniques used in neuroscience. Applications to neuroscience of differential equations, linear algebra, Fourier transforms, correlation and convolution, and probability theory. GE credit: QL. Effective: 2018 Winter Quarter.

NPB 167—Computational Neuroscience (5)
Lecture—4 hours; Lecture/Lab—3 hours. Prerequisite(s): (NPB 100 or NPB 110B); (MAT 016A, MAT 016B, MAT 016C) or (MAT 017A, MAT 017B, MAT 017C) or (MAT 021A, MAT 021B, MAT 021C); or Consent of Instructor. PHY 007A, PHY 007B or equivalent recommended. Mathematical models and data analysis techniques used to describe computations performed by nervous systems. Lecture topics include single neuron biophysics, neural coding, network dynamics, memory, plasticity, and learning. Lab topics include programming mathematical models and data analysis techniques in MATLAB. GE credit: QL, SE. Effective: 2018 Winter Quarter.

NPB 168—Neurobiology of Addictive Drugs (4)
Lecture/Discussion—4 hours. Prerequisite(s): NPB 100 or NPB 110B or NPB 110C or NPB 101; Or equivalents. Neurobiological basis for the effects and mechanisms of action of drugs with addictive potential, including opiates (morphine, heroin, methadone), amphetamines, cocaine, nicotine, marijuana (cannabinoids), alcohol, caffeine, and mind-altering drugs such as LSD and antidepressants. GE credit: SL, VL. Effective: 2018 Winter Quarter.

NPB 169—Frontiers in Neurobiology (3)
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): NPB 100; NPB 101; NPB 102 (can be concurrent) Lectures by leading authorities and discussion of the latest research in newly emerging areas in neurobiology. Offered every fourth year. GE credit: QL. Effective: 2010 Fall Quarter.

NPB 171—Physiology of Neuroimmune Interactions (4)
Lecture—3 hours; Lecture/Discussion—1 hour. Prerequisite(s): BIS 002A; (NPB 012 (can be concurrent) or NPB 100 (can be concurrent) or NPB 110B (can be concurrent)); or Consent of Instructor. Completion of PMI 126 or MMI 188 recommended prior to this course. Explores the complex interactions of the nervous and immune systems, and examine how the systems function together to serve homeostasis, behavior, and disease (such as Alzheimer's, autism, and multiple sclerosis). GE credit: SL. Effective: 2017 Fall Quarter.

NPB 172—Map Formation in the Brain (3)
Lecture—3 hours. Prerequisite(s): NPB 100 C- or better or NPB 110B C- or better; or equivalent basic neuroscience training with consent of instructor. Topographic map connection is a fundamental principle for establishing neural network in the brain. This course will provide comprehensive understanding of the current concepts of map formation in various sensory and motor nervous systems. GE credit: SE. Effective: 2017 Spring Quarter.

NPB 173—Neurobiology of Brain Disorders (3)
Lecture—3 hours. Prerequisite(s): NPB 110B or NPB 100; or Consent of Instructor. Examination of brain disorders from a basic science perspective to gain insights into the mechanisms of their action. Genetic, molecular, cellular, circuit, and environmental basis of a variety of brain disorders. How insights about underlying mechanisms may lead to the development of improved therapies. Effective: 2018 Spring Quarter.

NPB 190C—Research Conference (1)
Discussion—1 hour. Prerequisite(s): NPB 199 (can be concurrent); and Consent of Instructor. Upper division standing in Neurobiology, Physiology, and Behavior or related biological science; NPB 199 required concurrently. Research findings and methods in neurobiology, physiology, and/or behavior. Presentation and discussion of research by faculty and students. May be repeated for credit. May be repeated for credit. (P/NP grading only.) Effective: 1999 Spring Quarter.

NPB 192—Internship (1-12)
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Completion of 84 units. Work experience off and on campus in all subject areas offered in neurobiology, physiology, & behavior. May be repeated for credit. (P/NP grading only.) Effective: 2008 Fall Quarter.

NPB 194HA—Neurobiology, Physiology, and Behavior—Honors (1)
Laboratory—12 hours. Prerequisite(s): Senior standing; minimum 3.500 GPA in courses counted toward major; approval by the master advisor. Honors project in Neurobiology, Physiology, and Behavior. Laboratory research on a specific question. The project is developed with the sponsoring faculty member and approved by the student's Honors Thesis Committee. Honors thesis to be submitted upon completion of the project. (P/NP grading only.) Effective: 1997 Winter Quarter.
NPB 194HB—Neurobiology, Physiology and Behavior–Honors (4)
Laboratory—12 hours. Prerequisite(s): Senior standing; minimum 3.500 GPA in courses counted toward major; approval by the master advisor. Honors project in Neurobiology, Physiology, and Behavior. Laboratory research on a specific question. The project is developed with the sponsoring faculty member and approved by the student’s Honors Thesis Committee. Honors thesis to be submitted upon completion of the project. (P/NP grading only.) Effective: 2003 Spring Quarter.

NPB 194HC—Neurobiology, Physiology, and Behavior–Honors (2)
Laboratory—12 hours. Prerequisite(s): Senior standing; minimum 3.500 GPA in courses counted toward major; approval by the master advisor. Honors project in Neurobiology, Physiology, and Behavior. Laboratory research on a specific question. The project is developed with the sponsoring faculty member and approved by the student’s Honors Thesis Committee. Honors thesis to be submitted upon completion of the project. (P/NP grading only.) Effective: 1997 Winter Quarter.

NPB 197T—Tutoring in Neurobiology, Physiology, and Behavior (1-5)
Discussion—2-6 hours. Prerequisite(s): Consent of Instructor. Upper division standing. Assisting the instructor by tutoring students in one of the Department’s regular courses. May be repeated for credit. (P/NP grading only.) Effective: 2008 Fall Quarter.

NPB 198—Directed Group Study (1-5)
Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

NPB 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

NPB 211—Advanced Topics in Neuroimaging (3)
Laboratory—1 hour; Seminar—2 hours. Prerequisite(s): PSC 210; or Consent of Instructor. Restricted to 16 students. Critical presentation and discussion of the most influential advanced issues in neuroimaging, emphasizing fMRI design/analysis and the integration of fMRI with EEG/MEG. May be repeated for credit. Course may be repeated when topics differ. (Same course as NSC 211 and PSC 211.) (S/U grading only.) Effective: 2017 Spring Quarter.

NPB 212—Light and Fluorescence Microscopy (3)
Laboratory—1 hour; Lecture—2 hours. Prerequisite(s): Consent of Instructor. Restricted to maximum 16 students. Theory and practical application of light and fluorescence microscopy in the biological sciences. Laboratory component will focus on an optics bench, where we build simple compound and confocal microscopes on an optical rail. Effective: 2017 Spring Quarter.

NPB 217—Advanced Avian Physiology (1)
Project (Term Project)—1 hour. Prerequisite(s): NPB 117; and Consent of Instructor. Graduate standing; NPB 117 required concurrently. Study in depth of a topic in avian physiology through development of a lecture with associated instructional materials such as lesson plan, readings, presentation, and evaluation aids. Effective: 2009 Summer Session 1.

NPB 221—Cellular Neuroscience (4)
Discussion—1.5 hours; Lecture—3 hours. Advanced course on cellular and subcellular organization of the nervous system. Membrane channels, sensory transduction, synaptic transmission and cellular aspects of development and learning. Effective: 2015 Winter Quarter.

NPB 222—Systems Neuroscience (5)
Discussion—1 hour; Lecture—4 hours. Prerequisite(s): Graduate standing or consent of instructor. Integrative and information-processing aspects of nervous system organization. Topics include sensory systems, motor function, sensorimotor integration, the limbic system, and the neurobiology of learning and memory. (Same course as NSC 222.) Effective: 2002 Winter Quarter.

NPB 245—Computational Models of Cellular Signaling (3)
Lecture—3 hours. Prerequisite(s): Consent of Instructor. Computational and mathematical techniques in modeling of regulatory and signaling phenomena in neurobiology and cell physiology, focusing on linear and nonlinear ordinary differential equation models. Applications include ion channel kinetics, electrical activity, signal transduction, calcium oscillations, and simple neural circuits. Effective: 1997 Winter Quarter.

NPB 247—Topics in Functional Neurogenomics (2)
Discussion—1 hour; Lecture—1 hour. Prerequisite(s): Graduate standing or consent of instructor. The theory, methods and principles of functional neurogenomics with emphasis on the relationship to molecular mechanisms involved in development and disease of the nervous system. (Same course as NSC 247.) Effective: 2003 Spring Quarter.
NPB 261A—Topics in Vision: Eyes and Retinal Mechanisms (2)
Lecture/Discussion—2 hours. Prerequisite(s): NPB 100 or NPB 112; Or the equivalent; graduate standing. Structure and function of the visual system, with emphasis on the eye and retina, including optics, anatomy, transduction, retinal synapses, adaptation, and parallel processing. (Same course as NSC 261A and MCP 261A.) (S/U grading only.) Effective: 2004 Winter Quarter.

NPB 261B—Topics in Vision: Systems, Psychophysics, Computational Models (2)
Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. NPB 261A recommended. Functions of the central visual pathways and their underlying mechanisms. Recent research on aspects of anatomy, biochemistry, electrophysiology, psychophysics, development, and genetics of the visual system. (Same course as NSC 261B and MCP 261B.) (S/U grading only.) Effective: 2004 Winter Quarter.

NPB 261C—Topics in Vision: Clinical Vision Science (2)
Lecture/Discussion—2 hours. Prerequisite(s): NPB 261A; NPB 261B; or Consent of Instructor. Causes and mechanistic bases of major blinding diseases. Recent research on aspects of anatomy, biochemistry, electrophysiology, psychophysics, development, and genetics of the visual system related to disease. (Same course as NSC 261C and MCP 261C.) (S/U grading only.) Effective: 2005 Spring Quarter.

NPB 263—Modeling in Systems Neuroscience (4)
Lecture—3 hours; Lecture/Lab—1 hour. Prerequisite(s): Consent of Instructor. Modeling as a tool in systems neuroscience. Mathematical techniques will be introduced and used to explore advanced topics in echolocation, sound localization, electroreception, communications, and motor systems. Other topics include transforms, modeling assumptions, scales and linearity. Effective: 1997 Winter Quarter.

NPB 267—Computational Neuroscience (5)
Lecture—4 hours; Lecture/Lab—3 hours. Prerequisite(s): One course in general Neuroscience at the level of NPB 100 or NPB 110B; one year college-level Calculus at the level of MAT 016A, MAT 016B, MAT 016C or higher; one year Physics at the level of PHY 007A, PHY 007B, PHY 007C recommended; or Consent of Instructor. Mathematical models and data analysis techniques used to describe computations performed by nervous systems. Lecture topics include single-neuron biophysics, neural coding, network dynamics, memory, plasticity, and learning. Lab topics include programming mathematical models and data analysis techniques in MATLAB. (Same course as NSC 267.) Effective: 2018 Winter Quarter.

NPB 270—How to Write a Fundable Grant Proposal in the Biomedical Sciences (2)
Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Restricted to members of the Neuroscience and BMCDB graduate groups; graduate students in other biomedical programs may enroll with instructor permission. Teaches the do's and don'ts of writing grants in the biomedical sciences and the mechanisms of the review process. May be repeated for credit. (Same course as NSC 270.) Effective: 2016 Spring Quarter.

NPB 271A—Core Concepts & Methods in Learning, Memory, and Plasticity (2)
Lecture/Discussion—2 hours. Prerequisite(s): Graduate Standing or Consent of Instructor. Core concepts and methods used in studies of learning, memory and plasticity. Behavioral paradigms and measurement approaches in human and animal studies of learning and plasticity, as well as a consideration of the functional, anatomical and neuronal mechanisms underlying brain plasticity. (Same course as PSC 271A, NSC 271A.) (S/U grading only.) Effective: 2019 Fall Quarter.

NPB 271B—Core Concepts & Methods in Learning, Memory, & Plasticity (2)
Lecture/Discussion—2 hours. Prerequisite(s): NPB 271A or NSC 271A or PSC 271A Core concepts and detailed survey methods used in studies of learning, memory and plasticity, from the cellular and molecular level to the level of neural circuits. Areas of learning, memory, and plasticity research where recent progress has been made in linking across these levels of analysis. (Same course as PSC 271B, NSC 271B.) (S/U grading only.) Effective: 2020 Winter Quarter.

NPB 271C—Translational Approaches to Learning, Memory, & Plasticity Disorders (2)
Lecture/Discussion—2 hours. Prerequisite(s): NPB 271B or NSC 271B or PSC 271B Neurological disorders, the effect of these disorders on learning, memory and plasticity, approved therapeutic options and current research designed to improve understanding and treatment of these diseases: (i) the clinical presentation, diagnostic criteria, and existing therapies, (ii) mechanistic studies in humans and animal models, and (iii) molecular pathways involved in the disease and approaches for drug discovery. (Same course as PSC 271C, NSC 271C.) (S/U grading only.) Effective: 2020 Spring Quarter.
NPB 285—Literature in Visual Neuroscience (2)
Seminar—2 hours. May be repeated for credit. (Same course as NPB 285.) (S/U grading only.) Effective: 2008 Fall Quarter.

NPB 287A—Topics in Theoretical Neuroscience (2)
Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. In-depth exploration of topics in theoretical neuroscience. Topic varies each year. Fall quarter (287A): foundational material from books and review articles. Spring quarter (287B): continuation of year's topic through readings of seminal articles from the primary literature. May be repeated for credit. (Same course as NPB 287A.) (S/U grading only.) Effective: 2017 Spring Quarter.

NPB 287B—Topics in Theoretical Neuroscience (2)
Seminar—2 hours. Prerequisite(s): Consent of Instructor. In-depth exploration of topics in theoretical neuroscience. Topic varies each year. Fall quarter (287A): foundational material from books and review articles. Spring quarter (287B): continuation of year's topic through readings of seminal articles from the primary literature. May be repeated for credit. (Same course as NPB 287B.) (S/U grading only.) Effective: 2009 Spring Quarter.

NPB 291—Auditory Neuroscience (1)
Discussion—0.5 hours; Seminar—0.5 hours. Prerequisite(s): NPB 100 or NPB 112 or NSC 222; Or the equivalent. Exploration of various important aspects of auditory physiology, behavior and psychophysics through review of original literature. New topic each quarter. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 1998 Spring Quarter.

Neuroscience (Graduate Group)

Neuroscience (Graduate Group) | NSC Ph.D.
W. Martin Usrey, Ph.D., Chairperson of the Group

Group Office. 150 Center for Neuroscience; 530-757-8520; http://neuroscience.ucdavis.edu/grad
Faculty. http://neuroscience.ucdavis.edu/grad/people/faculty/index.html

Graduate Study. The Graduate Group in Neuroscience offers programs of study leading to the Ph.D. degree. Neuroscience is a broad, interdepartmental program with faculty interests ranging from molecular biophysics of channels to cortical organization and cognition. A major goal of the program is to prepare students for careers as research scientists. Details of the program may be obtained from the Group office.

The Master of Science degree is offered only en route to the Ph.D.

Graduate Advisors. E. Diaz (Pharmacology), W. M. Usrey (Neurobiology, Physiology, and Behavior), G. Gurkoff (Neurological Surgery), J. Geng (Psychology), H.J. Cheng (Neurobiology, Physiology, and Behavior; Pathology-Medicine)

Total: 0

Neuroscience (Graduate Group) | NSC Courses

Courses in NSC:

NSC 200LA—Laboratory Methods in Neurobiology (6)
Laboratory—18 hours. Prerequisite(s): Graduate standing in the Neuroscience Graduate Group. Individual research in the laboratory of a faculty member. Research problems emphasize the use of contemporary methods and good experimental design. May be repeated three times for credit. May be repeated up to 3 time(s). (S/U grading only.) Effective: 1997 Winter Quarter.

NSC 200LB—Laboratory Methods in Neurobiology (3)
Laboratory—9 hours. Prerequisite(s): Graduate standing in the Neuroscience Graduate Group. Individual research in the laboratory of a faculty member. Research problems emphasize the use of contemporary methods and good experimental design. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

NSC 201—Neuroanatomy (3)
Discussion/Laboratory—1 hour; Lecture—2 hours. Prerequisite(s): Consent of Instructor. Mix of lectures, demonstrations, and dissections, emphasizing functional significance of neuroanatomy from a biological perspective, with comparisons between human and non-human brains. Emphasis placed on functional anatomy of
the nervous system, integrated with cellular, molecular, cognitive, and developmental concepts. Effective: 2005 Fall Quarter.

**NSC 211—Advanced Topics in Neuroimaging (3)**
Laboratory—1 hour; Seminar—2 hours. Prerequisite(s): PSC 210; or Consent of Instructor. Restricted to 16 students. Critical presentation and discussion of the most influential advanced issues in neuroimaging, emphasizing fMRI design/analysis and the integration of fMRI with EEG/MEG. May be repeated for credit Course may be repeated when topics differ. (Same course as NPB 211 and PSC 211.) (S/U grading only.) Effective: 2017 Spring Quarter.

**NSC 220—How to Give a Scientific Seminar (3)**
Lecture/Discussion—3 hours. Prerequisite(s): Consent of Instructor. Presentation of effective seminars. Student presentations of selected neuroscience topics in seminar format. Must be taken in two consecutive quarters. May be repeated up to 1 time(s). Effective: 2002 Spring Quarter.

**NSC 221—Cellular Neurophysiology (4)**
Lecture—4.5 hours. Prerequisite(s): Graduate standing or consent of instructor. Physiological aspects of cellular and subcellular organization of the nervous system. Neuronal cell biology, the structure and function of ion channels, electrical excitability, signaling cascades, sensory transduction and, mechanisms of synaptic transmission, and the cellular basis of learning and memory. Effective: 2009 Fall Quarter.

**NSC 222—Systems Neuroscience (5)**
Discussion—1 hour; Lecture—4 hours. Prerequisite(s): Graduate standing or consent of instructor. Integrative and information-processing aspects of nervous system organization. Topics include sensory systems, motor function, sensorimotor integration, the limbic system, and the neurobiology of learning and memory. (Same course as NPB 222.) Effective: 2006 Winter Quarter.

**NSC 223—Cognitive Neuroscience (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Graduate student standing in Psychology or Neuroscience or consent of instructor. Graduate core course for neuroscience. Neurobiological bases of higher mental function including attention, memory, language. One of three in three-quarter sequence. (Same course as PSC 261.) Effective: 1997 Winter Quarter.

**NSC 224A—Molecular and Developmental Neurobiology (2)**
Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Key issues in developmental and molecular neurobiology. Discussion emphasis on critical evaluation of the experiments and methods described in research papers. Readings of seminal, primary research papers, reviews, and book chapters. Reading materials will be distributed one week in advance. Effective: 2006 Winter Quarter.

**NSC 224B—Molecular and Developmental Neurobiology (2)**
Lecture/Discussion—2 hours. Prerequisite(s): NSC 224A; or Consent of Instructor. Continuation of NSC 224A: Key issues in developmental and molecular neurobiology, focusing on developmental topics. Discussion emphasis on critical evaluation of experiments and methods described in associated literature. Effective: 2006 Spring Quarter.

**NSC 225—Translational Research in the Neurobiology of Disease (2)**
Discussion—1 hour; Lecture—1 hour. Prerequisite(s): NSC 221 (can be concurrent); NSC 222 (can be concurrent); NSC 223 (can be concurrent); or Consent of Instructor. Past or concurrent enrollment in all courses. Provides an overview of major neuropsychiatric and neurological disorders from both the clinical and fundamental science perspectives. Effective: 2008 Spring Quarter.

**NSC 226—Molecular and Developmental Neurobiology (4)**
Lecture/Discussion—4 hours. Prerequisite(s): Consent of Instructor. Introduction to molecular and developmental neurobiology for graduate students. Topics will range from neurulation to development of sensory systems and will include modern molecular methods and their application in developmental neuroscience. Effective: 2003 Winter Quarter.

**NSC 243—Topics in Cellular and Behavioral Neurobiology (2)**
Discussion—1 hour; Seminar—1 hour. Prerequisite(s): Consent of Instructor. An advanced examination of several current problems in neurobiology. Topics will vary in different years; may be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

**NSC 247—Topics in Functional Neurogenomics (2)**
Discussion—1 hour; Lecture—1 hour. Prerequisite(s): Graduate standing or consent of instructor. The theory, methods and principles of functional neurogenomics with emphasis on the relationship to molecular mechanisms involved in development and disease of the nervous system. (Same course as NPB 247.) Effective: 2003 Spring Quarter.
NSC 250—Biology of Neuroglia (2)
Lecture/Discussion—1.5 hours. Prerequisite(s): Consent of Instructor. The properties and functions of non-neuronal or neuroglial cells in the mammalian central nervous system with relevance to neuronal development, physiology and injury response. (S/U grading only.) Effective: 1997 Winter Quarter.

NSC 261A—Topics in Vision: Eyes and Retinal Mechanisms (2)
Lecture/Discussion—2 hours. Prerequisite(s): NPB 100 or NPB 112; Or the equivalent; graduate standing. Structure and function of the visual system, with emphasis on the eye and retina, including optics, anatomy, transduction, retinal synapses, adaptation, and parallel processing. (Same course as NPB 261A and MCP 261A.) (S/U grading only.) Effective: 2004 Winter Quarter.

NSC 261B—Topics in Vision: Systems, Psychophysics, Computational Models (2)
Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. NSC 261A recommended. Functions of the central visual pathways and their underlying mechanisms. Recent research on aspects of anatomy, biochemistry, electrophysiology, psychophysics, development, and genetics of the visual system. (Same course as NPB 261B and MCP 261B.) (S/U grading only.) Effective: 2004 Winter Quarter.

NSC 261C—Topics in Vision: Clinical Vision Science (2)
Lecture/Discussion—2 hours. Prerequisite(s): NSC 261A; NSC 261B; or Consent of Instructor. Causes and mechanistic bases of major blinding diseases. Recent research on aspects of anatomy, biochemistry, electrophysiology, psychophysics, development, and genetics of the visual system related to disease. (Same course as NPB 261C and MCP 261C.) (S/U grading only.) Effective: 2005 Spring Quarter.

NSC 267—Computational Neuroscience (5)
Lecture—4 hours; Lecture/Lab—3 hours. Prerequisite(s): Consent of Instructor. One course in general Neuroscience at the level of NSC 100; or NPB 110B; one year college-level Calculus at level of MAT 016A, MAT 016B, MAT 016C or higher; one year Physics at the level of PHY 007A, PHY 007B, PHY 007C, recommended; or Consent of Instructor. Mathematical models and data analysis techniques used to describe computations performed by nervous systems. Lecture topics include single neuron biophysics, neural coding, network dynamics, memory, plasticity, and learning. Lab topics include programming mathematical models and data analysis techniques in MATLAB. (Same course as NPB 267.) Effective: 2018 Winter Quarter.

NSC 270—How to Write a Fundable Grant Proposal in the Biomedical Sciences (2)
Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Restricted to members of the Neuroscience and BMCDT graduate groups; graduate students in other biomedical programs may enroll with instructor permission. Teaches the do's and don'ts of writing grants in the biomedical sciences and the mechanisms of the review process. May be repeated for credit. (Same course as NPB 270.) Effective: 2016 Spring Quarter.

NSC 271A—Core Concepts & Methods in Learning, Memory, and Plasticity (2)
Lecture/Discussion—2 hours. Prerequisite(s): Graduate Standing or Consent of Instructor. Core concepts and methods used in studies of learning, memory and plasticity. Behavioral paradigms and measurement approaches in human and animal studies of learning and plasticity, as well as a consideration of the functional, anatomical and neuronal mechanisms underlying brain plasticity. (Same course as PSC 271A, NPB 271A.) (S/U grading only.) Effective: 2019 Fall Quarter.

NSC 271B—Core Concepts & Methods in Learning, Memory, & Plasticity (2)
Lecture/Discussion—2 hours. Prerequisite(s): NSC 271A or NPB 271A or PSC 271A Core concepts and detailed survey methods used in studies of learning, memory and plasticity, from the cellular and molecular level to the level of neural circuits. Areas of learning, memory, and plasticity research where recent progress has been made in linking across these levels of analysis. (Same course as PSC 271B, NPB 271B.) (S/U grading only.) Effective: 2020 Winter Quarter.

NSC 271C—Translational Approaches to Learning, Memory, & Plasticity Disorders (2)
Lecture/Discussion—2 hours. Prerequisite(s): NSC 271B or NPB 271B or PSC 271B Neurological disorders, the effect of these disorders on learning, memory and plasticity, approved therapeutic options and current research designed to improve understanding and treatment of these diseases: (i) the clinical presentation, diagnostic criteria, and existing therapies, (ii) mechanistic studies in humans and animal models, and (iii) molecular pathways involved in the disease and approaches for drug discovery. (Same course as PSC 271C, NPB 271C.) (S/U grading only.) Effective: 2020 Spring Quarter.

NSC 283—Neurobiological Literature (1)
Seminar—1 hour. Prerequisite(s): Consent of Instructor. Critical presentation and analysis of recent journal articles in
neurobiology. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

**NSC 284—Development of Sensory Systems (1)**
Seminar—1 hour. Prerequisite(s): Consent of Instructor. Presentation and discussion of recent literature on the development of sensory systems. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 1998 Winter Quarter.

**NSC 285—Literature in Visual Neuroscience (2)**
Seminar—2 hours. Critical presentation and discussion of current literature in visual neuroscience. May be repeated for credit when topic differs. (Same course as NPB 285.) (S/U grading only.) Effective: 2004 Spring Quarter.

**NSC 287A—Topics in Theoretical Neuroscience (2)**
Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. In-depth exploration of topics in theoretical neuroscience. Topic varies each year. Fall quarter (287A): foundational material from books and review articles. Spring quarter (287B): continuation of year's topic through readings of seminal articles from the primary literature. May be repeated for credit. (Same course as NPB 287A.) (S/U grading only.) Effective: 2017 Spring Quarter.

**NSC 287B—Topics in Theoretical Neuroscience (2)**
Seminar—2 hours. Prerequisite(s): Consent of Instructor. In-depth exploration of topics in theoretical neuroscience. Topic varies each year. Fall quarter (287A): foundational material from books and review articles. Spring quarter (287B): continuation of year's topic through readings of seminal articles from the primary literature. May be repeated for credit. (Same course as NPB 287B.) (S/U grading only.) Effective: 2009 Spring Quarter.

**NSC 289—Topics in Molecular and Developmental Neurobiology (2)**
Seminar—2 hours. Analysis and discussion of seminal and current research papers in molecular and developmental neurobiology. Different topics will be covered each quarter. In the past topics have included, "Synaptic vesicle dynamics," "Neuronal polarity," and "Glutamate receptors." May be repeated up to 10 time(s) when topic differs. (S/U grading only.) Effective: 2011 Spring Quarter.

**NSC 290C—Research Conference in Neurobiology (1)**
Discussion—1 hour. Prerequisite(s): NSC 299 (can be concurrent); Graduate standing in Neuroscience or consent of instructor; NSC 299 required concurrently. Presentation and discussion of faculty and graduate student research in neurobiology. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

**NSC 292—Cortical Plasticity and Perception (2)**
Lecture/Discussion—2 hours. Prerequisite(s): NPB 100 or NPB 112; Or equivalent or consent of instructor. Examination of research articles on cortical plasticity and changes in perception. Examples drawn from studies of the somatosensory, visual, auditory, and motor cortex. (S/U grading only.) Effective: 2000 Winter Quarter.

**NSC 295—Literature in Neuroengineering (2)**
Seminar—2 hours. Open to graduate students only. Critical presentation and discussion of current literature in neuroengineering. May be repeated for credit. (Same course as BIM 295.) (S/U grading only.) Effective: 2018 Fall Quarter.

**NSC 298—Group Study (1-5)**
Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

**NSC 299—Research (1-12)**
Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

W. Martin Usrey, Ph.D., Chairperson of the Department

**Department Office.** 196 Briggs Hall; 530-752-0203; [http://www.npb.ucdavis.edu](http://www.npb.ucdavis.edu)

**Faculty.** [http://basc.ucdavis.edu/](http://basc.ucdavis.edu/)

**Master Advisor.** Dr. Hwai-Jong Cheng, M.D., Ph.D., Dr. Lee Miller, Ph.D.
Neuroscience Units: 18

Choose a minimum of 14 units from:

NPB 100 Neurobiology 4
NPB 100L Neurobiology Laboratory 3
NPB 107 Cell Signaling in Health and Disease 3
NPB 124 Comparative Neuroanatomy 3
NPB 126 Comparative Physiology: Sensory Systems 3
NPB 161 Developmental Neurobiology 3
NPB 162 Neural Mechanisms of Behavior 3
NPB 163 Systems Neuroscience 4
NPB 164 Mammalian Vision 4
NPB 165 Neurobiology of Speech Perception 3
NPB 166 Math Tools for Neuroscience 4
NPB 167 Computational Neuroscience 5
NPB 168 Neurobiology of Addictive Drugs 4
NPB 169 Frontiers in Neurobiology 3

One of the following may be completed to reach the unit requirement:

PSC 113 Developmental Psychobiology 4
PSC 121 Physiological Psychology 4
PSC 135 Cognitive Neuroscience: The Biological Foundations of the Mind 4
PSC 137 Neurobiology of Learning & Memory 4
LIN 175 Biological Basis of Language 4
PHI 103 Philosophy on Mind 4
HDE 163 Cognitive Neuropsychology in Adulthood and Aging 4

The following are cross-listed and either offering can be used to fulfill the course requirement:

NPB 124 Comparative Neuroanatomy 3
OR
PSC 124 Comparative Neuroanatomy 3

Total: 18

Neuroscience Minor; Neurobiology, Physiology, & Behavior | NPB Courses

Courses in NPB:

NPB 010—Elementary Human Physiology (3)
Lecture—3 hours. Introduction to physiology for non-science majors. Includes basic cell physiology and survey of major organ systems and how they function in homeostasis and human health. Not open for credit to students who have completed NPB 101. GE credit: SE. Effective: 2016 Winter Quarter.

NPB 011—Exercise and Fitness: Principles and Practice (3)
Lecture—3 hours. Human movement from physiological, psychological, sociological, and historical perspectives. Biology and psychology of exercise across the human lifespan. Not open for credit to students who have taken EXB 010 or an upper division Exercise Biology or Neurology, Physiology & Behavior course. GE credit: SE, SL. Effective: 2019 Fall Quarter.

NPB 012—The Human Brain and Disease (3)
Lecture—3 hours. Normal function and diseases of the human brain and nervous system. Diseases discussed include Parkinson’s, Alzheimer’s, leprosy, amnesia and schizophrenia. Intended for non-science majors. Not open for credit for students who have completed NPB 100, NPB 101, NPB 112, or PSC 121. GE credit: SE, SL. Effective: 1997 Spring Quarter.
NPB 013—Extreme Animal Athletes (3)
Lecture—3 hours. Overview of biomechanics, focusing on animal locomotion. Physical principles underlying traits such as speed, maneuverability, endurance, and precision. Comparisons of animals and human athletes performing similar feats, with animals often outperforming humans by a wide margin. Biomechanical concepts through hands-on exercises, problem sets, and readings from the scientific literature. GE credit: QL, SE, SL. Effective: 2018 Fall Quarter.

NPB 014—Illusions: Fooling the Brain (3)
Lecture—3 hours. Introduction to perceptual processing in the human nervous system; illusions. GE credit: QL, SE, SL. Effective: 2012 Winter Quarter.

NPB 015—The Biology and Physiology of Aging (4)
Discussion—1 hour; Lecture—3 hours. Broad examination of age-associated changes in body functions. Includes basic cell physiology, a survey of major organ systems and the age-induced alterations in system function. Some age-associated diseases will also be examined. Intended for non-science majors. Not open for credit to students who have completed NPB 15V. GE credit: SE. Effective: 2012 Fall Quarter.

NPB 015V—The Biology and Physiology of Aging (4)
Web Electronic Discussion—1 hour; Web Virtual Lecture—3 hours. Broad examination of the biological and physiological basis of aging in animals and plants. Concepts in demographic, evolutionary, genetic, and cell aging. Major human systems, age-related alterations in system function, and age-related diseases. Intended for non-science majors. Not open for credit to students who have completed NPB 15. GE credit: SE, SL. Effective: 2012 Fall Quarter.

NPB 017—The Path to Cyborgs: Introduction to Prostheses and Human Machine Interfaces (3)

NPB 018—Biological Science for Social Justice (3)
Lecture—3 hours. Broad survey of the many ways one can use the biological sciences to better the lives of others and break down barriers that have restricted social mobility. GE credit: DD, SE, SL, SS. Effective: 2018 Spring Quarter.

NPB 068—Biology of Drug Addiction and Abuse (3)
Lecture—3 hours. Broad examination of addictive substances and their use/abuse. Topics include historical perspective, physiological effects, etiology, neurobiology of addiction and the impact of drugs on contemporary society. Intended for non-science majors. Not open for credit to students having completed NPB 168. Effective: 2008 Spring Quarter.

NPB 090A—Lower Division Seminar: Issues in Body Weight Regulation (2)

NPB 090B—Human Color Perception (2)
Seminar—2 hours; Term Paper. Prerequisite(s): Lower division standing. Class size limited to 15 students with lower division standing. Neural determinants of color appearance, and why we see the world in the way we do. Discussions center around demonstrations of color phenomena and what they tell us about the human brain. Effective: 2008 Spring Quarter.

NPB 090C—Current Issues in Animal Behavior (2)
Seminar—2 hours. Prerequisite(s): Lower division standing. Limited enrollment. The mechanisms and outcomes of sexual selection (mate choice and mate competition). Theory, current models and evidence that supports or refutes the models. Effective: 2003 Winter Quarter.

NPB 090D—Lower Division Seminar: Current Issues in Reproductive Endocrinology (2)
Seminar—2 hours. Prerequisite(s): Lower division standing. The integrative roles of reproductive hormones in mammalian reproduction and health. Current theory and models regarding hormone function and use in reproductive health and contraception, and evidence that supports or refutes the models. Effective: 2002 Fall Quarter.

NPB 090E—Biology of Aging (2)
Seminar—2 hours. Prerequisite(s): Freshman standing. Current theories on the biology of aging covering genetic,

**NPB 090F—Visual Impairment and Blindness: A World Wide Problem (2)***
Seminar—2 hours. Prerequisite(s): Lower division standing. Examination of various abnormalities of the eye and the important geographic and cultural factors that influence the epidemiology of those abnormalities. Effective: 2007 Winter Quarter.

**NPB 091C—Research Conference (1)***
Discussion—1 hour. Prerequisite(s): NPB 099 (can be concurrent); and Consent of Instructor. Lower division standing in Neurobiology, Physiology and Behavior or related biological science; NPB 099 required concurrently. Restricted to lower division students. Research findings and methods in neurobiology, physiology, and/or behavior. Presentation and discussion of research by faculty and students. May be repeated for credit. (P/NP grading only.) Effective: 2003 Fall Quarter.

**NPB 092—Internship (1-12)***
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Lower division standing. Work experience off and on campus in all subject areas offered in the Department of Neurobiology, Physiology, and Behavior. Internships supervised by a member of the faculty. May be repeated for credit. (P/NP grading only.) Effective: 2008 Fall Quarter.

**NPB 098—Directed Group Study (1-5)***
Variable. Prerequisite(s): Consent of Instructor. Lower division standing. (P/NP grading only.) Effective: 2000 Winter Quarter.

**NPB 099—Special Study for Undergraduates (1-5)***
Variable. Prerequisite(s): Consent of Instructor. Lower division standing. (P/NP grading only.) Effective: 1999 Winter Quarter.

**NPB 100—Neurobiology (4)***
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): BIS 002A; PHY 009A, PHY 009B or PHY 007A, PHY 007B recommended. Brains and nervous systems, neurons and neural circuits. Coordination of movement. Development of nervous systems. Vision, hearing, and feature extraction by the central nervous system. The cell biology of learning and memory. Perception, cognition, and disorders of the brain. Not open for credit to students who have completed NPB 110B, NPB 112, NPB 160, NPB 161 or NPB 162, or NSC 221 or NSC 222. GE credit: QL, SE. Effective: 2018 Spring Quarter.

**NPB 100L—Neurobiology Laboratory (3)***
Extensive Writing/Discussion; Laboratory—3 hours; Lecture—1 hour. Prerequisite(s): NPB 100 (can be concurrent) or NPB 110B (can be concurrent) Experimental basis of neurobiology principles discussed in course 100. Topics include neurophysiology, sensory systems, motor systems, cellular neuroscience, cognitive neuroscience, and quantitative data analysis and modeling techniques. GE credit: SE. Effective: 2017 Winter Quarter.

**NPB 100Q—Quantitative Foundations of Neurobiology (1)***
Auto Tutorial—1.5 hours; Extensive Problem Solving—1.5 hours. Prerequisite(s): NPB 100 (can be concurrent) Computational methods and mathematical models used to study phenomena in neurobiology. GE credit: QL, VL. Effective: 2010 Spring Quarter.

**NPB 101—Systemic Physiology (5) Review all entries***
Lecture—5 hours. Prerequisite(s): BIS 001A or BIS 002A; CHE 002B; PHY 001B or PHY 007C strongly recommended. Systemic physiology with emphasis on aspects of human physiology. Functions of major organ systems, with the structure of those systems described as a basis for understanding the functions. Not open for credit to students who have completed NSC 110C. GE credit: SE. Effective: 2017 Winter Quarter.

**NPB 101—Systemic Physiology (5) Review all entries***
Lecture—5 hours. Prerequisite(s): BIS 002A; (CHE 002B or CHE 002BH); PHY 001B or PHY 007C strongly recommended. Systemic physiology with emphasis on aspects of human physiology. Functions of major organ systems, with the structure of those systems described as a basis for understanding the functions. Not open for credit to students who have completed NPB 110C. GE credit: SE. Effective: 2019 Winter Quarter.

**NPB 101D—Systemic Physiology Discussion (1.5)***
Discussion—1.5 hours. Prerequisite(s): NPB 101 (can be concurrent); Consent of Instructor. Discussion and problem solving related to fundamental principles of systemic physiology as presented in course 101. (P/NP grading only.) Effective: 2017 Spring Quarter.
NPB 101L—Systemic Physiology Laboratory (3)
Discussion—2 hours; Laboratory—3 hours; Term Paper. Prerequisite(s): NPB 101 or NPB 110C Selected experiments to illustrate functional characteristics of organ systems discussed in course 101. Effective: 2017 Winter Quarter.

NPB 102—Animal Behavior (3)
Lecture—3 hours. Prerequisite(s): (BIS 001A, BIS 001B, BIS 001C) or (BIS 002A, BIS 002B, BIS 002C) Basic principles of behavioral organization in vertebrate and invertebrate animals. Underlying physiological and ethological mechanisms. The evolution of behavior, with special emphasis on behavior under natural conditions. Not open for credit to students who have completed NPB 155. (Former NPB 155.). GE credit: SL. Effective: 2008 Fall Quarter.

NPB 102Q—Quantitative Topics in Animal Behavior (1)
Auto Tutorial—1.5 hours; Extensive Problem Solving—1.5 hours. Prerequisite(s): MAT 016B; NPB 102 (can be concurrent) Study of the quantitative concepts and exemplar models used in animal behavior. Effective: 2009 Spring Quarter.

NPB 103—Cellular Physiology/Neurobiology (3)
Lecture—3 hours. Prerequisite(s): (BIS 103 or BIS 105); BIS 104; PHY 007C recommended. Cellular physiology with emphasis on membrane transport processes and neuronal physiology. Fundamental physical-chemical and biological mechanisms of membrane transport will be considered in relation to cytoplasmic homeostasis, communication between cells, and the cellular mechanisms of sensory and motor transduction. Not open for credit to students who have completed NPB 100B. (Former NPB 100B.). Effective: 2008 Spring Quarter.

NPB 104L—Cellular Physiology/Neurobiology Laboratory (4)
Discussion—1 hour; Laboratory—3 hours; Lecture—1 hour; Term Paper/Discussion. Prerequisite(s): NPB 101L; (BIS 103 or BIS 105) Experiments in the physical and chemical processes of cells and tissues. Effective: 2018 Winter Quarter.

NPB 105—Introduction to Computer Models (4)
Lecture—3 hours; Lecture/Lab—1 hour. Prerequisite(s): CHE 002C; PHY 007C; (NPB 100 or NPB 101); MAT 016C; Or the equivalent to MAT 016C. Introduction to the ideas, mathematical techniques and computer tools required for developing models of cellular processes in physiology and neurobiology. Applications include membrane transport, ionic channels, action potentials, Ca2+ oscillations, respiration, and muscle contraction. Effective: 1997 Winter Quarter.

NPB 106—Experiments in Neurobiology, Physiology, and Behavior: Design and Execution (3)
Discussion—0.5 hours; Laboratory—7.5 hours. Prerequisite(s): (NPB 110A or NPB 100 or NPB 101 or NPB 102); NPB 199; and Consent of Instructor. Design and execution of experiments in neurobiology, physiology, and/or behavior. Students choose and design a project in consultation with the sponsoring faculty member. May be repeated once for credit to complete the project, with consent of instructor. May be repeated up to 1 time(s). (P/NP grading only.) GE credit: OL, QL, VL, WE. Effective: 2018 Winter Quarter.

NPB 107—Cell Signaling in Health and Disease (3)
Lecture—3 hours. Prerequisite(s): BIS 102 or BIS 105 Basics of cell signaling pathways, their disruption in disease, and their current utility and future potential as therapeutic targets. Focus is on signaling pathways specific to nervous, endocrine and immune systems, and those fundamental to all cells. GE credit: SL. Effective: 2009 Winter Quarter.

NPB 108Y—Animal Behavior Laboratory (3)
Lecture—3 hours; Web Electronic Discussion—12 hours. Hybrid course, consisting of limited in-person lectures and the rest laboratory exercises. The laboratory exercises will be online, and will require students to view and score videos of animal behavior in order to test behavioral hypotheses. Effective: 2016 Summer Session 2.

NPB 109—Kinesiology—Analysis and Control of Human Movement (4)
Lecture—4 hours. Prerequisite(s): PHY 007A; PHY 007B; NPB 101 or NPB 110C recommended; CHA 101 and CHA 101L (same as EXB 106 and EXB 106L) or equivalent recommended. Functional anatomy, motor control, and biomechanics of human movement understood in the context of body structures, basic principles of physics, and functional characteristics of muscle. GE credit: SE. Effective: 2018 Spring Quarter.

NPB 110A—Foundations 1: From Molecules to Individuals (5)
Discussion—1 hour; Lecture—4 hours. Prerequisite(s): (BIS 002A, BIS 002B); (CHE 002B or CHE 003A); PHY 007A and PHY 007B recommended; BIS 002C recommended. Pass One restricted to majors in Neurobiology, Physiology and Behavior. Major concepts in cell biology with special emphasis on connections between cell biology and behavior. Includes: cellular metabolism, cellular sensing and signaling, membrane structure-function, molecular switches, electrical and chemical signaling, endocrine signaling, cell cycle and differentiation, cytoskeleton, and
integrative examples. Credit limited to 3 units for students who have taken BIS 104. GE credit: SE. Effective: 2018 Winter Quarter.

NPB 110B—Foundations 2: Neurobiology (5)
Discussion—1 hour; Lecture—4 hours. Prerequisite(s): NPB 110A C- or better; PHY 007A and PHY 007B recommended. Open to declared NPB majors only. Core concepts of neurobiology including single-neuron biophysics, synapses and transmitters, neuronal development, motor systems, central pattern generation, neuronal circuits, intracellular signal transduction, sensory processing, multisensory integration, autonomic nervous system, neuromodulation, learning and memory, and higher cognition and disease. Credit limited to 3 units for students who have taken NPB 100. GE credit: SE. Effective: 2017 Winter Quarter.

NPB 110C—Foundations 3: Physiology (5) Review all entries
Discussion—1 hour; Lecture—4 hours. Prerequisite(s): NPB 110A C- or better; PHY 007A; PHY 007B and PHY 007C recommended. Open to declared NPB majors only. Focuses on the structure, function, and interactions of animal organ systems in homeostasis and reproduction, and the response to perturbations of homeostasis; neural and endocrine signaling; skeletal muscle and movement; cardiovascular and respiratory systems; renal, digestive, immune, and reproductive physiology. Credit limited to 2 units for students who have taken NPB 101. GE credit: SE. Effective: 2018 Winter Quarter.

NPB 111L—Advanced Systemic Physiology Laboratory (4)
Discussion—2 hours; Laboratory—6 hours; Lecture—1 hour; Term Paper. Prerequisite(s): NPB 101L Selected comprehensive experiments in the autonomic nervous system and the cardiovascular, respiratory, and neuromuscular systems. Emphasis on conceptual and methodological approaches in demonstrating the physiology of organ systems. Effective: 2018 Winter Quarter.

NPB 113—Cardiovascular, Respiratory, and Renal Physiology (4)
Lecture—4 hours. Prerequisite(s): (NPB 110C or NPB 101); CHE 008B, PHY 007B and PHY 007C recommended. An intense and advanced presentation of concepts in cardiovascular, respiratory, and renal physiology including discussion of acid-base balance. Effective: 2018 Winter Quarter.

NPB 114—Gastrointestinal Physiology (3)
Lecture—3 hours. Prerequisite(s): (NPB 110C or NPB 101); BIS 105 or BIS 103 recommended, BIS 105 preferred. Gastrointestinal anatomy and physiology. Digestion, secretion, absorption, motility, comparative physiology and pathology. Strong emphasis on neural and hormonal regulation and on cellular mechanisms of secretion and absorption. Effective: 2018 Winter Quarter.

NPB 116—Stress Physiology in Health and Disease (3)
Lecture—3 hours. Prerequisite(s): BIS 002A C- or better; or Consent of Instructor. Adaptive and maladaptive physiological responses to acute and chronic stress in mammals, with emphasis on humans. Role of endocrine and autonomic nervous system in stress response. Prenatal and postnatal effects of stress on cognitive and affective development. Wellness interventions. Effective: 2019 Winter Quarter.

NPB 117—Avian Physiology (3)
Lecture—3 hours. Prerequisite(s): (BIS 002A, BIS 002B); CHE 002B; NPB 101 or NPB 110C strongly recommended. Physiology of the various systems of birds with emphasis on digestion, respiration, excretion, and endocrine systems. Effective: 2018 Spring Quarter.

NPB 121—Physiology of Reproduction (4)
Lecture/Discussion—4 hours. Prerequisite(s): NPB 101 or NPB 110C or ANS 100 Physiological mechanisms related to reproduction, breeding efficiency and fertility, with special reference to domestic animals. GE credit: QL, SL. Effective: 2018 Spring Quarter.

NPB 121L—Physiology of Reproduction Laboratory (1)
Laboratory—3 hours. Prerequisite(s): NPB 121 (can be concurrent) Experiments on the reproductive systems of domestic animals including male and female gametes. (P/NP grading only.) Effective: 2017 Spring Quarter.
NPB 122—Developmental Endocrinology (3)
Lecture—3 hours. Prerequisite(s): NPB 101 Restricted to upper division standing. Hormonal control of development, maturation and senescence from the cellular to organismal level, with emphasis on the human. Prenatal and neonatal life, childhood and adolescence, adulthood and pregnancy, as well as the endocrinology of aging. Effective: 2003 Spring Quarter.

NPB 123—Comparative Vertebrate Organology (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): (BIS 001A, BIS 001B) or (BIS 002A, BIS 002B) Functional anatomy of major organ systems in vertebrates. Each system examined from cellular to gross level in fish, birds, and mammals. Emphasis on how differentiated cell types are integrated into tissues and organs to perform diverse physiological functions. (Same course as APC 100.) Effective: 2008 Winter Quarter.

NPB 124—Comparative Neuroanatomy (4) Review all entries
Laboratory—2 hours; Lecture—3 hours. Prerequisite(s): PSC 101 or NPB 100 or NPB 101 Overview of the neuroanatomy of the nervous system in a variety of mammalian and non-mammalian vertebrates. Examine changes or modifications to neural structures as a result of morphological or behavioral specializations. (Same course as Psychology 124) GE credit: SL. Effective: 1997 Fall Quarter.

NPB 124—Comparative Neuroanatomy (3) Review all entries
Lecture—3 hours. Prerequisite(s): NPB 101 or NPB 100 or NPB 110B or PSC 121 Overview of the neuroanatomy in mammalian vertebrates, focusing on the cerebral cortex and experimental techniques. Examine changes or modifications to neural structures as a result of morphological or behavioral specializations. (Same course as PSC 124.) Effective: 2018 Fall Quarter.

NPB 124L—Comparative Neuroanatomy Laboratory (2)
Laboratory—6 hours. Prerequisite(s): NPB 124 (can be concurrent) Pass One restricted to PSC and NPB majors; must be concurrently enrolled in NPB 124. Comparative neuroanatomy laboratory illustrating modern neuroanatomical techniques in determining neural connections within the mammalian brain. Includes experimentation and presentation of results. (Same course as PSC 124L.) Effective: 2018 Fall Quarter.

NPB 126—Comparative Physiology: Sensory Systems (3)
Lecture—3 hours. Prerequisite(s): NPB 100 or NPB 101 Basic physiological mechanisms involved in sensory systems. Comparative approach to considerations of mechanosensitive systems (audition, lateral lines, touch, echolocation, equilibrium), chemosensitive systems (olfaction, taste, pheromones), photosensitive systems (vision, infrared detection, UV detection), electroreception, and pain. Emphasis on receptors. Effective: 1997 Winter Quarter.

NPB 128—Comparative Physiology: Endocrinology (3)
Lecture—3 hours. Prerequisite(s): NPB 101 Comparison of physiological functions in the animal kingdom: animal hormones and their functions. Effective: 1997 Winter Quarter.

NPB 130—Physiology of the Endocrine Glands (4)
Lecture—4 hours. Prerequisite(s): NPB 110C or NPB 101 Advanced presentation of concepts in endocrinology with emphasis on the role of hormones in reproduction, metabolism, and disease. GE credit: VL. Effective: 2018 Winter Quarter.

NPB 132—Nature vs. Nurture: Physiological Interactions Among Genes, Nutrients and Health (3)
Lecture—3 hours. Prerequisite(s): BIS 001A or BIS 002A; or Consent of Instructor. Biochemical, physiological, genetic, and nutritional causes of important medical problems such as obesity, anorexia, heart disease and diabetes. One unit of credit allowed to students who have completed NPB 131. Effective: 2008 Fall Quarter.

NPB 133—Genes and the Brain (4)
Lecture—4 hours. Prerequisite(s): NPB 110B or NPB 100; or Consent of Instructor. BIS 101 recommended. Genetic contributions to brain evolution, development and disorders. Topics include evolution of genomic programs of neurodevelopment and the role of genetics in autism, intellectual disability, and schizophrenia. GE credit: SE. Effective: 2018 Fall Quarter.

NPB 134—General Immunology for Physiologists (3)
Lecture—2 hours; Lecture/Discussion—1 hour. Prerequisite(s): NPB 101 C- or better or NPB 110C C- or better; or Consent of Instructor. Immunology for undergrads interested in physiology aimed at understanding the physiological role of immune responses. Illustrated with examples of human diseases including diabetes, allergies and asthma, and emerging diseases such as Ebola and Zika. GE credit: SE. Effective: 2017 Fall Quarter.

NPB 139—Frontiers in Physiology (3)
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): NPB 100; NPB 101; NPB 102 (can be concurrent) Lectures by
leading authorities and discussion of the latest research in newly emerging areas in physiology. Offered every fourth year. GE credit: QL, SE. Effective: 2010 Fall Quarter.

NPB 140—Principles of Environmental Physiology (3) Review all entries
Lecture—3 hours. Prerequisite(s): NPB 101; BIS 102 recommended. Physiological aspects of interactions of organisms and environmental, cellular, system, and organismal levels. Emphasis on regulatory responses/mechanisms to thermal, pressure, gravity and light environmental variables. Not open for credit to students who have completed course 148. (Former course 148.). GE credit: WE. Effective: 1997 Winter Quarter.

NPB 140—Principles of Environmental Physiology (3) Review all entries
Lecture—3 hours. Prerequisite(s): NPB 101 or NPB 110C; BIS 102 recommended. Physiological aspects of interactions of organisms and environmental, cellular, system, and organismal levels. Emphasis on regulatory responses/mechanisms to thermal, pressure, gravity and light environmental variables. Not open for credit to students who have completed NPB 148. (Former NPB 148.). GE credit: WE. Effective: 2018 Fall Quarter.

NPB 141—Physiological Adaptation of Marine Organisms (3)

NPB 141P—Physiological Adaptation of Marine Organisms/Advanced Laboratory Topics (5)
Discussion—1 hour; Laboratory—12 hours. Prerequisite(s): NPB 141 (can be concurrent); Residence at Bodega Marine Laboratory required; NPB 141 required concurrently. Students must submit application available at http://www.bml.ucdavis.edu. Training in scientific research from hypothesis to publication, including methods of library research. Research related to a topic covered in course 141. GE credit: VL, WE. Effective: 2006 Spring Quarter.

NPB 142—Environmental Endocrinology: Mechanisms for Life Cycles (3)
Lecture—3 hours. Prerequisite(s): BIS 002A; BIS 002B; BIS 002C Effects of environmental factors on endocrine responses that affect vertebrate life history and fitness. Introduction to finite state machine theory and allostasis in life histories and coping strategies. Focus on life history stages including non-breeding, hibernation, reproduction, migration and moulting. GE credit: SE, WE. Effective: 2015 Winter Quarter.

NPB 150—Advanced Animal Behavior (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): NPB 102 or PSC 101; or Consent of Instructor. Advanced integrative survey of biological principles of behavioral organization, emphasizing historical roots, current research directions, conceptual issues and controversies. Laboratory exercises on the description and analysis of the behavior of captive and free-living animals. (Same course as PSC 122.) Effective: 2018 Winter Quarter.

NPB 152—Hormones and Behavior (3)
Lecture—3 hours. Prerequisite(s): (NPB 101 or NPB 110C); (NPB 102 or PSC 101) Endocrine physiology with an emphasis on the principles of behavior. Fundamental relationships between hormones and various behaviors engaged in by the organism during its lifetime. Role of hormones in behavioral homeostasis, social behavior, reproductive behavior, parental behavior, adaptation to stress. (Same course as PSC 123.) Effective: 2018 Winter Quarter.

NPB 157—Advanced Physiology of Animal/Human Disease (3)
Lecture—1 hour; Lecture/Discussion—2 hours. Prerequisite(s): NPB 101 B+ or better or NPB 110C B+ or better; Consent of Instructor. Limited to 35 students initially. Centers on fundamental mechanisms and pathophysiological basis for animal and human diseases. Course is case-based and uses animal and human diseases to help exemplify the physiological consequences of organ dysfunction. (Same course as HPH 157.) Effective: 2017 Spring Quarter.

NPB 159—Frontiers in Behavior (3) Review all entries
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): NPB 100; NPB 101; NPB 102 Lectures by leading authorities and discussion of the latest research in newly emerging areas in behavioral biology. Offered every fourth year. GE credit: QL, SE. Effective: 2010 Fall Quarter.

NPB 159—Frontiers in Behavior (3) Review all entries
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): (NPB 100, NPB 101, NPB 102) or (NPB 110A, NPB 110B, NPB 110C) Lectures by leading authorities and discussion of the latest research in newly emerging areas in behavioral biology. Offered every fourth year. GE credit: QL, SE. Effective: 2019 Spring Quarter.
NPB 161—Developmental Neurobiology (3)
Lecture—3 hours. Prerequisite(s): NPB 100 or NPB 101 or NPB 110B Issues, theoretical concepts, and methodologies in developmental neurobiology. Topics include prenatal and postnatal differentiation of neurons, and plasticity in the mature and aging brain. Integration of neurochemical, structural, physiological and behavioral perspectives. GE credit: SE. Effective: 2018 Winter Quarter.

NPB 162—Neural Mechanisms of Behavior (3)
Lecture—3 hours. Prerequisite(s): NPB 100 or NPB 101 or NPB 110B Relationship between brain and behavior. Identification and analysis of the relevant neural circuits involved. Examples of systems to be considered are birdsong, locomotion, echolocation. Effective: 2018 Winter Quarter.

NPB 163—Systems Neuroscience (4)
Lecture—3 hours; Lecture/Discussion—1 hour. Prerequisite(s): NPB 100 or NPB 110B: Or equivalent basic neuroscience training with consent of instructor. Concepts and techniques in systems neuroscience: e.g., measuring and manipulating neural activity, structure of neocortex, sensory processing, motor control, storage of information, neural codes, neural mechanisms underlying cognitive functions. GE credit: SE. Effective: 2017 Spring Quarter.

NPB 164—Mammalian Vision (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): NPB 100 or NPB 110B or PSC 101 Structure and function of the mammalian visual system, from the formation of images on the retina through visually guided behavior and perception. Emphasis on biological mechanisms underlying vision. Effective: 2017 Spring Quarter.

NPB 165—Neurobiology of Speech Perception (3)
Lecture—3 hours. Prerequisite(s): NPB 100 or NPB 101 or NPB 102; or Consent of Instructor. Interdisciplinary approach to speech perception with emphasis on functional neuroanatomy and behavior. Topics include auditory processing in time and space, intelligibility in noisy environments, visual speech, evolution of vocal communication, models of speech perception, development, and hearing impairment. GE credit: SL. Effective: 2018 Winter Quarter.

NPB 166—Math Tools for Neuroscience (4)
Lecture—4 hours. Prerequisite(s): (NPB 100 or NPB 110B); (MAT 016A, MAT 016B, MAT 016C) or (MAT 017A, MAT 017B, MAT 017C) or (MAT 021A, MAT 021B, MAT 021C); or Consent of Instructor. Introduction to mathematics techniques used in neuroscience. Applications to neuroscience of differential equations, linear algebra, Fourier transforms, correlation and convolution, and probability theory. GE credit: QL. Effective: 2018 Winter Quarter.

NPB 167—Computational Neuroscience (5)
Lecture—4 hours; Lecture/Lab—3 hours. Prerequisite(s): (NPB 100 or NPB 110B); (MAT 016A, MAT 016B, MAT 016C) or (MAT 017A, MAT 017B, MAT 017C) or (MAT 021A, MAT 021B, MAT 021C); or Consent of Instructor. PHY 007A, PHY 007B or equivalent recommended. Mathematical models and data analysis techniques used to describe computations performed by nervous systems. Lecture topics include single neuron biophysics, neural coding, network dynamics, memory, plasticity, and learning. Lab topics include programming mathematical models and data analysis techniques in MATLAB. GE credit: QL, SE. Effective: 2018 Winter Quarter.

NPB 168—Neurobiology of Addictive Drugs (4)
Lecture/Discussion—4 hours. Prerequisite(s): NPB 100 or NPB 110B or NPB 110C or NPB 101; Or equivalents. Neurobiological basis for the effects and mechanisms of action of drugs with addictive potential, including opiates (morphine, heroin, methadone), amphetamines, cocaine, nicotine, marijuana (cannabinoids), alcohol, caffeine, and mind-altering drugs such as LSD and antidepressants. GE credit: SL, VL. Effective: 2018 Winter Quarter.

NPB 169—Frontiers in Neurobiology (3)
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): NPB 100; NPB 101; NPB 102 (can be concurrent) Lectures by leading authorities and discussion of the latest research in newly emerging areas in neurobiology. Offered every fourth year. GE credit: QL. Effective: 2010 Fall Quarter.

NPB 171—Physiology of Neuroimmune Interactions (4)
Lecture—3 hours; Lecture/Discussion—1 hour. Prerequisite(s): BIS 002A; (NPB 012 (can be concurrent) or NPB 100 (can be concurrent) or NPB 110B (can be concurrent)); or Consent of Instructor. Completion of PMI 126 or MMI 188 recommended prior to this course. Explores the complex interactions of the nervous and immune systems, and examine how the systems function together to serve homeostasis, behavior, and disease (such as Alzheimer's, autism, and multiple sclerosis). GE credit: SL. Effective: 2017 Fall Quarter.

NPB 172—Map Formation in the Brain (3)
Lecture—3 hours. Prerequisite(s): NPB 100 C- or better or NPB 110B C- or better; or equivalent basic neuroscience
training with consent of instructor. Topographic map connection is a fundamental principle for establishing neural network in various sensory and motor nervous systems. GE credit: SE. Effective: 2017 Spring Quarter.

**NPB 173—Neurobiology of Brain Disorders (3)**
Lecture—3 hours. Prerequisite(s): NPB 110B or NPB 100; or Consent of Instructor. Examination of brain disorders from a basic science perspective to gain insights into the mechanisms of their action. Genetic, molecular, cellular, circuit, and environmental basis of a variety of brain disorders. How insights about underlying mechanisms may lead to the development of improved therapies. Effective: 2018 Spring Quarter.

**NPB 190C—Research Conference (1)**
Discussion—1 hour. Prerequisite(s): NPB 199 (can be concurrent); and Consent of Instructor. Upper division standing in Neurobiology, Physiology, and Behavior or related biological science; NPB 199 required concurrently. Research findings and methods in neurobiology, physiology, and/or behavior. Presentation and discussion of research by faculty and students. May be repeated for credit. May be repeated for credit. (P/NP grading only.) Effective: 1999 Spring Quarter.

**NPB 192—Internship (1-12)**
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Completion of 84 units. Work experience off and on campus in all subject areas offered in neurobiology, physiology, & behavior. May be repeated for credit. (P/NP grading only.) Effective: 2008 Fall Quarter.

**NPB 194HA—Neurobiology, Physiology, and Behavior—Honors (1)**
Laboratory—12 hours. Prerequisite(s): Senior standing; minimum 3.500 GPA in courses counted toward major; approval by the master advisor. Honors project in Neurobiology, Physiology, and Behavior. Laboratory research on a specific question. The project is developed with the sponsoring faculty member and approved by the student’s Honors Thesis Committee. Honors thesis to be submitted upon completion of the project. (P/NP grading only.) Effective: 1997 Winter Quarter.

**NPB 194HB—Neurobiology, Physiology and Behavior—Honors (4)**
Laboratory—12 hours. Prerequisite(s): Senior standing; minimum 3.500 GPA in courses counted toward major; approval by the master advisor. Honors project in Neurobiology, Physiology, and Behavior. Laboratory research on a specific question. The project is developed with the sponsoring faculty member and approved by the student’s Honors Thesis Committee. Honors thesis to be submitted upon completion of the project. (P/NP grading only.) Effective: 2003 Spring Quarter.

**NPB 194HC—Neurobiology, Physiology, and Behavior—Honors (2)**
Laboratory—12 hours. Prerequisite(s): Senior standing; minimum 3.500 GPA in courses counted toward major; approval by the master advisor. Honors project in Neurobiology, Physiology, and Behavior. Laboratory research on a specific question. The project is developed with the sponsoring faculty member and approved by the student’s Honors Thesis Committee. Honors thesis to be submitted upon completion of the project. (P/NP grading only.) Effective: 1997 Winter Quarter.

**NPB 197T—Tutoring in Neurobiology, Physiology, and Behavior (1-5)**
Discussion—2-6 hours. Prerequisite(s): Consent of Instructor. Upper division standing. Assisting the instructor by tutoring students in one of the Department's regular courses. May be repeated for credit. (P/NP grading only.) Effective: 2008 Fall Quarter.

**NPB 198—Directed Group Study (1-5)**
Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

**NPB 199—Special Study for Advanced Undergraduates (1-5)**
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

**NPB 211—Advanced Topics in Neuroimaging (3)**
Laboratory—1 hour; Seminar—2 hours. Prerequisite(s): PSC 210; or Consent of Instructor. Restricted to 16 students. Critical presentation and discussion of the most influential advanced issues in neuroimaging, emphasizing fMRI design/analysis and the integration of fMRI with EEG/MEG. May be repeated for credit Course may be repeated when topics differ. (Same course as NSC 211 and PSC 211.) (S/U grading only.) Effective: 2017 Spring Quarter.

**NPB 212—Light and Fluorescence Microscopy (3)**
Laboratory—1 hour; Lecture—2 hours. Prerequisite(s): Consent of Instructor. Restricted to maximum 16 students. Theory and practical application of light and fluorescence microscopy in the biological sciences. Laboratory
component will focus on an optics bench, where we build simple compound and confocal microscopes on an optical rail. Effective: 2017 Spring Quarter.

**NBP 217—Advanced Avian Physiology (1)**
Project (Term Project)—1 hour. Prerequisite(s): NPB 117; and Consent of Instructor. Graduate standing; NPB 117 required concurrently. Study in depth of a topic in avian physiology through development of a lecture with associated instructional materials such as lesson plan, readings, presentation, and evaluation aids. Effective: 2009 Summer Session 1.

**NBP 221—Cellular Neuroscience (4)**
Discussion—1.5 hours; Lecture—3 hours. Advanced course on cellular and subcellular organization of the nervous system. Membrane channels, sensory transduction, synaptic transmission and cellular aspects of development and learning. Effective: 2015 Winter Quarter.

**NBP 222—Systems Neuroscience (5)**
Discussion—1 hour; Lecture—4 hours. Prerequisite(s): Graduate standing or consent of instructor. Integrative and information-processing aspects of nervous system organization. Topics include sensory systems, motor function, sensorimotor integration, the limbic system, and the neurobiology of learning and memory. (Same course as NSC 222.) Effective: 2002 Winter Quarter.

**NBP 245—Computational Models of Cellular Signaling (3)**
Lecture—3 hours. Prerequisite(s): Consent of Instructor. Computational and mathematical techniques in modeling of regulatory and signaling phenomena in neurobiology and cell physiology, focusing on linear and nonlinear ordinary differential equation models. Applications include ion channel kinetics, electrical activity, signal transduction, calcium oscillations, and simple neural circuits. Effective: 1997 Winter Quarter.

**NBP 247—Topics in Functional Neurogenomics (2)**
Discussion—1 hour; Lecture—1 hour. Prerequisite(s): Graduate standing or consent of instructor. The theory, methods and principles of functional neurogenomics with emphasis on the relationship to molecular mechanisms involved in development and disease of the nervous system. (Same course as NSC 247.) Effective: 2003 Spring Quarter.

**NBP 261A—Topics in Vision: Eyes and Retinal Mechanisms (2)**
Lecture/Discussion—2 hours. Prerequisite(s): NPB 100 or NPB 112; Or the equivalent; graduate standing. Structure and function of the visual system, with emphasis on the eye and retina, including optics, anatomy, transduction, retinal synapses, adaptation, and parallel processing. (Same course as NSC 261A and MCP 261A.) (S/U grading only.) Effective: 2004 Winter Quarter.

**NBP 261B—Topics in Vision: Systems, Psychophysics, Computational Models (2)**
Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. NPB 261A recommended. Functions of the central visual pathways and their underlying mechanisms. Recent research on aspects of anatomy, biochemistry, electrophysiology, psychophysics, development, and genetics of the visual system. (Same course as NSC 261B and MCP 261B.) (S/U grading only.) Effective: 2004 Winter Quarter.

**NBP 261C—Topics in Vision: Clinical Vision Science (2)**
Lecture/Discussion—2 hours. Prerequisite(s): NPB 261A; NPB 261B; or Consent of Instructor. Causes and mechanistic bases of major blinding diseases. Recent research on aspects of anatomy, biochemistry, electrophysiology, psychophysics, development, and genetics of the visual system related to disease. (Same course as NSC 261C and MCP 261C.) (S/U grading only.) Effective: 2005 Spring Quarter.

**NBP 263—Modeling in Systems Neuroscience (4)**
Lecture—3 hours; Lecture/Lab—1 hour. Prerequisite(s): Consent of Instructor. Modeling as a tool in systems neuroscience. Mathematical techniques will be introduced and used to explore advanced topics in echolocation, sound localization, electoreception, communications, and motor systems. Other topics include transforms, modeling assumptions, scales and linearity. Effective: 1997 Winter Quarter.

**NBP 267—Computational Neuroscience (5)**
Lecture—4 hours; Lecture/Lab—3 hours. Prerequisite(s): One course in general Neuroscience at the level of NPB 100 or NPB 110B; one year college-level Calculus at the level of MAT 016A, MAT 016B, MAT 016C or higher; one year Physics at the level of PHY 007A, PHY 007B, PHY 007C recommended; or Consent of Instructor. Mathematical models and data analysis techniques used to describe computations performed by nervous systems. Lecture topics include single-neuron biophysics, neural coding, network dynamics, memory, plasticity, and learning. Lab topics include programming mathematical models and data analysis techniques in MATLAB. (Same course as NSC 267.) Effective: 2018 Winter Quarter.
NPB 270—How to Write a Fundable Grant Proposal in the Biomedical Sciences (2)
Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Restricted to members of the Neuroscience and BMCDB graduate groups; graduate students in other biomedical programs may enroll with instructor permission. Teaches the do’s and don’ts of writing grants in the biomedical sciences and the mechanisms of the review process. May be repeated for credit. (Same course as NSC 270.) Effective: 2016 Spring Quarter.

NPB 271A—Core Concepts & Methods in Learning, Memory, and Plasticity (2)
Lecture/Discussion—2 hours. Prerequisite(s): Graduate Standing or Consent of Instructor. Core concepts and methods used in studies of learning, memory and plasticity. Behavioral paradigms and measurement approaches in human and animal studies of learning and plasticity, as well as a consideration of the functional, anatomical and neuronal mechanisms underlying brain plasticity. (Same course as PSC 271A, NSC 271A.) (S/U grading only.) Effective: 2019 Fall Quarter.

NPB 271B—Core Concepts & Methods in Learning, Memory, & Plasticity (2)
Lecture/Discussion—2 hours. Prerequisite(s): NPB 271A or NSC 271A or PSC 271A Core concepts and detailed survey methods used in studies of learning, memory and plasticity, from the cellular and molecular level to the level of neural circuits. Areas of learning, memory, and plasticity research where recent progress has been made in linking across these levels of analysis. (Same course as PSC 271B, NSC 271B.) (S/U grading only.) Effective: 2020 Winter Quarter.

NPB 271C—Translational Approaches to Learning, Memory, & Plasticity Disorders (2)
Lecture/Discussion—2 hours. Prerequisite(s): NPB 271B or NSC 271B or PSC 271B Neurological disorders, the effect of these disorders on learning, memory and plasticity, approved therapeutic options and current research designed to improve understanding and treatment of these diseases: (i) the clinical presentation, diagnostic criteria, and existing therapies, (ii) mechanistic studies in humans and animal models, and (iii) molecular pathways involved in the disease and approaches for drug discovery. (Same course as PSC 271C, NSC 271C.) (S/U grading only.) Effective: 2020 Spring Quarter.

NPB 285—Literature in Visual Neuroscience (2)
Seminar—2 hours. May be repeated for credit. (Same course as NSC 285.) (S/U grading only.) Effective: 2008 Fall Quarter.

NPB 287A—Topics in Theoretical Neuroscience (2)
Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. In-depth exploration of topics in theoretical neuroscience. Topic varies each year. Fall quarter (287A): foundational material from books and review articles. Spring quarter (287B): continuation of year's topic through readings of seminal articles from the primary literature. May be repeated for credit. (Same course as NSC 287A.) (S/U grading only.) Effective: 2017 Spring Quarter.

NPB 287B—Topics in Theoretical Neuroscience (2)
Seminar—2 hours. Prerequisite(s): Consent of Instructor. In-depth exploration of topics in theoretical neuroscience. Topic varies each year. Fall quarter (287A): foundational material from books and review articles. Spring quarter (287B): continuation of year's topic through readings of seminal articles from the primary literature. May be repeated for credit. (Same course as NSC 287B.) (S/U grading only.) Effective: 2009 Spring Quarter.

NPB 291—Auditory Neuroscience (1)
Discussion—0.5 hours; Seminar—0.5 hours. Prerequisite(s): NPB 100 or NPB 112 or NSC 222; Or the equivalent. Exploration of various important aspects of auditory physiology, behavior and psychophysiology through review of original literature. New topic each quarter. May be repeated for credit with consent of instructor. May be repeated for credit. (S/U grading only.) Effective: 1998 Spring Quarter.

Nursing Science & Health-Care Leadership; Nursing

Nursing Science & Health-Care Leadership; Nursing | Nursing Science & Health-Care Leadership M.S.

Heather M. Young, Ph.D., R.N., F.A.A.N.; Associate Vice Chancellor for Nursing, UC Davis; Dean and Professor, Betty Irene Moore School of Nursing
Theresa A. Harvath, Ph.D., R.N., F.A.A.N.; Executive Associate Dean
Elizabeth Rice, Ph.D., P.M.H.N.P.-B.C., R.N.; Associate Dean for Clinical Education and Practice, Director for the Master of Science—Family Nurse Practitioner Degree Program
Mission Statement

The Betty Irene Moore School of Nursing at UC Davis cultivates academic excellence through immersive, interprofessional and interdisciplinary education and research in partnership with the communities served. Faculty, staff and students discover and disseminate knowledge to advance health, improve quality of care and shape policy.

Nursing Science and Health-Care Leadership Graduate Degree Program

Hosted by the Betty Irene Moore School of Nursing at UC Davis, the Nursing Science and Health-Care Leadership Graduate Degree Programs prepare nurse leaders, physician assistants, nurse practitioners, researchers and faculty in a unique interdisciplinary and interprofessional environment. The full-time, academic, doctoral program prepares graduates as leaders in health care, health policy and nurse faculty/researchers at the university level. The master’s degree Physician Assistant Studies program prepares graduates to deliver care as physician assistants. Graduates of the professional master’s degree leadership program are prepared for health-care leadership roles in a variety of organizations and as nurse faculty at the community college and prelicensure education levels. Graduates of the master’s degree Nurse Practitioner Program are prepared to deliver care as nurse practitioners.

Faculty

The UC Davis Nursing Science and Health-Care Leadership Graduate Group includes a wide cross-section of academic disciplines with faculty from the Betty Irene Moore School of Nursing as well as UC Davis Health System and other UC Davis schools, colleges, and departments. Within the graduate group faculty are experts in nursing, medicine, health informatics, nutrition, biostatistics, public health and other fields.

Ideal students for the Nursing Science and Health-Care Leadership Master of Science — Leadership Track are those with experience or interest in transforming health care through nursing education and research. They want to focus on important societal health issues through the work of advancing health and improving the systems that provide health services.

Graduates of this program are prepared for academic and leadership positions. Graduates exercise leadership through scientific thinking, responsibility, initiative, cultural inclusiveness, knowledge of organizations and system change, teamwork and a commitment to healthy communities.

The M.S.—Leadership Track program is a full-time, professional degree program that prepares graduates for health-care leadership roles in a variety of organizations and as nurse faculty at the community-college level. Some examples include:

- Leaders of health organizations and agencies—such as community clinics, trade associations, advocacy groups—improving quality of care and work environments, and advancing health outcomes and health-care effectiveness and efficiency
- Community college and other prelicensure nursing faculty—teaching the next generation of nurses
- Legislative and governmental agency staff and leadership developing, influencing and implementing policy to improve access and outcomes (not limited to health agencies but other organizations that provide public infrastructure such as transportation, planning or parks and recreation)
- Careers across the health-care sector, such as insurance, pharmaceutical, hospital, home health, aging support services, adoption services, chronic illness support services and medical equipment industries fostering the integration of excellence in clinical care, management, policy, education and research

Master of Science students take core courses plus electives and must complete a thesis. This is a five-quarter program. Core courses are offered fall, winter and spring quarters (not summer) on the UC Davis Sacramento campus. Students in the master’s-degree leadership program should expect to be on campus at least two days a week. The majority of the program’s core classes are conducted all-day Thursdays and Fridays. Students should
expect that some quarters they need to be available on certain weekends and nights. Electives are offered on
different days for all students and may be located on either the Sacramento or Davis campus.

A mandatory Leadership Immersion Week serves as an orientation for students. This full-time, three-day experience
runs Wednesday through Friday the week before fall quarter begins. Throughout the week, students experience
nursing leadership, team building and develop faculty relationships. The coursework provided that week serves as
the foundation for the Nursing Science and Health-Care Leadership Graduate program curriculum.

**Nursing Science and Health-Care Leadership Graduate Degree Program**

Hosted by the Betty Irene Moore School of Nursing at UC Davis, the Nursing Science and Health-Care Leadership
Graduate Degree Programs prepare nurse leaders, physician assistants, nurse practitioners, researchers and
faculty in a unique interdisciplinary and interprofessional environment. The full-time, academic, doctoral program
prepares graduates as leaders in health care, health policy and nurse faculty/researchers at the university level.
The master's degree Physician Assistant Studies program prepares graduates to deliver care as physician
assistants. Graduates of the professional master's degree leadership program are prepared for health-care
leadership roles in a variety of organizations and as nurse faculty at the community college and prelicensure
education levels. Graduates of the master's degree Nurse Practitioner Program are prepared to deliver care as
nurse practitioners.

**Faculty**

The UC Davis Nursing Science and Health-Care Leadership Graduate Group includes a wide cross-section of
academic disciplines with faculty from the Betty Irene Moore School of Nursing as well as UC Davis Health System
and other UC Davis schools, colleges, and departments. Within the graduate group faculty are experts in nursing,
medicine, health informatics, nutrition, biostatistics, public health and other fields.

**Nursing Science & Health-Care Leadership; Nursing | NRS Courses**

**Courses in NRS:**

**NRS 201—Health Status and Care Systems (4)**
Discussion/Laboratory; Lecture/Discussion—3 hours; Project (Term Project). Prerequisite(s): Current enrollment in
the Nursing Science and Health-Care Leadership graduate program or consent of instructor. Comparative health
status data, major current health issues globally, nationally, regionally. Theoretical perspectives on social, political,
economic determinants of health. Health-care systems examined, linked to data, and evaluated in regards to
outcomes. Aging, rural, ethnic minority populations highlighted. Effective: 2010 Fall Quarter.
NRS 202—Implementation Science (4)
Lecture/Discussion—4 hours. Prerequisite(s): Current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor. Change processes in health care from political, historic, economic and sociologic frameworks. Historic and current examples of transformative change in the health-care system. Skills for system transformation through health policy, practice, research and education are emphasized. Effective: 2010 Winter Quarter.

NRS 203—Leadership in Health Care (4)
Fieldwork; Lecture/Discussion—3 hours. Prerequisite(s): Current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor. Critical examination of leadership from a variety of theoretical and philosophical perspectives and focuses on specific challenges in health care and leadership at various levels, e.g., patient, organizational, and policy levels. Effective: 2010 Fall Quarter.

NRS 204—Research Skills for Nursing Science and Health-Care Leadership (4)
Discussion/Laboratory—1 hour; Lecture/Discussion—3 hours. Prerequisite(s): Current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor. Foundation for analyzing research, health, and systems data to answer clinical, systems, or policy questions. Use and examine multiple sources of data and information as a basis for planned change and transformation in health care. Effective: 2014 Winter Quarter.

NRS 205—Research Design in Nursing and Health Care (4)
Lecture/Discussion—4 hours. Prerequisite(s): Current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor. Major types of quantitative and qualitative research design and their application to nursing and health-care research. Implications of choosing alternative research designs and critical analysis of philosophical underpinnings. Evaluation of control and validity, sampling, instruments to measure health concepts. Effective: 2010 Fall Quarter.

NRS 205A—Overview of Research in Nursing Science and Health Care (2)
Lecture—2 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Provides an overview of quantitative and qualitative paradigms in scientific inquiry and the major designs related to each paradigm. First of a three-course series on research design and methods in nursing science and healthcare research. Effective: 2015 Fall Quarter.

NRS 205B—Quantitative Research in Nursing Science and Health Care (4)
Lecture—4 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Introduces principles of quantitative data collection and analysis as applied to major study designs in nursing and health-care research. Provides a basic foundation for producing, interpreting, and applying quantitative research findings to answer clinical, system, and policy questions. Effective: 2015 Fall Quarter.

NRS 205C—Qualitative Research in Nursing Science and Health Care (4)
Lecture—4 hours. Prerequisite(s): Consent of Instructor. Restricted to current Ph.D. students in NSHL program or consent of instructor. Introduces principles of qualitative data collection and analysis as applied to major study designs in nursing and health-care research. Provides a basic foundation for producing, interpreting, and applying qualitative research findings to answer clinical, system, and policy questions. Effective: 2015 Fall Quarter.

NRS 206—Community Connections (2-5)
Variable—6 hours. Prerequisite(s): Current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor. Open to NSHL MS students only. Community-based learning and experiences including community participation, assessment, data collection and analysis using multiple approaches, community health improvement projects, collaborative leadership practice, all with the guidance of community members and nursing faculty. May be repeated for credit. (S/U grading only.) Effective: 2010 Fall Quarter.

NRS 210Y—Applied Health Informatics (4)
Lecture/Discussion—1 hour; Web Virtual Lecture—3 hours. Prerequisite(s): Consent of Instructor. Open to current student in NSHL graduate programs or consent of instructor. Within the conceptual framework of the Foundation of Knowledge model, this course integrates nursing science, information science, computer science and cognitive science to acquire, process, generate and disseminate knowledge. Effective: 2014 Winter Quarter.

NRS 211Y—Rural Health (2-3)
Fieldwork—1 hour; Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor.
Interprofessional graduate course provides an introduction to rural health theory, research, policy, and practice, with an emphasis on rural health assets and disparities. Effective: 2015 Spring Quarter.

NRS 212—Technology & Innovations in Health Care (2)
Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Multidisciplinary approach to stimulate new thinking in the practice, process, and delivery of health care. Focus on improving overall health outcomes. Effective: 2017 Winter Quarter.

NRS 213—Race and Health in the United States (3)
Seminar—7.5 hours. Prerequisite(s): Consent of Instructor. Open to all Nursing Science and Health-Care Leadership graduate students or consent of instructor only. Race as a social construct and unequal health care distribution in the United States. Practical health care leadership to end racial inequalities in health. Effective: 2018 Fall Quarter.

NRS 220—Social, Cultural, and Behavioral Determinants of Health (2)
Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Effects of globalization, political systems, local and global economies, culture, race, class, gender, and sexuality on population health. Effective: 2016 Summer Quarter.

NRS 221—Biophysical Concepts in Nursing (3)
Lecture/Discussion—3 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Pathophysiological processes that contribute to different disease states across the lifespan; case studies; selective clinical decisions using current, reliable sources of pathophysiology information. Effective: 2016 Summer Quarter.

NRS 222A—Research Quality Improvement and Evidence Based Practice (2)
Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Introduction to providing safe, competent and compassionate care in a highly technical and digital environment. Emphasis on safety, quality and research to clinical practice. Accessing and analyzing reliable sources of evidence for integration in care-plan. Effective: 2016 Summer Quarter.

NRS 222B—Research Quality Improvement and Evidence Based Practice (2)
Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Introduction to providing safe, competent and compassionate care in a highly technical and digital environment. Emphasis on safety, quality and research to clinical practice. Accessing and analyzing reliable sources of evidence for integration in care-plan. Effective: 2016 Fall Quarter.

NRS 223—Quality and Safety Education in Health Care (2)
Lecture/Discussion—2 hours. Prerequisite(s): NRS 221; NRS 272; NRS 420; NRS 421; NRS 273; NRS 422; NRS 423; NRS 425; Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Implementing best practices alongside technological tools and focusing on continuous quality improvement. Emphasis on providing safe, competent care in a highly technical and digital environment. Building capacity to apply concepts related to safety, quality and research to clinical practice. Effective: 2017 Spring Quarter.

NRS 224—Developing Future Nurse Leaders (2)
Lecture/Discussion—2 hours. Prerequisite(s): NRS 221; NRS 272; NRS 420; NRS 421; NRS 273; NRS 422; NRS 423; NRS 425; NRS 223; NRS 426; Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Develop skills around effective decision making, fiscal and environmental stewardship, initiating and maintaining effective working relationships, using mutually respectful communication and collaboration, care coordination, delegation and supervision. Emphasis on conflict resolution, leadership and interprofessional teamwork. Effective: 2017 Summer Quarter.

NRS 225—Professional Nursing Role Formation (3)
Lecture/Discussion—3 hours. Prerequisite(s): NRS 220; NRS 221; NRS 222A; NRS 272; NRS 420; NRS 421; NRS 429A; NRS 222B; NRS 273; NRS 422; NRS 423; NRS 429B; NRS 203; NRS 212; NRS 425; NRS 429C; NRS 202; NRS 223; NRS 426; NRS 429D; NRS 224; NRS 424; NRS 427; NRS 429E; Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Transition from nursing student to professional nurse. Focus on ethical comportment, professional values of social
justice, autonomy, advocacy, altruism, human dignity, and integrity. Students must pass a mastery exit examination and complete a capstone project. Effective: 2017 Fall Quarter.

**NRS 242A—Implementation Science for Clinicians (2)**
Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Course focuses on identification of relevant research or improvement questions specific to patient care and evaluating the pertinent research literature related to the implementation of evidence based care. The course is 1st of a 3-course series. Effective: 2014 Summer Quarter.

**NRS 242B—Implementation Science for Clinicians (2)**
Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Course is a continuation of course 242A, Implementation Science for Clinicians, with a focus on implementing and evaluating a change. Effective: 2014 Spring Quarter.

**NRS 242C—Implementation Science for Clinicians (2)**
Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Advanced skills in application of implementation science into systems based practice and incorporating quality improvement and patient safety knowledge with particular focus on prevention of medical errors. Effective: 2014 Spring Quarter.

**NRS 243A—Leadership in Professional Practice (2)**
Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Course is a critical examination of leadership using theoretical and philosophical perspectives with an applied approach applicable to clinical practice. The 3 course series is conducted across three quarters in the 1st, 3rd and 8th quarters. Effective: 2013 Summer Quarter.

**NRS 243B—Leadership in Professional Practice (1)**
Lecture/Discussion—1 hour. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Course introduces professional role topics including history of the profession, the role in interprofessional teams and the health care system, transitioning to the role from other health professions, scope of practice, certification and licensure and professional organizations. Effective: 2014 Winter Quarter.

**NRS 243C—Leadership in Professional Practice (1)**
Lecture/Discussion—1 hour. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Course expands upon the leadership role as it relates to their clinical practice and professional role. Professional role topics including: transitioning from student to practicing professional, scope of practice, the physician relationship, and more advanced concepts in ethics. Effective: 2014 Spring Quarter.

**NRS 250—Foundations of Primary Health Care (7)**
Laboratory—3 hours; Lecture/Discussion—6 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Course is designed to promote the understanding and clinical application of human anatomy, physiology, histology, immunology and pathology. Effective: 2013 Summer Quarter.

**NRS 251A—Primary Health Care (8)**
Lecture/Discussion—8 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Course introduces primary health care concepts essential to the care of common medical problems seen in primary care settings. Module content will focus on various organ systems and specialty areas. Effective: 2013 Fall Quarter.

**NRS 251B—Foundations of Primary Health Care (8)**
Lecture/Discussion—8 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Course introduces primary health care concepts essential to the care of common medical problems seen in primary care settings. Effective: 2014 Winter Quarter.

**NRS 251C—Primary Health Care (8)**
Lecture/Discussion—8 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing
Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Course introduces primary health care concepts essential to the care of common medical problems seen in primary care settings. Effective: 2014 Spring Quarter.

**NRS 251D—Primary Heath Care (6)**
Lecture/Discussion—6 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Course introduces primary health care concepts essential to the care of common medical problems seen in primary care settings. Effective: 2014 Summer Quarter.

**NRS 260—Foundations of Behavioral Health (1)**
Lecture/Discussion—1 hour. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Course focuses on the spectrum of normal psychological development over the lifespan for children, adults and elders. Theories of stress and coping mechanism are presented as a framework for the assessment of individuals. Effective: 2013 Summer Quarter.

**NRS 270—Foundations of Pharmacology (2)**
Laboratory—3 hours; Lecture/Discussion—1 hour. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Course introduces the student to the major concepts in pharmacology and relevant human physiology related to pharmacotherapeutics and toxicology. Effective: 2013 Summer Quarter.

**NRS 271A—Pharmacology (2)**
Laboratory—3 hours; Lecture/Discussion—1 hour. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Systems based pharmacology focused on classes of drugs used to treat disorders in specialty systems. Effective: 2013 Fall Quarter.

**NRS 271B—Pharmacology (2)**
Laboratory—3 hours; Lecture/Discussion—1 hour. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Systems based pharmacology focused on classes of drugs used to treat disorders in specialty systems. Effective: 2013 Fall Quarter.

**NRS 271C—Pharmacology (2)**
Laboratory—3 hours; Lecture/Discussion—1 hour. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Systems based pharmacology focused on classes of drugs used to treat disorders in specialty systems. Effective: 2014 Spring Quarter.

**NRS 272—Foundations of Pharmacology (2)**
Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Theoretical background to providing safe and effective care related to drugs and natural products. Effective: 2016 Summer Quarter.

**NRS 273—Pharmacology Concepts in Nursing (2)**
Lecture/Discussion—2 hours. Prerequisite(s): NRS 221; NRS 272; NRS 420; NRS 421; Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Application of principles for safe and effective use of medications and natural products; use of current, reliable information to make clinical decisions. Effective: 2016 Fall Quarter.

**NRS 290—Master's Seminar (2)**
Discussion—2 hours. Prerequisite(s): Current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor. Open to NSHL MS students only or by consent of course instructor. Subject varies from quarter to quarter. Current knowledge and issues relevant to one of two fields of emphasis: population health or health systems. May be repeated up to 10 time(s). Effective: 2010 Fall Quarter.

**NRS 291—Doctoral Seminar (2)**
Discussion—2 hours. Prerequisite(s): Current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor. Focus on the theory, research and knowledge relevant to one of two fields of emphasis: population health or health systems. Emphasis placed on reading, critique and synthesis of
classic and cutting-edge research in nursing and health care. May be repeated up to 10 time(s). Effective: 2010 Fall Quarter.

NRS 291D—Doctoral Seminar (2)
Discussion—2 hours. Prerequisite(s): Current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor. Focus on the theory, research and knowledge relevant to one of two fields of emphasis: population health or health systems. Emphasis placed on reading, critique and synthesis of classic and cutting-edge research in nursing and health care. May be repeated up to 10 time(s). (S/U grading only.) Effective: 2014 Winter Quarter.

NRS 298—Special Topics in Nursing Science and Health-Care Leadership (1-4)
Lecture/Discussion—1-2 hours; Variable—1-3 hours. Prerequisite(s): Current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor. In-depth study of topics in Nursing Science and Health-Care Leadership, selected from: policy and politics in health care, health-care disparities, current issues in health care, approaches to the conduct of science, or other related areas, with year to year variation. May be repeated for credit. Effective: 2014 Spring Quarter.

NRS 298V—Online Special Topics in Nursing Science and Health-Care Leadership (1-4)
Web Electronic Discussion—1-4 hours; Web Virtual Lecture—1-4 hours. Prerequisite(s): Current enrollment in the Nursing Science and Health-Care Leadership graduate program or consent of instructor. In-depth study of topics in Nursing Science and Health-Care Leadership, selected from: policy and politics in health care, health-care disparities, current issues in health care, approaches to the conduct of science, or other related areas, with year to year variation. May be repeated for credit. Effective: 2014 Winter Quarter.

NRS 299—Research and Writing (1-12)
Extensive Writing/Discussion—3-36 hours. Prerequisite(s): Consent of Instructor. Students in the Nursing Science and Health-Care Leadership graduate programs conduct research and writing under the supervision of a faculty member. May be repeated for credit. (S/U grading only.) Effective: 2011 Winter Quarter.

NRS 299D—Dissertation Research and Writing (1-12)
Extensive Writing/Discussion—3-36 hours. Prerequisite(s): Consent of Instructor. Students in the Nursing Science and Health-Care Leadership graduate programs conduct dissertation research and writing under the supervision of a faculty member. May be repeated for credit. (S/U grading only.) Effective: 2011 Winter Quarter.

NRS 301—Learner Centered Teaching (3-4)
Lecture/Discussion—3 hours; Practice—1 hour. Prerequisite(s): Consent of Instructor. Open to current students in the Nursing Science and Health-care Leadership graduate programs; outside students with prior educational or work experience in education may register for this class with the consent of instructor. Students will explore best practices in learner-centered teaching, performance-based curriculum models, instructional design, and assessing/evaluating student learning. Students will have experience in planning learner-centered activities that are engaging and effective in achieving desired student performance. Effective: 2016 Spring Quarter.

NRS 302—Teaching Methods - Use of Emerging Technologies to Improve Student Learning (4)
Lecture/Discussion—3 hours; Practice—1 hour. Prerequisite(s): Consent of Instructor. Open to current students in the Nursing Science and Health-care Leadership graduate programs; outside students with prior educational or work experience in education may register for this class with the consent of instructor. Students will examine, design and develop instructional strategies that use innovative and emerging technologies to promote motivation, performance and learning in health professions education. Research findings associated with use of various emerging technologies will be examined. Effective: 2016 Fall Quarter.

NRS 303—Professional Role Formation (2-4)
Laboratory—2 hours; Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Open to current students in the Nursing Science and Health-care Leadership graduate programs; outside students with prior educational or work experience in education may register for this class with the consent of instructor. Exploration of the educator role. Topics include Role Expectations, Legal and Regulatory Issues, Professional Ethics, Educational Scholarship, Individual Differences, Learning Environments, and Lifelong Learning. Placements for the optional practicum are arranged in a wide variety of settings. Effective: 2017 Winter Quarter.

NRS 306—Nature of Caregiving (4)
Lecture/Discussion—4 hours. Prerequisite(s): Consent of Instructor. Explores theoretical and conceptual frameworks to enable clinicians to understand the nature of family caregiving. Students examine and apply frameworks in order
to conduct comprehensive person and family based assessments and interventions incorporating various dimensions of family caregiving. Effective: 2019 Fall Quarter.

**NRS 307—Family Centered Communication & Shared Decision Making (4)**
Lecture/Discussion—4 hours. Prerequisite(s): Consent of Instructor. Incorporates shared decision-making principles and group communication to address family centered care planning and challenging clinical discussions. Targets competencies needed by health professionals to partner effectively to enhance the caregiving experience and reduce negative sequelae over the caregiving trajectory. Effective: 2020 Winter Quarter.

**NRS 308—Patient & Family Centered Care Plan Development (4)**
Lecture/Discussion—4 hours. Prerequisite(s): Consent of Instructor. Synthesizes assessment data and analyzes impact of technology, individual, family, sociocultural, health care system, and illness-related variables in specific family care-giving situations. Co-create comprehensive evidence based plan to facilitate the health and well-being of the family unit through shared decision-making. Effective: 2020 Spring Quarter.

**NRS 400—Basic Clinical Skills (1-4)**
Lecture/Lab—1-4 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Instruction and practice of the fundamental clinical skills necessary for patient care comprise this course with a primary focus on principles of effective communication in establishing the therapeutic provider-patient relationship. Effective: 2013 Summer Quarter.

**NRS 401—Basic Clinical Skills (1-4)**
Lecture/Lab—1-4 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Continuation of focus on history taking and physical examination skills with advanced/specialized content. Effective: 2013 Fall Quarter.

**NRS 410A—Advanced Clinical Skills (1-4)**
Lecture/Lab—1-4 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Continuation of focus on history taking and physical examination skills with advanced/specialized content. Effective: 2014 Winter Quarter.

**NRS 410B—Advanced Clinical Skills (1-4)**
Lecture/Lab—1-4 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Continuation of focus on history taking and physical examination skills with advanced/specialized content related specified systems. Effective: 2014 Spring Quarter.

**NRS 410C—Advanced Clinical Skills (1-4)**
Lecture/Lab—1-4 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Continuation of focus on history taking and physical examination skills with advanced/specialized content related specified systems. Effective: 2014 Summer Quarter.

**NRS 410D—Advanced Clinical Skills (1-4)**
Lecture/Lab—1-4 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Continuation of focus on history taking and physical examination skills with advanced/specialized content related to specified systems. Effective: 2013 Fall Quarter.

**NRS 410E—Advanced Clinical Skills (1-4)**
Lecture/Lab—1-4 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Continuation of focus on history taking and physical examination skills with advanced/specialized content related to specified systems. Effective: 2013 Fall Quarter.

**NRS 410F—Advanced Clinical Skills (1-4)**
Lecture/Lab—1-4 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Continuation of focus on history taking and physical examination skills with advanced/specialized content related to specified specialty systems. Effective: 2014 Summer Quarter.

**NRS 410G—Advanced Clinical Skills (1-4)**
Lecture/Lab—1-4 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science
and Health-Care Leadership Graduate Degree programs or by consent of instructor. Continuation of focus on history taking and physical examination skills with advanced/specialized content related to specified specialty systems. Effective: 2015 Fall Quarter.

NRS 420—Foundations of Clinical Nursing Practice (3)
Clinical Activity—9 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Foundational course introduces students to core concepts of clinical nursing, including clinical reasoning, professional ethics, therapeutic communication and activities of daily living. Develop skills for the provision of safe, high quality, culturally-sensitive, person-centered care across the lifespan. Effective: 2016 Summer Quarter.

NRS 421—Health Assessment Across the Lifespan (3)
Clinical Activity—6 hours; Lecture/Discussion—1 hour. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Prepares students to conduct a health history assessment using developmentally and culturally appropriate approaches for individuals across the lifespan. Acquire the knowledge, understanding, and skills needed to perform, interpret and communicate a health history. Effective: 2016 Summer Quarter.

NRS 422—Care of Adults with Chronic Conditions (6)
Clinical Activity—9 hours; Lecture/Discussion—3 hours. Prerequisite(s): NRS 221; NRS 272; NRS 420; NRS 421; Consent of Instructor. This course is open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Learn concepts central to the effective management of a variety of common chronic illness and disabling conditions across the lifespan in a variety of different settings. Practice conducting in-depth health assessments of individuals with chronic conditions. Effective: 2016 Fall Quarter.

NRS 423—Psychosocial Wellness & Illness (5)
Clinical Activity—6 hours; Lecture/Discussion—3 hours. Prerequisite(s): NRS 221; NRS 272; NRS 420; NRS 421; Consent of Instructor. This course is open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Explore the biological, psychological, cultural, societal, and environmental factors that affect psychological wellness and illness. Practice providing care to individuals and families experiencing disruptions in mental health secondary to physical or psychiatric illness, trauma or loss. Effective: 2016 Fall Quarter.

NRS 424—Nursing Care of Older Adults (3)
Clinical Activity—9 hours; Lecture/Discussion—3 hours. Prerequisite(s): NRS 221; NRS 272; NRS 420; NRS 421; NRS 273; NRS 422; NRS 423; NRS 425; NRS 223; NRS 426; Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Build skills for situations involving older adults, such as in the management of complex clinical and administering and interpreting standardized assessment tools. Develop plans of care for older adults experiencing a variety of geriatric syndromes. Effective: 2017 Summer Quarter.

NRS 425—Family Focused Nursing (9)
Clinical Activity—12 hours; Lecture/Discussion—5 hours. Prerequisite(s): NRS 221; NRS 272; NRS 420; NRS 421; NRS 273; NRS 422; NRS 423; Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Focuses on family as the unit of nursing and interprofessional care. Includes influences of family on health and illness, reproductive and gender/sexuality issues, pregnancy, birth and child-rearing, and the health and illness in children and youth. Effective: 2017 Winter Quarter.

NRS 426—Nursing Care of Adults with Complex Illness or Injury (8)
Clinical Activity—12 hours; Lecture/Discussion—4 hours. Prerequisite(s): NRS 221; NRS 272; NRS 420; NRS 421; NRS 273; NRS 422; NRS 423; NRS 425; Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Prepares students to provide comprehensive, patient-centered nursing care for patients with acute or complex illness and injury. Theory portion focuses on concepts associated with complex physiological alterations. Effective: 2017 Spring Quarter.

NRS 427—Fostering Healthy Communities (7)
Clinical Activity—9 hours; Lecture/Discussion—4 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Focuses on populations & communities, and emphasizes working with diverse communities in providing health promotion, chronic disease management, transitional support and crisis intervention. Develop skills to critically analyze and shape health policy and develop accessible community resources. Effective: 2017 Summer Quarter.
NRS 428—Capstone Clinical Nursing Practicum (8)
Clinical Activity—24 hours. Prerequisite(s): NRS 220; NRS 221; NRS 222A; NRS 272; NRS 420; NRS 421; NRS 429A; NRS 222B; NRS 273; NRS 422; NRS 423; NRS 429B; NRS 203; NRS 212; NRS 425; NRS 429C; NRS 202; NRS 223; NRS 426; NRS 429D; NRS 224; NRS 424; NRS 427; NRS 429E; Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Practicum experience is designed to facilitate transition to professional practice. Opportunity to choose a clinical practice area of interest and to work with a preceptor with expertise in that area. Effective: 2017 Fall Quarter.

NRS 429A—Collaborative Practice A (1)
Clinical Activity—3 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Interprofessional course uses experiential learning activities including simulation, role play, and case studies. Concepts include but are not limited to: communication, person-centered care, ethical decision making, end-of-life decisions, culturally appropriate care, quality and safety, social justice, and professionalism. Effective: 2016 Summer Quarter.

NRS 429B—Collaborative Practice B (1)
Clinical Activity—3 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Interprofessional course uses experiential learning activities including simulation, role play, and case studies. Concepts include but are not limited to: communication, person-centered care, ethical decision making, end-of-life decisions, culturally appropriate care, quality and safety, social justice, and professionalism. Effective: 2016 Fall Quarter.

NRS 429C—Collaborative Practice C (1)
Clinical Activity—3 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Interprofessional course uses experiential learning activities including simulation, role play, and case studies. Concepts include but are not limited to: communication, person-centered care, ethical decision making, end-of-life decisions, culturally appropriate care, quality and safety, social justice, and professionalism. Effective: 2017 Winter Quarter.

NRS 429D—Collaborative Practice D (1)
Clinical Activity—3 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Interprofessional course uses experiential learning activities including simulation, role play, and case studies. Concepts include but are not limited to: communication, person-centered care, ethical decision making, end-of-life decisions, culturally appropriate care, quality and safety, social justice, and professionalism. Effective: 2017 Spring Quarter.

NRS 429E—Collaborative Practice E (1)
Clinical Activity—3 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Interprofessional course uses experiential learning activities including simulation, role play, and case studies. Concepts include but are not limited to: communication, person-centered care, ethical decision making, end-of-life decisions, culturally appropriate care, quality and safety, social justice, and professionalism. Effective: 2017 Summer Quarter.

NRS 429F—Collaborative Practice F (1)
Clinical Activity—3 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Group or by consent of the instructor. Interprofessional course uses experiential learning activities including simulation, role play, and case studies. Concepts include but are not limited to: communication, person-centered care, ethical decision making, end-of-life decisions, culturally appropriate care, quality and safety, social justice, and professionalism. Effective: 2017 Fall Quarter.

NRS 440—Preparation for Clinical Practice (1-3)
Clinical Activity—3-9 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Students are placed in clinical settings and/or clinical simulation laboratories to observe and practice the integration of clinical skills with direct supervision by faculty. Effective: 2016 Winter Quarter.

NRS 450A—Supervised Clinical Practice—Primary Health Care (1-16)
Clinical Activity—48 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Each of the required primary care rotations is a four-week supervised clinical practice experience in primary care, under the supervision of an appropriate community-based primary care provider per accreditation requirements. May be repeated up to 5 time(s). Effective: 2016 Winter Quarter.
NRS 450B—Supervised Clinical Practice-Primary Health Care (1-16)
Clinical Activity—48 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Each of the required primary care rotations is a four-week supervised clinical practice experience in primary care, under the supervision of an appropriate community-based primary care provider per accreditation requirements. May be repeated up to 5 time(s). Effective: 2016 Winter Quarter.

NRS 450C—Supervised Clinical Practice-Primary Health Care (1-16)
Clinical Activity—48 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Each of the required primary care rotations is a four-week supervised clinical practice experience in primary care, under the supervision of an appropriate community-based primary care provider per accreditation requirements. May be repeated up to 5 time(s). Effective: 2016 Winter Quarter.

NRS 450D—Supervised Clinical Practice-Primary Health Care (1-16)
Clinical Activity—48 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Each of the required primary care rotations is a four-week supervised clinical practice experience in primary care, under the supervision of an appropriate community-based primary care provider per accreditation requirements. May be repeated up to 5 time(s). Effective: 2016 Winter Quarter.

NRS 450E—Supervised Clinical Practice-Primary Health Care (1-16)
Clinical Activity—48 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Each of the required primary care rotations is a four-week supervised clinical practice experience in primary care, under the supervision of an appropriate community-based primary care provider per accreditation requirements. May be repeated up to 5 time(s). Effective: 2016 Winter Quarter.

NRS 451—Supervised Clinical Practice-Pediatrics (1-16)
Clinical Activity—48 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Four-week clinical rotation under the supervision of an appropriate community-based Pediatric Medicine provider per accreditation requirements. May be repeated up to 5 time(s). Effective: 2016 Winter Quarter.

NRS 452—Supervised Clinical Practice-Women’s Health (1-16)
Clinical Activity—48 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Four-week clinical rotation under the supervision of an appropriate community-based women’s health and prenatal care provider per accreditation requirements. May be repeated up to 5 time(s). Effective: 2016 Winter Quarter.

NRS 453—Supervised Clinical Practice-Mental Health (1-16)
Clinical Activity—48 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Four-week clinical rotation under the supervision of an appropriate community-based psychiatrist, psychiatric/mental health provider per accreditation requirements. May be repeated up to 5 time(s). Effective: 2016 Winter Quarter.

NRS 454—Supervised Clinical Practice-Emergency Medicine (1-16)
Clinical Activity—48 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Four-week clinical rotation under the supervision of an appropriate Emergency Medicine provider per accreditation requirements. May be repeated up to 5 time(s). Effective: 2016 Winter Quarter.

NRS 455—Supervised Clinical Practice-Inpatient Surgery (1-16)
Clinical Activity—48 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Four-week clinical experience under the supervision of an appropriate surgical provider per accreditation requirements. May be repeated up to 5 time(s). Effective: 2016 Winter Quarter.

NRS 456—Supervised Clinical Practice-Inpatient Medicine (1-16)
Clinical Activity—48 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Four-week clinical rotation
under the supervision of an appropriate inpatient provider per accreditation requirements. May be repeated up to 5 time(s). Effective: 2016 Winter Quarter.

NRS 459—Supervised Clinical Practice-Other Specialties (1-16)
Clinical Activity—48 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Two four-week selective rotations are available to accommodate student interest and/or accommodate a student’s clinical deficits identified by the program. May be repeated up to 5 time(s). Effective: 2016 Winter Quarter.

NRS 470—Health Care Ethics (3-9)
Discussion/Laboratory—1 hour; Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Guided independent study of issues in biomedical ethics, with discussion of readings that are based on student interests and needs. Participation in ethics rounds. (Same course as GMD 470.) (S/U grading only.) Effective: 2012 Spring Quarter.

NRS 471—Supervised Clinical Practice-Geriatrics (1-16)
Clinical Activity—48 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Four-week clinical rotation under the supervision of an appropriate community-based Geriatric Medicine provider per accreditation requirements. May be repeated up to 5 time(s). Effective: 2016 Winter Quarter.

NRS 475—Supervised Clinical Practice-Acute Care (1-16)
Clinical Activity—48 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Two- to four-week rotation focus on providing acute care in inpatient settings. Students will work directly with specific inpatient units. May be repeated up to 5 time(s). Effective: 2016 Winter Quarter.

NRS 480—Supervised Clinical Practice-Rural Health (1-16)
Clinical Activity—48 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Rural health rotations focus on providing care in medically underserved rural sites. Students will experience care across the continuum in ambulatory, inpatient, and community based settings. May be repeated up to 5 time(s). Effective: 2016 Winter Quarter.

NRS 490—Supervised Clinical Practice-Quality and Safety (1-16)
Clinical Activity—48 hours. Prerequisite(s): Consent of Instructor. Open to graduate students in the Nursing Science and Health-Care Leadership Graduate Degree programs or by consent of instructor. Clinical rotation that allow students to work directly with patient safety and quality improvement committees in various organizations. May be repeated up to 5 time(s). Effective: 2016 Winter Quarter.

NRS 493A—Improving Quality in Health Care (4)
Lecture/Discussion—4 hours. Prerequisite(s): Consent of Instructor. Open to Nursing Science and Health-Care Leadership Students. Working in interdisciplinary teams, will explore the theory and practical methods being employed to make improvement in health care systems while providing an opportunity for interprofessional educational experience. Effective: 2017 Fall Quarter.

NRS 493B—Improving Quality in Health Care (4)
Lecture/Discussion—4 hours. Prerequisite(s): NRS 493A; Consent of Instructor. Open to Nursing Science and Health-Care Leadership Students. Working in interdisciplinary teams, will explore advanced theory and practical methods being employed to make improvement in health care systems while providing an opportunity for interprofessional educational experience. Effective: 2018 Winter Quarter.

NRS 493C—Enhancing Patient Safety in Health Care (3)
Clinical Activity—1 hour; Discussion—1 hour; Seminar—1 hour. Prerequisite(s): Consent of Instructor. Nursing Science and Health-Care Leadership graduate students. Inter-professional module is designed to explore the theory and practical methods being employed to improve patient safety in health care while providing an opportunity for interprofessional educational experience. Effective: 2017 Spring Quarter.

Nutrition & Food Minor; Nutrition

Nutrition & Food Minor; Nutrition | Nutrition & Food Minor

(College of Agricultural and Environmental Sciences)
Francene M. Steinberg, Ph.D., RD., Chair of the Department
Sheri Zidenberg-Cherr, Ph.D., Vice Chairperson of the Department

Department Office. 3135 Meyer Hall; 530-752-4630; http://nutrition.ucdavis.edu

Faculty. http://nutrition.ucdavis.edu/people/faculty/index.html

The Department of Nutrition offers four minor programs open to students majoring in other disciplines who wish to complement their study programs with a concentration in the area of food and nutrition.

Graduate Study. Programs of study leading to the M.S. and Ph.D. degrees are available in Nutrition. For information on graduate study contact the Nutrition Graduate Group.

Minor Advisor. 3202 Meyer Hall; 530-752-2512

Nutrition and Food

**Preparation.**
Plan in advance to include the required course prerequisites.

NUT 111AY Introduction to Nutrition and Metabolism 3
NUT 111B Recommendations & Standards for Human Nutrition 2
NUT 120AN Nutritional Anthropology 4
OR
NUT 120BN Nutritional Geography 4
FST 100A Food Chemistry 4
FST 100B Food Properties 4
NPB 101 Systemic Physiology 5

Replacement courses:
- Note: If the student’s major program requires the same course in biochemistry and physiology, only one of the courses may duplicate credit toward the minor.
- Each program below lists replacement courses to fulfill the minimum unit requirement.

NUT 114 Developmental Nutrition 4
NUT 116A Clinical Nutrition 3
NUT 116B Clinical Nutrition 3
NUT 116AL Clinical Nutrition Practicum 3
NUT 116BL Clinical Nutrition Practicum 3

Total: 22

**Nutrition & Food Minor; Nutrition | NUT Courses**

**Courses in NUT:**

**NUT 010—Discoveries and Concepts in Nutrition (3)**
Lecture—3 hours; Project (Term Project). Nutrition as a science; historical development of nutrition concepts; properties of nutrients and foods. Not open for credit to students who have taken an upper division course in nutrition. No credit will be granted to students who have completed NUT 010Y or NUT 010V or an upper-division nutrition course. GE credit: SE, SL. Effective: 2018 Winter Quarter.

**NUT 010V—Discoveries and Concepts in Nutrition (3)**
Proyect (Term Project); Web Virtual Lecture—3 hours. Nutrition as a science; historical development of nutrition concepts; properties of nutrients and foods. Not open for credit to students who have taken an upper division course in nutrition. No credit will be granted to students who have completed NUT 010 or NUT 010Y or an upper-division nutrition course. GE credit: SE, SL. Effective: 2018 Winter Quarter.

**NUT 010Y—Discoveries and Concepts in Nutrition (3)**
Project (Term Project); Web Virtual Lecture—3 hours. Nutrition as a science; historical development of nutrition concepts; properties of nutrients and foods. Not open for credit to students who have taken an upper division
course in nutrition. No credit will be granted to students who have completed NUT 010 or NUT 010V or an upper-
division nutrition course. GE credit: SE, SL. Effective: 2018 Winter Quarter.

NUT 011—Current Topics and Controversies in Nutrition (2)
Discussion—1.5 hours; Term Paper. Exploration of current applications and controversies in nutrition. Students read
scientific journal articles and write summaries, as well as give brief oral presentations. Topics change to reflect
current interests and issues. GE credit: OL, SE, WE. Effective: 2010 Winter Quarter.

NUT 099—Individual Study for Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

NUT 104—Environmental & Nutritional Factors in Cellular Regulation and Nutritional Toxicants (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): BIS 101; (BIS 103 or ABI 103) Cellular regulation from
nutritional/toxicological perspective. Emphasis: role of biofactors on modulation of signal transduction pathways,
role of specific organelles in organization/regulation of metabolic transformations, major cofactor functions,
principles of pharmacology/toxicology important to understanding nutrient/toxicant metabolism. (Same course as
ETX 104.) GE credit: OL, SE, SL. Effective: 2008 Fall Quarter.

NUT 105—Nutrition and Aging (3)
Lecture—3 hours. Prerequisite(s): (NUT 111AV or NUT 111AY); ABI 103; Or the equivalent course to ABI 103. Role of
nutrition in the aging process from both an organismal/cell perspective, including demographics, theories of aging,
nutrition and evolution, nutritional manipulation and life-span extension, and nutrition's impact on the diseases of
aging. GE credit: SE. Effective: 2017 Spring Quarter.

NUT 106—Food Chemistry for Clinical Nutrition (5) Review all entries
Discussion—1 hour; Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): CHE 008B C or better or CHE 118C C or
better or CHE 128C C or better; Concurrent with FST 100A recommended. Only open to Clinical Nutrition majors.
Chemical and physical principles that influence functional properties, nutrient content, safety, and sensory aspects
of food. Emphasis on the application of these concepts in clinical nutrition. Not open to students who have
completed FST 101A and/or FST 101B. (Same course as FST 106.) GE credit: SE, SL, WE. Effective: 2018 Fall Quarter.

NUT 111AY—Introduction to Nutrition and Metabolism (3)
Lecture/Discussion—1 hour; Web Virtual Lecture—2 hours. Prerequisite(s): CHE 008B; NPB 101; Or the equivalent of
NPB 101. Restricted to upper division or graduate level students only. Introduction to metabolism of protein, fat and
carbohydrate: the biological role of vitamins and minerals; nutrient requirements during the life cycle; assessment
of dietary intake and nutritional status. Not open for credit to students who have completed NUT 101 or NUT 111AV.
GE credit: SE. Effective: 2016 Fall Quarter.

NUT 111B—Recommendations and Standards for Human Nutrition (2) Review all entries
Lecture—2 hours. Prerequisite(s): CHE 008B; NPB 101; (NUT 111AV or NUT 111AY); Or the equivalent of NPB 101.
Critical analysis of the development of nutritional recommendations for humans. Topics include: history of modern
recommendations, development of the Recommended Dietary Allowance (RDA) and other food guides; the Dietary
Reference Intakes (DRI); administrative structure of regulatory agencies pertinent to nutrition recommendations;
introduction to scientific methods used to determine the recommendations; food labeling laws; nutrition
recommendations in other countries and cultures. Not open for credit to students who have completed NUT 111.
Effective: 2017 Spring Quarter.

NUT 111B—Recommendations & Standards for Human Nutrition (2) Review all entries
Lecture—2 hours. Prerequisite(s): CHE 008B or CHE 118B or CHE 128B; NUT 111AY; NPB 101 recommended Critical
analysis of the development of nutritional recommendations for humans. Topics include: history of modern
recommendations, development of the Recommended Dietary Allowance (RDA) and other food guides; the Dietary
Reference Intakes (DRI); administrative structure of regulatory agencies pertinent to nutrition recommendations;
introduction to scientific methods used to determine the recommendations; food labeling laws; nutrition
recommendations in other countries and cultures. Not open for credit to students who have completed NUT 111. Effective: 2019 Fall Quarter.

NUT 112—Nutritional Assessment (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ((ABI 102, ABI 103) or (BIS 102, BIS 103)); NUT 111AY; (STA 013 or STA 013Y or PLS 120) Restricted to upper division or graduate level Nutrition students only. Methods of human nutritional assessment, including dietary, anthropometric, biochemical methods. Principles of precision, accuracy, and interpretation of results for individuals and populations. GE credit: QL, SE. Effective: 2018 Spring Quarter.

NUT 113—Principles of Epidemiology in Nutrition (4) Review all entries
Lecture/Discussion—4 hours. Prerequisite(s): STA 013 or STA 013Y or PLS 120; STA 100; Or equivalent. Introduction to epidemiology as it relates to the field of nutrition, including study design, principles of epidemiologic inference, criteria for causality, and interpreting measures of disease risk. GE credit: QL, SE. Effective: 2014 Fall Quarter.

NUT 114—Developmental Nutrition (4)
Lecture—4 hours. Prerequisite(s): ABI 102; ABI 103; (NUT 111AV or NUT 111AY); NUT 111B Role of nutritional factors in embryonic and postnatal development. GE credit: SE. Effective: 2017 Winter Quarter.

NUT 115—Animal Nutrition (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): CHE 008B or CHE 118B; or Consent of Instructor. Comparative differences among animals in digestion and metabolism of nutrients. Nutrient composition of feeds, digestive systems, digestion, absorption, feeding strategies. GE credit: OL, QL, SE, SL, VL, WE. Effective: 2017 Winter Quarter.

NUT 116A—Clinical Nutrition (3)
Lecture—3 hours. Prerequisite(s): (NUT 111AV or NUT 111AY); NUT 111B; NUT 112; NPB 101; Or the equivalent to NPB 101. Biochemical and physiological bases for therapeutic diets. Problems in planning diets for normal and pathological conditions. GE credit: SE. Effective: 1997 Fall Quarter.

NUT 116AL—Clinical Nutrition Practicum (3)
Discussion—1 hour; Laboratory—3 hours; Lecture—1 hour. Prerequisite(s): NUT 116A (can be concurrent) Fundamental principles of planning and evaluating therapeutic diets and patient education for pathological conditions covered in 116A. GE credit: SE. Effective: 2017 Winter Quarter.

NUT 116B—Clinical Nutrition (3)
Lecture—3 hours. Prerequisite(s): (NUT 111AV or NUT 111AY); NUT 111B; NUT 112; NPB 101; Or the equivalent to NPB 101. Biochemical and physiological bases for therapeutic diets. Problems in planning diets for normal and pathological conditions. GE credit: SE. Effective: 2017 Winter Quarter.

NUT 116BL—Clinical Nutrition Practicum (3)
Discussion—1 hour; Laboratory—3 hours; Lecture—1 hour. Prerequisite(s): NUT 116AL; NUT 116B (can be concurrent) Fundamental principles of planning and evaluating therapeutic diets and patient education for pathological conditions covered in 116B. Continuation of course 116AL. GE credit: SE. Effective: 2017 Winter Quarter.

NUT 117—Experimental Nutrition (6)
Extensive Writing; Laboratory—6 hours; Lecture—3 hours. Prerequisite(s): (NUT 111AV or NUT 111AY); NUT 111B; NUT 112; BIS 102; BIS 103; MCB 120L or other laboratory course in biochemistry is recommended. Methods of assessing nutritional status. Application of chemical, microbiological, chromatographic and enzymatic techniques to current problems in nutrition. GE credit: SE, WE. Effective: 2016 Fall Quarter.

NUT 118—Community Nutrition (4)
Lecture—4 hours. Prerequisite(s): NUT 116A; (NUT 111AV or NUT 111AY); NUT 111B Nutrition problems in contemporary communities and of selected target groups in the United States and in developing countries. Nutrition programs and policy, principles of nutrition education. GE credit: SE, SL. Effective: 2017 Winter Quarter.

NUT 119A—International, community-based nutritional assessment. (1)
Lecture/Discussion—1 hour. Prerequisite(s): NUT 112 (can be concurrent); and Consent of Instructor. Issues and problems related to community-based nutritional assessment in a low-income country, major nutritional problems in low-income countries; ethical issues in human investigation; survey design, data collection techniques, and data
analysis; preparation for international travel; cross-cultural communication, health, and safety while living abroad.
Effective: 2002 Spring Quarter.

NUT 119B—International, Community-Based Nutritional Assessment (6)
Fieldwork—12 hours; Lecture—2 hours. Prerequisite(s): NUT 119A; and Consent of Instructor. Restricted to upper division students in Clinical Nutrition, Community Nutrition, Dietetics, and Nutrition Science. A six-week summer course in Peru. Implementation of a community-based nutritional assessment survey, including development of the survey instrument, selection. Effective: 2002 Summer Special Session.

NUT 120AN—Nutritional Anthropology (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): NUT 010 and ANT 002 recommended. Nutritional anthropology from historical and contemporary perspectives; the anthropological approach to food and diet; field work methods; case histories that explore food patterns and their nutritional implications. GE credit: SE, SS. Effective: 2017 Spring Quarter.

NUT 120BN—Nutritional Geography (4)
Discussion—1 hour; Lecture—3 hours. Nutritional geography from historical and contemporary perspectives; the geographical approach to food and diet; cultural and environmental factors that influence dietary practices; food-related landscapes and patterns. GE credit: SE, SS. Effective: 2016 Fall Quarter.

NUT 122—Ruminant Nutrition and Digestive Physiology (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): (ABI 103 or BIS 103); BIS 002A; BIS 002B; BIS 002C; (ANS 100 or NPB 101); or Consent of Instructor. MAT 016B recommended. Study of nutrient utilization as influenced by the unique aspects of digestion and fermentation in ruminants, both domestic and wild. Laboratories include comparative anatomy, feed evaluation, digestion kinetics using fistulated cows, computer modeling, and microbial exercises. GE credit: QL, SE. Effective: 2017 Spring Quarter.

NUT 123—Comparative Animal Nutrition (3)
Lecture—3 hours. Prerequisite(s): ABI 103 or BIS 103 Restricted to upper division and graduate level students. Comparative nutrition of animals; including laboratory, companion, zoo, and wild, animals. Digestion and metabolic adaptations required for animal species to consume diverse diets. Relation of nutrition to metabolic adaptations and physiological states, including growth, reproduction, and diseases. GE credit: SE. Effective: 2017 Spring Quarter.

NUT 123L—Comparative Animal Nutrition Laboratory (1)
Laboratory—3 hours. Prerequisite(s): ABI 103 or BIS 103 Laboratory exercises leading to written reports on establishment of nutritional requirements and formulation of complete diets for laboratory, companion, zoo and wild animals. Effective: 2017 Spring Quarter.

NUT 124—Nutrition and Feeding of Finfishes (3)
Lecture—3 hours. Prerequisite(s): BIS 103 or ABI 103 Principles of nutrition and feeding of fishes under commercial situations; implication of fish nutrition to the environment and conservation of endangered species. GE credit: QL, SE, SL. Effective: 2016 Fall Quarter.

NUT 127—Environmental Stress and Development in Marine Organisms (10)
Discussion—2 hours; Laboratory—12 hours; Lecture—4 hours. Prerequisite(s): ETX 101 or BIS 102 or BIS 104; or equivalent course. ETX 114A or NUT 114 recommended. Course taught at Bodega Marine Laboratory. Effects of environmental and nutritional stress, including pollutants, on development and function in embryos and larvae of marine organisms. Emphasis on advanced experimental methods. (Same course as ETX 127.) GE credit: OL, QL, SE, SL, VL, WE. Effective: 2002 Summer Session 1. 

NUT 129—Journalistic Practicum in Nutrition (3)
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): (NUT 111AV or NUT 111AY); NUT 111B; or Consent of Instructor. A course in written or oral expression. Critical analysis and discussion of current, controversial issues in nutrition; use of journalistic techniques to interpret scientific findings for the lay public. Students required to write several articles for campus media. May be repeated up to 1 time(s). GE credit: OL, SE, SL, WE. Effective: 2017 Spring Quarter.

NUT 130—Experiments in Nutrition: Design and Execution (2)
Laboratory—6 hours. Prerequisite(s): Consent of Instructor. NUT 111AV, NUT 111AY, NUT 111B or NUT 114 recommended. Experiments in current nutritional problems. Experimental design: students choose project and, independently or in groups of two-three, design a protocol, complete the project, and report findings. May be
repeated for credit up to six times (three times per instructor) with consent of instructor. May be repeated up to 6
time(s) three times per instructor with consent of instructor. GE credit: SE. Effective: 2016 Fall Quarter.

NUT 141—Comparative Animal Nutrition and Metabolism (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ABI 103; (NUT 115 or NUT 116A or NUT 116B); or Consent of
Instructor. Foundational principles of nutrition, nutrient composition of feed ingredients, digestive systems of
domestic and exotic animals, nutrient digestibility and absorption, nutrient metabolism. GE credit: SE, SL, WE.
Effective: 2018 Fall Quarter.

NUT 190—Proseminar in Nutrition (1)
Seminar—1 hour. Prerequisite(s): (NUT 111AV or NUT 111AY); NUT 111B Restricted to senior standing. Discussion of
human nutrition problems. Each term will involve a different emphasis among experimental, clinical, and dietetic
problems of community, national and international scope. May be repeated twice for credit with consent of
instructor. May be repeated up to 2 time(s). GE credit: OL, SE, VL. Effective: 2016 Fall Quarter.

NUT 190C—Nutrition Research Conference (1)
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Upper division standing in Nutrition or related biological
science. Introduction to research findings and methods in nutrition. Presentation and discussion of research by
faculty and students. May be repeated for credit. May be repeated for credit. (P/NP grading only.) GE credit: SE.
Effective: 1997 Winter Quarter.

NUT 192—Internship (1-12)
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. One upper division course in nutrition. Work
experience on or off campus in practical application of nutrition, supervised by a faculty member. (P/NP grading
only.) Effective: 1997 Winter Quarter.

NUT 197T—Tutoring in Nutrition (1-2)
Discussion/Laboratory—3-6 hours. Prerequisite(s): Consent of Instructor. Nutrition Science, Clinical Nutrition or
related major. Tutoring of students in nutrition courses, assistance with discussion groups or laboratory sections,
weekly conference with instructor in charge of course: written evaluations. May be repeated if tutoring a different
course. May be repeated for credit. (P/NP grading only.) Effective: 2016 Fall Quarter.

NUT 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

NUT 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

NUT 219A—International Nutrition (3)
Lecture—3 hours. Prerequisite(s): NUT 111AV; NUT 111AY; Graduate Standing; undergraduates only admitted with
consent of instructor. Epidemiology, etiology, and consequences of undernutrition, with particular focus on the
nutritional problems of children and women in low income populations. Effective: 2018 Spring Quarter.

NUT 219B—International Nutrition (3)
Lecture—3 hours. Prerequisite(s): NUT 219A Intervention programs to prevent or ameliorate nutritional problems in
low-income populations. Planning, implementing, and evaluating nutrition intervention programs. Effective: 2004
Fall Quarter.

NUT 230—Experiments in Nutrition: Design and Execution (2)
Laboratory—6 hours. Prerequisite(s): Consent of Instructor. NUT 201, NUT 202, NUT 203, NUT 204, or the
equivalent recommended. Student selected projects to enhance laboratory skills. Independently, or in groups of
two-three students, design a protocol, carry out the project, analyze the results and report the findings. May be
repeated up to 6 time(s) with consent of instructor (limit of three times per instructor). Effective: 1999 Fall Quarter.

NUT 250—Metabolic Homeostasis (3)
Discussion—1.5 hours; Lecture—2 hours. Prerequisite(s): Passing the Nutrition Graduate Group Preliminary
Examination or consent of instructor. Preference given to students in advanced standing in the Nutrition Graduate
Group. Regulatory mechanisms of carbohydrate, lipid, and protein homeostasis; mechanisms of metabolic enzyme
regulation and of the metabolic hormones; homeostatic mechanisms and interactions; fuel-fuel interactions;

NUT 251—Nutrition and Immunity (2)
Lecture/Discussion—2 hours. Prerequisite(s): PMI 126; ABI 102; MMI 107; Or the equivalent to MMI 107. Cellular and
molecular mechanisms underlying interactions of nutrition and immune function, including modulation of
immunocompetence by diet and effects of immune responses on nutritional needs. Lectures and discussion explore implications for resistance to infection, autoimmunity and cancer. Effective: 2000 Winter Quarter.

NUT 252—Nutrition and Development (3)
Lecture—3 hours. Prerequisite(s): NUB 210A, NUB 210B, and NUB 210C recommended. Relationship of nutrition to prenatal and early postnatal development. Effective: 2018 Spring Quarter.

NUT 253—Control of Energy Balance and Body Weight (3)
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): Consent of Instructor. Comprehensive study of the biochemical, nutritional and physiological mechanisms controlling food intake, body composition and energy expenditure. Subject matter will be approached through lectures and discussions where students and staff will critically evaluate the literature. Effective: 2016 Spring Quarter.

NUT 254—Applications of Systems Analysis in Nutrition (3)
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): NUT 202; Or the equivalent. Quantitative aspects of digestion and metabolism; principles of systems analysis. Evolution of models of energy metabolism as applied in current feeding systems. Critical evaluations of mechanistic models used analytically in support of nutritional research. Effective: 1997 Winter Quarter.

NUT 258—Field Research Methods in International Nutrition (3)
Lecture/Discussion—3 hours. Prerequisite(s): Graduate standing or consent of instructor. Issues and problems related to implementation of nutrition field research in less-developed countries, including ethics; relationships with local governments, communities, and scientists; data collection techniques and quality assurance; field logistics; research budgets; and other administrative and personal issues. Effective: 1997 Winter Quarter.

NUT 259—Nutrition and Aging (2)
Lecture—2 hours. Prerequisite(s): NUT 201; NUT 202; NUT 203; NUT 204; Three courses. Interaction between nutrition and aging. Topics include physiological/biochemical basis of aging, age-related changes affecting nutritional requirements, nutrition and mortality rate, assessment of nutritional status in the elderly, and relationship between developmental nutrition and the rate of aging. Effective: 1997 Fall Quarter.

NUT 270—Scientific Ethics in Biomedical Studies: Emphasis on Nutrition (3)
Discussion—1 hour; Lecture—1 hour; Term Paper. Restricted to graduate standing or consent of instructor. Scientific ethics in biomedical studies, especially nutrition. Discussion and case study presentations on scientific integrity, fraud, misconduct, conflict of interest, human and animal research protections. Not open for credit to students who have completed NUT 492B. Effective: 2003 Spring Quarter.

NUT 290—Beginning Nutrition Seminar (2)
Lecture/Discussion—1 hour; Seminar—1 hour. Prerequisite(s): First-year graduate standing. Discussion and critical evaluation of topics in nutrition with emphasis on literature review and evaluation in this field. Students give oral presentations on relevant topics. Effective: 1997 Fall Quarter.

NUT 290C—Research Conference (1)
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Graduate standing. Major professors lead research discussions with their graduate students. Research papers are reviewed and project proposals presented and evaluated. Format will combine seminar and discussion style. (S/U grading only.) Effective: 1997 Winter Quarter.

NUT 291—Advanced Nutrition Seminar (1)
Seminar—1 hour. Prerequisite(s): Second-year graduate standing. Advanced topics in nutrition research. Multiple sections may be taken concurrently for credit. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

NUT 293A—Current Topics in Obesity, Food Intake and Energy Balance (3)
Discussion—1 hour; Lecture—1 hour; Seminar—1 hour. Prerequisite(s): NUT 129; Or graduate standing; Undergraduates with upper division standing with at least one writing course may enroll with consent of instructor. Current research and its evaluation. Principles of experimental design and scientific background for given article. Articles summarized for posting on Internet for use by healthcare professionals. May be repeated for credit with consent of instructor. May be repeated for credit. Effective: 1997 Fall Quarter.

NUT 293B—Current Topics in Obesity, Food Intake, and Energy Balance with Special Topics (3)
Discussion—1 hour; Lecture—1 hour; Seminar—1 hour. Prerequisite(s): NUT 129; Graduate standing. Undergraduates with upper division standing with at least one writing course may enroll with consent of instructor. A continuation of course 293A, with additional special topics. May be repeated for credit up to 3 times with consent of instructor. May be repeated up to 3 time(s). Effective: 1997 Fall Quarter.
NUT 294A—Current Topics in Developmental Nutrition (2)
Seminar—2 hours. Prerequisite(s): NUT 114 or NUT 252; or Consent of Instructor. Restricted to graduate standing or consent of instructor. Effects of nutrition on embryology, morphogenesis, and developmental mechanisms. May be repeated for credit when topic differs. Effective: 2004 Winter Quarter.

NUT 297T—Supervised Teaching in Nutrition (1-3)
Variable. Prerequisite(s): Graduate standing in nutrition or consent of instructor. Practical experience in teaching nutrition at the university level; curriculum design and evaluation; preparation and presentation of material. Assistance in laboratories, discussion sections, and evaluation of student work. (S/U grading only.) Effective: 1997 Winter Quarter.

NUT 298—Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Effective: 1997 Winter Quarter.

NUT 299—Research (1-12)
Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

NUT 492A—Professionalism: An Academic Perspective (2)
Lecture/Discussion—2 hours. Prerequisite(s): Graduate standing. For graduate students in their initial quarter of residence. Professionalism topics are presented and examples drawn from both the biological and social sciences. Effective: 1997 Fall Quarter.

NUT 492C—Grant Writing (3)
Discussion—1.5 hours; Lecture—1.5 hours. Prerequisite(s): Graduate standing in Nutrition or consent of instructor. Preparation of grants for governmental agencies (particularly NIH and USDA) and private foundations. Students will write a research grant or fellowship application. May be repeated once for credit with consent of instructor. May be repeated up to 1 time(s). Effective: 1997 Fall Quarter.

The Major Program
The study of nutrition encompasses all aspects of the consumption and utilization of food and its constituents. Key areas of study include: the biochemical reactions important to the utilization of nutrients and food constituents; the impact of diet on health and disease; and, nutrition-related policy and public health issues. The nutrition science major includes two options for studying these areas: nutritional biology and nutrition in public health.

The Program. Nutrition, as it is taught on the Davis campus, is a biological science and requires a complete background in chemistry and biology, along with calculus and physics (nutritional biology option) or economics (nutrition in public health option). These courses are generally completed during the first two years, and along with biochemistry, must be completed before most nutrition classes can be taken. During their junior and senior years, students in the nutritional biology option take additional course work in biochemistry, physiology, and toxicology. Students in the nutrition in public health option take additional course work in social and health-related sciences.

Career Alternatives. Both options are excellent preparation for professional or graduate training in medicine, public health, or other health sciences. The nutritional biology option also provides preparation for technical work in nutrition in the animal, food, and pharmaceutical industries. The nutrition in public health option prepares students for jobs in administrative, teaching, or public health/public service positions.

Dietetics Internship. To fulfill the academic requirements for an internship in Dietetics, students are strongly advised to declare the Clinical Nutrition major. Within the Nutrition in Public Health option, students should also
The remaining preparatory subject matter is based on which major option you choose.

**Nutritional Biology Option:**

- **ANT 002**  Cultural Anthropology  5
- **OR**
- **PSC 001**  General Psychology  4
- **OR**

- EXB 102  Introduction to Motor Learning and the Psychology of Sport and Exercise  4
- EXB 117  Exercise & Aging in Health & Disease  3
- HDE 100A  Infancy and Early Childhood  4
- HDE 100B  Middle Childhood and Adolescence  4
- HDE 100C  Adulthood and Aging  4
- NPB 132  Nature vs. Nurture: Physiological Interactions Among Genes, Nutrients and Health  3
Nutrition Science | Nutrition Science Minor

(College of Agricultural and Environmental Sciences)
Francene M. Steinberg, Ph.D., RD., Chair of the Department
Sheri Zidenberg-Cherr, Ph.D., Vice Chairperson of the Department

Department Office. 3135 Meyer Hall; 530-752-4630; http://nutrition.ucdavis.edu

Faculty. http://nutrition.ucdavis.edu/people/faculty/index.html

The Department of Nutrition offers four minor programs open to students majoring in other disciplines who wish to complement their study programs with a concentration in the area of food and nutrition.

Graduate Study. Programs of study leading to the M.S. and Ph.D. degrees are available in Nutrition. For information on graduate study contact the Nutrition Graduate Group.

Minor Advisor. 3202 Meyer Hall; 530-752-2512

Nutrition Science

Preparation.
Plan in advance to include the required course prerequisites.

Total: 20

Nutrition Science | NUT Courses

Total: 140-148
Courses in NUT:

**NUT 010—Discoveries and Concepts in Nutrition (3)**
Lecture—3 hours; Project (Term Project). Nutrition as a science; historical development of nutrition concepts; properties of nutrients and foods. Not open for credit to students who have taken an upper division course in nutrition. No credit will be granted to students who have completed NUT 010Y or NUT 010V or an upper-division nutrition course. GE credit: SE, SL. Effective: 2018 Winter Quarter.

**NUT 010V—Discoveries and Concepts in Nutrition (3)**
Project (Term Project); Web Virtual Lecture—3 hours. Nutrition as a science; historical development of nutrition concepts; properties of nutrients and foods. Not open for credit to students who have taken an upper division course in nutrition. No credit will be granted to students who have completed NUT 010 or NUT 010Y or an upper-division nutrition course. GE credit: SE, SL. Effective: 2018 Winter Quarter.

**NUT 010Y—Discoveries and Concepts in Nutrition (3)**
Project (Term Project); Web Virtual Lecture—3 hours. Nutrition as a science; historical development of nutrition concepts; properties of nutrients and foods. Not open for credit to students who have taken an upper division course in nutrition. No credit will be granted to students who have completed NUT 010 or NUT 010V or an upper-division nutrition course. GE credit: SE, SL. Effective: 2018 Winter Quarter.

**NUT 011—Current Topics and Controversies in Nutrition (2)**
Discussion—1.5 hours; Term Paper. Exploration of current applications and controversies in nutrition. Students read scientific journal articles and write summaries, as well as give brief oral presentations. Topics change to reflect current interests and issues. GE credit: OL, SE, WE. Effective: 2010 Winter Quarter.

**NUT 099—Individual Study for Undergraduates (1-5)**
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

**NUT 104—Environmental & Nutritional Factors in Cellular Regulation and Nutritional Toxicants (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): BIS 101; (BIS 103 or ABI 103) Cellular regulation from nutritional/toxicological perspective. Emphasis: role of biofactors on modulation of signal transduction pathways, role of specific organelles in organization/regulation of metabolic transformations, major cofactor functions, principles of pharmacology/toxicology important to understanding nutrient/toxicant metabolism. (Same course as ETX 104.) GE credit: OL, SE, SL. Effective: 2008 Fall Quarter.

**NUT 105—Nutrition and Aging (3)**
Lecture—3 hours. Prerequisite(s): (NUT 111AV or NUT 111AY); ABI 103; Or the equivalent course to ABI 103. Role of nutrition in the aging process from both an organismal/cell perspective, including demographics, theories of aging, nutrition and evolution, nutritional manipulation and life-span extension, and nutrition’s impact on the diseases of aging. GE credit: SE. Effective: 2017 Spring Quarter.

**NUT 106—Food Chemistry for Clinical Nutrition (5) Review all entries**
Discussion—1 hour; Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): CHE 008B C or better or CHE 118C C or better or CHE 128C C or better; Concurrent with FST 100A recommended. Only open to Clinical Nutrition majors. Chemical and physical principles that influence functional properties, nutrient content, safety, and sensory aspects of food. Emphasis on the application of these concepts in clinical nutrition. Not open to students who have completed FST 101A and/or FST 101B. (Same course as FST 106.) GE credit: SE, SL, WE. Effective: 2018 Fall Quarter.

**NUT 106—Food Chemistry for Clinical Nutrition (5) Review all entries**
Discussion—1 hour; Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): CHE 008B C- or better or CHE 118B C- or better or CHE 128B C- or better; Concurrent with FST 100A recommended. Only open to Clinical Nutrition majors. Chemical and physical principles that influence functional properties, nutrient content, safety, and sensory aspects of food. Emphasis on the application of these concepts in clinical nutrition. Not open to students who have completed FST 101A and/or FST 101B. (Same course as FST 106.) GE credit: SE, SL, WE. Effective: 2019 Spring Quarter.

**NUT 111AY—Introduction to Nutrition and Metabolism (3)**
Lecture/Discussion—1 hour; Web Virtual Lecture—2 hours. Prerequisite(s): CHE 008B; NPB 101; Or the equivalent of NPB 101. Restricted to upper division or graduate level students only. Introduction to metabolism of protein, fat and carbohydrate: the biological role of vitamins and minerals; nutrient requirements during the life cycle; assessment of dietary intake and nutritional status. Not open for credit to students who have completed NUT 101 or NUT 111AV. GE credit: SE. Effective: 2016 Fall Quarter.
NUT 111B—Recommendations and Standards for Human Nutrition (2) Review all entries
Lecture—2 hours. Prerequisite(s): CHE 008B; NPB 101; (NUT 111AV or NUT 111AY); Or the equivalent of NPB 101.
Critical analysis of the development of nutritional recommendations for humans. Topics include: history of modern
recommendations, development of the Recommended Dietary Allowance (RDA) and other food guides; the Dietary
Reference Intakes (DRI); administrative structure of regulatory agencies pertinent to nutrition recommendations;
introduction to scientific methods used to determine the recommendations; food labeling laws; nutrition
recommendations in other countries and cultures. Not open for credit to students who have completed NUT 111.
Effective: 2017 Spring Quarter.

NUT 111B—Recommendations & Standards for Human Nutrition (2) Review all entries
Lecture—2 hours. Prerequisite(s): (CHE 008B or CHE 118B or CHE 128B); NUT 111AY; NPB 101 recommended
Critical analysis of the development of nutritional recommendations for humans. Topics include: history of modern
recommendations, development of the Recommended Dietary Allowance (RDA) and other food guides; the Dietary
Reference Intakes (DRI); administrative structure of regulatory agencies pertinent to nutrition recommendations;
introduction to scientific methods used to determine the recommendations; food labeling laws; nutrition
recommendations in other countries and cultures. Not open for credit to students who have completed NUT 111.
Effective: 2019 Fall Quarter.

NUT 112—Nutritional Assessment (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ((ABI 102, ABI 103) or (BIS 102, BIS 103)); NUT 111AY, (STA 013
or STA 013Y or PLS 120) Restricted to upper division or graduate level Nutrition students only. Methods of human
nutritional assessment, including dietary, anthropometric, biochemical methods. Principles of precision, accuracy,
and interpretation of results for individuals and populations. GE credit: QL, SE. Effective: 2018 Spring Quarter.

NUT 113—Principles of Epidemiology in Nutrition (4) Review all entries
Lecture/Discussion—4 hours. Prerequisite(s): PLS 120; Or equivalent. Introduction to epidemiology as it relates to
the field of nutrition, including study design, principles of epidemiologic inference, criteria for causality, and
interpreting measures of disease risk. GE credit: QL, SE. Effective: 2014 Fall Quarter.

NUT 113—Principles of Epidemiology in Nutrition (4) Review all entries
Lecture/Discussion—4 hours. Prerequisite(s): STA 013 or STA 013Y or PLS 120 or STA 100 Introduction to
epidemiology as it relates to the field of nutrition, including study design, principles of epidemiologic inference,
criteria for causality, and interpreting measures of disease risk. GE credit: QL, SE. Effective: 2018 Fall Quarter.

NUT 114—Developmental Nutrition (4)
Lecture—4 hours. Prerequisite(s): ABI 102; ABI 103; (NUT 111AV or NUT 111AY); NUT 111B Role of nutritional factors in
embryonic and postnatal development. GE credit: SE. Effective: 2017 Winter Quarter.

NUT 115—Animal Nutrition (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): CHE 008B or CHE 118B; or Consent of Instructor.
Comparative differences among animals in digestion and metabolism of nutrients. Nutrient composition of feeds,
digestive systems, digestion, absorption, feeding strategies. GE credit: OL, QL, SE, SL, VL, WE. Effective: 2017
Winter Quarter.

NUT 116A—Clinical Nutrition (3)
Lecture—3 hours. Prerequisite(s): (NUT 111AV or NUT 111AY); NUT 111B; NUT 112; NPB 101; Or the equivalent to NPB
101. Biochemical and physiological bases for therapeutic diets. Problems in planning diets for normal and
pathological conditions. GE credit: SE. Effective: 2016 Fall Quarter.

NUT 116AL—Clinical Nutrition Practicum (3)
Discussion—1 hour; Laboratory—3 hours; Lecture—1 hour. Prerequisite(s): NUT 116A (can be concurrent)
Fundamental principles of planning and evaluating therapeutic diets and patient education for pathological
conditions covered in 116A. GE credit: SE. Effective: 1997 Fall Quarter.

NUT 116B—Clinical Nutrition (3)
Lecture—3 hours. Prerequisite(s): (NUT 111AV or NUT 111AY); NUT 111B; NUT 112; NPB 101; Or the equivalent to NPB
101. Biochemical and physiological bases for therapeutic diets. Problems in planning diets for normal and
pathological conditions. GE credit: SE. Effective: 2017 Winter Quarter.

NUT 116BL—Clinical Nutrition Practicum (3)
Discussion—1 hour; Laboratory—3 hours; Lecture—1 hour. Prerequisite(s): NUT 116AL; NUT 116B (can be concurrent)
Fundamental principles of planning and evaluating therapeutic diets and patient education for pathological
conditions covered in 116B. Continuation of course 116AL. GE credit: SE. Effective: 2017 Winter Quarter.
NUT 117—Experimental Nutrition (6)
Extensive Writing; Laboratory—6 hours; Lecture—3 hours. Prerequisite(s): (NUT 111AV or NUT 111AY); NUT 112; BIS 102; BIS 103; MCB 120L or other laboratory course in biochemistry is recommended. Methods of assessing nutritional status. Application of chemical, microbiological, chromatographic and enzymatic techniques to current problems in nutrition. GE credit: SE, WE. Effective: 2016 Fall Quarter.

NUT 118—Community Nutrition (4)
Lecture—4 hours. Prerequisite(s): NUT 116A; (NUT 111AV or NUT 111AY); NUT 111B Nutrition problems in contemporary communities and of selected target groups in the United States and in developing countries. Nutrition programs and policy, principles of nutrition education. GE credit: SE, SL. Effective: 2017 Winter Quarter.

NUT 119A—International, community-based nutritional assessment. (1)
Discussion/Discussion—1 hour. Prerequisite(s): NUT 112 (can be concurrent); and Consent of Instructor. Issues and problems related to community-based nutritional assessment in a low-income country, major nutritional problems in low-income countries; ethical issues in human investigation; survey design, data collection techniques, and data analysis; preparation for international travel; cross-cultural communication, health, and safety while living abroad. Effective: 2002 Spring Quarter.

NUT 119B—International, Community-Based Nutritional Assessment (6)
Fieldwork—12 hours; Lecture—2 hours. Prerequisite(s): NUT 119A; and Consent of Instructor. Restricted to upper division students in Clinical Nutrition, Community Nutrition, Dietetics, and Nutrition Science. A six-week summer course in Peru. Implementation of a community-based nutritional assessment survey, including development of the survey instrument, selection. Effective: 2002 Summer Special Session.

NUT 120AN—Nutritional Anthropology (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): NUT 010 and ANT 002 recommended. Nutritional anthropology from historical and contemporary perspectives; the anthropological approach to food and diet; field work methods; case histories that explore food patterns and their nutritional implications. GE credit: SE, SS. Effective: 2017 Spring Quarter.

NUT 120BN—Nutritional Geography (4)
Discussion—1 hour; Lecture—3 hours. Nutritional geography from historical and contemporary perspectives; the geographical approach to food and diet; cultural and environmental factors that influence dietary practices; food-related landscapes and patterns. GE credit: SE, SS. Effective: 2016 Fall Quarter.

NUT 122—Ruminant Nutrition and Digestive Physiology (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): (ABI 103 or BIS 103); BIS 002A; BIS 002B; BIS 002C; (ANS 100 or NPB 101); or Consent of Instructor. MAT 016B recommended. Study of nutrient utilization as influenced by the unique aspects of digestion and fermentation in ruminants, both domestic and wild. Laboratories include comparative anatomy, feed evaluation, digestion kinetics using fistulated cows, computer modeling, and microbial exercises. GE credit: QL, SE. Effective: 2017 Spring Quarter.

NUT 123—Comparative Animal Nutrition (3)
Lecture—3 hours. Prerequisite(s): ABI 103 or BIS 103 Restricted to upper division and graduate level students. Comparative nutrition of animals; including laboratory, companion, zoo, and wild, animals. Digestion and metabolic adaptations required for animal species to consume diverse diets. Relation of nutrition to metabolic adaptations and physiological states, including growth, reproduction, and diseases. GE credit: SE. Effective: 2017 Spring Quarter.

NUT 123L—Comparative Animal Nutrition Laboratory (1)
Laboratory—3 hours. Prerequisite(s): ABI 103 or BIS 103 Laboratory exercises leading to written reports on establishment of nutritional requirements and formulation of complete diets for laboratory, companion, zoo and wild animals. Effective: 2017 Spring Quarter.

NUT 124—Nutrition and Feeding of Finfishes (3)
Lecture—3 hours. Prerequisite(s): BIS 103 or ABI 103 Principles of nutrition and feeding of fishes under commercial situations; implication of fish nutrition to the environment and conservation of endangered species. GE credit: QL, SE, SL. Effective: 2016 Fall Quarter.

NUT 127—Environmental Stress and Development in Marine Organisms (10)
Discussion—2 hours; Laboratory—12 hours; Lecture—4 hours. Prerequisite(s): ETX 101 or BIS 102 or BIS 104; or equivalent course. ETX 114A or NUT 114 recommended. Course taught at Bodega Marine Laboratory. Effects of environmental and nutritional stress, including pollutants, on development and function in embryos and larvae of

NUT 129—Journalistic Practicum in Nutrition (3)
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): (NUT 111AV or NUT 111AY); NUT 111B; or Consent of Instructor. A course in written or oral expression. Critical analysis and discussion of current, controversial issues in nutrition; use of journalistic techniques to interpret scientific findings for the lay public. Students required to write several articles for campus media. May be repeated up to 1 time(s). GE credit: OL, SE, SL, WE. Effective: 2017 Spring Quarter.

NUT 130—Experiments in Nutrition: Design and Execution (2)
Laboratory—6 hours. Prerequisite(s): Consent of Instructor. NUT 111AV, NUT 111AY, NUT 111B or NUT 114 recommended. Experiments in current nutritional problems. Experimental design: students choose project and, independently or in groups of two-three, design a protocol, complete the project, and report findings. May be repeated for credit up to six times (three times per instructor) with consent of instructor. May be repeated up to 6 time(s) three times per instructor with consent of instructor. GE credit: SE. Effective: 2016 Fall Quarter.

NUT 141—Comparative Animal Nutrition and Metabolism (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ABI 103; (NUT 115 or NUT 116A or NUT 116B); or Consent of Instructor. Foundational principles of nutrition, nutrient composition of feed ingredients, digestive systems of domestic and exotic animals, nutrient digestibility and absorption, nutrient metabolism. GE credit: SE, SL, WE. Effective: 2018 Fall Quarter.

NUT 190—Proseminar in Nutrition (1)
Seminar—1 hour. Prerequisite(s): (NUT 111AV or NUT 111AY); NUT 111B Restricted to senior standing. Discussion of human nutrition problems. Each term will involve a different emphasis among experimental, clinical, and dietetic problems of community, national and international scope. May be repeated twice for credit with consent of instructor. May be repeated up to 2 time(s). GE credit: OL, SE, VL. Effective: 2016 Fall Quarter.

NUT 190C—Nutrition Research Conference (1)
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Upper division standing in Nutrition or related biological science. Introduction to research findings and methods in nutrition. Presentation and discussion of research by faculty and students. May be repeated for credit. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

NUT 192—Internship (1-12)
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. One upper division course in nutrition. Work experience on or off campus in practical application of nutrition, supervised by a faculty member. (P/NP grading only.) Effective: 1997 Winter Quarter.

NUT 197T—Tutoring in Nutrition (1-2)
Discussion/Laboratory—3-6 hours. Prerequisite(s): Consent of Instructor. Nutrition Science, Clinical Nutrition or related major. Tutoring of students in nutrition courses, assistance with discussion groups or laboratory sections, weekly conference with instructor in charge of course: written evaluations. May be repeated if tutoring a different course. May be repeated for credit. (P/NP grading only.) Effective: 2016 Fall Quarter.

NUT 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

NUT 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

NUT 219A—International Nutrition (3)
Lecture—3 hours. Prerequisite(s): NUT 111AV; NUT 111AY; Graduate Standing; undergraduates only admitted with consent of instructor. Epidemiology, etiology, and consequences of undernutrition, with particular focus on the nutritional problems of children and women in low income populations. Effective: 2018 Spring Quarter.

NUT 219B—International Nutrition (3)
Lecture—3 hours. Prerequisite(s): NUT 219A Intervention programs to prevent or ameliorate nutritional problems in low-income populations. Planning, implementing, and evaluating nutrition intervention programs. Effective: 2004 Fall Quarter.

NUT 230—Experiments in Nutrition: Design and Execution (2)
Laboratory—6 hours. Prerequisite(s): Consent of Instructor. NUT 201, NUT 202, NUT 203, NUT 204, or the
equivalent recommended. Student selected projects to enhance laboratory skills. Independently, or in groups of two-three students, design a protocol, carry out the project, analyze the results and report the findings. May be repeated up to 6 time(s) with consent of instructor (limit of three times per instructor). Effective: 1999 Fall Quarter.

**NUT 250—Metabolic Homeostasis (3)**
Discussion—1.5 hours; Lecture—2 hours. Prerequisite(s): Passing the Nutrition Graduate Group Preliminary Examination or consent of instructor. Preference given to students in advanced standing in the Nutrition Graduate Group. Regulatory mechanisms of carbohydrate, lipid, and protein homeostasis; mechanisms of metabolic enzyme regulation and of the metabolic hormones; homeostatic mechanisms and interactions; fuel-fuel interactions; nutrition-energy balance. Effective: 2001 Spring Quarter.

**NUT 251—Nutrition and Immunity (2)**
Lecture/Discussion—2 hours. Prerequisite(s): PMI 126; ABI 102; MMI 107; Or the equivalent to MMI 107. Cellular and molecular mechanisms underlying interactions of nutrition and immune function, including modulation of immunocompetence by diet and effects of immune responses on nutritional needs. Lectures and discussion explore implications for resistance to infection, autoimmunity and cancer. Effective: 2000 Winter Quarter.

**NUT 252—Nutrition and Development (3)**
Lecture—3 hours. Prerequisite(s): NUB 210A, NUB 210B, and NUB 210C recommended. Relationship of nutrition to prenatal and early postnatal development. Effective: 2018 Spring Quarter.

**NUT 253—Control of Energy Balance and Body Weight (3)**
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): Consent of Instructor. Comprehensive study of the biochemical, nutritional and physiological mechanisms controlling food intake, body composition and energy expenditure. Subject matter will be approached through lectures and discussions where students and staff will critically evaluate the literature. Effective: 2016 Spring Quarter.

**NUT 254—Applications of Systems Analysis in Nutrition (3)**
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): NUT 202; Or the equivalent. Quantitative aspects of digestion and metabolism; principles of systems analysis. Evolution of models of energy metabolism as applied in current feeding systems. Critical evaluations of mechanistic models used analytically in support of nutritional research. Effective: 1997 Winter Quarter.

**NUT 258—Field Research Methods in International Nutrition (3)**
Lecture/Discussion—3 hours. Prerequisite(s): Graduate standing or consent of instructor. Issues and problems related to implementation of nutrition field research in less-developed countries, including ethics; relationships with local governments, communities, and scientists; data collection techniques and quality assurance; field logistics; research budgets; and other administrative and personal issues. Effective: 1997 Winter Quarter.

**NUT 259—Nutrition and Aging (2)**
Lecture—2 hours. Prerequisite(s): NUT 201; NUT 202; NUT 203; NUT 204; Three courses. Interaction between nutrition and aging. Topics include physiological/biochemical basis of aging, age-related changes affecting nutritional requirements, nutrition and mortality rate, assessment of nutritional status in the elderly, and relationship between developmental nutrition and the rate of aging. Effective: 1997 Fall Quarter.

**NUT 270—Scientific Ethics in Biomedical Studies: Emphasis on Nutrition (3)**
Discussion—1 hour; Lecture—1 hour; Term Paper. Restricted to graduate standing or consent of instructor. Scientific ethics in biomedical studies, especially nutrition. Discussion and case study presentations on scientific integrity, fraud, misconduct, conflict of interest, human and animal research protections. Not open for credit to students who have completed NUT 492B. Effective: 2003 Spring Quarter.

**NUT 290—Beginning Nutrition Seminar (2)**
Lecture/Discussion—1 hour; Seminar—1 hour. Prerequisite(s): First-year graduate standing. Discussion and critical evaluation of topics in nutrition with emphasis on literature review and evaluation in this field. Students give oral presentations on relevant topics. Effective: 1997 Fall Quarter.

**NUT 290C—Research Conference (1)**
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Graduate standing. Major professors lead research discussions with their graduate students. Research papers are reviewed and project proposals presented and evaluated. Format will combine seminar and discussion style. (S/U grading only.) Effective: 1997 Winter Quarter.

**NUT 291—Advanced Nutrition Seminar (1)**
Seminar—1 hour. Prerequisite(s): Second-year graduate standing. Advanced topics in nutrition research. Multiple
sections may be taken concurrently for credit. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

NUT 293A—Current Topics in Obesity, Food Intake and Energy Balance (3)
Discussion—1 hour; Lecture—1 hour; Seminar—1 hour. Prerequisite(s): NUT 129; Or graduate standing. Undergraduates with upper division standing with at least one writing course may enroll with consent of instructor. Current research and its evaluation. Principles of experimental design and scientific background for given article. Articles summarized for posting on Internet for use by healthcare professionals. May be repeated for credit with consent of instructor. May be repeated for credit. Effective: 1997 Fall Quarter.

NUT 293B—Current Topics in Obesity, Food Intake, and Energy Balance with Special Topics (3)
Discussion—1 hour; Lecture—1 hour; Seminar—1 hour. Prerequisite(s): NUT 129; Graduate standing. Undergraduates with upper division standing with at least one writing course may enroll with consent of instructor. A continuation of course 293A, with additional special topics. May be repeated for credit up to 3 times with consent of instructor. May be repeated up to 3 time(s). Effective: 1997 Fall Quarter.

NUT 294A—Current Topics in Developmental Nutrition (2)
Seminar—2 hours. Prerequisite(s): NUT 114 or NUT 252; or Consent of Instructor. Restricted to graduate standing or consent of instructor. Effects of nutrition on embryology, morphogenesis, and developmental mechanisms. May be repeated for credit when topic differs. Effective: 2004 Winter Quarter.

NUT 297T—Supervised Teaching in Nutrition (1-3)
Variable. Prerequisite(s): Graduate standing in nutrition or consent of instructor. Practical experience in teaching nutrition at the university level; curriculum design and evaluation; preparation and presentation of material. Assistance in laboratories, discussion sections, and evaluation of student work. (S/U grading only.) Effective: 1997 Winter Quarter.

NUT 298—Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Effective: 1997 Winter Quarter.

NUT 299—Research (1-12)
Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

NUT 492A—Professionalism: An Academic Perspective (2)
Lecture/Discussion—2 hours. Prerequisite(s): Graduate standing. For graduate students in their initial quarter of residence. Professionalism topics are presented and examples drawn from both the biological and social sciences. Effective: 1997 Fall Quarter.

NUT 492C—Grant Writing (3)
Discussion—1.5 hours; Lecture—1.5 hours. Prerequisite(s): Graduate standing in Nutrition or consent of instructor. Preparation of grants for governmental agencies (particularly NIH and USDA) and private foundations. Students will write a research grant or fellowship application. May be repeated once for credit with consent of instructor. May be repeated up to 1 time(s). Effective: 1997 Fall Quarter.

Nutritional Biology (Graduate Group)
Nutritional Biology (Graduate Group) | NUB Information
Nutritional Biology (A Graduate Group)
Carolyn Slupsky, Ph.D., Chairperson of the Group

Faculty. http://ggnb.ucdavis.edu/people/faculty/index.html

1708
Graduate Study. The Graduate Group in Nutritional Biology offers programs of study and research leading to the M.S. and Ph.D. degrees. The great diversity of research interests represented by the faculty members allows students to choose from a wide variety of themes: nutritional biochemistry, animal nutrition, nutrition and development, nutrient bioavailability, human/clinical nutrition, nutrition and behavior, nutritional energetics, community nutrition, community health, maternal and child nutrition, nutrition and endocrinology, international nutrition, obesity/body composition, physiology of digestion, nutrition and chronic disease, culture and nutrition, nutrition and gene expression, nutrition and aging, food preferences, nutrition and immunity, diet and exercise, dietary assessment, protein and lipid metabolism, food intake regulation, nutrition education, and more.

Graduate Advisors. Consult the Nutritional Biology Graduate Group office.

Nutritional Biology (Graduate Group) | NUB Courses

Courses in NUB:

NUB 210A—Advanced Nutrition I: Nutrition and Metabolism, Macronutrients (5)
Discussion—1 hour; Lecture—4 hours. Prerequisite(s): Admission to the Nutritional Biology Graduate Group or consent of instructor. Class size limited to 30 students. Advanced general nutritional concepts. Integrating nutrition with biological systems, population nutrition issues, and research approaches. Advanced concepts on lipid and protein metabolism. Effective: 2014 Winter Quarter.

NUB 210B—Advanced Nutrition II: Nutrition and Cell Biology, Micronutrients (5)
Discussion—1 hour; Lecture—4 hours. Prerequisite(s): Admission to the Nutritional Biology Graduate Group or consent of instructor. Class size limited to 30 students. Effects of nutrients at the cellular level. Principles of cell signaling and signaling modulation by nutrients. Advanced concepts of mineral and vitamin metabolism. Mineral and vitamin deficiencies and associated pathologies. Effective: 2014 Fall Quarter.

NUB 210C—Advanced Nutrition III: Nutrition in Health and Disease (5)
Discussion—1 hour; Lecture—4 hours. Integration of biochemical, physiological, and genetic aspects of nutrition in the context of clinical and epidemiological observations related to health and disease, including obesity and diabetes, cancer, vascular and neurodegenerative diseases, osteoporosis, and birth defects. Review and consideration of governmental. Effective: 2014 Winter Quarter.

NUB 290C—Research Group Conference (1)
Discussion—1 hour. Prerequisite(s): Graduate standing. Weekly conference on research problems, progress and techniques in animal sciences. May be repeated for credit. (S/U grading only.) Effective: 2013 Fall Quarter.

NUB 298—Directed Group Study (1-5)
Variable. Prerequisite(s): Graduate standing in Nutritional Biology Graduate Group or consent of instructor. May be repeated up to 3 time(s) when topics differs and consent of instructor. Effective: 2013 Fall Quarter.

NUB 299—Research (1-12)
Variable. Prerequisite(s): Consent of Instructor. May be repeated for credit. (S/U grading only.) Effective: 2013 Fall Quarter.
**Oceanography Minor; Earth & Planetary Sciences**

Oceanography Minor; Earth & Planetary Sciences | Oceanography Minor

(College of Letters and Science)

Michael E. Oskin, Ph.D., Chairperson of the Department

David A. Osleger, Ph.D., Vice-Chairperson, Undergraduate Program

Sujoy Mukhopadhyay, Ph.D., Vice-Chairperson, Graduate Program

**Department Office.** 2119 Earth and Physical Sciences Building; 530-752-0350;  http://www.geology.ucdavis.edu

**Faculty.**  http://geology.ucdavis.edu/people/faculty/index.php

Oceanography is the study of the earth's oceans, investigating connections between geological, biological, chemical and physical processes in the marine realm, and the interactions between the Earth's ocean/atmosphere system. The interdisciplinary minor in oceanography is for students with backgrounds in any of these fields, as well as those interested in marine policy and conservation. The curriculum reflects the integrative nature of oceanography, with core courses covering the major disciplines in oceanography and elective courses that allow students to cater the minor to their interests. The oceanography minor includes courses taught at the Davis campus and courses offered at Bodega Marine Laboratory.

The minor is sponsored by the Department of Earth and Planetary Sciences.

**Minor Advisor.** T.M. Hill (Earth and Planetary Sciences).

Performance Studies (Graduate Group)

Performance Studies (Graduate Group) | PFS Information

Joe Dumit, Chairperson
Marian Bilheimer, Graduate Coordinator

Arts Group Graduate Office. 216B Art Building; 530-754-6973; mlbilheimer@ucdavis.edu; http://performancesudies.ucdavis.edu/

Faculty, http://arts.ucdavis.edu/theatre-dance-faculty; there are over 45 affiliated faculty in departments throughout HArCS and other faculty, all of whom offer courses relevant to the discipline.

Performance Studies (Graduate Group) | PFS M.A.

Joe Dumit, Chairperson
Marian Bilheimer, Graduate Coordinator

Arts Group Graduate Office. 216B Art Building; 530-754-6973; mlbilheimer@ucdavis.edu; http://performancesudies.ucdavis.edu/

Faculty, http://arts.ucdavis.edu/theatre-dance-faculty; there are over 45 affiliated faculty in departments throughout HArCS and other faculty, all of whom offer courses relevant to the discipline.

Graduate Study. The Ph.D. in Performance Studies is a four-year program. In the first two years of study, students develop an understanding of performance by drawing from a range of regular course offerings in the field to identify, explore, and define a field or fields of research. Students are required to complete four core courses out of five in performance studies, and one colloquium course. Each individual program is then built from seminar and/or practice as research courses, as well as independent or group studies, developing one or more of the four strands of the program: Comparative Medias, Embodiments, Cultures/Ecologies, and History/Text. A wide range of affiliated faculty offer courses throughout the HArCS faculty, and Designated Emphases are available in Studies in Performance and Practice, African American and African Studies, Critical Theory, Feminist Theory and Research, Native American Studies, and Writing, Rhetoric and Composition Studies. Students are required to complete a minimum of 60 units before taking the qualifying examination. No more than 12 units may be taken below the graduate level unless specifically approved by the Ph.D. graduate program advisor.

The Master of Arts degree is offered only in route to the Ph.D.

Main Program Advisor. Lynette Hunter (Theatre and Dance)

Graduate Advisors. Moradewun Adejunmobi (African American and African Studies), Emily Albu (Spanish & Classics), Susan Avila (Design), Gina Bloom (English), Maxine Craig (Gender, Sexuality, and Women's Studies), Kriss Ravetto (Cinema and Digital Media), Henry Spiller (Music), Archana Venkatesan (Comparative Literature, Religious Studies), Hegnar Watenpaugh (Art, Art History)

Performance Studies (Graduate Group) | PFS Courses

Courses in PFS:

PFS 200—Methods and Materials in Theatre Research (4)
Seminar—3 hours; Term Paper. Essential research tools in theatre and related fields; bibliographies, primary sources; methods of evaluating and presenting evidence; delineating research areas in the field. Effective: 2012 Fall Quarter.

PFS 259—Topics in Contemporary Theatre and Performance (4)
Seminar—3 hours; Term Paper. Special topics designed to study in depth aspects of contemporary performance including performance analysis, cultural and historical context, modes of production, theoretical and political entailments, and issues of spectatorship; e.g., "Brecht and After," "British Theater," "Race and Gender in Performance." May be repeated up to 5 time(s). Effective: 2012 Fall Quarter.

PFS 265A—Performance Studies: Modes of Production (4)
Seminar—3 hours; Term Paper. Introduction to the literature of performance production in a variety of media: theatre, dance, film, video, computer-based, looking at cultural, aesthetic, rhetorical and political theory. May be repeated up to 3 time(s) when topic differs. Effective: 2012 Fall Quarter.

PFS 265B—Performance Studies: Signification and the Body (4)
Seminar—3 hours; Term Paper. Introduction to analysis of the body in performance, drawing on theoretical models from several fields. May be repeated up to 3 time(s) when topic differs. Effective: 2012 Fall Quarter.

PFS 265C—Performance Studies: Performance and Society (4)
Seminar—3 hours; Term Paper. Introduction to the role of performance (broadly defined), in everyday life, sociopolitical negotiation, identity, social movements, the media, and the state. May be repeated up to 3 time(s) when topic differs. Effective: 2012 Fall Quarter.

PFS 265D—Performance Studies: Theory, History, Criticism (4)
Seminar—3 hours; Term Paper. Introduction to the theory, history and criticism, informing performance studies. May be repeated up to 3 time(s) when topic differs. Effective: 2012 Fall Quarter.

PFS 270A—Individually Guided Research in Performance Studies (4)
Discussion—1 hour; Extensive Writing; Independent Study. Prerequisite(s): PFS 200; (PFS 265A or PFS 265B or PFS 265C or PFS 265D); and Consent of Instructor. Restricted to students in the Graduate Group PhD in Performance
Studies. Individually guided research, under the supervision of a faculty member, on a Performance Studies topic related to the student's proposed dissertation project to produce a dissertation prospectus. Effective: 2012 Fall Quarter.

**PFS 270B—Individually Guided Research in Performance Studies (4)**
Discussion—1 hour; Extensive Writing; Independent Study. Prerequisite(s): PFS 200; (PFS 265A or PFS 265B or PFS 265C or PFS 265D); and Consent of Instructor. Restricted to students in the Graduate Group PhD in Performance Studies. Individually guided research, under the supervision of a faculty member, on a Performance Studies topic related to the student's proposed dissertation project to produce a dissertation prospectus. Effective: 2012 Fall Quarter.

**PFS 270C—Individually Guided Research in Performance Studies (4)**
Discussion/Laboratory—2 hours; Fieldwork—2 hours; Term Paper. Prerequisite(s): PFS 200; (PFS 265A or PFS 265B or PFS 265C or PFS 265D); and Consent of Instructor. Restricted to students in the Graduate Group PhD in Performance Studies. Individually guided research, under the supervision of a faculty member, on a Performance Studies topic related to the student's proposed dissertation project to produce a dissertation prospectus. Effective: 2012 Fall Quarter.

**PFS 290—Colloquia in Performance Studies (4)**
Discussion/Laboratory—1 hour; Lecture/Discussion—2 hours; Term Paper. Prerequisite(s): Registration in Performance Studies Graduate Group and prior to Qualifying Examination. Designed to provide cohort identity and faculty exchange. Opportunity to present papers, hear guest lecturers, and see faculty presentations, gather for organizational and administrative new, exchange of information and make announcements. Course must be taken every year that a Performance Studies graduate is registered, prior to taking the Qualifying Examination. May be repeated up to 4 time(s). Limited to four units per year. (S/U grading only.) Effective: 2011 Fall Quarter.

**PFS 298—Group Study (1-5)**
Independent Study—1-5 hours. Prerequisite(s): Consent of Instructor. Effective: 2012 Fall Quarter.

**PFS 299—Individual Study (1-12)**
Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 2012 Fall Quarter.

**PFS 299D—Dissertation Research (1-12)**
Variable. Prerequisite(s): Consent of Instructor. Advancement to Candidacy. May be repeated for credit. (S/U grading only.) Effective: 2012 Fall Quarter.

**PFS 459—Approaches to Theatre and Dance (4)**
Project (Term Project); Seminar—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. Advanced graduate students. Work on approaches to theatre, dance, film/video, design and performance, with a focus on methodology and professional development. May be repeated up to 5 time(s). Effective: 2012 Fall Quarter.

The Major Programs

Chemistry studies the composition of matter, its structure, and the means by which it is converted from one form to another.

The Program. We offer several degree programs leading to the Bachelor of Arts (A.B.) and the Bachelor of Science (B.S.). To meet and discuss these programs with our staff advisors, see https://chemistry.ucdavis.edu/undergraduate/academic-advising.

The B.S. in Pharmaceutical Chemistry is strongly focused on basic science while providing students with a greater understanding of the experimental and computational processes and societal issues that surround the synthesis, discovery and design of modern pharmaceuticals. Important relevant topics include potential drug targets, physical principles of drug action, drug synthesis and screening, computational drug design, drug delivery and ethical concerns. The demand for pharmaceutical chemists is high and anticipated to grow, as modern chemistry allows a wide range of choices for drug synthesis and our growing knowledge of biological processes presents challenging targets for novel therapeutics.

Career Alternatives. Graduates in Pharmaceutical Chemistry will be able to successfully pursue their career objectives in advanced education in professional and/or graduate schools and in a range of scientific careers in academia, government or industry including the pharmaceutical, medicinal and biological sciences, medicine, pharmacy, pharmacology and biotechnology.

Major Advisor. To contact a major advisor in the Department of Chemistry, see https://chemistry.ucdavis.edu/undergraduate/academic-advising.

Honors and Honors Program. The student must take courses 194HA, 194HB, and 194HC.

Graduate Study. The Department of Chemistry offers programs of study and research leading to the M.S. and Ph.D. degrees in Chemistry. Detailed information regarding graduate study may be obtained by contacting the Graduate Advisor, Department of Chemistry. See also Graduate Studies.

Graduate Study. The Department of Chemistry offers programs of study and research leading to the M.S. and Ph.D. degrees in Chemistry. Detailed information regarding graduate study may be obtained by contacting the Graduate Advisor, Department of Chemistry. See also Graduate Studies.

Pharmaceutical Chemistry; Chemistry | CHE Courses

Chemistry Placement Requirement. Students who enroll in Chemistry 002A, 002AH or Workload Chemistry 041C must satisfy the Chemistry Placement Requirement. Students who do not meet the placement requirements will be administratively dropped from these Chemistry courses. For more information about the placement requirements, see https://chemistry.ucdavis.edu/undergraduate/general-chemistry-series/chemistry-placement-requirements.

The Student Academic Success Center (SASC) provides review materials, workshops, drop-in and group tutoring, and additional resources.

Chemistry Graduate Students Tutors are also listed on the Department of Chemistry website at https://chemistry.ucdavis.edu/undergraduate/tutors-chemistry.

Courses in CHE:

CHE 002A—General Chemistry (5)
Discussion/Laboratory—4 hours; Lecture—3 hours. Prerequisite(s): High school chemistry and physics, and concurrent enrollment in mathematics at or above the level of MAT 012 strongly recommended; any one of the following: (A) SAT Mathematics score = 600+; (B) ACT Mathematics score = 27+; (C) AP Chemistry exam score of = 3+; (D) SAT Chemistry subject test score = 700+; (E) UC Davis Chemistry Placement Examination score = 24+ on first attempt; in lieu of A-E, either completion of ALEKS online Preparatory Chemistry course with 100% Pie Mastery or completion of Workload 41C with a grade of C or better (Workload 41C offered in fall quarter only to students who do not meet A-E). Periodic table, stoichiometry, chemical equations, physical properties and kinetic theory of gases, atomic and molecular structure and chemical bonding. Laboratory experiments in stoichiometric relations, properties and collection of gases, atomic spectroscopy, and introductory quantitative analysis. Not open for credit to students who have taken CHE 002AH. GE credit: QL, SE, SL. Effective: 2016 Fall Quarter.

CHE 002AH—Honors General Chemistry (5)
Discussion/Laboratory—4 hours; Lecture—3 hours. Prerequisite(s): Consent of Instructor. High school chemistry and physics. Any ONE of the following: (A) SAT Mathematics score = 670+; (B) ACT Mathematics score = 30+; (C) AP Chemistry exam score of = 4+; (D) SAT Chemistry subject test score = 700+; (E) UC Davis Chemistry Placement Examination score = 33+ on first attempt; (F) UC Davis Chemistry Placement Examination score = 30+ AND UC Davis Mathematics Placement Examination score = 45+, both on first attempts; consent of instructor. Limited enrollment course with a more rigorous treatment of material covered in course 2A. Students completing course 2AH can continue with course 2BH or 2B. Not open for credit to students who have taken CHE 002A. GE credit: QL, SE, SL. Effective: 2016 Fall Quarter.

CHE 002B—General Chemistry (5)
Discussion/Laboratory—4 hours; Lecture—3 hours. Prerequisite(s): CHE 002A C- or better or CHE 002AH C- or better Continuation of course 2A. Condensed phases and intermolecular forces, chemical thermodynamics, chemical equilibria, acids and bases, solubility. Laboratory experiments in thermochemistry, equilibria, and quantitative analysis using volumetric methods. Not open for credit to students who have taken CHE 002B. GE credit: QL, SE, SL. Effective: 2016 Fall Quarter.

CHE 002BH—Honors General Chemistry (5)
Discussion/Laboratory—4 hours; Lecture—3 hours. Prerequisite(s): CHE 002A or CHE 002AH C or better; MAT 021B (can be concurrent); or Consent of Instructor. CHE 2A with consent of instructor. Limited enrollment course with a more rigorous treatment of material covered in course 2B. Students completing course 2BH can continue with course 2CH or 2C. Not open for credit to students who have taken CHE 002B. GE credit: QL, SE, SL. Effective: 2016 Fall Quarter.
CHE 002C—General Chemistry (5)
Discussion/Laboratory—4 hours; Lecture—3 hours. Prerequisite(s): CHE 002B C- or better or CHE 002BH C- or better Continuation of course 2B. Kinetics, electrochemistry, spectroscopy, structure and bonding in transition metal compounds, application of principles to chemical reactions. Laboratory experiments in selected analytical methods and syntheses. Not open for credit to students who have taken CHE 002CH. GE credit: QL, SE, SL. Effective: 2016 Fall Quarter.

CHE 002CH—Honors General Chemistry (5)
Discussion/Laboratory—6 hours; Lecture—3 hours. Prerequisite(s): CHE 002B or CHE 002BH C or better; MAT 021C (can be concurrent); or Consent of Instructor. CHE 002B with consent of instructor Limited enrollment course with a more rigorous treatment of material covered in course 2C. Not open for credit to students who have taken CHE 002C. GE credit: QL, SE, SL. Effective: 2016 Fall Quarter.

CHE 003A—Chemistry for Life Sciences: Determining Structure and Predicting Properties (5)
Discussion—1 hour; Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): High high school chemistry and physics strongly recommended; satisfactory score on the Chemistry and Mathematics Placement Examinations or satisfactory completion of the ALEKS Summer Chemistry Prep Course; a satisfactory grade in WKL 041C ('P' or 'C' or better) will suffice in lieu of a satisfactory Chemistry Placement Examination score. Concurrent enrollment with course 2A, 2B, 2C, 2AH, 2BH, 2CH prohibited; not open for enrollment to students who have completed CHE 2C or 2CH with a C- or better. Integrated General and Organic Chemistry intended for majors in the life sciences. Core concepts of chemical composition, structure and properties. Includes phase changes, separation methods, composition, spectroscopy, atomic and molecular structure, periodicity, bonding, charge distribution, intermolecular forces, and physical properties. Only 3 units credit for students who have completed CHE 002A or CHE 002AH with a C- or better; only 1 unit of credit to students who have completed CHE 002B or CHE 002BH with a C- or better. GE credit: QL, SE, SL. Effective: 2016 Fall Quarter.

CHE 003B—Chemistry for Life Sciences: Predicting and Characterizing Chemical Change (5)
Discussion—1 hour; Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): CHE 003A C- or better; Note: C- or better in CHE 002B or 002BH does not satisfy the prerequisite requirement. Concurrent enrollment with course 2A, 2B, 2C, 2AH, 2BH, 2CH prohibited. Continuation of course 3A covering core concepts of characterization of chemical processes and predicting chemical changes. Includes modeling chemical reactions, understanding proportions/stoichiometry, tracking energy, activation energy, reaction kinetics, thermodynamics, and equilibrium. Only 3 units credit for students who have completed CHE 002B or CHE 002BH with a C- or better. GE credit: QL, SE, SL. Effective: 2017 Winter Quarter.

CHE 003C—Chemistry for Life Sciences: Controlling Processes and Synthetic Pathways (5)
Discussion—1 hour; Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): CHE 003B C- or better; Note: C- or better in CHE 002B or 002BH does not satisfy the prerequisite requirement. Concurrent enrollment with course 2A, 2B, 2C, 2AH, 2BH, 2CH prohibited. Continuation of course 3B covering core concepts of harnessing energy, controlling reaction extent, and organic chemistry synthetic pathways. Includes acids and bases, thermodynamics, chemical equilibria, organic chemistry terminology and mechanisms. Only 3 units credit for students who have completed CHE 002C or CHE 002CH with a C- or better. GE credit: QL, SE, SL. Effective: 2017 Spring Quarter.

CHE 008A—Organic Chemistry: Brief Course (2)
Lecture—2 hours. Prerequisite(s): CHE 002B C- or better or CHE 002BH C- or better With course 8B, an introduction to the nomenclature, structure, chemistry, and reaction mechanisms of organic compounds. Intended for students majoring in areas other than organic chemistry. No credit to students who have completed CHE 118A or 128A. GE credit: SE. Effective: 2016 Fall Quarter.

CHE 008B—Organic Chemistry: Brief Course (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): CHE 008A or CHE 118A or CHE 128A Laboratory concerned primarily with organic laboratory techniques and the chemistry of the common classes of organic compounds. Lecture portion a continuation of course 8A. Varying credit hours according to courses taken previously and corresponding expected workload for this course; full credit to students who complete CHE 118A or 128A; 3 units credit to students who have completed CHE 128A and CHE 129A (students who have completed CHE 129A are exempt from the laboratory portion of CHE 008B); 2 units credit to students who have completed CHE 128B; 1 unit credit to students who have completed CHE 118B or CHE 128B and CHE 129A (students who have completed CHE 118B are exempt from the laboratory portion of CHE 008B). GE credit: SE. Effective: 2016 Fall Quarter.

CHE 010—Concept of Chemistry (4)
Lecture—4 hours. Survey of basic concepts and contemporary applications of chemistry. Designed for non-science
majors and not as preparation for Chemistry 2A. Not open for credit to students who have had CHE 002A; but students with credit for CHE 010 may take CHE 002A for full credit. GE credit: SE, SL. Effective: 1997 Winter Quarter.

**CHE 098—Directed Group Study (1-5)**
Variable. Prerequisite(s): Consent of Instructor. Primarily for lower division students. (P/NP grading only.) Effective: 1997 Winter Quarter.

**CHE 099—Special Study for Undergraduates (1-5)**
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

**CHE 100—Environmental Water Chemistry (3)**
Lecture—3 hours. Prerequisite(s): CHE 002C or CHE 002CH Practical aspects of water chemistry in the environment, including thermodynamic relations, coordination chemistry, solubility calculations, redox reactions and rate laws. Computer modeling of the evolution in water chemistry from contact with minerals and gases. Effective: 2016 Winter Quarter.

**CHE 103A—Chemistry for Life Sciences: Determining Organic Structures and Properties (5)**
Discussion—1 hour; Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): CHE 002C C- or better or CHE 002CH C- or better; (CHE 008A or CHE 118A or CHE 128A) Not open for enrollment to students who have completed course 008B, 118B, 118C, 128B, 128C with a C- or better. Continuation of course 3C. Core concepts of organic structure, nomenclature, functional groups, organic acids and bases, resonance and delocalization, aromaticity, intermolecular forces, three-dimensional structure and conformational analysis, spectroscopy. Only 3 Units of credit for students who have completed CHE 008A with a C- or better; only 2 units of credit for students who have completed CHE 118A or CHE 128A with a C- or better; not open for credit to students who have completed CHE 008B, CHE 118B, CHE 118C, CHE 128B, CHE 128C with a C- or better. GE credit: SE, SL. Effective: 2017 Fall Quarter.

**CHE 103B—Chemistry for Life Sciences: Predicting and Controlling Organic Pathways (5)**
Discussion—1 hour; Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): CHE 103A C- or better Not open for enrollment to students who have completed course 008B, 118B, 118C, 128B, or 128C with a C- or better. Continuation of course 103A. Core concepts of functional group transformations, synthesis, mechanisms, sustainable chemistry, structure and function of biomolecules, organic reactions in biological systems, molecular design, detection, separation, and identification of organic molecules. Not open for credit to students who have completed CHE 008B, CHE 118B, CHE 118C, CHE 128B, or CHE 128C. GE credit: SE, SL. Effective: 2018 Winter Quarter.

**CHE 104—Forensic Applications of Analytical Chemistry (3)**
Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): CHE 002C or CHE 002CH Theory and application of standard methods of chemical analysis to evidentiary samples. Use and evaluation of results from screening tests, FTIR, GC and GCMS to various sample types encountered in forensics. Effective: 2016 Winter Quarter.

**CHE 105—Analytical and Physical Chemical Methods (4)**
Laboratory—6 hours; Lecture—2 hours. Prerequisite(s): CHE 110A (can be concurrent) or CHE 107B (can be concurrent) Fundamental theory and laboratory techniques in; analytical and physical chemistry, errors and data analysis methods, basic electrical circuits in instruments, advanced solution equilibria, potentiometric analysis, chromatographic separations, UV-visible spectroscopy, lasers. GE credit: QL, SE, SL. Effective: 2016 Spring Quarter.

**CHE 107A—Physical Chemistry for the Life Sciences (3)**
Lecture—3 hours. Prerequisite(s): CHE 002C or CHE 002CH; (MAT 016C or MAT 017C or MAT 021C); (PHY 007C or PHY 009C or PHY 009HC) Physical chemistry intended for majors in the life science area. Introductory development of classical and statistical thermodynamics including equilibrium processes and solutions of both nonelectrolytes and electrolytes. The thermodynamic basis of electrochemistry and membrane potentials. GE credit: SE. Effective: 2017 Spring Quarter.

**CHE 107B—Physical Chemistry for the Life Sciences (3)**
Lecture—3 hours. Prerequisite(s): CHE 107A Continuation of course 107A. Kinetic theory of gases and transport processes in liquids. Chemical kinetics, enzyme kinetics and theories of reaction rates. Introduction to quantum theory, atomic and molecular structure, and spectroscopy. Application to problems in the biological sciences. GE credit: SE. Effective: 2016 Fall Quarter.

**CHE 108—Molecular Biochemistry (3)**
Lecture—3 hours. Prerequisite(s): CHE 128C or CHE 118C Pass One open to Chemistry majors. Chemical principles and experimental methods applied to the biological sciences to understand the molecular structure and function of proteins, nucleic acids, carbohydrates, and membrane lipids. Effective: 2016 Winter Quarter.
CHE 110A—Physical Chemistry: Introduction to Quantum Mechanics (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (PHY 007C or PHY 009C or PHY 009HC); (CHE 002C or CHE 002CH); (MAT 016C or MAT 017C or MAT 021C); Completion of Mathematics 21D, 22A, and 22AL, and Physics 9C or 9HC, strongly recommended. Introduction to the postulates and general principles of quantum mechanics. Approximations based on variational method and time independent perturbation theory. Application to harmonic oscillator, rigid rotor, one-electron and many-electron atoms, and homo-and hetero-nuclear diatomic molecules. GE credit: QL, SE. Effective: 2017 Spring Quarter.

CHE 110B—Physical Chemistry: Properties of Atoms and Molecules (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): CHE 110A Group theory. Application of quantum mechanics to polyatomic molecules and molecular spectroscopy. Intermolecular forces and the gas, liquid and solid states. Distributions, ensembles and partition functions. Transport properties. Effective: 1999 Fall Quarter.

CHE 110C—Physical Chemistry: Thermodynamics, Equilibria and Kinetics (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): CHE 110B Development and application of the general principles of thermodynamics and statistical thermodynamics. Chemical kinetics, rate laws for chemical reactions and reaction mechanisms. Effective: 1999 Fall Quarter.

CHE 115—Instrumental Analysis (4)
Laboratory—6 hours; Lecture—2 hours. Prerequisite(s): CHE 105; (CHE 110B (can be concurrent) or (CHE 107A, CHE 107B)) Intermediate theory and laboratory techniques in analytical and physical chemistry. Advanced data analysis methods and goodness-of-fit criteria. Fourier-transform spectroscopic methods and instrumentation. Mass spectrometry. Electrochemistry. Liquid chromatography. GE credit: QL, SE, WE. Effective: 2006 Fall Quarter.

CHE 118A—Organic Chemistry for Health and Life Sciences (4)
Discussion/Laboratory—1.5 hours; Lecture—3 hours. Prerequisite(s): CHE 002C C- or better or CHE 002CH C- or better The 118A, 118B, 118C series is for students planning professional school studies in health and life sciences. A rigorous, in-depth presentation of basic principles with emphasis on stereochemistry and spectroscopy and preparations and reactions of nonaromatic hydrocarbons, haloalkanes, alcohols and ethers. Only 2 units credit for students who have completed course CHE 008A; not open for credit to students who have completed CHE 008B or CHE 128A. GE credit: SE, SL. Effective: 2017 Spring Quarter.

CHE 118B—Organic Chemistry for Health and Life Sciences (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): CHE 118A or CHE 128A Continuation of course 118A, with emphasis on spectroscopy and the preparation and reactions of aromatic hydrocarbons, organometallic compounds, aldehydes and ketones. Only one unit of credit for students who completed course CHE 128B.; not open for credit to students who have completed 8 or more units of CHE 128 and CHE 129 courses. GE credit: SE, SL. Effective: 2017 Fall Quarter.

CHE 118C—Organic Chemistry for Health and Life Sciences (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): CHE 118B or (CHE 128B, CHE 129A) Open to students changing from the CHE 128 course sequence only if they have completed prior organic laboratory work (at least course CHE 129A). Continuation of course 118B, with emphasis on the preparation, reactions and identification of carboxylic acids and their derivatives, alkyl and acyl amines, &-dicarbonyl compounds, and various classes of naturally occurring, biologically important compounds. Not open for credit to students who have completed course CHE 128C. GE credit: SE, SL. Effective: 2018 Winter Quarter.

CHE 121—Introduction to Molecular Structure and Spectra (4)
Lecture—4 hours. Prerequisite(s): CHE 110B Modern theoretical and experimental methods used to study problems of molecular structure and bonding; emphasis on spectroscopic techniques. Effective: 1997 Winter Quarter.

CHE 122—Chemistry of Nanoparticles (3)
Lecture—3 hours. Prerequisite(s): CHE 110C (can be concurrent) or CHE 107B (can be concurrent) Chemical and physical aspects of inorganic nanoparticles. Topics include synthesis, structure, colloidal behavior, catalytic activity, size and shape dependency of physical properties, analytical methods and applications. Effective: 2016 Winter Quarter.

CHE 124A—Inorganic Chemistry: Fundamentals (3)
Lecture—3 hours. Prerequisite(s): CHE 002C or CHE 002CH Symmetry, molecular geometry and structure, molecular orbital theory of bonding (polyatomic molecules and transition metals), solid state chemistry, energetics and spectroscopy of inorganic compounds. GE credit: SE. Effective: 2016 Fall Quarter.
CHE 124B—Inorganic Chemistry: Main Group Elements (3)
Lecture—3 hours. Prerequisite(s): CHE 124A Synthesis, structure and reactivity of inorganic and heteroorganic molecules containing the main group elements. Effective: 1997 Winter Quarter.

CHE 124C—Inorganic Chemistry: d and f Block Elements (3)
Lecture—3 hours. Prerequisite(s): CHE 124A Synthesis, structure and reactivity of transition metal complexes, organometallic and bioinorganic chemistry, the lanthanides and actinides. Effective: 1997 Winter Quarter.

CHE 124L—Laboratory Methods in Inorganic Chemistry (2)
Laboratory—6 hours. Prerequisite(s): CHE 124B or CHE 124C (can be concurrent) The preparation, purification and characterization of main group and transition metal inorganic and organometallic compounds. Effective: 2000 Spring Quarter.

CHE 125—Advanced Methods in Physical Chemistry (4)
Laboratory—6 hours; Lecture—2 hours. Prerequisite(s): CHE 110C (can be concurrent); CHE 115 Advanced theory and laboratory techniques in analytical and physical chemistry. Advanced spectroscopic methods. Thermodynamics. Kinetics. Chemical literature. Digital electronics and computer interfacing. Laboratory measurements and vacuum techniques. GE credit: QL, SE, WE. Effective: 2000 Spring Quarter.

CHE 128A—Organic Chemistry (3)
Lecture—3 hours. Prerequisite(s): CHE 002C C or better or CHE 002CH C or better Introduction to the basic concepts of organic chemistry with emphasis on stereochemistry and the chemistry of hydrocarbons. Designed primarily for majors in chemistry. Chemistry majors should enroll in course 129A concurrently. Only two units credit allowed for students who have completed CHE 008A; not open for credit to students who have completed courses CHE 008B or 118A. GE credit: SE. Effective: 2017 Winter Quarter.

CHE 128B—Organic Chemistry (3)
Lecture—3 hours. Prerequisite(s): CHE 128A; or Consent of Instructor. Continuation of course 128A with emphasis on the chemistry of alcohols, ethers, their sulfur analogs, and carbonyl compounds. Introduction to the application of spectroscopic methods to organic chemistry. Introduction to synthesis of moderately complex organic molecules. Full credit to students who completed CHE 008B or CHE 118A; not open for credit to students who have completed CHE 118B. GE credit: SE. Effective: 2017 Winter Quarter.

CHE 128C—Organic Chemistry (3)
Lecture—3 hours. Prerequisite(s): CHE 128B Continuation of course 128B with emphasis on enolate condensations and the chemistry of amines, phenols, and sugars; selected biologically important compounds. Full credit to students who completed CHE 118B; Not open for credit to students who have completed CHE 118C. GE credit: SE. Effective: 2017 Winter Quarter.

CHE 129A—Organic Chemistry Laboratory (2)
Laboratory—3 hours; Lecture—1 hour. Prerequisite(s): (CHE 002C C or better or CHE 002CH C or better); CHE 128A (can be concurrent) Introduction to laboratory techniques of organic chemistry. Emphasis on methods used for separation and purification of organic compounds. Full credit to students who completed CHE 008B; not open for credit to students who have completed CHE 118B. GE credit: SE. Effective: 2017 Winter Quarter.

CHE 129B—Organic Chemistry Laboratory (2)
Laboratory—6 hours. Prerequisite(s): CHE 129A; CHE 128B (can be concurrent) Continuation of course 129A. Emphasis on methods used for synthesis and isolation of organic compounds. Not open for credit to students who have completed CHE 118C. GE credit: SE. Effective: 2017 Winter Quarter.

CHE 129C—Organic Chemistry Laboratory (2)
Laboratory—6 hours. Prerequisite(s): CHE 128C (can be concurrent); CHE 129B continuation of course 129B Effective: 1997 Winter Quarter.

CHE 130A—Pharmaceutical Chemistry (3)
Lecture—3 hours. Prerequisite(s): CHE 118C or CHE 128C Examination of the design principles and experimental methods used in pharmaceutical and medicinal chemistry. Effective: 2006 Fall Quarter.

CHE 130B—Pharmaceutical Chemistry (3)
Lecture—2 hours; Lecture/Lab—1 hour. Prerequisite(s): CHE 130A (can be concurrent) Continuation of course 130A with emphasis on case studies of various drugs and the use of computational methods in drug design. Effective: 2017 Spring Quarter.
CHE 130C—Case Studies in Pharmaceutical Chemistry (1)
Independent Study; Seminar—2 hours. Prerequisite(s): CHE 130A (can be concurrent); CHE 130B (can be concurrent) Seminar. Exploration of medicinal and pharmaceutical chemistry topics through seminars presented by professional chemists (and allied professionals). Designed to highlight career opportunities for students with a degree in pharmaceutical chemistry. (P/NP grading only.) Effective: 2017 Spring Quarter.

CHE 131—Modern Methods of Organic Synthesis (3)
Lecture—3 hours. Prerequisite(s): CHE 128C or CHE 118C Introduction to modern synthetic methodology in organic chemistry with emphasis on retrosynthetic analysis, reaction mechanisms, and application to multistep syntheses of pharmaceuticals and natural products. GE credit: SE. Effective: 2016 Fall Quarter.

CHE 135—Advanced Bio-organic Chemistry Laboratory (3)
Laboratory—6 hours; Lecture—1 hour. Prerequisite(s): CHE 130B (can be concurrent) Separation, purification, identification and biological evaluation of organic compounds using modern methods of synthesis, computational chemistry and instrumentation. Emphasis on pharmaceutical and medicinal substances. Effective: 2017 Fall Quarter.

CHE 145—Good Quality Practices (3)
Discussion—1 hour; Laboratory—6 hours. Prerequisite(s): CHE 118B or CHE 129B Open to Chemistry and science majors. Preparation for work in GQP laboratories in both research and industry. Context within GQP-Good Quality Practices (GMP Good Manufacturing Practice, GCP Good Clinical Practices). Lab practice in GQP skills. GE credit: SE. Effective: 2016 Winter Quarter.

CHE 150—Chemistry of Natural Products (3)
Lecture—3 hours. Prerequisite(s): CHE 118C or CHE 128C Chemistry of terpenes, steroids, acetogenins, and alkaloids: isolation, structure determination, biosynthesis, chemical transformations, and total synthesis. GE credit: SE. Effective: 2017 Winter Quarter.

CHE 155—Scientific Programming for Chemistry (3)

CHE 192—Internship in Chemistry (1-6)
Internship—3-18 hours. Prerequisite(s): Upper division standing; project approval by faculty sponsor prior to enrollment. Supervised internship in chemistry; requires a final written report. May be repeated up to 6 unit(s). (P/NP grading only.) Effective: 1997 Winter Quarter.

CHE 194HA—Undergraduate Honors Research (2)
Independent Study—2 hours. Prerequisite(s): Open only to chemistry majors who have completed 135 units and who qualify for the honors program. Original research under the guidance of a faculty advisor, culminating in the writing of an extensive report. Effective: 1997 Winter Quarter.

CHE 194HB—Undergraduate Honors Research (2)
Independent Study—2 hours. Prerequisite(s): Open only to chemistry majors who have completed 135 units and who qualify for the honors program. Original research under the guidance of a faculty advisor, culminating in the writing of an extensive report. Effective: 1997 Winter Quarter.

CHE 194HC—Undergraduate Honors Research (2)
Independent Study—2 hours. Prerequisite(s): Open only to chemistry majors who have completed 135 units and who qualify for the honors program. Original research under the guidance of a faculty advisor, culminating in the writing of an extensive report. Effective: 2005 Fall Quarter.

CHE 195—Careers in Chemistry (1)
Seminar—2 hours. Prerequisite(s): Junior or senior standing in Chemistry. Designed to give Chemistry undergraduate students an in-depth appreciation of career opportunities with a bachelors degree in chemistry. Professional chemists (and allied professionals) describe research and provide career insights. (P/NP grading only.) Effective: 2001 Fall Quarter.

CHE 197—Projects in Chemical Education (1-4)
Discussion/Laboratory. Prerequisite(s): Consent of Instructor. Participation may include development of laboratory experiments, lecture demonstrations, autotutorial modules or assistance with laboratory sessions. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 1997 Winter Quarter.
CHE 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of instructor based upon adequate preparation in chemistry, mathematics and physics. (P/NP grading only.) Effective: 1997 Winter Quarter.

CHE 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of instructor based upon adequate preparation in chemistry, mathematics, and physics. (P/NP grading only.) Effective: 1997 Winter Quarter.

CHE 201—Chemical Uses of Symmetry and Group Theory (3)
Lecture—3 hours. Prerequisite(s): CHE 124A; CHE 110B; or Consent of Instructor. Symmetry elements and operations, point groups, representations of groups. Applications to molecular orbital theory, ligand field theory, molecular vibrations, and angular momentum. Crystallographic symmetry. Effective: 1997 Winter Quarter.

CHE 204—Mathematical Methods in Chemistry (3)

CHE 205—Symmetry, Spectroscopy, and Structure (3)
Lecture—3 hours. Prerequisite(s): CHE 201; Or equivalent. Vibrational and rotational spectra; electronic spectra and photoelectron spectroscopy; magnetism; electron spin and nuclear quadrupole resonance spectroscopy; nuclear magnetic resonance spectroscopy; other spectroscopic methods. Effective: 1997 Winter Quarter.

CHE 209—Special Topics in Physical Chemistry (3)
Lecture—3 hours. Prerequisite(s): CHE 210A; CHE 211A Graduate standing in Chemistry. Advanced topics in physical chemistry, biophysical chemistry or chemical physics chosen from areas of current research interest. May be repeated for credit when topics differ. Effective: 2005 Fall Quarter.

CHE 210A—Quantum Chemistry: Introduction and Stationary-State Properties (3)

CHE 210B—Quantum Chemistry: Time-Dependent Systems (3)

CHE 210C—Quantum Chemistry: Molecular Spectroscopy (3)
Lecture—3 hours. Prerequisite(s): CHE 210B Molecular spectroscopy: Born-Oppenheimer approximation, rotational, vibrational and electronic spectroscopy, spin systems, and molecular photophysics. Effective: 1997 Winter Quarter.

CHE 211A—Advanced Physical Chemistry: Statistical Thermodynamics (3)
Lecture—3 hours. Prerequisite(s): Consent of Instructor. Principles and applications of statistical mechanics; ensemble theory; statistical thermodynamics of gases, solids, liquids, electrolyte solutions and polymers; chemical equilibrium. Effective: 1997 Winter Quarter.

CHE 211B—Statistical Mechanics (3)
Lecture—3 hours. Prerequisite(s): CHE 211A Statistical mechanics of nonequilibrium systems, including the rigorous kinetic theory of gases, continuum mechanics transport in dense fluids, stochastic processes, brownian motion and linear response theory. Effective: 1997 Winter Quarter.

CHE 212—Chemical Dynamics (3)
Lecture—3 hours. Prerequisite(s): Consent of Instructor. Introduction to modern concepts in chemical reaction dynamics for graduate students in chemistry. Emphasis will be placed on experimental techniques as well as emerging physical models for characterizing chemical reactivity at a microscopic level. Effective: 1997 Winter Quarter.

CHE 215—Theoretical and Computational Chemistry (3)
Lecture—3 hours. Prerequisite(s): CHE 211A; CHE 210B; or Consent of Instructor. Mathematics of wide utility in chemistry, computational methods for guidance or alternative to experiment, and modern formulations of chemical theory. Emphasis will vary in successive years. May be repeated for credit. Effective: 1997 Winter Quarter.

CHE 216—Magnetic Resonance Spectroscopy (3)
Lecture—3 hours. Prerequisite(s): CHE 210A; CHE 210B (can be concurrent) Quantum mechanics of spin and orbital
angular momentum, nuclear magnetic resonance, theory of chemical shift and multiplet structures, electron spin resonance, theory of g-tensor in organic and transition ions, spin Hamiltonians, nuclear quadrupolar resonance, spin relaxation processes. Effective: 1997 Winter Quarter.

**CHE 217—X-Ray Structure Determination (3)**
Lecture—3 hours. Prerequisite(s): Consent of Instructor. Introduction to x-ray structure determination; crystals, symmetry, diffraction geometry, sample preparation and handling, diffraction apparatus and data collection, methods of structure solution and refinement, presentation of results, text, tables and graphics, crystallographic literature. Effective: 1997 Winter Quarter.

**CHE 218—Macromolecules: Physical Principles (3)**
Lecture—3 hours. Prerequisite(s): CHE 110A; CHE 110B; CHE 110C; Or equivalent. Relationship of higher order macromolecular structure to subunit composition; equilibrium properties and macromolecular dynamics; physical chemical determination of macromolecular structure. Effective: 2001 Winter Quarter.

**CHE 219—Spectroscopy of Organic Compounds (4)**
Laboratory—2.5 hours; Lecture—3 hours. Prerequisite(s): CHE 128C; Or equivalent. Identification of organic compounds and investigation of stereochemical and reaction mechanism phenomena using spectroscopic methods—principally NMR, IR and MS. Effective: 2006 Fall Quarter.

**CHE 219L—Laboratory in Spectroscopy of Organic Compounds (1)**
Laboratory—2.5 hours. Prerequisite(s): CHE 219 (can be concurrent) Restricted to Chemistry graduate students only or consent of instructor Practical application of NMR, IR and MS techniques for organic molecules. Effective: 2009 Summer Session 1.

**CHE 221A—Special Topics in Organic Chemistry (3)**
Lecture—3 hours. Selected topics of current interest in organic chemistry. Topics will vary each time the course is offered, and in general will emphasize the research interests of the staff member giving the course. Effective: 1997 Winter Quarter.

**CHE 221B—Special Topics in Organic Chemistry (3)**
Lecture—3 hours. Selected topics of current interest in organic chemistry. Topics will vary each time the course is offered, and in general will emphasize the research interests of the staff member giving the course. Effective: 1997 Winter Quarter.

**CHE 221C—Special Topics in Organic Chemistry (3)**
Lecture—3 hours. Selected topics of current interest in organic chemistry. Topics will vary each time the course is offered, and in general will emphasize the research interests of the staff member giving the course. Effective: 1997 Winter Quarter.

**CHE 221D—Special Topics in Organic Chemistry (3)**
Lecture—3 hours. Selected topics of current interest in organic chemistry. Topics will vary each time the course is offered, and in general will emphasize the research interests of the staff member giving the course. Effective: 1997 Winter Quarter.

**CHE 221E—Special Topics in Organic Chemistry (3)**
Lecture—3 hours. Selected topics of current interest in organic chemistry. Topics will vary each time the course is offered, and in general will emphasize the research interests of the staff member giving the course. Effective: 1997 Winter Quarter.

**CHE 221F—Special Topics in Organic Chemistry (3)**
Lecture—3 hours. Selected topics of current interest in organic chemistry. Topics will vary each time the course is offered, and in general will emphasize the research interests of the staff member giving the course. Effective: 1997 Winter Quarter.

**CHE 221G—Special Topics in Organic Chemistry (3)**
Lecture—3 hours. Selected topics of current interest in organic chemistry. Topics will vary each time the course is offered, and in general will emphasize the research interests of the staff member giving the course. Effective: 1997 Winter Quarter.

**CHE 221H—Special Topics in Organic Chemistry (3)**
Lecture—3 hours. Selected topics of current interest in organic chemistry. Topics will vary each time the course is offered, and in general will emphasize the research interests of the staff member giving the course. Effective: 1997 Winter Quarter.
CHE 222—Chemistry of Nanoparticles (3)
Lecture/Discussion—3 hours. Prerequisite(s): CHE 110C; Or equivalent. Chemical and physical aspects of inorganic nanoparticles, including synthesis, purification, reactivity, characterization, and applications for technology. Emphasis is on problems from the current literature. Not open for credit to students who have taken CHE 122. Effective: 2009 Winter Quarter.

CHE 226—Principles of Transition Metal Chemistry (3)
Lecture—3 hours. Prerequisite(s): CHE 124A; or equivalent. Electronic structures, bonding, and reactivity of transition metal compounds. Effective: 1997 Winter Quarter.

CHE 228A—Bio-inorganic Chemistry (3)
Lecture—3 hours. Prerequisite(s): CHE 226; or Consent of Instructor. Defines role of inorganic chemistry in the functioning of biological systems by identifying the functions of metal ions and main group compounds in biological systems and discussing the chemistry of model and isolated biological compounds. Offered every third year. Effective: 1997 Winter Quarter.

CHE 228B—Main Group Chemistry (3)
Lecture—3 hours. Prerequisite(s): CHE 226; or Consent of Instructor. Synthesis, physical properties, reactions and bonding of main group compounds. Discussions of concepts of electron deficiency, hypervalency, and non-classical bonding. Chemistry of the main group elements will be treated systematically. Offered every third year. Effective: 1997 Winter Quarter.

CHE 228C—Solid-State Chemistry (3)
Lecture—3 hours. Prerequisite(s): CHE 124A; CHE 110B; CHE 226; Or equivalent. Design and synthesis, structure and bonding of solid-state compounds; physical properties and characterization of solids; topics of current interest such as low-dimensional materials, inorganic polymers, materials for catalysis. Offered every third year. Effective: 1997 Winter Quarter.

CHE 228D—Homogeneous Catalysis (3)
Lecture—3 hours. Prerequisite(s): CHE 226 Overview of homogeneous catalysis and related methods, with emphasis on kinetics, mechanisms, and applications for organic synthesis. The related methods may include cluster, colloid, phase transfer, enzymatic, heterogeneous and polymer-supported catalysis. Offered every third year. Effective: 2001 Fall Quarter.

CHE 228E—Magnetochemistry (3)
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): CHE 124A or CHE 201; Or an equivalent class from either Physics or Chemical Engineering and Materials Science. Covers the basic principles and concepts of magnetism, methods used for characterization of magnetic properties, as well as specific state-of-the-art magnetic materials and topics from the recent chemistry literature. Effective: 2016 Winter Quarter.

CHE 231A—Organic Synthesis: Methods and Strategies (4)
Discussion/Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): CHE 128C; Or equivalent. Current strategies and methods in synthetic organic chemistry. Focus on construction of carbon frameworks, control of relative and absolute stereochemistry and retrosynthetic strategies. Use of databases and molecular modeling software in multistep strategies. Effective: 2017 Winter Quarter.

CHE 231B—Advanced Organic Synthesis (3)

CHE 233—Physical-Organic Chemistry (3)
Lecture—3 hours. Prerequisite(s): CHE 128A; CHE 128B; CHE 128C; CHE 110A; CHE 110B; CHE 110C; Or equivalent. Introduction to elementary concepts in physicalorganic chemistry including the application of simple numerical techniques in characterizing and modeling organic reactions. Effective: 1997 Winter Quarter.

CHE 235—Organometallic Chemistry in Organic Synthesis (3)
Lecture—3 hours. Prerequisite(s): CHE 128C Current trends in use of organometallics for organic synthesis; preparations, properties, applications, and limitations of organometallic reagents derived from transition and/or main group metals. Effective: 1997 Winter Quarter.

CHE 236—Chemistry of Natural Products (3)
Lecture—3 hours. Prerequisite(s): CHE 128C; Or equivalent. Advanced treatment of chemistry of naturally occurring
compounds isolated from a variety of sources. Topics will include isolation, structure determination, chemical transformations, total synthesis, biological activity, and biosynthesis. Biosynthetic origin will be used as a unifying theme. Effective: 1997 Winter Quarter.

CHE 237—Bio-organic Chemistry (3)
Lecture—3 hours. Prerequisite(s): CHE 128C; Or equivalent. Structure and function of biomolecules; molecular recognition; enzyme reaction mechanisms; design of suicide substrates for enzymes; enzyme engineering; design of artificial enzymes and application of enzymes in organic synthesis. Effective: 1997 Winter Quarter.

CHE 238—Introduction to Chemical Biology (3)
Lecture—3 hours. Prerequisite(s): CHE 118C or CHE 128C; Or equivalent; CHE 130A, CHE 130B and BIS 102, BIS 103, and BIS 104, or the equivalents recommended. Synthesis of complex molecules in nature. Use of biosynthetic pathways in synthesis of new chemical entities. Applications of small molecules in chemical genetics and structural biology. Solving biological problems using synthetic biomolecules. Effective: 2009 Winter Quarter.

CHE 240—Advanced Analytical Chemistry (3)
Lecture—3 hours. Prerequisite(s): CHE 110A; CHE 115; Or equivalent. Numerical treatment of experimental data; thermodynamics of electrolyte and non-electrolyte solutions; complex equilibria in aqueous and non-aqueous solutions; potentiometry and specific ion electrodes; mass transfer in liquid solutions; fundamentals of separation science, including column, gas and liquid chromatography. Effective: 1997 Winter Quarter.

CHE 241A—Surface Analytical Chemistry (3)
Lecture—3 hours. Prerequisite(s): CHE 110C; Or equivalent. Concepts of surfaces and interfaces: physical properties, unique chemistry and electronic effects. Focus on gas-solid interfaces, with some discussion of liquid-solid interfaces. Effective: 2002 Fall Quarter.

CHE 241B—Laser and X-ray Spectroscopy (3)
Lecture—3 hours. Prerequisite(s): CHE 110B; Or equivalent. Concepts and mechanisms of light-matter interactions. Chemical applications of modern spectroscopic methods, including multiphoton spectroscopy, time-resolved laser and x-ray photolysis, and phase-contrast x-ray imaging. Effective: 2002 Fall Quarter.

CHE 241C—Mass Spectrometry (3)
Lecture—3 hours. Prerequisite(s): CHE 110C; CHE 115; Or equivalent. Mass spectrometry and related methods with emphasis on ionization methods, mass analyzers, and detectors. Related methods may include ion-molecule reactions, unimolecular dissociation of organic and bio-organic compounds, and applications in biological and environmental analysis. Effective: 2002 Winter Quarter.

CHE 241D—Electroanalytical Chemistry (3)
Lecture—3 hours. Prerequisite(s): CHE 110C; CHE 115; Or equivalent. Electroanalytical chemistry with consideration of mass transfer and electrode kinetics for polarizable electrodes. Current-potential curves for a variety of conditions, including both potentiostatic and galvanostatic control, and their application in chemical analysis. Effective: 2002 Winter Quarter.

CHE 241E—Microscopy and Imaging Techniques (3)
Lecture—3 hours. Prerequisite(s): CHE 110C; CHE 115; Or equivalent. Introduction to modern microscopy and imaging techniques: scanning tunneling, atomic force, far-field optical, fluorescence, scanning near-field optical, and scanning electron microscopy. Application to nanoscience and analytical and bioanalytical chemistry. Some laboratory demonstrations. Effective: 2002 Fall Quarter.

CHE 245—Mechanistic Enzymology (3)
Lecture—3 hours. Advanced topics in chemical kinetics relevant to enzymes, enzyme kinetics, theory of enzyme catalysis, and the analysis of a selection of organic enzyme reaction mechanisms by the tools introduced in the first part of the course. Effective: 2013 Fall Quarter.

CHE 261—Current Topics in Chemical Research (2)
Lecture—2 hours. Prerequisite(s): Graduate standing in Chemistry or consent of instructor. Designed to help chemistry graduate students develop and maintain familiarity with the current and past literature in their immediate field of research and related areas. May be repeated for credit when topics differ. Effective: 1997 Winter Quarter.

CHE 263—Introduction to Chemical Research Methodology (3)
Discussion/Laboratory—9 hours. Prerequisite(s): CHE 293; and Consent of Instructor. Graduate student standing in Chemistry. Introduction to identification, formulation, and solution of meaningful scientific problems including experimental design and/or theoretical analyses of new and prevailing techniques, theories and hypotheses. May be repeated for credit when topic differs. (S/U grading only.) Effective: 1997 Winter Quarter.
CHE 264—Advanced Chemical Research Methodology (6)
Discussion/Laboratory—18 hours. Prerequisite(s): CHE 263; or Consent of Instructor. Applications of the methodology developed in course 263 to experimental and theoretical studies. Advanced methods of interpretation of results are developed. Includes the preparation of manuscripts for publication. May be repeated for credit when topic differs. (S/U grading only.) Effective: 1997 Winter Quarter.

CHE 290—Seminar (2)
Seminar—2 hours. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

CHE 293—Introduction to Chemistry Research (1)
Discussion—2 hours. Designed for incoming graduate students preparing for higher degrees in chemistry. Group and individual discussion of research activities in the Department and research topic selection. (S/U grading only.) Effective: 1997 Winter Quarter.

CHE 294—Presentation of Chemistry Research (1)
Seminar—2 hours. Prerequisite(s): Graduate standing. Restricted to graduate students in Chemistry who have not yet given their departmental presentation. Introduces first- and second-year Chemistry graduate students to the process of giving an effective research presentation. Advanced Ph.D. students give formal seminars describing the design and execution of their research projects. May be repeated up to 3 time(s). (S/U grading only.) Effective: 2009 Winter Quarter.

CHE 295—Careers in Chemistry (1)
Seminar—2 hours. Prerequisite(s): Graduate standing in Chemistry. Designed to give Chemistry graduate students an in-depth appreciation of career opportunities with a M.S. or Ph.D. degree in chemistry. Professional chemists (and allied professionals) give seminars describing both research and career insights. May be repeated up to 3 time(s). (S/U grading only.) Effective: 2001 Fall Quarter.

CHE 296—Research in Pharmaceutical Chemistry (6)
Laboratory—18 hours. Prerequisite(s): CHE 130A; CHE 130B; CHE 135; CHE 233 (can be concurrent); and Consent of Instructor. Restricted to students in the Integrated B.S./M.S. Program in Chemistry. Laboratory provides qualified graduate students with the opportunity to pursue original investigation in Pharmaceutical Chemistry and allied fields in order to fulfill the letter-graded research requirement of the Integrated B.S./M.S. Program in Chemistry (Pharmaceutical Chemistry Emphasis). May be repeated up to 3 time(s) when topic differs. Effective: 2009 Fall Quarter.

CHE 298—Group Study (1-5)

CHE 299—Research (1-12)
Variable. The laboratory is open to qualified graduate students who wish to pursue original investigation. Students wishing to enroll should communicate with the department well in advance of the quarter in which the work is to be undertaken. (S/U grading only.) Effective: 1997 Winter Quarter.

CHE 390—Methods of Teaching Chemistry (2)
Discussion—1 hour; Lecture—1 hour. Prerequisite(s): Consent of Instructor. Graduate student standing in Chemistry. Practical experience in methods and problems of teaching chemistry. Includes analyses of texts and supporting material, discussion of teaching techniques, preparing for and conducting of discussion sessions and student laboratories. Participation in the teaching program required for Ph.D. in chemistry. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

CHE 392—Advanced Methods of Teaching Chemistry (2)
Lecture—2 hours. Prerequisite(s): CHE 390 Advanced topics in teaching chemistry. Analysis and discussion of curricular design, curricula materials, teaching methods and evaluation. For students who are planning a career in teaching chemistry. (S/U grading only.) Effective: 1997 Winter Quarter.

Pharmacology & Toxicology (Graduate Group)

Pharmacology & Toxicology (Graduate Group) | PTX M.S
Kermit L. Carraway, Chairperson of the Group

Group Office. 4139 Meyer Hall (Department of Environmental Toxicology; 530-752-4516; http://ptx.ucdavis.edu/
Faculty. The more than 90 faculty in the graduate group represent at least 25 academic departments and organized research units within the College of Agricultural and Environmental Sciences, the College of Biological Sciences, the School of Medicine and the School of Veterinary Medicine.

Graduate Study. The program, which offers both the M.S. and Ph.D. degree, emphasizes an interdisciplinary approach that combines coursework and experimental training in modern approaches to pharmacological and toxicological problems. Areas of research span fundamental and translational research in a broad spectrum of areas within pharmacology and toxicology, including cardiovascular pharmacology, cancer therapeutics, neuropharmacology, drug discovery and design, neurotoxicology, pulmonary toxicology and environmental toxicology. Students complete core courses in pharmacology and toxicology and carry out research rotations during their first year of study. All Ph.D. students receive financial support. For detailed information on the program, contact the Group office, graduate advisors, or the Group chairperson.

Graduate Advisors. K. Carraway (Biochemistry & Molecular Medicine), A. Gelli (Pharmacology), R. Harper (Pulmonary Medicine), P. Henderson (Hematology & Oncology), M. Horne (Pharmacology), H. Knych (Molecular Biosciences), J.A. Last (Pulmonary Medicine), P. Lein (Molecular Biosciences), L. Miller (Anatomy, Physiology & Cell Biology), K. Pinkerton (Center for Health and Environment), B. Puschner (Molecular Biosciences), H. Wulff (Pharmacology)

Pharmacology & Toxicology (Graduate Group) | PTX Ph.D.

Kermit L. Carraway, Chairperson of the Group

Group Office. 4139 Meyer Hall (Department of Environmental Toxicology; 530-752-4516; http://ptx.ucdavis.edu/

Pharmacology & Toxicology (Graduate Group) | PTX Courses

Additional courses that satisfy the breadth and depth requirements of the program are taught under departments of faculty in the group.

Courses in PTX:

PTX 201—Principles of Pharmacology and Toxicology I (5)
Lecture—5 hours. Prerequisite(s): BIS 102; NPB 101 First of three courses presenting fundamental principles of pharmacology and toxicology. Introductory overview of basic concepts in pharmacology/toxicology, followed by in-depth blocks on fate processes of chemicals in the body, fate processes in tissue selective responses, selective toxicity employed therapeutically. Effective: 1997 Fall Quarter.

PTX 202—Principles of Pharmacology and Toxicology II (4)
Lecture—4 hours. Prerequisite(s): PTX 201 The second of three courses presenting fundamental principles of pharmacology and toxicology. Principles of pharmacodynamics and mechanisms of drug/toxicant actions. Effective: 1999 Winter Quarter.
PTX 203—Principles of Pharmacology and Toxicology III (4)
Lecture—4 hours. Prerequisite(s): PTX 201; PTX 202. Integrated physiological systems, cardiovascular and nervous systems, and how drugs and toxicants act to perturb function. Effective: 1999 Spring Quarter.

PTX 215—Electrophysiology Techniques and Applications (3)
Discussion—1.5 hours; Lecture—1.5 hours. Broad scope of topics in electrophysiology techniques and applications. (Same course as MCP 215.) (S/U grading only.) Effective: 2015 Spring Quarter.

PTX 230—Advanced Topics in Pharmacology and Toxicology (1-3)
Discussion—1 hour; Lecture—1 hour; Seminar—1 hour. Prerequisite(s): PTX 201; and Consent of Instructor. In-depth coverage of selected topics for graduate students in Pharmacology-Toxicology and related disciplines. Topics determined by instructor in charge for each quarter. Effective: 1997 Winter Quarter.

PTX 277—Molecular Mechanisms in Cancer and other Diseases (3)
Lecture/Discussion—2 hours; Project (Term Project). Prerequisite(s): MCB 121 or MCB 122; Undergraduate or graduate introductory course in cell biology (such as BIS 104), and general biochemistry (MCB 121 or MCB 122) required; PTX 202 recommended. Restricted to graduate standing or consent of instructor. Exploration of cutting edge investigations on the underlying mechanisms of cancer biology, cancer therapy and other diseases. Current medical research in Cancer and other diseases, as it spans the bench to bedside. Effective: 2015 Winter Quarter.

PTX 290—Seminar (1)

PTX 290C—Advanced Research Conference (1)
Lecture/Discussion. Provide credit for participation in and attendance at research conferences. May be repeated up to 3 time(s). (S/U grading only.) Effective: 2011 Fall Quarter.

PTX 299—Research (1-12)
Research with a faculty member in the Pharmacology & Toxicology Graduate Group. May be repeated for credit. (S/U grading only.) Effective: 2003 Winter Quarter.

Philosophy

Philosophy | PHI Information
(College of Letters and Science)
James Griesemer, Ph.D., Chairperson of the Department

Advising Office. 101 Young Hall; philadvising@ucdavis.edu; http://philosophy.ucdavis.edu

Faculty. http://philosophy.ucdavis.edu/directory-of-people/phi-faculty#c4=all&b_start=0

Philosophy | PHI A.B.
(College of Letters and Science)
James Griesemer, Ph.D., Chairperson of the Department

Department Office. 1240 Social Sciences & Humanities; philadmin@ucdavis.edu; http://philosophy.ucdavis.edu

Advising Office. 101 Young Hall; philadvising@ucdavis.edu; http://philosophy.ucdavis.edu

Faculty. http://philosophy.ucdavis.edu/directory-of-people/phi-faculty#c4=all&b_start=0

The Major Program

Philosophy addresses problems and questions that arise in all areas of human thought and experience and in all disciplines. Recurring questions about the nature of value, the good life, right conduct, knowledge, truth, language, mind, and reality are central to philosophical study. Philosophy also investigates the methodologies and assumptions of the major disciplines in the university in order to deepen our understanding of the sciences, of mathematics, art, literature, and history, and of religion and morality. It leads us to address issues about the nature of these subjects, about the methods of reasoning characteristic of them, and about the contributions they make to our understanding of ourselves and our world.
Philosophy contributes to the liberal education of its students. The department emphasizes an analytic approach to philosophical questions, which trains students to understand and evaluate arguments and to think and write precisely and clearly. These skills are of immense value in a variety of careers.

**The Program.** The Department of Philosophy offers its majors a choice among three options. The General Emphasis provides a broad view of the field of philosophy. It includes a breadth requirement at the lower division level while providing students wide choice in more advanced courses. The Pre-Law and Pre-Med Emphases include courses that provide philosophical perspective on law and medicine respectively and that also provide important preparation for professional school.

The Department offers courses in most areas of contemporary analytic philosophy including the theory of knowledge, metaphysics, logic, ethics, and political philosophy. In addition, upper division courses are offered in moral and political philosophy, and aesthetics, and in the philosophy of religion, of mind, of language, of mathematics, of law, and of the physical, biological and social sciences. The problems of philosophy have important roots in past. The history of philosophy is important not only as part of the heritage of educated persons, but also because it is relevant to contemporary issues. For these reasons, the department places great emphasis on the history of philosophy, providing courses on the major figures and traditions of western philosophy.

**Faculty Advisor.** Jan Szaif, Ph.D.

**Career Alternatives.** Students of philosophy learn to understand and evaluate arguments and to think and write precisely and clearly. These analytical skills are assets in any career. Many of our majors have pursued graduate study in philosophy and have become philosophers in their own right. Others have pursued academic careers in related disciplines in the humanities and social sciences. Philosophy majors are well prepared for law, business, or other professional schools and have found careers in computer programming, government service, teaching, the ministry, and social work. Those wishing to attend law school or medical school should considering pursuing the Pre-Law and Pre-Med emphases, respectively.

**Honors Program.** The department offers an honors program, which gives qualifying majors the opportunity to work closely with faculty and graduate students. Information can be obtained on the department website.

**Courses for Non-Majors.** Students majoring in most disciplines in the university will find courses relevant to their educational or career goals. PHI 001 is the introductory course for both majors and non-majors. PHI 005 teaches critical thinking. The following courses are recommended:

1. Pre-law: 012, 014, 024, 030, 102, 112, 115, 116, 118 and, especially, 119;
5. Social Sciences: 012, 030, 031, 032, 101, 102, 103, 109, 118, 131;
8. Humanities and the Arts: 014, 021, 022, 024, 101, 102, 103, 105, 114, 116, 118, 123, 141 through 175;

**Department Activities.** The Philosophy department sponsors a lecture series with well-known philosophers who present papers in their fields of expertise. The department also operates ongoing faculty and graduate student workshops. Undergraduate students are welcome to attend and join these discussions. Information can be obtained on the department website.

**Graduate Study.** The Department of Philosophy offers programs of study leading to the M.A. and Ph.D. degree. Detailed information may be obtained by writing to the Graduate Advisor.

**Graduate Advisor.** Cody Gilmore, Ph.D.

Philosophy | PHI M.A.  
(College of Letters and Science)  
James Griesemer, Ph.D., Chairperson of the Department  

Department Office. 1240 Social Sciences & Humanities; http://philosophy.ucdavis.edu  
Graduate Advising Office. 1241 Social Sciences & Humanities; http://philosophy.ucdavis.edu  
Faculty. http://philosophy.ucdavis.edu/directory-of-people/phi-faculty#c4=all&b_start=0  

Graduate Study. The Department of Philosophy graduate program has both M.A. and Ph.D. “tracks.” The M.A. track is designed for students who do not intend to pursue a Ph.D. in philosophy or who would benefit from enrolling first in a master’s degree program. Students who enroll in the M.A. track may, however, later petition for admission to the Ph.D. track if they so desire.  

Graduate Advisor. Cody Gilmore, Ph.D.  

Philosophy | PHI Ph.D.  
(College of Letters and Science)  
James Griesemer, Ph.D., Chairperson of the Department  

Department Office. 1240 Social Sciences & Humanities; http://philosophy.ucdavis.edu  
Graduate Advising Office. 1241 Social Sciences & Humanities; http://philosophy.ucdavis.edu  
Faculty. http://philosophy.ucdavis.edu/directory-of-people/phi-faculty#c4=all&b_start=0  

Graduate Study. The Department of Philosophy graduate program has both M.A. and Ph.D. “tracks.” Students who aim to complete a Ph.D. should apply directly to the Ph.D. track, even if they have not yet earned an M.A. in philosophy. Ph.D. students may earn the M.A. while progressing toward completion of the Ph.D. requirements.  

Graduate Advisor. Cody Gilmore, Ph.D.  

Philosophy | PHI Minor  
(College of Letters and Science)  
James Griesemer, Ph.D., Chairperson of the Department  

Department Office. 1240 Social Sciences & Humanities; philadmin@ucdavis.edu; http://philosophy.ucdavis.edu  
Advising Office. 101 Young Hall; philadvising@ucdavis.edu; http://philosophy.ucdavis.edu  
Faculty. http://philosophy.ucdavis.edu/directory-of-people/phi-faculty#c4=all&b_start=0
Students wishing to minor in Philosophy may choose a general minor or a minor specializing in logic. There are no specific courses required for the general minor, so students may create a program to suit their own interests. The range of choice in the logic specialization is limited to the courses listed.

**Minor Advisor.** Jan Szaif, Ph.D.

**Philosophy | PHI Courses**

**Courses in PHI:**

**PHI 001—Introduction to Philosophy (4)**

Discussion—1 hour; Lecture—3 hours. Problems of philosophy through major writings from various periods. Problems are drawn from political, aesthetic, religious, metaphysical, and epistemological concerns of philosophy. GE credit: AH, WE. Effective: 1997 Winter Quarter.

**PHI 005—Critical Reasoning (4)**

Discussion—1 hour; Lecture—3 hours. Criteria of good reasoning in everyday life and in science. Topics to be covered may include basic principles of deduction and induction; fallacies in reasoning; techniques and aids to reasoning; principles of scientific investigation; aids to clarity. Not open for credit to students who have completed PHI 006. GE credit: WE. Effective: 1997 Winter Quarter.

**PHI 007—Philosophical Perspectives on Sexuality (3)**

Lecture—3 hours. Philosophical issues related to sexuality, including, but not limited to, ethical and social issues regarding sexual practice, orientation, classification and identity. GE credit: AH. Effective: 2013 Winter Quarter.

**PHI 007Y—Philosophical Perspectives on Sexuality (3)**

Discussion—1 hour, Web Virtual Lecture—1.5 hours. Philosophical issues related to sexuality, including, but not limited to, ethical and social issues regarding sexual practice, orientation, classification and identity. Not open for credit to students who have completed PHI 007. GE credit: AH, DD. Effective: 2015 Winter Quarter.

**PHI 010—Introduction to Cognitive Science (4)**

Lecture/Discussion—4 hours. Pass One open to Cognitive Science majors only. Introduction to the interdisciplinary cognitive scientific approach to the study of mind, drawing concepts and methods from psychology, philosophy, linguistics, artificial intelligence, and other disciplines. (Same course as CGS 001.) GE credit: SE, SL. Effective: 2017 Fall Quarter.

**PHI 011—Asian Philosophy (4)**

Discussion—1 hour; Lecture—3 hours. Survey of the main philosophical systems of south and east Asia: Hinduism, Buddhism, Confucianism, and Taoism. Topics include the nature of reality, including God, the universe and the human self, human knowledge, and the proper conduct of human life. GE credit: AH, WC, WE. Effective: 2014 Fall Quarter.
PHI 012—Introduction to Symbolic Logic (4)
Discussion—1 hour; Lecture—3 hours. Syntax and semantics of the symbolic language sentence logic. Symbols of sentence logic. Translation between sentence logic and English. Truth table interpretation of sentence logic. Proof techniques. Application of truth tables and proof techniques to arguments in English. Not open for credit to students who have taken PHI 112, PHI 113, PHI 134, or PHI 135 and passed with a grade of C or better. GE credit: AH. Effective: 2011 Summer Session 1.

PHI 013—Minds, Brains, and Computers (3)
Lecture—3 hours. Computational theories of the nature of the mind. The mind as a computer process. The possibility of machine intelligence, consciousness, and mentality. Not open for credit for students who have completed PHI 013G for four units. GE credit: SE, SL, SS. Effective: 2014 Fall Quarter.

PHI 013G—Minds, Brains, and Computers with Discussion (4)
Discussion—1 hour; Lecture—3 hours. Computational theories of the nature of the mind. The mind as a computer process. The possibility of machine intelligence, consciousness, and mentality. Not open for credit for students who have completed PHI 013. GE credit: AH, SE, SL, WE. Effective: 2014 Fall Quarter.

PHI 014—Ethical and Social Problems in Contemporary Society (4)
Discussion—1 hour; Lecture—3 hours. Philosophical issues and positions involved in contemporary moral and social problems. Possible topics include civil disobedience and revolution, racial and sex discrimination, environment, population control, technology and human values, sexual morality, freedom in society. GE credit: AH, WE. Effective: 1997 Spring Quarter.

PHI 015—Introduction to Bioethics (4)
Discussion—1 hour; Lecture—3 hours. Critical analysis of normative issues raised by contemporary medicine and biology. Possible topics include euthanasia, reproductive technologies, genetic engineering, informed consent and patient autonomy, experimentation on human subjects and non-human animals. GE credit: AH, WE. Effective: 2016 Spring Quarter.

PHI 016—Philosophical Foundations of American Democracy (4)
Discussion—1 hour; Lecture—3 hours. The philosophical underpinnings of democratic government and the tension between the goals of providing security and of preserving democracy and civil liberties. Illustration of the tension through focus on issues related to war and terrorism. GE credit: ACGH, AH, WE. Effective: 2009 Fall Quarter.

PHI 017—Language, Thought, and World (4)
Discussion—1 hour; Lecture—3 hours. Puzzles in the philosophy of language, such as what language is, how language conveys thoughts, whether we each speak our own private language, and what we can learn about the world by studying language. GE credit: SS, WE. Effective: 2007 Fall Quarter.

PHI 021—Philosophical Classics of the Ancient Era (4)
Discussion—1 hour; Lecture—3 hours. Survey of ancient Western philosophy with special attention to the Pre-Socratics, Plato, Aristotle, and the Sceptics. GE credit: AH, WE. Effective: 2017 Spring Quarter.

PHI 022—Philosophical Classics of the Modern Era (4)
Discussion—1 hour; Lecture—3 hours. Survey of modern Western philosophy, including Descartes, Locke, Hume, and Kant. GE credit: AH, WE. Effective: 2017 Spring Quarter.

PHI 024—Introduction to Ethics (4)
Discussion—1 hour; Lecture—3 hours. Reading of historical and contemporary philosophical works in ethics. Topics include the nature of morality, the justification of moral claims, and major ethical theories, such as consequentialist, deontological, and virtue theories. GE credit: AH, WE. Effective: 2014 Fall Quarter.

PHI 030—Introduction to Philosophy of Science (4)
Discussion—1 hour; Lecture—3 hours. Not open for credit to students who have taken course 104. Basic problems in the philosophy of science, common to the physical, biological, and social sciences. Analysis of explanation, confirmation theory, observational and theoretical terms, the nature of theories, operationalism and behaviorism, realism, reduction. GE credit: AH, SE, SL, WE. Effective: 2000 Fall Quarter.

PHI 031—Appraising Scientific Reasoning (4)
Discussion—1 hour; Lecture—3 hours. Introduction to scientific hypotheses and the kinds of reasoning used to justify such hypotheses. Emphasis on adequate justification, criteria, and strategies for distinguishing scientific from pseudoscientific theories. Concrete historical and contemporary cases. GE credit: AH, SE, SL, WE. Effective: 1997 Winter Quarter.
PHI 032—Understanding Scientific Change (4)

PHI 038—Introduction to Philosophy of Biology (4)
Discussion—1 hour; Lecture—3 hours. Non-technical introduction to philosophical, social, and scientific ideas, methods and technologies in contemporary biological fields such as evolution, genetics, molecular biology, ecology, behavior. Philosophical consideration of determinism, reductionism, explanation, theory, modeling, observation, experimentation. Evaluation of scientific explanations of human nature. GE credit: AH, SE, SL, WE. Effective: 2001 Spring Quarter.

PHI 098—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

PHI 099—Special Study for Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

PHI 101—Metaphysics (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): One course in Philosophy recommended. Theories of being. Such topics as reality, substance, universals, space, time, causality, becoming, body, experience, persons, freedom, and determinism. Views of the nature and method of metaphysics. Anti-metaphysical arguments. GE credit: AH, WE. Effective: 1997 Winter Quarter.

PHI 102—Theory of Knowledge (4)
Discussion; Extensive Writing; Lecture—3 hours. Prerequisite(s): One course in philosophy recommended. Analysis of the concept of knowledge. The relation between knowledge, belief and truth. Development of foundationalist, coherentist and externalist theories of justified belief. Examination of skepticism. GE credit: AH, WE. Effective: 2016 Fall Quarter.

PHI 103—Philosophy on Mind (4)
Lecture/Discussion—3 hours; Term Paper. The relation between mind and body, our knowledge of other minds, and the explanation of mental acts. Discussion of such concepts as action, intention, and causation. GE credit: AH, WE. Effective: 1997 Winter Quarter.

PHI 104—The Evolution of Mind (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): One previous course in Philosophy recommended. Interpretation of human thought and behavior through the lens of evolutionary theory. Topics include the nature/nurture debate concerning cognitive and other mental capacities and traits, and the interaction between evolution, learning and development. GE credit: SS, WE. Effective: 2016 Fall Quarter.

PHI 105—Philosophy of Religion (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): One course in Philosophy recommended. Logical, metaphysical, epistemological, and existential aspects of selected religious concepts and problems. GE credit: AH, WE. Effective: 1997 Winter Quarter.

PHI 107—Philosophy of the Physical Sciences (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): One Philosophy course or a science background recommended. Nature of testability and confirmation of scientific hypotheses; nature of scientific laws, theories, explanations, and models. Problems of causality, determininism, induction, and probability; the structure of scientific revolutions. GE credit: AH, SE, WE. Effective: 1997 Winter Quarter.

PHI 108—Philosophy of the Biological Sciences (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): One course in Biology or one course in Philosophy recommended. Scientific method in biology. Nature of biological theories, explanations, and models. Problems of evolutionary theory, ecology, genetics, and sociobiology. Science and human values. GE credit: AH, SE, SL, WE. Effective: 2016 Fall Quarter.

PHI 109—Philosophy of the Social Sciences (4)
PHI 111—Philosophy of Space and Time (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): One upper division Philosophy course recommended. Philosophical problems of space and time. The philosophical implications of space-time theories, such as those of Newton and Einstein. Topics may include the nature of geometry, conventionalism, absolutist versus relationist views of space and time, philosophical impact of relativity theory. GE credit: AH, WE. Effective: 2016 Fall Quarter.

PHI 112—Intermediate Symbolic Logic (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): PHI 012 C- or better; or Consent of Instructor. Predicate logic syntax and semantics. Transcription between predicate logic and English. Models, truth-trees, and derivations. Identity, functions, and definite descriptions. Introduction to concepts of metatheory. GE credit: AH. Effective: 2018 Winter Quarter.

PHI 113—Metalogic (4)
Lecture/Discussion—4 hours. Prerequisite(s): PHI 112; MAT 108; Or the equivalent. The metalogic of classical propositional and first-order predicate logic. Consistency, soundness and completeness of both propositional and predicate logic. The Löwenheim-Skolem theorem for predicate logic. Undecidability of predicate logic. GE credit: AH. Effective: 2006 Fall Quarter.

PHI 114—History of Ethics (4)
Lecture/Discussion—4 hours. Prerequisite(s): One previous Philosophy course recommended. Study of some classic texts from the history of philosophical writing on central problems of ethics, taking the form either of a survey or concentrated examination of selected historical figures. Readings from such philosophers as Aristotle, Butler, Hume, Kant, Mill. GE credit: AH, WE. Effective: 2016 Fall Quarter.

PHI 115—Problems in Normative Ethics (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): One previous course in Philosophy recommended. Moral philosophy studied through examination of moral problems and the moral principles and common sense intuitions that bear on them. Problems discussed may include: animal rights, fetal rights, euthanasia, justice and health care, war, nuclear deterrence, world hunger, environmental protection. GE credit: AH, WE. Effective: 2016 Fall Quarter.

PHI 116—Ethical Theories (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): One course in ethics recommended. Study of fundamental concepts and problems in ethical theory through an examination of classical and contemporary philosophical theories of ethics. Among the theories that may be discussed are utilitarianism, virtue theory, theories of natural rights, Kantian ethical theory, and contractarianism. GE credit: AH, WE. Effective: 2016 Fall Quarter.

PHI 117—Foundations of Ethics (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): PHI 114, 115, 116, 101, or 137 recommended. Advanced investigation of questions about the nature and foundations of morality. Among the topics that may be discussed are moral realism and anti-realism, cognitivism and non-cognitivism, types of relativism, moral skepticism, normative language and normative belief. GE credit: AH, WE. Effective: 2017 Winter Quarter.

PHI 118—Political Philosophy (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): One course in philosophy recommended. Intensive examination of some central concepts of political thought such as the state, sovereignty, rights, obligation, freedom, law, authority, and responsibility. GE credit: AH, SS, WE. Effective: 2017 Winter Quarter.

PHI 119—Philosophy of Law (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Consent of Instructor. One course in philosophy recommended. Philosophical theories of the nature of law, legal obligation, the relation of law and morals. Problems for law involving liberty and justice: freedom of expression, privacy, rights, discrimination and fairness, responsibility, and punishment. GE credit: AH, SS, WE. Effective: 2017 Winter Quarter.

PHI 120—Environmental Ethics (4)
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): One course in Philosophy recommended. Conceptual and ethical issues concerning the environment. Extension of ethical theory to animals, all life, and ecosystem wholes. Topics may include contemporary environmental issues such as global warming, sustainability and biodiversity. Not open for credit for students who have completed PHI 115 prior to fall 2011. GE credit: AH, WE. Effective: 2017 Winter Quarter.

PHI 121—Bioethics (4)
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): PHI 015 recommended. In-depth coverage of topics in bioethics including resource allocation, measures of health and disease/disability, public health, and ethical
issues related to research on human subjects and emerging technologies. GE credit: AH, WE. Effective: 2016 Spring Quarter.

**PHI 123—Aesthetics (4)**
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): One course in Philosophy recommended. Nature of art, of artistic creation, of the work of art, and of aesthetic experience; nature and validity of criticism; relations of art to its environment. GE credit: AH, WE. Effective: 1997 Winter Quarter.

**PHI 125—Theory of Action (4)**
Extensive Writing/Discussion—1 hour; Lecture—3 hours. Prerequisite(s): One course in Philosophy recommended. Survey of prominent contemporary approaches to leading problems in action theory. Problems include issues about the nature of intentional action and the conceptual character of explanations of actions in terms of the agent's reasons. GE credit: AH, WE. Effective: 2017 Winter Quarter.

**PHI 128—Rationality (4)**
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): One course in Philosophy recommended. Philosophical issues concerning rationality in its various forms. Focus is on theoretical and practical reasoning and conditions for rational belief, choice, and action. Possible additional topics include rationality and human limitations; paradoxes of rationality; varieties of irrationality; rationality and objectivity. GE credit: AH. Effective: 2017 Winter Quarter.

**PHI 129—Knowledge and the A Priori (4)**
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): One course in Philosophy recommended. Self-evidence, intuition, the (in)fallibility and (in)defeasibility of a priori methods. Analytic, formalist and Kantian accounts of how knowledge can be acquired through reasoning and intuition alone, without recourse to empirical methods. GE credit: AH, WE. Effective: 2017 Winter Quarter.

**PHI 131—Philosophy of Logic and Mathematics (4)**
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): PHI 012; Or one course for credit in mathematics. Nature of formal systems and mathematical theories. Selected topics include logical and semantical paradoxes; foundations of mathematics; set theory, type theory, and intuitionistic theory; philosophy of geometry; philosophical implications of Gödel's incompleteness results. GE credit: AH, WE. Effective: 1997 Winter Quarter.

**PHI 133—Logic, Probability, and Artificial Intelligence (4)**
Lecture/Discussion—4 hours. Prerequisite(s): PHI 012; PHI 112 Introduction to theoretical artificial intelligence with a focus on nonmonotonic logic, Bayesian networks, and learning theory. Effective: 2016 Fall Quarter.

**PHI 134—Modal Logic (4)**
Lecture/Discussion—4 hours. Prerequisite(s): PHI 012 or MAT 108; Or the equivalent. Survey of the main systems of modal logic, including Lewis systems S4 and S5. Possible worlds semantics and formal proofs. Applications to epistemology, ethics, or temporality. GE credit: AH. Effective: 1998 Spring Quarter.

**PHI 135—Alternative Logics (4)**
Lecture/Discussion—4 hours. Prerequisite(s): PHI 012 or MAT 108; Or the equivalent. Alternatives to standard truth-functional logic, including many-valued logics, intuitionist logics, relevance logics, and non-monotonic logics. GE credit: AH. Effective: 1997 Winter Quarter.

**PHI 136—Formal Epistemology (4)**
Lecture/Discussion—4 hours. Prerequisite(s): PHI 012 Formal (mathematical) approaches to belief revision, knowledge and deduction, meta-knowledge, (multi-agent) epistemic logic, Bayesian confirmation, Bayes nets, epistemic and probabilistic paradoxes. GE credit: AH. Effective: 2014 Fall Quarter.

**PHI 137A—Philosophy of Language: Theory of Reference (4)**
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): One course in Philosophy or Linguistics recommended. Survey of issues and views concerning reference, or how words refer to things. Topics include names and descriptions, the distinction between sense and reference, the puzzle of non-referring terms, causal theories of reference, and possibility and necessity. Only two units of credit for students who have taken PHI 137. GE credit: AH, WE. Effective: 2014 Winter Quarter.

**PHI 137B—Philosophy of Language: Truth and Meaning (4)**
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): One course in Philosophy or Linguistics recommended. Comparative treatment of theories about the relationship between truth and meaning. Topics include: the identification of meaning with truth conditions, the nature of propositions, theories of linguistic...
understanding, the roles of mind and world in determining meaning. Only two units of credit for students who have taken PHI 137. GE credit: AH, WE. Effective: 2017 Winter Quarter.

**PHI 137C—Philosophy of Language: Semantics and Pragmatics (4)**
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): One course in Philosophy or Linguistics recommended. Philosophical issues and positions concerning the meaning and use of language. Topics include the distinction between meaning and implication, the roles of context and convention in language use, speaker meaning versus linguistic meaning and speech act theory. Only two units of credit for students who have taken PHI 137. GE credit: AH, WE. Effective: 2017 Winter Quarter.

**PHI 141—Socrates and the Socratic Dialogue (4)**
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): PHI 021 recommended. Philosophy of Socrates as found in the Socratic dialogues of Plato. Topics include the Socratic practice of refutation, its method, epistemological foundation, and moral purpose; Socratic eudaimonism and Socratic virtue theory; the paradoxes of Socratic intellectualism. GE credit: AH, WE. Effective: 2017 Winter Quarter.

**PHI 143—Hellenistic Philosophy (4)**
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): PHI 021 recommended. Positions and arguments of the major philosophical schools of the Hellenistic period: Stoicism, Epicureanism, and Skepticism. Focus is on ethical, epistemological and metaphysical questions and their interconnectedness. GE credit: AH, WE. Effective: 2017 Winter Quarter.

**PHI 145—Christian, Islamic, and Jewish Philosophers of the Middle Ages (4)**
Lecture/Discussion—4 hours. Prerequisite(s): PHI 021 recommended. Major Christian, Islamic, and Jewish philosophers of the Middle Ages. GE credit: AH, WC. Effective: 2018 Winter Quarter.

**PHI 151—Nineteenth Century European Philosophy (4)**

**PHI 156—Contemporary Analytic Philosophy (4)**
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): One course in Philosophy recommended. Consideration of central issues such as meaning/reference, analytic/synthetic, reductionism, formal and ordinary language, essential properties, ontological commitment, possible world semantics; influential works by philosophers such as Russell, Moore, Wittgenstein, Austin, Carnap, Quine, Putnam, Kripke, van Fraassen. GE credit: AH, WE. Effective: 2017 Winter Quarter.

**PHI 157—Twentieth Century European Philosophy (4)**
Lecture/Discussion—4 hours. Prerequisite(s): One course in Philosophy recommended. Survey of the main movements in twentieth century philosophy on the European continent, including phenomenology, existentialism, post-structuralism and post-modernism. Philosophers covered are Husserl, Heidegger, Sartre, Foucault, Derrida. GE credit: AH, WE. Effective: 2017 Winter Quarter.

**PHI 160—Pre-Socratics (4)**
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): PHI 021 recommended. Study of the metaphysical views of such pre-Socratic figures as the Milesians, the Pythagoreans, Heracleitus, Parmenides, Empedocles, Anaxagoras, and the atomists. GE credit: AH, WE. Effective: 2017 Winter Quarter.

**PHI 161—Plato (4)**
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): PHI 021 recommended. Examines Platos most important contributions in metaphysics, epistemology, psychology, cosmology, ethics and political philosophy. Dialogues will be selected from Platos middle and later writings. GE credit: AH, WE. Effective: 2017 Winter Quarter.

**PHI 162—Aristotle (4)**
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): PHI 021 recommended. Overview of Aristotles most central and influential writings. Topics selected from fields such as metaphysics, physics, ethics, logic, and psychology. GE credit: AH, WE. Effective: 2017 Winter Quarter.

**PHI 168—Descartes (4)**
Lecture/Discussion—4 hours. Prerequisite(s): PHI 022 recommended. Philosophical writings of René Descartes. Topics include the refutation of skepticism, the nature and existence of mind and body, the existence of God, and the foundations of science. GE credit: AH, WE. Effective: 2017 Winter Quarter.
PHI 170—Spinoza and Leibniz (4)
Lecture/Discussion—4 hours. Prerequisite(s): PHI 022 recommended. Seventeenth-century philosophical writings of Spinoza and Leibniz. Topics drawn from both philosophers include: the nature and existence of God, the nature of mind, the relation between mind and body, human freedom, metaphysical monism vs. pluralism. GE credit: AH, WE. Effective: 2016 Fall Quarter.

PHI 172—Locke and Berkeley (4)
Lecture/Discussion—4 hours. Prerequisite(s): PHI 022 recommended. Principal metaphysical works of John Locke and George Berkeley. Topics include abstract ideas, existence of matter, primary and secondary qualities, essence, substance, the existence of God, and the nature of scientific knowledge. May be repeated for credit. GE credit: AH, WE. Effective: 2017 Winter Quarter.

PHI 174—Hume (4) Review all entries
Lecture/Discussion—4 hours. Prerequisite(s): PHI 022N David Hume's Treatise of Human Nature and related writings. Topics include empiricism, space, causality, belief, skepticism, the passions, and morality. GE credit: AH, WE. Effective: 2003 Fall Quarter.

PHI 174—Hume (4) Review all entries
Lecture/Discussion—4 hours. Prerequisite(s): PHI 022 recommended. David Hume's Treatise of Human Nature and related writings. Topics include empiricism, space, causality, belief, skepticism, the passions, and morality. GE credit: AH, WE. Effective: 2019 Winter Quarter.

PHI 175—Kant (4)
Lecture/Discussion—4 hours. Prerequisite(s): PHI 022 recommended. Immanuel Kant's Critique of Pure Reason and related writings. Topics include the nature of human cognition, space and time, a priori concepts, substance, causality, human freedom, and the existence of God. GE credit: AH, WE. Effective: 2016 Fall Quarter.

PHI 178—Frege (4)
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): Consent of Instructor. One upper division course in Philosophy recommended. Development of Gottlob Frege's views about language and logic. Formulation of his grand mathematical idea known as logicism and how it led to the philosophy of language. GE credit: AH, WE. Effective: 2016 Fall Quarter.

PHI 189A—Special Topics in Philosophy; History of Philosophy (4)
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): One course in the area of the special topic recommended. Special topics in History of Philosophy. May be repeated up to 8 unit(s). GE credit: AH, WE. Effective: 2017 Winter Quarter.

PHI 189B—Special Topics in Philosophy; Metaphysics (4)
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): One course in the area of the special topic recommended. Special topics in Metaphysics. May be repeated up to 8 unit(s). GE credit: AH, WE. Effective: 2017 Winter Quarter.

PHI 189C—Special Topics in Philosophy; Theory of Knowledge (4)
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): One course in the area of the special topic recommended. Special topics in Theory of Knowledge. May be repeated up to 8 unit(s). GE credit: WE. Effective: 2017 Winter Quarter.

PHI 189D—Special Topics in Philosophy; Ethics (4)
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): One course in the area of the special topic recommended. Special topics in Ethics. May be repeated up to 8 unit(s). GE credit: AH, WE. Effective: 2017 Winter Quarter.

PHI 189E—Special Topics in Philosophy; Political Philosophy (4)
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): One course in the area of the special topic recommended. Special topics in Political Philosophy. May be repeated up to 8 unit(s). GE credit: AH, WE. Effective: 2017 Winter Quarter.

PHI 189F—Special Topics in Philosophy; Philosophy of Law (4)
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): One course in the area of the special topic recommended. Special topics in Philosophy of Law. May be repeated up to 8 unit(s). GE credit: AH, WE. Effective: 2017 Winter Quarter.
PHI 189G—Special Topics in Philosophy; Aesthetics (4)
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): One course in the area of the special topic recommended. Special topics in Aesthetics. May be repeated up to 8 unit(s). GE credit: AH, WE. Effective: 2017 Winter Quarter.

PHI 189H—Special Topics in Philosophy; Philosophy of Mind (4)
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): One course in the area of the special topic recommended. Special topics in Philosophy of Mind. May be repeated up to 8 unit(s). GE credit: AH, WE. Effective: 2017 Winter Quarter.

PHI 189I—Special Topics in Philosophy; Philosophy of Science (4)
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): One course in the area of the special topic recommended. Special Topics in Philosophy of Science. May be repeated up to 8 unit(s). GE credit: AH, SE, WE. Effective: 2017 Winter Quarter.

PHI 189J—Special Topics in Philosophy; Philosophy of Language (4)
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): One course in the area of the special topic recommended. Special topics in Philosophy of Language. May be repeated up to 8 unit(s). GE credit: AH. Effective: 2017 Winter Quarter.

PHI 189K—Special Topics in Philosophy; Logic (4)
Lecture/Discussion—4 hours. Prerequisite(s): One course in the area of the special topic recommended. Special topics in Logic. May be repeated up to 8 unit(s). GE credit: AH. Effective: 2017 Winter Quarter.

PHI 194HA—Honors Research Project (4)
Term Paper; Tutorial—3 hours. Prerequisite(s): Consent of Instructor. Open to students who are members of the honors program in Philosophy. Completion of honors research project under direction of an instructor. Consult departmental major advisor for list of instructors available in a given quarter. Effective: 1997 Winter Quarter.

PHI 194HB—Research Project (4)
Term Paper; Tutorial—3 hours. Prerequisite(s): Consent of Instructor. Open to students who are members of the honors program in Philosophy. Completion of honors research project under direction of an instructor. Consult departmental major advisor for list of instructors available in a given quarter. Effective: 1997 Winter Quarter.

PHI 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

PHI 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

PHI 200A—Proseminar I (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. Open only to students in their first quarter of the Philosophy Ph.D. program. Intensive study of core works in a selected area of philosophy. Intensive experience in philosophical writing, discussion, and presentation of written work. Effective: 2007 Fall Quarter.

PHI 200B—Proseminar II (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. Open only to students in their first quarter of the Philosophy Ph.D. program. Intensive study of core works in a selected area of philosophy. Intensive experience in philosophical writing, discussion, and presentation of written work. Effective: 2007 Winter Quarter.

PHI 201—Metaphysics (4)
Seminar—3 hours; Term Paper—1 hour. Prerequisite(s): Graduate standing or consent of instructor. Topics vary from quarter to quarter and may include the following: What are things? Do names refer to things? If so, how? Do things have essential properties? What is the nature of necessity? May be repeated for credit topic differs and with consent of instructor. Effective: 2000 Fall Quarter.

PHI 202—Theory of Knowledge (4)
Seminar—3 hours; Term Paper—1 hour. Prerequisite(s): Graduate standing in Philosophy or consent of instructor. Topics vary from quarter to quarter. Sample topics include belief, skepticism, justification, externalism, naturalized epistemology. Course may be repeated for credit with consent of instructor. May be repeated for credit topic is sufficiently distinct. Effective: 2000 Fall Quarter.

PHI 203—Philosophy of Mind (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Topics in the philosophy of mind, such as the mind-body problem, mental representation, consciousness, intentionality. Course may be
repeated for credit with consent of instructor. May be repeated for credit with consent of instructor. Effective: 2000 Winter Quarter.

**PHI 203P—Philosophy of Mind Practicum (4)**
Practice—12 hours. Prerequisite(s): Consent of Instructor. Specific research conducted and prepared for publication by advanced students in a team setting. Topics include knowledge representation and learning in neural networks, the nature and formal properties of mental representation. May be repeated for credit topic differs and with consent of instructor. (S/U grading only.) Effective: 2001 Spring Quarter.

**PHI 207—Philosophy of Physics (4)**
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing in Philosophy or consent of instructor. Intensive treatment of one (or more) topic(s) in the philosophy of physics, such as foundations of spacetime theories, the interpretation of quantum mechanics, or foundations of statistical mechanics. May be repeated for credit topic differs and with consent of instructor. Effective: 2001 Spring Quarter.

**PHI 208—Philosophy of Biology (4)**
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Intensive treatment of one (or more) topic(s) in the philosophy of biology, such as foundations of evolutionary theories, reductionism in biology, sociobiology and cultural evolution. May be repeated for credit topic differs and with consent of instructor. Effective: 2001 Winter Quarter.

**PHI 210—Philosophy of Science (4)**
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Treatment of one or more general topics of current interest in philosophy of science. Topics may include scientific explanation, theories of confirmation, scientific realism, reduction in physics and biology. May be repeated for credit topic differs and with consent of instructor. Effective: 2001 Winter Quarter.

**PHI 212—Philosophy of Logic and Mathematics (4)**
Seminar—3 hours; Term Paper. Prerequisite(s): PHI 112 or PHI 113 or MAT 108; or MAT 125 (Discontinued) or the equivalent. Philosophical issues in logic and math. Topics may include nature of logical and mathematical truth or knowledge, correctness of logical systems, foundations of mathematics, metaphysical and epistemological presuppositions, applications to philosophical problems and formalization of philosophical theories May be repeated for credit topic differs and with consent of instructor. Effective: 2001 Winter Quarter.

**PHI 213—Advanced Logic for Graduate Students (4)**
Extensive Problem Solving; Lecture/Discussion—3 hours. Prerequisite(s): Graduate standing in Philosophy. Enrollment in the Philosophy Ph.D. program. Intensive study of advanced logic, including set theory, metatheory of predicate logic, and modal logic. May be repeated up to 2 time(s) when topic differs. Effective: 2011 Fall Quarter.

**PHI 214—Ethics (4)**
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing in Philosophy or consent of instructor. Topics may include morality and motivation, objectivity in ethics, the relationship between the factual and the moral. Topics vary from quarter to quarter. May be repeated for credit topic differ and with consent of instructor. Effective: 2001 Winter Quarter.

**PHI 217—Political Philosophy (4)**
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Advanced studies in political philosophy. Topics vary but may include distributive justice, enforcement of morality by the state, equality, obligation to obey the law, social contract theory. May be repeated for credit topic differs and with consent of instructor. Effective: 2000 Fall Quarter.

**PHI 220—Environmental Ethics (4)**
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Intensive treatment of one or more topic(s) in environmental ethics, such as biodiversity, sustainability, composition of the moral community, invasive species, endangered species, applications of ethical theories to contemporary environmental issues. Effective: 2012 Winter Quarter.

**PHI 237—Philosophy of Language (4)**
Seminar—3 hours; Term Paper—1 hour. Prerequisite(s): Graduate standing or consent of instructor. Study of philosophical issues raised by language, such as the nature of semantic content, proper semantics for verbs of propositional attitude, feasibility and limitations of formal semantics and pragmatics for natural languages. May be repeated for credit if topic differs and consent of instructor. Effective: 2000 Fall Quarter.
PHI 238—Philosophy of Language Workshop (4)
Extensive Writing; Seminar—3 hours. Open to graduate students only. Discussion of recently published, unpublished and in-progress research in philosophy of language, including work on the relation of language and mind, of language and logic, and linguistic theory. May be repeated for credit when topic differs. Effective: 2007 Fall Quarter.

PHI 261—Plato (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Advanced seminar designed for analysis of arguments, doctrines, and texts from Plato's works. Methods of argumentation and interpretation are especially stressed. Topics vary according to instructor. May be repeated for credit with consent of instructor. Effective: 2000 Winter Quarter.

PHI 262—Aristotle (4)
Seminar—3 hours; Term Paper—1 hour. Prerequisite(s): Graduate standing or consent of instructor. Advanced seminar designed for analysis of arguments, doctrines, and texts from Aristotle's works. Methods of argumentation and interpretation are especially stressed. Topics vary according to instructor. Course may be repeated for credit with consent of instructor. Effective: 2001 Spring Quarter.

PHI 275—Kant (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing in Philosophy or consent of instructor. Intensive study of a topic in the philosophy of Kant, in such areas as metaphysics, theory of knowledge, ethics. May be repeated for credit with consent of instructor. Effective: 2000 Winter Quarter.

PHI 290—History of Philosophy (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Topics in the history of philosophy. Topics vary according to instructor from quarter to quarter. May be repeated for credit when topic differs and with consent of instructor. Effective: 2001 Winter Quarter.

PHI 298—Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Effective: 1997 Winter Quarter.

PHI 299—Research (1-12)
Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

PHI 396—Teaching Assistant Training Practicum (1-4)
Variable. Prerequisite(s): Graduate standing. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

Physical Education

Physical Education | Physical Education Information
(College of Letters and Science)
Barbara Jahn, M.S., Program Director

Program Office. 264 Hickey Gymnasium; 530-752-1111

Faculty. http://pe.ucdavis.edu/faculty-and-staff

The Program of Study
The Program in Physical Education facilitates the development and offering of non-major courses related to physical activities and education, fitness and health, athletic training, teacher education, and organized sport. The Program is available as part of a student's general educational experience to enhance and broaden the understanding and experience of physical activity in the maintenance of lifetime health and fitness.

The basic activities series includes Physical Education 1, fitness, lifetime, and sports skills. The PE 1 activity courses are instructional in nature, designed to introduce new skills to beginners or to improve existing skills. Physical Education 6 is offered for students participating in intercollegiate athletics. Additional lower division courses include those in special skill areas, such as life-saving and water safety, health and fitness, and athletic training. Upper division courses include advanced classes in coaching, and sociology of sports.
Class and Recreational Use of Facilities. The incidental fee payable by all students at the time of registration entitles students to the use of the gymnasium, pool, showers, tennis courts, and athletic fields. Fines are imposed for each formal transaction necessitated by failure of the student to comply with the regulations of the program.

Physical Education | PHE Courses

Courses in PHE:

**PHE 001—Physical Activities (0.5)**
Laboratory—2 hours. Physical Education Activity classes offered in the following areas: aquatics, personal fitness, martial arts, individual sports, and team sports. These academic classes are instructional rather than recreational and are intended to improve activity specific skills and knowledge. May be repeated up to 6 unit(s) along with PHE 6, for a combined total of 6 units. Credit limited to 6 units in combination with PHE 006. (P/NP grading only.) Effective: 2016 Winter Quarter.

**PHE 001A—Physical Activity-Archery (0.5)**
Laboratory—2 hours. Physical Education Activity classes in Archery. The academic classes are instructional rather than recreational and are intended to improve activity specific skills and knowledge. May be repeated up to 6 unit(s) along with course 6, for a combination total of 6 units. Credit limited to 6 units in combination with PHE 006. (P/NP grading only.) Effective: 2018 Fall Quarter.

**PHE 001AQ—Physical Activity-Aquatic Family (0.5)**
Laboratory—2 hours. Physical Education Activity classes in Aquatics. The academic classes are instructional rather than recreational and are intended to improve activity specific skills and knowledge. May be repeated up to 6 unit(s) along with course 6, for a combination total of 6 units. Credit limited to 6 units in combination with PHE 006. (P/NP grading only.) Effective: 2018 Fall Quarter.

**PHE 001F—Physical Activity-Fitness Family (0.5)**
Laboratory—2 hours. Physical Education Activity classes in personal fitness. The academic classes are instructional rather than recreational and are intended to improve activity specific skills and knowledge. May be repeated up to 6 unit(s) along with course 6, for a combination total of 6 units. Credit limited to 6 units in combination with PHE 006. (P/NP grading only.) Effective: 2018 Fall Quarter.

**PHE 001G—Physical Activity-Golf (0.5)**
Laboratory—2 hours. Physical Education Activity classes in Golf. These academic classes are instructional rather than recreational and are intended to improve activity specific skills and knowledge. May be repeated up to 6 unit(s) along with course 6, for a combination total of 6 units. Credit limited to 6 units in combination with PHE 006. (P/NP grading only.) Effective: 2018 Fall Quarter.

**PHE 001I—Physical Activity-Individual Sport Family (0.5)**
Laboratory—2 hours. Physical Education Activity classes in Individual Sports. The academic classes are instructional rather than recreational and are intended to improve activity specific skills and knowledge. May be repeated up to 6 unit(s) along with course 6, for a combination total of 6 units. Credit limited to 6 units in combination with PHE 006. (P/NP grading only.) Effective: 2018 Fall Quarter.

**PHE 001M—Physical Activity-Martial Arts Family (0.5)**
Laboratory—2 hours. Physical Education Activity classes in Martial Arts. The academic classes are instructional rather than recreational and are intended to improve activity specific skills and knowledge. May be repeated up to 6 unit(s) along with course 6, for a combination total of 6 units. Credit limited to 6 units in combination with PHE 006. (P/NP grading only.) Effective: 2018 Fall Quarter.

**PHE 001R—Physical Activity-Racquet Family (0.5)**
Laboratory—2 hours. Physical Education Activity classes in Racquet sports. The academic classes are instructional rather than recreational and are intended to improve activity specific skills and knowledge. May be repeated up to 6 unit(s) along with course 6, for a combination total of 6 units. Credit limited to 6 units in combination with PHE 006. (P/NP grading only.) Effective: 2018 Fall Quarter.

**PHE 001RC—Physical Activity-Rock Climbing (0.5)**
Laboratory—2 hours. Physical Education Activity classes in Rock Climbing. The academic classes are instructional rather than recreational and are intended to improve activity specific skills and knowledge. May be repeated up to 6 unit(s) along with course 6, for a combination total of 6 units. Credit limited to 6 units in combination with PHE 006. (P/NP grading only.) Effective: 2018 Fall Quarter.
PHE 001S—Physical Activity-Self Defense for Women (0.5)
Laboratory—2 hours. Physical Education Activity classes in Self Defense for Women. The academic classes are instructional rather than recreational and are intended to improve activity specific skills and knowledge. May be repeated up to 6 unit(s) along with course 6, for a combination total of 6 units. Credit limited to 6 units in combination with PHE 006. (P/NP grading only.) Effective: 2018 Fall Quarter.

PHE 001T—Physical Activity-Team Sports Family (0.5)
Laboratory—2 hours. Physical Education Activity classes in Team Sports. The academic classes are instructional rather than recreational and are intended to improve activity specific skills and knowledge. May be repeated up to 6 unit(s) along with course 6, for a combination total of 6 units. Credit limited to 6 units in combination with PHE 006. (P/NP grading only.) Effective: 2018 Fall Quarter.

PHE 006—Preparation and Participation in ICA Competition (1) Review all entries
Practice—3 hours. Prerequisite(s): Consent of instructor (head coach). Classes offered in all UC Davis intercollegiate athletic sports and are restricted to student-athletes who are members. May be repeated up to 6 unit(s), along with course 1, for a combined total of 6 units. (P/NP grading only.) Effective: 2018 Fall Quarter.

PHE 007—Professional Physical Education Activities: Men and Women (1) Review all entries
Laboratory—2 hours; Lecture—1 hour. Fundamental skills for: (a) coaching competitive athletics; (b) classroom teaching and coaching, and (c) classroom teaching and officiating. May be repeated up to 6 unit(s). Effective: 1997 Winter Quarter.

PHE 007—Professional Physical Education Activities: Men & Women/Coaching Leadership (1) Review all entries
Lecture—1 hour. Fundamental skills for: (a) coaching competitive athletics; (b) classroom teaching and coaching, and (c) classroom teaching and officiating. May be repeated up to 3 time(s) if taken with a different instructor. (P/NP grading only.) Effective: 2019 Spring Quarter.

PHE 008—Student-Athlete Life Skills (1)
Lecture—1 hour. Prerequisite(s): Consent of Instructor. Open to intercollegiate student-athletes only. For intercollegiate student-athletes. Balancing academic and athletic demands. Academic, psychological, and sociocultural issues which influence success as a college student-athlete. (P/NP grading only.) Effective: 2012 Fall Quarter.

PHE 015—Administration of Intramural Sports (2)
Lecture—2 hours. Planning and administering intramural sports programs at the high school and college level. Effective: 1997 Winter Quarter.

PHE 025—Theory of Lifesaving and Water Safety (2)
Laboratory—2 hours; Lecture—1 hour. Prerequisite(s): Sound physical condition, and no physical handicap that would render student unable to perform the required skills and ability to pass preliminary swimming test. Provides the student with the knowledge, organizational procedures, and skill development necessary to provide for water safety and save his/her own life or the life of another in an aquatic emergency. Effective: 1997 Winter Quarter.

PHE 027—Training Course for Water Safety Instructors (2)
Laboratory—2 hours; Lecture—1 hour. Prerequisite(s): PHE 001; Advanced swimming (PHE 001) or consent of instructor; and current Advanced Life-Saving Certificate. Theoretical knowledge and practical experience necessary for the organization and teaching of swimming and lifesaving classes. (American Red Cross Water Safety Instructors Certificate awarded upon successful completion of necessary requirements.) Effective: 1997 Winter Quarter.

PHE 040—Drugs and Society (2)
Fieldwork—2 hours; Film Viewing—5 hours; Lecture—2 hours. Pharmacology, methods of use, and effects of use of psychoactive and performance-enhancing drugs. Historical overview of drug use. Identification of behavior of at-risk and user populations. (P/NP grading only.) Effective: 1997 Winter Quarter.

</table>
of motor skills and motor learning principles applied to coaching. Classroom development of coaching skills and outside observations of coaching required. Effective: 2012 Spring Quarter.

**PHE 142—Physical Education in the Public Schools (3)**
Lecture—3 hours. Analysis and study of the principles and methods basic to teaching physical education at the elementary and secondary levels. Effective: 1997 Winter Quarter.

**PHE 143—Coaching Effectiveness (3)**
Lecture—3 hours. Prerequisite(s): Upper division standing; 3.0 units of PHE 001 and PHE 006 combined. Synthesis and application of basic components of sport psychology, sport pedagogy, and sport physiology and basic management and administration of athletics in public high schools. (P/NP grading only.) Effective: 1997 Winter Quarter.

**PHE 144—Principles of Health Education (2)**
Lecture—2 hours. Prerequisite(s): PHE 044; Upper division standing or consent of instructor. Principles of teaching health education in the public schools. (P/NP grading only.) Effective: 1997 Winter Quarter.

**PHE 150—Recreation in the Community (3)**
Discussion—1 hour; Lecture—2 hours. The nature and scope of community recreation programs in California emphasizing low income, highly populated areas, and poor rural communities. Effective: 1997 Winter Quarter.

**PHE 192—Physical Education Internship (1-12)**
Internship—3-36 hours. Prerequisite(s): Upper division standing and consent of instructor; enrollment dependent on availability of intern positions, with priority given to Exercise Science majors. Work experience in the application of physical activity programs to teaching, recreational, clinical or research situations under department faculty supervision. May be repeated up to 12 unit(s) (including course 92) but no internship units will be counted toward Exercise Science major. (P/NP grading only.) Effective: 1997 Winter Quarter.

**PHE 197T—Tutoring in Physical Education (1-5)**
Tutorial—1-5 hours. Prerequisite(s): Consent of chairperson. Tutoring of students in lower division physical activity courses. Written reports on methods and materials required. May be repeated once for credit. May be repeated up to 1 time(s). (P/NP grading only.) Effective: 1997 Winter Quarter.

**PHE 197TC—Tutoring in the Community (1-5)**
Discussion—1 hour; Tutorial—2-15 hours. Prerequisite(s): Upper division standing and consent of Department Chairperson. Tutoring in the community in physical education related projects under the guidance of the Physical Education faculty. Regular meetings with instructor in charge and written report required. May be repeated once for credit. May be repeated up to 1 time(s). (P/NP grading only.) Effective: 1997 Winter Quarter.

**PHE 198—Directed Group Study (1-5)**
Variable. Prerequisite(s): Consent of instructor and Department Chairperson. (P/NP grading only.) Effective: 1997 Winter Quarter.

**PHE 199—Special Study for Advanced Undergraduates (1-5)**
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 2002 Fall Quarter.

**PHE 300—The Elementary Physical Education Program (2)**
Laboratory—2 hours; Lecture—1 hour. Prerequisite(s): Consent of Instructor. Restricted to senior standing or credential student. Introduction to principles, theories, material, and practices of elementary school physical education program. Effective: 2014 Spring Quarter.

**PHE 380—Methods of Teaching Physical Education (3)**
Laboratory—6 hours; Lecture—1 hour. Prerequisite(s): PHE 142; or Consent of Instructor. Six units of PHE 007. The methods of teaching group and individual activities for grades K-12; program planning, class management, organization, and evaluation. (P/NP grading only.) Effective: 1997 Winter Quarter.

**Physics**

**Physics | PHY Information**

(College of Letters and Science)

Robert Svoboda, Ph.D., Chairperson of the Department

Lori Lubin, Ph.D., Vice Chairperson of the Department (Administration and Undergraduate Matters)
The Major Program

From the smallest subatomic particles to atoms, molecules, stars, and galaxies, the study of physics is the study of what makes the universe work. Knowledge gained using atomic-scale microscopes and high-energy particle accelerators and nuclear reactors teaches us not only what holds the atomic nucleus together but also how proteins function and why stars shine.

**The Program.** The Department of Physics offers a Bachelor of Arts in Physics and two Bachelor of Science degree programs: in Physics (which also offers an emphasis in Astrophysics), and in Applied Physics. The A.B. degree provides a broad coverage of classical and modern physics while permitting a broader liberal arts education than is possible with the other two programs. The B.S. degree in either Physics or Applied Physics should be followed by the student who plans to enter physics as a profession, and also provides excellent training for a wide variety of technical career options. The B.S. in Applied Physics provides the student with a solid introduction to a particular applied physics specialty. For the student who plans to enter the job market upon completing a B.S. degree, the applied physics orientation would be an asset. Either B.S. program provides a solid foundation in physics for the student interested in graduate work in either pure or applied physics.

**Career Alternatives.** Careers in physics and applied physics include research and development, either in universities, government laboratories, or industry; teaching in high schools, junior colleges, and universities; management and administration in industrial laboratories and in government agencies; and in production and sales in industry. A major in physics also provides a strong base for graduate-level work in such interdisciplinary areas as chemical physics, biophysics and medical physics, geophysics and environmental physics, astrophysics and astronomy, computer science, and materials science.

**Program Variance.** Similar courses from other departments may be substituted for courses in the depth subject matter requirements by obtaining prior written permission from the Undergraduate Curriculum Committee Chairperson.

**Graduate Study.** The Department of Physics offers programs of study and research leading to the M.S. and Ph.D. degrees. Further information regarding requirements for these three degrees, graduate research, teaching assistantships, and research assistantships may be obtained by writing to the Chairperson, Department of Physics, One Shields Avenue, University of California, Davis, CA 95616.

**Astronomy.** In addition to the introductory Astronomy courses listed, upper division and graduate courses in Astronomy, Astrophysics and Cosmology are listed under Physics.

**Preparatory Subject Matter**

**Graduate Study.** The Department of Physics offers programs of study and research leading to the M.S. and Ph.D. degrees. Further information regarding requirements for these three degrees, graduate research, teaching assistantships, and research assistantships may be obtained by writing to the Chairperson, Department of Physics, One Shields Avenue, University of California, Davis, CA 95616.

**Physics | PHY Ph.D.**

*(College of Letters and Science)*

Robert Svoboda, Ph.D., Chairperson of the Department

Lori Lubin, Ph.D., Vice Chairperson of the Department (Administration and Undergraduate Matters)
Graduate Study. The Department of Physics offers programs of study and research leading to the M.S. and Ph.D. degrees. Further information regarding requirements for these three degrees, graduate research, teaching assistantships, and research assistantships may be obtained by writing to the Chairperson, Department of Physics, One Shields Avenue, University of California, Davis, CA 95616.

Physics | PHY Minor
(College of Letters and Science)
Robert Svoboda, Ph.D., Chairperson of the Department
Lori Lubin, Ph.D., Vice Chairperson of the Department (Administration and Undergraduate Matters)
Rajiv Singh, Ph.D., Vice Chairperson of the Department (Graduate Matters)

Department Office. 174 Physics Building; 530-752-1500; http://www.physics.ucdavis.edu
Faculty. http://physics.ucdavis.edu/people/faculty

All courses in the minor have prerequisites equivalent to MAT 021A-021B-021C-021D and 022A-022B and PHY 009A-009B-009C-009D. Students considering the possibility of a minor should consult with a Physics major advisor before beginning course work in the minor program.

Physics | PHY Courses

Choose at least six upper division courses in Physics; excluding:

- PHY 160 Environmental Physics and Society 3
- PHY 197T Tutoring in Physics and Astronomy 1-5
- PHY 199 Special Study for Advanced Undergraduates 1-5

Total: 24
Physics 007B without first taking Physics 007A. All other situations should be discussed directly with a Physics 007 instructor.

Students not intending to take the entire sequence should instead take Physics 001.

**Physics 009** is a four-quarter sequence using calculus throughout and including laboratory work as an integral component. The course is primarily for students in the physical sciences and engineering.

**Physics 009H** is a five-quarter honors physics sequence, which may be taken instead of Physics 009. It is intended primarily for first-year students with a strong interest in physics and with advanced placement in mathematics to Mathematics 021B. Students who plan to major in physics, and also motivated non-majors, should take Physics 009H instead of Physics 009 if they are ready to begin Mathematics 021B in fall quarter. In course requirements and prerequisites, Physics 009HA-009HE can be substituted for Physics 009A-009D. Students may not switch between the 009H and 009 series beyond 009HA or 009A.

**Physics 010** is primarily a concept-oriented one-quarter lecture/discussion course requiring relatively little mathematical background.

**Courses in PHY:**

**PHY 001A—Principles of Physics (3)**
Lecture—3 hours. Prerequisite(s): Trigonometry or consent of instructor. Mechanics. Introduction to general principles and analytical methods used in physics with emphasis on applications in applied agricultural and biological sciences and in physical education. Not open to students who have received credit for PHY 007B or PHY 009A. GE credit: SE. Effective: 1997 Winter Quarter.

**PHY 001B—Principles of Physics (3)**
Lecture—3 hours. Prerequisite(s): PHY 001A or PHY 009A Not open for credit to students who have received credit for course 7A, 7B, 7C, 9B, 9C, or 9D. Continuation of course 1A. Heat, optics, electricity, modern physics. Not open for credit to students who have received credit for course 7A, 7B, 7C, 9B, 9C, or 9D. GE credit: SE. Effective: 1997 Winter Quarter.

**PHY 007A—General Physics (4)**
Discussion/Laboratory—5 hours; Lecture—1.5 hours. Prerequisite(s): MAT 016B (can be concurrent) or MAT 017B (can be concurrent) or MAT 021B (can be concurrent); Completion or concurrent enrollment in MAT 016B or MAT 017B or MAT 021B. Introduction to general principles and analytical methods used in physics for students majoring in a biological science. Only two units of credit allowed to students who have completed PHY 001B or PHY 009B. GE credit: SE. Effective: 2010 Winter Quarter.

**PHY 007B—General Physics (4)**
Discussion/Laboratory—5 hours; Lecture—1.5 hours. Prerequisite(s): PHY 007A Continuation of course 7A. Only two units of credit allowed to students who have completed course 9A, or 1A. GE credit: SE. Effective: 1997 Winter Quarter.

**PHY 007C—General Physics (4)**
Discussion/Laboratory—5 hours; Lecture—1.5 hours. Prerequisite(s): PHY 007B Continuation of course 7B. Only two units of credit allowed to students who have completed course 9C or 5C. GE credit: SE. Effective: 1997 Winter Quarter.

**PHY 009A—Classical Physics (5)**
Discussion—1 hour; Laboratory—2.5 hours; Lecture—3 hours. Prerequisite(s): MAT 021B; MAT 021M Introduction to general principles and analytical methods used in physics for physical science and engineering majors. Classical mechanics. Only 2 units of credit for students who have completed 1A or 7B. Not open for credit to students who have completed course 9HA. GE credit: SE. Effective: 2018 Winter Quarter.

**PHY 009A—Classical Physics (5)**
Discussion—1 hour; Laboratory—2.5 hours; Lecture—3 hours. Prerequisite(s): MAT 021B or MAT 021M; or Consent of Instructor. Introduction to general principles and analytical methods used in physics for physical science and engineering majors. Classical mechanics. Only 2 units of credit for students who have completed PHY 001A or PHY 007B; not open for credit to students who have completed course PHY 009HA. GE credit: SE. Effective: 2018 Summer Session 1.

**PHY 009B—Classical Physics (5)**
Discussion—1 hour; Laboratory—2.5 hours; Lecture—3 hours. Prerequisite(s): PHY 009A; MAT 021C; MAT 021D (can...
be concurrent) Continuation of course 9A. Fluid mechanics, thermodynamics, wave phenomena, optics. Only two units of credit for students who have completed PHY 007A; not open for credit to students who have completed PHY 009HB, PHY 009HC, or ENG 105. GE credit: SE. Effective: 2004 Fall Quarter.

PHY 009C—Classical Physics (5)
Discussion—1 hour; Laboratory—2.5 hours; Lecture—3 hours. Prerequisite(s): PHY 009B; MAT 021D; MAT 022A (can be concurrent) Electricity and magnetism including circuits and Maxwell’s equations. Only 3 units of credit for students who have completed PHY 007C; not open for credit to students who have completed PHY 009HD. GE credit: SE. Effective: 2005 Winter Quarter.

PHY 009D—Modern Physics (4)
Discussion—1.5 hours; Lecture—3 hours. Prerequisite(s): PHY 009C; MAT 022A; MAT 022B recommended (may be taken concurrently). Not open for credit to students who have completed course 9HB, 9HC, or 9HE. Introduction to physics concepts developed since 1900. Special relativity, quantum mechanics, atoms, molecules, condensed matter, nuclear and particle physics. Not open for credit to students who have completed course 9HB, 9HC, or 9HE. GE credit: SE. Effective: 1999 Spring Quarter.

PHY 009HA—Honors Physics (5)
Discussion/Laboratory—4 hours; Lecture—3 hours. Prerequisite(s): MAT 021B (can be concurrent); or Consent of Instructor. Classical mechanics. Same material as course 9A in greater depth. For students in physical sciences, mathematics, and engineering. Only 2 units of credit for students who have completed PHY 007A; not open for credit to students who have completed PHY 009A. GE credit: SE. Effective: 2003 Fall Quarter.

PHY 009HB—Honors Physics (5)
Discussion/Laboratory—4 hours; Lecture—3 hours. Prerequisite(s): (PHY 009HA or PHY 009A); MAT 021C (can be concurrent) Special relativity, thermal physics. Continuation of course 9HA. Only 2 units of credit for students who have completed PHY 007C; not open for credit to students who have completed PHY 009B or PHY 009D. GE credit: SE. Effective: 2004 Winter Quarter.

PHY 009HC—Honors Physics (5)
Discussion/Laboratory—4 hours; Lecture—3 hours. Prerequisite(s): PHY 009HB; MAT 021D (can be concurrent) Waves, sound, optics, quantum physics. Continuation of Physics 9HB. Only 2 units of credit for students who have completed PHY 007C; not open for credit to students who have completed PHY 009B or PHY 009D. GE credit: SE. Effective: 2004 Winter Quarter.

PHY 009HD—Honors Physics (5)
Discussion/Laboratory—4 hours; Lecture—3 hours. Prerequisite(s): PHY 009HC; MAT 021D Electricity and magnetism. Continuation of Physics 9HC. Not open for credit to students who have completed PHY 009C. GE credit: SE. Effective: 2003 Fall Quarter.

PHY 009HE—Honors Physics (5)
Discussion/Laboratory—4 hours; Lecture—3 hours. Prerequisite(s): PHY 009HD; MAT 022B (can be concurrent) Application of quantum mechanics. Not open for credit to students who have completed PHY 009D. GE credit: SE. Effective: 2004 Winter Quarter.

PHY 010—Topics in Physics for Nonscientists (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): High school algebra. Emphasis varies: survey of basic principles or a deeper exploration of some particular branch. Past topics included black holes, space time, and relativity; physics of music; history and philosophy; energy and the environment; and natural phenomena. No units of credit allowed if taken after any other PHY course. GE credit: SE. Effective: 1997 Winter Quarter.

PHY 010C—Physics of California (3)
Lecture—3 hours. Atmospheric phenomena common in CA, local weather patterns and microclimates. Applications to CA energy, water, and resource management policies. Physics underlying regional sports in CA. Not open for credit to students who have completed any quarter of PHY 009 or PHY 009H, or any upper division PHY course. GE credit: SE, SL, VL. Effective: 2014 Fall Quarter.

PHY 010CY—Physics of California (3)
Discussion—1.5 hours; Web Electronic Discussion—0.5 hours; Web Virtual Lecture—1 hour. Conceptual understanding of the physics underlying regional sports in CA. Focus on skiing, surfing, and scuba diving. Atmospheric phenomena common in CA, local weather patterns and microclimates, applications to CA energy, and water are also discussed. Not open for credit to students who have completed PHY 010C, any quarter of PHY 09A,
PHY 009B, PHY 009C, PHY 009D, PHY 009HA, PHY 009HB, PHY 009HC, PHY 009HD, or PHY 009HE, or any upper division PHY course. GE credit: SE, SL, VL. Effective: 2017 Winter Quarter.

PHY 012—Visualization in Science (3)
Lecture—3 hours. Production, interpretation, and use of images in physics, astronomy, biology, and chemistry as scientific evidence and for communication of research results. GE credit: SE, SL, VL. Effective: 2017 Winter Quarter.

PHY 030—Fractals, Chaos and Complexity (3)
Lecture/Discussion—3 hours. Prerequisite(s): MAT 016A or MAT 021A Modern ideas about the unifying ideas of fractal geometry, chaos and complexity. Basic theory and applications with examples from physics, earth sciences, mathematics, population dynamics, ecology, history, economics, biology, computer science, art and architecture. (Same course as GEL 030.) GE credit: QL, SE. Effective: 2010 Winter Quarter.

PHY 040—Introduction to Physics Computation (4)
Laboratory—4 hours; Lecture—2 hours. Introduction to programming using C++ with examples from computational physics. Introduction to modern tools used for scientific analysis, including Scientific computing with Python. GE credit: SE. Effective: 2018 Summer Session 2.

PHY 049—Supplementary Work in Lower Division Physics (1-3)
Variable. Students with partial credit in lower division physics courses may, with consent of instructor, complete the credit under this heading. May be repeated for credit. May be repeated for credit. GE credit: SE. Effective: 1999 Fall Quarter.

PHY 080—Experimental Techniques (4)
Laboratory—5 hours; Lecture—2 hours. Prerequisite(s): PHY 009D or PHY 009HD Open to Physics and Applied Physics majors only. Experimental techniques. Design of circuits. Data analysis, sources of noise, statistical and systematic uncertainties. Light sources, detection, and measurement in basic optical systems. Effective: 2017 Fall Quarter.

PHY 090X—Lower Division Seminar (2)
Seminar—2 hours. Prerequisite(s): Consent of Instructor. Lower division standing. Limited enrollment. Examination of a special topic in Physics through shared readings, discussions, written assignments, or special activities such as laboratory work. May be repeated for credit. GE credit: SE. Effective: 1998 Fall Quarter.

PHY 098—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Primary for lower division students. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

PHY 099—Special Study for Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

PHY 102—Computational Laboratory in Physics (1)
Laboratory—4 hours. Prerequisite(s): MAT 021D; ECS 030; (PHY 009D or PHY 009HD); PHY 104A (can be concurrent); MAT 22AB; PHY 104A required concurrently. Introduction to computational resources in the physics department. Preparation for brief programming assignments required in other upper division physics classes. Not open to students who have completed PHY 104B or PHY 105AL. GE credit: SE. Effective: 2008 Summer Session 1.

PHY 104A—Introductory Methods of Mathematical Physics (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): (PHY 009B C- or better, PHY 009C C- or better, PHY 009D C- or better); (MAT 021D C- or better, MAT 022A C- or better, MAT 022B C- or better); or Consent of Instructor. Introduction to the mathematics used in upper-division physics courses, including applications of vector spaces, Fourier analysis, partial differential equations. Effective: 2000 Fall Quarter.

PHY 104B—Computational Methods of Mathematical Physics (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): PHY 104A C- or better; PHY 105AL; or Consent of Instructor. Introduction to the use of computational techniques to solve the mathematical problems that arise in advanced physics courses, complementing the analytical approaches emphasized in course 104A. GE credit: SE. Effective: 2000 Fall Quarter.

PHY 104C—Intermediate Methods of Mathematical Physics (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): PHY 104A C- or better; or Consent of Instructor. Applications of complex analysis, conditional probability, integral transformations and other advanced topics. Effective: 2000 Fall Quarter.
PHY 105A—Analytical Mechanics (4)
Lecture—3 hours. Prerequisite(s): (PHY 009B C or better, PHY 009C C or better, PHY 009D C or better); (MAT 021D C or better, MAT 022A C or better, MAT 022B C or better); Or consent of department for any of the courses. Principles and applications of Newtonian mechanics; introduction to Lagrange’s and Hamilton’s equations GE credit: SE. Effective: 1999 Fall Quarter.

PHY 105B—Analytical Mechanics (4)
Lecture—3 hours. Prerequisite(s): PHY 104A C or better; PHY 105A C or better; Or consent of department for any of the courses. Principles and applications of Newtonian mechanics; introduction to Lagrange's and Hamilton's equations GE credit: SE. Effective: 1999 Fall Quarter.

PHY 105C—Continuum Mechanics (4)
Lecture—3 hours. Prerequisite(s): PHY 104A C- or better; PHY 105A C- or better; or Consent of Instructor. The continuum hypothesis and limitations, tensors, isotropic constitutive equations, and wave propagation. Applications such as elastic solids, heat flow, aerodynamics, and ocean waves. GE credit: SE. Effective: 2006 Spring Quarter.

PHY 108—Optics (3)
Lecture—3 hours. Prerequisite(s): ((PHY 009A, PHY 009B, PHY 009C, PHY 009D) or (PHY 007A, PHY 007B, PHY 007C)); (MAT 021A, MAT 021B, MAT 021C, MAT 021D); or Consent of Instructor. The phenomena of diffraction, interference, and polarization of light, with applications to current problems in astrophysics, material science, and atmospheric science. Study of modern optical instrumentation. Open to non-majors. GE credit: SE. Effective: 1997 Winter Quarter.

PHY 108L—Optics Laboratory (1)
Laboratory—3 hours. Prerequisite(s): PHY 108 (can be concurrent); PHY 108 required concurrently. The laboratory will consist of one major project pursued throughout the quarter, based on modern applications of optical techniques. GE credit: SE. Effective: 1997 Winter Quarter.

PHY 110A—Electricity and Magnetism (4) Review all entries
Lecture—3 hours. Prerequisite(s): PHY 009B C- or better; PHY 009C C- or better; PHY 009D C- or better; MAT 021D C- or better; MAT 022A C- or better; MAT 022B C- or better; PHY 104A; PHY 105A; Or consent of department. Theory of electrostatics, electromagnetism, Maxwell's equations, electromagnetic waves. GE credit: SE. Effective: 2018 Winter Quarter.

PHY 110A—Electricity & Magnetism (4) Review all entries
Lecture—3 hours. Prerequisite(s): (PHY 009B C- or better, PHY 009C C- or better, PHY 009D C- or better) or (PHY 009HB C- or better, PHY 009HC C- or better, PHY 009HD C- or better, PHY 009HE C- or better); MAT 021D C- or better; MAT 022A C- or better; MAT 022B C- or better; PHY 104A; PHY 105A; or consent of department. Theory of electrostatics, electromagnetism, Maxwell's equations, electromagnetic waves. GE credit: SE. Effective: 2019 Spring Quarter.

PHY 110B—Electricity and Magnetism (4)
Lecture—3 hours. Prerequisite(s): PHY 110A C- or better; PHY 104A C- or better; Or consent of department. Theory of electrostatics, electromagnetism, Maxwell's equations, electromagnetic waves. GE credit: SE. Effective: 2010 Winter Quarter.

PHY 110C—Electricity and Magnetism (4)
Lecture—3 hours. Prerequisite(s): PHY 110B C- or better; Or consent of department. Theory of electrostatics, electromagnetism, Maxwell's equations, electromagnetic waves. GE credit: SE. Effective: 2010 Winter Quarter.

PHY 112—Thermodynamics and Statistical Mechanics (4)
Lecture—3 hours. Prerequisite(s): PHY 115A; Or the equivalent. Introduction to classical and quantum statistical mechanics and their connections with thermodynamics. The theory is developed for the ideal gas model and simple magnetic models and then extended to studies of solids, quantum fluids, and chemical equilibria. GE credit: SE. Effective: 2000 Winter Quarter.

PHY 115A—Foundation of Quantum Mechanics (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): PHY 104A C- or better; PHY 105A C- or better; Or consent of department. Introduction to the methods of quantum mechanics with applications to atomic, molecular, solid state, nuclear and elementary particle physics. Extensive problem solving. GE credit: SE. Effective: 2007 Winter Quarter.

PHY 115B—Applications of Quantum Mechanics (4)
Lecture—3 hours. Prerequisite(s): PHY 115A C- or better; Or consent of department. Angular momentum and spin;
hydrogen atom and atomic spectra; perturbation theory; scattering theory. GE credit: SE. Effective: 1999 Fall Quarter.

**PHY 116A—Electronic Instrumentation (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): PHY 009C; MAT 022B; or Consent of Instructor. Experimental and theoretical study of important analog electronic circuits. Linear circuits, transmission lines, input impedance, feedback, amplifiers, oscillators, noise. GE credit: SE, VL. Effective: 2008 Fall Quarter.

**PHY 116B—Electronic Instrumentation (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): PHY 009C or PHY 009HD; or Consent of Instructor. Continuation of course 116A. Introduction to the use of digital electronics and microcomputers in experimental physics. Nonlinear electronics, integrated circuits, analog-to-digital and digital-to-analog converters, transducers, actuators. GE credit: SE. Effective: 2008 Spring Quarter.

**PHY 116C—Introduction to Computer-Based Experiments in Physics (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): (PHY 009D or PHY 009HD); PHY 116B; MAT 022B; or Consent of Instructor. Introduction to techniques for making physical measurements using computer-based instrumentation. GE credit: SE, VL. Effective: 2004 Spring Quarter.

**PHY 122A—Advanced Laboratory in Condensed Matter Physics (4)**
Laboratory—8 hours. Prerequisite(s): PHY 104A; PHY 105A; PHY 110B; PHY 115A; PHY 112 (can be concurrent); Or consent of the department. Registration by Permission to Add (PTA) number only; priority given to graduating PHY and APP majors. Experimental techniques and measurements in solid-state physics. Student performs three to six experiments depending on difficulty. Individual work is stressed. Thorough write-ups of the experiments are required. GE credit: SE, WE. Effective: 2019 Winter Quarter.

**PHY 122B—Advanced Laboratory in Particle Physics (4)**
Laboratory—8 hours. Prerequisite(s): PHY 104A; PHY 105A; PHY 110B; PHY 115A; PHY 112 (can be concurrent); PHY 080; Or consent of the department. Registration by Permission to Add (PTA) number only; priority given to graduating PHY and APP majors. Experimental techniques and measurements in nuclear and particle physics. Students perform three to six experiments depending on difficulty. Individual work is stressed. Thorough write-ups of the experiments are required. GE credit: SE, WE. Effective: 2019 Winter Quarter.

**PHY 129A—Introduction to Nuclear Physics (4)**
Lecture—3 hours. Prerequisite(s): PHY 115A C or better; or Consent of Instructor. Survey of basic nuclear properties and concepts requiring introductory knowledge of quantum mechanics: nuclear models and forces, radioactive decay and detecting nuclear radiation and nuclear reaction products, alpha, beta and gamma decay. GE credit: SE. Effective: 2000 Winter Quarter.

**PHY 129B—Nuclear Physics, Extensions and Applications (4)**
Lecture—3 hours; Term Paper. Prerequisite(s): PHY 129A Continuation of course 129A. Nuclear reactions, neutrons, fission, fusion accelerators, introduction to meson and particle physics, nuclear astrophysics, and applications of...
nuclear physics and techniques to mass spectrometry, nuclear medicine, trace element analysis. GE credit: SE. Effective: 1997 Winter Quarter.

PHY 130A—Elementary Particle Physics (4)
Lecture—3 hours. Prerequisite(s): PHY 115A C- or better; or Consent of Instructor. Properties and classification of elementary particles and their interactions. Experimental techniques. Conservation laws and symmetries. Strong, electromagnetic, and weak interactions. Introduction to Feynman calculus. GE credit: SE. Effective: 2000 Winter Quarter.

PHY 130B—Elementary Particle Physics (4)
Lecture—3 hours. Prerequisite(s): PHY 115A C- or better; or Consent of Instructor. Properties and classification of elementary particles and their interactions. Experimental techniques. Conservation laws and symmetries. Strong, electromagnetic, and weak interactions. Introduction to Feynman calculus. GE credit: SE. Effective: 2000 Winter Quarter.

PHY 140A—Introduction to Solid State Physics (4)
Lecture—3 hours. Prerequisite(s): PHY 115A C- or better; or Consent of Instructor. Or equivalent course passed with C- or better. Survey of fundamental ideas in the physics of solids, with selected device applications. Crystal structure, x-ray and neutron diffraction, phonons, simple metals, energy bands and Fermi surfaces, semiconductors, optical properties, magnetism, superconductivity. GE credit: SE. Effective: 2000 Winter Quarter.

PHY 140B—Introduction to Solid State Physics (4)
Lecture—3 hours. Prerequisite(s): PHY 115A C- or better; or Consent of Instructor. Or equivalent course passed with C- or better. Survey of fundamental ideas in the physics of solids, with selected device applications. Crystal structure, x-ray and neutron diffraction, phonons, simple metals, energy bands and Fermi surfaces, semiconductors, optical properties, magnetism, superconductivity. GE credit: SE. Effective: 2000 Winter Quarter.

PHY 150—Special Topics in Physics (4)
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): (PHY 009A, PHY 009B, PHY 009C, PHY 009D) or (PHY 009HA, PHY 009HB, PHY 009HC, PHY 009HD, PHY 009HE); or Consent of Instructor. Topics vary, covering areas of contemporary research in physics. May be repeated for credit. GE credit: SE. Effective: 2007 Fall Quarter.

PHY 151—Stellar Structure and Evolution (4)
Lecture—3 hours; Project (Term Project). Prerequisite(s): PHY 009A; PHY 009B; PHY 009C; PHY 009D; or Consent of Instructor. The chemical composition, structure, energy sources and evolutionary history of stars, with equal emphasis on both the observational data and theoretical models, including black holes, neutron stars and white dwarfs and the formation of substellar masses. GE credit: SE. Effective: 2007 Fall Quarter.

PHY 152—Galactic Structure and the Interstellar Medium (4)
Lecture—3 hours; Project (Term Project). Prerequisite(s): PHY 009A; PHY 009B; PHY 009C; PHY 009D; PHY 105A (can be concurrent); or Consent of Instructor. PHY 105A required concurrently. The structure, contents, and formation of our Milky Way galaxy, viz. its shape and size, the nature of the interstellar medium, stellar populations, rotation curves, mass determination and evidence of dark matter. GE credit: SE. Effective: 2007 Spring Quarter.

PHY 153—Extragalactic Astrophysics (4)
Lecture—3 hours; Project (Term Project). Prerequisite(s): PHY 009A; PHY 009B; PHY 009C; PHY 009D; PHY 104A; PHY 105A; or Consent of Instructor. Structure and evolution of galaxies and clusters of galaxies, including distance and mass determination, galaxy types and environments, active galactic nuclei and quasars, gravitational lensing and dark matter, global cosmological properties. Not open to students who have taken PHY 127. GE credit: SE. Effective: 2007 Winter Quarter.

PHY 154—Astrophysical Applications of Physics (4)
Lecture—3 hours; Project (Term Project). Prerequisite(s): PHY 105A; PHY 105B; PHY 110B (can be concurrent); PHY 115A (can be concurrent); PHY 112; PHY 112 or consent of instructor; PHY 110B and 115A required concurrently. Not open to students who have taken this course previously as course 198. Applications of classical and quantum mechanics, thermodynamics, statistical mechanics, and electricity and magnetism to astrophysical settings such as the Big Bang, degenerate white dwarf and neutron stars, and solar neutrinos. GE credit: SE. Effective: 2007 Spring Quarter.

PHY 155—General Relativity (4)
Lecture—3 hours; Project (Term Project). Prerequisite(s): PHY 104A; PHY 105A; PHY 105B; PHY 110A; PHY 105B and PHY 110A or consent of instructor. Definition of the mathematical frame work for the description of the gravitational...
field, introduction of the dynamical equations of Einstein governing its evolution and review of the key solutions, including black holes and expanding universes. GE credit: SE. Effective: 2007 Fall Quarter.

**PHY 156—Introduction to Cosmology (4)**
Lecture—3 hours; Project (Term Project). Prerequisite(s): PHY 009A; PHY 009B; PHY 009C; PHY 009D; PHY 105A (can be concurrent); or Consent of Instructor. PHY 105A required concurrently. Contemporary knowledge regarding the origin of the universe, including the Big Bang and nucleosynthesis, microwave background radiation, formation of cosmic structure, cosmic inflation, cosmic acceleration and dark energy. Not open to students who have completed PHY 126. GE credit: SE. Effective: 2007 Fall Quarter.

**PHY 157—Astronomy Instrumentation and Data Analysis Laboratory (4) Review all entries**
Laboratory—8 hours. Prerequisite(s): PHY 104A; PHY 105A; PHY 110A; PHY 115A (can be concurrent); PHY 110B (can be concurrent); and Consent of Instructor. Registration by Permission to Add (PTA) number only; priority given to graduating PHY astrophysics emphasis seniors. Experimental techniques, data acquisition and analysis involving laboratory astrophysics plus stellar, nebular and galaxy digital imaging, photometry and/or spectroscopy. Students perform three experiments. Individual work stressed. Minimum 10-15 page journal style articles of two experiments are required. GE credit: SE, WE. Effective: 2018 Winter Quarter.

**PHY 157—Astronomy Instrumentation & Data Analysis Laboratory (4) Review all entries**
Laboratory—8 hours. Prerequisite(s): PHY 080; PHY 104A; PHY 105A; PHY 110A; PHY 110B (can be concurrent); PHY 115A (can be concurrent); and consent of department. Registration by Permission to Add (PTA) number only; priority given to graduating PHY astrophysics emphasis seniors. Experimental techniques, data acquisition and analysis involving laboratory astrophysics plus stellar, nebular and galaxy digital imaging, photometry and/or spectroscopy. Students perform three experiments. Individual work stressed. Minimum 10-15 page journal style articles of two experiments are required. GE credit: SE, WE. Effective: 2020 Winter Quarter.

**PHY 160—Environmental Physics and Society (3)**
Lecture—3 hours. Prerequisite(s): (PHY 009D or PHY 007C); (PHY 010 or PHY 001B); MAT 016B; Or the equivalent. Impact of humankind on the environment will be discussed from the point of view of the physical sciences. Calculations based on physical principles will be made, and the resulting policy implications will be considered. (Same course as ENG 160.) GE credit: SE, SL. Effective: 1997 Winter Quarter.

**PHY 185—Alumni Seminar Series (1)**
Seminar—1 hour. Weekly guest speakers (usually a physics alumnus or alumna) tell students about their careers. Speakers use their experience to give students valuable perspectives on life after a degree in physics. May be repeated up to 2 time(s). (P/NP grading only.) GE credit: SE. Effective: 2013 Fall Quarter.

**PHY 190—Careers in Physics (1)**
Seminar—2 hours. Restricted to Physics and Applied Physics majors only. Overview of important research areas in physics, discussions of research opportunities and internships, strategies for graduate school and industrial careers, the fellowship and assistantship selection process, preparation of resumes, personal statements, and letters of recommendation. (P/NP grading only.) GE credit: SE. Effective: 2007 Fall Quarter.

**PHY 192—Internship in Physics (1-12)**
Internship—3-36 hours. Prerequisite(s): consent of instructor/Physics Internship Director. Enrollment dependent on availability of intern positions; open to Physics majors only. Supervised work experience requiring the application of physics principles and techniques in a professional setting, including but not limited to industry and national laboratories. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 2019 Fall Quarter.

**PHY 194HA—Special Study for Honors Students (4)**
Independent Study—12 hours. Prerequisite(s): Consent of Instructor. Open only to Physics and Applied Physics majors who satisfy the College of Letters and Science requirements for entrance into the Honors Program. Independent research project at a level significantly beyond that defined by the normal physics curriculum. GE credit: SE. Effective: 1997 Winter Quarter.

**PHY 194HB—Special Study for Honors Students (4)**
Independent Study—12 hours. Prerequisite(s): Consent of Instructor. Open only to Physics and Applied Physics majors who satisfy the College of Letters and Science requirements for entrance into the Honors Program. Independent research project at a level significantly beyond that defined by the normal physics curriculum. GE credit: SE. Effective: 1997 Winter Quarter.

**PHY 195—Senior Thesis (5)**
Independent Study—15 hours. Prerequisite(s): Consent of Instructor. Open only to Physics and Applied Physics
majors with senior standing. Preparation of a senior thesis on a topic selected by the student with approval of the department. May be repeated for a total of 15 units. May be repeated up to 15 unit(s). GE credit: SE. Effective: 1997 Winter Quarter.

**PHY 197T—Tutoring in Physics and Astronomy (1-5)**
Tutorial. Tutoring of students in lower division courses. Leading of small voluntary discussion groups affiliated with one of the department's regular courses. Weekly meeting with instructor (P/NP grading only.) GE credit: SE. Effective: 2004 Spring Quarter.

**PHY 198—Directed Group Study (1-5)**
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

**PHY 199—Special Study for Advanced Undergraduates (1-5)**
Variable. June 2012: GE2 Topical Breadth updated per Davis Division of the Academic Senate May 18th announcement of an administrative correction “To allow Topical Breadth designations of GE3 to apply to GE2.” (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

**PHY 200A—Theory of Mechanics and Electromagnetics (4)**
Independent Study—1 hour; Lecture—3 hours. Prerequisite(s): PHY 204A (can be concurrent); PHY 104B; PHY 105B; PHY 110C; Or equivalent to PHY 110C; PHY 204A required concurrently. Theoretical approaches in classical mechanics including the use of generalized coordinates and virtual work; variational calculus; Lagrange equations; symmetries, conservation laws, and Noether theorem; Lagrangian density; Hamilton formalism; canonical transformations; Poisson brackets; and Hamilton-Jacobi equations. Effective: 1997 Winter Quarter.

**PHY 200B—Theory of Mechanics and Electromagnetics (4)**
Independent Study—1 hour; Lecture—3 hours. Prerequisite(s): PHY 200A; PHY 204B (can be concurrent); PHY 204B concurrently. Theoretical approaches in electrodynamics including static electromagnetic fields; Maxwell's equations; plane waves in various media; magnetohydrodynamics; diffraction theory; radiating systems; and special relativity. Effective: 1997 Winter Quarter.

**PHY 200C—Theory of Mechanics and Electromagnetics (4)**
Independent Study—1 hour; Lecture—3 hours. Prerequisite(s): PHY 200A; PHY 204B (can be concurrent); PHY 204B concurrently. Theoretical approaches in electrodynamics including static electromagnetic fields; Maxwell's equations; plane waves in various media; magnetohydrodynamics; diffraction theory; radiating systems; and special relativity. Effective: 1997 Winter Quarter.

**PHY 204A—Methods of Mathematical Physics (4)**
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): PHY 104A; Or the equivalent. Linear vector spaces, operators and their spectral analysis, complete sets of functions, complex variables, functional analysis, Greens functions, calculus of variations, introduction to numerical analysis. Effective: 2016 Spring Quarter.

**PHY 204B—Methods of Mathematical Physics (4)**
Independent Study—1 hour; Lecture—3 hours. Prerequisite(s): PHY 104A; PHY 104B; Or the equivalent. Linear vector spaces, operators and their spectral analysis, complete sets of functions, complex variables, functional analysis, Green's functions, calculus of variations, introduction to numerical analysis. Effective: 1997 Winter Quarter.

**PHY 210—Computational Physics (3)**
Lecture—3 hours. Prerequisite(s): Knowledge of Fortran or C. Analytic techniques to solve differential equations and eignvalue problems. Physics content of course will be self-contained, and adjusted according to background of students. Effective: 1999 Spring Quarter.

**PHY 215A—Quantum Mechanics (4)**
Independent Study—1 hour; Lecture—3 hours. Prerequisite(s): PHY 115B; Or the equivalent. Formal development and interpretation of non-relativistic quantum mechanics; its application to atomic, nuclear, molecular, and solid-state problems; brief introduction to relativistic quantum mechanics and the Dirac equation. Effective: 1997 Winter Quarter.

**PHY 215B—Quantum Mechanics (4)**
Independent Study—1 hour; Lecture—3 hours. Prerequisite(s): PHY 115B; Or the equivalent. Formal development and interpretation of non-relativistic quantum mechanics; its application to atomic, nuclear, molecular, and solid-state problems; brief introduction to relativistic quantum mechanics and the Dirac equation. Effective: 1997 Winter Quarter.
PHY 215C—Quantum Mechanics (4)
Independent Study—1 hour; Lecture—3 hours. Prerequisite(s): PHY 115B; Or the equivalent. Formal development
and interpretation of non-relativistic quantum mechanics; its application to atomic, nuclear, molecular, and solid-
state problems; brief introduction to relativistic quantum mechanics and the Dirac equation. Effective: 1997 Winter Quarter.

PHY 219A—Statistical Mechanics (4)
Extensive Problem Solving—1 hour; Lecture—3 hours. Prerequisite(s): PHY 215B; Or equivalent. Foundations of
thermodynamics and classical and quantum statistical mechanics with simple applications to properties of solids,
real gases, nuclear matter, etc. and a brief introduction to phase transitions. Effective: 2002 Winter Quarter.

PHY 219B—Statistical Mechanics (4)
Extensive Problem Solving—1 hour; Lecture—3 hours. Prerequisite(s): PHY 219A Further applications of
thermodynamics and classical and quantum statistical mechanics. The modern theory of fluctuations about the
equilibrium state, phase transitions and critical phenomena. Effective: 2002 Winter Quarter.

PHY 223A—Group Theoretical Methods of Physics-Condensed Matter (3)
Lecture—3 hours. Prerequisite(s): PHY 215A; PHY 215B; PHY 215C (can be concurrent); or Consent of Instructor.

PHY 223B—Group Theoretical Methods of Physics-Elementary Particles (3)
Lecture—3 hours. Prerequisite(s): PHY 215A; PHY 215B; PHY 215C (can be concurrent); or Consent of Instructor.
PHY 215C required concurrently. Theory of groups and their representations with applications in elementary

PHY 224A—Nuclear Physics (3)
Lecture—3 hours. Prerequisite(s): PHY 215B Comprehensive study of the nucleon-nucleon interaction including the
deuteron, nucleon-nucleon scattering, polarization, determination of real parameters of S-matrix, and related topics.
Effective: 1997 Winter Quarter.

PHY 224B—Nuclear Physics (3)
Lecture—3 hours. Prerequisite(s): PHY 224A Study of nuclear models, including shell model, collective model,

PHY 224C—Nuclear Physics (3)
Lecture—3 hours. Prerequisite(s): PHY 224B Study of nuclear scattering and reactions including the optical model

PHY 229A—Advanced Nuclear Theory (3)
Lecture—3 hours. Prerequisite(s): PHY 224C Advanced topics in nuclear theory; theory of quantum-mechanical

PHY 229B—Advanced Nuclear Theory (3)
Lecture—3 hours. Prerequisite(s): PHY 229A Advanced topics in nuclear theory; theory of quantum-mechanical

PHY 230A—Quantum Theory of Fields (3)
Lecture—3 hours. Prerequisite(s): PHY 215C Relativistic quantum mechanics of particles; techniques and
applications of second quantization; Feynman diagrams; renormalization. Effective: 1997 Winter Quarter.

PHY 230B—Quantum Theory of Fields (3)
Lecture—3 hours. Prerequisite(s): PHY 230A Continuation of 230A, with selected advanced topics, such as S-matrix

PHY 230C—Quantum Theory of Fields (3)
Lecture—3 hours. Prerequisite(s): PHY 230A; PHY 230B; or Consent of Instructor. Renormalization theory and
applications, including dimensional regularization, Ward identities, renormalization group equations, coupling
constant unification, and precision electroweak calculations. May be repeated for credit with consent of instructor. Effective: 2007 Winter Quarter.

PHY 232—Topics in String Theory (3)
Lecture—3 hours. Prerequisite(s): Graduate standing in Physics or consent of instructor. Courses PHY 230A, PHY
230B, PHY 230C and PHY 260 or equivalent are strongly recommended. Current research trends in string theory,
with topics ranging from perturbative worldsheet methods, nonperturbative aspects and dualities, AdS/CFT correspondence, string field theory, etc. May be repeated for credit when topics differ. Effective: 2019 Spring Quarter.

PHY 233—Advanced Topics in Geometry and Physics (3)
Lecture—3 hours. Prerequisite(s): PHY 230A, PHY 230B, PHY 230C, & PHY 260 or equivalent strongly recommended. Graduate standing in Physics or consent of instructor required. Modern geometric methods in theoretical physics, with topics ranging from from pseudo-Riemannian differential geometry and topology with application to general relativity, black holes, and string theory. May be repeated for credit when topic differs. Effective: 2019 Spring Quarter.

PHY 240A—Condensed Matter Physics A (3)
Lecture—3 hours. Prerequisite(s): PHY 215C; PHY 219A; PHY 140A and PHY 140B or equivalent recommended. Topics in condensed matter physics: Crystal structure; one-electron theory; transport and optical properties of semiconductors; phonons, electron-phonon scattering. Effective: 2007 Fall Quarter.

PHY 240B—Condensed Matter Physics B (3)
Lecture—3 hours. Prerequisite(s): PHY 240A Topics in condensed matter physics: transport and optical properties of metals and quantum structures; experimental measurement the Fermi surface and of phonon spectra. Effective: 2008 Spring Quarter.

PHY 240C—Condensed Matter Physics (3)
Lecture—3 hours. Prerequisite(s): PHY 240A; PHY 240B Review of second quantization. Interacting electron gas, electron-phonon interaction and effects, including instabilities of electronic systems. Topics in the theory of superconductivity and magnetism. Effective: 2005 Spring Quarter.

PHY 241—Advanced Topics in Magnetism (3)
Lecture—3 hours. Prerequisite(s): PHY 240A; PHY 240B; PHY 240C; PHY 240D; or Consent of Instructor. Topics chosen from areas of current research interest. Effective: 1997 Winter Quarter.

PHY 242—Advanced Topics in Superconductivity (3)
Lecture—3 hours. Prerequisite(s): PHY 240A; PHY 240B; PHY 240C; PHY 240D; or Consent of Instructor. Topics chosen from areas of current research interest. Effective: 1997 Winter Quarter.

PHY 243A—Surface Physics of Materials (3)
Lecture—3 hours. Prerequisite(s): PHY 140A; PHY 140B; PHY 115A; PHY 115B; Or the equivalent to any; PHY 215A, PHY 240A, or the equivalents recommended. Experimental and theoretical fundamentals of surface and interface physics and chemistry, including electronic and magnetic structure, thermodynamics, adsorption kinetics, epitaxial growth, and a discussion of various spectroscopic and structural probes based on photons, electrons, ions, and scanning probes. Effective: 1999 Winter Quarter.

PHY 243B—Surface Physics of Materials (3)
Lecture—3 hours. Prerequisite(s): PHY 140A; PHY 140B; PHY 115A; PHY 115B; Or the equivalent to any; PHY 215A, PHY 240A, or the equivalents recommended. Experimental and theoretical fundamentals of surface and interface physics and chemistry, including electronic and magnetic structure, thermodynamics, adsorption kinetics, epitaxial growth, and a discussion of various spectroscopic and structural probes based on photons, electrons, ions, and scanning probes. Effective: 1999 Winter Quarter.

PHY 243C—Surface Physics of Materials (3)
Lecture—3 hours. Prerequisite(s): PHY 140A; PHY 140B; PHY 115A; PHY 115B; Or the equivalent to any; PHY 215A, PHY 240A, or equivalents recommended. Experimental and theoretical fundamentals of surface and interface physics and chemistry, including electronic and magnetic structure, thermodynamics, adsorption kinetics, epitaxial growth, and a discussion of various spectroscopic and structural probes based on photons, electrons, ions, and scanning probes. Effective: 2000 Spring Quarter.

PHY 245A—High-Energy Physics (3)
Lecture—3 hours. Prerequisite(s): PHY 230A Phenomenology and systematics of strong, electromagnetic, and weak interactions of hadrons and leptons; determination of quantum numbers; quarks and quarkonia; deep inelastic scattering; the quark parton model; experiments at hadron colliders and electron-positron colliders. Effective: 1997 Winter Quarter.

PHY 245B—High-Energy Physics (3)
Lecture—3 hours. Prerequisite(s): PHY 245A Electroweak interactions; phenomenology of the Standard Model of SU(2)LxU(1); weak interaction experiments; properties of and experiments with W and Z vector bosons; Glashow-
Weinberg-Salam model and the Higgs boson; introduction to supersymmetry and other speculations. Effective: 1997 Winter Quarter.

**PHY 245C—Collider Physics (3)**
Lecture—3 hours. Prerequisite(s): PHY 245A; PHY 252B (can be concurrent); or Consent of Instructor. PHY 252B taken previously or concurrently. Collider physics. Topics include quark and gluon distribution functions and the computation of cross sections; Large Hadron Collider and International Linear Collider phenomenology; collider and detector characteristics; extracting models from data; software tools for analyzing experimental data. May be repeated for credit with consent of instructor. Effective: 2008 Spring Quarter.

**PHY 246—Supersymmetry: Theory and Phenomenology (3)**

**PHY 246A—Supersymmetry: Theory and Phenomenology (3)**
Lecture—3 hours. Prerequisite(s): PHY 230A; PHY 230B; PHY 245A, PHY 245B recommended or consent of instructor. Construction of supersymmetric models of particle physics; superfields; supersymmetry breaking the minimal supersymmetric standard model; supergravity. Collider phenomenology of supersymmetry. Dark matter phenomenology. Not offered every year. Effective: 2008 Spring Quarter.

**PHY 246B—Advanced Supersymmetry (3)**
Lecture—3 hours. Prerequisite(s): PHY 246A Advanced topics in supersymmetry. Topics include holomorphy, the Affleck-Dine-Seiberg superpotential, Seiberg duality for SUSY QCD, dynamical SUSY breaking, Seiberg-Witten theory, superconformal field theories, supergravity, anomaly and gaugino mediation, and the AdS/CFT correspondence. Effective: 2007 Fall Quarter.

**PHY 250—Special Topics in Physics (3)**
Lecture—3 hours. Prerequisite(s): Consent of Instructor. Topic varies. May be repeated for credit. Effective: 1997 Fall Quarter.

**PHY 252A—Techniques of Experimental Physics (3)**
Lecture—3 hours. Introduction to techniques and methods of designing and executing experiments. Problems and examples from condensed matter research will be utilized. Effective: 1997 Winter Quarter.

**PHY 252B—Techniques of Experimental Physics (3)**
Lecture—3 hours. Introduction to techniques and methods of designing and executing experiments. Problems and examples from nuclear and particle research will be utilized. Effective: 1997 Winter Quarter.

**PHY 252C—Statistics and Data Analysis for Particle Physics (3)**
Lecture—3 hours. Introduction to statistical data analysis methods in particle physics. Theoretical lectures combined with practical computer laboratory work. Effective: 2007 Spring Quarter.

**PHY 253—Signals and Noise in Physics (3)**

**PHY 255—Econophysics (4)**
Lecture/Discussion—3 hours; Project (Term Project). Prerequisite(s): Knowledge of Python, R, Excel, Matlab, or consent of instructor. Application of ideas from statistical mechanics to the financial markets. Market dynamics from a physics and systems perspective, including the statistical distributions of returns, the dynamics of prices, and models for the markets. Effective: 2019 Winter Quarter.

**PHY 256A—Physics of Information (4)**
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): Consent of Instructor. Advanced undergraduate or introductory graduate differential equations, applied linear algebra, and probability theory; e.g., Mathematics 119A/B or 207A, 167 or 226A, and 135A/B or 235A; respectively; or in Physics 104A/C or 204A/B. Class size limited to 30 students. Nonlinear dynamics, deterministic chaos, bifurcations, pattern formation, symbolic dynamics, measurement theory, stochastic processes, elementary information theory, information in complex systems, computational laboratory. Effective: 2017 Spring Quarter.

**PHY 256B—Physics of Computation (4)**
Extensive Problem Solving; Lecture—3 hours. Prerequisite(s): PHY 256A; Consent of Instructor. Advanced undergraduate or introductory graduate differential equations, applied linear algebra, and probability theory; e.g.,
Mathematics 119A/B or 207A, 167 or 226A, and 135A/B or 235A, respectively; or in Physics 104A/C or 204A/B. Class size limited to 30 students. Structural complexity, computational mechanics, information measures, causal inference, applications to complex materials, quantum dynamics, and nonequilibrium thermodynamics, computational laboratory. Effective: 2017 Spring Quarter.

**PHY 260—Introduction to General Relativity (3)**
Lecture—3 hours. Prerequisite(s): PHY 200A; PHY 200B An introduction to general relativity. Differential geometry and curved spacetime; the Einstein field equations; gravitational fields of stars and black holes; weak fields and gravitational radiation; experimental tests; Big Bang cosmology. Effective: 1999 Spring Quarter.

**PHY 262—Early Universe Cosmology (3)**
Lecture—3 hours. Prerequisite(s): Second year standing in Physics Graduate Program or consent of instructor. Introduction to early universe cosmology: the Big Bang, inflation, primordial nucleosynthesis, dark matter, dark energy, and other topics of current interest Effective: 2005 Spring Quarter.

**PHY 263—Cosmic Structure Formation (3)**
Lecture—3 hours. Prerequisite(s): PHY 260 Growth of structure from small density inhomogeneities in the early universe to the diverse structures observable today. Use of observable properties (cosmic microwave background, gravitational lensing, peculiar velocities, number density, etc.) to constrain models of structure formation and fundamental physics. Effective: 2005 Spring Quarter.

**PHY 265—High Energy Astrophysics and Radiative Processes (3)**
Lecture—3 hours. Prerequisite(s): Graduate standing in Physics or consent of instructor. Survey course covering galactic and extragalactic X-ray and gamma-ray astronomy, radiative processes, and techniques of high-energy astrophysics. Effective: 2004 Fall Quarter.

**PHY 266—Data Analysis for Astrophysics (3)**
Lecture—3 hours. Prerequisite(s): Graduate standing in Physics or consent of instructor. Survey course covering measurement and signal analysis techniques for astrophysics and cosmology throughout the electromagnetic spectrum. Effective: 2005 Winter Quarter.

**PHY 267—Observational Extragalactic Astronomy & Cosmology (3)**
Lecture—3 hours. Prerequisite(s): Graduate standing in Physics or consent of instructor. Survey course covering current areas of research on extragalactic objects, their physical properties, origin, evolution, and distribution in space. Effective: 2005 Spring Quarter.

**PHY 268—Research Methods in Astrophysics (3)**
Lecture—3 hours. Prerequisite(s): PHY 204A, PHY 204B and PHY 215A recommended. Graduate standing in Physics or consent of instructor. Introduction to research methods in astrophysics and cosmology. Problems and examples from observational and theoretical work will be included. Effective: 2019 Spring Quarter.

**PHY 270—Current Topics in Physics Research (3)**
Lecture/Discussion—3 hours. Prerequisite(s): Graduate standing in Physics or consent of instructor. Reading and discussion to help physics graduate students develop and maintain familiarity with the current and past literature in their immediate field of research and related areas. May be repeated for credit. (S/U grading only.) Effective: 2013 Fall Quarter.

**PHY 285—Careers in Physics (1)**
Seminar—1.5 hours. Prerequisite(s): Graduate standing in Physics. Designed to give Physics graduate students an in-depth appreciation of career opportunities with a graduate degree in physics. Professional physicists, mainly from outside academia, will give seminars describing both research and career insights. May be repeated for credit. (S/U grading only.) Effective: 2005 Winter Quarter.

**PHY 290—Seminar in Physics (1)**
Seminar. Prerequisite(s): Graduate standing in Physics or consent of instructor. Presentation and discussion of topics of current research interest in physics. Topics will vary weekly and will cover a broad spectrum of the active fields of physics research at a level accessible to all physics graduate students. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

**PHY 291—Seminar in Nuclear Physics (1)**
Seminar—1 hour. Prerequisite(s): Graduate standing in Physics or consent of instructor. Presentation and discussion of topics of current research interest in nuclear physics. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.
PHY 292A—Seminar in Elementary Particle Physics (1)
Seminar—1 hour. Prerequisite(s): Graduate standing in Physics or consent of instructor. Presentation and discussion of topics of current research interest in elementary particle physics. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 2008 Fall Quarter.

PHY 292B—High Energy Frontier Initiative And Cosmology Theory Seminar (1)
Seminar—1 hour. Prerequisite(s): Physics graduate students. May be repeated up to 5 time(s). (S/U grading only.) Effective: 2007 Fall Quarter.

PHY 293—Seminar in Condensed Matter Physics (1)
Seminar—1 hour. Prerequisite(s): Graduate standing in Physics or consent of instructor. Presentation and discussion of topics of current research interest in condensed matter physics. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

PHY 294—Seminar in Cosmology (1)
Seminar—1 hour. Prerequisite(s): Graduate standing in Physics or consent of instructor. Presentation and discussion of topics of current research interest in Cosmology. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 1999 Winter Quarter.

PHY 295—Introduction to Departmental Research (1)
Seminar—1 hour. Seminar to introduce first- and second-year physics graduate students to the fields of specialty and research of the Physics staff. (S/U grading only.) Effective: 1997 Winter Quarter.

PHY 296—Field, Strings, and Gravity Seminar (1)
Lecture—1.5 hours. Prerequisite(s): Consent of Instructor. Presentation and discussion of topics of current research interest in the areas of quantum field theory, string theory and gravity. May be repeated for credit. (S/U grading only.) Effective: 2018 Fall Quarter.

PHY 297—Research on the Teaching and Learning of Physics (3)
Seminar—3 hours. Prerequisite(s): Graduate standing in Physics or consent of instructor. Discussion and analysis of recent research in how students construct understanding of physics and other science concepts and the implications of this research for instruction. Effective: 1997 Winter Quarter.

PHY 298—Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

PHY 299—Research (1-12)
Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

PHY 371—Teaching in an Active-Engagement Physics Discussion/Lab Setting (1)
Lecture/Discussion—1 hour. Prerequisite(s): PHY 009D; Or equivalent. Open to graduate students only. Analysis of recent research on science/physics teaching and learning and its implications for teaching labs, discussions, and discussion/labs with an emphasis on differences between conventional and active-engagement instructional settings. The appropriate role of the instructor in specific instructional settings. May be repeated up to 2 time(s). Effective: 2008 Summer Session 1.

PHY 390—Methods of Teaching Physics (1)
Lecture/Discussion—1 hour. Prerequisite(s): Consent of Instructor. Graduate standing in Physics. Practical experience in methods and problems related to teaching physics laboratories at the university level, including discussion of teaching techniques, analysis of quizzes and laboratory reports and related topics. Required of all Physics Teaching Assistants. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

PHY 396—Teaching Assistant Training Practicum (1-4)
Variable. Prerequisite(s): Graduate standing. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

Physics | AST Courses

Courses in AST:

AST 010G—Introduction to Stars, Galaxies, and the Universe (3)
Lecture—3 hours. Non-mathematical introduction to astrophysics of the Universe beyond our solar system using concepts of modern physics. Not open for credit to students who have taken AST 002, the former AST 010, any
quarter of PHY 009 or PHY 009H, or any upper-division physics course (other than PHY 137 or PHY 160). GE credit: SE, SL, VL. Effective: 2007 Summer Session 1.

**AST 010L—Observational Astronomy Lab (1)**
Laboratory—2.5 hours. Introduction to observations of the night sky using small telescopes in nighttime laboratory. Not open for credit to students who have taken AST 002 or AST 010. GE credit: SE, VL. Effective: 2018 Winter Quarter.

**AST 010S—Astronomy of the Solar System (3)**
Lecture—3 hours. Introduction to naked eye and telescopic observations of events in the night sky: positions of sun, moon, planets throughout the year. Historical perspective on how our understanding of the solar system evolved to current non-mathematical astrophysical interpretation of planetary systems. Not open for credit to students who have taken AST 002, any quarter of PHY 009 or PHY 009H, or any upper-division physics course (other than PHY 137 or PHY 160). GE credit: SE, SL, VL. Effective: 2007 Summer Session 1.

**AST 025—Introduction to Modern Astronomy and Astrophysics (4)**
Discussion/Laboratory—2.5 hours; Lecture—3 hours. Prerequisite(s): Good facility in high school physics and mathematics (algebra and trigonometry). Description and interpretation of astronomical phenomena using the laws of modern physics and observations by modern astronomical instruments. Gravity, relativity, electromagnetic radiation, atomic and nuclear processes in relation to the structure and evolution of stars, galaxies and the universe. Not open to students who have received credit for AST 002, AST 010G, or AST 010L. GE credit: SE, SL, VL. Effective: 2007 Fall Quarter.

**Faculty.** [http://www-plb.ucdavis.edu/faculty/](http://www-plb.ucdavis.edu/faculty/)

**The Major Program**

As organisms that sequester carbon and convert solar energy to usable forms, plants are the primary source of food on the planet as well as important buffers against climate change. The Plant Biology major focuses on fundamental aspects of how plants function as organisms and interact with their environment. A wide variety of scientific disciplines are integrated within the Plant Biology major, including physiology, cell and molecular biology, development, genetics and genomics.

**The Program.** The Plant Biology major consists of a biological sciences core covering the general principles of biology plus four plant-specific classes dealing with advanced aspects of plant biology including physiology,
development, and anatomy. Electives allow students to tailor the degree to suit their interests. Independent research in a laboratory setting is a requirement, and majors in Plant Biology are guaranteed this opportunity. Because of the value of plants as a model system for research in molecular genetics, cell biology, and biochemistry, Plant Biology makes an excellent minor or second major for student in these fields.

**Career Alternatives.** A degree in Plant Biology serves as an excellent launching point for a wide range of career options, including domestic and international opportunities in business, research and teaching in both governmental and private sectors. The program is excellent preparation for students wishing to enter graduate or other professional schools, including medicine, law (particularly environmental or patent law) or journalism. Plant biologists can work in the laboratory, in the field, in the forest, in botanical gardens or nurseries, in agricultural companies, or in biotechnology, pharmaceutical, energy or chemical industries, or in the area of environmental protection.

**Honors and Honors Programs.** Students on the honors list may elect to include a maximum of 5 units of 194H in their major programs. Refer to the Academic Information chapter and the appropriate College section for Dean's Honors List information.

**Graduate Study.** Consult the [Plant Biology (Graduate Group)] listing.

**Master Advisor.** Siobhan Brady, Plant Biology Department and Genome Center office in 4513 Genome and Biomedical Sciences Facility.

The Major Program

As organisms that sequester carbon and convert solar energy to usable forms, plants are the primary source of food on the planet as well as important buffers against climate change. The Plant Biology major focuses on fundamental aspects of how plants function as organisms and interact with their environment. A wide variety of scientific disciplines are integrated within the Plant Biology major, including physiology, cell and molecular biology, development, genetics and genomics.

The Program. The Plant Biology major consists of a biological sciences core covering the general principles of biology plus four plant-specific classes dealing with advanced aspects of plant biology including physiology, development, and anatomy. Electives allow students to tailor the degree to suit their interests. Independent research in a laboratory setting is a requirement, and students in the Plant Biology B.S. major are guaranteed this opportunity. Because of the value of plants as a model system for research in molecular genetics, cell biology, and biochemistry, Plant Biology makes an excellent minor or second major for student in these fields.

Career Alternatives. A degree in Plant Biology serves as an excellent launching point for a wide range of career options, including domestic and international opportunities in business, research and teaching in both governmental and private sectors. The program is excellent preparation for students wishing to enter graduate or other professional schools, including medicine, law (particularly environmental or patent law) or journalism. Plant biologists can work in the laboratory, in the field, in the forest, in botanical gardens or nurseries, in agricultural companies, or in biotechnology, pharmaceutical, energy or chemical industries, or in the area of environmental protection.

Honors and Honors Programs. Students on the honors list may elect to include a maximum of 5 units of 194H in their major programs. Refer to the Academic Information chapter and the appropriate College section for Dean's Honors List information.

### Plant Biology | PLB Minor

(Concluded Biological Sciences)

Savithramma P. Dinesh-Kumar, Ph.D., Chairperson of the Department

Steven Theg, Ph.D., Vice Chairperson of the Department

**Graduate Program.** See Plant Biology (A Graduate Group).

**Department Office.** 1002 Life Sciences; 530-752-0617; [http://www-plb.ucdavis.edu](http://www-plb.ucdavis.edu)

**Advising.** 1023 Sciences Laboratory Building; 530-752-0410; [http://basc.ucdavis.edu/](http://basc.ucdavis.edu/)

**Faculty.** [http://www-plb.ucdavis.edu/faculty/](http://www-plb.ucdavis.edu/faculty/)

**Minor Advisor.** Siobhan Brady, Plant Biology Department and Genome Center office in 4513 Genome and Biomedical Sciences Facility.

#### Plant Biology

**Units: 18**

*Upper division units, including at least one course from each of the following four groups*

**(a) Anatomy and Morphology:**

- EVE 140 Paleobotany                                | 4     |
- PLB 105 Developmental Plant Anatomy                | 5     |
- PLB 116 Plant Morphology and Evolution             | 5     |

**(b) Physiology and Development:**

- PLB 111 Plant Physiology                            | 3     |
- PLB 112 Plant Growth and Development                | 3     |
- PLB 123 Plant-Virus-Vector Interaction              | 3     |
- PLP 130 Fungal Biotechnology and Biochemistry       | 3     |

**(c) Evolution and Ecology:**

- EVE 100 Introduction to Evolution                  | 4     |
- PLB 102 California Floristics                      | 5     |
- PLB 108 Systematics and Evolution of Angiosperms   | 5     |
- PLB 117 Plant Ecology                              | 4     |
- PLB 143 Evolution of Crop Plants                   | 4     |

**(d) Biochemistry and Molecular Genetics:**

- BIT 160 Principles of Plant Biotechnology          | 3     |
- PLB 113 Molecular and Cellular Biology of Plants   | 3     |
- PLB 126 Plant Biochemistry                         | 3     |
- PLS 152 Plant Genetics                             | 4     |
- PLS 154 Introduction to Plant Breeding             | 4     |
- PLS 171 Principles and Practices of Plant Propagation | 4     |
- PLS 172 Postharvest Physiology and Technology     | 4     |

**1770**
Plant Biology | PLB Courses

Courses in PLB:

PLB 010—Plant Biology (3)
Lecture—3 hours. The social and natural science of plants. Cultural history and socioeconomic importance of plants. Biology of plants reproduction, including flowers, seeds and fruits. Historical, cultural, religious and medicinal uses of plants. Plants in the visual arts, music and literature. GE credit: SE, SL. Effective: 2016 Winter Quarter.

PLB 090X—Plant Science Seminar (1-4)
Variable. Prerequisite(s): Consent of Instructor. Examination of a special topic in a small group setting. Not open for credit to students who have completed course Plant Science 90X. Not open for credit to students who have completed PLS 090X. Effective: 1997 Winter Quarter.

PLB 092—Internship (1-12)
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Technical and/or professional experience on or off campus. Supervised by a member of the Plant Biology faculty. (P/NP grading only.) Effective: 1997 Winter Quarter.

PLB 098—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Primarily for lower division students. (P/NP grading only.) Effective: 1997 Winter Quarter.

PLB 099—Special Study for Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

PLB 102—California Floristics (5)
Fieldwork; Laboratory—5 hours; Lecture—2 hours. Prerequisite(s): PLS 002 or BIS 002C; Or equivalent course in Plant Science. Survey of the California flora, emphasizing recognition of important plant families and genera and use of taxonomic keys to identify species. Phylogenetic relationships among families. Principles of systematics and taxonomy. Two Saturday field trips. (Same course as PLS 102.) GE credit: SE, VL. Effective: 2017 Fall Quarter.

PLB 105—Developmental Plant Anatomy (5)
Laboratory—6 hours; Lecture—3 hours. Prerequisite(s): BIS 002C; Or other similar preparation in plant biology. Restricted to 50 students; split equally into two lab groups. Structural anatomy of vascular plants. Training in basic tissue sectioning, staining, and use of the compound microscope. GE credit: SE. Effective: 2011 Fall Quarter.

PLB 108—Systematics and Evolution of Angiosperms (5)
Laboratory—6 hours; Lecture—3 hours. Prerequisite(s): (BIS 001A, BIS 001B, BIS 001C) or (BIS 002A, BIS 002B, BIS 002C) Diversity and classification of angiosperms (flowering plants) on a world scale, and current understanding of the origin of angiosperms and evolutionary relationships and trends within them based on morphological and molecular evidence. (Same course as EVE 108.) Effective: 2008 Spring Quarter.

PLB 111—Plant Physiology (3)
Lecture—3 hours. Prerequisite(s): (BIS 002A, BIS 002B, BIS 002C); (CHE 008B (can be concurrent) or CHE 118B (can be concurrent)); PHY 007C (can be concurrent); PLB 105 recommended. Plant cell as a functional unit. The processes of absorption, movement, and utilization of water and minerals. Water loss, translocation, photosynthesis, respiration. Effective: 2016 Fall Quarter.

PLB 111D—Problems in Plant Physiology (1)
Discussion—1 hour. Prerequisite(s): PLB 111 (can be concurrent); PLB 111 required concurrently. Discussion of problems and applications relating to principles presented in course 111. Students will be assigned problems each week showing novel applications of principles described in course 111 and will prepare answers to be delivered orally during the class period. (P/NP grading only.) Effective: 1997 Winter Quarter.

PLB 112—Plant Growth and Development (3)
Lecture—3 hours. Prerequisite(s): (BIS 002A, BIS 002B, BIS 002C); (CHE 008B or CHE 118B); BIS 101 Introduction to the mechanisms and control systems that govern plant growth and development and the responses of plants to the environment. Strong emphasis on vegetative development of flowering plants. GE credit: QL, SE, SL. Effective: 2016 Fall Quarter.

PLB 112D—Problems in Plant Growth and Development (1)
Discussion—1 hour. Prerequisite(s): PLB 112 (can be concurrent); PLB 112 required concurrently. Discussion of
problems and applications relating to principles presented in course 112. Students will be assigned problems each week showing novel applications of the principles described in course 112 and will prepare answers to be delivered orally during class period. (P/NP grading only.) Effective: 1997 Winter Quarter.

**PLB 113—Molecular and Cellular Biology of Plants (3)**
Lecture—3 hours. Prerequisite(s): (BIS 002A, BIS 002B, BIS 002C); BIS 101 Molecular and cellular aspects of the growth and development of plants and their response to biological and environmental stresses. Primary focus on processes unique to plants. Experimental approaches will be emphasized. GE credit: QL, SL, VL. Effective: 2016 Fall Quarter.

**PLB 113D—Problems in Molecular and Cellular Biology of Plants (1)**
Discussion—1 hour. Prerequisite(s): PLB 113 (can be concurrent); PLB 113 required concurrently. Discussion of topics and applications related to principles presented in course 113. Assigned topics each week show novel applications of the principles described in course 113; discussion of topics during class period. (P/NP grading only.) Effective: 1997 Winter Quarter.

**PLB 116—Plant Morphology and Evolution (5)**
Laboratory—4 hours; Lecture—3 hours. Prerequisite(s): Introductory Plant Biology (e.g., BIS 002C, PLS 002). Introduction to the form, development and evolution of vascular plants. Emphasis given to the form and development of reproductive structures in ferns and seed-producing plants as a basis for determining evolutionary relationships. Not open for credit to students who have completed PLS 116. (Same course as PLS 116.) GE credit: SE, VL. Effective: 2015 Winter Quarter.

**PLB 117—Plant Ecology (4)**
Fieldwork—3 hours; Lecture—3 hours. Prerequisite(s): (BIS 001A, BIS 001B, BIS 001C) or (BIS 002A, BIS 002B, BIS 002C); PLB 111 recommended. The study of the interactions between plants, plant populations or vegetation types and their physical and biological environment. Special emphasis on California. Four full-day field trips and brief write-up of class project required. (Same course as EVE 117.) GE credit: SE. Effective: 2015 Winter Quarter.

**PLB 123—Plant-Virus-Vector Interaction (3)**
Lecture—3 hours. Prerequisite(s): BIS 002A; BIS 101; PLB 105, PLP 120, and ENT 100 recommended. Analysis of interactions necessary for viruses to infect plants. Interactions among insect vectors and host plants involved in the plant-virus life cycle. Evolutionary aspects of the molecular components in viral infection and modern approaches to the interdiction of viral movement. (Same course as ENT 123 and PLP 123.) GE credit: SE, SL, WE. Effective: 2014 Winter Quarter.

**PLB 126—Plant Biochemistry (3)**
Lecture—3 hours. Prerequisite(s): BIS 103 or BIS 105. The biochemistry of important plant processes and metabolic pathways. Discussion of methods used to understand plant processes, including use of transgenic plants. (Same course as MCB 126.) GE credit: SE, SL. Effective: 2008 Spring Quarter.

**PLB 143—Evolution of Crop Plants (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): PLS 002 or BIS 001C or BIS 002C. Origins of crops and agriculture, including main methodological approaches, centers of crop biodiversity, dispersal of crops, genetic and physiological differences between crops and their wild progenitors, agriculture practiced by other organisms, and role and ownership of crop biodiversity. GE credit: SE, SL, SS, WE. Effective: 2009 Spring Quarter.

**PLB 148—Introductory Mycology (4)**
Laboratory—6 hours; Lecture—2 hours. Prerequisite(s): BIS 001A; BIS 001B; BIS 001C. Limited enrollment. Systematics, ecology, evolution, and morphology of fungi. Importance of fungi to humans. (Same course as PLP 148.) GE credit: SE. Effective: 2001 Fall Quarter.

**PLB 189—Experiments in Plant Biology: Design and Execution (3)**
Discussion/Laboratory—6 hours. Prerequisite(s): (BIS 001A, BIS 001B, BIS 001C) or (BIS 002A, BIS 002B, BIS 002C); and Consent of Instructor. Or the equivalent courses in Plant Sciences. Provides an opportunity for undergraduate

1772
students to formulate experimental approaches to current questions in plant biology and to carry out their proposed experiments. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 2008 Fall Quarter.

**PLB 190C—Research Conference in Plant Biology (1)**
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Upper division standing in Plant Biology or related discipline. Introduction to research methods in plant biology. Design of field or laboratory research projects, survey of appropriate literature, and discussion of research by faculty and students. May be repeated for credit. (P/NP grading only.) Effective: 2007 Fall Quarter.

**PLB 192—Internship (1-12)**
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Completion of 84 units. Technical and/or professional experience on or off campus. Supervised by a member of the Plant Biology Department faculty. May be repeated for credit. (P/NP grading only.) Effective: 2008 Fall Quarter.

**PLB 194H—Special Study for Honors Students (1-5)**
Variable. Prerequisite(s): Consent of Instructor. Open only to majors of senior standing on honors list. Independent study of selected topics under the direction of a member or members of the staff. Completion will involve the writing of a senior thesis. (P/NP grading only.) Effective: 1997 Winter Quarter.

**PLB 197T—Tutoring in Plant Biology (1-5)**
Discussion—2-6 hours. Prerequisite(s): Consent of Instructor. Upper division standing. Assisting the instructor by tutoring students in one of the Department's regular courses. May be repeated for credit. (P/NP grading only.) Effective: 2008 Fall Quarter.

**PLB 198—Directed Group Study (1-5)**
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

**PLB 199—Special Study for Advanced Undergraduates (1-5)**
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

**PLB 396—Teaching Assistant Training Practicum (1-4)**
Variable—3-20 hours. Prerequisite(s): Consent of Instructor. Graduate standing. Practical experience in acting as teaching assistant in Plant Biology courses. Learning activity: hands on experience in preparing for and conducting discussions, guiding student laboratory work, and the formulation of questions and topics for examinations. May be repeated for credit. (S/U grading only.) Effective: 2013 Fall Quarter.

**Plant Biology (Graduate Group)**

**Plant Biology (Graduate Group) | PBI Information**

Neelima Sinha, Ph.D., Chairperson of the Group

**Group Office.** 227A Life Sciences; 530-752-2981; Fax 530-752-8822; [http://pbi.ucdavis.edu/](http://pbi.ucdavis.edu/)

**Faculty.** [http://pbi.ucdavis.edu/faculty/](http://pbi.ucdavis.edu/faculty/)

**Plant Biology (Graduate Group) | PBI M.S.**

Neelima Sinha, Ph.D., Chairperson of the Group

**Group Office.** 227A Life Sciences; 530-752-2981; Fax 530-752-8822; [http://pbi.ucdavis.edu/](http://pbi.ucdavis.edu/)

**Faculty.** [http://pbi.ucdavis.edu/faculty/](http://pbi.ucdavis.edu/faculty/)

**Graduate Study.** The Graduate Group in Plant Biology offers programs of study and research leading to the M.S. and Ph.D. degrees. The program prepares students for careers in teaching and research at universities and colleges, government and industrial laboratories. The graduate curriculum provides both a breadth in the discipline and in-depth study and research in one of four areas of specialization: cell and developmental biology; environmental and integrative biology; molecular biology, biochemistry and genomics; and systematics and evolutionary biology. These areas of specialization permit individual study and research into diverse aspects of plant biology, including anatomy, biochemistry, biotechnology, cell biology, cytology, developmental biology, ecology, genetics, genomics, molecular biology, morphology, paleo-botany, physiology, population biology, systematics, and weed science. The graduate advisor, the major professor, and the student will design a program of advanced courses to meet individual academic needs within one of the specializations.
Preparation. For both the M.S. and Ph.D. programs, a level of scholastic development equivalent to a Bachelor's degree in biological sciences from a recognized college or university is required. Courses in the following areas are considered to be prerequisite to the advanced degrees in Plant Biology: biology, inorganic chemistry, organic chemistry, introductory physics, genetics, plant development and structure, biochemistry, introductory plant physiology, calculus, introductory statistics, ecology/systematics/evolution, and cell/molecular biology. Limited deficiencies can be made up after admission.

Graduate Advisor. Contact the Group office.

Plant Biology (Graduate Group) | PBI Ph.D.

Neelima Sinha, Ph.D., Chairperson of the Group

Group Office. 227A Life Sciences; 530-752-2981; Fax 530-752-8822; http://pbi.ucdavis.edu/

Faculty. http://pbi.ucdavis.edu/faculty/

Graduate Study. The Graduate Group in Plant Biology offers programs of study and research leading to the M.S. and Ph.D. degrees. Plant Biology (Graduate Group) | PBI Courses

Courses in PBI:

PBI 200A—PBGG Core Course Series - Fall quarter (5)
Discussion—2 hours; Lecture—3 hours. Prerequisite(s): Graduate standing; a broad background of undergraduate level coursework in Plant Biology is recommended. The first of three PBGG graduate core courses. Coverage includes (1) plant genes, (2) biotechnology, (3) genomes and gene flow, (4) principles of plant systematics, and (5) the evolution of flowering plants. Effective: 2005 Fall Quarter.

PBI 200B—PBGG Core Course Series - Winter quarter (5)
Discussion—2 hours; Lecture—3 hours. Prerequisite(s): PBI 200A The second of three PBGG graduate core courses. Coverage includes (1) embryo development, (2) cytoskeleton and vesicle trafficking, (3) cell walls, (4) cell growth, (5) secondary metabolism, (6) plastids and (7) senescence. Effective: 2006 Winter Quarter.

PBI 200C—PBGG Core Course Series - Spring quarter (5)
Discussion—2 hours; Lecture—3 hours. Prerequisite(s): PBI 200A; PBI 200B The third of three PBGG graduate core courses. Coverage includes (1) plant water relations, (2) cellular & long distance transport processes, (3) mineral nutrition, (4) environmental impacts on growth & development, (5) stress perception & responses, (6) canopy processes, and (7) plant interactions with other organisms. Effective: 2006 Spring Quarter.

PBI 203N—Biology of the Plant Cell (4)
Discussion/Laboratory—2 hours; Lecture—3 hours. Prerequisite(s): PLB 111 or BIS 104; Or the equivalent. Open to senior undergraduate students in Plant Biology major. Recent progresses in plant cell biology. Intracellular motility in plant cells. Common techniques associated with the progress of plant cell biology. Effective: 2006 Fall Quarter.
PBI 210—Plant Ecophysiology (3)
Lecture—3 hours. Prerequisite(s): PLB 111; PLB 112; PLB 117 Study of the mechanisms of physiological adaptation of plants to their environment. Effective: 1997 Winter Quarter.

PBI 212—Physiology of Herbicidal Action (3)
Lecture—3 hours. Prerequisite(s): PLB 112 Study of the fundamental processes involved in the physiological action of herbicides. Detailed consideration of the fate of herbicides in plants. Effective: 1997 Spring Quarter.

PBI 214—Higher Plant Cell Walls (3)
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): PLB 112; A course in Biochemistry. Lectures focus on the structure, analysis, synthesis, and development-related metabolism of cell walls. Discussions center on analysis of scientific papers related to lecture topics. Effective: 1997 Winter Quarter.

PBI 220—Plant Developmental Biology (4)
Discussion—1 hour; Lecture—3 hours; Term Paper. Prerequisite(s): Plant Anatomy, Physiology, and Biochemistry. A survey of the concepts of plant development and organization. Examines plant cells, tissues, and organs with special emphasis on experimental evidence for mechanisms regulating developmental processes. Effective: 1997 Winter Quarter.

PBI 223—Special Topics in Scientific Method (2)
Discussion—2 hours. Examine the historical and philosophical background of the scientific method. Analyze the rational, perceptual, causal, creative and social aspects of scientific knowledge. Clarify the roles of reason, experimentation and creativity in scientific research. (S/U grading only.) Effective: 1997 Winter Quarter.

PBI 227—Plant Molecular Biology (4)
Lecture/Discussion—4 hours. Prerequisite(s): MCB 121 or MCB 161 Molecular aspects of higher plant biology with emphasis on gene expression. Plant nuclear and organelle genome organization, gene structure, mechanisms of gene regulation, gene transfer, and special topics related to development and response to biological and environmental stimuli. Effective: 1997 Winter Quarter.

PBI 229—Molecular Biology of Plant Reproduction (3)
Lecture—3 hours. Molecular genetic basis of plant reproduction. Emphasis on understanding developmentally regulated gene expression as it relates to the major changes that occur during plant reproduction and on the genetic control of flowering. Effective: 1997 Winter Quarter.

PBI 290A—Faculty Seminar (1)
Discussion—1 hour. Restricted to Plant Biology (PBGG) graduate students. Discussion of research area of seminar speakers in Plant Biology Graduate Group Seminar Series. May be repeated up to 6 time(s). (S/U grading only.) Effective: 2006 Winter Quarter.

PBI 290B—Seminar (1)
Seminar—1 hour. Seminars presented by visiting scientists on research topics of current interest. (S/U grading only.) Effective: 1997 Winter Quarter.

PBI 290C—Research Conference in Botany (1)
Discussion—1 hour. Prerequisite(s): Graduate standing and/or consent of instructor. Presentation and discussion by faculty and graduate students of research projects in botany. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

PBI 291—Graduate Student Seminar in Plant Biology (1)
Seminar—1 hour. Prerequisite(s): Graduate student standing. Student-given seminars on topics in plant biology, with critiques by instructor and peers. How to give a seminar, including preparation of visual and other teaching aids. Topic determined by instructor in charge. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 1997 Summer Session 1.

PBI 292—Seminars in Plants Biology (1)
Seminar—1 hour. Prerequisite(s): Consent of Instructor. Review of current literature in botanical disciplines. Disciplines and special subjects to be announced quarterly. Students present and analyze assigned topics. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

PBI 293—Seminar in Postharvest Biology (1)
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Open to advanced undergraduates. Intensive study of selected topics in the postharvest biology of fruits, vegetables, and ornamentals. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.
PBI 297T—Tutoring in Plant Biology (1-5)
Tutorial—3-15 hours. Offers graduate students, particularly those not serving as teaching assistants, the opportunity to gain teaching experience. (S/U grading only.) Effective: 1997 Winter Quarter.

PBI 298—Group Study (1-5)
Variable. May be repeated up to 4 time(s). (S/U grading only.) Effective: 2001 Fall Quarter.

PBI 299—Research (1-12)
Variable. Prerequisite(s): Consent of Instructor. Graduate standing. (S/U grading only.) Effective: 1997 Winter Quarter.

PBI 390—The Teaching of Plant Biology (2)
Discussion—2 hours. Prerequisite(s): Graduate standing; concurrent appointment as a teaching assistant in Plant Biology. Consideration of the problems of teaching botany, especially of preparing for and conducting discussions, guiding student laboratory work, and the formulation of questions and topics for examinations. (S/U grading only.) Effective: 1997 Winter Quarter.

Plant Pathology | PLP Courses
Courses in PLP:
PLP 040—Edible Mushroom Cultivation (2)
Discussion/Laboratory—3 hours; Lecture—1 hour. Prerequisite(s): BIS 010 or MIC 020 recommended. Principles and practices of growing edible mushrooms, including culture maintenance, basic mushroom substrate preparation, composting, spawn generation techniques, inoculation methods, harvesting, and pests and pest management. Effective: 1998 Winter Quarter.

PLP 120—Introduction to Plant Pathology (4) Review all entries
Laboratory—6 hours; Lecture—2 hours. Prerequisite(s): BIS 001C; MIC 102 recommended. The nature, cause, and control of plant diseases. Effective: 1997 Winter Quarter.

PLP 120—Introduction to Plant Pathology (4) Review all entries
Laboratory—6 hours; Lecture—2 hours. Prerequisite(s): BIS 002C; or Consent of Instructor. MIC 102 recommended. The nature, cause, and control of plant diseases. Effective: 2019 Winter Quarter.

PLP 123—Plant-Virus-Vector Interaction (3)
Lecture—3 hours. Prerequisite(s): BIS 002A; BIS 101; PLB 105, PLP 120, and ENT 100 recommended. Analysis of interactions necessary for viruses to infect plants. Interactions among insect vectors and host plants involved in the plant-virus life cycle. Evolutionary aspects of the molecular components in viral infection and modern approaches to the interdiction of viral movement. (Same course as ENT 123 and PLB 123.) GE credit: SE, SL, WE. Effective: 2014 Winter Quarter.

PLP 130—Fungal Biotechnology and Biochemistry (3)
Lecture—3 hours. Prerequisite(s): PLB 119; BIS 103 How fundamental physiological and biochemical activities of fungi impact the destructive and beneficial roles of these organisms in nature. Utilization and manipulation of fungi for biotechnological and industrial applications. Effective: 1997 Winter Quarter.

PLP 135—Field Identification of Mushrooms (1)
Fieldwork. Prerequisite(s): Introductory course in Biological Sciences; course in mycology recommended. Collection and identification of mushrooms and other fleshy fungi based on macro and microscopic features. (P/NP grading only.) Effective: 1999 Winter Quarter.

PLP 140—Agricultural Biotechnology and Public Policy (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): High school level biology, including genetics; BIS 010 is recommended. Examination of the development and deployment of agricultural biotechnologies, particularly transgenic crop plants, microorganisms and animals, with consideration of conventional agriculture, public perceptions of technologies, food safety, environmental impact, public policies and regulations. GE credit: SL. Effective: 2005 Spring Quarter.

PLP 148—Introductory Mycology (4)
Laboratory—6 hours; Lecture—2 hours. Prerequisite(s): BIS 001A; BIS 001B; BIS 001C Limited enrollment. Systematics, ecology, evolution, and morphology of fungi. Importance of fungi to humans. (Same course as PLB 148.) GE credit: SE. Effective: 2001 Fall Quarter.

PLP 150—Fungal Ecology (3) Review all entries
Lecture—3 hours. Prerequisite(s): BIS 001C; Or equivalent. The ecological roles of fungi as saprobes, mutualists and parasites in native and managed ecosystems. Physiological and reproductive strategies associated with adaptations to diverse habitats. Effective: 1999 Winter Quarter.

PLP 150—Fungal Ecology (3) Review all entries
Lecture—3 hours. Prerequisite(s): BIS 002C; Or equivalent. Ecological roles of fungi as saprobes, mutualists and parasites in native and managed ecosystems. Physiological and reproductive strategies associated with adaptations to diverse habitats. Effective: 2019 Winter Quarter.

PLP 185—Advanced Mushroom Taxonomy (2)
Discussion/Laboratory—3 hours; Fieldwork—1 hour. Prerequisite(s): (PLP 135 or PLP 148); BIS 101; Or the equivalent to BIS 101. Class size limited to 12 students. Microscopic and molecular methods used in the identification of mushroom species; molecular characterization including PCR-amplification of ribosomal nuclear DNA, digestion of the product with restriction enzymes, and DNA sequencing; a one-day field trip is required. Effective: 2002 Fall Quarter.

PLP 192—Internship (1-12)
Internship—3-36 hours. Prerequisite(s): PLP 120; and Consent of Instructor. Work experience off and on campus, supervised by a member of the faculty. (P/NP grading only.) Effective: 1997 Winter Quarter.
PLP 198—Directed Group Study (1-5)
Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

PLP 199—Special Study for Advanced Undergraduates (1-5)
Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

PLP 201A—Impacts, Mechanisms and Control of Plant Disease (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): PLP 120; Graduate student status in the Plant Pathology Graduate Program or consent of instructor. A case-studies approach to analysis of plant diseases caused by bacteria, fungi, oomycetes, and viruses, including impacts, etiology, pathogen taxonomy and epidemiology, biochemical and genetic aspects of pathogen-host interactions, virulence and resistance, and approaches to disease control. Effective: 2009 Winter Quarter.

PLP 201B—Impacts, Mechanisms and Control of Plant Disease (3)
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): PLP 120; PLP 201A; Graduate student status in the Plant Pathology Graduate Program or consent of instructor. A case-studies approach to analysis of plant diseases, including emerging diseases, caused by bacteria, fungi, nematodes, and oomycetes: impacts, etiology, pathogen taxonomy, epidemiology, biochemical and genetic aspects of pathogen-host interactions, virulence, resistance, disease control and statistical analysis. Effective: 2009 Spring Quarter.

PLP 205A—Diseases of Vegetable and Field Crops (3)
Fieldwork—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): PLP 120 Clinical study of diseases of vegetable and field crops with emphasis on etiology, epidemiology, diagnosis, and control. Field trips required. Effective: 2006 Spring Quarter.

PLP 205B—Diseases of Vegetable and Field Crops - Summer Field Trip (1)
Fieldwork—3 hours. Prerequisite(s): PLP 120; PLP 205A Continuation of Course 205A- four-day field trip investigating diseases of vegetable and field crops. (S/U grading only.) Effective: 2004 Summer Session 1.

PLP 206A—Diseases of Fruit, Nut, and Vine Crop (3)
Laboratory—6 hours; Lecture—2 hours. Prerequisite(s): PLP 120; PLB 119; and Consent of Instructor. Course 205 may be taken concurrently. Clinical study of fruit, nut, and vine crops diseases with emphasis on etiology, epidemiology, diagnosis, and control. Effective: 1997 Winter Quarter.

PLP 206B—Diseases of Fruit, Nut, and Vine Crop (1)
Laboratory—6 hours; Lecture—2 hours. Prerequisite(s): PLP 120; PLB 119; and Consent of Instructor. Course 205 may be taken concurrently. Clinical study of fruit, nut, and vine crops diseases with emphasis on etiology, epidemiology, diagnosis, and control. Effective: 1997 Winter Quarter.

PLP 210—Biochemistry and Molecular Biology of Plant-Microbe Interaction (4)
Lecture/Discussion—4 hours. Prerequisite(s): BIS 101; BIS 102; BIS 103; BIS 104; Or the equivalent. Discussion of plantmicrobe interactions, focused on the underlying cellular, biochemical, and molecular events that determine the diseased state. Effective: 1997 Winter Quarter.

PLP 217—Molecular Genetics of Fungi (3)
Lecture—3 hours. Prerequisite(s): BIS 101; BIS 103; MCB 161; PLB 119; PLP 130; PLP 215X; Graduate standing in a Biological Science; MIC 215 recommended. Advanced treatment of molecular biology and genetics of filamentous fungi and yeasts, including gene structure, organization and regulation; plant pathogenesis; secretion; control of reproduction; reproduction; molecular evolution; transformation; and gene manipulation. (Same course as BLC 217.) Effective: 1997 Winter Quarter.

PLP 224—Advanced Mycology (4) Review all entries
Laboratory—6 hours; Lecture—2 hours. Prerequisite(s): PLP 148 or PLB 148; or Consent of Instructor. Systematics, evolution, and ecology of the fungi. Topics include modern techniques and theories on classification of fungi, species concepts, sexual compatibility and vegetative compatibility. Laboratories will emphasize various approaches to fungal identification. Effective: 2002 Spring Quarter.

PLP 224—Advanced Mycology (3) Review all entries
Lecture—3 hours. Prerequisite(s): (PLP 148 or PLB 148); PLP 120; or Consent of Instructor. Physiology, cell biology and biochemistry of fungi. Topics include mycotoxins, epidemiology and nature of emerging and re-emerging fungal diseases, fungicides, and fungicide resistance. Effective: 2018 Fall Quarter.

PLP 228—Plant Bacteriology (5) Review all entries
Laboratory—9 hours; Lecture—2 hours. Prerequisite(s): PLP 120; BIS 102; BIS 103; MIC 002 or the equivalent. Study
of bacteria which have a saprophytic, symbiotic, or parasitic association with higher and lower plants. Clinical and molecular methods for identification and classification of these bacteria. Effective: 1997 Winter Quarter.

PLP 228—Plant Bacteriology (3) Review all entries
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): PLP 120; or equivalent or consent of instructor. Study of plant pathogenic microorganisms including taxonomy, biology, molecular mechanisms of disease, and plant disease management. Topics include quorum sensing, rhizosphere biology, genomics, virulence factors, and host plant resistance genes. Effective: 2019 Winter Quarter.

PLP 230—Plant Virology (3)
Lecture—3 hours. Prerequisite(s): Upper division or graduate course in Molecular Biology or graduate student in Plant Pathology. Viruses as causal agents of plant disease and as tools for manipulating plants; structures of virus particles; mechanisms of transmission, replication, and spread in the plant; cytology and molecular biology in susceptible and resistant reactions to virus infection; virus disease control. Only two units of credit to students who complete MIC 262; not open for credit to students who have completed PLP 226. Effective: 2003 Spring Quarter.

PLP 290—Seminar (1)

PLP 290C—Advanced Research Conference (1)
Seminar—1 hour. Prerequisite(s): PLP 120; or Consent of Instructor. Presentation, evaluation, and critical discussions of research activities in the area of advanced plant pathology; primarily designed for graduate students. (S/U grading only.) Effective: 1997 Winter Quarter.

PLP 291—Seminar in Molecular Plant Pathology (1)
Seminar—1 hour. Prerequisite(s): PLP 120; or Consent of Instructor. Review and evaluation of current literature and research in biochemistry and molecular biology of plant microbe interactions. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

PLP 295—Seminar in Mycology (1)
Seminar—1 hour. Review and evaluation of current literature and research in mycology. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

PLP 298—Special Group Study (1-5)

PLP 299—Research (1-12)
Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

Plant Sciences

Plant Sciences | PLS B.S.
(College of Agricultural and Environmental Sciences)

Chris van Kessel, Ph.D., Chairperson of the Department

Department Office. 1210 Plant and Environmental Sciences; 530-752-1703; http://www.plantsciences.ucdavis.edu/

Related Courses. See the Biotechnology, Environmental Horticulture, Horticulture & Agronomy, and Plant Biology course listings.

Graduate Study. For related graduate study, see the M.S. degree program in International Agricultural Development, and the M.S. and Ph.D. degree programs in the graduate groups of Horticulture & Agronomy, Plant Biology, Ecology, Genetics, Geography, and Soils & Biogeochemistry. See also Graduate Studies.

The Major Program
The Plant Sciences major is designed for students who are interested in a scientific understanding of how plants grow and develop in managed agricultural ecosystems and how plant products are utilized for food, fiber and
environmental enhancement. Advances in science and technology have provided new insights and options for using plants to address the issues associated with providing renewable food, fiber and energy resources for a growing global population while minimizing adverse impacts on the natural environment. Graduates in Plant Sciences are able to apply their skills and knowledge to a diverse range of agricultural and environmental goals or pursue advanced degrees in plant sciences.

The Program. The curriculum provides depth in the biological and physical sciences and a sound understanding of how plants obtain and utilize resources from their environment to sustain their growth and development. The influences of genetics, management systems and environmental inputs on crop development and productivity are emphasized along with the postharvest preservation and marketing of plant products. Students will develop an area of specialization with options in Crop Production, Plant Genetics and Breeding, or Postharvest Biology and Technology. An Individual option is also available to match specific subject matter or career goal interests in the plant sciences. All students gain practical experience through a combination of practical laboratory courses and internships. Students may also pursue an Honors thesis in their senior year.

Major Advisor. Daniel Potter

Advising Center for the major is located in 1220 Plant and Environmental Sciences; 530-752-1715.

Career Alternatives. Graduates from this program are prepared to pursue a wide range of careers, including various technical and management positions in agricultural and business enterprises, farming, or consulting; public, private, and non-profit agencies; Cooperative Extension; international development; teaching; or agricultural and environmental journalism and communication services. Graduates are qualified to pursue graduate studies in the natural and agricultural sciences, such as plant biology, genetics, breeding, horticulture, agronomy, biotechnology, ecology, environmental studies, pest management, education, or business management.

Plant Sciences | PLS Courses

Courses in PLS:

**PLS 001—Agriculture, Nature and Society (3)**
Discussion/Laboratory—1 hour; Lecture—2 hours. Multiple perspectives and connections between natural sciences, social sciences, and agriculture. Emphasizes agriculture's central position between nature and society and its key role in our search for a productive, lasting and hospitable environment. Several full-period field trips provide hands-on learning. Not open for credit to students who have completed AMR 001. (Former course AMR 001.). GE credit: SE. Effective: 2007 Fall Quarter.

**PLS 002—Botany and Physiology of Cultivated Plants (4)**
Discussion/Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): High school course in biology and chemistry recommended. A holistic introduction to the underlying botanical and physiological principles of cultivated plants and their response to the environment. Includes concepts behind plant selection, cultivation, and utilization. Laboratories include discussion and interactive demonstrations. Not open for credit to students who have completed AMR 002. (Former course AMR 002.). GE credit: SE, SL. Effective: 2007 Winter Quarter.

**PLS 005—Plants for Garden, Orchard and Landscape (2)**
Laboratory—3 hours; Lecture—1 hour. Prerequisite(s): For non-majors. Hands-on experience with plants cultivated for food, environmental enhancement and personal satisfaction. Topics include establishing a vegetable garden, pruning and propagation activities, growing flowers and ornamental plants, and the role of plants in human health and well-being. Not open for credit to students who have completed PLB 001 or PLS 002. (Former course PLB 001.). (P/NP grading only.) GE credit: SE. Effective: 2008 Fall Quarter.

**PLS 006—Flower Power--Art and Science of Flowers and Their Uses (2)**
Lecture/Discussion—2 hours. Prerequisite(s): High school biology. Introduction to the art and science of using and growing flowers to harness the power that is represented by their aesthetic beauty. Handling, production, arranging, breeding and marketing of flowers. Emphasis on potted plants and cut-flowers. (P/NP grading only.) Effective: 2010 Spring Quarter.

**PLS 007—Just Coffee: The Biology, Ecology and Socioeconomic Impacts of the World's Favorite Drink (4)**
Discussion—1 hour; Lecture—3 hours. Coffee used as a case study to examine biological, ecological and social factors influencing sustainability of farming systems and how food production systems impact human well-being. GE credit: SE, SS, WE. Effective: 2017 Fall Quarter.

**PLS 007V—Just Coffee: The Biology, Ecology and Socioeconomic Impacts of the World's Favorite Drink (4)**
Web Electronic Discussion—1 hour; Web Virtual Lecture—3 hours. Coffee used as a case study to examine biological, ecological and social factors influencing sustainability of farming systems and how food production systems impact human well-being. GE credit: SE, SS, WE. Effective: 2019 Winter Quarter.

**PLS 012—Plants and Society (4)**
Extensive Writing—3 hours; Lecture—3 hours. Prerequisite(s): High school biology. Dependence of human societies on plant and plant products. Plants as resources for food, fiber, health, enjoyment and environmental services. Sustainable uses of plants for food production, raw materials, bioenergy, and environmental conservation. Global population growth and future food supplies. Not open for credit to students who have complete PLB 012. (Former course PLB 012.). (Same course as SAS 012.) GE credit: SE, SS, WE. Effective: 2007 Fall Quarter.

**PLS 014—Introduction to Current Topics in Plant Biology (4)**
Discussion—3 hours. Introduction to scientific methods and current understanding of genetics, metabolism, and cellular structure in plants, with special emphasis on topics related to societal issues, such as herbal medicines and genetically modified organisms. Designed for students not specializing in biology. Not open for credit to students who have completed PLB 011. (Former course PLB 012.). GE credit: SE, SS, WE. Effective: 2007 Fall Quarter.

**PLS 015—Introduction to Sustainable Agriculture (4)**
Laboratory—3 hours; Lecture—3 hours. Multidisciplinary introduction to agricultural sustainability with a natural sciences emphasis. Sustainability concepts and perspectives. Agricultural evolution, history, resources and functions. Diverse agricultural systems and practices and their relative sustainability. Laboratories provide direct experience with selected agricultural practices and systems. GE credit: SE. Effective: 2009 Spring Quarter.

**PLS 021—Application of Computers in Technology (3)**
Discussion/Laboratory—2 hours; Lecture—2 hours. Prerequisite(s): High school algebra. Not open for students who
have completed Agricultural Management and Rangeland Resources 21. (Former course Agricultural Management and Rangeland Resources 21.) Concepts of computing and applications using personal computers, spreadsheets, database management, word processing and communications. GE credit: SE, VL. Effective: 2009 Winter Quarter.

**PLS 049—Organic Crop Production Practices (3)**
Discussion—1 hour; Laboratory—3 hours; Lecture—1 hour. Principles and practices of organic production of annual crops. Including organic crops, soil, and pest management, cover cropping, composting, seeding, transplanting, irrigation, harvesting and marketing. Not open for credit to students who have completed AMR 049. (Former course AMR 049.). (P/NP grading only.) GE credit: SE. Effective: 2007 Fall Quarter.

**PLS 092—Internship (1-12)**
Internship—3-36 hours. Work experience on or off campus in subject areas pertaining to plant and environmental sciences. Internship supervised by a faculty member. May be repeated for credit. (P/NP grading only.) Effective: 2007 Winter Quarter.

**PLS 098—Directed Group Study (1-5)**
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. Primarily for lower division students. May be repeated for credit. (P/NP grading only.) Effective: 2007 Winter Quarter.

**PLS 099—Special Study for Undergraduates (1-5)**
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. Primarily for lower division students. (P/NP grading only.) Effective: 2007 Winter Quarter.

**PLS 100A—Metabolic Processes of Cultivated Plants (3)**
Lecture—3 hours. Prerequisite(s): PLS 002 or BIS 002C; or Consent of Instructor. Principles of energy capture and photosynthesis, water use, and nutrient cycling. Conversion of these resources into products (carbohydrates, proteins, lipids, and other chemicals) by plants. Emphasis on the relationships between environmental resources, plant metabolism and plant growth. GE credit: SE. Effective: 2017 Spring Quarter.

**PLS 100AL—Metabolic Processes of Cultivated Plants Laboratory (2)**
Discussion/Laboratory—3 hours. Prerequisite(s): PLS 100A (can be concurrent); Or the equivalent. Techniques and instruments used to study plant metabolic processes, including water relations, respiration, photosynthesis, enzyme kinetics, microscopy, immunochemistry, and nitrogen fixation. Quantitative methods, problem solving, and practical applications are emphasized. GE credit: SE. Effective: 2007 Fall Quarter.

**PLS 100B—Growth and Yield of Cultivated Plants (3)**
Lecture—3 hours. Prerequisite(s): PLS 100A; Or the equivalent of PLS 100A. Principles of the cellular mechanisms and hormonal regulation underlying plant growth, development, and reproduction. Emphasis on how these processes contribute to the harvestable yield of cultivated plants and can be managed to increase crop productivity and quality. GE credit: SE. Effective: 2017 Spring Quarter.

**PLS 100BL—Growth and Yield of Cultivated Plants Laboratory (2)**
Discussion/Laboratory—3 hours. Prerequisite(s): PLS 100B (can be concurrent); Or equivalent. Laboratory exercises in plant growth and development and their regulation, including photomorphogenesis, plant growth regulators, plant anatomy, seed germination, fruit ripening and senescence. Includes field trips to illustrate relationships to cropping and marketing systems. GE credit: SE. Effective: 2007 Fall Quarter.

**PLS 100C—Environmental Interactions of Cultivated Plants (3)**
Lecture—3 hours. Prerequisite(s): PLS 100A; Or the equivalent of PLS 100A. Principles of plant interactions with their physical and biological environments and their acquisition of the resources needed for growth and reproduction. Emphasis on how management practices and environmental conditions affect crop productivity. GE credit: SE. Effective: 2017 Spring Quarter.

**PLS 100CL—Environmental Interactions of Cultivated Plants Laboratory (2)**
Discussion/Laboratory—3 hours. Prerequisite(s): PLS 100C (can be concurrent) Techniques and instruments used to study plant interactions with their physical and biological environments, including light responses, transpiration, microclimatology, nutrient availability and utilization, biomass accumulation. Quantitative methods and modeling are emphasized. GE credit: SE. Effective: 2007 Fall Quarter.

**PLS 101—Agriculture and the Environment (3)**
Lecture—3 hours. Prerequisite(s): PLS 002; or Consent of Instructor. Focus on the interaction between agriculture and the environment to address the principles required to analyze conflict and develop solutions to complex problems facing society. Not open for credit to students who have completed AMR 101. (Former course AMR 101.). GE credit: SE, SL. Effective: 2007 Fall Quarter.
PLS 102—California Floristics (5)
Fieldwork; Laboratory—5 hours; Lecture—2 hours. Prerequisite(s): PLS 002 or BIS 002C; Or equivalent course in Plant Science. Survey of the California flora, emphasizing recognition of important plant families and genera and use of taxonomic keys to identify species. Phylogenetic relationships among families. Principles of systematics and taxonomy. Two Saturday field trips. (Same course as PLB 102.) GE credit: SE, VL. Effective: 2017 Fall Quarter.

PLS 105—Concepts in Pest Management (3)
Discussion/Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): CHE 008B; (PLS 002 or BIS 002B or BIS 002C) Introduction to the ecological principles of integrated pest management, biology of different classes of pests and the types of losses they cause, population assessment, evaluation of advantages and disadvantages of different techniques used for pest management, IPM programs. Not open for credit to students who have completed AMR 105. (Former course AMR 105.). GE credit: SE. Effective: 2017 Winter Quarter.

PLS 110—Crop Management Systems for Vegetable Production (4)
Discussion—1 hour; Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): PLS 002 or (BIS 002A, BIS 002B, BIS 002C) Horticultural principles applied to production and management systems for vegetable crops. Laboratory and discussion illustrate efficient field management and resource use practices. Not open for credit to students who have completed PLS 110C. (Former course PLS 110C.). GE credit: SE. Effective: 2017 Winter Quarter.

PLS 112—Forage Crop Production (3)
Lecture—3 hours. Prerequisite(s): PLS 002 or BIS 001C or BIS 002C; or Consent of Instructor. Forages as a world resource in food production. Ecological principles governing the adaptation, establishment, growth and management of perennial and annual forages, including pastures, rangelands and hay; aspects of forage quality which affect feeding value to livestock. Not open for credit to students who have completed AMR 112. (Former course AMR 112.). GE credit: SE. Effective: 2008 Spring Quarter.

PLS 113—Biological Applications in Fruit Tree Management (2)
Laboratory—3 hours; Lecture—1 hour. Prerequisite(s): PLS 002 or BIS 001C or BIS 002C; Or equivalent. Physiology, growth, development and environmental requirements of fruit trees and the cultural practices used to maintain them. Emphasis on the application of biological principles in the culture of commercially important temperate zone fruit tree species. Not open for credit to students that have completed PLB 173. (Former course PLB 173.). GE credit: SE. Effective: 2007 Fall Quarter.

PLS 114—Biological Applications in Fruit Production (2)
Laboratory—3 hours; Lecture—1 hour. Prerequisite(s): PLS 002 or BIS 001C or BIS 002C; PLS 113 recommended. Reproductive biology of tree crop species. Biological principles of fruit production, tree nutrition and orchard management for optimizing cropping. Laboratories emphasize hands-on work with orchard tree systems that are done specifically to produce the crop. Not open for credit to students who have completed PLB 174. (Former course PLB 174.). GE credit: SE. Effective: 2007 Fall Quarter.

PLS 116—Plant Morphology and Evolution (5)
Laboratory—4 hours; Lecture—3 hours. Prerequisite(s): Introductory Plant Biology (e.g., BIS 002C, PLS 002). Introduction to the form, development, and evolution of vascular plants. Emphasis given to the form and development of reproductive structures in ferns and seed-producing plants as a basis for determining evolutionary relationships. Not open for credit to students who have completed PLB 116. (Same course as PLB 116.) GE credit: SE, VL. Effective: 2015 Winter Quarter.

PLS 120—Applied Statistics in Agricultural Sciences (4)
Discussion/Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): Upper division standing. Application of statistical methods to design and analysis of research trials for plant, animal, behavioral, nutritional, and consumer sciences. Basic concepts and statistical methods are presented in lectures, laboratories emphasize data processing techniques, problem solving, and interpretation in specialized fields. Not open for credit for students who have completed AMR 120. (Former course AMR 120.). GE credit: QL. Effective: 2008 Spring Quarter.

PLS 123—Introduction to Plant & Crop Systems Modeling (3)
Lecture—3 hours. Prerequisite(s): college algebra/precalculus & college physics recommended. Restricted to upper division and graduate students. Modeling approaches commonly used in plant and crop applications. Fundamentals of how plant/crop models are developed and considerations regarding their limitations. Example model applications include degree-day and radiation-use-efficiency models of growth and yield, phenological models, and crop coefficients. GE credit: QL. Effective: 2019 Spring Quarter.
PLS 130—Rangelands: Ecology, Conservation and Restoration (3)
Lecture—3 hours. Prerequisite(s): PLS 002 or BIS 002B or BIS 002C; or Consent of Instructor. Upper division standing introduction to the ecological principles and processes important for an understanding of the dynamics of range ecosystems. Emphasis on ecological and evolutionary concepts underlying management strategies for conserving biological diversity and environmental quality in rangelands. Not open for credit to students who have completed AMR 130. (Former course AMR 130.). GE credit: SE. Effective: 2017 Winter Quarter.

PLS 131—Identification and Ecology of Grasses (2)
Discussion—5 hours; Laboratory—20 hours; Lecture—7.5 hours. Prerequisite(s): PLS 130 or PLS 102 or PLS 147 recommended. Taxonomy and identification of western grasses. Development of skills in using plant identification keys. Ecology and evolution of grasses in grazing ecosystems. Given the week following spring quarter. Not open for credit to students who have completed AMR 131. (Former course AMR 131.). GE credit: SE, VL. Effective: 2017 Spring Quarter.

PLS 135—Ecology and Community Structure of Grassland and Savannah Herbivores (3)
Lecture—3 hours. Prerequisite(s): (BIS 001A or BIS 001B); (PLS 002 or BIS 001C); General ecology course (ESP 100) recommended. Feeding ecology of grassland herbivores and its importance in evolution of herbivore communities and social systems. Optimal foraging, interspecific interactions, and primary productivity are considered as factors structuring natural and managed grassland and savannah systems. Not open for credit to students who have completed AMR 135. (Former course AMR 135.). Effective: 2007 Winter Quarter.

PLS 141—Ethnobotany (4)
Discussion/Laboratory—2 hours; Lecture—3 hours. Prerequisite(s): PLS 002 or BIS 001C or BIS 002C Relationships and interactions between plants and people, including human perceptions, management, and uses of plants, influences of plants on human cultures, and effects of human activity on plant ecology and evolution. Concepts, questions, methods, and ethical considerations in ethnobotanical research. Not open for credit to students who have completed PLB 141. (Former course PLB 141.). GE credit: OL, SE, SS, WE. Effective: 2008 Winter Quarter.

PLS 144—Trees and Forests (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): PLS 002 or BIS 001C or BIS 002C Biological structure and function of trees as organisms; understanding of forests as communities and as ecosystems; use of forests by humans; tree phenology, photosynthesis, respiration, soil processes, life histories, dormancy, forest biodiversity, and agroforestry. Not open for credit to students who have completed PLB 144 or ENH 144 or ERS 144. (Former course PLB 144, ENH 144, ERS 144.). (Same course as ESM 144.) GE credit: SE, VL. Effective: 2011 Fall Quarter.

PLS 147—California Plant Communities (3)
Lecture/Discussion—3 hours. Prerequisite(s): PLS 002 or BIS 002C Ecology, distribution, and species of California's plant communities. Environmental forces that determine these communities, the threats they face, and their conservation and restoration opportunities. Not open for credit to students who have completed PLB 147. (Former course PLB 147.). GE credit: SE, VL. Effective: 2012 Spring Quarter.

PLS 147L—California Plant Communities Field Study (1)
Discussion/Laboratory—3 hours. Prerequisite(s): (PLS 002 or BIS 002C); PLS 147 (can be concurrent); Concurrent or previous enrollment in PLS 147. Visits to many of northern California's plant communities, from the north coast to the Central Valley to the Sierras. Discussion of community ecology and hands-on identification of species. Two Saturday and two three-day field trips required. Not open for credit to students who have completed PLB 147. (Former course PLB 147.). GE credit: SE, VL. Effective: 2012 Spring Quarter.

PLS 150—Sustainability and Agroecosystem Management (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): SSC 010; CHE 002A; (PLS 002 or BIS 001C or BIS 002C) Interdisciplinary analysis of agricultural production and food systems with primary emphasis on biophysical processes. General concepts governing the functioning of temperate and tropical agroecosystems in relation to resource availability, ecological sustainability, and socio-economic viability. Comparative ecological analyses of agroecosystems. Not open for credit to students who have completed AMR 150. (Former course AMR 150.). GE credit: OL, SE, SL. Effective: 2008 Spring Quarter.

PLS 152—Plant Genetics (4)
Discussion/Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): BIS 001A or BIS 002A; or Consent of Instructor. Basic principles of transmission genetics, cytogenetics, population and quantitative genetics, and molecular genetics. Practical aspects of genetic crosses and analysis of segregating populations. Not open to students who have completed PLB 152. (Former course PLB 152.). GE credit: SE. Effective: 2007 Fall Quarter.
PLS 153—Plant, Cell, Tissue and Organ Culture (4)
Discussion—1 hour; Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): PLS 002 or BIS 001C or BIS 002C Basic and applied aspects of plant tissue culture including media preparation, micropropagation, organogenesis, embryogenesis, anther culture, protoplast culture and transformation. Not open for credit to students who have completed PLB 153. (Former course PLB 153.). GE credit: SE. Effective: 2007 Fall Quarter.

PLS 154—Introduction to Plant Breeding (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): PLS 152 or BIS 101; or Consent of Instructor. Principles, methods and applications of plant breeding and genetics to the improvement of crop plants. Illustration of how plant breeding is a dynamic, multidisciplinary, constantly-evolving science. Laboratory emphasizes hands-on experience in the basics of breeding through experiments. Not open for credit to students who have completed PLB 154. (Former course PLB 154.). GE credit: SE. Effective: 2007 Fall Quarter.

PLS 157—Physiology of Environmental Stresses in Plants (4)
Discussion—2 hours; Lecture—2 hours. Prerequisite(s): PLS 100C or PLB 111 or PLB 112 or ENH 102 or VEN 110 Stress concepts and principles; molecular, physiological, developmental and morphological characteristics enabling plants to avoid or tolerate environmental stresses; stress acclimation and adaptation processes; responses of wild and cultivated species to drought, flooding, nutrient deficiencies, salinity, toxic ions, extreme temperatures, etc. Not open for credit to students who have completed PLB 157. (Former course PLB 157.). GE credit: SE. Effective: 2007 Fall Quarter.

PLS 158—Mineral Nutrition of Plants (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): PLS 100A or PLB 111 or ENH 102 or VEN 110 Evolution and scope of plant nutrition; essential elements; mechanisms of absorption and membrane transporters; translocation and allocation processes; mineral metabolism; deficiencies and toxicities; genetic variation in plant nutrition; applications to management and understanding ecological effects of nutrient availability or deficiency. Not open for credit to students who have completed PLB 158. (Former course PLB 158.). GE credit: SE. Effective: 2007 Fall Quarter.

PLS 160—Agroforestry: Global and Local Perspectives (3)
Lecture/Discussion—3 hours. Prerequisite(s): (PLS 002 or BIS 001C or BIS 002C); (PLS 142 or PLS 150 or BIS 002B); Or general ecology course in lieu of PLS 142 or PLS 150 or BIS 002B. Traditional and evolving use of trees in agricultural ecosystems; their multiple roles in environmental stabilization and production of food, fuel, and fiber; and socioeconomic barriers to the adoption and implementation of agroforestry practices. Not open for credit to students who have previously taken AMR 160. (Former course AMR 160.). (Same course as IAD 160.) GE credit: SE. Effective: 2011 Spring Quarter.

PLS 162—Urban Ecology (3)
Lecture/Discussion—3 hours. Prerequisite(s): Course in general or plant ecology such as PLB 117, ESP 100, EVE 101, EVE 120 or PLS 163. Application of fundamental concepts and approaches in landscape and ecosystem ecology to urban ecosystems. Ecological and social drivers and responses. Landscape heterogeneity, nutrient dynamics, invasive species, altered hydrology and climate, and pollution. Discussion of primary literature. GE credit: SE, SL. Effective: 2017 Winter Quarter.

PLS 163—Ecosystem and Landscape Ecology (4)
Lecture/Discussion—4 hours. Prerequisite(s): Course in general, plant, or soil ecology such as EVE 117, PLB 117, ESP 100, EVE 101, or SSC 112. Integration of concepts to understand and manage ecosystems in a complex and changing world. Emphasis on interactions among biotic, abiotic and human factors and changes over space/time. Local to global controls over water, carbon and nutrients across ecosystems/landscapes. Not open for credit to students who have completed ECL 201. Effective: 2010 Winter Quarter.

PLS 164—Practicum in Ecological Restoration (1)
Fieldwork—3 hours. Prerequisite(s): ENH 160 recommended. Hands-on field course that exposes students to various aspects of ecological restoration throughout the seasonal restoration cycle with real-world practitioners. Emphasis on grassland/rangeland, riparian, and oak woodland communities. May be repeated up to 3 time(s). (P/NP grading only.) Effective: 2014 Spring Quarter.

PLS 170A—Fruit and Nut Cropping Systems (2)
Laboratory—3 hours; Lecture—1 hour. Prerequisite(s): PLS 002 or BIS 002C; or Consent of Instructor. Overview of production and handling systems of major pomological crops, analysis of current cultural and harvesting problems and concerns associated with commercial fruit growing. Not open for credit to students who have completed AMR 170A. (Former course AMR 170A.). GE credit: SE. Effective: 2017 Spring Quarter.
PLS 170B—Fruit and Nut Cropping Systems (2)
Laboratory—3 hours; Lecture—1 hour. Prerequisite(s): PLS 002 or BIS 002C; or Consent of Instructor. Overview of production and handling systems of major pomological crops, including analysis of current cultural and harvesting problems and concerns associated with commercial fruit growing. Not open for credit to students who have completed AMR 170B. (Former course AMR 170B.). GE credit: SE. Effective: 2017 Spring Quarter.

PLS 171—Principles and Practices of Plant Propagation (4)
Discussion—1 hour; Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): PLS 002 or BIS 001C or BIS 002C Principles and practices of propagating plants covering anatomical, physiological, and practical aspects. Not open for credit to students who have completed PLB 171. (Former course PLB 171.). GE credit: SE. Effective: 2007 Fall Quarter.

PLS 172—Postharvest Physiology and Technology (4)
Discussion/Laboratory—2 hours; Lecture—3 hours. Prerequisite(s): General plant science background (e.g., PLS 002, PLS 012); PLS 196 recommended. Overview of physiological processes related to maturation and senescence of plant products and their responses to postharvest stresses. Targeted approaches and technologies to maintain product quality and limit postharvest disorders. Not open for credit to students who have completed PLB 172. (Former course PLB 172.). GE credit: SE. Effective: 2008 Fall Quarter.

PLS 173—Molecular and Cellular Aspects of Postharvest Biology (3)
Lecture/Discussion—3 hours. Prerequisite(s): PLS 002 or BIS 001C or BIS 002C; Or equivalent. Basic concepts and current knowledge of issues relevant to postharvest biology. Mechanisms of fruit ripening, senescence, programmed cell death. Metabolism and functions of phytohormones, carbohydrates, lipids, pigments, flavor compounds, and phytonutrients at molecular and cellular levels. GE credit: SE. Effective: 2017 Spring Quarter.

PLS 174—Microbiology and Safety of Fresh Fruits and Vegetables (3)
Lecture—3 hours. Prerequisite(s): PLS 002 or BIS 001C or BIS 002C; Or equivalent. Overview of microorganisms on fresh produce, pre- and postharvest factors influencing risk of microbial contamination, attachment of microorganisms to produce, multiplication during postharvest handling and storage, and methods of detection. Mock outbreak trial and presentation of science-based forensic discovery. GE credit: SE. Effective: 2008 Fall Quarter.

PLS 176—Introduction to Weed Science (4)
Discussion/Laboratory—4 hours; Lecture—2 hours. Prerequisite(s): PLS 002 or BIS 001C or BIS 002C Weed biology and ecology, methods of weed management, biological control, herbicides and herbicide resistance. Weed control in managed and natural ecosystems; invasive species. Laws and regulations. Application of herbicides. Sight and software-assisted identification of common weeds. Not open for credit to students who have completed PLB 176. (Former course PLB 176.). GE credit: SE, VL. Effective: 2011 Fall Quarter.

PLS 178—Biology and Management of Aquatic Plants (3)
Lecture—3 hours. Prerequisite(s): (PLS 002 or BIS 001C or BIS 002C); (CHE 008B or CHE 118B); PLS 100C, PLB 111, ENH 102, or HYD 122 recommended. Brief survey of common and invasive fresh water plants and macroalgae, their reproductive modes, physiology, growth (photosynthesis, nutrient utilization), development (hormonal interactions), ecology, modes and impacts of invasion, and management. Two Saturday field trips required. Not open for credit to students who have completed former course PLB 178. (Former course PLB 178.). GE credit: SE. Effective: 2007 Fall Quarter.

PLS 188—Undergraduate Research Proposal (3)
Lecture/Discussion—3 hours. Prerequisite(s): Upper division standing. Preparation and review of a scientific proposal. Problem definition, identification of objectives, literature survey, hypothesis generation, design of experiments, data analysis planning, proposal outline and preparation. (Same course as BIT 188.) GE credit: OL, SE, WE. Effective: 2007 Fall Quarter.

PLS 189L—Laboratory Research in Plant Sciences (2-5)
Discussion—1 hour; Laboratory—3-12 hours. Prerequisite(s): PLS 188; and Consent of Instructor. Formulating experimental approaches to current questions in plant science; performance of proposed experiments. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 2008 Summer Quarter.

PLS 190—Seminar on Alternatives in Agriculture (2)
Discussion—1 hour; Seminar—1 hour. Prerequisite(s): Upper division standing or consent of instructor. Seminar on topics related to alternative theories, practices and systems of agriculture and the relationship of agriculture to the
environment and society. Scientific, technological, social, political and economic perspectives. May be repeated up to 2 time(s) for a total of three times. (P/NP grading only.) GE credit: SE. Effective: 2017 Winter Quarter.

**PLS 190C—Research Group Conference (1)**
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Advanced standing. Weekly conference on research problems, progress and techniques in the plant sciences. May be repeated for credit. May be repeated for credit. (P/NP grading only.) Effective: 2007 Fall Quarter.

**PLS 192—Internship (1-12)**
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Completion of 84 units. Work experience on or off campus in subject areas pertaining to plant and environmental sciences. Internship supervised by a faculty member. May be repeated for credit. (P/NP grading only.) Effective: 2007 Winter Quarter.

**PLS 193—Garden and Farm-Based Experiential Education Methods (2)**
Laboratory—3 hours; Lecture—1 hour. Prerequisite(s): Upper division standing or consent of instructor. Methods of teaching children and youth about fruit and vegetable production and consumption. Lesson and activity planning for garden and farm field trips. Basic biology, ecology, plant science, and crop management practices. Mentorship in experiential learning. Preparation of garden site. (P/NP grading only.) GE credit: OL, SE. Effective: 2015 Winter Quarter.

**PLS 194H—Senior Honors Thesis (1-2)**
Independent Study—3-6 hours. Prerequisite(s): Senior standing; overall GPA of 3.250 or higher and consent of master advisor. Independent study of selected topics under the direction of a member or members of the staff. Completion will involve the writing of a senior thesis. (P/NP grading only.) GE credit: SE, WE. Effective: 2016 Fall Quarter.

**PLS 196—Postharvest Technology of Horticultural Crops (3)**
Fieldwork—45 hours; Lecture/Discussion—45 hours. Prerequisite(s): Upper division or graduate student standing. Intensive study of postharvest considerations and current procedures and challenges in postharvest handling for fruits, nuts, vegetables, and ornamentals in California. Scheduled first two weeks immediately following last day of spring quarter. Not open for credit to students who have completed PLB 196. (Former course PLB 196.). (P/NP grading only.) GE credit: SE. Effective: 2007 Fall Quarter.

**PLS 197T—Tutoring in Plant Sciences (1-5)**
Tutorial—1-5 hours. Prerequisite(s): Consent of Instructor. Upper division standing, completion of course being tutored or the equivalent. Leading small voluntary discussion or lab groups affiliated with one of the department's regular courses. May be repeated up to 8 unit(s). (P/NP grading only.) Effective: 2007 Winter Quarter.

**PLS 198—Directed Group Study (1-5)**
Variable—3-15 hours. May be repeated for credit. (P/NP grading only.) Effective: 2007 Winter Quarter.

**PLS 199—Special Study for Advanced Undergraduates (1-5)**
Variable—3-15 hours. May be repeated for credit. (P/NP grading only.) Effective: 2007 Winter Quarter.

**PLS 205—Experimental Design and Analysis (5)**
Discussion/Laboratory—2 hours; Lecture—3 hours. Prerequisite(s): PLS 120; Or equivalent. Introduction to the research process and statistical methods to plan, conduct and interpret experiments. Not open for credit to students who have completed AGR 205. (Former course AGR 205.). Effective: 2010 Winter Quarter.

**PLS 206—Applied Multivariate Modeling in Agricultural and Environmental Sciences (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): PLS 120; (STA 106 or STA 108 or PLS 205) Multivariate linear and nonlinear models. Model selection and parameter estimation. Analysis of manipulative and observational agroecological experiments. Discriminant, principal component, and path analyses. Logistic and biased regression. Bootstrapping. Exercises based on actual research by UCD students. Not open for credit to students who have complete AGR 206. (Former course AGR 206.). Effective: 2017 Winter Quarter.

**PLS 212—Postharvest Biology and Biotechnology of Fruits and Nuts (3)**
Lecture—3 hours. Prerequisite(s): PLS 172 Review of postharvest biology of fruits and nuts and biotechnological approaches to address postharvest challenges. Morphology, biology and postharvest handling of fruits and nuts are presented along with current research, including biotechnology, and discussion of future research needs and approaches. Not open for credit to students who have completed POM 212. Effective: 2008 Spring Quarter.

**PLS 213—Postharvest Physiology of Vegetables (3)**
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): PLS 172 or PLS 100B or PLB 112 Comparative physiology of
harvest vegetables; emphasis on maturation, senescence, compositional changes, physiological disorders and effects of environmental factors. Concepts and research procedures. Not open for credit to students who have completed VCR 212. (Former course VCR 212.) Effective: 2010 Spring Quarter.

**PLS 220—Genomics and Biotechnology of Plant Improvement (3)**
Lecture—3 hours. Prerequisite(s): BIS 101; Or the equivalent. Integration of modern biotechnology and classical plant breeding including the impact of structural, comparative and functional genomics on gene discovery, characterization and exploitation. Also covers molecular markers, plant transformation, hybrid production, disease resistance, and novel output traits. Not open for credit to students who have completed VCR 220. (Former course VCR 220.). (Same course as GGG 220.) Effective: 2007 Winter Quarter.

**PLS 221—Genomics and Breeding of Vegetable Crops (3)**
Lecture—3 hours. Prerequisite(s): BIS 101; Or equivalent. Preview of genome structure, mapping, gene tagging and development of other genetic resources applied to improvement of major vegetables. For graduate students contemplating a career in modern vegetable breeding and biotechnology. Not open for credit to students who have completed VCR 221. (Former course VCR 221.). Effective: 2007 Winter Quarter.

**PLS 222—Advanced Plant Breeding (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): PLS 154; PLS 205; GGG 201D or ANG 107 recommended. Philosophy, methods, and problems in developing improved plant species. Topics include: inbreeding, heterosis, progeny testing, breeding methodology, index selection, germplasm conservation, and breeding for stress resistance. Laboratories include tours of breeding facilities and calculation and interpretation of quantitative data. Effective: 2014 Winter Quarter.

**PLS 230—Forest Biology (4)**
Lecture—3 hours; Seminar—1 hour. Prerequisite(s): Graduate standing or advanced undergraduate with consent of instructor. Cross-disciplinary review of forest biology, including physiology, genetics, pathology, ecology, and silviculture. Effective: 2014 Spring Quarter.

**PLS 290—Seminar (1-2)**
Seminar—1-2 hours. Topics of current interest related to Plant Sciences. (S/U grading only.) Effective: 2007 Winter Quarter.

**PLS 290C—Research Conference (1)**
Discussion—1 hour. Prerequisite(s): Consent of Instructor. May be repeated for credit. (S/U grading only.) Effective: 2007 Winter Quarter.

**PLS 297T—Tutoring in Plant Sciences (1-5)**
Tutorial—1-5 hours. Prerequisite(s): Consent of Instructor. Graduate standing; completion of course to be tutored or the equivalent. Designed for graduate students who desire teaching experience but are not teaching assistants. May be repeated up to 5 unit(s) Same course may not be tutored more than one time. (S/U grading only.) Effective: 2007 Winter Quarter.

**PLS 299—Research (1-12)**
Variable—3-36 hours. May be repeated for credit. (S/U grading only.) Effective: 2007 Winter Quarter.

The Political Science Major Program

Political science is the study of politics and political systems at the local, national, and international levels. It concerns not only the institutions of government but also the analysis of such phenomena as political behavior, political values, political change and stability, parties, pressure groups, bureaucracies, administrative behavior, justice, national security, and international affairs.

The Program. The Department of Political Science offers two major programs: political science and political science-public service. The political science major aims to provide the student with a broad understanding of political concepts, political institutions, political behavior, and political processes. The political science-public service major is for students who desire opportunities for practical hands-on experience in their major. It differs in particular from the political science major in its internship requirement and its focus on the American political system.

Major Advisor. Consult Department office.

Internships and Career Alternatives. Both the proximity of UC Davis to the state capitol and the programs offered by the UC Washington Center afford exceptional internship possibilities in local, state, and national government offices, providing students with actual experience in politics and government service while still attending school. A student who majors in political science acquires research and analytic skills relevant to many professional fields. Consequently, the majors offered in political science are valuable not only in providing students with a better understanding of politics and political systems, but also as a first step toward careers in teaching, law, management, government, urban planning, journalism, politics, administration, or for graduate studies in numerous fields.

Public Affairs Internship Program. This program is open to upper division students in any major who want to obtain an internship in the area of government and public service. Information and applications are available from the Political Science Department in 467 Kerr Hall.

Graduate Study. The Department of Political Science offers a program of graduate study and research leading to a Ph.D. degree or an M.A./J.D. joint degree. The M.A./J.D. joint degree is done only in conjunction with UC Davis School of Law. Information concerning admission to these programs and requirements for completion are available in the Graduate Program Coordinator office.

Graduate Advisor. Consult Graduate Program Coordinator office.

American History and Institutions. This University requirement may be satisfied by passing any one of the following Political Science courses: 001, 005, 100, 102, 104, 105, 106, 108, 109, 113, 130, 131, 160, 163; see also under American History and Institutions requirements.

**The Political Science Major Program**

Political science is the study of politics and political systems at the local, national, and international levels. It concerns not only the institutions of government but also the analysis of such phenomena as political behavior, political values, political change and stability, parties, pressure groups, bureaucracies, administrative behavior, justice, national security, and international affairs.

**Graduate Study.** The Department of Political Science offers a program of graduate study and research leading to a Ph.D. degree or an M.A./J.D. joint degree. The M.A./J.D. joint degree is done only in conjunction with UC Davis School of Law. Information concerning admission to these programs and requirements for completion are available in the Graduate Program Coordinator office.

The Master of Arts degree is offered only en route to the Ph.D.

**Graduate Advisor.** Consult Graduate Program Coordinator office.

Political science is the study of politics and political systems at the local, national, and international levels. It concerns not only the institutions of government but also the analysis of such phenomena as political behavior, political values, political change and stability, parties, pressure groups, bureaucracies, administrative behavior, justice, national security, and international affairs.

Internships and Career Alternatives. Both the proximity of UC Davis to the state capitol and the programs offered by the UC Washington Center afford exceptional internship possibilities in local, state, and national government offices, providing students with actual experience in politics and government service while still attending school. A student who majors in political science acquires research and analytic skills relevant to many professional fields. Consequently, the majors offered in political science are valuable not only in providing students with a better understanding of politics and political systems, but also as a first step toward careers in teaching, law, management, government, urban planning, journalism, politics, administration, or for graduate studies in numerous fields.

Public Affairs Internship Program. This program is open to upper division students in any major who want to obtain an internship in the area of government and public service. Information and applications are available from the Political Science Department in 467 Kerr Hall.

Political Science | POL Courses

Courses in POL:

POL 001—American National Government (4)
Discussion—1 hour; Lecture—3 hours. Survey of American national government, including the constitutional system, political culture, parties, elections, the presidency, Congress, and the courts. GE credit: ACGH, SS, WE. Effective: 1997 Winter Quarter.

POL 002—Introduction to Comparative Politics (4)
Discussion—1 hour; Lecture—3 hours. Introduction to basic concepts in political analysis and application of them in comparative studies of selected countries. Coverage is given to cultural and other informal dimensions of politics as well as to more formal political and governmental structures. GE credit: SS, WC, WE. Effective: 1997 Winter Quarter.

POL 003—International Relations (4)
Discussion—1 hour; Lecture—3 hours. International conflict and cooperation, including the Cold War, nuclear weapons, and new techniques for understanding international politics. GE credit: SS, WC, WE. Effective: 2011 Fall Quarter.

POL 004—Basic Concepts in Political Theory (4)
Discussion—1 hour; Lecture—3 hours. Analysis of such concepts as the individual, community, liberty, equality, justice, and natural law as developed in the works of the major political philosophers. GE credit: AH, SS, WC, WE. Effective: 1997 Winter Quarter.

POL 005—Contemporary Problems of the American Political System (4)
Discussion—1 hour; Lecture—3 hours. In-depth treatment of selected problems and issues of American politics, governmental institutions, and policies. GE credit: ACGH, SS, WE. Effective: 1997 Winter Quarter.

POL 007—Contemporary Issues in Law and Politics (4)
Seminar—4 hours. Limited enrollment; open to students having no more than 40.1 units. Seminar focusing on the political dimensions of American law and institutions. Examines the role of courts in resolving contemporary issues of law and politics including abortion, capital punishment, and civil rights. GE credit: ACGH, SS, WE. Effective: 1997 Winter Quarter.

POL 011A—America Decides: Who Will Win This Year’s Election? (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Survey of factors influencing presidential and congressional
elections. Analysis of candidate nominations, campaign strategy, campaign finance, media coverage, and voter
decision-making. GE credit: ACGH, SS, WE. Effective: 2016 Fall Quarter.

**POL 011B—Citizen Lawmaking: Direct Democracy, Public Policy & Political Representation in America (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Analysis of direct participation by citizens in the lawmaking
process. GE credit: ACGH, SS, WE. Effective: 2016 Fall Quarter.

**POL 011C—Politics and Film (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Survey of portrayals of politics and policy issues in moving
pictures. Analysis of political processes, policy development, social mores, and historical periods as highlighted in
Hollywood movies, television, and/or documentary films. GE credit: ACGH, SS, VL, WE. Effective: 2016 Fall Quarter.

**POL 011D—Political Persuasion (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Examination of political influence and persuasion. GE credit: SS,
WE. Effective: 2016 Fall Quarter.

**POL 012A—Politics and Sports (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Core issues in American and world politics through the lens of
sports and the athletes who play them. The introduction of American civil rights movement, the Cold War, Middle
East Tensions, and democratization. GE credit: SS, WE. Effective: 2016 Fall Quarter.

**POL 012B—Climate Change and Politics (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Analysis of political institutions’ response and adaptation to
climate change. GE credit: SS, WE. Effective: 2016 Fall Quarter.

**POL 012Y—Data Visualization in the Social Sciences (4)**
Laboratory—1.5 hours; Lecture—2 hours; Web Virtual Lecture—1.5 hours. Introduction to quantitative data across the
social sciences (Communications, Political Science, Psychology, Sociology, and other disciplines). Transforming
data, describing data, producing graphs, visual reasoning, and interpretations. (Same course as CMN 012Y, SOC
012Y, and PSC 012Y.) GE credit: QL, VL. Effective: 2016 Spring Quarter.

**POL 051—Scientific Study of Politics (4)**
Discussion—1 hour; Lecture—3 hours. Introduction to the basic principles of the scientific study of politics. Research
design and empirical analysis of data with applications to different methodological approaches and different
substantive areas in political science. GE credit: AH, QL, SE, SS, VL, WE. Effective: 2006 Fall Quarter.

**POL 090X—Lower Division Seminar (4)**
Seminar—4 hours. Prerequisite(s): Consent of Instructor. Lower division standing. Limited enrollment. Examines
fundamental issues and concepts that shape the study and practice of politics. Students will read, discuss and write
about some of the most significant texts in political science in order to develop a foundation for the study of

**POL 099—Special Study for Undergraduates (1-5)**
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

**POL 100—Local Government and Politics (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): POL 001 recommended. Politics and government
of local communities in the United States, including cities, counties and special districts. Emphasizes sources and
varieties of community conflict, legislative and executive patterns, expertise, decision making and the politics of
structure. Observation of local governing boards. GE credit: ACGH, SS, WE. Effective: 2016 Spring Quarter.

**POL 102—Urban Public Policy (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): Consent of Instructor. POL 001 recommended.
Political and economic relationships among central cities, suburbs, and regional, state, and federal governments.
Focuses upon policy areas such as poverty, transportation, welfare, and housing, and upon who governs and who
benefits from the policies in these areas. GE credit: ACGH, DD, QL, SS, WE. Effective: 2016 Spring Quarter.

**POL 104—California State Government and Politics (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): Consent of Instructor. POL 001 recommended.
California political system. Political culture, constitution, elections and parties, direct democracy, legislature,
governor, executive branch, courts, finances, state-local relations and policy issues. GE credit: ACGH, SS, WE.
Effective: 2016 Spring Quarter.

**POL 105—The Legislative Process (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): POL 001 recommended. Legislative process with
emphasis on the United States Congress; legislative organization and procedures, legislative leadership and policy making, legislators and constituents, relations between Congress and other agencies. GE credit: ACGH, SS, WE. Effective: 2016 Spring Quarter.

**POL 106—The Presidency (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): POL 001 recommended. American presidencies origins and development; presidential power and influence as manifest in relationships with Congress, courts, parties, and the public in the formulation and administration of foreign and domestic policy; nominations, campaigns, and elections. GE credit: ACGH, SS, WE. Effective: 2016 Spring Quarter.

**POL 107—Environmental Politics and Administration (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): POL 001 recommended. Environment as a political issue in the United States. Development of administrative mechanisms for handling environmental problems. Changing role of Congress, the presidency, the bureaucracy and the courts in environmental policy formulation and implementation. GE credit: ACGH, QL, SS, WE. Effective: 2016 Spring Quarter.

**POL 108—Policy Making in the Public Sector (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): Consent of Instructor. POL 001 recommended. Theoretical rationale for governmental activity, program evaluation, PPBS, positive theories of policy making, the quantitative study of policy determinants, implementation, and proposals for improved decision making. GE credit: ACGH, QL, SS, WE. Effective: 2016 Spring Quarter.

**POL 109—Public Policy and the Governmental Process (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): POL 001 recommended. Processes of formulating public policy, including individual and collective decision making, political exchange, competition, bargaining, coalition formation and the allocation of public goods, resources and opportunities. GE credit: ACGH, QL, SS, WE. Effective: 2016 Spring Quarter.

**POL 110—The Strategy of Politics (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): POL 001 recommended. Introduction to game theory. Explanation of the behavior of individuals in strategic interaction. Rational and behavioral approaches. Applications to political science and other fields. GE credit: QL, SS, WE. Effective: 2016 Spring Quarter.

**POL 112—Contemporary Democratic Theory (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): POL 004 recommended. Major contemporary attempts to reformulate traditional democratic theory, attempts to replace traditional theory by conceptual models derived from modern social science findings. GE credit: AH, SS, WE. Effective: 2016 Spring Quarter.

**POL 113—American Political Thought (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): POL 004 recommended. Origins and nature of American political thought. Principles of American thought as they emerge from the founding period to the present. GE credit: ACGH, AH, SS, WE. Effective: 2016 Spring Quarter.

**POL 114—Quantitative Analysis of Political Data (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): POL 051 recommended. Logic and methods of analyzing quantitative political data. Topics covered include central tendency, probability, correlation, and non-parametric statistics. Particular emphasis will be placed on understanding the use of statistics in political science research. GE credit: AH, QL, SE, SS, VL, WE. Effective: 2016 Spring Quarter.

**POL 115—Medieval Political Thought (4)**
Lecture—3 hours; Term Paper. Prerequisite(s): POL 004 recommended. Examination of the ideas central to medieval political thinking. Emphasis will be upon the thoughts of the major political thinkers of the period, rather than upon political history. GE credit: AH, SS, WE. Effective: 2016 Spring Quarter.

**POL 116—Foundations of Political Thought (4)**
Lecture/Discussion—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): POL 004 recommended. Analysis and evaluation of the seminal works of a major political philosopher or of a major problem in political philosophy. May be repeated up to 1 time(s) when topic differs. GE credit: AH, SS, WC, WE. Effective: 2016 Spring Quarter.

**POL 117—Topics in the History of Political Thought (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): POL 004 recommended. Political thought of a specific historical period. Topics may include: Ancient Athens, the Italian Renaissance, the Enlightenment, or Nineteenth Century Germany. May be repeated up to 1 time(s) when topics differ. GE credit: SS, WE. Effective: 2016 Spring Quarter.
POL 118A—History of Political Theory: Ancient (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): POL 004 recommended. Critical analyses of classical and medieval political philosophers such as Plato, Aristotle, Cicero and St. Thomas. GE credit: AH, SS, WC, WE. Effective: 2016 Spring Quarter.

POL 118B—History of Political Theory: Early Modern (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): POL 004 recommended. Critical analysis of the works of early modern political philosophers such as Machiavelli, Montaigne, Hobbes, Locke and Hume. GE credit: AH, SS, WC, WE. Effective: 2016 Spring Quarter.

POL 118C—History of Political Theory: Late Modern (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): POL 004 recommended. Critical analyses of the works of late modern political philosophers such as Rousseau, Kant, Hegel, Tocqueville, Mill, Marx and Nietzsche. GE credit: AH, SS, WC, WE. Effective: 2016 Spring Quarter.

POL 119—Contemporary Political Thought (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): POL 004 recommended. Contemporary political thought from the end of the nineteenth century to the present. Emphasis upon an individual philosopher, concept, or philosophical movement; e.g., Nietzsche, Continental political thought, Rawls and critics, theories of distributive justice, feminist theory. GE credit: AH, SS, WC, WE. Effective: 2016 Spring Quarter.

POL 120—Theories of International Politics (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): Consent of Instructor. POL 003 recommended. Major contemporary approaches to the study of international politics, including balance of power, game theory, Marxist-Leninist theory, systems theory, and decision-making analysis. GE credit: SS, WE. Effective: 2016 Spring Quarter.

POL 121—Scientific Study of War (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): POL 003 recommended. Analysis of political processes involved in the initiation, conduct and termination of modern interstate warfare. GE credit: QL, SS, WE. Effective: 2016 Spring Quarter.

POL 122—International Law (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): POL 003 recommended. Selected topics in international law; territory, sovereign immunity, responsibility, the peaceful settlement or nonsettlement of international disputes. GE credit: SS, WE. Effective: 2016 Spring Quarter.

POL 123—The Politics of Interdependence (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): Consent of Instructor. POL 003 recommended. In the past several decades, growing economic interdependence has generated new problems in international relations. Course deals with difficulties in managing complex interdependence and its implication on national policies and politics. GE credit: SS, WE. Effective: 2016 Spring Quarter.

POL 124—The Politics of Global Inequality (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): POL 003 recommended. Analysis of current economic and political international relations resulting from a long standing division of the global system into rich and poor regions. GE credit: SS, WC, WE. Effective: 2016 Spring Quarter.

POL 126—Ethnic Self-Determination and International Conflict (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): POL 003 recommended. Compares the claims of the state and ethnic peoples in countries undergoing internal conflicts; e.g., South Africa, Northern Ireland. Analyzes the role of the international community in facilitating the peaceful resolution of conflicts. GE credit: SS, WC, WE. Effective: 2016 Spring Quarter.

POL 129—Special Studies in International Politics (4)
Lecture—3 hours; Term Paper. Prerequisite(s): POL 003 recommended. Intensive examination of one or more special problems in international politics. May be repeated once for credit when different topic is studied. May be repeated up to 1 time(s). GE credit: SS, WE. Effective: 2016 Spring Quarter.

POL 130—Recent U.S. Foreign Policy (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): Consent of Instructor. POL 003 recommended. Broad survey of the development of U.S. foreign policy in twentieth century with emphasis on transformation of policy during and after World War II, and the introduction to analytic tools and concepts useful for understanding of current foreign policy issues. GE credit: ACGH, SS, WE. Effective: 2016 Spring Quarter.
POL 131—Analysis of U.S. Foreign Policy (4)
Lecture—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. POL 003 recommended. Detailed presentation and examination of the formulation of execution of U.S. foreign policy. Survey of numerous factors influencing policy outcomes and how such determinants vary according to policy issue areas. GE credit: SS, WE. Effective: 2016 Spring Quarter.

POL 132—National Security Policy (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): POL 003 recommended. Development of national security policies since 1945. Analysis of deterrence and assumptions upon which it is based. Effects of nuclear weapons upon conduct of war, alliance systems, and the international system. Prospects of security and stability through arms control. GE credit: SS, WE. Effective: 2016 Spring Quarter.

POL 134—Africa and U.S. Foreign Policy (4)

POL 135—International Politics of the Middle East (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): Consent of Instructor. POL 003 recommended. International politics of the Middle East as a microcosm of world politics. The Middle East as a regional system. Domestic and International Politics in the Middle East. Changing Political Structures in the Middle East. Superpower involvement in the Middle East. GE credit: SS, WE. Effective: 2016 Spring Quarter.

POL 136—The Arab-Israeli Conflict (4)

POL 137—International Relations in Western Europe (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): POL 003 recommended. Analysis of European unity, problems of the Atlantic alliance, Atlantic political economy, East-West relations, communism in Western Europe and the relationship between domestic politics and foreign policy. GE credit: SS, WC, WE. Effective: 2016 Spring Quarter.

POL 139—Special Studies in Foreign Policy (4)
Lecture—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. POL 003 recommended. Extensive examination of one or more special problems in foreign policy. May be repeated up to 1 time(s) when topic differs. Effective: 2016 Spring Quarter.

POL 140A—Comparative Political Institutions: Electoral Systems (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): POL 002 recommended. Workings of electoral institutions, focusing on systems used to elect presidents and assemblies, pass laws, and generally make decisions. Examples from systems throughout the world, including cases from both the advanced industrial and developing worlds. GE credit: QL, SS, WE. Effective: 2016 Spring Quarter.

POL 140B—Comparative Political Institutions: Parties (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): Consent of Instructor. POL 002 recommended. Factors shaping political parties and their role in democratic representation. GE credit: SS, WE. Effective: 2016 Spring Quarter.

POL 140C—Comparative Political Institutions: Legislatures (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): Consent of Instructor. POL 002 recommended. Examination of legislatures from a comparative perspective. GE credit: SS, WE. Effective: 2016 Spring Quarter.

POL 140D—When Institutions Fail (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): POL 002 recommended. Examination of factors contributing to the success and failure of political institutions. GE credit: QL, SS, WE. Effective: 2016 Spring Quarter.

POL 140E—Policy-Making Processes (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): POL 002 recommended. Comparative analysis of policy-making in the U.S. and other countries. GE credit: QL, SS, WE. Effective: 2016 Spring Quarter.
POL 142A—Comparative Development: Political Development in Modernizing Societies (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): Consent of Instructor. POL 002 recommended. Nature and sequence of political development; its economic and social concomitants; role of elites, military, bureaucracy, and party systems; social stratification and group politics; social mobilization and political participation; instability, violence, and the politics of integration. GE credit: SS, WC, WE. Effective: 2016 Spring Quarter.

POL 142B—Comparative Development: Politics and Inequality (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): Consent of Instructor. POL 002 recommended. Linkages between politics and the distribution of social and economic goods. Impact of civil rights legislation, the politics of welfare states, and the effects of political participation on the distribution of goods. GE credit: SS, WC, WE. Effective: 2016 Spring Quarter.

POL 142C—Comparative Political Development: Democracy and Democratization (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): POL 002 recommended. Examination of conditions promoting democratization and democratic stability. GE credit: SS, WE. Effective: 2016 Spring Quarter.

POL 143A—Latin American Politics (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): POL 002 recommended. Issues related to democratic consolidation in Latin America, with a regional focus on South America. Topics include transitions to democracy, the role of the military, political economy, and political behavior. GE credit: SS, WC, WE. Effective: 2016 Spring Quarter.

POL 143B—Mexican Politics (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): POL 002 recommended. Introduction to the politics of contemporary Mexico. Focus on rise, fall, and aftermath of Mexico's one-party dominant system. GE credit: SS, WC, WE. Effective: 2016 Spring Quarter.

POL 144A—Politics of Post-Communist Countries: East European Politics (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): POL 002 recommended. Post-war democratization, state-building and economic reform in East European states. GE credit: SS, WC, WE. Effective: 2016 Spring Quarter.

POL 144B—Politics of Post-Communist Countries: Russia (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): POL 002 recommended. Democratization, state-building and economic reform; creation of new institutions; impacts of Soviet rule. GE credit: SS, WC, WE. Effective: 2016 Spring Quarter.

POL 145B—Politics in Israel (4)
Lecture—3 hours; Term Paper. Pass One restricted to Political Science, Political Science-Public Service, and International Relations majors. Introduction to the domestic politics of Israel in comparative perspective, including issues of internal cultural diversity, religion and politics, fragmentation of the political party system, and coalition governance. GE credit: SS, WC. Effective: 2019 Spring Quarter.

POL 146A—Politics of Africa: Issues in Contemporary African Politics (4)

POL 146B—Politics of Africa: Development in Africa (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): POL 002 recommended. Political and economic development within Sub-Saharan Africa. States and institutions, democracy, party systems, military coups/rule, bureaucracy/corruption, race/ethnicity, national/regional integrations, trade unions, economic development strategies, class formation, and women's roles and ideology. GE credit: SS, WC, WE. Effective: 2016 Spring Quarter.

POL 147A—West European Politics (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): Consent of Instructor. POL 002 recommended. Evolution, politics, and contemporary problems of selected political systems of Western Europe. GE credit: SS, WC, WE. Effective: 2016 Spring Quarter.

POL 147B—West European Politics: British Politics (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): Consent of Instructor. POL 002 recommended.
Evolution, politics, and contemporary problems of Britain's political system. GE credit: SS, WC, WE. Effective: 2016 Spring Quarter.

**POL 147C—West European Politics: French Politics (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): Consent of Instructor. POL 002 recommended. Evolution, politics and contemporary problems of France's political system. GE credit: SS, WC, WE. Effective: 2016 Spring Quarter.

**POL 147D—West European Politics: German Politics (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): POL 002 recommended. Evolution, politics and contemporary problems of Germany's political system. GE credit: SS, WC, WE. Effective: 2016 Spring Quarter.

**POL 148A—Government and Politics of East Asia: China (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): POL 002 recommended. Evolution of political institutions and political culture in China with emphasis on the post-1949 period. Primary attention to nationalism, modernization and political efficacy. GE credit: SS, WC, WE. Effective: 2016 Spring Quarter.

**POL 148B—Government and Politics in East Asia: Japan (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): POL 002 recommended. Japanese politics, with an emphasis on the postwar period. Particular emphasis on political parties, elections, political economy, and social problems. GE credit: SS, WC, WE. Effective: 2016 Spring Quarter.

**POL 148C—Government and Politics in East Asia: Southeast Asia (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): POL 002 recommended. Evolution of political institutions and economy of selected nations in Southeast Asia. Emphasis on imperialist legacy, nation building in multi-ethnic communities, and contrasts in economic performance. GE credit: SS, WC, WE. Effective: 2016 Spring Quarter.

**POL 150—Judicial Politics and Constitutional Interpretation (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): POL 001 recommended. Politics of judicial policy making, issues surrounding constitutional interpretation and decision making, prerequisite for courses on the politics of constitutional law. GE credit: ACGH, DD, SS, WE. Effective: 2016 Spring Quarter.

**POL 151—The Constitutional Politics of the First Amendment and the Right to Privacy. (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): POL 001 recommended. Constitutional politics surrounding such issues as the right to free expression, associational rights, the right to free exercise of religious beliefs and the right to privacy. GE credit: ACGH, DD, SS, WE. Effective: 2016 Spring Quarter.

**POL 152—The Constitutional Politics of the Equality (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): POL 001 recommended. Constitutional politics of equality in the American political system; issues surrounding constitutional doctrine and judicial policymaking; special attention on racial and sexual equality. GE credit: ACGH, DD, SS, WE. Effective: 2016 Fall Quarter.

**POL 153—The Constitutional Politics of the Justice System (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): POL 001 recommended. Constitutional politics of the American criminal justice system. Issues surrounding constitutional doctrine and judicial policymaking on issues such as search and seizure. Arrest, trial, incarceration and other issues of due process. GE credit: ACGH, DD, SS, WE. Effective: 2016 Spring Quarter.

**POL 154—Legal Philosophy (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): POL 001 recommended. Analysis of the nature and functions of law; law as an instrument of social control and the relationship between law and morality. GE credit: SS, WE. Effective: 2016 Spring Quarter.

**POL 155—Judicial Process and Behavior (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): POL 001 recommended. Analysis of the behavior of judges and courts in the political process. Techniques of judicial decision making. Relationships among courts and other decision-making bodies. GE credit: ACGH, SS, WE. Effective: 2016 Spring Quarter.

**POL 160—American Political Parties (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): POL 001 recommended. Analysis of the structured operations of the party system in the United States; party functions and organizations, nomination processes, campaigns and elections, party trends and reforms. GE credit: ACGH, DD, QL, SS, WE. Effective: 2016 Fall Quarter.
POL 161—Ballots, Bucks, and Maps: The Rules of the Electoral Game in American Politics (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Analysis of laws and court cases on the organization and administration of elections in the United States. Topics include campaign finance, redistricting, voting rights, race and representation, and comparisons with other democracies. GE credit: ACGH, DD, SS. Effective: 2018 Fall Quarter.

POL 161—Ballots, Bucks, & Maps: The Rules of the Electoral Game in American Politics (4) Review all entries
Lecture—3 hours; Term Paper/Discussion. Analysis of laws and court cases on the organization and administration of elections in the United States. Topics include campaign finance, redistricting, voting rights, race & representation, and comparisons with other democracies. GE credit: ACGH, DD, SS. Effective: 2019 Fall Quarter.

POL 162—Elections and Voting Behavior (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): POL 001 recommended. Analysis of American elections and partisan behavior; political socialization, political participation, partisanship and individual and group determinants of voting. GE credit: ACGH, DD, SS. Effective: 2016 Spring Quarter.

POL 163—Group Politics (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): POL 001 recommended. Groups, institutions and individuals, especially in American politics. Historical and analytical treatment of group theories as applied to interest groups (especially labor, business, agriculture, science, military); to racial, ethnic and sectional groups; to parties, public and legislative groups, bureaucracies. GE credit: ACGH, DD, SS, WE. Effective: 2016 Spring Quarter.

POL 164—Public Opinion (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): Consent of Instructor. POL 001 recommended. Nature of public opinion in America as it is supposed to be and as it is. Distribution of opinions among different publics and the significance of that distribution for system stability and institutions. Opinion polling and its problems. GE credit: ACGH, DD, SS, WE. Effective: 2016 Spring Quarter.

POL 165—Mass Media and Politics (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): POL 001 recommended. Organization of and decision making within the media; media audiences and the effect of the media on attitudes and behavior; the relationship of the government to the media (censorship, secrecy, freedom of the press, government regulation); the media in election campaigns. GE credit: SS, WE. Effective: 2016 Spring Quarter.

POL 166—Women in Politics (4)
Discussion—1 hour; Lecture—3 hours; Seminar—1 hour. Prerequisite(s): POL 001 recommended. Role of women in American politics. Historical experiences; contemporary organizations and strategies; areas of legislative concern; the impact of differences in social class, race, and ethnicity upon the involvement of women in politics. GE credit: ACGH, DD, SS, WE. Effective: 2016 Fall Quarter.

POL 168—Chicano Politics (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): POL 001 recommended. Political aspects of Chicano life in America; examines the Chicano's political role as it has been historically defined by different groups in society and the Chicano's responses to his/her political environment. GE credit: ACGH, DD, SS, WE. Effective: 2016 Spring Quarter.

POL 170—Political Psychology (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): POL 001 recommended. Overview to the growing literature on political psychology. Introduction to how psychological concepts (personality, attitudes, stereotypes, heuristics, affect, identity, group dynamics) help us understand how citizens think about politics. GE credit: SS, WE. Effective: 2016 Spring Quarter.

POL 171—The Politics of Energy (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): POL 001 recommended. Nature and performance of political processes for making energy choices at the international, national and state levels. Interaction of energy policy with other political goals and the ability of governmental institutions to overcome constraints on policy innovation. GE credit: SS, WE. Effective: 2016 Spring Quarter.

POL 172—American Political Development (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): POL 001 recommended. Systematic analysis of contemporary issues in American political development: historical determinants of political change; the timing and character of institutional development; conditions for successful political action. Democratization, cultural change, party formation, state-building, constitutionalism, race relations. GE credit: ACGH, DD, SS, WE. Effective: 2016 Spring Quarter.
POL 174—Government and the Economy (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): POL 001 recommended. Political basis of economic policy (taxation, spending and regulation); impact of prices, employment and growth on political demands; elite responses to economic conditions; policy alternatives and the public interest. GE credit: SS, WE. Effective: 2016 Spring Quarter.

POL 175—Science, Technology, and Policy (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): Consent of Instructor. POL 001 recommended. Analysis of policymaking for science and the use of scientific expertise for making decisions about technology. Topics include funding of basic research, relationship of science to technological development, science and military policy, technological risks, technology assessment and scientists and politics. GE credit: QL, SS, WE. Effective: 2016 Spring Quarter.

POL 176—Racial Politics (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): POL 001 recommended. Race, racial attitudes and racial policies in the United States with a specific emphasis on African Americans. GE credit: ACGH, DD, SS, WE. Effective: 2016 Spring Quarter.

POL 179—Special Studies in Comparative Politics (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): Consent of Instructor. POL 002 recommended. Intensive examination of one or more special problems appropriate to comparative politics. Coverage is given to formal and informal political institutions, economically developing and developed countries, and non-democratic, democratic, and democratizing countries. May be repeated up to 1 time(s). GE credit: SS, WE. Effective: 2016 Spring Quarter.

POL 180—Bureaucracy in Modern Society (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): POL 001 or POL 002 recommended. Role of bureaucracy in a complex society, with emphasis upon changing relationships between government and the economy; consequences of rapid technological and social change for bureaucratic structures and processes; the problems of reconciling expertise and democracy and increasing the responsiveness of public bureaucracy. GE credit: ACGH, SS, WE. Effective: 2016 Spring Quarter.

POL 183—Administrative Behavior (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): POL 001 recommended. Implications for American public administration of evolving concepts about behavior in organizations. GE credit: ACGH, SS, WE. Effective: 2016 Spring Quarter.

POL 187—Administrative Theory (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): POL 004 recommended. Historical and critical analysis of the principal theories of organization and management of public agencies in light of such concepts as decision making, bureaucracy, authority and power, communication and control; examination of role of government bureaucracies in the total society. GE credit: SS, WE. Effective: 2016 Spring Quarter.

POL 190—International Relations (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): Consent of Instructor. POL 003 recommended. Analysis and evaluation of substantive issues in contemporary international relations. Readings drawn from current academic and non-academic periodicals. GE credit: SS, WE. Effective: 2016 Fall Quarter.

POL 192A—Internship in Public Affairs (5)
Variable. Prerequisite(s): Enrollment dependent on availability of intern positions with highest priority assigned to students with Political Science Public Service major; upper division standing. Supervised internship and study in political, governmental, or related organizations. (P/NP grading only.) GE credit: ACGH, SS, WE. Effective: 1997 Winter Quarter.

POL 192B—Internship in Public Affairs (5)
Variable. Prerequisite(s): POL 192A; Enrollment dependent on availability of intern positions with highest priority assigned to students with Political Science-Public Service major; upper division standing. Supervised internship and study in political, governmental, or related organizations. (P/NP grading only.) GE credit: ACGH, SS, WE. Effective: 1997 Winter Quarter.

POL 193—Research in Practical Politics (2)
Project (Term Project)—6 hours. Prerequisite(s): POL 192A; POL 192B; Open only to Political Science-Public Service
majors, for whom it is required. Supervised preparation of an extensive paper relating internship experience to concepts, literature, and theory of political science. GE credit: SS, WE. Effective: 1997 Winter Quarter.

POL 193W—Washington Center Research Seminar (4)
Independent Study—3 hours; Lecture/Discussion—1 hour; Tutorial—0.5 hours. Prerequisite(s): POL 192W (can be concurrent); POL 192W required concurrently. Core academic component of Washington Program. Topics coordinated with internships. Research draws on resources uniquely available in Washington, DC. Supervised preparation of extensive paper. (Same course as WAS 193.) GE credit: OL, SS, WE. Effective: 2002 Spring Quarter.

POL 194HA—Special Study for Honors Students (4)
Independent Study—2 hours; Seminar—2 hours. Prerequisite(s): Major in Political Science with upper division standing and a GPA of 3.500 in the major. Directed reading, research and writing culminating in preparation of a senior honors thesis under the direction of faculty advisor. GE credit: OL, SS, VL, WE. Effective: 2002 Fall Quarter.

POL 194HB—Special Study for Honors Students (4)
Independent Study—2 hours; Seminar—2 hours. Prerequisite(s): Major in Political Science with upper division standing and a GPA of 3.500 in the major. Directed reading, research and writing culminating in preparation of a senior honors thesis under the direction of faculty advisor. GE credit: OL, SS, VL, WE. Effective: 2002 Fall Quarter.

POL 195—Special Studies in American Politics (4)
Seminar—4 hours. Prerequisite(s): Consent of Instructor. Upper division standing. Intensive examination of one or more special problems appropriate to American politics. May be repeated up to 1 time(s) when topic differs. GE credit: ACGH, SS, WE. Effective: 1997 Winter Quarter.

POL 196A—Seminar in American Politics (4)
Seminar—3 hours; Term Paper—1 hour. Prerequisite(s): Upper division Political Science majors or consent of instructor. Intensive reading, discussion, research, writing in American politics. Topics may include Congress, the Presidency, the Supreme Court, federalism, voting behavior, interest groups, ethnic groups or other topics with a more specialized content than normal course offerings. May be repeated up to 1 time(s) when topic differs. GE credit: ACGH, SS, WE. Effective: 2002 Fall Quarter.

POL 196B—Seminar in Comparative Politics (4)
Seminar—3 hours; Term Paper—1 hour. Prerequisite(s): Upper division Political Science majors or consent of instructor. Intensive reading, discussion, research, writing in comparative politics. Topics may include one country or geographical area, political institutions or behavior across countries, political development, or other topics that are more specialized than normal course offerings. May be repeated up to 1 time(s) topic differs. GE credit: SS, WE. Effective: 2002 Fall Quarter.

POL 196C—Seminar in International Relations (4)
Seminar—3 hours; Term Paper—1 hour. Prerequisite(s): Upper division Political Science majors or consent of instructor. Intensive reading, discussion, research, writing in international relations including study of international political institutions (UN, EU, or NATO) or interstate relations (war, trade, immigration) and other topics with more specialized content than normal course offerings. May be repeated up to 1 time(s) topic differs. GE credit: SS, WE. Effective: 2002 Fall Quarter.

POL 196D—Seminar in Political Theory (4)
Seminar—3 hours; Term Paper—1 hour. Prerequisite(s): Upper division Political Science majors or consent of instructor. Intensive reading, discussion, research, writing in political theory. Topics may include study of a single political thinker, a group of related thinkers, development of political concepts, or other topics with more specialized content than normal course offerings. May be repeated up to 1 time(s) topic differs. GE credit: SS, WE. Effective: 2002 Fall Quarter.

POL 196E—Seminar in Research Methods (4)
Seminar—3 hours; Term Paper—1 hour. Prerequisite(s): Upper division Political Science majors or consent of instructor. Intensive reading, discussion, research, and writing in selected topics in Research Methods such as research design, statistics, game theory, etc. May be repeated up to 1 time(s) topic differs. GE credit: QL, SS, VL, WE. Effective: 2002 Fall Quarter.

POL 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Fall Quarter.

POL 199—Special Study for Advanced Undergraduates (1-5)
Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.
POL 201—Urban Government and Politics (4)
Seminar—4 hours. Survey and analysis of the literature in the field of local government and politics in the United States. Approaches to the study of political reform, local autonomy, community power, representation, expertise, service delivery, policymaking and political change. Effective: 1997 Winter Quarter.

POL 202—American State Government and Politics (4)
Seminar—4 hours. Survey and analysis of the literature in the field of state government, politics, and policy. Approaches to the study of the American states as political systems, including their governing institutions and processes and their role in the Federal system. Effective: 1997 Winter Quarter.

POL 203A—American Government: The Presidency (4)
Seminar—3 hours; Term Paper. Restricted to graduate students only. Thorough overview of the current research on political executives, with particular emphasis on the American presidency. Two principal goals: the development of important and innovative student research programs; and adequate preparation for qualifying examinations. Effective: 2011 Spring Quarter.

POL 203B—American Government: Congress (4)
Seminar—3 hours; Term Paper. Restricted to graduate students only. Thorough overview of the current research on Congress, with particular emphasis on political representation. Two principal goals: the development of important and innovative student research programs; and adequate preparation for qualifying examinations. Effective: 2011 Spring Quarter.

POL 203C—American Government: Courts (4)
Seminar—4 hours. Survey and analysis of the literature in the field of American government with a focus on courts. Emphasis on the development and testing of theories of behavior and processes. Effective: 1997 Winter Quarter.

POL 207—Environmental Public Policy (4)
Seminar—4 hours. Analysis of the interface between the world of academic reflection about ecological and environmental problems and the world of political action. Evaluation of alternative approaches to policy analysis and recommendation. Individual research, including field research, will parallel discussion of the literature. Effective: 1997 Winter Quarter.

POL 208—Policy Analysis (4)

POL 209—The American Political System (4)
Seminar—3 hours; Term Paper. Restricted to graduate students only. Analysis of selected theoretical and empirical issues posed by contemporary research in American government and politics. Effective: 2011 Spring Quarter.

POL 210—Research Design in Political Science (4)
Discussion/Laboratory—1 hour; Seminar—3 hours. Prerequisite(s): Graduate standing. Introduction to philosophy of science and research design for political science. Topics include: logic of empirical research, overview of research design approaches for political science research. Effective: 2006 Winter Quarter.

POL 211—Research Methods in Political Science (4)
Discussion/Laboratory—1 hour; Seminar—3 hours. Prerequisite(s): Graduate standing. Pass One open to graduate majors; Pass Two open to graduate students. Introductory seminar on the foundations of probability theory and mathematical statistics that are critical to empirical investigations in political science. Effective: 2015 Winter Quarter.

POL 212—Quantitative Analysis in Political Science I (4)
Discussion/Laboratory—1 hour; Seminar—3 hours. Prerequisite(s): POL 211 Pass One open to graduate majors; Pass Two open to graduate students. Seminar provides students with an introduction to the linear regression model. Students who complete the course will have a working knowledge of basic regression techniques and problems. Effective: 2015 Winter Quarter.

POL 213—Quantitative Analysis in Political Science II (4)
Seminar—3 hours; Term Paper. Prerequisite(s): POL 212 Pass One open to graduate majors; pass 2 open to graduate students. More advanced topics in the use of statistical methods, with emphasis on political applications. Topics include: properties of least squares estimates, problems in multiple regression, and advanced topics (probit analysis, simultaneous models, time-series analysis, etc.). Effective: 2011 Fall Quarter.

POL 214A—Research in Political Science (4)
Discussion—2 hours; Lecture—1 hour; Term Paper. Prerequisite(s): POL 213 Advanced level graduate students in the
Department of Political Science only. Research seminar sequence required of all PhD students. Design, execution, and defense of an original piece of research in political science, culminating in a paper of publishable quality. Effective: 2004 Spring Quarter.

**POL 214B—Research in Political Science (4)**
Discussion—2 hours; Lecture—1 hour; Term Paper. Prerequisite(s): POL 212; POL 214A Advanced level graduate students in the Department of Political Science only. Research seminar sequence required of all PhD students. Design, execution, and defense of an original piece of research in political science, culminating in a paper of publishable quality. Effective: 2006 Winter Quarter.

**POL 215—Introduction to Modeling Political Behavior (4)**
Seminar—3 hours; Term Paper. Prerequisite(s): POL 211; POL 212 Pass One open to graduate majors; pass 2 open to graduate students. Introduction to formal and game theoretic analyses of politics. Students will learn basic game theory and modeling skills. We examine the benefits of modeling, and look at examples of formal analysis in a variety of political science sub-fields. Effective: 2011 Fall Quarter.

**POL 216—Qualitative Research Methods (4)**
Seminar—3 hours; Term Paper. Methodology for utilizing theoretically-oriented case studies and controlled comparison of a small number of cases to develop and test theories. Examination of how the case study method compliments experimental, statistical and deductive modes of research. Effective: 2000 Winter Quarter.

**POL 217—Social Choice Theory and Spatial Modeling (4)**
Seminar—4 hours. Introduction to social choice theory and formal spatial modeling including Arrows Theorem, the paradox of voting, cycling and agenda control. Focus on mastering modeling techniques as well as interpretation of classic works. Effective: 1998 Winter Quarter.

**POL 218—Topics in Political Theory (4)**
Seminar—3 hours; Term Paper. Topics vary and may be the work of a single theorist, time period, or political concept, such as justice. May be repeated up to 3 time(s) when topic differs. Effective: 2011 Fall Quarter.

**POL 219A—Political Theory Sequence (4)**
Review all entries
Seminar—3 hours; Term Paper. Survey of the great works in ancient and medieval political theory including such writers as Plato, Aristotle, Cicero, St. Augustine, Aquinas, Alfarabi and Marsilius. Discussion of various interpretations of these authors. Effective: 1997 Winter Quarter.

**POL 219A—Political Theory Sequence (4)**
Review all entries
Seminar—3 hours; Term Paper. Survey of the great works in ancient and medieval political theory including such writers as Plato, Aristotle, Cicero, St. Augustine, Aquinas, Alfarabi and Marsilius. Discussions of various interpretations of these authors. May be repeated for credit if topic differs. Effective: 2018 Fall Quarter.

**POL 219B—Political Theory Sequence (4)**
Review all entries
Seminar—3 hours; Term Paper. Survey of the great works in early modern to contemporary political theory including such writers as Machiavelli, Hobbes, Locke, Rousseau, Marx, Mill, Nietzsche, and Rawls. Discussion of various interpretations of these authors. Effective: 1997 Winter Quarter.

**POL 219B—Political Theory Sequence (4)**
Review all entries
Seminar—3 hours; Term Paper. Survey of the great works in early modern to contemporary political theory including such writers as Machiavelli, Hobbes, Locke, Rousseau, Marx, Mill, Nietzsche, and Rawls. Discussions of various interpretations of these authors. May be repeated for credit if topic differs. Effective: 2018 Fall Quarter.

**POL 219C—Contemporary Political Theory (4)**
Seminar—3 hours; Term Paper—1 hour. Survey of important works in contemporary political theory including such writers as Nietzsche, Heidegger, Arendt, Rawls, Nozick, Sandel. May be repeated for credit topic differs. Effective: 2004 Fall Quarter.

**POL 220—Seminar in Political Theory (4)**
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing. Open to graduate students only. Introduction to political theory and current debates over its study. Readings from and textual interpretations of political theory including the Federalist Papers and major works by thinkers such as Plato, Aristotle, Machiavelli, Hobbes, Locke, Rousseau, and Rawls. Other readings addressing issues of textual interpretation. Effective: 2003 Fall Quarter.

**POL 223—International Relations (4)**
Seminar—3 hours; Term Paper. Effective: 1997 Winter Quarter.
POL 225—The International System (4)
Seminar—3 hours; Term Paper. Analysis of the international system by means of theory formulation and integration; critique of research designs; use of various techniques of data generation and analysis. Effective: 1997 Winter Quarter.

POL 226—Seminar in International Political Economy (4)
Seminar—3 hours; Term Paper. Restricted to graduate students. Research in international political economy. Structure of the global economy, as well as specific dimensions of international economic relations, including trade, capital flows, global production structures, and migration. Effective: 2011 Spring Quarter.

POL 230—American Foreign Policy (4)
Seminar—3 hours; Term Paper. Effective: 1997 Winter Quarter.

POL 231—U.S. Political Culture and Foreign Relations (4)

POL 241—Communist Political Systems (4)
Seminar—4 hours. Prerequisite(s): or Consent of Instructor. Or the equivalent. Systematic analysis of selected topics dealing with the political process of communist political systems. Effective: 1997 Winter Quarter.

POL 242—Seminar in Comparative Politics (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Systematic survey of theories and methods used in the study of comparative politics. Effective: 1997 Winter Quarter.

POL 243—Comparative Institutional Change (4)
Seminar—3 hours; Term Paper. Restricted to graduate students. Comparison of institutional changes in countries of the former Soviet Union and Eastern Europe during the period of transition to democracy. Special attention to institutions of mass representation - electoral and party systems and national legislatures. Effective: 2011 Spring Quarter.

POL 246—Policymaking in Third-World Societies (4)
Seminar—3 hours. Prerequisite(s): Graduate standing or consent of instructor. Included in an analysis of policymaking process in Third-World countries are such topics as political resources, institutional resources, decision making, resource allocations, planning, and budgeting, implementation, and distribution of world resources. Effective: 1997 Winter Quarter.

POL 250—Policy Development and Impact in U.S. Courts (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing. Thorough overview of the literature regarding courts as policymaking institutions of government, with emphasis on the formation and implementation of judicial policy. Differences and similarities across the judicial, congressional, and executive branch policy processes. Effective: 1997 Winter Quarter.

POL 260—Political Parties (4)

POL 261—Political Behavior (4)
Seminar—3 hours; Term Paper. Survey of selected topics in political behavior and public opinion. May be repeated up to 3 time(s) when topic differs. Effective: 2011 Fall Quarter.

POL 274—Political Economy (4)
Seminar—3 hours; Term Paper. Restricted to graduate students. Politics of economic policy as reflected in taxation, spending and regulation; impact of prices, employment, and growth on political demands; government responses to economic conditions; electoral politics and the political business cycle. Effective: 2011 Spring Quarter.

POL 279—Political Networks: Methods and Applications (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing. Structure of political networks, socio-matrices and affiliation networks; general network characteristics: density, centralization, polarization, interdependence, dyadic and triadic characteristics: structural and role equivalence; subsets of networks: cliques, blocks and bloc modeling; characteristics of individuals in networks: centrality and prestige. Effective: 2007 Fall Quarter.
POL 280—Bayesian Methods: for Social and Behavioral Sciences (4)
Seminar—3 hours; Term Paper. Prerequisite(s): POL 212; Or equivalent to course. Pass One open to graduate majors only; Pass Two open to graduate students. Methodology seminar introducing Bayesian quantitative methods to issues and problems in political science and other social and behavioral sciences. Effective: 2011 Fall Quarter.

POL 281—Statistical Computing Issues in Political Science (4)
Discussion/Laboratory—1 hour; Seminar—3 hours. Prerequisite(s): POL 213; Or equivalent to course. Restricted to graduate standing. Methodology seminar introducing computing issues in empirical models for political science and other social and behavioral sciences. Effective: 2005 Fall Quarter.

POL 282—Advanced Modeling of Political Behavior (4)
Seminar—3 hours; Term Paper—1 hour. Prerequisite(s): POL 215; Or equivalent to course. Restricted to graduate standing or with instructors permission. Applications of formal theory to political science. Review of relevant contributions in other social sciences. Consideration of advanced techniques in game theory. Rational and behavioral approaches. Effective: 2005 Fall Quarter.

POL 283—Organizational Behavior (4)
Seminar—4 hours. Organizational behavior as it relates to public sector decision making. Effective: 1997 Winter Quarter.

POL 284—Advanced Network Analysis (4)
Seminar—3 hours; Term Paper. Prerequisite(s): POL 211; POL 212; POL 279 Exponential Random Graph Models (ERGMS) of networks, game theoretic models of network formation and network dynamics, diffusion processes, shocks and network collapse, percolation, cross-network spillover processes, social and political applications of advanced network models. Effective: 2013 Fall Quarter.

POL 290A—Research in American Government and Public Policy (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. Restricted to graduate students. Special research seminar on problems and issues in the study of American government and public policy. May be repeated up to 6 time(s) if topic differs. Effective: 2011 Spring Quarter.

POL 290B—Research in Political Theory (4)
Lecture—3 hours; Term Paper. Restricted to graduate students only. Special research seminar on problems and issues in the study of political theory. May be repeated up to 6 time(s) if topic varies. Effective: 2010 Spring Quarter.

POL 290C—Research in International Relations (4)
Lecture—3 hours; Term Paper. Restricted to graduate students only. Special research seminar on select problems and issues in the study of international relations. May be repeated up to 6 time(s) if topic varies. Effective: 2010 Spring Quarter.

POL 290D—Research in Judicial Politics (4)
Seminar—4 hours. Prerequisite(s): Graduate standing in Political Science or consent of instructor. Contemporary research on judicial politics, judicial institutions, jurisprudence, and judicial behavior. Effective: 1997 Winter Quarter.

POL 290E—Research in Political Parties, Politics, and Political Behavior (4)
Seminar—4 hours. Special research seminar on selected problems and issues in the study of political parties, politics, and political behavior. Effective: 1997 Winter Quarter.

POL 290F—Research in Comparative Government and Policy (4)
Lecture—3 hours; Term Paper. Restricted to graduate students only. Special research seminar on select problems and issues in the study of comparative government and policy. May be repeated up to 6 time(s) if topic varies. Effective: 2010 Spring Quarter.

POL 290G—Research in Methodology (4)
Lecture—3 hours; Term Paper. Prerequisite(s): POL 212 Special research seminar on selected problems and issues in methods in political science. May be repeated up to 3 time(s) topics vary. Effective: 2005 Fall Quarter.

POL 297—Internships in Political Science (2)
Seminar—2 hours. Prerequisite(s): Open only to persons who have internships or other positions in governmental agencies, political parties, etc. Application and evaluation of theoretical concepts through work experience or systematic observation in public and political agencies. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

POL 298—Group Study (1-5)
Variable. (S/U grading only.) Effective: 1997 Winter Quarter.
POL 299—Research (1-12)
Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

POL 299D—Research (1-12)
Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

POL 390—The Teaching of Political Science (1)
Seminar—1 hour. Prerequisite(s): Graduate student standing in Political Science. Methods and problems of teaching political science at the undergraduate level. (S/U grading only.) Effective: 1997 Winter Quarter.

POL 396—Teaching Assistant Training Practicum (1-4)
Variable. Prerequisite(s): Graduate standing. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

Political Science | IRE Courses

Courses in IRE:

IRE 001—Global Interdependence (4)
Discussion—1 hour; Lecture—3 hours. Development of the concept of global interdependence along its political, economic, demographic, cultural, technological, and environmental dimensions. Focus on the ways societies and states interact. Course provides the foundation for upper division multidisciplinary work in international relations. GE credit: SS, WE. Effective: 1997 Winter Quarter.

IRE 098—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

IRE 099—Special Study for Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

IRE 104—The Political Economy of International Migration (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): SOC 001, SOC 002, SOC 003, or SOC 004 recommended. Analysis of worldwide migration patterns, and social scientific theories of international and transnational migration. Focus in economical, political, and social impact of immigration and potential for international and regional cooperation. (Same course as SOC 104.) GE credit: SS, WC. Effective: 2016 Fall Quarter.

IRE 190—Topics in International Relations (4)
Lecture/Discussion—4 hours. Prerequisite(s): Consent of Instructor. Selected topics in international relations. Variable content. May be repeated for credit when topic differs. May be repeated for credit. GE credit: WE. Effective: 1997 Winter Quarter.

IRE 192—International Relations Internship (1-12)
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Upper division standing. Work experience in international relations, with term paper summarizing the practical experience of the student. (P/NP grading only.) GE credit: SS, WE. Effective: 1997 Winter Quarter.

IRE 194HA—Special Study for Honors Students (4)
Seminar—2 hours; Term Paper. Prerequisite(s): Open only to majors of senior standing who qualify for Honors Program. Directed reading, research, and writing on topics selected by students and instructor culminating in preparation of a senior honors thesis under direction of a faculty advisor. GE credit: OL, SS, WE. Effective: 1997 Winter Quarter.

IRE 194HB—Special Study for Honors Students (4)
Seminar—2 hours; Term Paper. Prerequisite(s): Open only to majors of senior standing who qualify for Honors Program. Directed reading, research, and writing on topics selected by students and instructor culminating in preparation of a senior honors thesis under direction of a faculty advisor. GE credit: OL, SS, WE. Effective: 1997 Winter Quarter.

IRE 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Upper division standing. (P/NP grading only.) Effective: 1997 Winter Quarter.

IRE 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. Upper division standing. (P/NP grading only.) Effective: 1997 Winter Quarter.
Population Biology (Graduate Group)

Population Biology (Graduate Group) | PBG Information

Alan M. Hastings, Ph.D., Chairperson of the Group (term ends 6/30/2018)

Group Office. 2320 Storer Hall; 530-752-1274; http://www.eve.ucdavis.edu/eve/pbg/

Faculty. http://www.eve.ucdavis.edu/eve/pbg/People_Faculty.html

Population Biology (Graduate Group) | PBG M.S.

Alan M. Hastings, Ph.D., Chairperson of the Group (term ends 6/30/2018)

Group Office. 2320 Storer Hall; 530-752-1274; http://www.eve.ucdavis.edu/eve/pbg/

Faculty. http://www.eve.ucdavis.edu/eve/pbg/People_Faculty.html

Graduate Study. The Graduate Group in Population Biology emphasizes programs of study and research leading to the Ph.D. degree. The Group concentrates on population biology as the broad discipline that blends ecology, evolution, population genetics and systematics into a unified field. The course curriculum consists of first-year core courses offered by the Group faculty, seminars, and advanced courses in population biology, and related disciplines, chosen in consultation with a guiding committee.

The Master of Science degree is offered only en route to the Ph.D.

Graduate Advisor. Consult the Population Biology Graduate Group office or website.

Population Biology (Graduate Group) | PBG Ph.D.

Population Biology (Graduate Group) | PBG Courses

Courses in PBG:

**PBG 200A—Principles of Population Biology (5)**
Discussion—2 hours; Lecture—3 hours. Prerequisite(s): PBG 231 (can be concurrent); and Consent of Instructor. PBG 231 required concurrently. Principles of single-species ecology and evolution. Topics include ecology of individuals, population growth models, structured populations, life history strategies, stochastic populations, basic population genetics theory, deleterious alleles in natural populations, and molecular population genetics. Effective: 1997 Winter Quarter.

**PBG 200B—Principles of Population Biology (6)**
Discussion—1 hour; Lecture—5 hours. Prerequisite(s): PBG 200A; PBG 231 Principles of multi-species communities. Topics include competition, mutualism, metapopulations, food webs and trophic cascades, interactions between simple ecological communities, island biogeography, succession, and large-scale patterns. Effective: 1998 Winter Quarter.

**PBG 200C—Principles of Population Biology (6)**
Discussion—1 hour; Lecture—5 hours. Prerequisite(s): PBG 200B Principles of microevolution and macroevolution. Topics include evolutionary quantitative genetics, analysis of hybrid zones, speciation, the fossil record, biogeography, and phylogeny reconstruction. Effective: 1998 Spring Quarter.
PBG 203—Advanced Evolution (3)
Discussion—2 hours; Lecture—1 hour. Prerequisite(s): Graduate standing. Adaptation and speciation, and biochemical and morphological evolution in plants and animals with emphasis on the appropriateness of different methods of analysis. Effective: 1997 Winter Quarter.

PBG 206—Ecology of Insect Parasitoids (4)
Lecture—3 hours; Seminar—1 hour. Prerequisite(s): Introductory animal ecology or behavior. Insect parasitoids will be investigated as model systems to address current topics in behavioral, population, and evolutionary ecology. Theory will be synthesized and critical empirical tests of ecological hypotheses emphasized. Effective: 1997 Winter Quarter.

PBG 207—Plant Population Biology (3)
Discussion/Laboratory—1 hour; Lecture—2 hours. Prerequisite(s): Advanced undergraduate ecology course (e.g., ESP 100, EVE 101, ENT 104, PLB 117), and advanced undergraduate course in genetics and/or evolution (e.g., BIS 101 or EVE 100). Introduction to theoretical and empirical research in plant population biology. Emphasis placed on linking ecological and genetic approaches to plant population biology. (Same course as ECL 207.) Effective: 2000 Winter Quarter.

PBG 212—Topics in Invertebrate Evolution (2)
Seminar—2 hours. Prerequisite(s): Graduate standing or consent of instructor; courses in evolutionary biology, systematics, and ecology highly recommended. Advanced seminar that critically examines problems relevant to evolutionary patterns among the invertebrates. May be repeated for credit when topic differs. (S/U grading only.) Effective: 1997 Winter Quarter.

PBG 221—Animal Behavior, Ecology and Evolution (3)
Lecture—3 hours. Prerequisite(s): NPB 102; EVE 100; EVE 101; and Consent of Instructor. Or the equivalent, graduate standing. The interface between animal behavior, ecology and evolution. New developments in behavioral ecology development and testing of hypotheses in this discipline. (Same course as ANB 221.) Effective: 2002 Winter Quarter.

PBG 224—Field Reconnaissance for Population Biologists (2)
Fieldwork—6 hours. Prerequisite(s): Graduate student in Population Biology, or consent of instructor. Biweekly field trips to acquaint students with plant and animal communities, biodiversity, and ecological and evolutionary research opportunities in northern and central California. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 1997 Fall Quarter.

PBG 225—Terrestrial Field Ecology (4)
Fieldwork—12 hours; Seminar—1 hour. Prerequisite(s): Introductory ecology and introductory statistics, or consent of instructor. A field course conducted over spring break and four weekends at Bodega Bay emphasizing student projects. Ecological hypothesis testing, data gathering, analysis, and written and oral presentation of results will be stressed. (Same course as ECL 225 and ENT 225.) Effective: 1997 Spring Quarter.

PBG 231—Mathematical Methods in Population Biology (3)
Lecture—3 hours. Prerequisite(s): MAT 016C or MAT 021C; Or the equivalent. Mathematical methods used in population biology. Linear and nonlinear difference equation and differential equation models are studied, using stability analysis and qualitative methods. Partial differential equation models are introduced. Applications to population biology models are stressed. (Same course as ECL 231.) Effective: 1997 Winter Quarter.

PBG 233—Computational Methods in Population Biology (3)
Discussion/Laboratory—1 hour; Lecture/Lab—2 hours. Prerequisite(s): A course in theoretical ecology (e.g., ECL 231 or an equivalent to ESP 121 from your undergraduate institution) or consent of instructor; no programming experience required. Numerical methods for simulating population dynamics using the computational software package R. Emphasis placed on model formulation and development, theoretical concepts and philosophical principles to guide simulation efforts, model parameterization, and implementing simulations with R. (Same course as ECL 233.) (S/U grading only.) Effective: 2013 Fall Quarter.

PBG 250A—Interdisciplinary Approaches to Biological Invasions (4)
Lecture/Discussion—4 hours. Prerequisite(s): Graduate standing. An integrative consideration of biological invasions, including an overview of concepts from ecology, ecological theory, evolution, genetics, philosophy, and other areas. Emphasis on potential contributions of each area for interdisciplinary problem-solving. Effective: 2004 Fall Quarter.
PBG 250B—Interdisciplinary Approaches to Biological Invasions (4)
Lecture/Discussion—4 hours. Prerequisite(s): Graduate standing. An integrative consideration of biological invasions, including an overview of concepts from history, sociology, communications, law, policy, management, and other areas. Emphasis on potential contributions of each area for interdisciplinary problem-solving. Effective: 2004 Fall Quarter.

PBG 251—Collaborative Project in Biological Invasions (3)
Discussion—1 hour; Project (Term Project). Prerequisite(s): PBG 250A; PBG 250B; and Consent of Instructor. Or equivalent courses. A year-long interdisciplinary collaborative project focusing on biological invasions, resulting in a paper or other suitable product presented at a symposium at the conclusion of the project. May be repeated up to 5 time(s). (S/U grading only.) Effective: 2004 Fall Quarter.

PBG 270—Research Conference in Evolutionary Biology (1)
Seminar—1 hour. Prerequisite(s): Consent of Instructor. Critical presentation and evaluation of current literature and ongoing research in evolutionary biology. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

PBG 271—Research Conference in Ecology (1)
Seminar—1 hour. Prerequisite(s): Consent of Instructor. Critical presentation and evaluation of current literature and ongoing research in ecology. Requirements include active participation in weekly discussions and the presentation of a paper or chapter once per quarter. May be repeated for credit. (Same course as ECL 271.) (S/U grading only.) Effective: 2014 Winter Quarter.

PBG 287—Advanced Animal Behavior (2)
Seminar—2 hours. Prerequisite(s): NPB 102; EVE 100; or the equivalents; graduate standing; Consent of Instructor. Reading, reports and discussion on current topics in animal behavior, with a focus on topics that lie at the interface between animal behavior, ecology and evolution. May be repeated up to 2 time(s). (Same course as ANB 287.) Effective: 2002 Spring Quarter.

PBG 290—Seminar (1)
Seminar—1 hour. Prerequisite(s): Consent of Instructor. Graduate standing. Seminars presented by visiting lecturers, UC Davis graduate students and faculty. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

PBG 290C—Research Conference in Population Biology (1)
Discussion—1 hour. Prerequisite(s): PBG 299 (can be concurrent); and Consent of Instructor. Graduate standing; PBG 299 required concurrently. Presentation and discussion of faculty and graduate student research in population biology. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

PBG 292—Topics in Ecology and Evolution (1)
Seminar—1 hour. Prerequisite(s): Graduate standing. Seminar presented by visiting lecturers, UC Davis faculty and graduate students. May be repeated for credit. May be repeated for credit. (Same course as ECL 296.) (S/U grading only.) Effective: 1997 Winter Quarter.

PBG 296—Seminar in Geographical Ecology (2)
Seminar—2 hours. Prerequisite(s): EVE 100 or EVE 101; or Consent of Instructor. Recent developments in theoretical and experimental biogeography, historical biogeography and related themes in systematics, the biology of colonizing species, and related topics. May be repeated for credit. (Same course as GEO 214.) (S/U grading only.) Effective: 2012 Fall Quarter.

PBG 298—Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Graduate standing. (S/U grading only.) Effective: 1997 Winter Quarter.

PBG 299—Research (1-12)
Variable. Prerequisite(s): Consent of Instructor. Graduate standing. (S/U grading only.) Effective: 1997 Winter Quarter.

Precision Agriculture Minor; Biological & Agricultural Engineering

Precision Agriculture Minor; Biological & Agricultural Engineering | Precision Agriculture Minor

(College of Agricultural and Environmental Sciences)
The Department of Biological and Agricultural Engineering offers a minor in Precision Agriculture, the latest farming concept that optimizes fertilizer, pesticide and water use, while minimizing environmental concerns.

**Minor Requirements:**
This minor acquaints students with recent developments and their applications to agriculture, in geographic information systems (GIS), global positioning systems (GPS), variable rate technologies (VRT), crop and soil sensors, and remote sensing. The minor prepares students for challenging positions in site-specific crop management as we enter the “information age” in agriculture.

**Minor Advisors.** S.K. Upadhyaya, D.K. Giles

**Precision Agriculture**

**Professional Writing Minor; University Writing Program**

(College of Letters & Science)

Carl Whithaus, Ph.D., Program Director

**Program Office.** 109 Voorhies Hall 530-752-6283; http://writing.ucdavis.edu

**Faculty.** http://writing.ucdavis.edu/people/directory/faculty

**The Program**

The University Writing Program (UWP) offers writing courses and seeks to improve writing instruction across campus through a variety of programs. The UWP coordinates first year, intermediate, and advanced writing courses that satisfy college composition requirements and offers courses in writing across the curriculum, writing in specific
disciplines, and writing in the professions. The Professional Writing Minor serves students from all majors who are planning careers as professional writers or editors, as well as those whose academic and professional careers demand advanced writing skills. The Program offers graduate courses in the teaching of writing and in composition theory, history, and research. The Designated Emphasis in Writing, Rhetoric, and Composition Studies offers Ph.D. students in affiliated programs the opportunity to prepare for leadership roles in writing research, teaching, and program administration. The UWP also administers the English Composition Examination, an alternative way to satisfy the advanced writing requirement. The UWP publishes an annual anthology of exemplary student writing, Prized Writing, and a journal for writing instructors, Writing on the Edge. The Writing in the Disciplines Workshop Program presents workshops on teaching writing for faculty and TAs and workshops on writing for students. The Writing Ambassadors Program trains advanced undergraduates and places them as interns in K-12 classrooms to improve writing instruction.

**Professional Writing**  
**Units:** 20

*Choose one from each of the four groups:*

**Group A:**
- ENL 100NF Creative Writing: Non-Fiction 4
- UWP 101 Advanced Composition 4
- UWP 102A Writing in the Disciplines: Special Topics 4
- UWP 102B Writing in the Disciplines: Biology 4
- UWP 102C Writing in the Disciplines: History 4
- UWP 102D Writing in the Disciplines: International Relations 4
- UWP 102E Writing in the Disciplines: Engineering 4
- UWP 102F Writing in the Disciplines: Food Science and Technology 4
- UWP 102G Writing in the Disciplines: Environmental Writing 4
- UWP 102H Writing in the Disciplines: Human Development and Psychology 4
- UWP 102I Writing in the Disciplines: Ethnic Studies 4
- UWP 102J Writing in the Disciplines: Fine Arts 4
- UWP 102K Writing in the Disciplines: Sociology 4
- UWP 102L Writing in the Disciplines: Film Studies 4
- UWP 102M Writing in the Disciplines: Community and Regional Development 4

**Group B:**
- UWP 104A Writing in the Professions: Business Writing 4
- UWP 104B Writing in the Professions: Law 4
- UWP 104C Writing in the Professions: Journalism 4
- UWP 104D Writing in the Professions: Elementary and Secondary Education 4
- UWP 104E Writing in the Professions: Science 4
- UWP 104F Writing in the Professions: Health 4
- UWP 104I Writing in the Professions: Internships 4
- UWP 104J Writing in the Professions: Writing for Social Justice 4
- UWP 104T Writing in the Professions: Technical Writing 4
- UWP 110 Specialized Genres in Professional Writing 4
- UWP 111A Specialized Topics in Journalism 4
- UWP 111B Specialized Topics in Journalism: Investigative Journalism 4
- UWP 111C Specialized Topics in Journalism: Science Journalism 4

**Group C:**
- ANT 110 Language and Sociocultural Anthropology *(Discontinued)* 4
- ANT 120 Language and Culture 4
- CLA 110 Origins of Rhetoric 4
- CMN 101 Communication Theories 4
- CMN 105 Semantic and Pragmatic Functions of Language *(Discontinued)* 4
- CMN 152 Theories of Persuasion *(Discontinued)* 4
- DES 145 History of Visual Communication 4
Professional Writing Minor; University Writing Program | UWP Courses

Courses in UWP:

UWP 001—Expository Writing (4) Review all entries
Lecture/Discussion—4 hours. Prerequisite(s): Completion of Entry-Level Writing Requirement. Composition, the essay, paragraph structure, diction, and related topics. Frequent writing assignments. Not open for credit to students who have taken UWP 001, UWP 001Y or UWP 001V. GE credit: AH, WE. Effective: 2010 Fall Quarter.

UWP 001—Introduction to Academic Literacies (4) Review all entries
Lecture/Discussion—4 hours. Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR). Introduction to reading and composing processes and key rhetorical concepts for academic literacies. Multiple drafts of composing projects in a variety of genres and modes with feedback from peers and the instructor. Not open for credit to students who have taken UWP 001Y or UWP 001V. GE credit: AH, WE. Effective: 2019 Winter Quarter.

UWP 001A—Writers' Workshop (2)
Discussion/Laboratory—2 hours. Concurrent enrollment in a lower division writing course required, preferably UWP 001; if necessary, based upon demand and academic advisor approval, students may concurrently enroll in an equivalent course instead; e.g., ENL 003 or NAS 005. Writing course that focuses on the development of writing and revision strategies, exploring ways to understand a writing task; to develop appropriate content for a writing task; to revise content to reflect competence as a communicator. Effective: 2019 Winter Quarter.

UWP 001V—Expository Writing (4) Review all entries
Web Electronic Discussion—2 hours; Web Virtual Lecture—2 hours. Prerequisite(s): Completion of Entry-Level Writing Requirement. Composition, the essay, paragraph structure, diction, and related topics. Frequent writing assignments. Not open to students who have taken UWP 001 or UWP 001Y. GE credit: AH, WE. Effective: 2013 Spring Quarter.

UWP 001V—Introduction to Academic Literacies: Online (4) Review all entries
Web Electronic Discussion—2 hours; Web Virtual Lecture—2 hours. Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR). Introduction to reading and composing processes and key rhetorical concepts for
academic literacies. Multiple drafts of composing projects in a variety of genres and modes with feedback from peers and the instructor. Not open to students who have taken UWP 001 or UWP 001Y. GE credit: AH, WE. Effective: 2019 Winter Quarter.

UWP 001Y—Expository Writing (4) Review all entries
Lecture/Discussion—2 hours; Web Electronic Discussion—2 hours. Prerequisite(s): Completion of Entry-Level Writing Requirement. Composition, the essay, paragraph structure, diction, and related topics. Frequent writing assignments. Not open to students who have taken UWP 001 or UWP 001V. GE credit: AH, WE. Effective: 2013 Fall Quarter.

UWP 001Y—Introduction to Academic Literacies (4) Review all entries
Lecture/Discussion—2 hours; Web Electronic Discussion—2 hours. Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR). Introduction to reading and composing processes and key rhetorical concepts for academic literacies. Multiple drafts of composing projects in a variety of genres and modes with feedback from peers and the instructor. Not open to students who have taken UWP 001 or UWP 001V. GE credit: AH, WE. Effective: 2019 Winter Quarter.

UWP 007—Practices in College Reading and Writing (4) Review all entries
Lecture/Discussion—4 hours. Prerequisite(s): Students placed into the course via AWPE score of 4 or lower. Development of skills required for success in college-level writing across genres and disciplines. Integrates reading, critical thinking, and written communication, using texts from across the curriculum. May be repeated up to 3 time(s) Students placed into the course via the Analytical Writing Placement Exam (AWPE) score of 4 or lower and by special permission. Effective: 2019 Winter Quarter.

UWP 007—Practices in College Reading and Writing (4) Review all entries
Lecture/Discussion—4 hours. Not open to students who have already fulfilled the Entry Level Writing Requirement (ELWR); course is only open to students who have not yet fulfilled the ELWR; enrollment is determined via campus placement, via scores on mechanisms such as the English Language Placement Exam or Analytical Writing Placement Exam. Development of skills required for success in college-level writing across genres and disciplines. Integrates reading, critical thinking, and written communication, using texts from across the curriculum. May be repeated up to 3 time(s). Effective: 2019 Winter Quarter.

UWP 007M—Entry Level Writing: Practices in College Reading & Writing for Multilingual Writers (4)
Discussion/Laboratory—4 hours. Prerequisite(s): Enrollment via campus placement (using the English Language Placement Exam or Analytical Writing Placement Exam) or after successful completion of UWP 022. Only open to students who have not yet fulfilled the Entry Level Writing Requirement (ELWR). Development of multilingual writers' composition and English language skills across genres and disciplines. Integrates college-level reading, critical thinking, and written communication, using texts from across the curriculum. No credit for students who have completed UWP 007, UWP 023, or WLD 057. Effective: 2019 Summer Session 1.

UWP 010—Introduction to Professional Writing Studies (4)
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): UWP 001 or UWP 001V or UWP 001Y; Or the equivalent. Introduction to writing as an object of study and to theories and research in the field. Survey of how writing is created, disseminated, and used in private, public, and academic contexts. GE credit: AH, WE. Effective: 2018 Spring Quarter.

UWP 011—Popular Science and Technology Writing (4)
Discussion—1 hour; Lecture/Discussion—3 hours. Positioning of science and technology in society as reflected and constructed in popular texts. Topics include genre theory, demarcation, rhetorical figures, forms of qualitative and quantitative reasoning, and the epistemic role of popularization in science. GE credit: AH, WE. Effective: 2014 Winter Quarter.

UWP 012—Writing and Visual Rhetoric (4)
Discussion—1 hour; Lecture/Discussion—3 hours. Introduction to writing needs, conventions, and genres in design contexts. Emphasis on applying critical reading, analysis, and writing skills to designed products, such as graphics, visual communications, and clothes, and designed spaces, such as exhibitions and interior architecture. GE credit: AH, VL, WE. Effective: 2014 Fall Quarter.

UWP 013—Video Game Rhetorics (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): UWP 001 C- or better or UWP 001V C- or better or UWP 001Y C- or better or ENL 003 C- or better or COM 001 C- or better or COM 002 C- or better or COM 003 C- or better or COM 004 C- or better or NAS 005 C- or better Examination of video games as rhetorical texts whose meaning is
produced through complex interplay of procedures, narratives, rules, and context. Writing about video games using critical perspectives and analytic methods. GE credit: AH, VL, WE. Effective: 2018 Spring Quarter.

**UWP 018—Style in the Essay (4)** [Review all entries]
Lecture/Discussion—4 hours. Prerequisite(s): UWP 001 C- or better or UWP 001V C- or better or UWP 001Y C- or better or ENL 003 C- or better or COM 001 C- or better or COM 002 C- or better or COM 003 C- or better or COM 004 C- or better or NAS 005 C- or better Style, language, and structure in the essay. Analyzing style, developing a voice in writing, revising sentences, developing effective paragraphs and arguments, and writing with force and clarity. GE credit: AH, WE. Effective: 2018 Winter Quarter.

**UWP 018—Style in the Essay (4)** [Review all entries Discontinued]
Lecture/Discussion—4 hours. Prerequisite(s): UWP 001 C- or better or UWP 001V C- or better or UWP 001Y C- or better or ENL 003 C- or better or COM 001 C- or better or COM 002 C- or better or COM 003 C- or better or COM 004 C- or better or NAS 005 C- or better Style, language, and structure in the essay. Analyzing style, developing a voice in writing, revising sentences, developing effective paragraphs and arguments, and writing with force and clarity. GE credit: AH, WE. Effective: 2018 Fall Quarter.

**UWP 019—Writing Research Papers (4)** [Review all entries]
Lecture/Discussion—4 hours. Prerequisite(s): UWP 001 C- or better or UWP 001V C- or better or UWP 001Y C- or better or ENL 003 C- or better or COM 001 C- or better or COM 002 C- or better or COM 003 C- or better or COM 004 C- or better or NAS 005 C- or better Critical reading, analysis, documentation, and writing research-based assignments. Formulation of research topics and development of effective arguments. Reading and writing assignments may focus on a single theme. GE credit: AH, WE. Effective: 2018 Winter Quarter.

**UWP 019—Writing Research Papers (4)** [Review all entries Discontinued]
Lecture/Discussion—4 hours. Prerequisite(s): UWP 001 C- or better or UWP 001V C- or better or UWP 001Y C- or better or ENL 003 C- or better or COM 001 C- or better or COM 002 C- or better or COM 003 C- or better or COM 004 C- or better or NAS 005 C- or better Critical reading, analysis, documentation, and writing research-based assignments. Formulation of research topics and development of effective arguments. Reading and writing assignments may focus on a single theme. GE credit: AH, WE. Effective: 2018 Fall Quarter.

**UWP 020—Oral English for International Students (3)** [Review all entries]
Lecture/Discussion—3 hours. Open to non-native speakers of English with priority enrollment to international teaching assistants with qualifying placement exam scores. UWP 104J—Writing in the Professions: Writing for Social Justice (4)
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): UWP 001 C- or better or UWP 001V C- or better or UWP 001Y C- or better or ENL 003 C- or better or COM 001 C- or better or COM 002 C- or better or COM 003 C- or better or COM 004 C- or better or NAS 005 C- or better; and upper division standing. Advanced instruction in writing for Social Justice, using an interdisciplinary approach combining feminist, critical race, ethnic, cultural, and transnational studies; practice in techniques of research and styles of communication for diverse audiences. Suitable for activists in community organizing, non-profits, politics. GE credit: AH, WE. Effective: 2018 Winter Quarter.

UWP 104T—Writing in the Professions: Technical Writing (4)
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): UWP 001 C- or better or UWP 001V C- or better or UWP 001Y C- or better or ENL 003 C- or better or COM 001 C- or better or COM 002 C- or better or COM 003 C- or better or COM 004 C- or better or NAS 005 C- or better; and upper division standing. Communicating effectively about technology and other technical subjects to varied audiences for varied purposes. Suitable for students entering professions that require communicating technical information to subject matter experts, managers, technicians, and non-specialists. Not open for credit to students who have taken UWP 104A prior to fall 2012. GE credit: AH, WE. Effective: 2018 Winter Quarter.

UWP 106—English Grammar (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): UWP 001 or UWP 001V or UWP 001Y or ENL 003 or LIN 001 or LIN 001Y; or Consent of Instructor. Survey of present-day English grammar as informed by contemporary linguistic theories. The major syntactic structures of English; their variation across dialects, styles, and registers; their development; and their usefulness in describing the conventions of English. (Same course as ENL 106 and LIN 106.) GE credit: AH. Effective: 2018 Winter Quarter.

UWP 110—Specialized Genres in Professional Writing (4)
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): Satisfaction of the upper division writing requirement. Restricted to upper-division students who have satisfied the upper-division writing requirement. Counts toward the writing minor. Instruction in the elements and practices of professional writing in specialized genres. May be repeated up to 2 time(s) when topic differs. GE credit: AH, WE. Effective: 2015 Winter Quarter.

UWP 111A—Specialized Topics in Journalism (4)
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): Satisfaction of the upper division writing requirement. Restricted to upper-division students with a strong interest in journalism. Counts toward the writing minor. Instruction in the elements and practices of advanced journalism. May be repeated up to 1 time(s) specialized journalism topic for each course differs. GE credit: AH, WE. Effective: 2009 Fall Quarter.

UWP 111B—Specialized Topics in Journalism: Investigative Journalism (4)
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): Satisfaction of the upper division writing requirement. Restricted to upper-division students with a strong interest in journalism; counts toward the writing minor. Instruction in the elements and practices of in-depth investigative journalism. GE credit: AH, WE. Effective: 2009 Fall Quarter.

UWP 111C—Specialized Topics in Journalism: Science Journalism (4)
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): Satisfaction of the upper division writing requirement. Restricted to upper-division students with a strong interest in journalism. Counts toward the writing minor. Instruction in the elements and practices of science journalism. GE credit: AH, WE. Effective: 2009 Fall Quarter.

UWP 112A—Introduction to Professional Editing (4)
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): Satisfaction of the upper-division writing requirement. Restricted to upper-division students who have satisfied the upper-division writing requirement; counts toward the writing minor, Group C: Theory, History, and Design. Introduction to general editing practices and principles, with an emphasis on professional editing in organizational contexts, including academia and the workplace. Extensive practice in copy, comprehensive, and collaborative editing. GE credit: AH, VL, WE. Effective: 2010 Fall Quarter.

UWP 120—Rhetorical Approaches to Scientific and Technological Issues (4)
Extensive Writing; Lecture/Discussion—3 hours. Restricted to upper division standing. Application of rhetorical theories to scientific issues. Topics include: Rhetorical dimensions of scientific knowledge-making; scientific voice; rhetorical figures in science; incommensurability and demarcation; epistemology, definition, and classification;
science wars; models of scientific literacy and accommodation, and implications for risk communication. GE credit: AH, SE, SL, WE. Effective: 2015 Winter Quarter.

**UWP 121—History of Scientific Writing (4)**
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): Upper division standing. History of scientific writing from the 17th century to the present; origins and evolution of scientific genres; role of scientific writing in producing scientific knowledge; discursive differences between disciplines; emergence of English as a global language of science. GE credit: AH, SE, SL, WE. Effective: 2013 Fall Quarter.

**UWP 190—Capstone Portfolio Seminar (4)**
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): UWP 100 Open to majors who have completed 135 units. Capstone course for majors. Synthesis and application of rhetorical concepts learned in the major. Development of professional digital and print portfolio for graduate school and career applications. Effective: 2016 Spring Quarter.

**UWP 192—Internship in Writing (1-12)**
Internship—3-36 hours. Prerequisite(s): UWP 001 or UWP 001V or UWP 001Y or ENL 003; or equivalent course; consent of instructor. Internships in fields where students can practice their skills. May be repeated up to 12 unit(s). (P/NP grading only.) GE credit: AH. Effective: 2018 Winter Quarter.

**UWP 197T—Tutoring in Writing (1-5)**
Tutorial—1-5 hours. Prerequisite(s): Consent of Instructor. Upper division standing. Tutoring one-on-one or leading small voluntary discussion groups affiliated with a writing course. May be repeated up to 10 unit(s). (P/NP grading only.) GE credit: AH. Effective: 2005 Fall Quarter.

**UWP 197TC—Community Tutoring in Writing (1-4)**
Tutorial—1-4 hours. Prerequisite(s): Consent of Instructor. Upper division standing. Field experience, with individuals or in K-12 classroom instruction, focusing on reading- and writing-to-learn strategies in any subject area. May be repeated up to 10 unit(s). (P/NP grading only.) GE credit: AH. Effective: 2005 Fall Quarter.

**UWP 198—Directed Group Study (1-5)**
Variable—1-5 hours. Prerequisite(s): UWP 001 or UWP 001V or UWP 001Y or ENL 003; or equivalent course; consent of instructor. May be repeated up to 10 unit(s). (P/NP grading only.) GE credit: AH, WE. Effective: 2018 Winter Quarter.

**UWP 199—Special Study for Advanced Undergraduates (1-5)**
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. (P/NP grading only.) GE credit: AH, WE. Effective: 2005 Fall Quarter.

**UWP 220—Rhetorical Approaches to Genre Study (4)**
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): Graduate standing or consent of instructor. Using genre theory and methods of analysis to understand and prepare to do research on different types of writing in varying academic and professional contexts. Emphasis on problems in organizational, professional, and/or interdisciplinary communication. Effective: 2015 Fall Quarter.

**UWP 225—English for International/ESL Graduate Students (4)**
Lecture/Discussion—4 hours. Prerequisite(s): Consent of Instructor. Multi-skills ESL course designed to help international/ESL students improve their English language skills for successful academic study. Emphasis on writing, speaking, listening, reading, and academic culture. Not open for credit to students who have taken LIN 025. (S/U grading only.) Effective: 2019 Winter Quarter.

**UWP 226—Writing for International Graduate Students (3)** [Review all entries](#)
Lecture—3 hours. Prerequisite(s): Consent of Instructor. Focuses on writing needed for academic work, including summaries, critiques, research and grant proposals, memos, resumes, and research papers. Includes a review of grammar needed for writing and some focus on reading skills and American vocabulary and idioms. Not open for credit to students who have taken LIN 026. (S/U grading only.) Effective: 2019 Winter Quarter.

**UWP 226—Writing for International Graduate Students (4)** [Review all entries](#)
Lecture/Discussion—4 hours. Prerequisite(s): Consent of Instructor. Focuses on writing needed for academic work, including summaries, critiques, research & grant proposals, memos, resumes, and research papers. Includes a review of grammar needed for writing and some focus on reading skills and American vocabulary and idioms. Not open for credit to students who have taken LIN 026. (S/U grading only.) Effective: 2019 Fall Quarter.
UWP 250—Writing Assessment (4)
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): Graduate standing or consent of instructor. Examines key testing and measurement concepts; the history of writing assessment; and relationships among writing tests and methods of teaching writing; the impacts of Information and Communication Technology (ICT), and how educational policies both drive and respond to writing assessments. Effective: 2011 Fall Quarter.

UWP 253—Writing Program Administration (4)
Extensive Writing; Lecture/Discussion—3 hours. Theories, models, and procedures of writing programs, primarily in higher education. Developmental, first-year, and advanced writing programs, writing centers, writing-across-the-curriculum programs, writing minors and majors, and graduate programs in rhetoric and composition. Effective: 2014 Fall Quarter.

UWP 255—Theory and Research in Response to Student Writing (4)
Discussion—3 hours; Extensive Writing; Extensive Writing/Discussion; Project (Term Project). Restricted to graduate standing. Intensive focus on the critical topic of response or feedback to student writers. Coverage of philosophy, theory, and empirical research on teacher written feedback, teacher-student writing conferences, peer response, and error correction. Effective: 2013 Fall Quarter.

UWP 270—Literacy and Technology (4)
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): Graduate standing or consent of instructor. Examines how the physical qualities of texts offer different affordances during production and reception; grounds these discussions in the development of literacy practices and writing technologies from ancient to contemporary; creates frameworks for research into literacy, teaching, and textual technologies. Effective: 2011 Fall Quarter.

UWP 271—Second Language Writing (4)
Extensive Writing; Project (Term Project); Seminar—3 hours. Prerequisite(s): Graduate standing. Restricted to graduate standing. Traces the history of second language writing theory and research on second language writers in a variety of academic and professional contexts. Emphasis on writer characteristics, texts, and contexts. Effective: 2013 Fall Quarter.

UWP 280—Journal Editing Workshop: Writing on the Edge (2)
Seminar—2 hours. Reading and critiquing manuscript submissions. Discussing relevant work in the field of writing studies. Applying principles of professional editing. Developmental editing, copy-editing, and typesetting of accepted manuscripts. Soliciting articles and communicating with contributors. Students encouraged to enroll both quarters. May be repeated for credit. (S/U grading only.) Effective: 2013 Fall Quarter.

UWP 298—Directed Group Study (1-5)
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. Graduate standing. (S/U grading only.) Effective: 2005 Fall Quarter.

UWP 299—Individual Study (1-12)
Workshop—1-12 hours. Prerequisite(s): Consent of Instructor. Graduate standing. (S/U grading only.) Effective: 2005 Fall Quarter.

UWP 390—Theory and Practice of Teaching University-Level Composition (4)
Extensive Writing; Seminar—3 hours. Open to graduate students teaching course 1 in the fall quarter following this course. Examination of current theories and practices in teaching of writing. Practical application to undergraduate writing courses. Emphasis on designing assignments and class sequences, and responding to student writing. Examination of impact of cultural, technological and theoretical changes on composition pedagogy. Effective: 2013 Fall Quarter.

UWP 391—Oral English for ESL Students (3)
Laboratory—2 hours; Lecture—2 hours. Prerequisite(s): Open only to non-native speakers of English with priority enrollment to international student teaching assistants; completion of any required ESL courses or consent of instructor. Intensive work in oral English for non-native English-speaking students, particularly international student teaching assistants, to increase fluency, accuracy, and use of appropriate discourse strategies in academic settings; e.g., seminar, discussion, laboratory. May be repeated for credit with consent of instructor. (S/U grading only.) Effective: 2019 Winter Quarter.

UWP 392—Teaching Expository Writing (2)
Discussion—2 hours. Prerequisite(s): UWP 390; Graduate standing, appointment as Teaching Assistant in the Composition Program; or the equivalent of UWP 390. Discussion of problems related to teaching expository writing
at the university level, with special emphasis on teaching reading and writing skills and responding to student papers. (S/U grading only.) Effective: 2005 Fall Quarter.

UWP 395—Teaching Multilingual Writers (4)
Seminar—3 hours. Prerequisite(s): Graduate standing or advanced undergraduate standing. Recommended: UWP 390, LIN 1, ENL/LIN/UWP 106. Preparing teachers of university-level second language writers, whether in composition courses or courses in other disciplines with a substantial writing component. Suitable for graduate students and advanced undergraduates. Effective: 2017 Fall Quarter.

UWP 396—Teaching Assistant Training Practicum (1-4)
Variable—1-4 hours. Prerequisite(s): Consent of Instructor. Graduate standing. May be repeated for credit for credit. (S/U grading only.) Effective: 2005 Fall Quarter.

Faculty. http://psychology.ucdavis.edu/directory-of-people/faculty#c4=all&b_start=0

The Major Programs

The psychology program at UC Davis is broad and includes students and faculty with a variety of interests. The department has developed around five major areas of emphasis:

Perception, Cognition, and Cognitive Neuroscience (PCCN) involves the study of awareness and thought, and includes such topics as perception, learning, memory, language and cognition.

Biological Psychology covers a broad spectrum of topics including evolutionary, neurobiological, and molecular mechanisms of behavior.

Social-Personality Psychology involves the study of the individual in his or her social environment and includes such topics as personality and individual differences, emotions, stereotyping and prejudice, intergroup relations, the psychology of religion and psychological health and dysfunction.

Developmental Psychology involves the study of changes in behavioral, cognitive, emotional, and social abilities that occur throughout the lifespan. Typical and atypical development is examined using a variety of methods including behavioral, neuroimaging, and physiological assessments.

Quantitative Psychology involves the study of linear and nonlinear models, psychometrics, mixed-effects models, and dynamic models, including experimental design, analysis of variance, regression, multivariate analysis, latent growth models, time series models, and factor analytic models.

The department offers the Bachelor of Arts (A.B.) program for students interested in the liberal arts and the Bachelor of Science (B.S.) program geared for students with an interest in either biology or mathematics. The main objective of both programs is a broad introduction to the scope of contemporary psychology. In addition to completing a number of common core courses for their degree, students may take approved elective courses from a wide range of topics including Educational Psychology, Interpersonal Communication, and Psychological Anthropology, to name a few. The department strongly encourages students to become involved in individual research projects under the direction of faculty members and to participate in our internship program to broaden experience and understanding of the field of psychology.
Preparatory Requirements. Before declaring a major in Psychology, students must complete PSC 001 and PSC 041 with a combined grade point average of at least 2.500. Both courses must be taken for a letter grade. If a 2.500 GPA is not attained in these two courses, a 2.000 GPA in a minimum of three upper division Psychology courses is also acceptable for major declaration.

Career Alternatives. A degree in psychology provides broad intellectual foundations which are useful to the graduate for the development of careers in a variety of areas, including social work, teaching, business, management and counseling. An undergraduate education in psychology also provides excellent preparation for graduate study. Individuals with degrees in psychology may enter graduate programs to prepare for teaching, research, or clinical/counseling careers in psychology, or may go on to professional schools for training in veterinary and human medicine, law, and many other professions.

Honors and Honors Program. In order to be eligible for high or highest honors in Psychology, the student must both meet the college criteria for honors and complete a research project involving a minimum of six units of course work over at least two quarters which represents an original analysis of data on psychological phenomena. Course 194HA-194HB or other approved courses can be used to satisfy the unit requirement. This project is to be written in thesis form and approved by the department. The quality of the thesis work will be the primary determinant for designating high or highest honors at graduation.

Graduate Study. The Department offers programs of study and research leading to the Ph.D. degree in psychology. Detailed information regarding graduate study may be obtained on our website.

Graduate Advisor. See http://psychology.ucdavis.edu/graduate.

Recommended for All Majors. Students who plan to do graduate work in any area of psychology are strongly encouraged to gain experience through research and internship activities.

Major Advisor. See staff advisors in 101 Young Hall; psychadvising@ucdavis.edu; 530-752-5104; http://psychology.ucdavis.edu/undergraduate/advising.

Group D: choose one:

PSC 140 Developmental Psychology 4

OR

HDE 100A Infancy and Early Childhood 4

OR

HDE 100B Middle Childhood and Adolescence 4

Students who have completed HDE 100A or HDE 100B prior to PSC 140 will receive two units of credit for PSC 140.

PSC 141 Cognitive Development 4

OR

HDE 101 Cognitive Development 4

OR

PSC 142 Social and Personality Development 4

OR

HDE 102 Social and Personality Development 4

PSC 143 Infant Development 4

PSC 146 The Development of Memory 4

PSC 148 Developmental Disorders 4

Approved Electives 12-14

Additional units to achieve 40 upper division units chosen from Psychology courses and/or approved electives. See list of approved electives below.

BIS 101 Genes and Gene Expression 4

NPB 101 Systemic Physiology 5

Recommended coursework for those interested in Graduate Programs in Biological Psychology:

PSC 180B Research in Psychobiology 4

PSC 199 Special Study for Advanced Undergraduates 1-5

On a Biological Psychology topic.

ANT 154A The Evolution of Primate Behavior 5

ESP 110 Principles of Environmental Science 4

EVE 100 Introduction to Evolution 4

EVE 101 Introduction to Ecology 4

Quantitative Emphasis Units: 90-103

Preparatory Subject Matter 41-54

PSC 001 General Psychology 4

OR

PSC 001Y General Psychology 4

The equivalent.

PSC 041 Research Methods in Psychology 4

STA 013 Elementary Statistics 4

OR

STA 100 Applied Statistics for Biological Sciences 4

Strongly recommended that PSC 041 and STA 013 or STA 100 be completed in the first year.

MAT 021A Calculus 4

MAT 021B Calculus 4

MAT 021C Calculus 4

ECS 032A Introduction to Programming 4

OR

ECS 036A Programming & Problem Solving 4

CHE 010 Concept of Chemistry 4

OR

CHE 002A General Chemistry 5

CHE 002B General Chemistry 5
CHE 002AH  Honors General Chemistry  5
CHE 002BH  Honors General Chemistry  5
PHY 010  Topics in Physics for Nonscientists  4
OR
PHY 010C  Physics of California  3

Psychology | PSC M.A.
(College of Letters and Science)
Susan Rivera, Ph.D., Chairperson of the Department

Department Office. 135 Young Hall; 530-752-1880; http://psychology.ucdavis.edu

Faculty. http://psychology.ucdavis.edu/directory-of-people/faculty#c4=all&b_start=0

Graduate Study. The Department offers programs of study and research leading to the Ph.D. degree in psychology. Detailed information regarding graduate study may be obtained on our website.

The Master of Arts degree is offered only in route to the Ph.D.

Graduate Advisor. See http://psychology.ucdavis.edu/graduate.

Psychology | PSC Ph.D.
(College of Letters and Science)
Susan Rivera, Ph.D., Chairperson of the Department

Department Office. 135 Young Hall; 530-752-1880; http://psychology.ucdavis.edu

Faculty. http://psychology.ucdavis.edu/directory-of-people/faculty#c4=all&b_start=0

Graduate Study. The Department offers programs of study and research leading to the Ph.D. degree in psychology. Detailed information regarding graduate study may be obtained on our website.

Graduate Advisor. See http://psychology.ucdavis.edu/graduate.

Psychology | PSC Minor
(College of Letters and Science)
Susan Rivera, Ph.D., Chairperson of the Department

Department Office. 135 Young Hall; 530-752-1880; http://psychology.ucdavis.edu

Faculty. http://psychology.ucdavis.edu/directory-of-people/faculty#c4=all&b_start=0

The Minor Programs
The psychology program at UC Davis is broad and includes students and faculty with a variety of interests. The department has developed around five major areas of emphasis:

Perception, Cognition, and Cognitive Neuroscience (PCCN) involves the study of awareness and thought, and includes such topics as perception, learning, memory, language and cognition.

Biological Psychology covers a broad spectrum of topics including evolutionary, neurobiological, and molecular mechanisms of behavior.
Social-Personality Psychology involves the study of the individual in his or her social environment and includes such topics as personality and individual differences, emotions, stereotyping and prejudice, intergroup relations, the psychology of religion and psychological health and dysfunction.

Developmental Psychology involves the study of changes in behavioral, cognitive, emotional, and social abilities that occur throughout the lifespan. Typical and atypical development is examined using a variety of methods including behavioral, neuroimaging, and physiological assessments.

Quantitative Psychology involves the study of linear and nonlinear models, psychometrics, mixed-effects models, and dynamic models, including experimental design, analysis of variance, regression, multivariate analysis, latent growth models, time series models, and factor analytic models.

Graduate Study. The Department offers programs of study and research leading to the Ph.D. degree in psychology. Detailed information regarding graduate study may be obtained on our website.

Graduate Advisor. See http://psychology.ucdavis.edu/graduate.

Recommended for All Majors & Minors. Students who plan to do graduate work in any area of psychology are strongly encouraged to gain experience through research and internship activities.

Minor Advisor. See staff advisors in 101 Young Hall; psychadvising@ucdavis.edu; 530-752-5104; http://psychology.ucdavis.edu/undergraduate/advising.

SOC 135 Social Relationships 4
SOC 152 Juvenile Delinquency 4
SOC 171 Sociology of Violence and Inequality 4

Total: 24

Psychology | PSC Courses

Courses in PSC:
PSC 001—General Psychology (4)
Lecture—4 hours. Principles and basic concepts of psychology. The empirical study of individual behavior including perception, cognition, development, personality, social interactions and the biological underpinnings of behavior. Not open for credit to students who have taken PSC 001Y. GE credit: SS. Effective: 2017 Winter Quarter.

PSC 001Y—General Psychology (4)
Discussion—1 hour; Lecture—1 hour; Web Virtual Lecture—2 hours. Introduction to empirical approaches. Focus on perception, cognition, personality and social psychology, and biological aspects of behavior. Not open for credit to students who have taken PSC 001. GE credit: SS. Effective: 2016 Fall Quarter.

PSC 012Y—Data Visualization in the Social Sciences (4)
Laboratory—1.5 hours; Lecture—2 hours; Web Virtual Lecture—1.5 hours. Introduction to quantitative data across the social sciences (Communications, Political Science, Psychology, Sociology, and other disciplines). Transforming data, describing data, producing graphs, visual reasoning, and interpretations. (Same course as CMN 012Y, SOC 012Y, POL 012Y.) GE credit: QL, VL. Effective: 2016 Spring Quarter.

PSC 020—Freshman Psychology Seminar (4)
Seminar—4 hours. Prerequisite(s): Freshman standing. Instructor will acquaint students with his or her program of research, the development of scientific questions from the literature, and the application of research methods to examine these questions. Critical thinking will be encouraged via expository writing and brief presentations. Effective: 1997 Winter Quarter.

PSC 041—Research Methods in Psychology (4)
Extensive Writing; Lecture—3 hours. Prerequisite(s): (PSC 001 or PSC 001Y); PSC 012Y, STA 013, or STA 100 strongly recommended. Introduction to experimental design, interviews, questionnaires, field and observational methods, reliability, and statistical inference. GE credit: QL. Effective: 2017 Fall Quarter.

PSC 051—Relationship Science: Lust, Love, and Evolution (4)
Lecture—4 hours. Prerequisite(s): PSC 001 or PSC 001Y; or introductory social science course or introductory life science course. Evolutionary perspectives on attraction and close relationships. Integrating social psychological and evolutionary theories with empirical evidence pertaining to human mating. GE credit: SE, SS. Effective: 2018 Spring Quarter.

PSC 061—Mindreading: Understanding Other Minds (4)
Extensive Writing; Lecture—3 hours. Prerequisite(s): PSC 001; (SOC 001 or PHI 010) Psychological perspectives on the process of understanding other people’s minds. Integration of social-cognitive theories with empirical evidence to explore the human ability to make sense of others’ thoughts, feelings, and behaviors. GE credit: SS. Effective: 2018 Fall Quarter.

PSC 090X—Lower Division Seminar (1-2)
Seminar—1-2 hours. Prerequisite(s): Consent of Instructor. Lower division standing. Limited enrollment. Examination of a special topic in Psychology through shared readings, discussions, written assignments, or special activities such as fieldwork or laboratory work. Effective: 1997 Winter Quarter.

PSC 098—Directed Group Study (1-5)
Variable. Primarily for lower division students. (P/NP grading only.) Effective: 1997 Winter Quarter.

PSC 099—Special Study for Lower Division Students (1-5)
Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

PSC 100—Introduction to Cognitive Psychology (4)
Lecture—4 hours. Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041 Introduction to human information processing, mental representation and transformation, imagery, attention, memory, language processing, concept formation, problem solving, and computer simulation. Not open for credit to students who have completed former PSC 136. Effective: 2018 Winter Quarter.

PSC 100Y—Introduction to Cognitive Psychology (4)
Discussion—1 hour; Lecture—1 hour; Web Virtual Lecture—4 hours. Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041 Introduction to human information processing, mental representation and transformation, imagery, attention, memory, language processing, concept formation, problem solving, and computer simulation. Not open for credit to students who have completed former PSC 136 or current PSC 100. Effective: 2018 Spring Quarter.

PSC 101—Introduction to Biological Psychology (4)
Lecture—4 hours. Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041 Pass One open to majors. Survey and integration
of the relationships between behavior and biological processes, including physiology, genes, development, ecology, and evolution. Two units of credit for those students who have completed NPB 100. Effective: 2018 Winter Quarter.

**PSC 103A—Statistical Analysis of Psychological Data (5)**
Laboratory—2 hours; Lecture—4 hours; Term Paper. Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041; (STA 013 or STA 013Y or STA 102) Pass One open to Psychology Majors. Design and statistical analysis of psychological investigations and the interpretation of quantitative data in psychology. Not open for credit to students who have completed PSC 103. GE credit: QL. Effective: 2018 Winter Quarter.

**PSC 103B—Statistical Analysis of Psychological Data (5)**
Laboratory—2 hours; Lecture—4 hours. Prerequisite(s): PSC 103A; (STA 013 or STA 013Y or STA 102) Pass One open to Psychology majors. Probability theory, sampling distributions, statistical inference, and hypothesis testing using standard parametric and correlational approaches. Simple regression analysis, multiple regression analysis, non-parametric statistics, introduction to multivariate statistics, with applications in psychology. Not open for credit to students who have completed PSC 105. GE credit: QL. Effective: 2018 Winter Quarter.

**PSC 104—Applied Psychometrics: An Introduction to Measurement Theory (4)**
Lecture—4 hours. Prerequisite(s): PSC 041; PSC 103A; (STA 013 or STA 013Y); Upper division standing in Psychology. Examination of the basic principles and applications of classical and modern test theory. Topics include test construction, reliability theory, validity theory, factor analysis and latent trait theory. GE credit: QL. Effective: 2018 Spring Quarter.

**PSC 107—Questionnaire and Survey Research Methods (4)**
Discussion/Laboratory—2 hours; Lecture/Discussion—2 hours. Prerequisite(s): PSC 001 or PSC 001Y; and Consent of Instructor. PSC 041 or an equivalent course on social or behavioral research methods or consent of instructor. Limited enrollment. Introduction to survey and questionnaire research methods with emphasis on how to ask questions. Social and psychological factors that influence survey response. Practical aspects of fielding survey and questionnaire research. GE credit: QL. Effective: 2018 Spring Quarter.

**PSC 113—Developmental Psychobiology (4)**
Laboratory—2 hours; Lecture—3 hours. Prerequisite(s): PSC 101 The biology of behavioral development; survey and integration of the organismic and environmental processes that regulate the development of behavior. Effective: 1997 Fall Quarter.

**PSC 120—Agent-Based Modeling (4)**
Lecture/Lab—4 hours. Prerequisite(s): PSC 100 and/or PSC 101 recommended Class size limited to 24 students. Introduction to agent-based computer simulation and analysis with emphasis on learning how to model animals, including humans, to achieve insight into social and group behavior. GE credit: QL. Effective: 2018 Spring Quarter.

**PSC 121—Physiological Psychology (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041; PSC 101 Pass One open to Psychology majors. Relationship of brain structure and function to behavior, motivation, emotion, language, and learning in humans and other animals. An introduction to the methodology of physiological psychology and neuroscience. Not open for credit to students who have completed former PSC 108. Effective: 2018 Winter Quarter.

**PSC 122—Advanced Animal Behavior (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): PSC 101 or NPB 102 Pass One open to Psychology majors. Advanced integrative survey of biological principles of behavioral organization, emphasizing historical roots, current research directions, conceptual issues and controversies. Laboratory exercises on the description and analysis of the behavior of captive and free-living animals Not open for credit to students who have completed former PSC 150. (Same course as NPB 150.) Effective: 2000 Fall Quarter.

**PSC 123—Hormones and Behavior (3)**
Lecture—3 hours. Prerequisite(s): NPB 101; (PSC 101 or NPB 102) Pass One open to Psychology majors. Endocrine physiology with an emphasis on the principles of behavior. Fundamental relationships between hormones and various behaviors engaged in by the organism during its lifetime. Role of hormones in behavioral homeostasis, social behavior, reproductive behavior, parental behavior, adaptation to stress. Not open for credit to students who have completed former PSC 152. (Same course as NPB 152.) Effective: 2000 Fall Quarter.

**PSC 124—Comparative Neuroanatomy (4)**
Laboratory—2 hours; Lecture—3 hours. Prerequisite(s): PSC 101 or NPB 100 or NPB 101 Overview of the neuroanatomy of the nervous system in a variety of mammalian and non-mammalian vertebrates. Examine changes
or modifications to neural structures as a result of morphological or behavioral specializations. (Same course as Neurobiology, Physiology, and Behavior 124) GE credit: SL. Effective: 1997 Fall Quarter.

**PSC 124—Comparative Neuroanatomy (3)** *Review all entries*

Lecture—3 hours. Prerequisite(s): NPB 100 or NPB 101 or NPB 110B or PSC 121 Overview of the neuroanatomy in mammalian vertebrates, focusing on the cerebral cortex and experimental techniques. Examine changes or modifications to neural structures as a result of morphological or behavioral specializations. (Same course as NPB 124.) Effective: 2018 Fall Quarter.

**PSC 124L—Comparative Neuroanatomy Laboratory (2)**

Laboratory—6 hours. Prerequisite(s): PSC 124 (can be concurrent) Pass One restricted to PSC and NPB majors; must be concurrently enrolled in PSC 124. Comparative neuroanatomy laboratory illustrating modern neuroanatomical techniques in determining neural connections within the mammalian brain. Includes experimentation and presentation of results. (Same course as NPB 124L) Effective: 2018 Fall Quarter.

**PSC 125—Behavioral Epigenetics (4)**

Lecture—4 hours. Prerequisite(s): PSC 101 Review of basic principles in genetics and epigenetics with emphasis on behavior. Introduction to the use of modern molecular methods in understanding the complex relationships between genes, environment, and behavior. Effective: 2016 Fall Quarter.

**PSC 126—Health Psychology (4)**

Lecture—4 hours. Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041; PSC 101 recommended. Pass One open to Psychology majors. Psychological factors influencing health and illness. Topics include stress and coping, personality and health, symptom perception and reporting, heart disease, cancer, compliance, and health maintenance and promotion. Not open for credit to students who have completed former PSC 160. Effective: 2018 Winter Quarter.

**PSC 130—Human Learning and Memory (4)**

Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041; (PSC 012Y or STA 013 or STA 100); or Consent of Instructor. Consideration of major theories of human learning and memory with critical examination of relevant experimental data. Effective: 2018 Winter Quarter.

**PSC 131—Perception (4)**

Discussion/Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041; (PSC 100 or PSC 135) Cognitive organizations related to measurable physical energy changes mediated through sensory channels. Perception of objects, space, motion, events. Effective: 2018 Winter Quarter.

**PSC 132—Language and Cognition (4)**

Lecture—3 hours; Term Paper. Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041; (PSC 100 or PSC 135); or Consent of Instructor. Introduction to the cognitive processes involved in language comprehension and production. Topics include the biological foundations of language, speech perception, word recognition, syntax, reading ability, and pragmatics. GE credit: WE. Effective: 2018 Winter Quarter.

**PSC 133—Neuroeconomics/Reinforcement Learning and Decision Making (4)**

Lecture—3 hours; Term Paper. Prerequisite(s): (PSC 100 or PSC 100Y or PSC 135 or ARE 100A or ECN 100A or NPB 162 or NPB 163); (STA 013 or STA 013Y or STA 100 or PSC 103A); or Consent of Instructor. Theoretical and empirical approaches to neuroeconomics (neuroscience of decision making) from psychology, neuroscience, economics, and computer science. Neuroscience of judgment and decision making, behavioral economics, and reinforcement learning. (Same course as ECN 107 and CGS 107.) GE credit: SL, SS. Effective: 2018 Spring Quarter.

**PSC 134—Cognitive Neuroscience: The Biological Foundations of the Mind (4)** *Review all entries*

Lecture—4 hours. Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041; or Consent of Instructor. PSC 101, PSC 121, or PSC 129 recommended. Neuroscientific foundations of higher mental processes including attention, memory, language, higher-level perceptual and motor processes, and consciousness. Emphasis on the neural mechanisms which form the substrates of human cognition and the relationship of mind to brain. Effective: 2018 Winter Quarter.

**PSC 135—Cognitive Neuroscience: The Biological Foundations of the Mind (4)** *Review all entries*

Lecture—4 hours. Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041; or Consent of Instructor. PSC 101 or PSC 121 recommended. Neuroscientific foundations of higher mental processes including attention, memory, language, higher-level perceptual and motor processes, and consciousness. Emphasis on the neural mechanisms which form the substrates of human cognition and the relationship of mind to brain. Effective: 2019 Spring Quarter.

**PSC 136—Psychology of Music (4)**

Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041; (PSC 100 or PSC 135 or
MUS 006C); or Consent of Instructor. Introduction to the mental and neural representations of musical structures and processes involved in perceiving, remembering, and performing music. Music and emotion. GE credit: WE. Effective: 2018 Spring Quarter.

PSC 137—Neurobiology of Learning & Memory (4)
Lecture—4 hours. Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041; PSC 101 Overview of the neural basis of learning and memory focusing on modern behavioral neuroscience research with animals. Topics include consolidation, neural plasticity, cellular competition for memory storage, and the role of neurogenesis in learning. Effective: 2018 Spring Quarter.

PSC 138—Consciousness and Cognition (4)
Lecture—4 hours. Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041; (PSC 100 or PSC 135) Current theoretical and empirical evidence in the study of cognition and consciousness. Theories of consciousness, psychological and neural basis of conscious and unconscious processes such as attention, intentionality, and dreams. (Same course as CGS 138.) Effective: 2018 Spring Quarter.

PSC 139—Advanced Cognitive Neuroscience (4)
Lecture—3 hours; Term Paper. Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041; PSC 135; or Consent of Instructor. Advanced integrative survey of cognitive neuroscience, including perception, attention, memory, and navigation. Emphasis on reviewing literature in psychology, neuroscience, and statistics; understanding methods in cognition; and presentation skills. GE credit: SL. Effective: 2018 Spring Quarter.

PSC 140—Developmental Psychology (4)
Lecture—4 hours. Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041 Pass One open to Psychology majors. An ontogenetic account of human behavior through adolescence with emphasis on motor skills, mental abilities, motivation, and social interaction. Two units of credit allowed to students who have completed HDE 100A or HDE 100B; not open for credit to students who have completed PSC 112. (Former PSC 112.). Effective: 2018 Winter Quarter.

PSC 140Y—Developmental Psychology (4)
Discussion—1 hour; Lecture—1.5 hours; Web Virtual Lecture. Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041 Pass One open to Psychology Majors. Ontogenetic account of human behavior through adolescence with emphasis on motor skills, mental abilities, motivation, and social interaction. Two units of credit allowed to students who have completed HDE 100A or HDE 100B; not open for credit to students who have completed PSC 112. (Former course 112.). Effective: 2019 Winter Quarter.

PSC 141—Cognitive Development (4)
Lecture—3 hours; Term Paper—1 hour. Prerequisite(s): PSC 140 or HDE 100A or HDE 100B Pass One open to Psychology & Human Development majors. Theories, methods, evidence, and debates in the field of cognitive development, such as nature/nurture, constraints on learning, and the role of plasticity. Topics include attention, memory, concepts about the physical and social world, and language. (Same course as HDE 101.) GE credit: WE. Effective: 2002 Fall Quarter.

PSC 142—Social and Personality Development (4)
Lecture—3 hours; Term Paper—1 hour. Prerequisite(s): PSC 140 or HDE 100A or HDE 100B Pass One open to Psychology and Human Development majors. Social and personality development of children, infancy through adolescence. Topics include the development of personality, achievement motivation, self-understanding, sex-role identity, and antisocial behavior. Emphasis on the interface between biological and social factors. (Same course as HDE 102.) GE credit: SS, WE. Effective: 2002 Fall Quarter.

PSC 143—Infant Development (4) Extensive Writing; Lecture—3 hours. Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041; (PSC 140 or HDE 100A) Psychological development in infancy. Topics include physical and motor development, sensory and nervous system development, and memory and cognitive development. Emphasis will be on evaluating theories, empirical research, and experimental methods for understanding infant development. GE credit: WE. Effective: 2018 Winter Quarter.

PSC 143—Infant Development (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041; (PSC 140 or HDE 100A) Psychological development in infancy. Topics include physical and motor development, sensory and nervous system development, and memory and cognitive development. Emphasis will be on evaluating theories, empirical research, and experimental methods for understanding infant development. Effective: 2019 Winter Quarter.
PSC 145—Social Psychology (4) Review all entries Discontinued
Lecture—4 hours. Behavior of the individual in the group. Examination of basic psychological processes in social situations, surveying various problems of social interaction: group tensions, norm-development, attitudes, values, public opinion, status. Effective: 2000 Fall Quarter.

PSC 145—Developmental Cognitive Neuroscience (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): PSC 135 or (PSC 140 or HDE 100A or HDE 100B); (PSC 101 or PSC 121 or NPB 161 or HDE 163); PSC 141 recommended. Neuroscientific theories and methods (EEG, ERP, fNIRS, fMRI) that inform an understanding of behavioral and cognitive development over infancy and childhood. Neurodevelopmental correlates of perception, action, language, and social cognition; value of the neuroscientific perspective; limitations and challenges of neuroscientific research in the developmental context. GE credit: SL. Effective: 2018 Fall Quarter.

PSC 146—The Development of Memory (4)
Lecture—3 hours; Term Paper—1 hour. Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041; and any Psychology upper division course from Core Group A or D. Pass One open to Psychology majors. Theory and research on memory development with focus on infancy and childhood. Not open for credit to students who have completed former PSC 133. GE credit: WE. Effective: 2018 Spring Quarter.

PSC 148—Developmental Disorders (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041; (PSC 140 or PSC 141 or HDE 100A or HDE 100B) Current scientific knowledge of the influences of biological, cognitive, and environmental factors on the emergence of disorders with onset in childhood. Examples include autism spectrum, ADD/ADHD, dyslexia and dyscalculia. Emphasis placed on understanding these disorders, their causes and their treatments. Effective: 2018 Spring Quarter.

PSC 151—Social Psychology (4) Review all entries
Lecture—4 hours. Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041 Pass One open to Psychology majors. Behavior of the individual in the group. Examination of basic psychological processes in social situations, surveying various problems of social interaction: group tensions, norm-development, attitudes, values, public opinion, status. Not open for credit to students who have completed former course 145. GE credit: DD. Effective: 2018 Winter Quarter.

PSC 151—Social Psychology (4) Review all entries
Lecture—4 hours. Prerequisite(s): PSC 001 or PSC 001Y, PSC 041 recommended Pass One open to Psychology majors. Behavior of the individual in the group. Examination of basic psychological processes in social situations, surveying various problems of social interaction: group tensions, norm-development, attitudes, values, public opinion, status. Not open for credit to students who have completed former PSC 145. GE credit: DD. Effective: 2018 Summer Session 1.

PSC 152—Social Cognition (4)
Lecture—4 hours. Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041 Examines how social factors influence how we attend to, encode, and process information and how these mental processes affect subsequent judgments and behavior. Effective: 2018 Spring Quarter.

PSC 153—Psychology and Law (4)
Lecture—4 hours. Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041 Pass One open to Psychology majors. Current theoretical and empirical issues in the study of psychology and law. Topics include eyewitness testimony, child abuse, jury decision making, juvenile delinquency and criminology, prediction of violence, insanity defense, and memory for traumatic events. Not open for credit to students who have completed former PSC 115. Effective: 2018 Spring Quarter.

PSC 154—Psychology of Emotion (4) Review all entries
Lecture—4 hours. Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041 Pass One open to Psychology majors. An introduction to current theories and research on emotion and bodily feelings with special reference to self-knowledge. Not open for credit to students who have completed former course 143. Effective: 2018 Winter Quarter.

PSC 154—Psychology of Emotion (4) Review all entries
Lecture—4 hours. Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041 Pass One open to Psychology majors. Introduction to current theories and research on emotion and bodily feelings with special reference to self-knowledge. Effective: 2018 Summer Session 1.

PSC 157—Stereotyping, Prejudice, and Stigma (4) Review all entries
Lecture/Discussion—4 hours. Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041 Social psychological underpinnings of social psychological underpinnings of
stereotyping, prejudice, and stigma from sociocultural, motivational, and cognitive perspectives. Topics include: origins, maintenance, change, effects on person perception and memory, and the automaticity/controllability of stereotyping and prejudice. GE credit: DD. Effective: 2018 Winter Quarter.

**PSC 157—Stereotyping, Prejudice, and Stigma (4)**  
Review all entries  
Lecture—3 hours; Term Paper. Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041 Social psychological underpinnings of stereotyping, prejudice, and stigma from sociocultural, motivational, and cognitive perspectives. Topics include: origins, maintenance, change, effects on person perception and memory, and the automaticity/controllability of stereotyping and prejudice. GE credit: DD. Effective: 2019 Winter Quarter.

**PSC 158—Sexual Orientation and Prejudice (4)**  
Lecture/Discussion—4 hours. Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041 Pass One open to Psychology majors. Current scientific knowledge about sexual orientation and prejudice based on sexual orientation. Emphasis is placed on learning the skills necessary for a critical understanding of science and public policy issues relevant to sexuality. GE credit: ACGH, DD, SS, WE. Effective: 2018 Spring Quarter.

**PSC 159—Gender and Human Reproduction (4)**  
Lecture—4 hours. Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041 Pass One open to Psychology majors. Psychology of reproduction. Reproductive events over the course of an individual's life, including sexual development, mate choice, relationships, and reproduction. Biological and social psychological explanations at the levels of mechanism and evolutionary function. Not open for credit to students who have completed former PSC 149. (Former course PSC 149.). Effective: 2018 Spring Quarter.

**PSC 161—Psychology of the Self (4)**  
Lecture—4 hours. Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041 Psychological theory and research on the self. Topics include: self-knowledge, self-esteem, self-regulation, self-presentation, cognitive and emotional aspects of the self, and the role of the self in shaping social interaction. Effective: 2018 Spring Quarter.

**PSC 162—Introduction to Personality Psychology (4)**  
Lecture—3 hours; Term Paper. Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041 Pass One open to Psychology majors. Scientific study of personality. Methods of personality research. Overview of current research and theory in the field of personality psychology. Not open for credit to students who have completed former PSC 147. GE credit: SS. Effective: 2018 Winter Quarter.

**PSC 165—Introduction to Clinical Psychology (4)**  
Lecture—4 hours. Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041; PSC 168; (PSC 140 or PSC 151) Major theoretical formulations in the history of clinical psychology, from classical psychoanalysis to contemporary existentialism and behavior modification. A survey, based on lectures, films, and tapes, of what clinical psychologists do, including methods of appraisal, professional roles, and approaches to treatment. Effective: 2018 Spring Quarter.

**PSC 166—Abnormal Psychology (4)**  
Lecture—4 hours. Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041 Descriptive and functional account of behavioral disorders, with primary consideration given to neurotic and psychotic behavior. GE credit: SS. Effective: 2018 Winter Quarter.

**PSC 170—Psychology of Religion (4)**  
Lecture—4 hours. Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041 Major theories, issues, data, and research methodologies of the psychology of religion. Religious experience and expression; religious development in childhood, adolescence, and adulthood; conversion; religious influences on physical and mental health; cross-cultural perspectives. GE credit: WE. Effective: 2018 Winter Quarter.

**PSC 175—Genius, Creativity, and Leadership (4)**  
Lecture—3 hours; Term Paper. Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041; or Consent of Instructor. Or equivalents. Phenomenon of genius is examined from a diversity of theoretical, methodological, and disciplinary perspectives, with an emphasis on outstanding creativity and leadership in art, music, literature, philosophy, science, war, and politics. GE credit: SS, WE. Effective: 2018 Spring Quarter.

**PSC 180A—Research in Cognitive and Perceptual Psychology (4)**  
Laboratory—4 hours; Lecture—2 hours. Prerequisite(s): PSC 041; four upper division Psychology courses and Consent of Instructor. Empirical research on selected topics in general experimental psychology (general research design and analysis, perception, cognition, cognitive development, etc.). Specific content will vary from quarter to quarter. May be repeated once for credit when content differs. May be repeated up to 1 time(s). Effective: 1998 Fall Quarter.
PSC 180B—Research in Psychobiology (4)
Laboratory—4 hours; Lecture—2 hours. Prerequisite(s): PSC 101; Three additional upper division courses in Psychology and Consent of Instructor. Empirical research on selected topics in psychobiology (animal learning, animal behavior, physiological and sensory psychology, developmental psychobiology, computer modeling of neural systems). Content varies. May be repeated once for credit when content differs. May be repeated up to 1 time(s). Effective: 1997 Fall Quarter.

PSC 180C—Research in Personality and Social Psychology (4)
Laboratory—4 hours; Lecture—2 hours. Prerequisite(s): PSC 041; four upper division Psychology courses and Consent of Instructor. Empirical research on selected topics in personality and social psychology (personality, social psychology, organizational psychology, etc.). Content will vary from quarter to quarter. May be repeated once for credit when specific content differs. May be repeated up to 1 time(s). Effective: 1997 Winter Quarter.

PSC 180D—Research in Developmental Psychology (4)
Laboratory—4 hours; Lecture—2 hours. Prerequisite(s): PSC 041; Consent of Instructor. Four upper division Psychology courses. Empirical research on selected topics in developmental psychology (research design and analysis, development, cognitive development, social and personality development etc.). May be repeated up to 1 time(s) when content differs. Effective: 2017 Winter Quarter.

PSC 182—Methods in Laboratory Research (4)
Laboratory—4 hours; Lecture—2 hours. Prerequisite(s): Consent of Instructor. Training in specific lab-based research methods coupled with hands-on experience in a research lab. Students assessed on their ability report and interpret research findings. Content varies from quarter to quarter. May be repeated up to 2 time(s) when content differs. Effective: 2018 Fall Quarter.

PSC 185—History of Psychology (4)
Lecture—3 hours; Term Paper. Prerequisite(s): (PSC 001 or PSC 001Y); PSC 041; Upper division standing or consent of instructor. Pass One open to Psychology majors. Development of psychological thought and research in context of history of philosophy and science. Not open for credit to students who have completed PSC 120. (Former PSC 120.). GE credit: SS, WE. Effective: 2018 Winter Quarter.

PSC 190—Seminar in Psychology (4)
Seminar—4 hours. Prerequisite(s): Junior or senior standing; major in Psychology or consent of instructor. Intensive treatment of a special topic or problem of psychological interest. May be repeated for credit in different subject area. May be repeated for credit. Effective: 1997 Winter Quarter.

PSC 190X—Upper Division Seminar (1-2)

PSC 192—Fieldwork in Psychology (1-6)
Fieldwork—1-6 hours. Prerequisite(s): Consent of Instructor. Upper division standing in Psychology. Limited enrollment. Supervised internship off and on campus, in community and institutional settings. Maximum of six units may be used towards satisfaction of upper division major requirement. May be repeated up to 1 time(s) per internship site. (P/NP grading only.) Effective: 2017 Winter Quarter.

PSC 194HA—Special Study for Honors Students (3)
Independent Study—9 hours. Prerequisite(s): Consent of Instructor. Senior standing in Psychology and qualifications for admission into college honors program; at least one course from PSC 180A, PSC 180B, PSC 180C or PSC 199 strongly recommended. Directed research. Supervised reading, research and writing leading to submission of a Senior Honors thesis under the direction of faculty sponsor. GE credit: WE. Effective: 1997 Winter Quarter.

PSC 194HB—Special Study for Honors Students (3)
Independent Study—9 hours. Prerequisite(s): Consent of Instructor. Senior standing in Psychology and qualifications for admission into college honors program; at least one course from PSC 180A, PSC 180B, PSC 180C or PSC 199 strongly recommended. Directed research. Supervised reading, research and writing leading to submission of a Senior Honors thesis under the direction of faculty sponsor. GE credit: WE. Effective: 1997 Winter Quarter.

PSC 197T—Tutoring in Psychology (1-3)
Tutorial—1-3 hours. Prerequisite(s): Consent of Instructor. Upper division standing. Intended for advanced undergraduate students who will lead discussion sections in Psychology courses. May be repeated for credit for a total of 8 units. May be repeated up to 8 unit(s). (P/NP grading only.) Effective: 1997 Winter Quarter.
PSC 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

PSC 199—Special Study for Advanced Undergraduates (1-5)
Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

PSC 200—Proseminar in Psychology (3)
Independent Study—1 hour; Seminar—2 hours. Prerequisite(s): Graduate standing in Psychology or consent of instructor. Introduces matriculating graduate students to research activities of departmental faculty. (S/U grading only.) Effective: 1997 Winter Quarter.

PSC 201—Research Preceptorship (4)
Discussion—5 hours; Laboratory—4 hours. Prerequisite(s): Consent of Instructor. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

PSC 202—Research Seminar (1)
Seminar—1 hour. Prerequisite(s): Graduate standing in Psychology. Presentation of graduate research to program faculty and graduate students. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

PSC 204A—Statistical Analysis of Psychological Experiments (5)
Laboratory—2 hours; Lecture—4 hours. Prerequisite(s): STA 102; Or equivalent; graduate standing in Psychology or consent of instructor. Probability theory, sampling distributions, statistical inference, and hypothesis testing using standard parametric and correlational approaches. Analysis of variance, factorial and repeated measures, and tests of trends. Not open for credit to students who have completed PSC 206. Effective: 2014 Spring Quarter.

PSC 204B—Causal Modeling of Correlational Data (5)
Laboratory—2 hours; Lecture—4 hours. Prerequisite(s): PSC 204A; Or the equivalent course and graduate standing in Psychology or consent of instructor. Examination of how to make causal inferences from correlational data in the behavioral sciences. Emphasis is on testing rival causal models using correlations among observed variables. Beginning with multiple regression analysis, discussion advances to path analysis and related techniques. Not open for credit to students who have completed PSC 207A. Effective: 2015 Spring Quarter.

PSC 204D—Advanced Statistical Inference from Psychological Experiments (5)
Laboratory—2 hours; Lecture—4 hours. Prerequisite(s): PSC 204A; Or the equivalent; graduate standing in Psychology or consent of instructor. Advanced topics in statistical inference, which may include probability theory, sampling distributions, statistical inference and hypothesis testing, nonparametric statistics, Bayesian approaches, and advanced issues in analysis of variance. Not open for credit to students who have completed PSC 205. Effective: 2014 Spring Quarter.

PSC 205A—Applied Multivariate Analysis of Psychological Data (4)
Lecture—4 hours. Prerequisite(s): PSC 204A; PSC 204B; PSC 204D; or Consent of Instructor. Review of the major methods of multivariate data analysis for psychological data. Students will program statistical routines using a linear algebra-based computing language. Topics will include multivariate analysis of variance, discriminant analysis, canonical analysis factor analysis, and component analysis. Not open for credit to students who have completed PSC 207B. (Former PSC 207B.). Effective: 2017 Spring Quarter.

PSC 205B—Factor Analysis (4)
Lecture—3 hours; Term Paper. Prerequisite(s): PSC 204A; PSC 204B; or Consent of Instructor. Or equivalent courses; graduate standing. Theory and methods of factor analysis, including exploratory factor analysis, confirmatory factor analysis, and principal component analysis. Effective: 2015 Winter Quarter.

PSC 205C—Structural Equation Modeling (4)
Lecture—3 hours; Term Paper. Prerequisite(s): PSC 204A; PSC 204B; or Consent of Instructor. Or equivalent courses; graduate standing. Theory and methods of structural equation modeling, including path analysis, confirmatory factor analysis, multiple-group modeling and latent growth curve modeling. Effective: 2008 Fall Quarter.

PSC 205D—Multilevel Models (4)
Lecture—4 hours. Prerequisite(s): PSC 204A; Graduate standing or consent of instructor. Introduction to statistical techniques for the analysis of normal, hierarchically structured data, such as cross-sectional clustered data or repeated-measures data. Topics include hierarchical linear models, latent growth curve models, and how these methods handle unbalanced and/or missing data. Effective: 2004 Fall Quarter.
PSC 205E—Applied Psychometrics and Measurement Theory (4)
Lecture—4 hours. Prerequisite(s): PSC 204A; Graduate standing in Psychology or consent of instructor. Examination of the basic principles and applications of classical and modern test theory. Topics include test construction, reliability theory, validity theory, factor analysis, and latent trait theory. Not open for credit to students who have completed PSC 204 or PSC 204C. Effective: 2013 Fall Quarter.

PSC 205F—Item Response Theory (4)
Lecture—3 hours; Term Paper. Prerequisite(s): PSC 204A; Or the equivalent; graduate standing in Psychology or consent of instructor. Item response theory allows for the creation of precise measurement instruments in psychological testing. Review Classical Test Theory, and then cover basic IRT models through advanced applications. Effective: 2014 Winter Quarter.

PSC 205G—Applied Longitudinal Data Analysis (4)
Lecture—3 hours; Term Paper. Prerequisite(s): PSC 204A; Graduate standing in Psychology or consent of instructor. Modeling and understanding of intraindividual change and interindividual differences in change. Reviews conventional methods and introduces contemporary techniques for modeling intraindividual change. Effective: 2014 Fall Quarter.

PSC 206A—Theoretical Foundations: Research Methods in Psychology (4)
Lecture/Discussion—3 hours; Term Paper. Restricted to graduate student status. Examines the philosophy and research practices underlying experimental psychology. Topics to be covered include philosophy of science/ epistemology, research design, inference and bias in research, theory development, validity, the social context of research, and critical thinking about research. Effective: 2010 Spring Quarter.

PSC 206B—Research Methods in Psychology: Applications in Social-Personality Research (4)
Lecture/Discussion—3 hours; Term Paper. Restricted to graduate student status. Overview of the research designs, assessment methods, and statistical procedure used by social-personality psychologists. Focus on the practical issues that arise when using each method in specific research contexts. Effective: 2009 Fall Quarter.

PSC 207—Survey and Questionnaire Research Methods (4)
Seminar—4 hours. Prerequisite(s): Graduate standing in Psychology or consent of instructor. A conceptual analysis of the contributions of neuroanatomy, neurophysiology and neurochemistry to an understanding of animal and human behavior. Effective: 1997 Winter Quarter.

PSC 208—Physiological Psychology (4)
Seminar—4 hours. Prerequisite(s): Graduate standing in Psychology or consent of instructor. The Matlab programming environment as a means of organizing, analyzing, and visualizing scientific data. Basic programming concepts such as variables, loops, conditional branching, and efficient programming techniques will be emphasized. Effective: 2006 Fall Quarter.

PSC 209A—Introduction to Programming: Matlab (4)
Lecture/Lab—3 hours. Prerequisite(s): Graduate standing or consent of instructor. The Matlab programming environment as a means of organizing, analyzing, and visualizing scientific data. Basic programming concepts such as variables, loops, conditional branching, and efficient programming techniques will be emphasized. Effective: 2006 Fall Quarter.

PSC 210—Fundamentals of Cognitive Neuroimaging (3)
Lecture/Discussion—3 hours. Prerequisite(s): Basic knowledge of inferential statistics and experimental Psychology. Introduction to empirical foundations and methodology of neuroimaging, emphasizing pragmatics of functional magnetic resonance imaging (fMRI) to study cognition. Topics include MR physics, the relationship between neural activity and the BOLD response, experimental design, and analysis of fMRI data. Effective: 2007 Fall Quarter.

PSC 211—Advanced Topics in Neuroimaging (3)
Laboratory—1 hour; Seminar—2 hours. Prerequisite(s): PSC 210; or Consent of Instructor. Restricted to 16 students. Critical presentation and discussion of the most influential advanced issues in neuroimaging, emphasizing fMRI design/analysis and the integration of fMRI with EEG/MEG. May be repeated for credit when topics differ. (Same course as NSC 211 and NPB 211.) (S/U grading only.) Effective: 2017 Spring Quarter.
PSC 212A—Developmental Psychology: Cognitive and Perceptual Development (4)
Seminar—4 hours. Prerequisite(s): Graduate standing or consent of instructor; completion of an undergraduate or graduate course on developmental psychology or human development. Theories and empirical findings concerning human cognitive and perceptual development. Development of perception, memory, concepts (e.g., theory of mind, concepts about number), problem solving, and language from infancy to adolescence. Effective: 2003 Fall Quarter.

PSC 212B—Developmental Psychology: Social, Emotional, and Personality Development (4)
Seminar—4 hours. Prerequisite(s): Graduate standing or consent of instructor; completion of an undergraduate or graduate course on developmental psychology or human development. Theories and empirical findings concerning human social, emotional, and personality development. Development of emotions, moral reasoning and behavior, personality, self-concept, and social cognition from infancy to adolescence (may include adulthood). Effective: 2003 Fall Quarter.

PSC 217—Behavioral Genetics (4)
Discussion/Laboratory—1 hour; Lecture—3 hours; Term Paper. Prerequisite(s): Graduate standing. Restricted to 20 students. Review basic principles in genetics and select topics in molecular genetics with emphasis on behavior. Use of modern molecular methods to outline complex relationships between genes, environment, and behavior. Not open for credit to students who have completed PSC 251. Effective: 2008 Spring Quarter.

PSC 218A—Fundamentals of Animal Behavior (5)
Discussion—1 hour; Lecture/Discussion—4 hours. Prerequisite(s): Consent of Instructor. Upper division undergraduate introduction to the biology of behavior, such as PSC 101, PSC 122, PSC 123, NPB 102, NPB 150, NPB 152, WFC 141, ENT 104, or ANS 105. Survey of the phenomena and theory of animal behavior from the perspectives of multiple biological disciplines, including evolution, ecology, psychology, genetics, neurobiology, endocrinology, and animal science. (Same course as ANB 218A.) Effective: 2007 Fall Quarter.

PSC 218B—Fundamentals of Animal Behavior (5)
Discussion—1 hour; Lecture/Discussion—4 hours. Prerequisite(s): PSC 209A; or Consent of Instructor. Survey of the phenomena and theory of animal behavior from the perspectives of multiple biological disciplines, including evolution, ecology, psychology, genetics, neurobiology, endocrinology, and animal science. (Same course as ANB 218B.) Effective: 2007 Fall Quarter.

PSC 220—History of Psychology (4)
Lecture—2 hours; Seminar—2 hours. Prerequisite(s): Graduate standing in Psychology or consent of instructor. A lecture-seminar on the history of psychology and on the applicability of early psychological theory and research to contemporary investigations. Effective: 1997 Winter Quarter.

PSC 221—Academic Writing in Psychology (4) Review all entries
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. Class size limited to 10 students. Strategies for developing and honing academic writing skills and writing productivity, with a particular focus on how to write a clear and compelling empirical journal article in psychology. May be repeated up to 4 unit(s) with consent of instructor if student chooses to focus on a substantially different writing project. Effective: 2013 Spring Quarter.

PSC 221—Academic Writing in Psychology (4) Review all entries
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. Cannot have taken the course twice. In other words, the course can be repeated once. Strategies for developing and honing academic writing skills and writing productivity, with a particular focus on how to write a clear and compelling empirical journal article in psychology. May be repeated up to 1 time(s) with consent of instructor if student chooses to focus on a substantially different writing project. Effective: 2019 Winter Quarter.

PSC 230—Cognitive Psychology (4)
Seminar—4 hours. Prerequisite(s): Graduate standing in Psychology or consent of instructor. Analysis of the mental processes by which knowledge is acquired, manipulated, stored, retrieved and used. Effective: 1997 Winter Quarter.

PSC 231—Sensation and Perception (4)
Seminar—4 hours. Prerequisite(s): Graduate standing in Psychology or consent of instructor. Analysis of the role of sensory processes and perception in experience and their effects on behavior. Effective: 1997 Winter Quarter.

PSC 241—Attitudes and Social Influence (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. Survey of theory and research in the field of attitudes and social influence. Topics include attitude definition and measurement, major theories of attitude formation and change, the relationship between attitudes and behavior, and recent directions and controversies. Effective: 2011 Fall Quarter.
PSC 242—Attraction and Close Relationships (4)  
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing in Psychology, Sociology, Human Development, a related social science, or consent of instructor. Social psychological theory and research on attraction and close relationships, with a particular emphasis on romantic relationships. Covers attachment theory, interdependence theory, and evolutionary psychological perspectives. Effective: 2018 Winter Quarter.

PSC 243—Social Cognition (4)  
Lecture/Discussion—3 hours; Term Paper. Processes underlying the perception, memory, and judgment of social stimuli, the effects of social and affective factors on cognition, and the interpersonal consequences of those processes. Topics include automaticity/control, motivated cognition, person perception, stereotyping, attitudes, and persuasion. Effective: 2007 Fall Quarter.

PSC 244—Stereotyping, Prejudice, and Stigma (4)  
Lecture/Discussion—3 hours; Term Paper. This course examines the social psychological underpinnings of stereotyping, prejudice, and stigma, including sociocultural, motivational, and cognitive factors. Effective: 2007 Fall Quarter.

PSC 245—Social Psychology (4)  
Seminar—4 hours. Prerequisite(s): Graduate standing in Psychology or consent of instructor. Theory and research in social psychology. Effective: 1997 Winter Quarter.

PSC 247—Personality (4)  
Seminar—4 hours. Prerequisite(s): Graduate standing in Psychology or consent of instructor. Theory and research in human personality. Effective: 1997 Winter Quarter.

PSC 251—Topics in Genetic Correlates of Behavior (4)  
Seminar—4 hours. Prerequisite(s): Graduate standing in Psychology or consent of instructor. Theory and experiment in the genetic contributions to animal and human behavior. May be repeated for credit when topic differs. May be repeated for credit. Effective: 1997 Winter Quarter.

PSC 252—Topics in Psychobiology (4)  
Seminar—4 hours. Prerequisite(s): Graduate standing in Psychology or consent of instructor. Critical study in a selected area of psychobiology. May be repeated for credit when content differs. May be repeated for credit. Effective: 1997 Winter Quarter.

PSC 261—Cognitive Neuroscience (4)  
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Graduate student standing in Psychology or Neuroscience or consent of instructor. Graduate core course for neuroscience. Neurobiological bases of higher mental function including attention, memory, language. One of three in three-quarter sequence. (Same course as NSC 223.) Effective: 1997 Winter Quarter.

PSC 263—Topics in Cognitive Psychology (4)  
Seminar—4 hours. Prerequisite(s): Graduate standing in Psychology or consent of instructor. Selected topics in language processing, memory, perception, problem solving, and thinking, with an emphasis on the common underlying cognitive processes. May be repeated for credit when content differs. May be repeated for credit. Effective: 1997 Winter Quarter.

PSC 264—Topics in Psycholinguistics (4)  
Seminar—4 hours. Prerequisite(s): Graduate standing in Psychology or consent of instructor. Discussion of fundamental issues in the psychology of language. May be repeated for credit when content differs. May be repeated for credit. Effective: 1997 Winter Quarter.

PSC 270—Topics in Personality and Social Psychology (4)  
Seminar—4 hours. Prerequisite(s): Graduate student standing or consent of instructor. Critical study of a selected area of personality or social psychology. May be repeated for credit for credit when content differs. Effective: 2005 Fall Quarter.

PSC 271A—Core Concepts & Methods in Learning, Memory, and Plasticity (2)  
Lecture/Discussion—2 hours. Prerequisite(s): Graduate Standing or Consent of Instructor. Core concepts and methods used in studies of learning, memory and plasticity. Behavioral paradigms and measurement approaches in human and animal studies of learning and plasticity, as well as a consideration of the functional, anatomical and neuronal mechanisms underlying brain plasticity. (Same course as NSC 271A, NPB 271A.) (S/U grading only.) Effective: 2019 Fall Quarter.
PSC 271B—Core Concepts & Methods in Learning, Memory, & Plasticity (2)
Lecture/Discussion—2 hours. Prerequisite(s): PSC 271A or NPB 271A or NSC 271A Core concepts and detailed survey methods used in studies of learning, memory and plasticity, from the cellular and molecular level to the level of neural circuits. Areas of learning, memory, and plasticity research where recent progress has been made in linking across these levels of analysis. (Same course as NSC 271B, NPB 271B.) (S/U grading only.) Effective: 2020 Winter Quarter.

PSC 271C—Translational Approaches to Learning, Memory, & Plasticity Disorders (2)
Lecture/Discussion—2 hours. Prerequisite(s): PSC 271B or NPB 271B or NSC 271B Neurological disorders, the effect of these disorders on learning, memory and plasticity, approved therapeutic options and current research designed to improve understanding and treatment of these diseases: (i) the clinical presentation, diagnostic criteria, and existing therapies, (ii) mechanistic studies in humans and animal models, and (iii) molecular pathways involved in the disease and approaches for drug discovery. (Same course as NSC 271C, NPB 271C.) (S/U grading only.) Effective: 2020 Spring Quarter.

PSC 272—Topics in Developmental Psychology (4)
Seminar—4 hours. Prerequisite(s): Graduate standing in Psychology or consent of instructor. Selected topics in developmental psychology, including developmental neuroscience, memory development, infancy, cognitive development, social development, child maltreatment, children and law, perceptual development, emotional development, children at risk, and adolescence, with emphasis on developmental processes and developmental theory. May be repeated for credit. Effective: 2005 Fall Quarter.

PSC 289A—Current Research in Psychology (2)
Seminar—2 hours. Prerequisite(s): Graduate standing in Psychology or consent of instructor. Contemporary theory and empirical research in specialized topics in psychology. Topics include developmental attachment, social neuroscience, mental health, emotion, sexual orientation and identity. May be repeated for credit if topic differs. Effective: 2007 Winter Quarter.

PSC 289B—Current Research in Psychology (2)
Discussion—2 hours. Prerequisite(s): PSC 289A; Graduate standing in Psychology or consent of instructor. Intensive examination of contemporary theory and empirical research on a specialized topic in psychology. Sample topics include developmental attachment, social neuroscience, culture and mental health, electrophysiology and cognitive neuroscience, emotion, implicit cognitive processes, sexual orientation and identity, and attention. May be repeated for credit content differs. Effective: 2007 Winter Quarter.

PSC 290—Seminar (4)
Seminar—4 hours. Prerequisite(s): Graduate standing in Psychology or consent of instructor. Seminar devoted to a highly specific research topic in any area of basic psychology. Special topic selected for a quarter will vary depending on interests of instructor and students. Effective: 1997 Winter Quarter.

PSC 298—Group Study (1-5)
Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

PSC 299—Research (2-9)
Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

PSC 299D—Dissertation Research (1-12)
Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

PSC 390—The Teaching of Psychology (4)
Seminar—4 hours. Prerequisite(s): Consent of Instructor. Advanced graduate standing in Psychology or a closely related discipline. Methods and techniques of teaching undergraduate psychology. Integration of learning outcomes with effective evaluation. Practical experience in the application of pedagogical principles. (S/U grading only.) Effective: 2017 Winter Quarter.

PSC 390A—The Teaching of Psychology (6)
Discussion—6 hours; Lecture—6 hours; Practice—6 hours. Prerequisite(s): Consent of Instructor. Advanced graduate standing in Psychology or a closely related discipline. Methods and problems of teaching psychology at the undergraduate and graduate levels; curriculum design and evaluation. Practical experience in the preparation and presentation of material. (S/U grading only.) Effective: 1997 Winter Quarter.

PSC 390B—The Teaching of Psychology (4)
Discussion—6 hours; Lecture—4 hours; Practice—2 hours. Prerequisite(s): Consent of Instructor. Advanced graduate standing in Psychology or a closely related discipline. Methods and problems of teaching psychology at the
undergraduate and graduate levels; curriculum design and evaluation. Practical experience in the preparation and presentation of material. (S/U grading only.) Effective: 1997 Winter Quarter.

**PSC 391—Teaching of Psychology Practicum (4)**
Fieldwork; Seminar—1 hour. Prerequisite(s): PSC 390; or Consent of Instructor. Supervised teaching in undergraduate classrooms. Techniques for delivering content through lectures, discussions, or labs; course administration; communications; assessment of student learning; solving ethical problems; instructional technology. (S/U grading only.) Effective: 2017 Fall Quarter.

**PSC 396—Teaching Assistant Training Practicum (1-4)**
Variable. Prerequisite(s): Graduate standing. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

**Public Health**

(School of Medicine)

**Department.** Public Health Sciences; Med-Sci 1C; 530-754-9048; [http://www.ucdmc.ucdavis.edu/phs/](http://www.ucdmc.ucdavis.edu/phs/)

**Faculty.** [http://www.ucdmc.ucdavis.edu/phs/about/phs_faculty.html](http://www.ucdmc.ucdavis.edu/phs/about/phs_faculty.html)

The Department of Public Health Sciences offers the Master of Public Health (MPH) degree and a Ph.D. degree. The MPH degree is accredited by the Council on Education for Public Health. Students apply for admission through the Office of Graduate Studies. The following listing is all required core course work for the degree. Course descriptions are given under the individual course offerings. For course information, see [Master of Public Health (MPH)](http://www.ucdmc.ucdavis.edu/phs/about/phs_faculty.html).

**Public Health | SPH Courses**

**Courses in SPH:**

**SPH 092—Internship in Community Health (1-12)**
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Lower division standing. Students apply theory and
concepts learned in the classroom through field work in a community health agency. (P/NP grading only.) Effective: 2008 Summer Session 2.

**SPH 101—Introduction to Public Health (3)**
Lecture—3 hours. Prerequisite(s): Undergraduate standing. Provide basic concepts and controversies in public health, basic science of public health, social and behavioral factors in health and disease, environmental and occupational health issues, the relationship of public health to the medical care system and health care reform. GE credit: SE, SS. Effective: 2016 Winter Quarter.

**SPH 102—Introduction to Human Epidemiology (4)**
Discussion—2 hours; Lecture—2 hours. Practice of epidemiology as it relates to human populations. Content is fundamental to the Public Health minor and a required core course. GE credit: SE. Effective: 2017 Spring Quarter.

**SPH 104—Globalization and Health: Evidence and Policies (3)**
Lecture—3 hours. Provides an overview of the evidence on the multiple effects of globalization policies on health. GE credit: SS, WC. Effective: 2017 Winter Quarter.

**SPH 113—Health Disparities in the U.S. (3)**
Lecture—3 hours. Introduction to the principles and practice of health disparities research. GE credit: DD, SS. Effective: 2018 Spring Quarter.

**SPH 132—Health Issues Confronting Asian Americans and Pacific Islanders (4)**
Lecture/Discussion—4 hours. Health issues confronting Asian Americans and Pacific Islanders. (Same course as AAS 132.) GE credit: SS. Effective: 2009 Winter Quarter.

**SPH 160—General Health Education and Prevention (5)**
Discussion—1 hour; Lecture—4 hours. Open to students in the internship program for the Health Education Program only; class size limited to 50 students. Topics include addiction, substance abuse/prevention, nutrition, stress management, physical fitness, body image, reproductive anatomy & physiology, contraceptive options, safer sex, sexual health, healthy relationships, and other general wellness/health promotion topics. Practice in peer counseling and outreach presentations. (P/NP grading only.) Effective: 2008 Summer Session 2.

**SPH 161—Campus Alcohol/Other Drug Abuse Prevention Program Peer Educator Training (4)**
Lecture/Discussion—3 hours; Practice—1 hour. Prerequisite(s): SPH 160 (can be concurrent); and Consent of Instructor. Preparation for internship in campus and community substance abuse prevention and educational intervention. Addiction and other physiological responses to alcohol and other drugs. Harm-reduction strategies for individuals and target populations. Practice in peer counseling skills and outreach presentations to groups. (P/NP grading only.) Effective: 2008 Summer Session 2.

**SPH 162—Health Advocates Peer Educator Training (4)**
Lecture/Discussion—3 hours; Practice—1 hour. Prerequisite(s): SPH 160 (can be concurrent); and Consent of Instructor. Preparation for internship in campus and community health promotion and risk reduction. Nutrition, stress management, physical fitness, body image and disordered eating, skin cancer prevention, and other general wellness/health promotion topics. (P/NP grading only.) Effective: 2008 Summer Session 2.

**SPH 190—Topics in Public Health (1) Review all entries**
Seminar—1 hour. Prerequisite(s): Consent of Instructor. Seminar on key issues and current topics in public health. May be repeated for credit. (P/NP grading only.) Effective: 2008 Summer Session 2.

**SPH 190—Topics in Public Health (1) Review all entries**
Seminar—1 hour. Prerequisite(s): Consent of Instructor. Pass one restricted to undergraduate seniors. Seminar on key issues and current topics in public health. May be repeated for credit. (P/NP grading only.) Effective: 2019 Spring Quarter.

**SPH 190C—Research Conference in Community and International Health (1)**
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Weekly conference on research problems, progress, and techniques in Community and International Health. Critical discussion of recent journal articles. May be repeated for credit. (P/NP grading only.) Effective: 2008 Summer Session 2.

**SPH 192—Internship in Community Health Practice (1-12)**
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Upper division and graduate students. The student, through fieldwork in a community health agency, learns to apply theory and concepts learned in the classroom. (P/NP grading only.) Effective: 2008 Summer Session 2.
SPH 198—Study in Community and International Health (1-5)
Variable. Prerequisite(s): Consent of Instructor. Undergraduate standing. Study and experience for undergraduate students in any number of areas in community and international health. (P/NP grading only.) Effective: 2008 Summer Session 2.

SPH 199—Research in Community and International Health (1-5)
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. Undergraduate standing. Student will work with faculty member in areas of research interest, including but not limited to injury control, international health, health policy, occupational and environmental health, health promotion and wellness, women's health, and health demographics. (P/NP grading only.) Effective: 2008 Summer Session 2.

SPH 201—Introduction to Public Health (3)
Discussion/Laboratory—2 hours; Lecture—3 hours. Prerequisite(s): Graduate standing or consent of instructor. Provides an overview of public health. Covers the history of public health in the U.S.; defines its major functions and constituencies; and, introduces fundamental principles of epidemiology, biostatistics, behavioral sciences, environmental health, infectious diseases, and reducing health disparities. May be repeated up to 1 time(s). Effective: 2011 Summer Session 2.

SPH 202—Public Health Issues in California's Central Valley (3)
Lecture—3 hours. Prerequisite(s): Consent of Instructor. Public health issues in California's Central Valley, including the influences of migration, racial and ethnic diversity, the agricultural industry, environmental exposures, and rurality. Effective: 2018 Spring Quarter.

SPH 203—Learning and Teaching in Public Health Contexts (2)
Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Graduate standing. Aimed at current and future public health professionals interested in learning more about the educational potential for interactions with community members and other health professionals—all stakeholders in improving the health of communities. Effective: 2012 Spring Quarter.

SPH 204—Globalization and Health: Evidence and Policies (3)
Lecture—3 hours. Open to graduate student standing. Provides an overview of the evidence on the multiple effects of globalization policies on health. Effective: 2015 Fall Quarter.

SPH 205AY—Epidemiology for Health Professionals (4)
Lecture—2 hours; Web Virtual Lecture—2 hours. Prerequisite(s): Consent of Instructor. Basic epidemiologic concepts and approaches to epidemiologic research, with examples from human medicine, including outbreak investigation, infectious disease epidemiology, properties of tests. Effective: 2017 Fall Quarter.

SPH 207—Advanced Epidemiologic Methodology (4)
Lecture/Discussion—4 hours. Prerequisite(s): EPI 206 In-depth integration of advanced epidemiological concepts. Theory, methods, and applications for observational studies including random and systematic error, confounding, counterfactuals, causal inference, effect modification, internal and external validity, estimability, and interpretation of effect measures, and advanced study designs. (Same course as EPI 207.) Effective: 2016 Winter Quarter.

SPH 208—Principles & Applications of Cancer Prevention & Control (2)
Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Principles and applications of cancer prevention and control from a public health perspective. (S/U grading only.) Effective: 2018 Spring Quarter.

SPH 209—History of Epidemiology in Public Health (2)
Discussion—1.5 hours; Lecture—0.5 hours. Introduction to the history of epidemiology in solving major public health problems. Original historical articles will be read/discussed. Topics may include: infectious disease, accidents/adverse events, nutritional deficiencies, community vaccination trials, occupational exposures, cancer, birth defects, cardiovascular disease, and smoking. (Same course as EPI 209.) Effective: 2014 Fall Quarter.

SPH 210—Public Health Informatics (2)
Laboratory—2 hours; Lecture—2 hours. Prerequisite(s): Consent of Instructor. Graduate standing. Collection, verification, and utilization of data related to populations; infrastructure, functions, and tools used to generate public health knowledge supporting public health practices and policy development/dissemination. (S/U grading only.) Effective: 2008 Summer Session 2.

SPH 212—Migration and Health (3)
Lecture/Discussion—3 hours. Prerequisite(s): Graduate standing. Principles of migration and health. Topics will include demographics, public health invention programs, health care delivery, occupational health, and effects of
international migration on the health in communities of origin, transit and destination. Guest presentations by
outside experts. Effective: 2012 Spring Quarter.

SPH 213—Health Disparities in the U.S. (3) Review all entries
Lecture—3 hours. Prerequisite(s): Consent of Instructor. Introduction to the principles and practice of health
disparities research. Effective: 2018 Spring Quarter.

SPH 213—Health Disparities in the U.S. (3) Review all entries
Lecture—3 hours. Prerequisite(s): Consent of Instructor. Restricted to Graduate Students. Introduction to the

SPH 222—Social & Behavioral Aspects of Public Health (3)
Lecture/Discussion—3 hours. Prerequisite(s): STA 102; STA 106; and Consent of Instructor. Graduate standing.
Theories and strategies of health behavior change at the individual, group, community, and environmental levels.
Examples include: transtheoretical model, social networks, and social marketing. Theories are applied to solve

SPH 223—Obesity Prevention in Community Settings (3)
Lecture/Discussion—3 hours. Prerequisite(s): Consent of Instructor. Look at causes of the obesity epidemic in the
U.S.; identify and critically assess the research literature on various prevention strategies; understand, and apply
evidence-based public health strategies to combat obesity; and translate the science to a general audience.
Effective: 2014 Fall Quarter.

SPH 232—Health Communication (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Health communication
theories and research traditions. Topics include consumer health information seeking; physician-patient interaction;
information, social marketing, “edutainment,” and media advocacy campaigns; social networks and coping; media
influences on health; and new communication technologies in health promotion and healthcare delivery. (Same
course as CMN 232.) Effective: 2011 Fall Quarter.

SPH 233—Persuasive Technologies for Health (4)
Lecture/Discussion—3 hours; Term Paper. Theorizing, designing and evaluating ethical technology-based health
communication interventions. Uses of social media, mobile communication apps, wearable devices, computer-
generated tailored messages, educational games, and computational approaches in health promotion and
healthcare delivery. (Same course as CMN 233.) Effective: 2017 Fall Quarter.

SPH 235—Health Communication Campaigns (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. Restricted to graduate students.
Principles of health communication campaign planning, implementation and evaluation. Strategies for changing
health behaviors, shaping policy, and improving healthcare organizations’ relations with stakeholders. (Same
course as CMN 235.) Effective: 2017 Fall Quarter.

SPH 244—Introduction to Medical Statistics (4)
Lecture—4 hours. Introduction to statistical methods and software in clinical, laboratory and population medicine.
Graphical and tabular presentation of data, probability, binomial, Poisson, normal, t-, F-, and Chi-square
distributions, elementary nonparametric methods, simple linear regression and correlation, life tables. Only one unit
of credit for students who have completed STA 100 or MPM 402. (Same course as CLH 244.) Effective: 2017 Winter
Quarter.

SPH 245—Biostatistics for Biomedical Science (4)
Lecture—4 hours. Prerequisite(s): CLH 244 or SPH 244; and Consent of Instructor. Or an equivalent course. Analysis
of data and design of experiments for laboratory data. (Same course as CLH 245.) Effective: 2015 Spring Quarter.

SPH 246—Biostatistics for Clinical Research (4)
Lecture—4 hours. Prerequisite(s): SPH 245 or CLH 245 Emphasizes critical biostatistics for clinical research and
targets biomedical audience. Students will develop understanding for basic planning and analysis of clinical studies
and learn to develop collaborations with biostatisticians. May be repeated for credit. (Same course as CLH 246.)
Effective: 2015 Winter Quarter.

SPH 247—Statistical Analysis for Laboratory Data (4)
Lecture—4 hours. Prerequisite(s): CLH 245 or SPH 245 Statistical methods for experimental design and analysis of
laboratory data including gene expression arrays, RNA-Seq, and mass spec. (Same course as CLH 247.) Effective:
2015 Spring Quarter.
SPH 252—Social Epidemiology (2)
Lecture/Discussion—2 hours. Prerequisite(s): EPI 205A; and Consent of Instructor. Social determinants of health; psychosocial and physiological pathways; health and social inequality; gender and racial/ethnic disparities in health; social support, social cohesion and health; social gradient in behavioral risk factors; social ecological approaches to health intervention; interventions addressing social determinants. (Same course as EPI 252.) Effective: 2009 Spring Quarter.

SPH 255—Human Reproductive Epidemiology (3)
Lecture—3 hours. Prerequisite(s): MPM 405; MPM 406; PHY 220; PGG 222; or equivalents or Consent of Instructor. Human reproductive effects and risk of reproductive disorders, examined from macro- and micro-environmental exposures in community and occupational settings, epidemiologic study designs and analyses. Effective: 2009 Spring Quarter.

SPH 262—Principles of Environmental Health Science (3)
Lecture—3 hours. Prerequisite(s): Consent of Instructor. Principles, approaches and issues related to environmental health. Recognizing, assessing, understanding and controlling the impact of people on their environment and the impact of the environment on the public. Effective: 2008 Summer Session 2.

SPH 264—Public Health Econometrics (2)
Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Principles of demand and supply; elasticity; benefits and costs; least squares regression; stepwise regression; economic and statistical significance; fixed and random effects; longitudinal data; non-linear relations; continuous and binary variables; instrumental variables; attrition bias; tobit regression; Two-part cost model. (S/U grading only.) Effective: 2008 Spring Quarter.

SPH 266—Applied Analytic Epidemiology (3)
Laboratory—2 hours; Lecture—2 hours. Prerequisite(s): MPM 404; or Consent of Instructor. Principles and applications in analysis of epidemiologic data. Methods of analyzing stratified and matched data, logistic regression for cohort and case-control studies, Poisson regression, survival-time methods. (Same course as PHR 266.) Effective: 2009 Spring Quarter.

SPH 273—Health Services Administration (3)
Lecture—3 hours. Prerequisite(s): Consent of Instructor. Limited enrollment. Structure and function of public and private medical care. Topics include categories and trends in national medical spending, predictors of patient use, causes of death, managed care, HMOs, Medicare, Medicaid, costs of technology, and medical care in other countries. Effective: 2008 Summer Session 2.

SPH 274—Economic Evaluation in Health Care (3)
Lecture/Lab—3 hours. Prerequisite(s): At least one semester of graduate level Statistics or consent of instructor. Cost-effectiveness/cost-benefit analysis (CE/CBA) methods among various economic evaluation methods. CE/CBA is increasingly used to evaluate alternative choices in public health and clinical practice and to enlighten and inform health policy determinations. Effective: 2012 Fall Quarter.

SPH 276—Critical Assessment in Health Policy and Economics (2)
Lecture/Discussion—2 hours. Course aims to develop critical reading skills of the health policy and health economics literature, mainly following the microeconomic paradigm and analytical techniques. Some basic concepts of micro economic theory will be explained in the class. Effective: 2014 Fall Quarter.

SPH 277—Net Benefit Regression (3)
Lecture/Discussion—3 hours. Prerequisite(s): STA 100 or SPH 244 or MPM 202; or Consent of Instructor. Graduate student standing. Open to graduate students only. Uses regression methods for cost-effectiveness analysis. Focus on methods that create and explain economic information in person-level data. Effective: 2017 Fall Quarter.

SPH 280—Introduction to SAS Programming (3)
Discussion/Laboratory—1 hour; Lecture—2 hours. Prerequisite(s): Introductory statistics course (e.g., MPM 402, STA 102). Introduction to SAS, an integrated software system for data retrieval and management, data manipulation and programming. (Same course as EPI 280.) Effective: 2016 Fall Quarter.

SPH 290—Topics in Public Health (1)
Seminar—1 hour. Prerequisite(s): Consent of Instructor. Open to students in Master of Public Health program. Key issues and current topics in public health. Course begins in August SSII. Students must enroll in August, then Fall and Winter. The course is a series but grades and units are given at end of each quarter. May be repeated up to 10 times. (S/U grading only.) Effective: 2017 Winter Quarter.
SPH 290—Topics in Public Health (1) Review all entries
Seminar—1 hour. Prerequisite(s): Consent of Instructor. Restricted to Graduate Students. Key issues and current topics in public health. Course begins in August SSII. Students must enroll in August, then Fall and Winter. The course is a series but grades and units are given at end of each quarter. May be repeated up to 10 time(s). (S/U grading only.) Effective: 2019 Spring Quarter.

SPH 291—Public Health Sciences Doctoral Seminar (1-7)
Seminar—1 hour. Prerequisite(s): Consent of Instructor. Seminar to explore research on translational science and rural health; includes presentations of student research in progress. May be repeated up to 6 time(s) when topic differs; with consent of instructor, etc. (S/U grading only.) Effective: 2017 Fall Quarter.

SPH 292A—Public Health Translational Science Rotation (1-7)
Variable—1-7 hours. Prerequisite(s): Ph.D. student in Public Health Sciences or consent of instructor. Public Health Translational Science Rotation for Ph.D. students in Public Health Sciences. May be repeated up to 8 unit(s) with consent of instructor. (S/U grading only.) Effective: 2017 Fall Quarter.

SPH 292B—Public Health Translational Science Rotation (1-7)
Variable—1-3 hours. Prerequisite(s): Consent of Instructor. Open to Ph.D. students in Public Health Sciences. Public Health Translational Science Rotation for Ph.D. students in Public Health Sciences. May be repeated up to 8 unit(s) with consent of instructor. (S/U grading only.) Effective: 2018 Winter Quarter.

SPH 295—International Health (2)
Lecture/Discussion—2 hours. Prerequisite(s): Graduate standing or consent of instructor. Forum for learning health issues and health care systems in other countries. Topics include health care for refugees, the impact of political strife on health, the health care professional in international settings. (S/U grading only.) Effective: 2010 Winter Quarter.

SPH 297—Public Health Practicum (1-16)
Variable—3-32 hours. Prerequisite(s): Consent of Instructor. Open to Master of Public Health students. Practical fieldwork experience in public health. Placement site will vary based on the interest and experience of each student. May be repeated up to 4 time(s). (S/U grading only.) Effective: 2008 Summer Session 2.

SPH 298—Study in Community and International Health (1-5)
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. Graduate student in good academic standing. Study and experience for graduate students in any number of areas in community and international health. (S/U grading only.) Effective: 2008 Summer Session 2.

SPH 299—Research in Community and International Health (1-12)
Variable—3-36 hours. Prerequisite(s): Consent of Instructor. Graduate standing. Student will work with faculty member in areas of research interest, including but not limited to injury control, international health, health policy, occupational and environmental health, health promotion and wellness, women’s health, and health demographics. (S/U grading only.) Effective: 2008 Summer Session 2.

SPH 402—Introductory Medical Spanish (2)
Lecture—2 hours. Prerequisite(s): Medical student or consent of instructor. The vocabulary needed to conduct a basic history and physical examination in Spanish. (H/P/F grading only.) Effective: 2008 Summer Session 2.

SPH 461—Clerkship in Community Health Group Practice (3-9)
Clinical Activity. Prerequisite(s): Third-or fourth-year medical student. Overview of local community health in group practice situations. Students participate in treatment at several clinic sites in Yolo County. Topics include primary care, environmental health, maternal and child health, jail health, and preventive health care for the aged. (S/U grading only.) Effective: 2008 Summer Session 2.

SPH 465—Community Health Preceptorship (3-18)
Clinical Activity—5-40 hours. Prerequisite(s): Consent of Instructor. Fourth-year medical student in good academic standing. Participate at state or county health department or other public health organization in on-going investigations into current public health problems, e.g., birth defects, cancer control, diabetes, hypertension, injury control, infectious diseases, aging, Alzheimer’s disease, and smoking and tobacco use control. (H/P/F grading only.) Effective: 2010 Spring Quarter.

SPH 466—Occupational and Environmental Medicine Elective (6-12)
Clinical Activity; Laboratory; Variable—6-12 hours. Prerequisite(s): Consent of Instructor. Fourth-year medical student in good academic standing. Participate in activities of Occupational and Environmental Health Unit. Major activity is involvement in an epidemiologic research project of the University. Participate in Occupational and Environmental
Medicine Clinic at UC Davis Medical Center and other sites, as arranged. (H/P/F grading only.) Effective: 2010 Summer Quarter.

**SPH 470—Clinical Selective in Occupational and Environmental Medicine (3-6)**
Clinical Activity—9-18 hours. Prerequisite(s): Consent of Instructor. Fourth-year medical student in good academic standing. Outpatient clinical experience in Occupational and Environmental Medicine at UCDMC and other sites, as arranged. Gain experience in evaluating occ/env medical conditions, use of medical literature resources, the worker's compensation system, and toxicological principles. Students may take up to four weeks for six units. (H/P/F grading only.) Effective: 2010 Spring Quarter.

**SPH 480—Insights in Occupational and Environmental Medicine (1-3)**
Clinical Activity—3-9 hours. Prerequisite(s): Consent of Instructor. First- or second-year medical student in good academic standing. Observe and participate in research and clinical activities in occupational and environmental medicine which include conferences, occupational and environmental medicine clinical activities and field visits. Develop and present small individual research projects. (P/F grading only.) Effective: 2010 Summer Quarter.

**SPH 495—International Health (2)**
Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Medical student in good academic standing. Forum for learning health issues and health care systems in other countries. Topics include health care for refugees, the impact of political strife on health, the health care professional in international settings. (H/P/F grading only.) Effective: 2009 Spring Quarter.

**SPH 496—Current Issues in Public Health (1)**
Lecture/Discussion—1 hour. Topical issues in public health. Speakers from the local public health community address issues such as disease control programs, access to care. May be repeated up to 3 time(s). (P/F grading only.) Effective: 2008 Summer Session 2.

**SPH 498—Study in Public Health Sciences (1-6)**
Variable—3-18 hours. Prerequisite(s): Consent of Instructor. Medical student in good academic standing. Study and experience for medical students in areas in community and international health. May be repeated for credit. (H/P/F grading only.) Effective: 2009 Spring Quarter.

**SPH 499—Research in Public Health Sciences (1-9)**
Variable. Prerequisite(s): Medical students with consent of instructor. Work with faculty member in areas of research interest, including but not limited to public health, injury control, international health, health policy, occupational and environmental health, health promotion and wellness, women's health, and health demographics. May be repeated for credit. (H/P/F grading only.) Effective: 2017 Fall Quarter.

Public Health Sciences | Public Health Sciences Minor
(School of Medicine)

Department. Public Health Sciences; Med-Sci 1C; 530-754-4992; http://www.ucdmc.ucdavis.edu/phs/

Faculty. http://www.ucdmc.ucdavis.edu/phs/about/phs_faculty.html

The Public Health Sciences minor offers undergraduate students a foundation of knowledge for those who plan to enter the field of public health immediately following graduation and for those planning to earn an advanced degree in Public Health or a related field including medicine, nursing, and dentistry.

For a full list of electives, see Elective Courses at http://www.ucdmc.ucdavis.edu/phs/education/undergraduate.html.

Public Health Sciences Units: 20

SPH 101 Introduction to Public Health 3
SPH 102 Introduction to Human Epidemiology 4
SPH 190 Topics in Public Health 1

Choose one: 3
SPH 104 Globalization and Health: Evidence and Policies 3
SPH 113 Health Disparities in the U.S. 3

Prior to Winter 2018 Public Health Sciences 113 was Public Health Sciences 105 (2 units); prior to Fall 2018 Public Health Sciences 113 was 2 units.

Electives 9

Total: 20

Public Health Sciences | SPH Courses

Courses in SPH:

**SPH 092—Internship in Community Health (1-12)**
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Lower division standing. Students apply theory and concepts learned in the classroom through field work in a community health agency. (P/NP grading only.) Effective: 2008 Summer Session 2.

**SPH 101—Introduction to Public Health (3)**
Lecture—3 hours. Prerequisite(s): Undergraduate standing. Provide basic concepts and controversies in public health, basic science of public health, social and behavioral factors in health and disease, environmental and occupational health issues, the relationship of public health to the medical care system and health care reform. GE credit: SE, SS. Effective: 2016 Winter Quarter.

**SPH 102—Introduction to Human Epidemiology (4)**
Discussion—2 hours; Lecture—2 hours. Practice of epidemiology as it relates to human populations. Content is fundamental to the Public Health minor and a required core course. GE credit: SE. Effective: 2017 Spring Quarter.

1861
SPH 104—Globalization and Health: Evidence and Policies (3)
Lecture—3 hours. Provides an overview of the evidence on the multiple effects of globalization policies on health. GE credit: SS, WC. Effective: 2017 Winter Quarter.

SPH 113—Health Disparities in the U.S. (3)
Lecture—3 hours. Introduction to the principles and practice of health disparities research. GE credit: DD, SS. Effective: 2018 Spring Quarter.

SPH 132—Health Issues Confronting Asian Americans and Pacific Islanders (4)
Lecture/Discussion—4 hours. Health issues confronting Asian Americans and Pacific Islanders. (Same course as AAS 132.) GE credit: SS. Effective: 2009 Winter Quarter.

SPH 160—General Health Education and Prevention (5)
Discussion—1 hour; Lecture—4 hours. Open to students in the internship program for the Health Education Program only; class size limited to 50 students. Topics include addiction, substance abuse/prevention, nutrition, stress management, physical fitness, body image, reproductive anatomy & physiology, contraceptive options, safer sex, sexual health, healthy relationships, and other general wellness/health promotion topics. Practice in peer counseling and outreach presentations. (P/NP grading only.) Effective: 2008 Summer Session 2.

SPH 161—Campus Alcohol/Other Drug Abuse Prevention Program Peer Educator Training (4)
Lecture/Discussion—3 hours; Practice—1 hour. Prerequisite(s): SPH 160 (can be concurrent); and Consent of Instructor. Preparation for internship in campus and community substance abuse prevention and educational intervention. Addiction and other physiological responses to alcohol and other drugs. Harm-reduction strategies for individuals and target populations. Practice in peer counseling skills and outreach presentations to groups. (P/NP grading only.) Effective: 2008 Summer Session 2.

SPH 162—Health Advocates Peer Educator Training (4)
Lecture/Discussion—3 hours; Practice—1 hour. Prerequisite(s): SPH 160 (can be concurrent); and Consent of Instructor. Preparation for internship in campus and community health promotion and risk reduction. Nutrition, stress management, physical fitness, body image and disordered eating, skin cancer prevention, and other general wellness/health promotion topics. (P/NP grading only.) Effective: 2008 Summer Session 2.

SPH 190—Topics in Public Health (1) Review all entries
Seminar—1 hour. Prerequisite(s): Consent of Instructor. Seminar on key issues and current topics in public health. May be repeated for credit. (P/NP grading only.) Effective: 2016 Fall Quarter.

SPH 190—Topics in Public Health (1) Review all entries
Seminar—1 hour. Prerequisite(s): Consent of Instructor. Pass one restricted to undergraduate seniors. Seminar on key issues and current topics in public health. May be repeated for credit. (P/NP grading only.) Effective: 2019 Spring Quarter.

SPH 190C—Research Conference in Community and International Health (1)
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Weekly conference on research problems, progress, and techniques in Community and International Health. Critical discussion of recent journal articles. May be repeated for credit. (P/NP grading only.) Effective: 2008 Summer Session 2.

SPH 192—Internship in Community Health Practice (1-12)
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Upper division and graduate students. The student, through fieldwork in a community health agency, learns to apply theory and concepts learned in the classroom. (P/NP grading only.) Effective: 2008 Summer Session 2.

SPH 198—Study in Community and International Health (1-5)
Variable. Prerequisite(s): Consent of Instructor. Undergraduate standing. Study and experience for undergraduate students in any number of areas in community and international health. (P/NP grading only.) Effective: 2008 Summer Session 2.

SPH 199—Research in Community and International Health (1-5)
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. Undergraduate standing. Student will work with faculty member in areas of research interest, including but not limited to injury control, international health, health policy, occupational and environmental health, health promotion and wellness, women's health, and health demographics. (P/NP grading only.) Effective: 2008 Summer Session 2.

SPH 201—Introduction to Public Health (3)
Discussion/Laboratory—2 hours; Lecture—3 hours. Prerequisite(s): Graduate standing or consent of instructor.
Provides an overview of public health. Covers the history of public health in the U.S.; defines its major functions and constituencies; and, introduces fundamental principles of epidemiology, biostatistics, behavioral sciences, environmental health, infectious diseases, and reducing health disparities. May be repeated up to 1 time(s). Effective: 2011 Summer Session 2.

**SPH 202—Public Health Issues in California’s Central Valley (3)**
Lecture—3 hours. Prerequisite(s): Consent of Instructor. Public health issues in California’s Central Valley, including the influences of migration, racial and ethnic diversity, the agricultural industry, environmental exposures, and rurality. Effective: 2018 Spring Quarter.

**SPH 203—Learning and Teaching in Public Health Contexts (2)**
Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Graduate standing. Aimed at current and future public health professionals interested in learning more about the educational potential for interactions with community members and other health professionals—all stakeholders in improving the health of communities. Effective: 2012 Spring Quarter.

**SPH 204—Globalization and Health: Evidence and Policies (3)**
Lecture—3 hours. Open to graduate student standing. Provides an overview of the evidence on the multiple effects of globalization policies on health. Effective: 2015 Fall Quarter.

**SPH 205AY—Epidemiology for Health Professionals (4)**
Lecture—2 hours; Web Virtual Lecture—2 hours. Prerequisite(s): Consent of Instructor. Basic epidemiologic concepts and approaches to epidemiologic research, with examples from human medicine, including outbreak investigation, infectious disease epidemiology, properties of tests. Effective: 2017 Fall Quarter.

**SPH 207—Advanced Epidemiologic Methodology (4)**
Lecture/Discussion—4 hours. Prerequisite(s): EPI 206 In-depth integration of advanced epidemiological concepts. Theory, methods, and applications for observational studies including random and systematic error, confounding, counterfactuals, causal inference, effect modification, internal and external validity, estimability, and interpretation of effect measures, and advanced study designs. (Same course as EPI 207) Effective: 2016 Winter Quarter.

**SPH 208—Principles & Applications of Cancer Prevention & Control (2)**
Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Principles and applications of cancer prevention and control from a public health perspective. (S/U grading only.) Effective: 2018 Spring Quarter.

**SPH 209—History of Epidemiology in Public Health (2)**
Discussion—1.5 hours; Lecture—0.5 hours. Introduction to the history of epidemiology in solving major public health problems. Original historical articles will be read/discussed. Topics may include: infectious disease, accidents/adverse events, nutritional deficiencies, community vaccination trials, occupational exposures, cancer, birth defects, cardiovascular disease, and smoking. (Same course as EPI 209.) Effective: 2014 Fall Quarter.

**SPH 210—Public Health Informatics (2)**
Laboratory—2 hours; Lecture—2 hours. Prerequisite(s): Consent of Instructor. Graduate standing. Collection, verification, and utilization of data related to populations; infrastructure, functions, and tools used to generate public health knowledge supporting public health practices and policy development/dissemination. (S/U grading only.) Effective: 2008 Summer Session 2.

**SPH 212—Migration and Health (3)**
Lecture/Discussion—3 hours. Prerequisite(s): Graduate standing. Principles of migration and health. Topics will include demographics, public health invention programs, health care delivery, occupational health, and effects of international migration on the health in communities of origin, transit and destination. Guest presentations by outside experts. Effective: 2012 Spring Quarter.

**SPH 213—Health Disparities in the U.S. (3)**
Lecture—3 hours. Prerequisite(s): Consent of Instructor. Introduction to the principles and practice of health disparities research. Effective: 2018 Spring Quarter.

**SPH 222—Social & Behavioral Aspects of Public Health (3)**
Lecture/Discussion—3 hours. Prerequisite(s): STA 102; STA 106; and Consent of Instructor. Graduate standing. Theories and strategies of health behavior change at the individual, group, community, and environmental levels.
Examples include: transtheoretical model, social networks, and social marketing. Theories are applied to solve common public health problems (cancer, obesity, smoking, and HIV/AIDS). Effective: 2009 Winter Quarter.

**SPH 223—Obesity Prevention in Community Settings (3)**
Lecture/Discussion—3 hours. Prerequisite(s): Consent of Instructor. Look at causes of the obesity epidemic in the U.S.; identify and critically assess the research literature on various prevention strategies; understand, and apply evidence-based public health strategies to combat obesity; and translate the science to a general audience. Effective: 2009 Winter Quarter.

**SPH 232—Health Communication (4)**
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Health communication theories and research traditions. Topics include consumer health information seeking; physician-patient interaction; information, social marketing, “edutainment,” and media advocacy campaigns; social networks and coping; media influences on health; and new communication technologies in health promotion and healthcare delivery. (Same course as CMN 232.) Effective: 2011 Fall Quarter.

**SPH 233—Persuasive Technologies for Health (4)**
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. Restricted to graduate students. Theorizing, designing and evaluating ethical technology-based health communication interventions. Uses of social media, mobile communication apps, wearable devices, computer-generated tailored messages, educational games, and computational approaches in health promotion and healthcare delivery. (Same course as CMN 233.) Effective: 2017 Fall Quarter.

**SPH 235—Health Communication Campaigns (4)**
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. Principles of health communication campaign planning, implementation and evaluation. Strategies for changing health behaviors, shaping policy, and improving healthcare organizations’ relations with stakeholders. (Same course as CMN 235.) Effective: 2017 Fall Quarter.

**SPH 244—Introduction to Medical Statistics (4)**
Lecture—4 hours. Introduction to statistical methods and software in clinical, laboratory and population medicine. Graphical and tabular presentation of data, probability, binomial, Poisson, normal, t-, F-, and Chi-square distributions, elementary nonparametric methods, simple linear regression and correlation, life tables. Only one unit of credit for students who have completed STA 100 or MPM 402. (Same course as CLH 244.) Effective: 2017 Winter Quarter.

**SPH 245—Biostatistics for Biomedical Science (4)**
Lecture—4 hours. Prerequisite(s): CLH 244 or SPH 244; and Consent of Instructor. Or an equivalent course. Analysis of data and design of experiments for laboratory data. (Same course as CLH 245.) Effective: 2015 Spring Quarter.

**SPH 246—Biostatistics for Clinical Research (4)**
Lecture—4 hours. Prerequisite(s): SPH 245 or CLH 245 Emphasizes critical biostatistics for clinical research and targets biomedical audience. Students will develop understanding for basic planning and analysis of clinical studies and learn to develop collaborations with biostatisticians. May be repeated for credit. (Same course as CLH 246.) Effective: 2015 Winter Quarter.

**SPH 247—Statistical Analysis for Laboratory Data (4)**
Lecture—4 hours. Prerequisite(s): CLH 245 or SPH 245 Statistical methods for experimental design and analysis of laboratory data including gene expression arrays, RNA-Seq, and mass spec. (Same course as CLH 247.) Effective: 2015 Spring Quarter.

**SPH 252—Social Epidemiology (2)**
Lecture/Discussion—2 hours. Prerequisite(s): EPI 205A; and Consent of Instructor. Social determinants of health; psychosocial and physiological pathways; health and social inequality; gender and racial/ethnic disparities in health; social support, social cohesion and health; social gradient in behavioral risk factors; social ecological approaches to health intervention; interventions addressing social determinants. (Same course as EPI 252.) Effective: 2009 Spring Quarter.

**SPH 255—Human Reproductive Epidemiology (3)**
Lecture—3 hours. Prerequisite(s): MPM 405; MPM 406; PHY 220; PGG 222; or equivalents or Consent of Instructor. Human reproductive effects and risk of reproductive disorders, examined from macro- and micro-environmental exposures in community and occupational settings, epidemiologic study designs and analyses. Effective: 2009 Spring Quarter.
SPH 262—Principles of Environmental Health Science (3)
Lecture—3 hours. Prerequisite(s): Consent of Instructor. Principles, approaches and issues related to environmental health. Recognizing, assessing, understanding and controlling the impact of people on their environment and the impact of the environment on the public. Effective: 2008 Summer Session 2.

SPH 264—Public Health Econometrics (2)
Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Principles of demand and supply; elasticity; benefits and costs; least squares regression; stepwise regression; economic and statistical significance; fixed and random effects; longitudinal data; non-linear relations; continuous and binary variables; instrumental variables; attrition bias; tobit regression; Two-part cost model. (S/U grading only.) Effective: 2008 Spring Quarter.

SPH 266—Applied Analytic Epidemiology (3)
Laboratory—2 hours; Lecture—2 hours. Prerequisite(s): MPM 404; or Consent of Instructor. Principles and applications in analysis of epidemiologic data. Methods of analyzing stratified and matched data, logistic regression for cohort and case-control studies, Poisson regression, survival-time methods. (Same course as PHR 266.) Effective: 2009 Spring Quarter.

SPH 273—Health Services Administration (3)
Lecture—3 hours. Prerequisite(s): Consent of Instructor. Limited enrollment. Structure and function of public and private medical care. Topics include categories and trends in national medical spending, predictors of patient use, causes of death, managed care, HMOs, Medicare, Medicaid, costs of technology, and medical care in other countries. Effective: 2008 Summer Session 2.

SPH 274—Economic Evaluation in Health Care (3)
Lecture/Lab—3 hours. Prerequisite(s): At least one semester of graduate level Statistics or consent of instructor. Cost-effectiveness/cost-benefit analysis (CE/CBA) methods among various economic evaluation methods. CE/CBA is increasingly used to evaluate alternative choices in public health and clinical practice and to enlighten and inform health policy determinations. Effective: 2012 Fall Quarter.

SPH 276—Critical Assessment in Health Policy and Economics (2)
Lecture/Discussion—2 hours. Course aims to develop critical reading skills of the health policy and health economics literature, mainly following the microeconomic paradigm and analytical techniques. Some basic concepts of micro economic theory will be explained in the class. Effective: 2014 Fall Quarter.

SPH 277—Net Benefit Regression (3)
Lecture/Discussion—3 hours. Prerequisite(s): STA 100 or SPH 244 or MPM 202; or Consent of Instructor. Graduate student standing. Open to graduate students only. Uses regression methods for cost-effectiveness analysis. Focus on methods that create and explain economic information in person-level data. Effective: 2017 Fall Quarter.

SPH 280—Introduction to SAS Programming (3)
Discussion/Laboratory—1 hour; Lecture—2 hours. Prerequisite(s): Introductory statistics course (e.g., MPM 402, STA 102). Introduction to SAS, an integrated software system for data retrieval and management, data manipulation and programming. (Same course as EPI 280.) Effective: 2016 Fall Quarter.

SPH 290—Topics in Public Health (1) Review all entries
Seminar—1 hour. Prerequisite(s): Consent of Instructor. Open to students in Master of Public Health program. Key issues and current topics in public health. Course begins in August SSII. Students must enroll in August, then Fall and Winter. The course is a series but grades and units are given at end of each quarter. May be repeated up to 10 time(s). (S/U grading only.) Effective: 2016 Fall Quarter.

SPH 290—Topics in Public Health (1) Review all entries
Seminar—1 hour. Prerequisite(s): Consent of Instructor. Restricted to Graduate Students. Key issues and current topics in public health. Course begins in August SSII. Students must enroll in August, then Fall and Winter. The course is a series but grades and units are given at end of each quarter. May be repeated up to 10 time(s). (S/U grading only.) Effective: 2017 Winter Quarter.

SPH 291—Public Health Sciences Doctoral Seminar (1-7)
Seminar—1 hour. Prerequisite(s): Consent of Instructor. Seminar to explore research on translational science and rural health; includes presentations of student research in progress. May be repeated up to 6 time(s) when topic differs; with consent of instructor, etc. (S/U grading only.) Effective: 2019 Spring Quarter.

SPH 292A—Public Health Translational Science Rotation (1-7)
Variable—1-7 hours. Prerequisite(s): Ph.D. student in Public Health Sciences or consent of instructor. Public Health
Translational Science Rotation for Ph.D. students in Public Health Sciences. May be repeated up to 8 unit(s) with consent of instructor. (S/U grading only.) Effective: 2017 Fall Quarter.

**SPH 292B—Public Health Translational Science Rotation (1-7)**
Variable—1-3 hours. Prerequisite(s): Consent of Instructor. Open to Ph.D. students in Public Health Sciences. Public Health Translational Science Rotation for Ph.D. students in Public Health Sciences. May be repeated up to 8 unit(s) with consent of instructor. (S/U grading only.) Effective: 2018 Winter Quarter.

**SPH 295—International Health (2)**
Lecture/Discussion—2 hours. Prerequisite(s): Graduate standing or consent of instructor. Forum for learning health issues and health care systems in other countries. Topics include health care for refugees, the impact of political strife on health, the health care professional in international settings. (S/U grading only.) Effective: 2010 Winter Quarter.

**SPH 297—Public Health Practicum (1-16)**
Variable—3-32 hours. Prerequisite(s): Consent of Instructor. Open to Master of Public Health students. Practical fieldwork experience in public health. Placement site will vary based on the interest and experience of each student. May be repeated up to 4 time(s). (S/U grading only.) Effective: 2008 Summer Session 2.

**SPH 298—Study in Community and International Health (1-5)**
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. Graduate student in good academic standing. Study and experience for graduate students in any number of areas in community and international health. (S/U grading only.) Effective: 2008 Summer Session 2.

**SPH 299—Research in Community and International Health (1-12)**
Variable—3-36 hours. Prerequisite(s): Consent of Instructor. Graduate standing. Student will work with faculty member in areas of research interest, including but not limited to injury control, international health, health policy, occupational and environmental health, health promotion and wellness, women's health, and health demographics. (S/U grading only.) Effective: 2008 Summer Session 2.

**SPH 402—Introductory Medical Spanish (2)**
Lecture—2 hours. Prerequisite(s): Medical student or consent of instructor. The vocabulary needed to conduct a basic history and physical examination in Spanish. (H/P/F grading only.) Effective: 2008 Summer Session 2.

**SPH 461—Clerkship in Community Health Group Practice (3-9)**
Clinical Activity. Prerequisite(s): Third-or fourth-year medical student. Overview of local community health in group practice situations. Students participate in treatment at several clinic sites in Yolo County. Topics include primary care, environmental health, maternal and child health, jail health, and preventive health care for the aged. (S/U grading only.) Effective: 2008 Summer Session 2.

**SPH 465—Community Health Preceptorship (3-18)**
Clinical Activity; Laboratory; Variable—6-12 hours. Prerequisite(s): Consent of Instructor. Fourth-year medical student in good academic standing. Participate at state or county health department or other public health organization in on-going investigations into current public health problems, e.g., birth defects, cancer control, diabetes, hypertension, injury control, infectious diseases, aging, Alzheimer's disease, and smoking and tobacco use control. (H/P/F grading only.) Effective: 2010 Spring Quarter.

**SPH 466—Occupational and Environmental Medicine Elective (6-12)**
Clinical Activity; Laboratory; Variable—6-12 hours. Prerequisite(s): Consent of Instructor. Fourth-year medical student in good academic standing. Participate in activities of Occupational and Environmental Health Unit. Major activity is involvement in an epidemiologic research project of the University. Participate in Occupational and Environmental Medicine Clinic at UC Davis Medical Center and other sites, as arranged. (H/P/F grading only.) Effective: 2010 Summer Quarter.

**SPH 470—Clinical Selective in Occupational and Environmental Medicine (3-6)**
Clinical Activity—9-18 hours. Prerequisite(s): Consent of Instructor. Fourth-year medical student in good academic standing. Outpatient clinical experience in Occupational and Environmental Medicine at UCDMC and other sites, as arranged. Gain experience in evaluating occ/env medical conditions, use of medical literature resources, the worker's compensation system, and toxicological principles. Students may take up to four weeks for six units. (H/P/F grading only.) Effective: 2010 Spring Quarter.

**SPH 480—Insights in Occupational and Environmental Medicine (1-3)**
Clinical Activity—3-9 hours. Prerequisite(s): Consent of Instructor. First- or second-year medical student in good academic standing. Observe and participate in research and clinical activities in occupational and environmental
Quantitative Biology and Bioinformatics Units:

**Core Courses**  
8-12

**Programming:**

- ECS 032A Introduction to Programming 4
- ECS 036A Programming & Problem Solving 4

*The equivalent.* The programming requirement may be satisfied by previous experience and therefore may not entail college course credit. Please

SPH 495—International Health (2)
Lecture/Discussion—2 hours. Prerequisite(s): Consent of Instructor. Medical student in good academic standing. Forum for learning health issues and health care systems in other countries. Topics include health care for refugees, the impact of political strife on health, the health care professional in international settings. (H/P/F grading only.) Effective: 2009 Spring Quarter.

SPH 496—Current Issues in Public Health (1)
Lecture/Discussion—1 hour. Topical issues in public health. Speakers from the local public health community address issues such as disease control programs, access to care. May be repeated up to 3 time(s). (P/F grading only.) Effective: 2008 Summer Session 2.

SPH 498—Study in Public Health Sciences (1-6)
Variable—3-18 hours. Prerequisite(s): Consent of Instructor. Medical student in good academic standing. Study and experience for medical students in areas in community and international health. May be repeated for credit. (H/P/F grading only.) Effective: 2009 Spring Quarter.

SPH 499—Research in Public Health Sciences (1-9)
Variable. Prerequisite(s): Medical students with consent of instructor. Work with faculty member in areas of research interest, including but not limited to public health, injury control, international health, health policy, occupational and environmental health, health promotion and wellness, women's health, and health demographics. May be repeated for credit. (H/P/F grading only.) Effective: 2017 Fall Quarter.

Quantitative Biology & Bioinformatics Minor; Biological Sciences

**Quantitative Biology & Bioinformatics Minor; Biological Sciences | Quantitative Biology & Bioinformatics Minor**

(College of Biological Sciences)

530-752-0410; clhom@ucdavis.edu; http://quantbio.ucdavis.edu/

The interdisciplinary minor in Quantitative Biology and Bioinformatics is an integrative program that introduces students to the quantitative and computational approaches that are redefining all disciplines in the biological sciences, from molecular and cell biology, through genetics and physiology, to ecology and evolutionary biology. Students in this minor will learn research tools that apply mathematical and computational methods, increase their insight into the strengths and limitations of quantitative approaches, and develop the interdisciplinary perspective that is now the foundation of modern biological research and training.

The minor in Quantitative Biology and Bioinformatics is open to all undergraduates regardless of major and is sponsored by the College of Biological Sciences.

**Restrictions.** No more than two upper division courses from a single department may be offered in satisfaction of the minor requirements. Only one course used to satisfy a requirement for the minor may be applied toward a student’s major.

**Minor Advisor.** Consult the Biology Academic Success Center (BASC). 1023 Sciences Laboratory Building; 530-752-0410; http://basc.ucdavis.edu/

**Religious Studies**

**Religious Studies | RST Information**

(College of Letters and Science)

Archana Venkatesan, Ph.D., Chair

1868
Religious Studies | RST A.B.
(College of Letters and Science)
Archana Venkatesan, Ph.D., Chair

Program Office. 213 Sproul Hall; 530-752-1219; http://religions.ucdavis.edu
Faculty. http://religions.ucdavis.edu/people

The Major Program
Religion is a major force in human experience. It has shaped the world's history, literature, art, culture, politics, ethics, and economics. In addition to offering courses in all the major religious traditions (Judaism, Christianity, Islam, and Hinduism,) the Religious Studies Program has developed cross-cultural courses dealing with religious symbols, myths, and rituals in written texts, art, theater, and film, and the Internet, as well as, thematic courses dealing with such topics as religion and the body, the rise of fundamentalism, religion and science, religion and ethics, and religion and violence.

The Program. The major introduces students to the academic study of religion. Students can choose from a broad range of courses both in the program itself and in other departments and programs-history, philosophy, psychology, sociology, anthropology, American studies, classics, and medieval studies. In addition to studying religious thought per se, students in the major can also study the way religion has shaped human behavior in such matters as family life, gender roles, ethics, artistic life, concepts of individual freedom, the pursuit of science, and economics. For some students, Religious Studies is an appropriate second major and combines well with anything from philosophy to international agricultural development, political science, and the physical sciences.

Career Alternatives. Because of the program's focus on developing critical thinking, writing, and reading skills, students who major in Religious Studies are well prepared to enter a variety of careers, including teaching, the health professions, law, business, and government. In an increasingly global society, knowledge of the world's religious traditions and practices has become an essential part of a student's education.

Recommended. A reading knowledge of a foreign language is highly recommended.

Course Equivalents. The major advisors have a list of lower and upper division courses that can be substituted for courses suggested above.

Honors and Honors Program. A student becomes eligible for graduation with honors by meeting the minimum GPA and course requirements established by the College of Letters and Science. Upon successful completion of the additional requirements of the College of Letters and Science Honors Program, individual students may be recommended by the program for graduation with high honors or highest honors on the basis of an evaluation of their academic achievements in the major.

Education Abroad Program. The Religious Studies program encourages students to study in the Summer Abroad program, the Quarter Abroad program, or the Education Abroad program. With the approval of a major advisor, applicable courses taken abroad may be accepted in the major or minor programs.

Teaching Credential Subject Representative. See the Teaching Credential/M.A. Program.

Hebrew. Students interested in Hebrew courses should see http://classics.ucdavis.edu/hebrew.

Major Advisors. Consult the Program office.

Total: 20

Religious Studies | RST Courses

Courses in RST:

RST 001—Survey of Religion (4)
Discussion—1 hour; Lecture—3 hours. Basic concepts introduced through readings of the primary religious literature. Discussion of central ideas (creation, history, law, prophecy, suffering, mysticism, asceticism, karma, reincarnation, moksha, etc.); readings from the Bible, Bhagavad Gita, the Koran, selections from Plato and early Buddhist writings. GE credit: ACGH, AH, DD, OL, VL, WE. Effective: 1997 Winter Quarter.

RST 001A—Pilgrimage (4)
Discussion—1 hour; Lecture—3 hours. Introduction to comparative religion, focusing on the theme of pilgrimage in different religious traditions. Not open to students who have taken RST 003A. GE credit: AH, WC, WE. Effective: 2013 Spring Quarter.

RST 001B—Death and Afterlife (4)
Discussion—1 hour; Lecture—3 hours. Introduction to comparative religion, focusing on the theme of death and the afterlife in different religious traditions. Not open to students who have taken RST 003B. GE credit: AH, OL, VL, WC, WE. Effective: 2013 Spring Quarter.

RST 001C—Sacrifice (4)
Discussion—1 hour; Lecture—3 hours. Introduction to comparative religion, focusing on the theme of sacrifice in different religious traditions. Not open to students who have taken RST 003C. GE credit: AH, OL, VL, WC, WE. Effective: 2013 Spring Quarter.

RST 001D—Conversion (4)
Discussion—1 hour; Lecture—3 hours. Introduction to comparative religion, focusing on the theme of conversion in different religious traditions. Not open to students who have taken RST 003D. GE credit: AH, WC, WE. Effective: 2013 Spring Quarter.

RST 001E—Fundamentalism (4)
Discussion—1 hour; Lecture—3 hours. Introduction to comparative religion, focusing on the idea of fundamentalism in different religious traditions. No credit given to students that have taken RST 003E. GE credit: AH, DD, OL, SS, WE. Effective: 2017 Fall Quarter.

RST 001F—Religion Today (4)
Discussion—1 hour; Lecture—3 hours. Introduction to comparative religion, focusing on different religious traditions in the contemporary world. GE credit: AH, DD, WC, WE. Effective: 2013 Spring Quarter.

RST 001G—Myth, Ritual, and Symbolism (4)
Discussion—1 hour; Lecture—3 hours. Not open to students who have taken and received unit credit for course 2. Myths, rituals and religious symbols found in a variety of religious traditions including examples from ancient and contemporary religious life. Variety of religious phenomena; validity of different approaches to the study of religion. Not open to students who have taken and received unit credit for RST 002. GE credit: AH, OL, VL, WC, WE. Effective: 2009 Fall Quarter.

RST 023—Introduction to Judaism (4)
Lecture/Discussion—3 hours; Term Paper. Introduction to the study of religion using examples from the rituals, art
and holy texts of Judaism. No prior knowledge of either Judaism or the study of religion is necessary. GE credit: 

RST 030—Religions of South Asia (4)
Discussion—1 hour; Lecture—3 hours. Introduction to South Asian religions, including Hinduism, Buddhism, Islam,
Jainism and Sikhism. Traces historical developments from Vedic texts and their ascetic reformulation by sages such
as Yajnavalkya, Siddhartha Gautama, and Mahavira into our global present. GE credit: AH, VL, WC, WE. Effective: 
2014 Winter Quarter.

RST 040—New Testament (4)
Discussion—1 hour; Lecture—3 hours. New Testament literature from critical, historical, and theological

RST 042—Religion and Science Fiction (4)
Lecture—3 hours; Term Paper. Representations of actual and fictional religious movements in science fiction and
fantasy writing and film. Examination of: the characteristics of religion and religiousity in fictional religious
movements; the relationship between religion, science, and technology in modern speculative fiction. GE credit: 

RST 045—Christianity (4)
Lecture/Discussion—3 hours; Term Paper/Discussion. Major concepts and practices in the Christian tradition. Survey
of the history of Christianity and Christian expansion from antiquity to modern times. Course pays particular
attention to Christianity in China, India, Africa, the Middle East, and Latin America. GE credit: AH, VL, WC, WE.
Effective: 2012 Fall Quarter.

RST 060—Introduction to Islam (4)
Lecture/Discussion—3 hours; Term Paper/Discussion—1 hour. Introduction to topics central to the Islamic tradition.
Muhammad, the Qur’an, Islamic law, theology, philosophy, cosmology, worship, and mysticism. Race and gender in
Islam, Islamic revival, and varying experiences of Islam in different historical and cultural settings. GE credit: AH, SS,
WC, WE. Effective: 2014 Winter Quarter.

RST 065C—The Qur’an and its Interpretation (4)
Extensive Writing; Lecture/Discussion—3 hours. The Qur’an, its history, its various functions in the lives of Muslims,
and its different interpretations. Quranic themes such as God and humankind, nature and revelation, eschatology
and Satan. Islam and other religions; women, gender, and sexuality. GE credit: AH, SS, WC, WE. Effective: 2002 Fall Quarter.

RST 066—The Song of God: The Bhagavad Gita (4)
Discussion—1 hour; Lecture—3 hours. The Bhagavad Gita, its history and reception, and its significance in the lives
of Hindus. Themes explored include Hindu theories of god, self, war, peace, duty, and action. GE credit: AH, OL,
WC, WE. Effective: 2005 Spring Quarter.

RST 067—Modern Hinduism (4)
Lecture/Discussion—3 hours; Term Paper. Historical survey of modern Hinduism from the early nineteenth century
to the present. Topics include Rammohun Roy, Sir William Jones, and Mahatma Gandhi, nationalism, post-

RST 068—Hinduism (4)
Extensive Writing; Lecture—3 hours. Hindu tradition from ancient to modern times. Multiplicity of religious forms
within Hinduism with mention of Jainism, Buddhism, and Sikhism and their relation to the mainstream of Hindu

RST 069—Introduction to Hindu Mythology (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Survey of the major narrative traditions within Hinduism, including
epic literature and local stories in oral, textual, visual and performative forms. GE credit: AH, VL, WC, WE. Effective: 
2014 Winter Quarter.

RST 070—Religion and Language (4)
Lecture/Discussion—3 hours; Term Paper. Basic toolkit for studying religious discourse in a variety of traditions.
Concentration on the sacred and profane, the wondrous and ordinary, and the mystical and reasonable. GE credit: 
RST 075—Introduction to Chinese Philosophy (4)
Lecture/Discussion—4 hours. Introduction to Chinese philosophy from classical pre-modern times; emphasis on basic concepts and their impact on social conduct; the Age of Philosophers, the Han synthesis, the medieval Buddhist contribution. Effective: 2004 Summer Session 2.

RST 080—Religion, Gender, Sexuality (4)
Lecture/Discussion—3 hours; Term Paper. Constructions of gender and sexuality within one or more religious traditions, pre-modern and modern. Emphasis on the interaction between religious, medical, and ethical definitions of the human body and sexual behavior. GE credit: AH, WE. Effective: 2009 Winter Quarter.

RST 098—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Primarily for lower division students. (P/NP grading only.) Effective: 1997 Winter Quarter.

RST 099—Special Study for Lower Division Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

RST 100—Study of Religion: Issues and Methods (4)

RST 102—Christian Origins (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. Development of Christianity from the end of the first century through the major controversies of the fifth century. Emphasis on the relationship between the new religious movement and the Roman Empire, and issues of early Christian identity and diversity. GE credit: AH, WC, WE. Effective: 2016 Spring Quarter.

RST 103—Medieval and Byzantine Christianity (4)
Lecture—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. Christianity in Europe and the Near East from the year 600 to 1450. Focus on the development of Catholic and Orthodox traditions in ritual, art, and thought, with attention to interactions between regional groups, and Christian interaction with Islam. GE credit: AH, WC, WE. Effective: 2016 Spring Quarter.

RST 104—Christianity 1450-1700 (4)
Lecture/Discussion—3 hours; Term Paper. History of Reformation conflicts over the authority of scripture, the nature of man and the universe, and the basis of morality with the goal of understanding how these conflicts laid the foundation for the modern world. Effective: 2010 Spring Quarter.

RST 105—Christianity and Modernity, 1700-1920 (4)
Lecture—3 hours; Term Paper. Reaction of Christian critics and apologists to the profound cultural and scientific transformations resulting from the Scientific Revolution, the Enlightenment, and the advent of the modern critical study of religion. GE credit: AH, OL, VL, WC, WE. Effective: 2012 Spring Quarter.

RST 106—Christianity in the Contemporary World (4)
Lecture—3 hours; Term Paper. Christianity in the 20th and 21st centuries. Relationship of Christianity to globalization, industrialization, mass media, and the contemporary secular state. Focus on Christianity in America and developing nations, and on the relationship of established Christian institutions to new Christian movements. GE credit: ACGH, AH, WC, WE. Effective: 2012 Spring Quarter.

RST 110—Life, Meaning and Identity (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Upper division standing. Study of religious lives, the quest for meaning and for personal identity; how religions frame the problems of life; how cultural and personal crises affect youthful identity; the nature and structure of dreams, myths, and ideals. GE credit: AH, WE. Effective: 2016 Spring Quarter.

RST 111—Persuasion and Conviction in Religious Tradition (4)
Lecture/Discussion—4 hours; Term Paper. Selected topics in religious argument. Familiarizes students with the discourse structures of religious persuasion and enables them to perform analysis of such texts. Covers argument styles and structures used in ethics, theology, and preaching. GE credit: ACGH, AH, OL, WC, WE. Effective: 2015 Spring Quarter.

RST 115—Mysticism (4)
Lecture—3 hours; Term Paper. Prerequisite(s): One lower division Religious Studies course. Historical and
descriptive analysis of selected key figures in mystical traditions and readings of representative mystical texts. Analytic term paper. GE credit: AH, OL, VL, WC, WE. Effective: 2016 Spring Quarter.

RST 120—Religion, Magic and Science (4)
Extensive Writing; Lecture—3 hours. Religion, magic, and science from the middle ages to the present. Contrast between modern scientific methodology and religious and magical thinking. (Same course as STS 120.) GE credit: AH, OL, VL, WC, WE. Effective: 2005 Fall Quarter.

RST 122—Studies in Biblical Texts (4)
Lecture—3 hours; Term Paper. Prerequisite(s): RST 021 Study of a book from the Prophets or writings from critical, historical, and religious perspectives. May be repeated once for credit in different subject area. May be repeated up to 1 time(s). GE credit: AH, WE. Effective: 1997 Winter Quarter.

RST 123—Sex and Gender in the Bible (4)
Lecture—3 hours; Term Paper. Gender and sexuality in the Bible and its interpretation in Judaism and Christianity. Femininity and masculinity; gender roles; homosexuality; sexual violence. Historical origins in the ancient world; influence on contemporary views. GE credit: AH, WC, WE. Effective: 2017 Fall Quarter.

RST 124—Topics in Judaism (4)
Lecture—3 hours; Term Paper. Prerequisite(s): RST 023; RST 021 Examination of selected aspects of Jewish life, religion, or literature. Potential topics include: Jewish Perspectives on Jesus; The Golem: History and Legend; Sexuality and Gender in Late Antique Judaism and Early Christianity. May be repeated for credit when topic differs. Effective: 2016 Spring Quarter.

RST 125—Dead Sea Scrolls, Apocrypha, and Pseudepigrapha (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): RST 021; or Consent of Instructor. Survey of the Dead Sea Scrolls, apocryphal and pseudepigraphical writings of Judaism and Christianity and their historical, social, and religious importance. GE credit: AH, WC, WE. Effective: 2016 Spring Quarter.

RST 126—The Formation of the Rabbinic Tradition (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): RST 021; RST 023; (RST 040 or RST 125) Survey of the classical rabbinic Jewish texts such as the Talmud and of the social and historical contexts of their production in Palestine and Babylonia. GE credit: WC. Effective: 2011 Fall Quarter.

RST 130—Topics in Religious Studies (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): RST 001 or RST 002 or RST 003A or RST 003B or RST 003C; or Consent of Instructor. One course. Thematic study of a phenomenon in more than one religious tradition or of the relationship between religion and another cultural phenomenon. Topics may include archeology and the Bible, women and religion, religion and violence. May be repeated for credit when topic differs. GE credit: WC, WE. Effective: 2002 Fall Quarter.

RST 131—Genocide (4) Review all entries
Lecture/Discussion—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): Upper division standing. Comparative and critical study of the modern phenomenon of genocide from religious, ethical and historical perspectives. (Same course as Human Rights 131.) GE credit: AH, SS, VL, WC, WE. Effective: 2014 Spring Quarter.

RST 131—Genocide (4) Review all entries Discontinued
Lecture/Discussion—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): Upper division standing. Comparative and critical study of the modern phenomenon of genocide from religious, ethical and historical perspectives. (Same course as Human Rights 131.) GE credit: AH, SS, VL, WC, WE. Effective: 2018 Fall Quarter.

RST 132—Topics in Mediterranean Ancient Religion (4) Review all entries
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): RST 021; RST 040; or Consent of Instructor. Thematic study of specific sociological, literary or theological theme across the religious traditions of the ancient Mediterranean/Near East: Greek and Roman religions, Judaism, Christianity, Zoroastrianism, Manichaeism, etc. Topics may include creation, sacrifice, priesthoods, prophecies, holy books, the afterlife. May be repeated up to 2 time(s) when topic differs. GE credit: AH, WC, WE. Effective: 2011 Fall Quarter.

RST 132—Topics in Mediterranean Ancient Religion (4) Review all entries
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. Thematic study of specific sociological, literary or theological theme across the religious traditions of the ancient Mediterranean/Near East: Greek and Roman religions, Judaism, Christianity, Zoroastrianism, Manichaeism, etc. Topics may include creation, sacrifice, priesthoods, prophecies, holy books, the afterlife. May be repeated up to 2 time(s) when topic differs. GE credit: AH, WC, WE. Effective: 2019 Fall Quarter.
RST 134—Human Rights (4) **Review all entries**
Lecture/Discussion—3 hours; Term Paper/Discussion—1 hour. Introduction to the interdisciplinary study of the origins, evolution, denial and protection of Human Rights. No credit for students who have completed course 90. (Same course as HMR 134.) GE credit: AH, SS, WC, WE. Effective: 2014 Spring Quarter.

RST 134—Human Rights (4) **Review all entries Discontinued**
Lecture/Discussion—3 hours; Term Paper/Discussion—1 hour. Introduction to the interdisciplinary study of the origins, evolution, denial and protection of Human Rights. No credit for students who have completed course 90. (Same course as Human Rights 134.) GE credit: AH, SS, WC, WE. Effective: 2019 Winter Quarter.

RST 135—The Bible and Film (4)
Film Viewing—3 hours; Lecture—2 hours; Term Paper. Prerequisite(s): HUM 010 recommended. Examination of the uses of the Judeo-Christian Scriptures in film. Topics include dramatic depictions of biblical stories, the tension between science and religion, allegorical treatments of biblical themes, and the problems of religious conviction. Effective: 2003 Winter Quarter.

RST 137—Topics in Buddhism (4)
Lecture—3 hours; Term Paper. Thematic exploration of historic developments, periods, regions and sects in Buddhism from an interdisciplinary perspective. May be repeated up to 12 unit(s) when topic differs. GE credit: AH, WC, WE. Effective: 2019 Spring Quarter.

RST 138—Human Rights, Gender, and Sexuality (4) **Review all entries**
Lecture/Discussion—3 hours; Term Paper. Gender and sexuality in the context of human rights. Topics include women's participation in the public sphere, the right to change gender, the right for family privacy, and the right to marriage. (Same course as Human Rights 138.) GE credit: AH, WC, WE. Effective: 2015 Fall Quarter.

RST 138—Human Rights, Gender, and Sexuality (4) **Review all entries Discontinued**
Lecture/Discussion—3 hours; Term Paper. Gender and sexuality in the context of human rights. Topics include women's participation in the public sphere, the right to change gender, the right for family privacy, and the right to marriage. (Same course as Human Rights 138.) GE credit: AH, WC, WE. Effective: 2019 Spring Quarter.

RST 139—Topics in Hinduism (4)
Lecture—3 hours; Term Paper. Thematic study of specific periods, movements, leaders, regions, ethics or philosophies within Hinduism from an interdisciplinary perspective. May be repeated up to 12 unit(s) when topic differs. GE credit: AH, WC, WE. Effective: 2019 Spring Quarter.

RST 140—Christian Theology (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. Historical and systematic introduction to Christian doctrine, with attention to divergent traditions and the problem of orthodoxy and heresy. GE credit: AH, WC, WE. Effective: 2016 Spring Quarter.

Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Consent of Instructor. Life and thought of the early Church as reflected by the Synoptic Tradition; Matthew, Mark, Luke and Acts. Offered every third year to alternate with 141B, 141C. GE credit: AH, WC, WE. Effective: 2016 Spring Quarter.

RST 141B—New Testament Literature: John (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Consent of Instructor. Life and thought of the early Church as reflected by the Johannine Tradition; the Gospel and letters of John. Offered every third year to alternate with courses 141A and 141C. GE credit: AH, WC, WE. Effective: 2016 Spring Quarter.

RST 141C—New Testament Literature: Paul (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Consent of Instructor. Life and thought of the early Church as reflected by the Pauline tradition. The letters of Paul. Offered every third year to alternate with 141A, 141B. GE credit: AH, WC, WE. Effective: 2016 Spring Quarter.

RST 143—New Testament Apocrypha (4)
Lecture—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. Extra-canonical Christian writings and their reception, from antiquity to the present. Emphasis on the importance of New Testament figures both as literary characters and as authors within different Christian traditions. GE credit: AH, OL, WC, WE. Effective: 2016 Spring Quarter.

RST 144—History of the Bible (4)
Lecture—3 hours; Term Paper. Prerequisite(s): RST 021 or RST 040 History of the formation of the Christian biblical
canon, with emphasis on differences between Christian traditions; survey of translations and adaptations of biblical narrative in Christianity, Judaism, and Islam, as well as in contemporary culture. GE credit: AH, WC, WE. Effective: 2014 Winter Quarter.

**RST 145—Contemporary American Religion (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): RST 040 and HIS 017B recommended. Examination of several major movements and phenomena in twentieth-century American religion. GE credit: ACGH, AH, DD, WE. Effective: 1997 Winter Quarter.

**RST 150—Religious Ethics (4)**
Lecture/Discussion—3 hours; Term Paper/Discussion. Prerequisite(s): RST 010 recommended. Study of the religious bases of ethics through examination of ethical problems that arise in different religious cultures around the world and in nations where multiple religious cultures face similar issues. GE credit: AH, WC, WE. Effective: 2014 Winter Quarter.

**RST 152—Justice, Equity, and Privacy in Medical Humanities (4)**

**RST 154—The Hindu Temple (4)**
Lecture—3 hours; Term Paper. Comparative history of architecture and symbolism of the Hindu Temple in India, Southeast Asia and the United States. Attention to the temple as expression of religious knowledge, political authority, and cultural heritage through the lens of colonialism and postcolonialism. (Same course as AHI 154.) GE credit: AH, SS, VL, WC, WE. Effective: 2015 Fall Quarter.

**RST 156—Religion and the Performing Arts in India (4)**
Lecture—3 hours; Term Paper. Prerequisite(s): RST 030; RST 068; or Consent of Instructor. Survey of religion and performing arts in India. Emphasis on the influence of colonialism, nationalism, and regionalism on the history of Indian performing arts. GE credit: AH, WC, WE. Effective: 2012 Winter Quarter.

**RST 157—Hindu Women and Goddesses (4)**
Lecture—3 hours; Term Paper. Hindu goddesses and the religious lives of Hindu women in India and the diaspora. GE credit: AH, VL, WC, WE. Effective: 2010 Fall Quarter.

**RST 158—The Ramayana (4)**
Lecture—3 hours; Term Paper. Exploration of the Indian epic, Ramayana, through the lens of literature, performance, and visual art. Emphasis on the text's diversity and its contemporary global relevance. Topics include Ramayanas in Southeast Asia, and in various South Asian diaspora communities. (Same course as COM 156.) GE credit: AH, WC, WE. Effective: 2015 Spring Quarter.

**RST 159—The Mahabharata (4)**
Lecture/Discussion—3 hours; Term Paper. Survey of the Indian epic, the Mahabharata, through textual, oral, and visual culture. GE credit: AH, WC, WE. Effective: 2019 Fall Quarter.

**RST 160—Introduction to Islamic Thought (4)**
Extensive Writing; Lecture—3 hours. Prerequisite(s): RST 060 recommended. The development of Islamic thought from the first centuries of Islam to the eighteenth century. Theology, philosophy, ethics, Sufism, historiography, political theory, fundamentalism, al-Farabi, al-Ghazzali, Ibn Rushd, Tusi, Ibn al-Arabi, Rumi, Molla Sadra, Ibn Khaldun, Ibn Abd al-Wahhab. GE credit: AH, WC, WE. Effective: 2004 Fall Quarter.

**RST 161—Modern Islam (4)**

**RST 161B—Modern Islam: Authority and Tradition In Process (4)**
Lecture/Discussion—3 hours; Term Paper. Survey of Islamic thought, social organization, politics from eighteenth century through present. Focus on changing notions of moral authority and tradition. Concentration on Middle East and South Asia with sustained treatment of North American engagements with the Islamic world. GE credit: AH, OL, SS, WC, WE. Effective: 2014 Spring Quarter.

**RST 162—Introduction to Islamic Law (4)**
Extensive Writing; Lecture—3 hours. Prerequisite(s): RST 060 recommended. The development of Islamic law in the
formative centuries of Islam, ca. 600-1000, as well as its adaptation to changing economic, social, and political conditions in subsequent periods. Legal schools, legal theory, the Shari'a, reformist movements, human rights. GE credit: AH, WC, WE. Effective: 2004 Fall Quarter.

RST 163—Social Life of Islam (4)
Lecture—3 hours; Term Paper. Prerequisite(s): RST 060 or HIS 006 recommended. Introduction to culture and social life in Muslim societies. Focus on the plurality of traditions in Muslim faith, reason, and everyday practice. Special attention to Muslim rituals, ethical values, verbal genres, family life, sexuality and veiling, and youth culture. GE credit: AH, OL, SS, WC, WE. Effective: 2015 Spring Quarter.

RST 165—Islam in Asia (4)
Extensive Writing; Lecture/Discussion—3 hours. Islam as a lived religion in the Indian sub-continent, Central Asia, China, and Southeast Asia. Emphasis is on primary sources studied comparatively and historically. Effective: 2004 Winter Quarter.

RST 166—Religion and Media in the Arab World (4)
Lecture—4 hours. Exploration of the role and experience of media technologies in the Arab world. Study of digital and electronic media as well as alternative media practices. Investigation of new trends in political activism and identity formation. (Same course as MSA 131C.) GE credit: OL, SS, VL, WC, WE. Effective: 2014 Fall Quarter.

RST 167—Iraq (4)
Seminar—3 hours; Term Paper—1 hour. Origins, causes and ethical challenges of conditions in Iraq; larger historical, cultural and ethical dimensions of mass violence, war, liberation, neocolonialism, terrorism and resistance. Effective: 2007 Spring Quarter.

RST 170—Buddhism (4)
Lecture—3 hours; Term Paper. Buddhism in its pan-Asian manifestations, from its beginning in India to its development in Sri Lanka and Southeast Asia, Central Asia, China and Japan; teachings and practices, socio-political and cultural impact. GE credit: AH, VL, WC. Effective: 2005 Spring Quarter.

RST 172—Ch'an (Zen) Buddhism (4)
Lecture/Discussion—3 hours; Term Paper. Doctrines and methods of the Ch'an Buddhism, both ancient and modern. Review of ritual techniques, including meditation. Effective: 2005 Spring Quarter.

RST 175A—Chinese Intellectual Traditions: Daoist Traditions (4)
Lecture/Discussion—4 hours. Prerequisite(s): A course in Chinese history recommended. English-language survey of key Daoist texts and scholarship. Topics include Daoist concepts of the cosmos, the natural world, scripture, the body, and immortality; Daoist deities; Daoism and the state. (Same course as CHN 100A.) GE credit: AH, WC. Effective: 2016 Fall Quarter.

RST 189—Senior Colloquium (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. Primarily for seniors in Religious Studies. Discussion in depth of a problem in religion which requires the methods of several disciplines and is important in the encounter between religions. Effective: 1997 Winter Quarter.

RST 190—Seminar (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. Required of all Religious Studies majors. Allows majors to integrate their disciplined study of the field. Emphasis on current scholarly debate about the methods for analyzing and comparing diverse religious traditions. Effective: 1997 Winter Quarter.

RST 194HA—Special Study for Honors Students (1-5)
Independent Study. Open only to majors of senior standing who qualify for honors program. Guided research, under the direction of a faculty member approved by the Program Director, leading to a senior honors thesis on a religious studies topic. (P/NP grading only.) Effective: 1997 Winter Quarter.

RST 194HB—Special Study for Honors Students (1-5)
Independent Study. Open only to majors of senior standing who qualify for honors program. Guided research, under the direction of a faculty member approved by the Program Director, leading to a senior honors thesis on a religious studies topic. (P/NP grading only.) Effective: 1997 Winter Quarter.

RST 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Upper division standing. (P/NP grading only.) Effective: 1997 Winter Quarter.
RST 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

RST 201—Methods and Issues in Religious Studies (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing. Focuses on controversies in the study of comparative religion. How is religion best defined? Are there methods unique to the study of religion? What does the study of religion contribute to the study of society in general? May be repeated up to 2 time(s) the content is substantially different. Effective: 2006 Spring Quarter.

RST 205—Religion and Media (4)
Lecture/Discussion—3 hours; Term Paper. Many communities are finding global media technologies useful for religious practice. This course examines how religious revitalization is historically situated. A phenomenological approach will enable students to situate media and religion within the social and material world of practitioners. Effective: 2009 Winter Quarter.

RST 210—Religion and Postcoloniality, or Savages, Civilization, and Spirituality (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing. This course examines relations between religion and colonialisms. Using specific historical situations it explores some of our thorniest theoretical problems. Students acquire a solid understanding of postcolonial theory and the historical tools to critically engage religion in the present. Effective: 2007 Fall Quarter.

RST 212—Religion and Violence (4)
Seminar—3 hours; Term Paper. Comparative and critical study of the ideological, cultural, and theological relationship between forms of violence and religion and religious practice. Effective: 2007 Fall Quarter.

RST 215—Topics in the History of Christianity (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing. Selected topics in the history of Christianity. Intended for graduate students seeking to do advanced work in the study of Christianity. May cover issues in Christian thought from antiquity, the middle ages, the early modern or modern period. May be repeated for credit when topic differs. Effective: 2010 Fall Quarter.

RST 299—Directed Research (1-12)
Variable. May be repeated for credit. (S/U grading only.) Effective: 2007 Fall Quarter.

RST 396—Teaching Assistant Training Practicum (1-4)
Variable. Prerequisite(s): Consent of Instructor. Graduate standing. May be repeated for credit. (S/U grading only.) Effective: 2009 Winter Quarter.

The Major Program
The Russian major introduces students to a culture rich in art, music, theater, film, language, and literature. The major offers an opportunity to learn skills needed to enter the fields of foreign affairs, world politics, and international trade, or to begin graduate work in literature, history, cultural studies and international relations.
The Program. The major program instructs students in speaking, understanding, reading, and writing the Russian language. The program also acquaints students with the intellectual and cultural contributions of the Russian world through the study of its literature, traditions, and institutions.

Internships and Career Alternatives. Russian majors may participate in internships where they can serve as translators and interpreters for schools and business firms throughout Northern California. Upon graduation, many Russian majors enter the business world or enter graduate programs in Slavic studies and international relations. The program encourages students to supplement their Russian studies with courses in related fields such as international relations, political science, computer science, cultural studies, or economics in order to maximize their career possibilities.

Honors and Honors Program. The honors program comprises at least one quarter of study under course 194H, which will include a research paper. For details consult the major advisor.

Study Abroad. Students who have completed one or two years of Russian language study can participate in the Education Abroad Program (EAP) in Moscow. Many of our students also participate in summer, semester, and year-long programs sponsored by CIEE and ACTR in St. Petersburg and Moscow.

Prerequisite Credit. Credit normally will not be given for a course if that course is the prerequisite for a course already completed.

**Courses in RUS:**

**RUS 001—Elementary Russian (5)**
Discussion—5 hours; Laboratory—1 hour. Introduction to Russian grammar and development of all language skills in a cultural context with special emphasis on communication. GE credit: AH, WC. Effective: 1997 Winter Quarter.

**RUS 001A—Accelerated Intensive Elementary Russian (15)**
Lecture/Discussion—15 hours. Special 12 week accelerated, intensive summer session course that combines the work of courses 1, 2, and 3. Introduction to Russian grammar and development of all language skills in a cultural context with emphasis on communication. Not open to students who have completed RUS 001, RUS 002, or RUS 003. Effective: 2008 Summer Special Session.

**RUS 002—Elementary Russian (5)**
Discussion—5 hours; Laboratory—1 hour. Prerequisite(s): RUS 001 Continuation of grammar and language skills developed in course 1. GE credit: AH, WC. Effective: 1997 Winter Quarter.

**RUS 003—Elementary Russian (5)**
Discussion—5 hours; Laboratory—1 hour. Prerequisite(s): RUS 002 Continuation of grammar and language skills developed in course 2. GE credit: AH, OL, WC. Effective: 2015 Spring Quarter.

**RUS 004—Intermediate Russian (4)**
Discussion/Laboratory—4 hours. Prerequisite(s): RUS 003 Grammar review and conversational practice in Russian. GE credit: AH, OL, WC. Effective: 2016 Fall Quarter.

**RUS 005—Intermediate Russian (4)**
Discussion—4 hours; Laboratory—1 hour. Prerequisite(s): RUS 004 Grammar review. Introduction to literature in its sociopolitical context. Conversational practice. GE credit: AH, OL, WC. Effective: 2015 Spring Quarter.

**RUS 006—Intermediate Russian (4)**
Discussion—4 hours; Laboratory—1 hour. Prerequisite(s): RUS 005 Grammar review. Intermediate conversation and continued reading of literature. Social and cultural practices in contemporary Russia; introduction to Russian history. GE credit: AH, OL, WC. Effective: 2015 Spring Quarter.

**RUS 098—Directed Group Study (1-5)**
Discussion—1-5 hours. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.
RUS 099—Special Study for Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

RUS 101A—Advanced Russian (4)
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): RUS 006; or Consent of Instructor. Topics in Russian. Grammar for the advanced student. Reading and discussion of journalistic texts and classic and contemporary literature. Conversational exercises utilizing literary and colloquial variants of current Russian speech. GE credit: AH, WC. Effective: 2011 Fall Quarter.

RUS 101B—Advanced Russian (4)
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): RUS 101A; or Consent of Instructor. Continuation of course 101A. Topics in Russian grammar for the advanced student. Reading and discussion of journalistic texts and classic and contemporary literature. Conversational exercises utilizing literary and colloquial variants of current Russian speech. GE credit: AH, WC. Effective: 2011 Winter Quarter.

RUS 101C—Advanced Russian (4)
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): RUS 101B Continuation of course 101B. Topics in Russian grammar for the advanced student. Reading and discussion of journalistic texts and classic and contemporary literature. Conversational exercises utilizing literary and colloquial variants of current Russian speech. GE credit: AH, WC. Effective: 2011 Spring Quarter.

RUS 102—Russian Composition (4)
Lecture/Discussion—3 hours; Tutorial—1 hour. Prerequisite(s): RUS 006; or Consent of Instructor. Practice in writing Russian. One composition on a different topic each week. Topics include: history, geography, politics, and literature of Russia; comparison of Russian and American lifestyles; current events. Conducted in Russian. GE credit: AH, WC, WE. Effective: 2002 Winter Quarter.

RUS 103—Literary Translation (4)
Discussion—3 hours. Prerequisite(s): RUS 101C Translation of Russian literary texts into stylistically equivalent idiomatic English. Effective: 1997 Winter Quarter.

RUS 105—Advanced Russian Conversation (4)
Discussion—3 hours; Practice—1 hour. Prerequisite(s): RUS 006 Intensive conversational practice and discussion based on current events and contemporary texts. GE credit: AH, OL, WC. Effective: 2015 Winter Quarter.

RUS 120—Topics in Russian Literature and Culture (4)
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): Upper division standing or consent of instructor. Knowledge of Russian not required. Investigation of significant themes and issues of Russian literature and culture within their European context. May be repeated up to 1 time(s). GE credit: AH, OL, WC, WE. Effective: 2017 Spring Quarter.

RUS 122—19th-Century Russian Literature (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): RUS 101C when the course offered in Russian; no prerequisite when offered in English. Not open to students who have taken course 121 and 127. Study of Russian literature (prose fiction, drama, poetry) from the period between 1800 and the end of the 19th century. May include authors like Pushkin, Lermontov, Gogol, Turgenev, Dostoevsky, Tolstoy, Chekhov. Offered alternately in English or Russian. GE credit: AH, OL, VL, WC, WE. Effective: 2015 Fall Quarter.

RUS 124—Twentieth-Century Russian Literature (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): RUS 101C when offered in Russian; no prerequisite when offered in English. Study of Russian literature (prose, drama, poetry) from the period between 1900 and the end of the 20th century. Authors like Y. Olesha, M. Bulgakov, D. Kharmas, and L. Petrushevskaya. Taught in Russian. Not open for credit to students who have taken RUS 123 or RUS 128. GE credit: AH, OL, VL, WC, WE. Effective: 2015 Fall Quarter.

RUS 126—The Russian Theater (4)
Lecture—3 hours; Term Paper. Prerequisite(s): RUS 101C; or Consent of Instructor. The main works of Russian dramatists from Fonvizin to the present, including Gogol, Turgenev, Tolstoy, Ostrovsky, Chekhov, Blok, Mayakovsky, Kharmas. Conducted in Russian. GE credit: AH, WC, WE. Effective: 2008 Fall Quarter.

RUS 129—Russian Film (4)
Film Viewing—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): Completion of Subject A requirements. History of Russian film; film and social revolution, the cult of Stalin, dissident visions; film and the collapse of the Soviet
empire; gender and the nation in Russian film. Course taught in English; films are in Russian with English subtitles. (Same course as FMS 129.) GE credit: AH, VL, WC, WE. Effective: 2009 Fall Quarter.

RUS 130—Contemporary Russian Culture (4)
Lecture—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. Trends in Russian culture and the relationship between artists and the government. Topics: recent changes in the cultural scene, postmodernist trends in literature, visual art, film, and theater. GE credit: AH, VL, WC, WE. Effective: 2016 Spring Quarter.

RUS 133—Post-Soviet Literature (4)

RUS 139—Pushkin (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): RUS 101C; or Consent of Instructor. Three major periods of Pushkin's poetical works: his early Lyceum verse; his poetry of the early 1820s; and the mature period. Further study of Pushkin's prose fiction, drama, and journalism. GE credit: AH, OL, WC, WE. Effective: 2016 Spring Quarter.

RUS 140—Dostoevsky (in English) (4)
Lecture—3 hours. Reading and analysis of Dostoevsky's principal works such as Crime and Punishment, The Idiot, The Brothers Karamazov, and The Diary. Study of social and political views as reflected in Dostoevsky's works. GE credit: AH, WC, WE. Effective: 1997 Winter Quarter.

RUS 141—Tolstoy (in English) (4)
Lecture—3 hours; Term Paper. Study of Leo Tolstoy's literary evolution and moral quest. Readings include his Confession, a major novel such as War and Peace or Anna Karenina, and representative shorter fiction. GE credit: AH, OL, WE. Effective: 2015 Fall Quarter.

RUS 142—Women in Russian Culture (4)
Lecture/Discussion—3 hours; Term Paper. Study of the representation of women in contemporary Russian fiction and film. Exploration of issues such as family dynamics/motherhood, sexuality, work, and women's relationship to the state. Offered in English. GE credit: AH, OL, VL, WC, WE. Effective: 2017 Winter Quarter.

RUS 143—Chekhov (in English) (4)
Extensive Writing; Lecture/Discussion—3 hours. Examination of Chekhov's short stories and major plays, such as The Seagull, Uncle Vanya, The Three Sisters, The Cherry Orchard, and Ivanov, in the broader cultural context of European and Russian fin de siecle. GE credit: AH, OL, WC, WE. Effective: 2016 Fall Quarter.

RUS 150—Russian Culture (4)

RUS 192—Research Essay (2)
Variable. Prerequisite(s): A Russian literature course (may be taken concurrently). A research essay, based on primary and secondary sources, dealing in depth with a topic arising from or related to the prerequisite literature course. May be repeated for credit. May be repeated for credit. GE credit: AH, WC, WE. Effective: 1997 Winter Quarter.

RUS 194H—Special Study for Honors Students (4)
Independent Study—4 hours. Prerequisite(s): Open only to majors of senior standing who qualify for honors program. Guided research, under the direction of a faculty member, leading to a senior honors thesis on a topic in Russian studies. Effective: 1997 Winter Quarter.

RUS 195H—Honors Thesis (4)
Independent Study—4 hours. Prerequisite(s): RUS 194H Writing an honors thesis, under the direction of a faculty member, on a topic in Russian studies. Effective: 1997 Winter Quarter.

RUS 197T—Tutoring in Russian (1-4)
Laboratory—1-2 hours; Seminar—1-2 hours. Prerequisite(s): Consent of Instructor. Upper division standing. Tutoring in undergraduate courses, including leadership in small voluntary discussion groups affiliated with departmental courses. May be repeated up to 6 unit(s). (P/NP grading only.) Effective: 2014 Winter Quarter.

RUS 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.
Science and Society Units:
22-27

SAS 001 Critical Inquiry into Contemporary Issues 4
Choose one:
SAS 002 Feeding the World: Influences on the Global Food Supply 3
SAS 005 Pathways to Discovery: Science and Society 3
SAS 020 Genetics and Society 4
SAS 030 Mushrooms, Molds, and Society 3
SAS 120 Science and Contemporary Societal Issues 3

Choose one from each of the four areas:

History and Philosophy of Science:

CRD 118 Technology and Society 4
CRD 162 People, Work and Technology 5
HIS 185A History of Science in America 4
HIS 185B History of Technology in America 4
PHI 107 Philosophy of the Physical Sciences 4
PHI 108 Philosophy of the Biological Sciences 4

Science & Society Minor; Science & Society | SAS Minor

(College of Agricultural and Environmental Sciences)

David M. Rizzo, Ph.D., Program Director

Science and Society Program. https://sas.ucdavis.edu/

Program Office. 160 Hutchison Hall; 530-754-7277

The Program. Science and Society is an interdepartmental teaching program administered by the College of Agricultural and Environmental Sciences that offers students throughout the campus the opportunity to discover the connections that link the social, biological, and physical sciences with societal issues and cultural discourses. Course work examines discovery processes in relation to societal values, public policy and ethics, including issues associated with cultural diversity. Whenever possible, opportunities outside the classroom are included as part of the learning experience.

The Science and Society teaching program serves students of all majors and interests. It can allow lower division students who have not yet declared a major a meaningful context for exploring diverse subject matters. The minor for the program includes, in addition to Science and Society courses, upper division courses from both the College of Agricultural and Environmental Sciences and the College of Letters and Science in the areas of history and philosophy of science, policy and decision making, communication of science, and culture, ethics and applications.

Minor Advisor. D. M. Rizzo

### Science & Society Minor; Science & Society | SAS Courses

**Courses in SAS:**

**SAS 001—Critical Inquiry into Contemporary Issues (4)**
Discussion—1 hour; Lecture/Discussion—3 hours. Open to first year and new transfer students only. Contemporary issues, including global population trends, economic and environmental changes, cultural diversity and biodiversity, nutrition and food safety, fiber and textiles, changing consumer cultures. Inquiry processes emphasize ethics, multiple disciplines, and multiple perspectives. GE credit: SE, SS, WE. Effective: 2003 Fall Quarter.

**SAS 002—Feeding the Planet: Influences on the Global Food Supply (3)**
Lecture/Discussion—3 hours. Scientific principles and dynamic interactions involved in food production, food processing, nutrition, shelf life and marketing from differing viewpoints. Physical, biological and social science issues influencing the availability and safety of the food supply worldwide. GE credit: SE, SL, SS. Effective: 1997 Winter Quarter.

**SAS 002—Feeding the World: Influences on the Global Food Supply (3)**
Lecture/Discussion—3 hours. Scientific principles and dynamic interactions involved in food production, food processing, nutrition, shelf life and marketing from differing viewpoints. Physical, biological and social science issues influencing the availability and safety of the food supply worldwide. Not open for credit to students who have taken SAS 002V. GE credit: SE, SL, SS. Effective: 1997 Winter Quarter.

**SAS 002V—Feeding the World: Influences on the Global Food Supply (3)**
Web Electronic Discussion—1 hour; Web Virtual Lecture—2 hours. Scientific principles and dynamic interactions involved in food production, food processing, nutrition, and agribusiness. Physical, biological and social science issues influencing the availability and safety of the food supply worldwide. Not open for credit to students who have taken SAS 002. GE credit: SE, SL, SS. Effective: 2018 Fall Quarter.

**SAS 003—Science, Technology and Society (4)**
Lecture—4 hours. Impact of developments in science and technology on the individual in society and how economics, politics, culture and values affect technological development. Not open for credit to students who have completed former course ABS 018. GE credit: SE, SS. Effective: 1997 Winter Quarter.
SAS 004—Water in Popular Culture (3)
Discussion—1 hour; Film Viewing—2 hours; Lecture—1 hour. Importance of water in many aspects of society as revealed through a survey of its depictions in film. GE credit: SE, SL, SS. Effective: 2008 Fall Quarter.

SAS 005—Pathways to Discovery: Science and Society (3)
Lecture/Discussion—3 hours. Highlights a current issue and/or controversy found in contemporary society and looks at how this problem impacts and is affected by the physical, social and biological sciences. Course varies with topic offered. May be repeated up to 2 time(s). GE credit: SE, SS. Effective: 1997 Winter Quarter.

SAS 007—Terrorism and War (4)
Discussion—1 hour; Lecture—3 hours; Term Paper. Exploration of terrorism and war from science and social sciences perspectives. Terrorist cells and groups; biological, chemical, nuclear, and environmental terrorism; intelligence gathering and espionage; military strategy; genocide; epochal wars; clash of civilizations; nation building; and future global scenarios. GE credit: SE, SS, WE. Effective: 2004 Winter Quarter.

SAS 007V—Terrorism and War (4)
Auto Tutorial—5 hours; Extensive Writing; Web Electronic Discussion—1 hour; Web Virtual Lecture—3 hours. Terrorism and war from science and social sciences perspectives: terrorism (terrorist cells, WMD's, religious extremism), warfare (military strategy, genocide), and statecraft (diplomacy, clash of civilizations, epochal wars). Students may not take both SAS 007V and SAS 007 for credit. GE credit: SS, WC, WE. Effective: 2017 Spring Quarter.

SAS 008—Water Quality at Risk (3)
Discussion—1 hour; Lecture—2 hours. Not open to students who have successfully completed ERS 008. (Formerly Environmental and Resource Sciences 8.) Natural and human threats to water quality. Balance of science and policy in all aspects of attaining, maintaining, and managing water quality, water contamination. Decoding popular media coverage of water quality and water contamination. (Same course as ESM 008.) GE credit: SE, SL, SS, WE. Effective: 2011 Fall Quarter.

SAS 009—Crisis in the Environment (3)
Lecture—3 hours. Explores contemporary environmental issues by examining the causes, effects and solutions to a wide range of environmental problems facing the global ecosystem. Integrated discussion of political, societal and economic impact linkages with environmental problems. GE credit: SE, SS, WE. Effective: 2006 Fall Quarter.

SAS 010—Water, Power, Society (3)
Discussion—1 hour; Lecture—2 hours. Water resources issues. How water has been used to gain and wield socio-political power. Water resources development in California related to current and future sustainability of water quantity and quality. Roles of science and policy in solving water problems. (Same course as HYD 010.) GE credit: SE, SL, SS. Effective: 2005 Spring Quarter.

SAS 011—California Geography (3)
Discussion—1 hour; Lecture—2 hours; Term Paper. Introduction to cultural/societal patterns of California and their relationship to natural resources, biomes, geomorphology, and physiography. Focus on diversity of California's environments and their impacts on and alterations by human activities. Environmental issues in the State. GE credit: SE, SS, WE. Effective: 2006 Fall Quarter.

SAS 012—Plants and Society (4)
Extensive Writing—3 hours; Lecture—3 hours. Prerequisite(s): High school biology. Dependence of human societies on plant and plant products. Plants as resources for food, fiber, health, enjoyment and environmental services. Sustainable uses of plants for food production, raw materials, bioenergy, and environmental conservation. Global population growth and future food supplies. Not open for credit to students who have completed PLB 012. (Former course PLB 012.) GE credit: SE, SS, WE. Effective: 2007 Fall Quarter.

SAS 013—Disease and Society (3)
Lecture—3 hours. Limited enrollment. Introduction to the concept of disease, the societal and personal impacts of past, present and future diseases, and the science behind disease discoveries, causes, evolution, diagnosis, treatment, and prevention. GE credit: SE, SL, SS. Effective: 2012 Fall Quarter.

SAS 014—Forests and Society (3)
Discussion—1 hour; Lecture—2 hours. Class size limited to 120 students. Sociology, natural history and current issues of the world's forests. Application of scientific principles in outdoor laboratories and on-campus field trips. GE credit: ACGH, OL, SE, SL, SS, WE. Effective: 2016 Fall Quarter.
SAS 018—GIS and Society (3)
Laboratory—3 hours; Lecture—2 hours; Term Paper/Discussion—0.3 hours. Geographic Information Systems (GIS) as a spatial technology and a tool for change in society. Evaluate physical, biological and social impact of GIS in the context of case studies such as land, water and community planning. GE credit: QL, SE, SL, SS, VL. Effective: 2007 Spring Quarter.

SAS 020—Genetics and Society (4)
Discussion—1 hour; Lecture—3 hours. Basic concepts of genetics, modern methods of biotechnology, the process of scientific discovery and the public perception of the process; present and future impact of genetics on society. Not open for credit to students who have completed SAS 140. GE credit: OL, SE, SL, SS, WE. Effective: 2005 Winter Quarter.

SAS 025—Global Climate Change: Convergence of Biological, Geophysical, & Social Sciences (3) Review all entries

SAS 025—Global Climate Change: Convergence of Biological, Geophysical, & Social Sciences (4) Review all entries

SAS 025V—Global Climate Change: Convergence of Biological, Geophysical, & Social Sciences (3) Review all entries
Auto Tutorial—5 hours; Extensive Writing—2 hours; Web Electronic Discussion—2 hours; Web Virtual Lecture. Causes of global climate change and the biological, geophysical, and social consequences of such change. Methods used by different scientists for predicting future events. Complexity of global affairs. Decision making under uncertainty. Students cannot take both SAS 025 and SAS 025V for credit. GE credit: DD, OL, QL, SE, SL, SS, VL, WC, WE. Effective: 2013 Winter Quarter.

SAS 025V—Global Climate Change: Convergence of Biological, Geophysical, & Social Sciences (4) Review all entries

SAS 030—Mushrooms, Molds, and Society (3)
Lecture/Discussion—3 hours. Fungi as organisms with which humans interact daily, societal issues arising from these interactions. Fungi in medicine, religion, agriculture, and industry, as well as cultural perceptions of fungi. GE credit: SE, SS. Effective: 1998 Spring Quarter.

SAS 035—Germs: The Good, the Bad, and the Ugly (3)
Discussion—1 hour; Lecture—2 hours. Class size restricted to 60 students. Impact of microorganisms on Earth, Humans and Society. Historical, scientific, and contemporary issues dealing with microbes on natural and built environments. GE credit: SE, SS, WE. Effective: 2017 Spring Quarter.

SAS 040—Photography: Bridging Art and Science (3)
Lecture—2 hours; Studio—3 hours. Photography is used to explore the common ground between art and science. Photographic processes, creativity and aesthetics, chaos and order, principles of space, time and light. Photographic interpretation and documentation of the natural world. Camera required. GE credit: AH, SE, SL, VL, WE. Effective: 2008 Spring Quarter.

SAS 041—Understanding Performance: Appreciation of Modern Theatre, Dance, Film and Performance Art for the Humanities and Sciences (4)
Discussion/Laboratory—1 hour; Lecture/Discussion—3 hours. Relevance of theatre and performance to modern culture, science and society. Approaches to theatre/dance/media/performance art, integrated into Mondavi Centre
for the Arts and Theatre and Dance Department programs. (Same course as DRA 005.) GE credit: AH, DD, OL, VL, WC, WE. Effective: 2015 Winter Quarter.

**SAS 042—Earth, Water, Science, Song (3)**
Lecture—2 hours; Studio—3 hours. Fusion of water and soil science with performing arts. Creative communication of scientific concepts and facts through exercises in song writing and poetry. Design, discuss and conduct public performances related to the functioning of the natural world. GE credit: AH, OL, SE. Effective: 2009 Summer Session 2.

**SAS 043—Energy, Materials, and Design Over Time (4)**
Discussion—1 hour; Lecture—3 hours. Global history of design across time, viewed through the lens of the effects of the creation and discovery of new energy sources, processes, and materials on design. (Same course as DES 040A.) GE credit: AH, WC. Effective: 2018 Spring Quarter.

**SAS 070A—Genetic Engineering in Medicine, Agriculture, and Law (5)**
Lecture—5 hours. Not open to students who have completed BIS 002A and BIS 002B and BIS 002C. Historical and scientific study of the impact of genetic engineering in medicine, agriculture, and law, including examination of social, ethical, and legal issues raised. Offered in a distance-learning format. GE credit: SE, SL, SS. Effective: 2018 Winter Quarter.

**SAS 090A—Issues in Environmental and Resource Sciences (2)**
Seminar—2 hours. Prerequisite(s): Limited to lower division students. Discussion of historical and current issues in environmental and resource sciences. Lectures, reading and field trips will provide background for selected topics. Effective: 1997 Winter Quarter.

**SAS 090B—Observing and Writing in Biology (2)**
Laboratory—1 hour; Seminar—1 hour; Term Paper. Students will observe the interactions between microscopic organisms, conduct simple laboratory experiments, describe and analyze observations and discuss scientific observations and writing. Effective: 1997 Winter Quarter.

**SAS 090E—Biotechnology—a New Era, a New Struggle (2)**
Seminar—2 hours. Animal biotechnology and its applications. Discussion topics include potential societal impacts of various technologies, factors shaping public opinion, and ethical and moral questions arising from new biotechnology applications. Effective: 2001 Fall Quarter.

**SAS 090F—Food Distribution in a Hungry World (2)**
Seminar—2 hours. Class size limited to 15 students. The biological, technological, environmental, and socioeconomic factors related to food distribution systems at local, regional, national, and international levels. The potential for increasing world food supply by reducing losses between harvest and consumption. Effective: 2001 Fall Quarter.

**SAS 090G—Science, Society and the Environment (2)**
Seminar—2 hours. Contemporary environmental issues, scientific approaches to addressing these issues, and accompanying societal and ethical considerations. Effective: 2001 Fall Quarter.

**SAS 090X—Lower Division Seminar (1-4)**
Seminar—1-4 hours. Prerequisite(s): Consent of Instructor. Lower division standing. Limited enrollment. Examination of a special topic in Science and Society through shared readings, discussions, written assignments, or special activities such as fieldwork, laboratory work, etc. May be repeated for credit. Effective: 1997 Winter Quarter.

**SAS 092—Internship in Science and Society (1-12)**
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Lower division standing. Supervised internship on and off campus, in the community, or in institutional settings. (P/NP grading only.) Effective: 1997 Winter Quarter.

**SAS 097T—Tutoring in Science and Society (2-3)**
Discussion/Laboratory—6-9 hours. Prerequisite(s): Consent of Instructor. Lower division standing; completion of course being tutored. Tutoring in undergraduate Science and Society courses. Assisting with leading discussion groups under supervision of instructor(s) and teaching assistants. Acting as liaison between the students and course instructor(s) to foster effective communication and interaction. May not be repeated. (P/NP grading only.) Effective: 1998 Fall Quarter.

**SAS 098—Directed Group Study (1-5)**
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.
SAS 099—Special Study for Undergraduates (1-5)
Discussion—3-15 hours. Prerequisite(s): Consent of Instructor. Lower division standing. (P/NP grading only.)
Effective: 1997 Winter Quarter.

SAS 109—Environmental Change, Disease and Public Health (4)
Lecture/Discussion—3 hours; Project (Term Project). Analysis of environmental changes from pre-history to the present and their influence on disease distribution, virulence and public health. Focus on critical study of many human-driven environmental changes and the accelerated transformation/spread of pathogens under globalization. Not open for credit to students who have taken HIS 109B. (Same course as HIS 109.) GE credit: SE, SL, SS, WC.
Effective: 2016 Fall Quarter.

SAS 110—Applications of Evolution in Medicine, Human Behavior, and Agriculture (4)
Discussion—1 hour; Lecture—2 hours; Term Paper. Prerequisite(s): BIS 002A; BIS 002B; BIS 002C Class size limited to 60 students. Applications of evolutionary biology in medicine, human behavior, and agriculture. Examination of the imprint of evolution on the human life cycle from conception to death. GE credit: SE, SL, WE. Effective: 2013 Fall Quarter.

SAS 120—Science and Contemporary Societal Issues (3)
Lecture/Discussion—3 hours. Prerequisite(s): Upper division standing. Study of a contemporary societal issue/problem emphasizing critical thinking with information drawn from several disciplines. Multiple instructors illustrate the necessity of an interdisciplinary and cooperative approach in solving important issues. Topic will vary. May be repeated up to 1 time(s). GE credit: SE, SS. Effective: 1997 Winter Quarter.

SAS 121—Global Poverty: Critical Thinking and Taking Action (4)
Discussion—1 hour; Lecture—3 hours. Social science and engineering analysis of causes and effects of world poverty and of policies to reduce it via economic growth, foreign aid, and community-level interventions, e.g., in potable water, sanitation, lighting, small scale energy, irrigation, health and microfinance. GE credit: SS, WC.
Effective: 2013 Fall Quarter.

SAS 130—Contemporary Leadership (4)
Lecture—3 hours; Seminar—1 hour. Prerequisite(s): Consent of Instructor. Class size limited to 40 students. Leadership, including issues, skills, and practices as they relate to individuals, organizations, diverse social settings and communities. Written and verbal communications, personality styles for collaborative work, and ethics. GE credit: OL. Effective: 2006 Fall Quarter.

SAS 145—Digital Communication in Agricultural, Environmental, and Human Sciences (3)
Lecture/Discussion—1.5 hours; Project (Term Project); Studio—1.5 hours. Prerequisite(s): Consent of Instructor. Use digital media to communicate a succinct, compelling story. In lecture, discussion and activities, create storyboards and scripts, use video, audio, and editing technology, and produce a short media-rich video to effectively convey a message. GE credit: VL. Effective: 2018 Fall Quarter.

SAS 190X—Science & Society Seminar (1-4)
Seminar—1 hour. Prerequisite(s): Consent of Instructor. Upper division standing. Class size limited to 20 students. In-depth examination at an upper division level of a special topic in Science and Society. Emphasis upon student participation in learning. May be repeated for credit. (P/NP grading only.) Effective: 2005 Fall Quarter.

SAS 192—Internship in Science and Society (1-12)
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Upper division standing. Supervised internship on or off campus, in the community, or in institutional settings. (P/NP grading only.) Effective: 1997 Winter Quarter.

SAS 197T—Tutoring in Science and Society (1-5)
Tutorial—3-15 hours. Prerequisite(s): Consent of Instructor. Upper division standing; completion of course being tutored or the equivalent. Tutoring of students in Science and Society courses. Assistance with discussion groups and laboratory sections under supervision of instructor. May be repeated for credit if tutoring another Science and Society course. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

SAS 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

SAS 199—Special Study in Science and Society (1-5)
Variable. Prerequisite(s): Consent of Instructor. Upper division standing. (P/NP grading only.) Effective: 1997 Winter Quarter.
SAS 298—Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. May be repeated for credit when topic differs. May be repeated for credit. (S/U grading only.) Effective: 1998 Fall Quarter.

SAS 299—Graduate Research (1-12)
Variable. Prerequisite(s): Consent of Instructor. Graduate student. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 1998 Fall Quarter.

SAS 390—Teaching Methods in Science and Society (1)
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Graduate level. Practical experience in methods and problems related to teaching Science and Society courses. Discussion of critical pedagogies specific to teaching of science-societal issues, preparing for and conducting discussion sessions, analyses of texts and supporting material, formulation of assignments, exams. May be repeated for credit. (S/U grading only.) Effective: 1998 Fall Quarter.

Science & Technology Studies

Science & Technology Studies | STS A.B.
(John of Letters and Science)

Colin Milburn, Ph.D., Program Director

Program Office. 101 Young Hall; stsadvising@ucdavis.edu; http://sts.ucdavis.edu

Faculty. http://sts.ucdavis.edu/directory-of-people/sts-faculty

The Major Program

The Science and Technology Studies (STS) major brings the perspectives of the humanities and social sciences to bear on the analysis and synthesis of science, technology, and medicine. It considers science, technology, and medicine, in tandem with their social, political, and economic contexts. The major combines history, philosophy, anthropology, sociology, cultural studies, environmental studies, literature and media studies, as well as law and business studies to address the impacts and implications of science, technology, and medicine. The major allows students to pursue a broader understanding of science than is available within a traditional science major, and it provides important skills for interpreting science, technology, and medicine in relation to society and culture.

The Program. Graduation with a degree in Science and Technology Studies requires completion of courses in the social sciences, the humanities, and the natural sciences - courses in STS. Upper-division work includes twelve units from each of two different STS concentration ("modules") and twelve units (plus prerequisites) providing depth, concentration, and field work in the sciences. The STS modules are: (1) Cultural Studies of Science and Technology; (2) Ethics, Values, and Science Policy; (3) History and Philosophy of Science; and (4) Medicine, Society, and Culture. Courses in the modules require careful selection to make the best use of the STS major. Prerequisites for courses in the sciences can be extensive and may require substantial advance planning. Students are encouraged to take advantage of faculty and staff advising to develop their plans of their study.

Career Alternatives. The STS major enables students to analyze science and allied practices from historical, philosophical, sociological, political, anthropological, and cultural perspectives. STS prepares students for careers that address the broader ramifications of science, technology and medicine. STS majors often pursue careers in health care and medicine, law, journalism, public policy, economics, government, media and technology industries, science education, non-profit health organizations, libraries and museums, public health administration, management consultant, and teaching. STS majors are also well prepared for advanced research careers in the sciences, the humanities, and the social sciences.

Major Advisor. See staff advisors in 101 Young Hall; stsadvising@ucdavis.edu; 530-752-5104; http://sts.ucdavis.edu/undergraduate/advising-1

Faculty Advisor. The current Director of STS is also available for advising by appointment.

Choose twelve units each from two of the following four modules:

1. **Cultural Studies of Science and Technology:**
   - AMS 101G Special Topics: New Directions in American Culture Studies | 4
   - AMS 158 Technology and the Modern American Body                       | 4
   - CRD 118 Technology and Society                                        | 4
   - CRD 162 People, Work and Technology                                   | 5
   - HIS 139A Medieval and Renaissance Medicine                           | 4
   - HIS 139B Medicine, Society, and Culture in Modern Europe             | 4
   - STS 108 Intellectual Property in Science                             | 4
   - STS 109 Visualization in Science: A Critical Introduction            | 4
   - STS 120 Religion, Magic and Science                                  | 4
   - STS 130A From Natural History to the History of Nature               | 4
   - STS 131 Darwin                                                       | 4
   - STS 150 Gender and Science                                           | 4
   - STS 160 Ghosts of the Machine: How Technology Rewires our Senses     | 4
   - STS 162 Surveillance Technologies and Social Media                   | 4
   - STS 165 Built Environments                                           | 4
   - STS 173 Science Fiction                                              | 4
   - STS 176 Sociology of Knowledge, Science, and Scientific Knowledge   | 4
   - SOC 150 Criminology                                                  | 4
   - SOC 175 Mass Communication                                            | 4

2. **Ethics, Values, and Science Policy:**
   - ARE 120 Agricultural Policy                                         | 4
   - ARE 147 Resource and Environment Policy Analysis                    | 3
   - AMS 125 Corporate Cultures                                          | 4
   - CMN 170 Digital Technology and Social Change                        | 4
   - ECS 188 Ethics in an Age of Technology                              | 4
   - ESP 165 Climate Policy                                              | 3
   - HIS 185B History of Technology in America                           | 4
   - PHI 116 Ethical Theories                                            | 4
   - PHI 120 Environmental Ethics                                        | 4
   - PHY 160 Environmental Physics and Society                           | 3

**Note:** Although a course may be listed in more than one module, that course may satisfy only one requirement.

### Science Electives

Choose twelve units, at least eight of which must be from upper division courses, from the Approved Science Electives list at [http://sts.ucdavis.edu/undergraduate/sts-major-requirements](http://sts.ucdavis.edu/undergraduate/sts-major-requirements). Unit totals will vary with required prerequisites. Note: Students are strongly advised to choose science elective courses in consultation with faculty or staff advisor. Some courses in some areas may require prerequisites too extensive to be used for the STS major.

Total: 60-80

**Science & Technology Studies | STS Courses**

**Courses in STS:**

**STS 001—Introduction to Science, Technology and Medicine Studies (4)**

Discussion—1 hour; Lecture—3 hours. History, philosophy, sociology, politics, and cultural studies of science, technology, and medicine. Emphasis on a broad range of perspectives. GE credit: SS, WE. Effective: 1998 Fall Quarter.
STS 002—Introduction to the History of Science and Technology (4)
Discussion—1 hour; Lecture—3 hours. Introduction to topics and methods of the history of science and technology. Emphasis on understanding the role of science and technology in the modern world through a long-term historical perspective. (Same course as HIS 002.) GE credit: AH, SL, SS, WC, WE. Effective: 2017 Fall Quarter.

STS 011—Science on Trial: Law, Science, and Technology in the United States (4)

STS 016—Sex, Science, & Society (4)
Discussion—1 hour; Lecture—3 hours. Survey of the relationship between sex, science, and society in the history of the modern world. Emphasis on the development of scientific ideas about the human body against broader social, cultural, and political trends and from a global viewpoint. (Same course as HIS 016.) GE credit: AH, DD, SL, WC, WE. Effective: 2019 Fall Quarter.

STS 020—Methods in Science, Technology and Medicine Studies (4)
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): STS 001 recommended. Methodological issues concerning the historical, philosophical, sociological, ethical, and political analysis of science, technology, and medicine. Detailed case studies to illustrate different methods of analysis. GE credit: SS, WE. Effective: 1998 Fall Quarter.

STS 032—Drugs, Science and Culture (4)
Discussion—1 hour; Lecture—3 hours. Drugs, politics, science, society in a cultural perspective: emphasis on roles of science, government and the media in shifting attitudes toward alcohol, marijuana, Prozac and other pharmaceuticals; drug laws, war on drugs and global trade in sugar, opium, cocaine. (Same course as ANT 032.) GE credit: SS, VL, WE. Effective: 2008 Fall Quarter.

STS 040A—Media History 1, Gutenberg to Oppenheimer (4)
Discussion—1 hour; Extensive Writing; Film Viewing—2 hours; Lecture—3 hours. History of Media to 1945, with particular focus on mechanically reproduced mass media technologies including the printing press, the newspaper, photography, cinema, radio and early computing technology. Analysis of inter-related cultural and political topics. (Same course as CTS 040A.) GE credit: AH, OL, SS, VL, WE. Effective: 2014 Fall Quarter.

STS 040B—Media History 2 1945-Present (4)
Discussion—1 hour; Extensive Writing; Film Viewing—2 hours; Lecture—3 hours. Prerequisite(s): STS 040A History of media from 1945 to present, with particular focus on the development of the computer, digital network and internet technologies in the context of other media infrastructures like radio, television and satellite networks. Analysis of inter-related cultural/political topics. (Same course as CTS 040B.) GE credit: AH, OL, SS, VL, WE. Effective: 2015 Winter Quarter.

STS 050—Ancient Science (4)
Discussion—1 hour; Lecture—3 hours. Study of science in ancient Greece and Rome; consideration of its social context; concentration on the basic concepts of physics the world of medicine and biology the history of mathematics and the practices of astronomy astrology and meteorology. (Same course as CLA 050.) GE credit: AH, WC, WE. Effective: 2016 Fall Quarter.

STS 051—Ancient Medicine (4)
Discussion—1 hour; Lecture—3 hours. Medicine in ancient Greece and Rome; physiological conceptions of the body within scientific and social frameworks; exploration of sanitation technology and health in antiquity; medical treatment of the female body; medicine and the economy. (Same course as CLA 051.) GE credit: AH, WC, WE. Effective: 2016 Winter Quarter.

STS 092—Internship (1-12)
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Work experience off and on campus in all subject areas offered in the program in Science & Technology Studies under the supervision of a member of the faculty. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 2006 Fall Quarter.

STS 098—Directed Group Study (1-5)
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. May be repeated for credit. (P/NP grading only.) GE credit: SS. Effective: 2006 Fall Quarter.

STS 099—Special Study for Undergraduates (1-5)
Variable—3-15 hours. (P/NP grading only.) Effective: 2006 Fall Quarter.
STS 101—Introduction to Data Studies (4)
Lecture/Discussion—4 hours. Introduction to basic data science concepts, defining problems, clarifying questions, identifying stakeholders, caring for and cleaning data, interviewing techniques, structuring presentations, use of Excel for data problems. GE credit: SS. Effective: 2017 Spring Quarter.

STS 108—Intellectual Property in Science (4)
Lecture/Discussion—4 hours. Prerequisite(s): STS 001; Or other Social Science or Humanities writing course. Historical and conceptual framework for contemporary debates about intellectual property and science. Topics include US patent system and copyright law, interaction between patents and industrial policy, credit in academic and industrial science, role of IP in global knowledge politics. GE credit: ACGH, SS, WE. Effective: 2011 Spring Quarter.

STS 109—Visualization in Science: A Critical Introduction (4)
Extensive Writing/Discussion—1 hour; Lecture—3 hours. Prerequisite(s): STS 001 or STS 020 or ANT 002 recommended. Anthropological approaches to scientific visualization techniques, informatics, simulations. Examination of different visualization techniques toward understanding the work involved in producing them, critical assessment of their power and limits, especially when visualizations are used socially to make claims. (Same course as ANT 109.) GE credit: SS, VL, WE. Effective: 2016 Fall Quarter.

STS 110—Computing, Data, & Law in the United States (4)
Lecture/Discussion—3 hours; Term Paper. Introduction to the problems in American law and policy borne out of the creation and use of information technologies. Topics include intellectual property, corporate law, privacy, and emerging problems surrounding big data. GE credit: ACGH, SS, WE. Effective: 2018 Winter Quarter.

STS 112—Visualizing Society with Data (4)
Lecture/Lab—3 hours; Term Paper. Analysis and visualization of historical and contemporary data about populations and societies using R. Critical exploration of visual communication of information about people over time and critical assessment of role of data collection and analysis in societies. GE credit: DD, QL, SS. Effective: 2018 Winter Quarter.

STS 113—Business and Technology in the United States: From Electricity to E-Commerce (4)
Lecture/Discussion—3 hours; Term Paper. Historical introduction to the joint development of business and technology in the United States from the late nineteenth century to the present day. GE credit: ACGH, SS, WE. Effective: 2018 Spring Quarter.

STS 114—The Global Information Age (4)
Lecture/Discussion—3 hours; Term Paper. Introduction to the global spread of information technologies like computers and smartphones. Special focus on their social, cultural, and commercial impact. GE credit: SS, WC, WE. Effective: 2019 Spring Quarter.

STS 115—Data Sense and Exploration: Critical Storytelling with Analysis (4)
Discussion/Laboratory—1 hour; Lecture/Discussion—3 hours. Data science and the communication of data insights through critical storytelling. Attention to the historical and social contexts of data analysis, emphasizing narrative, visualization, and exploration. Introduction to the R computing environment for data analysis. GE credit: OL. Effective: 2018 Fall Quarter.

STS 120—Religion, Magic and Science (4)
Extensive Writing; Lecture—3 hours. Religion, magic, and science from the middle ages to the present. Contrast between modern scientific methodology and religious and magical thinking. (Same course as RST 120.) GE credit: AH, OL, VL, WC. Effective: 2005 Fall Quarter.

STS 121—Special Topics in Medical Anthropology (4)
Lecture/Discussion—4 hours. Prerequisite(s): ANT 002 recommended. Introduction to critical medical anthropology. Topics include anthropological analysis of bio-medicine, psychiatry, systems of knowledge and healing, the body, emotions, and clinical encounters in a cross-cultural perspective. (Same course as ANT 121.) GE credit: SS, WC, WE. Effective: 2016 Fall Quarter.

STS 122—Health and Medical Technologies (4)
STS 129—Health and Medicine in a Global Context (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): ANT 002 recommended. Recent works in medical anthropology and the science studies of medicine dealing with social and cultural aspects of global health issues such as AIDS, pandemics, clinical trials, cultural differences in illnesses, diabetes, organ trafficking, medical technologies, illness narratives, and others. (Same course as ANT 129.) GE credit: SS, WC, WE. Effective: 2016 Fall Quarter.

STS 130A—From Natural History to the History of Nature (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): HIS 135A recommended. Evolution and demise of natural history as a discipline from Aristotle to Linnaeus. Considers ancient views of nature and its Renaissance rediscovery; the emergence of biology, botany, geology, and zoology; the history of taxonomy and classification. GE credit: AH, SE, WE. Effective: 1997 Winter Quarter.

STS 130B—History of Modern Biology (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): STS 130A recommended. Development of modern biology from pre-Darwinian roots to the present. Considers emergence of modern biological specialities and consolidation of biological theory around evolutionary ideas. History of allied fields such as genetics, paleontology, embryology, ecology, systematics and molecular biology. GE credit: AH, SE, WE. Effective: 1997 Winter Quarter.

STS 131—Darwin (4)
Lecture—3 hours; Term Paper. Prerequisite(s): Upper division standing or consent of instructor. Students will explore the life and times of Charles Darwin and will trace the development of evolutionary thinking before and after the Origin of Species to appreciate its place in Victorian society and in the corpus of Darwin’s thought. GE credit: AH, SE, WE. Effective: 1997 Winter Quarter.

STS 150—Gender and Science (4)
Lecture/Discussion—3 hours; Term Paper. An interdisciplinary approach to the relations between gender and science. Topics include the biological and cultural construction of sexual difference, the role of women as practitioners of science, and feminist approaches to science. GE credit: ACGH, DD, SS, WE. Effective: 1997 Winter Quarter.

STS 151—Media Theory (5)
Discussion—1 hour; Extensive Writing; Film Viewing—3 hours; Lecture—2 hours. Critical and theoretical approaches to the emergence of new technologies since the invention of photography. Examine various approaches to media (formalist, semiotic, structuralist, Frankfurt School, cybernetics, visual and gamer theory). (Same course as CTS 150.) GE credit: AH, OL, SS, VL, WE. Effective: 2014 Fall Quarter.

STS 152—Sounding Data: Critical Approaches to Sonification (4)
Lecture/Discussion—3 hours; Term Paper/Discussion. Critical and creative approaches to auditory data and display in art, science, and technology. Practical introduction to sonification techniques through sound studies and sensory ethnography. Heuristic listening and collaborative sound design. GE credit: SS, WE. Effective: 2017 Spring Quarter.

STS 160—Ghosts of the Machine: How Technology Rewires our Senses (4)
Extensive Writing/Discussion—1 hour; Lecture—3 hours. Historical, aesthetic and critical approaches to how information technologies produced ghost effects or a sense of terror in response to new media like the photograph, gramophone, film, typewriter, computer, Turing Machine. Focus on technological media transforms sense perception. (Same course as TCS 160.) GE credit: ACGH, AH, SS, VL, WE. Effective: 2013 Fall Quarter.

STS 161—Time: Mechanism and Measurement (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): STS 001 Cultural concepts of time; units and instruments of time measurement; historical differences in the social organization of time; and time measurement in twentieth-century science. GE credit: SS, WE. Effective: 2005 Fall Quarter.

STS 162—Surveillance Technologies and Social Media (4)
Film Viewing—3 hours; Lecture—3 hours; Term Paper. Prerequisite(s): STS 020 or TCS 001 Study of the ubiquitous presence of CCTV, face recognition software, global tracking systems, biosensors, and data mining practices that have made surveillance part of our daily life. Exploration of the boundary between security and control, information and spying. (Same course as CTS 162.) GE credit: ACGH, AH, OL, SS, VL, WE. Effective: 2015 Winter Quarter.

STS 163—History of Communication Technologies (4)
Lecture/Discussion—3 hours; Term Paper. History of communication technologies from the late Middle Ages to the 20th century. Questions of technology, knowledge, power and culture. Particular attention to questions about information and truth. GE credit: SS, WE. Effective: 2005 Fall Quarter.
STS 164—Writing Science (4)
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): STS 001 or ENL 003; Or equivalent. Texts and writing practices in the production of scientific knowledge. Surveys the literary structure of scientific arguments; history of scientific genres; rhetoric and semiotics in scientific culture; graphical systems in the experimental laboratory; narratives of science, including science fiction. (Same course as ENL 164.) GE credit: AH, SL, WE. Effective: 2011 Fall Quarter.

STS 165—Built Environments (4)
Extensive Writing; Lecture—3 hours. Built environments, which are designed to support forms of life. Their role as carriers of cultural memory and in turning knowledge of nature into social assets. Historical constellations of knowledge, social order, and power. GE credit: SS. Effective: 2005 Spring Quarter.

STS 172—Video Games and Culture (4)
Extensive Writing/Discussion—1 hour; Lecture—3 hours. Prerequisite(s): STS 001 or TCS 001 or ENL 003; Or equivalent of any. Critical approaches to the study of video games, focusing on formal, historical, and cultural modes of analysis. History of software and hardware in North American and global contexts. Relations of games to society, politics, economics, literature, media, and the arts. (Same course as CTS 172 and ENL 172.) GE credit: ACGH, AH, SS, VL. Effective: 2014 Fall Quarter.

STS 173—Science Fiction (4)
Extensive Writing; Lecture/Discussion—3 hours. Prerequisite(s): STS 001 or ENL 003; Or equivalent. The literary modes and methods of science fiction. Representative texts, authors, and themes of the genre - e.g., time travel, alternative universes, and utopias. Relations of science fiction to science, philosophy, and culture. (Same course as ENL 173.) GE credit: AH, WE. Effective: 2008 Winter Quarter.

STS 175—Laboratory Studies Lab (4)
Discussion/Laboratory—4 hours. Prerequisite(s): Upper division standing or consent of instructor. Hands-on training in Science and Technology Studies fieldwork, interviewing, archival research and data analysis. Review of laboratory studies literature, informed consent procedures, ethics, and care of the data. Individual and group projects possible. GE credit: SS, WE. Effective: 2011 Fall Quarter.

STS 176—Sociology of Knowledge, Science, and Scientific Knowledge (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended. Social, cultural, and historical dimensions of knowledge, especially scientific knowledge. Problems, methods, and theory in sociology of scientific knowledge. Laboratory and historical case studies. Scientific and technical knowledge in institutional and organizational contexts. (Same course as SOC 176.) GE credit: SS. Effective: 2016 Fall Quarter.

STS 180—Topics in History and Philosophy of Science (4) Review all entries
Seminar—3 hours; Term Paper. Prerequisite(s): Course in History and Philosophy of Science or other course-work relevant to topic. In depth treatment of selected topics in the history and philosophy of science. Possible topics include history of modern physics, history of molecular biology, science and society, science and power, scientific explanation, technology and culture, theory testing. May be repeated for credit consent of instructor. GE credit: SS. Effective: 2004 Fall Quarter.

STS 180—Topics in Science and Technology Studies (4) Review all entries
Seminar—3 hours; Term Paper. Prerequisite(s): Course in Science and Technology Studies or other course-work relevant to topic. In-depth treatment of selected topics in anthropology, history, philosophy, and sociology of science and related fields. Possible topics include science and society, science and power, scientific explanation, technology and culture, theory testing. May be repeated for credit when content varies. GE credit: SS. Effective: 2018 Fall Quarter.

STS 190—Seminar in Science, Technology and Medicine Studies (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Open to junior and senior Science and Technology Studies majors only. Intensive reading, discussion, research and writing by small groups in selected topics of science, technology, and medicine studies scholarship. Emphasis on individual research projects. Effective: 1998 Fall Quarter.

STS 192—Internship (1-12)
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Work experience off and on campus in all subject areas offered in the program in Science & Technology Studies under the supervision of a member of the faculty. May be repeated up to 3 time(s) for up to 12 units of credit. (P/NP grading only.) Effective: 2006 Fall Quarter.
STS 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

STS 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

STS 200—Theories and Methods in Science & Technology Studies (4)
Seminar—3 hours; Term Paper. Theories and methods of Science & Technology Studies as a field of critical and empirical scholarship, and examination of various contexts in which STS has emerged worldwide. May be repeated up to 1 time(s) with consent of instructor. Effective: 2014 Fall Quarter.

STS 205—Contemporary Issues in Science and Technology Studies (4)
Discussion—3 hours; Term Paper. Recent topics, debates, and innovative methods in Science and Technology Studies. Issues may include the governance of technoscience, science and media, data studies, indigenous knowledge, science and globalization, citizen science, new and emerging technologies. May be repeated for credit when topic differs. Effective: 2019 Winter Quarter.

STS 210—Digital Technologies: History and Theory (4)
Discussion—3 hours; Term Paper. Introduction to the history and theory of digital technologies. Human-machine interaction, cybernetics, software studies, and global networking. Effective: 2018 Spring Quarter.

STS 250—History and Philosophy of Science (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Interdisciplinary seminar in the history and philosophy of science. Focueses on issues such as historiography, methodology, and the conceptual foundations of science. May be repeated for credit with consent of instructor. May be repeated for credit. Effective: 1997 Winter Quarter.

STS 298—Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

STS 299—Research (1-12)
Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

STS 396—Teaching Assistant Training Practicum (1-4)
Variable. Prerequisite(s): Graduate standing. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

Science Teaching Credential

Science Teaching Credential | Science Teaching Credential Information
(College of Letters and Science)
Michael E. Oskin, Ph.D., Chairperson of the Department
David A. Osleger, Ph.D., Vice-Chairperson, Undergraduate Program
Sujoy Mukhopadhyay, Ph.D., Vice-Chairperson, Graduate Program

Department Office. 2119 Earth and Physical Sciences Building: 530-752-0350; http://www.geology.ucdavis.edu

Science Teaching Credential. Students who might wish to become a teacher should consult an advisor in the Cal Teach/Mathematics and Science Teaching Program (CalTeach/MAST) at http://mast.ucdavis.edu/ at their first opportunity in order to combine the prerequisites for a credential program with general education requirements.

The following was incorrectly included in the 2018-2019 catalog.

Science Teaching Credential. Students who might wish to become a teacher should consult an advisor in the Mathematics and Science Teaching Program (MAST; http://mast.ucdavis.edu) at their first opportunity in order to combine the prerequisites for a credential program with General Education requirements. MAST also offers seminars that give participants required experience in elementary, middle school, and high school classrooms. Students hoping to teach Earth and Planetary Science may prepare by satisfying the requirements for the B.S. degree in Natural Science (http://naturalsciences.ucdavis.edu) or the A.B. degree in Geology (77-79 units) and 36 additional units of science as outlined below. Students may also prepare for the science credential by completing the B.S. degree in Geology (107-111 units) and an additional 24 units as indicated by the asterisks (*) shown in the requirements.
Sexuality Studies Minor; Gender, Sexuality & Women's Studies

Sexuality Studies Minor; Gender, Sexuality & Women's Studies | Sexuality Minor

(College of Letters and Science)

http://gsws.ucdavis.edu/sexualitystudies

The interdisciplinary minor in Sexuality Studies offers students a unique opportunity to study the concept of sexuality—including sexual identities, desires, and practices—by examining its changing meanings and effects across different political, historical, and cultural landscapes. At UC Davis, Sexuality Studies pays particular attention to how gender, race, class, nation, empire, colonialism, and globalization shape popular understandings of sexuality, and how these understandings of sexuality in turn affect social, political, and economic relations of power.

The minor is sponsored by the Gender, Sexuality & Women's Studies Department.

Advising. Gender, Sexuality & Women's Studies Department, 1200 Hart Hall; 530-752-6429

Restrictions

(A) Students may take no more than one lower division course to satisfy requirements for the minor. (B) To satisfy the interdisciplinary component of the minor, students must either split their coursework roughly equally between two programs/departments or take coursework in at least three programs/departments. (C) Students may petition the minor advisor to accept Special Topics courses and Capstone/Senior Seminars as additional courses, as long as their course of study follows the minor’s lower-division restriction and interdisciplinary requirements. (D) Students may petition the minor advisor to accept up to four units of registered individual study, group study or internship towards the minor program, as long as their course of study follows the minor’s lower-division restriction and interdisciplinary requirements.

Total: 18-20
Social and Ethnic Relations Minor | Social & Ethnic Relations Minor

(College of Letters and Science)

The interdisciplinary minor in Social and Ethnic Relations explores the racial, ethnic, class and gender aspects of human relations in the modern world. Students study human societies and cultures from a multi-ethnic perspective and across established academic departmental lines. The minor is jointly sponsored by African American and African Studies, Asian American Studies, Native American Studies, and Women and Gender Studies.

Advising. Contact the Program in Asian American Studies, 3131 Hart Hall, ethnicstudiessao@ucdavis.edu.

Social Sciences

Social Sciences | Social Sciences Information
The Program of Study
The Program in Social Sciences promotes the development of innovative curricular initiatives across the social sciences, including offering broadly conceived, integrative undergraduate-level and graduate-level courses. Faculty affiliated with the program are often engaged in interdepartmental teaching and research.

Social Theory & Comparative History
This designated emphasis was disestablished effective September 19, 2011.

Courses in STH:

STH 250—Research in Social Theory and Comparative History (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Admission to Social Theory and Comparative History Designated Emphasis. Theoretically informed research in comparative history. Students read exemplary works and learn to frame their own research projects. Presentations include Center for History, Society, and Culture faculty and visitors discussing current research. Effective: 1997 Winter Quarter.

STH 290—Advanced Topics in Social Theory and Comparative History (4)
Seminar—3 hours; Term Paper. Prerequisite(s): HIS 204 or SOC 242A; and Consent of Instructor. Interdisciplinary study of particular substantive problems in social theory and comparative history. Topics vary. Effective: 1997 Winter Quarter.

STH 295—Advanced Group Research in Social Theory and Comparative History (1)
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Participation in research workshops sponsored by the Center for Comparative Research for History, Society, and Culture. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

STH 296—Theory and Society Journal Editorial Workshop (1-4)
Independent Study—3 hours; Workshop—1 hour. Reading and offering workshop critiques of papers submitted for publication. Reading and discussion of other relevant work in history and the social science. May be repeated up to 36 unit(s) with consent of instructor. (S/U grading only.) Effective: 2000 Fall Quarter.

The Major Programs
Sociology is the study of human society in all its manifestations. Its aim is to discover the process and structure of human interaction, to identify the main forces that sustain or weaken social groups, and to determine the conditions that transform social life. Sociology, like any science, is a disciplined, intellectual quest for knowledge about the fundamental nature of things.

Students selecting the Sociology major may choose from four options in the major. The General Sociology emphasis allows students to obtain a broad understanding of the concepts, methods, and theories of sociology. Students with a special interest in the areas of Law and Society or Social Services may choose a more specialized program of courses and practical experience within the sociology major. The Comparative Studies and World Development emphasis provides a sociological perspective on social and economic changes throughout the world, with a stress on relationships between “developed” and “developing” societies. In their junior year, students are encouraged to consider the Education Abroad Program—especially one in a developing country.

Career Opportunities. In the Sociology major, the General option is for students desiring a solid liberal arts education as well as those interested in graduate work in the social sciences. Options in Law and Society or Social Services prepare students for careers in such areas as law, corrections, social work or counseling. The Comparative Studies and World Development emphasis prepares students for graduate training leading to careers in international fields.

Major Advisor. Consult the Departmental Advising office in 1282 Social Sciences and Humanities Building or see http://sociology.ucdavis.edu/undergraduate/advising/advising-office.

Honors Program. An Honors Program is available to Sociology and Sociology-Organizational Studies majors who have demonstrated excellence in their field of study. To be eligible for the program, students must have a grade-point average of 3.500 in the major and the recommendation of a faculty sponsor familiar with their work. In addition to meeting the standard major requirements, students are encouraged to take a 199 course with their sponsor in the spring of their third year, prior to the seminar courses. Honors students write an honors thesis and take two quarters (eight units) of Honors coursework (SOC 194H). Successful completion of the Honors Program, when combined with College GPA requirements, enables the student to graduate with High or Highest Honors. Students should apply for the program before they begin their fourth year.

Sociology | SOC; Organizational Studies A.B.

(College of Letters and Science)
Ryken Grattet, Ph.D., Chairperson of the Department

Department Office. 1283 Social Sciences and Humanities Building; 530-752-0782; http://sociology.ucdavis.edu
Faculty. http://sociology.ucdavis.edu/people

The Major Programs

The Organizational Studies (OS) major is designed to provide a broad understanding of the political, social, and economic organizations that make up modern society. Whether thinking about the structure of government bureaucracies, legal systems, economic markets, educational systems, or workplaces, OS offers an interdisciplinary view from which to understand the contemporary world in which complex and formal organizations are ubiquitous. Formal organizations influence how we feel, what we think, and what we can accomplish. As such, the OS major provides both a basic understanding of the field as well as enhancing your ability to pursue their more specialized career interests.

At the upper-division level, you can chose one of four specialized tracks, any one of which will help to better identify and inform your career goals—whether that be in postgraduate education or a specific type of job—and pursue them after graduation. Whether you select the “Business and Society,” “Public Policy and Social Welfare,” “Nonprofit and Social Change Organizations” or the “Student-Initiated Theme” track, once completed you will have a unique and valuable area of expertise.

Students who plan to enroll in graduate programs in business, public policy, public administration, and education are advised to develop proficiencies in statistics and calculus (such as the MAT 016 series).

Track 1: The Business and Society track is for students who hold an interest in or wish to pursue careers in management or corporate professions and who are interested in economic institutions and commerce, management and administration, work and workplaces, and labor markets. Courses in this cluster analyze businesses, firms, corporations, and markets—nationally and globally—and their place in society, historically and in the present, from a critical perspective. The BAS examines the origins of business corporations and economic markets (and relations); the power relations, inequalities, and stratification associated with contemporary business organizations (firms and corporations); why business organizations rely on particular organizational structures to increase their efficiencies and effectiveness; and overviews of the role business and regulatory organizations play in the economy.

Postgraduate training and careers that follow from this cluster:

- Professional training: MBA programs; mediation programs; law; public policy
- Graduate training: sociology; economics; Ph.D. business school programs (with concentrations in organizational behavior, entrepreneurship, industrial relations, economic analysis, policy analysis, labor relations)
- Career paths: managers, human resources professionals, project managers, diversity personnel, corporate social responsibility personnel, lobbyists, business entrepreneur, labor relations specialists, creative professionals, research staff at policy institutes such as Economic Policy Institute, Urban InstituteE2

Track 2: Public Policy and Social Welfare (PPSW)

The PPSW track is for students who hold an interest in or plan to pursue careers in government and/or social welfare organizations. Courses in this track emphasize how formal organizations and institutions emerge to address key social problems and the policies they generate and utilize to solve them; the unique challenges that government and other policy oriented organizations confront in addressing and managing public problems and promoting the common good; and the dynamics and special circumstances that specific organizational/institutional policy fields such as education, health care, and social welfare confront in seeking to fulfill their charge.

Postgraduate training and careers that follow from this track:

- Professional training: programs in public policy, public administration, government, social welfare, counseling, public affairs, law, leadership institutes, community psychology
• Graduate training: Ph.D. programs in sociology, political science, public administration, education, educational leadership
• Career paths: consultants, social service workers and administrators, staff at policy institutes and think tanks, program evaluation and development, nonprofit administrators, lawyers, teachers, research staff at policy institutes and think tanks, leadership positions in education, including higher education, counselors

**Track 3: Nonprofit and social movement organizations (NSMO):**

The NSMO track is for students who wish to contribute to local, national, and global transformation(s), to social justice, and/or who plan to pursue a career in the non-profit sector focusing on addressing specific causes and fulfilling social agendas. Students in this cluster may have particular interest in understanding the role that informal and formal organizations—from well-organized and mature non-profits to emergent social movement organizations—play in responding to and affecting social change. This cluster familiarizes students with the unique capacity of organizations to change the world but simultaneously, the barriers, limitations, and challenges to doing so.

Postgraduate training and careers that follow from this track:

• Professional training: programs in community development, regional development, urban development, public policy, public administration, Master's programs in social change, law and social change, business programs with a concentration in corporate responsibility
• Graduate training: programs sociology, history, labor studies, development, international relations, political science
• Career paths: working in nongovernmental organizations around the world (NGO's), joining the Peace Corps or Teach America; teaching in other countries; jobs in any number of areas that are the focus of social change and social justice efforts (energy, housing, labor, community and regional development, health, corporate social responsibility); working in for-profit companies in the areas of energy, corporate social responsibility, work/family support programs, research staff at policy institutes and think tanks

**Track 4: Student-Initiated Track:**

Select a combination of five courses from any of the above 3 themes (at least three courses should be from SOC). Students choosing this track must meet with a SOC undergraduate advisor to obtain approval of selected courses.

**Major Advisor.** Consult the Departmental Advising office in 1282 Social Sciences and Humanities Building or see http://sociology.ucdavis.edu/undergraduate/advising/advising-office.

**Honors Program.** An Honors Program is available to Sociology and Sociology-Organizational Studies majors who have demonstrated excellence in their field of study. To be eligible for the program, students must have a grade-point average of 3.500 in the major and the recommendation of a faculty sponsor familiar with their work. In addition to meeting the standard major requirements, students are encouraged to take a 199 course with their sponsor in the spring of their third year, prior to the seminar courses. Honors students write an honors thesis and take two quarters (eight units) of Honors coursework (SOC 194H). Successful completion of the Honors Program, when combined with College GPA requirements, enables the student to graduate with High or Highest Honors. Students should apply for the program before they begin their fourth year.

---

**Sociology | SOC Courses**

**Courses in SOC:**

**SOC 001—Introduction to Sociology (5)**
Discussion—1 hour; Lecture—4 hours. Principles and basic concepts of sociology. The study of groups, culture, collective behavior, classes and caste, community and ecology, role, status, and personality. GE credit: ACGH, DD, SS. Effective: 1997 Winter Quarter.

**SOC 002—Self and Society (4)**
Discussion—1 hour; Lecture—3 hours. Exploration of how self and identity are formed and transformed by socialization and social interaction in relation to roles, groups, institutions, power, and social change. Consideration of how people make decisions, fall in love, and come to blows. GE credit: ACGH, DD, SS. Effective: 2015 Winter Quarter.

**SOC 003—Social Problems (4)**
Discussion—1 hour; Lecture—3 hours. General sociological consideration of contemporary social problems in relation to sociocultural change and programs for improvement. GE credit: ACGH, DD, SS. Effective: 1997 Winter Quarter.

**SOC 004—Immigration and Opportunity (4)**
Discussion—1 hour; Lecture—3 hours; Term Paper. Social and demographic analysis of immigration: motives and experiences of immigrants; immigration and social mobility; immigration, assimilation, and social change; multicultural societies. Detailed study of immigration into the U.S., with comparative studies of Europe, Australia, and other host countries. GE credit: ACGH, DD, SS, WC. Effective: 1997 Winter Quarter.

**SOC 005—Global Social Change: An Introduction to Macrosociology (4)**
Discussion—1 hour; Lecture—3 hours. Introduction to change and diversity in world history, including the United States. Examines population and family, technological change and economic development, power and status, culture and identity. GE credit: ACGH, SS, WC. Effective: 1997 Winter Quarter.

**SOC 006—Health and Illness (4)**
Discussion—1 hour; Lecture—3 hours. Introduction to the sociology of health and illness, including social determinants of health, social inequalities in health/health disparities, social construction of health, the organization of health care, and the politics of health care reform. GE credit: DD, SS. Effective: 2016 Fall Quarter.

**SOC 011—Sociology of Labor and Employment (4)**
Discussion—1 hour; Lecture—3 hours. Labor and employment issues in the contemporary United States with some use of historical and comparative materials. Topics will include strategies pursued by employers and employees, labor market discrimination and the role of social policies in shaping labor markets. GE credit: SS. Effective: 2006 Summer Session 1.

**SOC 012Y—Data Visualization in the Social Sciences (4)**
Laboratory—1.5 hours; Lecture—2 hours; Web Virtual Lecture—1.5 hours. Introduction to quantitative data across the social sciences (Communications, Political Science, Psychology, Sociology, and other disciplines). Transforming data, describing data, producing graphs, visual reasoning, and interpretations. (Same course as CMN 012Y, PSC 12Y, and POL 012Y.) GE credit: QL, VL. Effective: 2016 Spring Quarter.
SOC 025—Sociology of Popular Culture (4)

SOC 030A—Intercultural Relations in Multicultural Societies (3)
Discussion—1.5 hours; Lecture—1.5 hours. Macro-structural analysis of contemporary multicultural societies; immigration and assimilation in comparative perspective; social construction of racial and ethnic group identities; ethnicity and gender; group conflict and cooperation; controversies surrounding multiculturalism. First course in a two-course Multicultural Immersion Program. GE credit: ACGH, DD, SS. Effective: 2005 Fall Quarter.

SOC 030B—Intercultural Relations in Multicultural Societies (3)
Discussion—1.5 hours; Lecture—1.5 hours. Prerequisite(s): SOC 030A; or Consent of Instructor. Social-psychological analysis of personal experiences living in a multicultural society; conforming to or rejecting group identity or stereotypes; managing and reducing conflict; cross-cultural communication; promises and problems of diversity at UCD. Second course in a two-course Multicultural Immersion Program. GE credit: ACGH, DD, SS. Effective: 2005 Winter Quarter.

SOC 046A—Introduction to Social Research (4)
Discussion—1 hour; Lecture—3 hours; Project (Term Project); Term Paper. Examination of the methodological problems of social research. Selection and definition of problems of investigation, data-gathering techniques, and sampling. GE credit: SS. Effective: 1997 Winter Quarter.

SOC 046B—Introduction to Social Research (5)
Discussion—1 hour; Lecture—4 hours. Data-analysis techniques, measurement, scaling, multivariate analysis, and quantitative measures of association. GE credit: QL, SS. Effective: 2012 Fall Quarter.

SOC 090X—Lower Division Seminar (1-2)
Seminar—1-2 hours. Prerequisite(s): Consent of Instructor. Lower division standing. Limited enrollment. Examination of a special topic in sociology through shared readings, discussions, written assignments, or special activities such as fieldwork, laboratory work, etc. May not be repeated for credit. GE credit: SS. Effective: 1997 Winter Quarter.

SOC 098—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Primarily intended for lower division students. (P/NP grading only.) Effective: 1997 Winter Quarter.

SOC 099—Special Study for Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

SOC 100—Origins of Modern Sociological Theory (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended. Origins of modern sociological thought. Special emphasis on three major theorists from the classical tradition of nineteenth century European social thought: Karl Marx, Max Weber, and Emile Durkheim. GE credit: SS. Effective: 2016 Fall Quarter.

SOC 102—Society and Culture of California (4)
Discussion—1 hour; Lecture—3 hours; Term Paper. Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended. California's distinctive society and culture; sociological analyses of topical issues concerning diversity, environment, cities. GE credit: ACGH, DD, SS. Effective: 2016 Fall Quarter.

SOC 103—Evaluation Research Methods (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): SOC 001 or SOC 002 or SOC 003 recommended; SOC 046A and SOC 046B recommended. Surveys applications of research methods to the evaluation of social programs, primarily emphasizing methodological issues, e.g., research design and data collection; uses of evaluation research are also discussed and placed in theoretical context. Participation in an evaluation project. GE credit: SL, SS. Effective: 2016 Fall Quarter.

SOC 104—The Political Economy of International Migration (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): SOC 001, SOC 002, SOC 003, or SOC 004 recommended. Analysis of worldwide migration patterns, and social scientific theories of international and transnational migration. Focus in economical, political, and social impact of immigration and potential for international and regional cooperation. (Same course as IRE 104.) GE credit: SS, WC. Effective: 2016 Fall Quarter.
SOC 106—Intermediate Social Statistics (5)
Discussion—1 hour; Lecture—4 hours. Prerequisite(s): SOC 046B; or Consent of Instructor. Intermediate level course in statistical analysis of social data, emphasizing the logic and use of statistical measures, procedures, and mathematical models especially relevant to sociological analysis. GE credit: QL, SL, SS. Effective: 2016 Fall Quarter.

SOC 118—Political Sociology (4)
Lecture—3 hours; Project (Term Project); Term Paper/Discussion—1 hour. Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended. Relation of social cleavages and social cohesion to the functioning of political institutions; the social bases of local and national power structures; social sources of political movement, analysis of concepts of alienation, revolution, ideology, ruling class, and elite. GE credit: SS. Effective: 2016 Fall Quarter.

SOC 120—Deviance (4)
Lecture—3 hours; Term Paper/Discussion. Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended. Social structural sources, institutional practices and microprocesses associated with illegality, evil, disease, immorality, disability, racial and class differences, citizenship, and the body. Special emphasis on expert knowledge and the production and management of social difference. GE credit: SS. Effective: 2016 Fall Quarter.

SOC 122—Sociology of Adolescence (4)
Lecture—3 hours; Project (Term Project); Term Paper/Discussion—1 hour. Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended. Chronological age and social status; analysis of social processes bearing upon the socialization of children and adolescents. The emergence of youth cultures. Generational succession as a cultural problem. GE credit: SS. Effective: 2016 Fall Quarter.

SOC 123—American Society (4)
Discussion—1 hour; Lecture—3 hours; Project (Term Project); Term Paper. The demographic and social structure of American society and population, with emphasis on ethnic and class groups as bases for political and economic interest. Attention to selected current social controversies. GE credit: ACGH, DD, SS. Effective: 1997 Winter Quarter.

SOC 124—Education and Inequality in the U.S. (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended. Functions of schooling in contemporary U.S. society. Racial, ethnic, social class, and gender inequalities in student outcomes. Consideration of classic and current controversies in the sociology of education and education policy. GE credit: SS. Effective: 2016 Fall Quarter.

SOC 125—Sociology of Culture (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended. Sociological approaches to study of historical and contemporary culture and mass media, and their structuring in relation to social actors, institutions, stratification, power, the production of culture, audiences, and the significance of culture in processes of change. GE credit: SS. Effective: 2016 Fall Quarter.

SOC 126—Social Interaction (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended. Everyday interaction in natural settings; ethnographic approaches to the understanding of social meanings, situations, personal identity and human relationships. Particular attention to the work of Erving Goffman and to principles of field observation and qualitative analysis. GE credit: SS. Effective: 2016 Fall Quarter.

SOC 128—Interracial Interpersonal Dynamics (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended. Analysis of the influences of cultural differences and racial stratification on interpersonal interaction in instrumental settings (e.g., work, education, political action) and intimate settings (e.g., friendship, love, marriage, family). Minority/majority relationships. GE credit: SS. Effective: 2016 Fall Quarter.

SOC 129—Sociology of Black Experience in America (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended. Survey of historical and contemporary theoretical sociological perspectives on the Black experience in United States. Emphasis on comparisons of Black sociological perspectives and mainstream perspectives of specific sociologists. GE credit: ACGH, DD, SS. Effective: 2016 Fall Quarter.

SOC 130—Race Relations (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended. Functions of the social definitions of race and racial groups. Analysis of racial conflict, oppression, and other forms of ethnic stratification. Models of ethnic interaction and social change. Emphasis on racial relationships within the U.S. GE credit: ACGH, DD, SS. Effective: 2016 Fall Quarter.
SOC 131—The Family (4)  
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended. Contemporary family life in historical and cross-cultural perspective. How different family forms arose, their significance today and prospects for further family change. Attention to power relations within and beyond the family and to the social implications of family transformation. GE credit: ACGH, DD, SS. Effective: 2016 Fall Quarter.

SOC 132—The Sociology of Gender (4)  
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended. Analysis of biological, psychological, cultural and structural conditions underlying the status and roles of men and women in contemporary society, drawing on a historical and comparative perspective. GE credit: ACGH, DD, SS. Effective: 2016 Fall Quarter.

SOC 133—Sexual Stratification and Politics (4)  
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Consent of Instructor. SOC 001, SOC 002, or SOC 003 recommended. Analysis of origins, dynamics, and social implications of sexual stratification. Examination of classical and contemporary theorists such as Engels, Freud, J.S. Mill, de Beauvoir, Juliet Mitchell, D. Dinnerstein. Attention to selected issues in social movements for and against sexual equality. GE credit: SS. Effective: 2016 Fall Quarter.

SOC 134—Sociology of Racial Ethnic Families (4)  
Discussion—1 hour; Lecture—3 hours; Term Paper. Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended. Asian American, Black, Chicano, and Native American family life in comparative historical perspective. Family structure and gender roles are considered in relation to socio-historical dynamics. GE credit: ACGH, DD, SS. Effective: 2016 Fall Quarter.

SOC 135—Social Relationships (4)  
Discussion—1 hour; Lecture—3 hours; Term Paper. Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended. Social and cultural factors influencing friendships and intimate relationships. Topics include relationship development, relationship maintenance, and relationship loss. GE credit: SS. Effective: 2016 Fall Quarter.

SOC 137—African American Society and Culture 1790 to 1990 (4)  
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended. Political and social transformations of African American communities between 1790 and 1990, as seen through film, literature, and music. Topics include: Black consciousness, Afro-Slave culture, The Harlem Renaissance, and contemporary Hip Hop. GE credit: ACGH, DD, SS. Effective: 2016 Fall Quarter.

SOC 138—Economic Sociology (4)  
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended. Overview of the rapidly growing field of economic sociology. Focus on variations in the ways that markets are organized. The relationship between individual and collective rationality will also be emphasized. GE credit: ACGH, SS, WC. Effective: 2016 Fall Quarter.

SOC 139—Corporations and Society (4)  
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended. Study of the history and power of the modern corporation; corporate organization; politics, the state, and the corporation; labor unions and the labor process; competition, regulation and international markets; the multinational and conglomerate corporation; and mass markets and consumerism. GE credit: ACGH, SS. Effective: 2016 Fall Quarter.

SOC 140—Social Stratification (4)  
Lecture—3 hours; Project (Term Project); Term Paper/Discussion—1 hour. Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended. Systems of social ranking, theories of stratification; power, prestige, culture, and styles of life of various social classes; social mobility and its consequences for social structure. GE credit: ACGH, DD, SS. Effective: 2016 Fall Quarter.

SOC 141—Industrialization and Social Change (4)  
Lecture—3 hours; Project (Term Project); Term Paper/Discussion—1 hour. Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended. Selected technological and social factors. Preconditions of economic development and industrialization. Social, political, and cultural issues at various levels of economic development. Major historical differences and major current trends. Emphasis either on highly industrialized countries or on less developed countries. GE credit: SS. Effective: 2016 Fall Quarter.

SOC 143A—Urban Society (4)  
Discussion—1 hour; Lecture—3 hours; Project (Term Project); Term Paper. Prerequisite(s): SOC 001, SOC 002, or
SOC 003 recommended. Theories of city origins. Analysis of the historic process of urbanization and of varying city types. Comparison of American and European experience of metropolitanization, counterurbanization, and neighborhood change. Consideration of competing theories of urban growth and change and competing visions of the urban future. GE credit: SS. Effective: 2016 Fall Quarter.

SOC 143B—Sociology of City Life (4)
Discussion—1 hour; Lecture—3 hours; Project (Term Project); Term Paper. Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended. Critical dissection of the loss of community issue. Analysis of the organization of primary ties in the city, of the culture of urban public life and of the learning of city skills. GE credit: SS. Effective: 2016 Fall Quarter.

SOC 144—Agriculture and Society (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended. Development of agriculture as a major enterprise in modern society with the concomitant reduction in the labor force and family farms. Analysis of issues including mechanization, migrant labor, corporate farming, and public resource policy. GE credit: SS. Effective: 2016 Fall Quarter.

SOC 145A—Sociology of Third World Development (4) [Review all entries]
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): SOC 001; Upper division standing. Introduction to theories and contemporary issues in the sociology of development. Topics such as urbanization, rural/agrarian change, class, status groups, international division of labor, sectoral shifts, international capital, informal economy, gender, and political processes are analyzed within a comparative-historical framework. GE credit: SS, WC. Effective: 1997 Winter Quarter.

SOC 145B—Gender and Rural Development in the Third World (4)
Seminar—4 hours. Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended. Political-economic analysis of women and work during the process of socioeconomic change in the world with particular attention to the family/household context. GE credit: SS, WC. Effective: 2016 Fall Quarter.

SOC 146—Sociology of Religion (4)
Discussion—1 hour; Lecture—3 hours; Project (Term Project); Term Paper. Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended. Relationship between social structures and religions. The social setting of the major world religions. Religious innovators and institutionalization (churches, sects, cults). Secularization in the modern world and the rise of secular ideologies. GE credit: SS. Effective: 2016 Fall Quarter.

SOC 147—Sociological Perspectives on East Asia (4)
Discussion—1 hour; Lecture—3 hours; Project (Term Project); Term Paper. Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended. Sociological theories and concepts applied toward understanding East Asian society. Emphasis on the political structure, stratification, and economy in China and Japan. Analysis of historical and contemporary similarities and differences. GE credit: SS, WC. Effective: 2016 Fall Quarter.

SOC 148—Collective Behavior (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended. Study of behavior of human crowds and masses in extraordinary circumstances, including crowd panics, mass scares, collective protests, riots, revolutionary situations, ecstatic and revivalist gatherings, crazes, fads, and fashions. GE credit: SS. Effective: 2016 Fall Quarter.

SOC 149—Religion and American Society (4)
Lecture—3 hours; Project (Term Project). Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended. Historical, contemporary survey of religious traditions and organizations and their relation to U.S. social and cultural patterns. Civil religion, religious pluralism, minority and deviant communities, religious migration, U.S. religion as a social institution, and religion, politics, and social stratification. GE credit: ACGH, DD, SS. Effective: 2016 Fall Quarter.

SOC 150—Criminology (4)
Lecture—3 hours; Project (Term Project); Term Paper/Discussion—1 hour. Prerequisite(s): SOC 001, SOC 002, or SOC
SOC 151—The Criminal Justice System (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended. Sociological analysis of the different components of the criminal justice system including the emergence and interpretation of criminal laws, the contemporary roles and functions of the police, criminal courts and correctional institutions. GE credit: SS. Effective: 2016 Fall Quarter.

SOC 152—Juvenile Delinquency (4)
Lecture—3 hours; Project (Term Project); Term Paper/Discussion—1 hour. Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended. Study of juvenile delinquency in relation to the family, peer groups, community, and institutional structures. Consideration of processing of the delinquent by formal agencies of control. GE credit: SS. Effective: 2016 Fall Quarter.

SOC 153—The Sociology of Childhood (4)
Lecture—3 hours; Term Paper. Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended. Contemporary childhood in historical, cross-cultural, and global perspectives. Examine changes in understanding of the nature of childhood and "best interests of the child" by class, race, gender, geographic region, and historical period. GE credit: ACGH, DD, SS, WC. Effective: 2016 Fall Quarter.

SOC 154—Health and Illness (4)
Lecture—3 hours; Project (Term Project); Term Paper/Discussion—1 hour. Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended. Theoretical tools for understanding the social determinants of health and health care, including such topics as health policy, social sources of illness, social construction of illness, medicalization, social disparities in health, and the illness experience. GE credit: SS. Effective: 2016 Fall Quarter.

SOC 155—Sociology of Law (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended. Law considered as social control; relation of legal institutions to society as affecting judicial decision making and administration of justice. Lawyers as an occupational group. Legal reform. GE credit: SS. Effective: 2016 Fall Quarter.

SOC 156—Social Movements (4)
Discussion—1 hour; Lecture—3 hours; Project (Term Project); Term Paper. Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended. Analysis of several aspects of social movements: mobilization, forms of organization, ideology, recruitment, leadership, strategies and tactics, development, effects. Frequent use of sound and film materials. GE credit: SS. Effective: 2016 Fall Quarter.

SOC 157—Social Conflict (4)
Discussion—1 hour; Lecture—3 hours; Project (Term Project); Term Paper. Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended. Analysis of the causes, dynamics, and regulation of social conflict within and between various kinds of social groupings with particular reference to nonviolent methods of waging and regulating conflict. GE credit: SS. Effective: 2016 Fall Quarter.

SOC 158—Women's Social Movements in Latin America (4)
Lecture—3 hours; Term Paper. Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended. Contemporary women's social movements in Latin America, focusing on Honduras, El Salvador, Brazil, and Nicaragua. Examination of exploitation and oppression in Latin America. GE credit: DD, SS, WC. Effective: 2016 Fall Quarter.

SOC 159—Work, Employment, and Careers in the 21st Century (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended. Historical and contemporary overview of employment, work, and occupations in American society. Study of authority and power relations, labor markets, control systems, stratification, and corporate structures, and how these factors shape work in diverse or organizational and employment setting. GE credit: SS. Effective: 2016 Fall Quarter.

SOC 160—Sociology of the Environment (4)
Lecture—3 hours; Term Paper. Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended. Production, consumption, and urban expansion. Basic social logics surrounding current problems of resource scarcity (environmental extractions) and excess wastes (environmental additions). Ways that society can change and reorganize itself to become more environmentally conscious and hence ecologically sustainable. GE credit: ACGH, DD, SS, WC. Effective: 2016 Fall Quarter.
SOC 161—The Civil Justice System (4)
Lecture—3 hours; Term Paper. Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended. Empirical studies of the different aspects of the civil justice system in the United States and Global Society including the litigation, juries, civil rights, and international laws relating to trade, the environment, and human rights. Effective: 2016 Fall Quarter.

SOC 162—Society, Culture, and Health (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): SOC 001, SOC 002, SOC 003, or SOC 006 recommended. Analysis of how socio-cultural factors shape illness experience. Evaluation of how certain conditions come to be understood as health conditions; illness identities and biographies; doctor-patient interactions; biomedical cultures; and how race, ethnicity, and gender shape health practices. GE credit: DD, SS. Effective: 2016 Fall Quarter.

SOC 163—Population Health: Social Determinants and Disparities in Health (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): SOC 001, SOC 002, SOC 003, or SOC 006 recommended. Survey of the social determinants and disparities in health: measurement of population health; health transitions and global disparities; domestic disparities in health by class, race/ethnicity, nativity, gender, and sexual orientation; social determinants including social support, social stress, neighborhoods, and policy. GE credit: DD, SS. Effective: 2016 Fall Quarter.

SOC 164—Health Policy and Politics (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): SOC 001, SOC 002, SOC 003, or SOC 006 recommended. Introduction to health policy and politics, including health care access and delivery, and policies related to health inequalities, the social determinants of illness and health behaviors. GE credit: DD, SS. Effective: 2016 Fall Quarter.

SOC 170—Population (4)
Discussion—1 hour; Lecture—3 hours; Project (Term Project); Term Paper. Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended. Introduction to the study of human population, including theories and statistical measures; social causes and consequences of population trends; changes in population structure; geographical distribution, migration, sociopsychological factors affecting fertility. GE credit: QL, SS. Effective: 2016 Fall Quarter.

SOC 171—Sociology of Violence and Inequality (4)
Lecture/Discussion—4 hours. Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended. How systems of social inequality organize the practice of violence. Definitions of violence and issues affecting the social capacity for violence. Analysis and comparison of different forms of violence associated with race, class, gender relations and social organization. GE credit: SS. Effective: 2016 Fall Quarter.

SOC 172—Ideology of Class, Race and Gender (4)
Lecture—4 hours. Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended. Examination of popular belief systems that accompany relations between social classes, whites and blacks, and men and women in the United States. How do dominant groups attempt to justify each relationship, and is there ideological conflict or consensus between groups. GE credit: ACGH, DD, SS. Effective: 2016 Fall Quarter.

SOC 173—Sociology Through Literature (4)
Discussion—1 hour; Lecture—3 hours; Project (Term Project); Term Paper. Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended. Introduction to analysis of literature as sociological data. Reading of numerous works on American and other societies by authors such as Steinbeck, Lewis, Dreiser, Schulberg, Orwell, etc. GE credit: SS. Effective: 2016 Fall Quarter.

SOC 174—American Jewish Identities and Communities (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended. Sociology of Jewish life, analyzing challenges to Jewish identity and community in the diaspora. Diversity within the Jewish community, Americanization, women, new immigrants, post-Holocaust Jewish identity, and LGBT Jews. GE credit: SS. Effective: 2016 Fall Quarter.

SOC 175—Mass Communication (4)
Lecture—3 hours; Term Paper. Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended. Examines the relationship between the media and social structures. History of mediastate relations. Media as reflector and
shaper of values. Emphasis on current European and Marxist and pluralist theories rather than on content analysis.

**SOC 176—Sociology of Knowledge, Science, and Scientific Knowledge (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended. Social, cultural, and historical dimensions of knowledge, especially scientific knowledge. Problems, methods, and theory in sociology of scientific knowledge. Laboratory and historical case studies. Scientific and technical knowledge in institutional and organizational contexts. (Same course as STS 176.) GE credit: SS. Effective: 2016 Fall Quarter.

**SOC 178—Punishment and Corrections (4)**
Lecture—3 hours; Term Paper. Prerequisite(s): SOC 001, 002, or 003 recommended. Origins, characteristics, and consequences of various sanctions and punishment regimes including fines, banishment, incarceration, deportation, and execution. GE credit: SS. Effective: 2017 Spring Quarter.

**SOC 180A—Complex Organizations (4)**
Discussion—1 hour; Lecture—3 hours; Project (Term Project); Term Paper. Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended. Develops a sociological approach to organizations theory. Designed to introduce sociological concepts, address the alternative psychological and economic models, and involve students in the practice of organizational analysis. GE credit: SS. Effective: 2016 Fall Quarter.

**SOC 180B—Complex Organizations (4)**
Discussion—1 hour; Lecture—3 hours; Project (Term Project); Term Paper. Prerequisite(s): Consent of Instructor. SOC 001, SOC 002, or SOC 003 recommended. Builds on concepts and skills developed in course 180A. Deals with the issues of organizational decision making, design, and survival. Emphasis on relations between organizations and the effects of those relations in both the public and private sectors. GE credit: SS. Effective: 2016 Fall Quarter.

**SOC 181—Social Change Organization (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended. Analysis of organizations with social change and improvement goals and programs, emphasizing voluntary associations and grassroots citizen groups. Topics treated include formation, decision making and leadership, strategies and tactics, factionalism and coalitions, effectiveness. GE credit: SS. Effective: 2016 Fall Quarter.

**SOC 182—Utopian Communal Groups and Movements (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended. Formations, structures, and social life of historical and contemporary countercultural, utopian, dystopian, intentional, and religious communal settlements and movements, including comparison with other small settlement forms such as monasteries, villages, neighborhoods, encampments, and communities. GE credit: SS. Effective: 2016 Fall Quarter.

**SOC 183—Comparative Organizations (4)**
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): SOC 001, SOC 002 or SOC 003 recommended; SOC 180A recommended. Examination of the economic, cultural, and political organization of major industrial and developing nations. Discussion of patterns and practices, alternative theoretical models of explanation, and case studies of organizations. Societies may include Japan, Germany, Egypt, China, and the U.S. GE credit: ACGH, SS, WC. Effective: 2016 Fall Quarter.

**SOC 185—Social Policy (4)**
Lecture—3 hours; Project (Term Project); Term Paper/Discussion—1 hour. Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended. Examination of social policies that affect the well-being of individuals, families and groups, including such policies as old-age pensions, health insurance, and aid to the poor. Students may not take both SOC 185 and SOC 185Y for credit. GE credit: SS. Effective: 2016 Fall Quarter.

**SOC 185Y—Social Policy (Hybrid Version) (4)**
Lecture—1.5 hours; Term Paper/Discussion—1 hour; Web Virtual Lecture—1.5 hours. Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended. Examination of social policies that affect the well-being of individuals, families and groups, including such policies as old-age pensions, health insurance, and aid to the poor. Students may not take both SOC 185 and SOC 185Y for credit. GE credit: SS, WE. Effective: 2016 Fall Quarter.

**SOC 188—Markets, Culture and Inequality in China (4)**
Lecture—3 hours; Term Paper. Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended. Economic and political systems and patterns of social interaction and inequality in China. State and corporate structures and
practices, market and consumer behaviors, social mobility and stratification, protest and resistance. GE credit: SS, WC. Effective: 2016 Fall Quarter.

**SOC 189—Social Science Writing (4)**
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended. Improved analytic writing and methods for reporting social science research to a wider public. Sociological analysis of the conditions of good and bad writing. GE credit: SS. Effective: 2016 Fall Quarter.

**SOC 190X—Seminar in Sociological Analysis (4)**
Seminar—3 hours; Term Paper. Prerequisite(s): SOC 100; Upper division standing; SOC 100 (former SOC 165A). Limited enrollment. In-depth examination at an upper division level of a special topic in Sociology. Emphasis on student participation in learning. May not be repeated for credit. GE credit: SS. Effective: 1997 Winter Quarter.

**SOC 191—Workshop in Contemporary Sociological Theory (4)**
Lecture—2 hours; Term Paper; Workshop—1 hour. Prerequisite(s): SOC 100; SOC 100 (former SOC 165A); senior standing. Workshop in contemporary sociological theory that allows students to explore the uses of theory in empirical inquiry on problems of interest to students. Contemporary theory considered in relation to classical and modern influences, concept formation, theory construction, and explanation. Not open for credit to students who have received credit for SOC 165B. GE credit: SS. Effective: 1997 Winter Quarter.

**SOC 192—Internship and Research Practicum (2-6)**
Internship—6-18 hours. Prerequisite(s): Consent of Instructor. Must have 84 units complete; faculty approval of proposed internship. Supervised internship and study in an agency, organization, or institution; application of sociological concepts to the work experience. May be repeated for credit with consent of instructor. Maximum of four units may be counted toward the major. (P/NP grading only.) Effective: 2018 Winter Quarter.

**SOC 193—Workshop in Field Research (2)**
Lecture/Discussion—2 hours. Prerequisite(s): SOC 046A; (SOC 192 (can be concurrent) or SOC 199 (can be concurrent)); SOC 192 or SOC 199 required concurrently for 2.0-4.0 units, senior standing. Overview of the process of collecting, recording, analyzing, and reporting qualitative social data. Emphasis on application of principles; each participant completes an original research project. Not open for credit to students who have completed SOC 194HA. GE credit: SS, WE. Effective: 2001 Fall Quarter.

**SOC 194H—Special Study for Honors Students (1-5)**
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. Open to Sociology majors of senior standing who qualify for the Honors program. Independent study of a sociological problem involving the writing of an Honors thesis. May be repeated up to 8 unit(s). (P/NP grading only.) GE credit: WE. Effective: 2014 Fall Quarter.

**SOC 194HA—Special Study for Honors Students (4)**
Seminar—3 hours; Term Paper. Prerequisite(s): Senior standing and admission to the Honors Program. Directed reading, research and writing culminating in the preparation of a Senior Honors Thesis under direction of faculty advisor. GE credit: SS. Effective: 1997 Fall Quarter.

**SOC 194HB—Special Study for Honors Students (4)**
Seminar—3 hours; Term Paper. Prerequisite(s): Senior standing and admissions to the Honors Program. Directed reading, research and writing culminating in the preparation of a Senior Honors Thesis under direction of faculty advisor. GE credit: SS. Effective: 1997 Spring Quarter.

**SOC 195—Special Topics in Sociological Analysis (4)**
Seminar—3 hours; Term Paper. Prerequisite(s): SOC 001, SOC 002, or SOC 003 recommended. In-depth examination of topics in sociology. Emphasis on student research and writing. May be repeated for credit when topic differs. May be repeated for credit. GE credit: SS. Effective: 2016 Fall Quarter.

**SOC 197T—Tutoring in Sociology (1-4)**
Tutorial—3-12 hours. Prerequisite(s): Upper division standing; completion of appropriate course with distinction. Activities vary depending on the nature of the course assignment. May include (but not limited to) tutoring on course material, advising on projects and papers, and leading discussion groups. (P/NP grading only.) Effective: 1997 Winter Quarter.

**SOC 198—Directed Group Study (1-5)**
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.
SOC 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. Must have 84 units complete and faculty approval. Special study. (P/NP grading only.) Effective: 2018 Winter Quarter.

SOC 201—Social Research (4)
Lecture/Discussion—3 hours; Term Paper—1 hour. Prerequisite(s): Graduate standing or consent of instructor. Comparative survey of sociological inquiry, taught as a practicum. Philosophy of social science; values and research; research agendas and research problem formulations; research process; explanations; interpretation; study design; concept formation, measure, sampling, data acquisition, inference; rhetoric and presentation of findings. Effective: 2007 Fall Quarter.

SOC 206—Quantitative Analysis in Sociology (4)
Lecture—4 hours. Prerequisite(s): SOC 106 Survey of the statistical models and methods that serve as a foundation for quantitative research in sociology, with an emphasis on multivariate regression analysis, as well as measurement theory and time series analysis. (S/U grading only.) Effective: 1997 Winter Quarter.

SOC 207A—Methods of Quantitative Research (4)
Lecture—3 hours; Term Paper. Prerequisite(s): SOC 106; Or the equivalent. Principles of study design, examination of measurement, survey research methods and multivariate analysis. Course will stress actual practice of techniques. Students will carry out quantitative data analysis using packaged computer programs. May be repeated up to 8 unit(s) with instructor approval. Effective: 2015 Fall Quarter.

SOC 208—Topics in Advanced Quantitative Methods in Social Science (4)
Seminar—3 hours; Term Paper. Prerequisite(s): SOC 206; Or the equivalent and graduate standing; major graduate students. Analysis of the logic and application of an advanced statistical model; the particular model chosen may vary. Emphasis on the model's assumptions, its strengths and weaknesses, its application for social science inquiry, and the relationship between methods and social theory. May be repeated up to 12 unit(s). Effective: 2007 Spring Quarter.

SOC 215—Economy, Polity, and Society (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. Open to graduate students in sociology and related disciplines. Course introduces students to topics and selected issues in the related fields of economic and political sociology and political economy. Effective: 1997 Winter Quarter.

SOC 220—Deviance, Law, and Social Control (4)
Project (Term Project); Seminar—3 hours. Prerequisite(s): SOC 120; or Consent of Instructor. Report and discussions of literature on selected forms of deviance in relation to law and formal social control. Agency contacts and exploratory research projects. Effective: 1997 Winter Quarter.

SOC 224—Sociology of Education (4)
Seminar—3 hours; Term Paper. Prerequisite(s): SOC 206 or equivalent recommended. Restricted to graduate students or consent of instructor. Overview of sociological theories accounting for the form, role, and evolution of educational systems. Emphasis on empirical research on education and social stratification and application to educational policy. Effective: 2018 Winter Quarter.

SOC 225—Cultural Sociology (4)
Seminar—3 hours; Term Paper. Explores the varied ways in which culture is understood in the social sciences and the research questions that follow from contrasting viewpoints. The approach is historically informed and focused on changing cultural forms in relation to industrialization and post-modernism. Effective: 1997 Winter Quarter.

SOC 226—Sociological Social Psychology (4)
Seminar—3 hours; Term Paper—1 hour. Prerequisite(s): Graduate standing or consent of instructor. Advanced study of the varying approaches, methods, issues and topical concerns of sociological social psychology. Analysis of central and representative historical and contemporary works. Effective: 1997 Winter Quarter.

SOC 227—Sociology of Reproduction (4)
Discussion—1 hour; Lecture—3 hours. Recent social science scholarship in such areas as teenage pregnancy, family planning, abortion, adoption, AIDS, and new reproductive technologies; focus on the current situation in the United States. Effective: 1997 Winter Quarter.

SOC 230—Ethnic (Race) Relations (4)
Lecture—3 hours; Term Paper. Advanced study of the determinants of ethnic groupings and their interrelationships. Major theme will be the patterns of ethnic stratification and causes of ethnic conflict. Specific focus upon dominance and resistance to dominance. Influence of social science research. Effective: 1997 Winter Quarter.
SOC 233—Gender, Culture, and Local/Global Transformation (4)
Seminar—3 hours; Term Paper. Focus on critical approach to women and development; analyze local transformations with global connections within specific cultural contexts. Course covers theory, methodological issues, and relationship between theory and practice. Effective: 1998 Fall Quarter.

SOC 234—Gender, Family, and Society (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. The major theoretical traditions and concerns in family sociology and sociology of gender. Analysis of selected classical and contemporary works representative of functionalist, Marxist, psychoanalytic, feminist and critical theoretical approaches to these subjects (e.g., Engels, Parsons, Freud, Horkheimer, Goode, Lasch, Mitchell). Emphasis on macro and historical questions. Effective: 1997 Winter Quarter.

SOC 242A—Methodologies of Sociohistorical Inquires (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Consent of instructor not required for graduate students in the Social Sciences Division or the Humanities, Arts, and Cultural Studies Division; required for undergraduates and students from other divisions or colleges. Introduction to comparative and case methodological approaches to sociohistorical inquiry, theoretical and practical issues, and substantive research agendas ranging from study of large-scale social transformations to close microhistories, including research agendas being developed by students in the course. Effective: 2015 Fall Quarter.

SOC 243—Urban Society (4)
Seminar—3 hours; Term Paper. Broad overview of the issues and concerns of the field of urban sociology. Special emphasis on the human experience of urban living in contemporary, cross-cultural or historical settings. Effective: 1997 Winter Quarter.

SOC 245—Developing Societies (4)
Project (Term Project); Seminar—3 hours; Term Paper. Prerequisite(s): Graduate student status or familiarity with problems of developing societies. Analysis of social and economic problems of developing societies from the standpoint of theory and research on modernization and underdevelopment. Nature of third world dependency and interdependence in the global political economy. Effective: 1997 Winter Quarter.

SOC 248—Social Movements (4)
Seminar—3 hours; Term Paper. Analysis of current issues in and contributions to the study of collective behavior and social movements; particular focus upon the strategies and tactics of social movements. Effective: 1997 Winter Quarter.

SOC 254—Sociology of Health and Illness (4)
Seminar—3 hours; Term Paper. Open to graduate or professional students. Sociological perspectives and methods on the study of health and illness. Students select topics for supervised research. Research paper required. Effective: 2018 Winter Quarter.

SOC 255—Sociology of Law (4)
Seminar—4 hours. Prerequisite(s): Consent of Instructor. Analysis of the nature of the legal process and its impact on social behavior. Will consider (1) nature and functions of law, (2) the organization and administration of law, and (3) the capacity of law to affect social behavior. Effective: 1997 Winter Quarter.

SOC 265A—Classical Sociological Theory (4)
Discussion—1 hour; Lecture—3 hours. Introduces graduate students to the work of the main classical thinkers in the tradition of social theory, such as Marx, Durkheim, Weber, Simmel, Freud, G.H. Mead, and Parsons, locating them within the historical, cultural, and philosophical milieu in which their ideas originated. Effective: 1997 Winter Quarter.

SOC 265B—Theory in Contemporary Sociology (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): SOC 265A Explores the uses of theories in contemporary sociology by tracing their connections with classical sociological writings and their relations to broader theoretical concerns of contemporary social thought, with particular emphasis on relevance to the current historical, cultural and social milieu. Effective: 1997 Winter Quarter.

SOC 270—Social Demography (4)
Seminar—4 hours. Prerequisite(s): SOC 170; or Consent of Instructor. How social institutions affect and are affected by the level and variation of mortality, migration, and fertility. Special emphases on the determinants of fertility-related attitudes and behavior, on less-developed countries, and on contemporary empirical studies. Effective: 1997 Winter Quarter.
SOC 280—Organizations and Institutions (4)

SOC 288—Integrative Research Practicum (4)
Extensive Writing; Seminar—6 hours; Term Paper. Prerequisite(s): SOC 207A; SOC 242A; SOC 292A; Consent of Instructor. Continuing training in field, quantitative, and/or comparative-historical methods. Emphasis on students' research projects and applications of principles related to research design, concept and theory construction causality and interpretation, and data and measurement. Completion of research paper is required. Effective: 2015 Fall Quarter.

SOC 290—Seminar (4)
Seminar—3 hours; Term Paper. (S/U grading only.) Effective: 1997 Winter Quarter.

SOC 292A—Field Research (4)
Fieldwork; Seminar—3 hours. Prerequisite(s): Graduate standing in Sociology or consent of instructor. Introduction to the logic, methods, and practices of field research, with particular emphasis on the ethnographic tradition of participant observation. Interviewing and other qualitative techniques will also be covered. Students will develop original research projects based on their own fieldwork. Effective: 2015 Fall Quarter.

SOC 293—Proseminar in Sociology (2)
Seminar—2 hours. Prerequisite(s): First-year Sociology graduate students only. Introduction to graduate training in sociology. A seminar designed to introduce students entering graduate work in the department to its ongoing research activities. (S/U grading only.) Effective: 1997 Winter Quarter.

SOC 295—Special Topics Seminar (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Research topics in Sociology. Specific topic will vary according to faculty interest and student demand. May be repeated for credit when topic differs. May be repeated for credit. Effective: 1999 Fall Quarter.

SOC 298—Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

SOC 299—Individual Study (1-12)
Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

SOC 390A—The Teaching of Sociology (2)
Discussion—1 hour; Lecture—1 hour. Prerequisite(s): Graduate standing; required for first-time teaching assistants. Practical instruction in teaching methods for qualitative and quantitative courses. Pedagogical issues involved in critical sociological analysis. (S/U grading only.) Effective: 1997 Winter Quarter.

SOC 390B—The Teaching of Sociology (2)
Discussion—1 hour; Lecture—1 hour. Prerequisite(s): Graduate standing. Practical instruction in devising course syllabi, lectures and assignments for Associate-Instructors and others interested in college teaching. Discussion of pedagogical methods of teaching qualitative and quantitative courses. (S/U grading only.) Effective: 1997 Winter Quarter.

SOC 396—Teaching Assistant Training Practicum (1-4)
Variable. Prerequisite(s): Graduate standing. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

SOC 466—Research Paper Workshop (2)
Discussion—0.5 hours; Workshop—1.5 hours. Prerequisite(s): Master of Arts standing. A workshop to assist advanced graduate students in the preparation of an original research paper. Students present their research papers and discuss issues in theory, research design, data, empirical inference, and verbal and written presentation of a professional research paper. (S/U grading only.) Effective: 1997 Winter Quarter.

Soil Science Minor; Land, Air & Water Resources
Soil Science Minor; Land, Air & Water Resources | SSC Minor
(College of Agricultural and Environmental Sciences)
Faculty. http://lawr.ucdavis.edu/people/faculty
Major Programs. See the Soils and Biogeochemistry track in Environmental Science and Management.

The Department of Land, Air and Water Resources, Soils and Biogeochemistry Program, offers a minor program in soil science. The minor is especially geared toward students in the environmental sciences including Hydrologic Science, Environmental Science and Management, Environmental Toxicology, Ecological Management and Restoration, International Agricultural Development, Crop Science and Management, Environmental Horticulture and Urban Forestry, Geology, and Plant Biology.

Graduate Study. Programs of study leading to the M.S. and Ph.D. degrees in Soils & Biogeochemistry are available. Information regarding these programs can be obtained from the graduate advisor, at http://soils.ucdavis.edu/ and in the Graduate Announcement. See also Graduate Studies.

Minor Advisor. R.J. Southard (Land, Air and Water Resources)

Soil Science Minor; Land, Air & Water Resources | SSC Courses

Questions pertaining to the following courses should be directed to the instructor, to the Resource Sciences Teaching Center in 1150 Plant and Environmental Sciences Building 530-752-1603.

Courses in SSC:

SSC 010—Soils in Our Environment (3)
Independent Study; Lecture—3 hours. Class size limited to 90 students. Soils in our global ecosystem; soils as natural bodies formed by interactive environmental processes; soil response to use and management; sustainable use of soil resources; role of soils in agricultural and environmental issues; role of soils in our daily lives. GE credit: QL, SE, SL. Effective: 2006 Fall Quarter.

SSC 092—Soil Science Internship (1-12)
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Lower division standing. Work experience off and on campus in soil science. Internship supervised by a member of the faculty. (P/NP grading only.) Effective: 1997 Winter Quarter.

SSC 100—Principles of Soil Science (5)
Laboratory—3 hours; Lecture—3 hours; Term Paper. Prerequisite(s): College-level courses in each of chemistry, physics, biology, and geology recommended. Soil as part of natural and managed ecosystems and landscapes. Solid, liquid, and gas phases and their interactions in the soil. Water, gas and heat movement in soil. Soil biology. Plant nutrient acquisition and use. Soil development, management and use. GE credit: QL, SE, SL, VL. Effective: 2018 Winter Quarter.

SSC 102—Environmental Soil Chemistry (3)
Lecture—3 hours. Prerequisite(s): General chemistry; SSC 100 or equivalent recommended. Soil chemistry processes related to the fate and transport of contaminants in soil. Soil minerals, natural organic matter, surface charge, soil solution chemistry, redox reactions in soil, and sorption of inorganic and organic contaminants. GE credit: QL, SE, SL. Effective: 2018 Winter Quarter.
SSC 105—Field Studies of Soils in California Ecosystems (5)
Prerequisite(s): SSC 100 and SSC 120 or equivalent recommended. Class size limited to a minimum of 10 and a maximum of 24 students. Field-based studies of soils in California ecosystems, away from campus, throughout California. Emphasis on description and classification of soils; relationships among soils, vegetation, geology, and climate; physical, chemical, and biological processes in soils on the landscape; and the role of soils in land use. May be repeated up to 1 time(s). GE credit: QL, SE, SL, VL, WE. Effective: 2005 Summer Special Session.

SSC 107—Soil Physics (5)
Discussion—1 hour; Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): SSC 100; ERS 100; MAT 016A; Or the equivalent of MAT 016A. Physical properties of soil. Principles of water, gas, heat, and solute movement in soil with selected examples related to soil and water management. Influence of soil properties on transfer processes. GE credit: SE. Effective: 1999 Fall Quarter.

SSC 109—Sustainable Nutrient Management (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): SSC 100; Or the equivalent. Availability of nutrients in organic and conventional agricultural, vineyard, orchard and plantation forest soils; management of fertilizers, cover crops, compost, sewage sludge and manures for crop production and to prevent loss to the environment is emphasized. GE credit: OL, QL, SE, SL, VL, WE. Effective: 2008 Spring Quarter.

SSC 111—Soil Microbiology (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): BIS 002C recommended. Major groups of microorganisms in soil, their interrelationships, and their responses to environmental variables. Role of microorganisms in cycling of nutrients. Plant-microbe relationships. Transformations of organic and inorganic pollutants. GE credit: QL, SE, SL, WE. Effective: 2018 Winter Quarter.

SSC 112—Soil Ecology (3)
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): SSC 100 or equivalent recommended. Overview of living constituents of soils, their interactions, importance to, and impact on biogeochemical cycles, decomposition, and soil properties. Practical applications of soil biological diversity are emphasized. GE credit: SE. Effective: 2018 Winter Quarter.

SSC 118—Soils in Land Use and the Environment (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Consent of Instructor. SSC 100 or equivalent recommended. Soils are considered as elements in land use planning and environmental quality. Topics include: soil survey reports, remote sensing, land capability classification, soil erosion/conservation, waste disposal on soils and soil reclamation. One one-day field trip. GE credit: SE, SL. Effective: 2018 Winter Quarter.

SSC 120—Soil Genesis, Morphology, and Classification (5)
Laboratory—3 hours; Lecture—4 hours. Prerequisite(s): SSC 100; GEL 050 recommended. Recognition and description of soils; chemical, biological and physical processes of soil formation. Factors of soil formation. Interactions of soils with diverse ecosystems. Introduction to soil classification. Practice using soil taxonomy. Practical experience describing soil properties in the field. GE credit: QL, SE, SL, VL. Effective: 1997 Winter Quarter.

SSC 122—Soil Science Internship (1-12)
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Completion of 84 units. Work experience off and on campus in soil science. Internship supervised by a member of the faculty. (P/NP grading only.) Effective: 1997 Winter Quarter.

SSC 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

SSC 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

SSC 202—Topics in Advanced Soil Chemistry (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Consent of Instructor. General chemistry; SSC 100 or equivalent recommended. Restricted to 18 students. Reviews of current research in soil chemistry. Topics include double layer theory; clay mineral and oxide surface chemistry; adsorption on soil surfaces; speciation and modeling of solution ions; solubility and mineral stability diagrams. May be repeated up to 1 time(s) if topic differs. Effective: 2018 Winter Quarter.

SSC 205—Field Studies of Soils in California Ecosystems (5)
Discussion—15 hours; Fieldwork—50 hours; Lecture—5 hours. Prerequisite(s): SSC 100 and SSC 120 or equivalent recommended. Class size limited to 24 students. Field-based soil studies in California ecosystems. Description and
classification of soils; relationships among soils, vegetation, geology, and climate; physical, chemical, and biological processes; their role in land use. Similar to course 105; requires additional work for graduate credit. May be repeated up to 1 time(s) if geographic locale changes. Effective: 2006 Spring Quarter.

**SSC 208—Soil-Plant Interrelationships (3)**
Lecture—3 hours. Prerequisite(s): SSC 100; PLB 111; or Consent of Instructor. Plant needs, occurrence and reactions of water and mineral nutrients in soils; root systems and their growth in soils; mass flow and diffusion mechanisms in nutrient acquisition; models relating nutrient uptake to soil and plant characteristics; nutrient assimilation and crop quality. Effective: 1997 Winter Quarter.

**SSC 211—Advanced Soil Microbiology (3)**
Lecture—3 hours. Prerequisite(s): CHE 008A; CHE 008B; SSC 111; BIS 102, BIS 103 or an equivalent course recommended. Microbial metabolism of organic chemicals in soil, both natural and xenobiotic. Decomposition of organic matter. Kinetics of microbial processes in soil. Effective: 1997 Winter Quarter.

**SSC 219—Ecosystem Biogeochemistry (4)**
Discussion/Laboratory—2 hours; Lecture—3 hours. Prerequisite(s): Introductory courses in ecology/biology and soils recommended; undergraduates accepted with consent of instructor. Multidisciplinary analysis of energy and nutrient transfers within terrestrial ecosystems. Examination of processes and inter- and intra-system interactions between the atmosphere, biosphere, lithosphere and hydrosphere. Laboratory section uses biogeochemical simulation models to examine case studies. (Same course as ECL 219.) Effective: 1997 Winter Quarter.

**SSC 220—Pedology (3)**
Lecture—3 hours. Prerequisite(s): Consent of Instructor. SSC 120 recommended. Topics selected from studies of soil-forming processes, soil-geomorphic relations, mineral weathering, new developments in soil classification, and development of pedologic theory. Topics vary from year to year. May be repeated once for credit. May be repeated up to 1 time(s). Effective: 1997 Winter Quarter.

**SSC 222—Global Carbon Cycle (3)**
Lecture—3 hours. Prerequisite(s): CHE 008A; CHE 008B; MAT 016A; MAT 016B; SSC 100; Or the equivalent of SSC 100. Global carbon cycle from Phanerozoic epoch to modern times. Examination of long and short-term carbon cycles. Transfer of carbon among ocean, land and life with emphasis on humic substance formation, methods of characterization, reactions with organics and soil carbon stabilization. Effective: 2008 Summer Session 1.

**SSC 290—Special Topics in Soil Science (1-4)**
Seminar—1-4 hours; Variable. Prerequisite(s): Graduate standing. Seminars and critical review of problems, issues, and research in soil science. May be repeated for credit. (S/U grading only.) Effective: 2010 Fall Quarter.

**SSC 298—Group Study (1-5)**
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. Group Study May be repeated for credit when topic differs. (S/U grading only.) Effective: 2014 Spring Quarter.

**SSC 299—Research (1-12)**
Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

**SSC 396—Teaching Assistant Training Practicum (1-4)**
Variable. Prerequisite(s): Graduate standing. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

**Soils & Biogeochemistry (Graduate Group)**

**Soils & Biogeochemistry (Graduate Group) | Soils & Biogeochemistry Information**
Sanjai J. Parikh, Ph.D., Chairperson of the Group

**Group Office.** 1152 Plant & Environmental Sciences Building; 530-752-1669; [http://soils.ucdavis.edu/](http://soils.ucdavis.edu/);
[http://lawr.ucdavis.edu/graduate_sbg.htm](http://lawr.ucdavis.edu/graduate_sbg.htm)

**Faculty.** [http://soils.ucdavis.edu/people/faculty/](http://soils.ucdavis.edu/people/faculty/)

**Soils & Biogeochemistry (Graduate Group) | Soils & Biogeochemistry M.S.**
Sanjai J. Parikh, Ph.D., Chairperson of the Group
Graduate Study. The Soils and Biogeochemistry Graduate Group offers programs of study and research leading to the M.S. and Ph.D. degrees. The focus of Soils and Biogeochemistry is on the physical, chemical and biological processes occurring in soils of different landforms and ecosystems. The goal is to understand the complex processes of mass and energy flow that control agricultural and natural ecosystem functions, productivity, and sustainability. Investigations assess impacts and implications of natural processes and anthropogenic effects, such as climate change, on soil and ecosystem behavior and development. Examples include: fate and emission of greenhouse gases; soil carbon sequestration; fate and transport of native and applied chemicals; soil microbial ecology; nutrient uptake and management; nutrient cycling in managed and wildland ecosystems; pesticide and trace element adsorption on surfaces; mineral weathering; organic agriculture; bioavailability of toxics; soil erosion; conservation; ecosystem productivity and sustainability; and the study of soil evolution on the landscape. These studies are carried out within a framework of integrating applied chemical, physical, mathematical, and biological sciences.

Graduate Advisors. Randy Dahlgren, Ph.D.; Jorge Rodrigues, Ph.D.; Sanjai Parikh, Ph.D.

Graduate Admissions Officer. Jorge Rodrigues, Ph.D.

The Major Program

The Spanish major program assures proficiency in all four language skills—speaking, understanding, reading, and writing—and acquaints students with the intellectual and cultural contributions of the Spanish-speaking world through a study of its language, literature, and cultural productions.

The Program. The department's lower division program gives students a solid foundation in the Spanish language, either through the traditional elementary and intermediate language series or through an accelerated three-course sequence of Spanish for native speakers. At the upper division level, students receive a broad introduction to basic concepts and the practice of literary and cultural criticism and to the four areas of study represented in the department's curriculum: Spanish linguistics, Spanish literature and culture, Latin-American literature and culture, and Latina/o literatures and cultures in the United States. Students are encouraged to work closely with the department's academic advisors in designing a program of studies tailored to their individual needs and interests. Many students combine the Spanish major with another major in the humanities or social sciences.

Advising. Given the great flexibility in the Spanish major, it is important that students design their programs in close consultation with their major advisor. This is especially important for students who intend to use their major as preparation for graduate study, for those who are planning a teaching career, and for those who wish to take advantage of our Education Abroad Program options.

Major Advisors. Student Affairs Officer/Undergraduate Academic Coordinator; Laura Barrera, ljbarerra@ucdavis.edu.

Student Learning Outcomes. Educational Objectives:

- **Linguistics.** Demonstrate knowledge of the Spanish speaking world's linguistic diversity through the comprehension of Spanish in a variety of situations, discursive modes and historical, regional or social variations. Demonstrates analytic, interpretative, and critical thinking skills; SPA 111N, 113, 115/S, 116, 117, 118, 180.

- **Literature.** Demonstrate analytic, interpretative and critical thinking skills with respect to literary texts from Latin America, Spain, the United States and other countries in which there is a literary production in Spanish; SPA 100/S, 130, 131N, 134A/B, 142 (Spain); 150N, 151, 157, 159/S (Latin America); 117, 174, 176, 177 (United States).

- **Culture.** Demonstrate cultural awareness with respect to the diversity of cultural products and manifestations produced in the Spanish speaking world (Latin America, Spain, the United States and other countries in which there is a cultural production in Spanish; SPA 100/S, 141/S, 170/S, 174.

- **Film and Art.** Demonstrate analytic interpretative and critical thinking skills with respect to linguistics, literature and cultural studies.

Career Alternatives. The program, alone or in combination with other major programs, may lead to advanced study of the language or literature and culture of Spain and Spanish America, and to careers not only in teaching, but also in other professions such as library science, law, medicine, and in government, social service, business, or international relations.

Honors Program. Candidates for high or highest honors in Spanish must write a senior thesis under the direction of a faculty member. For this purpose, honors candidates must enroll in at least six units of SPA 194H distributed over two quarters. Normally, a student will undertake the honors project during the first two quarters of the senior year; other arrangements must be authorized by the department chair. Only students who, at the end of their junior year (135 units), have attained a cumulative GPA of 3.500 in courses required for the major will be eligible for the honors program. The requirements for earning high and highest honors in Spanish are in addition to the regular requirements for the major in Spanish.

UC Education Abroad Program Options. The department encourages its majors to consider study in a Spanish-speaking country with our UC Education Abroad Program (UCEAP). It is now possible for our students to complete significant portions of the Spanish major in the UCEAP centers at both the lower (Preparatory Subject Matter) and upper division levels through newly introduced options. See UC Davis Study Abroad at http://studyabroad.ucdavis.edu/.

UC Davis Quarter Abroad. The Quarter Abroad Program offers programs in Mendoza, Argentina (fall quarter) and in Madrid, Spain (spring quarter). These programs aim at providing students with opportunities to increase their
knowledge of the Spanish language and cultures by experiencing the life-learning challenges of living and studying abroad.

Students may earn 15-22 UC Davis units toward the Spanish major, minor, or foreign language requirement. Each program may offer an upper division course taught by the UC Davis Program Director focusing on history, culture and society.

For more information, contact C. Colombi or C. Martínez-Carazo or see http://studyabroad.ucdavis.edu/programs/quarterabroad/.

**Prerequisite Credit.** Credit normally will not be given for a course if that course is the prerequisite of a course already successfully completed. Exceptions can be made by the Department Chairperson only.

### Depth Subject Matter

**Units: 41-44**

Choose one in each of the following five areas:

19-20
Students planning to take SPA 110 should do so at the beginning of the upper division sequence or concurrently with one from:

SPA 100 Principles of Hispanic Literature and Criticism 4
SPA 100S Principles of Hispanic Literature and Criticism 4
SPA 141 Introduction to Spanish Culture 4
SPA 141S Introduction to Spanish Culture 4
SPA 170 Introduction to Latin American Culture 4
SPA 170S Introduction to Latin American Culture 4
SPA 111N The Structure of Spanish: Sounds and Words 3
SPA 115 History of the Spanish Language 4
SPA 116 Applied Spanish Linguistics 4
SPA 116S Applied Spanish Linguistics 4
SPA 130 Survey of Spanish Literature to 1700 4
SPA 131N Survey of Spanish Literature: 1700 to Present 4
SPA 134A Don Quijote I 4
SPA 142 Special Topics in Spanish Cultural and Literary Studies 4
SPA 150N Survey of Latin American Literature to 1900 4
SPA 151 Survey of Latin American Literature 1900 to Present 4
SPA 157 Great Works of Latin American Literature/Culture 4
SPA 159 Special Topics in Latin American Literature and Culture 4
SPA 159S Special Topics in Latin American Literature and Culture 4
SPA 117 Teaching Spanish as a Native Tongue in the U.S.: Praxis and Theory 4
SPA 174 Chicano Culture 4
SPA 176 Literature in Spanish Written in the United States 4
SPA 177 California and Latin America 4

Choose six electives in consultation with the student's major advisor: 22-24

Students may, with the approval of their advisor, choose up to two electives outside the Spanish department in such programs as:

**African American and African Studies:**
- AAS 107A African Descent Communities and Culture in the Caribbean and Latin America 4
- AAS 180 Race and Ethnicity in Latin America 4

**Anthropology:**
- ANT 144 Contemporary Societies and Cultures of Latin America 4

**Art History:**
- AHI 151 Arts of the Indians of the Americas 4

**Chicana/o Studies:**
- CHI 154 The Chicana/o Novel 4
- CHI 155 Chicana/o Theater 4
- CHI 156 Chicana/o Poetry 4
- CHI 160 Mexican Film and Greater Mexican Identity 4
- CHI 170 Contemporary Issues in Chicano Art 4
- CHI 171 Mexican and Chicano Mural Workshop 4

**Comparative Literature:**
- COM 152 Literature of the Americas 4
- COM 165 Caribbean Literatures 4
- COM 165S Caribbean Literatures 4

**Education:**
- EDU 151 Language Development in the Chicano Child 3
EDU 152  Academic Spanish for Bilingual Teachers  3

History:
- HIS 159  Women and Gender in Latin American History  4
- HIS 160  Spain and America in the 16th century  4
- HIS 164  History of Chile  4
- HIS 165  Latin American Social Revolutions  4
- HIS 166A  History of Mexico to 1848  4
- HIS 166B  History of Mexico since 1848  4
- HIS 167  Modern Latin American Cultural and Intellectual History  4
- HIS 168  History of Inter-American Relations  4
- HIS 169A  Mexican-American History  4
- HIS 169B  Mexican-American History  4

Linguistics:
- LIN 166  The Spanish Language in the United States  4

Native American Studies:
- NAS 120  Ethnopolitics of South American Indians  4
- NAS 133A  Ethnohistory of Native Peoples of Mexico and Central America to 1500  4
- NAS 133B  Ethnohistory of Native Peoples of Mexico and Central America 1500 to 2000  4
- NAS 184  Contemporary Indigenous Literature of Mexico  4

A maximum of six units of SPA 199 may be counted toward the major. SPA 199 cannot be used to replace regular departmental courses.

Total: 41-77

Spanish | SPA M.A.

(College of Letters and Science)

Department Office. 210 Sproul Hall; 530-752-2239; http://spanish.ucdavis.edu/en/graduate-program

Graduate Study. The Department offers courses leading to the M.A. degree in Spanish to students who have completed with distinction the A.B. degree in Spanish, or the equivalent. Candidates will be recommended for admission to graduate studies in Spanish provided they meet the requirements of the Graduate Studies office and the Department of Spanish. The Department also offers programs of study and research leading to the Ph.D. degree. Detailed information may be obtained by writing to the Chairperson or the Graduate Director of the Spanish Department.

Graduate Advisor. Maria Ruby, mruby@ucdavis.edu

One upper division Spanish elective. 4

Consult a departmental advisor if any of these courses are to be taken abroad.

Total: 23-24

Spanish | SPA Courses

Courses in SPA:

SPA 001—Elementary Spanish (5)
Lecture/Discussion—5 hours. Introduction to Spanish grammar and development of all language skills in a cultural context with special emphasis on communication. Not open for credit for students who have completed equivalent SPA 001S; students who have successfully completed SPA 002 or SPA 003 in the 10th or higher grade of high school may receive unit credit for this course on a P/NP grading basis only; although a passing grade will be charged to the student's P/NP option, no petition is required; all other students will receive a letter grade unless a P/NP petition is filed. GE credit: AH, WC. Effective: 2016 Winter Quarter.

SPA 001A—Accelerated Intensive Elementary Spanish (15)
Lecture/Discussion—15 hours. Introduction to Spanish grammar and development of all language skills in a cultural context with emphasis on communication. Special 12-week accelerated, intensive summer session course combining the work of courses 1, 2 and 3. Not open to students who have completed equivalent SPA 001, SPA 001S, SPA 002, SPA 002S, SPA 002V, SPA 002Y, SPA 003, SPA 003S, SPA 003V or SPA 003Y. GE credit: AH, WC. Effective: 2016 Summer Special Session.

SPA 001S—Elementary Spanish (5)
Lecture/Discussion—5 hours. Introduction to Spanish grammar and development of all language skills in a cultural context with special emphasis on communication. Offered in a Spanish speaking country under the supervision of a UC Davis faculty/lecturer. Not open for credit to students who have taken equivalent SPA 001. GE credit: AH, WC. Effective: 2016 Spring Quarter.
SPA 001Y—Elementary Spanish (5)
Lecture/Discussion—3 hours; Web Electronic Discussion—1 hour; Web Virtual Lecture—1 hour. Introduction to Spanish grammar and development of all language skills in a cultural context with special emphasis on communication. Not open for credit for students who have completed equivalent courses SPA 001 or SPA 001S; students who have completed Spanish 2 or 3 in the 10th grade of high school may receive unit credit for this course on a P/NP basis only; although a passing grade will be charged to the student's P/NP option, no petition is required; all other students will receive a letter grade unless a P/NP petition is filed. GE credit: AH, WC. Effective: 2019 Spring Quarter.

SPA 002—Elementary Spanish (5) Review all entries
Lecture/Discussion—5 hours. Prerequisite(s): SPA 001 or SPA 001S; Or the equivalent. Continuation of courses 1 and 1S in the areas of grammar and basic language skills. Not open for credit for students who have completed equivalent SPA 002S, SPA 002V or SPA 002Y. GE credit: AH, WC. Effective: 2016 Winter Quarter.

SPA 002—Elementary Spanish (5) Review all entries
Lecture/Discussion—5 hours. Prerequisite(s): SPA 001 or SPA 001S or SPA 001Y; Or the equivalent. Continuation of courses 001 and 001S in the areas of grammar and basic language skills. Not open for credit for students who have completed equivalent SPA 002S, SPA 002V or SPA 002Y. GE credit: AH, WC. Effective: 2019 Spring Quarter.

SPA 002S—Elementary Spanish (5) Review all entries
Lecture/Discussion—5 hours. Prerequisite(s): SPA 001 or SPA 001S Continuation of Spanish 001 and 001S in the areas of grammar and basic language skills. Offered in a Spanish speaking country under the supervision of UC Davis faculty/lecturer. Not open for credit to students who have taken course SPA 002, SPA 002V or SPA 002Y. GE credit: AH, WC. Effective: 2016 Spring Quarter.

SPA 002S—Elementary Spanish (5) Review all entries
Lecture/Discussion—5 hours. Prerequisite(s): SPA 001 or SPA 001S or SPA 001Y Continuation of course 001, 001S, or previous high school experience in the areas of grammar and basic language skills. Online format combining synchronous chatting with technologically based materials. Not open for credit to students who have taken equivalent SPA 002, SPA 002S, SPA 002Y, or higher. GE credit: AH, WC. Effective: 2019 Spring Quarter.

SPA 002V—Elementary Spanish (5) Review all entries
Web Electronic Discussion—2 hours; Web Virtual Lecture—3 hours. Prerequisite(s): SPA 001 or SPA 001S; Or the equivalent. Continuation of course 001, 001S, or previous high school experience in the areas of grammar and basic language skills. Online format combining synchronous chatting with technologically based materials. Not open for credit to students who have taken equivalent SPA 002, SPA 002S, SPA 002Y, or higher. GE credit: AH, WC. Effective: 2017 Spring Quarter.

SPA 002V—Elementary Spanish (5) Review all entries
Web Electronic Discussion—2 hours; Web Virtual Lecture—3 hours. Prerequisite(s): SPA 001 or SPA 001S or SPA 001Y; Or the equivalent. Continuation of course 001, 001S, or previous high school experience in the areas of grammar and basic language skills. Online format combining synchronous chatting with technologically based materials. Not open for credit to students who have taken equivalent SPA 002, SPA 002S, SPA 002Y, or higher. GE credit: AH, WC. Effective: 2019 Spring Quarter.

SPA 002Y—Elementary Spanish (5)
Lecture/Discussion—3 hours; Web Electronic Discussion—2 hours. Prerequisite(s): SPA 001 or SPA 001S Continuation of course 1 or 1S in the areas of grammar and basic language skills. Hybrid format combining classroom instruction with technologically based materials. Not open for credit to students who have taken equivalent course SPA 002, SPA 002S, or SPA 002V. GE credit: AH, WC. Effective: 2016 Winter Quarter.

SPA 003—Elementary Spanish (5)
Lecture/Discussion—5 hours. Prerequisite(s): SPA 002 or SPA 002S or SPA 002V or SPA 002Y Completion of grammar sequence and continuing practice of all language skills using cultural texts. Not open for credit for students who have completed equivalent course SPA 003S, SPA 003V or SPA 003Y. GE credit: AH, WC. Effective: 2016 Spring Quarter.

SPA 003S—Elementary Spanish (5)
Lecture/Discussion—5 hours. Prerequisite(s): SPA 002 or SPA 002S or SPA 002V or SPA 002Y Completion of grammar sequence and continuing practice of all language skills using cultural texts. Offered in a Spanish speaking country under the supervision of UC Davis faculty. Not open for credit for students who have completed equivalent SPA 003, SPA 003V or SPA 003Y. GE credit: AH, WC. Effective: 2016 Spring Quarter.
SPA 003V—Elementary Spanish (5)
Web Electronic Discussion—2 hours; Web Virtual Lecture—3 hours. Prerequisite(s): SPA 002 or SPA 002S or SPA 002V or SPA 002Y. Continuation of course 2, 2S, 2V or 2Y. Online format combining synchronous chatting with technologically based materials. Not open to students who have taken equivalent SPA 003, SPA 003S, SPA 003Y, or higher. GE credit: AH, WC. Effective: 2016 Winter Quarter.

SPA 003Y—Elementary Spanish (5)
Lecture/Discussion—3 hours; Web Electronic Discussion—2 hours. Prerequisite(s): SPA 002 or SPA 002S or SPA 002V or SPA 002Y. Completion of grammar sequence and continuing practice of all language skills using cultural texts. Hybrid format combining classroom instruction with technologically based materials. Not open to students who have taken equivalent SPA 003, SPA 003S, or SPA 003V. GE credit: AH, WC. Effective: 2016 Winter Quarter.

SPA 008—Elementary Spanish Conversation (2)
Discussion—3 hours. Prerequisite(s): (SPA 003 or SPA 003V or SPA 003Y); SPA 021 (concurrently) recommended. Not open to native speakers or upper division students. Designed to develop oral communication skills. Emphasis on increasing vocabulary, improving listening comprehension, pronunciation, accuracy and grammar control. Practice of everyday situations. GE credit: OL, WC. Effective: 2018 Spring Quarter.

SPA 021—Intermediate Spanish (5)
Lecture/Discussion—5 hours. Prerequisite(s): SPA 003 or SPA 003S or SPA 003V or SPA 003Y. Review and development of grammar, vocabulary and composition acquired in the first year through exercises and reading of modern texts. Not open for credit for students who have completed equivalent SPA 021S, SPA 021V or SPA 021Y. GE credit: AH, WC. Effective: 2016 Spring Quarter.

SPA 021S—Intermediate Spanish (5)
Lecture/Discussion—5 hours. Prerequisite(s): SPA 003 or SPA 003S or SPA 003V or SPA 003Y. Review and development of the grammar, vocabulary and composition acquired in the first year through exercises and reading of modern texts. Not open for credit for students who have completed equivalent SPA 021, SPA 021V or SPA 021Y. GE credit: AH, WC. Effective: 2016 Spring Quarter.

SPA 021V—IIntermediate Spanish I (5)
Web Electronic Discussion—2 hours; Web Virtual Lecture—3 hours. Prerequisite(s): SPA 003 or SPA 003Y or SPA 003Y; Or the equivalent from previous high school language experience. Continuation of course 3, 3V, 3Y, 3S, or previous high school experience in the areas of grammar and intermediate language skills. Online format combining synchronous chatting with technologically based materials. Not open for credit to students who have taken equivalent SPA 021, SPA 021Y or SPA 021S. GE credit: AH, OL, WC, WE. Effective: 2016 Spring Quarter.

SPA 021Y—Intermediate Spanish (5)
Lecture/Discussion—3 hours; Web Electronic Discussion—2 hours. Prerequisite(s): SPA 003 or SPA 003S or SPA 003V or SPA 003Y. Continuation of courses 3, 3S, 3Y and 3Y in the areas of grammar and basic language skills. Hybrid format combining classroom instruction with technologically based materials where learning takes place both face-to-face and online. Not open for credit to students who have taken equivalent SPA 021, SPA 021S or SPA 021V. GE credit: AH, WC. Effective: 2016 Spring Quarter.

SPA 022—Intermediate Spanish (5)
Lecture/Discussion—5 hours. Prerequisite(s): SPA 021 or SPA 021S or SPA 021V or SPA 021Y. Development of all language skills through exercises and reading of modern texts. Development on more difficult grammar concepts and further practice on composition. Not open for credit for students who have completed equivalent SPA 022S, SPA 022V or SPA 022Y. GE credit: AH, WC. Effective: 2016 Spring Quarter.

SPA 022S—Intermediate Spanish (5)
Lecture/Discussion—5 hours. Prerequisite(s): SPA 021 or SPA 021S or SPA 021V or SPA 021Y. Development of all language skills through exercises and reading of modern texts. Development of more difficult grammar concepts and further practice on composition. Not open for credit for students who have completed equivalent SPA 022, SPA 022V or SPA 022Y. GE credit: AH, WC. Effective: 2016 Spring Quarter.

SPA 022V—Intermediate Spanish II (5)
Web Electronic Discussion—2 hours; Web Virtual Lecture—3 hours. Prerequisite(s): SPA 021 or SPA 021S or SPA 021V or SPA 021Y; Or equivalent from previous high school language experience. Continuation of course 21, 21V, 21Y, 22S, or previous high school experience in the areas of grammar and intermediate language skills. Online format combining synchronous chatting with technologically based materials. Not open for credit to students who have taken SPA 022, SPA 022Y, or SPA 022S. GE credit: AH, OL, SS, WC, WE. Effective: 2016 Spring Quarter.
SPA 022Y—Intermediate Spanish (5)
Lecture/Discussion—3 hours; Web Electronic Discussion—2 hours. Prerequisite(s): SPA 021 or SPA 021S or SPA 021V or SPA 021Y Continuation of course 21, 21S, or 21V in the areas of grammar and basic language skills. Online format combining synchronous chatting with technologically based materials. Not open to students who have taken equivalent SPA 022, SPA 022S or SPA 022V. GE credit: AH, WC. Effective: 2016 Winter Quarter.

SPA 023—Spanish Composition I (4)
Extensive Writing; Lecture—3 hours. Prerequisite(s): SPA 022 or SPA 022S or SPA 022V or SPA 022Y Development of writing skills by way of reading, discussion, and analysis of authentic materials, literary texts, and videos. Selective review of grammar. Composition, journals, individual and group projects. Not open for students who have completed equivalent SPA 023S. GE credit: AH, WC, WE. Effective: 2016 Winter Quarter.

SPA 023S—Spanish Composition I (4)
Extensive Writing; Lecture—3 hours. Prerequisite(s): SPA 022 or SPA 022S or SPA 022V or SPA 022Y Development of writing skills by way of reading, discussion, and analysis of authentic materials, literary texts, and videos. Selective review of grammar. Composition, journals, individual and group projects. Course is taught in a Spanish speaking country. Not open for credit to students who have completed equivalent SPA 023. GE credit: AH, WC, WE. Effective: 2016 Winter Quarter.

SPA 024—Spanish Composition II (4)
Extensive Writing; Lecture—3 hours. Prerequisite(s): SPA 023 or SPA 023S Development of advanced level writing skills, with emphasis on how to write argumentative prose, essays, and research papers. Introduction to the analysis of literary genres. Compositions, journals, individual and group projects. Not open for credit to students who have completed equivalent SPA 024S. GE credit: AH, WC, WE. Effective: 2016 Winter Quarter.

SPA 024S—Spanish Composition II (4)
Extensive Writing; Lecture—3 hours. Prerequisite(s): SPA 023 or SPA 023S Development of advanced level writing skills, with emphasis on how to write argumentative prose, essays, and research papers. Introduction to the analysis of literary genres. Compositions, journals, individual and group projects. Not open for credit to students who have completed equivalent SPA 024. GE credit: AH, WC, WE. Effective: 2016 Winter Quarter.

SPA 028—Intermediate Spanish Conversation (2)
Discussion—3 hours. Prerequisite(s): SPA 008 or SPA 022 or SPA 022V or SPA 022Y Continuation of course 8. Designed to develop oral communication skills at a more advanced level. Practice in more complex situations. (Former course 9) GE credit: OL, WC. Effective: 2018 Spring Quarter.

SPA 031—Intermediate Spanish for Native Speakers I (5)
Extensive Writing; Lecture/Discussion—3 hours; Tutorial—1 hour. Prerequisite(s): SPA 003 or SPA 003V or SPA 003Y; Or equivalent course or consent of instructor. First course of a three-quarter series designed to provide bilingual students whose native language is Spanish with the linguistic and learning skills required for successfully completing upper division courses in Spanish. Intensive review of grammar and composition. GE credit: AH, OL, WC, WE. Effective: 2018 Winter Quarter.

SPA 032—Intermediate Spanish for Native Speakers II (5)
Extensive Writing; Lecture/Discussion—3 hours; Tutorial—1 hour. Prerequisite(s): SPA 031; Consent of Instructor. Continuation of Spanish 31, intensive review of grammar and composition. Development of all language skills through reading of modern texts, presentation/discussion of major ideas, vocabulary expansion, and writing essays on topics discussed. Designed for students whose native language is Spanish. GE credit: AH, OL, WC, WE. Effective: 2016 Winter Quarter.

SPA 033—Intermediate Spanish for Native Speakers III (5)
Extensive Writing; Lecture/Discussion—3 hours; Tutorial—1 hour. Prerequisite(s): SPA 032; Consent of Instructor. Development of writing skills, with emphasis on experimenting with various writing styles: analytical, argumentative, and creative. Analytical review of literary genres. Written essays will be assigned. Students will develop a research paper. Designed for students whose native language is Spanish. GE credit: AH, OL, WC, WE. Effective: 2016 Winter Quarter.

SPA 098—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of instructor and department chairperson. Primarily for lower division students. (P/ NP grading only.) Effective: 1997 Winter Quarter.
SPA 098F—Student Facilitated Course (1-4)
Variable—1-4 hours. Prerequisite(s): Consent of Instructor. Student facilitated course intended primarily for lower division students. (P/NP grading only.) Effective: 2017 Winter Quarter.

SPA 099—Special Study for Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

SPA 100—Principles of Hispanic Literature and Criticism (4)
Extensive Writing/Discussion—1 hour; Lecture—3 hours. Prerequisite(s): SPA 024 or SPA 024S or SPA 033 Principles of literary criticism applied to the study of fiction, drama, poetry, and essay of major literary writers of the Hispanic world. Not open for credit to students who have taken SPA 100S. GE credit: AH, OL, WC, WE. Effective: 2004 Spring Quarter.

SPA 100S—Principles of Hispanic Literature and Criticism (4)
Extensive Writing/Discussion—1 hour; Lecture—3 hours. Prerequisite(s): SPA 024 or SPA 033 Principles of literary criticism applied to the study of fiction, drama, poetry and essay of major literary writers of the Hispanic world. Offered in a Spanish speaking country under the supervision of a UC Davis faculty/lecturer. Not open to students who have taken equivalent SPA 100. GE credit: AH, OL, WC, WE. Effective: 2002 Spring Quarter.

SPA 110—Advanced Spanish Composition (4)
Lecture—3 hours. Prerequisite(s): SPA 024 or SPA 033 Practice in expository writing with emphasis on clarity and idiomatic expression. Practical application and review of selected grammar topics. (Part of former courses 110A and 110B) GE credit: WE. Effective: 1997 Winter Quarter.

SPA 111N—The Structure of Spanish: Sounds and Words (3)
Lecture—3 hours. Prerequisite(s): (SPA 024 or SPA 033); or Consent of Instructor. LIN 001 recommended. Linguistic description of the sound patterns of Spanish and how those sounds can be used to form larger units, such as morphemes and words. Theoretical and practical comparisons with English and with other Romance languages. ( Former course 132.) GE credit: SS. Effective: 2016 Fall Quarter.

SPA 112N—The Structure of Spanish: Words and Phrases (3)
Lecture—3 hours. Prerequisite(s): SPA 111N; or Consent of Instructor. A study of Spanish word and phrase structure, with special emphasis on the constituent structure of noun and verb phrases. Theoretical and practical comparisons with English and with other Romance languages. (Former course 131.) GE credit: SS. Effective: 2016 Fall Quarter.

SPA 113—Spanish Pronunciation (4)
Lecture—3 hours; Term Paper. Prerequisite(s): (SPA 024 or SPA 033); LIN 001 recommended. Sound structure of modern Spanish; theoretical analysis of selected problems in pronunciation. Strongly recommended for prospective teachers of Spanish. GE credit: SS. Effective: 2016 Fall Quarter.

SPA 114N—Contrastive Analysis of English and Spanish (4)
Extensive Writing; Lecture—3 hours. Prerequisite(s): SPA 024 or SPA 033; or Consent of Instructor. SPA 111N and SPA 112N recommended. Contrastive analysis of English and Spanish, error analysis, introduction to structuralist and transformational linguistics. Individual and group conferences. (Former course 137) GE credit: SS. Effective: 2016 Fall Quarter.

SPA 115—History of the Spanish Language (4)
Extensive Writing/Discussion—1 hour; Lecture—3 hours. Prerequisite(s): SPA 024 or SPA 033; or Consent of Instructor. LIN 001 recommended. Spanish language from its roots in spoken Latin to modernity. Emphasis on the close relationship between historical events and language change, and the role that literature plays in language standardization. Not open to students who have completed equivalent SPA 115S. GE credit: AH, SS. Effective: 2016 Fall Quarter.

SPA 115S—History of the Spanish Language (4)
Extensive Writing/Discussion—1 hour; Lecture—3 hours. Prerequisite(s): SPA 024 or SPA 033; or Consent of Instructor. LIN 001 recommended. Spanish language from its roots in spoken Latin to modernity. Emphasis on the close relationship between historical events and language change, and the role that literature plays in language standardization. Offered in a Spanish speaking country under the supervision of a UC Davis faculty/lecturer. Not open to students who have completed equivalent course 115. GE credit: AH, SS. Effective: 2016 Fall Quarter.

SPA 116—Applied Spanish Linguistics (4)
Extensive Writing/Discussion—1 hour; Lecture—3 hours. Prerequisite(s): SPA 024 or SPA 033; or Consent of Instructor. LIN 001 recommended. Exploration of the major theoretical and practical issues concerning learning
Spanish as a second language. For students interested in teaching Spanish as a career. Not open to students who have taken equivalent SPA 116S. GE credit: SS. Effective: 2016 Fall Quarter.

SPA 116S—Applied Spanish Linguistics (4)
Extensive Writing/Discussion—1 hour; Lecture—3 hours. Prerequisite(s): SPA 024 or SPA 033; or Consent of Instructor. LIN 001 recommended. Exploration of the major theoretical and practical issues concerning learning Spanish as a second language. For students interested in teaching Spanish as a career. Offered in a Spanish speaking country, in Spanish, under the supervision of UC Davis faculty. Not open to students who have taken SPA 116. GE credit: SS. Effective: 2016 Fall Quarter.

SPA 117—Teaching Spanish as a Native Tongue in the U.S.: Praxis and Theory (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): SPA 024 or SPA 033; or Consent of Instructor. LIN 001 recommended. Designed for students interested in teaching Spanish to native speakers. Focus on cultural diversity of the Spanish speaking population in the United States; applied language teaching methodologies in the context of teaching Spanish to native speakers at different levels. GE credit: OL. Effective: 2016 Fall Quarter.

SPA 118—Topics in Spanish Linguistics (4)
Lecture—3 hours; Term Paper. Prerequisite(s): SPA 111N; or Consent of Instructor. Study of specialized topics in Spanish linguistics, for example: language and use; text and context; language and society; bilingualism; Spanish dialectology; syntax and semantics. May be repeated once for credit when topic differs. May be repeated up to 1 time(s). GE credit: SS. Effective: 2016 Fall Quarter.

SPA 123—Creative Writing in Spanish (4)
Discussion—4 hours. Prerequisite(s): SPA 024 or SPA 033; or Consent of Instructor. Intensive writing of poetry or fiction in Spanish or in a bilingual (Spanish/English) format. Students will write both in prescribed forms and in experimental forms of their own choosing. GE credit: WE. Effective: 1997 Winter Quarter.

SPA 130—Survey of Spanish Literature to 1700 (4)
Lecture—3 hours; Term Paper. Prerequisite(s): SPA 100 or SPA 100S or SPA 141 or SPA 141S or SPA 170 or SPA 170S Survey of Spanish literature (narrative, poetry and drama) to 1700. Emphasis on the multicultural birth of the Spanish culture, the formation and growth of the Spanish language and letters through its written records and the literature of the early period. GE credit: AH, WC. Effective: 2008 Summer Session 1.

SPA 131N—Survey of Spanish Literature: 1700 to Present (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): SPA 100 or SPA 100S or SPA 141 or SPA 141S or SPA 170 or SPA 170S Survey of modern Spanish literature, providing an overview of main literary movements (romanticism, realism, naturalism, modernism, avantgarde). Emphasis on the philosophical and historical background and on the European context for modern Spanish literature. (Part of former courses 104A and 104B.) GE credit: AH, WC. Effective: 2008 Summer Session 1.

SPA 132—Golden Age Drama and Performance (4)
Lecture—1.5 hours; Performance Instruction—1.5 hours. Prerequisite(s): SPA 100 or SPA 100S or SPA 141 or SPA 141S or SPA 170 or SPA 170S Limited enrollment. Golden Age drama: text and performance. Study of Spanish Baroque drama as performance art. Close reading of plays and related aspects of seventeenth-century theater: theatrical spaces, staging, performance, actors, public, language, costumes. Final project is performance of a play. May be repeated up to 2 time(s). GE credit: AH, OL, VL, WC. Effective: 2007 Winter Quarter.

SPA 133N—Golden Age Literature of Spain (4)
Lecture—3 hours; Term Paper. Prerequisite(s): SPA 100 or SPA 100S or SPA 141 or SPA 141S or SPA 170 or SPA 170S Introduction to the study of the principal authors and literary movements of 16th- and 17th-century Spain and Spanish American colonial literature. May be repeated up to 3 time(s) with consent of instructor. GE credit: AH, OL, WC, WE. Effective: 2008 Summer Session 1.

SPA 134A—Don Quijote I (4)
Lecture—3 hours; Term Paper. Prerequisite(s): SPA 100 or SPA 100S or SPA 141 or SPA 141S or SPA 170 or SPA 170S Critical interpretation of Don Quijote Part One by Cervantes. Focused study of key elements within the socio-cultural context of Golden Age Spain. Don Quijote as prototype for the modern novel. GE credit: AH, WC, WE. Effective: 2007 Fall Quarter.

SPA 134B—Don Quijote II (4)
Lecture—3 hours; Term Paper. Prerequisite(s): SPA 134A Critical interpretation of Don Quijote Part Two by Cervantes. Focused study of key elements within the socio-cultural context of Golden Age Spain. Don Quijote as prototype for the modern novel. GE credit: AH, WC, WE. Effective: 2006 Winter Quarter.
SPA 135N—Spanish Romanticism (4)
Lecture—3 hours; Term Paper. Prerequisite(s): SPA 100 or SPA 100S or SPA 141 or SPA 141S or SPA 170 or SPA 170S
Romanticism as a philosophical concept, and as a literary movement in Spain, with emphasis on its distinctive, specific "romantic" qualities and its literary expression in five leading authors of the early nineteenth century. (Former course 114.) GE credit: AH, WC. Effective: 2008 Summer Session 1.

SPA 136N—The Spanish Novel of the 19th Century (4)
Lecture—3 hours; Term Paper. Prerequisite(s): SPA 100 or SPA 100S or SPA 141 or SPA 141S or SPA 170 or SPA 170S
Literary realism in Spain, focusing on Leopoldo Alas (Clarín), Emilia Pardo Bazán and Benito Pérez Galdós unique characteristics of Spanish realism and its historical roots in Cervantes and the picaresque. GE credit: AH, WC, WE. Effective: 2008 Summer Session 1.

Lecture—3 hours; Project (Term Project)—1 hour. Prerequisite(s): SPA 024 or SPA 024S or SPA 033 Study of specific historical tendencies in Spanish culture(s) from the Romans to the present. Sources studied may include literature, film, art, journalism, and performance. Approaches to material may address issues of aesthetics, politics, identity, and globalization. May be repeated up to 1 time(s). GE credit: AH, WC. Effective: 2005 Fall Quarter.
SPA 147—Anglos, Latinos and the Spanish Black Legend: The Origins and Educational Implications of Anti-Hispanic Prejudice (4)
Fieldwork; Lecture/Discussion—3 hours; Term Paper. Examination of Anti-Hispanic prejudice in the United States focusing on the "Black Legend," a 16th Century anti-Spanish myth underpinning the doctrine of "Manifest Destiny." Exploration of the Legend's presence in contemporary American society through interviews and analysis of school textbooks. (Same course as EDU 147.) GE credit: ACGH, AH, DD, WE. Effective: 2016 Fall Quarter.

SPA 148—Cinema in the Spanish-Speaking World in Translation (4)
Film Viewing—3 hours; Lecture—3 hours. Prerequisite(s): SPA 024 or SPA 024S or SPA 033 Analysis of the culture of the Spanish-speaking world through film in translation. Emphasis on the cultural information illustrated by the films; no prior knowledge of cinematography required. Films with subtitles. Not open for students who have completed equivalent SPA 148S. GE credit: AH, VL, WC. Effective: 2004 Fall Quarter.

SPA 148S—Cinema in the Spanish-Speaking World in Translation (4)
Film Viewing—3 hours; Lecture—3 hours. Prerequisite(s): SPA 024 or SPA 033 Analysis of the culture of the Spanish-speaking world through film in translation. Emphasis on the cultural information illustrated by the films; no prior knowledge of cinematography required. Films with subtitles. Offered in a Spanish speaking country, in Spanish, under the supervision of UC Davis faculty. Not open to students who have taken equivalent SPA 148. GE credit: AH, VL, WC. Effective: 2002 Spring Quarter.

SPA 149—Latin-American Literature in Translation (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): ENL 003; Or the equivalent of ENL 003. Reading, lectures and discussions in English of works by Borges, Cortázar, Fuentes, García Márquez, Paz and others. May not be counted toward the major in Spanish. GE credit: AH, WC, WE. Effective: 1997 Winter Quarter.

SPA 149—Latin-American Literature in Translation (4)
Review all entries
Lecture/Discussion—3 hours; Term Paper. Reading, lectures and discussions in English of works by Borges, Cortázar, Fuentes, Garcia Márquez, Paz and others. GE credit: AH, WC, WE. Effective: 2008 Summer Session 1.

SPA 150N—Survey of Latin American Literature to 1900 (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): SPA 100 or SPA 100S or SPA 141 or SPA 141S or SPA 170 or SPA 170S Latin American literature from preconquest texts and the chronicles of the Conquest to romanticism and modernism. Reading selections include fiction, poetry, drama and essays. GE credit: AH, WC. Effective: 2008 Summer Session 1.

SPA 151—Survey of Latin American Literature 1900 to Present (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): SPA 100 or SPA 100S or SPA 141 or SPA 141S or SPA 170 or SPA 170S Latin American literature from 1900 to the present. Reading selections include fiction, poetry, drama, essays, testimonio, etc. GE credit: AH, WC. Effective: 2008 Fall Quarter.

SPA 153—Latin American Short Story (4)
Lecture—3 hours; Term Paper. Prerequisite(s): SPA 100 or SPA 100S or SPA 141 or SPA 141S or SPA 170 or SPA 170S Evolution of the Latin American short story from the 19th century to the present. Emphasis on the contemporary period. GE credit: AH, WC. Effective: 2008 Summer Session 1.

SPA 154—Latin American Novel (4)
Lecture—3 hours; Term Paper. Prerequisite(s): SPA 100 or SPA 100S or SPA 141 or SPA 141S or SPA 170 or SPA 170S Evolution of the Latin American novel from the 19th century to the present. Emphasis on significant contemporary works. GE credit: AH, WC. Effective: 2008 Summer Session 1.

SPA 155—Mexican Novel (4)
Lecture—3 hours; Term Paper. Prerequisite(s): SPA 100 or SPA 100S or SPA 141 or SPA 141S or SPA 170 or SPA 170S Evolution of the Mexican novel from the 19th century to the present. Emphasis on the narrative of the Revolution and significant contemporary works. GE credit: AH, WC. Effective: 2008 Summer Session 1.

SPA 156—Latin American Literature of the Turn of the 20th Century (4)
Lecture—3 hours; Term Paper. Prerequisite(s): SPA 100 or SPA 100S or SPA 141 or SPA 141S or SPA 170 or SPA 170S Modernism as an authentic expression of Latin American literature and its influence on 20th-century poetry and prose. In depth analysis of the works of Dario and other major writers of the era. Offered in alternate years. GE credit: AH, WC. Effective: 2008 Summer Session 1.

SPA 157—Great Works of Latin American Literature/Culture (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): SPA 100 or SPA 100S or SPA 141 or SPA 141S or SPA 170 or SPA 170S Study of major works of Latin American literature/culture and their cultural and literary milieus.
May include novels, poetry, film, etc. Works may be analyzed in terms of style, influence, cultural significance, political importance, and/or commercial success. GE credit: AH, WC. Effective: 2008 Fall Quarter.

SPA 158—Latin American Poetry: From Vanguardism to Surrealism and Beyond (4)
Lecture—3 hours; Term Paper. Prerequisite(s): SPA 100 or SPA 100S or SPA 141 or SPA 141S or SPA 170 or SPA 170S Study of vanguardism, surrealism, and more recent movements of Latin American poetry. An in-depth analysis of the works of such major poets as Neruda, Vallejo, and Paz. GE credit: AH, WC. Effective: 2008 Summer Session 1.

SPA 159—Special Topics in Latin American Literature and Culture (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): SPA 100 or SPA 100S or SPA 141 or SPA 141S or SPA 170 or SPA 170S; One course. Special topics in the study of Latin American literature and culture. May be repeated up to 1 time(s) when topic or subject differs; students may take any SPA 159 course two times total in combination. GE credit: AH, WC. Effective: 2015 Winter Quarter.

SPA 159S—Special Topics in Latin American Literature and Culture (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): SPA 100 or SPA 100S or SPA 141 or SPA 141S or SPA 170 or SPA 170S; One course. Special topics in the study of Latin American literature and culture. Offered in a Spanish speaking country under the supervision of UC Davis faculty. May be repeated up to 1 time(s) when topic or subject differs; students may take any SPA 159 course two times total in combination. GE credit: AH, WC. Effective: 2015 Winter Quarter.

SPA 159Y—Special Topics in Latin American Literature and Culture (4)
Lecture/Discussion—1 hour; Web Virtual Lecture—3 hours. Prerequisite(s): SPA 100 or SPA 100S or SPA 141 or SPA 141S or SPA 170 or SPA 170S; One course. Special topics in the study of Latin American literature and culture. Hybrid format combining classroom instruction with technologically based materials. May be repeated up to 1 time(s) when topic or subject differs; students may take any Spanish 159 course two times total in combination. GE credit: AH, WC. Effective: 2016 Spring Quarter.

SPA 160—Latin American Women Writers in Translation (4)
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): Upper division standing or consent of instructor. Latin American women writers from the 19th and 20th centuries. Recent theoretical approaches to literature by women in Latin America. Discussions in English of works by Matto de Turner, Avellaneda, Storni, Ocampo, Agustini, Mistral, Castellanos, and others. GE credit: AH, WC. Effective: 2005 Spring Quarter.

SPA 170—Introduction to Latin American Culture (4)
Lecture—3 hours; Term Paper. Prerequisite(s): SPA 024 or SPA 024S or SPA 033 Introduction to history, geography and culture of Latin America. Multiple genres of cultural production and representation, with a focus on cultural diversity and regional difference. Introduction to critical reading and textual analysis. Not open for students who have completed equivalent course SPA 170S. GE credit: AH, VL, WC, WE. Effective: 2008 Summer Session 1.

SPA 170S—Introduction to Latin American Culture (4)
Lecture—3 hours; Project (Term Project). Prerequisite(s): SPA 024 or SPA 024S or SPA 033 Introduction to history, geography and culture of Latin America. Multiple genres of cultural production and representation, with a focus on cultural diversity and regional difference. Introduction to critical reading and textual analysis. Offered in a Spanish-speaking country. Not open for students who have completed equivalent SPA 170. GE credit: AH, VL, WC, WE. Effective: 2008 Summer Session 1.

SPA 171—Music from Latin America (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Consent of Instructor. Examination of music from Latin America. Characteristic music (i.e. tango, bossa nova, salsa, musica motena, musica andina) as well as its implications in other musical genres. Taught in English or Spanish depending on instructor. May be repeated up to 1 time(s) when the topic differs. Not open to students who have taken SPA 171S or MUS 127S. (Same course as MUS 127.) GE credit: AH, VL, WC, WE. Effective: 2018 Winter Quarter.

SPA 171S—Music from Latin America (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Consent of Instructor. Examination of music from Latin America. Characteristic music (i.e. tango, bossa nova, salsa, musica motena, musica andina) as well as its implications in other musical genres. Taught in English or Spanish depending on instructor. May be repeated up to 1 time(s) when content differs. Not open to students who have taken SPA 171 or MUS 127. (Same course as MUS 127S.) GE credit: AH, VL, WC, WE. Effective: 2018 Winter Quarter.

SPA 172—Mexican Culture (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): SPA 024 or SPA 024S or SPA 033 Study of
Mexican culture through a diversity of cultural expression, including elite, popular and mass media culture. Focus on national icons and archetypes, multiculturalism, transnationalism. May be repeated up to 1 time(s). GE credit: AH, VL, WC. Effective: 2008 Fall Quarter.

SPA 173—Cinema and Latin American Culture (4)
Film Viewing—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): SPA 024 or SPA 024S or SPA 033 Understanding Latin American cultures through cinema. History and critical analysis of Latin American film. Focus on a national cinematic tradition. Comparative experiences in different parts of Latin America and/or a particular era. Conducted entirely in Spanish. May be repeated up to 1 time(s) when topic differs. GE credit: AH, VL, WC. Effective: 2005 Spring Quarter.

SPA 174—Chicano Culture (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): SPA 024 or SPA 033 An interdisciplinary survey of Chicano culture. Topics include literature, art, folklore, oral tradition, music, politics, as well as everyday cultural manifestations. Conducted in Spanish. (Former course 124.) GE credit: ACGH, AH, DD. Effective: 1997 Winter Quarter.

SPA 175—Topics in Latin American Cultural Studies (4)
Lecture—3 hours; Project (Term Project)—1 hour. Prerequisite(s): SPA 024 or SPA 024S or SPA 033 Specific historical tendencies and issues in Latin American culture(s) from precolombian times to present. Studies of literature, film, art, journalism and performance. Focus on issues of aesthetics, politics, identity, and globalization. May be repeated up to 1 time(s) content differs. GE credit: AH, VL, WC, WE. Effective: 2008 Fall Quarter.

SPA 176—Literature in Spanish Written in the United States (4)
Lecture—3 hours; Term Paper. Prerequisite(s): SPA 024 or SPA 033 Survey of the literary and cultural contributions of the main Spanish-speaking populations present in the U.S.: Chicanos, Puerto Ricans, Cuban-Americans, Central Americans, and other Latinos. GE credit: ACGH, AH, DD. Effective: 1997 Winter Quarter.

SPA 177—California and Latin America (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): SPA 024 or SPA 024S or SPA 033 Interdisciplinary survey on the relationship between California and Latin America (1500s-present). Latin American representations of California and Californian representations of Latin America, as well as borderlands texts, with a special focus on Mexican-American perspectives. Conducted in Spanish. GE credit: ACGH, DD. Effective: 2008 Fall Quarter.

SPA 178A—Spanish for the Professions (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): SPA 024 or SPA 024S or SPA 033 For students with an advanced level of Spanish interested in the use of Spanish in the health care, legal and law enforcement and marketing and business professions. Field trips documenting the use of Spanish in the public context. GE credit: AH, DD, OL, SS, WE. Effective: 2014 Fall Quarter.

SPA 179—Science and Politics of the Human Body in the Spanish-Speaking World (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Interaction between the interpretations of scientific ideas, philosophical issues, and politics concerning the human body in the Spanish-speaking world through different historical periods. Not open to students who have taken equivalent SPA 179Y. GE credit: AH, SE, SS. Effective: 2015 Fall Quarter.

SPA 179Y—Science and Politics of the Human Body in the Spanish-Speaking World (4)
Discussion—2 hours; Web Virtual Lecture—2 hours. Interaction between the interpretations of scientific ideas, philosophical issues, and politics concerning the human body in the Spanish-speaking world through different historical periods. Not open for credit to students who have taken equivalent SPA 179. GE credit: AH, SE, SS. Effective: 2015 Fall Quarter.

SPA 180—Senior Seminar in Spanish Linguistics (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Senior standing; a major in Spanish or consent of instructor. Limited enrollment. Group study of a special topic drawn from Spanish linguistics. Independent research project. May be repeated up to 1 time(s). GE credit: AH, OL, SS, WE. Effective: 2007 Fall Quarter.

SPA 181—Senior Seminar in Spanish Literature/Culture (4)
Seminar—3 hours; Term Paper—1 hour. Prerequisite(s): Senior standing; a major in Spanish or consent of instructor. Limited enrollment. Group study of a special topic drawn from Spanish literary or cultural studies. Independent research project. May be repeated up to 1 time(s) if content differs. GE credit: AH, OL, WE. Effective: 2006 Fall Quarter.
SPA 182—Senior Seminar in Latin American Literature/Culture (4)
Seminar—3 hours; Term Paper—1 hour. Prerequisite(s): Senior standing; a major in Spanish or consent of instructor. Limited enrollment. Group study of a special topic drawn from Latin American literary or cultural studies. Independent research project. May be repeated up to 1 time(s) if content differs. GE credit: AH, OL, WC, WE. Effective: 2006 Fall Quarter.

SPA 192I—Internship in Spanish (1-12)
Independent Study—3:36 hours. Prerequisite(s): SPA 023; and Consent of Instructor. Junior standing; major in Spanish, Chicano Studies, or a related field. Internships in fields where Spanish language skills can be used and perfected (teaching, counseling, translating-interpreting). May be repeated up to 8 unit(s) Units will not count toward the Spanish major. (P/NP grading only.) Effective: 1997 Winter Quarter.

SPA 194H—Special Study for Honors Students (1-5)
Independent Study—3:15 hours. Prerequisite(s): Consent of Instructor. Senior standing and qualification for the Spanish honors program. Guided research, under the direction of a faculty member, leading to a senior honors thesis on a topic in Spanish literature, civilization, or language studies. May be repeated up to 8 unit(s). (P/NP grading only.) GE credit: AH, WC, WE. Effective: 2000 Winter Quarter.

SPA 197T—Tutoring in Spanish (1-4)
Tutorial—1:4 hours. Prerequisite(s): Upper division standing and permission of the chair. Tutoring in undergraduate courses including leadership in small voluntary discussion groups affiliated with departmental courses. May be repeated for credit for a total of 6 units. May be repeated up to 6 unit(s). (P/NP grading only.) Effective: 1997 Winter Quarter.

SPA 197TC—Tutoring in the Community (2-4)
Tutorial—2:4 hours. Prerequisite(s): Upper division standing and permission of the chair. Tutoring in public schools under the guidance of a regular teacher and supervision by a departmental faculty member. May be repeated for credit for a total of 6 units. May be repeated up to 6 unit(s). (P/NP grading only.) Effective: 1997 Winter Quarter.

SPA 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of instructor and department chairperson. (P/NP grading only.) GE credit: AH, WC, WE. Effective: 1997 Winter Quarter.

SPA 198F—Student Facilitated Course (1-4)
Variable—1:4 hours. Prerequisite(s): Consent of Instructor. Student facilitated course intended primarily for upper division students. (P/NP grading only.) Effective: 2017 Winter Quarter.

SPA 199—Special Study for Advanced Undergraduates (1-5)
Variable. Special study of a topic or an author to be determined in consultation with an individual faculty member. May be repeated up to 6 unit(s). (P/NP grading only.) GE credit: AH, WC, WE. Effective: 2000 Winter Quarter.

SPA 199FA—Student Facilitated Course Development (1-2)
Variable—1:4 hours. Prerequisite(s): Consent of Instructor. Open to upper division Spanish majors only. Under the supervision of a faculty member, an undergraduate student plans and develops the course they will offer under 98F/198F. (P/NP grading only.) Effective: 2017 Spring Quarter.

SPA 199FB—Student Facilitated Teaching (1-4)
Variable—1:4 hours. Prerequisite(s): SPA 199FA; Consent of Instructor. Must have completed course 199FA, and be teaching a course 98F or 198F; open to upper division Spanish majors only. Student-facilitated course under the supervision of a faculty member, an undergraduate student teaches a course under 98F/198F. (P/NP grading only.) Effective: 2017 Fall Quarter.

SPA 201—Literary Theory I (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Basic theories and practical approaches to modern and contemporary Hispanic literature. Emphasis on formalism, poststructuralism, socio-cultural discourses, and ideologies. Effective: 1997 Winter Quarter.

SPA 202—Literary Theory II (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Major contemporary critical theories including recent, innovative approaches to Hispanic literature and culture. Readings from Semiotics and Deconstructionism to Psychological and Socio-ideological approaches. Emphasis on Postmodern and Neo-colonial discourse. Effective: 1997 Winter Quarter.
SPA 203—Research Methodologies (1)
Seminar—2 hours. Introduction to the range of scholarly research methodologies currently being realized in
Spanish linguistics, literary and cultural studies: archival research, textual analysis, discourse analysis, statistics for
linguistics, etc.; introduction to scholarly writing (MLA style) and scholarly publishing. (S/U grading only.) Effective:
2013 Fall Quarter.

SPA 205—Spanish Phonology (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Some knowledge of phonetics is required and consent of instructor;
LIN 109 and LIN 139 highly recommended. Analyzes the sound patterns of Spanish from both linear and non-linear
perspectives. Students will develop a clear understanding of what phonology is and the nature of Spanish
phonology, as defined by modern linguistic analysis. Effective: 1997 Winter Quarter.

SPA 206—Spanish Syntax (4)
Seminar—3 hours; Term Paper. Prerequisite(s): LIN 165; LIN 140. An examination of Spanish word order within the
framework of general linguistic theory. The student will investigate how to write a grammar of Spanish with
particular attention to the structure of noun and verb clauses. Effective: 1997 Winter Quarter.

SPA 207—History of the Spanish Language (4)
Seminar—3 hours; Term Paper. Prerequisite(s): LAT 001 (Former course 220A.) Effective: 1997 Winter Quarter.

SPA 208—Old Spanish Texts (4)
Seminar—3 hours; Term Paper. Prerequisite(s): SPA 207 An in-depth linguistic examination of Old Spanish texts from
the 12th to the 15th centuries, with particular attention to the significance of orthographic changes. Effective: 1997
Winter Quarter.

SPA 211—Hispanic Dialectology (4)
Seminar—3 hours; Term Paper. Prerequisite(s): SPA 220; or Consent of Instructor. Descriptive and historical study of
the distinctive features of Peninsular and American Spanish dialects. (Former course 221.) Effective: 1997 Winter
Quarter.

SPA 212—Applied Linguistics (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing and SPA 215 and SPA 216 recommended.
Focuses on the relevant linguistic aspects of teaching Spanish. Designed for graduate students who have an

SPA 215—Special Topics in Hispanic Linguistics (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Consent of Instructor. SPA 205 and SPA 206 recommended.
Specialized topics in Hispanic linguistics (e.g., pragmatics, sociolinguistics, topics in syntax, semantics, or diachronic
studies). May be repeated for credit when topic differs. May be repeated for credit. Effective: 1997 Winter Quarter.

SPA 220—Catalan Language and Culture (4)
Laboratory—1 hour; Lecture/Discussion—3 hours. Prerequisite(s): Consent of Instructor. Good command of Spanish,
Portuguese, French or Italian and graduate level of studies in any of these languages. Open to advanced
undergraduate students, with notions of Catalan, can be admitted with consent of instructor; designed for graduate
students. Foundation for the acquisition of Catalan oral, reading and elementary writing level skills for students of
Spanish (Iberianists or Hispanists), with the capacity to interpret educated written language. Emphasis on weekly
review of grammar and all language skills. Effective: 2014 Winter Quarter.

SPA 222—Critical Approaches to Spanish Literature I: Prose & Essay (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Critical approaches to
Spanish narrative and essay. May be repeated up to 2 time(s) topic differs. Effective: 2002 Fall Quarter.

SPA 223—Critical Approaches to Spanish Literature II: Poetry & Drama (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Critical approaches to
Spanish poetry and drama. May be repeated up to 2 time(s) when topic differs. Effective: 2002 Fall Quarter.

SPA 224—Studies of a Major Writer, Period, or Genre in Spanish Literature (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Artistic development of a
major Spanish writer and his/her intellectual and literary milieu or study of a special topic, period, or genre. May be
repeated for credit with consent of instructor. May be repeated for credit. Effective: 1997 Winter Quarter.

SPA 230—Topics in Latin American Cultural Studies (4)
Seminar—3 hours; Term Paper. Discussion of select contemporary theoretical debates in Latin American Cultural
Studies. Application of critical questions to the analysis of cultural texts. May be repeated up to 2 time(s) when content differs. Effective: 2007 Fall Quarter.

**SPA 231—Interamerican Studies (4)**
Seminar—3 hours; Term Paper. Survey of methodologies of investigation for crosscultural or comparative projects in the geographical context of the Americas. Focus on particular problems of language, discipline, national definitions, and global hierarchies of knowledge that complicate such projects. Readings of interamerican cultural texts. Effective: 2007 Fall Quarter.

**SPA 252—Medieval Spanish Literature: Prose (4)**
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. An exploration of the major genres of Medieval Spanish prose from its origins to 1450. Effective: 1997 Winter Quarter.

**SPA 253—Medieval Spanish Literature: Epic (4)**
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Medieval Spanish epic narratives. Major theoretical perspectives on the genesis, diffusion, and character of the Medieval epic. Relationship of epic to ballad literature. Effective: 1997 Winter Quarter.

**SPA 254—Medieval Hispanic Lyric (4)**
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Analysis of the most representative lyric poetry in the various Peninsular languages and in provencal, troubadour poetry, kharjas, villancicos, cantigas de amigo, and courtly lyric. Effective: 1997 Winter Quarter.

**SPA 255—Spanish Literature of the Early Renaissance (4)**
Seminar—3 hours; Term Paper. Spanish Literature, 1450-1550, with emphasis on La Celestina. (Former course 229.) Effective: 1997 Winter Quarter.

**SPA 256—Spanish Literature of the Renaissance and Golden Age: Poetry (4)**
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Extensive critical study of the main currents of Renaissance and Baroque Spanish poetry through its language structures, styles (Culteranismo-Conceptismo), rhetorical devices, myths, and themes (love, death, time). Effective: 1997 Winter Quarter.

**SPA 257—Spanish Literature of the Renaissance and Golden Age: Drama (4)**
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. An exploration of major 16th and 17th century literary and cultural developments through the study of selected dramas. Effective: 1997 Winter Quarter.

**SPA 258—Spanish Literature of the Renaissance and Golden Age: Prose (4)**
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. The origins and development of the Spanish novel during the Renaissance and the Spanish Golden Age. Effective: 1997 Winter Quarter.

**SPA 259—Cervantes and the Novel (4)**
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. The narrative works of Miguel de Cervantes with special emphasis on Don Quijote. Effective: 1997 Winter Quarter.

**SPA 260—Modern Spanish Literature (4)**
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Topics of Spanish literature, from 1700-1920. Effective: 1997 Winter Quarter.

**SPA 261—Contemporary Spanish Literature: Poetry (4)**
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Critical analysis of modern Spanish poetry from a wide spectrum of poetic currents. Effective: 1997 Winter Quarter.

**SPA 262—Contemporary Spanish Literature: Narrative (4)**
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Study of the 20th-century novel and short story with emphasis on the avant-garde, existentialism, social realism, and postmodern trends. May be repeated up to 2 time(s) when topic differs and with consent of instructor. Effective: 2003 Spring Quarter.

**SPA 263—Contemporary Spanish Literature: Drama (4)**
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. The Spanish theatrical production of the last 70 years. Effective: 1997 Winter Quarter.

**SPA 264—Contemporary Spanish Literature: Essay (4)**
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Major thinkers from
Ganivet to Unamuno and Ortega y Gasset. Emphasis will be placed on the relationships between Spanish thought and European philosophical currents. Effective: 1997 Winter Quarter.

**SPA 265—Women Writers of Spain (4)**
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Introduction to the development of a feminine consciousness in the Spanish contemporary literary scene. Selected texts represent particularly innovative typologies of feminine discourse in the realm of the historical, psychoanalytical, and metafictional, erotic, and allegorical fiction. Effective: 1997 Winter Quarter.

**SPA 272—Critical Approaches to Latin American Literature: Narrative (4)**
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Development of Latin American literary periods and currents in narrative (novel, short story, and essay), from early colonial times to the present. May be repeated up to 2 time(s) material changes. Effective: 2008 Summer Session 1.

**SPA 273—Critical Approaches to Latin American Literature: Poetry and Drama (4)**
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Development of Latin American literary periods and currents in poetry and drama, from early Colonial times to the present. May be repeated up to 2 time(s) when topic differs. Effective: 2008 Summer Session 1.

**SPA 274—Studies of a Major Writer, Period, or Genre in Latin American Literature (4)**
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Artistic development of a major Latin American writer and his/her intellectual and literary milieu or study of a special topic, period, or genre. May be repeated for credit with consent of instructor. May be repeated for credit. Effective: 2008 Summer Session 1.

**SPA 275—Colonial Literature (4)**

**SPA 276—Twentieth-Century Latin American Drama (4)**
Seminar—4 hours. Prerequisite(s): Graduate standing or consent of instructor. Major Latin American dramatists from Florencio Sánchez to the present. (Former course SPA 240.) Effective: 2008 Summer Session 1.

**SPA 277—Latin American Novel, 1900-1950 (4)**
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Study of main trends and key authors in Latin America in the first half of the 20th century. (Former course SPA 241A.) Effective: 2008 Summer Session 1.

**SPA 278—New Trends in Latin American Fiction (4)**
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Recent developments in Latin American narrative. Emphasis on innovative language and structure. (Former course SPA 241B.) Effective: 2008 Summer Session 1.

**SPA 279—Mexican Narrative (4)**
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Study of the evolution of Mexican narrative. Emphasis on the narrative of the Revolution and significant contemporary works. Effective: 1997 Winter Quarter.

**SPA 280—Latin American Short Story (4)**
Seminar—3 hours; Term Paper. Works by major writers with emphasis on 20th-century authors such as Quiroga, Borges, García Márquez, Cortázar, and Rulfo. (Former course SPA 243). Effective: 2008 Summer Session 1.

**SPA 281—Latin American Women Writers (4)**
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Study of feminist critical theories, gender construction, and self-representation within the history of socio-cultural changes in Latin America. Effective: 2008 Summer Session 1.

**SPA 282—Dario and Modernism (4)**
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Study of poetry and prose of Spanish-American Modernism (1880-1916). Offered in alternate years. (Former course 245.) Effective: 1997 Winter Quarter.

**SPA 283—New Directions in Latin American Poetry (4)**
SPA 284—The Latin American Essay (4)
Seminar—3 hours; Term Paper. Major Latin American essayists from Sarmiento to contemporary essayists. Effective: 2008 Summer Session 1.

SPA 285—Multicultural Approaches to Cuban Literature and Culture (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Study of main trends in Cuban literature. Emphasis on historical, geographic, social and cultural context (including music and film). Course taught in English with some readings in Spanish. Effective: 1999 Spring Quarter.

SPA 291—Foreign Language Learning in the Classroom (4)
Project (Term Project); Seminar—3 hours. Overview of approaches to university-level foreign language instruction and the theoretical notions underlying current trends in classroom practices across commonly taught foreign languages. (Same course as GER 291 and FRE 291.) Effective: 2006 Fall Quarter.

SPA 298—Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Graduate standing. May be repeated for credit. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

SPA 299—Research (1-12)
Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

SPA 300—The Teaching of Spanish (3)
Lecture—3 hours. Prerequisite(s): Senior or graduate standing; a major or minor in Spanish. Effective: 1997 Fall Quarter.

SPA 390—The Teaching of Spanish in College (4)
Discussion—2 hours; Lecture—2 hours. Prerequisite(s): Graduate standing. Theoretical instruction in modern teaching methods and demonstration of their practical application. Required of graduate teaching assistants. Effective: 1997 Winter Quarter.

SPA 396—Teaching Assistant Training Practicum (1-4)
Variable. Prerequisite(s): Graduate standing. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

Statistics

Thomas Lee, Ph.D., Chairperson of the Department
Department Office. 4118 Mathematical Sciences Building; 530-752-2361; http://www.stat.ucdavis.edu
Faculty. http://www.stat.ucdavis.edu/people/faculty.html

The Major Program
Statistics enables us to make inferences about entire populations, based on samples extracted from those populations. Statistical methods can be applied to problems from almost every discipline and they are vitally important to researchers in agricultural, biological, environmental, social, engineering, and medical sciences.

The Program. Statistics majors may receive either a Bachelor of Arts or a Bachelor of Science degree. Both the A.B. and the B.S. programs require theoretical and applied course work and underscore the strong interdependence of statistical theory and the applications and computational aspects of statistics. The B.S. degree program has four
tracks: General Track, Applied Statistics Track, Computational Statistics Track, and the Statistical Data Science Track. The A.B. degree program has one track.

**A.B. in Statistics-Applied Statistics Option Track** emphasizes statistical applications. This track is recommended for students who are interested in applications of statistical techniques to various disciplines, especially the social sciences.

**Major Advisor.** D. Paul

Students are encouraged to meet with an advisor to plan a program as early as possible. Sometime before or during the first quarter of the junior year, students planning to major in Statistics should consult with a faculty advisor to plan the remainder of their undergraduate programs.

**Career Alternatives.** Probability models, statistical methods, and computational techniques are used in a great many fields, including the biological, physical, social, and health sciences, business, and engineering. The wide applicability of statistics is reflected in the strong demand for graduates with statistical training in both the public and private sectors. Employment opportunities include careers in data and policy analysis in government and industry, financial management, quality control, insurance and healthcare industry, actuarial science, engineering, public health, biological and pharmaceutical research, law, and education. Students with an undergraduate degree in statistics have entered advanced studies in statistics, economics, finance, psychology, medicine, business management and analytics, and other professional school programs.

The Major Program

Statistics enables us to make inferences about entire populations, based on samples extracted from those populations. Statistical methods can be applied to problems from almost every discipline and they are vitally important to researchers in agricultural, biological, environmental, social, engineering, and medical sciences.

The Program. Statistics majors may receive either a Bachelor of Arts or a Bachelor of Science degree. Both the A.B. and the B.S. programs require theoretical and applied course work and underscore the strong interdependence of statistical theory and the applications and computational aspects of statistics. The B.S. degree program has four tracks: General Track, Applied Statistics Track, Computational Statistics Track, and the Statistical Data Science Track.

B.S. in Statistics-General Track emphasizes statistical theory and is especially recommended as preparation for graduate study in statistics.

B.S. in Statistics-Applied Statistics Track emphasizes statistical applications. This track is recommended for students who are interested in applications of statistical techniques to various disciplines including the biological, physical and social sciences.

B.S. in Statistics-Computational Statistics Track emphasizes computing. This track is recommended for students interested in the computational and data management aspects of statistical analysis.

B.S. in Statistics-Statistical Data Science Track emphasizes data handling skills and statistical computation. This track is recommended for students interested in statistical learning methodology, advanced data handling techniques and computational aspects of statistical analysis.

Major Advisor. D. Paul
Students are encouraged to meet with an advisor to plan a program as early as possible. Sometime before or during the first quarter of the junior year, students planning to major in Statistics should consult with a faculty advisor to plan the remainder of their undergraduate programs.

**Career Alternatives.** Probability models, statistical methods, and computational techniques are used in a great many fields, including the biological, physical, social, and health sciences, business, and engineering. The wide applicability of statistics is reflected in the strong demand for graduates with statistical training in both the public and private sectors. Employment opportunities include careers in data and policy analysis in government and industry, financial management, quality control, insurance and healthcare industry, actuarial science, engineering, public health, biological and pharmaceutical research, law, and education. Students with an undergraduate degree in statistics have entered advanced studies in statistics, economics, finance, psychology, medicine, business management and analytics, and other professional school programs.

STA 141B  Data & Web Technologies for Data Analysis  4

OR

STA 141C  Big Data & High Performance Statistical Computing  4
STA 144  Sampling Theory of Surveys  4
STA 145  Bayesian Statistical Inference  4
STA 160  Practice in Statistical Data Science  4
MAT 168  Optimization  4

One approved four unit course:  4

STA 194HA  Special Studies for Honors Students  4
STA 194HB  Special Studies for Honors Students  4
STA 199  Special Study for Advanced Undergraduates  1-5

Four upper division elective courses outside of Statistics.  12-16

1953
Electives are chosen with and must be approved by the major advisor. Electives should follow a coherent sequence in one single discipline where statistical methods and models are applied: at least three of them should cover the quantitative aspects of the discipline. A list of pre-approved electives can be found on the Statistics Department website.

STA 194HB Special Studies for Honors Students 4
STA 199 Special Study for Advanced Undergraduates 1-5

Total: 79-84

Statistics | STA B.S./M.S.

Thomas (C.M.) Lee, Ph.D., Chairperson of the Program
Ethan Anderes, Ph.D., Vice Chairperson for Graduate Affairs

Program Office. 4118 Mathematical Sciences Building; 530-554-1367; http://www.stat.ucdavis.edu
Faculty. http://www.stat.ucdavis.edu/people/faculty.htm

The Department offers undergraduate majors a path into the Statistics M.S. program through the Integrated Degree Program (I.D.P.). This program is intended for students who seek to be employed as statisticians in government or industry. The minimum major GPA requirement is 3.200 at the end of the junior year, although students with demonstrated excellence in academic work (with a major GPA of 3.500 or above) are most likely to be admitted. Before moving into the graduate phase, I.D.P. students must satisfy all requirements of the B.S. degree.

To apply for the I.D.P., undergraduate students must submit the Statistics I.D.P. form along with supporting documents during the last quarter of their junior year, to enter the I.D.P. in the first quarter of their senior year. In addition, applicants must submit an application to the M.S. program during the senior year, prior to the deadline of the MS application. Students with a major GPA of 3.500 or above may waive the GRE requirement in the M.S. application. Before applying to the I.D.P., students are strongly advised to consult with both the undergraduate and graduate advisors.

Once a student enters the graduate phase of the I.D.P., they follow the course requirements for the Master's degree (44 units, 18 of which are graduate level). A maximum of 6 units taken in the undergraduate phase can be transferred to the M.S. provided they have not been used to satisfy any requirements of the B.S. degree.

Major Advisor. Debashis Paul
Graduate Advisor. Ethan Anderes (Statistics)

Statistics I STA Minor

(College of Letters and Science)

Thomas Lee, Ph.D., Chairperson of the Department

Department Office. 4118 Mathematical Sciences Building; 530-752-2361; http://www.stat.ucdavis.edu

Faculty. http://www.stat.ucdavis.edu/people/faculty.html

The Department offers a minor program in Statistics that consists of five upper division level courses focusing on the fundamentals of mathematical statistics and of the most widely used applied statistical methods.

STA 100 Applied Statistics for Biological Sciences 4
Additional preparatory courses will be needed based on the course prerequisites listed in the catalog.

Total: 20

Statistics | STA Courses

Courses in STA:

STA 010—Statistical Thinking (4)
Discussion/Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): Two years of high school algebra. Statistics and probability in daily life. Examines principles of collecting, presenting and interpreting data in order to critically assess results reported in the media; emphasis is on understanding polls, unemployment rates, health studies; understanding probability, risk and odds. GE credit: QL, SE. Effective: 2000 Spring Quarter.

STA 012—Introduction to Discrete Probability (4)
Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): Two years of high school algebra. Random experiments; countable sample spaces; elementary probability axioms; counting formulas; conditional probability; independence; Bayes theorem; expectation; gambling problems; binomial, hypergeometric, Poisson, geometric, negative binomial and multinomial models; limiting distributions; Markov chains. Applications in the social, biological, and engineering sciences. GE credit: QL, SE. Effective: 1999 Fall Quarter.

STA 013—Elementary Statistics (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Two years of high school algebra or Mathematics D. Descriptive statistics; basic probability concepts; binomial, normal, Student's t, and chi-square distributions. Hypothesis testing and confidence intervals for one and two means and proportions. Regression. Not open for credit for students who have completed STA 013V, or higher. GE credit: QL, SE. Effective: 2016 Fall Quarter.

STA 013Y—Elementary Statistics (4)
Lecture—1.5 hours; Web Virtual Lecture—5 hours. Prerequisite(s): Two years of high school algebra or Mathematics D. Descriptive statistics; basic probability concepts; binomial, normal, Student's t, and chi-square distributions. Hypothesis testing and confidence intervals for one and two means and proportions. Regression. Not open for credit for students who have completed STA 013, or higher. GE credit: QL, SE. Effective: 2016 Fall Quarter.

STA 032—Gateway to Statistical Data Science (4)
Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): MAT 016B or MAT 021B or MAT 017B Probability concepts; programming in R; exploratory data analysis; sampling distribution; estimation and inference; linear regression; simulations; resampling methods. Alternative to STA 013 for students with a background in calculus and programming. Only two units of credit allowed to students who have taken STA 013; not open for credit to students who have taken STA 100. GE credit: QL, SE. Effective: 2018 Winter Quarter.

STA 032—Gateway to Statistical Data Science (4)
Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): MAT 016B C- or better or MAT 021B C- or better or MAT 017B C- or better Probability concepts; programming in R; exploratory data analysis; sampling distribution; estimation and inference; linear regression; simulations; resampling methods. Alternative to STA 013 for students with a background in calculus and programming. Only two units of credit allowed to students who have taken STA 013; not open for credit to students who have taken STA 100. GE credit: QL, SE. Effective: 2019 Fall Quarter.

STA 090X—Seminar (1-2)
Seminar—1-2 hours. Prerequisite(s): Consent of Instructor. High school algebra. Examination of a special topic in a small group setting. Effective: 1997 Winter Quarter.

STA 098—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

STA 099—Special Study for Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 2000 Spring Quarter.

STA 100—Applied Statistics for Biological Sciences (4) Review all entries
Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): MAT 016B or MAT 017B or MAT 021B Descriptive statistics, probability, sampling distributions, estimation, hypothesis testing, contingency tables, ANOVA, regression; implementation of statistical methods using computer package. Only two units credit allowed to students who have
taken STA 013, STA 032 or 103; not open for credit to students who have taken STA 102. GE credit: QL, SE. Effective: 2017 Spring Quarter.

**STA 100—Applied Statistics for Biological Sciences (4) Review all entries**
Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): MAT 016B C- or better or MAT 017B C- or better or MAT 021B C- or better Descriptive statistics, probability, sampling distributions, estimation, hypothesis testing, contingency tables, ANOVA, regression; implementation of statistical methods using computer package. Only two units credit allowed to students who have taken STA 013, STA 032 or 103; not open for credit to students who have taken STA 102. GE credit: QL, SE. Effective: 2019 Fall Quarter.

**STA 101—Advanced Applied Statistics for the Biological Sciences (4) Review all entries**
Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): STA 100 Basic experimental designs, two-factor ANOVA without interactions, repeated measures ANOVA, ANCOVA, random effects vs. fixed effects, multiple regression, basic model building, resampling methods, multiple comparisons, multivariate methods, generalized linear models, Monte Carlo simulations. GE credit: QL, SE. Effective: 2014 Fall Quarter.

**STA 103—Applied Statistics for Business and Economics (4) Review all entries**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (STA 013 or STA 013Y or STA 032 or STA 100); (MAT 016B or MAT 017B or MAT 021B) Descriptive statistics; probability; random variables; expectation; binomial, normal, Poisson, other univariate distributions; joint distributions; sampling distributions, central limit theorem; properties of estimators; linear combinations of random variables; testing and estimation; Minitab computing package. Two units credit to students who have completed STA 100. GE credit: QL, SE. Effective: 2018 Winter Quarter.

**STA 104—Applied Statistical Methods: Nonparametric Statistics (4) Review all entries**
Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): STA 013 or STA 013Y or STA 032 or STA 100 Sign and Wilcoxon tests, Walsh averages. Two-sample procedures. Inferences concerning scale. Kruskal-Wallis test. Measures of association. Chi square and Kolmogorov-Smirnov tests. GE credit: QL, SE. Effective: 2018 Winter Quarter.

**STA 106—Applied Statistical Methods: Analysis of Variance (4) Review all entries**
Discussion/Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): STA 013 or STA 013Y or STA 032 or STA 100 Basics of experimental design. One-way and two-way fixed effects analysis of variance models. Randomized complete and incomplete block design. Multiple comparisons procedures. One-way random effects model. GE credit: SE. Effective: 2018 Winter Quarter.

**STA 108—Applied Statistical Methods: Regression Analysis (4) Review all entries**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): STA 013 or STA 013Y or STA 032 or STA 100 Simple linear
regression, variable selection techniques, stepwise regression, analysis of covariance, influence measures, computing packages. GE credit: QL, SE, SL. Effective: 2018 Winter Quarter.

STA 108—Applied Statistical Methods: Regression Analysis (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): STA 013 C- or better or STA 013Y C- or better or STA 032 C- or better or STA 100 C- or better Simple linear regression, variable selection techniques, stepwise regression, analysis of covariance, influence measures, computing packages. GE credit: QL, SE, SL. Effective: 2019 Fall Quarter.

STA 130A—Mathematical Statistics: Brief Course (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MAT 016C or MAT 017C or MAT 021C Basic probability, densities and distributions, mean, variance, covariance, Chebyshev's inequality, some special distributions, sampling distributions, central limit theorem and law of large numbers, point estimation, some methods of estimation, interval estimation, confidence intervals for certain quantities, computing sample sizes. Only 2 units of credit allowed to students who have taken STA 131A. GE credit: QL, SE. Effective: 2018 Winter Quarter.

STA 130B—Mathematical Statistics: Brief Course (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): STA 130A C- or better or STA 131A C- or better or MAT 135A C- or better Transformed random variables, large sample properties of estimates. Basic ideas of hypotheses testing, likelihood ratio tests, goodness-of-fit tests. General linear model, least squares estimates, Gauss-Markov theorem. Analysis of variance, F-test. Regression and correlation, multiple regression. Selected topics. GE credit: QL, SE. Effective: 2019 Fall Quarter.

STA 131A—Introduction to Probability Theory (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MAT 021B; MAT 021C; MAT 022A or MAT 067 Fundamental concepts of probability theory, discrete and continuous random variables, standard distributions, moments and moment-generating functions, laws of large numbers and the central limit theorem. Not open for credit to students who have completed MAT 135A. GE credit: QL, SE. Effective: 2018 Winter Quarter.

STA 131B—Introduction to Probability Theory (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MAT 021C C- or better; (MAT 022A C- or better or MAT 027A C- or better); MAT 021D strongly recommended Fundamental concepts of probability theory, discrete and continuous random variables, standard distributions, moments and moment-generating functions, laws of large numbers and the central limit theorem. Not open for credit to students who have completed MAT 135A. GE credit: QL, SE. Effective: 2019 Fall Quarter.

STA 131C—Introduction to Mathematical Statistics (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): STA 131B or Consent of Instructor. Testing theory, tools and
Applications from probability theory, Linear model theory, ANOVA, goodness-of-fit. GE credit: SE. Effective: 2016 Fall Quarter.

STA 131C—Introduction to Mathematical Statistics (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): STA 131B C- or better. Testing theory, tools and applications from probability theory, Linear model theory, ANOVA, goodness-of-fit. GE credit: SE. Effective: 2019 Fall Quarter.

STA 135—Multivariate Data Analysis (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): STA 130B or STA 131B; (MAT 022A or MAT 067) Multivariate normal distribution; Mahalanobis distance; sampling distributions of the mean vector and covariance matrix; Hotellings T2; simultaneous inference; one-way MANOVA; discriminant analysis; principal components; canonical correlation; factor analysis. Intensive use of computer analyses and real data sets. GE credit: QL, SE. Effective: 2016 Fall Quarter.

STA 135—Multivariate Data Analysis (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): STA 130B C- or better or STA 131B C- or better; (MAT 022A C- or better or MAT 027A C- or better or MAT 067 C- or better) Multivariate normal distribution; Mahalanobis distance; sampling distributions of the mean vector and covariance matrix; Hotellings T2; simultaneous inference; one-way MANOVA; discriminant analysis; principal components; canonical correlation; factor analysis. Intensive use of computer analyses and real data sets. GE credit: QL, SE. Effective: 2019 Fall Quarter.

STA 137—Applied Time Series Analysis (4)
Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): STA 108 Time series relationships; univariate time series models: trend, seasonality, correlated errors; regression with correlated errors; autoregressive models; autoregressive moving average models; spectral analysis: cyclical behavior and periodicity, measures of periodicity, periodogram; linear filtering; prediction of time series; transfer function models. GE credit: QL, SE. Effective: 2016 Fall Quarter.

STA 138—Analysis of Categorical Data (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): STA 108 or STA 130B or STA 131B or STA 106, STA 108) Varieties of categorical data, cross-classifications, contingency tables, tests for independence. Multidimensional tables and log-linear models, maximum likelihood estimation; tests of goodness-of-fit. Logit models, linear logistic models. Analysis of incomplete tables. Packaged computer programs, analysis of real data. GE credit: QL, SE. Effective: 1997 Winter Quarter.

STA 141A—Fundamentals of Statistical Data Science (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): STA 108 or STA 106; (STA 032 or STA 100 or STA 013 or STA 013Y) Introduction to computing for data analysis and visualization, and simulation, using a high-level language (e.g., R). Computational reasoning, computationally intensive statistical methods, reading tabular and non-standard data. Not open for credit to students who have taken STA 141 or STA 242. Effective: 2018 Spring Quarter.

STA 141A—Fundamentals of Statistical Data Science (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): STA 108 C- or better or STA 106 C- or better. Introduction to computing for data analysis and visualization, and simulation, using a high-level language (e.g., R). Computational reasoning, computationally intensive statistical methods, reading tabular and non-standard data. Not open for credit to students who have taken STA 141 or STA 242. Effective: 2019 Fall Quarter.

STA 141B—Data & Web Technologies for Data Analysis (4) Review all entries

STA 141B—Data & Web Technologies for Data Analysis (4) Review all entries

STA 141B—Data & Web Technologies for Data Analysis (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): STA 141A C- or better Pass One and Pass Two restricted to Statistics majors and graduate students in Statistics and Biostatistics. Open to all students during Open

**STA 141C—Big Data & High Performance Statistical Computing (4)**

Review all entries

Discussion—1 hour; Lecture—3 hours. Prerequisite(s): STA 141B or (STA 141A, ECS 010) High-performance computing in high-level data analysis languages; different computational approaches and paradigms for efficient analysis of big data; interfaces to compiled languages; R and Python programming languages; high-level parallel computing; MapReduce; parallel algorithms and reasoning. Effective: 2018 Winter Quarter.

**STA 141C—Big Data & High Performance Statistical Computing (4)**

Discussion—1 hour; Lecture—3 hours. Prerequisite(s): STA 141B or (STA 141A, ECS 010) Pass One and Pass Two restricted to Statistics majors and graduate students in Statistics and Biostatistics; open to all students during Open registration. High-performance computing in high-level data analysis languages; different computational approaches and paradigms for efficient analysis of big data; interfaces to compiled languages; R and Python programming languages; high-level parallel computing; MapReduce; parallel algorithms and reasoning. Effective: 2019 Winter Quarter.

**STA 141C—Big Data & High Performance Statistical Computing (4)**

Discussion—1 hour; Lecture—3 hours. Prerequisite(s): STA 141B C- or better or (STA 141A C- or better, (ECS 010 C- or better or ECS 032A C- or better)) Pass One and Pass Two restricted to Statistics majors and graduate students in Statistics and Biostatistics; open to all students during Open registration. High-performance computing in high-level data analysis languages; different computational approaches and paradigms for efficient analysis of big data; interfaces to compiled languages; R and Python programming languages; high-level parallel computing; MapReduce; parallel algorithms and reasoning. Effective: 2019 Fall Quarter.

**STA 144—Sampling Theory of Surveys (4)**

Discussion/Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): (STA 130B or STA 131B) or (STA 106, STA 108) Simple random, stratified random, cluster, and systematic sampling plans; mean, proportion, total, ratio, and regression estimators for these plans; sample survey design, absolute and relative error, sample size selection, strata construction; sampling and nonsampling sources of error. GE credit: QL, SE. Effective: 2016 Fall Quarter.

**STA 145—Bayesian Statistical Inference (4)**

Review all entries

Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): STA 130B or STA 131B Subjective probability, Bayes Theorem, conjugate priors, non-informative priors, estimation, testing, prediction, empirical Bayes methods, properties of Bayesian procedures, comparisons with classical procedures, approximation techniques, Gibbs sampling, hierarchical Bayesian analysis, applications, computer implemented data analysis. GE credit: QL, SE. Effective: 2016 Fall Quarter.

**STA 145—Bayesian Statistical Inference (4)**

Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): STA 130B C- or better or STA 131B C- or better Subjective probability, Bayes Theorem, conjugate priors, non-informative priors, estimation, testing, prediction, empirical Bayes methods, properties of Bayesian procedures, comparisons with classical procedures, approximation techniques, Gibbs sampling, hierarchical Bayesian analysis, applications, computer implemented data analysis. GE credit: QL, SE. Effective: 2019 Fall Quarter.

**STA 160—Practice in Statistical Data Science (4)**

Review all entries

Discussion/Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): STA 106; STA 108; (STA 130B or STA 131B); (STA 141 or STA 141A) Principles and practice of interdisciplinary, collaborative data analysis; complete case study review and team data analysis project. Effective: 2016 Spring Quarter.

**STA 160—Practice in Statistical Data Science (4)**

Discussion/Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): STA 106 C- or better; STA 108 C- or better; (STA 130B C- or better or STA 131B C- or better); STA 141A C- or better Principles and practice of interdisciplinary, collaborative data analysis; complete case study review and team data analysis project. Effective: 2019 Fall Quarter.

**STA 190X—Seminar (1-2)**

Seminar—1-2 hours. Prerequisite(s): STA 013 or STA 013Y or STA 032 or STA 100 or STA 103 In-depth examination of a special topic in a small group setting. Effective: 2018 Spring Quarter.

**STA 192—Internship in Statistics (1-12)**

Internship—3-36 hours; Term Paper. Prerequisite(s): Consent of Instructor. Upper division standing. Work experience in statistics. (P/NP grading only.) Effective: 1997 Winter Quarter.
STA 194HA—Special Studies for Honors Students (4)
Independent Study—12 hours. Prerequisite(s): Senior qualifying for honors. Directed reading, research and writing, culminating in the completion of a senior honors thesis or project under direction of a faculty advisor. GE credit: SE. Effective: 1997 Winter Quarter.

STA 194HB—Special Studies for Honors Students (4)
Independent Study—12 hours. Prerequisite(s): Senior qualifying for honors. Directed reading, research and writing, culminating in the completion of a senior honors thesis or project under direction of a faculty advisor. GE credit: SE. Effective: 1997 Winter Quarter.

STA 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

STA 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

STA 200A—Introduction to Probability Theory (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MAT 021A; MAT 021B; MAT 021C; MAT 022A; Consent of Instructor. Fundamental concepts of probability theory, discrete and continuous random variables, standard distributions, moments and moment-generating functions, laws of large numbers and the central limit theorem. Effective: 2018 Winter Quarter.

STA 200B—Introduction to Mathematical Statistics I (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): STA 200A; or Consent of Instructor. Sampling, methods of estimation, bias-variance decomposition, sampling distributions, Fisher information, confidence intervals, and some elements of hypothesis testing. Effective: 2018 Winter Quarter.

STA 200C—Introduction to Mathematical Statistics II (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): STA 200B; or Consent of Instructor. Testing theory, tools and applications from probability theory, Linear model theory, ANOVA, goodness-of-fit. No credit to students who have taken STA 131C. Effective: 2018 Spring Quarter.

STA 205—Statistical Methods for Research with SAS (4)
Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): STA 200B; or Consent of Instructor. Focus on linear statistical models widely used in scientific research. Emphasis on concepts, methods and data analysis using SAS. Topics include simple and multiple linear regression, polynomial regression, diagnostics, model selection, variable transformation, factorial designs and ANCOVA. Effective: 2013 Fall Quarter.

STA 206—Statistical Methods for Research - II (4)
Discussion/Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): STA 206; Knowledge of vectors and matrices. Linear and nonlinear statistical models emphasis on concepts, methods/data analysis using professional level software; formal mathematics kept to minimum. Topics include linear mixed models, repeated measures, generalized linear models, model selection, analysis of missing data, and multiple testing procedures. Effective: 2013 Fall Quarter.
STA 208—Statistical Methods in Machine Learning (4)
Discussion/Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): STA 206; STA 207; STA 135; Or their equivalents. Focus on linear and nonlinear statistical models. Emphasis on concepts, methods, and data analysis; formal mathematics kept to minimum. Topics include resampling methods, regularization techniques in regression and modern classification, cluster analysis and dimension reduction techniques. Use professional level software. Effective: 2013 Fall Quarter.

STA 209—Optimization for Big Data Analytics (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): STA 200A; STA 208 Optimization algorithms for solving problems in statistics, machine learning, data analytics. Review computational tools for implementing optimization algorithms (gradient descent, stochastic gradient descent, coordinate descent, Newton’s method.) Effective: 2018 Spring Quarter.

STA 222—Biostatistics: Survival Analysis (4)
Discussion/Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): STA 131C Incomplete data; life tables; nonparametric methods; parametric methods; accelerated failure time models; proportional hazards models; partial likelihood; advanced topics. (Same course as BST 222.) Effective: 2002 Fall Quarter.

STA 223—Biostatistics: Generalized Linear Models (4)
Discussion/Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): STA 131C Likelihood and linear regression; generalized linear model; Binomial regression; case-control studies; dose-response and bioassay; Poisson regression; Gamma regression; quasi-likelihood models; estimating equations; multivariate GLMs. (Same course as BST 223.) Effective: 2002 Fall Quarter.

STA 224—Analysis of Longitudinal Data (4)
Discussion/Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): ((STA 222, STA 223) or (BST 222, BST 223)); STA 232B; or Consent of Instructor. Standard and advanced methodology, theory, algorithms, and applications relevant for analysis of repeated measurements and longitudinal data in biostatistical and statistical settings. (Same course as BST 224.) Effective: 2005 Spring Quarter.

STA 225—Clinical Trials (4)
Discussion/Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): STA 223 or BST 223; or Consent of Instructor. Basic statistical principles of clinical designs, including bias, randomization, blocking, and masking. Practical applications of widely-used designs, including dose-finding, comparative and cluster randomization designs. Advanced statistical procedures for analysis of data collected in clinical trials. (Same course as BST 225.) Effective: 2005 Spring Quarter.

STA 226—Statistical Methods for Bioinformatics (4)
Discussion/Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): STA 131C; or Consent of Instructor. Data analysis experience recommended. Standard and advanced statistical methodology, theory, algorithms, and applications relevant to the analysis of -omics data. (Same course as BST 226.) Effective: 2007 Fall Quarter.

STA 231A—Mathematical Statistics I (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): STA 131A; STA 131B; STA 131C; MAT 025; MAT 125A; Or equivalent of MAT 025 and MAT 125A. First part of three-quarter sequence on mathematical statistics. Emphasizes foundations. Topics include basic concepts in asymptotic theory, decision theory, and an overview of methods of point estimation. Effective: 2008 Summer Session 1.

STA 231B—Mathematical Statistics II (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): STA 231A Second part of a three-quarter sequence on mathematical statistics. Emphasizes hypothesis testing (including multiple testing) as well as theory for linear models. Effective: 2008 Summer Session 1.

STA 231C—Mathematical Statistics III (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): STA 231A; STA 231B Third part of three-quarter sequence on mathematical statistics. Emphasizes large sample theory and their applications. Topics include statistical functionals, smoothing methods and optimization techniques relevant for statistics. Effective: 2008 Summer Session 1.

STA 232A—Applied Statistics I (4)
Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): STA 106; STA 108; STA 131A; STA 131B; STA 131C; MAT 167 Estimation and testing for the general linear model, regression, analysis of designed experiments, and missing data techniques. Effective: 2011 Fall Quarter.
STA 232B—Applied Statistics II (4)
Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): STA 106; STA 108; STA 131A; STA 131B; STA 131C; STA 232A; MAT 167. Alternative approaches to regression, model selection, nonparametric methods amenable to linear model framework and their applications. Effective: 2011 Fall Quarter.

STA 232C—Applied Statistics III (4)
Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): STA 106; STA 108; STA 131C; STA 232B; MAT 167. Multivariate analysis: multivariate distributions, multivariate linear models, data analytic methods including principal component, factor, discriminant, canonical correlation and cluster analysis. Effective: 2011 Fall Quarter.

STA 233—Design Experiments (3)
Lecture—3 hours. Prerequisite(s): STA 131C. Topics from balanced and partially balanced incomplete block designs, fractional factorials, and response surfaces. Effective: 1997 Winter Quarter.

STA 235A—Probability Theory (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): (MAT 125B, MAT 135A) or STA 131A; or Consent of Instructor. Measure-theoretic foundations, abstract integration, independence, laws of large numbers, characteristic functions, central limit theorems. Weak convergence in metric spaces, Brownian motion, invariance principle. Conditional expectation. Topics selected from: martingales, Markov chains, ergodic theory. (Same course as MAT 235A.) Effective: 2007 Spring Quarter.

STA 235B—Probability Theory (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): STA 235A or MAT 235A; or Consent of Instructor. Measure-theoretic foundations, abstract integration, independence, laws of large numbers, characteristic functions, central limit theorems. Weak convergence in metric spaces, Brownian motion, invariance principle. Conditional expectation. Topics selected from: martingales, Markov chains, ergodic theory. (Same course as MAT 235B.) Effective: 2008 Spring Quarter.

STA 235C—Probability Theory (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): STA 235B or MAT 235B; or Consent of Instructor. Measure-theoretic foundations, abstract integration, independence, laws of large numbers, characteristic functions, central limit theorems. Weak convergence in metric spaces, Brownian motion, invariance principle. Conditional expectation. Topics selected from: martingales, Markov chains, ergodic theory. (Same course as MAT 235C.) Effective: 2008 Spring Quarter.

STA 237A—Time Series Analysis (4)
Lecture—3 hours; Term Paper. Prerequisite(s): STA 131B; Or the equivalent of STA 131B. Advanced topics in time series analysis and applications. Models for experimental data, measures of dependence, large-sample theory, statistical estimation and inference. Univariate and multivariate spectral analysis, regression, ARIMA models, state-space models, Kalman filtering. Effective: 1999 Fall Quarter.

STA 237B—Time Series Analysis (4)
Lecture—3 hours; Term Paper. Prerequisite(s): STA 131B; STA 237A; Or the equivalent of STA 131B. Advanced topics in time series analysis and applications. Models for experimental data, measures of dependence, large-sample theory, statistical estimation and inference. Univariate and multivariate spectral analysis, regression, ARIMA models, state-space models, Kalman filtering. Effective: 1999 Fall Quarter.

STA 238—Theory of Multivariate Analysis (4)
Lecture—3 hours; Term Paper. Prerequisite(s): STA 131B; STA 135. Multivariate normal and Wishart distributions, Hotelling's T-Squared, simultaneous inference, likelihood ratio and union intersection tests, Bayesian methods, discriminant analysis, principal component and factor analysis, multivariate clustering, multivariate regression and analysis of variance, application to data. Effective: 1999 Fall Quarter.

STA 240A—Nonparametric Inference (4)
Lecture—3 hours; Term Paper. Prerequisite(s): STA 231C; STA 235A, STA 235B, STA 235C recommended. Comprehensive treatment of nonparametric statistical inference, including the most basic materials from classical nonparametrics, robustness, nonparametric estimation of a distribution function from incomplete data, curve estimation, and theory of resampling methodology. Effective: 2000 Winter Quarter.

STA 240B—Nonparametric Inference (4)
Lecture—3 hours; Term Paper. Prerequisite(s): STA 231C; STA 235A, STA 235B, STA 235C recommended. Comprehensive treatment of nonparametric statistical inference, including the most basic materials from classical
nonparametrics, robustness, nonparametric estimation of a distribution function from incomplete data, curve estimation, and theory of re-sampling methodology. Effective: 2000 Winter Quarter.

STA 241—Asymptotic Theory of Statistics (4)
Lecture—3 hours; Term Paper. Prerequisite(s): STA 231C; STA 235A, STA 235B, STA 235C desirable. Topics in asymptotic theory of statistics chosen from weak convergence, contiguity, empirical processes, Edgeworth expansion, and semiparametric inference. Effective: 2000 Spring Quarter.

STA 242—Introduction to Statistical Programming (4)
Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): STA 130A; STA 130B; or equivalent of STA 130A and STA 130B. Essentials of statistical computing using a general-purpose statistical language. Topics include algorithms; design; debugging and efficiency; object-oriented concepts; model specification and fitting; statistical visualization; data and text processing; databases; computer systems and platforms; comparison of scientific programming languages. Effective: 2009 Winter Quarter.

STA 243—Computational Statistics (4)
Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): (STA 130A, STA 130B); (MAT 067 or MAT 167); Or equivalent of STA 130A and 130B, or equivalent of MAT 167 or MAT 067. Numerical analysis; random number generation; computer experiments and resampling techniques (bootstrap, cross validation); numerical optimization; matrix decompositions and linear algebra computations; algorithms (markov chain monte carlo, expectation-maximization); algorithm design and efficiency; parallel and distributed computing. Effective: 2009 Winter Quarter.

STA 250—Topics in Applied and Computational Statistics (4)
Discussion/Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): STA 131A; STA 232A recommended, not required. Resampling, nonparametric and semiparametric methods, incomplete data analysis, diagnostics, multivariate and time series analysis, applied Bayesian methods, sequential analysis and quality control, categorical data analysis, spatial and image analysis, computational biology, functional data analysis, models for correlated data, learning theory. May be repeated for credit with consent of graduate advisor. Effective: 2006 Spring Quarter.

STA 251—Topics in Statistical Methods and Models (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): STA 231B; Or the equivalent of STA 231B. Topics may include Bayesian analysis, nonparametric and semiparametric regression, sequential analysis, bootstrap, statistical methods in high dimensions, reliability, spatial processes, inference for stochastic process, stochastic methods in finance, empirical processes, change-point problems, asymptotics for parametric, nonparametric and semiparametric models, nonlinear time series, robustness. May be repeated for credit if topics differ; only with consent of the graduate advisor. Effective: 2002 Fall Quarter.

STA 252—Advanced Topics in Biostatistics (4)
Discussion/Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): (STA 222 or BST 222); (STA 223 or BST 223) Biostatistical methods and models selected from the following: genetics, bioinformatics and genomics; longitudinal or functional data; clinical trials and experimental design; analysis of environmental data; dose-response, nutrition and toxicology; survival analysis; observational studies and epidemiology; computer-intensive or Bayesian methods in biostatistics. May be repeated for credit with consent of advisor when topic differs. (Same course as BST 252.) Effective: 2002 Fall Quarter.

STA 260—Statistical Practice and Data Analysis (3)
Lecture/Discussion—3 hours. Prerequisite(s): STA 207 or STA 232B; Working knowledge of advanced statistical software and the equivalent of STA 207 or STA 232B. Open to students enrolled in the graduate program in Statistics or Biostatistics, as the class also serves to provide professional service to clients and collaborators who work with the students. Principles and practice of interdisciplinary collaboration in statistics, statistical consulting, ethical aspects, and basics of data analysis and study design. Emphasis on practical consulting and collaboration of statisticians with clients and scientists under instructor supervision. May be repeated up to 1 time(s). Effective: 2014 Fall Quarter.

STA 280—Orientation to Statistical Research (2)
Seminar—2 hours. Prerequisite(s): Consent of Instructor. Guided orientation to original statistical research papers, and oral presentations in class of such papers by students under the supervision of a faculty member. May be repeated once for credit. May be repeated up to 1 time(s). (S/U grading only.) Effective: 1999 Spring Quarter.

STA 290—Seminar in Statistics (1-6)
Variable. Prerequisite(s): Consent of Instructor. Seminar on advanced topics in probability and statistics. (S/U grading only.) Effective: 1997 Winter Quarter.
STA 292—Graduate Group in Statistics Seminar (1-2)
Seminar—1-2 hours. Prerequisite(s): Consent of Instructor. Graduate standing. Advanced study in various fields of statistics with emphasis in applied topics, presented by members of the Graduate Group in Statistics and other guest speakers. (S/U grading only.) Effective: 1997 Fall Quarter.

STA 298—Directed Group Study (1-5)
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. Graduate standing. Special topics in Statistics appropriate for study at the graduate level. May be repeated for credit. Effective: 2004 Spring Quarter.

STA 299—Individual Study (1-12)
Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

STA 299D—Dissertation Research (1-12)
Variable—3-36 hours. Prerequisite(s): Consent of Instructor. Advancement to candidacy for Ph.D. Research in Statistics under the supervision of major professor. May be repeated for credit. (S/U grading only.) Effective: 2004 Spring Quarter.

STA 390—Methods of Teaching Statistics (2)
Laboratory—1 hour; Lecture/Discussion—1 hour. Prerequisite(s): Graduate standing. Practical experience in methods/problems of teaching statistics at university undergraduate level. Lecturing techniques, analysis of tests and supporting material, preparation and grading of examinations, and use of statistical software. Emphasis on practical training. May be repeated for credit. (S/U grading only.) Effective: 2004 Spring Quarter.

STA 396—Teaching Assistant Training Practicum (1-4)
Variable. Prerequisite(s): Consent of Instructor. Graduate standing. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

STA 401—Methods in Statistical Consulting (3)
Discussion—1 hour; Lecture—3 hours. Students must be enrolled in the graduate program in Statistics or Biostatistics. Introduction to consulting, in-class consulting as a group, statistical consulting with clients, and in-class discussion of consulting problems. Clients are drawn from a pool of University clients. May be repeated for credit with consent of graduate advisor. (S/U grading only.) Effective: 2006 Spring Quarter.

Graduate Study. The Graduate Program in Statistics offers programs of study and research leading to the M.S. and Ph.D. degrees. The M.S. gives students a strong foundation in the theory of statistics as well as substantial familiarity with the most widely used statistical methods. Facility in computer programming is essential for some of the course work. The supervised statistical consulting required of all M.S. students has proven to be a valuable educational experience. The Ph.D. program combines advanced course work in statistics and probability with the opportunity for in-depth concurrent study in an applied field. For detailed information contact the Chairperson of the Program or the Graduate Advisor.

Preparation. Preparation for the graduate program requires a year of calculus, a course in linear algebra, facility with a programming language and upper division coursework in mathematics and/or statistics. For admission to the...
Ph.D. program, course work requirements for the master's degree, and at least one semester/two quarters of advanced calculus must be completed.

Statistics (Graduate Group) I STA Courses

Courses in STA:

STA 010—Statistical Thinking (4)
Discussion/Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): Two years of high school algebra. Statistics and probability in daily life. Examines principles of collecting, presenting and interpreting data in order to critically assess results reported in the media; emphasis is on understanding polls, unemployment rates, health studies; understanding probability, risk and odds. GE credit: QL, SE. Effective: 2000 Spring Quarter.

STA 012—Introduction to Discrete Probability (4)
Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): Two years of high school algebra. Random experiments; countable sample spaces; elementary probability axioms; counting formulas; conditional probability; independence; Bayes theorem; expectation; gambling problems; binomial, hypergeometric, Poisson, geometric, negative binomial and multinomial models; limiting distributions; Markov chains. Applications in the social, biological, and engineering sciences. GE credit: QL, SE. Effective: 1999 Fall Quarter.

STA 013—Elementary Statistics (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Two years of high school algebra or Mathematics D. Descriptive statistics; basic probability concepts; binomial, normal, Student's t, and chi-square distributions. Hypothesis testing and confidence intervals for one or two means and proportions. Regression. Not open for credit for students who have completed STA 013V, or higher. GE credit: QL, SE. Effective: 2016 Fall Quarter.

STA 013Y—Elementary Statistics (4)
Lecture—1.5 hours; Web Virtual Lecture—5 hours. Prerequisite(s): Two years of high school algebra or Mathematics D. Descriptive statistics; basic probability concepts; binomial, normal, Student's t, and chi-square distributions. Hypothesis testing and confidence intervals for one or two means and proportions. Regression. Not open for credit for students who have completed STA 013, or higher. GE credit: QL, SE. Effective: 2016 Fall Quarter.

STA 032—Gateway to Statistical Data Science (4) Review all entries
Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): MAT 016B or MAT 021B or MAT 017B Probability concepts; programming in R; exploratory data analysis; sampling distribution; estimation and inference; linear regression; simulations; resampling methods. Alternative to STA 013 for students with a background in calculus and programming. Only two units of credit allowed to students who have taken STA 013; not open for credit to students who have taken STA 100. GE credit: QL, SE. Effective: 2018 Winter Quarter.
STA 032—Gateway to Statistical Data Science (4) Review all entries
Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): MAT 016B C- or better or MAT 021B C- or better or MAT 017B C- or better Probability concepts; programming in R; exploratory data analysis; sampling distribution; estimation and inference; linear regression; simulations; resampling methods. Alternative to STA 013 for students with a background in calculus and programming. Only two units of credit allowed to students who have taken STA 013; not open for credit to students who have taken STA 100. GE credit: QL, SE. Effective: 2019 Fall Quarter.

STA 090X—Seminar (1-2)
Seminar—1-2 hours. Prerequisite(s): Consent of Instructor. High school algebra. Examination of a special topic in a small group setting. Effective: 1997 Winter Quarter.

STA 098—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

STA 099—Special Study for Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 2000 Spring Quarter.

STA 100—Applied Statistics for Biological Sciences (4) Review all entries
Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): MAT 016B or MAT 017B or MAT 021B Descriptive statistics, probability, sampling distributions, estimation, hypothesis testing, contingency tables, ANOVA, regression; implementation of statistical methods using computer package. Only two units credit allowed to students who have taken STA 013, STA 032 or 103; not open for credit to students who have taken STA 102. GE credit: QL, SE. Effective: 2017 Spring Quarter.

STA 101—Advanced Applied Statistics for the Biological Sciences (4) Review all entries
Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): STA 100 C- or better Basic experimental designs, two-factor ANOVA without interactions, repeated measures ANOVA, ANCOVA, random effects vs. fixed effects, multiple regression, basic model building, resampling methods, multiple comparisons, multivariate methods, generalized linear models, Monte Carlo simulations. GE credit: QL, SE. Effective: 2014 Fall Quarter.

STA 103—Applied Statistics for Business and Economics (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (STA 013 or STA 013Y or STA 032 or STA 100); (MAT 016B or MAT 017B or MAT 021B) Descriptive statistics; probability; random variables; expectation; binomial, normal, Poisson, other univariate distributions; joint distributions; sampling distributions, central limit theorem; properties of estimators; linear combinations of random variables; testing and estimation; Minitab computing package. Two units credit to students who have completed STA 100. GE credit: QL, SE. Effective: 2018 Winter Quarter.

STA 104—Applied Statistical Methods: Nonparametric Statistics (4) Review all entries
Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): STA 013 or STA 013Y or STA 032 or STA 100 Sign and Wilcoxon tests, Walsh averages. Two-sample procedures. Inferences concerning scale. Kruskal-Wallis test. Measures of association. Chi square and Kolmogorov-Smirnov tests. GE credit: QL, SE. Effective: 2018 Winter Quarter.
STA 104—Applied Statistical Methods: Nonparametric Statistics (4)  
Review all entries  
Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): STA 013 C- or better or STA 013Y C- or better or STA 032 C- or better or STA 100 C- or better. Sign and Wilcoxon tests, Walsh averages. Two-sample procedures. Inferences concerning scale. Kruskal-Wallis test. Measures of association. Chi square and Kolmogorov-Smirnov tests. GE credit: QL, SE. Effective: 2019 Fall Quarter.

STA 106—Applied Statistical Methods: Analysis of Variance (4)  
Review all entries  
Discussion/Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): STA 013 or STA 013Y or STA 032 or STA 100. Basics of experimental design. One-way and two-way fixed effects analysis of variance models. Randomized complete and incomplete block design. Multiple comparisons procedures. One-way random effects model. GE credit: SE. Effective: 2018 Winter Quarter.

STA 106—Applied Statistical Methods: Analysis of Variance (4)  
Review all entries  
Discussion/Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): STA 013 C- or better or STA 013Y C- or better or STA 032 C- or better or STA 100 C- or better. Basics of experimental design. One-way and two-way fixed effects analysis of variance models. Randomized complete and incomplete block design. Multiple comparisons procedures. One-way random effects model. GE credit: SE. Effective: 2019 Fall Quarter.

STA 108—Applied Statistical Methods: Regression Analysis (4)  
Review all entries  
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): STA 013 or STA 013Y or STA 032 or STA 100. Simple linear regression, variable selection techniques, stepwise regression, analysis of covariance, influence measures, computing packages. GE credit: QL, SE, SL. Effective: 2018 Winter Quarter.

STA 108—Applied Statistical Methods: Regression Analysis (4)  
Review all entries  
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): STA 013 C- or better or STA 013Y C- or better or STA 032 C- or better or STA 100 C- or better. Simple linear regression, variable selection techniques, stepwise regression, analysis of covariance, influence measures, computing packages. GE credit: QL, SE, SL. Effective: 2019 Fall Quarter.

STA 130A—Mathematical Statistics: Brief Course (4)  
Review all entries  
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MAT 016C or MAT 017C or MAT 021C. Basic probability, densities and distributions, mean, variance, covariance, Chebyshev’s inequality, some special distributions, sampling distributions, central limit theorem and law of large numbers, point estimation, some methods of estimation, interval estimation, confidence intervals for certain quantities, computing sample sizes. Only 2 units of credit allowed to students who have taken STA 131A. GE credit: QL, SE. Effective: 2018 Winter Quarter.

STA 130A—Mathematical Statistics: Brief Course (4)  
Review all entries  
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (MAT 016C C- or better or MAT 017C C- or better or MAT 021C C- or better); (STA 013 C- or better or STA 013Y C- or better or STA 032 C- or better or STA 100 C- or better). Basic probability, densities and distributions, mean, variance, covariance, Chebyshev’s inequality, some special distributions, sampling distributions, central limit theorem and law of large numbers, point estimation, some methods of estimation, interval estimation, confidence intervals for certain quantities, computing sample sizes. Only two units of credit allowed to students who have taken STA 131A. GE credit: QL, SE. Effective: 2019 Fall Quarter.

STA 130B—Mathematical Statistics: Brief Course (4)  
Review all entries  
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): STA 130A or STA 131A or MAT 135A. Transformed random variables, large sample properties of estimates. Basic ideas of hypotheses testing, likelihood ratio tests, goodness-of-fit tests. General linear model, least squares estimates, Gauss-Markov theorem. Analysis of variance, F-test. Regression and correlation, multiple regression. Selected topics. GE credit: QL, SE. Effective: 2016 Fall Quarter.

STA 130B—Mathematical Statistics: Brief Course (4)  
Review all entries  
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): STA 130A C- or better or STA 131A C- or better or MAT 135A C- or better. Transformed random variables, large sample properties of estimates. Basic ideas of hypotheses testing, likelihood ratio tests, goodness-of-fit tests. General linear model, least squares estimates, Gauss-Markov theorem. Analysis of variance, F-test. Regression and correlation, multiple regression. Selected topics. GE credit: QL, SE. Effective: 2019 Fall Quarter.

STA 131A—Introduction to Probability Theory (4)  
Review all entries  
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MAT 021B; MAT 021C; MAT 022A or MAT 067. Fundamental concepts of probability theory, discrete and continuous random variables, standard distributions, moments and moment-generating functions, laws of large numbers and the central limit theorem. Not open for credit to students who have completed MAT 135A. GE credit: QL, SE. Effective: 2018 Winter Quarter.
STA 131A—Introduction to Probability Theory (4) **Review all entries**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MAT 021C C- or better; (MAT 022A C- or better or MAT 027A C- or better or MAT 067 C- or better); MAT 021D strongly recommended Fundamental concepts of probability theory, discrete and continuous random variables, standard distributions, moments and moment-generating functions, laws of large numbers and the central limit theorem. Not open for credit to students who have completed MAT 135A. GE credit: QL, SE. Effective: 2019 Fall Quarter.

STA 131B—Introduction to Mathematical Statistics (4) **Review all entries**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): STA 131A or MAT 135A; or Consent of Instructor. Sampling, methods of estimation, bias-variance decomposition, sampling distributions, Fisher information, confidence intervals, and some elements of hypothesis testing. GE credit: SE. Effective: 2017 Winter Quarter.

STA 131B—Introduction to Mathematical Statistics (4) **Review all entries**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): STA 131A C- or better or MAT 135A C- or better; Consent of Instructor. Sampling, methods of estimation, bias-variance decomposition, sampling distributions, Fisher information, confidence intervals, and some elements of hypothesis testing; GE credit: SE. Effective: 2019 Fall Quarter.

STA 131C—Introduction to Mathematical Statistics (4) **Review all entries**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): STA 131B; or Consent of Instructor. Testing theory, tools and applications from probability theory, Linear model theory, ANOVA, goodness-of-fit. GE credit: SE. Effective: 2016 Fall Quarter.

STA 131C—Introduction to Mathematical Statistics (4) **Review all entries**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): STA 131B C- or better Testing theory, tools and applications from probability theory, Linear model theory, ANOVA, goodness-of-fit. GE credit: SE. Effective: 2019 Fall Quarter.

STA 135—Multivariate Data Analysis (4) **Review all entries**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (STA 130B or STA 131B); (MAT 022A or MAT 067) Multivariate normal distribution; Mahalanobis distance; sampling distributions of the mean vector and covariance matrix; Hotellings T2; simultaneous inference; one-way MANOVA; discriminant analysis; principal components; canonical correlation; factor analysis. Intensive use of computer analyses and real data sets. GE credit: QL, SE. Effective: 2016 Fall Quarter.

STA 135—Multivariate Data Analysis (4) **Review all entries**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (STA 130B C- or better or STA 131B C- or better); (MAT 022A C- or better or MAT 027A C- or better or MAT 067 C- or better) Multivariate normal distribution; Mahalanobis distance; sampling distributions of the mean vector and covariance matrix; Hotellings T2; simultaneous inference; one-way MANOVA; discriminant analysis; principal components; canonical correlation; factor analysis. Intensive use of computer analyses and real data sets. GE credit: QL, SE. Effective: 2019 Fall Quarter.

STA 137—Applied Time Series Analysis (4)
Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): STA 108 Time series relationships; univariate time series models: trend, seasonality, correlated errors; regression with correlated errors; autoregressive models; autoregressive moving average models; spectral analysis: cyclical behavior and periodicity, measures of periodicity, periodogram; linear filtering; prediction of time series; transfer function models. GE credit: QL, SE. Effective: 2016 Fall Quarter.

STA 138—Analysis of Categorical Data (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (STA 130B or STA 131B) or (STA 106, STA 108) Varieties of categorical data, cross-classifications, contingency tables, tests for independence. Multidimensional tables and log-linear models, maximum likelihood estimation; tests of goodness-of-fit. Logit models, linear logistic models. Analysis of incomplete tables. Packaged computer programs, analysis of real data. GE credit: QL, SE. Effective: 1997 Winter Quarter.

STA 141A—Fundamentals of Statistical Data Science (4) **Review all entries**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): (STA 108 or STA 106); (STA 032 or STA 100 or STA 013 or STA 013Y) Introduction to computing for data analysis and visualization, and simulation, using a high-level language (e.g., R). Computational reasoning, computationally intensive statistical methods, reading tabular and non-standard data. Not open for credit to students who have taken STA 141 or STA 242. Effective: 2018 Spring Quarter.

STA 141A—Fundamentals of Statistical Data Science (4) **Review all entries**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): STA 108 C- or better or STA 106 C- or better Introduction to
computing for data analysis and visualization, and simulation, using a high-level language (e.g., R). Computational reasoning, computationally intensive statistical methods, reading tabular and non-standard data. Not open for credit to students who have taken STA 141 or STA 242. Effective: 2019 Fall Quarter.

**STA 141B—Data & Web Technologies for Data Analysis (4)**

Review all entries

**STA 141B—Data & Web Technologies for Data Analysis (4)**

Review all entries

**STA 141B—Data & Web Technologies for Data Analysis (4)**

Review all entries

Discussion—1 hour; Lecture—3 hours. Prerequisite(s): STA 141B or (STA 141A, ECS 010) High-performance computing in high-level data analysis languages; different computational approaches and paradigms for efficient analysis of big data; interfaces to compiled languages; R and Python programming languages; high-level parallel computing; MapReduce; parallel algorithms and reasoning. Effective: 2019 Winter Quarter.

**STA 141C—Big Data & High Performance Statistical Computing (4)**

Review all entries

Discussion—1 hour; Lecture—3 hours. Prerequisite(s): STA 141B or (STA 141A, ECS 010) Pass One and Pass Two restricted to Statistics majors and graduate students in Statistics and Biostatistics; open to all students during Open registration. High-performance computing in high-level data analysis languages; different computational approaches and paradigms for efficient analysis of big data; interfaces to compiled languages; R and Python programming languages; high-level parallel computing; MapReduce; parallel algorithms and reasoning. Effective: 2019 Winter Quarter.

**STA 141C—Big Data & High Performance Statistical Computing (4)**

Review all entries

Discussion—1 hour; Lecture—3 hours. Prerequisite(s): STA 141B or (STA 141A, ECS 010) Pass One and Pass Two restricted to Statistics majors and graduate students in Statistics and Biostatistics; open to all students during Open registration. High-performance computing in high-level data analysis languages; different computational approaches and paradigms for efficient analysis of big data; interfaces to compiled languages; R and Python programming languages; high-level parallel computing; MapReduce; parallel algorithms and reasoning. Effective: 2019 Winter Quarter.

**STA 141C—Big Data & High Performance Statistical Computing (4)**

Review all entries

Discussion—1 hour; Lecture—3 hours. Prerequisite(s): STA 141B C- or better or (STA 141A C- or better, ECS 010 C- or better) Pass One and Pass Two restricted to Statistics majors and graduate students in Statistics and Biostatistics; open to all students during Open registration. High-performance computing in high-level data analysis languages; different computational approaches and paradigms for efficient analysis of big data; interfaces to compiled languages; R and Python programming languages; high-level parallel computing; MapReduce; parallel algorithms and reasoning. Effective: 2019 Fall Quarter.

**STA 144—Sampling Theory of Surveys (4)**

Discussion/Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): (STA 130B or STA 131B) or (STA 106, STA 108) Simple random, stratified random, cluster, and systematic sampling plans; mean, proportion, total, ratio, and regression estimators for these plans; sample survey design, absolute and relative error, sample size selection, strata construction; sampling and nonsampling sources of error. GE credit: QL, SE. Effective: 2016 Fall Quarter.

**STA 145—Bayesian Statistical Inference (4)**

Review all entries

Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): STA 130B or STA 131B Subjective probability, Bayes Theorem, conjugate priors, non-informative priors, estimation, testing, prediction, empirical Bayes methods, properties of Bayesian procedures, comparisons with classical procedures, approximation techniques, Gibbs sampling, hierarchical Bayesian analysis, applications, computer implemented data analysis. GE credit: QL, SE. Effective: 2016 Fall Quarter.

**STA 145—Bayesian Statistical Inference (4)**

Review all entries

Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): STA 130B C- or better or STA 131B C- or better Subjective probability, Bayes Theorem, conjugate priors, non-informative priors, estimation, testing, prediction, empirical Bayes
methods, properties of Bayesian procedures, comparisons with classical procedures, approximation techniques, Gibbs sampling, hierarchical Bayesian analysis, applications, computer implemented data analysis. GE credit: QL, SE. Effective: 2019 Fall Quarter.

STA 160—Practice in Statistical Data Science (4) Review all entries
Discussion/Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): STA 106; STA 108; (STA 130B or STA 131B); (STA 141 or STA 141A) Principles and practice of interdisciplinary, collaborative data analysis; complete case study review and team data analysis project. Effective: 2016 Spring Quarter.

STA 160—Practice in Statistical Data Science (4) Review all entries
Discussion/Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): STA 106 C- or better; STA 108 C- or better; (STA 130B C- or better or STA 131B C- or better); STA 141A C- or better Principles and practice of interdisciplinary, collaborative data analysis; complete case study review and team data analysis project. Effective: 2019 Fall Quarter.

STA 190X—Seminar (1-2)
Seminar—1-2 hours. Prerequisite(s): STA 013 or STA 013Y or STA 032 or STA 100 or STA 103 In-depth examination of a special topic in a small group setting. Effective: 2018 Spring Quarter.

STA 192—Internship in Statistics (1-12)
Internship—3-36 hours; Term Paper. Prerequisite(s): Consent of Instructor. Upper division standing. Work experience in statistics. (P/NP grading only.) Effective: 1997 Winter Quarter.

STA 194HA—Special Studies for Honors Students (4)
Independent Study—12 hours. Prerequisite(s): Senior qualifying for honors. Directed reading, research and writing, culminating in the completion of a senior honors thesis or project under direction of a faculty advisor. GE credit: SE. Effective: 1997 Winter Quarter.

STA 194HB—Special Studies for Honors Students (4)
Independent Study—12 hours. Prerequisite(s): Senior qualifying for honors. Directed reading, research and writing, culminating in the completion of a senior honors thesis or project under direction of a faculty advisor. GE credit: SE. Effective: 1997 Winter Quarter.

STA 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

STA 199—Special Study for Advanced Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

STA 200A—Introduction to Probability Theory (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MAT 021A; MAT 021B; MAT 021C; MAT 022A; Consent of Instructor. Fundamental concepts of probability theory, discrete and continuous random variables, standard distributions, moments and moment-generating functions, laws of large numbers and the central limit theorem. Effective: 2018 Winter Quarter.

STA 200B—Introduction to Mathematical Statistics I (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): STA 200A; or Consent of Instructor. Sampling, methods of estimation, bias-variance decomposition, sampling distributions, Fisher information, confidence intervals, and some elements of hypothesis testing. Effective: 2018 Winter Quarter.

STA 200C—Introduction to Mathematical Statistics II (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): STA 200B; or Consent of Instructor. Testing theory, tools and applications from probability theory, Linear model theory, ANOVA, goodness-of-fit. No credit to students who have taken STA 131C. Effective: 2018 Spring Quarter.

STA 200C—Introduction to Mathematical Statistics II (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): STA 200B; or Consent of Instructor. Testing theory, tools and applications from probability theory, Linear model theory, ANOVA, goodness-of-fit. Effective: 2019 Summer Session 1.

STA 201—SAS Programming for Statistical Analysis (3)
Discussion/Laboratory—1 hour; Lecture—2 hours. Prerequisite(s): Introductory, upper division statistics course; some knowledge of vectors and matrices; STA 106 or STA 108 or the equivalent suggested. Introductory SAS language, data management, statistical applications, methods. Includes basics, graphics, summary statistics, data sets, variables and functions, linear models, repetitive code, simple macros, GLIM and GAM, formatting output, correspondence analysis, bootstrap. Prepare SAS base programmer certification exam. Effective: 2013 Fall Quarter.
STA 205—Statistical Methods for Research with SAS (4)
Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): An introductory upper division statistics course and some knowledge of vectors and matrices; STA 100, or STA 102, or STA 103 suggested or the equivalent. Focus on linear statistical models widely used in scientific research. Emphasis on concepts, methods and data analysis using SAS. Topics include simple and multiple linear regression, polynomial regression, diagnostics, model selection, variable transformation, factorial designs and ANCOVA. Effective: 2008 Fall Quarter.

STA 206—Statistical Methods for Research - I (4)
Discussion/Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): Introductory statistics course; some knowledge of vectors and matrices. Focus on linear statistical models. Emphasis on concepts, method and data analysis; formal mathematics kept to minimum. Topics include simple and multiple linear regression, polynomial regression, diagnostics, model selection, factorial designs and analysis of covariance. Use of professional level software. Effective: 2013 Fall Quarter.

STA 207—Statistical Methods for Research II (4)
Discussion/Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): STA 206; Knowledge of vectors and matrices. Linear and nonlinear statistical models emphasis on concepts, methods/data analysis using professional level software; formal mathematics kept to minimum. Topics include linear mixed models, repeated measures, generalized linear models, model selection, analysis of missing data, and multiple testing procedures. Effective: 2013 Fall Quarter.

STA 208—Statistical Methods in Machine Learning (4)
Discussion/Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): STA 206; STA 207; STA 135; Or their equivalents. Focus on linear and nonlinear statistical models. Emphasis on concepts, methods, and data analysis; formal mathematics kept to minimum. Topics include resampling methods, regularization techniques in regression and modern classification, cluster analysis and dimension reduction techniques. Use professional level software. Effective: 2013 Fall Quarter.

STA 209—Optimization for Big Data Analytics (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): STA 200A; STA 208 Optimization algorithms for solving problems in statistics, machine learning, data analytics. Review computational tools for implementing optimization algorithms (gradient descent, stochastic gradient descent, coordinate descent, Newton’s method.) Effective: 2018 Spring Quarter.

STA 222—Biostatistics: Survival Analysis (4)
Discussion/Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): STA 131C Incomplete data; life tables; nonparametric methods; parametric methods; accelerated failure time models; proportional hazards models; partial likelihood; advanced topics. (Same course as BST 222.) Effective: 2002 Fall Quarter.

STA 223—Biostatistics: Generalized Linear Models (4)
Discussion/Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): STA 131C Likelihood and linear regression; generalized linear model; Binomial regression; case-control studies; dose-response and bioassay; Poisson regression; Gamma regression; quasi-likelihood models; estimating equations; multivariate GLMs. (Same course as BST 223.) Effective: 2002 Fall Quarter.

STA 224—Analysis of Longitudinal Data (4)
Discussion/Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): ((STA 222, STA 223) or (BST 222, BST 223)); STA 232B; or Consent of Instructor. Standard and advanced methodology, theory, algorithms, and applications relevant for analysis of repeated measurements and longitudinal data in biostatistical and statistical settings. (Same course as BST 224.) Effective: 2002 Fall Quarter.

STA 225—Clinical Trials (4)
Discussion/Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): STA 223 or BST 223; or Consent of Instructor. Basic statistical principles of clinical designs, including bias, randomization, blocking, and masking. Practical applications of widely-used designs, including dose-finding, comparative and cluster randomization designs. Advanced statistical procedures for analysis of data collected in clinical trials. (Same course as BST 225.) Effective: 2005 Spring Quarter.

STA 226—Statistical Methods for Bioinformatics (4)
Discussion/Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): STA 131C; or Consent of Instructor. Data analysis experience recommended. Standard and advanced statistical methodology, theory, algorithms, and applications relevant to the analysis of -omics data. (Same course as BST 226.) Effective: 2007 Fall Quarter.
STA 231A—Mathematical Statistics I (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): STA 131A; STA 131B; STA 131C; MAT 025; MAT 125A; Or equivalent of MAT 025 and MAT 125A. First part of three-quarter sequence on mathematical statistics. Emphasizes foundations. Topics include basic concepts in asymptotic theory, decision theory, and an overview of methods of point estimation. Effective: 2008 Summer Session 1.

STA 231B—Mathematical Statistics II (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): STA 231A Second part of a three-quarter sequence on mathematical statistics. Emphasizes: hypothesis testing (including multiple testing) as well as theory for linear models. Effective: 2008 Summer Session 1.

STA 231C—Mathematical Statistics III (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): STA 231A; STA 231B Third part of three-quarter sequence on mathematical statistics. Emphasizes large sample theory and their applications. Topics include statistical functionals, smoothing methods and optimization techniques relevant for statistics. Effective: 2008 Summer Session 1.

STA 232A—Applied Statistics I (4)
Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): STA 106; STA 108; STA 131A; STA 131B; STA 131C; MAT 167 Estimation and testing for the general linear model, regression, analysis of designed experiments, and missing data techniques. Effective: 2011 Fall Quarter.

STA 232B—Applied Statistics II (4)
Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): STA 106; STA 108; STA 131A; STA 131B; STA 131C; STA 232A; MAT 167 Alternative approaches to regression, model selection, nonparametric methods amenable to linear model framework and their applications. Effective: 2011 Fall Quarter.

STA 232C—Applied Statistics III (4)
Laboratory—1 hour; Lecture—3 hours. Prerequisite(s): STA 106; STA 108; STA 131A; STA 131C; STA 232B; MAT 167 Multivariate analysis: multivariate distributions, multivariate linear models, data analytic methods including principal component, factor, discriminant, canonical correlation and cluster analysis. Effective: 2011 Fall Quarter.

STA 233—Design Experiments (3)
Lecture—3 hours. Prerequisite(s): STA 131C Topics from balanced and partially balanced incomplete block designs, fractional factorials, and response surfaces. Effective: 1997 Winter Quarter.

STA 235A—Probability Theory (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): (MAT 125B, MAT 135A) or STA 131A; or Consent of Instructor. Measure-theoretic foundations, abstract integration, independence, laws of large numbers, characteristic functions, central limit theorems. Weak convergence in metric spaces, Brownian motion, invariance principle. Conditional expectation. Topics selected from: martingales, Markov chains, ergodic theory. (Same course as MAT 235A.) Effective: 2007 Spring Quarter.

STA 235B—Probability Theory (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): STA 235A or MAT 235A; or Consent of Instructor. Measure-theoretic foundations, abstract integration, independence, laws of large numbers, characteristic functions, central limit theorems. Weak convergence in metric spaces, Brownian motion, invariance principle. Conditional expectation. Topics selected from: martingales, Markov chains, ergodic theory. (Same course as MAT 235B.) Effective: 2008 Spring Quarter.

STA 235C—Probability Theory (4)
Lecture—3 hours; Term Paper/Discussion—1 hour. Prerequisite(s): STA 235B or MAT 235B; or Consent of Instructor. Measure-theoretic foundations, abstract integration, independence, laws of large numbers, characteristic functions, central limit theorems. Weak convergence in metric spaces, Brownian motion, invariance principle. Conditional expectation. Topics selected from: martingales, Markov chains, ergodic theory. (Same course as MAT 235C.) Effective: 2008 Spring Quarter.

STA 237A—Time Series Analysis (4)
Lecture—3 hours; Term Paper. Prerequisite(s): STA 131B; Or the equivalent of STA 131B. Advanced topics in time series analysis and applications. Models for experimental data, measures of dependence, large-sample theory, statistical estimation and inference. Univariate and multivariate spectral analysis, regression, ARIMA models, state-space models, Kalman filtering. Effective: 1999 Fall Quarter.

STA 237B—Time Series Analysis (4)
Lecture—3 hours; Term Paper. Prerequisite(s): STA 131B; STA 237A; Or the equivalent of STA 131B. Advanced topics
in time series analysis and applications. Models for experimental data, measures of dependence, large-sample
time
STA 260—Statistical Practice and Data Analysis (3)  
Lecture/Discussion—3 hours. Prerequisite(s): STA 207 or STA 232B; Working knowledge of advanced statistical software and the equivalent of STA 207 or STA 232B. Open to students enrolled in the graduate program in Statistics or Biostatistics, as the class also serves to provide professional service to clients and collaborators who work with the students. Principles and practice of interdisciplinary collaboration in statistics, statistical consulting, ethical aspects, and basics of data analysis and study design. Emphasis on practical consulting and collaboration of statisticians with clients and scientists under instructor supervision. May be repeated up to 1 time(s). Effective: 2014 Fall Quarter.

STA 280—Orientation to Statistical Research (2)  
Seminar—2 hours. Prerequisite(s): Consent of Instructor. Guided orientation to original statistical research papers, and oral presentations in class of such papers by students under the supervision of a faculty member. May be repeated once for credit. May be repeated up to 1 time(s). (S/U grading only.) Effective: 1999 Spring Quarter.

STA 290—Seminar in Statistics (1-6)  
Variable. Prerequisite(s): Consent of Instructor. Seminar on advanced topics in probability and statistics. (S/U grading only.) Effective: 1997 Winter Quarter.

STA 292—Graduate Group in Statistics Seminar (1-2)  
Seminar—1-2 hours. Prerequisite(s): Consent of Instructor. Graduate standing. Advanced study in various fields of statistics with emphasis in applied topics, presented by members of the Graduate Group in Statistics and other guest speakers. (S/U grading only.) Effective: 1997 Fall Quarter.

STA 298—Directed Group Study (1-5)  
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. Graduate standing. Special topics in Statistics appropriate for study at the graduate level. May be repeated for credit. Effective: 2004 Spring Quarter.

STA 299—Individual Study (1-12)  
Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

STA 299D—Dissertation Research (1-12)  
Variable—3-36 hours. Prerequisite(s): Consent of Instructor. Advancement to candidacy for Ph.D. Research in Statistics under the supervision of major professor. May be repeated for credit. (S/U grading only.) Effective: 2004 Spring Quarter.

STA 390—Methods of Teaching Statistics (2)  
Laboratory—1 hour; Lecture/Discussion—1 hour. Prerequisite(s): Graduate standing. Practical experience in methods/problems of teaching statistics at university undergraduate level. Lecturing techniques, analysis of tests and supporting material, preparation and grading of examinations, and use of statistical software. Emphasis on practical training. May be repeated for credit. (S/U grading only.) Effective: 2004 Spring Quarter.

STA 396—Teaching Assistant Training Practicum (1-4)  
Variable. Prerequisite(s): Consent of Instructor. Graduate standing. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

STA 401—Methods in Statistical Consulting (3)  
Discussion—1 hour; Lecture—3 hours. Students must be enrolled in the graduate program in Statistics or Biostatistics. Introduction to consulting, in-class consulting as a group, statistical consulting with clients, and in-class discussion of consulting problems. Clients are drawn from a pool of University clients. May be repeated for credit with consent of graduate advisor. (S/U grading only.) Effective: 2006 Spring Quarter.

Study of Religion (Graduate Group)
Graduate Study. The Graduate Group in the Study of Religion offers students classical training in the literatures of particular religious traditions, and they are encouraged to understand these traditions at the intersection of contemporary thematic and regional phenomena.

Students have the opportunity to concentrate primarily on one of three regional specializations: American religious cultures, Mediterranean religions, and Asian religions. An additional regional specialization typically serves as a secondary area of competence. Students further shape their scholarship through intensive engagement in one of the following thematic specializations: Values, Ethics, and Human Rights; Modernity, Science, and Secularism; Visual Culture, Media, and Technology; Language, Rhetoric, and Performance; Body and Praxis; Theory and Method.

This curriculum guides students through a rigorous course of study, providing the breadth and depth necessary to produce exciting, rigorous scholarship at forefront of the field of Religious Studies. Graduate Group training prepares students for careers in academia as well as in the government and the private sector.

Preparation. Admission to the Graduate Group requires a Bachelor's or Master's degree in a discipline relevant to the study of religion, as well as preparation in at least one language relevant to the intended area of primary research. The group requires three letters of recommendation and a sample of recent written work. The general GRE is also required.

Graduate Advisor. Contact the Group office.

While an M.A. degree may be obtained while pursuing a Ph.D. degree, only Ph.D. applications will be accepted.

Study of Religion (Graduate Group) | SOR Ph.D.

Students have the opportunity to concentrate primarily on one of three regional specializations: American religious cultures, Mediterranean religions, and Asian religions. An additional regional specialization typically serves as a secondary area of competence. Students further shape their scholarship through intensive engagement in one of the following thematic specializations: Values, Ethics, and Human Rights; Modernity, Science, and Secularism; Visual Culture, Media, and Technology; Language, Rhetoric, and Performance; Body and Praxis; Theory and Method.

This curriculum guides students through a rigorous course of study, providing the breadth and depth necessary to produce exciting, rigorous scholarship at forefront of the field of Religious Studies. Graduate Group training prepares students for careers in academia as well as in the government and the private sector.

Preparation. Admission to the Graduate Group requires a Bachelor's or Master's degree in a discipline relevant to the study of religion, as well as preparation in at least one language relevant to the intended area of primary research. The group requires three letters of recommendation and a sample of recent written work. The general GRE is also required.

Graduate Advisor. Contact the Group office.

Study of Religion (Graduate Group) | REL Courses

Courses in REL:
REL 200A—Historical Roots of the Study of Religion (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Consideration of the historical and philosophical formation of religion as a concept. Treats the emergence of religion as a category of analysis and understanding from the Reformation through the Enlightenment. Effective: 2013 Fall Quarter.

REL 200B—Foundational Theories of Religion (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Survey of classical 19th and 20th century approaches to the study of religion. Effective: 2013 Fall Quarter.

REL 200C—Contemporary Approaches to the Study of Religion (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Consideration of major themes, issues and methods in the contemporary study of religion. Perspectives from diverse cultural settings employed to consider modern historical, philosophical, and social contexts that inform understandings of religion. Effective: 2013 Fall Quarter.

REL 200D—Field Profile Seminar I and II (1-2)
Project (Term Project). Individually guided research to survey the field of study, under the supervision of a faculty member. Four units total over two or more quarters are required by the end of the second year. May be repeated for credit. Effective: 2013 Fall Quarter.

REL 210A—Special Topics in American Religious Cultures (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Comparative, interpretive study of the treatment of specific topics in American religious cultures. May be repeated for credit when topic differs. Effective: 2013 Fall Quarter.

REL 210B—Special Topics in Asian Religious Cultures (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Comparative, interpretive study of the treatment of specific topics in Asian religious cultures. May be repeated for credit when topic differs. Effective: 2013 Fall Quarter.

REL 210C—Special Topics in Mediterranean Religious Cultures (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Comparative, interpretive study of the treatment of specific topics in Mediterranean religious cultures. May be repeated for credit when topic differs. Effective: 2013 Fall Quarter.

REL 230A—Thematic Topics - Body and Praxis (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Comparative, interpretive study of the treatment of religion through specific topics and themes relating to the body and praxis. May be repeated for credit when topic differs. Effective: 2013 Fall Quarter.

REL 230B—Thematic Topics - Language, Rhetoric, and Performance (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Comparative, interpretive study of the treatment of religion through specific topics and themes relating to language, rhetoric, and performance. May be repeated for credit when topic differs. Effective: 2013 Fall Quarter.

REL 230C—Thematic Topics - Modernity, Science, and Secularism (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Comparative, interpretive study of the treatment of religion through specific topics and themes relating to modernity, science, and secularism. May be repeated for credit when topic differs. Effective: 2013 Fall Quarter.

REL 230D—Thematic Topics - Theory and Method (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Comparative, interpretive study of the treatment of religion through specific topics and themes relating to theory and method. May be repeated for credit when topic differs. Effective: 2013 Fall Quarter.

REL 230E—Thematic Topics - Values, Ethics, and Human Rights (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Comparative, interpretive study of the treatment of religion through specific topics and themes relating to values, ethics, and human rights. May be repeated for credit when topic differs. Effective: 2013 Fall Quarter.

REL 230F—Thematic Topics - Visual Culture, Media, and Technology (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Comparative, interpretive study of the treatment of religion through specific topics and themes relating to visual culture, media, and technology. May be repeated for credit when topic differs. Effective: 2013 Fall Quarter.
REL 231B—Theories of Language (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing. Restricted to graduate students. Focuses on historical theories of language that precede and accompany post-structuralist theory. Intended to introduce graduate students to the context of modern theory formation. May cover structuralism, integrationalism, and grammaticalization. Effective: 2015 Spring Quarter.

REL 231E—History, Theory and Criticism of Human Rights (4)
Seminar—3 hours; Term Paper. Prerequisite(s): Graduate standing or consent of instructor. Restricted to graduate students. Introduces the advanced study of Human Rights and the theoretical and practical elaboration of the international Human Rights system. Seminar will engage with criticism of Human Rights and develop research and teaching within disciplinary and interdisciplinary frameworks. (Same course as HMR 200A.) Effective: 2013 Fall Quarter.

REL 298—Group Study (1-5)
Variable. Prerequisite(s): Graduate standing or consent of instructor. Group Study May be repeated for credit. (S/U grading only.) Effective: 2013 Fall Quarter.

REL 299—Research (1-12)
Variable. Prerequisite(s): Graduate standing or consent of instructor. Research May be repeated for credit. (S/U grading only.) Effective: 2012 Fall Quarter.

REL 299D—Dissertation Writing (1-12)
Variable. Prerequisite(s): Consent of Instructor. Advanced to candidacy for the Ph.D. program. Dissertation Writing May be repeated for credit. (S/U grading only.) Effective: 2013 Fall Quarter.

Sustainability in the Built Environment Minor; Civil & Environmental Engineering

Sustainability in the Built Environment Minor; Civil & Environmental Engineering
Sustainability in the Built Environment Minor

(College of Engineering)
Amit M. Kanvinde, Ph.D., Chairperson of the Department; 530-754-9471

Department Office. 2001 Ghausi Hall; 530-752-0586; http://cee.engr.ucdavis.edu

Faculty. http://cee.engr.ucdavis.edu/people/faculty-directory/

The built environmental plays an integral role in meeting society's most basic needs of shelter, security, mobility, community, and water and waste treatment, but it also contributes significantly to the sustainability challenges of climate change, pollution, resource consumption, and land use. As society and government policy increase pressure to reduce the environmental impacts of our everyday activities, individuals must increasingly understand how the built environment they design and maintain fits into the complex environmental and human system in which we live.

This minor provides a guiding framework for educating individuals who will design and maintain our future built environment in the challenges and potential solutions for improved sustainability.

The minor is designed to attract students from a range of departments and programs across campus, including, but not limited to, Environmental Science and Policy, Urban Planning, Plant Sciences, Landscape Architecture, Design, Engineering, Community and Regional Development, Anthropology, Agriculture and Resource Economics, Atmospheric Science, Environmental Remote Sensing, Environmental Toxicology, Applied Biological Systems Technology, Geology, Hydrology, and Nature and Culture. Students enrolled in the minor will acquire fundamental skills and knowledge of the elements and integrated processes necessary for a sustainable built environment.

Successful completion of the minor requires both a minimum overall UC GPA of 2.000 and a minimum 2.000 GPA for the coursework completed for the minor, with no grade lower than a C- for any course used for the minor. All courses must be taken for a letter grade.

The online Minor Declaration form is available via the Online Advising Student Information System (OASIS) at https://students.ucdavis.edu/.
Transcript notation must be requested no later than the quarter preceding graduation, and will appear as a minor in Sustainability in the Built Environment.

**Sustainability in the Built Environment Minor; Civil & Environmental Engineering | ECI Courses**

**Courses in ECI:**

**ECI 003—Civil Infrastructure and Society (4)**
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): MAT 021A (can be concurrent) Pass One restricted to lower division students; Civil Engineering majors. Introduction to civil infrastructure and its relationship with society and the natural environment. Exposure to innovative research on civil engineering and environmental systems. Participation in laboratory experiments illustrative of the solution of representative but simplified engineering problems. Not open for credit to upper division students. GE credit: OL, SE, SS. Effective: 2016 Winter Quarter.

**ECI 016—Spatial Data Analysis (2)**
Laboratory—3 hours; Lecture—1 hour. Restricted to Civil Engineering and Biological Systems Engineering majors; non-majors accommodated on a space-available basis. Computer-aided design and geographic information systems in civil engineering practice. GE credit: QL, SE. Effective: 2010 Spring Quarter.
ECI 019—C Programming for Civil and Environmental Engineers (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): MAT 021A (can be concurrent) Pass One open to Civil Engineering majors and Optical Science and Engineering majors. Computational problem solving techniques for Civil and Environmental Engineering applications using structured C programming. Algorithm design applied to realistic problems. GE credit: SE. Effective: 2011 Winter Quarter.

ECI 040—Introduction to Environmental Engineering (4)
Lecture—4 hours. Prerequisite(s): CHE 002B Pass One open to students in the College of Engineering. Introduction to topics in environmental engineering; discussion on influence of literary work, art, and media on the evolution of environmental engineering practice, relevant laws, and regulations; presentations of historical case studies. GE credit: AH. Effective: 2017 Winter Quarter.

ECI 090X—Lower Division Seminar (1-4)
Seminar—1-4 hours. Prerequisite(s): Consent of Instructor. Examination of a special topic in a small group setting. May be repeated for credit. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 092—Internship for Engineering (1-5)
Internship. Prerequisite(s): Lower division standing; approval of project prior to period of internship. Supervised work experience in civil engineering. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

ECI 098—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. Lower division standing. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

ECI 099—Special Study for Undergraduates (1-5)
Variable. Prerequisite(s): Consent of Instructor. Lower division standing. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

ECI 100—Introduction to Fluid Mechanics for Civil and Environmental Engineers (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ENG 035 C- or better; MAT 022B C- or better; PHY 009B C- or better Pass One restricted to Civil Engineering, Environmental Engineering and Hydrology majors. Fluid flow in civil & environmental engineering, basis for design, buoyancy, hydrostatics, gravity dams, hydraulic modeling: similarity & scaling, conservation laws, flow in bends, nozzles, pipes, pumps, turbines, complimentary lab experiments. Not open for credit to students who have taken ENG 103. GE credit: SE. Effective: 2017 Fall Quarter.

ECI 114—Probabilistic Systems Analysis for Civil Engineers (4)
Lecture—4 hours. Prerequisite(s): MAT 021C C- or better Probabilistic concepts and models in engineering. Statistical analysis of engineering experimental and field data. Introduction to stochastic processes and models of engineering systems. Not open for credit to students who have completed STA 120. GE credit: QL, SE. Effective: 2013 Fall Quarter.

ECI 115—Computer Methods in Civil & Environmental Engineering (4) Review all entries
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): (ENG 006 or ECS 030); MAT 022B Open to Civil Engineering majors only. Presentation, implementation and application of numerical algorithms and computer models for the solution of practical problems in Civil and Environmental Engineering. GE credit: SE. Effective: 2013 Fall Quarter.

ECI 115—Computer Methods in Civil & Environmental Engineering (4) Review all entries
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): (ENG 006 C- or better or ECS 030 C- or better or ECS 032A C- or better); MAT 022B C- or better Open to Civil Engineering majors only. Presentation, implementation and application of numerical algorithms and computer models for the solution of practical problems in Civil and Environmental Engineering. GE credit: SE. Effective: 2020 Winter Quarter.

ECI 119—Parallel Processing for Engineering Applications. (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): C programming or consent of instructor. Fundamental skills in parallel computing for engineering applications; emphasis on structured parallel programming for distributed memory parallel clusters. No credit allowed for students who have taken ECI 119B. GE credit: SE. Effective: 2005 Spring Quarter.

ECI 123—Urban Systems and Sustainability (4)
Lecture—4 hours. Prerequisite(s): Upper division standing. Systems-level approach of how to evaluate and then modify sustainability of urban systems based on interaction with natural environments. Topics include: definition/metrics of urban sustainability; system analyses of urban systems; enabling technology, policies, legislation;
measures and modification of ecological footprints. GE credit: ACGH, DD, SE, SL, SS, WE. Effective: 2006 Fall Quarter.

ECI 125—Building Energy Performance (4)
Lecture—4 hours. Prerequisite(s): Upper division standing in Engineering. Open to students in the College of Engineering. Mechanisms of energy consumption in buildings including end uses, thermal loads, ventilation, air infiltration, thermal energy distribution, and HVAC systems; energy performance simulation; methods and strategies of energy efficiency. GE credit: SE. Effective: 2011 Winter Quarter.

ECI 130—Structural Analysis (4)
Lecture—4 hours. Prerequisite(s): ENG 104 C- or better; MAT 022A Open to Civil Engineering majors. Elastic structural analysis of determinate and indeterminate trusses, beams and frames. Plastic bending and limit analysis. GE credit: QL, SE. Effective: 2014 Winter Quarter.

ECI 131—Matrix Structural Analysis (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ENG 104 C- or better; ENG 006 Open to Engineering majors only. Matrix formulation and computer analysis of statically indeterminate structures. Stiffness and flexibility formulations for elastic structures. Finite element methods for elasticity and bending problems. GE credit: SE. Effective: 2013 Fall Quarter.

ECI 132—Structural Design: Metallic Elements (4) Review all entries
Lecture—4 hours. Prerequisite(s): ECI 130 Design of metallic beams, columns, and other members for various types of loading and boundary conditions; design of connections between members; member performance within structural systems. GE credit: SE, VL. Effective: 2013 Fall Quarter.

ECI 135—Structural Design: Concrete Elements (4) Review all entries
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ECI 130 Restricted to Civil Engineering, Civil Engineering/Materials Science and Engineering, and Materials Science and Engineering majors only. Strength design procedures for columns, rectangular beams, T-beams and beams of general cross-section. Building code requirements for bending, shear, axial load, combined stresses and bond. Introduction to prestressed concrete. GE credit: QL, SE. Effective: 2013 Fall Quarter.

ECI 136—Building Design (4) Review all entries
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): (ECI 130 or ECI 131); (ECI 135 or ECI 132) Design of a building structure for a specific need under the multiple constraints of safety, serviceability, cost and aesthetics. GE credit: SE. Effective: 2019 Winter Quarter.

ECI 137—Construction Principles and Project Management (4)
Laboratory—3 hours; Lecture—3 hours. Restricted to upper division standing in Engineering. Project management, with civil engineering construction and design applications, including project scope, schedule, resources, cost, quality, risk, and control. Construction industry overview. Interactions between planning, design, construction, operations. Construction operations analysis. Contract issues. Project management software, field trips, guest lectures. GE credit: ACGH, OL, QL, SE, SS, VL, WE. Effective: 2013 Fall Quarter.

ECI 138—Earthquake Loads on Structures (4) Review all entries
Discussion—1 hour, Lecture—3 hours. Prerequisite(s): ECI 130 or ECI 131 Determination of loads on structures due to earthquakes. Methods of estimating equivalent static lateral forces; response spectrum and time history analysis.

ECI 138—Earthquake Loads on Structures (4) Review all entries
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECI 130 C- or better or ECI 131 C- or better Determination of loads on structures due to earthquakes. Methods of estimating equivalent static lateral forces; response spectrum and time history analysis. Concepts of mass, damping and stiffness for typical structures. Design for inelastic behavior. Numerical solutions and Code requirements. GE credit: SE. Effective: 2019 Winter Quarter.

ECI 139—Advanced Structural Mechanics (4)
Lecture—4 hours. Prerequisite(s): ENG 104 C- or better Review of stress, strain, equilibrium, compatibility, and elastic material behavior. Plane stress and plane strain problems in elasticity; energy methods. Theories for unsymmetric bending, straight and curved beams. Beams on elastic foundations; stresses in plates and shells; elastic stability. GE credit: QL, SE. Effective: 2013 Fall Quarter.

ECI 140A—Environmental Analysis of Aqueous Systems (4) Review all entries
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): CHE 002B C- or better; ECI 040 (can be concurrent) Pass One restricted to Environmental Engineering majors. Introduction to "wet chemical" and instrumental techniques commonly used in the examination of water and wastewater and associated data analysis. Not open for credit to students who have taken ECH 140 or CHE 100. GE credit: SE. Effective: 2020 Winter Quarter.

ECI 140B—Chemical Principles for Environmental Engineers (4)
Lecture—4 hours. Prerequisite(s): CHE 002B C- or better Aqueous chemistry; equilibrium relationships; carbonate system; thermodynamics; kinetics & rate laws; precipitation, adsorption, & volatilization phenomenon; oxidation & reduction reactions; pH, pE and predominance diagrams; organic chemicals. Not open for credit to students who have taken ECI 140. GE credit: SE. Effective: 2017 Fall Quarter.

ECI 140C—Biological Principles for Environmental Engineering (4) Review all entries
Lecture—4 hours. Prerequisite(s): ECI 140A C- or better or ECI 140B C- or better Fundamental microbiology concepts for environmental engineers; provides background needed for the application of water and wastewater treatment, bioremediation, air pollution control and biotransformations in environmental engineered systems. Only two units of credit for students who have taken MIC 101 or MIC 102. GE credit: SE. Effective: 2018 Winter Quarter.

ECI 140D—Water and Wastewater Treatment System Design (4) Review all entries
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): (ENG 103 C- or better or ECI 100 C- or better); (ECI 140 C- or better or ECI 140A C- or better or ECI 140B C- or better or ECI 140C C- or better or ECI 140A C- or better or ECI 140B C- or better or ECI 140C C- or better or ECI 140A C- or better or ECI 140B C- or better or ECI 140C C- or better or ECI 148A C- or better) Evaluation and design of water and wastewater treatment systems. Not open for credit to students who have taken ECI 148B. GE credit: SE. Effective: 2020 Winter Quarter.

ECI 141—Engineering Hydraulics (3)
Lecture—3 hours. Prerequisite(s): ENG 103 C- or better or ECI 100 C- or better Nature of flow of a real fluid; flow in pipes; open channel flow; turbomachinery; fluid forces on objects: boundary layers, lift and drag. GE credit: SE. Effective: 2018 Winter Quarter.
ECI 141L—Engineering Hydraulics Laboratory (1)
Laboratory—3 hours. Prerequisite(s): ECI 141 (can be concurrent) Open to Engineering students only. Laboratory experiments and demonstrations on flow measurements, sluice gates, hydraulic jump, flow characteristics, and centrifugal pumps. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 142—Engineering Hydrology (4)
Lecture—4 hours. Prerequisite(s): ECI 141 (can be concurrent) Restricted to students in the College of Engineering. The hydrologic cycle. Evapotranspiration, interception, depression storage and infiltration. Streamflow analysis and modeling. Flood routing through channels and reservoirs. Frequency analysis of hydrologic variables. Precipitation analysis for hydrologic design. Hydrologic design. GE credit: QL, SE. Effective: 2013 Fall Quarter.

ECI 143—Green Engineering Design and Sustainability (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): Upper division standing. Restricted to upper division standing; Pass One restricted to Civil Engineering majors. Application of concepts, goals and metrics of sustainability, green engineering and industrial ecology to engineering design. Other course topics include life-cycle assessments, analysis of environmental management systems, and economics of pollution prevention and sustainability. GE credit: QL, SE, SL, SS. Effective: 2017 Winter Quarter.

ECI 144—Groundwater Systems Design (4)
Lecture—4 hours. Prerequisite(s): ECI 141 Groundwater occurrence, distribution, and movement; groundwater flow systems; radial flow to wells and aquifer testing; aquifer management; groundwater contamination; solute transport by groundwater; fate and transport of subsurface contaminants. Groundwater supply and transport modeling. GE credit: SE. Effective: 2005 Spring Quarter.

ECI 144L—Groundwater Systems Design Laboratory (1)
Laboratory—3 hours. Prerequisite(s): ECI 144 (can be concurrent); ECI 144 required concurrently. Computer modeling of groundwater flow under regional gradient, well injection/withdrawal, and natural and engineered boundary conditions. Use of Groundwater Vistas computer program. Effective: 2010 Fall Quarter.

ECI 145—Hydraulic Structure Design (4)
Discussion—1 hour; Laboratory—3 hours; Lecture—2 hours. Prerequisite(s): ECI 141 C- or better Project-based course on the design of an integrated urban drainage system with focus on consideration of design alternatives, multiple realistic constraints, quantification of uncertainty, codes and standards, technical drawing and cost analysis. GE credit: SE. Effective: 2017 Fall Quarter.

ECI 146—Water Resources Simulation (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ENG 103 C- or better or ECI 100 C- or better Computer simulation techniques in the analysis, design and operation of surface water systems; modeling concepts and practices with application to surface runoff; water quality in rivers and streams and dispersion of contaminants in water bodies. GE credit: SE. Effective: 2018 Winter Quarter.

ECI 148A—Water Quality Management (4)
Lecture—4 hours. Prerequisite(s): CHE 002B C- or better Basic concepts of water quality measurements and regulations. Introduction to physical, biological and chemical processes in natural waters. Fundamentals of mass balances in water and wastewater treatment. GE credit: SE. Effective: 2013 Fall Quarter.

ECI 149—Air Pollution (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MAT 021D; MAT 022B; CHE 002B C- or better; (ATM 121A or ENG 103 C- or better or ECI 100 C- or better) Physical and technical aspects of air pollution. Emphasis on geophysical processes and air pollution meteorology as well as physical and chemical properties of pollutants. (Same course as ATM 149.) GE credit: QL, SE, SL. Effective: 2018 Winter Quarter.

ECI 150—Air Pollution Control System Design (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ECI 149 C- or better or ATM 149 C- or better Design and evaluation of air pollution control devices and systems. GE credit: SE. Effective: 2017 Fall Quarter.

ECI 153—Deterministic Optimization and Design (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): MAT 021C; MAT 022A; Computer programming course. Operations research. Optimization techniques such as linear programming, dynamic programming, and non-linear programming. Applications in civil engineering disciplines, including multiple realistic constraints, through computer-based course projects. GE credit: QL, SE, SL. Effective: 2013 Fall Quarter.

ECI 155—Water Resources Engineering Planning (4)
Lecture—4 hours. Prerequisite(s): (ENG 106 or ECN 001A or ECN 001AV); ECI 114 Basic engineering planning
concepts; role of engineering, economic, environmental and social information and analysis; institutional, political and legal aspects. Case studies and computer models illustrate the planning of water resource systems. GE credit: QL, SE, SL, SS, WE. Effective: 2018 Winter Quarter.

ECI 161—Transportation System Operations (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): MAT 021C C- or better; PHY 009A C- or better Principles of transportation system operations; traffic characteristics and methods of measurement; models of transportation operations and congestion applied to urban streets and freeways. GE credit: QL, SE. Effective: 2016 Fall Quarter.

ECI 163—Energy and Environmental Aspects of Transportation (4)
Extensive Writing; Lecture—3 hours. Prerequisite(s): ECN 001A or ECN 001AV or ENG 106 Engineering, economic, and systems planning concepts. Analysis and evaluation of energy, air quality and selected environmental attributes of transportation technologies. Strategies for reducing pollution and petroleum consumption in light of institutional and political constraints. Evaluation of vehicle emission models. (Same course as ESP 163.) GE credit: SE, SL, SS, WE. Effective: 2018 Spring Quarter.

ECI 165—Transportation Policy (3)
Lecture—3 hours. Transportation and associated environmental problems confronting urban areas, and prospective technological and institutional solutions. Draws upon concepts and methods from economics, engineering, political science and environmental studies. GE credit: QL, SE, SS. Effective: 2013 Fall Quarter.

ECI 171—Soil Mechanics (4)
Lecture—4 hours. Prerequisite(s): (ENG 103 (can be concurrent) or ECI 100 (can be concurrent)); ENG 104 C- or better; ECI 171L (can be concurrent); ECI 171L required concurrently. Restricted to Civil Engineering and Environmental Engineering majors only. Soil formations, mass-volume relationships, soil classification, effective stress, soil-water-void relationships, compaction, seepage, capillarity, compressibility, consolidation, strength, states of stress and failure, lateral earth pressures, and slope stability. GE credit: SE. Effective: 2018 Spring Quarter.

ECI 171L—Soil Mechanics Laboratory (1)
Laboratory—3 hours. Prerequisite(s): ECI 171 (can be concurrent); ECI 171 required concurrently. Laboratory studies utilizing standard testing methods to determine physical, mechanical and hydraulic properties of soil and demonstration of basic principles of soil behavior. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 173—Foundation Design (4)
Lecture—4 hours. Prerequisite(s): ECI 171 Foundation analysis and design, including site characterization, evaluation of shallow and deep foundation alternatives, evaluation of bearing capacity and settlements, design of retaining structures, and case-based design experiences. GE credit: SE. Effective: 2018 Winter Quarter.

ECI 175—Geotechnical Earthquake Engineering (4)
Lecture—4 hours. Prerequisite(s): ECI 171 C- or better Tectonics, faults, site response, and probabilistic ground motion prediction equations. Cyclic loading and liquefaction of soil elements and layers. Empirical procedures and field tests for evaluation of triggering and consequences, of liquefaction. GE credit: SE. Effective: 2017 Fall Quarter.

ECI 179—Pavement Engineering (4)
Discussion/Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ENG 104 C- or better Pavement types (rigid, flexible, unsurfaced, rail), their applications (roads, airfields, ports, rail) and distress mechanisms. Materials, traffic and environment characterization. Empirical and mechanistic-empirical design procedures. Maintenance, rehabilitation and reconstruction; construction quality; asphalt concrete mix design. GE credit: QL, SE, SL, VL. Effective: 2013 Fall Quarter.

ECI 189A—Selected Topics in Civil Engineering; Environmental Engineering (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Environmental Engineering. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 189B—Selected Topics in Civil Engineering; Hydraulics and Hydrologic Engineering (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Hydraulics and Hydrologic Engineering. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 189C—Selected Topics in Civil Engineering; Engineering Planning (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Engineering Planning. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.
ECI 189D—Selected Topics in Civil Engineering; Geotechnical Engineering (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Geotechnical Engineering. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 189E—Selected Topics in Civil Engineering; Structural Engineering (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Structural Engineering. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 189F—Selected Topics in Civil Engineering; Structural Mechanics (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Structural Mechanics. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 189G—Selected Topics in Civil Engineering; Transportation Engineering (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Transportation Engineering. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 189H—Selected Topics in Civil Engineering; Transportation Planning (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Transportation Planning. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 189I—Selected Topics in Civil Engineering; Water Resources Engineering (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Water Resources Engineering. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 189J—Selected Topics in Civil Engineering; Water Resources Planning (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Water Resources Planning. May be repeated for credit when topic differs. GE credit: SE. Effective: 1997 Winter Quarter.

ECI 190C—Research Group Conferences in Civil and Environmental Engineering (1)
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Upper division standing in Civil and Environmental Engineering. Research group conferences. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

ECI 192—Internship in Engineering (1-5)
Internship. Prerequisite(s): Upper division standing; approval of project prior to the period of the internship. Supervised work experience in civil engineering. May be repeated for credit. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

ECI 193A—Civil and Environmental Engineering Senior Design (4)
Laboratory—2 hours; Lecture—2 hours. Prerequisite(s): (ECI 140D C- or better) or (ECI 171 C- or better, ECI 171L C- or better) or (ECI 132 C- or better or ECI 135 C- or better) or (ECI 161 C- or better or ECI 163 C- or better) or (ECI 141 C- or better, ECI 141L C- or better); and Consent of Instructor. And one ECI major depth course with a C- or better. Students must be in final year of study. Open to seniors in Civil Engineering and Environmental Engineering only; students must be in their final year of study. Culminating design experience for civil engineering and environmental engineering majors. Student teams work closely with faculty, city officials or consulting clients to propose, implement and validate a unique solution to a real-world problem. GE credit: OL, SE, WE. Effective: 2018 Winter Quarter.

ECI 193B—Civil and Environmental Engineering Senior Design (4)
Laboratory—3 hours; Lecture—1 hour. Prerequisite(s): ECI 193A Open to seniors in Civil Engineering and Environmental Engineering only. Culminating design experience for civil engineering and environmental engineering majors. Student teams work closely with faculty, city officials or consulting clients to propose, implement and validate a unique solution to a real-world problem. GE credit: OL, SE, VL, WE. Effective: 2017 Fall Quarter.
ECI 198—Directed Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) GE credit: SE. Effective: 1997 Winter Quarter.

ECI 199—Special Study for Advanced Undergraduates (1-5)
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. Special study. (P/NP grading only.) GE credit: SE. Effective: 2016 Fall Quarter.

ECI 201—Introduction to Theory of Elasticity (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ENG 104 Fundamental equations of elasticity in three dimensions; plane stress and plane strain; flexure and torsion of bars of various shapes. Introduction to variational and approximate methods. Effective: 1997 Winter Quarter.

ECI 203—Inelastic Behavior of Solids (3)
Lecture—3 hours. Prerequisite(s): ECI 201 Fundamentals of theories of plasticity, viscoelasticity and viscoplasticity for solids. Macroscopic constitutive modelling for engineering materials, e.g., metals, polymers, soils, etc., and microscopic motivation. Effective: 1997 Winter Quarter.

ECI 205—Continuum Mechanics (3)
Lecture—3 hours. Prerequisite(s): ECI 201 Tensor formulation of the field equations for continuum mechanics, including large deformation effects. Invariance and symmetry requirements. Introduction to nonlinear thermoelasticity and thermodynamics. Solution of three-dimensional problems. Selected topics. Effective: 1998 Winter Quarter.

ECI 206—Fracture Mechanics (4)
Lecture—4 hours. Prerequisite(s): ECI 201; ENG 104 Linear and nonlinear fracture mechanics, stress analysis, energy concepts, brittle fracture criteria, path independent integrals, Dugdale-Barenblatt model, general cohesive zone models, ductile fracture criteria, crack tip fields for stationary and propagating cracks, fatigue. Application of numerical methods for fracture mechanics. Effective: 2006 Winter Quarter.

ECI 211—Advanced Matrix Structural Analysis (4)
Lecture—4 hours. Prerequisite(s): ECI 131 Analysis of complex frameworks by the displacement method; treatment of tapered beams, curved beams, and beams on elastic foundations; partially rigid connections; geometric and material nonlinearities; buckling; flexibility-based formulations; FEM-software for nonlinear analysis of structures. Effective: 2003 Winter Quarter.

ECI 212A—Finite Element Procedures in Applied Mechanics (4)
Lecture—4 hours. Prerequisite(s): EAD 115 or (MAT 128A, MAT 128B (can be concurrent)) Weighted-residual and Rayleigh-Ritz methods. Weak/variational formulation and development of discrete equations using finite element approximations. Application to one- and two-dimensional problems (heat conduction). Effective: 2003 Winter Quarter.

ECI 212B—Finite Elements: Application to Linear and Non-Linear Structural Mechanics Problems (4)

ECI 213—Analysis of Structures Subjected to Dynamic Loads (4)
Lecture—4 hours. Prerequisite(s): ECI 211 (can be concurrent) Analysis of structures subjected to earthquake, wind and blast loading; distributed, consistent and lumped mass techniques; computer implementation; nonlinear response spectrum; frequency and time domain analysis; seismic protection of structures; numerical methods in linear and nonlinear structural dynamics. Effective: 2012 Fall Quarter.

ECI 214—Probabilistic Seismic Hazard Analysis and Design Ground Motions (4)
Lecture—4 hours. Probabilistic seismic hazard analysis for use in developing design spectra and for seismic risk analyses, including the development of earthquake ground motion time series for use in dynamic analyses of structures. Effective: 2016 Winter Quarter.

ECI 216—Meshfree Methods and Partition of Unity Finite Elements (4)
Lecture—4 hours. Prerequisite(s): ECI 201; ECI 212A Advanced discretization techniques such as meshfree methods and partition of unity finite elements for the Galerkin solution of boundary-value problems in solid and structural mechanics. Application of meshfree and extended finite element methods in computational fracture. Effective: 2016 Winter Quarter.
ECI 221—Theory of Plates and Introduction to Shells (3)

ECI 223—Advanced Dynamics, Signal Processing, and Smart Structures Technology (4)
Lecture—4 hours. Prerequisite(s): ECI 213; Or equivalent. Signal processing and system identification of structures under dynamic excitations; Fourier and Laplace transforms; data acquisition and sensor design fundamentals; sensor technologies/techniques for nondestructive evaluation; structural control; actuators and dampers for smart structures; piezoelectrics and acoustic emissions; micro- and nano-fabrication. Effective: 2011 Winter Quarter.

ECI 232—Advanced Topics in Concrete Structures (4)
Lecture—4 hours. Prerequisite(s): ECI 130; ECI 135; ECI 138; Graduate standing. Ductility of reinforced concrete; strength of two-way slabs; modified compression field theory. Effective: 2001 Fall Quarter.

ECI 233—Advanced Design of Steel Structures (4)
Lecture—4 hours. Prerequisite(s): (ECI 130 or ECI 131); ECI 132 Review of Load and Resistance Factor Design (LRFD); steel-plate girder design; plastic design of indeterminate systems; moment frames and bracing systems; connection design; seismic design of steel structures; vibration of flooring systems; steel-concrete composite design. Effective: 2004 Winter Quarter.

ECI 234—Prestressed Concrete (4)
Lecture—4 hours. Prerequisite(s): ECI 135; (ECI 130 or ECI 131) Survey of methods and applications; prestressing materials and systems; prestress losses; flexural design; design for shear and torsion; deflection computation and control; continuous beams and indeterminate structures; floor systems; partial prestressing; design of compression members; strut-and-tie models. Effective: 2003 Fall Quarter.

ECI 235—Cement Composites (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ENG 104 Applications of cement composites; materials selection and proportioning; component and composite properties; hydration reactions and microstructure development; mechanisms of failure; nondestructive test methods; fiber reinforcement; concrete durability; novel reinforcing materials; ferrocement; repair and retrofit technologies; applications to structural design. Effective: 2002 Fall Quarter.

ECI 236—Design of Fiber Reinforced Polymer Composite Structures (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ECI 135 Basics of mechanics and design of polymer matrix composites; composite classification, manufacturing process, micromechanical property determination, classical lamination theory, strength theories, first-ply-failure, test methods, design practice, strengthening and retrofitting of existing reinforced concrete structures. Effective: 2008 Winter Quarter.

ECI 237—Bridge Design (4)
Lecture—4 hours. Prerequisite(s): ECI 130; ECI 135; ECI 234 recommended. Open to Graduate Students only. Bridge types, behavior and construction characteristics; design philosophy, details according to Caltrans and American Association of State Highway and Transportation Officials codes, principles; seismic design and retrofit of concrete bridges; modern bridges using advanced fiber reinforced polymer composites; fieldtrip required. Effective: 2007 Fall Quarter.

ECI 238—Performance-Based Seismic Engineering (4)
Lecture—4 hours. Prerequisite(s): ECI 138; ECI 213 Modern seismic design; performance-based seismic design; seismic hazard; seismic demands; linear and nonlinear procedures; performance assessment: deterministic and probabilistic procedure; review of FEMA-350, FEMA-356, ATC-40 and other performance-based guidelines. Effective: 2005 Spring Quarter.

ECI 240—Water Quality (4)
Lecture—4 hours. Prerequisite(s): ECI 141; ECI 142 Quality requirements for beneficial uses of water. Hydrologic cycle of quality. Hydromechanics in relation to quality of surface and groundwaters; transport and fate of waterborne pollutants. Heat budget for surface waters; predictive methods; introduction to water quality modeling. Effective: 2000 Fall Quarter.

ECI 241—Environmental Reactive Chemical Transport Modeling (4)
Lecture—4 hours. Prerequisite(s): CHE 002A or CHE 002B or ECI 149; Or equivalent. Modeling of reactive chemical transport in air and water including kinetic reactions, equilibrium reactions, and phase partitioning. Emphasis on
numerical solution schemes and programming techniques to provide deeper insight into model performance and limitations. Effective: 2014 Fall Quarter.

**ECI 242—Air Quality (4)**
Lecture—4 hours. Prerequisite(s): ENG 105; ECI 141; ECI 149; Or equivalents. Factors determining air quality. Effects of air pollutants. Physical and chemical fundamentals of atmospheric transport and reaction. Introduction to dispersion modeling. Effective: 2002 Fall Quarter.

**ECI 243A—Water and Waste Treatment (4) Review all entries**
Lecture—4 hours. Prerequisite(s): ECI 148A; Or the equivalent. Characteristics of water and airborne wastes; treatment processes and process kinetics; treatment system design. Effective: 1999 Fall Quarter.

**ECI 243A—Water and Waste Treatment (4) Review all entries**
Lecture—4 hours. Prerequisite(s): ECI 148A; Or the equivalent. Open to Graduate majors only. Characteristics of water and airborne wastes; treatment processes and process kinetics; treatment system design. Effective: 2019 Spring Quarter.

**ECI 243B—Water and Waste Treatment (4) Review all entries**
Lecture—4 hours. Prerequisite(s): ECI 243A Continuation of course 243A. Aeration, thickening, biological processes, design of biological treatment systems. Effective: 2000 Winter Quarter.

**ECI 243B—Water and Waste Treatment (4) Review all entries**
Lecture—4 hours. Prerequisite(s): ECI 243A Open to graduate majors only. Continuation of course 243A. Aeration, thickening, biological processes, design of biological treatment systems. Effective: 2019 Spring Quarter.

**ECI 243L—Pilot Plant Laboratory (4) Review all entries**
Discussion—1 hour; Laboratory—6 hours; Lecture—1 hour. Prerequisite(s): ECI 243A; ECI 243B (can be concurrent); or Consent of Instructor. Graduate standing. Laboratory investigation of physical, chemical, and biological processes for water and wastewater treatment. Effective: 2016 Winter Quarter.

**ECI 243L—Pilot Plant Laboratory (4) Review all entries**
Discussion—1 hour; Laboratory—6 hours; Lecture—1 hour. Prerequisite(s): ECI 243A; ECI 243B (can be concurrent); or Consent of Instructor. Graduate standing. Open to graduate majors only. Laboratory investigation of physical, chemical, and biological processes for water and wastewater treatment. Effective: 2019 Spring Quarter.

**ECI 244—Life Cycle Assessment for Sustainable Engineering (4) Review all entries**
Lecture—4 hours. Prerequisite(s): Graduate standing. Life cycle assessment methodology is taught emphasizing applications to infrastructure and energy systems. Life cycle design, life cycle cost methods, other tools from industrial ecology, and links to policy are covered as well. Effective: 2011 Fall Quarter.

**ECI 244—Life Cycle Assessment for Sustainable Engineering (4) Review all entries Discontinued**
Lecture—4 hours. Prerequisite(s): Graduate standing. Life cycle assessment methodology is taught emphasizing applications to infrastructure and energy systems. Life cycle design, life cycle cost methods, other tools from industrial ecology, and links to policy are covered as well. Effective: 2019 Winter Quarter.

**ECI 244A—Life Cycle Assessment for Sustainable Engineering (4)**
Lecture—4 hours. Enrollment restricted to graduate students. Life cycle assessment methodology. Emphasis on applications to infrastructure and energy systems. Life cycle design, life cycle cost methods, other tools from industrial ecology, and links to policy. Not open to students who have taken ECI 244. (Same course as EGG 201.) Effective: 2019 Winter Quarter.

**ECI 245A—Applied Environmental Chemistry: Inorganic (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): ENG 105; ECI 140; CHE 002B; Or the equivalent of CHE 002B; CHE 002C or CHE 107A recommended. Chemistry of natural and polluted waters. Topics include chemical, kinetic and equilibrium principles, redox reactions, gas solution and solid-solution equilibria, thermodynamics, carbonate systems, coordination chemistry, interfacial phenomena. Effective: 2000 Spring Quarter.

**ECI 245B—Applied Environmental Chemistry: Organic (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): CHE 128A; CHE 128B; CHE 128C; Or the equivalent; CHE 002C or CHE 107A recommended. Transport and transformation of organic chemicals in the environment. Topics include application of thermodynamics to predict solubility and activity coefficients; distribution of organic chemicals between the aqueous phase and air, solvent, or solid phases; chemical, photochemical and biological transformation reactions. Effective: 2001 Spring Quarter.
ECI 246N—Understanding Climate Change: Causes and Consequences (4)
Lecture—4 hours. Open to graduate students. Diverse physical processes that govern climate and drive climate change. Observational, experimental and modeling techniques and methods used in the development of our scientific understanding of the Earth system. Effective: 2016 Spring Quarter.

ECI 247—Aerosols (4)
Lecture—4 hours. Prerequisite(s): ENG 103; ENG 105; ECI 141; ECI 149 Behavior of airborne particles including particle formation, modification, and removal processes. Effective: 2002 Fall Quarter.

ECI 247L—Aerosols Laboratory (4)
Laboratory—6 hours; Lecture—2 hours. Prerequisite(s): ECI 247 Methods of generation and characterization of aerosols. Detailed topics may include flow rate measurement, aerosol generation, aerosol collection, ions measurement, metals measurement, and carbon measurement. May be repeated up to 1 time(s). Effective: 2002 Fall Quarter.

ECI 248—Biofilm Processes (4)
Lecture—4 hours. Prerequisite(s): SSC 111 or SSC 211 or ECI 243B; or Consent of Instructor. Calculus and basic cell molecular biology are recommended. Natural and engineered biofilms, including biofilm occurrence and development, spatial structure, microbial processes, fundamental and applied research tools, biofilm reactors, beneficial uses, and detrimental effects. Effective: 2004 Spring Quarter.

ECI 249—Probabilistic Design and Optimization (4)
Lecture—4 hours. Prerequisite(s): ECI 114; ECI 153; ENG 106; Or equivalents. Design by optimization for probabilistic systems, decision theory, the value of information, probabilistic linear programming, probabilistic dynamic programming, nonlinear probabilistic optimization. Applications in civil engineering design, project evaluation, and risk management. Effective: 2004 Spring Quarter.

ECI 250—Civil Infrastructure System Optimization and Identification (4)
Lecture—4 hours. Prerequisite(s): MAT 021C; MAT 022A; Programming course; EAD 115 and mathematical modeling course recommended. Restricted to graduate standing. Applied mathematics with a focus on modeling, identifying, and controlling dynamic, stochastic, and underdetermined systems. Applications in transportation networks, water resource planning, and other civil infrastructure systems. Effective: 2005 Spring Quarter.

ECI 251—Transportation Demand Analysis (4)

ECI 252—Sustainable Transportation Technology and Policy (3) Review all entries
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): ECI 165 Role of technical fixes and demand management in creating a sustainable transportation system. Emphasis on technology options, including alternative fuels, electric propulsion, and IVHS. Analysis of market demand and travel behavior, environmental impacts, economics and politics. (Same course as ESP 252.) Effective: 2000 Fall Quarter.

ECI 252—Sustainable Transportation Technology and Policy (3) Review all entries Discontinued
Discussion—1 hour; Lecture—2 hours. Prerequisite(s): ECI 165 Role of technical fixes and demand management in creating a sustainable transportation system. Emphasis on technology options, including alternative fuels, electric propulsion, and IVHS. Analysis of market demand and travel behavior, environmental impacts, economics and politics. (Same course as ESP 252.) Effective: 2018 Fall Quarter.

ECI 253—Dynamic Programming and Multistage Decision Processes (4)
Lecture—4 hours. Prerequisite(s): MAT 021C; MAT 022A; Programming course; EAD 115 recommended. Operations research. Optimization techniques with a focus on dynamic programming in treating deterministic, stochastic, and adaptive multistage decision processes. Brief review of linear programming and non-linear programming. Applications in transportation networks and other civil infrastructure systems. Effective: 2005 Spring Quarter.

ECI 254—Exploring Data from Built Environment Using R (4)
Laboratory—3 hours; Lecture—3 hours. Introduction to modern data science, specifically data acquisition, exploratory data analysis, visualization, and beginning data analysis using R. Emphasizes computational reasoning and working with tabular and non-standard data. Focus will be on data generated in the built environment. (Same course as GEO 279,) Effective: 2017 Fall Quarter.

1990
ECI 256—Urban Traffic Management and Control (4)
Lecture—4 hours. Prerequisite(s): ECI 114 Basic concepts, models, and methods related to the branch of traffic science that deals with the movement of vehicles on a road network, including travel speed, travel time, congestion concepts, car-following and hydrodynamic traffic models. Effective: 2000 Fall Quarter.

ECI 257—Flow in Transportation Networks (4)
Lecture—4 hours. Prerequisite(s): ECI 153; ECI 161 or ECI 256 recommended. Elements of graph theory, a survey of pertinent optimization techniques, extremal principles in network flow problems, deterministic equilibrium assignment, stochastic equilibrium assignment, extensions of equilibrium assignments and dynamic transportation network assignment. Effective: 2000 Winter Quarter.

ECI 259—Asphalt and Asphalt Mixes (4)
Lecture—4 hours. Prerequisite(s): ECI 179; or Consent of Instructor. Asphalts and asphalt mix types and their use in civil engineering structures, with primary emphasis on pavements. Asphalt, aggregate properties and effects on mix properties. Design, construction, recycling. Recent developments and research. Effective: 2006 Winter Quarter.

ECI 260—Sediment Transport (4)
Lecture—4 hours. Prerequisite(s): ECI 141; Or equivalent. Sediment transport in hydrologic systems. Process-oriented course which will emphasize how sediment moves and the physical processes that affect sediment transport. Field trip. Effective: 2006 Winter Quarter.

ECI 261—Cohesive Particle Transportation (3) Review all entries Discontinued

ECI 261—Colloids in Soil and Water (4) Review all entries
Lecture—4 hours. Prerequisite(s): CHE 002B; (ENG 103 or ECI 100); Upper division or graduate standing. Pass One restricted to graduate standing; Pass Two restricted to upper division standing or graduate standing. Colloid occurrence, properties, behavior in different environments, and transport mechanisms in water and soils. Emphasis on their role in water contamination. Effective: 2018 Fall Quarter.

ECI 264A—Transport, Mixing and Water Quality in River and Lakes (4)
Lecture—4 hours. Prerequisite(s): ECI 141; ECI 240 Principal causes of mixing and transport in rivers, lakes and reservoirs, and their impacts on water quality. Case studies of specific lakes and rivers. Effective: 2000 Fall Quarter.

ECI 264B—Transport, Mixing and Water Quality in Estuaries and Wetlands (4)
Lecture—4 hours. Prerequisite(s): ECI 141; ECI 240 Principal causes of mixing and transport in estuaries and wetlands, and their impacts on water quality. Topics include advection/diffusion; tides; transverse mixing; longitudinal dispersion; sediment transport; nutrient cycling; computer modeling of estuaries. Case studies of specific systems. Effective: 2000 Spring Quarter.

ECI 265—Stochastic Hydrology and Hydraulics (4)
Lecture—4 hours. Prerequisite(s): ECI 266; or Consent of Instructor. Physics-based stochastic methods in modeling hydrologic and hydraulic processes; theory for modeling hydrologic-hydraulic governing equations as stochastic partial differential equations applied to various hydrologic-hydraulic processes under uncertainty, including transport, open channel flow, overland flow, soil water flow, and groundwater. Effective: 2015 Winter Quarter.

ECI 266—Applied Stochastic Methods in Engineering (4)
Lecture—4 hours. Prerequisite(s): ECI 114 or MAT 131 or STA 130A or STA 131A or MAT 118A (can be concurrent) Stochastic processes classification; Gaussian random fields; stochastic calculus in mean square; Ito and Stratonovich stochastic differential equations; Fokker-Planck equation; stochastic differential equations with random coefficients. Effective: 1999 Fall Quarter.

ECI 267—Water Resource Management (3)
Lecture—3 hours. Prerequisite(s): ECI 114; ECI 141; ECI 142; ECI 153 recommended. Engineering, institutional, economic, and social basis for managing local and regional water resources. Examples in the context of California's water development and management. Uses of computer modeling to improve water management. (Same course as GEO 212.) Effective: 2013 Fall Quarter.

ECI 268—Infrastructure Economics (3)
Lecture—3 hours. Prerequisite(s): (ECN 001A or ECN 001AV); ENG 106; Or the equivalent. Economics applied to infrastructure engineering planning, operations, maintenance, and management problems; microeconomic and macroeconomic theories; benefit-cost analysis; effect of uncertainty; optimization economics; non-classical economics; public finance. Effective: 2018 Spring Quarter.
ECI 269—Transportation-Air Quality: Theory and Practice (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ECI 149; Or the equivalent. Health and regulatory aspects of airborne pollutants. Principles of modeling vehicle emissions. Conformity issues and the regulatory framework. Regional and micro-scale modeling. Effective: 1999 Fall Quarter.

ECI 270—Advanced Water Resources Management (3)
Lecture—3 hours. Prerequisite(s): ECI 153; ECI 267; Or the equivalent. Discussion of technical papers related to planning theory, system maintenance, regionalization, multi-objective methods, risk analysis, institutional issues, pricing model application, economic development, forecasting, operations, and other topics. Effective: 1997 Winter Quarter.

ECI 271—Inverse Problems (4)
Lecture—4 hours. Prerequisite(s): ECI 114; ECI 144; Or equivalents. Inverse calibration of distributed parameter models, using data representing model outputs. Forward and inverse mappings, stability, uniqueness, identifiability. Optimization formulation of inverse problems, maximum likelihood and other objective functions, indirect and direct approaches, solution by UCODE in hands-on project format. Effective: 2010 Fall Quarter.

ECI 272A—Advanced Hydrogeology (4)

ECI 272B—Advanced Hydrogeology (4)
Lecture—4 hours. Prerequisite(s): ECI 142; ECI 144A Multicomponent reactive transport including multiple phases. Advective/dispersive transport, chemical equilibria, and mass transformation kinetics. Natural chemical/microbiological processes including sorption, complexation, biodegradation, and diffusive mass transfer. Eulerian and Lagrangean averaging methods. Applications to contaminant remediation problems in river and subsurface hydrology. Effective: 2004 Fall Quarter.

ECI 272C—Multiphase Reactive Transport (4)
Lecture—4 hours. Prerequisite(s): ECI 142; ECI 144; ECI 148A Multicomponent reactive transport including multiple phases. Advective/dispersive transport, chemical equilibria, and mass transformation kinetics. Natural chemical/microbiological processes including sorption, complexation, biodegradation, and diffusive mass transfer. Eulerian and Lagrangean averaging methods. Applications to contaminant remediation problems in river and subsurface hydrology. Effective: 2004 Fall Quarter.

ECI 273—Water Resources Systems Engineering (4)
Lecture—4 hours. Prerequisite(s): ECI 114; ECI 153; Or the equivalent. Planning and management of water resource systems. Deterministic and stochastic simulation and optimization techniques. Capacity design and operation of reservoir systems for water supply, hydropower, flood control, and environmental objectives. Effective: 2018 Winter Quarter.

ECI 275—Hydrologic Time-Series Analysis (4)
Lecture—4 hours. Prerequisite(s): ECI 114; ECI 142 Application of statistical methods for analysis and modeling of hydrologic series. Statistical simulation and prediction of hydrologic sequences using time series methodology. Effective: 2003 Fall Quarter.

ECI 276—Watershed Hydrology (4)

ECI 277A—Computational River Mechanics I (4)
Lecture—4 hours. Prerequisite(s): EAD 115 (can be concurrent); ECI 141 (can be concurrent) Unsteady open channel flows, computation of water surface profiles, shallow water equations, St. Venant equations, method of characteristics, finite difference methods, stability and accuracy of explicit and implicit schemes, flood routing in simple and compound channels, advection of plumes. Not open for credit to students who have taken ECI 277. Effective: 2004 Fall Quarter.

ECI 277B—Computational River Mechanics II (4)
Lecture—4 hours. Prerequisite(s): ECI 277A Open channel flows, physical aspects of river mechanics, formulation of depth-averaged equations, boundary conditions, coordinates transformation and grid generation, finite-difference
solution techniques, applications to two-dimensional momentum and pollutant transport in rivers. Effective: 2004 Fall Quarter.

ECI 277C—Turbulence and Mixing Processes (4)
Lecture—4 hours. Prerequisite(s): Graduate standing. Nature of turbulent flows, conservation equations, momentum, heat and mass transport in free and wall-bounded flows, body forces and mixing, roughness effects, turbulence modeling and simulation. Effective: 2004 Fall Quarter.

ECI 278—Hydrodynamics (3)

ECI 279—Advanced Mechanics of Fluids (4)

ECI 280A—Nonlinear Finite Elements for Elastic-Plastic Problems (4)
Lecture—4 hours. Prerequisite(s): Consent of Instructor. State of the art finite element methods and tools for elastic-plastic problems, including computational techniques based on the finite element method and the theory of elastoplasticity. Effective: 2008 Spring Quarter.

ECI 280B—Nonlinear Dynamic Finite Elements (4)
Lecture—4 hours. Prerequisite(s): Consent of Instructor. State of the art computational methods and tools for analyzing linear and nonlinear dynamics problems. Effective: 2009 Spring Quarter.

ECI 281A—Advanced Soil Mechanics (4)

ECI 281B—Advanced Soil Mechanics (5)
Laboratory—3 hours; Lecture—4 hours. Prerequisite(s): ECI 281A Site investigation and soil characterization within the context of slope stability analysis. Effective: 2014 Spring Quarter.

ECI 282—Pavement Design and Rehabilitation (4)
Lecture—4 hours. Prerequisite(s): ECI 179; or Consent of Instructor. Advanced pavement design and structural/functional condition evaluation for concrete and asphalt pavements. Highways, airfields, port facilities; new facilities, rehabilitation, reconstruction. Mechanistic-empirical procedures, materials, climate and traffic characterization. Use of current design methods; recent developments and research. Effective: 2004 Winter Quarter.

ECI 283—Physico-Chemical Aspects of Soil Behavior (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): ECI 171 Study of the geotechnical behavior of soils considering formation, transport, mineralogy, soil-fluid-electrolyte systems, surface tension, particle mechanics, shape, fabric, and structure. Laboratories demonstrate effects of fundamental interparticle forces (contact, Van Der Waals, capillarity and chemical). Effective: 2012 Fall Quarter.

ECI 284—Theoretical Geomechanics (4)

ECI 286—Advanced Foundation Design (4)
Lecture—4 hours. Prerequisite(s): ECI 173 Design and analysis of pile and pier foundations, including seismic effects; deep excavation systems; tie-back, nailing, and anchor systems; coffer dams; loads on buried conduits; ground modification techniques; and other related topics. Effective: 2004 Spring Quarter.

ECI 287—Geotechnical Earthquake Engineering (4)
Lecture—4 hours. Prerequisite(s): ECI 138; ECI 281A Characteristics and estimation of earthquake ground motions; wave propagation and local site response; liquefaction potential and remediation; residual strength and stability considerations; ground deformations; dynamic soil-structure interaction. Effective: 2004 Spring Quarter.
ECI 288—Earth and Rockfill Dams (4)
Lecture—4 hours. Prerequisite(s): ECI 281A; ECI 281B (can be concurrent) Site selection; design considerations; layout; seismic effects including considerations of fault movements; construction; environmental considerations, instrumentation; maintenance remediation and retrofit of existing dams. Effective: 2004 Winter Quarter.

ECI 289A—Selected Topics in Civil Engineering; Environmental Engineering (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Environmental Engineering. May be repeated for credit. Effective: 1997 Winter Quarter.

ECI 289B—Selected Topics in Civil Engineering; Hydraulics and Hydrologic Engineering (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Hydraulics and Hydrologic Engineering. May be repeated for credit. Effective: 1997 Winter Quarter.

ECI 289C—Selected Topics in Civil Engineering; Engineering Planning (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Engineering Planning. May be repeated for credit. Effective: 1997 Winter Quarter.

ECI 289D—Selected Topics in Civil Engineering; Geotechnical Engineering (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Geotechnical Engineering. May be repeated for credit. Effective: 1997 Winter Quarter.

ECI 289E—Selected Topics in Civil Engineering; Structural Engineering (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Structural Engineering. May be repeated for credit. Effective: 1997 Winter Quarter.

ECI 289F—Selected Topics in Civil Engineering; Structural Mechanics (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Structural Mechanics. May be repeated for credit. Effective: 1997 Winter Quarter.

ECI 289G—Selected Topics in Civil Engineering; Transportation Engineering (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Transportation Engineering. May be repeated for credit. Effective: 1997 Winter Quarter.

ECI 289H—Selected Topics in Civil Engineering; Transportation Planning (1-5)
Variable. Prerequisite(s): Consent of Instructor. Directed group study in Transportation Planning. May be repeated for credit. Effective: 1997 Winter Quarter.

ECI 289I—Selected Topics in Civil Engineering; Water Resources Engineering (1-5)
Laboratory; Lecture; Lecture/Lab. Prerequisite(s): Consent of Instructor. Directed group study in Water Resources Engineering. May be repeated for credit. Effective: 1997 Winter Quarter.

ECI 290—Seminar (1)
Seminar—1 hour. Discussion of current graduate research, and guest lectures on recent advances. Oral presentation of individual study. Course required of graduate degree candidates. (S/U grading only.) Effective: 1997 Winter Quarter.

ECI 290C—Graduate Research Group Conference (1)
Discussion—1 hour. Research problems, progress, and techniques in civil engineering. May be repeated for credit. (S/U grading only.) Effective: 1997 Winter Quarter.

ECI 296—Topics in Water and Environmental Engineering (1)
Seminar—2 hours. Seminars presented by visiting lecturers, UC Davis faculty and, graduate students. May be repeated for credit. (S/U grading only.) Effective: 2000 Winter Quarter.

ECI 298—Group Study (1-5)
Variable. Prerequisite(s): Consent of Instructor. (S/U grading only.) Effective: 1997 Winter Quarter.

ECI 299—Research (1-12)
Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

ECI 390—The Teaching of Civil Engineering (1)
Discussion—1 hour. Prerequisite(s): Meet qualifications for teaching assistant and/or associate-in in Civil Engineering. Participation as teaching assistant or associate-in in a designated engineering course. Methods of leading discussion groups or laboratory sections, writing and grading quizzes, use of laboratory equipment, and grading laboratory reports. May be repeated up to 9 unit(s). (S/U grading only.) Effective: 1997 Winter Quarter.
Sustainable Agriculture & Food Systems

Sustainable Agriculture & Food Systems | Sustainable Agriculture & Food Systems B.S.

(College of Agriculture and Environmental Sciences)

Sustainable Agriculture and Food Systems is an interdisciplinary major hosted by Department of Land, Air and Water Resources.

William Horwath, Ph. D., Major Advisor

Program Office. 1303 Hart Hall; 530-752-2244; http://asi.ucdavis.edu/safs

The Major Program

The Sustainable Agriculture and Food Systems (SA&FS) major serves students interested in improving the sustainability of agriculture and food systems. This major prepares graduates to understand the interdisciplinary and systems-based aspects of sustainability and provides them with the knowledge, leadership skills and experiences required to excel in agricultural and food systems professions.

The Program

This program is designed to develop students’ competencies for addressing the environmental, social, and economic challenges and opportunities associated with agricultural and food systems sustainability. The program emphasizes an experiential learning approach to sustainability education, allowing students to choose between three tracks within the major. Students in the Agriculture and Ecology track focus on crop and animal production systems, ecology, and practices that mitigate negative impacts while producing environmental and social benefits. Students in the Food and Society track focus on issues related to the social, cultural, political and community development aspects of agriculture and food systems. Students in the Economics and Policy track focus on issues related to agricultural and resource economics, policy and management. The program provides students with practical experiences through courses with on- and off-campus fieldwork and through internship placements at sites related to students' interests and focus of study.

Major Advisor. R. Galt (Human Ecology); Track I Advisor. W. Horwath (Land, Air& Water Resources); Track II Advisor. R. Galt (Human Ecology); Track III Advisor. T. Tomich (Human Ecology, Environmental Science & Policy)

Advising Center for the major is located in 1303 Hart Hall, Department of Human Ecology 530-752-2244.

Internships and Career Alternatives

Sustainable Agriculture and Food Systems students are required to complete an internship in the field before graduation. Internships have been arranged with local, county, and state agricultural agencies, production farms and commercial processors and retailers, domestic and international non-governmental organizations, and rural and urban community development programs. Graduates are prepared to pursue a broad range of careers related to agricultural production and food system management, rural and urban community services, education and development, and agricultural and environmental sciences, as well as careers in agricultural, environmental, and economic policy and analysis. Positions may be in private industry, government and public service agencies and in the non-profit sector, nationally and internationally. The major also prepares students for graduate studies in a wide range of fields related to agriculture and food systems.

English Composition Requirement

See College requirement; must include CMN 001.

Units: 4-8

Internship Requirement

Students must complete at least 12 units of internship, six of which must be completed off campus or must involve advanced responsibilities if on campus.

Applied Production

Choose one:
- PLS 049 Organic Crop Production Practices 3
- PLP 040 Edible Mushroom Cultivation 2
- VEN 101A Viticultural Practices 3
- VEN 101B Viticultural Practices 3
- VEN 101C Viticultural Practices 3
- ENH 120 Management of Container Media 3
- PLS 131 Identification and Ecology of Grasses 2

Choose one:
- ANS 049D Animal Management Practices: Goats 2
- ANS 049F Animal Management Practices: Laboratory Animals 2
- ANS 049G Animal Management Practices: Meats 2
- ANS 041L Domestic Animal Production Laboratory 2

Choose one:
- ABT 049 Field Equipment Operation 2
- ABT 052 Field Equipment Welding 2
- ABT 101 Engine Technology 3
- ABT 142 Equipment and Technology for Small Farms 2
- FST 050 Introduction to Food Preservation 3

Track I: Agriculture and Ecology

Focuses on crop and animal production systems, ecology, and practices that mitigate negative impacts while producing environmental and social benefits.

Preparatory Subject Matter

Choose one:
- MAT 016A Short Calculus 3
- MAT 016B Short Calculus 3
- PLS 120 Applied Statistics in Agricultural Sciences 4
- STA 100 Applied Statistics for Biological Sciences 4
- CHE 002A General Chemistry 5
- CHE 002B General Chemistry 5
- PHY 001A Principles of Physics 3
- BIS 002A Introduction to Biology: Essentials of Life on Earth 5
- BIS 002B Introduction to Biology: Principles of Ecology and Evolution 5
- PLS 002 Botany and Physiology of Cultivated Plants 4
- ANS 001 Domestic Animals and People 4
- ANS 002 Introductory Animal Science 4
FST 001  Principles of Food Science  3
ECN 001A Principles of Microeconomics  4
CRD 001  The Community  4
Choose one:
  PHI 014  Ethical and Social Problems in Contemporary Society  4
  PHI 015  Introduction to Bioethics  4
  PHI 024  Introduction to Ethics  4
Choose one:
  ANT 002 Cultural Anthropology  5
  POL 004  Basic Concepts in Political Theory  4
  SOC 001  Introduction to Sociology  5
  SOC 003  Social Problems  4

Depth Subject Matter  34-38
ARE 120  Agricultural Policy  4
OR
ARE 147 Resource and Environment Policy Analysis  3
ESP 161  Environmental Law  4
OR
ESP 169 Water Policy and Politics  3
SSC 100 Principles of Soil Science  5
OR
SSC 109 Sustainable Nutrient Management  4
Choose one:
  ANS 129 Environmental Stewardship in Animal Production Systems  3
  ENH 160 Restoration Ecology  3
  ESP 100 General Ecology  4
  EVE 101 Introduction to Ecology  4
  PLS 105 Concepts in Pest Management  3
  PLS 142 Ecology of Crop Systems (Discontinued)  4
  WFC 154 Conservation Biology  4
Additional upper-division restricted electives chosen in consultation with the track faculty advisor.  20

Track II: Food and Society  Units: 108
Focuses on issues related to the social, cultural, political and community development aspects of agriculture and food systems.

Preparatory Subject Matter  57-64
PHI 005 Critical Reasoning  4
OR
PHI 031 Appraising Scientific Reasoning  4
Choose one:

Sustainable Agriculture & Food Systems | SAF Courses

Courses in SAF:

SAF 090—SA & FS Seminar (1-2)
Seminar—1-3 hours. Introductory or survey topics within Sustainable Agriculture and Food Systems. May be repeated for credit when topic differs. (P/NP grading only.) Effective: 2018 Spring Quarter.

SAF 090X—SA & FS Portfolio (1-4)
Workshop—3-12 hours. Prerequisite(s): Consent of Instructor. Restricted to Sustainable Agriculture and Food Systems majors with lower-division standing or consent of instructor. SA&FS Portfolios are designed to complement interdisciplinary, academic coursework by supporting student development of each of the SA&FS Student Learning Outcomes: Systems Thinking, Experimentation & Inquiry, Understanding Values, Interpersonal Communication, Strategic Management, Civic Engagement and Personal Development. May be repeated for credit. (P/NP grading only.) Effective: 2015 Spring Quarter.

SAF 092—Internship (1-12)
Internship—3-36 hours; Variable—1 hour. Prerequisite(s): Consent of Instructor. Restricted to Sustainable Agriculture and Food Systems majors or with consent of instructor. Lower-division internship for students enrolled in the Sustainable Agriculture and Food Systems program of study. Enrollment for non-majors by consent of instructor. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 2013 Fall Quarter.

SAF 098—Directed Group Study (1-5)
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. Restricted to Sustainable Agriculture and Food Systems major or with consent of instructor. Group study on focused topics in Sustainable Agriculture and Food Systems. Varies according to instructor. Course plan is adapted to student need and interest in conjunction with the expertise of the instructor. May be repeated for credit. (P/NP grading only.) Effective: 2013 Fall Quarter.

SAF 099—Special Study for Undergraduates (1-5)
Independent Study—3-15 hours. Prerequisite(s): Consent of Instructor. Under faculty supervision, students pursue a special or individualized course of study related to Sustainable Agriculture and Food Systems. May be repeated for credit. (P/NP grading only.) Effective: 2013 Fall Quarter.

SAF 192—Internship (1-12)
Internship—3-36 hours; Variable—1 hour. Prerequisite(s): Consent of Instructor. Upper division standing. Restricted to Sustainable Agriculture and Food Systems majors or non-majors by consent of instructor. Upper-division internship for students enrolled in the Sustainable Agriculture and Food Systems program of study. May be repeated up to 12 unit(s). (P/NP grading only.) Effective: 2013 Fall Quarter.

SAF 197T—Tutoring in Sustainable Agriculture and Food Systems (1-5)
Tutorial—3-15 hours. Prerequisite(s): Consent of Instructor. Upper division standing. Undergraduates assist the instructor by tutoring students in regularly scheduled courses that fulfill SA&FS major requirements. May be repeated for credit. (P/NP grading only.) Effective: 2013 Fall Quarter.

SAF 197TC—SA&FS Tutoring in the Community (1-5)
Tutorial—3-15 hours. Prerequisite(s): Consent of Instructor. Upper division standing. Undergraduates assist the instructor by tutoring in the community in settings related to Sustainable Agriculture and Food Systems. May be repeated for credit. (P/NP grading only.) Effective: 2013 Fall Quarter.

SAF 198—Directed Group Study (1-5)
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. Upper division standing. Restricted to Sustainable Agriculture and Food Systems major or with consent of instructor. Group study on focused topics in Sustainable Agriculture and Food Systems. Varies according to instructor. Course plan is adapted to student need and interest in conjunction with the expertise of the instructor. May be repeated for credit. (P/NP grading only.) Effective: 2013 Fall Quarter.
Agriculture and Food Systems. Varies according to instructor. Course plan is adapted to student need and interest in conjunction with the expertise of the instructor. May be repeated for credit. (P/NP grading only.) Effective: 2013 Fall Quarter.

**SAF 199—Special Study for Advanced Undergraduates (1-5)**
Independent Study—3-15 hours. Prerequisite(s): Consent of Instructor. Upper division standing. Under faculty supervision, advanced students pursue a special or individualized course of study related to Sustainable Agriculture and Food Systems. May be repeated for credit. (P/NP grading only.) Effective: 2013 Fall Quarter.

**Sustainable Environmental Design**

**Sustainable Environmental Design | Sustainable Environmental Design B.S.**

(College of Agriculture and Environmental Sciences)

(Department of Human Ecology)

Pasty Eubanks Owens, M.L.A., Vice Chair, Landscape Architecture and Environmental Design

Program Office. 131 Hunt Hall; 530-752-3907; [http://humanecology.ucdavis.edu/lda/academic_programs/sed](http://humanecology.ucdavis.edu/lda/academic_programs/sed)

Faculty. [http://humanecology.ucdavis.edu/lda/people/faculty/](http://humanecology.ucdavis.edu/lda/people/faculty/)

**The Major Program**

The Sustainable Environmental Design major is intended to build student understanding and skills related to creation of sustainable communities and landscapes. Coursework emphasizes urban and environmental design, sustainable development theory and practice, green building, local government planning and decision-making, community dynamics and organizations, and written, graphic, and oral presentation of sustainability strategies.

**The Program**

The Sustainable Environmental Design major is particularly suited for students who are interested in the physical form and design of communities and related public and private processes. It is focused on the physical environment of communities and the process of designing, planning for, and regulating the built landscape and the place-making considerations involved in creating sustainable communities.

**Major Advisor.** Stephen Wheeler

**Advising Center.** See Sharla Cheney, 135 Hunt Hall; 530-754-8628; [scheney@ucdavis.edu](mailto:scheney@ucdavis.edu).

**Career Alternatives.** Graduates will choose to pursue work in government, community organizations, education, or the private sector. They will also be well-positioned to pursue graduate education in city and regional planning, landscape architecture, architecture, public policy, public administration, law, real estate, and related fields.

**Courses in Sustainable Environmental Design.** See course listing under Landscape Architecture.

**Teaching Credential/M.A. Program; Education, School of **

**Teaching Credential/M.A. Program; Education, School of | Teaching Credential/M.A. Program**

School of Education Building; 530-752-5887; Fax 530-754-6672; eduadvising@ucdavis.edu; https://education.ucdavis.edu/teaching-credentialma

**Faculty.** [https://education.ucdavis.edu/faculty-directory](https://education.ucdavis.edu/faculty-directory)

The **Teaching Credential with Master's Degree** program offers an opportunity for qualified students to complete the requirements for both a Masters of Arts in Education degree and a Multiple Subject OR Single Subject Credential in English, mathematics, science, social science or agriculture in a six-quarter program completed in less than two years. The BCLAD (bi-lingual) authorization is available to credential candidates in both the elementary and secondary programs.

The Credential Program prepares students for the teaching profession by immersing them in the total environment of a public school classroom while enrolled in required coursework. The coursework incorporates a theoretical-practical approach to the teaching-learning process, encouraging close interactions among teacher candidates and teacher education faculty. Students complete requirements for the M.A. degree during two part-time quarters following the credential year. This coursework introduces the integration of research into teaching practice, making teachers more informed and pro-active practitioners.

**Graduate Advisor.** Lisa Sullivan

**Graduate Coordinator.** Jana Royal

**Courses.** See Education, School of.

**Teaching Credential/M.A. Degree Program**

Academic preparation for the Teaching Credential Program includes a completed bachelor's degree and a GPA of at least 3.00. For the Multiple Subject credential, many undergraduate majors are appropriate preparation for the program. For Single Subject credential candidates, we recommend an undergraduate major in the intended area of secondary teaching. Use undergraduate internship opportunities to gain classroom experience in the grade levels at which you wish to teach. In addition to these general requirements, learn about current state and UC Davis credential prerequisites at the School of Education website or call our Student Services Office.

- Classroom experience in the appropriate grade levels
- U.S. Constitution course
- Specific preparatory coursework; see advisor for details

2002
• California Basic Skills Requirement
• For the elementary credential program, the California Subject Examination for Teachers (CSET)
• For secondary credential programs, approved subject matter coursework or the California Subject Examination for Teachers (CSET) for the appropriate subject

Applicants are encouraged to have program prerequisites and testing requirements completed prior to submitting an application. Credential requirements are regularly revised by the State of California. To obtain the most current information, students considering a career in teaching are encouraged to consult with the School of Education advisors throughout their undergraduate career.

M.A. in Education Degree Programs. Applicants to the General Track M.A. must have completed an undergraduate degree with a major in a field that supports their intended area of emphasis. A minimum undergraduate GPA of 3.000 is necessary for graduate admission at the University of California, Davis. Please consult with advisors in the School of Education regarding additional testing or supplemental information that may be required for application to a specific program.

Ed.D. Degree (CANDEL). Applicants to the CANDEL program must meet general admission requirements for graduate study at the University of California. Requirements include a bachelor's and master's degree (or equivalent) from an accredited institution, and a GPA of at least 3.000. In addition, applicants will have demonstrated prior experience in administrative or leadership roles in an educational institution or related areas.

Ph.D. Degree. Applicants to the Ph.D. program in Education must have a bachelor's degree, and normally will have completed a master's degree (or equivalent) in a field that supports their intended area of emphasis. A minimum GPA of 3.000 in previous undergraduate coursework is required for graduate admission at the University of California, Davis. Applicants must demonstrate a high potential for scholarly achievement and research. Individuals possessing graduate degrees in fields other than education are encouraged to apply. Experience in teaching, research, or related areas of education are desirable.

Technocultural Studies

Technocultural Studies | Technocultural Studies A.B.

(College of Letters and Science)

Michael Neff, Ph.D., Chairperson of the Department

Program Office. 101 Art Building; 530-752-0105; http://arts.ucdavis.edu/cinema-and-digital-media

Faculty. http://arts.ucdavis.edu/cinema-digital-media-program-faculty

The Technocultural Studies major is an interdisciplinary integration of current research in cultural history and theory with innovative hands-on production in digital media and "low-tech." It focuses on the fine and performing arts, media arts, community media, literature and cultural studies as they relate to technology and science. Backed by critical perspectives and the latest forms of research and production skills, students enjoy the mobility to explore individual research and expression, project-based collaboration and community engagement.

The Program. Preparatory course work involves a solid introduction to the history, ideas and current activities of technocultural studies. For depth subject matter, students in the major select to concentrate on either critical studies or creative production emphases, and work toward a final project. All majors are required to take at least one course from another department or program relevant to their area of study, upon approval from Technocultural Studies, and may take more courses with approval. The final project for the critical studies emphasis consists of a substantial research paper. The final project for the creative production emphasis will be a major individual or collaborative work. Plans for final projects must be approved in advance.

Major Advisor. Information on the current Academic Advisors can be obtained by contacting the Arts Group Advising Center at 530-752-0616 or http://arts.ucdavis.edu/arts-group-undergraduate-advising.

Career Paths. Technocultural Studies is designed to prepare graduates to be highly adaptable, collaborative, multi-skilled and current with the latest developments. Perhaps most importantly is self-motivation: students do best when fueled by their own passions and plot their own directions, while held to very high standards. We feel this is the best education for living and working in a complex, rapidly changing world. Final research papers and creative production portfolios will provide graduate school admissions committees, employers or clients with tangible evidence of Technocultural Studies graduates’ track records and talents.

TCS 198 Directed Group Study (Discontinued) 1-5

Total: 72

**Technocultural Studies | TCS Courses**

**Courses in TCS:**

**TCS 001—Introduction to Technocultural Studies (4)** [Review all entries](#)

Extensive Writing; Lecture—3 hours. Contemporary developments in the fine and performing arts, media arts, digital arts, and literature as they relate to technological and scientific practices. GE credit: AH, VL, WE. Effective: 2012 Fall Quarter.

**TCS 001—Introduction to Technocultural Studies (4)** [Review all entries Discontinued](#)

Extensive Writing; Lecture—3 hours. Contemporary developments in the fine and performing arts, media arts, digital arts, and literature as they relate to technological and scientific practices. GE credit: AH, VL, WE. Effective: 2019 Winter Quarter.

**TCS 005—Media Archaeology (4)** [Review all entries](#)

Lecture/Discussion—3 hours; Term Paper. Evolution of media technologies and practices beginning in the 19th Century as they relate to contemporary digital arts practices. Special focus on the reconstruction of the social and artistic possibilities of lost and obsolete media technologies. GE credit: AH, SE, VL, WE. Effective: 2012 Fall Quarter.

**TCS 005—Media Archaeology (4)** [Review all entries Discontinued](#)

Lecture/Discussion—3 hours; Term Paper. Evolution of media technologies and practices beginning in the 19th Century as they relate to contemporary digital arts practices. Special focus on the reconstruction of the social and artistic possibilities of lost and obsolete media technologies. GE credit: AH, SE, VL, WE. Effective: 2019 Summer Session 1.

**TCS 007A—Technocultural Workshop; Digital Imaging (1)**

Seminar—1 hour. Workshops in technocultural digital skills; Digital Imaging. GE credit: VL. Effective: 2012 Fall Quarter.

**TCS 007B—Technocultural Workshop; Digital Video (1)**

Seminar—1 hour. Workshops in technocultural digital skills; Digital Video. GE credit: VL. Effective: 2012 Fall Quarter.

**TCS 007C—Technocultural Workshop; Digital Sound (1)**

Seminar—1 hour. Workshops in technocultural digital skills; Digital Sound. GE credit: VL. Effective: 2012 Fall Quarter.

**TCS 007D—Technocultural Workshop; Web Design (1)**

Seminar—1 hour. Workshops in technocultural digital skills; Web Design. GE credit: VL. Effective: 2012 Fall Quarter.

**TCS 007E—Technocultural Workshop; Topics in Digital Production (1)**

Seminar—1 hour. Workshops in technocultural digital skills; Topics in Digital Production. May be repeated for credit. GE credit: VL. Effective: 2012 Fall Quarter.

**TCS 100—Experimental Digital Cinema I (4)** [Review all entries](#)

Laboratory—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): CTS 020 or ART 012 or TCS 007B; TCS 170B; or equivalent with consent of instructor. Class size limited to 20 students. Experimental approaches to the making of film and video in the age of digital technologies. Builds upon foundation provided by course 20. Instruction in
technical, conceptual, creative, and critical skills for taking a project from idea to fruition. GE credit: AH, OL, VL. Effective: 2017 Spring Quarter.

TCS 100—Experimental Digital Cinema I (4) Review all entries Discontinued
Laboratory—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): CTS 020 or ART 012 or TCS 007B; TCS 170B; or equivalent with consent of instructor. Class size limited to 20 students. Experimental approaches to the making of film and video in the age of digital technologies. Builds upon foundation provided by course 20. Instruction in technical, conceptual, creative, and critical skills for taking a project from idea to fruition. GE credit: AH, OL, VL. Effective: 2019 Winter Quarter.

TCS 101—Experimental Digital Cinema II (4) Review all entries Discontinued
Laboratory—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): TCS 100 Continuation of course 100 with further exploration of digital cinema creation. Additional topics include new modes of distribution, streaming, installation and exhibition. GE credit: VL. Effective: 2012 Fall Quarter.

TCS 101—Experimental Digital Cinema II (4) Review all entries Discontinued
Laboratory—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): TCS 100 Continuation of course 100 with further exploration of digital cinema creation. Additional topics include new modes of distribution, streaming, installation and exhibition. GE credit: VL. Effective: 2019 Winter Quarter.

TCS 103—Interactivity and Animation (4)
Laboratory—3 hours; Lecture/Discussion—3 hours. Fundamentals of creating interactive screen-based work. Theories of interactivity, linear versus non-linear structures and audience involvement and participation. Use of digital production tools to produce class projects. GE credit: VL. Effective: 2012 Fall Quarter.

TCS 104—Documentary Production (4)
Lecture/Discussion—3 hours; Project (Term Project). Prerequisite(s): TCS 007B; TCS 155; Or equivalent proficiency to TCS 007B. Traditional and new forms of documentary, with focus on technocultural issues. Skills and strategies for producing work in various media. Progression through all stages of production, from conception through post-production to critique. GE credit: VL. Effective: 2012 Fall Quarter.

TCS 110—Object-Oriented Programming for Artists (4) Review all entries
Laboratory—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): TCS 001 Introduction to object-oriented programming for artists. Focus on understanding the metaphors and potential of object-oriented programming for sound, video, performance, and interactive installations. GE credit: VL. Effective: 2012 Fall Quarter.

TCS 110—Object-Oriented Programming for Artists (4) Review all entries Discontinued
Laboratory—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): TCS 001 Introduction to object-oriented programming for artists. Focus on understanding the metaphors and potential of object-oriented programming for sound, video, performance, and interactive installations. GE credit: VL. Effective: 2018 Fall Quarter.

TCS 111—Community Media Production (4) Review all entries
Laboratory—3 hours; Lecture/Discussion—3 hours. Use of video and new media tools to address social issues among neighborhood and community groups. Students will use basic video, sound, and lighting techniques as they work with local groups in a group video project. GE credit: VL. Effective: 2012 Fall Quarter.

TCS 111—Community Media Production (4) Review all entries Discontinued
Laboratory—3 hours; Lecture/Discussion—3 hours. Use of video and new media tools to address social issues among neighborhood and community groups. Students will use basic video, sound, and lighting techniques as they work with local groups in a group video project. GE credit: VL. Effective: 2012 Fall Quarter.

TCS 112—New Radio Features and Documentary (4)
Laboratory—3 hours; Lecture/Discussion—3 hours. New feature and documentary production for radio and other audiophonic media, including audio streaming websites and installation. Emphasis on new and experimental approaches to audio production for broadcast on community radio and in international arts programming. Effective: 2012 Fall Quarter.

TCS 113—Community Networks (4) Review all entries
Laboratory—3 hours; Lecture/Discussion—3 hours. Impact and implications of computer-based networks in community, civic, and social life. Subjects may include community-access computer sites, neighborhood wireless networks, the digital divide, open-source software, and citizen action. Effective: 2012 Fall Quarter.

TCS 113—Community Networks (4) Review all entries Discontinued
Laboratory—3 hours; Lecture/Discussion—3 hours. Impact and implications of computer-based networks in
community, civic, and social life. Subjects may include community-access computer sites, neighborhood wireless networks, the digital divide, open-source software, and citizen action. Effective: 2018 Summer Session 1.

TCS 115—Electronics for Artists (4)  Review all entries
Laboratory—3 hours; Lecture—3 hours. Creative application of electronic technology relevant to media and fine arts involving both electronic principles and hands-on application. Effective: 2012 Fall Quarter.

TCS 115—Electronics for Artists (4)  Review all entries Discontinued
Laboratory—3 hours; Lecture—3 hours. Creative application of electronic technology relevant to media and fine arts involving both electronic principles and hands-on application. Effective: 2019 Spring Quarter.

TCS 120—History of Sound in the Arts (4)
Lecture—3 hours; Term Paper. Prerequisite(s): TCS 001 A survey of the use of sound, voice, noise, and modes of listening in the modernist, avant-garde, and experimental arts, from the late 19th Century to the present. Focus on audiophonic and audiovisual technologies. Effective: 2012 Fall Quarter.

TCS 121—Introduction to Electronic Sound (4)  Review all entries
Laboratory—3 hours; Lecture/Discussion—3 hours. Introduction to the use of electronic sound within the arts. Techniques and aesthetics of experimental contemporary practices. Creation of original sound works. Effective: 2018 Winter Quarter.

TCS 121—Introduction to Electronic Sound (4)  Review all entries Discontinued
Laboratory—3 hours; Lecture/Discussion—3 hours. Introduction to the use of electronic sound within the arts. Techniques and aesthetics of experimental contemporary practices. Creation of original sound works. Effective: 2018 Summer Session 1.

TCS 122—Intermediate Sonic Arts (4)  Review all entries
Laboratory—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): TCS 121; TCS 170C Techniques of recording, editing, mixing, and synthesis to combine voice, field recordings, and electronic signals. Incorporating live, recorded, and found sounds to create multidimensional stories. Presentation of live performances, audio recordings, and sound installations. Effective: 2012 Fall Quarter.

TCS 122—Intermediate Sonic Arts (4)  Review all entries Discontinued
Laboratory—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): TCS 121; TCS 170C Techniques of recording, editing, mixing, and synthesis to combine voice, field recordings, and electronic signals. Incorporating live, recorded, and found sounds to create multidimensional stories. Presentation of live performances, audio recordings, and sound installations. Effective: 2018 Summer Session 1.

TCS 123—Sight and Soundtrack (4)  Review all entries
Laboratory—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): TCS 007C; TCS 170C The use of sound to articulate, lend mood or subconsciously underscore visual, environmental or performative situations, combining music, voice, sound effects and other noises to create sound designs that enhance, alter or support action and movement. Effective: 2012 Fall Quarter.

TCS 123—Sight and Soundtrack (4)  Review all entries Discontinued
Laboratory—3 hours; Lecture/Discussion—3 hours. Prerequisite(s): TCS 007C; TCS 170C The use of sound to articulate, lend mood or subconsciously underscore visual, environmental or performative situations, combining music, voice, sound effects and other noises to create sound designs that enhance, alter or support action and movement. Effective: 2018 Fall Quarter.

TCS 125—Advanced Sound: Performance and Improvisation (4)  Review all entries
Practice—3 hours; Workshop—3 hours. Prerequisite(s): TCS 121; TCS 122; or Consent of Instructor. Culmination of TCS sound courses. Class will focus on performance and improvisation, culminating in a final public performance. Students will be expected to do extensive reading and rehearsal outside of class time. Effective: 2012 Fall Quarter.

TCS 125—Advanced Sound: Performance and Improvisation (4)  Review all entries Discontinued
Practice—3 hours; Workshop—3 hours. Prerequisite(s): TCS 121; TCS 122; or Consent of Instructor. Culmination of TCS sound courses. Class will focus on performance and improvisation, culminating in a final public performance. Students will be expected to do extensive reading and rehearsal outside of class time. Effective: 2018 Summer Session 1.

TCS 130—Fundamentals of 3D Computer Graphics (4)  Review all entries
Laboratory—3 hours; Lecture—3 hours. A foundation course that teaches students the theory of three dimensional
computer graphics, including modeling, rendering and animation. Development of practical skills through the use of professional software to create computer graphics Effective: 2012 Fall Quarter.

TCS 130—Fundamentals of 3D Computer Graphics (4) Review all entries Discontinued
Laboratory—3 hours; Lecture—3 hours. A foundation course that teaches students the theory of three dimensional computer graphics, including modeling, rendering and animation. Development of practical skills through the use of professional software to create computer graphics Effective: 2018 Fall Quarter.

TCS 131—Character Animation (4) Review all entries
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): TCS 130; or Consent of Instructor. The art of character animation in three dimensional computer animation. Movement theory, principles of animation, animation timing. Development of technical and practical skills. Effective: 2012 Fall Quarter.

TCS 131—Character Animation (4) Review all entries Discontinued
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): TCS 130; or Consent of Instructor. The art of character animation in three dimensional computer animation. Movement theory, principles of animation, animation timing. Development of technical and practical skills. Effective: 2018 Fall Quarter.

TCS 150—Introduction to Theories of the Technoculture (4)
Extensive Writing; Lecture/Discussion—3 hours. Major cultural theories of technology with emphasis on media, communications, and the arts. Changing relationships between technologies, humans, and culture. Focus on the evolution of modern technologies and their reception within popular and applied contexts. GE credit: VL. Effective: 2012 Fall Quarter.

TCS 151—Topics in Virtuality (4) Review all entries
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): TCS 001 Social, political, economic, and aesthetic factors in virtual reality. Artificial environments, telepresence, and simulated experience. Focus on contemporary artists’ work and writing. GE credit: VL. Effective: 2012 Fall Quarter.

TCS 151—Topics in Virtuality (4) Review all entries Discontinued
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): TCS 001 Social, political, economic, and aesthetic factors in virtual reality. Artificial environments, telepresence, and simulated experience. Focus on contemporary artists’ work and writing. GE credit: VL. Effective: 2019 Summer Session 1.

TCS 152—New Trends in Technocultural Arts (4)
Lecture/Discussion—3 hours; Term Paper. Current work at the intersection of the arts, culture, science, and technology including biological and medical sciences, computer science and communications, and artificial intelligence and digital media. GE credit: VL. Effective: 2012 Fall Quarter.

TCS 153—Concepts of Innovative Soundtracks (4)
Lecture/Discussion—3 hours; Term Paper. Innovative and unconventional soundtracks in cinema, media arts, and fine arts. Introduction to basic analytical skills for understanding sound-image relationships. Effective: 2012 Fall Quarter.

TCS 154—Outsider Machines (4)
Lecture/Discussion—3 hours; Term Paper. Invention, adaptation and use of technologies outside the mainstream, commonsense, and the possible. Topics include machines as metaphor and embodied thought, eccentric customizing and and fictional technologies. GE credit: VL. Effective: 2012 Fall Quarter.

TCS 155—Introduction to Documentary Studies (4)
Lecture/Discussion—3 hours; Term Paper. Recent evolution of the documentary. The personal essay film; found-footage/appropriation work; non-linear, multi-media forms; spoken word; storytelling; oral history recordings; and other examples of documentary expression. GE credit: ACGH, AH, DD, VL. Effective: 2012 Fall Quarter.

TCS 158—Technology and the Modern American Body (4) Review all entries
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): TCS 001; (AMS 001A or AMS 005) The history and analysis of the relationships between human bodies and technologies in modern society. Dominant and eccentric examples of how human bodies and technologies influence one another and reveal underlying cultural assumptions. (Same course as AMS 158.) GE credit: ACGH, AH, WE. Effective: 2012 Fall Quarter.

TCS 158—Technology and the Modern American Body (4) Review all entries Discontinued
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): TCS 001; (AMS 001A or AMS 005) The history and analysis of the relationships between human bodies and technologies in modern society. Dominant and eccentric
examples of how human bodies and technologies influence one another and reveal underlying cultural assumptions. (Same course as American Studies 158.) GE credit: ACGH, AH, WE. Effective: 2019 Winter Quarter.

TCS 159—Media Subcultures (4)
Lecture/Discussion—3 hours; Term Paper. Relationships between subcultural groups and media technologies. Media as the cohesive and persuasive force of subcultural activities. List-servs, websites, free radio, fan 'zines, and hip-hop culture. GE credit: ACGH, VL. Effective: 2012 Fall Quarter.

TCS 160—Ghosts of the Machine: How Technology Rewires our Senses (4)
Extensive Writing/Discussion—1 hour; Lecture—3 hours. Historical, aesthetic and critical approaches to how information technologies produced ghost effects or a sense of terror in response to new media like the photograph, gramophone, film, typewriter, computer, Turing Machine. Focus on technological media transforms sense perception. (Same course as STS 160.) GE credit: ACGH, AH, SS, VL, WE. Effective: 2013 Fall Quarter.

TCS 170A—Advanced Technocultural Workshop (1)
Seminar—1 hour. Prerequisite(s): TCS 007A; Or equivalent. Workshop in advanced technocultural digital skills: Digital Imaging. GE credit: VL. Effective: 2012 Fall Quarter.

TCS 170B—Advanced Technocultural Workshop (1)
Seminar—1 hour. Prerequisite(s): TCS 007B; Or equivalent. Workshop in advanced technocultural digital skills: Digital Video. GE credit: VL. Effective: 2012 Fall Quarter.

TCS 170C—Advanced Technocultural Workshop (1)
Seminar—1 hour. Prerequisite(s): TCS 007C Workshop in advanced technocultural digital skills: Digital Sound. GE credit: VL. Effective: 2012 Fall Quarter.

TCS 170D—Advanced Technocultural Workshop (1)
Seminar—1 hour. Prerequisite(s): TCS 007D Workshop in advanced technocultural digital skills: Web Design. GE credit: VL. Effective: 2012 Fall Quarter.

TCS 170E—Advanced Technocultural Workshop (1)
Seminar—1 hour. Prerequisite(s): Consent of Instructor. Workshop in advanced technocultural digital skills: Topics in Digital Production. GE credit: VL. Effective: 2012 Fall Quarter.

TCS 175—Small Scale Film Production (4)
Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): Consent of Instructor. Lecture and intensive workshop teaching small-scale film production. Appointments as a(n) director, director of photography, actor, writer, lighting designer, sound designer and other critical positions are used to produce and submit a short film to a film festival. May be repeated up to 2 time(s). (Same course as DRA 175.) Effective: 2012 Fall Quarter.

TCS 190—Research Methods in Technocultural Studies (4)
Lecture/Discussion—3 hours; Project (Term Project). Introduction to basic research methods for Technocultural Studies: electronic and archived images, sounds and data, satellite downlinking, radiowave scanning, and oral histories. GE credit: VL, WE. Effective: 2012 Fall Quarter.

TCS 191—Writing Across Media (4)
Extensive Writing; Lecture/Discussion—3 hours. Introduction to experimental approaches to writing for different media and artistic practices. How written texts relate to the images, sounds, and performances in digital and media production. GE credit: WE. Effective: 2012 Fall Quarter.

TCS 192—Internship (1-4) Review all entries
Internship—3-12 hours. Supervised internship on or off campus in area relevant to Technocultural Studies. May be repeated up to 2 time(s). (P/NP grading only.) Effective: 2012 Fall Quarter.

TCS 197T—Tutoring in Technocultural Studies (1-5) Review all entries
Tutorial—3-15 hours. Prerequisite(s): Consent of Instructor. Undergraduates assist the instructor by tutoring students in one of the department's regularly scheduled courses. May be repeated up to 8 unit(s). (P/NP grading only.) Effective: 2012 Fall Quarter.

TCS 198—Directed Group Study (1-5) Review all entries
Variable—3-15 hours. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 2012 Fall Quarter.
Technology Management Minor; Graduate School of Management

Technology Management Minor; Graduate School of Management | Technology Management Minor

School Office. Gallagher Hall; 530-752-7658

The Graduate School of Management offers a minor in Technology Management to undergraduate students. This minor complements students' undergraduate studies with courses in the ways in which engineering and science-based industrial enterprises manage and use knowledge from science, engineering and technology. The minor also provides students with business and management skills that should enable them to use their engineering and science education more effectively in a technology environment.

To complete the minor, students must complete a minimum of 20 units of coursework in the minor with a GPA of 2.000 or better. Students may petition to have the minor noted on their transcript by following the process designated by their college, which allows the Graduate School of Management to approve the minor electronically. Contact your college's academic advisor for more information.

Textiles (Graduate Group)

Textiles (Graduate Group) | Textiles (Graduate Group) M.S.

Ning Pan, Ph.D., Chairperson of the Group

Group Office. 129 Everson Hall; 530-752-8035; nerabaud@ucdavis.edu; http://textiles.ucdavis.edu

Faculty. https://textiles.ucdavis.edu/graduate-group-faculty

Graduate Study. The Graduate Group in Textiles offers a program of study and research leading to the M.S. degree. Students in the program are trained in an interdisciplinary approach emphasizing the physical and behavioral science aspects of textiles. Research areas include chemical, physical, biochemical, and mechanical properties of fibers and polymers as well as fibrous assemblies, including fabrics, composites, paper, and nonwovens; and psychological and sociological factors relating to perception and consumption of textiles and apparel. Extensive specialized fiber, polymer, and textiles research facilities and a behavioral research laboratory are available. For detailed information regarding the program, address the Chairperson of the Group.

Textiles & Clothing | TXC B.S.

(College of Agricultural and Environmental Sciences)
You-Lo Hsieh, Ph.D., Chairperson of the Division

Division Office. 129 Everson Hall; 530-752-6650; http://textiles.ucdavis.edu
Faculty. https://textiles.ucdavis.edu/faculty

The Major Program

The textiles and clothing major emphasizes the connections among (a) the physical characteristics of textile products, (b) human perceptions of and behavior toward these products, and (c) global economic trends affecting the textile/apparel marketplace. An integrative knowledge base links textile products with people and processes, to focus on the production, distribution, and consumer use of textiles and apparel; see also Fiber and Polymer Science.

The Program. The textiles and clothing major offers two options: textile science and marketing/economics. The Textile Science option provides students with a broad knowledge base in both the social and physical sciences. This base includes production, end-use applications and care of textiles and apparel, physical and chemical properties of textiles, and social-psychological and economic aspects of textiles and clothing. The Marketing/Economics option emphasizes social science and business course work, while also providing students with an awareness of the physical nature of textile products.

Major Advisor. You-Lo Hsieh

Advising Center for the major is located in 1204 RMI south 530-752-3250 or 129B Everson Hall; 530-754-8368.

Internships and Career Alternatives. Textiles and clothing majors can pursue internships and careers in apparel production and merchandising, retail management, international marketing, textile testing and conservation, and textiles journalism. The majority of textiles and clothing graduates accept entry-level management and technical positions within the textile and apparel industry or in related fields; e.g., merchandising and marketing, production, research and development, technical service and design. Students may also pursue graduate studies in textiles, business, and other areas depending on their specific selections of restricted elective course work.

Textiles & Clothing | TXC Courses

Questions pertaining to the following courses should be directed to the instructor or to the Division of Textiles and Clothing. See also courses in Fiber and Polymer Science.

Courses in TXC:

**TXC 006—Introduction to Textiles (4)**
Laboratory—3 hours; Lecture—3 hours. Introduction to the structure and properties of textiles. Consumer use and fabric characteristics are emphasized. GE credit: SE, SL, VL. Effective: 1997 Winter Quarter.

**TXC 007—Style and Cultural Studies (4)**
Discussion/Laboratory—1 hour; Lecture/Discussion—3 hours. The multiple and overlapping influences of gender, sexuality, ethnicity, and class on constructions of identity and community are explored through the study of style in 2015.
popular culture and everyday life. Continuity and change in clothing and appearance styles are interpreted. GE credit: AH, SS, VL, WC, WE. Effective: 2010 Fall Quarter.

**TXC 008—The Textiles and Apparel Industries (4)**

**TXC 092—Internship in Textiles and Clothing (1-12)**
Internship—3-36 hours. Prerequisite(s): Consent of Instructor. Work experience off campus in a textiles or clothing-related area. Supervision by a member of the Textiles and Clothing faculty. (P/NP grading only.) Effective: 1997 Winter Quarter.

**TXC 098—Directed Group Study (1-5)**
Variable. Prerequisite(s): Consent of Instructor. (P/NP grading only.) Effective: 1997 Winter Quarter.

**TXC 099—Special Study for Lower Division Students (1-5)**
Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

**TXC 107—Social and Psychological Aspects of Clothing (4)**
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): SOC 002 Social and cognitive factors influencing management and perception of personal appearance in everyday life. Concepts and methods appropriate to the study of meaning of clothes in social and cultural contexts. GE credit: SS, VL, WE. Effective: 1997 Winter Quarter.

**TXC 162—Textile Fabrics (3)**
Lecture—3 hours. Prerequisite(s): TXC 006 Properties of fabrics as related to serviceability, comfort, and appearance. GE credit: SS, VL, WE. Effective: 1997 Winter Quarter.

**TXC 162L—Textile Fabrics Laboratory (1)**
Laboratory—3 hours. Prerequisite(s): TXC 162 (can be concurrent) Laboratory methods and procedures employed in studying properties of textile fabrics as related to serviceability, comfort, and appearance. GE credit: QL, SE, VL, WE. Effective: 1997 Winter Quarter.

**TXC 163—Textile Coloration and Finishing (3)**
Lecture—3 hours. Prerequisite(s): TXC 006; (FPS 110 or CHE 008B) Basic principles of textile dyeing, printing, and finishing; color theory; structure, properties, and application of dyes and finishes; factors affecting application and fastness; maintenance of dyed and finished textiles. GE credit: SE, VL. Effective: 1997 Winter Quarter.

**TXC 163L—Textile Coloration and Finishing Laboratory (1)**
Laboratory—3 hours. Prerequisite(s): TXC 163 (can be concurrent) Demonstrates various aspects of dyeing, printing, and finishing of textile substrates including the effect of fiber and finish type, and physical and chemical variables on dyeing and finishing processes and on the properties of the resultant textile. GE credit: QL, SE, SL, WE. Effective: 1997 Winter Quarter.

**TXC 164—Principles of Apparel Production (3)**
Lecture—3 hours. Prerequisite(s): TXC 006 or TXC 008 Overview of characteristics, technology, processes, and research in apparel manufacturing industries including study of government statistics, material utilization and fabrication, mechanization, management, and production engineering. GE credit: OL, SS, VL. Effective: 1997 Winter Quarter.

**TXC 165—Textile Processes (3)**
Lecture/Discussion—3 hours. Prerequisite(s): TXC 006 Physical processes involved in the production of textiles from the individual fiber to the finished fabric. Includes spinning, texturing, yarn formation, weaving preparation, weaving and knitting, tufting and fabric finishing. GE credit: SE. Effective: 1997 Winter Quarter.

**TXC 171—Clothing Materials Science (4)**
Discussion/Laboratory—3 hours; Lecture—3 hours. Prerequisite(s): TXC 006; TXC 008; And senior standing. The properties, characterization, and performance evaluation of clothing materials and structures for specific functional applications. Principles and methods related to wetting and transport properties, fabric hand and aesthetic properties, clothing comfort, and material and assembly technology. GE credit: SE, VL. Effective: 1997 Winter Quarter.

**TXC 173—Principles of Fashion Marketing (3)**
Lecture—3 hours. Prerequisite(s): TXC 008; (ECN 001A or ECN 001AV); (ARE 113 or ARE 136) Study of basic elements of fashion marketing including philosophy and objectives, organization, merchandising, pricing, promotion and personnel. GE credit: SS, VL. Effective: 2018 Spring Quarter.
TXC 174—Introduction to World Trade in Textiles and Clothing (4)
Discussion—1 hour; Lecture—3 hours. Prerequisite(s): TXC 008 Structure of the global fiber/textile/apparel complex and its distribution patterns with an overview of political, economic and technological factors that are changing these industries and their markets. GE credit: SS, WC. Effective: 2005 Winter Quarter.

TXC 180A—Introduction to Research in Textiles (2)
Laboratory—6 hours. Prerequisite(s): Consent of Instructor. Senior standing with textile-related major. Senior thesis on independent problems. Research begun in course 180A will be continued and completed in course 180B. GE credit: SS, WE. Effective: 1997 Winter Quarter.

TXC 180B—Introduction to Research in Textiles (2)
Laboratory—6 hours. Prerequisite(s): Consent of Instructor. Senior standing with textile-related major. Senior thesis on independent problems. Research begun in course 180A will be continued and completed in course 180B. GE credit: SS, WE. Effective: 1997 Winter Quarter.

TXC 192—Internship in Textiles and Clothing (1-12)
Laboratory—3-36 hours. Prerequisite(s): Consent of Instructor. Work-learn experience off campus in a textiles or clothing-related area. Supervision by a member of the Textiles and Clothing faculty. (P/NP grading only.) Effective: 1997 Winter Quarter.

TXC 197T—Tutoring in Textiles and Clothing (1-5)
Discussion/Laboratory—3-15 hours. Prerequisite(s): Consent of Instructor. Upper division textiles-related major. Tutoring of students in Textiles and Clothing courses. Assistance with discussion groups and laboratory sections under supervision of instructor. May be repeated for credit if tutoring another textiles course. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

TXC 198—Directed Group Study (1-5)
Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

TXC 199—Special Study for Advanced Undergraduates (1-5)
Variable. (P/NP grading only.) Effective: 1997 Winter Quarter.

TXC 230—Behavioral Science Concepts in Textiles (3)
Lecture—3 hours. Prerequisite(s): TXC 107; Upper division or graduate course in statistics (e.g., AMR 120) and one in a behavioral science (e.g., PSC 145). Examination of theories and research concerning relationships between clothing and human behavior with emphasis on research techniques, including methods of measuring clothing variables. Effective: 1997 Winter Quarter.

TXC 290—Seminar (1)
Seminar—1 hour. Critical review of selected topics of current interest in textiles. (S/U grading only.) Effective: 1997 Winter Quarter.

TXC 290C—Research Conference (1)
Discussion—1 hour. Prerequisite(s): Consent of Instructor. Graduate standing. Individual faculty members meet with their graduate students. Critical presentations of original research are made by graduate students. Research activities are planned. Discussions are led by major professors for their research groups. (S/U grading only.) Effective: 1997 Winter Quarter.

TXC 293—Recent Advances in Textiles (3)
Lecture—3 hours. Prerequisite(s): Two upper division courses in Textiles and Clothing or consent of instructor. Critical reading and evaluation on selected topics of current interest in textiles. Multidisciplinary aspects of the topics selected will be stressed. May be repeated for credit. May be repeated for credit. Effective: 1997 Winter Quarter.

TXC 298—Group Study (1-5)

TXC 299—Research (1-12)
Variable. (S/U grading only.) Effective: 1997 Winter Quarter.

TXC 396—Teaching Assistant Training Practicum (1-4)
Variable. Prerequisite(s): Graduate standing. May be repeated for credit. (P/NP grading only.) Effective: 1997 Winter Quarter.

Theatre & Dance
Theatre & Dance | DRA A.B.

Theatre and Dance Major Program

The A.B. degree in Theatre and Dance provides students with an appreciation for an understanding of performance and its role in culture and society. The program offers a strong foundation in all aspects of drama, theatre, dance performance, and production. Students build significant skills in specific areas (including acting, directing, choreography, design, playwriting and devising, production skills and management) as well as achieving a broad knowledge of theatre and dance.

Productions and Facilities. Each year's schedule includes opportunities to work with professional directors and choreographers in three Granada Artists-in-Residence productions; the Main Stage Dance/Theatre Productions; Film Festival at UC Davis; projects generated through the Institute for Exploration in Theatre, Dance and Performance; and workshops and performance projects developed by M.F.A and Ph.D. students. These productions are staged in our proscenium (Main), thrust (Wyatt), black box (Arena), performance studio (Della Davidson Performance Studio) and intimate laboratory theatre (Lab A), as well as in the Mondavi Center's Vanderhoef Studio Theatre and Jackson Hall. These productions are part of the academic program of the department and serve an important purpose in the study of theatre and dance. Participation is open to all students.

Production Requirements. All students completing a major in Theatre and Dance must participate in productions, including work in at least two of the following three areas: acting/dance; design (sets, costume, lighting, painting, props, sound); directing/playwriting/stage management, as well as crew assignments for a minimum of two productions and work in production labs.

Graduate Study. The Department of Theatre and Dance offers programs of study and research leading to the M.F.A. in Theatre and Dance (the interdisciplinary weaving of acting, directing, design, choreography and practice and research) and contributing to the Graduate Group Ph.D. in Performance Studies. Detailed information may be obtained by contacting the Graduate Program Administrators: for the M.F.A. in Theatre and Dance, 530-752-8710, and for the Graduate Group in Performance Studies, 530-754-6973.

Faculty. [http://arts.ucdavis.edu/theatre-dance-faculty](http://arts.ucdavis.edu/theatre-dance-faculty)

The Theatre and Dance Major Program

The Department of Theatre and dance facilities are complemented by an excellent faculty and production staff...three times a year, as well as the Granada-Artist-in-Residence program, which brings a major director, choreographer or playwright to the department three times a year. The faculty includes a group of distinguished scholars in history, theory and criticism whose research and teaching focuses on social engagement and activism. Students, both majors and non-majors, can audition for department productions or apply to the Institute for Exploration in Theatre, Dance and Performance to do related work.

The A.B. degree in Theatre and Dance provides students with an appreciation for an understanding of performance and its role in culture and society. The program offers a strong foundation in all aspects of drama, theatre, dance performance, and production. Students build significant skills in specific areas (including acting, directing, choreography, design, playwriting and devising, production skills and management) as well as achieving a broad knowledge of theatre and dance.

**Productions and Facilities.** Each year's schedule includes opportunities to work with professional directors and choreographers in three Granada Artists-in-Residence productions; the Main Stage Dance/Theatre Productions; Film Festival at UC Davis; projects generated through the Institute for Exploration in Theatre, Dance and Performance; and workshops and performance projects developed by M.F.A and Ph.D. students. These productions are staged in our proscenium (Main), thrust (Wyatt), black box (Arena), performance studio (Della Davidson Performance Studio) and intimate laboratory theatre (Lab A), as well as in the Mondavi Center's Vanderhoef Studio Theatre and Jackson Hall. These productions are part of the academic program of the department and serve an important purpose in the study of theatre and dance. Participation is open to all students.

**Transfer Students.** As described above, all students completing a major in Theatre and Dance must participate in dramatic productions, including work in at least two of the following three areas: acting/dance; design (scenic, costume, lighting, painting, props, sound); directing/playwriting/stage management as well as crew assignments for a minimum of two productions while in residence at UC Davis. Transfer students should see the major advisor for an evaluation of your previous experience.

**Guest Artists.** The Granada Visiting Artists Program brings distinguished professional artists to the campus each year, to be in residence for a quarter. These working professional artists interact closely with students in the classroom and rehearsal halls and provide them excellent pre-professional experiences of theater practice.

**Graduate Study.** The Department of Theatre and Dance offers programs of study and research leading to the M.F.A. in Theatre and Dance (the interdisciplinary weaving of acting, directing, design, choreography and practice and research) and contributing to the Graduate Group Ph.D. in Performance Studies. Detailed information may be obtained by contacting the Graduate Program Administrators: for the M.F.A. in Theatre and Dance, 530-752-8710, and for the Graduate Group in Performance Studies, 530-754-6973.

Subjects covered include basic tools, materials and equipment, production practices; and the interdisciplinary and collaborative nature of dramatic production. Effective: 1997 Winter Quarter.

**DRA 026—Performing Arts Production Management (3)**
Lecture—3 hours. Theoretical study of performing arts administration and backstage operations from audition through performance. Techniques of scheduling, production management, stage management, technical direction,

**DRA 028—Entertainment Engineering and Management: Stagecraft to Stage Management (4)**
Lecture/Discussion—4 hours. Introduction to technical production and management in theatre and dance. Topics include stage management, theatrical mechanics, backstage protocols, scenic construction, properties, lighting, basic shop tools, costume shop use and construction, basic make-up, sound equipment, graphics and robotics for theatre. GE credit: AH. Effective: 2015 Spring Quarter.

**DRA 030—Theatre Laboratory (1-5)**
Project (Term Project)—2 hours. Prerequisite(s): Consent of Instructor. Projects in acting, production, scene design, costuming, lighting, directing, and playwriting. Participation in departmental productions. May be repeated up to 11 unit(s). Effective: 2016 Spring Quarter.

**DRA 040A—Beginning Modern Dance (2)**
Discussion/Laboratory—4 hours. Fundamentals of modern dance focusing primarily on the development of techniques and creative problem solving. Basic anatomy, dance terminology, and a general overview of modern dance history. May be repeated up to 2 time(s) Non-dance majors can only repeat the course once; dance majors may apply to the dance faculty advisor for permission to repeat more times; dance is a repetitive practice that involves constant reiteration and demands this for improvement and better understanding of the somatic and proprioceptive skills. GE credit: AH, VL. Effective: 2017 Spring Quarter.

**DRA 040B—Intermediate Modern Dance (2)**
Discussion/Laboratory—4 hours. Prerequisite(s): DRA 040A; or Consent of Instructor. Modern dance techniques. Basic anatomy, dance terminology and a general overview of modern dance history. May be repeated up to 1 time(s) For Dance majors, further repeats negotiated with faculty advisor in dance. GE credit: AH, VL. Effective: 2016 Spring Quarter.

**DRA 041A—Beginning Jazz Dance (2)**
Discussion/Laboratory—4 hours. Fundamentals of jazz dance; includes warm-ups, dance techniques and combinations. Basic anatomy, dance terminology and general overview of jazz dance history. May be repeated up to 1 time(s). Effective: 2017 Spring Quarter.

**DRA 041B—Intermediate Jazz Dance (2)**
Discussion/Laboratory—4 hours. Prerequisite(s): DRA 041A; or Consent of Instructor. Warm-ups, dance techniques and combinations at the intermediate level. Basic anatomy, dance terminology and a general overview of jazz styles of historically significant jazz choreographers and leading contemporary jazz choreographers. May be repeated up to 1 time(s) with consent of instructor. Effective: 2016 Spring Quarter.

**DRA 042A—Beginning Ballet (2)**
Discussion/Laboratory—4 hours. Fundamentals of ballet, focusing on the development of technique through proper alignment, quality, and rhythm. Basic anatomy, ballet terminology, and dance history. May be repeated for credit with consent of instructor. GE credit: AH, VL. Effective: 2016 Spring Quarter.

**DRA 042B—Intermediate Ballet (2)**
Discussion/Laboratory—4 hours. Prerequisite(s): DRA 042A; or Consent of Instructor. Barre and center work at the intermediate level. Development and refinement of technique through proper alignment, rhythmic, and qualitative understanding. Anatomy, ballet terminology, and dance history. May be repeated for credit with consent of instructor. GE credit: AH, VL. Effective: 2016 Spring Quarter.

**DRA 043A—Contact Improvisation Dance (2)**
Lecture/Lab—4 hours. Fundamentals of contact improvisation and its applications to all forms of dance, performance, sports, physical safety and health. Solo improvisation, safety, communication, alignment, basic lifting and weight-sharing, intuition, developing relaxed readiness and personal expression. May be repeated up to 2 time(s). GE credit: AH, VL. Effective: 2016 Spring Quarter.

**DRA 043B—Intermediate Contact Improvisation (2)**
Lecture/Lab—4 hours. Prerequisite(s): DRA 043A; or Consent of Instructor. Building on the fundamentals. Reviewing basics, extended improvising, skillfully working with partners of different sizes and abilities, advanced lifting, advanced safety practices, embracing risk and disorientation, subtle nuances of communication. May be repeated up to 2 time(s). GE credit: AH, VL. Effective: 2016 Spring Quarter.

**DRA 044A—Beginning Hip Hop Dance (2)**
Discussion/Laboratory—4 hours. Fundamentals of Hip Hop dance focusing on developing a fluid movement
vocabulary, facility in body isolations, intricate rhythmic patterning, quick shifts of weight and mastering dance combinations. Discussions on Hip Hop dance history, styles and terminology. May be repeated up to 1 time(s). Effective: 2002 Fall Quarter.

**DRA 044B—Intermediate Hip Hop Dance (2)**
Discussion/Laboratory—4 hours. Prerequisite(s): DRA 044A; or Consent of Instructor. Expansion of Hip Hop dance vocabulary by focusing on mastering body isolations and intricate rhythmic techniques, complex dance combinations, advanced across the floor sequences. May be repeated up to 1 time(s). Effective: 2002 Fall Quarter.

**DRA 055—Contemporary Local, National and Global Theatre, Dance and Performance (4)**
Lecture/Discussion—4 hours. Introduction a range of contemporary theatre, dance and performance in local, national and international settings. Training in critical approaches to and aesthetic appreciation of these forms. Emphasis varies based on instructor. GE credit: AH, DD, VL, WC. Effective: 2015 Fall Quarter.

**DRA 056A—History of Theatre and Dance I: Myth, Magic and Madness (4)**
