2019-2020 General Catalog

Published April 29, 2019; Volume 50 | Content Effective: April 29, 2019-April 26, 2020, unless otherwise noted.

The official version of the 2019-2020 UC Davis General Catalog is this web version prepared by the Office of the University Registrar.

Changes for the 2019-2020 General Catalog, and on:

- The catalog encompasses one academic year.
- Courses are updated and published with effective terms as they are approved.
- Programs (majors & minors) are updated for fall term only; once a year at the publication date.
- To understand course descriptions better, see the expanded About Courses.
- For best viewing, use the latest Firefox or Chrome browsers.

Printing the Catalog

To print the entire 2019-2020 General Catalog, see General Catalog Downloads.

To print a single section, like Animal Science or Introduction, use Export PDF in the upper right corner of your browser.

The provisions of this general catalog reflect information as of the date of publication. Content is subject to change without notice.

It is the responsibility of the individual student to become familiar with the announcements and regulations of the university contained in this general catalog.

Office of the University Registrar, 3100 Dutton Hall, One Shields Avenue, Davis, CA 95616-8692

Editorial and production coordination: Randall Larson-Maynard, Senior Editor; Office of the University Registrar.

The University of California, Davis, will provide assistance to the visually impaired regarding the information contained in this catalog. Questions should be directed to the office or department concerned.

DISCLAIMER NOTICE: This General Catalog is not a contract nor an offer to enter into a contract. While every effort is made to ensure the accuracy of the information provided in this General Catalog, it must be understood that all courses, course descriptions, designations of instructors, curricular and degree requirements and other academic information described herein are subject to change or elimination at any time without notice or published amendment to this catalog. In addition, The University of California reserves the right to make changes at any time, without prior notice, to other programs, policies, procedures and information, which are described in this General Catalog only as a convenience to its readers. Fees and all other charges are subject to change at any time without notice. Students should consult the appropriate academic or administrative department, school, college, graduate division or other service provider for currently accurate information on any matters described in this General Catalog; contact information is available at http://ucdavis.edu.
Welcome to UC Davis

From the Chancellor

I’m delighted that you’ve chosen to be part of our thriving UC Davis community. All of us — faculty, staff and alumni — are committed to helping you achieve academic success and make the most of your college experience.

You have an incredible opportunity to learn from some of the best and brightest professors and students from around the globe and earn a degree that commands respect in graduate schools and the workplace worldwide.

My hope is that your own world opens up like never before.

You are surrounded by go-getters, change makers and problem solvers who all want to make the world a better place. Our research and innovations help feed a growing population, sustain our resources and advance health worldwide. Our alumni have provided leadership in government, the arts, technology, business, education and much more.

You are building on our legacy. The personal touch, social engagement and passion for learning you bring to UC Davis elevates the university as a whole.

I wish you much success in your studies and the best of times in your college life.

Gary S. May, Chancellor
Academic Calendars

All UC Davis Academic Calendars are maintained by the Office of the University Registrar; see Academic Calendars.
Introduction

UC Davis

For the full UC Davis story, see About UC Davis.

Visiting the Campus

UC Davis Welcome Center; 530-752-8111
Monday-Friday 8:00 a.m.-5:00 p.m. (PT) | Saturdays 9:00 a.m.-3:00 p.m. (PT) | Closed Sundays except for Apr 1-Apr 30.
Campus tours. Monday-Friday 9:00 a.m. & 1 p.m. (PT) | Saturdays 11:00 a.m. & Sundays, Apr 1-30 11:00 a.m. (PT).
Register at http://visit.ucdavis.edu or 530-752-8111.

Accreditation

The University of California, Davis is accredited by WASC Senior College & University Commission (WSCUC).

UC Davis is also accredited by the Accreditation Board for Engineering & Technology, Accreditation Council for Graduate Medical Education, Accreditation Review Commission on Education for the Physician Assistant (ARC-PA), American Association for Accreditation of Laboratory Animal Care, American Bar Association, American Chemical Society, American Dietetic Association, American Psychological Association, Association to Advance Collegiate Schools of Business; Commission on Collegiate Nursing Education, Association of American Law Schools, Association of American Medical Colleges, Association to Advance Collegiate Schools of Business; Commission on Collegiate Nursing Education; Commission on Teacher Credentialing, Computer Science Accreditation Commission, Council on Education & Public Health, the Council on Education of the American Veterinary Medical Association, Intersocietal Commission for the Accreditation of Vascular Laboratories (ICAVL), and the Liaison Committee on Medical Education.

UC Davis Principles of Community

The University of California, Davis, is first and foremost an institution of learning and teaching, committed to serving the needs of society. Our campus community reflects and is a part of a society comprising all races, creeds, and social circumstances. The successful conduct of the University's affairs requires that every member of the University community acknowledge and practice the following basic principles:

We affirm the dignity inherent in all of us, and we strive to maintain a climate of justice marked by respect for each other. We acknowledge that our society carries within it historical and deep-rooted misunderstandings and biases, and therefore we will endeavor to foster mutual understanding among the many parts of our whole.

We affirm the right of freedom of expression within our community and also affirm our commitment to the highest standards of civility and decency towards all. We recognize the right of every individual to think and speak as dictated by personal belief, to express any idea, and to disagree with or counter another's point of view, limited only by University regulations governing time, place, and manner. We promote open expression of our individuality and our diversity within the bounds of courtesy, sensitivity, and respect.

We confront and reject all manifestations of discrimination, including those based on race, ethnicity, gender, age, disability, sexual orientation, religious or political beliefs, status within or outside the University, or any of the other differences among people which have been excuses for misunderstanding, dissension, or hatred. We recognize and cherish the richness contributed to our lives by our diversity. We take pride in our various achievements, and we celebrate our differences.

We recognize that each of us has an obligation to the community of which we have chosen to be a part. We will strive to build a true community of spirit and purpose based on mutual respect and caring.

The “Principles of Community” were prepared and adopted after extensive discussion within the campus community about the need for a statement that reflects UC Davis' commitment to a learning environment characterized by diversity, understanding and the acceptance of all people. This statement of common principles was published on April 20, 1990, carrying the endorsement of Chancellor Theodore L. Hullar and the leadership of the Davis Division of the Academic Senate, the Academic Staff Organization, the UCD Staff Assembly, the UCDMC Staff Assembly, the Associated Students of UC Davis (ASUCD), and the Graduate Student Association.
Educational Objectives for Students

The Educational Objectives for Students were adopted by the Academic Senate in April 2002. They articulate our aspirations for student learning; help to establish campus priorities and guide decision making related to student development; and guide academic programs in the review of how their classes and course requirements interact with the goals to demonstrate educational effectiveness.

Develop effective communication skills:
  • Written, oral, interpersonal, group

Develop higher cognitive skills:
  • Critical thinking, creativity, analytical ability

Cultivate the virtues:
  • Ethics, responsibility, honor, tolerance, respect for others, empathy

Develop focus and depth in one or more disciplines.

Develop leadership skills:
  • Ability to stimulate and direct collaborative learning and collaborative action

Develop a global perspective:
  • Broad intellectual and cultural experience through active engagement, an understanding of the interactions among the individual, society, and the natural world

Prepare for lifelong learning:
  • Independent thinking and learning, learning to find information, asking the right questions

Mission Statement | Philosophy of Purpose

UC Davis is dedicated to academic excellence and serving the public good. As a major research institution, UC Davis takes a holistic approach in addressing the most critical issues faced by the region, state and the world. The university embraces the principles of diversity, inclusion and equity to sustain a culture of mutual respect.

Colleges & Schools

College of:
  • Agricultural & Environmental Sciences
  • Biological Sciences
  • Engineering
  • Letters & Science

Schools:
  • Graduate Study
  • Betty Irene Moore School of Nursing
  • Graduate School of Management
  • School of Education
  • School of Law
  • School of Medicine
  • School of Veterinary Medicine

Board of Regents | Administrative Officers
Undergraduate & Post-Undergraduate Degrees

Undergraduate Majors are administered by the Colleges of Agricultural & Environmental Sciences (A&ES), Biological Sciences (CBS), Letters & Science (L&S), and Engineering. All graduate programs are administered by Graduate Studies. Professional studies are administered by the schools indicated. The list, below, indicates the major or discipline, the degree(s) offered and the college or school offering the major. This list also contains Post-Undergraduate Degrees.

Minors are offered by the Colleges of Agricultural & Environmental Sciences (A&ES), Biological Sciences (CBS), Engineering (ENGR), and Letters & Science (L&S), the School of Education (SOE), School of Medicine (SOM), and the Graduate School of Management (GSM). The list, in the Minors tab, indicates the minor program, the offering department (if the department name is different than the name of the minor) and the college offering the minor.

The Legend tab contains acronyms & titles.

Fees, Expenses, & Financial Aid

Give careful consideration to the total financing of your university education. If you need funds beyond those that you and your family can provide, you should apply for financial aid well in advance of enrollment. There are deadlines for applying for financial aid: grants, loans, Work Study and scholarships.

For current student fee information, see Tuition & Fees. Every student must pay the quarterly fees, and any amounts charged to the student account, in full by the fee payment deadlines in the Fees & Billing calendar. A Deferred Payment Plan (DPP) is available, allowing students to pay quarterly student and housing fees in three monthly installments, or semester fees in four monthly installments.

Course Materials & Service Fees

Students may be charged fees in some courses for the use, rental or consumption of materials, tools or equipment, or for the costs of materials or services necessary to provide a special supplemental educational experience. For example, course materials fees may cover the purchase of chemicals and glassware for a science laboratory or art supplies for an art studio class. They might also cover film rentals, field trips, or the purchase or rental of specific equipment. Courses that may be subject to the course materials fee are listed in the Schedule Builder. For a course materials fees list, see UCD Student Resources: Tuition & Fees.

Part-Time Students Fees

Students approved for part-time status for tuition purposes will be assessed one-half of Tuition. Nonresident students will also be assessed one-half of Nonresident Supplemental Tuition. There is no reduction in the Student Services Fee or in any of the campus-base fees. For more information and specific requirements, see Part-Time Status.

UC Employee-Student Fees

Reduced fees are available to UC career employees and certain UC retirees who are qualified for admission to the university. For full information, see Career Staff Reduced Fee.

Vehicle Parking Permit & Bicycle Licensing Fees

Parking permit information & rates or 530-752-8277.

A California State bicycle license sticker is required on all bicycles operated on campus; full information or 530-752-2453.

Costs for a Year at UC Davis

For the most recent Cost of Attendance figures, see undergraduate; graduate; professional.

International Student Expenses

International students are responsible for all of their expenses while studying at UC Davis. The expenses include nonresident supplemental tuition, systemwide tuition and fees, campus-based fees, room and board, books and a modest amount for personal expenses. For the latest costs, see Cost of Attendance. It is extremely important that students arrive on campus with sufficient funds for the entire academic year to cover all fees, tuition and expenses such as room and board, health insurance, books, supplies, transportation and other miscellaneous expenses. Careful budgeting is essential for international students.

During the admission process, most international undergraduate students are required to complete the "Confidential Financial Statement" form certifying that support funds are available for nine months. Students need to have adequate, reliable and continuing financial support for the whole time they are here. After students arrive in the United States, it is extremely difficult to obtain additional funding. The university does not offer grants or financial aid to international undergraduate students.
Fee Refunds

UC Davis follows the University of California's system-wide refund procedures and any refund is based upon a Schedule of Refunds. When considering a leave of absence or separating from the university, any refund will be based upon the number of calendar days elapsed from the start of instruction to when such request is filed with the Office of the University Registrar.

Cancellation or Withdrawal From the University | Planned Educational Leave Program (PELP) | University of California Student Health Plan (SHIP)

Residence for Tuition Information

For complete information for determination of residence for tuition, see Tuition & Residence.

Financial Aid

The Financial Aid & Scholarships Office provides financial assistance in the form of grants, scholarships, loans, and work-study employment. To apply, undergraduates and graduate students are required to annually file the Free Application for Federal Student Aid (FAFSA), or the California Dream Act Application.

UC Education Finance Policy for Undergraduates | Graduate Student Funding

Satisfactory Academic Progress

Federal regulations require that undergraduate and graduate student financial aid recipients meet the published Standards for Satisfactory Academic Progress (SAP) for Financial Aid concerning GPA, Pace of Progression, and Maximum Timeframe of attempted units allowed to obtain a degree; see Satisfactory Academic Progress (SAP).

Financial Aid Types

Grants. A grant is an award that does not have to be repaid as long as the student remains eligible. Whenever criteria and funding levels permit, a student's financial aid award includes grants; see Available Grant Awards.

Loans. Financial aid almost always includes a long-term loan; see Undergraduate Student Loans.

Work-Study

Undergraduate Work-Study allows students to earn part of their financial aid through part-time employment; see Work-Study for Undergraduate Students.

Community Service Work-Study. A wide variety of community service jobs are available for students who apply for Work-Study funding; see Work-Study for Undergraduate Students.

Work-Study for Graduate. Work-Study funds for graduate students are allocated directly to the chairpersons of the graduate programs; see Work-Study for Graduate Student Researchers.

Undergraduate Scholarships & Awards

Undergraduates with outstanding academic records are encouraged to apply for scholarships. For information about scholarship application process, see Undergraduate & Prestigious Scholarships.
Student Life

As a UC Davis student, you're part of a creative, innovative community. Located in a classic college town where bicycles predominate and students make up half the population, UC Davis offers resources to create your unique path whether you have established academic and career goals or want to explore. Living-learning communities and vibrant student centers are spaces for exploring and affirming diverse identities. The campus’s multiple advising, tutoring, leadership and career resources will help you excel and achieve your aspirations, and the array of UC Davis professional schools—business, law, veterinary medicine and medicine—offer unique opportunities for undergraduates. With over 750 student organizations, you will find welcoming, supportive groups that share your interests and passions, and when it's time to recreate, options at UC Davis encompass everything from arts and crafts to indoor rock climbing.

Living at Davis

On-Campus Housing

Student Housing & Dining Services

Living on campus adds a measure of convenience to your life and helps familiarize students with the campus. All incoming fall quarter freshmen and transfer students are guaranteed housing in Student Housing, provided they meet eligibility requirements and all Student Housing and university deadlines. Freshmen and Transfer students are guaranteed one year of housing. For more information about the housing guarantee; see Prospective Residents. All other students should contact Student Housing to inquire about their housing options.

For more information on the following housing, see Housing Areas.

- Residence Halls
- Apartments
- Student Housing Apartments (SHA)—Transfer Student Communities
- Apartments (UC Davis)
- Public-Private Partnerships
- Capital Projects

Off-Campus Housing

The majority of UC Davis students live off campus. The City of Davis has ample apartments for rent, from one-person studio apartments to five- or six-person suites. Townhouses, duplexes and houses throughout the city are also available for student rental. ASUCD maintains a list of available community housing and, early every year, hosts "Housing Day," an event that brings dozens of local housing managers to campus to introduce their communities to UC Davis students.

Transportation & Parking

Transportation Services

Transportation Services (TAPS)

The restricted central campus is closed to unauthorized motor vehicles. Walking and bicycling are the most common ways to traverse the campus. For complete information, see Transportation Services (TAPS).

- Bicycles | Parking | Motorist Assistance
- Alternative Transportation
  - goClub
  - UC Davis/UC Davis Medical Center Shuttle
  - Davis/Berkeley Shuttle

Buses

Unitrans provides year round public transit bus service across Davis from two main UC Davis campus bus terminals—the Memorial Union and Silo Bus Terminals. Information on bus schedules and fares is available at http://unitrans.ucdavis.edu or 530-752-2877.
WorkLife
Heitman Staff Learning Center; worklife@ucdavis.edu

WorkLife is the principal resource on campus for referrals, outreach, education and programming that enable students, faculty and staff to meet commitments and pursue interests both in and outside of the university. For services addressing child care, elder care, breastfeeding support, health and wellness, community involvement, and workplace flexibility, see WorkLife. See also, UC Davis Student Parent Child Care Funding Program and Community Child Care Programs.

Health & Counseling Services

Student Health & Counseling Services (SHCS)
Student Health & Wellness Center; Appointments: 530-752-2349; General information: 530-752-2300

Student Health Services provides wellness resources and cost-sensitive medical care tailored to the unique and diverse needs of UC Davis students. All registered students choose a primary care provider (PCP) who coordinates their wellness care and treatment needs. SHCS staff includes physicians, nurse practitioners, registered nurses, physical therapists, dietitians and health educators. Pharmacy, lab, and x-ray services are available. Medical care is provided at the Student Health & Wellness Center. Services are available to all registered students regardless of insurance coverage. After hours, students can speak with an advice nurse at 530-752-2349. To read about services and fees, make an appointment, get urgent care information, or contact an advice nurse after hours, see Medical Services.

Student Health Insurance

The University of California (UC) requires that all students have health insurance. To ensure this requirement is met, all UC students are automatically enrolled in UC Student Health Insurance Plan (UC SHIP) and fees for coverage are charged to your student account each term. UC SHIP includes medical, dental and vision benefits. Students with comparable health insurance can apply for a UC SHIP student health insurance waiver. For complete information, see Insurance Services.

Immunizations

All incoming new, transfer and graduate students, including students in the Veterinary Medicine and School of Nursing programs, are required to meet the UC Immunization & TB Risk Screening requirement.

Required immunizations include:

- 2 MMR (Measles, Mumps, Rubella) vaccines, or positive titer for each disease
- 2 Varicella vaccines
- 1 Adult TDAP
- 1 meningococcal vaccine (Menactra, Menomune, or Menveo)

Students become compliant with this requirement by entering their vaccination dates, uploading a copy of their immunization records, and completing the TB Risk Screening Questionnaire via the SHCS Health-e-Messaging website.

Students who do not complete this requirement will have a hold on their registration and will not be able to register for their second term.

Counseling Services

Student Health & Counseling Services (SHCS); 219 North Hall; Appointments: 530-752-0871; General information: 530-752-2300

SHCS Counseling Services offers short term individual counseling services to all registered students, as well as group therapy and workshops. There are also case managers and mental health advocacy specialists who assist in referrals to off-campus counseling, using insurance, and referrals to community resources. To make a counseling or case management appointment, or for consultations, call 530-752-0871. Mental Health Crisis Consultation Services are available at Counseling Services at 219 North Hall, Monday-Friday, 11 a.m.-4 p.m., and in the Student Health &
Wellness Center in Acute Care, Monday-Friday, 9 a.m.-5 p.m. If you need to speak to someone on the weekend, holiday, or after hours, please call 530-752-0871 and follow the prompts.

**Mind Spa**

*Mind Spa*; 132 North Hall and Student Health & Wellness Center

**Health Education & Promotion**

Health Education & Promotion (HEP) leverages a dynamic public health approach to foster and build environments, institutional practices and a campus culture that promote student success and lifelong well-being. HEP focuses on the following areas: alcohol, tobacco and other drug use, sexual well-being, mental well-being and physical well-being.

**Extracurricular Activities**

By participating in extracurricular activities at UC Davis, students benefit from numerous opportunities for educational, personal, cultural and social enrichment. In general, registered and enrolled UC Davis students may participate in extracurricular activities sponsored by the campus. Some activities have additional eligibility criteria, so you are encouraged to inquire about the particular requirements of the groups and programs that interest you.

**Campus Recreation & Memorial Union**

Department of Campus Recreation; Activities & Recreation Center (ARC) | Memorial Union

The UC Davis Department of Campus Recreation and Memorial Union manage the following programs and facilities, creating opportunities to build community, cultivate friendships and enhance learning; complementing the academic mission of the university and enhancing the quality of life for the campus:

- Activities & Recreation Center (ARC)
- Cal Aggie Marching Band
- Craft Center
- Equestrian Center
- Games Area
- Hickey Pool
- Intramural Sports
- Memorial Union
- Outdoor Adventures Center
- Pavilion
- Putah Creek Lodge
- Recreation Fields
- Recreation Pool
- Sport Clubs
- UCDHS Student Fitness Center

**UC Davis Stores**

The UC Davis Stores are full-service stores owned and operated by the university.

**Silo Union**

The Silo Union houses food services, meeting/conference facilities, lounges and the campus pub.

**Intercollegiate Athletics**

The Intercollegiate Athletics (ICA) program is an integral part of the total educational process and a vital part of the human development of young men and women.
Arts

Robert & Margrit Mondavi Center for the Performing Arts | UC Davis

The Mondavi Center is the premier performance venue in Northern California and the regional destination for the best in music, dance, distinguished speakers, jazz, theater, and world music.

University Policies on Nondiscrimination, Sexual Harassment/Sexual Violence, Student Records & Privacy

Nondiscrimination | Sexual Harassment/Sexual Violence Prevention | Accommodations for Students with Disabilities

Disclosures from Student Records; see also UC Davis Policy & Procedure Manual Section 320-21

Social Security Numbers | Release of Registration Material & Grades
Campus Security, Crime Awareness, & Alcohol & Drug Abuse Prevention

In accordance with federal laws, Crime Awareness and Campus Security Act of 1990, and the Drug Free Schools and Communities Act of 1989, UC Davis annually makes information available to students and employees regarding campus security, crime statistics, and alcohol and drug abuse prevention. Also see, victim support services.
Academic Advising & Student Services

To help you get the most from your education, UC Davis offers many different types of academic advising. College advisors assist you in meeting degree requirements and taking maximum advantage of available university resources. A conference at least once a quarter with your faculty or staff advisor is especially desirable during your first year and during your final quarters preceding graduation. A meeting with a faculty or staff advisor is required each year for students in the College of:

- Engineering
- Letters & Science

College of Biological Sciences matriculating students in their first-year at UC Davis are required to meet with a BASC advisor in the Biology Academic Success Center (BASC).

For complete information on academic advising, see the College of:

- Agricultural & Environmental Sciences
- Biological Sciences
- Engineering
- Letters & Science

Student Disability Center

Student Disability Center, 530-752-3184, is committed to ensuring equal educational access and opportunities for students with disabilities. An integral part of that commitment is the coordination of specialized academic accommodations and support services. Additionally, the center advises students on their rights and responsibilities, as well as strategies and tools for managing their disabilities. Current and prospective students, faculty, and staff are encouraged to contact the center for information regarding available services, resources, and the accommodation process.

Office of Educational Opportunity & Enrichment Services (OEOES)

The Office of Educational Opportunity and Enrichment Services (OEOES) is a family of services, programs and centers designed to support student learning, enhance the student experience and foster strong communities where students are empowered to achieve their goals. Transition assistance, support services and co-curricular opportunities are offered to all students along with specialized support geared toward various diverse student communities.

Educational Opportunity Program (EOP) Services

Educational Opportunity Program (EOP), 530-752-9366, offers an array of services to help first generation students and students from disadvantaged backgrounds adapt both academically and socially to the University setting and successfully achieve their educational goals. EOP provides a caring and supportive environment for students to meet with peer and staff advisors and network with other students. For complete information, see Educational Opportunity Program (EOP).

First-Year Aggie Connections (FYAC)

First-Year Aggie Connections (FYAC) groups first-year students (freshmen and transfers, including international students) into 25-person “Connections” based on a shared purpose, interest, or theme. Connections meet regularly for one academic quarter and are led by staff or faculty facilitators who engage students in discussions surrounding crucial topics related to transitioning to life at UC Davis. The First-Year Aggie Connections program aims to foster opportunities that will empower students as they navigate their first-year at UC Davis.

Guardian Scholars Program (GSP)

The mission of the Guardian Scholars Program (GSP), 530-752-1211, is to empower foster youth at UC Davis to reach their potential by providing a community network that supports their academic progress and personal growth. For complete information, see Guardian Scholars Program (GSP).
Mentorships for Undergraduate Research in Agriculture, Letters & Science (MURALS)

Mentorships for Undergraduate Research in Agriculture, Letters & Science (MURALS), 530-752-9931, is designed to enrich the research experience of students situationally disadvantaged in their access to graduate school. For complete information, see MURALS.

Transfer & Reentry Center

If you transferred to UC Davis, are a reentry student, the Transfer and Reentry Center, 530-752-2200, is here to serve you. Reentry refers to undergraduate students who are 25 years-old or older, graduate students who are 30 years-old or older, married students or student parents. If you or your parent(s) served in the U.S. military and you are unsure of what benefits you may be eligible for, the Transfer and Reentry Center can help. For complete information, see Transfer and Reentry Center.

Pre-Graduate/Pre-Professional Services

Pre-Professional/Pre-Graduate School Advising, 530-752-4475, offers individualized advice and information to students interested in admission to professional and graduate schools (law, Masters and Ph.D. programs, etc.) including prerequisite course planning, exam preparation, evaluation of competitiveness and assistance with all aspects of the application process such as writing the personal statement, getting good letters of recommendation, selecting schools/programs and strategies for becoming the most competitive applicant possible. In addition, the program offers small group advising and informative workshops, and hosts visits from admissions officers from various professional schools. For complete information, see Pre-Professional/Pre-Graduate School Advising.

Special Transitional Enrichment Program (STEP)

Freshman EOP students are invited to participate in the Special Transitional Enrichment Program (STEP), 530-752-2013. The program begins in summer and continues through the first two academic years. STEP offers preparatory course work, academic assistance and advising to help students adjust and succeed academically and socially. For complete information, see Special Transitional Enrichment Program (STEP).

Success Coaching & Learning Strategies

Services offered by Success Coaching & Learning Strategies, 530-752-4475, are designed to help undergraduate students become the designer and driver of their academic, personal, and professional success. Through workshops and one-on-one appointments, students learn new strategies, build skills, and reflect on their experiences to develop practical strategies for solving problems and achieving goals.

Veterans Success Center

The Veterans Success Center provides veterans, service members and dependents a welcoming space, a community network, guidance with educational benefits and engagement opportunities that span the university and the larger Davis community. For complete information, see Veterans Success Center.

Student Housing

The First-Year Experience Program, 530-752-5566, is one component of the New Student Academic Services unit in Student Housing & Dining Services, which includes the new student Orientation program and the academic year First-Year Experience Peer Advising program. The Residence Hall Advising Team (RHAT) is a collaboration between NSAS, the four colleges and Study Skills Assistance to provide drop-in academic peer advising and tutoring within the residence halls.

New Student Orientation, 530-752-4443, assists new students and their families with the transition to UC Davis. Orientation includes assistance with academic advising, course registration, information for campus resources and social integration.

Student Conduct & Assistance

Office of Student Support & Judicial Affairs, 530-752-1128

The Office of Student Support & Judicial Affairs (OSSJA) upholds campus standards of academic honesty and student conduct by resolving alleged violations of university policies or campus regulations. OSSJA Case Managers
serve students in distress by coordinating campus resources for assistance and care. OSSJA also provides conflict resolution services and general problem solving for students.

**Code of Academic Conduct**

A long tradition at UC Davis, students are expected to uphold high standards of honesty and fairness in their academic work. The Code and additional information may be found at the Office of Student Support & Judicial Affairs.

**Student Responsibilities**

Students are responsible for complying with the announcements and regulations in this catalog and with all policies, rules and regulations of the university and this campus. Students will not be able to register or receive transcripts of record or diplomas until they have met all university obligations.

**Nondiscrimination & Sexual Harassment/Sexual Violence Prevention**

If students believe that they have been subjected to prohibited discrimination, harassment, sexual harassment, and/or sexual violence, they may contact the Harassment & Discrimination Assistance & Prevention Program (HDAPP) at 530-747-3864 or hdapp@ucdavis.edu. We also offer an anonymous call-in line at 530-747-3865.

**Resolving Academic Problems**

**Grade Changes**

Students who believe they received an incorrect grade due to a clerical or procedural error should ask their instructor to file a Request for Grade Change form with the Office of the University Registrar; for complete information, see Grade Changes and the guidelines for the Committee on Grade Changes.

**Associated Students, University of California at Davis (ASUCD)**

The Associated Students, University of California, Davis (ASUCD), 530-752-1990, is constituted to represent its membership in the University of California and in the greater community and to increase the role and impact of its members on those decisions affecting their lives.

ASUCD is run by a three-branch, federal model government with some city council-style modifications. It consists of an executive branch, a legislative branch, and a judicial branch, as well as administrative support units. ASUCD is one of the largest student employers on campus and offers a variety of services that provide resources for UC Davis students and create a great environment for academics as well as for entertainment.

The Association aims to create and provide services and activities which its membership shall consider important to fulfilling the experience of being a student attending the University of California, Davis.

**Academic Assistance & Tutoring Centers**

**Academic Assistance & Tutoring Centers (AATC)**

Academic Assistance & Tutoring Centers (AATC), 530-752-2013, exist to help undergraduate students thrive at UC Davis and beyond. We provide an inclusive and interactive environment where students participate in reinforcing and retaining knowledge in multi-disciplinary writing, math and science through co-curricular academic services provided by both professional staff and peer tutors. We strive to support students in developing the academic competence and confidence that will empower them to succeed at UC Davis. AATC provides academic support to undergraduate students enrolled in Biology, Chemistry, Economics, Mathematics, Physics, Statistics, and Writing Across the Disciplines. Our instructional professional staff offer classes, workshops, office hours, individual writing appointments, and a Writing Studio. To support our professional staff and our services, AATC hires 300 undergraduate tutors to provide drop-in tutoring for students enrolled in math and science courses and in writing across the disciplines. For complete information on our academic support services, see https://tutoring.ucdavis.edu/.
Internship & Career Services
Located in South Hall.

Internship Programs
Gain practical skills that will transfer to the workplace. Apply your coursework. Launch your career. Take advantage of hundreds of internships organized through the Internship & Career Center (ICC) or initiate your own. There is literally something for everyone! An internship may be full time or part time, credit or non-credit, voluntary or paid, depending on your skills, needs and interests, as well as the availability of openings. Internship experiences must emphasize learning and be supervised by a professional. Get your approved internship documented on your UC Davis transcript by completing Transcript Notation (TN). Academic credit is awarded for experiences planned and approved in advance by a sponsoring faculty member.

The Internship & Career Center (ICC)
The Internship & Career Center (ICC) works with undergraduate, masters, and Ph.D students, postdoctoral scholars and recent alumni. The ICC can help you identify your abilities and interests and relate them to career options; gain access to practical experience to increase your competitiveness in the job market; and employment. Attend ICC workshops on finding an internship or part time job, beginning a job search, developing a resume, networking and preparing for an interview. Each academic year, the ICC hosts four to six large internship and career fairs, giving UC Davis students and alumni the opportunity to connect with employers.

Masters, Ph.D.s, & Postdoc Services
The Internship & Career Center (ICC), located in South Hall, provides comprehensive career services for UC Davis Master's and Ph.D. students, and Postdoctoral scholars (MPP). Career advisors can assist you with all aspects of your career search whether it be within or beyond academia, or both. Our career services include confidential one-to-one advising with individualized review of curriculum vitae (CV), resumes, and cover letters; workshops and panel discussions; recruiting and networking events; and employer information sessions, all specifically designed for advanced degree holders.

Student Employment
Located in South Hall, Student Employment is a resource within the Internship & Career Center (ICC) that connects students to paid opportunities (on and off campus) that help fund their educational expenses, while gaining professional skills and a professional network. With support from the Internship & Career Center, students have easy access to student employment as well as internship and career opportunities.

Academic Resources
UC Davis Study Abroad
UC Davis Study Abroad, 530-752-5763, is one of the richest educational experiences a student can have. When students return from study abroad in places like Italy or Hong Kong, they describe their time abroad as an experience that changed their lives and prepared them to learn, work, and engage in a globally interconnected world. UC Davis Study Abroad is home to UC Davis Quarter Abroad, UC Davis Summer Abroad, UC Davis Internships Abroad, UC Davis Seminars Abroad, UC Davis Exchanges, and the University of California Education Abroad Program (UCEAP). For complete information, see UC Davis Study Abroad.

First-Year Seminars Program
The UC Davis First-Year Seminars Program gives first-year students the opportunity to study with faculty members in small groups, meeting in settings more informal than the ordinary classroom. For complete information, see UC Davis First-Year Seminars Program.

CalTeach/Mathematics & Science Teaching Program (MAST)
The UC Davis CalTeach/Mathematics & Science Teaching Program (MAST), 530-754-1056, provides students with opportunities to explore careers in mathematics and science education. For complete information, see Mathematics & Science Teaching Program (CalTeach/MAST).
Undergraduate Research Center

The Undergraduate Research Center, 530-752-3390, serves as the campus hub to inspire and facilitate all UC Davis undergraduates to engage in faculty-sponsored research, scholarship, design and creative activities, and also coordinates various awards, programs and funding opportunities. For complete information, see Undergraduate Research Center.

UC Washington Program

The University of California hosts a system-wide academic internship and residential program for undergraduate students attending from each of the UC campuses. The programs provide undergraduates an opportunity to enrich their education while in residence for one quarter in the nation's capital. Students also have unparalleled access to a wide range of internship opportunities. For complete information, see UC Washington Program, 530-754-5718.

Student Resource & Information Centers

Center for Advocacy, Resources & Education (CARE)

The UC Davis Center of Advocacy, Resources & Education (CARE) is committed to reducing sexual violence and its impact using a multifaceted approach including primary prevention, education and awareness, trauma-informed survivor services, and advocacy for victim rights at the campus, University of California, and state level. We work to broaden public awareness about the nature of sexual assault, intimate partner violence, stalking, sexual harassment, and their impact on people of all identities. We foster a culture intolerant of sexual violence by promoting healthy sexual communication, safe relationships, and respect.

All survivor advocacy and support services are confidential, free, and available to any UC Davis affiliate who has experienced sexual harassment, sexual assault, intimate partner violence, or stalking. For complete information, see Center for Advocacy, Resources & Education (CARE), 530-752-3299 (Davis Campus) or 916-734-3799 (Sacramento Campus).

Center for Chicanx/Latinx Academic Student Success (CCLASS)

The Center for Chicanx/Latinx Academic Student Success is dedicated to welcoming, supporting, retaining, and informing students as they navigate the university. It is a space for students to find community and familia on campus. The unit contributes to the university's commitment to campus diversity and inclusion. At its core, the unit acts as an academic support space for students to thrive as scholars and unique individuals. We are dedicated to retaining, empowering, and graduating Chicanx and Latinx students at UC Davis. By offering and providing authentic and culturally relevant opportunities for academic and personal growth, El Centro seeks to support Chicanx and Latinx students as they navigate the university from first year students to graduating seniors. For complete information, see Center for Chicanx/Latinx Academic Student Success or 530-752-8402.

Center for Leadership Learning

The Center for Leadership Learning (CLL), 530-752-6908, offers a unique space for undergraduates to engage in the study of leadership through a variety of interactive, experiential learning environments, including quarterly workshops, certificate programs, a speaker series, and annual conference. CLL programs are open to the undergraduate community and welcome students from all majors, class levels, and degrees of leadership experience. For complete information, see Center for Leadership Learning.

Cross-Cultural Center

Born out of student activism and political struggle, the Cross Cultural Center (CCC) provides a culturally relevant community space where student voices can be expressed and respected. The CCC cultivates critical consciousness and cultural competency by providing learning opportunities at the crossroads of the many aspects of our identities and experiences. By embracing our cultural and intellectual heritage, the CCC supports student leadership in advancing our collective vision for community empowerment and social justice. For complete information, see Cross Cultural Center or call 530-752-4287.
Lesbian, Gay, Bisexual, Transgender, Queer, Intersex, Asexual Resource Center (LGBTQIARC)

The Lesbian, Gay, Bisexual, Transgender, Queer, Intersex, Asexual Resource Center (LGBTQIARC), 530-752-2452, provides an open and inclusive space and community that is committed to challenging sexism, cissexism/trans oppression/transmisogyny, heterosexism, monosexism, and allosexism. For complete information, see Lesbian, Gay, Bisexual, Transgender, Queer, Intersex, Asexual Resource Center.

Services for International Students & Scholars (SISS)

Services for International Students & Scholars (SISS), 530-752-0864, assists international students, faculty and researchers in gaining and maintaining an appropriate immigration status while at UC Davis. SISS provides orientation and other information and assistance as part of its mission to build a campus community that is fully inclusive of international students and scholars. For complete information, see Services for International Students & Scholars.

Women's Resources & Research Center (WRRC)

The Women's Resources & Research Center (WRRC), 530-752-3372, promotes gender equity and aspires for a campus where students, faculty, and staff of all genders can thrive. All are welcome to visit the WRRC and learn about gender equity, connect with community, and find resources and support. For complete information, see Women's Resources & Research Center.
Academic Information

Registration

Office of the University Registrar; 530-752-3639

Registration includes the process of enrolling in classes, the financial obligation to pay tuition, fees and all other charges, filing current address (mailing, permanent, and emergency) information with the Office of the University Registrar, and completing and submitting any forms pertaining to your registration status. To be a continuing student at the university, you must enroll in classes each academic term. To be considered a registered student, you must also pay all tuition, fees and any outstanding balance due.

If you are a new student, your acceptance letter will direct you to all of the required next steps to obtain student status at the university. Graduate students who have previously attended UC Davis as undergraduates are considered to be new students. If you do not enroll in classes for a future academic term or did not take an approved leave of absence, you must apply for Readmission to return to the university and resume student status.

For complete information, see Registration.

Requirements for Schools

College of School of Education; Declare
School of Management; Accounting | Technology Management

Academic Credit

Units of Credit | Credit by Examination

Concurrent Enrollment

Per Davis Division Academic Senate Regulation A553, a student may not obtain transfer credit for courses taken at
a non-University of California campus in a term during which the student is registered as a UC Davis full-time
student. A variance can be obtained only by petitioning the dean of your college well in advance of the desired
registration. For more information see Concurrent Enrollment.

Special Programs

There are a variety of special programs that allow students to take courses at other UC’s, at Community or CSU’s, in
Sacramento, in Washington DC or abroad. Each program has its own requirements and application process.

Intercampus Visiting Programs | UC/CSU/Community College Cross Enrollment | Study Abroad | Summer Sessions
UC Davis Extension | Open Campus
Examinations
Final Examination Information & Schedule | Academic Senate Regulations—Examinations | Midterms

Grades & Grading
For complete information on grades & grading, see Grading. Each college has different rules regarding P/NP grading; see College of:

- Agricultural & Environmental Sciences
- Biological Sciences
- Engineering
- Letters & Science

Probation & Dismissal
The University of California Academic Senate (UCSR 900) and UC Davis Division Academic Senate (DD Reg A540C, DD Reg A552) Regulations govern probation and dismissal. Students must meet both academic and minimum standards of progress toward degree completion. For complete information on Probation and Dismissal, see Academic Standing.

Honors & Prizes
Deans' Honors Lists
According to UC Davis Academic Senate Regulation 551 (ASR 551.A), the quarterly Dean's Honors List includes names of students who have completed, for a letter grade, a minimum of 12 units in a specific quarter with a grade point average equal to or higher than the minimum grade point average attained by the upper 16 percent of those registered in the same class level and college during that quarter. Honors lists will be posted quarterly on deans' office websites or made available by other means and a notation of these honors will be placed on each student's permanent record by the Office of the University Registrar.

College of:
- Agricultural & Environmental Sciences
- Biological Sciences
- Engineering
- Letters & Science

Graduation Honors
Honors at graduation are awarded to students who have a grade point average in the top percent of their college as shown in the table below. The College of Letters & Science requires that additional criteria be met for high and highest honors.

<table>
<thead>
<tr>
<th>Total Quarter Units at UC</th>
<th>Highest Honors</th>
<th>High Honors</th>
<th>Honors</th>

An honors notation is made on students’ diplomas and on their permanent records in the Office of the University Registrar.

**University Honors Program**

The University Honors Program (UHP), 530-752-3225, is a four-year, interdisciplinary, campus-wide program for high potential and socially conscious undergraduate students interested in enhancing their educational experience through special courses, close faculty contact, dynamic peer interaction and positive social change.

**Prizes & Awards**

The University Medal is the highest campus honor awarded to a graduating senior in recognition of superior scholarship and achievement. A College or School Medal is also given to the outstanding graduating student in each of the colleges and professional schools.

Departmental citations, special awards and prizes are also awarded to students for superior achievement and scholarship.

Prizes & awards for, College of:

- Agricultural & Environmental Sciences
- Biological Sciences
- Engineering
- Letters & Science

**Chancellor’s Award for Excellence in Mentoring Undergraduate Research**

These prestigious awards recognize a graduating senior who has distinguished him/herself through their excellence in undergraduate research; and faculty, postdocs or graduate students who have excelled in mentoring undergraduate researchers. For complete information, see Chancellor’s Award for Excellence in Undergraduate Research.

**Leaving UC Davis**

To graduate, undergraduate students must file an Application for Graduation with the Office of the University Registrar by the posted deadlines. To participate in the Commencement Ceremony, a student must register to walk. These are separate actions.

Graduation | Commencement Ceremony

**Leave of Absence: Planned Educational Leave Program (PELP)**

The Planned Educational Leave Program (PELP) allows any continuing undergraduate or graduate level student to temporarily suspend academic work at UC Davis.

**Withdrawal**

Withdrawal | Retroactive Withdrawal

**Returning to UC Davis**

Undergraduate Readmission
For any term a student does not register, is not on an approved leave of absence, or has cancelled/withdrawn from the university, the student is considered non-continuing and must apply for readmission to return to registered status.
Undergraduate Education

Bachelor's Degree Requirements

Students must satisfy four groups of requirements before they can become eligible for candidacy for the bachelor's degree:

- University Requirements; applies to all colleges.
- General Education Requirements; applies to all colleges.
- College Requirements; may be stricter than University Requirements for the same obligation.
- Major requirements as listed in Departments, Programs, & Degrees.

Students are responsible for seeing that all of their degree requirements are fulfilled.

University Requirements

To earn a Bachelor's Degree, all students must fulfill the following University of California requirements:

- Entry Level Writing
- American History & Institutions
- Units
- Residence
- Scholarship
- General Education
- College Requirements; see tabs above for:
  - Agricultural & Environmental Sciences
  - Biological Sciences
  - Engineering
  - Letters & Science
- Major/Degree; course requirements for each major/degree are listed in Departments, Programs, & Degrees.

For older Bachelor's Degree Requirements, see Bachelor's Degree Requirements tab.

Entry Level Writing Requirement

Every undergraduate student at UC Davis must demonstrate college-level proficiency in writing by satisfying the Entry Level Writing Requirement (ELWR). Satisfaction of the ELWR is a prerequisite to undergraduate writing courses that fulfill the English Composition Requirement and General Education requirements for writing experience.

Students who do not satisfy the Entry Level Writing Requirement by the end of the third quarter of enrollment* will be disenrolled from the University per UC Davis Senate Regulation 521.

*UC Davis students whose native or primary school language is not English will take the English Language Placement Exam (ELPE) to determine which writing course to take first. The English Language Placement Exam (ELPE), which may be taken only once, will be delivered via Canvas and taken remotely during one of several testing periods during the summer before the first quarter. Students whose ELPE results require them to take one or more UWP ESL courses will have the standard three quarters to meet the Entry Level Writing Requirement (ELWR) plus the number of quarters they are held for UWP English intensive coursework (UWP 021-022). The ELWR
timeline begins with the first quarter of enrollment at UC Davis and continues each quarter. Students who do not satisfy the ELWR within the time limit will be disenrolled from the University per UC Davis Senate Regulation 521.

Fulfilling ELWR Before Entering UC Davis

Students can fulfill the Entry Level Writing Requirement (ELWR) before they begin at UC Davis with tests and coursework including:

SAT Scores
- 680 or better on the College Board SAT Reasoning Test, Writing (last administration January 2016); or
- 680 or better on the SAT, Evidenced-Based Reading and Writing** (beginning with Fall 2018 admits on a pilot basis); or

*UC is accepting a score of 680 or better on the SAT, Evidenced-Based Reading and Writing to satisfy the Entry Level Writing Requirement on a pilot basis, beginning with new students entering UC in Fall 2018. The pilot will remain in effect until a new policy is adopted by the Academic Senate.

AP (Advanced Placement) Scores
- 3 or above on either Advanced Placement Examination in English; or

ACT Scores
- 30 or better on the ACT, English Language Arts; or
- 30 or better on the ACT, Combined English/Writing (last administered June 2015); or

IB (International Baccalaureate) Scores
- 5 or above on an International Baccalaureate Higher Level English A: Literature exam (formerly known as Higher Level English A1 exam); or
- 6 or above on the International Baccalaureate Standard Level English A: Literature exam (formerly known as Standard Level English A1 exam); or
- 5 or above on an International Baccalaureate Higher Level English A: Language and Literature exam; or
- 6 or above on an International Baccalaureate Standard Level English A: Language and Literature exam; or

Analytical Writing Placement Exam
Passing the Analytical Writing Placement Examination (AWPE); or

Coursework
Earning a grade of C or higher in an acceptable 3 semester-unit or 4 quarter-unit college level composition course.

California High School Students
Every May, the University of California's Office of the President (UCOP) offers a writing placement exam for California high school seniors who have not met ELWR and plan to attend a UC campus the next fall. The exam—called the UC Analytical Writing Placement Examination (AWPE)—is administered the second Saturday of May at testing centers throughout the state of California. The exam lasts for two hours. The AWPE instructs test-takers to read a short passage provided by a proctor and then write a response to the passage by hand within the two hour exam. The AWPE may only be taken once. Learn more about the AWPE at the UCOP website, including registration information, sample exams, sample responses, and the scoring guide.

Fulfilling ELWR After Entering UC Davis

Undergraduate students who enter UC Davis and have not satisfied the ELWR in one of the ways described above can complete the requirement by:

- Enrolling in UWP 007, a 4 unit UC Davis writing course that carries units toward graduation credit, and receiving a C or higher; or
- Enrolling in UWP 007M, a 4 unit UC Davis writing course that carries units toward graduation credit, and receiving a C or higher; or
• Enrolling in UWP 001A (must be taken concurrently with UWP 001), a 2 unit UC Davis writing course that carries units toward graduation credit, and receiving a C or higher; or

• Enrolling in ENL 003A (must be taken concurrently with ENL 003), a 2 unit UC Davis writing course that carries units toward graduation credit, and receiving a C or higher; or

• Enrolling in NAS 005A (must be taken concurrently with NAS 005), a 2 unit UC Davis writing course that carries units toward graduation credit, and receiving a C or higher; or

• Enrolling in WR 039A, a 4 unit writing course offered by UC Online that carries units toward graduation credit, and receiving a C or higher; or

• Enrolling in Workload 057, a 4.5 unit writing course offered by Sacramento City College on the UC Davis campus that counts toward minimum progress but carries no units toward graduation, and receiving a C or higher; or

• Passing the AWPE, if it was not taken prior to entering UC Davis. The AWPE may only be taken once. Passing the AWPE fulfills ELWR. To learn more about the time, location, test format, and registration process for UC Davis offerings of AWPE at the start of the quarter, please visit http://elw.ucdavis.edu/schedules/exam-schedules/awpe.

NOTE: P/NP grade mode is not permitted if the course will be used for satisfaction of the ELWR. Students must take the course for a letter grade and receive a C or higher to fulfill ELWR.

Students who need intensive writing support should enroll in UWP 007:

UWP 007 is a face-to-face, 4 unit credit-bearing course taught by writing faculty at UC Davis. The small class size of 18 students allows for intense mentorship and collaboration as students focus on academic literacy strategies including understanding scholarly texts, contextualizing information, developing source-based academic writing projects, and learning how to implement feedback and revision plans.

UWP 007M is a face-to-face, 4 unit credit-bearing course taught by writing faculty at UC Davis. Students arrive at this course through campus placement (using the English Language Placement Exam or Analytical Writing Placement Exam) or after successful completion of UWP 022. The small class size of 18 students allows for the development of multilingual writers’ composition and English language skills across genres and disciplines. The course integrates college-level reading, critical thinking, and written communication, using texts from across the curriculum. UWP 023 has been discontinued; students who successfully completed UWP 022 have the option to take either UWP 007M or UWP 007.

Please Note: Students who successfully completed UWP 023 cannot enroll in UWP 007M; as they are equivalent courses. Students who successfully completed UWP 023 before summer 2019 but still need to fulfill ELWR, MUST enroll in an ELWR course other than UWP 007M.

Students who need less writing support should enroll in an “A” co-course along with the corresponding lower-division writing course:

UWP 001A

UWP 001A is a face-to-face 2 unit credit-bearing course taught by writing instructors at UC Davis that fulfills ELWR if passed with a C or higher. Concurrent enrollment in UWP 001 or UWP 001Y (a 4 unit credit-bearing course that fulfills the lower division writing requirement) is required for UWP 001A students. The course uses a writing studio approach; each section of UWP 001A enrolls 14 students who work intensively on analyzing writing tasks, developing drafts of writing, providing and implementing feedback, and identifying useful strategies for academic writing across the curriculum.

ENL 003A

ENL 003A is a 2-unit, credit-bearing course that fulfills ELWR when passed with a C or higher. It is taught by instructors from the English Department at UC Davis. Students must be enrolled in ENL 003 (a 4 unit credit-bearing course that fulfills the lower division writing requirement) in order to be enrolled in ENL 003A. Structured as a writing studio in support of ENL 003, each section of ENL 003A enrolls 14 students to work in small groups with an instructor to support them as they complete writing assignments from ENL 003. Those assignments include literary analysis of poetry, drama, and fiction.

NAS 005A
NAS 005A is a face-to-face 2 unit credit bearing course that fulfills ELWR if passed with a C or higher, taught by Native American Studies instructors at UC Davis. Concurrent enrollment in NAS 005 is required for NAS 005A students. The course uses a writing studio approach; each section of NAS 005A enrolls 14 students who work in small groups and an instructor mentor who supports them as they complete disciplinary writing tasks assigned in NAS 005, including literary analysis of poetry, drama, and fiction.

Students who want to take an online writing course should take WR 039A:

WR 039A is an online Cross-Campus course taught by UC Irvine. Students in the Intro to Writing & Rhetoric course will develop their writing through language-intensive exercises, participation in community-based writing in blogs and forums, and completion of a writing portfolio. Students will also have the opportunity to experiment with various writing forms, ranging from the personal narrative to a thesis-driven essay project. Students must meet certain eligibility criteria to enroll through Cross-Campus enrollment and should check in with the advisors in their Dean’s Office prior to enrollment.

Students who want to take a course without graduation credits and therefore no GPA impact should take WLD 057:

Workload 057 is a face-to-face course taught by Sacramento City College faculty on the UC Davis campus; the 4.5 units of the course count toward the minimum progress requirement but does not carry units toward graduation credit nor does it factor into a student’s GPA. To satisfy the requirement, students must earn a course grade of C or higher; students who receive a grade lower than C must repeat an ELWR fulfilling course.

American History & Institutions Requirement

The American History & Institutions requirement ensures that every graduating student will have at least a minimum knowledge of the background of this country’s development and an understanding of the political, economic and social interrelationships of its way of life.

You may meet this requirement in any of these ways:

- Complete one high school unit in American history, or 1/2 high school unit in American history and 1/2 high school unit in civics or American government, with a grade of C or better in each course
- Complete any one of the following courses:
  - African American and African Studies (AAS) 010, 100
  - Asian American Studies (ASA) 001, 002
  - Chicana/Chicano Studies (CHI) 010
  - Economics (ECN) 111A, 111B
  - Native American Studies (NAS) 001, 10, 116, 130A, 130B, 130C
  - Political Science (POL) 001, 005, 100, 102, 104, 105, 106, 108, 109, 113, 130, 131, 160, 163
  - Students electing to complete one of the above courses in order to meet this requirement are subject to the rules for prerequisites and majors.

  - Present evidence that the requirement has been accepted as satisfied at another campus of the university.
  - Present evidence that the requirement has been satisfied through courses in the area of American History and Institutions at another collegiate institution whose credits are acceptable for transfer to UC Davis.
  - Successful completion of the Advanced Placement (AP) Examination in United States Government and Politics taken May 2014 and prior with a score of 3 or higher. As of May 2015 AP examination, AP United States Government and Politics no longer satisfies the American History and Institutions requirement.
  - Successful completion of the International Baccalaureate (IB) Examination in History of the Americas Higher Level (HL) with a score of 5, 6, or 7.
  - Successful completion of the SAT Subject Examination in U.S. History with a score of 550 or higher.

International students, regardless of the type of visa they hold, must meet the university’s American History and Institutions requirement for graduation.
Unit Requirements & Limitations

Minimum. A minimum of 180 quarter units is required for graduation. These must be distributed according to the minimum requirements set forth by the faculty of your college.

Unit Credit Limitations. For certain courses, there may be limits established on the number of units countable towards the 180-unit minimum required for the degree. To avoid discovering just before graduation that a student is short on units, a student should regularly meet with their advisor to keep track of the number of units taken and credited.

Internship Courses. A maximum of 15 units of internship courses may be counted toward the 180-unit bachelor’s degree requirement; however, some colleges have set a lower maximum. Unless the student has completed a minimum of 84 units, the student shall not receive University credit for an internship course numbered 192. (ASR 532.A & B)

Special Study Courses. Unless the student has completed a minimum of 84 units, the student shall not receive University credit for an Special Study courses course numbered 194H or 199. (ASR 535)

Transfer Courses. The acceptability of transfer courses for unit credit is determined by Undergraduate Admissions. The acceptability of such courses toward specific requirements is determined by the individual college or school. Students should refer to the Advanced Placement Examination chart and their transcripts to eliminate the possibility of duplication of credit.

Residence Requirements

The minimum residence requirement for a bachelor’s degree at the University of California is one academic year (three quarters). Thirty-five of the final 45 quarter units completed by each candidate must be earned while in residence on the UC Davis campus (UCSR 630.A). Each summer session in which a student completes a course of at least 2 quarter units may be counted as half a quarter's residence.

Regularly approved courses (laboratory, field, or other individual work) done outside of a regular session but under the direction of a department of instruction may be accepted upon the recommendation of the department in partial fulfillment of the residence requirement for the bachelor’s degree. Registration is with the consent of the instructor only.

UC Davis Extension courses are not accepted as part of the university residence requirement.

There are additional residence requirements for students enrolled in the Colleges of Letters & Science. If you are planning to study abroad during your senior year, you should consult your college dean's office or the Biology Academic Success Center.

With the approval of the dean of a student's college or school, a candidate for the bachelor’s degree who was in active service in the armed forces of the United States in the year preceding the awarding of the degree may be recommended for the degree after only one quarter of university residence in which the candidate completes at least 16 units or passes a comprehensive examination in the major or field of concentration (UCSR 614).

Scholarship Requirement

To receive a bachelor's degree, you must obtain twice as many grade points as units (a 2.000 GPA) for all courses you have attempted in the university. Each college has specific requirements, as well; see tabs above.

General Education (GE) Requirement

For complete information, see General Education Requirements. For a list of courses that contain GE attributes and GE search tools, see General Education (GE) Requirements.

The General Education (GE) requirement promotes the intellectual growth of all undergraduates by ensuring that they acquire a breadth of knowledge that will enlarge their perspectives beyond the focus of a major and serve them well as participants in a knowledge-based society. It seeks to stimulate continued growth by providing knowledge of both the content and the methodologies of different academic disciplines. It involves students in the learning process by its expectation of considerable writing and class participation, and encourages students to consider the relationships between disciplines.
The GE requirement has two components, Topical Breadth and Core Literacies, and is defined in terms of units, not courses.

**Topical Breadth Component—52 units**

A GE course in topical breadth addresses broad subject areas that are important to the student's general knowledge. The units of most undergraduate courses at UC Davis are assigned to one of the three Topical Breadth Areas.

**Note:** In the case of a course that has been certified in more than one Topical Breadth Area, a student may count the units of the course in only one of the areas in which it has been certified.

- **Arts & Humanities—12-20 units.** Courses in this area provide students with knowledge of significant intellectual traditions, cultural achievements and historical processes.
- **Science & Engineering—12-20 units.** Courses in this area provide students with knowledge of major ideas and concepts of science and engineering and their applications.
- **Social Sciences—12-20 units.** Courses in this area provide students with knowledge of the individual, social, political and economic activities of people.

**Core Literacies Component—35 units**

The literacies are crucial both for success in one's profession and for a thoughtful, engaged citizenship in the community, nation and world.

**Note:** In the case of a course that has been certified in more than one Core Literacy Area, a student may count the units of the course in only one of the core literacy areas in which it has been certified.

1. **Literacy with Words & Images—20 units.** The objective of this core literacy is to help students communicate their ideas effectively in written, oral and visual forms. The requirement also seeks to enhance students' critical judgment of oral, written, and visual messages created by others.

   **Note:** A student must have completed the Entry Level Writing Requirement (formerly known as the Subject A requirement) before receiving General Education credit for coursework satisfying requirements a, b, and Writing Experience coursework satisfying requirement c, below.

   a. **English Composition—8 units.** As described by College of Agricultural & Environmental Sciences, College of Biological Sciences, College of Engineering, or College of Letters & Science.

   b. **Writing Experience coursework in the student's major or in other departments—6 units.** Courses in writing experience provide students instruction on how to communicate ideas in the subject matter of the course. The opportunity to improve writing after having received careful commentary is crucial to this requirement.

   c. **Oral Skills coursework or additional writing experience coursework—3 units.** Courses in oral literacy involve effective communication of ideas through oral presentation and build on and strengthen the critical thinking skills exercised through writing. As an alternative to developing oral communication skills, students may take additional coursework certified as writing experience (see requirement b, above).

   d. **Visual Literacy coursework—3 units.** Courses in visual literacy provide students with the analytical skills they need to understand how still and moving images, art and architecture, illustrations accompanying written text, graphs and charts, and other visual embodiments of ideas inform and persuade people. Coursework may stress the skills needed to communicate through visual means as well as the analytical skills needed to be a thoughtful consumer of visual messages.

2. **Civic & Cultural Literacy—9 units.** The objective of this core literacy is to prepare students for thoughtful, active participation in civic society. Students will learn to think analytically about American institutions and social relations, understand the diversity of American cultures, and see the relationships between national and local cultures and the world.

   a. **American Cultures, Governance, & History—3 units.** Courses in American Cultures, Governance, and History provide students with an understanding and appreciation of the social and cultural diversity of the United States and of the relationships between these diverse cultures and larger patterns of national history and institutions.

   b. **Domestic Diversity—3 units.** Courses in Domestic Diversity provide students with an understanding of issues such as race, ethnicity, social class, gender, sexuality, and religion within the United States, and develop the student's ability to think critically about diverse socio-cultural perspectives.

   c. **World Cultures—3 units.** Courses in World Cultures provide students with a global perspective in a world
where communication technologies, economic relationships, and the flow of people across national borders increasingly challenge national identities and create transnational cultures. Students can satisfy this requirement through coursework or through certified study abroad.

3. **Quantitative Literacy—at least 3 units.** The objective of this core literacy is to provide students with an understanding of quantitative reasoning and skills for evaluating claims and knowledge generated through quantitative methods.

4. **Scientific Literacy—at least 3 units.** The objective of this core literacy is to provide students with an understanding of the fundamental ways scientists approach problems and generate new knowledge, and an understanding of how scientific findings relate to other disciplines and to public policy.

**Additional Conditions**

**Meeting Total Units Requirement.** With the exception of units used to satisfy the English Composition element, units approved for a Core Literacy will be accepted toward satisfaction of the appropriate Topical Breadth component. Course units that satisfy requirements in the candidate's major or majors may also be counted toward satisfaction of General Education requirements.

**Grading.** Students may take courses P/NP to fulfill their General Education requirements, up to the limits set by college and campus regulations.

**Advanced Placement & International Baccalaureate.** Students may not present Advanced Placement or International Baccalaureate credit in satisfaction of GE requirements, except insofar as it may be applied to the English Composition component of the Literacy with Words and Images requirement.

**Transfer Students** who have successfully completed the Intersegmental General Education Transfer Curriculum (IGETC) lower division course work are exempt from all General Education requirements that may be met with lower-division courses. Transfer students who have not completed the IGETC, and who are not entitled to graduate under the provisions of a General Catalog issued prior to Fall 2011 as permitted by the applicable college policy on degree requirement changes, are required to satisfy all General Education components under the revised requirement but may offer previously completed coursework toward their satisfaction.

**Approved General Education Courses**

For a list of the courses that provide General Education credit; see [General Education](#). **Please note** that you cannot claim GE credit for a course you completed before it was an approved GE course.

**Undergraduate Education | Agricultural & Environmental Sciences**

**College of Agricultural & Environmental Sciences**

A preliminary degree check can be used to help track your progress. You can also utilize the [MyDegree](#) advising tool to review requirements. It is the responsibility of the undergraduate scholar to ensure all requirements are fulfilled.

**College Units & Limitations**

- A minimum of 180 quarter units is required for the degree. At least 54 of the 180 units must be in upper division or graduate courses except that a maximum of 9 units in graduate level courses (200 series) and professional courses (300 and 400 series) will be accepted toward the 54 upper division requirement.
- No more than 6 units of Physical Education 001 and/or 006 and no more than 20 units of Internship 092 and 192 and courses numbered 099, 190C, 197T, and 199 may be counted toward the total of 180 units for the degree.
- A maximum of 12 units of Internship 092 and 192 is permitted. Credit will not be given for 192, 199 numbered courses prior to completion of 84 units.
- The Academic Senate limits the total number of courses grades P, including units earned in courses graded “P/NP only” to one third of the units completed on the UC Davis campus. The P/NP option should not be used for major requirements.
- Students may apply credit for courses taken in the Open Campus Program through UC Davis Continuing and Professional Education (formerly known as UC Davis Extension) towards the 180-unit undergraduate degree requirement. The grade points earned when enrolled in Open Campus courses will count toward
the calculation of a student's UC GPA upon his/her admission or readmission to regular student status at UC Davis. Students registered at UC Davis may not enroll in Open Campus courses.

- University of California Extension courses can be used to satisfy graduation requirements only with approval of the dean, as long as the units are deemed as transferable units by the Undergraduate Admissions office. Only grade points from University of California, Davis Extension courses, not Extension courses from other campuses, will be counted toward the student's overall UC grade point average.
- Undergraduate students may not exceed 225 units; registration for enrollment when the limit has been reached may only be approved by the dean by petition.

**College Residence**

- 35 of the final 45 units must be taken while an undergraduate scholar is in the college. University of California Extension courses can be used to satisfy graduation requirements only with approval of the dean. Only grade points from University of California, Davis extension courses will count toward the student's overall UC grade point average.
- Education Abroad Courses are not considered in residence. Please speak to the Dean's Office if you are planning to study abroad.

**College Scholarship**

- The minimum grade point average (GPA) to satisfy the scholarship requirement is 2.000 for all courses counted toward the major and for all upper division courses used to satisfy major requirements.
- Only grades earned in courses taken at UC Davis will be included in the grade point computations.
- Cumulative grade point average (GPA) is a minimum of 2.000; major grade point average (GPA) is also a minimum of 2.000 - both are required in order to be eligible for graduation.
- Major grade point average (GPA) calculation varies per program of study. Questions regarding major GPA should be directed to the department advisor.
- To obtain these minimum averages in the major, you may repeat courses that are graded D or F. If you have to repeat a course more than once, scholars must obtain approval from the Dean's Office prior to enrolling.

**English Composition**

This requirement may be met in one of three ways:

1. Either two courses emphasizing written expression or one course emphasizing written expression and one course emphasizing oral expression, with a grade of C- (or P) or better. The following UC Davis courses satisfy this requirement:
   
   - (a) One course must be selected from English (ENL) 3; University Writing Program (UWP) 001, 048, 049, 101, 102 series, or 104 series (courses with primary emphasis in writing skills), and;
   - (b) One course selected from the courses not selected above, or from Communication (CMN) 001; Comparative Literature (COM) 001, 002, 003, 004, or Native American Studies (NAS) 005 (courses emphasizing either writing or speaking skills.)

2. Advanced Placement English score of 4 of 5 PLUS any course listed in 1(a) or 1(b) above EXCEPT University Writing Program (UWP) 001 or English (ENL) 003.

3. By successfully passing the English Composition Examination administered by the College of Letters & Science upon completion of 70 units of degree credit (the examination does not yield credit).

For specific examination dates, instructions, and to sign up to take an examination, see the University Writing Program-Upper Division Composition Exam Information. It is recommended that students with disabilities contact the Student Disability Center at 530-752-3184 and the Entry Level Writing Program Office 530-752-0450 at least two weeks prior to the exam date to arrange accommodations.

**Undergraduate Education | Biological Sciences**
College of Biological Sciences

Unit Requirements

Total Units. Complete no less than 180 units allowing for the unit credit limitations listed below. No student may exceed 225 units in their academic career without approval of the Dean. Units earned in Advanced Placement and International Baccalaureate exams are not counted toward this 225-unit limit. Upon reaching 200 units, a student must submit a quarter-by-quarter graduation plan to the Biology Academic Success Center or a hold will be placed on their registration.

Upper Division Units. Complete 64 upper division units.

Unit Credit Limitations

- **Passed/Not Passed Units.** All courses used to satisfy major requirements must be taken on a letter-graded basis, unless courses are only offered on a Passed/Not Passed basis. The Academic Senate limits the total number of courses graded P, including units earned in courses graded "P/NP only," to one third of the units completed on the UC Davis campus.
- **Physical Education.** Maximum of 6 units of Physical Education (PHE) 001, 006 and similar physical activity courses including transfer work.
- **Transfer Work.** Maximum of 105 units of credit earned at two-year institutions (community college).
- **Graduate Courses.** Units from courses in the 200 series (with the exception of course 299) may apply toward the minimum 64-unit upper division requirement and/or as a substitution for undergraduate courses in the major under the following conditions:
  - Students must obtain written permission from the course instructor and the master advisor for their major.
  - The master advisor will confirm that students have a minimum 3.400 GPA in the major at the time that they register for the course.
- **Professional and teaching courses.** Maximum of 9 units in courses numbered 300-399 and 400-499. These units may not be applied toward the 64-unit upper division requirement.
- **Upper division standing.** Must complete 84 units before enrolling in 192, 194H and 199 to receive degree and upper division credit.
- **Special Study.** No more than 5 units per quarter of Special Study courses (099, 194H, 199).
- **Nonstandard Courses.** Maximum of 20 units of nonstandard courses including transfer work.*
  - Nonstandard courses are defined here as tutoring, internship, research, research conference, honors research and similar course activities. Some examples of these courses are, but are not limited to, courses numbered 090C, 091, 092, 092C, 097T, 097TC, 099, 189, 190C, 191, 192, 192C, 193, 194H, 197T, 197TC, 199, etc. Courses numbered 098 or 198 are not included in this 20-unit limitation.
  - There are additional unit credit limitations on tutoring and internship units.
    - **Tutoring.** Maximum of 3 tutoring units including but not limited to 097T, 197T, 097TC and 197TC.
    - **Internship.** A maximum of 6 internship units including but not limited to 092, 192, 92C, 192C.

* Specific exceptions to these limits may be granted by the Committee on Undergraduate Petitions based on the uniqueness of the experiences and their concordance with the petitioner’s educational objectives.

Credit for Open Campus (Concurrent) Courses

Students may apply credit for courses taken in the Open Campus (Concurrent) Program through UC Davis Extension towards the 180-unit undergraduate degree requirement. The grade points earned when enrolled in Open Campus courses will count toward the calculation of a student’s UC GPA upon his/her admission or readmission to regular student status at UC Davis. However, the units earned do not satisfy the university residence requirement. Students registered at UC Davis may not enroll in Open Campus courses.

Residence

Meet university residence requirement. No additional college residence requirements.

Scholarship

Students must attain at least a 2.000 GPA for all courses required in their major. Students must also attain a 2.000 GPA in all Depth Subject Matter courses required in their major. Students who fail to maintain a 2.000 GPA in courses required for their major over two consecutive quarters may be required to withdraw from the major.
• **Repeating Courses.** Students may repeat courses once in which they received a grade of D+ or less. To repeat a course more than once, students must petition the Dean for approval prior to enrolling in the course.

• **Passed/Not Passed Grading Option.** All courses used to satisfy major requirements must be taken on a letter-graded basis, unless courses are only offered on a Passed/Not Passed basis.

### English Composition

English Composition requirement may be satisfied in one of two ways:

1. Completing 8 units, to include 4 upper division units, in English composition courses with at least a C- or Passed grade from the following list: Comparative Literature 001, 002, 003, 004, English 003, Native American Studies 005, University Writing Program 001, 018, 019, 101, 102 series, or 104 series.

   OR

2. Passing the English Composition Examination, administered by the University Writing Program, upon completion of 70 units of degree credit. This examination does not yield credit. Students interested in entering the health science field should check with the Health Professions Advising office or the Biology Academic Success Center before choosing this option.

### English Composition Examination

The no-fee, no-unit examination is typically offered on a Saturday in October, January, and April. For specific dates, see [http://writing.ucdavis.edu/compexam/](http://writing.ucdavis.edu/compexam/).

If students choose to take this challenge exam, they are strongly advised to do so in their junior year. Register for the English Composition Examination at [http://writing.ucdavis.edu/compexam/](http://writing.ucdavis.edu/compexam/) from the Monday before the exam date until Friday at noon or until no spaces remain. The AWPE/Upper-Division Composition Examination form, available at the UC Davis Bookstore, is required. It is recommended that students with disabilities contact the Student Disability Center 530-752-3184 and the University Writing Program 530-752-6283 at least two weeks prior to the exam date to arrange accommodations. No examinations are given during the summer.

### Additional Bachelor of Arts Requirements

Bachelor of Arts degrees are available in Biological Sciences; Evolution, Ecology and Biodiversity; Microbiology; and Plant Biology. These degrees offer students an opportunity to broaden their education while pursuing a rigorous life science major. Candidates for the Bachelor of Arts degrees must complete two additional requirements.

#### Foreign Language

The requirement can be met in one of three ways:

- Complete with passing grades 15 quarter units of college level course work, or the equivalent thereof, in a single language.
- Attain a minimal score prescribed by the Committee on Undergraduate Curriculum and Educational Policy, in the College Entrance Examination Board Achievement Test in Foreign Language, which may be taken at any time during the student's high school career, or any other achievement test approved by the Committee on Undergraduate Curriculum and Educational Policy.
- Placement beyond the 15-unit level on a placement/proficiency examination offered by one of the foreign language departments of the University.

#### Breadth Requirements

Satisfaction of the campus General Education requirement (or IGETC for transfer students) in effect Fall 2011 will satisfy the Breadth requirement. Students that matriculated prior to Fall 2011 have the option of completing the Breadth Requirement specified in the College of Biological Sciences regulations prior to this revision. Completion of a minor in the humanities, social sciences or fine arts can offer structure and coherence to the courses selected for the satisfaction of the requirement.

### Declaration of Major/Unclassified—Life Sciences

Students must declare a major by 90 units. A hold will be placed on a student's registration if he/she is still undeclared after completing 90 UC Davis units.

All changes of major and college must be completed before the beginning of the student's quarter of graduation.

Students who are enrolled in a major administered by the College of Biological Sciences and students who are Undeclared-Life Sciences see a staff advisor in the Biology Academic Success Center for their major, university,
general education, and college academic advising. Master faculty advisors are also available in the department that houses their major, as listed in the catalog, or at the Biology Academic Success Center.

**Degree Check**

Students are encouraged to meet with their academic advisor at least once a year to ensure timely graduation. Students are required to consult a Biology Academic Success Center academic advisor at three points in their academic careers:

- In their first two quarters on the Davis campus.
- Before accumulating 90 units.
- Before accumulating 135 units.
- In addition, if you are taking courses which, if passed, will cause your unit total to exceed 200 units and you intend to register for the next quarter, you must file a plan with your advisor that leads to graduation within 225 units. If the plan anticipates registering after you have accumulated 225 units, the plan must be submitted to the Dean for approval.

If you do not meet any of these advising requirements, a hold may be placed on your registration.

**Degree Requirement Changes or Catalog Rights**

On occasion, the faculty makes changes in the requirements that students must satisfy to obtain the baccalaureate degree. So that you will not be penalized by changes that may work to your disadvantage and so that you will benefit by changes that assist you in completing your degree requirements, it is college policy that you may choose to fulfill the university and college requirements (see General Education Requirement for an exception) as stated in any UC Davis General Catalog in effect at the time you were registered at UC Davis. If you have transferred to UC Davis from a community college, state college, or another university, you may follow the requirements as stated in any UC Davis General Catalog in effect either during the three years immediately preceding your transfer to UC Davis or at the time you first registered at that institution, whichever is most recent. Once you have chosen the year of the General Catalog under which you wish to be governed, you must satisfy all of the university and college requirements specified in that catalog.

With respect to the completion of your major requirements, most of the majors in the College of Biological Sciences require completion of the major degree requirements in effect at the time you officially declared your major. However, because departments differ in how they handle these matters, check with your BASC academic advisor if you have any questions about your major requirements.

**Undergraduate Education | Engineering**

**College of Engineering**

**Unit**

Each candidate must complete a program of study under an approved curriculum in Engineering, totaling at least 180 units.

**Residence**

College of Engineering students must meet the university residence requirement. There are no additional college residence requirements.

- **Limitation on Credit for UC Davis Extension Courses.** Students may apply a maximum of 16 units of credit for courses taken in the Open Campus Program through UC Davis Extension towards the unit requirement of their major. Courses may be taken only when written approval has been obtained from the Associate Dean for Undergraduate Studies. The grade points earned when enrolled in Open Campus courses will count toward the calculation of the student's UC GPA upon your admission or readmission to regular student status at UC Davis. Students registered at UC Davis may not enroll in Open Campus courses.
Scholarship
In addition to meeting the university scholarship requirement, College of Engineering students are required to maintain at least a 2.000 grade point average for all undergraduate course work within the College of Engineering at UC Davis.

English Composition
All students admitted to the University must complete the Entry Level Writing Requirement before credit for any composition course or general education writing experience course will be granted.

Once the Entry Level Writing Requirement has been satisfied, there are two distinct composition requirements for engineering students:

- **Lower-division composition.** This requirement can be satisfied by completion of an Advanced Placement English exam with a score of 4 or 5; International Baccalaureate credit for English 3; or completion of certain coursework with a grade of C- or better. Courses allowed vary by major. Please see your program adviser to determine coursework that has been approved for your major.

- **Upper division composition.** Requirements for upper division composition vary by major. Please see your program adviser to determine the coursework that has been approved for your major. Please note that when you use coursework to satisfy either of the composition requirements, you must earn a grade of C- or better.

Current Catalog Curriculum
In order to ensure that students graduate with the most current engineering knowledge, College of Engineering Students must complete the major requirements in effect in the academic year of graduation or in the immediately preceding academic year.

Undergraduate Education | Letters & Science
College of Letters & Science

Unit
A minimum of 180 units is required for the bachelor's degree. 64 units must be earned in upper division courses.

**Registration Beyond the 225-unit Limit.** You are expected to fulfill all degree requirements within the 180- to 225-unit range. Once 225 units have been completed (excluding units awarded for College Board Advanced Placement Examinations or International Baccalaureate Examinations), you may register only with the permission. Such permission is rarely granted and then typically only to allow completion of minimum degree requirements. A hold will be placed on a student's record when they reach 200 total units, requiring submission of an academic plan to verify the degree can be completed within the 225-unit cap. You will be expected to adhere to a program of courses agreed upon and to meet other conditions that may have been set. Approval must be obtained from Undergraduate Education and Advising in the Office of the Dean before you will be permitted to register for courses for the quarter following completion of 225 or more units.

If you are in good standing, you will be able to complete 12 quarters or the equivalent (e.g., four years) of college work even if you have earned more than 225 units before you finish your fourth year. You must petition for continuation, however, and file the quarter-by-quarter course program you have planned.

**Unit Credit Limitations.** For certain courses, limits have been established on the number of units that can be counted towards the 180-unit minimum required for the degree. To avoid discovering just before graduation that you are short units, meet with an advisor regularly and keep track of the number of units you have taken in each of the following categories.

**Limitation on Credit for Graduate and Professional Courses.** Undergraduates may enroll in graduate and professional courses subject to the restrictions outlined on the petition to Request to Take a 200, 300 or 400 - Numbered Course for Degree Credit. Graduate and professional courses that have been completed will be listed on the student's transcript in the usual manner. However, the units earned may be counted toward degree requirements only under the conditions listed below.
Within the limitations A, B and C given below, undergraduate students in the College may count up to a combined total of 9 units in graduate 200 series courses and in 300 and 400 series professional courses toward degree requirements. These units, however, are not counted as upper division units.

A. The recommendations of the instructor in the course and the department chairperson—in addition to approval from Undergraduate Education and Advising in the Office of the Dean—must be obtained by petition in order to receive credit toward the degree for the following kinds of courses:

- All graduate courses 200–298, whether offered by a department or program outside of or within the College of Letters & Science.
- All professional courses 300–398 for teachers offered outside of the College of Letters & Science.
- All postgraduate professional courses 400–498 offered outside of the College of Letters & Science.
- All variable unit courses 300–398 and 400–498 offered within the College of Letters & Science.

B. The minimum eligibility conditions for an undergraduate student in the College to petition for degree credit for a 200, 300, or 400 series course are a UC grade point average of 3.300 and completion of 18 upper division units basic to the subject matter of the course. These eligibility conditions may be waived, however, upon the recommendation of the course instructor and concurrence of the department chairperson if the student's preparation warrants exception.

C. Undergraduates in the College cannot receive degree credit for special study courses 299, 399, or 499.

Limitation on Credit for Units Graded P. Students in the College of Letters & Science are subject to an additional limitation on the number of units that may be completed employing the Passed/Not Passed grading option. Graduating seniors and other students planning to undertake graduate or professional studies, should consult an adviser before electing for Passed/Not Passed grading in courses required for the major program. Excluding courses that are graded on a Passed/Not Passed (P/NP) basis only, the number of units graded P that may be accepted towards a degree in the College of Letters & Science is limited to not more than one fourth of the units completed in residence on the UC Davis campus. The Academic Senate limits the total number of courses graded P, including units earned in courses graded "P/NP only," to one third of the units completed on the UC Davis campus. This limitation applies to all UC Davis undergraduates, including Letters & Science students.

Limitation on Credit for UC Davis Extension Courses.

A. UC Davis Extension courses with a designator of "X." Students may apply credit earned through lower division and upper division UC Davis Extension "X" courses towards the 180-unit requirement only with written approval from Undergraduate Education and Advising in the Office of the Dean prior to registration. The degree credit allowed for such courses is usually less than the unit value listed in the course description. Additional limitations on UC Davis Extension "X" courses include: a maximum of 9 units may be offered for elective credit only and may not be applied toward fulfillment of the Area, Foreign Language, Upper Division, or Residence requirements of the College.

B. UC Davis Extension courses with a designator of "XD." Students may apply credit earned through lower division and upper division UC Davis Extension "XD" courses towards the 180-unit requirement. Additionally, credit from such courses may be applied toward fulfillment of all university, campus, college and major unit and subject matter requirements—including the Area, Foreign Language, Upper Division and Residence requirements of the College—in the same manner that the corresponding regular UC Davis course is so accepted.

C. UC Davis Extension courses with a designator of "XDC" [Open Campus (Concurrent) Program]. Subject to the following conditions, students may apply credit earned through lower division and upper division UC Davis Extension Open Campus (Concurrent) courses—i.e., those bearing the "XDC" designator-towards university unit and subject requirements, and, effective Fall 2003, the calculation of the student's UC GPA, upon admission or readmission to regular student status at UC Davis.

- Students on leave of absence and regular status students when matriculated, or regular status students for a period of one calendar year following the last term of regular enrollment at UC Davis, may not enroll in Open Campus (Concurrent) courses. Exceptions to this policy for undergraduate students may be made only under extraordinary circumstances by petition with prior approval by Undergraduate Education and Advising in the Office of the Dean and the Dean of UC Davis Extension.
- Concurrent ("XDC") courses do not count toward satisfaction of the University residence requirement or the residence requirements of the campus or the college.
• Concurrent ("XDC") courses may constitute at most half of the units offered in satisfaction of the upper division requirements of the major.

• In the event that the faculty of the college imposes further restrictions on the number of units of UC Davis Extension Open Campus (Concurrent) course work that may be applied to undergraduate degree programs, the allowable number of units of course work will be determined chronologically, starting with the course completed first. Grade point credit for such courses will be determined in the same manner.

Other Unit Credit Limitations. The following are additional courses that have limits on the number of units that can be counted toward your degree.

• Internship courses (numbers 92, 192): 12 units maximum including internship units taken at other institutions; see Nonstandard courses, below.

• Music 130, 131, 140-150 (combined): 19 units maximum.

• Nonstandard courses (92, 97T, 97TC, 99, 192, 194H, 197T, 197TC, 199 and similar courses): 30 units maximum or onesixth of the units taken at UC Davis, whichever is the smaller; note the separate unit limits on internship, special study and tutoring courses; and major limitations • Physical Education 1 and 6 (combined): 6 units maximum.

• Special Study courses (99, 194H, 199): 5 units maximum in any one quarter; see Nonstandard courses, above.

• Tutoring courses (97T, 97TC, 197T, 197TC): 10 units maximum; see Nonstandard courses, above.

Residence

While registered in the College of Letters & Science, a minimum of 27 upper division units, including 18 upper division units in the major, must be completed on the Davis campus; work completed while registered in the UC Education Abroad Program or the UC Davis Extension Open Campus Program does not satisfy university or College Residence requirements.

Scholarship

The minimum grade point average to satisfy the scholarship requirement is 2.000 for all courses counted toward the major and for all upper division courses used to satisfy major requirements. Only grades earned in courses taken at UC Davis will be included in the grade point computations. To obtain these minimum averages in the major, you may repeat courses that are graded D or F. If you have to repeat a course more than once, you need approval from Undergraduate Education and Advising in the Office of the Dean.

English Composition

All undergraduates in the College of Letters & Science must fulfill a two-course writing requirement, by completing each course with a grade of C- (or P) or higher or by testing out of one or both courses. All courses require a minimum of 6,000 words of writing, designed to introduce students to academic and professional writing, advance their analytic skills, and improve their writing process. Students may satisfy the writing requirement by completing:

• One course from University Writing Program (UWP) 001, 001V, 001Y, English (ENG) 003, Comparative Literature (COM) 001, 002, 003, 004, or Native American Studies (NAS) 005; and.

• After completing 84 units, one course selected from University Writing Program (UWP) 101, 102 series, or 104 series.

Transfer Courses in English Composition. Transfer courses considered to be equivalent or comparable to English (ENG) 003, Comparative Literature (COM) 001, 002, 003, 004, Native American Studies (NAS) 005, or University Writing Program (UWP) 001, 001V, 001Y, 101, 102 or 104 series, will be accepted toward satisfaction of the English Composition requirement. Note that University Writing Program (UWP) 101, 102 and 104 series courses or the equivalent must be taken after you have completed 84 units of degree credit.

Upper Division Composition Examination. The no-fee examination is typically offered Saturdays in October, January and April. No examinations are given during the summer. For specific examination dates, instructions, and to sign up to take an examination, see the University Writing Program-Upper Division Composition Exam Information at http://writing.ucdavis.edu/compexam. It is recommended that students with disabilities contact the Student Disability Center at 530-752-3184 and the Entry Level Writing Program Office 530-752-0450 at least two weeks prior to the exam date to arrange accommodations.
Area (Breadth)

The College Breadth Requirement promotes the intellectual growth of students by asking them to acquire a broader background of knowledge than is provided by the usual major. The Breadth requirement also guides students in exploring the interdependence of knowledge.

A.B. Degree. Satisfaction of the campus General Education requirement.

B.S. Degree. A total of 90 units in natural sciences/ mathematics; units used in satisfaction of the campus General Education requirement in Science and Engineering topical breadth may also be used to satisfy this requirement.

Courses numbered 092, 097T, 097TC, 098, 192, 197T, 197TC, 198 and 200-499 cannot be counted toward satisfaction of the natural sciences/mathematics Area requirement. A maximum of 10 units in special study courses (099, 194H, 199) may be counted toward that portion of the Area requirement. Subject to the restrictions just listed, courses acceptable for fulfilling the 90-unit natural sciences/mathematics Area requirement are:

Natural Sciences & Mathematics

- Anatomy, Physiology and Cell Biology (APC) 100
- Astronomy (AST)
- Avian Sciences (AVS) 013
- Biological Sciences (BIS)
- Cell Biology & Human Anatomy (CHA) 101, 101L
- Chemistry (CHE)
- Engineering (ENG) 006, 010, 035, 102
- Engineering: Biomedical (BIM) 126
- Engineering: Electrical & Computer (EEC) 070, 170, 173A
- Entomology (ENT) 010, 100, 153
- Environmental & Resource Sciences (ERS) 030, 131
- Environmental Science & Policy (ESP) 030, 100, 121
- Environmental Toxicology (ETX) 101
- Evolution & Ecology (EVE)
- Fiber & Polymer Science (FPS) 110
- Food Science & Technology (FST) 100A, 100B, 101A, 101B
- Geology (GEL)
- Integrated Studies (IST) 008A
- Mathematics (MAT)
- Microbiology (MIC)
- Molecular & Cellular Biology (MCB)
- Neurobiology, Physiology, & Behavior (NPB)
- Nutrition 010, 010V, 019Y, 111AV, 111B
- Pathology, Microbiology, & Immunology (PMI) 126
- Physical Education PHE) 133, 135
- Physics (PHY)
- Plant Biology (PLB)
- Psychology (PSY) 041, 100, 100Y, 101, 103A, 103B, 104, 113, 121, 122, 123, 124, 125, 126, 127, 129, 130, 131, 132, 135, 137, 146, 180B
- Statistics (STA)
- Wildlife, Fish, & Conservation Biology (WFC) 010

Foreign Language (A.B. & B.A.S. degrees)

A key component of liberal education, the study of another language exposes students to a ubiquitous and highly diverse component of human behavior and interaction. Language learning enables students to communicate
effectively in an increasingly internationalized world, enhances their ability to understand ways of thinking different from their own, gives them direct access to cultural production from another time and place, awakens in them an awareness of the conditioned nature of their assumptions about the world, and trains them to cope more effectively with intellectual and practical problems they may face in their future careers.

The College of Letters & Science encourages its students to acquire functional proficiency in at least one language other than English before graduating. At a minimum, the College requires A.B. candidates to complete three sequenced quarters (15 units) of courses, or its equivalent, in one foreign language. B.S. candidate requirements are determined by their respective major program.

Languages Satisfying the Requirement

The Foreign Language Requirement may be satisfied in any language offered at UC Davis, including ancient languages, or which is normally taught at—and for which transfer credit is allowed— from another institution, including American Sign Language. Students may also satisfy this requirement by examination in a language not offered on the UC Davis campus (see below).

Satisfaction of the Requirement

At UC Davis or Another Accredited Institution. You may satisfy the requirement by taking 15 quarter units of one foreign or classical language offered at UC Davis. You may also fulfill this requirement by taking the equivalent number of transferable quarter units in one foreign language at an accredited institution. Transfer students should consult the Transfer Credit Evaluation, which is issued by Undergraduate Education and Advising in the Office of the Dean, within a quarter after their first enrollment at UC Davis. Students planning to continue to study the same language at UC Davis must consult the relevant language coordinator. If you have successfully completed the second or third year of a language in the tenth or higher grade in high school, you may receive unit credit for course 1 of that language when taken at UC Davis, but the grading mode will be P/NP only. Although a Passed or Not Passed grade will be charged to your P/NP option, no petition is required.

Through Study Abroad. Certain study abroad programs offered by UC Davis through the Study Abroad Center, UC Education Abroad Program and other accredited institutions may be used to satisfy the requirement. Some of these programs do not have a language prerequisite, but others do. If you intend to apply for a study abroad program with a language prerequisite, you should plan on completing the relevant foreign language requirement by the end of your second or third year, depending on the program.

With the Intersegmental General Education Transfer Curriculum (IGETC). IGETC is a series of courses which prospective transfer students attending California community colleges may complete to satisfy the lower division breadth/general education requirements at the University of California. Students may satisfy the Foreign Language requirement by attaining certification of IGETC completion.

By Examination: Proficiency Exam. The UC Davis Language Center (DLC) offers proficiency tests in numerous languages. A proficiency test does not yield unit credit; it only determines whether the Foreign Language requirement has been met or at which point in the language sequence you should enroll. Students must follow the language program's placement policy if they decide to study the language at UC Davis.

By Examination: Standardized Tests. College Board Subject Test: Earning a qualifying score of at least 550 on a College Board Foreign Language Subject Test satisfies the requirement. This test may be taken at any time during your high school career. Once your score is on file at Undergraduate Admissions, notify Undergraduate Education and Advising in the Office of the Dean so that satisfaction of the College requirement can be noted on your record.

College Board Advanced Placement Examination. A score of 5, 4 or 3 on any foreign language College Board Advanced Placement Examination, with the exception of Latin, taken in high school will satisfy the Foreign Language requirement.

International Baccalaureate Higher Level Examination. A score of 7, 6, or 5 on the French A1, A2, or B Examination, the German A1, A2 or B Examination, the Italian A1 Examination, the Latin Examination, the Portuguese A1, A2 or B Examination, or the Spanish A1 Examination taken in high school will satisfy the Foreign Language requirement.

By Examination: Other means. If you have not completed the required level language course, but assume you have attained equivalent language fluency and cultural knowledge, you may satisfy the language requirement by passing a proficiency examination. For more information, consult the appropriate foreign language department. You may validate your knowledge of a language acquired by any means before matriculating at UC Davis by taking a
proficiency test or another form of evaluation (if available in the relevant language department). A test may not be taken, however, in a language for which you have already received degree credit.

**Major Degree Certification**

These requirements are fulfilled by completing a major program offered by a teaching department or program committee in the College of Letters & Science (see the list of majors) or an individual major program approved by the College's Committee on Individual Majors. No more than six units in internship courses (numbered 092, 192, or similar internship courses) may be accepted in satisfaction of the requirements of major programs. Courses numbered 097T, 97TC, 197T and 197TC do not satisfy unit or course requirements in the major. Please check with your major advisor to determine if there are any additional restrictions for your specific major. You can also learn more about the requirements for a major by talking with a Major Advisor and visiting the departmental website.

**Degree Check**

**Freshman admits.** In your third year, you will be notified by Undergraduate Education and Advising in the Office of the Dean that a summary of your progress in fulfilling college and university requirements has been completed. At approximately this point, you should contact your departmental advisor for a check of your major requirements.

**Transfer admits.** During Orientation, you should be in contact with your departmental advisor for a check of your major requirements. You will receive notification of the evaluation of your transfer institution credit summarizing your progress in fulfilling college, campus and university requirements in late summer/early fall after your official transcripts have been processed.

**Senior year.** Before the beginning of your senior year, take some time to consider your goals and to plan the academic program for your final year as an undergraduate. To plan properly and to ensure that you get the most out of your remaining education and complete all graduation requirements as well, you should know what requirements remain unsatisfied, you are encouraged to utilize the MyDegree advising tool. While not a replacement for academic advising by your college and major advisors, it is an online advising tool that allows you to understand your degree requirements, track your progress towards degree completion, and explore alternative and/or additional fields of study.

**Degree Requirement Changes**

On occasion, the faculty makes changes in the requirements that students must satisfy to obtain the baccalaureate degree. So that you will not be penalized by changes that may work to your disadvantage and so that you will benefit by changes that assist you in completing your degree requirements, it is College policy that, unless otherwise specified by the Davis Division of the Academic Senate, you may choose to fulfill the university, campus and College requirements as stated in any UC Davis General Catalog in effect at any time you were registered as a full-time student at a postsecondary institution of higher education; e.g., community college, college or university.

Once you have chosen the year of the General Catalog under which you wish to be governed, you must satisfy all of the university, campus and college requirements specified in that catalog. With respect to the completion of your major requirements, most of the majors in the College of Letters & Science require completion of the major degree requirements in effect at the time you officially declared your major. However, because departments differ in how they handle these matters, check with the department or major program office if you have any questions about which requirements apply to you.

Accounting Minor; Graduate School of Management | Accounting Minor

(Graduate School of Management)

School Office. Gallagher Hall; 530-752-7658; http://gsm.ucdavis.edu/

The UC Davis Graduate School of Management’s Undergraduate Accounting Minor gives you the opportunity to enhance your coursework with a carefully crafted series of five upper-division courses. These courses are designed to prepare you for accounting-related careers or advanced study in accounting. All five courses, 20 units total, must be completed to receive the minor certification.

The Accounting minor courses are open to all undergraduate and graduate majors at UC Davis.

All minor courses must be taken at UC Davis.

No course overlap allowed with other minors.

Prerequisites for minor courses are required and you should plan accordingly.

To complete the minor, students must complete the 20 units of coursework with a GPA of 2.000 or better. Courses may be taken P/NP as long as at least one course is taken for a letter grade and minor GPA is at least 2.000. For the OASIS minor declaration form to be approved, one course must be successfully completed and minor GPA at least 2.000.

The Mechanical & Aerospace Engineering Undergraduate Programs

The Department of Mechanical & Aerospace Engineering administers two undergraduate programs in the College of Engineering: (1) Mechanical Engineering, (2) Aerospace Science & Engineering.

For more information about our programs, please see http://mae.ucdavis.edu/undergraduate/undergraduate-majors.
Mission. The Department of Mechanical & Aerospace Engineering is committed to educating future engineers so that they may contribute to the economic growth and well-being of the state, the nation, and the world, and to the advancement of knowledge in the mechanical and aerospace sciences.

Objectives. The objectives of the Mechanical Engineering and Aerospace Science & Engineering programs are to produce graduates who do one or more of the following: a. Practice mechanical engineering and/or aerospace engineering in a broad range of agencies, industries, and institutes; b. Pursue graduate education; c. Participate in research and development, and other creative and innovative efforts in science, engineering, and technology; d. Pursue entrepreneurial endeavors.

Division of Aerospace Science & Engineering
The Division of Aerospace Science & Engineering administers the Aerospace Science & Engineering Program within the Department of Mechanical & Aerospace Engineering.

The Aerospace Science & Engineering Undergraduate Program
The Aerospace Science & Engineering program is accredited by the Engineering Accreditation Commission of ABET; http://www.abet.org.

Aerospace Science & Engineering majors learn to apply the principles of the physical sciences and engineering to the design of aerospace vehicles. Specific objectives include the design, development and manufacture of aerospace vehicles and other transportation systems through the integration of disciplines associated with aerodynamics, propulsion, structures and guidance/control.

Our Bachelor of Science degree in Aerospace Science & Engineering provides a broad background and fundamental education in mathematics, the physical sciences, and the engineering sciences. These fundamentals, when complemented by the required technical courses, prepare students for employment in government or industry, while simultaneously establishing an excellent foundation for graduate studies.

Students are encouraged to adhere carefully to all prerequisite requirements. The instructor is authorized to drop students from a course for which stated prerequisites have not been completed.

Exclusive of General Education units, the minimum number of units required for the Aerospace Science & Engineering major is 160.

The Major Program

African American & African Studies is an interdisciplinary field of study in the humanities, arts, and social sciences. This major introduces students to the social cultural, historical and artistic dimensions of global African Diaspora and Black communities in the United States, Africa, Europe, Asia, Caribbean, Latin America and Pacific regions of the world. The instructors are creative, accessible and highly qualified, with specializations across a range of disciplines. Students are exposed to and trained to think critically about the conditions and demands of global societies. Students may choose to enrich their education studying for a summer, a quarter, or a year in Africa, or by studying for a quarter in the Caribbean. Majors and Minors are also encouraged to take advantage of relevant internship opportunities.

The Program. The purpose of this program is to give students a sense of the individual characteristics and common concerns of Black communities in Africa, the United States, and in the wider Diaspora. The African American emphasis includes courses on history, culture, and the impact of developments in politics and the economy on the social organization of Black people in the United States. The African Diaspora emphasis enables students to study the way Black communities outside Africa and the United States have dealt with questions of race and ethnicity. It also considers how they have defined their identity in the political arena as well as by using religion, theater and dance, literature and film. The African emphasis allows students to focus on Africa's recent history, social issues, and contemporary culture.
**Career Alternatives.** Students majoring in African American & African Studies gain knowledge and strong critical thinking and analytical skills, problem-solving skills and communication skills, all suited for advanced studies in the social sciences, law, education and professional schools. Graduates in the major have pursued careers in education, the private and public sectors, the non-profit sector, international development agencies and in human service. The interdisciplinary nature of African American & African Studies is excellent preparation for professions in community organizations such as the Urban League, NAACP and the Office of Economic Opportunity.

**Major Advisor.** Dionica Bell; dbbell@ucdavis.edu

**American History and Institutions.** This University requirement can be satisfied by completion of AAS 010, AAS 100; listed in University Requirements.

**Note:** Although a course may be listed more than once, such a course may satisfy only one requirement.

A coordinated program of upper division courses, selected and approved in consultation with the major advisor and chosen to reflect the student’s major emphasis. Possible areas of emphasis include the following:

Creative arts in the black community worldwide, social and political trends in the global black community, African American society and culture, Africa, African Diasporas. These areas of emphasis are offered as guidelines for students in the major. They are not the only areas of emphasis that students may choose for the major.

The Minor Program

African American & African Studies is an interdisciplinary field of study in the humanities, arts, and social sciences. This major introduces students to the social cultural, historical and artistic dimensions of global African Diaspora and Black communities in the United States, Africa, Europe, Asia, Caribbean, Latin America and Pacific regions of the world. The instructors are creative, accessible and highly qualified, with specializations across a range of disciplines. Students are exposed to and trained to think critically about the conditions and demands of global societies. Students may choose to enrich their education studying for a summer, a quarter, or a year in Africa, or by studying for a quarter in the Caribbean. Majors and Minors are also encouraged to take advantage of relevant internship opportunities.

The Program. The purpose of this program is to give students a sense of the individual characteristics and common concerns of Black communities in Africa, the United States, and in the wider Diaspora. The African American emphasis includes courses on history, culture, and the impact of developments in politics and the economy on the social organization of Black people in the United States. The African Diaspora emphasis enables students to study the way Black communities outside Africa and the United States have dealt with questions of race and ethnicity. It also considers how they have defined their identity in the political arena as well as by using religion, theater and dance, literature and film. The African emphasis allows students to focus on Africa's recent history, social issues, and contemporary culture.

Career Alternatives. Students majoring in African American & African Studies gain knowledge and strong critical thinking and analytical skills, problem-solving skills and communication skills, all suited for advanced studies in the social sciences, law, education and professional schools. Graduates in the major have pursued careers in education, the private and public sectors, the non-profit sector, international development agencies and in human service. The interdisciplinary nature of African American & African Studies is excellent preparation for professions in community organizations such as the Urban League, NAACP and the Office of Economic Opportunity.

Agricultural & Environmental Education

Agricultural & Environmental Education | AEE B.S.

(College of Agricultural & Environmental Sciences; School of Education)

Undergraduate Advising Center (including peer advising) is located in the Animal Science Advising Center in 1202 Meyer Hall; 530-754-7915; https://animalscience.ucdavis.edu/academics/undergrad/advising.

The Major Program

The major serves those interested in teaching agricultural and environmental sciences in K-12 classrooms or in non-formal settings such as food production and distribution systems, nature preserves, environmental camps, or other venues. This major prepares graduates to direct programs in the agricultural and environmental sciences as well as provides them with a skill set necessary to work within social science careers related to these fields. This program of study meets state and federal requirements for entry into teacher preparation in agriculture and science, as well as requirements in Career Technical Education (CTE).

The Program

The program is designed to provide students with a broad background in various agricultural and environmental science disciplines, e.g., animal science, environmental science, plant and soil science, agricultural engineering, business management, agro ecology, and horticulture. The program also focuses on the social sciences related to human resource development. The program provides students with practical experiences through fieldwork, school, and non-formal learning sites placements, or placement in sites related to a student's focus of study. Through this major students will have the opportunity to explore and then incorporate agricultural and environmental issues into educational and development settings.

Career Alternatives. The need for scientists, technicians, and educators to assist in domestic and international agricultural development and environmental programs has created a continuing demand for qualified instructors and supervisory personnel. This major also provides general preparation for positions in banking, sales and service, rural recreation, and related agricultural and environmental sectors. Students interested in obtaining breadth in both agricultural and environmental sciences will appreciate the scope and flexibility the major provides.

Choose one:
- HIS 017A  History of the United States  4
- POL 001  American National Government  4

Preparatory Subject Matter  Units: 51

Choose a minimum of eight (8) units in each area of Animal Science, Applied Biological Systems Technology, Agricultural Business and Economics, Environmental Horticulture, Environmental Science and Natural Resources; and Plant and Soil Science:

Animal Science  8
- ANS 001  Domestic Animals and People  4
- ANS 002  Introductory Animal Science  4
- ANS 021  Livestock and Dairy Cattle Judging  2
- ANS 041  Domestic Animal Production  2

Applied Biological Systems Technology  9
- ABT 016  Metal Properties and Fabrication  2
- ABT 049  Field Equipment Operation  2
- ABT 052  Field Equipment Welding  2
- ABT 101  Engine Technology  3

Agricultural Business & Economics; choose ARE 015 and ECN 001A or 001B:  8
- ARE 015  Population, Environment and World Agriculture  4
- ECN 001A  Principles of Microeconomics  4
- ECN 001B  Principles of Macroeconomics  4

Environmental Horticulture  9
- ENH 001  Introduction to Environmental Horticulture/Urban Forestry  3
- ENH 006  Introduction to Environmental Plants  4
- PLS 005  Plants for Garden, Orchard and Landscape  2

Environmental Science & Natural Resources  9
- ESP 010  Current Issues in the Environment  3
- ETX 010  Introduction to Environmental Toxicology  3
- HYD 010  Water, Power, Society  3

Plant & Soil Science  8
- PLS 001  Agriculture, Nature and Society  3
- PLS 002  Botany and Physiology of Cultivated Plants  4
- PLS 015  Introduction to Sustainable Agriculture  4
- PLS 049  Organic Crop Production Practices  3
- VEN 002  Introduction to Viticulture  2
- VEN 003  Introduction to Winemaking  3

Science/Math Preparatory  Units: 43-45

Biological Science  10
- BIS 002A  Introduction to Biology: Essentials of Life on Earth  5
- BIS 002B  Introduction to Biology: Principles of Ecology and Evolution  5

Chemistry  10
- CHE 002A  General Chemistry  5
- CHE 002B  General Chemistry  5

Geology  6
- GEL 001  The Earth  4
- GEL 020  Geology of California  2

Mathematics, choose a series:  6-8
- MAT 016A  Short Calculus  3
- MAT 016B  Short Calculus  3
MAT 017A  Calculus for Biology and Medicine  4
MAT 017B  Calculus for Biology and Medicine  4
MAT 021A  Calculus  4
MAT 021B  Calculus  4

Physics  8
PHY 007A  General Physics  4
PHY 007B  General Physics  4

Soil Science  3
SSC 010  Soils in Our Environment  3

Depth Subject Matter  Units: 20

Agricultural Education  6
AED 100  Concepts in Agricultural and Environmental Education  3
AED 160  Vocational Education  3

Education  10
EDU 110  Educational Psychology: General  4
EDU 115  Educating Children with Disabilities  2
EDU 142  Introduction to Environmental Education  4

Environmental Science & Policy  4
ESP 110  Principles of Environmental Science  4

Focused Depth Subject Matter  Units: 16

The specialized focus will consist of a minimum of 16 units in one of the six areas listed below:

Agricultural Business & Economics  16
ARE 100A  Intermediate Microeconomics: Theory of Production and Consumption  4
ARE 100B  Intermediate Microeconomics: Imperfect Competition, Markets and Welfare Economics  4
ARE 120  Agricultural Policy  4
ARE 130  Agricultural Markets  4
ARE 135  Agribusiness Marketing Plan Development  2
ARE 138  International Commodity & Resource Markets  4
ARE 140  Farm Management  4
ARE 150  Agricultural Labor  4
ARE 175  Natural Resource Economics  4
ARE 176  Environmental Economics  4

Animal Science:  16
Choose upper division units from any Animal Genetics, Animal Science, or Avian Sciences courses. Or choose from:
ABI 102  Animal Biochemistry and Metabolism  5
FST 109  Principles of Quality Assurance in Food Processing  3
NPB 101  Systemic Physiology  5
NPB 121  Physiology of Reproduction  4
NUT 115  Animal Nutrition  4
NUT 122  Ruminant Nutrition and Digestive Physiology  4
NUT 123  Comparative Animal Nutrition  3

Applied Biological Systems Technology:  16
ABT 121  Animal Housing and Environment Management  2
ABT 142  Equipment and Technology for Small Farms  2
ABT 161  Water Quality Management for Aquaculture  3
ABT 165  Irrigation Practices for an Urban Environment  2

**Restricted Electives**

Choose at least four additional upper division courses (minimum 16 units; duplicate from Depth specialization courses not counted) selected with approval of an advisor to supplement or expand depth subject matter courses chosen from Animal Biology, Animal Genetics, Animal Science, Agricultural & Resource Economics, Avian Sciences, Environmental Horticulture, Environmental & Resource Sciences, Environmental Science & Policy, Food Science & Technology, International Agricultural Development, Nature and Culture, Neurobiology, Physiology, & Behavior, Nutrition, Plant Sciences, Plant Biology, or Viticulture & Enology.

**Total:** 150-152

**Agricultural & Resource Economics**

**Agricultural & Resource Economics | ARE Information**

(College of Agricultural & Environmental Sciences)
Agricultural & Resource Economics undergraduate program in Managerial Economics B.S.

Undergraduate Student Information for the Managerial Economics major, 1176 Social Sciences & Humanities Building; 530-754-9536; https://managerialeconomics.ucdavis.edu/

Major Program. See Managerial Economics undergraduate program.

Major Advisor. Student Services, 1176 Social Sciences & Humanities Building; 530-754-9536.

Agricultural & Resource Economics | ARE M.S.
(College of Agricultural & Environmental Sciences)

Rachael E. Goodhue, Ph.D., Chair of the Department

Department Office. 1176 Social Sciences & Humanities Building; 530-752-6185; https://are.ucdavis.edu/graduate/

Faculty. https://are.ucdavis.edu/people/faculty/

Graduate Student Information. 1171 Social Sciences & Humanities Building; 530-752-6185; https://are.ucdavis.edu/graduate/

The program is both an end in itself and a preparation for a Ph.D. degree in Applied Economics. The program includes courses emphasizing applications of economic theory and quantitative methods, along with elective field courses and a thesis option. The M.S. program prepares students for jobs in academic industry and government.

Agricultural & Resource Economics | ARE M.S./M.B.A.

(College of Agricultural & Environmental Sciences)

Rachael E. Goodhue, Ph.D., Chair of the Department

Department Office. 1176 Social Sciences & Humanities Building; 530-752-6185; https://are.ucdavis.edu/graduate/

Faculty. https://are.ucdavis.edu/people/faculty/

Graduate Student Information. 1171 Social Sciences & Humanities Building; 530-752-6185; https://are.ucdavis.edu/graduate/

The program combines a course of study similar to the regular M.S. program with a complementary regime of M.B.A. courses similar to the regular M.B.A. program but with some savings in requirements and some synergy. This dual-degree program prepares students for a range of employment opportunities in business-oriented industries.

Agricultural & Resource Economics | ARE Ph.D.

(College of Agricultural & Environmental Sciences)

Rachael E. Goodhue, Ph.D., Chair of the Department

Department Office. 1176 Social Sciences & Humanities Building; 530-752-6185; https://are.ucdavis.edu/graduate/

Faculty. https://are.ucdavis.edu/people/faculty/

Graduate Student Information. 1171 Social Sciences & Humanities Building; 530-752-6185; https://are.ucdavis.edu/graduate/

The Ph.D. program provides intensive training in modern economic theory, econometrics, and mathematical programming, with elective fields such as natural resource and environmental economics, development economics, agricultural economics, and econometrics. Complementary fields in other areas of economics and management are also available. It is typically a four or five year course of study that prepares graduates for jobs in academia, government, near-government organizations, and the private sector.
Agricultural Pest Management Minor; Entomology & Nematology

Agricultural Pest Management Minor; Entomology & Nematology

(College of Agricultural & Environmental Sciences)
Formerly the departments of Entomology & Nematology
Steve Nadler, Ph.D., Chairperson of the Department
Joanna Chiu, Ph.D., Vice Chairperson of the Department

Department Office. 367 Briggs Hall; 530-752-0492; http://entomology.ucdavis.edu

Faculty. http://entomology.ucdavis.edu/Faculty/

The Department of Entomology has five minor programs open to students in other disciplines who are interested in rounding out their academic study with a concentration in the area of entomology.

Minor Adviser. S. Lawler, S. Nadler

Agricultural Pest Management

Units: 20-21

- ENT 100 General Entomology 4
- ENT 100L General Entomology Laboratory 2
- PLS 105 Concepts in Pest Management 3

Choose at least three: 11-12
- NEM 100 General Plant Nematology 4
- PLS 176 Introduction to Weed Science 4
- PLP 120 Introduction to Plant Pathology 4

Of the three, one can be ENT 123 or PLB 123 or PLP 123: 3
- ENT 123 Plant-Virus-Vector Interaction 3
- PLB 123 Plant-Virus-Vector Interaction 3
- PLP 123 Plant-Virus-Vector Interaction 3

Total: 20-21

Agricultural Systems & Environment Minor; Plant Sciences

Agricultural Systems & Environment Minor; Plant Sciences

(College of Agricultural & Environmental Sciences)

Advising is located in 1220 Plant & Environmental Sciences; 530-752-1715; http://www.plantsciences.ucdavis.edu/plantsciences/undergrad_students/minors.htm

Minor Advisor. T. Gradziel (Plant Sciences)

**American Studies**

**American Studies | AMS Information**

*(College of Letters & Science)*

Charlotte Biltekoff, Ph.D, Chair of the Department

**Department Office.** 1200 Hart Hall; 530-752-6429; [http://ams.ucdavis.edu](http://ams.ucdavis.edu)

**Faculty.** [http://ams.ucdavis.edu/faculty](http://ams.ucdavis.edu/faculty)

**American Studies | AMS A.B.**

*(College of Letters & Science)*

Charlotte Biltekoff, Ph.D., Chair of the Department

**Department Office.** 1200 Hart Hall; 530-752-6429; [http://ams.ucdavis.edu](http://ams.ucdavis.edu)

**Faculty.** [http://ams.ucdavis.edu/faculty](http://ams.ucdavis.edu)

**The Department**

American Studies explores the cultures of the United States, as well as their transnational exchanges and impact. The discipline’s practitioners seek to understand the historical origins of particular cultures and practices held by individuals and groups within the United States and how those values and beliefs shape social and political realities within and beyond U.S. borders. The approach that American Studies takes is interdisciplinary, meaning that in
American Studies we answer these questions using tools developed by numerous disciplines including history, sociology, anthropology, literary criticism, folklore, media and science and technology studies.

American Studies takes as its subject American cultures and provides an excellent, broad education in the liberal arts. Our aim is to make each student a culture critic, a person capable of bringing a thoughtful and humane approach to bear upon our understanding of the varieties of American experiences. Making connections is the way we like to characterize our work in American Studies. American Studies majors are good critical thinkers, develop excellent writing skills, and most importantly “learn how to learn,” that is, you learn to figure out what intellectual tools and specialized knowledge you will need to perform a task or solve a problem. These intellectual and communication skills will prepare majors for a broad array of careers.

**The Major.** American Studies majors create an emphasis devoted to the close study of major issues crucial to the practice of American Studies. Advanced work in at least two other departments or programs allows each student to study areas tailored to his or her own individual education goals. Sample emphases include: Culture and Consumption, Youth Education, Social Identities, Nature, Culture and Environment, Marketing, Advertising and Business, and Food and Health, for example. Students have the option of writing a senior thesis within this emphasis.

**Career Alternatives.** As an interdisciplinary department, American Studies provides a good liberal arts and sciences undergraduate education. American Studies maximizes a student’s contact with a variety of subject matter and approaches. Graduates have moved into a broad range of career settings, including journalism, law, teaching, marketing, non-profit and community organizations, government, social work, environmental planning, library science, museum curatorship, and business. Students discover new career possibilities through their internships in American institutions.

**Faculty Advisor.** R. Cartwright

**Major Advisor:** Rodrigo Bonilla; ams-advising@ucdavis.edu or 530-752-6429

Depth Subject Matter  

AMS 100  Methods in American Studies  4
AMS 160  Undergraduate Seminar in American Studies  4

American Studies Elective  
Three additional upper-division American Studies courses.  12

Emphasis  
In consultation with the American Studies Undergraduate Advisor, the student designs a program of 20 units (typically five courses) of upper division course work around a unifying theme, period, or subject matter in American cultures. The courses should come from two or more departments or programs and can include up to 8 units of American Studies courses. Only 4 units of course 192 (internship) can be included in the emphasis. The student may choose the senior thesis option (190A-190B) for 8 units of the emphasis and take the remaining 12 units outside the department.

Recommended  
Completion of the college requirement in English composition before enrollment in American Studies 190A.

Total: 64-65

Animal Behavior (Graduate Group)  
ANB M.S.

Gail L. Patricelli, Ph.D., Chairperson of the Group

Group Office. 227D Life Sciences; 530-752-2981; Fax 530-752-8822; animalbehavior@biosci.ucdavis.edu; http://anb.ucdavis.edu/

Faculty. The Group includes faculty from 12 departments in five schools and college.
The Ph.D. program in Animal Behavior is an interdepartmental program focusing on the mechanisms underlying behavior, the evolution of behavior, and the applications of behavior to current problems in conservation biology and animal welfare. The program trains students for teaching and research in a variety of areas, including anthropology, animal science, ecology, entomology, neurobiology, psychology, physiology, veterinary science, wildlife biology, and zoology. Resources available to students, in addition to various departmental facilities, include those of the California National Primate Research Center, Bodega Marine Laboratory, and the UC Natural Reserve System.

The Master of Science degree is offered only en route to the Ph.D.

There is an application deadline of Dec 1 for fall quarter.

**Strongly recommended; a course on teaching science:**

| PSC 390A The Teaching of Psychology | 6        |

72
Electives
Students also take two additional courses (of at least 3 units each, at the 100 or 200 level) in the student's area of specialization, chosen in consultation with and approved by the Course Guidance Committee.

Strongly recommended:
At least one additional course in statistics or modeling. In addition to the above listed courses, modeling courses include:

- PBG 231 Mathematical Methods in Population Biology 3
- PSC 120 Agent-Based Modeling 4

Animal Behavior (Graduate Group) | ANB Ph.D.

Gail L. Patricelli, Ph.D., Chairperson of the Group

Group Office. 227D Life Sciences; 530-752-2981; Fax 530-752-8822; animalbehavior@biosci.ucdavis.edu; http://anb.ucdavis.edu/

Faculty. The Group includes faculty from 12 departments in five schools and college.

Graduate Study. The Ph.D. program in Animal Behavior is an interdepartmental program focusing on the mechanisms underlying behavior, the evolution of behavior, and the applications of behavior to current problems in conservation biology and animal welfare. The program trains students for teaching and research in a variety of areas, including anthropology, animal science, ecology, entomology, neurobiology, psychology, physiology, veterinary science, wildlife biology, and zoology. Resources available to students, in addition to various departmental facilities, include those of the California National Primate Research Center, Bodega Marine Laboratory, and the UC Natural Reserve System.

The Master of Science degree is offered only en route to the Ph.D.

There is an application deadline of Dec 1 for fall quarter.

Preparation

Ecology, e.g.:
- EVE 101 Introduction to Ecology 4
- ESP 100 General Ecology 4

Genetics, e.g.:
- BIS 101 Genes and Gene Expression 4

Statistics, e.g.:
- STA 100 Applied Statistics for Biological Sciences 4
- PSC 103A Statistical Analysis of Psychological Data 5

Evolution, e.g.:
- EVE 100 Introduction to Evolution 4

Animal Behavior, e.g.:
- NPB 102 Animal Behavior 3

Physiology, e.g.:
- NPB 101 Systemic Physiology 5

Core Requirements

Students take two “core” courses on the fundamentals of animal behavior, at least one course in advanced statistics, a methodology and grant writing course, and graduate seminars (3 units).

Required courses:

Fundamentals of Animal Behavior
- ANB 218A Fundamentals of Animal Behavior 5
ANB 218B  Fundamentals of Animal Behavior  5
Methodology & Grant Writing
ANB 201  Scientific Approaches to Animal Behavior Research  3
Advanced Statistics
PSC 204A  Statistical Analysis of Psychological Experiments  5
PSC 204B  Causal Modeling of Correlational Data  5
PSC 204D  Advanced Statistical Inference from Psychological Experiments  5
STA 106  Applied Statistical Methods: Analysis of Variance  4
STA 108  Applied Statistical Methods: Regression Analysis  4
STA 138  Analysis of Categorical Data  4
STA 205  Statistical Methods for Research with SAS  4
PLS 205  Experimental Design and Analysis  5
PLS 206  Applied Multivariate Modeling in Agricultural and Environmental Sciences  4

Graduate Seminars
ANB 290  Seminar in Animal Behavior  1-3

Strongly recommended; a course on teaching science:
PSC 390A  The Teaching of Psychology  6
PSC 390B  The Teaching of Psychology  4

Electives:
Students also take two additional courses (of at least 3 units each, at the 100 or 200 level) in the student's area of specialization, chosen in consultation with and approved by the Course Guidance Committee.

Strongly recommended:
At least one additional course in statistics or modeling. In addition to the above listed courses, modeling courses include:
PBG 231  Mathematical Methods in Population Biology  3
PSC 120  Agent-Based Modeling  4

Animal Biology
Animal Biology | ABI B.S
(College of Agricultural & Environmental Sciences)

Department.  Entomology & Nematology

The Major.  https://abi.ucdavis.edu/

Faculty.  http://entomology.ucdavis.edu/Faculty/

The Major Program
The Animal Biology major offers students training in the biological and natural sciences as they apply to animals. The major covers basic biological sciences foundational to understanding animal evolution, systematics, ecology, physiology and molecular biology. Students in the Animal Biology major are encouraged to think beyond particular groups of animals in which they are interested and to consider science as a process and a way of learning new things about them, and of advancing society. The program emphasizes biological principles used in research and in solving societal conflicts with animals in agriculture, urban areas, or natural environments.

The Program.  The major consists of core courses in the sciences that build an understanding of animal biology from the molecular to the ecological and evolutionary levels of organization. After completing these core courses, students chose an interdisciplinary practicum project from general animal biology, predicated on their ultimate career goals. They plan this emphasis of study in a required discussion-seminar course and in consultation with a mentor. The program includes a senior thesis, which each student employs the process and principles of science to propose and carry out the practicum project they choose, integrating the disciplines of the major. The Animal Biology major emphasizes research in biological principles as opposed to animal care and husbandry.

**Practicum Research & Career Alternatives.** The Animal Biology program and professional research interests of each student guides him or her in Practicum and career choices. On- and off-campus Practicum research opportunities occur in research laboratories, at field situations, in zoos and public aquariums, with governmental agencies, national and state parks with private industry, and in international programs. A degree in Animal Biology prepares students for careers in research, teaching, academia, governmental regulation, health, or agriculture where these emphasize integrative biology of animals. Careers in veterinary medicine, animal husbandry and animal management remain open to Animal Biology majors as well, however, other preparation may be required. Students in the major focus on gaining research experience, and become well prepared to continue their training at the graduate or professional level in a variety of biological disciplines.

**Master Advisor.** R. Kimsey

**Major Advisor.** E. Galvan Hack

**Advising Center** for the major, including peer advising, is located in 150 and Academic Advisor located in 160 Hutchison Hall; 530-754-7277; abi-advising@ucdavis.edu.

Faculty. http://animalbiology.ucdavis.edu/people/
Graduate Study. The Graduate Group in Animal Biology offers programs of study and research leading to the M.S. and the Ph.D. degrees. The Animal Biology Graduate Group focuses on integrated animal biology. Each student individually tailors his/her program of study to meet individual needs. The Animal Biology Graduate Group is unique in encouraging a multidisciplinary or interdisciplinary approach involving physiology, nutrition, genetics, ecology and/or behavior within the context of organismal animal biology.

Preparation. Applicants should have undergraduate preparation in a field appropriate to the course of study selected, including upper division coursework in most of the following subjects: biochemistry, genetics, nutrition, physiology, and integrative animal biology such as animal management.

Graduate Advisors. R.C. Hovey, J. Larsen, E.A. Maga, J.D. Murray, P.J. Ross, S. Meyers, A. Todgham

The Major Program

The Animal Science major is devoted to the sciences central to understanding biological function of domestic and captive animals, their care, management, and utilization by people for food, fiber, companionship, and recreation. Advances in science and technology, and an ever-growing human population, have increased the complexity of issues surrounding the care and management of animals. Specializations within the major allow students to develop a scientific appreciation of animals and their relationship to their environment. Graduates in Animal Science are able to advance the science and technology of animal care and management in an objective and effective manner for the betterment of animals and society.

The Program. The curriculum provides depth in the biological and physiological sciences and allows students to specialize within the broad field of applied animal science. Study begins with introductory courses in animal science, biology, chemistry, mathematics, and statistics. Students undertake advanced courses in animal behavior, biochemistry, genetics, nutrition, and physiology and the integration of these sciences to animal function, growth, reproduction, and lactation. Students complete the curriculum by choosing a specialization in either an animal science discipline (animal behavior, biochemistry, genetics, nutrition, or physiology) or in the sciences particular to a class of animals (aquatic, avian, companion and captive, equine, laboratory, livestock and dairy, or poultry).

Career Alternatives. A wide range of career opportunities are available to graduates. The primary goal of the major is to prepare students for graduate study leading to the M.S. and Ph.D. degrees; for continued study in a
professional school such as veterinary medicine, human medicine, or dentistry; for careers in research, agricultural production, farm and ranch management, or positions in business, sales, financial services, health care, agricultural extension, consulting services, teaching, journalism, or laboratory technology.

**Graduate Study.** The Animal Biology Graduate Group offers a program of study and research leading to the M.S. or Ph.D., degree in Animal Biology. See Animal Biology (Graduate Group); see also Graduate Studies.

Area of Specialization

Choose one area of specialization below:

The program of study must be approved in advance by your faculty advisor. Courses must be taken for a letter grade.

Animal Science with a Disciplinary Focus

Select 20 upper division units, with approval from your faculty advisor, to form a coherent series of courses in one of the following disciplines: animal behavior, biochemistry, genetics, nutrition, or physiology

Aquatic Animals

ANS 018 Introductory Aquaculture
ANS 131 Reproduction and Early Development in Aquatic Animals
NUT 124 Nutrition and Feeding of Finfishes

Choose one:
ANS 118 Fish Production
ANS 119 Invertebrate Aquaculture

Select additional upper division units from any Animal Genetics or Animal Science course, or other courses approved by your faculty advisor. Students in this specialization must take ANS 136 to meet their Laboratory Depth Subject Matter requirement. Students in this specialization may elect to substitute any of BIS 104, EVE 112, or WFC 120 and 121 for the 12-unit requirement under Integrative Animal Biology, with approval of your faculty advisor.

Avian Sciences

AVS 013 Birds, Humans and the Environment
AVS 100 Avian Biology
AVS 150 Nutrition of Birds
NUT 123 Comparative Animal Nutrition
NUT 123L Comparative Animal Nutrition Laboratory

Select additional upper division units from any Animal Genetics, Animal Science, or Avian Sciences courses or other courses approved by your advisor. Students in this specialization must substitute AVS 103, 121, and NPB 117 for the ANS 124 and NPB 121 and 121L requirement under Integrative Animal Biology.

Companion & Captive Animals

ANS 042 Introductory Companion Animal Biology
ANS 142 Companion Animal Care and Management
ANS 170 Ethics of Animal Use

Choose NUT 115 or 123 or 123 & 123L:
NUT 115 Animal Nutrition
NUT 122 Ruminant Nutrition and Digestive Physiology
NUT 123 Comparative Animal Nutrition
NUT 123L Comparative Animal Nutrition Laboratory

If NUT 123 is selected then NUT 123L must also be taken.

Select additional upper division units from any ANG, ANS or AVS course, or from NUT 115, 122, 123, 123L or other courses.
### Equine Science
- **ANS 015** Introductory Horse Husbandry 3
- **ANS 115** Advanced Horse Production 4
- **ANS 141** Equine Enterprise Management 4

**Choose one:**
- **ANS 125** Equine Exercise Physiology 3
- **ANS 126** Equine Nutrition 3
- **ANS 127** Advanced Equine Reproduction 3

Select additional upper division units from any ANG or ANS course, or from NUT 115, 122, 123, 123L or other courses approved by your faculty advisor. 6

### Laboratory Animals
- **ANS 042** Introductory Companion Animal Biology 4
- **ANS 103** Animal Welfare 4
- **ANS 140** Management of Laboratory Animals 4
- **NUT 123** Comparative Animal Nutrition 3
- **NUT 123L** Comparative Animal Nutrition Laboratory 1

**Choose one:**
- **ANS 104** Principles and Applications of Domestic Animal Behavior 4
- **NPB 102** Animal Behavior 3

**Choose one:**
- **APC 100** Comparative Vertebrate Organology 4
- **NBP 123** Comparative Vertebrate Organology 4

### Livestock & Dairy
- **Choose two:**
  - **ANS 143** Pig and Poultry Care and Management 4
  - **ANS 144** Beef Cattle and Sheep Production 4
  - **ANS 146** Dairy Cattle Production 5

**Choose one:**
- **ANS 145** Meat Processing and Marketing 4
- **ANS 147** Dairy Processing and Marketing 3

**NUT 115** Animal Nutrition 4

Select additional upper division units from any ANG, ANS or AVS course, or from NUT 122, 123, 123L or other courses approved by your faculty advisor. 7-9

### Poultry
- **AVS 011** Introduction to Poultry Science 3
- **AVS 100** Avian Biology 3
- **AVS 150** Nutrition of Birds 1
- **ANS 143** Pig and Poultry Care and Management 4
- **AVS 149** Egg Production Management 2
- **NUT 123** Comparative Animal Nutrition 3
- **NUT 123L** Comparative Animal Nutrition Laboratory 1

Select additional upper division units from any ANG, ANS, AVS, or other courses approved by your faculty advisor. Students in this specialization must substitute AVS 103, 121, and NPB 117 for the ANS 124 and NPB 121 and 121L requirement under Integrative Animal Biology. 3

**Total:** 112-123
Animal Science—Animal Biology

Units: 20

Choose ANS 015 or 042 or 041 & 041L or 021 & 041:

- ANS 015  Introductory Horse Husbandry  3
- ANS 042  Introductory Companion Animal Biology  4
- ANS 041  Domestic Animal Production  2
- ANS 041L  Domestic Animal Production Laboratory  2
- ANS 021  Livestock and Dairy Cattle Judging  2
- ANS 041  Domestic Animal Production  2

Choose one:

- ANS 103  Animal Welfare  4
- ANS 104  Principles and Applications of Domestic Animal Behavior  4

Choose ANS 123 & 124 or 121 & 121L:

- ANS 123  Animal Growth and Development  4
- ANS 124  Lactation  4
- NPB 121  Physiology of Reproduction  4
- NPB 121L  Physiology of Reproduction Laboratory  1

Choose additional units to complete the 20-unit total:

Upper division Animal Science (ANS) courses.
Animal Genetics (ANG) courses.

- NPB 121  Physiology of Reproduction  4
- NPB 121L  Physiology of Reproduction Laboratory  1
- NUT 115  Animal Nutrition  4
- NUT 122  Ruminant Nutrition and Digestive Physiology  4
- NUT 123  Comparative Animal Nutrition  3
- NUT 123L  Comparative Animal Nutrition Laboratory  1

Variable unit courses (092, 099, 192, 197T, 198, 199) are not allowed for the completion of this requirement.

Animal Science—Animal Genetics

Units: 20

Choose ANS 015 & 042 or 041 & 041L or 021 & 041:

- ANS 015  Introductory Horse Husbandry  3
- ANS 042  Introductory Companion Animal Biology  4
- ANS 041  Domestic Animal Production  2
- ANS 041L  Domestic Animal Production Laboratory  2
- ANS 021  Livestock and Dairy Cattle Judging  2
- ANS 041  Domestic Animal Production  2

Animal Genetics

- ANG 107  Genetics and Animal Breeding  5
- ANG 111  Molecular Biology Laboratory Techniques  4

Additional upper division courses.

Choose additional units to complete the 20-unit total:

Upper division Animal Science (ANS) courses.
Animal Genetics (ANG) courses.

- AVS 103  Avian Development and Genomics  3
- NPB 121  Physiology of Reproduction  4
Variable unit courses (092, 099, 192, 197T, 198, 199) are not allowed for the completion of this requirement.

**Animal Science—Aquaculture**

Units: 20

<table>

Animal Science & Management

Animal Science & Management | Animal Science & Management B.S.

(College of Agricultural & Environmental Sciences)

https://animalscience.ucdavis.edu/academics/undergrad/advising

Master Advisor. J.G. Fadel

Advising Center for the major (including peer advising) is located in 1202 Meyer Hall; 530-754-7915. Each student will be assigned a faculty advisor through this office upon entering the major.

The Major Program

The Animal Science & Management major combines a thorough education in the basic biology of domestic animal species with a strong background in agricultural economics. Graduates of this interdisciplinary major will be well positioned to adjust to our rapidly changing world and job market.

The Program. The interdisciplinary program in Animal Science and Management combines a fundamental background in the natural sciences (chemistry, biology, physiology, nutrition, genetics, mathematics, and behavior), with an understanding of economics and humanities. After completing preparatory courses, students focus on both the animal species that interest them (horses, cattle, sheep, companion animals, goats, fish, crustaceans or mollusks, among others) and principles of managerial economics (marketing, finance, business organization, or systems analysis). Students preparing for medical or veterinary school can meet professional entrance requirements with those of this major if they plan ahead.

Career Alternatives. Job opportunities for successful graduates are plentiful and include positions with banking and financial institutions, agribusiness, Peace Corps, and farms of all scales. Most Animal Science and Management graduates are well prepared for professional study (medical, law, veterinary, and graduate business schools) as well as graduate research programs leading to the M.S. or Ph.D. degrees. Advanced degrees open doors to work as extension specialists, farm advisors, and teachers, and prepare students for international service.

Written & Oral Expression

Other courses in quantitative skills with prior approval of the Master Advisor.
## Depth Subject Matter

**Units:** 29

**Biological Science**
- BIS 101 Genes and Gene Expression (4)

**Nutrition**
- NUT 115 Animal Nutrition (4)

**Choose one:**
- NPB 101 Systemic Physiology (5)
- ANS 100 Animal Physiology (5)

**Business Management**

**Agricultural & Resource Economics**
- ARE 100A Intermediate Microeconomics: Theory of Production and Consumption (4)

**Choose one:**
- ARE 113 Fundamentals of Marketing Management (4)
- ARE 130 Agricultural Markets (4)
- ARE 136 Managerial Marketing (4)
- ARE 138 International Commodity & Resource Markets (4)

**Choose one:**
- ARE 120 Agricultural Policy (4)
- ARE 132 Cooperative Business Enterprises (4)
- ARE 140 Farm Management (4)
- ARE 145 Farm and Rural Resources Appraisal (4)
- ARE 157 Analysis for Operations and Production Management (4)

**Choose one:**
- ARE 128 Agricultural Applications of Linear Programming (4)
- ARE 155 Operations Research and Management Science (4)

## Area of Specializations

**Units:** 14-16

Choose one area of specialization below:

**Aquatic Animals**
- ANS 018 Introductory Aquaculture (4)

**Choose one:**
- ANS 118 Fish Production (4)
- ANS 119 Invertebrate Aquaculture (4)
- ANS 131 Reproduction and Early Development in Aquatic Animals (4)
- ANS 148 Enterprise Analysis in Animal Industries (4)

**Companion Animals**
- ANS 042 Introductory Companion Animal Biology (4)
- ANS 140 Management of Laboratory Animals (4)
- ANS 142 Companion Animal Care and Management (4)
- ANS 148 Enterprise Analysis in Animal Industries (4)

**Dairy**
- ANS 041 Domestic Animal Production (2)
- ANS 041L Domestic Animal Production Laboratory (2)
- ANS 146 Dairy Cattle Production (5)
- ANS 147 Dairy Processing and Marketing (3)
- ANS 148 Enterprise Analysis in Animal Industries (4)

**Equine**
- ANS 015 Introductory Horse Husbandry (3)
- ANS 115 Advanced Horse Production (4)
- ANS 141 Equine Enterprise Management (4)
- ANS 148 Enterprise Analysis in Animal Industries (4)

### Individualized

Students may, with prior approval of their advisor and the Master Advisor, design their own individualized specialization within the major. The specialization will consist of 4 to 6 courses with one of the courses being ANS148. The other courses will include an introduction, care and management, and processing and/or marketing aspects of the animal of interest.

**Anthropology**

**Anthropology | ANT Information**

(College of Letters & Science)

Lynne A. Isbell, Ph.D., Chairperson of the Department
Anthropology | ANT A.B.

(College of Letters & Science)
Lynne A. Isbell, Ph.D., Chairperson of the Department

The A.B. Major

Anthropology is the systematic study of humans. The student of anthropology learns about human biology, ecology, and social life—past and present—and gains a broad understanding of humans and societies. It is a diverse field, and the courses, faculty, and degree programs at UC Davis are subdivided into two wings—Evolutionary and Sociocultural.

Evolutionary A.B. Evolutionary anthropologists are united by their common application of science and evolutionary theory to understand the behavior, ecology, history, and evolution of humans & non-human primates, as individuals and as societies. These topics may be approached through archaeology, human behavioral ecology, paleoanthropology, primatology, genetics, and conservation biology. Archaeology is the study of history or prehistory by analysis of a people's artifacts, or their material culture, with the goal of reconstructing culture history and human behavior. Human behavioral ecology is the study of how variation in ecology and social organization can help us understand variation in human behavior. Paleoanthropology is the study of human evolution through the fossil and archaeological records, drawing on relevant studies in biological anthropology, Paleolithic archaeology, genetics, and geology. Primatology is the study of behavior, ecology, and morphology of primates to address questions about the evolution and function of behavioral and morphological patterns in nonhuman primates and to test models of the origins of human morphology and behavior. Genetic anthropology uses DNA to address anthropological questions about population histories, migrations, mixing, and adaptations to local contexts. Conservation biology explores the causes of loss of biological diversity—in this department, it focuses on threatened non-human primates and the conservation of natural resources by a rapidly growing population. A Bachelor of Arts degree provides broad training that includes all subfields of Anthropology.

Sociocultural A.B. Sociocultural anthropologists study the varied ways in which people around the world organize their lives and interpret the circumstances in which they operate. Their main method is extended field research, which combines attention to global issues with the close study of human relations and culture. Among the themes addressed in the department's undergraduate courses are globalization and transnationalism; human ecology and environmental change; cultures of healing, health & medicine, the anthropology of law & global legal processes, the study of resistance, rebellion, & social control, the global spread of media & technology; migration, multiculturalism and urban life; colonialism and neocolonialism development and post-development; race, class & gender; politics & the political; cultures of everyday life; language use & discourse; and self, identity and family. Sociocultural anthropology thus offers a rich set of resources for understanding and engaging pressing issues in a globalizing world characterized by new forms of international culture and community as well as by increasing material inequality and political volatility.

The Program. The Bachelor of Arts program is divided into two emphasis areas, Evolutionary and Sociocultural, which parallel the two wings described above. Students interested in the study of recent and contemporary human societies should follow the Sociocultural Track. To obtain an A.B. degree in sociocultural anthropology, each student is required to complete courses that provide (1) foundational skills, (2) language & cultural skills, (3) comprehensive skills, and (4) specialized skills. Students interested in the study of archaeology; primate studies; or human biology, ecology or origins should follow the Evolutionary Track. The A.B. degree offered by the Evolutionary Track provides general training in anthropology from an evolutionary perspective. The Evolutionary Track also offers a B.S. degree that requires lower division coursework in math and science and upper division coursework in biological anthropology and closely related disciplines. Students planning on pursuing jobs in medical and other health-related fields after graduation may be especially interested in the B.S. degree.

Students in both tracks are encouraged to gain practical experience through courses taken while studying abroad (under the administration of the UC Davis Study Abroad) and through undergraduate research or internships.
performed for credit (under ANT 192, 198, or 199 units provided by the advising office). Students showing exceptional ability are welcome to seek permission from instructors to participate in graduate seminars offered by the department.

**Career Opportunities.** A Bachelor of Arts degree in Anthropology is suited for students seeking a solid liberal arts education. With its broad goal to facilitate understanding across lines of cultural difference, sociocultural anthropology prepares students for lives that are influenced by increasingly pervasive cultural exchange, as well as cultural conflict, around the world. The program serves as excellent preparation for careers in which inter-cultural skills are increasingly needed, including social & environmental activism, business, diplomacy & social administration, journalism, law, education & international relations. Students who focus on evolutionary processes will be well prepared to enter fields such as medical or health anthropology, museum studies, cultural resource management, and wildlife conservation. A degree in anthropology with appropriate courses in education is good preparation for high school teaching in social, biological, and physical sciences. It also provides the foundation for advanced study leading to careers in college-level teaching and research.

**Major Advisor.** Consult Department advising office in 1282 Social Sciences & Humanities Building.

**Honors Program.** Candidates for high or highest honors in Anthropology must write a senior thesis under the direction of a faculty member. The thesis project will have a minimum duration of two quarters. Honors candidates must take at least six units of Anthropology (ANT 194H). Only students who, at the end of their junior year (135 units), have attained a cumulative grade point average of 3.500 in Anthropology courses will be eligible for the honors program. The quality of the thesis work will be the primary determinant for designating high or highest honors at graduation.

**Teaching Credential Subject Representative.** See the Teaching Credential/M.A. Program.

**Graduate Study.** The Department offers a program of study leading to the M.A. and Ph.D. degrees in Anthropology. Further information regarding graduate study may be obtained at the Department website and at Graduate Studies.

### A.B. Anthropology - Evolutionary Emphasis

**Units: 67-76**

**Preparatory Subject Matter**

**Units: 25-28**

**A.B. Anthropology - Sociocultural Emphasis**  
Units: 57-67

**Preparatory Subject Matter**  
Units: 13-23

**Choose two:**

- ANT 001 Human Evolutionary Biology  
- ANT 003 Introduction to Archaeology  
- ANT 004 Introduction to Anthropological Linguistics  

**Choose one of the following two options:**

1. Complete the equivalent to five quarters of course work in foreign language or provide proof of proficiency.  
2. **Choose two lower division sociocultural courses:**
   - ANT 020 Comparative Cultures  
   - ANT 030 Sexualities  
   - ANT 032 Drugs, Science and Culture  
   - ANT 034 Cultures of Consumerism  
   - ANT 036 Star Trek as Social Theory  

**Depth Subject Matter**  
Units: 44

**Choose two upper division area-focus sociocultural track courses:**

- ANT 140A Cultures and Societies of West and Central Africa  
- ANT 140B Cultures and Societies of East and South Africa  
- ANT 141C People of the Arctic: Contemporary and Historic Cultures of the Circumpolar Region  
- ANT 142 Peoples of the Middle East  
- ANT 143A Ethnology of Southeast Asia  
- ANT 144 Contemporary Societies and Cultures of Latin America  
- ANT 145 Performance, Embodiment, and Space in South Asia  
- ANT 146N Topics in the Anthropology of Europe  
- ANT 147 Modern South Asia Cinema  
- ANT 148A Culture and Political Economy in Contemporary China  

**Choose one of the following two options; see list below identifying upper division sociocultural courses; see list above identifying evolutionary track courses:**

1. Eight additional upper division anthropology courses; two courses may be in the evolutionary track; and up to six units can be ANT 192, 194H, 198, or 199 units.  
2. Eight additional upper division courses that may combine six sociocultural track courses and either eight units of Study Abroad credit or two related courses in a single academic discipline; including but not limited to: AAS, AMS, ART, AHI, AAS, CHI, CMN, CRD, DES, ECN, EAS, HIS, LIN, MSA, NAS, NAC, PHI, POL, PSC, RST, STS, SOC, TXC, WMS.

**Sociocultural track upper division courses:**

- Note: Sociocultural track courses at the upper division level are those with numbers from 100 to 148A, with the exception of 101, 103, and 128A. Area-focus sociocultural track courses are those that refer in their titles to one or more peoples or regions of the world.

- ANT 100 Theory in Social-Cultural Anthropology  
- ANT 104N Cultural Politics of the Environment

Anthropology | ANT B.S.
(College of Letters & Science)

Lynne A. Isbell, Ph.D., Chairperson of the Department

Department Office. 328 Young Hall; 530-752-0745; http://anthropology.ucdavis.edu

The B.S. Major

Anthropology is the systematic study of humans. The student of anthropology learns about human biology, ecology, and social life—past & present—and gains a broad understanding of humans and societies. The Bachelor of Science degree in Anthropology is interdisciplinary in nature since it requires lower division coursework in math & science and upper division coursework in biological anthropology & closely related disciplines.

The Program. Evolutionary anthropologists are united by their common application of science and evolutionary theory to understand the behavior, ecology, history, and evolution of humans & non-human primates, as individuals and as societies. These topics may be approached through archaeology, human behavioral ecology, paleoanthropology, primatology, genetics, and conservation biology. Archaeology is the study of history or prehistory by analysis of a people's artifacts, or their material culture, with the goal of reconstructing culture history and human behavior. Human behavioral ecology is the study of how variation in ecology and social organization can help us understand variation in human behavior. Paleoanthropology is the study of human evolution through the fossil and archaeological records, drawing on relevant studies in biological anthropology, Paleolithic archaeology, genetics, and geology. Primatology is the study of behavior, ecology, and morphology of primates to address questions about the evolution and function of behavioral & morphological patterns in nonhuman primates and to test models of the origins of human morphology and behavior. Genetic anthropology uses DNA to address anthropological questions about population histories, migrations, mixing, and adaptations to local contexts. Conservation biology explores the causes of loss of biological diversity—in this department, it focuses on threatened non-human primates and the conservation of natural resources by a rapidly growing population. A Bachelor of Science degree, in addition to core evolutionary anthropology courses, includes the introductory sequences of biology, chemistry, organic chemistry, and calculus, as well as genetics and ecology.

Students are encouraged to gain practical experience through undergraduate research or internships performed for credit (under ANT 192, 198, or 199 units provided by the advising office). Students showing exceptional ability are welcome to seek permission from instructors to participate in graduate seminars offered by the department.

Career Opportunities. A Bachelor of Science degree in Anthropology combines a solid liberal arts education with training in the life and physical sciences. Through its interdisciplinary nature, a Bachelor of Science degree in Anthropology provides the educational background for careers in the biological sciences and a variety of health professions including pre-medical, pre-dental, and pre-veterinary, fields which increasingly need professionals with training in the social and behavioral sciences. In addition, students will be well prepared to enter fields such as medical or health anthropology, forensic sciences, museum studies, cultural resource management, and wildlife conservation. A Bachelor of Science degree in Anthropology with appropriate courses in education is good preparation for high school teaching in social, biological, and physical sciences. It also provides the foundation for advanced study leading to careers in college-level teaching and research.

Major Advisor. Consult Department advising office in 1282 Social Sciences & Humanities Building.
**Honors Program.** Candidates for high or highest honors in Anthropology must write a senior thesis under the direction of a faculty member. The thesis project will have a minimum duration of two quarters. Honors candidates must take at least six units of Anthropology (ANT) 194H. Only students who, at the end of their junior year (135 units), have attained a cumulative grade point average of 3.500 in Anthropology courses will be eligible for the honors program. The quality of the thesis work will be the primary determinant for designating high or highest honors at graduation.

**Teaching Credential Subject Representative.** See the Teaching Credential/M.A. Program.

**Graduate Study**

The Department offers a program of study leading to the M.A. and Ph.D. degrees in Anthropology. Further information regarding graduate study may be obtained at the Department office and at Graduate Studies.

**Applied Biological Systems Technology**

**Applied Biological Systems Technology | Applied Biological Systems Technology**

(College of Agricultural & Environmental Sciences)

**Applied Chemistry**

**Applied Chemistry | Applied Chemistry B.S.**

(College of Letters & Science)

**Department Administration.** For a complete list of department administration, see [https://chemistry.ucdavis.edu/people](https://chemistry.ucdavis.edu/people).

**Department Office.** 108 Chemistry Building; 530-752-8900; Fax 530-752-8995; [https://chemistry.ucdavis.edu/](https://chemistry.ucdavis.edu/)

Faculty. [https://chemistry.ucdavis.edu/people](https://chemistry.ucdavis.edu/people)

**The Major Programs**

Chemistry studies the composition of matter, its structure, and the means by which it is converted from one form to another.

**The Program.** The Department of Chemistry offers two Bachelor of Science degree emphases under the heading of Applied Chemistry: Environmental Chemistry and Forensic Chemistry. The B.S. emphasis in Applied Chemistry fall outside of the classical chemistry degree and instead draw on significant course material from areas relevant to their particular fields. The Environmental Chemistry program provides students with tools to understand the processes governing chemical transformations in soil, air, and water, analyze for key substances in the environment, and make meaningful predictions about the fates of these chemicals. The Forensic Chemistry program involves the identification and quantitation of scientific evidence both in the natural environment and in urban settings, including substances sometimes available in only trace amounts.

**Career Alternatives.** Environmental chemistry graduates with the bachelor’s degree will be able to pursue advanced degrees in areas such as atmospheric chemistry, geochemistry, toxicology, and environmental science. They will also have access to a range of scientific careers including regulatory agencies, environmental consulting firms, and industries concerned with the environmental impacts and fates of their products. Graduates of the Forensic B.S. program will be able to pursue careers in private forensic labs as well as law enforcement and regulatory agencies at many levels, including police and sheriff’s departments, district attorney crime labs, and laboratories of federal agencies including the FBI, DEA, FDA, and many others.

**Major Advisor.** To contact a major advisor in the Department of Chemistry, see [https://chemistry.ucdavis.edu/undergraduate/academic-advising](https://chemistry.ucdavis.edu/undergraduate/academic-advising).

**Honors & Honors Program.** The student must take courses 194HA, 194HB, and 194HC.
Environmental Chemistry Emphasis  
Units: 95-116

Preparatory Subject Matter  
Chemistry; choose a series:  
- CHE 002A General Chemistry  
- CHE 002B General Chemistry  
- CHE 002C General Chemistry  
- CHE 002AH Honors General Chemistry  
- CHE 002BH Honors General Chemistry  
- CHE 002CH Honors General Chemistry  

Physics; choose a series:  
- PHY 007A General Physics  
- PHY 007B General Physics  
- PHY 007C General Physics  
- PHY 009A Classical Physics  
- PHY 009B Classical Physics  
- PHY 009C Classical Physics  

Mathematics; choose a series:  
- MAT 016A Short Calculus  
- MAT 016B Short Calculus  
- MAT 016C Short Calculus  
- MAT 017A Calculus for Biology and Medicine  
- MAT 017B Calculus for Biology and Medicine  
- MAT 017C Calculus for Biology and Medicine  
- MAT 021A Calculus  
- MAT 021B Calculus  
- MAT 021C Calculus  

Biological Science  
- BIS 002A Introduction to Biology: Essentials of Life on Earth  

Statistics; choose one:  
- STA 013 Elementary Statistics  
- STA 032 Gateway to Statistical Data Science  
- STA 100 Applied Statistics for Biological Sciences  

Depth Subject Matter  
Chemistry  
- CHE 100 Environmental Water Chemistry  
- CHE 105 Analytical and Physical Chemical Methods  
- CHE 115 Instrumental Analysis  
- CHE 124A Inorganic Chemistry: Fundamentals  
Choose a series:  
- CHE 107A Physical Chemistry for the Life Sciences  
- CHE 107B Physical Chemistry for the Life Sciences  
- CHE 110A Physical Chemistry: Introduction to Quantum Mechanics  
- CHE 110B Physical Chemistry: Properties of Atoms and Molecules  
- CHE 110C Physical Chemistry: Thermodynamics, Equilibria and Kinetics  

Choose 118 series or 128 series & 129A & 129B:  
- CHE 118A Organic Chemistry for Health and Life Sciences  
- CHE 118B Organic Chemistry for Health and Life Sciences  

Graduate Study. The Department of Chemistry offers programs of study and research leading to the M.S. and Ph.D. degrees in Chemistry. Detailed information regarding graduate study may be obtained by contacting the Graduate Advisor, Department of Chemistry. See also Graduate Studies.
CHE 118C  Organic Chemistry for Health and Life Sciences  4
CHE 128A  Organic Chemistry  3
CHE 128B  Organic Chemistry  3

At least three additional upper division units in Chemistry (CHE); CHE 199 or 194H strongly encouraged.
Applied Computing & Information Systems Minor; Plant Sciences

(Email: studentservices@math.ucdavis.edu; http://appliedmath.ucdavis.edu/)

Faculty. The Group includes approximately 90 faculty members, of whom about one-third are in the Department of Mathematics. Membership comprises chemists, biologists, physicists, geologists, statisticians, computer scientists, and engineers. Research interests include biology, atmospheric sciences, mechanics, solid and fluid dynamics, optimization and control, theoretical chemistry, computer and engineering sciences, mathematical physics, signal...
and image processing, harmonic analysis, numerical analysis and nonlinear partial differential equations. A complete list of faculty and their research areas are available at http://appliedmath.ucdavis.edu/people.

**Applied Mathematics (Graduate Group) | Applied Mathematics M.S.**

**Group Office.** 1130 Mathematical Sciences Bldg.; 530-752-8130; studentservices@math.ucdavis.edu; http://appliedmath.ucdavis.edu/

**Faculty.** The Group includes approximately 90 faculty members, of whom about one-third are in the Department of Mathematics. Membership comprises chemists, biologists, physicists, geologists, statisticians, computer scientists, and engineers. Research interests include biology, atmospheric sciences, mechanics, solid and fluid dynamics, optimization and control, theoretical chemistry, computer and engineering sciences, mathematical physics, signal and image processing, harmonic analysis, numerical analysis and nonlinear partial differential equations. A complete list of faculty and their research areas are available at http://appliedmath.ucdavis.edu/people.

**Graduate Study.** Students prepare for careers where mathematics is applied to problems in the physical and life sciences, engineering, and management. The degree requirements consist of rigorous training in applied mathematics, including course work and a research dissertation under the direction of a member of the Graduate Group in Applied Mathematics. The M.S. degree provides preparation for further study in applied mathematics or an application area, or for a career in industry or public service. The Ph.D. degree provides preparation for a career in research and/or teaching, or in industrial or national research laboratories. For further information, please contact studentservices@math.ucdavis.edu or 530-752-8130.

New applicants are admitted to the fall quarter only.

**Preparation.** The program admits qualified students with a bachelor's degree in mathematics, physics, chemistry, engineering, economics, the life sciences and related fields. General and Subject GRE scores are required, and applicants should display evidence of strong quantitative skills. Undergraduate courses should include calculus (including vector calculus), linear algebra, and ordinary differential equations. Advanced calculus (introduction to real analysis) is strongly recommended. Additional background in probability, partial differential equations, and/or numerical analysis is a plus. The ability to program in a high-level computer programming language (e.g., C, MATLAB, Python, R, etc.) is assumed.

**Graduate Advisor.** Contact the Student Services Office at 530-752-8130 or at studentservices@math.ucdavis.edu.

**Courses.** For a list of the courses in applied mathematics and mathematics, see Mathematics.

**Applied Mathematics (Graduate Group) | Applied Mathematics Ph.D.**

## Applied Mathematics; Mathematics

### Applied Mathematics; Mathematics | Applied Mathematics B.S.

*(College of Letters & Science)*

Abigail Thomspon, Ph.D., Chairperson

**Department Office.** 1130 Mathematical Sciences Bldg.; 530-752-0827; studentservices@math.ucdavis.edu; http://www.math.ucdavis.edu

**Faculty.** https://www.math.ucdavis.edu/people/faculty/

### The Major Programs

Mathematics is the study of abstract structures, space, change, and the interrelations of these concepts. It also is the language of the exact sciences.

**The Program.** After completing basic introductory courses such as calculus and linear algebra, students plan an upper division program in consultation with a faculty advisor. Upper division courses include real analysis, probability, modern algebra, as well as a variety of other courses that allow students to further mathematical knowledge and skills that feature their research or career interests. This individualized program can lead to graduate study in pure or applied mathematics, elementary or secondary level teaching, or to other professional goals. It can also reflect a special interest such as computational and applied mathematics, computer science, or statistics, or may be combined with a major in some other field.

**Career Alternatives.** A degree in mathematics provides entry to many careers in industry in addition to teaching. For instance, operations research, data analysis, systems analysis, computing, actuarial work, insurance, and financial services are only a few such careers. Mathematics is also a sound basis for graduate work in a variety of fields, such as law, engineering, and economics.

**Recommended Language Preparation.** Bachelor of Science degree candidates are advised, but not required, to satisfy the same language requirement as that for a Bachelor of Arts degree candidate, and to fulfill it in French, German, or Russian.

**Major Advisors.** For a current list of faculty and staff advisors, see [https://www.math.ucdavis.edu/undergrad/advising/advisers/](https://www.math.ucdavis.edu/undergrad/advising/advisers/) or contact the Student Services office at studentservices@math.ucdavis.edu.

**Mathematics Placement Requirement.** Students who wish to enroll in MAT 012, 016A, 017A, 021A, 021AH, and 021M must satisfy the mathematics placement requirement by taking an online exam. Students who do not satisfy the requirement will be administratively dropped from these courses. For more information, including preparation tips and how to access the online exam, please see the Department of Mathematics' website, at [http://www.math.ucdavis.edu/undergrad/math_placement](http://www.math.ucdavis.edu/undergrad/math_placement), well in advance of enrolling.

**Department Honors.** Students who meet the minimum GPA requirement for honors at graduation for the College of Letters & Science and who complete a senior project as part of MAT 194 or 199 units in consultation with their faculty advisor may also be recommended by the department for graduation with High Honors or Highest Honors. Recommendations will be based on evaluations of students' academic achievements in their major and the quality of their senior project. For complete details, see our website at [https://www.math.ucdavis.edu/undergrad/honors/](https://www.math.ucdavis.edu/undergrad/honors/).

**Graduate Study.** The Department offers programs of study and research leading to the M.A. and Ph.D. degrees in Mathematics. Information regarding graduate study may be obtained by consulting our website, and by sending an email to studentservices@math.ucdavis.edu.
### Preparatory Subject Matter

**Units: 39-47**

**Calculus**
- MAT 021A Calculus 4
- MAT 021B Calculus 4
- MAT 021C Calculus 4
- MAT 021D Vector Analysis 4

**Linear Algebra & Proof-Writing; choose one option:** 4-8

(a) MAT 022A Linear Algebra 3
    - MAT 108 Introduction to Abstract Mathematics 4

(b) MAT 027A Linear Algebra with Applications to Biology 4
    - MAT 108 Introduction to Abstract Mathematics 4

(c) MAT 067 Modern Linear Algebra 4

**MATLAB; choose one:** 0-1
- MAT 022AL Linear Algebra Computer Laboratory 1
- Equivalent MATLAB knowledge. 0

**NOTE:** Basic knowledge of MATLAB is required for both MAT 022A and MAT 067. Students can learn it on their own, enroll in ENG 006, EME 005, or in the one unit course MAT 022AL (can be taken concurrently).

**Differential Equations; choose one:** 3-4
- MAT 022B Differential Equations 3
- MAT 027B Differential Equations with Applications to Biology 4

**Programming** 8
- ECS 032A Introduction to Programming 4
- ENG 006 Engineering Problem Solving 4

**Choose one two-quarter sequence:** 8-10

**Physics**
- PHY 009A Classical Physics 5
- PHY 009B Classical Physics 5

**Biological Science**
- BIS 002A Introduction to Biology: Essentials of Life on Earth 5
- BIS 002B Introduction to Biology: Principles of Ecology and Evolution 5

**Chemistry**
- CHE 002A General Chemistry 5
- CHE 002B General Chemistry 5

**Economics**
- ECN 001A Principles of Microeconomics 4
- ECN 001B Principles of Macroeconomics 4

**Statistics**
- STA 032 Gateway to Statistical Data Science 4
- STA 100 Applied Statistics for Biological Sciences 4

Other applied preparatory courses approved by your advisor.

### Depth Subject Matter

**Units: 51-52**

**A. Core Courses**
- MAT 119A Ordinary Differential Equations 4
- MAT 127A Real Analysis 4
- MAT 127B Real Analysis 4
- MAT 127C Real Analysis 4
MAT 135A Probability 4
MAT 150A Modern Algebra 4
MAT 185A Complex Analysis 4

Choose two:
- MAT 128A Numerical Analysis 4
- MAT 128B Numerical Analysis in Solution of Equations 4
- MAT 128C Numerical Analysis in Differential Equations 4

B. Enrichment Courses 12
1. Choose two: MAT 111-185B; excluding MAT 180, core courses, and courses being used as a capstone.
   - MAT 111 History of Mathematics 4
   - MAT 114 Convex Geometry 4
   - MAT 115A Number Theory 4
   - MAT 115B Number Theory 4
   - MAT 116 Differential Geometry 4
   - MAT 118A Partial Differential Equations: Elementary Methods 4
   - MAT 118B Partial Differential Equations: Eigenfunction Expansions 4
   - MAT 118C Partial Differential Equations: Green's Functions and Transforms 4
   - MAT 119A Ordinary Differential Equations 4
   - MAT 119B Ordinary Differential Equations 4
   - MAT 124 Mathematical Biology 4
   - MAT 125A Real Analysis 4
   - MAT 125B Real Analysis 4
   - MAT 127A Real Analysis 4
   - MAT 127B Real Analysis 4
   - MAT 127C Real Analysis 4
   - MAT 128A Numerical Analysis 4
   - MAT 128B Numerical Analysis in Solution of Equations 4
   - MAT 128C Numerical Analysis in Differential Equations 4
   - MAT 129 Fourier Analysis 4
   - MAT 133 Mathematical Finance 4
   - MAT 135A Probability 4
   - MAT 135B Stochastic Processes 4
   - MAT 141 Euclidean Geometry 4
   - MAT 145 Combinatorics 4
   - MAT 146 Algebraic Combinatorics 4
   - MAT 147 Topology 4
   - MAT 148 Discrete Mathematics 4
   - MAT 150A Modern Algebra 4
   - MAT 150B Modern Algebra 4

MAT 150C  Modern Algebra 4
MAT 180  Special Topics 3
MAT 185B  Complex Analysis 4
MAT 189  Advanced Problem Solving 3
MAT 192  Internship in Applied Mathematics 1-3
MAT 194  Undergraduate Thesis 3

Total: 90-99

Applied Physics; Physics
Applied Physics; Physics | Applied Physics B.S.
The Major Program

From the smallest subatomic particles to atoms, molecules, stars, and galaxies, the study of physics is the study of what makes the universe work. Knowledge gained using atomic-scale microscopes and high-energy particle accelerators and nuclear reactors teaches us not only what holds the atomic nucleus together but also how proteins function and why stars shine.

The Program. The Department of Physics offers a Bachelor of Arts in Physics and two Bachelor of Science degree programs: in Physics (which also offers an emphasis in Astrophysics), and in Applied Physics. The A.B. degree provides a broad coverage of classical and modern physics while permitting a broader liberal arts education than is possible with the other two programs. The B.S. degree in either Physics or Applied Physics should be followed by the student who plans to enter physics as a profession, and also provides excellent training for a wide variety of technical career options. The B.S. in Applied Physics provides the student with a solid introduction to a particular applied physics specialty. For the student who plans to enter the job market upon completing a B.S. degree, the applied physics orientation would be an asset. Either B.S. program provides a solid foundation in physics for the student interested in graduate work in either pure or applied physics.

Career Alternatives. Careers in physics and applied physics include research and development, either in universities, government laboratories, or industry; teaching in high schools, junior colleges, and universities; management and administration in industrial laboratories and in government agencies; and in production and sales in industry. A major in physics also provides a strong base for graduate-level work in such interdisciplinary areas as chemical physics, biophysics and medical physics, geophysics and environmental physics, astrophysics and astronomy, computer science, and materials science.

Graduate Study. The Department of Physics offers programs of study and research leading to the M.S. and Ph.D. degrees. Further information regarding requirements for these three degrees, graduate research, teaching assistantships, and research assistantships may be obtained by writing to the Chairperson, Department of Physics, One Shields Avenue, University of California, Davis, CA 95616.

The minor in Arab Studies covers an area of utmost historical, cultural, economic and geopolitical significance. Several key contemporary issues make the region as a whole a focus of interest for scholarly study. The Arab Studies minor is an interdisciplinary minor open to undergraduates in all four colleges.

**Minor Advisor.** Consult the Middle East/South Asia Studies Program in 155 Kerr Hall 530-754-4926 or the Middle East/South Asia Studies website at [http://mesa.ucdavis.edu](http://mesa.ucdavis.edu).

The Major Program

Art History studies the changing visual expression of values, beliefs and experiences across diverse cultures and over time. It provides training in historical, social and aesthetic understanding, critical thinking, scholarly research, and lucid, thoughtful analysis and writing. More than any other discipline art history sharpens its students' visual acuity and deepens their visual literacy. In so doing, it prepares them to face the increasingly complex visual world we find ourselves in today.

The Program. The major begins with a series of courses that surveys major landmarks in the history of visual culture, art and architecture in Asia, Europe, and the United States. More advanced lecture courses and seminars focus on particularly important periods and issues. Students are encouraged to personalize their training with internships, independent study, and focused upper-division study. Top students considering graduate study are encouraged to engage in more advance study by pursuing a senior honors thesis.

Career Options. A major in Art History develops critical thinking and the integration of research, interpretation and understanding. It provides an excellent liberal arts basis for professions as far ranging as advertising, law, medicine, politics and business. The major prepares students for advanced study in Art History, Architecture, Museum Studies and Cultural Studies. It also serves as the foundation for careers in teaching, arts, administration, museums, galleries, historic preservation, art libraries, publishing, journalism, advertising, art conservation, and art investment. As the world becomes increasingly flooded with images, the critical visual literacy gained through the study of art history becomes more important for a wide variety of careers.

Honors Program. The Honors Program in Art History is encouraged for Art History majors who are considering attending graduate school. To be eligible for the program, a student must have a grade point average of 3.600 in the major or consent of both the prospective thesis advisor, who must be a member of the Art History faculty and the major advisor. In addition to meeting the standard major requirements, the honors student completes one additional undergraduate seminar (course 100 or 190A-L), researches and writes an honors thesis (courses 194HA and 194HB), supervised by the prospective thesis advisor. Students participating in this Program are candidates for Departmental recommendation for graduation with High or Highest Honors. See the Academic Information chapter, Letters and Science honors section, of this catalog and consult the department website for more information.
Teaching Credential Subject Representative. Department Chairperson; see the Teacher Education program.

Graduate Study. The Program in Art History offers studies leading to the Master of Arts degree in History of Art as preparation for further graduate study or professional work. For more information, contact the Graduate Staff Advisor at 530-752-8710, or see http://arthistory.ucdavis.edu.

Preparatory Subject Matter

Units: 20-21

Choose four:

- AHI 001A Ancient Mediterranean Art 4
- AHI 001B Medieval and Renaissance Art 4
- AHI 001C Baroque to Modern Art 4

Choose one:

- AHI 001D Arts of Asia 4
- AHI 001DY Arts of Asia 5
- AHI 001E Islamic Art and Architecture 4
- AHI 005 Understanding Visual Culture 4
- AHI 025 Understanding Architecture 4

Any lower division Art Studio (ART) course except ART 010 or ART 030. 4

Depth Subject Matter

Units: 40

Distribution Areas: Choose one course in each of the following six areas:

1. The Ancient World
   - AHI 152 Arts of Oceania and Prehistoric Europe 4
   - AHI 172A Early Greek Art and Architecture 4
   - AHI 172B Later Greek Art and Architecture 4
   - AHI 173 Roman Art and Architecture 4
   - AHI 175 Architecture and Urbanism in Mediterranean Antiquity 4

2. Asia
   - AHI 154 The Hindu Temple 4
   - AHI 157 (Pending Approval) 4
   - AHI 163A Early Chinese Art 4
   - AHI 163B Chinese Painting 4
   - AHI 163C Early Modern Chinese Painting 4
   - AHI 163D Art from China 1900 to the Present 4
   - AHI 164 The Arts of Japan 4

3. The Middle Ages to 1700
   - AHI 155 The Islamic City 4
   - AHI 156 Arts of the Islamic Book 4
   - AHI 176D (Pending Approval) 4
   - AHI 178B Early Italian Renaissance Art and Architecture 4
   - AHI 178C High and Late Italian Renaissance Art and Architecture 4
   - AHI 179B Baroque Art 4

4. Western Art 1700 to 1900
   - AHI 130 Landscape, Nature, and Art 4
   - AHI 168 Great Cities 4
   - AHI 182 British Art and Culture (1750-1900) 4
   - AHI 183A Art in the Age of Revolution, 1750-1850 4
   - AHI 183B Impressionism and Post-Impressionism: Manet to 1900 4
   - AHI 188C American Art to 1910 4

5. World Art 20th Century to the Present
   - AHI 122 Sex and Space 4
   - AHI 163D Art from China 1900 to the Present 4
   - AHI 183C Modernism in France, 1880-1940 4
   - AHI 185 Avant-Gardism and its Aftermath, 1917-1960 4
   - AHI 186 Contemporary Art 1960-Present 4
   - AHI 189 Photography in History 4
(6) Art & Issues Across Chronologies

AHI 110  Cultural History of Museums  4
AHI 120A  Art, Architecture, and Human Rights  4
AHI 121  Politics of Public Art  4
AHI 123  The Museum in the Age of Spectacle  4
AHI 181  Latin American Art & Architecture  4
AHI 188A  The American Home  4

Undergraduate Seminar in Art History, (AHI 190A-L); choose one:  4
AHI 190A  Undergraduate Seminar in Art History: Mediterranean Antiquity  4
AHI 190B  Undergraduate Seminar in Art History: Medieval  4
AHI 190C  Undergraduate Seminar in Art History: Renaissance  4
AHI 190D  Undergraduate Seminar in Art History: American  4
AHI 190E  Undergraduate Seminar in Art History: Gendering of Culture  4
AHI 190F  Undergraduate Seminar in Art History: Chinese  4
AHI 190G  Undergraduate Seminar in Art History: Japanese  4
AHI 190H  Undergraduate Seminar in Art History: Modern-Contemporary  4
AHI 190I  Undergraduate Seminar in Art History: 17th-18th Century  4
AHI 190J  Undergraduate Seminar in Art History: Islamic  4
AHI 190K  Undergraduate Seminar in Art History: 19th Century  4
AHI 190L  Undergraduate Seminar in Art History: Architecture & Heritage  4

Electives  12

Choose any three additional AHI upper-division courses or seminars.

Emphasis in Architectural History  Units: 60

Emphasis in Architectural History follows the same requirements as for the Art History major above, applying at least six of the following to their respective required areas or as electives:

AHI 025  Understanding Architecture  4
AHI 110  Cultural History of Museums  4
AHI 120A  Art, Architecture, and Human Rights  4
AHI 122  Sex and Space  4
AHI 123  The Museum in the Age of Spectacle  4
AHI 152  Arts of Oceania and Prehistoric Europe  4
AHI 154  The Hindu Temple  4
AHI 155  The Islamic City  4
AHI 163A  Early Chinese Art  4
AHI 168  Great Cities  4
AHI 172A  Early Greek Art and Architecture  4
AHI 172B  Later Greek Art and Architecture  4
AHI 173  Roman Art and Architecture  4
AHI 175  Architecture and Urbanism in Mediterranean Antiquity  4
AHI 176A  Art of the Middle Ages: Early Christian and Byzantine Art  4
AHI 176B  Art of the Middle Ages: Early Medieval and Romanesque Art  4
AHI 176C  Art of the Middle Ages: Gothic  4
AHI 178B  Early Italian Renaissance Art and Architecture  4
AHI 178C  High and Late Italian Renaissance Art and Architecture  4
AHI 181  Latin American Art & Architecture  4
AHI 184  Twentieth Century Architecture  4
AHI 187  Contemporary Architecture  4
AHI 188A  The American Home  4
AHI 188B  Architecture of the United States  4

Fulfilling the undergraduate seminar requirement (AHI 190A-L) through an architectural topic is highly recommended.
Art History Minor

Units: 20

Five upper-division courses. Choose one course from four of the following areas:

1. The Ancient World
   - AHI 152 Arts of Oceania and Prehistoric Europe 4
   - AHI 172A Early Greek Art and Architecture 4
   - AHI 172B Later Greek Art and Architecture 4
   - AHI 173 Roman Art and Architecture 4
   - AHI 175 Architecture and Urbanism in Mediterranean Antiquity 4

2. Asia
   - AHI 154 The Hindu Temple 4
   - AHI 157 (Pending Approval) 4
   - AHI 163A Early Chinese Art 4
   - AHI 163B Chinese Painting 4
   - AHI 163C Early Modern Chinese Painting 4
   - AHI 164 The Arts of Japan 4

3. The Middle Ages to 1700
   - AHI 155 The Islamic City 4
   - AHI 156 Arts of the Islamic Book 4
   - AHI 176D (Pending Approval) 4
   - AHI 178B Early Italian Renaissance Art and Architecture 4
   - AHI 178C High and Late Italian Renaissance Art and Architecture 4
   - AHI 179B Baroque Art 4

4. Western Art 1700 to 1900
   - AHI 130 Landscape, Nature, and Art 4
   - AHI 168 Great Cities 4
   - AHI 182 British Art and Culture (1750-1900) 4
   - AHI 183A Art in the Age of Revolution, 1750-1850 4
   - AHI 183B Impressionism and Post-Impressionism: Manet to 1900 4
   - AHI 188C American Art to 1910 4

5. World Art 20th Century to the Present
   - AHI 122 Sex and Space 4
   - AHI 163D Art from China 1900 to the Present 4
   - AHI 183C Modernism in France, 1880-1940 4

The Major Program

The Art Studio major provides the studio experience necessary for a broad understanding of the practice and interpretation of the visual arts.

The Program. The Art Studio program is designed to deliver a broad range of hands-on studio practices to the art major. Areas of focus include painting, sculpture, drawing, photography, ceramics, printmaking, and time-based media. Course choices/sequences are determined by the student according to major distribution requirements. Students are encouraged to explore a broad range of disciplines and are expected to take advantage of beginning classes which provide a critical introduction to the research possibilities within the major, across disciplines. In addition to studio classes, students are encouraged to participate in a distinguished visiting artist lecture series, professional practice seminars, student exhibitions/competitions, internships, and benefit from exposure to cultural events and exhibitions in Davis, Sacramento, and the Greater Bay Area.

Major Advisor. Information on the current Academic Advisor can be obtained by contacting the Art Department Main Office at 530-752-0105 or at http://arts.ucdavis.edu/arts-group-undergraduate-advising.

Portfolios. While portfolios are not required for admission to the art major, students at all levels are expected to maintain current portfolios of completed work in order to qualify and compete for the numerous internships, fellowships, grants, awards, and exhibitions the program has to offer, as well as to better prepare for the rigors of graduate school and/or an independent studio practice.

Career Options. Graduates of the Art Studio Program attend prestigious post-baccalaureate and graduate programs in studio art. Alumni often go on to develop professional studio practices. Commitment to the development of one's studio work leads to exhibition opportunities as well as accomplishments in the realm of fellowships, commissions, collaborations, and a host of other professional projects and opportunities. For the
student wishing to explore additional arts-related trajectories, in the private or public sector, a studio arts education provides a strong foundation for careers and/or graduate work in K-12 art education, art therapy, arts administration, curatorial studies, set design, architecture, culinary arts, design, film, animation, art criticism/journalism among others.

**Total: 68**

**Art Studio | ART M.F.A.**

(College of Letters & Science)

Annabeth Rosen, M.F.A., Chairperson of the Department

**Department Office.** 101 Art Building; 530-752-0105; [http://art.ucdavis.edu](http://art.ucdavis.edu)

**Faculty.** [http://arts.ucdavis.edu/art-studio-faculty](http://arts.ucdavis.edu/art-studio-faculty)

**Graduate Study.** The Department of Art offers programs of study and research leading to the M.F.A. degree in the practice of art. For more information contact the Graduate Staff Advisor at 530-752-8710 or at [http://arts.ucdavis.edu/art-studio-graduate-program](http://arts.ucdavis.edu/art-studio-graduate-program).

**Art Studio | ART Minor**

(College of Letters & Science)

Annabeth Rosen, M.F.A., Chairperson of the Department

**Department Office.** 101 Art Building; 530-752-0105; [http://art.ucdavis.edu](http://art.ucdavis.edu)

**Faculty.** [http://arts.ucdavis.edu/art-studio-faculty](http://arts.ucdavis.edu/art-studio-faculty)

**The Minor Program.** The Art Studio program delivers a broad range of hands-on studio practices to the art minor. Areas of focus include painting, sculpture, drawing, photography, ceramics, printmaking, and time-based media.
Course choices/sequences are determined by the student according to minor requirements. Students are encouraged to explore different areas of focus and are expected to take advantage of beginning classes which provide a critical introduction to the research possibilities within studio art. In addition to studio classes, students are encouraged to participate in the department’s distinguished visiting artist lecture series, professional practice seminars, student exhibitions/competitions, internships, and benefit from exposure to cultural events and exhibitions in Davis, Sacramento, and the Greater Bay Area.

Prerequisite courses must be taken prior to enrollment in upper division courses. Independent study courses are not applicable.

Department Background

Born out of social and global justice movements of the late 1960s, the Department of Asian American Studies at UC Davis is one of the very first programs in Asian American studies established nationally. The Department provides unique learning opportunities about the historical and contemporary experiences of Asian Americans in local and global contexts. We seek to develop and advance knowledge about the diversity of Asian American populations as immigrants and refugees, as ethnic minorities, and as a racial group in U.S. society. In examining the complexity of Asian American experiences, we foster critical thinking and comprehensive analyses of formations of race, ethnicity, class, gender, religion, and sexuality that are manifested not only in the United States but also in other regions and nations across the globe.

A distinct feature of our department is our emphasis on applied knowledge. Our curriculum, for instance, encourages students to work in close collaboration with community groups to advance social justice and transformative social change. Moreover, the faculty and staff in our department are consistently recognized for their strong mentorship and close engagement with students’ academic and personal growth. Our faculty and courses also focus on diverse Asian American populations as we seek to be inclusive of underrepresented Asian American groups and highlight cutting-edge research.

The Department houses the George Kagiwada Library and Digital Media Lab. This unique library holds a vast collection of scholarly texts in Asian American studies as well as an archive of Asian American community newspapers and other primary source publications not found elsewhere. The Digital Media Lab helps to support course-based as well as individual students’ independent projects.

The Major Program

Offering both an undergraduate major and minor, our curriculum emphasizes multidisciplinary, comparative, transnational, and intersectional perspectives; original empirically-based scholarship; cultural production and analyses; and community engagement.

In consultation with our faculty and staff advisors, students in the major have the exciting opportunity to select an emphasis or specialty organized around our faculty’s three core areas of intellectual focus — Immigration, Labor, and Transnationalism; Visual, Literary, and Cultural Studies; and Public/Community-Engaged Scholarship. Each emphasis incorporates a diverse array of thematic, theoretical, disciplinary, and methodological approaches — as well as a focus on a broad range of Asian American communities — allowing students to choose a course of study that aligns with their particular academic and career interests.

In order to enhance students’ intellectual development and postgraduate preparation, our curriculum also requires that all majors complete an off-campus community internship. This requirement seeks to ensure students experience a deeper and more comprehensive liberal arts education that connects classroom education to real life...
contexts that foster the development of new forms of knowledge and practical skills. The Department also offers an optional two-quarter thesis writing seminar for students in the major and minor that progresses through each stage of designing and completing an individualized undergraduate thesis project based on original research, which helps prepare students interested in applying for graduate school.

**Career Alternatives.** With the multidisciplinary emphasis of our program, an Asian American studies major provides excellent preparation for a diverse range of careers. Our alumni have established successful careers in the arts, community-based and non-profit organizations, government and politics, human rights, journalism, international relations, law, K-12 education, public health, public policy, social work, and student affairs in higher education. Others have gone on to pursue postgraduate degrees in a wide variety of fields that include education, ethnic studies, fine arts, feminist & queer studies, history, law, literature, political science, public policy, sociology, and social work. Our department has fostered close relationships with our alumni who are committed to supporting our majors with their career plans.

**General Education Requirements.** A large number of the courses offered by the Department fulfill a wide range of general education topical breadth and core literacy requirements that include:

Topical Breadth:
- Arts and Humanities
- Social Sciences

Core Literacy:

*Literacy with Words & Images:*
- Writing Experience
- Oral Skills
- Visual Literacy

*Civic & Cultural Literacy:*
- American Cultures, Governance, & History
- Domestic Diversity
- World Cultures

**Major Advisor.** Joe Nguyen, Student Affairs Officer (SAO); 530-752-8617 or jovnguyen@ucdavis.edu.

Substitutions for disciplinary track courses will be considered by the Department Chair on a case by case basis. Likewise, any substitutions of Major/Minor criteria will be considered by the Department Chair.

Direct questions pertaining to the following courses to the instructor or to the Department of Asian American Studies in 3102 Hart Hall; 530-752-2069. Also find relevant contact information at http://asa.ucdavis.edu.

ASA 189C | Topics in Asian American Studies: Physical and Mental Health | 4
ASA 189D  Topics in Asian American Studies: Policy and Community  4
ASA 189E  Topics in Asian American Studies: Comparative Racial Studies  4
ASA 189F  Topics in Asian American Studies: Asian Studies and Asian American Studies  4
ASA 189G  Topics in Asian American Studies: Race, Class, Gender, and Sexuality  4
ASA 189H  Topics in Asian American Studies: Society and Institutions  4
ASA 189I  Topics in Asian American Studies: Politics and Social Movements  4
ASA 194 & 195  8
ASA 194  Asian American Studies Capstone Course  4
ASA 195  Asian American Studies Senior Thesis Seminar  4
ASA 198  Directed Group Study  1-5
Up to six units in ASA 198 and/or ASA 199 can be used to satisfy the Asian American Studies upper division course requirements.
ASA 199  Special Study for Advanced Undergraduates  1-5
Up to six units in ASA 198 and/or ASA 199 can be used to satisfy the Asian American Studies upper division course requirements.

At least two upper-division elective courses from other departments or programs that relate to chosen emphasis.  8

Two courses (of up to eight units) from Study Abroad can be substituted for major requirements upon approval from the SAO or faculty advisor.  0-8

Substitutions for disciplinary track courses will be considered by the Department Chair on a case by case basis. Likewise, any substitutions of Major/Minor criteria will be considered by the Department Chair.

Faculty. http://lawr.ucdavis.edu/people/faculty/atmospheric-science

The Major Program

Atmospheric science is the study of the air that surrounds the planet. It includes all weather phenomena and climate including global and regional climate change, the chemistry of trace constituents and cloud and particle formation, interactions between ecosystems and the atmosphere, as well as quantitative studies of climate extremes and severe weather, including droughts, floods, hurricanes and tornadoes. The study of the impacts of human and other biotic activity on the quality of the air we breathe are important topics in the major.

The Program. Modern atmospheric science is a quantitative science that is reflected in the major's curriculum. In addition to the study of daily weather events, the program deals with fundamental dynamical and physical processes that involve the general circulation of the atmosphere; turbulent mass and energy transfer at the planetary surface as well as within the free atmosphere; the transfer of solar and terrestrial radiation throughout the atmosphere; atmospheric interaction with the biosphere; climate variations; and developments in remote sensing using satellites with modern meteorological instrumentation. In addition, the program has significant expertise in the areas of air quality and its related atmospheric chemistry. As well as providing a broad background in meteorology, the major includes an informal minor area to be chosen from mathematics, computer science, environmental studies, resource management or a physical or biological science. For more information, see http://atm.ucdavis.edu.

Internships and Career Opportunities. Atmospheric science students have participated in internships with the California Air Resources Board, various county Air Pollution Control Districts, the National Weather Service, and performing research. Job opportunities include: national weather services, weather forecasting for broadcast media or private forecasting firms, environmental consulting firms (such as environmental impact reports, wind farm siting), government agencies at all levels from local (air quality districts, planning departments, etc.) to state (Air Resources Board) to national (NOAA), and companies whose operations are impacted by weather (such as airlines, futures markets). About half of our graduates continue their education by seeking the M.S. or Ph.D. degree in atmospheric science or related areas.

Note. Alternative options for students who are interested in atmospheric science are to minor in ATM or to major in ESM choosing the climate change and air quality track. However, both the ATM minor and the ESM climate change and air quality track do not meet the Federal civil service requirements for meteorologists.

Graduate Study. You can specialize in particular areas of atmospheric science through graduate study and research leading to the M.S. and Ph.D. degrees. For details, see Atmospheric Science (Graduate Group) and Graduate Studies.

Related Courses. See ESP 150A; PHY104A, 104B; ESM 131.

**Restricted Electives**

Coordinated group of courses (informal minor area) to be chosen with advisor's approval from mathematics, computer science, environmental studies, communication, resource management, or a physical or biological science (at least 10 upper division units)

**Total: 123**

**Atmospheric Science | ATM Minor**

(College of Agricultural & Environmental Sciences)

William Horwath, Chairperson (Land, Air & Water Resources)

**Department Office.** 1110 Plant & Environmental Sciences Building; 530-752-1130; http://lawr.ucdavis.edu

**Faculty.** http://lawr.ucdavis.edu/people/faculty/atmospheric-science

**Minor Program.** The minor in Atmospheric Science provides a broad treatment of weather and climate, with the option to focus on such topics as climate change, meteorological instrumentation, and satellite remote sensing. Students undertaking the minor should have completed minimum preparatory course work in calculus and physics (MAT 016A-016B, PHY 005A or 007A). Some upper division courses in Atmospheric Science have the MAT 021 and 022 series and the PHY 009 series as prerequisites.

**Minor Advisor.** Erwan Monier

Atmospheric Science (Graduate Group) | ATM M.S.
Shu-Hua Chen, Ph.D., Chairperson of the Group; 530-752-1822

Group Office. 1152 Plant & Environmental Sciences Building; 530-752-1669; http://atm.ucdavis.edu

Faculty. http://atm.ucdavis.edu/people/faculty/

Graduate Study. The Graduate Group in Atmospheric Science offers both the M.S. and Ph.D. degree programs. A student may place emphasis on graduate work in one or more of the following fields: air quality meteorology, atmospheric chemistry, cloud physical processes, biometeorology, micrometeorology, numerical weather prediction, remote sensing, climate dynamics, large-scale dynamics, and meso-scale and boundary-layer meteorology. The diverse and extensive backgrounds of the faculty allow opportunities for interdisciplinary training and research.

Preparation. The Group encourages applications from all interested students with backgrounds in the physical or natural sciences. Basic qualifications for students entering the Atmospheric Science graduate program include mathematics to the level of vector calculus and partial differential equations, and one year of college-level physics. Flexibility may be allowed for students with high academic potential, but it is expected that deficiencies in preparatory material and in key undergraduate atmospheric science courses be completed within the first year of graduate study.

Graduate Advisor. Paul Ullrich, Ph.D.
Graduate Admissions Officer. Ian Faloona, Ph.D.

### Avian Sciences (Graduate Group)

**Avian Sciences (Graduate Group) | AVS M.S.**

Annie King, Ph.D., Chairperson of the Group

**Group Office.** 1249 Meyer Hall; 530-752-2382; http://aviansciences.ucdavis.edu

**Faculty.** [http://aviansciences.ucdavis.edu/people/faculty.html](http://aviansciences.ucdavis.edu/people/faculty.html)

**Graduate Study.** The Graduate Group in Avian Sciences offers the M.S. degree program to students who wish to pursue specialized advanced work on avian species. Specializations students may choose include behavior, nutrition, physiology, reproduction, pathology, immunology, toxicology, food chemistry, management, ecology, genetics, comparative incubation, environmental physiology, and cellular and developmental studies using wild and domestic birds as experimental animals. Both master's degree plans, thesis and comprehensive examination, are available.

**Preparation.** Applicants should have undergraduate preparation in a field appropriate to the course of study selected, including courses in most of the following subjects: general biology, general and organic chemistry, biochemistry, avian biology, genetics, nutrition, physiology, and statistics.
Biochemical Engineering; Engineering

Biochemical Engineering; Engineering | Biochemical Engineering B.S.

(College of Engineering)

Roland Faller, Ph.D., Chairperson of the Department 530-752-6496; Fax 530-752-1031

Department Office. 3001 Ghashi Hall; Fax 530-752-1031; http://che.engineering.ucdavis.edu/

Faculty. https://che.engineering.ucdavis.edu/people/faculty/

The Department of Chemical Engineering offers two undergraduate programs: Chemical Engineering and Biochemical Engineering.

Mission Statement. To advance, through teaching and research programs, the frontiers of chemical and biochemical engineering; to educate students with a sense of professionalism and community; and to serve the public of California through outreach efforts.

Honors Program. An Honors Program is available to qualified students in the Chemical Engineering and Biochemical Engineering majors. It is a two-year program designed to challenge the most talented students in these majors. Students are invited to participate in their sophomore year. In the upper division, students will complete either an honors thesis or a project that might involve local industry. Students must maintain a grade point average of 3.500 to continue in the program. Successful completion of the Honors Program will be acknowledged on the student's transcript.

Biochemical Engineering Undergraduate Program

The Biochemical Engineering program is accredited by the Engineering Accreditation Commission of ABET; see http://www.abet.org.

As the biotechnology industry expands and matures, there is increasing need for engineers who can move products from the research stage to large-scale manufacturing. As they fill this need, engineers must also understand the production, purification, and regulatory issues surrounding biopharmaceutical manufacturing.

Biochemical engineers—with their strong foundations in chemistry, biological sciences, and chemical process engineering—are in a unique position to tackle these problems. Biochemical engineers apply the principles of cell and molecular biology, and engineering to develop, design, scale up, optimize, and operate processes that use living cells, organisms, or biological molecules for the production and purification of products (such as monoclonal antibodies, vaccines, therapeutic proteins, antibiotics, and industrial enzymes); for health and/or environmental monitoring (such as diagnostic kits, microarrays, biosensors); or for environmental improvement (such as bioremediation). An understanding of biological processes is also becoming increasingly important in the industries that traditionally employ chemical engineers, including the industries that process materials, chemicals, foods, energy, fuels, and semiconductors.

Objectives. We educate students in the fundamentals of chemical and biochemical engineering, balanced with the application of these principles to practical problems; educate students as independent, critical thinkers who can also function effectively in a team; prepare students with a sense of community, ethical responsibility, and professionalism; prepare students for careers in industry, government, and academia; teach students the necessity for continuing education and self-learning; and foster proficiency in written and oral communications.

Students are encouraged to adhere carefully to all prerequisite requirements. The instructor is authorized to drop students from a course for which stated prerequisites have not been completed.

Exclusive of General Education units, the minimum number of units required for the Biochemical Engineering major is 162.

### Departments, Programs, & Degrees | Biochemistry & Molecular Biology; Molecular & Cellular Biology

**Biochemistry & Molecular Biology; Molecular & Cellular Biology B.S.**

(College of Biological Sciences)

Jodi Nunnari, Ph.D., Professor, Chairperson of the Department

**Department Office.** 149 Briggs Hall; 530-752-3611; [http://www.mcb.ucdavis.edu](http://www.mcb.ucdavis.edu)

**Faculty.** [http://biosci3.ucdavis.edu/Faculty/Profile/FacultyByDept/MCB](http://biosci3.ucdavis.edu/Faculty/Profile/FacultyByDept/MCB)

**The Biochemistry & Molecular Biology Major Program**

The Biochemistry & Molecular Biology major introduces students to the chemistry of living organisms and the experimental techniques that are used to probe the structures and functions of biologically important molecules. Students who enjoy both chemistry and biology and who are comfortable with quantitative approaches to problem solving will find this major a rewarding field of study.

**The Program.** The Biochemistry & Molecular Biology program begins with the four-course, upper division common curriculum that introduces the principles of biochemistry, genetics, and cell biology. Majors then take a comprehensive and rigorous laboratory course to familiarize them with the most important aspects of biochemical research. Additional upper division courses in biochemistry and molecular biology examine detailed aspects of these subjects. Students are also required to take courses in other biological sciences and a full year of physical chemistry.

**Upper Division Composition Requirement; choose one; a grade of C- or better is required:***

- UWP 102E Writing in the Disciplines: Engineering | 4 |
- UWP 102F Writing in the Disciplines: Food Science and Technology | 4 |
- UWP 104A Writing in the Professions: Business Writing | 4 |
- UWP 104E Writing in the Professions: Science | 4 |
- UWP 104T Writing in the Professions: Technical Writing | 4 |
- Passing the Upper Division Composition Exam. | 0 |

**Total:** 162-166
Career Alternatives. The Biochemistry & Molecular Biology program provides a solid scientific background for students seeking a research, teaching, or service career in the life sciences. Positions are open to biochemists in bio-medical, bio-technological, pharmaceutical, agricultural research and chemical industries. Also, university-affiliated research laboratories, hospital laboratories, and government-sponsored research facilities provide employment opportunities. The major provides excellent preparation for advanced study in graduate or professional schools.

Graduate Study. See Biochemistry, Molecular, Cellular, & Developmental Biology (Graduate Group).

Master Advisor. David Wilson, Ph.D.

Advising. Biology Academic Success Center (BASC); 1023 Sciences Laboratory Building; 530-752-0410; http://www.biosci.ucdavis.edu/BASC.

Faculty. http://bmcdb.ucdavis.edu/faculty/

Graduate Study. The Graduate Group in Biochemistry, Molecular, Cellular, & Developmental Biology offers programs of study and research leading to the M.S. and Ph.D. degrees. While an M.S. may be obtained while pursuing a Ph.D., only Ph.D. applications will be accepted. Biochemistry, Molecular, Cellular, & Developmental Biology is a broad interdepartmental program.

Master's degree offered only en route to Ph.D.

Preparation. Appropriate preparation is an undergraduate degree in a biological or physical science. Preparation should include a year of calculus, physics, general chemistry and organic chemistry, and courses in statistics, biochemistry, genetics and cell biology.

Major Programs & Graduate Study. For the Bachelor of Science program, see the major in Biological Systems Engineering; for graduate study, see also Graduate Studies.

Minor Programs. The Department of Biological & Agricultural Engineering offers two minors through the College of Agricultural & Environmental Sciences: Geographic Information Systems and Precision Agriculture.

The minor in Geographic Information Systems is open to all majors, including those in engineering. This minor is for students interested in information processing of spatial data related to remote sensing for geographical and environmental planning and related areas.

The minor in Precision Agriculture is open to all majors, including those in engineering, and acquaints students with recent developments and their applications to agriculture, in geographic information systems, global positioning systems, and variable rate technologies.

The Department of Biological & Agricultural Engineering also administers three minors through the College of Engineering in Energy Science & Technology, Energy Efficiency, and Energy Policy.

Courses. Courses are listed under Applied Biological Systems Technology, and Engineering: Biological & Agricultural (Biological Systems Engineering).

The Biological Sciences Major

Departments of Evolution & Ecology; Microbiology & Molecular Genetics; Molecular & Cellular Biology; Neurobiology, Physiology, & Behavior; and Plant Biology

The Program. The Biological Sciences major is broad in concept, spanning the numerous core disciplines of biology. The Bachelor of Arts (A.B.) program includes preparatory work in mathematics, general and organic chemistry, physics, and introductory level biology, as well as upper division core classes emphasizing the breadth of biological sciences. Students in the Bachelor of Arts (A.B.) program can pursue upper division coursework outside of the biological sciences. Research and internships are encouraged.
Career Alternatives. The degree program prepares students for admission to graduate schools or professional schools, leading to either a variety of professional health careers or further study in basic and applied areas of biology. They provide suitable preparation for careers in teaching, biological and biotechnological research with various governmental agencies or private companies, government regulatory agencies, environmental consulting, biological illustration and writing, pharmaceutical sales, biological/environmental law, and biomedical engineering.

Master Advisor. Lesilee Rose, Ph.D.

Advising. Biology Academic Success Center (BASC) in 1023 Sciences Laboratory Building; 530-752-0410; http://basc.ucdavis.edu/.

Teaching Credential Subject Representative. Associate Director of Teacher Education (School of Education); see the Teaching Credential/M.A. Program.

Depth Subject Matter

Biological Science
- **BIS 101**  Genes and Gene Expression  4
- Choose **BIS 105 or 102 & 103:**
  - **BIS 105**  Biomolecules and Metabolism  3
  - **BIS 102**  Structure and Function of Biomolecules  3
  - **BIS 103**  Bioenergetics and Metabolism  3

Statistics; choose one:
- **STA 100**  Applied Statistics for Biological Sciences  4
- **STA 013**  Elementary Statistics  4

Evolution & Ecology
- **EVE 100**  Introduction to Evolution  4

Choose one from each topic:
- Ecology
  - **ESP 100**  General Ecology  4
  - **EVE 101**  Introduction to Ecology  4
- Microbiology
  - **FST 104**  Food Microbiology  3
  - **MIC 102**  Introductory Microbiology  3
  - **MIC 162**  General Virology  4
  - **MIC 170**  Yeast Molecular Genetics  3
- Animal Physiology, Behavior or Development
  - **BIS 104**  Cell Biology  3
  - **MCB 150**  Developmental Biology  4
  - **NBP 100**  Neurobiology  4
  - **NBP 101**  Systemic Physiology  5
  - **NBP 102**  Animal Behavior  3
  - **NBP 141**  Physiological Adaptation of Marine Organisms  3
- Plant Physiology or Development:
  - **PLB 105**  Developmental Plant Anatomy  5
  - **PLB 111**  Plant Physiology  3
  - **PLB 112**  Plant Growth and Development  3
  - **PLB 113**  Molecular and Cellular Biology of Plants  3
  - **PLB 116**  Plant Morphology and Evolution  5
  - **PLB 126**  Plant Biochemistry  3

Laboratory Requirement

Choose course(s) for a minimum total of six hours/week of laboratory or field work from the list of courses below:

Choose two with three hours lab or field work/week:
- **EVE 110**  Running, Swimming and Flying  3
- **EVE 117**  Plant Ecology  4
- **EVE 119**  Population Biology of Invasive Plants and Weeds  3
- **EVE 140**  Paleobotany  4
- **EVE 180A**  Experimental Ecology and Evolution in the Field  4
- **EVE 180B**  Experimental Ecology and Evolution in the Field  4
- **EXB 104L**  Exercise Biology Laboratory  3
- **EXB 115**  Biomechanical Bases of Movement  3
- **MIC 103L**  Introductory Microbiology Laboratory  2
- **NBP 100L**  Neurobiology Laboratory  3
- **NBP 101L**  Systemic Physiology Laboratory  3
- **NBP 121L**  Physiology of Reproduction Laboratory  1
- **NBP 123**  Comparative Vertebrate Organology  4
- **PLB 117**  Plant Ecology  4
PLB 119  Population Biology of Invasive Plants and Weeds 3

Other courses with approval of the master advisor.

*Choose one with six hours lab or field work/week; a course may fulfill both the lab and a depth topic requirement:*

Other courses with approval of the Master Advisor.

**Total: 73-93**

**Biological Sciences | BIS B.S.**

(College of Biological Sciences)

**Biology Academic Success Center (BASC).** 1023 Sciences Laboratory Building; 530-752-0410; http://biosci.ucdavis.edu; http://basc.ucdavis.edu/

**Faculty.** https://biology.ucdavis.edu/faculty

**The Biological Sciences Major**

Departments of Evolution & Ecology; Microbiology & Molecular Genetics; Molecular & Cellular Biology; Neurobiology, Physiology, & Behavior; and Plant Biology

**The Program.** The Biological Sciences major is broad in concept, spanning the numerous core disciplines of biology. The Bachelor of Science (B.S.) program includes preparatory work in mathematics, general and organic chemistry, physics, and introductory level biology, as well as upper division core classes emphasizing the breadth of biological sciences. Students in the B.S. degree program complete additional upper division biology coursework, for which they can choose classes from a variety of different areas such as molecular biology and genetics, animal behavior, plant growth and development, bioinformatics, marine biology, forensics, and microbiology research and internships are encouraged.

**Career Alternatives.** The degree program prepares students for admission to graduate schools or professional schools, leading to either a variety of professional health careers or further study in basic and applied areas of biology. They provide suitable preparation for careers in teaching, biological and biotechnological research with various governmental agencies or private companies, government regulatory agencies, environmental consulting, biological illustration and writing, pharmaceutical sales, biological/environmental law, and biomedical engineering.

**Master Advisor.** Lesilee Rose, Ph.D.
Advising. Information on the Biological Sciences major or minor can be obtained at the Biology Academic Success Center (BASC) in 1023 Sciences Laboratory Building; 530-752-0410; http://basc.ucdavis.edu/.

Teaching Credential Subject Representative. Associate Director of Teacher Education (School of Education); see the Teaching Credential/M.A. Program.

### Preparatory Subject Matter

**Units: 56-66**

**Biological Science**
- BIS 002A Introduction to Biology: Essentials of Life on Earth 5
- BIS 002B Introduction to Biology: Principles of Ecology and Evolution 5
- BIS 002C Introduction to Biology: Biodiversity and the Tree of Life 5

**Chemistry**
- **Choose a series:** 21-27
  - CHE 002A General Chemistry 5
  - CHE 002B General Chemistry 5
  - CHE 002C General Chemistry 5
  - CHE 003A Chemistry for Life Sciences: Determining Structure and Predicting Properties 5
  - CHE 003B Chemistry for Life Sciences: Predicting and Characterizing Chemical Change 5
  - CHE 003C Chemistry for Life Sciences: Controlling Processes and Synthetic Pathways 5

**Mathematics; choose a series:** 8-12
- MAT 017A Calculus for Biology and Medicine 4
- MAT 017B Calculus for Biology and Medicine 4
- MAT 017C Calculus for Biology and Medicine 4
- MAT 021A Calculus 4
- MAT 021B Calculus 4
- MAT 021C Calculus 4
- MAT 021C Recommended.

**Physics**
- PHY 007A General Physics 4
- PHY 007B General Physics 4
- PHY 007C General Physics 4

### Depth Subject Matter

**Units: 42-50**

**Section 1: Common Curriculum**

**Units: 10-13**

**Biological Science**
- BIS 101 Genes and Gene Expression 4
- **Choose BIS 105 or 102 & 103:** 3-6
  - BIS 105 Biomolecules and Metabolism 3
  - BIS 102 Structure and Function of Biomolecules 3
  - BIS 103 Bioenergetics and Metabolism 3
- BIS 104 Cell Biology 3

### Section 3: Laboratory Requirement

Units: 0

Course(s) selected to fulfill the laboratory requirement may also satisfy restricted elective or depth subject matter units (but not both).

Choose course(s) for a minimum total of six hours/week of laboratory or field work from the list of courses below:

**Choose two with three hours lab or field work/week:**
- EVE 110 Running, Swimming and Flying 3
- EVE 117 Plant Ecology 4
- EVE 119 Population Biology of Invasive Plants and Weeds 3
- EVE 140 Paleobotany 4
- EVE 180A Experimental Ecology and Evolution in the Field 4
- EVE 180B Experimental Ecology and Evolution in the Field 4
- EXB 104L Exercise Biology Laboratory 3
- EXB 115 Biomechanical Bases of Movement 3
- MIC 103L Introductory Microbiology Laboratory 2
- NPB 100L Neurobiology Laboratory 3
- NPB 101L Systemic Physiology Laboratory 3
- NPB 121L Physiology of Reproduction Laboratory 1
- NPB 123 Comparative Vertebrate Organology 4
- PLB 119 Population Biology of Invasive Plants and Weeds 3

Other courses with approval of the Master Advisor.

**Choose one course with six hours lab or field work/week:**
- BIS 180L Genomics Laboratory 5
- CHA 101L Human Gross Anatomy Laboratory 3
- EVE 105 Phylogenetic Analysis of Vertebrate Structure 4

**Section 4: Restricted Electives**

Choose at least three or more courses for a minimum of 11 units from the list of Approved Upper Division Restrictive Electives and/or laboratory courses. No class or laboratory used to satisfy a section 1 or a section 2 course requirement may be used as a restricted elective.

Students may choose any combination of approved courses that align with their academic or career objectives, or choose courses from a list of sample themes available on the BASC website at http://basc.ucdavis.edu. Up to three of the 11 units may be fulfilled by approved seminar or research courses.

**Approved Upper Division Restricted Electives:**

- **ANG 105**  Horse Genetics 3
- **ANG 107**  Genetics and Animal Breeding 5
- **ANS 104**  Principles and Applications of Domestic Animal Behavior 4
- **ANS 119**  Invertebrate Aquaculture 4
- **ANS 123**  Animal Growth and Development 4
- **ANS 131**  Reproduction and Early Development in Aquatic Animals 4
- **ANS 142**  Companion Animal Care and Management 4
- **ANS 170**  Ethics of Animal Use 4
- **ANT 151**  Primate Evolution 4
- **ANT 152**  Human Evolution 5
- **ANT 153**  Human Genetics: Mutation and Migration 5
- **ANT 154A**  The Evolution of Primate Behavior 5
- **ANT 154B**  Primate Evolutionary Ecology 5
- **ANT 157**  Anthropological Genetics 3
- **APC 100**  Comparative Vertebrate Organology 4
- **AVS 100**  Avian Biology 3
- **AVS 150**  Nutrition of Birds 1
- **BIM 117**  Modeling Strategies for Biomedical Engineering 4
- **BIM 140**  Protein Engineering 4
- **BIS Biological Sciences - all upper division courses**
- **BIT 150**  Applied Bioinformatics 4

Biological Sciences | BIS Minor

(College of Biological Sciences)

Faculty. [https://biology.ucdavis.edu/faculty](https://biology.ucdavis.edu/faculty)

Departments of Evolution & Ecology; Microbiology & Molecular Genetics; Molecular & Cellular Biology; Neurobiology, Physiology, & Behavior; and Plant Biology

Master Advisor. Lesilee Rose, Ph.D.

Advising. Information on the Biological Sciences major or minor can be obtained at the Biology Academic Success Center (BASC) in 1023 Sciences Laboratory Building; 530-752-0410; [http://basc.ucdavis.edu/](http://basc.ucdavis.edu/).

Description. The Biological Sciences minor provides an opportunity for students in programs outside of the College of Biological Sciences to complement their studies with a concentration in biology. Student in the minor experience the breadth of biology by taking courses in five core areas: molecular biology/ biochemistry, animal biology, plant biology, microbiology and ecology/evolution.

Biological Sciences

Complete at least three units from each of the five numbered groups to total at least 18 units. Appropriate alternative courses may be used with approval of a master advisor.

1) Cell & Molecular Biology

Biological Systems Engineering; Agricultural & Environmental Sciences, Engineering

Biological Systems Engineering; Agricultural & Environmental Sciences, Engineering  |  EBS Information

(College of Engineering and College of Agricultural & Environmental Sciences)

Bryan M. Jenkins, Ph.D., Chairperson of the Department

Department Office. 2030 Bainer Hall; 530-752-0102; http://bae.engineering.ucdavis.edu

Mission. The Department of Biological & Agricultural Engineering is dedicated to the advancement of the discipline of biological engineering and to the conduct of research under its many diverse areas of application. Biological engineering or biological systems engineering is the biology-based engineering discipline that integrates life sciences with engineering in the advancement and application of fundamental concepts of biological systems from molecular to ecosystem levels. Within this discipline, our faculty members work in a range of research areas including biotechnology engineering, agricultural and natural resources engineering, and food engineering.

The mission of the Department of Biological & Agricultural Engineering is to discover, develop, apply, and disseminate knowledge for the sustainable production, management, and use of biological materials, and to educate students for this work.

Objectives. We educate students in the fundamentals of mathematics, physical and biological sciences, and engineering, balanced with the application of principles to practical problems. We teach students to develop skills for solving engineering problems in biological systems through use of appropriate analysis, synthesis, and engineering design techniques. We prepare students for entry into engineering practice and graduate education, as well as for engagement in life-long learning. We foster the ability of our students to collaborate and communicate effectively, and provide an awareness of the importance of economics, professional responsibility, and the environment.

Students graduating with a B.S. degree in Biological Systems Engineering from UC Davis are prepared to:

- Apply life sciences in engineering at the biochemical, cellular, organism, and macro levels,
- Solve biological systems engineering problems while employed in the private or public sector,
- Consider the environmental and social consequences of their engineering activities,
- Communicate effectively with professional colleagues and public constituencies,
- Act in an ethical manner, and
- Continue their education in a changing professional world.

The Biological Systems Engineering Undergraduate Program

Biological Systems Engineering is an engineering major that uses biology as its main scientific base. With rapid advances in biology and biotechnology, engineers are needed to work side by side with life scientists to bring laboratory developments into commercial production or field application. Industries in bioenergy, bioprocessing, biotechnology, food processing, aquaculture, agriculture, plant production, animal production, and forest
production all need engineers with strong training in biology. The heightened concern for environmental resources and their preservation generates many engineering opportunities as society strives to maintain balance within the biosphere.

In the freshman and sophomore years, the Biological Systems Engineering major requires sequences of courses in mathematics, physics, chemistry, engineering science, and humanities, similar to all accredited engineering programs. In addition to these course sequences, the Biological Systems Engineering major also requires courses in the biological sciences. Exclusive of General Education units, the Biological Systems Engineering major requires a minimum of 162 units (86 units in the lower division; 76 units in the upper division).

Biological Systems Engineering graduates take jobs in the biotechnology, energy, food, and medical industries; work for state and federal agencies; or pursue graduate work. Students also can use the program as a pathway to professional schools in medicine, veterinary medicine, dentistry, or business.

The Biological Systems Engineering program is accredited by the Engineering Accreditation Commission of ABET; see [http://www.abet.org](http://www.abet.org).

Students are encouraged to adhere carefully to all prerequisite requirements. The instructor is authorized to drop students from a course for which stated prerequisites have not been completed.

**Lower Division Required Courses**

See the Degree Requirements section, below.

**Upper Division Requirements**

If your career objective is a professional degree in the health sciences (e.g., medicine, veterinary medicine, or dentistry), you should consult with advisors from the appropriate school to plan for successful admission and to ensure that you take specific courses that may be required and that you have the necessary experience. The upper division requirements are listed following the areas of specialization:

- Biotechnology Engineering
- Agricultural and Natural Resources Engineering
- Food Engineering

**Areas of Specialization**

**Biotechnology Engineering.** Biotechnology involves the handling and manipulation of living organisms or their components to produce useful products. Students specializing in biotechnology engineering integrate analysis and design with applied biology to solve problems in renewable energy production, large-scale biotechnical production, control of biological systems, and bio-based materials production.

Students may focus on the mechanisms and processes for the sustainable production and use of energy from renewable biological sources. Students may also focus on the challenges in scaling up laboratory developments to industrial production, including production, packaging, and application of biocontrol agents for plant pests and diseases; genetically altered plants; plant materials and food products; and microbial production of biological products, tissue culture, and bioremediation. Students may also focus on the development of biosensors to detect microorganisms and specific substances, useful in the development of products based on biological processes and materials.

Biotechnical engineers work in the biotech industries on process design and operation, scale-up, and instrumentation and control.

Recommended biological science electives:

- BIS 101, 102, 103
- BIT 160, 161A, 161B
- MIC 102, 103L, 115
- MCB 120L, 121, 126, 162, 182
- PBI 126
- PLS 152

Recommended engineering electives:

- BIM 109, 117, 118, 140, 143, 151, 152, 161A, 162

Agricultural & Natural Resources Engineering. With the world population expected to grow over the next several decades, major concerns lie with meeting the needs of agriculture and with the sustainable use of limited natural resources. Students specializing in agricultural and natural resources engineering combine analysis and design with applied biology to solve problems in producing, transporting, and processing biological products leading to food, fiber, energy, pharmaceuticals, and other human needs.

Students may focus on automation and control of field operations and engineered systems, robotics, and on the biomechanics of humans and animals. They may also focus on engineering issues related to the sustainable use of natural resources, particularly energy and water, but also land and air. Agricultural and natural resources engineers design machinery, processes, and systems for productive plant and animal culture, while improving overall sustainability.

Agricultural and natural resources engineers are employed as practicing professionals and managers with agricultural producers, equipment manufacturers, irrigation districts, food processors, consulting engineering firms, start-up companies, and government agencies. Graduates with interest in biomechanics work in industry on the design, evaluation, and application of human-centered devices and systems, as well as on improving worker health and safety.

Recommended biological science electives:

Animal Emphasis
- AVS 100
- ANS 112, 143, 144, 146
- NPB 101
- SSC 100

Aquaculture Emphasis
- ANS 118, 131, 136A
- ABT 163
- WFC 120, 121

Biomechanics Emphasis
- BIS 102
- NPB 101
- EXB 103
- CHA 101

Plant Emphasis
- ENT 100
- ENH 102
- ESP 100
- ETX 101
- HYD 124
- MIC 120
- PLB 111
- SSC 100
- PLS 101, 110A, 114, 142

Recommended engineering electives:
- EBS 128, 145
- BIM 109, 116, 126
- ECI 140, 141, 142, 144, 145, 148A, 171

*ENG 111, 121, 180*

Additional recommended electives:

*ABT 150, 161, 165*

**Food Engineering.** Producing the food we eat every day constitutes the largest industrial sector of the U.S. economy, and this production involves the work of engineers in a wide variety of food industries, both at home and around the world. Students specializing in food engineering design food processes and operate equipment and facilities for production of high quality, safe, and nutritious food with minimal impact of these operations on the environment.

Students learn to apply engineering principles and concepts to handle, store, process, package, and distribute food and related products. In addition to engineering principles, the food engineering specialization provides an understanding of the chemical, biochemical, microbiological, and physical characteristics of food. Students study concepts of food refrigeration, freezing, thermal processing, drying, and other food operations, food digestion, and health and nutrition in food system design.

Food engineers work as practicing engineers, scientists, and managers in the food industry.

Recommended biological science electives:

- ANS 112
- BIS 101, 102, 103
- MIC 102, 103L
- PLS 110C, 172, 174, 196

Recommended engineering electives:

- EBS 135, 161
- ECH 160
- ENG 180

**Suggested Advisors.** G. Bornhorst, J. de Moura Bell, T. Jeoh, M. McCarthy, N. Nitin, Z. Pan, D. Slaughter

**Master Undergraduate Advisor.** T. Jeoh

**EBS B.S./M.S. Integrated**

**The Graduate Program in Biological Systems Engineering**

Integrated B.S./M.S., M.Engr., D.Engr., and Ph.D. in Biological Systems Engineering
Designated Ph.D. emphasis available in Biotechnology

[http://bae.engineering.ucdavis.edu](http://bae.engineering.ucdavis.edu); 530-752-0102

Graduate students in Biological Systems Engineering focus on finding economically and environmentally sustainable solutions to many of the most important global issues of our time—the safety, security and abundance of our food, detection of pathogens, development of bioenergy and other sustainable energy systems, control of insect-borne disease and damage, as well as the preservation of our land, air and water resources.

We enjoy the strategic advantage of being located in California, the national leader in agricultural production and crop diversity, and a major center for biotechnology. With the unique status of belonging to both the College of Engineering and the College of Agricultural & Environmental Sciences, the program benefits from a wide diversity of collaborations across multiple disciplines. We interact with colleagues in both engineering and the life sciences to create multidisciplinary approaches to our teaching and research. Students benefit from this dynamic environment that combines the strengths of nationally ranked engineering, agricultural and environmental programs.

Financial support is available in the form of research assistantships, teaching assistantships, fellowships and financial aid.

**Research Highlights:**

- Automation and Control
- Bioenvironmental engineering
- Renewable energy
- Industrial biotechnology
- Food safety
- Biosensors
- Bioprocess engineering
- Bioinstrumentation
- Ergonomics, health and safety
- Aquacultural engineering
- Ecological systems engineering
- Food engineering
- Forest and fiber engineering
- Postharvest engineering
- Remote sensing
- Robotics and autonomous systems
- Soil and water engineering

Biomedical Engineering; Engineering

Biomedical Engineering; Engineering | BIM Information
The Biomedical Engineering Undergraduate Major

The Biomedical Engineering program is accredited by the Engineering Accreditation Commission of ABET; see http://www.abet.org.

Biomedical engineering is an interdisciplinary field of study that integrates knowledge of engineering principles with the biomedical sciences. It is a very diverse field with biomedical engineers working in areas ranging from medical imaging to regenerative medicine. Some major contributions of Biomedical Engineering include the left ventricular assist device (LVAD), artificial joints, hemodialysis, bioengineered skin, coronary stents, computed tomography (CT), and flexible endoscopes. Students who choose biomedical engineering are interested in contributing to human health and quality of life, but do not routinely interact directly with patients, as do physicians. Due to the need to complete additional coursework beyond BME degree requirements, this major is not a primary route for pre-medical studies.

The mission of the BS degree program of the Department of Biomedical Engineering is to combine exceptional teaching with state-of-the-art research for the advancement of technologies and computational techniques that meet medical and societal challenges.

The educational objectives of our program are that a B.S. degree in Biomedical Engineering should prepare students to:

1) Be successfully engaged in their chosen career through engineering practice, academic or clinical research, healthcare, education, service, or related activities, or through pursuit of graduate or professional degrees; and 2) Contribute effectively to society through responsible professional practice, fostering of cross-disciplinary collaboration, generation of innovative solutions to problems, and continuous pursuit of knowledge for personal and technological advancement.

The biomedical engineering curriculum has been designed to provide a solid foundation in mathematics, life and physical sciences, and engineering, and to provide sufficient flexibility in the upper division requirements to encourage students to explore specializations within the field. Our instructional program is designed to impart knowledge of contemporary issues at the forefront of biomedical engineering research. Employment opportunities exist in industry, hospitals, academic research and teaching institutes, national laboratories, or government regulatory agencies. The major also provides excellent grounding in the skills necessary for professional or graduate-level studies in biological and health sciences. Exclusive of General Education units, the minimum number of units required for the Biomedical Engineering degree is 157.

For information about graduate degree options, see Biomedical Engineering (Graduate Group).

Areas of Specialization

As Biomedical engineering is a broad field, specializing in a subfield of engineering can provide more in-depth expertise in a focus area. Through the judicious selection of upper division engineering and science electives, students can create this depth in one of our suggested areas of specialization or in an area of the student's
choosing. One of the strengths of the UC Davis program is the flexibility to design one's own emphasis of study. These specializations are neither required nor degree-notated.

**Biomechanics.** This is a broad subfield that includes orthopedic/rehabilitation engineering (including the design of wheelchairs and prosthetics) and the study of mechanical forces produced by biological systems. Biomechanics allows a better understanding of the fluid dynamics of blood flow and the forces acting on tissue in the artery to allow the design of better cardiovascular interventional devices. This field involves more intensive study of mechanics, dynamics and thermodynamics.

**Cellular & Tissue.** This focus area applies biomedical engineering principles to control behavior at the gene, protein, cell, and tissue level. Engineers in this area work with cellular therapies, protein production, gene therapy, tissue engineering and regeneration, and biomaterials development. This subfield draws heavily from the chemical and biological sciences and can involve studying biomedical transport, natural or synthetic biomaterials, pharmacokinetics and pharmacodynamics.

**Imaging.** Visualizing anatomical structure, physiological processes, metabolic activity and molecular expression in living tissues is essential for the diagnosis of disease, development of new therapeutics, evaluation of the response to therapeutics, and guidance of interventional procedures. Our program has a particular strength in molecular imaging, which involves detecting molecular-scale events within living systems. An imaging biomedical engineer can develop instruments for imaging, create algorithms for three-dimensional reconstruction of imaging data, and generate new contrast agents to enhance image quality. Depending upon the area of interest, this field can require further study in electronics, signal processing, chemistry or computer programming.

**Medical Devices.** This is a diverse area that can include the development of devices, instruments and implants ranging from the nano- to macro-scale that can be used in the diagnosis, treatment or prevention of disease. This involves combining technologies like pharmaceuticals, electronics and mechanical devices to develop combination medical treatments.

**Systems & Synthetic Biology.** In this area, students apply engineering principles to better understand, design and build biological systems at the cellular level. They integrating cellular, biochemical, genetic, electromechanical and computational approaches in their work, which can be applied to health and other applications. Systems and synthetic biology specialists can build engineered or artificial cells for fighting cancer or antibiotic resistance, improve tissue engineering and drug production approaches and study how complex and dynamic molecular systems control cellular behavior.

**Pre-Medical Student.** As engineering is playing an increasing role in the practice of medicine, students can focus on the intersection of engineering and medicine for future careers as physician-scientists. Please note that to meet admission requirements for medical school, students must complete extra coursework in addition to the listed Department of Biomedical Engineering curriculum requirements.

**The Graduate Program in Biomedical Engineering.** Doctoral and master's degrees in Biomedical Engineering are offered through the interdisciplinary Graduate Group in Biomedical Engineering. Please see http://www.bme.ucdavis.edu and Biomedical Engineering (Graduate Group).

### Lower Division Required Courses

Students are encouraged to adhere carefully to all prerequisite requirements. The instructor is authorized to drop students from a course for which stated prerequisites have not been completed.

**Mathematics**

- MAT 021A  Calculus  4
- MAT 021B  Calculus  4
- MAT 021C  Calculus  4
- MAT 021D  Vector Analysis  4
- MAT 022A  Linear Algebra  3
- MAT 022B  Differential Equations  3

**Physics**

**Science & Engineering Electives** are to be selected in consultation with a staff or faculty advisor.

**Science Electives; to be chosen according to specialization:**

- BIS 002B  Introduction to Biology: Principles of Ecology and Evolution  5
- BIS 002C  Introduction to Biology: Biodiversity and the Tree of Life  5
- ECS 032A  Introduction to Programming  4
- ECS 032B  Introduction to Data Structures  4
- ECS 040  Software Development and Object-Oriented Programming  4  *(Discontinued)*
- PHY 009D  Modern Physics  4
- BIM 102  Cellular Dynamics  4
- BIM 161A  Biomolecular Engineering  4
- BIM 161L  Biomolecular Engineering Laboratory  3
- BIM 161S  Biomolecular Engineering: Brief Course  1

Any graded upper division course in the Biological Sciences, Chemistry or Physics that is designated as Science & Engineering topical breadth.

**With the approval of the Biomedical Engineering Undergraduate Committee; four units:**

- BIM 192  Internship in Biomedical Engineering  1-12
- BIM 199  Special Study for Advanced Undergraduates  1-5

**Engineering Electives**

Any graded upper division Biomedical Engineering course; except:

- BIM 102  Cellular Dynamics  4
- BIM 161A  Biomolecular Engineering  4
- BIM 161L  Biomolecular Engineering Laboratory  3
- BIM 161S  Biomolecular Engineering: Brief Course  1

**With the approval of the Biomedical Engineering Undergraduate Committee; four units:**

- BIM 192  Internship in Biomedical Engineering  1-12
- BIM 199  Special Study for Advanced Undergraduates  1-5

No more than four units allowed from lower division coursework.

- ENG 004  Engineering Graphics in Design  3
- ENG 035  Statics  4

Choose one:

- ENG 045  Properties of Materials  4
- ENG 045Y Properties of Materials  4
- ENG 102  Dynamics  4
- ENG 103  Fluid Mechanics  4
- ENG 104  Mechanics of Materials  4
- ENG 104L Mechanics of Materials Laboratory  1

Passing the Upper Division Composition Exam offered by the College of Letters & Science.
Biomedical Engineering; Engineering | BIM Minor

(College of Engineering)

Steven George, Ph.D., Chairperson of the Department

Department Office. 2303 Genome & Biomedical Sciences Facility; 530-752-1033; https://bme.ucdavis.edu

The minor in Biomedical Engineering is restricted to enrolled College of Engineering students. The intent is to build upon their existing core strengths in other engineering majors by adding expertise in biomedical applications. This additional training makes students more attractive to employers in the medical device industry, and positions students for graduate training in health related applications of engineering.

The minor requires two life sciences courses not typically required for engineering students, one at the cellular level (Biomedical Engineering 102) and the other at the physiological level (Neurobiology, Physiology, & Behavior 101 or Biomedical Engineering 116). The remaining 12 units are to be selected from the list of upper division Biomedical Engineering courses in consultation with an advisor. Students will be advised to select additional courses to complement their existing curricula. Examples of relevant coursework for different majors are provided as a reference.

Minor Requirements

Successful completion of the minor requires the following:

- Completing 21 units of minor coursework. All courses must be taken for a letter grade.
- Minimum overall GPA of 2.000 and no grade lower than a C- for coursework completed in the minor.
- No more than 1 course can be counted towards both the student's major and the minor.

Minor Advisors. Rosalind Christian, Jennifer Choi

Biomedical Engineering Units: 21

Choose one:
- NPB 101 Systemic Physiology 5
- BIM 116 Physiology for Biomedical Engineers 5
- BIM 102 Cellular Dynamics 4

Electives; to be chosen in consultation with the Biomedical Engineering Departmental Advisor:
- BIM 120 Introduction to Materials Science for Biomedical Engineers 4
- BIM 141 Cell and Tissue Mechanics 4
- BIM 142 Principles and Practices of Biomedical Imaging 4
- BIM 143 Biomolecular Systems Engineering: Synthetic Biology 4
- BIM 143L Synthetic Biology Laboratory 2
- BIM 144 Fundamentals of Biophotonics and Bioimaging 4
- BIM 145 Immuno-Engineering 4
- BIM 152 Molecular Control of Biosystems 4
- BIM 161A Biomolecular Engineering 4
- BIM 162 Introduction to the Biophysics of Molecules and Cells 4
- BIM 163 Bioelectricity, Biomechanics, and Signaling Systems 4
- BIM 167 Biomedical Fluid Mechanics 4
- BIM 171 Clinical Applications for Biomedical Device Design 4
- BIM 173 Cell and Tissue Engineering 4
- BIM 176 Microfluidic Lab 2
- BIM 189A Topics in Biomedical Engineering; Cellular and Molecular Engineering 1-5
- BIM 189B Topics in Biomedical Engineering; Biomedical Imaging 1-5
- BIM 189C Topics in Biomedical Engineering; Biomedical Engineering 1-5

Total: 21
Biomedical Engineering (Graduate Group)

Biomedical Engineering (Graduate Group) | Biomedical Engineering Information

David Hawkins, Ph.D., Chairperson of the Group; 530-752-2748

Group Office. 2306B Genome & Biomedical Sciences Facility; 530-752-2611; https://bmegg.ucdavis.edu/

Faculty. https://bmegg.ucdavis.edu/contacts/graduate-group-faculty/

Graduate Study. The Biomedical Engineering Graduate Group (BMEGG) offers programs of study and research leading to the M.S. and Ph.D. degrees. The programs of study prepare students for professional work in the effective integration of engineering with medical and biological sciences. Research strengths lie in the areas of: stem cell & tissue engineering for regenerative medicine; biophotonics & biomedical imaging; biosensors, MEMS & nanomaterials; cellular & molecular mechanics; computational bioengineering & modeling; biomaterials & drug delivery; neuroengineering; musculoskeletal biomechanics & mechanobiology; cardiac electrophysiology; and synthetic biology, systems biology, & bioinformatics. This broad interdisciplinary program is best suited for students who are capable of and comfortable with considerable independence. Each student, together with an advisor, defines a specific course of study suited to individual goals.

Preparation. The BMEGG regards strong competence in mathematics and engineering as necessary for successful completion of study. Prior course work in these areas is emphasized in the evaluation of applications. Some undergraduate training can be acquired after admission to the BMEGG, but it may require an additional year of study.

Courses. See Biomedical Engineering.

Biomedical Engineering (Graduate Group) | Biomedical Engineering M.S.

David Hawkins, Ph.D., Chairperson of the Group; 530-752-2748

Group Office. 2306B Genome & Biomedical Sciences Facility; 530-752-2611; https://bmegg.ucdavis.edu/

Biophysics (Graduate Group)

Biophysics (Graduate Group) | BPH Ph.D.
Atul N. Parikh, Ph.D., Chairperson of the Group

Group Office. 227A Life Sciences; 530-752-4863; http://bph.ucdavis.edu/

Faculty. http://bph.ucdavis.edu/faculty/

Graduate Study. The Biophysics Graduate Group offers a program leading to a Ph.D. degree in biophysics. The interdisciplinary program prepares students to conduct independent research at the interface of physics, chemistry, and biology. Students employ advanced quantitative research methods and models to explore biophysical mechanisms in living systems. Faculty members have particular research interests in physical biology of the cell, structural biology, computational biology, membrane mechanics, systems and synthetic biology, mechanisms of catalysis and energy transduction, neuroscience, and imaging. Students choose from the broad biophysics research venues a research laboratory that matches their interests and career goals.

The Master of Sciences degree is offered only en route to the Ph.D.

Biostatistics (Graduate Group)

Biostatistics (Graduate Group) | BST Information
Kyoungmi Kim, Ph.D. (Public Health Sciences), Chairperson of the Group

Group Office. 4118 Mathematical Sciences Building; 530-752-1532; https://biostatistics.ucdavis.edu/

Faculty. https://biostatistics.ucdavis.edu/people

Biostatistics (Graduate Group) | BST M.S.
Kyoungmi Kim, Ph.D. (Public Health Sciences), Chairperson of the Group

Group Office. 4118 Mathematical Sciences Building; 530-752-1532; https://biostatistics.ucdavis.edu/

Faculty. https://biostatistics.ucdavis.edu/people

Graduate Study. Biostatistics is a field of science that uses quantitative methods to study life sciences related problems that arise in a broad array of fields. The program provides students with, first, solid training in the biostatistical core disciplines and theory; second, with state-of-the art knowledge and skills for biostatistical data analysis; third, substantial exposure to the biological and epidemiological sciences; and fourth, with a strong background in theoretical modeling, statistical techniques and quantitative as well as computational methods. Programs of study and research are offered leading to the M.S. and Ph.D. degrees. The program prepares students for interdisciplinary careers ranging from bioinformatics, environmental toxicology and stochastic modeling in biology and medicine to clinical trials, drug development, epidemiological and medical statistics. The program draws on the strengths of the Biostatistics faculty at UC Davis.

Preparation. Students should have one year of calculus; a course in linear algebra or one year of biological course work; facility with a programming language; and upper-division work in at least one of Mathematics, Statistics and Biology.

Graduate Advisor. Ana-Maria Iosif (Public Health Sciences)

Biostatistics (Graduate Group) | BST Ph.D.
Kyoungmi Kim, Ph.D. (Public Health Sciences), Chairperson of the Group

Group Office. 4118 Mathematical Sciences Building; 530-752-1532; https://biostatistics.ucdavis.edu/

Faculty. https://biostatistics.ucdavis.edu/people

biostatistical core disciplines and theory; second, with state-of-the-art knowledge and skills for biostatistical data analysis; third, substantial exposure to the biological and epidemiological sciences; and fourth, with a strong background in theoretical modeling, statistical techniques and quantitative as well as computational methods. Programs of study and research are offered leading to the M.S. and Ph.D. degrees. The program prepares students for interdisciplinary careers ranging from bioinformatics, environmental toxicology and stochastic modeling in biology and medicine to clinical trials, drug development, epidemiological and medical statistics. The program draws on the strengths of the Biostatistics faculty at UC Davis.

**Preparation.** Students should have one year of calculus; a course in linear algebra or one year of biological coursework; facility with a programming language; and upper-division work in at least one of Mathematics, Statistics and Biology.

**Graduate Advisor.** Christiana Drake (Statistics)

---

### Biotechnology

**Biotechnology | BIT B.S.**

(College of Agricultural & Environmental Sciences)

**Faculty.** Faculty includes members of the Departments of Animal Science; Engineering: Chemical Engineering & Materials Science; Computer Science; Engineering: Biological & Agricultural; Food Science & Technology; Land, Air, & Water Resources; Plant Pathology; Plant Sciences; Viticulture & Enology; and the College of Biological Sciences.

**The Major Program**

Every living organism, from the smallest and most primitive bacteria to every plant, insect, animal or human being, contains DNA as the primary genetic material. DNA directs all cellular processes, creating the incredible variety and diversity of living organisms in the biosphere. Biotechnology focuses on the mechanics of life processes and their application. Biotechnology means “life technology” and represents an integrated, multidisciplinary field, with a profound impact today on almost every aspect of human endeavor.

**Preparatory Requirements.** UC Davis students who wish to change their major to Biotechnology must complete the following courses (representing the subject areas of Biological Sciences, Chemistry, and Mathematics) with a grade point average of at least 2.500 in each subject area. All of these courses must be taken for a letter grade:

<table>
<thead>
<tr>
<th>Course</th>
<th>UNITS</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIS 002A, 002B, 002C</td>
<td>15</td>
</tr>
<tr>
<td>CHE 002A, 002B, 002C or 003A, 003B, 003C</td>
<td>15</td>
</tr>
</tbody>
</table>

Mathematics, one of the following groups:
- MAT 016A, 016B; or MAT 017A, 017B; or MAT 021A, 021B: 6-8

**The Program.** In the first two years, students develop a strong and general background in biological science with an emphasis on fundamental concepts and basic principles of genetics, molecular biology and cell biology. Four options, Animal Biotechnology, Plant Biotechnology, Fermentation/Microbial Biotechnology, and Bioinformatics, provide in-depth training and specialized knowledge in an aspect of biotechnology. Each option has a strong laboratory component to reinforce the theoretical concepts. Students also do an internship in a biotechnology company or university or government laboratory.

**Internships and Career Opportunities.** In the last decade, more industries are turning to biotechnology to solve problems and improve products, creating a growing job market for individuals trained in biotechnology in the agricultural, food and beverage, health care, chemical, pharmaceutical and biochemical, and environmental and bioremediation industries.

Graduates trained in the technologies designed for biotechnology will find their training applicable to advanced research in molecular biology, genetics, biochemistry, and the plant and animal sciences.

**Major Advisor.** J.I. Yoder (Plant Sciences) in 101 Asmundson Hall.

**Advising Center** for the major is located in 1220 Plant & Environmental Sciences; 530-752-1715.

Total: 114-131
DEB 263—Biotechnology Fundamentals and Application (2)
Lecture—2 hours. Prerequisite(s): BIS 101; BIS 102; MIC 102; or Consent of Instructor. Must be a graduate student in good standing. Fundamentals of molecular biology and chemical engineering involved in recombinant DNA technology. Topics: principles of rate processes of biological systems, optimization of bioreactors, and issues related to overexpression and production of recombinant molecules. Participation in student-directed team projects. Effective: 2016 Winter Quarter.

DEB 282—Biotechnology Internship (7-12)
Internship—21-36 hours. Prerequisite(s): Graduate standing and Consent of Instructor. Open only to students participating in the Designated Emphasis in Biotechnology program. Research at a biotechnology company or interdisciplinary cross-college lab for a minimum of 3 months as part of the Designated Emphasis in Biotechnology Program. (S/U grading only.) Effective: 2017 Winter Quarter.

DEB 294—Current Progress in Biotechnology (1)
Seminar—1 hour. Prerequisite(s): Graduate standing. Seminars presented by guest lecturers on subjects of their own research activities. May be repeated for credit. (Same course as ECH 294.) (S/U grading only.) Effective: 2018 Winter Quarter.

Bodega Marine Laboratory Program

Bodega Marine Laboratory Program | BML Program
http://bml.ucdavis.edu/

Integrative marine science courses at Bodega Marine Laboratory (BML) offer a multidisciplinary understanding of coastal systems through hands-on research, lab and field based courses. The program includes courses during spring quarter, Summer Sessions One and Two.

Spring Quarter Program
The spring quarter curriculum is currently under revision and a new integrated curriculum will be in place in the near future that is 12-15 units. For updates, please check http://bml.ucdavis.edu/. Scholarships will be available to defray the costs of housing at BML.

For more details, follow developments of the spring quarter curriculum on the BML website at http://bml.ucdavis.edu/.

Summer Session Courses
This integrated program offers students a multidisciplinary understanding of coastal ecosystems and oceanography through intensive, hands on lab and field courses taught at Bodega Marine Laboratory. Students can take up to 10 units in each Summer Session. Applications are due in Spring of each year. Scholarships are available to defray the costs of housing at BML.

For more course detail, see full description under appropriate academic department listing or http://bml.ucdavis.edu/.

Offerings include:

**Summer Session One**
*Coastal Marine Research and Experimental Invertebrate Biology.* BIS 124, EVE 114
*Effects of Coastal Pollution on Marine Organisms.* ETX/NUT 127

**Summer Session Two**
*Biological Oceanography.* GEL/ESP 150C
*Coastal Oceanography.* ESP 152
*Global Change Ecology.* ESP 120
*Marine & Coastal Field Ecology.* ESP 124

Course offerings, sequence structure and instructors may vary from year to year.
Bodega Marine Laboratory spring and summer programs are residential, with students housed on the laboratory grounds. Participants are assessed a room and board fee in addition to standard campus registration fees. Financial aid may be available to eligible students from campus. Scholarships are available from Bodega Marine Laboratory. Applications and consent of instructors are required.

Additional information is available directly from:
Bodega Marine Laboratory
P.O. Box 247
Bodega Bay, CA 94923
707-875-2211; http://bml.ucdavis.edu/

Business Analytics; Graduate School of Management

The UC Davis Master of Science in Business Analytics program is designed to prepare you to thrive as an innovative leader in the digital economy.

Capital Area North Doctorate in Education Leadership (CANDEL) Education (Graduate Group)

Capital Area North Doctorate in Education Leadership (CANDEL) Education (Graduate Group) | CANDEL Ed.D.

(School of Education)
School of Education Building; 530-752-0757; http://education.ucdavis.edu
Faculty. https://education.ucdavis.edu/candel-program-faculty

The Educational Leadership (CANDEL) Program leading to a Doctor of Education (Ed.D.) degree, is intended primarily for working professionals in schools, community colleges, and related educational capacities that reside in the greater Sacramento Valley, Bay Area, and Northern California. Graduates of this program will be prepared to lead in educational environments that promote learning, equity and achievement for all students. Armed with both real-world, problem-based learning, and scholarship skills, program graduates will be uniquely ready to manage the complexities of educational organizations, effect school change processes and shape the educational policies that bear on the practice of education in the public setting.

The Cell Biology Major Program
The Cell Biology major provides students with a comprehensive understanding of the cell, the basic structural and functional unit of all living organisms.

**The Program.** To understand living organisms, the biologist must understand the cell. Hence, cell biology lies at the core of the biological sciences. Students taking this major gain a solid foundation in biological principles. The major emphasizes how cellular organization and function contribute to the development, maintenance and reproduction of adult organisms. The major illustrates the ways in which principles derived from the physical sciences, genetics, biochemistry, molecular biology and physiology are integrated in the study of living cells and emphasizes the experimental nature of the study of cell biology.

**Career Alternatives.** The major provides an excellent background for students wishing to enter postgraduate and professional programs in biological, health sciences or veterinary sciences; for students pursuing careers involving teaching or research in the biological sciences; for students interested in careers in the biotechnological or pharmaceutical industries; or for students interested in careers related to the administrative, legal or commercial aspects of biomedical science.

**Master Advisor.** F.J. McNally, Ph.D.

**Advising.** Biology Academic Success Center (BASC); 1023 Sciences Laboratory Building; 530-752-0410; http://www.biosci.ucdavis.edu/BASC.

**Graduate Study.** See Biochemistry, Molecular, Cellular, & Developmental Biology (Graduate Group).

Faculty. https://che.engineering.ucdavis.edu/people/faculty/

The Department of Chemical Engineering offers two undergraduate programs: Chemical Engineering and Biochemical Engineering.

Mission Statement. To advance, through teaching and research programs, the frontiers of chemical and biochemical engineering; to educate students with a sense of professionalism and community; and to serve the public of California through outreach efforts.

Honors Program. An Honors Program is available to qualified students in the Chemical Engineering and Biochemical Engineering majors. It is a two-year program designed to challenge the most talented students in these majors. Students are invited to participate in their sophomore year. In the upper division, students will complete either an honors thesis or a project that might involve local industry. Students must maintain a grade point average of 3.500 to continue in the program. Successful completion of the Honors Program will be acknowledged on the student's transcript.

Chemical Engineering Undergraduate Program
The Chemical Engineering program is accredited by the Engineering Accreditation Commission of ABET; see http://www.abet.org.

Chemical engineers apply the principles of chemistry and engineering to produce useful commodities, ranging from fuels to polymers. Chemical engineers are increasingly concerned with chemical and engineering processes related to the environment and food production. They work in diverse areas ranging from integrated circuits to integrated waste management. Preparation for a career in chemical engineering requires an understanding of both engineering and chemical principles to develop proficiency in conceiving, designing, and operating new processes.

The chemical engineering curriculum has been planned to provide a sound knowledge of engineering and chemical sciences so that you may achieve competence in addressing current and future technical problems.

**Objectives.** The objectives of the program in Chemical Engineering are to educate students in the fundamentals of chemical engineering, balanced with the application of these principles to practical problems; to train them as independent, critical thinkers who can also function effectively in teams; to foster a sense of community, ethical responsibility, and professionalism; to prepare them for careers in industry, government, and academia; to illustrate the necessity for continuing education and self-learning; and to help students to learn to communicate proficiently in written and oral form.

Students are encouraged to adhere carefully to all prerequisite requirements. The instructor is authorized to drop students from a course for which stated prerequisites have not been completed.

Exclusive of General Education units, the minimum number of units required for the Chemical Engineering major is 156.

**Options for Junior and Senior Year.** The focus in the junior year is on fundamentals such as thermodynamics, fluid mechanics, energy transfer, and mass transfer phenomena. In the senior year, students draw these fundamentals together and apply them in a study of kinetics, process design, and process dynamics and control. The program's requirement of eight chemical engineering elective units allow students to strengthen specific areas in chemical engineering, explore new areas, or pursue new areas of specialization.

- CHE 110A Physical Chemistry: Introduction to Quantum Mechanics 4
- CHE 110B Physical Chemistry: Properties of Atoms and Molecules 4
- CHE 128A Organic Chemistry 3
- CHE 128B Organic Chemistry 3
- CHE 129A Organic Chemistry Laboratory 2

**Chemical Engineering Electives**

Choose any upper division courses in the areas of Chemistry (CHE), Chemical Engineering (ECH) or Materials Science & Engineering (EMS). You may receive elective credit up to a maximum of four units for any combination of engineering courses numbered 190C, 192, 198, and 199.

Courses may also be chosen from:

- BIS 102 Structure and Function of Biomolecules 3
- FST 100A Food Chemistry 4
- FST 102A Malting and Brewing Science 4
- FST 102B Practical Malting and Brewing 4
- FPS 150 Polymer Syntheses and Reactions 3

Units: 80-84
Upper Division Composition Requirement; choose one; a grade of C- or better is required:

- UWP 102E Writing in the Disciplines: Engineering 4
- UWP 102F Writing in the Disciplines: Food Science and Technology 4
- UWP 104A Writing in the Professions: Business Writing 4
- UWP 104E Writing in the Professions: Science 4
- UWP 104T Writing in the Professions: Technical Writing 4

Passing the Upper Division Composition Exam.

Total: 156-161

Chemical Engineering; Engineering | ECH M. Engr.

Graduate Program in the Department of Chemical Engineering

The Department of Chemical Engineering is home to a top ranked graduate program in Chemical Engineering. We offer a unique environment for graduate studies- we are large enough to boast world-renowned faculty and state-of-the-art research facilities, yet small enough to give every graduate student personal attention.

The Graduate Program in Chemical Engineering

M. Engr, M.S. and Ph.D.

Ph.D. designated emphases are available as specializations in biotechnology, biophysics, and nuclear science. http://che.engineering.ucdavis.edu; 530-752-7952

The Chemical Engineering Graduate Program provides students with a strong grounding in the fundamentals and explores critical applications in a wide range of process systems.

Doctoral students are typically offered competitive four-year financial offers of fellowships and research/teaching assistantships which include tuition, fees, and a stipend. Financial offers are subject to satisfactory progress towards completion of degree requirements.

Major research areas include Energy, Environment, Synthetic Biology and Biotechnology.

**The Major Programs**

Chemistry studies the composition of matter, its structure, and the means by which it is converted from one form to another.

**The Program.** We offer several degree programs leading to the Bachelor of Arts (A.B.) and the Bachelor of Science (B.S.). To meet and discuss these programs with our staff advisors, see [https://chemistry.ucdavis.edu/undergraduate/academic-advising](https://chemistry.ucdavis.edu/undergraduate/academic-advising).
The B.S. degree in Chemical Physics provides students with an in-depth understanding of the fundamentals of chemistry, focusing on areas at the interface of chemistry and physics. These include, for example, the experimental measurement and theoretical calculation of the detailed properties and behavior of atoms and molecules. An important experimental tool in chemical physics is spectroscopy, which uses conventional or laser light to probe the atomic and molecular properties of matter.

**Career Alternatives.** Graduates in Chemical Physics will be prepared for employment in technology, energy, laser science, material science, solid-state chemistry and other fields requiring a strong background in both chemistry and physics. They will also be well-suited for graduate study in a range of areas including chemistry, chemical physics, computational chemistry, material science, nanomaterials and laser science.

**Major Advisor.** To contact a major advisor in the Department of Chemistry, see https://chemistry.ucdavis.edu/undergraduate/academic-advising.

The Major Programs

Chemistry studies the composition of matter, its structure, and the means by which it is converted from one form to another.

The Program. We offer several degree programs leading to the Bachelor of Arts (A.B.) and the Bachelor of Science (B.S.). To meet and discuss these programs with our staff advisors, see https://chemistry.ucdavis.edu/undergraduate/academic-advising.

The curriculum leading to the A.B. degree offers a substantive program in chemistry, while allowing students the freedom to take more courses in other disciplines and pursue a broad liberal arts education. Students with a deeper interest in chemistry should choose one of the several programs leading to the B.S. degree.

Career Alternatives. Chemistry graduates with bachelor's degrees are employed extensively throughout various industries in quality control, research & development, production supervision, technical marketing, and other areas. The types of industries employing these graduates include chemical, energy, pharmaceutical, genetic engineering, biotechnology, food & beverage, petroleum & petrochemical, paper & textile, electronics & computer, and environmental & regulatory agencies. The bachelor's programs also provide chemistry graduates with the rigorous preparation needed for an advanced degree in chemistry and various professional schools in the health sciences.

Major Advisor. To contact a major advisor in the Department of Chemistry, see https://chemistry.ucdavis.edu/undergraduate/academic-advising.

Honors & Honors Program. The student must take courses CHE 194HA, 194HB, and 194HC.
**Graduate Study.** The Department of Chemistry offers programs of study and research leading to the M.S. and Ph.D. degrees in Chemistry. Detailed information regarding graduate study may be obtained by contacting the Graduate Advisor, Department of Chemistry. See also Graduate Studies.

At least 11 additional upper division units in Chemistry (CHE) (except CHE 107A or 107B) or related areas, including one course with formal lectures; courses in related areas must be approved in advance by the major advisor.

**Total:** 79-85

### Chemistry | CHE B.S.

(College of Letters & Science)

**Department Administration.** For a complete list of department administration, see [https://chemistry.ucdavis.edu/people](https://chemistry.ucdavis.edu/people).
**Department Office.** 108 Chemistry Building; 530-752-8900; Fax 530-752-8995; https://chemistry.ucdavis.edu/

**Faculty.** https://chemistry.ucdavis.edu/people

**The Major Programs**

Chemistry studies the composition of matter, its structure, and the means by which it is converted from one form to another.

**The Program.** We offer several degree programs leading to the Bachelor of Arts (A.B.) and the Bachelor of Science (B.S.). To meet and discuss these programs with our staff advisors, see https://chemistry.ucdavis.edu/undergraduate/academic-advising.

The general B.S. degree program, which is accredited by the American Chemical Society, is well-suited for students interested in chemistry as a profession. The other B.S. programs focus on a specific area of applied chemistry: Environmental Chemistry and Forensic Chemistry. These programs are a little less intensive in chemistry and draw on significant course material from areas relevant to their particular field, but fall outside of a classical chemistry degree.

**Career Alternatives.** Chemistry graduates with bachelor’s degrees are employed extensively throughout various industries in quality control, research & development, production supervision, technical marketing, and other areas. The types of industries employing these graduates include chemical, energy, pharmaceutical, genetic engineering, biotechnology, food & beverage, petroleum & petrochemical, paper & textile, electronics & computer, and environmental & regulatory agencies. The bachelor’s programs also provide chemistry graduates with the rigorous preparation needed for an advanced degree in chemistry and various professional schools in the health sciences.

**Major Advisor.** To contact a major advisor in the Department of Chemistry, see https://chemistry.ucdavis.edu/undergraduate/academic-advising.

**Honors & Honors Program.** The student must take courses CHE 194HA, 194HB, and 194HC.

**Graduate Study.** The Department of Chemistry offers programs of study and research leading to the M.S. and Ph.D. degrees in Chemistry. Detailed information regarding graduate study may be obtained by contacting the Graduate Advisor, Department of Chemistry. See also Graduate Studies.

The Major Program

The Department of Chicana/Chicano Studies offers an interdisciplinary curriculum focusing on the Chicana/Chicano experience through an analysis of class, race, ethnicity, gender and sexuality, and cultural expression. The
The department offers a major leading to the Bachelor of Arts degree and a minor that can satisfy breadth requirements for the College of Letters and Science. Both the major and minor frame an analysis within the historical and contemporary experiences of Chicanas/os in the Americas.

**The Program.** At the lower division level, the major curriculum provides an interdisciplinary overview of various topics. Students are advised to take courses that serve as prerequisites for certain upper division courses. At the upper division level, majors pursue advanced interdisciplinary course work in both the humanities/art and the social sciences. At this level, students will find courses in Chicana/Chicano history, theory, health and several courses taught from a variety of disciplinary perspectives.

**Career Alternatives.** A degree in Chicana/o Studies provides broad intellectual foundations which are useful to the graduate for the development of careers in a variety of areas, including work in cross-cultural education, cultural/art centers, community development, public policy and social welfare. The interdisciplinary structure of the Bachelor of Arts degree in Chicana/o Studies also provides excellent preparation for graduate study in a variety of fields.

**Major Advisor.** Alma Martinez, M.A.

Child Development (Graduate Group)

Child Development (Graduate Group) | Child Development M.S.

Amanda Guyer, Ph.D., Group Chairperson
Graduate Study. The Graduate Group in Child Development offers a multidisciplinary program leading to an M.S. degree. The program provides students with an opportunity to pursue a coordinated course of postgraduate study in the field of child development which cuts across departmental boundaries. Students may work with children and families in the community, as well as the University’s Center for Child & Family Studies. Recipients of the degree gain sufficient background to engage in professions that directly (e.g., preschool, 4-H) or indirectly (e.g., social policy) involve children and families, obtain positions in teaching or research settings, or pursue further study leading to a doctorate in child development, human development, clinical psychology, or related fields.

Applicants seeking admissions and fellowships consideration must submit all materials by our priority December 15 deadline. The final admissions deadline is March 1. For more details, see http://humandevelopment.ucdavis.edu/.

Graduate Advisor. Contact Group office.

Chinese; East Asian Languages & Cultures

The Major Program

The department offers a core language program in Chinese, and courses in literature and culture. The core language program has two tracks: one for students who have no Chinese-language background whatsoever and one for students with prior background.

The Program. Practical language skills are taught using contemporary methods and materials, so that upon entering the upper division a student will have attained substantial fluency in the spoken language (listening and speaking) and the written language (reading and writing). Upper-division courses balance the need to further develop language skills with the need to understand and appreciate the richness and diversity of Chinese culture. All students are encouraged to combine their study of language and literature with courses in related fields, and to study abroad through the Education Abroad Program, the UC Davis Study Abroad Program or through internships in China or Taiwan.

Career Opportunities. UC Davis graduates have learned that a major in Chinese is a meaningful, earned distinction that facilitates entrance to graduate programs and professional schools. In addition, job opportunities abound in virtually all career paths, especially for graduates who have completed study abroad.

Honors Program. To be eligible to receive high or highest honors in the Chinese major, students must complete a senior thesis project. A student interested in pursuing a senior thesis project must enroll in CHN 194H and complete a scholarly paper or similar research project under the direction of a senate faculty member. The thesis project will have a minimum duration of two quarters and carry a minimum of 6 units of credit. To qualify to undertake the senior thesis project, a student must have completed at least 135 units with a minimum GPA of 3.500 in courses counted toward the major. Interested students should consult with faculty in their field of interest by the quarter before they hope to commence work on the project (in most cases this will be the Spring Quarter of their junior year). Students who complete the senior thesis project and have an overall GPA that qualifies them for honors may be recommended by the faculty for honors, high honors, or highest honors at graduation.
**Education Abroad Program.** The university maintains study abroad programs in China, Hong Kong, and Taiwan. They offer excellent opportunities for students to polish their language skills and experience Asian cultures firsthand. Students are encouraged to participate. Appropriate courses taken abroad can be applied toward the major or the minor. For details, see the department's undergraduate advisor, the Education Abroad Program Office or the UC Davis Study Abroad Office.

**Related Courses.** See East Asian Studies (EAS) course list.

**Prerequisite Credit.** No student may repeat a course if that course is a prerequisite for a course that has already been completed with a grade of C– or better.

**Placement.** Chinese 001 is intended for beginning students with no prior knowledge of the Chinese language. Students who do have some knowledge but wish to improve their skills should meet with an advisor to discuss appropriate placement. Students must follow departmental guidelines for placement in all language courses and instructor approval is required for enrollment.

**Backtracking.** Satisfactory completion of a language course is evidence that a student’s language skills are beyond the level of those expected in its prerequisite courses. Accordingly, students who have completed a language course cannot go back and take its prerequisites. If the prerequisite courses are required for the major, students may substitute other courses. Students who are not sure how this requirement applies to them should speak to the undergraduate advisor.

**Waived Language Courses.** Students with exceptional language ability may waive required language courses. If lower division courses have been waived, students will not have to take courses in their place. If upper division courses have been waived, students can use other appropriate courses to earn the units they need to complete the major. Consult the undergraduate advisor regarding selection of appropriate courses.

**Grading.** Students may take up to two and no more than two (regular, letter-graded) courses for the major on a P/NP basis. Courses which are only offered on a P/NP basis do not count toward these limits.

Chinese; East Asian Languages & Cultures | CHN Minor

(College of Letters & Science)

Department Office. 211 Sproul Hall; 530-752-4999; https://ealc.ucdavis.edu/

Faculty. https://ealc.ucdavis.edu/people

A minor is offered in Chinese for students wishing to follow a formally recognized program of study in Chinese language and literature. For the minor, students may take one (regular, letter-graded) course on a P/NP basis. Courses which are only offered on a P/NP basis do not count toward these limits.

Chinese

All upper division CHN courses, including both language courses and literature in translation courses, may be used to meet this requirement. One approved lower division course may also be used; CHN 010, 011, 050. In addition, students must demonstrate their language proficiency, normally through completion of CHN 003BL or 006. Only four units from 192, 197T, 198, and 199 may be applied to the minor. For details, consult the undergraduate advisor.

Cinema & Digital Media

Cinema & Digital Media | Cinema & Digital Media A.B.

(College of Letters & Science)

Timothy Lenoir, Ph.D., Chairperson of the Department

Department Office. 101 Art Building; 530-752-0105; http://arts.ucdavis.edu/cinema-and-digital-media

Faculty. http://arts.ucdavis.edu/cinema-digital-media-program-faculty

The Cinema & Digital Media Major Program

The Cinema & Digital Media (CDM) program combines the study of audio-visual and digital media, theories about such media, and the relevant modes of artistic practice and production. CDM integrates the analysis of audio-visual
and digital texts with their theoretical underpinnings and their methods of production. The program also addresses the particular impact that technology has on culture in its many forms and fields.

CDM faculty teach and research on various histories, theories, and practices of media. Current fields for teaching and research in cinema and digital media include the history and analysis of film and video, film and video production, electronic music, digital content creation and design, the digital arts, community media and activism, computer graphics, animation, and gaming—as well as the theories and politics of these various areas.

The Program. Preparatory course work involves a solid introduction to the history, ideas and current trends in cinema and digital media. For depth subject matter, students in the major select a combination of critical studies and creative production courses. Two courses will be selected from the production/programming distribution, two from the theory/history distribution and four will be elected by the student, allowing them to take up to six production courses or six studies/theory classes, should they so choose.

Major Advisor. Information on the current Academic Advisors can be obtained by contacting the Arts Group Advising Center at 530-752-0616 or http://arts.ucdavis.edu/arts-group-undergraduate-advising.

Career Alternatives. Cinema & Digital Media is designed to prepare graduates to be highly adaptable analytical thinkers, collaborative, multi-skilled and current with the latest developments in media and technology. Perhaps most importantly is self-motivation: students do best when fueled by their own passions and plot their own directions, while held to very high standards. We feel this is the best education for living and working in a complex, rapidly changing world. Final research papers and creative production portfolios will provide graduate school admissions committees, employers or clients with tangible evidence of Cinema & Digital Media graduates' track records and talents.

Course Changes. Cinema & Digital Media is working on updating all of the existing FMS, TCS, and CTS courses to the CDM course subject code. If you have any questions regarding the course subject code changes and equivalent major requirements, please contact the Arts Group Advising Center at 530-752-0616.

Choose four additional courses, chosen from the lists above, for a total of at least 16 units.

Some courses are identified as fulfilling more than one requirement; a given course can only fulfill one such requirement.

Total: 60-62
Civil & Environmental Engineering; Engineering

Civil & Environmental Engineering; Engineering | ECI Information
(College of Engineering)
Amit M. Kanvinde, Ph.D., Chairperson of the Department; 530-752-0586
Department Office. 2001 Ghausi Hall; 530-752-0586; http://cee.engr.ucdavis.edu
Faculty. http://cee.engr.ucdavis.edu/people/faculty-directory/

Civil & Environmental Engineering; Engineering | ECI M.S.
(College of Engineering)
Amit M. Kanvinde, Ph.D., Chairperson of the Department; 530-754-9471
Department Office. 2001 Ghausi Hall; 530-752-0586; http://cee.engr.ucdavis.edu
Faculty. http://cee.engr.ucdavis.edu/people/faculty-directory/
M.S.
http://cee.engr.ucdavis.edu/graduate; 530-752-1441

With over forty faculty members, over $20 million in annual research expenditures and over 200 graduate students, the Department of Civil and Environmental Engineering integrates research, education and professional service in areas related to civil infrastructure and the environment. Graduate students benefit from close working relationships with professors who are the leading international experts in their field. Students pursuing their M.S. degrees have the opportunity to follow a more coursework-focused track or research-focused track. Graduate students pursuing their M.S. will specialize in one of five core areas: environmental, geotechnical, structural/structural mechanics, transportation or water resources engineering. Our graduates go on to serve the profession and academia by advancing the leading edge of fundamental knowledge, as well as engineering practice.

Financial support is available in the form of research assistantships, teaching assistantships, fellowships and financial aid. Over 80% of the graduate students in our program are either fully or partially supported through one or more of these paths.

Research Area Highlights:

- Alternative fuel transportation infrastructure
- Earthquake engineering
- Environmental engineering
- Environmental planning and management
- Geotechnical engineering
- Hydraulics and fluid mechanics
- Hydrology
- Structural engineering
- Structural health monitoring
- Structural mechanics
- Systems planning and design
- Transportation engineering
- Transportation planning and design
- Water resources engineering

Research Facilities and Partnerships:

- Pavement Research Center & Advanced Transportation Infrastructure Research Center
- Center for Bio-mediated & Bio-inspired Geotechnics
- Center for Geotechnical Modeling
- Center for Watershed Sciences
- Center for Water-Energy Efficiency
Complete Information is on our website.

Civil & Environmental Engineering; Engineering | ECI Ph.D.

Ph.D.; Designated Ph.D. emphasis available in Biotechnology
http://cee.engr.ucdavis.edu/graduate; 530-752-1441

With over forty faculty members, over $20 million in annual research expenditures and over 200 graduate students, the Department of Civil & Environmental Engineering integrates research, education and professional service in areas related to civil infrastructure and the environment. Graduate students benefit from close working relationships with professors who are the leading international experts in their field. They are supported in their study and research by robust funding, and they have access to state-of-the-art research facilities within the program and in interdisciplinary CEE faculty-led centers across campus. Our graduates go on to serve the profession and academia by advancing the leading edge of fundamental knowledge, as well as engineering practice.

Generous financial support is available in the form of research assistantships, teaching assistantships, fellowships and financial aid. Over 80% of the graduate students in our program, and nearly all Ph.D. students, are either fully or partially supported through one or more of these paths.

Research Area Highlights:

Civil Engineering; Engineering | Civil Engineering B.S.

(College of Engineering)

Amit M. Kanvinde, Ph.D., Chairperson of the Department; 530-752-2605

Department Office. 2001 Ghausi Hall; 530-752-0586; http://cee.engr.ucdavis.edu

Faculty. http://cee.engr.ucdavis.edu/people/faculty-directory/

The civil engineering profession is responsible for designing, building, operating and maintaining the physical infrastructure and protecting the natural environment that together support human society in an economically and environmentally sustainable manner. The need to predict and mitigate the impact of complex human- and nature-induced stresses on large-scale, geographically-distributed systems has never been more evident than now. These challenges and inevitable societal changes result in a need to develop and adopt new technologies and improved efficiency into the infrastructure.

The Civil Engineering program is accredited by the Engineering Accreditation Commission of ABET; see http://www.abet.org.

Students are encouraged to adhere carefully to all prerequisite requirements. The instructor is authorized to drop students from a course for which stated prerequisites have not been completed. Exclusive of General Education units, the minimum number of units required for the Civil Engineering major is 153 (74 units in lower division and 79-89 units in upper division).

Areas of Specialization

Environmental Engineering. This area focuses on understanding and management of physical, chemical, and biological processes in natural and engineered systems. Areas of emphasis include improvement of air, land, and water quality in the face of increasing population, expanding industrialization, and global climate change. Examples of environmental engineering include innovative analysis and design of air, water, wastewater, and solid waste treatment systems; mathematical modeling of natural and engineered systems; life cycle analysis; sampling, analysis, transport and transformation of natural and anthropogenic pollutants; and modeling of air pollutant emissions.

Geotechnical Engineering. This area encompasses civil infrastructure and environmental problems that require characterization and utilization of geologic materials (soils and rocks) to develop, design, analyze and model engineered solutions. This includes, but is not limited to, foundations for buildings, bridges, retaining structures, earthwork (e.g. dams, tunnels, highways), pavements, effects of earthquakes and other natural hazards (e.g. ground motions, liquefaction, soil-structure interaction, landslides, tsunamis), ground improvement methods (e.g. compaction, cement mixing), and geo-environmental problems (e.g. ground water flow, subsurface contaminant transport and remediation).

Suggested Advisors. R.W. Boulanger, Y.F. Dafalias, J.T. DeJong, J.T. Harvey, B. Jeremic, B.L. Kutter, A. Martinez, K. Ziotopoulou

Structural Engineering & Structural Mechanics. Structural Engineering addresses the conception, design, analysis, construction, retrofit and modeling of all types of civil infrastructure, including buildings, bridges, dams, ports, highways, and industrial facilities subject to loadings ranging from gravity and earthquakes, to extreme environmental events, with consideration of safe, serviceable, and sustainable outcomes over the entire life-cycle. Structural Mechanics encompasses theories for solids and structures, and the associated methods of analysis,
computation and materials characterization used in the practice of Structural Engineering. For both disciplines, materials of particular interest include steel, concrete, timber, advanced composites and particulate media.

**Transportation Planning & Engineering.** This area deals with the movement of people and goods in a manner consistent with society’s environmental and socio-economic goals. Transportation engineering applies engineering, physical and mathematical sciences, economics, and behavioral social science principles to plan, analyze, design, and operate resilient and sustainable transportation systems, such as highways, transit, airfields and ports. Transportation planning involves the formulation and analysis of transportation policy, program, and project alternatives. Societal goals, budgetary constraints, socio-economic (such as safety, equity and mobility) and environmental (such as air and water quality, climate change, and clean energy) objectives, and technological feasibilities (such as vehicle, infrastructure, and information technologies) are considered.

**Suggested Advisors.** Y. Fan, J.T. Harvey, M.A. Jaller, A. Kendall, M.P. Modera, D.A. Niemeier, D. Sperling, H.M. Zhang

**Water Resources Engineering.** This area includes hydrology, hydraulics, fluid mechanics, and water resources systems planning and design. Hydrology deals with quantifying and understanding all aspects of the hydrologic cycle, including the relationships between precipitation, runoff, groundwater, and surface water. Water quality and contaminant transport issues are linked to hydrologic conditions. Hydraulics and fluid mechanics deal with flows in pipes, open-channel water-distribution systems, and natural systems, such as lakes and estuaries. Water resources systems planning and design deals with the comprehensive development of water resources to meet the multiple needs of industry, agriculture, municipalities, recreation, and other activities.

Additional information on areas of specialization and potential faculty advisors can be obtained from the departmental website.

</tr>
</tbody>
</table>

**Civil & Environmental Engineering Electives**

Civil & Environmental Engineering electives may include any upper division, letter-graded Civil & Environmental Engineering courses (i.e. not already used towards the ECI breadth, ECI depth and math analysis requirements) and may include ENG 102 or 105. If both ENG 102 and 105 are completed 4 units will be considered towards the ECI electives. Also can include, but not exceed, a combination of six units from ECI 198 and 199. A maximum of four units of upper-division coursework outside of Civil & Environmental Engineering may be considered on a petition basis. Please consult with the undergraduate staff advisor.

If ECI 003 was not completed in the Lower Division requirements, 20 units of electives are required.
### Upper Division Composition Requirement: choose one: a grade of C- or better is required:

**Faculty.** [https://classics.ucdavis.edu/people/classics-faculty](https://classics.ucdavis.edu/people/classics-faculty)

#### Classical Civilization; Classics | Classical Civilization A.B.

(College of Letters & Science)

Carey Seal, Ph.D., Program Director

**Department Office.** Classics Program; 211 Sproul Hall; 530-752-4999; [http://classics.ucdavis.edu](http://classics.ucdavis.edu)

**Faculty.** [https://classics.ucdavis.edu/people/classics-faculty](https://classics.ucdavis.edu/people/classics-faculty)

### The Major Program

Classical Civilization is an interdisciplinary major that examines the ancient Mediterranean cultures of Greece, Rome and the Near East, with courses offered on the languages, history, literature, religions, myths, art and archaeology of these societies, their achievements in rhetoric and philosophy, and their political and social institutions. Minor programs in Classical Civilization, Greek, and Latin, and many General Education courses are also offered.

#### The Program.

The major has two tracks: (1) Classical and Mediterranean Civilizations, and (2) Classical Languages and Literatures. The core of both major tracks consists of two years of Latin or Greek, the introductory sequence on the ancient Mediterranean world (CLA 001, 002, 003 or 004), the advanced seminar (CLA 190), and a number of electives. The Classical and Mediterranean Civilization track allows students to choose their electives from a broadly balanced program in history, art and archaeology, literature, philosophy and rhetoric. The Classical Languages and Literatures track focuses more intensively on language and literature, requiring the study of two languages and allowing fewer electives. Students planning to go on to graduate work in Classics should take Track 2 and study as much Latin and Greek as possible. They should make a point of talking to an advisor early in their undergraduate program. They are also advised to acquire a reading knowledge of French or German.

#### Career Opportunities.

A degree in Classical Civilization represents a solid liberal arts education that provides an excellent foundation for a wide variety of careers. In the last twenty-five years, many majors have applied to law or medical schools and nearly all have been accepted. Additional career options include library and museum work, teaching, journalism, and graduate study in Classics, art, archaeology, history, literature, philosophy, and religion.

#### Major Advisors.

V. Popescu, C. Seal, A. Uhlig, Colin Webster

#### Honors Program.

Candidates for high or highest honors in Classical Civilization must write a senior honors thesis under the direction of a faculty member in Classics. Potential candidates for the honors program must enroll in Classics 194HA and 194HB, normally during the first two quarters of the senior year. Enrollment is limited to upper division students with a minimum of 135 units, and a 3.500 grade point average in courses in the Classical Civilization major. For further information, students should consult with the major advisor or program director. The
requirements for the honors program are in addition to the regular requirements for the major in Classical Civilization.

Graduate Study. The Department offers a master’s degree in Classics with emphasis on either Greek or Latin; however, admission into the graduate program has been suspended.

Prerequisite credit. Credit will not normally be given for a lower division course in Latin or Greek if it is the prerequisite of a course already successfully completed. Exceptions can be made by the Program Director only.

### Clinical Nutrition

#### Clinical Nutrition | Clinical Nutrition B.S.

(College of Agricultural & Environmental Sciences)

**Faculty.** [http://nutrition.ucdavis.edu/people/faculty/index.html](http://nutrition.ucdavis.edu/people/faculty/index.html)

**The Major Program**

The Clinical Nutrition major provides students with training in normal and therapeutic nutrition, biological and social sciences, food science, communication, business management and food service management. This major fulfills the academic requirements for admission into a dietetics internship or the equivalent, which must be completed before qualifying for registration as a dietitian.

**The Program.** The Clinical Nutrition major (formerly Dietetics) includes the same basic core of nutrition classes as the Nutrition Science major, but includes additional courses such as food service management, education, sociology, and communication skills to prepare for work with the public. Clinical Nutrition students spend the first two years completing preparatory course work in the basic biological sciences, along with several of the social sciences. In the final two years, students take courses in normal and clinical nutrition, food science, biochemistry, and management techniques.
Entering freshman or transfer students are assumed to have basic computer skills and to demonstrate mathematics competency adequate to pass the Math Placement Exam with a minimum score of 25.

**Major Advisor.** Francene Steinberg (Nutrition)

**Advising Center** for the major is located in 3202 Meyer Hall; 530-752-2512.

**Career Alternatives.** The Clinical Nutrition major qualifies students to apply for a dietetic internship accredited by the Accreditation Council for Education in Nutrition and Dietetics enabling them to become a Registered Dietitian, the professional credential necessary to work in a clinical setting. Once dietitians are registered, they generally seek employment in administrative, therapeutic, teaching, research, or public health/public service positions in clinics, hospitals, schools, or other similar institutions. There is a growing role for dietitians working in settings outside of the traditional hospital (for example, in state and federal nutrition programs, nutrition education, Peace Corps and Cooperative Extension work). Students who complete the undergraduate preparation in clinical nutrition are also qualified to enter graduate programs in dietetics, nutrition science, public health nutrition, and food service management.

Clinical Research (Graduate Group)

Clinical Research (Graduate Group) | Clinical Research M.A.S.
Valentina Medici, M.D., M.A.S, Chairperson of the Group

Group Office. CTSC, 2921 Stockton Blvd., Sacramento, CA 95817; 916-703-9110

Faculty, https://health.ucdavis.edu/clinicalresearch/faculty.html

Graduate Study. Graduate Group in Clinical Research (GGCR) is an interdisciplinary graduate group in clinical research with a Master of Advanced Study degree in Clinical Research. The GGCR provides a solid clinical/translational, patient-oriented research foundation for junior faculty, clinical and pre-clinical fellows, and post-doctoral scholars. The program centers around three core elements: didactic instruction, mentored research, and special experiences.

Mandatory course work includes biostatistics, epidemiology, patient-oriented research, health services research, data management/informatics, scientific communication, research management, research ethics and career development. The instruction includes a 6-8-week summer curriculum followed by a one- or two-year core curriculum and electives that can be tailored to best meet each scholar’s career development needs.

Degree Offered. M.A.S. Plan II

Degree Requirements can be found at https://health.ucdavis.edu/clinicalresearch/curriculum.html.

Coaching Principles & Methods Minor; Physical Education

Coaching Principles & Methods Minor; Physical Education | Coaching Principles & Methods Minor

227
The Coaching Principles & Methods minor is an interdisciplinary minor open to undergraduates in all four colleges. Students must complete a statement of interest to assist in placing them in future internships. This form is available in the Physical Education Program Office, in 264 Hickey Gym, and may be turned in at any time.

Minor Advisor. Lou Bronzan; 530-752-5541 or stbronzan@ucdavis.edu

PHE 192 has a prerequisite of junior/senior standing. PHE 192 cannot be taken until after a student has completed more than 90 total units. PHE 192 internship must be in a coaching or teaching setting. Setting must be approved IN ADVANCE by the coaching minor advisor before a CRN will be issued.

Required Minor Electives

A minimum of eight units with courses from at least two different departments. One course must be taken from race/class/gender list. Second course can be from race/class/gender list or from sociocultural issues & settings list.

Cognitive Science | CGS A.B.
(College of Letters & Science)
David Corina, Ph.D., Program Director

Program Office. 101 Young Hall; cogsciadvising@ucdavis.edu; http://cogsci.ucdavis.edu/
Faculty. http://cogsci.ucdavis.edu/faculty.html
The Major Programs

The Cognitive Science major is designed to provide a broad interdisciplinary approach to the study of mind that includes courses from different departments and attracts students with a variety of interests. It emphasizes a multifaceted approach to the study of mind that integrates concepts and techniques from psychology, artificial intelligence, linguistics, neurology, philosophy and other relevant fields.

For students interested in the liberal arts the Cognitive Science major can be pursued as a Bachelor of Arts (A.B.) program. Alternatively, it can be pursued as a Bachelor of Science (B.S.) program for students with a stronger interest in the mathematical, neurological and computational foundations of the discipline. The main objective of both programs is to give the student a broad grounding in the integrated sciences of the mind and to connect approaches from different fields. Students must complete a number of core courses for the degree, as well as a number of specialty courses on such wide-ranging topics as logic for artificial intelligence, computational linguistics, cognitive neuroscience, animal cognition and the psychology of music.

Career Alternatives. A degree in Cognitive Science provides broad intellectual foundations useful for careers in a variety of areas, including teaching, business, social work/counseling and the information technology industry. An undergraduate education in cognitive science also prepares the student for graduate study in appropriate subfields of psychology, linguistics, philosophy and informatics. It is also suitable training for pre-medicine, pre-law, and pre-management students.

Major Advisors. Staff advisors are available in 101 Young Hall; 530 752 5104; cogsciadvising@ucdavis.edu; http://cogsci.ucdavis.edu/advising.html.

- MAT 022AL  Linear Algebra Computer Laboratory  1
- MAT 027A  Linear Algebra with Applications to Biology  4

Cognitive Science; choose one:
- PHI 010  Introduction to Cognitive Science  4
- CGS 001  Introduction to Cognitive Science  4

Philosophy  8
- PHI 012  Introduction to Symbolic Logic  4
- PHI 013G  Minds, Brains, and Computers with Discussion  4

Psychology  8
Choose one:
- PSC 001  General Psychology  4
- PSC 001Y  General Psychology  4
- PSC 041  Research Methods in Psychology  4

Statistics; choose one:
- STA 013  Elementary Statistics  4
- STA 100  Applied Statistics for Biological Sciences  4

Depth Subject Matter  Units: 47-50
All from group A:  12
Group A: Core
One four-unit upper division course in Cognitive Science (CGS).
Choose one:
- PSC 100  Introduction to Cognitive Psychology  4
- PSC 100Y  Introduction to Cognitive Psychology  4
- PHI 112  Intermediate Symbolic Logic  4

Choose three from group B:  12
Group B: Computation
- ECS 120  Theory of Computation  4
- ECS 170  Introduction to Artificial Intelligence  4
- ECS 171  Machine Learning  4
- LIN 177  Computational Linguistics  4
- PHI 133  Logic, Probability, and Artificial Intelligence  4

Choose one from group C:  4
Group C: Neuroscience

The Major Program

The major in communication focuses upon human symbolic behavior in interpersonal and mediated contexts.

The Program. The program of study in communication examines communication processes at several different levels of analysis. Courses dealing with communication at the individual, interpersonal, organizational and societal levels of analysis are offered. The emphasis in the program reflects the changing focus in the discipline and society toward computer-mediated communication, quantitative behavioral science and cognitive science. Classes addressing such topics as communication and cognition, message systems, interpersonal communication, nonverbal communication, communication and persuasion, organizational communication, mass media effects, computer-mediated communication and public communication campaigns explore communication at these levels of analysis. Related social science courses are also part of the major.

Major Advisors. Contact department.

Career Alternatives. Communication graduates have found careers in such fields as broadcast and print journalism, administration, sales, management, politics and government, education, social work, and public relations. A communication degree is also excellent preparation for law school or other graduate programs.

Grading recommendation. Although not required, it is recommended that all courses offered in satisfaction of the major, except variable-unit courses, be taken for a letter grade.

Graduate Study. The Department of Communication offers programs of study and research leading to M.A. and Ph.D. degrees in Communication. Detailed information may be obtained from the Graduate Advisor, Department of Communication.

Community & Regional Development

Community & Regional Development | CRD B.S.

(College of Agricultural & Environmental Sciences)

(Department of Human Ecology)

Jonathan London, Ph.D., Community & Regional Development Program, Vice-Chairperson of the Department

Department Advising Office. 1303 Hart Hall; 530-752-2244, 530-752-1805; 530-752-9322; https://humanecology.ucdavis.edu/

Faculty. http://humanecology.ucdavis.edu/crd-faculty

The Major Program

The Community & Regional Development major aims to provide a broad comparative understanding of theories, methodologies, and issues relevant to the study of communities and the people in them. The program focuses on the ways that economic, political and socio-cultural forces are transforming the world, countries, regions, and local communities, and it considers how knowledge can be used to improve the quality of community life.

The Program.

Principal subjects of study within the major are community, regional, and organizational development; social change processes; community and regional research methodologies; the role of class, ethnicity, gender, and race in shaping social life; the impacts of innovation and technology on communities, and the effects of social, economic and political systems on regions. The major is organized to allow students to develop fields of concentration that meet their career goals.

Major Advisor. M. Kenney, mfkenney@ucdavis.edu

Internships and Career Alternatives. Community & Regional Development students are required to complete an internship in their field before graduation. Internships have been arranged with local, county, and state planning units, health departments, schools, housing offices, businesses, and education programs, among others. Community and Regional Development graduates are prepared for occupations in community development, social research, program evaluation, organizational and educational consulting, city and regional planning, and for-profit organizations. The major also provides effective preparation for graduate or professional study in the social and behavioral sciences or for professional degrees.

Honors Program. An Honors Program is available to Human & Community Development majors who have demonstrated excellence in their field of study. Entrance into the honors program requires that a student have completed at least 135 units with a minimum grade point average of 3.500 in upper division courses counted toward the major. The program consists of a project whose specific nature is determined in consultation with the student's Honors Adviser. It may involve completion of a research project, a scholarly paper, a senior thesis, or some comparable assignment. The project will have a minimum duration of two quarters and will be noted on the student's record by a variable unit course number or special honors course designation. Successful completion of
the honors program requires that a minimum of eight (8) units of credit be earned in course work for the project. It is expected that a student participating in the Honors Program of the Community & Regional Development major will participate in the Undergraduate Research, Scholarship and Creative Activities Conference. Additionally, students participating in the Honors Program will be required to give a public presentation of their work in a departmental seminar program.

**Honors Program Advisor.** M. Kenney, mkenney@ucdavis.edu

**Methods for Community Research; at least one must be CRD 151 or 156:**

| CRD 151 Community Field Research: Theory and Analysis | 5 |

241
CRD 156 Community Economic Development 5
CMN 102 Empirical Methods in Communication 4
EDU 114 Quantitative Methods in Educational Research 4
LDA 150 Introduction to Geographic Information Systems 4
SOC 103 Evaluation Research Methods 4
SOC 106 Intermediate Social Statistics 5

Internship 4
CRD 192 Internship 1-12

Areas of Specialization  Units: 40

Choose 20 units from each of two options, including at least one Community and Regional Development course from each option, or 40 units from one option, including at least two Community and Regional Development courses. These courses cannot overlap with the depth subject. Up to four units of variable-unit course work may be counted toward this requirement; e.g., Community and Regional Development 192.

Global Communities Option 40

Faculty. http://nutrition.ucdavis.edu/people/faculty/index.html

The Department of Nutrition offers four minor programs open to students majoring in other disciplines who wish to complement their study programs with a concentration in the area of food and nutrition.

Minor Advisor. 3202 Meyer Hall; 530-752-2512

Note: If the student's major program requires the same course in biochemistry and physiology, only one of the courses may duplicate credit toward the minor. Each program below lists replacement courses to fulfill the minimum unit requirement.

The Major Program

Comparative Literature is a dynamic major whose own self-definition is constantly shifting. Once mostly limited to the study of western European literature and its Greco-Roman classical past, today Comparative Literature has become a global interdisciplinary study of literature in original languages and other media (including cinema, television, fine arts, and opera, for example). Thus, we can define Comparative Literature as the study of literature and culture across national boundaries and throughout historical time.

The Program. Both the major and the minor programs in Comparative Literature allow students to combine courses in one or more national literature departments with courses in Comparative Literature. The introductory course sequence (COM 001 - 004) provides both an overview of ancient to contemporary literature and film and offers intensive practice in analytical thought. In addition, any one of the courses in the sequence satisfies the university composition requirement. All readings in undergraduate Comparative Literature courses are in English, but majors take upper division courses in at least one foreign literature in the original language.

Students majoring in Comparative Literature choose a first and second literature of concentration, one of which may be English. After the introductory sequence, each student's major course work is divided between courses in the two literatures of concentration and Comparative Literature courses. These Comparative Literature courses encourage students to take a broad view of a historical period, a theme, a genre, or a literary movement. The wide variety of options in the program permits great flexibility and encourages interdisciplinary connections among literature and philosophy, psychology, history, and the arts. Each student's plan of study must be approved by the major adviser at the beginning and end of each calendar year.

Advising. All Comparative Literature majors and minors must consult with their advisor, individually, at least once at the beginning and once at the end of each academic year.

Major Advisor. Consult the Department office.

Career Alternatives. A Comparative Literature major offers an excellent enhancement to pre-professional training, preparing students for graduate study in medicine, dentistry, veterinary medicine, and other science fields as well as law and business, besides of course journalism and publishing, teaching, or graduate study in literature.

Honors and Honors Program. Students, who meet the grade point requirement for graduation with honors and complete the requirements established by the College of Letters and Science, may be recommended by the department for graduation with high honors or highest honors on the basis of an evaluation of their academic achievements in the major and in the honors project in particular. Entrance into the honors program requires that a student have completed at least 135 units with a minimum grade point average of 3.500 in courses counted toward the major.

Candidates must write a senior thesis under the direction of a faculty member approved by the major adviser. For this purpose, in addition to fulfilling all other major requirements, honors candidates must enroll in 6 units of COM 194H during the first two quarters of the senior year.

It is recommended that students who do not use a European language toward the major take one of the remaining required lower division courses in the 053 series, preferably the 053 course that relates to the region of the language the student is using to satisfy the upper division language requirement in the major.

Foreign Language

Sufficient preparation to ensure satisfactory performance at the upper division level.

Depth Subject Matter

Units: 40
Choose five upper division Comparative Literature courses including at least one course in a major period (such as 164A-164B-164C-164D), movement (such as 168A-168B, 169) or genre (such as 160A-160B, 161A-161B, 163, 166A-166B) and including the following required courses:

COM 141  Introduction to Critical Theoretical Approaches to Literature and Culture 4

COM 195  Senior Seminar in Comparative Literature 4

COM 195 to be taken in the spring quarter before graduation.

Three upper division literature courses in a language other than English. 12

Two additional upper division literature courses in Comparative Literature or in any other program including English or literature in translation. 8

Total: 56-86

Comparative Literature | COM M.A.

(College of Letters & Science)

Chairperson, Consult the Department Office

Department Office. 207 Sproul Hall; 530-752-2115; http://complit.ucdavis.edu

Faculty. http://complit.ucdavis.edu/people/faculty

Graduate Study. The Comparative Literature Program offers the Ph.D. degree with a strong emphasis on individual research under the supervision of a faculty member. Candidates for the Ph.D., in addition to research of a comparative nature, study three literatures (one of which may be English and/or American) in the original languages, acquiring an extensive knowledge of the overall development of one. Students may choose to focus on a special topic instead of on a third literary tradition.

Within this framework, each student's program will be tailored to individual interests, and may center on a major historical period, such as the Renaissance or the modern age; a genre, such as lyric poetry, epic, drama, or the novel; or any other special emphasis approved by the Graduate Advisor.

Preparation. For admission to the Ph.D. Program candidates should have an undergraduate major in literature and reading ability in three foreign languages. The Group requires three letters of recommendation and a sample of recent written work, and it is recommended that students submit their GRE scores.

Graduate Advisor. Consult the graduate advising office.

Comparative Literature | COM Ph.D.

Choose at least five upper division literature courses, at least four of which are in Comparative Literature (COM); COM 141 & COM 195 recommended.

Courses should be chosen in consultation with, and with the approval of, the advisor.

Total: 24

**Computational Biology Minor; Computer Science Engineering**

**Computational Biology Minor; Computer Science Engineering | Computational Biology Minor**

(College of Engineering)

Matthew Farrens, Ph.D., Chairperson of the Department

Department Office. 2063 Kemper Hall 530-752-7004; http://www.cs.ucdavis.edu

The minor in Computational Biology will provide to students with engineering, physical science or biological science majors the foundations necessary to build efficient computational models and algorithms, use state-of-the-art techniques for scientific analysis and create scalable infrastructure environments for biological and biotechnological applications.

Students must take a total of 19-24 upper division units, with two required courses and 11-12 units of upper division electives, as specified below. A minimum GPA of 2.000 is required for coursework in the minor. Students should note that most of the courses listed below have lower division prerequisites. In particular, required course ECS 122A has a prerequisite chain of ECS 020, 036A, 036B, and 036C. No more than one course of Upper Division work will be permitted for overlap between any major and the minor.

**Minor Advisors.** T. Pham, V. Filkov, D. Gusfield, P. Koehl, J. Sison, I. Tagkopoulos
Computational Biology

**Required Courses**
- ECS 122A Algorithm Design and Analysis 4
- ECS 124 Theory and Practice of Bioinformatics 4

**Electives**
- Choose at least one biology course; four units minimum: 4
  - MCB 121 Advanced Molecular Biology 3
  - MCB 124 Macromolecular Structure and Function 4
  - MCB 182 Principles of Genomics 3
  - EVE 100 Introduction to Evolution 4
  - EVE 101 Introduction to Ecology 4
  - EVE 102 Population and Quantitative Genetics 4
  - EVE 103 Phylogeny, Speciation and Macroevolution 4
  - EVE 131 Human Genetic Variation and Evolution 3
  - BIS 101 Genes and Gene Expression 4
  - BIS 104 Cell Biology 3
  - BIS 122 Population Biology and Ecology 3

- Choose at least one computational or statistics course: 4
  - ECS 130 Scientific Computation 4
  - ECS 132 Probability and Statistical Modeling for Computer Science 4
  - ECS 140A Programming Languages 4
  - ECS 145 Scripting Languages and Their Applications 4
  - ECS 158 Programming on Parallel Architectures 4
  - ECS 160 Software Engineering 4
  - ECS 165A Database Systems 4
  - ECS 170 Introduction to Artificial Intelligence 4
  - ECS 177 Scientific Visualization 4
  - STA 130A Mathematical Statistics: Brief Course 4
  - STA 141A Fundamentals of Statistical Data Science 4
  - STA 141B Data & Web Technologies for Data Analysis 4
  - STA 141C Big Data & High Performance Statistical Computing 4
  - BIT 150 Applied Bioinformatics 4
  - BIS 132 Introduction to Dynamic Models in Modern Biology 4

**Choose at least one computational biology and bioinformatics course:** 4
- ECS 129 Computational Structural Bioinformatics 4
- BIS 132 Introduction to Dynamic Models in Modern Biology 4
- BIM 117 Modeling Strategies for Biomedical Engineering 4
- BIT 150 Applied Bioinformatics 4

**Total:** 20-23

Computer Engineering; Electrical & Computer Engineering

Computer Engineering; Electrical & Computer Engineering | Computer Engineering B.S.

(College of Engineering)

Saif Islam, Ph.D., Chairperson of the Department

Josh Hihath, Ph.D., Vice Chairperson for Undergraduate Studies

Khaled Abdel-Ghaffar, Ph.D., Vice Chairperson for Graduate Studies

**Department Office.** 2064 Kemper Hall 530-752-0583; [http://www.ece.ucdavis.edu](http://www.ece.ucdavis.edu)

**Faculty.** [http://www.ece.ucdavis.edu/people/faculty/](http://www.ece.ucdavis.edu/people/faculty/)

**The Electrical & Computer Engineering Undergraduate Programs**
The department administers two undergraduate curricula in the College of Engineering: (1) the Electrical Engineering curriculum and (2) the Computer Engineering curriculum.

**Integrated Degree Program (IDP).** The IDP leads to both the Bachelor of Science and the Master of Science degrees. The program provides a student the opportunity to obtain superior breadth and depth of technical material. The IDP program in the Department of Electrical & Computer Engineering is available only to UC Davis undergraduates with strong academic records enrolled in the Electrical Engineering, Computer Engineering or Applied Physics curricula. Applicants in their junior year must apply for the IDP by March 31. For more information on IDP, see [http://www.ece.ucdavis.edu](http://www.ece.ucdavis.edu).

**Mission.** Under its land grant status, the University of California has a mission to provide the state with the trained workforce it needs and to advance knowledge and research in directions that contribute to the general welfare of the state and the nation. The Department of Electrical & Computer Engineering contributes to the mission of the University in three ways. First, its undergraduate and graduate education programs seek to provide students with an understanding of the fundamental principles of electrical and computer engineering, the skills needed to solve the complex technological problems of modern society and the ability to continue to learn and develop throughout their careers. Second, through its research programs, the department contributes to the development and progress of electronics, communications, and computer technology. Finally, the department helps to transfer research results to industry through publication, public service and professional activities.

**Objectives.**

*Teaching*—To provide undergraduate students with sufficient breadth to allow them to participate in teams, continue their own education after graduation and select a focus area intelligently; to provide undergraduate students with sufficient depth in a narrower discipline to allow them to develop the ability to solve complex engineering problems; to educate the students in the graduate program to be leaders in industry or to do meaningful research in industry, government or academia.

*Research*—To develop and maintain research programs that produce useful technological advances while simultaneously training the next generation of researchers and leaders; to update and/or shift the foci of these programs frequently in response to the needs of our constituency and the nation; to provide a stimulating environment that encourages our graduate students to develop their abilities as far as possible.

**Computer Engineering Undergraduate Program**

The Computer Engineering program is accredited by the Engineering Accreditation Commission of ABET; see [http://www.abet.org](http://www.abet.org).

**Objectives.** The Electrical & Computer Engineering program educational objectives have been developed to address the needs of our constituencies. The objectives of the Electrical & Computer Engineering programs are as follow:

- Graduates will create value for their employers, demonstrating knowledge and initiative and making beneficial contributions beyond the workplace. This can also result in patents, awards, publications and presentations.
- Graduates will grow their capabilities through advanced education and professional development.
- Graduates will provide leadership and be proactive in their profession and/or communities.

Exclusive of General Education units, the minimum number of units required for the Computer Engineering undergraduate major is 148.

Students are encouraged to adhere carefully to all prerequisite requirements. The instructor is authorized to drop students from a course for which stated prerequisites have not been completed.

Group Office. 2063 Kemper Hall (Department of Computer Science); 530-752-7004; csgradadvising@ucdavis.edu; gradinfocs@ucdavis.edu; http://www.cs.ucdavis.edu

Graduate Study. The Graduate Group in Computer Science offers programs of study leading to the M.S. and Ph.D. degrees in Computer Science. The varied nature of the faculty brings a wide variety of research interests to the program. Research strengths lie in algorithms, computational biology, computer architecture, computer graphics and visualization, database systems, computer security and cryptography, computer networks, program specifications and verification, programming languages and compilers, parallel and distributed systems, scientific computation, and software engineering. Interdisciplinary research in computer science is encouraged.

Preparation. Normal preparation for the program is a bachelor's degree in either computer science or in a closely related field (such as electrical engineering or mathematics, with substantial course work in computer science). Applications are also considered from students with outstanding records in other disciplines. M.S. students may either complete a thesis, project or pass a comprehensive examination.

Graduate Advisors. P. Koehl (Chair), Z. Bai, M. Farrens, S. King

**Preparation.** Normal preparation for the program is a bachelor's degree in either computer science or in a closely related field (such as electrical engineering or mathematics, with substantial course work in computer science). Applications are also considered from students with outstanding records in other disciplines. Ph.D. students must pass a qualifying oral examination and complete a dissertation demonstrating original research in an area approved by the Graduate Group.

**The Major Program**

The Department of Computer Science administers two majors: Computer Science and Engineering (CSE), in the College of Engineering, and Computer Science (CS), in the College of Letters and Science. It also administers two minors: Computer Science, in the College of Letters and Science, and Computational Biology, in the College of Engineering. For information on the Computer Science and Engineering curriculum and the minor in Computational Biology, see Engineering: Computer Science.

The primary differences between the CSE and CS majors are the extent of hardware coverage and curricular flexibility. The CSE major develops a solid understanding of the entire machine, including hands-on experience with its hardware components. The CS major teaches some hardware, at the digital-design level, on simulators. The CSE major has fewer free electives. The CS major's more generous electives make it easier to complete a minor or double major.

Students in the CS major receive a solid grounding in the fundamentals of computer languages, operating systems, computer architecture, and the mathematical abstractions underpinning computer science. Students are prepared for both industry and postgraduate study.
Preparatory Requirements

Before declaring a major in Computer Science, students must complete the following courses with an overall UC Davis grade point average of at least 3.000; a grade of C- or better required in all courses:

Mathematics
  MAT 021A  Calculus  4
  MAT 021B  Calculus  4

Computer Science Engineering
  ECS 020  Discrete Mathematics For Computer Science  4
  Choose an option:  5-8
  (a)  8
    Choose one:
      ECS 030  Programming and Problem Solving (Discontinued)  4
      ECS 036A  Programming & Problem Solving  4
  (b)  5
    ECS 034  Software Development in UNIX and C/C++  5

Preparatory Subject Matter

Mathematics
  MAT 021A  Calculus  4
  MAT 021B  Calculus  4
  MAT 021C  Calculus  4
  Choose one:
    MAT 022A  Linear Algebra  3
    MAT 067  Modern Linear Algebra  4

Computer Science Engineering
  ECS 020  Discrete Mathematics For Computer Science  4
  Choose one:
    ECS 030  Programming and Problem Solving (Discontinued)  4
    ECS 036A  Programming & Problem Solving  4
  Choose one:
    ECS 040  Software Development and Object-Oriented Programming (Discontinued)  4
    ECS 036B  Software Development and Object-Oriented Programming in C++  4
  Choose one:
    ECS 060  Data Structures and Programming (Discontinued)  4
    ECS 036C  Data Structures, Algorithms, and Programming  4
  Choose one:
    ECS 050  Computer Organization and Machine-Dependent Programming  4
    EEC 070  Computer Structure and Assembly Language (Discontinued)  4

Choose three:  15

(College of Engineering)

Matthew Farrens, Ph.D., Chairperson of the Department

**Department Office.** 2063 Kemper Hall; 530-752-7004; [http://www.cs.ucdavis.edu](http://www.cs.ucdavis.edu)

**Faculty.** [http://www.cs.ucdavis.edu/people/faculty/](http://www.cs.ucdavis.edu/people/faculty/)

**The Computer Science & Engineering Program**

The Department of Computer Science administers two curricula: Computer Science & Engineering in the College of Engineering, and Computer Science in the College of Letters & Science. It also administers two minors: Computer Science in the College of Letters & Science, and Computational Biology in the College of Engineering. For information on the Computer Science curriculum and minor; see Computer Science.

The Computer Science Engineering major (below) prepares students to do further work in hardware, software, theory, or electronics, either in industry or in postgraduate study.

The primary differences between the Computer Science Engineering and the Computer Science majors are the extent of course work covering hardware and the flexibility of the curriculum. The Computer Science Engineering major develops a solid understanding of the entire machine, including hands-on experience with its hardware components. The Computer Science major has some course work on hardware, at the digital-design level, on simulators. The Computer Science Engineering major has fewer free electives. The CS major’s more generous electives make it easier to complete a minor or double major.

A key theme of the Computer Science Engineering curriculum is the hardware/software interaction, a theme reflected in the courses required and the orientation of the courses themselves.

The Computer Science & Engineering major provides students with a solid background in mathematics, physics, chemistry, and electronic circuits and systems, all supporting the computer hardware and computer software courses that constitute the focus of the curriculum.

**Mission.** The University of California, Davis, is, first and foremost, an institution of learning and teaching, committed to serving the needs of society. The Department of Computer Science contributes to the mission in three ways. First, its undergraduate and graduate education programs seek to educate students in the fundamental principles of computer science and the skills needed to solve the complex technological problems of modern society. The breadth of coursework provides a framework for life-long learning and an appreciation for multidisciplinary activities. Second, through its research programs, the department contributes to the development and progress of computer science, and software and information technology, to provide innovative, creative solutions for societal needs. Finally, the department disseminates its research-to enhance collaborations with the public sector, further interdisciplinary interests that benefit society, and educate the public through publications, public service, and professional activities.
Department Objectives. Teaching—We seek to provide undergraduate students with a thorough understanding of the key principles and practices of computing, which include a strong theoretical background in mathematics, basic sciences, and engineering fundamentals and an ability to apply this knowledge to practical problems. We endeavor to provide students with sufficient breadth to work creatively and productively in multidisciplinary work teams; this breadth, in its broadest context, will form the basis for an appreciation and interest in life-long learning. We provide students with the opportunities to design and conduct experiments, and to collect and analyze data in core, as well as more specialized, areas of computer science. We provide students with breadth in the humanities and social sciences so they learn to communicate effectively, understand professional and ethical issues in society, and appreciate the interrelatedness between computing and society. We educate graduate students to be our next generation of teachers or leaders in industry, or to pursue meaningful, creative research in industry, government, or academia. Research—We develop and maintain research programs that produce fundamental scientific advances, as well as useful technological innovations, while simultaneously training the next generation of researchers and leaders in the field of computer science.

Objectives. We train graduates to practice computer science and engineering in a broad range of industries; we prepare interested graduates for graduate education or other professional degrees; we give students an understanding of computer software and hardware systems, and both theoretical and experimental approaches to problem solving; we ready graduates for lifelong learning; and we encourage graduates to contribute to their profession and society.

Computer Science & Engineering Undergraduate Program

The Computer Science & Engineering program is accredited by the Engineering Accreditation Commission and the Computing Accreditation Commission of ABET; see http://www.abet.org.

Exclusive of General Education units, the minimum number of units for the Computer Science & Engineering major is 144.

Students are encouraged to adhere carefully to all prerequisite requirements. The instructor is authorized to drop students from a course for which stated prerequisites have not been completed.

**Computer Science Electives**

- Choose a minimum of four courses and a minimum of 15 units chosen from ECS courses numbered 120 to 189 inclusive; one approved course of three-five units from ECS 192 or 199; EEC 171, 180A, 180B; one course may be taken from the following restricted elective list: ECN 122; LIN 127, 177; MAT 135A, 135B; PSC 120; STA 131A, 131B. No course can count as both a required course and a computer science and engineering elective.

**Upper Division Composition Requirement**

- Choose one:
  - UWP 101 Advanced Composition | 4

Grade of C- or better required.
Passing the Upper-Division Composition Exam administered by the College of Letters Science.

**Construction Engineering & Management Minor; Civil & Environmental Engineering**

**Construction Engineering & Management Minor; Civil & Environmental Engineering | Construction Engineering & Management Minor**

(College of Engineering)

Amit M. Kanvinde, Ph.D., Chairperson of the Department; 530-752-2605  
**Department Office.** 2001 Ghausi Hall; 530-752-0586; [http://cee.engr.ucdavis.edu](http://cee.engr.ucdavis.edu)  
**Faculty.** [http://cee.engr.ucdavis.edu/people/faculty-directory/](http://cee.engr.ucdavis.edu/people/faculty-directory/)

California's construction industry continues to experience high growth as it continues to accommodate increasing population and as it faces renewal of much of the infrastructure built by previous generations. At the same time, the construction industry faces challenges of scarce materials, a need for decreased environmental impact in terms of the construction process itself and operation of the completed project, and a more complex operational, regulatory and social context in which it must do its work.

The purpose of this minor is to better prepare professional civil and environmental engineers to thrive in this challenging industry, and to improve the efficiency of delivery and sustainability of the civil infrastructure in the state through their future efforts.

It is expected that engineering students will enroll in this minor program, including Civil, Mechanical, Chemical, and Materials Science majors. Students from other colleges can also complete this minor, but it is recommended that they review the requirements with one of the advisors before enrolling. Students who are interested in construction of infrastructure in their discipline can make use of the skills that will be learned through completion of this minor.

All courses must be taken for a letter grade. A grade of C- or better is required for all courses used to satisfy minor requirements, with an overall GPA of 2.000 or better. All prerequisites for courses must have been taken for a letter grade; no grade lower than a C- will be accepted in any prerequisite course. Students must complete ENG 106 with a C- or better.

Course Overlap. Please refer to your college's policies regarding overlap rules.

The online Minor Declaration form is available via the Online Advising Student Information System (OASIS) at [https://students.ucdavis.edu/](https://students.ucdavis.edu/). Please contact the Undergraduate Advisors in the Department of Civil & Environmental Engineering, for more information at civiladvising@ucdavis.edu.

Transcript notation must be requested no later than the quarter preceding graduation, and will appear as a minor in Construction Engineering & Management.

**Minor advisors.** J.L. Darby, J.T. Harvey, J.R. Lund

(College of Agricultural & Environmental Sciences)

Science & Society Program. [https://sas.ucdavis.edu/](https://sas.ucdavis.edu/)

Program Office. 160 Hutchison Hall; 530-754-7277

The Science & Society Program offers a minor in Contemporary Leadership, open to all undergraduate students regardless of major. The minor provides a broad overview of leadership theory and practice, and engages students in critical thinking, self-reflection, problem solving and multicultural education. Students should contact the minor advisor for course selection and plan approval.

Consult advisors often to insure timely enrollment in SAS 192 and 190X only offered in spring quarter once a year.

Minor Advisor. The list of appropriate courses may change over time. To request an advising appointment, consult Elvira Galvan Hack in Science & Society (Plant Pathology) at eghack@ucdavis.edu.

Critical Theory

Critical Theory | Critical Theory Designated Emphasis

Kriss Ravetto-Biagioli, Ph.D., Chairperson of the Program

Program Office. 207 Sproul Hall; 530-752-2115; http://crittheory.ucdavis.edu

Faculty. http://crittheory.ucdavis.edu/people

Graduate Study. The program in Critical Theory offers study and research leading to the Ph.D. with a designated emphasis in Critical Theory. The program provides theoretical emphasis and interdisciplinary perspective to students already preparing for the Ph.D. in one of 14 participating graduate programs (Anthropology, Comparative Literature, Cultural Studies, Education, English, French, German, History, Music, Psychology, Sociology, Spanish, Study of Religion, and Performance Studies). Students complete all requirements for the Ph.D., including the dissertation, in one of the participating departments. Minimum coursework for the Critical Theory Designated Emphasis consists of four courses. The first three of these, CRI 200A, 200B, and 200C are taught by affiliated
faculty, with 200A normally being taken first. For the fourth course, students have the option of taking another section of CRI 200B or an approved course from any affiliated department.

Graduate Advisor. Consult Critical Theory Program office.

Cultural Studies (Graduate Group)

Cultural Studies (Graduate Group) | CST Information
Wendy Ho, Ph.D., Graduate Group Chair
Group Office. 3129 Hart Hall; 530-754-9765; https://culturalstudies.ucdavis.edu/

Cultural Studies (Graduate Group) | CST M.A.
Wendy Ho, Ph.D., Graduate Group Chair
Group Office. 3129 Hart Hall; 530-754-9765; https://culturalstudies.ucdavis.edu/

Graduate Study. The Graduate Group in Cultural Studies at UC Davis offers an interdisciplinary approach to the study of culture and society that highlights how sexuality, race, ability, citizenship, gender, nationality, class and language organize embodied identities, social relations and cultural objects. With the close guidance and supervision of a faculty committee, students in the program pursue interdisciplinary research in areas including studies of comparative and critical race, ecocriticism, fashion, queer theory, media and popular cultural representation, science and technology, Marxist theory, travel and tourism, food, physical and cognitive abilities, cultural geography, transnational culture and politics, globalization, religion, rhetoric, performance, and critical theory. Although both the Ph.D. and M.A. are offered, applications are only accepted for the Ph.D. program, and the M.A. is available as a terminal degree en route to the Ph.D.

Preparation. Normal preparation for the program is a bachelor’s degree in a related field. Terminal M.A. students must pass an examination. Ph.D. students must pass a qualifying examination, a comprehensive examination, and complete a dissertation demonstrating original research in an area approved by the Graduate Group. In addition to the standard UC Davis graduate application (which requires a statement of purpose), we also require three letters of recommendation, transcripts, GRE scores, writing sample (ten-page minimum, not exceeding twenty pages), and a fellowship application.

The Master of Art degree is offered as a terminal degree in route to the Ph.D. Applicants may only apply for the Ph.D. program.

Graduate Advisors. Graduate Advisors. Elizabeth Freeman (English), Wendy Ho (Asian American Studies & Gender; Sexuality, & Women’s Studies), Susan Kaiser (Gender, Sexuality, & Women’s Studies; Textiles & Clothing), Caren Kaplan (American Studies), Sudipta Sen (History), Robyn Rodriguez (Asian American Studies)

theory. Although both the Ph.D. and M.A. are offered, applications are only accepted for the Ph.D. program, and the M.A. is available as a terminal degree in route to the Ph.D.

**Preparation.** Normal preparation for the program is a bachelor's degree in a related field. Terminal M.A. students must pass an examination. Ph.D. students must pass a qualifying examination, a comprehensive examination, and complete a dissertation demonstrating original research in an area approved by the Graduate Group. In addition to the standard UC Davis graduate application (which requires a statement of purpose), we also require three letters of recommendation, transcripts, GRE scores, writing sample (ten-page minimum, not exceeding twenty pages), and a fellowship application.

**Graduate Advisors.** Elizabeth Freeman (English), Wendy Ho (Asian American Studies & Gender; Sexuality, & Women's Studies), Susan Kaiser (Gender, Sexuality, & Women's Studies; Textiles & Clothing), Caren Kaplan (American Studies), Sudipta Sen (History), Robyn Rodriguez (Asian American Studies)

**The Major Program**

The Department of Design offers a creative, challenging, and flexible approach to the study of design with emphasis on socially responsible, human centered, and sustainable practice.

**The Program.** Foundation courses: Design & Visual Culture; Design Drawing, Form & Color, and Graphic Design & Computer Technology; are required of all design majors. One additional course in the student's area of interest is required for Preparatory Subject Matter. Depth Subject Matter courses provide: (1) further exploration of design principles and conceptual, formal and technical issues; (2) conceptual and critical development through a series of history and theory classes; (3) in-depth studio experience with projects that demonstrate a research-based, iterative design process. Optional capstone class. A more detailed explanation is available through the Design Advising office in 101 Art Building; 530-752-0890.

**Portfolios.** Portfolios are not required for admission to the major. However, it is highly recommended that design students maintain an updated portfolio of visual work for faculty and professional evaluation and consideration for enrollment in specialized courses, including independent study, group study and internship.

**Internships, Careers, & Study Abroad.** Design students are encouraged to supplement their coursework with internships in design firms, museums, and design related businesses. Design graduates go directly from this program into further graduate study, or professional work including exhibition, fashion, information, interior architecture and product (lighting and furniture), textiles, visual communications (digital, environmental and print) and sustainable design. In addition, students have become entrepreneurs through freelance and commissioned work in many related areas. The Department of Design encourages students to experience design education abroad through a variety of sponsored programs.
Preparatory Subject Matter

Units: 32

Design

DES 001 Introduction to Design 4
Choose one:
DES 014 Design Drawing 4
DES 021 Drafting and Perspective 4
DES 015 Form and Color 4
DES 016 Graphic Design and Computer Technology 4

University Writing Program

Choose one:
UWP 011 Popular Science and Technology Writing 4
UWP 012 Writing and Visual Rhetoric 4
Preferred.
UWP 048 Style in the Essay 4
UWP 049 Writing Research Papers 4

Choose one:
DES 040A Energy, Materials, and Design Over Time 4
DES 040B Ideologies of Design 4
DES 040C Design for Aesthetics and Experience 4

Choose two:
DES 021 Drafting and Perspective 4
Can only be used for this requirement if not counted above.
DES 040A Energy, Materials, and Design Over Time 4
Can only be used for this requirement if not counted above.
DES 040B Ideologies of Design 4
Can only be used for this requirement if not counted above.
DES 040C Design for Aesthetics and Experience 4
Can only be used for this requirement if not counted above.
DES 050 Introduction to Three-Dimensional Design 4
DES 051 (Pending Approval) 4
DES 070 Introduction to Textile Design Structures 4
DES 077 Introduction to Structural Design for Fashion 4
ART 012 Beginning Video 4

Faculty. http://arts.ucdavis.edu/design-people-0

Graduate Study. The graduate program in Design leading to the Master of Fine Arts.

The UC Davis Master of Fine Arts (MFA) in Design unites theory and practice. This two-year program encourages an interdisciplinary approach with emphases on socially responsible, human-centered, and sustainable design practice. Students collaborate with outstanding faculty within the department, and the greater University, whose work covers a broad array of disciplines and interests. Design faculty expertise includes design theory, exhibition, fashion, history, information, interaction, interior architecture, immersion, lighting, product, textiles, time-base, visual communication and wearables, among others. Students blend individual focused research and creative practice with an understanding of key design issues in history, theory and research methodology. The MFA degree culminates in a project-based thesis and exhibition. For more information, see http://arts.ucdavis.edu/design-graduate-program.

Graduate Advisor. Please contact the Program at 530-752-8710.

Dramatic Art

Dramatic Art | Dramatic Art M.F.A.
Graduate Study. The Department of Theatre & Dance offers programs of study and research leading to the M.F.A. in Theatre & Dance (the interdisciplinary weaving of acting, directing, design, choreography and practice and research) and contributing to the Graduate Group Ph.D. in Performance Studies. Detailed information may be obtained by contacting the Graduate Program Administrators: for the M.F.A. in Theatre & Dance, 530-752-8710; Graduate Group in Performance Studies, 530-754-6973.

Faculty. http://eastasian.ucdavis.edu/contact/faculty

The Major Program

The East Asian Studies major gives the student an understanding of East Asia and Southeast Asia through interdisciplinary studies, including courses on East Asian countries within the humanities and social sciences. Students are encouraged to pursue study abroad opportunities, as well as other guided studies pertaining to East and Southeast Asia.

The Program. The program offers core courses in East Asian humanities and social sciences, including history, comparative literature, languages, philosophy and religion, political science, sociology, as well as courses focused on Southeast Asia. Science courses that closely engage the student of East and/or Southeast Asia are also eligible to count towards the major.

Along with taking the lower division and upper division depth subject courses; the student may choose additional courses that concentrate on a special field of interest, such as anthropology or history, or special courses such as honor thesis, independent study, internships, and study abroad.

Programs, Internships, and Career Alternatives. To enhance the student's understanding of East and Southeast Asia, our majors are strongly encouraged to participate in UC Davis's Study Abroad Program, which gives students the opportunity to live and experience a culture within East or Southeast Asia. Our majors are also encouraged to work with UC Davis's Internship and Career Center, which provides customized assistance for EAS students to obtain legislative, legal, and business internships and careers. Likewise, the UC Davis Sacramento and Washington Centers arrange internships and run full-credit academic programs in Sacramento and Washington D.C., with a wide range of opportunities for our majors. Graduating EAS majors are prepared for employment in government agencies (such as Foreign Service), state agencies, international or non-governmental organizations (NGO, such as the United Nations), foundations, journalism, teaching, counseling, and companies with international business interests, trade, or finance. The broad-based and multidisciplinary components of this major program enhance career prospects in jobs that demand knowledge of cultures of East and Southeast Asia.

Major Advisors. 2216 Social Science & Humanities Building; 530-752-9241; easugadvisor@ucdavis.edu.

**Elective Requirement**

Units: 16

Choose 16 units:
- Any EAS special course (approved courses: EAS 190, 192, 194H, 196A-B, 198—maximum 12 units from this list); any CHN or JPN upper division course; any Depth Subject Matter course; any upper division EAP course focusing on East Asia or Southeast Asia.

**Total: 61-62**

---

**East Asian Studies | EAS Minor**

(College of Letters & Science)

Xiaoling Shu, Ph.D., Program Director

**Program Office.** 1277 Social Science and Humanities Building; 530-752-3406; [http://eastasian.ucdavis.edu](http://eastasian.ucdavis.edu)

Courses taken for the minor are expected to reflect a predominant interest in East Asia or Southeast Asia. All upper division courses counting towards the East Asian Studies major, may be used to fulfill the requirements for the minor program, as long as they deal predominantly with East Asia or Southeast Asia.

**East Asian Studies**

Units: 20

Choose any five upper division courses from the Depth Subject Matter list for the major, or from the following list:
- Any CHN or JPN upper division course.
- Any EAS special course; approved courses:
Ecological Management & Restoration

Ecological Management & Restoration | Ecological Management & Restoration B.S.

(College of Agricultural & Environmental Sciences)

Faculty. [http://www.plantsciences.ucdavis.edu/plantsciences/databases/directory/faculty.aspx](http://www.plantsciences.ucdavis.edu/plantsciences/databases/directory/faculty.aspx)

The Major Program

This major is designed for students who are interested in understanding how to manage and restore wildland and rangeland plant communities. Courses are selected to provide an interdisciplinary background that encompasses ecology, applied plant biology, and the social sciences. Students will acquire a core understanding of natural and managed ecosystems and how they function, interact with the natural environment, are connected with human society and social change, and are restored and managed.

The Program. The curriculum provides depth in the ecological and botanical sciences directed toward an integrated understanding of how communities and ecosystems function and how this knowledge can assist in their management and restoration. Courses in environmental policy and law expose the students to the social drivers and constraints of ecosystem management. All students gain practical experience through practical field courses and a required internship. Students may also pursue an Honors thesis in their senior year.

Major Advisor. Kenneth Tate

Advising Center for the major, including peer advising, is located in 1220 Plant & Environmental Sciences 530-752-9770.

Career Alternatives. Graduates from this program are prepared to pursue a wide range of careers, including positions in ecological restoration and ecosystem management; rangeland and reserve management; environmental consulting; public, private, or non-profit agencies concerned with restoration and natural resource management; Cooperative Extension; teaching; information and communication services. Graduates are qualified to pursue advanced studies in fields such as ecology, agroecology, environmental studies, geography or weed science.

Total: 101-125
Faculty. http://ecology.ucdavis.edu/people/faculty.html

Graduate Study. The Graduate Group in Ecology offers the M.S. and Ph.D. degrees. Ecology is a science that integrates numerous fields of study to attain deep understanding of natural and societal influences on the distribution, abundances, behaviors, traits, and ecosystem functions of organisms. In order to accommodate varied student interests, the Group has developed several 'areas of emphasis' with specialized programs of study: agricultural ecology, conservation ecology, ecosystems and landscape ecology, ecotoxicology, environmental policy and human ecology, integrative ecology, marine ecology, physiological ecology and restoration ecology. For further details, contact the Group office.

Preparation. Appropriate preparation is undergraduate work in any of the biological, social or behavioral, and physical sciences, mathematics or engineering. Applicants will normally be expected to have completed the following courses during the undergraduate years or shortly after matriculating: two courses each in introductory biology, general chemistry and physical science; one course each in calculus, an upper division introduction to ecology course, and introductory statistics. Students that choose the environmental policy and human ecology area of emphasis are only required to complete one course in general chemistry. They may also substitute one quantitative course in social science such as micro- or macro-economics for one chemistry or physics requirement.

Ecology (Graduate Group) | ECL Ph.D.
Truman Young, Ph.D., Chairperson of the Group

**Economics**

**Economics | ECN Information**

(College of Letters & Science)

Giovanni Peri, Ph.D., Chairperson of the Department

**Department Office.** 2216 Social Sciences and Humanities Building; 530-752-9241; [http://www.econ.ucdavis.edu](http://www.econ.ucdavis.edu)

**Economics | ECN A.B.**

(College of Letters & Science)

Giovanni Peri, Ph.D., Chairperson of the Department

**Department Office.** 2216 Social Sciences and Humanities Building; 530-752-9241; [http://www.econ.ucdavis.edu](http://www.econ.ucdavis.edu)

**The Major Program**

Economics is the study of how individuals, organizations, and societies choose among alternative uses of resources and how these resources are turned into the things people want.

**The Program.** Economics majors complete an introductory course sequence in economics, in addition to several courses in quantitative methods. Intermediate theory and economic history are taken on the upper division level and then students are free to concentrate the remainder of their units in various areas of interest, including more courses in economic theory or history, international economics, labor, industry, alternative economic systems, economic development, public finance, econometrics, or mathematical economics.

**Major Advisors.** Contact Department office at [ecnugadvisor@ucdavis.edu](mailto:ecnugadvisor@ucdavis.edu) or 530-752-9142.

**Internships and Career Alternatives.** Internships for economics majors have been arranged at banks, brokerages, other business enterprises, and governmental units. The internships must complement the student's course work. A degree in economics is excellent preparation for students who want to go on to law school, business school, advanced work in economics, or graduate work in international relations. It is also a good background for careers in management and positions with the government.

**Course Limits.** Except under extraordinary circumstances, not more than two economics courses should be taken in any one quarter. In special cases, the department will accept a limited number of related upper division courses from other departments in satisfaction of the economics upper division course requirements. Approval from a departmental advisor is required in all such cases.

**Graduation with High or Highest Honors.** To be eligible for departmental recommendation for High or Highest Honors in Economics at graduation, a student must take all upper division courses in Economics for a letter grade, earn at least a 3.500 grade point average in those courses, and complete at least eight units of course work that result in the submission of an Honors project. Consult the College of Letters and Science section of this catalog and contact the Department for more information.

**Study Abroad.** The Economics Department wishes to accommodate students who would like to complement their economics degree with a study abroad experience. Up to 20 units of upper division credit from foreign campuses (excluding ECN 100 and 101) may be used towards the completion of the degree. To ensure that foreign courses will apply towards the economics degree, students need to select courses from the pre-approved list at the UC Davis Study Abroad office or seek pre-approval in the economics department for the foreign courses they wish to complete.

**Graduate Advisors.** Contact Department office.

**Recommended.** Students considering graduate study in economics are strongly urged to take MAT 021A-021B-021C and 022A.

**American History and Institutions.** This University requirement can be satisfied by completion of ECN 111A, 111B; see also under Bachelor’s Degree Requirements.

(College of Letters & Science)

Giovanni Peri, Ph.D., Chairperson of the Department

**Department Office.** 2216 Social Sciences and Humanities Building; 530-752-9241; [http://www.econ.ucdavis.edu](http://www.econ.ucdavis.edu)

Economics is the study of how individuals, organizations, and societies choose among alternative uses of resources and how these resources are turned into the things people want.

**Course Limits.** Except under extraordinary circumstances, not more than two economics courses should be taken in any one quarter. In special cases, the department will accept a limited number of related upper division courses from other departments in satisfaction of the economics upper division course requirements. Approval from a departmental advisor is required in all such cases.

**Preparation.** ECN 001A, 001B; STA 013, 032, or 102; MAT106A, 016B or 021A, 021B. MAT 016A, 016B or 021A, 021B should be completed before taking ECN 100 and 101. Students need to complete ECN 100 and 101 before taking the advanced courses.

## Education Minor

### Education Minor | EDU Minor

(School of Education)

Lauren E. Lindstrom, Ph.D., Dean

Cynthia Carter Ching, Ph.D., Associate Dean for Academic Programs and Instruction

Peter C. Mundy, Ph.D., Associate Dean for Academic Personnel and Research

530-752-8258; Fax 530-754-8019; [http://education.ucdavis.edu](http://education.ucdavis.edu)

**Faculty.** [http://education.ucdavis.edu/faculty](http://education.ucdavis.edu/faculty)

**Program Coordinator.** 530-752-2367

The UC Davis School of Education is committed to developing informed citizens and advocates for productive educational environments in a democratic society. Education courses are designed for undergraduate students from all majors.

A Minor in Education will help students:

- Develop an understanding of the issues and concerns of public and private education.
- Complete prerequisites for the teaching credential program.
- Work towards a master's degree or doctoral degree in education or related field.
- Seek employment in policy, advocacy, or other education related careers.

### Courses.

Students must complete 20 units the Minor program in Education. At least 12 units of the 20-unit minimum for the minor must be in Education. The remaining units for the minor may be in education or a related field as approved on the electives list.

### Minor Advisors.

A designated faculty member in the School of Education may advise students and give final approval on the minor. For additional information contact the Student Services office in School of Education Building.

*  Internship (192, 195A or B, 195TC, 197TC), Group Study (198) and Independent Study (199), or a combination of both, may not exceed a total of four units. Elective courses may include only one internship.

**Total: 20**

**Education (Graduate Group)**

**Education (Graduate Group) | EDU (Graduate Group) Information**

(School of Education)
**Admissions for the 2018-19 academic year have been suspended while our faculty review the program's current topical focus and requirements. We will not be offering the Master of Arts General Track for this admissions cycle.**

The Master of Arts in Education provides a course of study for examining research and theory about learners, teachers, schools, and related social institutions. The program prepares professionals to conduct research about the education of children, youth, and adults in a multicultural society. Graduates may assume leadership positions in school districts, state education agencies, and private organizations concerned with instructional research, policy and practice.

Education (Graduate Group) | EDU Ph.D.

(School of Education)
Lee Martin, Chairperson of the Group

(Chairperson of the Group)

Graduate Study. The Graduate Group in Education offers programs of study and research leading to the Ph.D. degree. Students may concentrate in; language, literacy and culture; learning and mind sciences; mathematics education; school organization and educational policy; or science and agriculture education. Students may also combine these fields of study with designated emphasis areas such as Critical Theory; Second Language Acquisition, Women's Studies, and Writing, Rhetoric, and Composition Studies, Detailed information regarding graduate study may be obtained by writing the Graduate Coordinator or at http://education.ucdavis.edu/programs/PhDoverview.html.

Preparation. Students should have earned a Bachelor's or M.A. degree or the equivalent in a discipline relevant to their proposed emphasis program. For example, students applying for the mathematics education emphasis should have earned the B.A. or M.A. or M.A.T. degree in mathematics or mathematics education.

Graduate Advisers. Danny Martinez, Rebecca Ambrose, Alexis Patterson

Graduate Coordinator. Mary M. Reid

Electrical & Computer Engineering; Electrical & Computer Engineering

Electrical & Computer Engineering; Electrical & Computer Engineering | EEC Information
Saif Islam, Ph.D., Chairperson of the Department
Josh Hihath, Ph.D., Vice Chairperson for Undergraduate Studies
Khaled Abdel-Ghaffar, Ph.D., Vice Chairperson for Graduate Studies
The Department of Electrical & Computer Engineering prepares graduate students to do meaningful research and acquire skills and insights vital to solving some of the world's most complex technological problems. Our graduate program offers a challenging and stimulating environment, covering optical, wireline and wireless communications, telecommunication networks, computer engineering, circuits, electromagnetics, physical electronics, optoelectronics, control, and signal processing. The depth of resources in the study of circuit design alone, with one of the largest faculty groups in the field in the UC system, distinguishes us from other programs, while our program in microwave communications and devices is unique.

The Electrical & Computer Engineering Graduate Program benefits from the highly interdisciplinary culture at UC Davis and attracts faculty from biomedical, chemical, electrical, computer, civil, and mechanical engineering, as well as computer science and mathematics.

Many of our graduates go on to leadership and technology management roles in industry, returning each year for our industrial affiliates meeting to network with other industry representatives, current students and faculty.

Generous financial support is available in the form of research assistantships, teaching assistantships, fellowships and financial aid.

**Research Highlights:**

- Communications, control, networking, and signal processing
- Computer engineering
- Electronic circuits
- Optoelectronics
- RF, micro- and millimeter waves
- Physical electronics

**Research Facilities and Partnerships:**

- Center for Information Technology in the Interest of Society
- Northern California Center for Nanotechnology
- Center on Polymer Interfaces and Macromolecular Assemblies
- Lawrence Livermore National Laboratory
- Lawrence Berkeley National Laboratory
- Los Alamos National Laboratory
- California Lighting Technology Center
- PlanetLab Consortium
- Sandia National Laboratory

Complete Information is on our website.
The Graduate Program in Electrical and Computer Engineering

- Northern California Center for Nanotechnology
- Center on Polymer Interfaces and Macromolecular Assemblies
- Lawrence Livermore National Laboratory
- Lawrence Berkeley National Laboratory
- Los Alamos National Laboratory
- California Lighting Technology Center
- PlanetLab Consortium
- Sandia National Laboratory

Complete Information is on our website.
The Department of Electrical & Computer Engineering prepares graduate students to do meaningful research and acquire skills and insights vital to solving some of the world's most complex technological problems. Our graduate program offers a challenging and stimulating environment, covering optical, wireline and wireless communications, telecommunication networks, computer engineering, circuits, electromagnetics, physical electronics, optoelectronics, control, and signal processing. The depth of resources in the study of circuit design alone, with one of the largest faculty groups in the field in the UC system, distinguishes us from other programs, while our program in microwave communications and devices is unique.

The Electrical & Computer Engineering Graduate Program benefits from the highly interdisciplinary culture at UC Davis and attracts faculty from biomedical, chemical, electrical, computer, civil, and mechanical engineering, as well as computer science and mathematics.

Many of our graduates go on to leadership and technology management roles in industry, returning each year for our industrial affiliates meeting to network with other industry representatives, current students and faculty.

Generous financial support is available in the form of research assistantships, teaching assistantships, fellowships and financial aid.

**Research Highlights:**
- Communications, control, networking, and signal processing
- Computer engineering
- Electronic circuits
- Optoelectronics
- RF, micro- and millimeter waves
- Physical electronics

**Research Facilities and Partnerships:**
- Center for Information Technology in the Interest of Society
- Northern California Center for Nanotechnology
- Center on Polymer Interfaces and Macromolecular Assemblies
- Lawrence Livermore National Laboratory
- Lawrence Berkeley National Laboratory
- Los Alamos National Laboratory
- California Lighting Technology Center
- PlanetLab Consortium
- Sandia National Laboratory

Complete Information is on our website.
The Electrical & Computer Engineering Undergraduate Programs

The department administers two undergraduate curricula in the College of Engineering: (1) the Electrical Engineering curriculum and (2) the Computer Engineering curriculum.

Integrated Degree Program (IDP). The IDP leads to both the Bachelor of Science and the Master of Science degrees. The program provides a student the opportunity to obtain superior breadth and depth of technical material. The IDP program in the Department of Electrical & Computer Engineering is available only to UC Davis undergraduates with strong academic records enrolled in the Electrical Engineering, Computer Engineering, Electronic Materials Engineering or Applied Physics curricula. Applicants in their junior year must apply for the IDP by March 31. For more information on IDP, see http://www.ece.ucdavis.edu.

Mission. Under its land grant status, the University of California has a mission to provide the state with the trained workforce it needs and to advance knowledge and research in directions that contribute to the general welfare of the state and the nation. The Department of Electrical & Computer Engineering contributes to the mission of the University in three ways. First, its undergraduate and graduate education programs seek to provide students with an understanding of the fundamental principles of electrical and computer engineering, the skills needed to solve the complex technological problems of modern society and the ability to continue to learn and develop throughout their careers. Second, through its research programs, the department contributes to the development and progress of electronics, communications, and computer technology. Finally, the department helps to transfer research results to industry through publication, public service and professional activities.

Objectives. Teaching—To provide undergraduate students with sufficient breadth to allow them to participate in teams, continue their own education after graduation and select a focus area intelligently; to provide undergraduate students with sufficient depth in a narrower discipline to allow them to develop the ability to solve complex engineering problems; to educate the students in the graduate program to be leaders in industry or to do meaningful research in industry, government or academia. Research—To develop and maintain research programs that produce useful technological advances while simultaneously training the next generation of researchers and leaders; to update and/or shift the foci of these programs frequently in response to the needs of our constituency and the nation; to provide a stimulating environment that encourages our graduate students to develop their abilities as far as possible.

Electrical Engineering Undergraduate Program

The Electrical Engineering program is accredited by the Engineering Accreditation Commission of ABET; see http://www.abet.org.

Electrical engineering involves the design, analysis, and effective use of electrical systems including electronic computers. Electrical systems and computers play a central role in nearly all aspects of modern life, including communication, medicine, education, environmental protection, space exploration, defense, and home entertainment.

Students who complete the Electrical Engineering curriculum will obtain a Bachelor of Science in Electrical Engineering, one of the engineering degrees recognized in all fifty states as eligible for registration as a Professional Engineer.
Objectives. The Electrical & Computer Engineering program educational objectives have been developed to address the needs of our constituencies. The objectives of the Electrical & Computer Engineering programs are as follow:

- Graduates will create value for their employers, demonstrating knowledge and initiative and making beneficial contributions beyond the workplace. This can also result in patents, awards, publications and presentations.
- Graduates will grow their capabilities through advanced education and professional development.
- Graduates will provide leadership and be proactive in their profession and/or communities.

Exclusive of General Education units, the minimum number of units for the Electrical Engineering major is 146. Students are encouraged to adhere carefully to all prerequisite requirements. The instructor is authorized to drop students from a course for which stated prerequisites have not been completed.

Electrical Engineering Curriculum

Areas of Specialization

For updated recommended courses, see the department website at https://www.ece.ucdavis.edu/undergraduate/majors-and-minor/.

Physical Electronics: Solid-state devices, circuits and fabrication and the theory courses supporting those subjects.

Recommended elective courses:
- Core electives: EEC 130B, 140B
- Design Laboratory Electives: EEC 118, or 132A, 132B or 135. Select remaining upper-division design electives from EEC 110B, 146A, 146B
- Technical electives: EEC 112, 180

Electromagnetics: Microwave circuits and systems, and fiber optical systems.

Recommended elective courses:
- Core electives: EEC 130B, 140B
- Technical electives: EEC 112

Analog Electronics: Transistor- and system-level analog circuit design.

Recommended elective courses:
- Core electives: EEC 110B, 140B, 150B
- Technical electives: Select from EEC 130B, 146A

Digital Electronics: Transistor- and system-level digital circuit design.

Recommended elective courses:
- Core electives: EEC 110B, 140B, 150B
- Design Laboratory Electives: EEC 118 and 180 or 172 or 183 or 181A-181B. Select remaining upper division design electives from EEC 116, 170 or 171
- Technical electives: Select from EEC 130B and 112 or 146A or 157A or 160 or 210

Communication Controls & Signal Processing: Digital communication, robotics, classical controls and communication, wireless & cellular digital communication systems, signal & image processing, and computer vision.

Recommended elective courses:

Core electives: EEC 150B, 180

Design Laboratory Electives: EEC 157A and 157B or 165. Select remaining upper division design electives from EEC 160

Technical Electives: Select from EEC 112, 195A-195B
EEC 150A  Introduction to Signals and Systems I  4
EEC 161  Probabilistic Analysis of Electrical & Computer Systems  4
EEC 196  Issues in Engineering Design  1

Choose one:
ENG 160  Environmental Physics and Society  3
ENG 190  Professional Responsibilities of Engineers  3
ECS 188  Ethics in an Age of Technology  4

Upper-Division Electives  32
Choose at least eight courses for a minimum of 32 units:
After completion of the upper division elective requirement (at least 8 courses, 2 core, 2 with labs, 1 project) any units in excess of 32 will count toward the Technical Elective requirement.

Two Core Electives
A maximum of one course appearing on both the Core Elective list and the Design Laboratory Elective list may be counted in both categories.

EEC 110B  Electronic Circuits II  4
EEC 130B  Introductory Electromagnetics II  4
EEC 140B  Principles of Device Physics II  4
EEC 170  Introduction to Computer Architecture  4
EEC 180  Digital Systems II  5

Choose one:
EEC 150B  Introduction to Signals and Systems II  4
EEC 157A  Control Systems  4
EEC 160  Signal Analysis and Communications  4

Design Laboratory Electives
A maximum of one course appearing on both the Core Elective list and the Design Laboratory Elective list may be counted in both categories.

Choose at least two Design electives with lab:
EEC 110B  Electronic Circuits II  4
EEC 112  Communication Electronics  4
EEC 116  VLSI Design  4
EEC 118  Digital Integrated Circuits  4
EEC 132A  RF and Microwaves in Wireless Communication  5
EEC 132B  RF and Microwaves in Wireless Communication  5
EEC 132C  RF and Microwaves in Wireless Communications  5
EEC 135  Optoelectronics for High-Speed Data Networking and Computing Systems  4
EEC 146A  Integrated Circuits Fabrication  4
EEC 146B  Advanced Integrated Circuits Fabrication  3
EEC 152  Digital Signal Processing  4
EEC 157A  Control Systems  4
EEC 157B  Control Systems  4
EEC 165  Statistical and Digital Communication  4
EEC 172  Embedded Systems  4
EEC 180  Digital Systems II  5
EEC 183  Testing and Verification of Digital Systems  5

Choose at least one Design Project course:
All Design Project courses are also considered Design Laboratory electives and may be counted in both categories simultaneously. Both A and B need to be taken to receive credit for the Design Project.
EEC 119A  Integrated Circuit Design Project  3
EEC 119B  Integrated Circuit Design Project  3
EEC 134A  RF/Microwave Systems Design  3
EEC 134B  RF/Microwave Systems Design  3
EEC 136A  Electronic Design Project  3
The remaining electives may be any letter-graded upper division Electrical and Computer Engineering course not used to satisfy another major requirement:
The remaining electives may be any letter-graded upper division Electrical and Computer Engineering course not used to satisfy another major requirement or the following ECS courses:

- ECS 036B: Software Development and Object-Oriented Programming in C++
- ECS 150: Operating Systems and System Programming
- ECS 152B: Computer Networks
- ECS 163: Information Interfaces
- ECS 175: Computer Graphics
- ECS 177: Scientific Visualization
- ECS 178: Geometric Modeling

Technical Electives
After completion of the upper division elective requirement (at least 8 courses, 2 core, 2 with labs, 1 project) any units in excess of 32 will count toward the technical elective requirement.
CHE 002B, 002C and any upper-division course; except CHE 195, 197.
ENG 035, 045, and any upper-division engineering course not used in satisfaction of core degree requirements, excluding ENG 100, 160, 190 (each restricted to one unit of technical elective), 198, ECS 132, 154A, 154B, & 188 (ECS 154AB courses may be used by EEEL majors who did not take EEC 170).
A maximum of 6 units for any combination of engineering courses numbered 190C, 192, 198, and 199 may be used.

Mathematics
Any upper-division course except MAT 135A & 197TC.

Physics
Any upper-division PHY course, except 116, 137, 160 (restricted to one unit of technical elective), 195, 197T.

Statistics
Any upper-division course, except STA 100, 102, 103, 104, 106, 108, 120, 130A.
MGT 011B  Elementary Accounting  4
MGT 100  Introduction to Financial Accounting  3
MGT 120  Managing and Using Information Technology  4
MGT 140  Marketing for the Technology-Based Enterprise  4
MGT 150  Technology Management  4
MGT 160  Financing New Business Ventures  4
MGT 170  Management Accounting and Control  4
MGT 180  Supply Chain Planning and Management  4

Upper Division Composition Requirement; choose one; a grade of C- or better is required: 0-4
UWP 101  Advanced Composition  4
UWP 102A  Writing in the Disciplines: Special Topics  4
UWP 102B  Writing in the Disciplines: Biology  4
UWP 102C  Writing in the Disciplines: History  4

Electrical Engineering Minor

There has been an increasing need for professionals in most engineering disciplines to understand the fundamentals of electronic circuits, electronic signals, semiconductor devices, applied electromagnetics, control systems, computer systems, and communication systems.

The objective of this minor program is to prepare students with the necessary theoretical and practical training in one or many of the above mentioned fields. The minor program curriculum is designed to allow flexibility while
ensuring a solid foundation of fundamental electrical engineering concepts. The program is expected to accommodate students of diverse backgrounds.

The minor must be outside the department or program of your major and no more than one course may be counted toward both your minor and your major. The courses you take to satisfy the requirements of a minor, including those completed elsewhere, must be approved by an advisor in the Department of Electrical and Computer Engineering. You must have a minimum overall GPA of 2.000 and satisfy the minor course requirements, listed below. To receive notation of this minor on your diploma, you must obtain a minor petition and file it no later than the deadline for filing for graduation.

**Department Office.** 2030 Bainer Hall; 530-752-0102; [http://bae.engineering.ucdavis.edu](http://bae.engineering.ucdavis.edu)

**Energy Minor Programs**

There is an urgent need to develop and commercialize technologies for the sustainable conversion and use of energy. The goal of these minors is to prepare students for careers that require training in energy science and technology, efficiency, and policy. Clean technologies and green technologies including energy are some of the fastest growing markets for new investments. Well-trained individuals in all related fields are needed to provide the level of expertise required to advance technology and policy and to satisfy national and global objectives for greater energy sustainability. The minors are designed to accommodate persons of diverse backgrounds with
energy efficiency in areas that may include engineering, science, policy, economics, planning, and management.

**Energy Efficiency Minor**

All courses must be taken for a letter grade. A grade of C- or better is required for all courses used to satisfy minor requirements with an overall GPA in the required minor courses of 2.000 or better. Only one course overlap allowed between major and minor.

**Minor Advisors.** F. Loge (Civil & Environmental Engineering), D. Sperling (Institute of Transportation Studies), M. Modera (Western Cooling Efficiency Center)

- Biomedical Engineering
- Chemical Engineering
- Civil & Environmental Engineering
- Computer Science & Engineering
- Electrical & Computer Engineering
- Materials Science & Engineering
- Mechanical & Aerospace Engineering

Graduate Study

Graduate degrees (M.S & Ph.D.) are offered in the following engineering disciplines:

- Biological Systems Engineering
- Biomedical Engineering
- Chemical Engineering
- Civil & Environmental Engineering
- Computer Science
- Electrical & Computer Engineering
- Materials Science & Engineering
- Mechanical & Aerospace Engineering
- Transportation Technology & Policy

The Major Programs

Twelve majors, leading to the B.S. degree, are open to students:

- Aerospace Science & Engineering
- Biochemical Engineering
- Biological Systems Engineering
- Biomedical Engineering
- Chemical Engineering
- Civil Engineering
- Computer Engineering
- Computer Science & Engineering
- Electrical Engineering
- Environmental Engineering
- Materials Science & Engineering
- Mechanical Engineering

Minor Programs

The College of Engineering offers nine undergraduate minors:

- Biomedical Engineering (Department of Biomedical Engineering)
- Computational Biology (Department of Computer Science)
- Construction Engineering & Management (Department of Civil & Environmental Engineering)
- Electrical Engineering (Department of Electrical & Computer Engineering)

The Major Program

The study of English develops skills in reading analytically and perceptively and in writing clearly and effectively. Students major in English by taking courses in a wide variety of media, genres, topics, and historical periods. All students are introduced to the major by completing 20 units spread over courses in writing, any one of many topics courses, and the gateway series to the English major that covers “Literature in English” from the earliest medieval texts to the present. Students then build their own path through the major depending upon their particular interests, eventually completing 44 more units covering different historical periods, methods of theory and criticism, and thematic focuses. After a shared set of courses, students choose to specialize either in Literary Criticism and Theory or Creative Writing. All majors have the opportunity to work with distinguished writers, critics, scholars, and teachers.

English majors learn how to:

- Write clearly and effectively
- Think creatively and analytically
- Organize and communicate ideas creatively and efficiently
- Analyze and critically evaluate language and other forms of representation
- Understand texts within their historical, political, and cultural contexts
- Recognize and evaluate various perspectives, through creating or reading fiction, drama, and poetry
- Evaluate how fictional and non-fictional narratives structure thought and action
- Read long texts closely, analytically, and efficiently
- Respond spontaneously with organized, clear statements and ideas

Career Options. Graduates have found the major excellent pre-professional training for careers in teaching, writing, law, medicine, library work, journalism, and more. Many graduates are employed in publishing, marketing, advertising, or the tech sector. Others have worked in local, state, and federal government agencies, as well as in industry. Many have gone on to graduate study in a wide range of fields including English, education, counseling, and more.

Major Advising. All new and prospective English majors are encouraged to see an undergraduate staff advisor, individually, once per year, at minimum.

Foreign Languages. Students who contemplate advanced study in English should prepare for foreign language requirements for higher degrees and should consult with the graduate advisor.

Undergraduate Advisor. See Department website at http://english.ucdavis.edu or the Departmental Advising Office in 177/179 Voorhies Hall.

Honors & Honors Program. A Senior Honors Program is available to an invited group of English majors, who prepare and write a Senior Thesis (either a research paper or creative writing) in their final year. The critical honors program consists of four units of 194H and four units of 195H, normally taken during winter and spring quarters of the senior year. The creative writing honors program consists of four units of 100FA or 100PA, normally taken during spring quarter of the junior year, and four units of 195H, normally taken winter quarter of the senior year. Completion of the program is a prerequisite for High or Highest Honors at graduation. Eligibility criteria and application materials may be obtained at the Undergraduate Advising office in 177 Voorhies Hall or by accessing the Department website at http://english.ucdavis.edu. For more details, see Graduation Honors.

Education Abroad Options. The department strongly encourages interested students to pursue their studies abroad. It is possible for students to complete significant portions of the English major provided that the course is evaluated as at least four UC Davis units; the course is considered upper division by the standards set forth by UC Davis Study Abroad; the student presents copies of the coursework, syllabus, and writing assignments to the department’s advising staff.

Teaching Credential Subject Representative. See the Teacher Education program.

Entry Level Writing. Students must have met the Entry Level Writing requirement before taking any course in English.

Prerequisites. ENL 003 or UWP 001 is required for admission into all preparatory courses (040, 043, 044, 045, 010A, 010B, 010C), and all upper division courses, unless otherwise stated in the course listings. COM 001, 002, 003, or 004 or NAS 005 may normally be substituted for ENL 003 or UWP 001.

Coursework. Up to four upper division units in a national literature other than English or American, or in Comparative Literature, may count toward the requirements of the major

ENL 185C Women's Writing III 4
ENL 186 Literature, Sexuality, and Gender 4

Choose one course in film and media studies, language studies, cultural studies and contexts, literature and science/technology, or literature and the environment:

ENL 105 History of the English Language 4
ENL 106 English Grammar 4
ENL 107 Freedom of Expression 4
ENL 120 Law and Literature 4
ENL 160 Film as Narrative 4
ENL 161A Film History I: Origins to 1945 4
ENL 161B Film History II: 1945 to present 4
ENL 162 Film Theory and Criticism 4
ENL 164 Writing Science 4
ENL 171A The Bible as Literature: The Old Testament 4
ENL 171B The Bible as Literature: Prophets and New Testament 4
ENL 172 Video Games and Culture 4
ENL 173 Science Fiction 4
ENL 175 American Literary Humor 4
ENL 180 Children's Literature 4
ENL 182 Literature of California 4
ENL 183 Young Adult Literature 4
ENL 184 Literature and the Environment 4
CDM 172 (Pending Approval) 4
LIN 106 English Grammar 4
STS 172 Video Games and Culture 4
STS 173 Science Fiction 4
UWP 106 English Grammar 4

Please note that while some courses are identified as fulfilling more than one distribution requirement, a given course can only fulfill one such requirement.

Area of Emphasis; choose at least one: 12

Literature, Criticism, & Theory
One upper division English elective. 4
Choose two advanced courses, one of which can be a seminar:

Please note that English 110A or 110B is a prerequisite for advanced study in the major.

ENL 149 Topics in Literature 4
ENL 153 Topics in Drama 4
ENL 159 Topics in the Novel 4
ENL 163 Literary Study in the British Isles 4
ENL 165 Topics in Poetry 4
ENL 177 Study of an Individual Author 4
ENL 187A Topics in Literature and Media 4
ENL 188A Topics in Literary and Critical Theory 4
ENL 189 Seminar in Literary Studies 4
ENL 194H Seminar for Honors Students 4
ENL 195H Honors Thesis 4

Creative Writing

Please note that students must select courses in more than genre.
Three sections of:

ENL 100F Creative Writing: Fiction 4
ENL 100P Creative Writing: Poetry 4
ENL 100NF Creative Writing: Non-Fiction 4
ENL 100FA Creative Writing Advanced Fiction 4
ENL 100PA Creative Writing Advanced Poetry 4
English | ENL M.A.

Department Office. 176 Voorhies Hall; 530-752-2257; http://english.ucdavis.edu
Faculty. http://english.ucdavis.edu/people/faculty
The Minor Program
Pursuing a minor in English allows students to develop their abilities to read critically and to write clearly while enjoying the pleasures that great literature has to offer. To complete the minor, students take five upper division courses, at least four of which focus on literature, film, or other media. Choices within the curriculum are unlimited by historical period, and can include a course in creative writing. All minors have the opportunity to work with distinguished writers, critics, scholars, and teachers.
Career Alternatives. Graduates have found the minor to be an excellent complement to their training in other fields, helping to demonstrate their writing and critical thinking skills to employers and graduate schools.

English

Five upper division (100 level) English (ENL) courses; at least four of these must be literature courses (numbered 107-186).

Entomology

Entomology | ENT Information
The Major Program

The Entomology major is a general biological science program. The curriculum is designed to develop an understanding of fundamental biological concepts by studying insects. Insects offer unique opportunities to study biological systems and are model experimental animals. Many insects are either pests, or beneficial species that have great importance to the economy, environment or public health. Students may focus on specific areas of interest including agricultural entomology; insect systematics & evolution; behavior & ecology; medical entomology; and insect molecular biology, physiology & toxicology.

The Program. Students begin their study in entomology with selected insect biology courses. After completing these courses, students may enroll in courses in their particular area of interest. The Entomology Faculty encourages students to do research internships in their laboratories.

Career Alternatives. Entomology graduates find careers in many different areas of applied or basic biology. Graduates have the opportunity to continue in professional graduate programs such as veterinary or human medicine, or get advanced degrees leading to careers in biotechnology, conservation biology, or academic teaching and research. Many graduates have participated in internship programs with the California Department of Food and Agriculture and found careers in insect diagnostic laboratories, conducting insect surveys, and/or developing entomological collections. Other graduates have worked in agriculture in the area of insect pest management. Graduates are prepared for managerial and technical positions with state and federal agencies and in agricultural production and supporting industries. Some entomology graduates pursue careers in primary, secondary, and college level science education.

Major Advisors. S. Lawler, S. Nadler

Minor Requirements:
The Department of Entomology has five minor programs open to students in other disciplines who are interested in rounding out their academic study with a concentration in the area of entomology.

Minor Adviser. S. Lawler, S. Nadler

Graduate Study. The Department of Entomology offers a program of study and research leading to the M.S. and Ph.D. degrees. For further details, see Graduate Studies and the Graduate Announcement.

Related Courses. See courses in Nematology.

Environmental Engineering

Environmental Engineering | Environmental Engineering B.S.
(College of Engineering)
Amit M. Kanvinde, Ph.D., Chairperson of the Department; 530-752-2605
Environmental engineers are responsible for designing processes and infrastructure to ensure society has access to safe water, clean air, and healthy ecosystems. Environmental engineers apply knowledge from physics, chemistry, biology and the social sciences to problems in a variety of areas including water & wastewater treatment and ecosystem remediation, analysis of chemical fate and transport in the natural environment, and modeling of hydrologic & atmospheric flows. As climate change creates new challenges, such as in the form of droughts and intense weather events, the field of environmental engineering evolves to meet society's needs. As an environmental engineering student at UC Davis, you will gain skills that enable you to design sustainable solutions for society.

The Environmental Engineering major started in 2017 and has not yet undergone accreditation review, therefore students who are interested in majoring in environmental engineering are highly encouraged to double major in civil engineering.

Students are encouraged to adhere carefully to all prerequisite requirements. The instructor is authorized to drop students from a course for which stated prerequisites have not been completed. Exclusive of General Education units, the minimum number of units required for the Environmental Engineering major is 136 (72-73 units in lower division and 64-68 units in upper division).

**Lower Division Required Courses**

Environmental Geology Minor; Geology

Environmental Geology Minor; Geology | Environmental Geology Minor

(College of Letters & Science)

Michael E. Oskin, Ph.D., Chairperson of the Department
Environmental Horticulture & Urban Forestry

Environmental Horticulture & Urban Forestry | Environmental Horticulture & Urban Forestry B.S.

(College of Agricultural & Environmental Sciences)

The Major Program. Students majoring in Environmental Horticulture & Urban Forestry learn how plants improve the environment and the quality of our lives. The major focuses on the biological and physical concepts and horticultural principles of plant production, management of plants and plant ecosystems in landscape settings and sociological aspects of plant/people interactions in the urban environment. Plants are used to revegetate and restore disturbed landscapes, control erosion and reduce energy and water consumption. The ornamental use of plants to improve the aesthetic quality of urban and rural landscapes, recreational areas, interiorscapes and commercial sites is an important aspect of this major. Students may select one or more of the following three areas of specialization: Floriculture/Nursery, Plant Biodiversity/Restoration, or Urban Landscape Management.

Internships & Career Opportunities. Students are encouraged to develop internships on or off campus to augment their activities in the classroom and laboratory. Internships are available with the department's greenhouse facility, the UC Davis Arboretum, landscape designers, local nurseries, government agencies, regional non-profits, and restoration firms. Career opportunities in this field include growing and/or managing plants in a variety of settings, including nurseries & arboretum, consulting as an arborist, or as an urban, landscape, or restoration horticulturist; business ownership; park management and landscape contracting; working in the public or private sector, or for non-profit organizations.

Major Advisor. T.P. Young
CMN 001 recommended as part of the College English Composition Requirement or the Words & Images Core Literacy Component.

*Environmental Horticulture*  
ENH 001 Introduction to Environmental Horticulture/Urban Forestry 3  
ENH 006 Introduction to Environmental Plants 4

*Landscape Architecture*  
LDA 030 History of Environmental Design 4

MAT 016A Short Calculus 3  
STA 013 Elementary Statistics 4

*Choose one:*  
UWP 102B Writing in the Disciplines: Biology 4  
UWP 102G Writing in the Disciplines: Environmental Writing 4  
UWP 104E Writing in the Professions: Science 4  
Other upper division composition course. May overlap with college composition requirement; may be satisfied by passing the English Composition Exam.

*Lower Division Restricted Electives*  
Choose one lower division resource science course and one lower division social science/humanities course in consultation with advisor; minimum six units.

*Depth Subject Matter*  
Choose one:  
ENH 102 Physiological Principles in Environmental Horticulture 4  
PLS 100A Metabolic Processes of Cultivated Plants 3

Choose one:  
ENH 105 Taxonomy and Ecology of Environmental Plant Families 4  
PLS 102 California Floristics 5  
PLB 108 Systematics and Evolution of Angiosperms 5

Choose one:  
PLB 117 Plant Ecology 4  
PLS 150 Sustainability and Agroecosystem Management 4

*Plant Science*  
PLS 171 Principles and Practices of Plant Propagation 4
Choose two:

ENT 110  Arthropod Pest Management  5
NEM 100  General Plant Nematology  4
PLP 120  Introduction to Plant Pathology  4
PLS 105  Concepts in Pest Management  3
PLS 176  Introduction to Weed Science  4

Internship or research; must be approved by major advisor.

Upper Division Restricted Electives

In consultation with an advisor, choose three upper division courses in the areas of resource sciences and social sciences/humanities; at least one course must come from each of these two areas; minimum nine units.

Areas of Specialization; choose one:

No course may be used to satisfy more than one requirement.

Floriculture/Nursery Option

ENH 120  Management of Container Media  3
ENH 125  Greenhouse and Nursery Crop Production  5
ABT 165  Irrigation Practices for an Urban Environment  2
ENT 135  Introduction to Biological Control  4
Choose one:

PLS 100C  Environmental Interactions of Cultivated Plants  3
PLS 158  Mineral Nutrition of Plants  4
SSC 109  Sustainable Nutrient Management  4

Plant Biodiversity/Restoration Option

ENH 160  Restoration Ecology  3
ENH 160L  Restoration Ecology Laboratory  1
Choose one:

ENH 150  Genetics and Plant Conservation: The Biodiversity Crisis  3
EVE 100  Introduction to Evolution  4
PLB 116  Plant Morphology and Evolution  5
(a) Choose one:

ESM 141  Role of Fire in Natural Ecosystems  4
ESP 127  Plant Conservation Biology  4
ESP 155L  Wetland Ecology Laboratory  3
PLS 130  Rangelands: Ecology, Conservation and Restoration  3
PLS 150  Sustainability and Agroecosystem Management  4
WFC 155  Habitat Conservation and Restoration  3
(b) Choose one:

ESP 155  Wetland Ecology  4
PLB 108  Systematics and Evolution of Angiosperms  5
PLB 117  Plant Ecology  4
PLB 119  Population Biology of Invasive Plants and Weeds  3
PLS 102  California Floristics  5
PLS 144  Trees and Forests  4
PLS 147 & 147L:

PLS 147  California Plant Communities  3
PLS 147L  California Plant Communities Field Study  1
PLS 163  Ecosystem and Landscape Ecology  4
PLS 176  Introduction to Weed Science  4
WFC 156  Plant Geography  4
WFC 157  Coastal Ecosystems  4
Choose one additional class from section a or b. 3-5

John Muir Institute of the Environment

**Program Coordinators:** Jessica Penrose

**Program Chair:** Michael Springborn

The Master of Science in Environmental Policy & Management (EPM) program provides training in applying environmental science to real-world environmental policy and management issues. Graduates of this program are equipped to integrate technical and scientific expertise in a social-political-natural context to provide effective environmental policy and management solutions; for more information, see Environmental Policy & Management.

**Environmental Policy Analysis & Planning**

**Environmental Policy Analysis & Planning | EPA&P Information**
Environmental Policy Analysis & Planning | EPA&P B.S.

The Major Program

The major in Environmental Policy Analysis & Planning develops skills for designing and assessing sustainable policies for environmental quality and natural resource management.

Any student in good standing is eligible to transfer to the major; to do so, please see the staff advisor, Melissa Whaley, in 2134 Wickson Hall, or the master advisor, Prof. G. Arnold, in 2144 Wickson Hall.

The Program. This major provides students with a strong background in policy analysis, including the evaluation of policy alternatives and the study of factors affecting policy formulation and implementation. Key components of this interdisciplinary training include a general background in the natural sciences relevant to environmental policy, economics, political science, statistics, and research methodology to quantitatively analyze environmental problems and policy options. In addition, students are encouraged to develop substantive knowledge in a specific field of environmental policy, such as urban and regional planning, water policy, transportation and energy, climate policy, or conservation management.

Careers. Environmental policy analysis and planning graduates are prepared for employment in environmental, natural resource, energy, and transportation focused public agencies, consulting firms, non-governmental organizations, and businesses, or as legislative aides for elected representatives. The major is also excellent preparation for students who want to go on to graduate work in law, planning, public policy, political science, economics, or business.

Major Advisor. G. Arnold (Environmental Science & Policy)

**Integrative Policy**

Students choosing this individualized track must consult with a faculty advisor to identify an area of emphasis within this track and to select four upper division courses with a common theme. Possible areas of emphasis are marine policy, pollutants in the environment, planning in the presence of environmental hazards, sustainable development, or environmental and natural resource economics. If you are considering this track, please contact the major adviser as soon as possible.

Environmental Policy Analysis & Planning | EPA&P Minor

(College of Agricultural & Environmental Sciences)

Faculty. http://desp.ucdavis.edu/faculty

The faculty for environmental policy analysis & planning offers the following minor. The Environmental Policy Analysis minor is for natural and social science students desiring basic training in policy analysis theory and methods.

Minor Advisor. G. Arnold (Environmental Science & Policy)

Preparation

Units: 0-4

ECN 001A: Principles of Microeconomics
ECN 001A not included in units required for the minor.

Basic course in political science.

Environmental Policy Analysis

Units: 23-25

Environmental Science & Policy

Units: 17

ESP 001 Environmental Analysis
ESP 160 The Policy Process
ESP 161 Environmental Law
ESP 168A Methods of Environmental Policy Evaluation

Choose two:

Units: 6-8

ESP 163 Energy and Environmental Aspects of Transportation
ESP 165 Climate Policy
ESP 166 Ocean and Coastal Policy
ESP 167 Energy Policy
ESP 168B Methods of Environmental Policy Analysis
ESP 169 Water Policy and Politics
ESP 171 Urban and Regional Planning
ESP 172 Public Lands Management
ESP 179 Environmental Impact Assessment

Total: 23-25

Environmental Science & Management

Environmental Science & Management | ESM B.S.

(College of Agricultural & Environmental Sciences)

The Environmental Science & Management (ESM) major is jointly coordinated by the Department of Environmental Science & Policy and the Department of Land, Air, & Water Resources.

Environmental Science & Policy

Marcel Holyoak, Chairperson

Department Office. 2132 Wickson Hall; 530-752-3026; http://desp.ucdavis.edu

Faculty. https://desp.ucdavis.edu/faculty

Land, Air, & Water Resources

William Horwath, Chairperson

Department Office. 1110 Plant and Environmental Sciences Building; 530-752-1130; http://lawr.ucdavis.edu

Faculty. http://www.lawr.ucdavis.edu/people/faculty
The Major Program

The Environmental Science & Management (ESM) major is designed for students who are interested in solving environmental problems from an interdisciplinary perspective linking the natural and social sciences.

Students who choose this major will study the interaction of physical, biological, and social components of environmental problems. Students completing the program will understand the scientific basis for environmental decision making and the legal, economic, and political issues involved in management of the environment.

The Program. Courses in biology, chemistry, physics, economics, geology, and calculus form the lower-division preparatory foundation of the curriculum. These are then tied together with Environmental Science & Policy (ESP) 001, "Environmental Analysis," which provides an inter-disciplinary analysis of several environmental problems. The upper-division core consists of foundation courses in physical, biological, and social sciences, as well as applied courses in environmental monitoring, GIS, impact reporting, and statistical analysis. In their junior year, students must choose a specialized track from the following six options:

(a) Ecology, Biodiversity, & Conservation
(b) Natural Resource Management
(c) Climate Change & Air Quality
(d) Geospatial Information Science
(e) Watershed Science
(f) Soils & Biogeochemistry

A capstone course is required for all seniors and serves to integrate the science, policy/management and biology aspects of the ESM major. All students gain practical experience through field courses and a required internship. Selected students may also pursue an honors thesis in their senior year.

The ESM major is jointly administered by the Departments of Environmental Science & Policy (ESP) and Land, Air & Water Resources (LAWR). Any student in good standing is eligible to transfer to the major; to do so, please see the student affairs officers in 2134 Wickson Hall or in 1150 Plant & Environmental Sciences Building.

Careers. Graduates from this program are prepared to pursue careers as practicing environmental scientists, resource analysts and planners working for public agencies and private firms specializing in environmental quality, natural resources or ecological research. The major is also an excellent preparation for graduate or professional training in physical and/or biological environmental science graduate programs, as well as in environmental law, administration and environmental policy.

Major Advisors. Marissa Baskett (Environmental Science & Policy) and Terrence Nathan (Land, Air & Water Resources)

Advising centers for the major, including peer advising, are located in both the Environmental Science & Policy and Land, Air & Water Resources departments. Students whose last names begin with the letters A-L, please see Melissa Whaley in 2134 Wickson Hall. Students whose last names begin with the letters M-Z, please see Lacole Brooks in 1150 Plant & Environmental Sciences.

The Program of Study

Environmental Science & Policy is a teaching and research department offering courses, workshops, and directed group study classes that focus on the complex trade-offs that arise from interdependencies between natural and human systems. The department offers Bachelor of Science degrees in Environmental Science & Management and in Environmental Policy Analysis & Planning. Courses in Environmental Science & Policy also supplement major programs in a wide variety of established disciplines.

Current Information. Through its continuing contacts with many other departments and teaching divisions on the campus, the department develops a variety of special courses and workshops each year. Check with the Department office for up-to-date information about our courses and workshops.

Graduate Study. The Graduate Group in Ecology which is housed in Environmental Science & Policy offers an M.S. and Ph.D. degree program. Further information about graduate programs in ecology should be obtained from the chairperson of the Graduate Group in Ecology.

Group Office. 1005 Wickson Hall; 530-752-6752; http://ecology.ucdavis.edu/

Environmental Toxicology

The Major Program

Toxic agents in the environment include pesticides, food additives, industrial waste, and metals as well as chemicals produced by animals, plants, fungi and bacteria. Students in the Environmental Toxicology major learn how toxicants produce adverse effects by understanding their environmental fates and biological activities. They learn about monitoring concentrations and the distribution and persistence of agents found in water, soil, air and foods. Toxicity testing procedures and exposure assessments are used to help evaluate potential for harm to humans and other species. By understanding the cellular targets and biochemical mechanisms of perturbation by toxicants, toxicologists can better estimate adverse effects. Overall, students learn mechanisms by which toxic agents act, their origin and fate and how toxicologists evaluate the risk of adverse effects and balance them against the benefits.

The Program. Preparatory courses in biology, chemistry, mathematics, and physics are required to provide fundamental principles that underlie toxicology. Students in the major are expected to understand the environmental fates and biological activities of different classes of toxic substances, and the legislative issues that arise from chemical use. Opportunities are available to develop in-depth understanding in areas of emphasis through selection of electives.

Emphases. Elective course work in many disciplines can complement the required core courses. Providing a framework for selecting restricted electives, the major offers specializations in (1) Ecotoxicology & Environmental Chemistry, (2) Forensic Science & Regulatory Toxicology, and (3) Molecular & Biomedical Toxicology. The first category includes topics in chemical fate, transport and degradation, as well as ecology, wildlife, and aquatic toxicology. The second category includes forensic science, environmental policy and management, and public health. The third category includes pharmacology, biotechnology, medicine, veterinary medicine, and food
toxicology. Students are encouraged to select course work from these Emphases and beyond to match their interests.

**Internships and Career Alternatives.** Occupations that use environmental toxicology include risk assessment, pharmaceutical development, food additive toxicity testing, managing regulatory compliance, residue or forensic analysis, pest control, monitoring and field sampling, industrial hygiene, and environmental health and safety. A substantial proportion of graduates elect to pursue advanced training in graduate or professional schools. Others with the B.S. degree go on to law, medical, pharmacy, or veterinary medical school, as well as to graduate programs in pharmacology, toxicology, agricultural and environmental chemistry, or public health. During undergraduate study, optional internships or research projects are recommended to provide training and work experience to help students pursue future goals.

**Major Advisor.** Matthew Wood

**Advising Center** for the major is in 4111 Meyer Hall. Contact the Academic Program Advisor at 530-752-1042.

Environmental Toxicology | ETX Minor

(College of Agricultural & Environmental Sciences)

Robert H. Rice, Ph.D., Chairperson of the Department

Department Office. 4138 Meyer Hall; 530-752-1142; http://etox.ucdavis.edu

Faculty. http://etox.ucdavis.edu/directory/faculty/

Environmental Toxicology explores the effects of toxicants (both human made and naturally occurring) on the normal biochemical, cellular, and physiological functioning of biological systems. The minor will complement your course of study by enhancing your appreciation of the complexity and resiliency of biological systems when challenged by chemical agents and the fate and impact of chemicals in the environment. The science underlying a variety of current environmental issues is presented.

Minor Advisor. Qi Zhang

Advising Center for the major and minor is in 4111 Meyer Hall. Contact the Academic Program Advisor at 530-752-1042.

John Stachowicz, Ph.D., Chairperson of the Department
Department Office. 2320 Storer Hall; 530-752-1272; http://www.eve.ucdavis.edu
The Evolution, Ecology & Biodiversity Major Program
The major in Evolution, Ecology & Biodiversity offers the student a broad background in the theoretical and empirical basis of our understanding of the diversity and distribution of living organisms.

The Program. The program of study for the major begins with a core of introductory courses in mathematics, physical sciences, and biology. These are followed by survey courses in biodiversity, evolution and ecology and various more specialized courses that focus the student on particular disciplines or organisms, with an emphasis on problem-solving and critical thinking. Evolution, Ecology & Biodiversity majors may earn either a Bachelor of Science or a Bachelor of Arts degree. The requirements for the B.S. degree program include more science courses, such as biochemistry, whereas those for the A.B. degree program allow room for more electives within the humanities and social sciences. The A.B. degree is especially appropriate for those students who wish to combine arts or languages with evolution and ecology for career preparation in such areas as scientific writing, translating or illustration.

Career Alternatives. A degree in Evolution, Ecology & Biodiversity prepares the student for career opportunities in research, teaching, health professions, veterinary medicine, agriculture, environmental management, and industry. Many students gain some research experience while at UC Davis and choose to continue their training at the graduate level. This track offers careers in academics, government, environmental organizations, or business.

Teaching Credential Subject Representative. Students planning for a teaching career should consult the School of Education in regards to preparation for certification; see the Teaching Credential/M.A. Program.

The Evolution, Ecology & Biodiversity Major Program

The major in Evolution, Ecology & Biodiversity offers the student a broad background in the theoretical and empirical basis of our understanding of the diversity and distribution of living organisms.
The Program. The program of study for the major begins with a core of introductory courses in mathematics, physical sciences, and biology. These are followed by survey courses in biodiversity, evolution and ecology and various more specialized courses that focus the student on particular disciplines or organisms, with an emphasis on problem-solving and critical thinking. Evolution, Ecology & Biodiversity majors may earn either a Bachelor of Science or a Bachelor of Arts degree. The requirements for the B.S. degree program include more science courses, such as biochemistry, whereas those for the A.B. degree program allow room for more electives within the humanities and social sciences. The A.B. degree is especially appropriate for those students who wish to combine arts or languages with evolution and ecology for career preparation in such areas as scientific writing, translating or illustration.

Career Alternatives. A degree in Evolution, Ecology & Biodiversity prepares the student for career opportunities in research, teaching, health professions, veterinary medicine, agriculture, environmental management, and industry. Many students gain some research experience while at UC Davis and choose to continue their training at the graduate level. This track offers careers in academics, government, environmental organizations, or business.

Evolution & Ecology | EE&B Minor

(College of Biological Sciences)

John Stachowicz, Ph.D., Chairperson of the Department

Department Office. 2320 Storer Hall; 530-752-1272; http://www.eve.ucdavis.edu

Learn about the diversity of life of Earth, including diversity in genes, physiology, shapes, sizes, and behaviors. You will learn about how this diversity emerged, as plants, animals, and microbes became adapted to the environment and to each other. You will learn to predict whether populations of interacting organisms will persist over time.

Master Advisor. Arthur Shapiro, Ph.D.

Faculty. http://nursing.ucdavis.edu

Mission Statement
The Betty Irene Moore School of Nursing at UC Davis cultivates academic excellence through immersive, interprofessional and interdisciplinary education and research in partnership with the communities serves. Faculty, staff and students discover and disseminate knowledge to advance health, improve quality of care and shape policy.

Nursing Science and Health-Care Leadership Graduate Degree Program
Irene Moore School of Nursing at UC Davis, the Nursing Science and Health-Care Leadership Graduate Degree Programs prepare nurse leaders, physician assistants, nurse practitioners, researchers and faculty in a unique interdisciplinary and interprofessional environment. The full-time, academic, doctoral program prepares graduates as leaders in health care, health policy and nurse faculty/researchers at the university level. The master's degree Physician Assistant Studies program prepares graduates to deliver care as physician assistants. Graduates of the professional master's degree leadership program are prepared for health-care leadership roles in a variety of organizations and as nurse faculty at the community college and prelicensure education levels. Graduates of the master's degree Nurse Practitioner Program are prepared to deliver care as nurse practitioners.

Faculty
The UC Davis Nursing Science and Health-Care Leadership Graduate Group includes a wide cross-section of academic disciplines with faculty from the Betty Irene Moore School of Nursing as well as UC Davis Health System and other UC Davis schools, colleges, and departments. Within the graduate group faculty are experts in nursing, medicine, health informatics, nutrition, biostatistics, public health and other fields.

The Master of Science—Family Nurse Practitioner Degree Program prepares graduates to deliver care as family nurse practitioners (FNP). In alignment with the school's vision to advance health, the mission of the family nurse practitioner program is to educate health care professionals to lead clinical programs in collaborative teams and to improve the availability of culturally relevant primary health care to underserved populations throughout California.

Feminist Theory & Research
The Gender, Sexuality and Women's Studies Program at UC Davis offers a Designated Emphasis in Feminist Theory & Research. Currently, graduate students in the following sixteen affiliated Ph.D. programs are eligible to participate: Anthropology, Comparative Literature, Cultural Studies, Education, English, French, German, Geography, History, Native American Studies, Nursing, Performance Studies, Psychology, Sociology, Spanish, and the Study of Religion.

The Designated Emphasis in Feminist Theory and Research affords graduate students in affiliated programs the opportunity to augment their Ph.D. in a given discipline with a specialization in Feminist Theory and Research. Typically, a doctoral student in good standing may seek admission to the Designated Emphasis in Feminist Theory and Research and enroll in Designated Emphasis in Feminist Theory and Research courses. Those students in affiliated Ph.D. programs who complete the requirements of the Designated Emphasis will have this noted on their transcripts and their Ph.D. diploma will note the “Special Emphasis in Feminist Theory & Research.”

Students must complete all the requirements for the Ph.D. in their home department. The requirements for the Designated Emphasis in Feminist Theory and Research are the successful completion of the two core courses, Women's Studies (WMS) 200A & 200B, and two additional courses focusing on gender, sexuality, and women's studies; one in the student's home department and one outside their home department. A member of the DE affiliated faculty must be a member of the student's qualifying examination. As with the Qualifying Exam, one member of the candidate's dissertation committee must be a member of the DE. Analysis of gender or sexuality is expected to be a central component of both the student's qualifying examination and doctoral research.

Students should consult with the Chair of the Designated Emphasis in Feminist Theory and Research before enrolling in a graduate course for which they wish to receive credit to ensure that it will count toward fulfilling the requirements of the Designated Emphasis. If possible, please bring a copy of the syllabus or an expanded course description to your meeting.

Fiber & Polymer Science | FPS B.S.
(College of Agricultural & Environmental Sciences)
Faculty. https://textiles.ucdavis.edu/faculty

The Major Program

The Fiber & Polymer Science major is concerned with the physical, chemical, and structural properties of fibers and polymers and how these relate to fiber and polymer performance and end-use.

The Program. All students in this major take a common core of course work in chemistry, physics, and mathematics, and depth subject matter in fiber and polymer science, organic and physical chemistry, and technical writing. In the restricted electives, students select courses from areas such as computer science and mathematics, chemistry, marketing and management, material and advanced fiber and polymer science, and textiles.

Career Alternatives. The major prepares the student for a career in a wide range of industries in the areas of research and development, technical marketing and management, production, quality control, and science teaching (on completion of an additional year in the teaching credential program). The companies employing Fiber and Polymer Science graduates are in the fiber, polymer, industrial product, textile and/or chemical business.
Graduates are prepared to enter the graduate program in textiles or agricultural and environmental chemistry with a specialization in fiber and polymer chemistry, fiber and materials science and polymer engineering programs at other universities.

**Major Advisor.** Y. L. Hsieh (Textiles & Clothing)

**Advising Center** for the major is located in 1204 RMI south 530-752-3250 or 129B Everson Hall 530-754-8368.

- TXC 174 Introduction to World Trade in Textiles and Clothing 4

**Total:** 115-127

**Fiber & Polymer Science | FPS Minor**

(College of Agricultural & Environmental Sciences)

**Faculty.** [https://textiles.ucdavis.edu/faculty](https://textiles.ucdavis.edu/faculty)

**The Major Program**

349
The Fiber & Polymer Science major is concerned with the physical, chemical, and structural properties of fibers and polymers and how these relate to fiber and polymer performance and end-use.

**The Program.** All students in this major take a common core of course work in chemistry, physics, and mathematics, and depth subject matter in fiber and polymer science, organic and physical chemistry, and technical writing. In the restricted electives, students select courses from areas such as computer science and mathematics, chemistry, marketing and management, material and advanced fiber and polymer science, and textiles.

**Career Alternatives.** The major prepares the student for a career in a wide range of industries in the areas of research and development, technical marketing and management, production, quality control, and science teaching (on completion of an additional year in the teaching credential program). The companies employing Fiber and Polymer Science graduates are in the fiber, polymer, industrial product, textile and/or chemical business. Graduates are prepared to enter the graduate program in textiles or agricultural and environmental chemistry with a specialization in fiber and polymer chemistry, fiber and materials science and polymer engineering programs at other universities.

**Minor Advisor.** Y. L. Hsieh (Textiles & Clothing)

**Advising Center** for the major is located in 1204 RMI south 530-752-3250 or 129B Everson Hall 530-754-8368.

**Fiber and Polymer Science**  
**Units:** 18

- **Choose one:**
  - TXC 006 Introduction to Textiles 4
  - ENG 045 Properties of Materials 4

- **Choose 14 units:**
  - FPS 100 Principles of Polymer Materials Science 3
  - FPS 150 Polymer Syntheses and Reactions 3
  - FPS 161 Structure and Properties of Fibers 3
  - FPS 161L Textile Chemical Analysis Laboratory 1
  - **Fiber & Polymer Science**
    - FPS 180A Introduction to Research in Fiber and Polymer Science 2
    - FPS 180B Introduction to Research in Fiber and Polymer Science 2
  - **Textiles & Clothing**
    - TXC 163 Textile Coloration and Finishing 3
    - TXC 163L Textile Coloration and Finishing Laboratory 1

**Total:** 18

### First-Year Seminar Program

**First-Year Seminar Program | First-Year Seminar Program**

**Program Office.** The Grove, Room 1350 (Surge III); [http://fys.ucdavis.edu/](http://fys.ucdavis.edu/)

Questions pertaining to the following courses should be directed to the instructor or to the First-Year Seminars Office in Undergraduate Education.

### Food Science

**Food Science | Food Science B.S.**

*(College of Agricultural & Environmental Sciences)*

Department of Food Science & Technology

Linda J. Harris, Ph.D., Chairperson of the Department

**Department Office.** 1136 RMI North Building; 530-752-1482; [http://foodscience.ucdavis.edu](http://foodscience.ucdavis.edu)

**Faculty.** [https://foodscience.ucdavis.edu/person-type/101](https://foodscience.ucdavis.edu/person-type/101)

**The Major Program**
Preparatory Subject Matter

Choose one:
- UWP 102F Writing in the Disciplines: Food Science and Technology 4
- UWP 104A Writing in the Professions: Business Writing 4
- UWP 104E Writing in the Professions: Science 4
The upper-division composition exam will satisfy this requirement.

Communication
- CMN 001 Introduction to Public Speaking 4

Mathematics
- MAT 016A Short Calculus 3
- MAT 016B Short Calculus 3
- MAT 016C Short Calculus 3

Biological Science
- BIS 002A Introduction to Biology: Essentials of Life on Earth 5

Chemistry
- CHE 002A General Chemistry 5
- CHE 002B General Chemistry 5
- CHE 002C General Chemistry 5
- CHE 008A Organic Chemistry: Brief Course 2
- CHE 008B Organic Chemistry: Brief Course 4
A more advanced series.

Physics
- PHY 007A General Physics 4
- PHY 007B General Physics 4
- PHY 007C General Physics 4

Food Science & Technology
- FST 050 Introduction to Food Preservation 3

Statistics
- STA 013 Elementary Statistics 4

Nutrition
- NUT 010 Discoveries and Concepts in Nutrition 3
Approved substitute.
## Depth Subject Matter

**Biological Science**
- BIS 102 Structure and Function of Biomolecules: 3 units
- BIS 103 Bioenergetics and Metabolism: 3 units

**Microbiology**
- MIC 102 Introductory Microbiology: 3 units
- MIC 103L Introductory Microbiology Laboratory: 2 units

**Food Science & Technology**
- FST 100A Food Chemistry: 4 units
- FST 100B Food Properties: 4 units
- FST 101A Food Chemistry Laboratory: 3 units
- FST 101B Food Properties Laboratory: 2 units
- FST 103 Physical and Chemical Methods for Food Analysis: 4 units
- FST 104 Food Microbiology: 3 units
- FST 104L Food Microbiology Laboratory: 4 units
- FST 110 Food Processing: 4 units
- FST 110L Food Processing Laboratory: 2 units
- FST 190 Senior Seminar: 1 unit

**Choose one:**
- FST 117 Design and Analysis for Sensory Food Science: 4 units
- STA 106 Applied Statistical Methods: Analysis of Variance: 4 units

**Choose one:**
- FST 107 Food Sensory Science: 4 units
- FST 127 Sensory Evaluation of Foods: 4 units

## Restricted Electives

**FST 003** Introduction to Brewing and Beer: 3 units
**FST 102A** Malting and Brewing Science: 4 units
**FST 102B** Practical Malting and Brewing: 4 units
**FST 107** Food Sensory Science: 4 units
**FST 109** Principles of Quality Assurance in Food Processing: 3 units
**FST 119** Chemistry and Technology of Milk and Dairy Products: 4 units
**FST 123** Introduction to Enzymology: 3 units
**FST 123L** Enzymology Laboratory: 2 units
**FST 128** Food Toxicology: 3 units
**FST 159** New Food Product Ideas: 3 units
**FST 160** Food Product Development: 4 units
**FST 192** Internship for Advanced Undergraduates: 1-12 units
**FST 199** Special Study for Advanced Undergraduates: 1-5 units
**FST 213** Flavor Chemistry of Foods and Beverages: 3 units
**FST 219** Biochemistry, Microbiology and Technology of Cheeses of the World: 4 units
**ARE 018** Business Law: 4 units
**ARE 100A** Intermediate Microeconomics: Theory of Production and Consumption: 4 units

**Units: 50**

**Units: 18**

**Brewing Science Option**

The Brewing Science option prepares Food Science students for careers in production or quality assurance within the brewing industry or other food fermentation industries. The option also prepares students for graduate study in food science or related programs, and exposes the students to diverse disciplines, including chemistry, biochemistry, microbiology, and processing.

**Specific course requirements:**

- FST 102A  Malting and Brewing Science  4
- FST 102B  Practical Malting and Brewing  4
- FST 123  Introduction to Enzymology  3

**Selected additional courses:**

- FST 003  Introduction to Brewing and Beer  3
- FST 109  Principles of Quality Assurance in Food Processing  3
- FST 159  New Food Product Ideas  3
- FST 160  Food Product Development  4

**Units:** 18

**Total:** 133
Food Science (Graduate Group)

Food Science (Graduate Group) | Food Science Information
Maria L. Marco, Ph.D., Chairperson of the Group

Group Office. 1204 RMI South Building; 530-752-3250; bftvadvising@ucdavis.edu; https://foodscience.ucdavis.edu/

Faculty. Includes members from nine departments in the Colleges of Agricultural & Environmental Sciences, Letters & Science, and Engineering, and the Schools of Medicine and Veterinary Medicine.

Food Science (Graduate Group) | Food Science M.S.
Maria L. Marco, Ph.D., Chairperson of the Group

Group Office. 1204 RMI South Building; 530-752-3250; bftvadvising@ucdavis.edu; https://foodscience.ucdavis.edu/

Faculty. Includes members from nine departments in the Colleges of Agricultural & Environmental Sciences, Letters & Science, and Engineering, and the Schools of Medicine and Veterinary Medicine.

Graduate Study. The interdepartmental Graduate Group in Food Science offers programs of study leading to the M.S. degree. Graduate studies stress the application of the biological, chemical, physical, and behavioral sciences to processing, preservation, quality evaluation, public health aspects, and utilization of foods. Areas of specialization include chemistry-biochemistry, microbiology, engineering-technology, brewing, and sensory science. Detailed information regarding graduate study is available through the Group Chairperson or the Group office.

Graduate Advisor. Contact the Food Science Graduate Group office at bftvadvising@ucdavis.edu.

Food Science (Graduate Group) | Food Science Ph.D.
Maria L. Marco, Ph.D., Chairperson of the Group

Group Office. 1204 RMI South Building; 530-752-3250; bftvadvising@ucdavis.edu; https://foodscience.ucdavis.edu/

Faculty. Includes members from nine departments in the Colleges of Agricultural & Environmental Sciences, Letters & Science, and Engineering, and the Schools of Medicine and Veterinary Medicine.

Graduate Study. The interdepartmental Graduate Group in Food Science offers programs of study leading to the Ph.D. degree. Graduate studies stress the application of the biological, chemical, physical, and behavioral sciences to processing, preservation, quality evaluation, public health aspects, and utilization of foods. Areas of specialization include chemistry-biochemistry, microbiology, engineering-technology, brewing, and sensory science. Detailed information regarding graduate study is available through the Group Chairperson or the Group office.

Faculty. http://nutrition.ucdavis.edu/people/faculty/index.html

The Department of Nutrition offers four minor programs open to students majoring in other disciplines who wish to complement their study programs with a concentration in the area of food and nutrition.

Graduate Study. Programs of study leading to the M.S. and Ph.D. degrees are available in Nutrition. For information on graduate study contact the Nutrition Graduate Group.

Minor Advisor. 3202 Meyer Hall; 530-752-2512

Food Service Management

Preparation.
Plan in advance to include the required course prerequisites.

Food Science & Technology

FST 100A  Food Chemistry  4
FST 100B  Food Properties  4
FST 101A  Food Chemistry Laboratory  3
FST 101B  Food Properties Laboratory  2

Food Service Management

FSM 120  Principles of Quantity Food Production  4
FSM 120L  Quantity Food Production Laboratory  2
FSM 122  Food Service Systems Management  3

Agricultural and Resource Economics

ARE 112  Fundamentals of Organization Management  4

Replacement courses; see note below:
Note: If the student’s major program requires the same course in biochemistry and physiology, only one of the courses may duplicate credit toward the minor.
Each program below lists replacement courses to fulfill the minimum unit requirement.

NUT 010  Discoveries and Concepts in Nutrition  3
NUT 11A  Introduction to Nutrition and Metabolism  3

Forensic Science (Graduate Group)
Forensic Science (Graduate Group) | Forensic Science M.S.

Kent Pinkerton, Ph.D., Chairperson of the Group
Ruth Dickover, M.S. Ph.D., Director of the Program
Philip Meisch, Student Affairs Officer

Group Office. 1909 Galileo Ct., Suite B; Davis, CA 95618; 530-747-3913; http://forensicscience.ucdavis.edu
Faculty. http://forensicscience.ucdavis.edu/graduate-group

Graduate Study. The Forensic Science Graduate Group offers the degree of MS in Forensic Science. This program, offering a Plan I-Thesis option and a Plan II-Capstone Option, has two tracks, DNA or Criminalistics, enabling the student to take core courses emphasizing the physical or biological sciences. Each track requires the student to
take eight to nine core courses, totaling 24-27 units, three units of seminar, and the appropriate number of elective/research units for a total of 54 units. Students can take courses outside their specializations, but they must complete the courses required for their own track. The FOR seminar courses in the fall and winter quarters are required for new students. The FOR spring seminar may be taken in any spring quarter or students may take one additional seminar course in another department or program before graduation.

**Preparation.** Appropriate preparation is an undergraduate degree in physical or natural sciences, engineering or a closely related field with a GPA of 3.000 or higher. Examples include Biochemistry, Chemistry, Molecular Biology, Biology, Genetics, and Engineering. Applicants must have completed at least one year each of general chemistry, organic chemistry, general physics, math through calculus and a class in statistics. Other recommended courses include general biology, biochemistry and genetics.

**Graduate Advisors.** Ruth Dickover (Forensic Science), You-Lo Hsieh (Division of Textiles & Clothing), Robert B. Kimsey (Entomology), Donald Land (Chemistry), Taka Shibamoto (Environmental Toxicology), Christyann Darwent (Anthropology), Jelmer Eerkens (Anthropology), Carrie Finno (Population Health & Reproduction), Robert Poppenga (California Animal Health & Food Safety Laboratory), Ben Sacks (Population Health & Reproduction/Canid Diversity & Conservation Laboratory-Center for Veterinary Genetics), Bahram Ravani (Mechanical & Aeronautical Engineering), Moshe Rosenberg (Food Science & Technology), Matt Wood (Environmental Toxicology)

Chairperson, Consult the Department Office

**Department Office.** 213 Sproul Hall; 530-752-1219; [http://french.ucdavis.edu](http://french.ucdavis.edu)

**Faculty.** [http://frenchanditalian.ucdavis.edu/people-french](http://frenchanditalian.ucdavis.edu/people-french)

**The Major Program**

The major program assures proficiency in all four language skills—speaking, listening, reading, and writing—and acquaints students with the intellectual and cultural contributions of the French-speaking world through the study of its literatures, traditions, and institutions.

**The Program.** The department encourages its students to work closely with the academic advisor in designing a major tailored to their needs and interests within the broad requirements prescribed by the program and to avail themselves of the guidance of an excellent teaching faculty. Each year, a substantial number of students with good preparation in French participate in the university's very popular Education Abroad Program, which maintains centers in Bordeaux, Lyon, and Paris.

**Career Alternatives.** Foreign language teachers, a cardiologist, a veterinarian, a naval commander at the Pentagon, a professor of Political Science, lawyers, sales representatives, journalists, a speech pathologist, a law professor, translators, a senior applications programmer, travel agents, independent business owners, a senior museum curator, nurses, financial managers, stock brokers, and an industrial attaché for a French trade commission—all graduated with an A.B. in French from UC Davis. These represent only a small fraction of the career choices documented in a survey of department graduates.

**Major Advisor.** C. Goldstein
**Honors Program.** Candidates for high or highest honors in French must write a senior thesis under the direction of a faculty member. For this purpose, honors candidates must enroll in FRE 194H (4 units) and FRE 195H (4 units). Normally, a student will undertake the honors project during the first two quarters of the senior year; other arrangements must be authorized by the department chair. Only students who, at the end of the junior year (135 units), have attained a cumulative grade-point average of 3.500 in courses required for the major will be eligible for the honors program. The requirements for earning high and highest honors in French are in addition to the regular requirements for the major in French.

**Education Abroad Program.** The department of French and Italian encourages students to study abroad in the Education Abroad Program. With the approval of a major advisor, applicable courses taken abroad may be accepted in the major or minor programs.

**Graduate Study.** The department offers programs of study and research leading to the M.A. and Ph.D. degrees in French. Candidates for the Ph.D. have the option of enriching their degree program by preparing a designated emphasis in African American and African Studies, Classics and Classical Receptions, Critical Theory, Feminist Theory and Research, Second Language Acquisition, or Studies in Performance and Practice. Detailed information may be obtained from the graduate advisor or the department chairperson.

**Graduate Advisor.** T. Warner

**Prerequisite Credit.** Credit will not normally be given for a course if it is the prerequisite of a course already successfully completed. Exceptions can be made by the department chairperson only.

The Major Program

Gender, Sexuality & Women's Studies is an interdisciplinary major founded on the understanding that the social production of gender is inseparable from that of race, sexuality, class, nationality, ability and other categories of difference. Our curriculum places feminist concerns within a transnational context, while respecting the need for geographic and historical specificity. These frameworks inform our teaching, our research, our institutional and community practices, and the principles we bring to our classrooms. Gender, Sexuality & Women's Studies offers a wide range of classes that use the lens of gender to examine colonialism and post colonialism, globalization, history, sexuality, queer theory, literature, popular culture, feminist video production, area studies, film fashion and food. The Department offers both an undergraduate major and minor. We also work collaboratively with other units on campus to sponsor two undergraduate minors, Sexuality Studies and Social & Ethnic Relations, and an undergraduate concentration in transnational production and consumption.

The Department. One of the most exciting and challenging aspects of the Gender, Sexuality & Women's Studies Department is that students, in consultation with the peer and faculty advisors, can pursue their particular academic interests and design their course of study accordingly. In devising their major plan, students will draw on courses offered in African American & African Studies, American Studies, Anthropology, Asian American Studies, Chicana/o Studies, Comparative Literature, English, French, German and Italian Studies, History, Linguistics, Native American Studies, Political Science, Psychology, Sociology, Spanish, Textiles & Clothing, and other related disciplines.

In addition to offering a broad array of courses that deal with gender, class, race, ethnicity, and sexuality, the Gender, Sexuality & Women's Studies Department affords interested students the opportunity to earn internship credit and conduct independent research as well as take advantage of the Honors Thesis option.

Students design a program of study in consultation with an advisor that is in accordance with their individual career goals. Many Gender, Sexuality & Women's Studies majors find it advantageous to pursue a double major, or to minor in another field of study. Upon successful completion of the degree requirements, students majoring in the program will graduate with a Bachelor of Arts in Gender, Sexuality & Women's Studies.

Career Alternatives. A degree in Gender, Sexuality & Women's Studies opens many possibilities for future employment. The major introduces students to relevant social issues, fosters critical thinking, develops strong verbal, writing and research skills and encourages social advocacy.

Pre-professional students will discover that a major in Gender, Sexuality & Women's Studies offers useful preparatory training for medical or law school. It is particularly suitable for those interested in specializing in social policy, international development, social justice or gender-related work in a wide range of institutions and contexts. Students who plan to do practical work in counseling, clinical psychology, social services, education, media or
politics will also find a major in Gender, Sexuality & Women's Studies provides a strong foundation. Those who wish to pursue graduate level research in such fields as anthropology, comparative literature, cultural studies, economics, education, ethnic studies, English, film studies, history, languages and literatures, performance studies, philosophy, political science, and sociology will also benefit from a strong Gender, Sexuality & Women's Studies undergraduate background in critical theory, social analysis, history and a sound understanding of cultural representation and narratives of difference.

Increasingly, media and cultural institutions, corporations, and personnel firms are hiring specialists in women and gender studies trained in understanding the complex cultural challenges and demands arising from diverse communities. State and federal agencies need people who have special understanding of the problems that diverse groups of women face in society, industry, and the professions. Educational institutions across the spectrum need specialists to develop and administer women and gender studies programs, multi-cultural community centers, LGBTQ organizations and other organizations designed specifically to deal with gender, social diversity and inequality, and a growing range of old and new social challenges arising in the context of globalization.

Some of our alumni have developed careers other than those described above. Gender, Sexuality & Women’s Studies faculty and peer advisors can provide even more ideas about possible future careers. Doing internships related to coursework enables students to integrate theory with hands-on practice and service in the community.

**Graduate Study.** The Gender, Sexuality & Women’s Studies Department offers a designated emphasis in Feminist Theory & Research for students enrolled in the Ph.D. programs of fifteen other affiliated departments.

**Major Advisor.** Rodrigo Bonilla, gsw-advising@ucdavis.edu or 530-752-6429

Thematic Cluster Tracks

Choose one of three cluster tracks. Choose four courses that form a thematic cluster, at least two of which are Women's Studies courses specified for the track. Courses used to meet this requirement may not duplicate those used to meet the Histories and Cultures major requirements. Students may also develop their own.

Track 1: Social Justice, Gender Politics & Activism

Women's Studies, requires two:

- WMS 102 Gender and Post Colonialism 4
- WMS 140 Gender and Law 4
- WMS 145 Women's Movements in Transnational Perspective 4
- WMS 146 Gender, War and Peace 4
- WMS 148 Science, Gender, and Social Justice 4
- WMS 170 Queer Studies 4
- WMS 175 Gender and Experience of Race 4
- WMS 182 Globalization, Gender and Culture 4
- WMS 187 Gender and Public Policy 4
- WMS 192 Internship in Women's Studies 1-12
- WMS 193 Feminist Leadership Seminar 2

Depth Electives, requires two:

- AAS 017 Women in African Societies 4
- AAS 123 Black Female Experience in Contemporary Society 4
- AAS 133 The Black Family In America 4

**Gender, Sexuality & Women's Studies | WMS Minor**

(College of Letters & Science)

Kathryn Olmsted, Ph.D., Interim Department Chair

**Department Office.** 1200 Hart Hall; 530-752-6429; [http://gsws.ucdavis.edu/](http://gsws.ucdavis.edu/)

**Faculty.** [http://gsws.ucdavis.edu/faculty](http://gsws.ucdavis.edu/faculty)

**The Minor**

Gender, Sexuality & Women's Studies is an interdisciplinary major founded on the understanding that the social production of gender is inseparable from that of race, sexuality, class, nationality, ability and other categories of difference. Our curriculum places feminist concerns within a transnational context, while respecting the need for geographic and historical specificity. These frameworks inform our teaching, our research, our institutional and
community practices, and the principles we bring to our classrooms. Gender, Sexuality & Women’s Studies offers a wide range of classes that use the lens of gender to examine colonialism and post colonialism, globalization, history, sexuality, queer theory, literature, popular culture, feminist video production, area studies, film fashion and food. The Department offers both an undergraduate major and minor. We also work collaboratively with other units on campus to sponsor two undergraduate minors, Sexuality Studies and Social & Ethnic Relations, and an undergraduate concentration in transnational production and consumption.

The Department. One of the most exciting and challenging aspects of the Gender, Sexuality & Women’s Studies Department is that students, in consultation with the peer and faculty advisors, can pursue their particular academic interests and design their course of study accordingly. In devising their major plan, students will draw on courses offered in African American & African Studies, African American Studies, Anthropology, Asian American Studies, Chicana/o Studies, Comparative Literature, English, French, German and Italian Studies, History, Linguistics, Native American Studies, Political Science, Psychology, Sociology, Spanish, Textiles & Clothing, and other related disciplines.

In addition to offering a broad array of courses that deal with gender, class, race, ethnicity, and sexuality, the Gender, Sexuality & Women’s Studies Department affords interested students the opportunity to earn internship credit and conduct independent research as well as take advantage of the Honors Thesis option.

Students design a program of study in consultation with an advisor that is in accordance with their individual career goals. Many Gender, Sexuality & Women's Studies majors find it advantageous to pursue a double major, or to minor in another field of study. Upon successful completion of the degree requirements, students majoring in the program will graduate with a Bachelor of Arts in Gender, Sexuality & Women's Studies.

Career Alternatives. A degree in Gender, Sexuality & Women’s Studies opens many possibilities for future employment. The major introduces students to relevant social issues, fosters critical thinking, develops strong verbal, writing and research skills and encourages social advocacy.

Pre-professional students will discover that a major in Gender, Sexuality & Women’s Studies offers useful preparatory training for medical or law school. It is particularly suitable for those interested in specializing in social policy, international development, social justice or gender-related work in a wide range of institutions and contexts. Students who plan to do practical work in counseling, clinical psychology, social services, education, media or politics will also find a major in Gender, Sexuality & Women's Studies provides a strong foundation. Those who wish to pursue graduate level research in such fields as anthropology, comparative literature, cultural studies, economics, education, ethnic studies, English, film studies, history, languages and literatures, performance studies, philosophy, political science, and sociology will also benefit from a strong Gender, Sexuality & Women's Studies undergraduate background in critical theory, social analysis, history and a sound understanding of cultural representation and narratives of difference.

Increasingly, media and cultural institutions, corporations, and personnel firms are hiring specialists in women and gender studies trained in understanding the complex cultural challenges and demands arising from diverse communities. State and federal agencies need people who have special understanding of the problems that diverse groups of women face in society, industry, and the professions. Educational institutions across the spectrum need specialists to develop and administer women and gender studies programs, multi-cultural community centers, LGBTQ organizations and other organizations designed specifically to deal with gender, social diversity and inequality, and a growing range of old and new social challenges arising in the context of globalization.

Some of our alumni have developed careers other than those described above. Gender, Sexuality & Women’s Studies faculty and peer advisors can provide even more ideas about possible future careers. Doing internships related to coursework enables students to integrate theory with hands-on practice and service in the community.

Graduate Study. The Gender, Sexuality & Women’s Studies Department offers a designated emphasis in Feminist Theory & Research for students enrolled in the Ph.D. programs of fifteen other affiliated departments.

Minor Advisor. Rodrigo Bonilla, gsw-advising@ucdavis.edu or (530)752-6429

(College of Letters & Science)

Raul Aranovich, Ph.D., Chairperson of the Department

Department Office. 469 Kerr Hall; 530-752-0966; http://linguistics.ucdavis.edu

Linguistics offers two minor programs:
• General Linguistics, which provides the student with basic knowledge of language structure and linguistic analysis.
• Linguistics for Language Teachers, which especially complements the major in English with the Teaching Area of emphasis; it is also of relevance to students interested in teaching foreign languages.

Minor Advisor. Julia Menard-Warwick

Genetics & Genomics; Molecular & Cellular Biology

Genetics & Genomics; Molecular & Cellular Biology | Genetics & Genomics B.S.

(College of Biological Sciences)
Jodi Nunnari, Ph.D., Professor, Chairperson of the Department

Department Office. 149 Briggs Hall; 530-752-3611; http://www.mcb.ucdavis.edu

Faculty, http://biosci3.ucdavis.edu/Faculty/Profile/FacultyByDept/MCB

The Genetics & Genomics Major Program

The Genetics & Genomics major provides a broad background in the biological, mathematical, and physical sciences basic to the study of heredity, gene expression and evolution. The major is sufficiently flexible to accommodate students interested in the subject either as a basic discipline in the biological sciences or in terms of its applied aspects such as biotechnology, medicine, and agriculture.

The Program. The Genetics & Genomics program begins with the four-course, upper division core curriculum that provides an introduction to the principles of genetics, biochemistry, and cell biology. Students then take additional upper division courses in specialized areas of modern genetics including gene expression, evolution, development, human genetics and genomics, as well as a laboratory courses in the principles of genetics and genomics. Additional upper division courses in biological sciences, as well as internship/research coursework can be chosen to fulfill required elective units.

Career Alternatives. The Genetics & Genomics degree provides suitable preparation for a wide variety of careers, including teaching, research, work with biotechnology companies, medicine, and all the health sciences. It is also an excellent background for students wishing to continue their education in a graduate program, a teacher-training program, medical school, veterinary school, or other professional schools.

Master Advisor. Ted Powers, Ph.D.

Advising. Biology Academic Success Center (BASC); 1023 Sciences Laboratory Building; 530-752-0410; http://www.biosci.ucdavis.edu/BASC.

- PLS 154  Introduction to Plant Breeding  4

Upper division courses in genetics or other fields relevant to the student’s interest chosen in consultation with the advisor. No more than four units of 192, 193, 194H, 198, or 199 may be used for credit in this category.

**Total:** 96-117

**Geographic Information Systems Minor; Biological & Agricultural Engineering**
The Department of Biological & Agricultural Engineering offers a minor in Geographic Information Systems with an emphasis on spatial analysis. This minor is ideal for students interested in information processing of spatial data related to remote sensing, land information systems, marine cartography, thematic mapping, surface modeling, environmental modeling resources management, public utility planning, emergency response, geomarketing, geotechnics, precision agriculture, archaeology, military exercises, and computer-aided design. Prerequisites include MAT 016A-016B, STA 013 or PLS 120 or ECI 114, and PLS 021 or ECS 015.

**Minor Advisors.** S. K. Upadhyaya, S.G. Vougioukas (Biological & Agricultural Engineering Department)

**Geographic Studies Minor; Environmental Design**

**Geographic Studies Minor; Environmental Design | Geographic Studies Minor**

(College of Agricultural & Environmental Sciences)

(Department of Human Ecology)

The minor in Geographic Studies is defined by its concern with place. Geographers strive to answer spatial questions regarding the Earth’s surface; to describe and explain the character of regions; to ascertain the ways in which historical and contemporary humans have used and shaped the Earth’s surface; and to understand the interactions of physical, biotic, and human systems within our global environment. The minor is compatible with a variety of environmental majors in the college.

The minor is sponsored by the Department of Human Ecology, Landscape Architecture & Environmental Design Program.

**Minor Advisor.** S. E. Greco; see staff advisor Sharla Cheney, 135 Hunt Hall, scheney@ucdavis.edu.

Individual Study:
Select a maximum of four units of 192 (Internship) or 199 (Research) in any appropriate department.

Total: 20

Geography (Graduate Group)

Geography (Graduate Group) | GEO Information

Robert Hijmans, Ph.D., Chairperson of the Group

Group Office. Carrie Armstrong-Ruport, Student Affairs Officer; 133 Hunt Hall 530-752-4119; caruport@ucdavis.edu; http://geography.ucdavis.edu

Faculty. http://geography.ucdavis.edu/people/faculty

Geography (Graduate Group) | GEO M.A.

Robert Hijmans, Ph.D., Chairperson of the Group

Group Office. Carrie Armstrong-Ruport, Student Affairs Officer; 133 Hunt Hall 530-752-4119; caruport@ucdavis.edu; http://geography.ucdavis.edu
Faculty. http://geography.ucdavis.edu/people/faculty

Graduate Study. The Graduate Group in Geography (GGG) offers programs of study and research leading to the M.A. and Ph.D. degrees. Faculty and students share a common interest in spatial interaction between humans and the biophysical environment. The wide faculty interests attract a diverse set of students in such areas as biogeography, urban forestry and related natural science and engineering fields, as well as human geography and related social science fields. A number of faculty members use and teach geographic information systems, remote sensing, and related geographic techniques, and most have a strong field orientation. The strengths of the Davis campus and its faculty enable the program to focus on important issues including people, place and power, community and regional identity and change, people-environment interaction, agricultural sustainability, landscape architecture, environmental change, biogeography, natural resource management, and technological innovations in computing and the use of geographic information systems. Students are mentored by faculty across the many colleges of the university.

Preparation. Most students considered for admission will have an undergraduate major in geography or in a closely related field. Generally, a student without an undergraduate degree in geography will be required to complete the equivalent of a minor in geography, consisting of one course each in human geography, physical geography and geographic methods, plus any additional undergraduate coursework required as background for the student's research emphasis, as determined by the student's guidance committee.

Geography (Graduate Group) | GEO Ph.D.

Graduate Advisors. Ryan Galt (Human Ecology), Robert Hijmans (Environmental Science & Policy), Jay Lund (Civil & Environmental Engineering), James Quinn (Environmental Science & Policy).

Geology

Geology | GEL Information

(College of Letters & Science)

Michael E. Oskin, Ph.D., Chairperson of the Department

David A. Osleger, Ph.D., Vice-Chairperson, Undergraduate Program
Civilization exists by geological consent—subject to change without notice.”—Will Durant

Geology is the study of the Earth, and in particular its history, structure, and the processes that have molded our planet and its biosphere. Geology involves the origin of continents & ocean basins, earthquakes & volcanoes, variations in global climate, and how these physical changes impact the evolution of life. All of these planetary processes are viewed through the prism of “deep time,” a perspective unique to geologists and one that distinguishes geology from most of the other physical sciences.

A significant component of geology is oriented toward the interaction between humans and the Earth. This aspect includes the study of resources such as minerals, oil, and water; identification & mitigation of Earth hazards such as earthquakes, landslides, floods, and volcanic eruptions; identification & mitigation of polluted ground water; land use planning; and the study of ancient & modern climate change.

The Program. Students interested in becoming professional geologists or continuing their geological studies at the graduate level should choose the Bachelor of Science degree program. The Bachelor of Arts program is for students interested in an interdisciplinary program of study, or who plan to go into pre-college teaching. Both programs allow students to emphasize an aspect of the field of particular interest to them. The upper division electives are not restricted to geology courses but must be chosen to provide a relevant, coherent, and in-depth program of study. Transfer students should have completed as much as possible of the preparatory subject matter listed below.

Internships & Career Alternatives. In recent years in California, the largest employers of geologists have been environmental & geotechnical consulting firms, with oil companies, research laboratories and government agencies also providing opportunities. Students graduating with a Bachelor’s degree may get entry-level positions in the private sector or they may go on to attain their teaching credential to fill the growing need for science teachers at all pre-college levels. A Master’s degree is the most versatile professional level degree, and a Ph.D. is generally required for research and academic positions. Internships are strongly encouraged for undergraduates and are a means of exploring potential career opportunities that can lead to positions after graduation. UC Davis students have interned at the California Division of Mines & Geology, the State Department of Water Resources, CAL-EPA, and various consulting firms. For more information, see http://geology.ucdavis.edu/students/careers.

Education Abroad Options. The department strongly encourages interested students to pursue a portion of their studies abroad. Within the constraints of the campus and College residence requirements, it is possible for students to complete significant portions of the Geology major at an international institution provided that the student consults with one of the undergraduate advisors and carefully plans a course of study abroad that will complement their coursework at Davis. In recent years, UC Davis Geology majors have spent their junior or senior years completing upper division coursework at EAP partner institutions in New Zealand, Ghana, Chile, and the United Kingdom. For more information, see https://geology.ucdavis.edu/students/undergrad/gel/studyabroad.

Major Advisors. J.M. McClain, R. Motani

“Civilization exists by geological consent—subject to change without notice.”—Will Durant

Geology is the study of the Earth, and in particular its history, structure, and the processes that have molded our planet and its biosphere. Geology involves the origin of continents & ocean basins, earthquakes & volcanoes, variations in global climate, and how these physical changes impact the evolution of life. All of these planetary processes are viewed through the prism of “deep time,” a perspective unique to geologists and one that distinguishes geology from most of the other physical sciences.

A significant component of geology is oriented toward the interaction between humans and the Earth. This aspect includes the study of resources such as minerals, oil, and water; identification & mitigation of Earth hazards such as earthquakes, landslides, floods, and volcanic eruptions; identification & mitigation of polluted ground water; land use planning; and the study of ancient & modern climate change.

The Program. Students interested in becoming professional geologists or continuing their geological studies at the graduate level should choose the Bachelor of Science degree program. The Bachelor of Arts program is for students interested in an interdisciplinary program of study, or who plan to go into pre-college teaching. Both programs allow students to emphasize an aspect of the field of particular interest to them. The upper division electives are not restricted to geology courses but must be chosen to provide a relevant, coherent, and in-depth program of study. Transfer students should have completed as much as possible of the preparatory subject matter listed below.

Internships & Career Alternatives. In recent years in California, the largest employers of geologists have been environmental & geotechnical consulting firms, with oil companies, research laboratories and government agencies also providing opportunities. Students graduating with a Bachelor's degree may get entry-level positions in the private sector or they may go on to attain their teaching credential to fill the growing need for science teachers at all pre-college levels. A Master's degree is the most versatile professional level degree, and a Ph.D. is generally required for research and academic positions. Internships are strongly encouraged for undergraduates and are a means of exploring potential career opportunities that can lead to positions after graduation. UC Davis students have interned at the California Division of Mines & Geology, the State Department of Water Resources, CAL-EPA, and various consulting firms. For more information, see http://geology.ucdavis.edu/students/careers.

Education Abroad Options. The department strongly encourages interested students to pursue a portion of their studies abroad. Within the constraints of the campus and College residence requirements, it is possible for students to complete significant portions of the Geology major at an international institution provided that the student consults with one of the undergraduate advisors and carefully plans a course of study abroad that will complement their coursework at Davis. In recent years, UC Davis Geology majors have spent their junior or senior years completing upper division coursework at EAP partner institutions in New Zealand, Ghana, Chile, and the United Kingdom. For more information, see https://geology.ucdavis.edu/students/undergrad/gel/studyabroad.

Major Advisors. J.M. McClain, R. Motani

**Upper Division Electives**

Choose from courses GEL 130-194 or pre-selected non-GEL courses. Only one of GEL/EDU 181 or GEL/EDU 183 or GEL 185A or 185B or 186 may be applied toward elective credit. Pre-selected non-GEL courses in related fields: CHE 100, ECI 171/171L, ECI 175, ESM 100, ESM 186, ESP 152, HYD 144, HYD 146, LDA/ABT 150, SSC 100, WFC 102. Other courses in related fields must be approved in advance by the major advisor. No more than three units of upper division elective credit for courses GEL 115-120. No more than six units of upper division elective credit for GEL 192 or 194A-194B or 194HA-194HB. Students who receive approval to do a senior thesis for part of the capstone requirement may not use 194A-194B or 194HA-194HB for the upper division elective courses.

<td>3</td>
</tr>
</tbody>
</table>
Choose one:
- GEL 141 Evolutionary History of Vertebrates 3
- GEL 144 Historical Ecology 3

Choose at least nine units:
- ANT 151 Primate Evolution 4
- ANT 152 Human Evolution 5
- EVE 100 Introduction to Evolution 4
- EVE 101 Introduction to Ecology 4
- EVE 102 Population and Quantitative Genetics 4
- EVE 105 Phylogenetic Analysis of Vertebrate Structure 4
- EVE 112 Biology of Invertebrates 3
- EVE 112L Biology of Invertebrates Laboratory 2
- EVE 140 Paleobotany 4
- EVE 149 Evolution of Ecological Systems 4
- GEL 109 Earth History: Sediments and Strata 3
- GEL 150C Biological Oceanography 4

Total: 19-24

Geophysics Minor; Earth & Planetary Sciences

Geophysics Minor; Earth & Planetary Sciences | Geophysics Minor
(College of Letters & Science)

Michael E. Oskin, Ph.D., Chairperson of the Department

David A. Osleger, Ph.D., Vice-Chairperson, Undergraduate Program

Sujoy Mukhopadhyay, Ph.D., Vice-Chairperson, Graduate Program

Department Office. 2119 Earth & Physical Sciences Building; 530-752-0350; http://geology.ucdavis.edu

Faculty. See http://geology.ucdavis.edu/people/faculty/

Geophysics is the study of the physical properties and processes within and surrounding the Earth. Many problems in the Earth Sciences require geophysical techniques for study. The interdisciplinary minor in geophysics is for students with backgrounds in the physical sciences, engineering and other fields who are interested in pursuing a graduate or professional career in geophysics, or those who desire a career in the energy, minerals, or environmental industries.

The minor is sponsored by the Department of Earth & Planetary Sciences.

Minor Advisor. See Geology major advisors.

**German | GER A.B.**

(College of Letters & Science)

Sven-Erik Rose, Ph.D., Chairperson of the Department

**Department Office.** German & Russian; 213 Sproul Hall; 530-752-1219; [http://german.ucdavis.edu](http://german.ucdavis.edu)

**Faculty.** [http://german.ucdavis.edu/faculty](http://german.ucdavis.edu/faculty)

**The Major Program**

The German major explores in depth the literature and language, the culture and commerce of the German-speaking world (primarily Germany, Austria and Switzerland). The key to the major lies in the careful balance between solid core requirements and the possibility to explore German subject areas through the lens of other disciplines, such as music, art, philosophy, history, and economics.

**The Program.** The department offers courses that highlight literary figures, movements and themes. These courses form the core of upper-division literature electives, but we also offer courses that discuss contemporary culture and commerce in German-speaking countries. Regardless of emphasis, students will find maximum practice in spoken and written German as well as in listening comprehension in all upper-division courses offered in German.

Career Alternatives. Completion of the major prepares students for graduate study in German or for career opportunities in international fields ranging from employment in business and government to careers in the fine arts and sciences. Also, it permits admission to professional schools such as law and medicine.

Honors & Honors Program. The honors program consists of two quarters of research (194H) terminating in an honors thesis. For details consult the undergraduate major advisor. Graduation with high or highest honors requires participation in the honors program.

Graduate Study. The Department offers programs of study and research leading to the M.A. degree and to the Ph.D. degree in German Literature. Additional degree options for a designated emphasis are available through departmental affiliations with the programs in Social Theory & Comparative History, Critical Theory, Feminist Theory & Research, and Second Language Acquisition. Detailed information may be obtained by writing to the Department Chairperson or the Graduate Advisor.

Graduate Advisor. Chunjie Zhang

Prerequisite Credit. Credit normally will not be given on the lower-division level for a course that is the prerequisite of a course already successfully completed.

German | GER Minor

(College of Letters & Science)
Sven-Erik Rose, Ph.D., Chairperson of the Department

Department Office. German & Russian; 213 Sproul Hall; 530-752-1219; http://german.ucdavis.edu

Faculty. http://german.ucdavis.edu/faculty

The Department offers a German minor consisting of at least 20 upper-division units of courses taught in German. Students wishing to minor in German should consult the undergraduate advisor.

Prerequisite Credit. Credit normally will not be given on the lower-division level for a course that is the prerequisite of a course already successfully completed.
Global & International Studies Minor; Humanities

Global & International Studies Minor; Humanities | Global & International Studies Minor

(College of Letters & Science)

The minor is overseen by a Program Committee. For more information, see http://studyabroad.ucdavis.edu.

The interdisciplinary minor in Global & International Studies will enable students to learn about global and international issues at UC Davis, as well as gain first-hand academic experience abroad. The minor is also designed to give recognition for upper division course work while studying abroad. However, the minor can also be completed with approved course work taken at UC Davis.

Students will be expected to work closely with an academic advisor in developing an intellectually coherent program of study. Each proposal must be approved by the Faculty Directors of UC Davis Study Abroad.

Study Abroad and International Internships. The course cluster requirement may be met in one of two ways: (1) completion of a minimum of 16-17 units in the course cluster emphasis by taking approved UC Davis upper division courses in the area of global/international studies and/or approved upper division courses taken while participating in UC Study Abroad or another approved study abroad program, or (2) completion of 12 units of course work in a UC Davis accredited international internship, plus UC Davis courses sufficient to total 16-17 units. Students must meet with the GIS advisor and complete a Course Cluster Worksheet to demonstrate subject interrelatedness.

Restrictions. No more than two courses from a single UC Davis Department may be offered in satisfaction of the minor requirements.

Foreign Language Study. Students are strongly encouraged to study a foreign language, particularly the language of the country in which and about which they intend to study. However, only upper division coursework may be used to fulfill requirements for the minor.

Global & International Studies

Arts & Humanities Emphasis

Choose one:

- ANT 004 Introduction to Anthropological Linguistics 4
- ANT 020 Comparative Cultures 4
- IRE 001 Global Interdependence 4
- POL 003 International Relations 4
- SOC 005 Global Social Change: An Introduction to Macrosociology 4

Choose one upper division UC Davis general course on global international studies. 3-4

See program advisor for a list of approved courses.

Course cluster requirement

The minor requires the selection of interrelated courses totaling a minimum of 16-17 upper division units in area and regional studies or thematic course clusters in global and international studies.

Suggested course clusters include:

1) Country or region-specific courses:
   - Western Europe; Russian & East/Central Europe; Asia & the Pacific; Latin & South America; Africa & the Middle East; Jewish Studies; specific countries.

2) Courses clustered around a thematic field in global and international studies:
   - People & nationalities; the individual & society, arts, language, literature & culture.
Global Disease Biology

Global Disease Biology | GDB Information
(College of Agricultural & Environmental Sciences)

Master Advisor. Johan H.J. Leveau, Ph.D., Professor (Plant Pathology)

Faculty. Includes members of the Departments of Plant Pathology; Veterinary Medicine, School of; Medicine, School of.

The Major Program

The Global Disease Biology (GDB) major offers students the opportunity to study disease and its relationship to the health of people, animals, plants, and the environment. The program uses an integrated approach to advance student understanding of the concept(s) of disease, the societal and personal impacts of past, present and future diseases, and the science behind disease discoveries, causes, evolution, diagnosis, treatment, and prevention. The program recognizes the interconnectedness of people, animals, plants, and the environment and aims to identify and address the fundamental causes of poor health around the world. Managing global disease problems requires a multifaceted, holistic approach to address the full spectrum of human, animal, plant, and environmental health risks (also known as a One Health approach). Throughout a series of core courses, issues related to human, animal, and plant health, along with tools available to solve these problems, will be introduced to provide students with real-world scenarios in which they can apply and advance their creative and critical thinking skills. The major prepares graduates with the knowledge, leadership skills and experiences required to excel in professions associated with global health, the environment, food safety and security, biological safety and security, and health policy. For more information, see http://gdb.ucdavis.edu.

The Program. The Global Disease Biology major provides students with broad preparatory scientific course work, global disease biology core classes, flexibility in upper division electives, and a strong research experience. Global Disease Biology core classes are intended to be transdisciplinary and focus on concepts that cut across human, animal, and plant diseases offering a unifying ecological and quantitative perspective on disease. Students plan their chosen emphasis of study as part of a required discussion course and in consultation with their advisor. Students will draw from many undergraduate courses currently offered on disease and health in a way that compliments the core courses required for the Global Disease Biology major. The major includes a senior research project, which each student designs to bridge the disciplines of the major.

Internships and Career Alternatives. The program and interests of each student in solving societal problems guides students to a range of internship and career choices. On and off-campus internship opportunities are available in research laboratories, in field situations, with governmental agencies, with private industry, and in international programs. A degree in Global Disease Biology prepares students for careers in research, teaching, governmental regulation, health care industry, or agriculture (food safety/food security) as each relates to disease
and health of people, animals, and plants. Students in the major gain research experience and may choose to continue their training at the graduate or professional level in a variety of biological disciplines. Careers in medicine, veterinary medicine, and plant pathology are open to Global Disease Biology majors.

Greek Minor; Classics

Greek Minor; Classics | Greek Minor
(College of Letters & Science)
Carey Seal, Ph.D., Program Director

Department Office. Classics Program; 211 Sproul Hall; 530-752-4999; http://classics.ucdavis.edu

Faculty. https://classics.ucdavis.edu/people/classics-faculty

The Department offers minors in Classical Civilization, Greek and Latin for those wishing to follow a shorter but formally recognized program of study in Classics.

Greek

Classics; choose one:

- CLA 001 Ancient Near East and Early Greece: 3000-500 B.C.E. 4
- CLA 002 Ancient Greece and the Near East: 500 to 146 B.C.E. 4

Three upper division courses in Greek.

One additional upper division course in Classics, Latin, or Greek.

Units: 20

Total: 20

Health Informatics (Graduate Group)

Health Informatics (Graduate Group) | Health Informatics M.S.

Nicholas Anderson, Ph.D., Chair

Group Office. UC Davis Health System Health Informatics Program; 2450 48th St., Suite 2800, Sacramento, CA 95817; 916-734-8710; healthinformatics@ucdavis.edu

Faculty. http://www.ucdmc.ucdavis.edu/informatics/our_team/graduate_group_faculty/

Graduate Study. The Master's degree program seeks to train the next generation of researchers, clinicians and leaders to advance the science of Health Informatics. Successful applicants have backgrounds in health, technology, information science, or biology, and are enthused to develop new knowledge, systems and models using health data and information systems.

The course of study provides research-oriented training that spans the use of computer systems in medicine today, including methods for clinical data acquisition, storage, and retrieval, the development, use and implementation of the electronic medical record, management of clinical data, and the development and use of medical decision support systems. A research project and thesis are mandatory degree requirements.

Preparation. The Group encourages applications from clinicians, healthcare IT professionals and researchers who have had experience and interest in the access, linkage and knowledge generation from healthcare data.

Clinicians (M.D., R.N., Pharm.D., others)

Demonstrated through completed baccalaureate or higher level coursework, work experience, or clinical focus:

A. Successful completion of Clinical Education, at the Baccalaureate level or higher.
B. Working knowledge in technology, ideally computer science and programming.

Healthcare Information Technology Professionals

Demonstrated through completed coursework or professional experience:

A. Working experience in Healthcare IT, biotechnology or similar experience.
B. Knowledge of Human Disease and Condition.
C. Knowledge of Medical Terminology.

396
Researchers
Demonstrated through completed coursework, baccalaureate or higher degrees, personal research experience:

A. Applied background (Baccalaureate or higher) in computer science, information science, biology or related field.

B. Domain experience in health information or biology.

Graduate Advisor. Mark Carroll (Public Health Sciences and Pathology and Laboratory Medicine)

The Major Program
The History major develops critical intelligence and fosters an understanding of ourselves and our world through the study of the past—both the "deep past" and the more recent past.

The Program. A student electing a major in History will receive a broad education in histories of several geographic areas. Students preferring more active engagement in research and writing are encouraged to complete history seminars and/or the honors program.

Career Alternatives. A degree in history is excellent preparation for a professional career such as teaching, law, journalism, public administration, or business management. Professional schools in these and related fields (including the health professions) are looking for students who can weigh conflicting evidence, evaluate alternative courses of action or divergent points of view, and express conclusions logically in everyday language. These analytical skills are stressed in history classes, and their mastery gives the history student a solid preparation for subsequent training in a specialized career.

History of Science, Medicine, & Technology. Students can create a concentration in the History of Science, Medicine, & Technology upon consultation with a faculty advisor. They may draw upon the relevant History courses (History 2, 16, 85, 107, 135A, 135B, 136, 139A, 139B, 185A, and 185B) as well as History & Philosophy of Science offerings.

History & Philosophy of Science. Courses from the History & Philosophy of Science minor may count toward the History major. STS 130A, 130B, 150, and 180 fulfill upper division requirements in either the U.S. or Europe concentration.

Honors & Honors Program. A student becomes eligible for graduation with honors by meeting the minimum GPA (usually 3.500) and course requirements established by the College of Letters & Science. To qualify for high or highest honors, students must also complete the History Department honors program with a GPA of 3.500 or above and write a thesis that meets the criteria for high honors or highest honors. Students apply to participate in the department honors program during the latter part of their junior year. Admission to the program is based on GPA, a thesis proposal, examples of previous writing, and the recommendation of a faculty member who is willing to
sponsors the student's project, interviews, and faculty recommendations. Students admitted into the program must complete the HIS 104A, 104B, 104C sequence of honors courses, which requires the completion of a senior honors thesis. Students who anticipate seeking admission to the honors program are urged to complete at least one HIS 102 (undergraduate seminar) before the end of their junior year. Interested students are urged to consult with faculty in their field early in their junior year. Students may substitute HIS 104B and 104C for any courses in their program other than HIS 102.

Students who anticipate pursuing graduate work in history or a teaching credential, and who do not wish to opt for the research emphasis embodied in the honors program, are encouraged to select Plan II of the major.

**Study Abroad & the History Major.** The department strongly encourages interested students to pursue their studies abroad. While there are no specific required courses or prerequisites, students are urged to take at least one history course that touches upon the geographic area where they plan to study abroad before departing. To receive a history degree from UC Davis, students must complete at least 18 upper division units in the history major at UC Davis (which can also include HIS 101, 102, 103). The remaining major requirements can be fulfilled abroad provided that (a) the course should be evaluated as at least four UC Davis units, (b) the course should be considered upper division by the standards set forth by the UC Davis Study Abroad Program, and (c) the course should be in the field of History. Students may present copies of the course work, syllabus, and writing assignments to the department's liaison person with the Study Abroad office for approval.

**Teaching Credential Subject Representative.** See the Teaching Credential/M.A. Program.

**Preparing for Careers in Teaching.** History majors can pursue rewarding careers in teaching. To ensure your undergraduate coursework prepares you for a subject matter competency test, please contact the History Project at http://historyproject.ucdavis.edu/.

**Graduate Study.** The Department of History offers programs of study and research leading to the M.A. and Ph.D. degrees in history. Detailed information may be obtained by contacting the Graduate Advisor.

**Graduate Advisor.** See the department's website for updated information.

**Major Advisors.** hisugadvisor@ucdavis.edu or see the department’s website for updated information.

**Preparatory Subject Matter**

Choose five lower division courses from the following seven concentrations, including at least one course in three different concentrations. Additional units to reach 20.

- **(a) Africa:**
  - HIS 015A: Africa to 1900
  - HIS 015B: Africa Today

- **(b) Asia:**
  - HIS 008: History of Indian Civilization
  - HIS 009A: History of East Asian Civilization
  - HIS 009B: History of East Asian Civilization

- **(c) Europe:**
  - HIS 004A: History of Western Civilization
  - HIS 004B: History of Western Civilization
  - HIS 004C: History of Western Civilization

- **(d) Latin America:**
  - HIS 007A: History of Latin America to 1700
  - HIS 007B: History of Latin America, 1700-1900
  - HIS 007C: History of Latin America 1900-present

- **(e) Middle East:**
  - HIS 006: Introduction to the Middle East

- **(f) United States:**
  - HIS 017A: History of the United States
  - HIS 017B: History of the United States

Units: 20
HIS 018A  Race in America to 1865  4
HIS 072A  Women and Gender in America, to 1865  4
HIS 072B  Women and Gender in America, 1865-Present  4
HIS 080  The History of the United States in the Middle East  2
HIS 080W  The History of the United States in the Middle East  2
HIS 085  Nature, Man, and the Machine in America  4

(g) World:
HIS 001  Introduction to History  2
HIS 002  Introduction to the History of Science and Technology  4
HIS 003  Cities: A Survey of World Cultures  4
HIS 010A  World History to 1350  4
HIS 010B  World History, c. 1350-1850  4
HIS 010C  World History III  4
HIS 011  History of the Jewish People in the Modern World  4
HIS 012  Food and History  4
HIS 013  Global Sexualities  4
HIS 014  History of Global Capitalism  4
HIS 020  The Vietnam War  4
HIS 090  Research in History  4

Depth Subject Matter  Units: 40-41

History Seminar  Units: 4-5
HIS 101  Introduction to Historical Thought and Writing  5
HIS 102A  Undergraduate Proseminar in History; Ancient  5
HIS 102B  Undergraduate Proseminar in History; Medieval  5
HIS 102D  Undergraduate Proseminar in History; Modern Europe to 1815  5
HIS 102E  Undergraduate Proseminar in History; Europe Since 1815  5
HIS 102F  Undergraduate Proseminar in History; Russia  5
HIS 102G  Undergraduate Proseminar in History; China to 1800  5
HIS 102H  Undergraduate Proseminar in History; China Since 1800  5
HIS 102I  Undergraduate Proseminar in History; Britain  5
HIS 102J  Undergraduate Proseminar in History; Latin America Since 1810  5
HIS 102K  Undergraduate Proseminar in History; American History to 1787  5
HIS 102L  Undergraduate Proseminar in History; United States, 1787-1896  5
HIS 102M  Undergraduate Proseminar in History; United States Since 1896  5
HIS 102N  Undergraduate Proseminar in History; Japan  5
HIS 102O  Undergraduate Proseminar in History; Africa  5
HIS 102P  Undergraduate Proseminar in History; Christianity and Culture in Europe, 50-1850  5
HIS 102Q  Undergraduate Proseminar in History; India  5
HIS 102R  Undergraduate Proseminar in History; Muslim Societies  5
HIS 102S  Undergraduate Proseminar in History; Education Abroad Program  5
HIS 102X  Undergraduate Proseminar in History; Comparative History  5
HIS 103  Topics in Historical Research  4

Choose at least three courses in a single Concentration listed below.  12
Choose at least two courses in a second Concentration listed below.  8
Choose at least one course in a third Concentration listed below.  4
Additional units to reach 40.  12

Total Units for the Major  Units: 60-61
Fields of Concentration

A course may only be used to fulfill one concentration.

(a) Africa:
- HIS 102O Undergraduate Proseminar in History; Africa 5
- HIS 115A History of West Africa 4
- HIS 115B History of East Africa and the Indian Ocean 4
- HIS 115C History of Southern Africa from Exploration to the Rainbow Nation 4
- HIS 115D Postcolonial Africa 4
- HIS 115E Slavery, Africa, and the Atlantic World 4
- HIS 116 African History: Special Themes 4

(b) Asia:
- HIS 102G Undergraduate Proseminar in History; China to 1800 5
- HIS 102H Undergraduate Proseminar in History; China Since 1800 5
- HIS 102N Undergraduate Proseminar in History; Japan 5
- HIS 102Q Undergraduate Proseminar in History; India 5
- HIS 111A Ancient History 4
- HIS 191A Classical China 4
- HIS 191B High Imperial China 4
- HIS 191C Late Imperial China 4
- HIS 191D Nineteenth Century China: The Empire Confronts the West 4
- HIS 191E The Chinese Revolution 4
- HIS 191F History of the People’s Republic of China 4
- HIS 191G Special Topics in Chinese History to 1800 4
- HIS 191H Special Topics in Chinese History after 1800 4
- HIS 191J Sex and Society in Modern Chinese History 4
- HIS 194A Aristocratic and Feudal Japan 4
- HIS 194B Early Modern Japan 4
- HIS 194C Modern Japan 4
- HIS 194D Business and Labor in Modern Japan 4
- HIS 194E Education and Technology in Modern Japan 4
- HIS 195B History of Modern Korea 4
- HIS 195C A History of Vietnam 4
- HIS 196A Medieval India 4
- HIS 196B Modern India 4

(c) Europe:
- HIS 102A Undergraduate Proseminar in History; Ancient 5
- HIS 102B Undergraduate Proseminar in History; Medieval 5
- HIS 102D Undergraduate Proseminar in History; Modern Europe to 1815 5
- HIS 102E Undergraduate Proseminar in History; Europe Since 1815 5
- HIS 102F Undergraduate Proseminar in History; Russia 5
- HIS 102I Undergraduate Proseminar in History; Britain 5
- HIS 102P Undergraduate Proseminar in History; Christianity and Culture in Europe, 50-1850 5
- HIS 111B Ancient History 4
- HIS 111C Ancient History 4
- HIS 121A Medieval History 4
- HIS 121B Medieval History 4
- HIS 121C Medieval History 4
- HIS 122 Selected Themes in Medieval History 4
- HIS 125 Topics in Early Modern European History 4
- HIS 126Y The History of Human Rights in Europe 4
- HIS 130A Christianity and Culture in Europe: 50-1450 4
- HIS 130B Christianity and Culture in Europe: 1450-1600 4
HIS 130C Christianity and Culture in Europe: 1600-1850 4
HIS 131A Early Modern European History 4
HIS 131B European History During the Renaissance and Reformation 4
HIS 131C The Old Regime: Absolution, Enlightenment and Revolution in Europe 4
HIS 132 Crime and Punishment in Early Modern Europe 4
HIS 133 European Thought & Culture from the Renaissance to the Enlightenment 4
HIS 134A The Age of Revolution 4
HIS 135A History of Science to the 18th Century 4
HIS 135B History of Science, 18th to 20th Centuries 4
HIS 136 Scientific Revolution 4
HIS 138A The Rise of the Russian Empire, 1304-1825 4
HIS 138B Reform and Revolution in Tsarist Russia, 1825-1917 4
HIS 138C Russian History: The Rise and Fall of the Soviet Union, 1917 to the Present 4
HIS 139A Medieval and Renaissance Medicine 4

The minor in History consists of five upper division courses chosen so that at least three courses are in one field and at least one course is in another field. The two fields shall be chosen from among those defined in the catalog for the major. However, students may also, in consultation with and with the authorization of a faculty advisor, define other thematic fields.

**Minor Advisor.** [hisugadvisor@ucdavis.edu](mailto:hisugadvisor@ucdavis.edu) or see the [department's website](http://history.ucdavis.edu) for updated information.

History & Philosophy of Science Minor; Science & Technology Studies | History & Philosophy of Science Minor
(College of Letters & Science)

Colin Milburn, Ph.D., Program Director

Advising Office. 101 Young Hall; stsadvising@ucdavis.edu

The interdisciplinary minor in the History & Philosophy of Science invites students to examine historical and contemporary problems in a variety of scientific disciplines, and to explore concepts and procedures basic to science and how they have evolved. The minor is sponsored by the Program in Science & Technology Studies.

Minor Advisor. 101 Young Hall, stsadvising@ucdavis.edu.

Faculty Advisor. The current Director of STS is also available for advising by appointment.

History & Philosophy of Science | Units: 24

Choose five courses from those listed below; one course must be from each of three areas:

(a) History
   - HIS 135A History of Science to the 18th Century 4
   - HIS 135B History of Science, 18th to 20th Centuries 4
   - HIS 136 Scientific Revolution 4
   - HIS 138A The Rise of the Russian Empire, 1304-1825 4
   - HIS 139A Medieval and Renaissance Medicine 4
   - HIS 139B Medicine, Society, and Culture in Modern Europe 4
   - HIS 185A History of Science in America 4
   - HIS 185B History of Technology in America 4

(b) Philosophy
   - PHI 107 Philosophy of the Physical Sciences 4
   - PHI 108 Philosophy of the Biological Sciences 4
   - PHI 109 Philosophy of the Social Sciences 4
   - PHI 111 Philosophy of Space and Time 4

(c) Science & Technology Studies
   - STS 020 Methods in Science, Technology and Medicine Studies 4
   - STS 130A From Natural History to the History of Nature 4
   - STS 130B History of Modern Biology 4
   - STS 131 Darwin 4
   - STS 150 Gender and Science 4
   - STS 180 Topics in Science and Technology Studies 4

Astrid Volder, Ph.D., Chairperson of the Group

Group Office. 1224 Plant & Environmental Sciences Building; 530-752-7738; http://ggha.ucdavis.edu

Faculty. http://ggha.ucdavis.edu/GGHAfaculty.htm

Graduate Study. The Graduate Group in Horticulture & Agronomy offers programs of study leading to the M.S. and Ph.D. degrees for students interested in the science and management of agricultural crops, including their ecology, physiology, genetics, and post-harvest management, as well as the interaction of agricultural crops with the environment. The M.S. program is designed to focus on a cropping system, such as agronomy, environmental horticulture, pomology, vegetable crops, viticulture and weed science. Within that cropping system, the student can specialize in one of a number of areas, including agroecology, biotechnology, breeding and crop improvement, crop physiology, crop production, floriculture, landscape horticulture, mineral nutrition, modeling, nursery production, pest management, plant growth and development, postharvest physiology, revegetation/restoration, and water relations. Research may be conducted within these areas with an applied or basic focus, but in association with a cropping system.

Preparation. For both the M.S. and Ph.D. programs, a level of competence equivalent to that of a sound undergraduate program in Plant Science is required. This includes coursework in general biology, chemistry, organic chemistry, physics, statistics, genetics, plant physiology, and soil science. A few limited deficiencies in any of these areas can be made up after admission to the graduate program. Specific requirements are outlined in detail on the group's website. The graduate advisor, the major professor, and the student will design a program of advanced courses to meet individual academic needs within one of the specializations.

Graduate Advisors. Consult the Group office.

Group Office. 1224 Plant & Environmental Sciences Building; 530-752-7738; http://ggha.ucdavis.edu

Faculty. http://ggha.ucdavis.edu/GGHAfaculty.htm

Graduate Study. The Graduate Group in Horticulture & Agronomy offers programs of study leading to the M.S. and Ph.D. degrees for students interested in the science and management of agricultural crops, including their ecology, physiology, genetics, and post-harvest management, as well as the interaction of agricultural crops with the environment. In the Ph.D. program, students focus on one of five areas of emphasis: agroecology, crop improvement/plant breeding, crop production systems, plant physiology, and post-harvest biology/physiology. Research may be conducted within these areas with an applied or basic focus, but in association with a cropping system such as agronomy, environmental horticulture, pomology, vegetable crops, viticulture and weed science.

Preparation. For both the M.S. and Ph.D. programs, a level of competence equivalent to that of a sound undergraduate program in Plant Science is required. This includes coursework in general biology, chemistry, organic chemistry, physics, statistics, genetics, plant physiology, and soil science. A few limited deficiencies in any of these areas can be made up after admission to the graduate program. Specific requirements are outlined in detail on the group's website. The graduate advisor, the major professor, and the student will design a program of advanced courses to meet individual academic needs within one of the specializations.

Graduate Advisors. Consult the Group office.

Faculty. http://humanecology.ucdavis.edu/hdfs-faculty

The Major Program

Human development explores the developmental process in humans throughout the life cycle. Biological, cognitive, and personality/sociocultural aspects of development are studied.

The Program. Human development majors complete a group of preparatory courses in anthropology, general biology, genetics, history, philosophy, physiology, psychology, and statistics. Upper division students can design their programs in consultation with a faculty member to emphasize a particular interest. For instance, students can study the cognitive, social, and biological aspects of human development while emphasizing child or adult development.

Internships & Career Alternatives. At least one practicum course is required. A second practicum or supervised internship can be used to fulfill the restricted elective requirement for the major. In addition, students can intern in schools, early childhood education or senior centers, hospitals, rehabilitation centers, probation offices, group foster homes, mental health clinics, or as tutors for handicapped or bilingual students. Human development graduates fill a wide variety of positions in preschools, elementary and special educational settings, programs designed for parents, families, and the elderly, as well as governmental jobs related to social services for people of all ages. Students who emphasize biological aspects of human development can apply to medical school or pursue training for positions in the health sciences. Human development prepares students to pursue advanced degrees in behavioral and social sciences, education, social work, family law, or health sciences.

Preparatory Requirements. UC Davis students who wish to change their major to Human Development must be in good academic standing. Students must complete the following courses with a combined grade point average of at least 2.500. All of the following courses must be taken for a letter grade:

```
PSC 001
Choose one: STA 010, 013, 013V; PSC 041; SOC 046A & 046B
Choose one: ANT 001, 002, 015
Choose one: BIS 002A, 010, 010V; MIC 010; MCB 010; NPB 010, 012, 101
```

Students must have achieved a 2.000 GPA in any required upper division courses taken prior to declaring the major.

All courses satisfying the Preparatory Subject Matter, Depth Subject Matter, Restricted Electives and Human Development Major English Coursework Requirement must be taken for a letter grade.

Major Advisor. Leah Hibel

Graduate Study. Graduate study is available through a Master of Science degree in child development, and a Ph.D. degree in human development. See also Graduate Studies.
Choose one:  
- MCB 010  Introduction to Human Heredity  
- BIS 101  Genes and Gene Expression  

Biological Sciences 101 cannot be used to satisfy both the Preparatory Subject Matter and the Depth Subject Matter Requirements.

Choose one:  
- HIS 017A  History of the United States  
- HIS 017B  History of the United States  
- HIS 072A  Women and Gender in America, to 1865  
- HIS 072B  Women and Gender in America, 1865-Present  
- POL 001  American National Government  

Choose two:  
- PHI 005  Critical Reasoning  
- PHI 015  Introduction to Bioethics  
- PHI 030  Introduction to Philosophy of Science  
- PHI 031  Appraising Scientific Reasoning  
- PHI 032  Understanding Scientific Change  
- PHI 038  Introduction to Philosophy of Biology  

Choose one:  
- NPB 010  Elementary Human Physiology  
- NPB 101  Systemic Physiology  
- PSC 101  Introduction to Biological Psychology  

Psychology  
- PSC 001  General Psychology  

Choose one:  
- PSC 041  Research Methods in Psychology  
- STA 010  Statistical Thinking  
- STA 013  Elementary Statistics  

*Sociology 046A & 046B:*  
- SOC 046A  Introduction to Social Research  
- SOC 046B  Introduction to Social Research  

**Depth Subject Matter**  
**Units:** 50-54

*Life Span*  
- HDE 100A  Infancy and Early Childhood  
- HDE 100B  Middle Childhood and Adolescence  
- HDE 100C  Adulthood and Aging  

*Research Methods*  
- HDE 120  Research Methods in Human Development  

*Biological Processes*  
Choose one:  
- BIS 101  Genes and Gene Expression  

Biological Sciences 101 cannot be used to satisfy both the Preparatory Subject Matter and the Depth Subject Matter Requirements.  

- HDE 117  Longevity  
- NUT 111AY  Introduction to Nutrition and Metabolism  
- PSC 121  Physiological Psychology  

*Social-Cultural Processes*  
Choose one:  
- HDE 102  Social and Personality Development  
- HDE 110  Contemporary American Family  
- HDE 130  Developmental Psychopathology
HDE 160  Social Aspects of Aging  4

Cognitive Processes  4

Choose one:
- HDE 101  Cognitive Development  4
- HDE 103  Cross-Cultural Study of Children  4
- HDE 132  Individual Differences in Cognition  4
- HDE 161  Applied Cognition and Aging  4
- HDE 163  Cognitive Neuropsychology in Adulthood and Aging  4

Practicum; choose one:  4-6
- HDE 140 & 140L  5
  - HDE 140  Communication and Interaction with Young Children  2
  - HDE 140L  Laboratory in Early Childhood  3-5
  
  May only be taken for 3 units.
- HDE 141  Field Study With Children and Adolescents  4-6
- HDE 142  Field Study with Emotionally Distressed Children and Adolescents  4-6
- HDE 143  Field Studies of the Elderly  4-6

Restricted Electives  19-20

Choose five additional upper division courses (19-20 units) chosen from among Human Development courses or from a list of restricted electives in consultation with faculty advisor; may include only one practicum course.

Choose at least one of the courses from the Depth Subject groups or Restricted Electives listed above must focus on childhood/adolescence (HDE 101, 102, 103, 110, 130, 132) and one on adulthood/aging (HDE 117, 143, 160, 161, 163).

Human Development English Coursework Requirement  Units: 12

Choose three courses in English Composition; at least one must be upper division:

Choose one:
- ENL 003  Introduction to Literature  4
- UWP 001  Introduction to Academic Literacies  4
- UWP 001Y  Introduction to Academic Literacies  4
- UWP 048  Style in the Essay  4
- UWP 049  Writing Research Papers  4
- CMN 001  Introduction to Public Speaking  4
- COM 001  Major Works of the Ancient World  4
- COM 002  Major Works of the Medieval and Early Modern World  4
- COM 003  Major Works of the Modern World  4
- COM 004  Major Works of the Contemporary World  4
- NAS 005  Introduction to Native American Literature  4

Choose at least one:
- Any of UWP 101
- Any of UWP 102 Series
- Any of UWP 104 Series

The Upper Division Composition Exam does not satisfy the requirement.

* Advanced Placement English score of 4 or 5 which satisfies ENL 003 and/or UWP 001 will satisfy one of the three required courses.

Total: 101-115

Human Development (Graduate Group)

Human Development (Graduate Group) | HDE Ph.D.

Amanda E. Guyer, Ph.D., Group Chairperson

Group Office. 1315 Hart Hall; 530-754-4109; http://humandevelopment.ucdavis.edu

Faculty. https://humandevelopment.ucdavis.edu/people

Graduate Study. The interdisciplinary and interdepartmental Graduate Group in Human Development offers a program of study leading to the Ph.D. degree. The program provides lifespan study of human behavioral development, with a balance of emphasis on biological, cognitive, and socio-emotional development in context. Recipients of the degree will be prepared to teach, to conduct research, and to be actively involved in public service in human behavioral development.

Applicants seeking admissions and fellowships consideration must submit all materials by our priority December 15 deadline. The final admissions deadline is March 1. For more details, see our website.

Graduate Advisor. Contact the Group office.

Description. This minor exposes students to general and specialized courses related to human biology including courses such as exercise and aging in health and disease and exercise metabolism. Students who obtain a human physiology minor will be able to demonstrate knowledge of the physiological processes that allow animals to function in their environment. This minor provides a foundation for further training in health-related professions.

Human Rights Studies
(College of Letters and Science)

Keith Watenpaugh, Ph.D., Program Director

Program Office. 213 Sproul Hall; 530-752-1219; http://human-rights.ucdavis.edu

Human Rights Studies is the newest interdisciplinary program at UC Davis and the first of its kind in the University of California system. Our new century has brought with it a host of complex, unprecedented, and daunting challenges to basic human rights; courage, creativity, and a commitment to sustained and innovative interdisciplinary collaboration are necessary to understand, address and solve these challenges. Human Rights Studies is a place for incubating, supporting, coordinating, and promoting faculty and student research, teaching, learning, service, and engagement across the campus on Human Rights and its attendant fields: humanitarianism, environmental justice, genocide, mass sexual and gender-based violence, refugee studies, memory studies, and post-conflict transitional justice. Undergraduate Human Rights students go on to join the Peace Corps, attend graduate school in the humanities and social sciences, and pursue professional programs and careers in public policy, law, education, nursing, and medicine.

Human Rights Studies | HMR Minor
(College of Letters & Science)

The Human Rights Studies Minor provides students with an opportunity to explore human rights as a critical element of our contemporary world.

Courses in the minor approach human rights as a problem for humanity, policy, advocacy and humanitarian action, as well as a subject for historical, ethical, social scientific and cultural study. Students will examine moments of terrible human rights abuse: genocide, slavery, colonialism, Apartheid, and sexual and gender-based violence. They will also learn about movements to protect and promote human rights, including the elaboration of the contemporary human rights régime, efforts by international and local non-governmental human rights organizations, and artistic and literary responses to human rights challenges.

The minor is administered by the Human Rights Studies Program.

Program Objectives
In addition to completing HMR 134, students must take three additional Core Courses and one course from the Elective Course list.

Advising. Keith David Watenpaugh, kwatenpaugh@ucdavis.edu.

HMR 140A  Human Rights and the Popular Imagination  4
HMR 140B  The Art & Politics of Memory in Latin America: Truth, Justice, and Reconciliation  4
HMR 161  Human Rights in Latin America  4
HMR 162Y  The History of Human Rights in Europe  4
HMR 190  Seminar  4

In addition to the courses listed above, any HMR course between 100-199 will count towards the core course requirement.

Elective Courses (4 units); choose one from the following or seek the approval of the program advisor for an unlisted course that treats a human rights related topic:

Suggested Electives

AAS 180  Race and Ethnicity in Latin America  4
AMS 156  Race, Culture and Society in the United States  4
ANT 126A  Anthropology of Development  4
HIS 115E  Slavery, Africa, and the Atlantic World  4
HIS 142A  History of the Holocaust  4
HIS 142B  The Memory of the Holocaust  4
HIS 159  Women and Gender in Latin American History  4
HIS 165  Latin American Social Revolutions  4
HIS 184  History of Sexuality in America  4
NAS 120  Ethnopolitics of South American Indians  4
POL 124  The Politics of Global Inequality  4
SOC 104  The Political Economy of International Migration  4

Other Electives

ANT 126B  Women and Development  4
ANT 130A  Cultural Dimensions of Globalization  4
CHI 130  United States-Mexican Border Relations  4
HIS 115D  Postcolonial Africa  4
HIS 172  American Environmental History  4
HIS 177B  History of Black People and American Race Relations, 1860-Present  4
MSA 150  Women and Islamic Discourses  4
NAS 180  Native American Women  4
POL 126  Ethnic Self-Determination and International Conflict  4
POL 142B  Comparative Development: Politics and Inequality  4
POL 146B  Politics of Africa: Development in Africa  4
POL 152  The Constitutional Politics of the Equality  4
POL 166  Women in Politics  4
POL 168  Chicano Politics  4
POL 176  Racial Politics  4
SOC 130  Race Relations  4
SOC 160  Sociology of the Environment  4
SOC 172  Ideology of Class, Race and Gender  4
SOC 181  Social Change Organization  4
WMS 102  Gender and Post Colonialism  4
WMS 140  Gender and Law  4
WMS 145  Women's Movements in Transnational Perspective  4
WMS 148  Science, Gender, and Social Justice  4
WMS 170  Queer Studies  4
WMS 175  Gender and Experience of Race  4
WMS 182  Globalization, Gender and Culture  4
WMS 184  Gender in the Arab World  4

The Program of Study
The Humanities program is an undergraduate and graduate curriculum emphasizing innovative approaches to ideas that matter. Courses offered through the program are interdisciplinary in scope and aim to develop critical thinking and writing skills in three principal areas: major figures, works, and ideas in world cultures; major themes in world literatures and societies; and relationships between history, society, language, and culture.

Hydrologic Sciences (Graduate Group)
Hydrologic Sciences (Graduate Group) | HYD Information
Thomas Harter, Ph.D., Chairperson of the Group
Group Office. 1152 Plant and Environmental Sciences Building; 530-752-1669; http://hsgg.ucdavis.edu/
Faculty. http://hsgg.ucdavis.edu/people/faculty/

Hydrologic Sciences (Graduate Group) | HYD M.S.
Thomas Harter, Ph.D., Chairperson of the Group
Group Office. 1152 Plant & Environmental Sciences Building; 530-752-1669; http://hsgg.ucdavis.edu/
Faculty. http://hsgg.ucdavis.edu/people/faculty/

Graduate Study. The Hydrologic Sciences Graduate Group offers M.S. and Ph.D. degrees. Hydrologic Sciences integrates numerous and diverse fields of sciences to deepen the understanding of the physical and biogeochemical dynamics of water and water resources below, on, and above the land surface. It considers the interactions between water, the natural environment, agriculture, urban areas, ecosystems, climate, and societal systems. And it investigates water management, regulations, water law, and societal conflicts around water. Students have the ability to take advantage of the breadth of earth, environmental, agricultural, and social sciences and engineering resources on campus that are related to water in the natural and built environment. Students deepen their understanding, advance their critical thinking and analysis skills, and gain in-depth knowledge of innovative, leading hydrologic science tools and techniques to employ for problem solving.

Specialization. To accommodate the diversity of preparation and interests among students, the program offers five specializations from which the student selects one for their M.S.: physical hydrology, water policy and management, hydrochemistry, hydrobiology, and earth surface processes. Two options – a thesis option (Plan I) and a comprehensive exam option (Plan II) – are available for obtaining the Master of Science.

Preparation. Applicants to the program are expected to have completed or to be completing an undergraduate degree in environmental, physical, chemical, or biological sciences, mathematics, engineering, or related degrees. Undergraduate study must include one year of calculus and one course each in probability/statistics, computer programming, physical geology, and introductory hydrology. Additional undergraduate preparation, expected to be completed before entering the program, depend on the choice of specialization: physical hydrology and earth surface processes require one course each in linear algebra, differential equations, and fluid mechanics, one year of general physics, and two courses of general chemistry. Water policy and management requires one course each in microeconomics and in public policy. Hydrochemistry requires one year each in general biology and general chemistry, and one course in aqueous chemistry. Hydrobiology requires one year each in general biology and general chemistry, and one course in introductory ecology.

(College of Agricultural & Environmental Sciences)

**Faculty.** [http://lawr.ucdavis.edu/people/faculty/hydrology](http://lawr.ucdavis.edu/people/faculty/hydrology)

**The Major Program**

Hydrology is the study of the occurrence, distribution, circulation, and behavior of water and water-borne materials in the environment of Earth. It includes practical measurement and technical analysis of water phenomena underground, on the Earth's surface, and in the atmosphere. Contemporary hydrologic problems include environmental restoration, sustainability of groundwater and surface water resources, water pollution, and natural disasters such as floods, droughts, landslides, avalanches, and land subsidence. The management of these problems demands hydrologic scientists with the comprehensive, interdisciplinary education embodied in this program. Beyond its societal utility, hydrology can be an exciting science for the curious-minded. Hydrologists explore natural phenomena such as climate change, waterfalls, health of coral reefs, biogeochemical cycles, and aquifers.
**The Program.** A hydrologist needs a strong background across the basic sciences of physics, mathematics, chemistry, and biology. Breadth of understanding comes from exposure to ecology, geology, engineering, policy, and law. Depth of experience is provided by core hydrology courses, internship opportunities, and practical outdoor training. Students choose electives to match their interests and career goals. Transfer students should have completed as much as possible of the preparatory subject matter listed below.

**Internships and Career Alternatives.** Job opportunities in hydrology exceed the available supply of trained hydrologists. Students commonly obtain internships and jobs with state and federal agencies, private consulting firms, environmental interest groups, irrigation districts, and utility companies. Federal agencies hiring hydrologists include the U.S. Geological Survey, U.S. Department of Agriculture (Fish & Wildlife, Agricultural Research, Forest Service, and National Resource Conservation Service), Environmental Protection Agency, and national research laboratories (Lawrence Livermore National Laboratory, Lawrence Berkeley National Laboratory). State and local agency employers include California's Departments of Water Resources, Conservation, Fish & Game, and Toxic Substances as well as the Water Resources Control Board and Regional Water Quality Control Boards. To obtain higher levels of responsibility and salary, hydrologists often seek advanced degrees, and the hydrology major is designed to provide students with a highly competitive education to get into graduate school.

</table>

**Choose one:**

| HYD 103N       | Fluid Mechanics Fundamentals | 4 |
| ENG 103        | Fluid Mechanics              | 4 |

**Equivalent of either.**

**Choose ECI 114 or STA 130 series:**

| 4-8 |
ECI 114  Probabilistic Systems Analysis for Civil Engineers  4  
STA 130A  Mathematical Statistics: Brief Course  4  
STA 130B  Mathematical Statistics: Brief Course  4  

**Hydrology**  
HYD 134  Aqueous Geochemistry  6  
HYD 141  Physical Hydrology  4  
HYD 144  Groundwater Hydrology  4  
HYD 151  Field Methods in Hydrology  4  

**Soil Science**  
SSC 107  Soil Physics  5  

**Water Policy & Law; choose one:**  
HYD 150  Water Law  3  
ARE 147  Resource and Environment Policy Analysis  3  
ESP 161  Environmental Law  4  
ESP 169  Water Policy and Politics  3  
ESM 121  Water Science and Management  3  

**GIS & Remote Sensing; choose one:**  
LDA 150  Introduction to Geographic Information Systems  4  
HYD 182  Environmental Analysis using GIS  4  
ESM 185  Aerial Photo Interpretation and Remote Sensing  4  
ESM 186  Environmental Remote Sensing  5  

**Hydrologic Science; choose three:**  
HYD 110  Irrigation Principles and Practices  3  
HYD 124  Plant-Water-Soil Relationships  4  
HYD 142  Systems Hydrology  4  
HYD 143  Ecohydrology  4  
HYD 145  Water Science and Design  4  
HYD 146  Hydrogeology and Contaminant Transport  5  
HYD 147  Runoff, Erosion and Water Quality Management  3  
ECI 141  Engineering Hydraulics  3  
ABT 165  Irrigation Practices for an Urban Environment  2  

**Restricted Courses**  
Upper division courses to supplement or expand areas of student interest selected with approval of advisor.  

**Total: 133-154**

**Hydrology | HYD Minor**  
(College of Agricultural & Environmental Sciences)  

**Faculty.** [http://lawr.ucdavis.edu/people/faculty/hydrology](http://lawr.ucdavis.edu/people/faculty/hydrology)  

The Hydrology Section of the Department of Land, Air & Water Resources offers the minor in Hydrology for environmental or natural science students who have an interest in water/environmental issues. The interested student should have completed preparatory course work in calculus (MAT 016B), chemistry (CHE 002A; CHE 002B recommended), physics (PHY 007A), and biology (BIS 002A). Course work in the minor provides fundamental skills and knowledge of the hydrologic sciences. The program is sufficiently flexible for students to pursue particular water issues or problems of interest to them.  

**Minor Advisor.** Graham Fogg; 530-752-6810; gefogg@ucdavis.edu.

- Groundwater Hydrology 4

Soil Physics 5

Choose one:
- Aqueous Geochemistry 6
- Environmental Water Chemistry 3
- Soil Microbiology 4
- Limnology 4

Total: 20-23

Immunology

Immunology | IMM Information
Huaijun Zhou, M.D., Ph.D., Chairperson of the Group

Group Office. 1026 Vet Med Administration Building; 530-754-0103; http://immunology.compmed.ucdavis.edu/
Faculty. http://immunology.compmed.ucdavis.edu/people/faculty.html

Immunology | IMM M.S.
Huaijun Zhou, M.D., Ph.D., Chairperson of the Group

Group Office. 1026 Vet Med Administration Building; 530-754-0103; http://immunology.compmed.ucdavis.edu/
Faculty. http://immunology.compmed.ucdavis.edu/people/faculty.html

Graduate Study. The Graduate Group in Immunology offers an interdisciplinary program of study in an exciting field of biology and medicine leading to the M.S. and Ph.D. degrees. Participating faculty from various Schools and Departments at UC Davis provide research opportunities in diverse areas of applied immunology. Areas of focus include infection and immunity (including host response regulation to parasites, viruses and bacteria), nutrition and immunity, autoimmunity, immune regulation, neuroimmunology, cancer therapy and immune mediators and their uses for diagnosis and treatment.

Preparation. Applicants for candidacy to these programs should have completed undergraduate preparation in mathematics, physics, chemistry, biochemistry, molecular and cellular biology or related biological and medical sciences.

For work leading to the Ph.D. degree, the requirements include cell biology, chemical immunology, cellular immunology, immunohematology, and advanced immunology. In addition to these general requirements, more specialized preparation in at least one of the following is required: (a) microbiological specialties (bacteriology, virology, parasitology, medical microbiology); (b) zoological specialties (cell biology, endocrinology, embryology, protozoology, histology, cytology, physiology); (c) medical specialties (pathology, anatomy, pharmacology, clinical pathology, reproduction, hematology, epidemiology); (d) biochemistry/biophysics specialties (biologically active molecules, control mechanisms); (e) genetic specialties (developmental genetics, population genetics, cytogenetics, molecular genetics).

Graduate Advisor. See the graduate program website at http://immunology.compmed.ucdavis.edu/people/.

Independent Study Program

Information. Chairperson, Committee on Courses of Instruction, c/o Academic Senate Office; 530-752-2220.

The Independent Study Program provides an opportunity for upper division students to design and pursue a full quarter (12-15 units) of individual study in an area of special interest.

A program qualifying as Independent Study will consist of one or more courses in the 190–199 series. While the theme of such a program may be reasonably broad, a recognizable common thread should unite all the academic work you undertake during an independent study quarter. Regularly offered formal courses will only be acceptable as a part of such a program if they clearly fit its theme and contribute something essential toward the realization of its objectives. The program is not to be considered a way to take more variable-unit courses than normally permitted.

The procedure for enrolling in an Independent Study Program is as follows:

1. Develop, in general terms, a plan of study;
2. Locate a faculty sponsor or panel of sponsors and with their help and approval develop a detailed plan;
3. Complete a project proposal form (obtained from the Academic Senate office) and submit it to the Academic Senate Committee on Courses of Instruction.

The deadline for applications is the tenth day of instruction of the term before; for specific dates, see the Academic Calendar.

Note that most courses in the 190-199 series are graded on a "Passed/Not Passed" basis unless the instructor has obtained approval for letter grading from both the college or school Committee on Courses of Instruction and from the Academic Senate Committee on Courses of Instruction. Requests for letter grading must be received by the Senate Committee no later than the fifteenth day of instruction in the quarter in which the course is offered.

You must report the completion or termination of the project to the Committee on Courses of Instruction.

India & South Asia Studies Minor; Middle East/South Asia Studies

India & South Asia Studies Minor; Middle East/South Asia Studies | India & South Asia Studies Minor
The minor in India & South Asia Studies covers an area of immense historical, cultural, economic, demographic, and geopolitical significance. The minor is designed to emphasize the interconnected and comparative aspect of history, culture, society, economy, religion, gender relations, media, law, political economy, international relations, urbanism, migration & diaspora, language & literatures across regional & national boundaries. It is an interdisciplinary minor open to undergraduates in all four colleges.

**Minor Advisor.** Consult the Middle East/South Asia Studies Program in 155 Kerr Hall 530-754-4926 or the Middle East/South Asia Studies website at [http://mesa.ucdavis.edu](http://mesa.ucdavis.edu).

*With prior consultation with an advisor, students can petition in advance the Program Committee to accept:*
Other elective courses toward the minor program if the content is 50% or more on the Arab World. Under no circumstances may more than one lower division course be offered in satisfaction of requirements for the minor. More than four units of Middle East/South Asia 181C and/or Middle East/South Asia 182C towards the minor program.

Individual Major

Individual Major | A&ES B.S.

(College of Agricultural & Environmental Sciences)

The Individual Major in this College has been suspended indefinitely.

Program Office. 150 Mrak Hall; 530-752-0108; http://www.caes.ucdavis.edu/students/current/advising

Preparatory Subject Matter

Lower division courses basic to the program or needed to satisfy prerequisites for upper division requirements as determined by the Committee on Undergraduate Student Petitions.

Units: 0

Depth Subject Matter

Upper division course work must include:

(a) Choose at least 30 units from courses offered by departments in the College of Biological Sciences.
(b) Additional requirements as determined by the Committee on Undergraduate Student Petitions; see the Biology Academic Success Center for details.

Units: 28-42

Total: 20-24
Individual Major | Biological Sciences B.S.

(College of Biological Sciences)

Program Office. Biology Academic Success Center; 1023 Sciences Laboratory Building; 530-752-0410.

The Major Program

The Individual Major, an integrated program composed of courses from two or more disciplines, is designed by the student and is subject to approval by faculty advisor and appropriate college committees. This major enables a student to pursue a specific interest that cannot be accommodated within the framework of an existing major. It must clearly and specifically meet the student's educational goals as well as meet university and college academic standards.

Student Proposal. A student who wishes to propose an individual major must submit the proposal to the Committee on Undergraduate Student Petitions prior to reaching 120 units. It is important for the student to make arrangements to speak with an advisor in the Biology Academic Success Center early in the development of his/her major as no individual major will be approved after a student has completed 120 units.

Principal Advisor (selected by student). A faculty member in a department or program in the College of Biological Sciences.

Preparatory Subject Matter

Lower division courses basic to the program or needed to satisfy prerequisites for upper division requirements as determined by the Committee on Undergraduate Student Petitions.

Depth Subject Matter

Upper division course work must include:
(a) Choose at least 30 units from courses offered by departments in the College of Biological Sciences.
(b) Additional requirements as determined by the Committee on Undergraduate Student Petitions; see the Biology Academic Success Center for details.
(c) For the B.S. degree, a maximum of 110 units toward the major.

All University, General Education, and College of Biological Sciences Bachelor's degree requirements; variable units.

Individual Major | L&S A.B.

(College of Letters & Science)

Program Office. 200 Social Sciences & Humanities Building (Undergraduate Education and Advising office); http://www.ls.ucdavis.edu/students

The Major Program

The Individual Major, an integrated program composed of courses from two or more disciplines, is designed by the student and is subject to approval by the faculty advisor and appropriate college committees. This major enables a student to pursue a specific interest that cannot be accommodated within the framework of an existing major. It must clearly and specifically meet the student's educational goals as well as meet university and college academic standards.

Student Proposal. A student who wishes to propose an individual major must submit the proposal to the Faculty Committee on Individual Majors in the College of Letters & Science prior to reaching 120 units. The proposal must
be submitted by the end of the fourth week of the quarter. This proposal will consist of (1) an essay, identifying the specific educational and professional objectives, including an indication of why the objectives cannot be met within existing majors, (2) a list of courses planned to complete the major, and (3) faculty advisor recommendations. The proposal will be reviewed and a decision provided the quarter of submittal. It is important that you carefully review the information in the Individual Majors Handbook; available at http://ls.ucdavis.edu/advising/academic-pdfs/individual-major-handbook.pdf.

**Honors Program.** By the fourth week of the last quarter of the junior year, students potentially eligible for high or highest honors at graduation (see College section), may petition the Individual Majors Committee for tentative acceptance into an honors program.

Final admission will depend upon the Committee's approval of a senior thesis prospectus that has been agreed upon by the student and faculty advisor. The prospectus must be presented to the Committee by the end of the fourth full week of instruction of the first quarter of the senior year. Graduation with high or highest honors will be conditional upon both the maintenance of the required grade point average and the satisfactory completion of the senior thesis project. Students who anticipate doing a senior honors thesis should allow up to three units of independent study in the program during each of two quarters in the senior year as course options.

**Major Advisor (selected by student).** Principal Advisor: a faculty member in a teaching department or program in the College of Letters & Science in the major field of emphasis. Secondary Advisor: a faculty member from a secondary area of interest.

**Preparatory Subject Matter**

Units: 0

Lower division courses basic to the program or needed to satisfy prerequisites for upper division requirements.

**Depth Subject Matter**

Units: 45-54

Upper division units must include:

a) Interrelated and complementary courses from two or more departments which provide a unified pattern and focus.

b) At least 30 units from Letters & Science teaching departments or programs.

c) No more than 10 units in courses numbered 194H, 198 & 199.

d) For the A.B. degree, a maximum of 80 units toward the major.

Total: 45-54

**Individual Major | L&S B.S.**

(College of Letters & Science)

**Program Office.** 200 Social Sciences & Humanities Building (Undergraduate Education and Advising office); http://www.ls.ucdavis.edu/students

**Integrated Teaching Credential (Graduate Group)**

**Integrated Teaching Credential (Graduate Group) | Integrated Teaching Credential M.S.**

(School of Education)

**School of Education Building:** 530-752-0757; [http://education.ucdavis.edu](http://education.ucdavis.edu)

**Faculty:** [https://education.ucdavis.edu/candel-program-faculty](https://education.ucdavis.edu/candel-program-faculty)

The Integrated Teaching Credential with Master's Degree Program offers an opportunity for qualified students to complete the requirements for both a Masters of Arts in Education degree and a Multiple Subject OR Single Subject Credential in English, mathematics, science, social science or agriculture in a six-quarter program completed in less than two years. The Bilingual authorization in Spanish, formerly referred to as BCLAD, is available to credential candidates in both the elementary and secondary programs.
The Credential Program prepares students for the teaching profession by immersing them in the total environment of a public school classroom while enrolled in required coursework. The coursework incorporates a theoretical-practical approach to the teaching-learning process, encouraging close interactions among teacher candidates and teacher education faculty. Students complete requirements for the M.A. degree during two part-time quarters following the credential year. This coursework introduces the integration of research into teaching practice, making teachers more informed and pro-active practitioners.

Integrative Genetics & Genomics (Graduate Group)

Integrative Genetics & Genomics (Graduate Group) | GGG Information
Fred Chedin, Ph.D., Chairperson of the Group

Group Office. 227A Life Sciences; 530-752-4863; http://igg.ucdavis.edu/
Faculty. http://igg.ucdavis.edu/faculty/

Graduate Study. The Graduate Group in Integrative Genetics & Genomics (IGG) offers programs of study and research leading to M.S. and Ph.D. degrees. Students in the IGG graduate program have the opportunity to apply genomic, molecular, computational, and classical genetic approaches to study model organisms, a broad range of native and agricultural species, humans, and companion animals. The group integrates genetic research across campus and unites over 100 faculty members from more than 25 departments spanning the College of Biological Sciences, the College of Letters & Science, the College of Agricultural & Environmental Sciences, the School of Medicine, and the School of Veterinary Medicine. Students experience an unsurpassed breadth of research and instructional opportunities from the most fundamental to applied aspects of genetics. For additional information regarding the program, contact the group coordinator at 530-752-4863.

Integrative Pathobiology (Graduate Group)

Integrative Pathobiology (Graduate Group) | Integrative Pathobiology Information
Patricia Pesavento, D.V.M., Ph.D., Chairperson of the Group
Brian Murphy, D.V.M., Ph.D., Vice-chairperson of the Group

Group Office. 1024 Veterinary Medicine Student Services and Administrative Center; 530-752-3737; http://www.vetmed.ucdavis.edu/integrativepath/
Integrative Pathobiology (Graduate Group) | Integrative Pathobiology M.S.

Patricia Pesavento, D.V.M., Ph.D., Chairperson of the Group

Group Office. 1024 Veterinary Medicine Student Services & Administrative Center; 530-752-3737; http://www.vetmed.ucdavis.edu/integrativepath/

Graduate Study. The Graduate Group in Integrative Pathobiology (GGIP) is the core UC Davis graduate program for students interested in disease processes and biomedical research. The diverse faculty members in the group come from the School of Veterinary Medicine, the School of Medicine, the College of Agricultural and Environmental Sciences, and the College of Biological Sciences. This diversity of faculty offers students a wide range of opportunities and expertise from the UC Davis biomedical research community.

GGIP is designed for students interested in studying mechanisms responsible for the development of disease at the organismal, cellular or subcellular level. Students interested in the interface between cell biology, biochemistry, microbiology, pharmacology, physiology, immunology, and genetics are encouraged to apply.

Preparation. This program is primarily for applicants with a strong background in basic biomedical sciences.

Graduate Advisor. Jeffrey Stott (Pathology, Microbiology, & Immunology)

Integrative Pathobiology (Graduate Group) | Integrative Pathobiology Ph.D.

Patricia Pesavento, D.V.M., Ph.D., Chairperson of the Group

Group Office. 1024 Veterinary Medicine Student Services & Administrative Center; 530-752-3737; http://www.vetmed.ucdavis.edu/integrativepath/

Graduate Study. The Graduate Group in Integrative Pathobiology (GGIP) is the core UC Davis graduate program for students interested in disease processes and biomedical research. The diverse faculty members in the group come from the School of Veterinary Medicine, the School of Medicine, the College of Agricultural and Environmental Sciences, and the College of Biological Sciences. This diversity of faculty offers students a wide range of opportunities and expertise from the UC Davis biomedical research community.

GGIP is designed for students interested in studying mechanisms responsible for the development of disease at the organismal, cellular or subcellular level. Students interested in the interface between cell biology, biochemistry, microbiology, pharmacology, physiology, immunology, and genetics are encouraged to apply.

Preparation. Students applying to this program have varied backgrounds. Some hold professional degrees (i.e., DVM, MD or DDS) while others apply after completion of an undergraduate degree. Students without a professional degree are admitted if they have exceptionally strong interests and backgrounds in basic biomedical sciences.

Foreign Language Requirement

Students must complete three sequenced quarters (15 units) of courses in one foreign language or its equivalent. Passing a foreign language proficiency examination, a score of 5, 4, or 3 on a foreign language Advanced Placement examination (except Latin), or a score of 550 on the SATII: Subject Test will also satisfy this requirement.

Internship Requirement

Students must complete at least four units of internship. Internships can be chosen in consultation with an advisor. Internship requirement waived for students enrolled in the UC Education Abroad Program.

International Agricultural Development (Graduate Group)

International Agricultural Development (Graduate Group) | International Agricultural Development M.S.

Kate Scow, Ph.D., Professor (Land, Air, & Water Resources), Chairperson of the Group

Group Office. 1238 Plant & Environmental Sciences Building; 530-752-4839; http://iad.ucdavis.edu

Faculty. http://iad.ucdavis.edu/people/faculty/

Graduate Study. The International Agricultural Development M.S. degree program prepares students for careers in global agricultural and rural development, especially, but not exclusively, of developing and less-industrialized regions. This is an interdisciplinary program designed to provide students with knowledge and skills that will enable them to implement, facilitate, and manage programs that enhance agricultural development, resource management, and rural life.

Students are prepared to realize biological and technological improvement in agricultural and natural systems to facilitate social innovation. Training in International Agricultural Development includes both breadth and depth components. Breadth components, required of all M.S. students, aim to establish an understanding of the issues in international development as they relate to agriculture and the environment. These include the history and philosophy of development, leadership and management techniques, fundamentals of farming systems, and agricultural economics. Students acquire depth in their own areas of specialization within the agricultural and social sciences. The areas include agricultural and resource economics, agricultural engineering, agronomy, animal science, anthropology, aquaculture, avian science, community development, ecology, economics, entomology, environmental design, environmental toxicology, food science, gender, geography, horticulture, nutrition, plant pathology, plant biology, plant protection and pest management, political science, preventive veterinary medicine, range science, sociology, soil science, sustainable agriculture, vegetable crops, viticulture, and water science.

Practical and on-site experience with development issues is encouraged and facilitated by guidance from the group's faculty members, who possess a wide range of experience in international development.

Graduate Advisor. Contact the Group office.

International & Community Nutrition

International & Community Nutrition | International & Community Nutrition (Designated Emphasis)

Christine P. Stewart, Ph.D., Program Director

Program Office. 3253 Meyer Hall; 530-752-1992; http://picn.ucdavis.edu/

Faculty. http://picn.ucdavis.edu/people/faculty/

Graduate Study. The Program in International & Community Nutrition, an Organized Research Unit located in the Department of Nutrition, coordinates specialized course work and research leading to the Designated Emphasis in International and Community Nutrition for students in various graduate programs. The program focuses on both theoretical and practical issues concerning the identification, treatment, and prevention of human nutritional problems in low-income countries and in disadvantaged groups in the United States. Students enrolled in the Designated Emphasis are expected to (1) complete the course requirements already established by their respective graduate programs, (2) participate in a weekly advanced seminar in international and community nutrition, (3) complete additional core courses in international nutrition (Nutrition 219A, 219B, 258) and selected courses in the related disciplines of epidemiology, statistics, and social and behavioral sciences, and (4) conduct their dissertation research on a relevant topic under the supervision of a professor who is a member of the Program in International & Community Nutrition.

Students accepted into the following doctoral programs are automatically eligible to participate in the Designated Emphasis: Nutrition, Agricultural & Resource Economics, Epidemiology, Anthropology, and Human Development. Students from other programs may also be accepted by special request to the Program Director. Upon graduation,
students receive a Ph.D. in their major field, with specific recognition for the Designated Emphasis in International and Community Nutrition.

**Graduate Advisor.** Contact the Program office.

### International Relations

#### International Relations | International Relations A.B.

Ethan Scheiner, Ph.D., Program Director

**Program Office.** 464 Kerr Hall; 530-754-8098

Problems of security, development, ethnic conflict, human rights, health, and the environment are increasingly confronted at a global rather than a national level. With its theoretical models and real-world application, the study of international relations is an exciting and highly relevant interdisciplinary major.

**The Program.** Graduation with a major in international relations requires completion of introductory courses in political science, economics, statistics, and history. The major also requires fluency in English and a working knowledge (approximately 24 to 30 units of course credits or equivalent fluency) of one other modern language. Students choose one of four tracks that encompass major topical areas in combination with an area studies emphasis:

1. World Trade and Development;
2. Peace and Security;
3. Global Environment, Health, and Natural Resources;
4. Peoples and Nationalities. *Upper division course work for Tracks I, II and III is composed of twelve courses. Students choosing Track IV, Peoples and Nationalities, are required to study or work abroad for a minimum of one quarter; upper division course work is reduced to nine classes in recognition of the experience gained through education abroad.*

**Programs, Internships, and Career Alternatives.** One program of special interest to international relations majors is the Education Abroad Program, which provides insights into the life and culture of other countries. At UC Davis, the Internship and Career Center assists students in obtaining legislative, legal, and business internships. In addition, the UC Davis Washington Center and UC Center Sacramento arrange internships and run full-credit academic program in Washington, D.C. and Sacramento respectively with a full range of opportunities for International Relations majors (see also UC Washington Center (UCDC). International relations graduates are prepared for employment in government agencies (such as the Foreign Service), state agencies, international or non-governmental organizations (such as the United Nations), foundations, and companies having interests in international business, trade, or finance. The stringent language requirement of the major program enhances career prospects in jobs which demand knowledge of the language and culture of other countries.

**International Relations Abroad.** International Relations strongly encourages all students to participate in the UC Education Abroad Program; those who choose to study Track IV, Peoples and Nationalities, must study or work abroad for a minimum of one quarter. A maximum of five courses taken abroad may be applied toward the International Relations major. Courses are selected with the approval of an advisor for the International Relations program.

**Major Advisor.** Consult department office.

Note: The language curricula are subject to change; please check with an advisor for the major. A language not listed above may be substituted only with prior written approval of the International Relations Program Committee.

Depth Subject Matter

Tracks I, II & III: Twelve upper division courses.

Track IV: Nine upper division courses.

Choose one track:

Track I: World Trade & Development

Emphasizes contemporary economic relations of industrialized and developing countries.

For Advanced Industrialized Focus:

- ECN 100A Intermediate Micro Theory: Consumer and Producer Theory 4
- ECN 101 Intermediate Macro Theory 4
- ECN 160A International Microeconomics 4
- ECN 160B International Macroeconomics 4
- POL 123 The Politics of Interdependence 4

Choose two from Group A. 8
Choose one from Group B. 4
Choose four to fulfill Area Studies Requirement. 16

For Developing Countries Focus:

- ECN 115A Economic Development 4
- ECN 115B Economic Development 4
- ECN 162 International Economic Relations 4
- POL 123 The Politics of Interdependence 4
- POL 124 The Politics of Global Inequality 4

Choose one from Group A. 4
Choose two from Group B. 8
Choose four to fulfill Area Studies Requirement. 16

Group A; Advanced Industrialized Countries:

- ARE 138 International Commodity & Resource Markets 4
- ANT 127 Urban Anthropology 4
- CRD 118 Technology and Society 4
- CRD 141 Organization of Economic Space 4
- ECN 102 Analysis of Economic Data 4
- ECN 110B World Economic History Since the Industrial Revolution 4
- IRE 104 The Political Economy of International Migration 4
- POL 130 Recent U.S. Foreign Policy 4
- POL 140A Comparative Political Institutions: Electoral Systems 4
- POL 140B Comparative Political Institutions: Parties 4
- POL 140C Comparative Political Institutions: Legislatures 4
- POL 140D When Institutions Fail 4
- POL 140E Policy-Making Processes 4
- SOC 138 Economic Sociology 4
- SOC 139 Corporations and Society 4
- SOC 141 Industrialization and Social Change 4
- SOC 183 Comparative Organizations 4

Group B; Developing Countries:

- ANT 122A Economic Anthropology 4
- ANT 122B Anthropology and Political Economy 4
- ANT 126A Anthropology of Development 4
- ANT 126B Women and Development 4
- ANT 127 Urban Anthropology 4
Track II: Peace & Security

Focuses on political and security relationships among states and non-state actors, examining questions of war, peace, alliances, and diplomacy.

Choose five courses spanning two disciplines:

ECN 162 International Economic Relations 4
HIS 119 World War I 4
HIS 120 World War II 4
HIS 174B War, Prosperity, and Depression: United States, 1917-1945 4
HIS 174C The United States Since World War II, 1945 to the Present 4

Choose three additional courses from at least two departments:

COM 157 War and Peace in Literature 4
ECN 122 Theory of Games and Strategic Behavior 4
HIS 145 War and Revolution in Europe 1789-1918 4
HIS 146A Europe in the Twentieth Century 4
HIS 146B Europe in the Twentieth Century 4
HMR 131 Genocide 4
HMR 134 Human Rights 4
PHI 118 Political Philosophy 4
POL 112 Contemporary Democratic Theory 4
POL 122 International Law 4
POL 124 The Politics of Global Inequality 4
POL 126 Ethnic Self-Determination and International Conflict 4
POL 131 Analysis of U.S. Foreign Policy 4
POL 140A Comparative Political Institutions: Electoral Systems 4
POL 140B Comparative Political Institutions: Parties 4
POL 140C Comparative Political Institutions: Legislatures 4
POL 140D When Institutions Fail 4
POL 140E Policy-Making Processes 4
SOC 100 Origins of Modern Sociological Theory 4
SOC 118 Political Sociology 4
SOC 157 Social Conflict 4
WMS 102 Gender and Post Colonialism 4

Choose four courses to fulfill Area Studies Requirement.
Familiarizes students with new sources of global interdependence such as biodiversity, natural resource conflicts, population growth, and world health.

Note: Some courses shown below have additional prerequisites.

ECN 162  International Economic Relations  4
POL 123  The Politics of Interdependence  4

Choose one:  4
- ESP 161  Environmental Law  4
- ESP 162  Environmental Policy  4

Choose one:  4
- ANT 131  Ecology and Politics  4
- ESP 164  Ethical Issues in Environmental Policy (Discontinued)  3
- PHI 120  Environmental Ethics  4

Choose two:  7-8
- ARE 147  Resource and Environment Policy Analysis  3
- ARE 175  Natural Resource Economics  4
- ARE 176  Environmental Economics  4
- ANT 103  Indigenous Peoples and Natural Resource Conservation  4
- ABT 182  Environmental Analysis Using GIS  4
- CRD 149  Community Development Perspectives on Environmental Justice  4
- ECN 115A  Economic Development  4
- ECN 125  Energy Economics  4
- ESP 164  Ethical Issues in Environmental Policy (Discontinued)  3
- IAD 170  Program Development for International Agriculture  4
- PHI 120  Environmental Ethics  4
- PHY 160  Environmental Physics and Society  3
- POL 107  Environmental Politics and Administration  4
- POL 175  Science, Technology, and Policy  4
- SOC 160  Sociology of the Environment  4

Choose two from one of the following groups:  4-8

Atmospheric & Marine Environments:
- ATM 116  Modern Climate Change  3
- ATM 149  Air Pollution  4
- ESM 131  Air as a Resource  3
- ESM 120  Global Environmental Interactions  4
- ESM 121  Water Science and Management  3
- GEL 116N  Oceanography  3

Land Use & Energy Supply:
- ANT 104N  Cultural Politics of the Environment  4
- CRD 142  Rural Change in the Industrialized World  4
- ESM 144  Trees and Forests  4
- ESP 167  Energy Policy  4
- GEL 130  Non-Renewable Natural Resources  3
- GEL 134  Environmental Geology and Land Use Planning  3
- PLS 101  Agriculture and the Environment  3
- PLS 144  Trees and Forests  4
- PLS 150  Sustainability and Agroecosystem Management  4
- PLS 160  Agroforestry: Global and Local Perspectives  3
- POL 171  The Politics of Energy  4

Health & Human Populations:
- ANT 121  Special Topics in Medical Anthropology  4
- ANT 129  Health and Medicine in a Global Context  4
- ANT 131  Ecology and Politics  4
- ESP 121  Population Ecology  4
- ETX 101  Principles of Environmental Toxicology  4
- IDI 141  Infectious Diseases of Humans  1
NUT 111AY  Introduction to Nutrition and Metabolism  3  
NUT 111B  Recommendations & Standards for Human Nutrition  2  
NUT 118  Community Nutrition  4  
SOC 170  Population  4  

Choose four courses to fulfill Area Studies Requirement.  16  

Track IV: Peoples & Nationalities  36  
Examines social and cultural foundations of national development and international relations.  
Choose two:  8  
ANT 123AN  Resistance, Rebellion, and Popular Movements  4  
ANT 130A  Cultural Dimensions of Globalization  4  
SOC 118  Political Sociology  4  
SOC 156  Social Movements  4  
SOC 181  Social Change Organization  4  

Choose one each from three of the following four groups:  12  

The Mixing of Peoples:  
ANT 130BN  Migration and the Politics of Place and Identity  4  
ANT 139AN  Race, Class, Gender Systems  4  
CRD 176  Comparative Ethnicity  4  
HMR 131  Genocide  4  
HMR 134  Human Rights  4  
IRE 104  The Political Economy of International Migration  4  
POL 126  Ethnic Self-Determination and International Conflict  4  

Women:  
ANT 126B  Women and Development  4  
ANT 139BN  Gender and Sexuality  4  
HDE 103  Cross-Cultural Study of Children  4  
SOC 145B  Gender and Rural Development in the Third World  4  
WMS 102  Gender and Post Colonialism  4  
WMS 182  Globalization, Gender and Culture  4  

Religion:  
ANT 124  Religion in Society and Culture  4  
ANT 134  Buddhism in Global Culture  4  
PHI 105  Philosophy of Religion  4  
RST 106  Christianity in the Contemporary World  4  
RST 161  Modern Islam  4  
RST 161B  Modern Islam: Authority and Tradition In Process  4  
RST 170  Buddhism  4  
SOC 146  Sociology of Religion  4  

Development & Its Impact on Social Cleavages:  
ANT 122B  Anthropology and Political Economy  4  
ANT 126A  Anthropology of Development  4  
ANT 126B  Women and Development  4  
CRD 180  Transnational Community Development  4  
POL 124  The Politics of Global Inequality  4  
POL 142A  Comparative Development: Political Development in Modernizing Societies  4  
SAS 121  Global Poverty: Critical Thinking and Taking Action  4  
SOC 145A  Sociology of Third World Development  4  
SOC 145B  Gender and Rural Development in the Third World  4  

Four courses to fulfill Area Studies Requirement.  16  
Education/Internship Abroad for a minimum of one quarter.  0  

Area Studies Requirement  16  
Choose four: Courses must incorporate at least two of three groups (History, Social Analysis, Culture and Literature); we encourage students to take all four
courses from one region, but will accept a minimum of three from one region and
one from a different region. Tracks I, II and III students who choose to take
advantage of an Education Abroad experience may fulfill the Area Studies
requirement by completing three courses instead of four; all three courses must
be from one region.

International Science Studies Minor; Land, Air & Water Resources | International Science Studies Minor

(College of Agricultural & Environmental Sciences)

This interdisciplinary minor in International Science Studies will introduce College of Agricultural & Environmental Sciences students to global issues, which affect their major disciplines in the current world, and also provide an opportunity to gain first-hand experience abroad when appropriate. The goal of this minor is to enable our college students to develop greater international competence and to enhance their employability.

The minor assumes that the student will have a major in the sciences, and that classes taken under one of the three tracks in the minor will contribute depth to the existing major or establish depth in a selected additional field of study. Students will be expected to work closely with an academic advisor in developing an intellectually coherent program of the study. A minimum of 18 units of upper division work is required. Only a single course can be counted toward both major and minor and no course can be used to satisfy the requirements of more than one minor.

Minor Advisor. Shu-Hua Chen (Land, Air & Water Resources); 530-752-1822; shachen@ucdavis.edu.

International Science Studies

Units: 23-25

Global Issue course requirement. 7-8

Focusing on broad range of global issues and their impacts on ecological and environmental resources and biodiversity, in addition to international policy and economics. Beyond the courses taken under each track, choose two out of the three courses listed below:

ATM 116 Modern Climate Change 3
PLS 150 Sustainability and Agroecosystem Management 4
ARE 115B Economic Development 4

Choose one of the following tracks: 16-17

Education Abroad Program courses taught overseas and relevant international internship activities will count towards the minor requirement with advisor's approval. For each track, students can take a maximum of three units from EAP courses, with a valid transcript, and three units from relevant international internship activities. The international internship activities would require a pre-approved study plan with the academic advisor before the maximum of three units can be awarded. Language and culture related courses are encouraged, but not required for the minor.

(1) Ecological, Environmental, & Energy Studies Track; choose 16-17 units: 16-17

ANT 103 Indigenous Peoples and Natural Resource Conservation 4
ARE 147 Resource and Environment Policy Analysis 3
ATM 116 Modern Climate Change 3
ATM 133 Biometeorology 4
ESM 100 Principles of Hydrologic Science 4
ESM 121 Water Science and Management 3
ESM 131 Air as a Resource 3
ESM 144 Trees and Forests 4
ESM 120 Global Environmental Interactions 4
ESP 100 General Ecology 4
ESP 151 Limnology 4
EVE 147 Biogeography 4
SSC 109 Sustainable Nutrient Management 4
HYD 143 Ecohydrology 4

(2) Policy & Management Focus Track; choose 16-17 units: 16-17

ARE 115A Economic Development 4
ARE 115B Economic Development 4
ARE 138 International Commodity & Resource Markets 4
IRE 190 Topics in International Relations 4
Internship Program

Internship Program | Internship Program

The Internship & Career Center; 2nd Floor, South Hall 530-752-2855 http://icc.ucdavis.edu

Marcie Kirk Holland, Executive Director

Program Areas

Agricultural and Environmental Sciences, Career Recruiting Programs, Engineering and Physical Sciences, Masters, Ph.D.s and Postdoctoral Scholars, Health and Biological Sciences, International Programs and Liberal Arts and Business.

Internship Experience

An internship (also known as experiential education) is a work experience that is either directly related to your major field of study or your career interest. Internships are an opportunity to develop your skills and knowledge under the supervision of a professional. The Internship and Career Center facilitates a campus-wide internship program. All internships, both credit and non-credit, can be taken for Transcript Notation with completion of required evaluation reports. The notation briefly describes the nature and location of the internship experience. Questions pertaining to Transcript Notation may be directed to The Internship and Career Center.

Course Credit

Academic credit is granted through academic departments and graduate groups. The ICC advising staff can assist you in identifying internship opportunities and provide information about academic credit.

Internship courses (numbered 92 and 192) are available for credit on a variable-unit and Passed/Not Passed grading basis. A maximum of 12 units of 92 and/or 192 courses may be counted toward the 180-unit minimum needed for graduation. To qualify for the 192 course, students must have acquired 84 units of credit. All credited internships require approval and sponsorship by a faculty member from an appropriate discipline. Arrangements may be made through the department of the sponsoring faculty member and facilitated by The Internship and Career Center Staff.

Faculty. http://frenchanditalian.ucdavis.edu/people-italian

The Major Program

The major in Italian provides a solid language background that will enable the student to develop an appreciation for the numerous contributions Italians and Italophones have made to literature, the arts, political theory, science, and other expressions of human creativity. The major also emphasizes the influence Italian culture continues to have on our global world.

The Program. The Italian program is geared to the specific needs and interests of the students, who enjoy the advantages of a small classroom setting and the individualized mentoring of dedicated professors. While the use of Italian is stressed in language and literature courses, the program is interdisciplinary in nature. Starting at the lower-division level, students collaborate closely with academic advisors in order to design a major curriculum that includes culture, film, art history, history, food science, and other courses in related fields offered on campus or in Italy. The Italian program actively participates in the UC-wide Education Abroad Program, the Quarter Abroad Program (Florence), the International Internships Program, and the Summer Abroad Program (Rome), all of which offer opportunities for travel and study in Italy.

Career Alternatives. The Italian Program provides a solid foundation for a variety of career paths by offering training in Italian language and culture and developing skills that are vital in any professional setting: critical analysis, interpersonal skills, effective written and oral communication, and cultural sensitivity. In addition to specific career paths in foreign service and education, knowledge of the Italian language and culture enhances professional opportunities in a variety of fields, such as viticulture and enology, food science, political science, medicine, architecture, and engineering.

Honors & Honors Program. Candidates for high or highest honors in Italian must write a senior thesis under the direction of a faculty member. For this purpose, honors candidates must enroll in ITA 194H (3 units) and ITA 195H (3 units). Normally, a student will undertake the honors project during the first two quarters of the senior year; other arrangements must be authorized by the department chair. Only students who, at the end of the junior year (135 units), have attained a cumulative grade-point average of 3.500 in courses required for the major will be eligible for the honors program.

Education Abroad Program. The department strongly encourages students to study abroad in the Summer Abroad program (Rome), the Quarter Abroad Program (Florence), or the Education Abroad Program. Applicable courses are accepted for credit in the major program.

Prerequisite Credit. Credit will not normally be given for a course if it is a prerequisite of a course already successfully completed. Exceptions can be made only by the major advisor.

Quarter Abroad Program. The UC Davis Quarter Abroad Program and the Italian Program offer an exciting Italian Language and Culture Program in Florence, Italy. While studying abroad in Florence, students will earn 16-24 UC Davis quarter units and will experience the richness and vitality of Italian and European culture.

Participants fulfill three-quarters-worth of Italian language study, enroll in culture and film courses, integrate into the Florentine community through meaningful internships (with transcript notation), and explore electives in areas such as art history, fashion, business, and food studies.

There is no language requirement, and all registered UC Davis students with 2.000 GPA and above, good academic standing, and good disciplinary standing are eligible to apply.

For more information, please contact Professor Margherita Heyer-Caput at mheyercaput@ucdavis.edu or see https://studyabroad.ucdavis.edu/programs/quarterabroad/italy.html.

Minor Advisor. M. Heyer-Cáput

Preparatory Subject Matter Units: 27
**Depth Subject Matter**  
*Units: 36*

**Four required courses:**  
*Choose one:*  
- ITA 101 Advanced Conversation, Composition, and Grammar  
- ITA 101S Advanced Composition, Conversation and Grammar  
- ITA 105 Introduction to Italian Literature

*Two Italian literature courses taught in Italian from two different areas among the following:*  

**(a) Medieval Italian:**  
- ITA 112 Medieval and Renaissance Poetry: St. Francis to Petrarch  
- ITA 113 Dante Alighieri, Divina Commedia (Inferno, Purgatorio, Paradiso)  
- ITA 114 Boccaccio, Decameron, and the Renaissance Novella  
- ITA 145 Special Topics in Italian Literature *  

**(b) Renaissance Italian:**  
- ITA 115A Studies in the Cinquecento  
- ITA 115B Italian Literature of the Renaissance and the Baroque: From Cellini to Marino  
- ITA 115C Italian Drama from Machiavelli to the Enlightenment  
- ITA 115D Early Modern Italian Lyric  
- ITA 145 Special Topics in Italian Literature *  

**(c) Modern Italian:**  
- ITA 118 Italian Literature of the Eighteenth Century  
- ITA 119 Italian Literature of the Nineteenth Century  
- ITA 120A Italian Literature of the Twentieth Century: The Novel  
- ITA 120B Italian Literature of the Twentieth Century: Poetry and Drama  
- ITA 145 Special Topics in Italian Literature *  

**Five Elective Courses in Italian literature, cinema, or culture, to be chosen in consultation with the Italian faculty advisor, from among the following:**  

- ITA 104 Italian Translation and Style  
- ITA 128 Topics in Italian Culture  
- ITA 131 Autobiography in Italy  
- ITA 150 Studies in Italian Cinema +  
- ITA 194H Special Study for Honors Students  
- ITA 195H Honors Thesis  

*Choose one:*  
- ITA 107 Survey of Italian Culture and Institutions +  
- ITA 107S Survey of Italian Culture and Institutions +
Contemporary Issues in Italian Culture and Society + 4
ITA 108S Contemporary Issues in Italian Culture and Society + 4

Choose one: 4

Please note: a maximum of four units of coursework in English is allowed for the Italian Minor.

+ Taught in English

**Total: 20**
**Japanese; East Asian Languages & Cultures**

**Japanese; East Asian Languages & Cultures | JPN Information**

(College of Letters & Science)

Department Office. 211 Sproul Hall; 530-752-4999; http://japanese.ucdavis.edu

Faculty. https://ealc.ucdavis.edu/people

**Japanese; East Asian Languages & Cultures | JPN A.B.**

(College of Letters & Science)

Department Office. 211 Sproul Hall; 530-752-4999; http://japanese.ucdavis.edu

Faculty. https://ealc.ucdavis.edu/people

**The Major Program**

The department offers a core language program in Japanese, and courses in literature and culture.

**The Program.** Practical language skills are taught using the most modern methods so that upon entering the upper division a student will have attained substantial fluency in the spoken language (listening and speaking) and the written language (reading and writing). Upper-division courses balance the need to further language skills with the need to understand and appreciate the richness and diversity of Japanese culture. All students are encouraged to combine their study of language and literature with courses in related fields, and to study abroad through the Education Abroad Program, the UC Davis Study Abroad Program or through internships in Japan.

**Career Opportunities.** UC Davis graduates have learned that a major in Japanese is a meaningful, earned distinction that facilitates entrance to graduate programs and professional schools. In addition, job opportunities abound in virtually all career paths, especially for graduates who have completed study abroad.

**Honors Program.** To be eligible to receive high or highest honors in the Japanese major, students must complete a senior thesis project. A student interested in pursuing a senior thesis project must enroll in JPN 194H and complete a scholarly paper or similar research project under the direction of a senate faculty member. The thesis project will have a minimum duration of two quarters and carry a minimum of 6 units of credit. To qualify to undertake the senior thesis project, a student must have completed at least 135 units with a minimum GPA of 3.500 in courses counted toward the major. Interested students should consult with faculty in their field of interest by the quarter before they hope to commence work on the project (in most cases this will be the Spring Quarter of their junior year). Students who complete the senior thesis project and have an overall GPA that qualifies them for honors may be recommended by the faculty for honors, high honors, or highest honors at graduation.

**Education Abroad Program.** The university maintains study abroad programs in Japan. They offer excellent opportunities for students to polish their language skills and experience Asian cultures firsthand. Students are encouraged to participate. Appropriate courses taken abroad can be applied toward the major or the minor. For details, see the department's undergraduate advisor, the Education Abroad Program Office or the UC Davis Study Abroad Office.

**Related Courses.** See East Asian Studies (EAS) course list.

**Prerequisite Credit.** No student may repeat a course if that course is a prerequisite for a course that has already been completed with a grade of C– or better.

**Placement.** JPN 001 is intended for beginning students with no prior knowledge of the Japanese language. Students who do have some knowledge but wish to improve their skills should meet with one of the advisors to discuss appropriate placement. Students must follow departmental guidelines for placement in all language courses and instructor approval is required for enrollment.

**Backtracking.** Satisfactory completion of a language course is evidence that a student’s language skills are beyond the level of those expected in its prerequisite courses. Accordingly, students who have completed a language course cannot go back and take its prerequisites. If the prerequisite courses are required for the major, students may substitute other courses. Students who are not sure how this requirement applies to them should speak to the undergraduate advisor.
**Waived Language Courses.** Students with exceptional language ability may waive required language courses. If lower division courses have been waived, students will not have to take courses in their place. If upper division courses have been waived, students can use other appropriate courses to earn the units they need to complete the major. Consult the undergraduate advisor regarding selection of appropriate courses.

**Grading.** Students may take up to two and no more than two (regular, letter-graded) courses for the major on a P/NP basis. Courses which are only offered on a P/NP basis do not count toward these limits.

### Preparatory Subject Matter

Japanese; East Asian Languages & Cultures | JPN Minor

(College of Letters & Science)

Department Office. 211 Sproul Hall; 530-752-4999; http://japanese.ucdavis.edu

Faculty. https://ealc.ucdavis.edu/people

A minor is offered in Japanese for students wishing to follow a formally recognized program of study in Japanese language and literature. For the minor, students may take one (regular, letter-graded) course on a P/NP basis. Courses which are only offered on a P/NP basis do not count toward these limits.

Japanese

All upper division JPN courses, including both language courses and literature in translation courses, may be used to meet this requirement. One approved lower division course (JPN 010, 025, 050) may also be used. In addition, students must demonstrate their language proficiency, normally through completion of JPN 006. Only four units from 192, 197T, 198, and 199 may be applied to the minor. For details, consult the undergraduate advisor.

Jewish Studies Minor; Jewish Studies

Jewish Studies Minor; Jewish Studies | Jewish Studies Minor
(College of Letters & Science)
David Biale, Ph.D., Program Director

Department Office. 2216 Social Sciences & Humanities Building; 530-752-9241; http://jewishstudies.ucdavis.edu

Faculty, http://jewishstudies.ucdavis.edu/core-faculty.html

The Program in Jewish Studies offers students the opportunity to explore Jewish history, communities, literature, religion, and culture in a comparative perspective and multicultural framework. Courses include Hebrew language instruction as well as the study of classical and modern Jewish texts in translation.

The interdisciplinary minor in Jewish Studies provides an introduction to the study of Jewish culture, thought, history, and literature. Students learn a broad range of methodologies and critical concepts in these areas and gain insight into the relation between Jewish identities, histories, and representations and those of the cultures in which Jews throughout the world have lived.

The Program in Jewish Studies will be of special interest to students in History, Religious Studies, Comparative Literature and Sociology as well as other fields in the Humanities & Social Sciences.

Advising. Jewish Studies Program office; dbiale@ucdavis.edu.

Land, Air, & Water Resources

Land, Air, & Water Resources | Land, Air, & Water Resources Information

(College of Agricultural & Environmental Sciences)

Will Horwath, Chairperson

Department Office. 1110 Plant & Environmental Sciences Building 530-752-1130; http://lawr.ucdavis.edu

Land, Air & Water Resources is a multidisciplinary department with faculty who specialize in atmospheric science, plant science, soils and biogeochemistry, hydrology, and water engineering. Teaching, research, and outreach efforts focus on agricultural and environmental aspects of these disciplines. The faculty also contributes to numerous other undergraduate and graduate programs in the Colleges of Agricultural & Environmental Sciences, Letters & Science, and Engineering.

Major Programs. Undergraduate programs in Atmospheric Science, Hydrology, Environmental Science & Management, and Sustainable Agriculture & Food Systems are centered in the department; see http://lawr.ucdavis.edu/academic_programs.htm.

Undergraduate Advising Center is located in 1150 Plant & Environmental Sciences Building; 530-752-1603.

Courses. See courses listed under Atmospheric Science (ATM), Hydrologic Sciences (HYD), Hydrology (HYD), Environmental Science & Management (ESM), and Soil Science (SSC). See also the websites listed above.

Graduate Study. Graduate programs, offering both M.S. and Ph.D. degrees, in Atmospheric Science, Soils & Biogeochemistry, and Hydrologic Sciences are administered in the department; see http://lawr.ucdavis.edu/academic_programs.htm.

Graduate Advising Center is located in 1152 Plant & Environmental Sciences Building; 530-752-1669.

Landscape Architecture

Landscape Architecture | LDA B.S.

(College of Agricultural & Environmental Sciences)

(Department of Human Ecology; Landscape Architecture & Environmental Sciences)

Department Office. Department of Human Ecology; 131 Hunt Hall; 530-752-3907; http://lda.ucdavis.edu

Faculty. http://humanecology.ucdavis.edu/lda/people/faculty.htm

Landscape architecture is the planning and design of land areas where human use requires adaptation or conservation of the environment. Students who study landscape architecture are concerned about the welfare of the environment and the people who use and shape it. They are capable of solving physical problems and are able to visualize and think in terms of spaces and three-dimensional concepts. The program is fully accredited by the

Total: 20
Landscape Architecture Accreditation Board (LAAB) which is the only organization professionally sanctioned to grant landscape architectural accreditations in the United States. The program was last reviewed in 2018.

The Program. The curriculum balances creativity and visual and spatial skills with technological expertise and a thorough background in physical, natural, and social sciences. Students develop proficiency at problem solving relating to design of parks, public spaces, energy-efficient neighborhoods, land reclamation projects, city and regional planning, and landscape planning for wilderness and scenic regions, coastal and riparian environments, and other sensitive land areas. The program stresses a process-oriented approach to design and emphasizes environmental and community values.

Preparatory Requirements. Students are admitted to the landscape architecture major only after submitting a portfolio for review and selection by the faculty.

Career Alternatives. Graduates may find jobs in private landscape architectural firms or public agencies, non-profit organizations, and corporations employing landscape architects. The landscape architecture major provides the student with excellent preparation for graduate school or career development in a wide range of environmental and design-related fields.

Graduate Study. Graduate-level landscape architecture courses are available to students pursuing graduate programs compatible with or directed toward landscape management, planning, and design issues. A Graduate Academic Certificate in Landscape Architecture & Environmental Design is an option for any graduate student; see https://gradstudies.ucdavis.edu/programs/graduate-academic-certificates. Program faculty are active members of various graduate groups: Community Development, Geography, Transportation Technology & Policy, and Ecology. Faculty members have expertise in many areas, including landscape history, social theory, practice of public space design, historic landscape preservation, city and regional planning, community participation in urban landscape design, landscape ecology, conservation planning, resource management, bioregionalism, and regenerative landscape systems. Graduate students pursue more focused interests, expanding their professional expertise and/or conducting advanced research in landscape architecture correlated disciplines.

Advising Center. See Sharla Cheney, 135 Hunt Hall; 530-754-8628; scheney@ucdavis.edu.

Major Advisor. N. Claire Napawan

Program Office. Hemispheric Institute of the Americas, 1277 Social Sciences & Humanities Building; 530-752-3046; http://hia.ucdavis.edu

Faculty. http://hia.ucdavis.edu/people

The minor in Latin American and Hemispheric Studies offers students the opportunity to explore connections throughout the Western Hemisphere from an array of perspectives across multiple academic fields.

The minor is made up of six courses, arranged in three tiers: Basic (one lower division course on the history of Latin America); Core (two introductory upper division courses chosen from a designated list of fields other than History); and Elective (three additional upper division courses from a designated list of courses that focus primarily on Latin American and/or Hemispheric issues). Students are strongly encouraged to develop proficiency in Spanish or Portuguese, either through course work (such as completion of SPA 024 or 033), or through life experience such as study abroad.

Minor Advisor. hiaugadvisor@ucdavis.edu; 2216 Social Sciences & Humanities Building; 530-752-9241.

The University of California Davis School of Law offers a three-year professional curriculum leading to the degree of Juris Doctor. Within a uniquely supportive atmosphere, law students have access to a comprehensive modern law school curriculum taught by a nationally and internationally distinguished faculty. The School offers a full range of traditional law courses, opportunities for practical experience through clinical programs, and in-depth study of an area of law in an individualized program of classroom work, research, writing, or experience in the community. It further provides professional skills training in interviewing and counseling, negotiation and dispute resolution and trial practice. The School seeks to promote critical evaluation of law and legal institutions in a broad perspective, integrating non-legal disciplines with professional legal education.
UC Davis Law School is fully accredited by the American Bar Association, is a member of the Association of American Law Schools, and has a chapter of the Order of the Coif.

Program of Study

The professional curriculum requires six semesters for completion and extends over a period of three years. It is for full-time students only; no part-time or evening program is offered. New students are admitted only at the beginning of the fall semester.

After satisfactorily completing the professional curriculum of 88 semester units and the required period of resident study, you will receive the degree of Juris Doctor (J.D.). Students who fail to attain satisfactory grades may be required to withdraw from the School at the end of any academic year.

The first year’s work is prescribed and provides the essential foundation for subsequent legal study. Satisfactory completion of the first-year courses is, in all cases, prerequisite to second- and third-year courses. The work of the second and third years is elective.

Combined Degree Programs

Individual students may find a combined degree involving law and another discipline such as economics, business, sociology, or science advantageous. To support this kind of study, the School, in conjunction with other schools and university departments, has established Combined Degree Programs. Under these programs, a student may work toward a J.D. degree and a master’s degree in another discipline at the same time. Students working toward a combined degree are required to spend their first year at the law school.

Normally, a Combined Degree Program will take at least four years. You will usually be able to earn up to 10 semester-hours of law school credit for work in the related discipline and normally can complete the combined degrees in less time than it would take to earn the two degrees separately. The first year of the Combined Degree Program must be taken entirely in the School of Law. During the remaining years, course work may be divided between the law school and the related discipline. You must satisfy the admission requirements for both programs and file applications with both units.

Students have pursued degree programs in combination with UC Davis departments for the M.A. degree in economics, philosophy, computer science, and sociology, and with the School of Management for the M.B.A. degree. The law school will attempt to work out an additional program if you are interested in other disciplines. You may enroll in the Combined Degree Program any time before the beginning of your third year in law school. If you are interested in pursuing a Combined Degree Program, and have made a separate application to another school or department, you should notify the School of Law if that application is accepted.

Law, School of L.L.M.

530-752-6081; Fax 530-752-4704; llm@ucdavis.edu
http://www.law.ucdavis.edu/international/

The Law School LL.M. (Master of Laws) program integrates American and foreign law students at all levels of study. For foreign law graduates, the program provides an opportunity to gain a basic knowledge of the United States legal system. United States law school graduates and selected foreign LL.M. candidates may also seek admission on a thesis rather than a course basis. Other opportunities available to all graduate law students include developing special expertise in a particular area and doing special projects and original research under the direction of a faculty member.

Each LL.M. candidate must successfully complete a minimum of 20 semester units of work, usually 10 units each semester. Foreign LL.M. students must enroll in the 1-unit course Introduction to Legal Research and the 2-unit course U.S. Legal System Seminar. They earn the remainder of their required course credit in regular elective J.D. courses. Each foreign student must also complete an intellectually rigorous legal research and writing project, constituting at least two units of credit.

All LL.M. candidates begin their year of study with a complete orientation in the academic and social life of the law school, the UC Davis campus, and the city of Davis. LL.M. students are encouraged to enroll in the School of Law’s Orientation in U.S.A. Law Program, given during the summer before the fall semester of LL.M. begins.
Linguistics

Linguistics | LIN A.B.
(College of Letters & Science)
Raul Aranovich, Ph.D., Chairperson of the Department

Department Office. 469 Kerr Hall; 530-752-0966; http://linguistics.ucdavis.edu

The Major Program

Linguistics is the systematic study of human language. It focuses on theories of language structure, variation, and use, description of contemporary languages, and the examination of language change through time. Because of the pervasive influence of language in our everyday lives, work in linguistics interacts in important ways with studies carried out in many other fields, including psychology, anthropology, neuroscience, philosophy, computer science, sociology, literature, language teaching, communication and education.

The Program. An introductory lower division course provides students with basic concepts and some of the methods needed to analyze language in a systematic way. Upper division courses probe more deeply into specific aspects of language structure, language use, and the relationship of language to other realms of human activity.

Career Alternatives. Majors in linguistics find practical outlets for their linguistic training in a variety of fields: the computer science industry (software development); teaching English as a second language; foreign language teaching; elementary and secondary level bilingual-bicultural programs; language-oriented missionary work; bilingual-bicultural curriculum development (e.g., for publishing houses); legal work; speech therapy; lexicography (preparation of dictionaries). All of these types of employment share an interest in persons skilled in the analysis of language, spoken and/or written. Linguistics equips students with just such skills.

Grading Recommendation. Though not required, it is recommended that all courses offered in satisfaction of the Linguistics major be taken for a letter grade.

Faculty Advisor. Julia Menard-Warwick

Honors and Honors Program. The honors program consists of six units of 194H credit normally taken in the fall and winter quarters of the senior year. Completion of the program is a prerequisite for High or Highest Honors at graduation. Specific eligibility criteria may be obtained from the major advisor. For general information regarding graduation with honors and Dean’s Honors Lists, please see Academic Information.

Graduate Study. The Linguistics Graduate Group offers study and research leading to the M.A. and Ph.D. degrees. Please see Linguistics (Graduate Group); more detailed information may be obtained from the Graduate Advisor or from the Chairperson of the Linguistics Group.

Graduate Advisor. R. Bayley

(College of Letters & Science)
Raul Aranovich, Ph.D., Chairperson of the Department
Department Office. 469 Kerr Hall; 530-752-0966; http://linguistics.ucdavis.edu

Linguistics offers two minor programs:

- **General Linguistics**, which provides the student with basic knowledge of language structure and linguistic analysis.
- **Linguistics for Language Teachers**, which especially complements the major in English with the Teaching Area of emphasis; it is also of relevance to students interested in teaching foreign languages.

**Minor Advisor.** Julia Menard-Warwick

**Luso-Brazilian Studies Minor; Spanish | Luso-Brazilian Studies Minor**

(College of Letters & Science)

**Department Office.** [https://spanish.ucdavis.edu/minor-luso-brazilian-studies](https://spanish.ucdavis.edu/minor-luso-brazilian-studies)

The Department of Spanish & Portuguese sponsors the minor in Luso-Brazilian Studies, which offers students the opportunity to engage with the Portuguese-speaking world as a global space, as well as gain in-depth knowledge of Brazilian literature, culture, and society. The minor is structured to facilitate engagement with Latin American, peninsular, and transatlantic topics, while ensuring that students master the essential skills of linguistic competence, and literary and cultural knowledge.

**Education Abroad Program Options.** We highly recommend that students participate in study abroad; see [http://studyabroad.ucdavis.edu](http://studyabroad.ucdavis.edu). Courses taken abroad may count toward the Luso-Brazilian Studies minor.

**Minor Advisor.** L. Bernucci, R. Newcomb

Program of Study

The hallmark of the UC Davis MBA program is its flexibility. Students are required to take nine core courses comprising 27 units, and 45 units of elective/capstone coursework for the 72 units required for the degree. The required core curriculum is designed to provide students foundation in the functional areas of business-accounting, economics, finance, marketing, organizational behavior, statistics, and strategy. These management disciplines are examined through the use of case studies, lectures and the analysis of a few select companies on which to base illustrations and spark discussions. As early as the first year of study, students are able to integrate elective courses into their personal curriculum.

Elective courses at the Graduate School of Management place an emphasis on real-world application of management principles through the use of executive guest speakers who present “live” case study analyses and actual “client” businesses for student projects. Many courses require team projects and emphasize managing by innovation and entrepreneurial thinking. These team projects develop your independent research abilities and hone your presentation skills. With a wide variety of electives offered every year, students can build their own MBA curriculum based on their goals.

Most students choose functional concentrations such as:

- Business Analytics and Technologies
- Entrepreneurship
- Finance/Accounting
- Marketing
- Management
- Strategy

Managerial Economics

Managerial Economics | Managerial Economics Information
Managerial Economics | Managerial Economics B.S.

The Major Program

The Managerial Economics major at UC Davis is a disciplinary program combining strong preparation in microeconomic theory and quantitative methods. It prepares students for the analysis of management and policy issues in business, finance, marketing, production, agriculture, food distribution, natural resources, the environment, resource allocation, and international trade & development. Students in the Managerial Economics program develop valuable skills and strengths that lead to careers in business and government. Students specialize in one or more emphases selected from the following:

2. International Business Economics explores the economic drivers and policy challenges in the major emerging markets and focuses on how these markets are impacting the world economy.
3. Environmental and Resource Economics concentrates on issues related to the use of resources and environmental quality.
4. Agribusiness Economics focuses on the economic and policy aspects of production and marketing of foods and fibers.

Major Advisor. Contact Student Services at manecon@primal.ucdavis.edu.

Internships & Career Alternatives. Internships for students in Managerial Economics provide additional career experience, information, and preparation in a variety of business enterprises and governmental agencies. For more information, see http://icc.ucdavis.edu/. Managerial Economics majors have established careers in every area of business and industry, including marketing, analysis, consulting, financial services, accounting, entrepreneurship, real estate and government. Many graduates have entered advanced degree programs in business management, accounting, finance, agricultural and resource economics, economics, public policy, and law.

Study Abroad. The Agricultural & Resource Economics department encourages students to complement their Managerial Economics degree with a study abroad experience. Students must seek pre-approval from a Managerial Economics staff advisor for major-related courses. A total of two upper-division courses (maximum four units each) may be applied to major requirements. However, core courses (ARE 100A, 100B, 106, 155, and ECN 101) are excluded. Students are expected to complete ARE 100A and STA 103 prior to taking upper-division classes abroad for the major.

Domestic Institutions. Upper division coursework taken at other four-year institutions for credit in the major must be reviewed by the Managerial Economics master advisor.

Graduate Study. Students who meet the admission requirements of Graduate Studies and the Department of Agricultural & Resource Economics may pursue studies leading to the M.S. and Ph.D. degrees. For information on admission to graduate study and degree requirements, consult the Graduate Program Coordinator in the Department of Agricultural & Resource Economics; also see http://agecon.ucdavis.edu.

Managerial Economics | Managerial Economics Minor

(College of Agricultural & Environmental Sciences)

Advising Office. 1176 Social Sciences & Humanities Building; 530-754-9536; http://manecon.ucdavis.edu

Faculty. https://are.ucdavis.edu/people/faculty/

Preparation for the minor includes the completion of the following courses with grades of C- (or P) or better:

- ECN 001A or 001AV & 001B
- MAT 016A-016B-016C or 017A-017B or 017A-016B-016C or 021A-021B or 021A-016B-016C
- STA 013 or 013Y & 103

One upper division class to satisfy the minor may be taken for passed/not passed grading. A total of two upper-division courses (maximum four units each) may be taken through UC Study Abroad, all other courses must be taken in residence. Students must seek pre-approval from a Managerial Economics staff advisor for any international courses.

Students must attain a minor GPA of at least a C average (2.000) in courses taken for the minor. All upper-division courses taken toward minor requirements will be calculated as part of the minor GPA, including courses with F grades that have not been repeated.

---

**Marine & Coastal Science**

**Marine & Coastal Science | Marine & Coastal Science B.S.**

(College of Letters & Sciences, College of Agricultural & Environmental Sciences, and College of Biological Sciences)

Michael E. Oskin, Ph.D., Chairperson of the Department

David A. Osleger, Ph.D., Vice-Chairperson, Undergraduate Program

Sujoy Mukhopadhyay, Ph.D., Vice-Chairperson, Graduate Program

**Department Office.** Earth & Planetary Sciences; 2119 Earth & Physical Sciences; 530-752-0350; [http://geology.ucdavis.edu/](http://geology.ucdavis.edu/)

**Faculty.** [http://geology.ucdavis.edu/people/faculty](http://geology.ucdavis.edu/people/faculty)

The major in Marine & Coastal Science focuses on the interdisciplinary nature of marine sciences by exposing students to core, breadth, and focus area courses in the discipline, in addition to a strong foundation of science preparatory material. The major builds upon UC Davis strengths in marine and coastal sciences, including field-based courses offered at Bodega Marine Laboratory to provide students a unique, interdisciplinary, “hands on” education. Advising is provided by the Department of Earth and Planetary Sciences for interested students.

**The Program.** The major begins with introductory courses in mathematics, chemistry, physics, biology, and earth sciences. These are followed by core courses in Marine Science. The major requirements provide focus and breadth, so that each student gains mastery in one area and broad exposure to many facets of Marine & Coastal Science. Focus areas are: (i) Coastal Environmental Processes, (ii) Marine Ecology & Organismal Biology, (iii) Marine Environmental Chemistry, and (iv) Oceans & the Earth System.

In this major, students will be exposed to the foundation disciplines within marine science (biology, chemistry, geology, physics) as well as modern issues facing marine and coastal environments; e.g., climate change, pollution,
carbon cycling, conservation. The major requires field experience, independent research or internship, and concludes with a capstone course featuring current research in marine science. These integrative experiences will require students to synthesize the interdisciplinary topics that they have encountered through this degree program. The mastery achieved provides a strong foundation for future careers in academic science, government, policy, and the private sector. For more information, see http://marinescience.ucdavis.edu/programs/mcsci/index.html.

**Internships & Career Alternatives.** A B.S. in Marine & Coastal Science will provide students with knowledge and practical experience needed to pursue careers in marine science (government, private sector, research) and/or advanced degree programs. The major program includes both research and internship experiences to help prepare students for these career paths. For more information, see https://geology.ucdavis.edu/students/undergrad/mcsci/internships.

**Advising.** Students majoring in Marine & Coastal Science are strongly encouraged to meet with their faculty advisor (assigned, based upon Focus Area choice) once per year to review their coursework plans. Staff advising is available through the Department of Earth & Planetary Sciences, and student peer advisors are available. Faculty advisors include: Tessa Hill (College of Letters & Science), Anne Todgham and John Largier (College of Agricultural & Environmental Sciences), and Brian Gaylord (College of Biological Sciences). For more information, see https://geology.ucdavis.edu/students/undergrad/advising.

The student's chosen Focus Area will determine the college into which the student is admitted, the college where the degree is awarded, and the associated department:

- **Coastal Environmental Processes.** College of Agricultural & Environmental Sciences; Environmental Science & Policy
- **Marine Ecology & Organismal Biology.** College of Biological Sciences; Evolution & Ecology
- **Marine Environmental Chemistry.** College of Agricultural & Environmental Sciences; Environmental Toxicology
- **Oceans & the Earth System.** College of Letters & Science; Earth & Planetary Sciences

Courses cannot be utilized to fulfill multiple requirements, with the exception that any Bodega Marine Laboratory course simultaneously fulfills the field requirement below.
Focus Area Requirement

Complete at least four courses from one category below, totaling at least 12 units.

**Coastal Environmental Processes; College of Agricultural & Environmental Sciences; Environmental Science & Policy**

Emphasis on processes and environments of the coastal zone, and the strong physical-biological connection that exists here. Courses highlight the critical terrestrial-marine interface and fundamental physical processes in the coastal zone.

*This focus area requirement can be fulfilled using:*

- ATM 121A Atmospheric Dynamics $^+$ 4
- ATM 121B Atmospheric Dynamics $^+$ 4
- ATM 158 Boundary-Layer Meteorology 4
- ETX 102A Environmental Fate of Toxicants $^+$ 4
- ESP 152 Coastal Oceanography $^+$ 3
- ESP 155 Wetland Ecology 4
- ESP 155L Wetland Ecology Laboratory 3
- ESP 166 Ocean and Coastal Policy 3
- GEL 156 Hydrogeology and Contaminant Transport $^+$ 5
- GEL 182 Field Studies in Marine Geochemistry 2-8
- HYD 103N Fluid Mechanics Fundamentals 4
- HYD 134 Aqueous Geochemistry 6
- HYD 143 Ecohydrology $^+$ 4
- HYD 144 Groundwater Hydrology $^+$ 4
- WFC 157 Coastal Ecosystems $^+$ 4

**Marine Ecology & Organismal Biology; College of Biological Sciences; Evolution & Ecology**

Focus on physiological adaptations to the marine environment, and the biology of marine species from the molecular to population levels. Courses include emphasis on the ecological processes that determine the distribution and abundance of marine organisms, and the patterns and mechanisms of evolution in the ocean.

*The focus area requirement can be fulfilled using:*

- ANS 131 Reproduction and Early Development in Aquatic Animals $^~$ 4
- BIS 122 Population Biology and Ecology $^+$ 3
- BIS 122P Population Biology and Ecology/Advanced Laboratory Topics $^+$ 5
- BIS 124 Coastal Marine Research 6
- ESP 100 General Ecology 4
- ESP 121 Population Ecology 4
- ESP 124 Marine and Coastal Field Ecology $^+$ 3
- ESP 155 Wetland Ecology $^~$ 4
- ESP 155L Wetland Ecology Laboratory 3
- EVE 100 Introduction to Evolution 4
- EVE 101 Introduction to Ecology 4
- EVE 106 Mechanical Design in Organisms $^~^+$ 3
- EVE 112 Biology of Invertebrates 3
- EVE 112L Biology of Invertebrates Laboratory 2
- EVE 114 Experimental Invertebrate Biology $^~^+$ 3
EVE 115  Marine Ecology  4
EVE 120  Global Change Ecology  3
ETX 127  Environmental Stress and Development in Marine Organisms  10

NPB 141  Physiological Adaptation of Marine Organisms  3
NPB 141P  Physiological Adaptation of Marine Organisms/Advanced Laboratory Topics  5

WFC 120  Biology and Conservation of Fishes  3
WFC 120L  Laboratory in Biology and Conservation of Fishes  2
WFC 121  Physiology of Fishes  4
WFC 122  Population Dynamics and Estimation  4
WFC 130  Physiological Ecology of Wildlife  4

Marine Environmental Chemistry; College of Agricultural & Environmental Sciences; Environmental Toxicology
Emphasis on major themes in marine chemistry, geochemistry, the carbon cycle, and contaminant fate and transport.
The focus area requirement can be fulfilled using:

CHE 100  Environmental Water Chemistry  3
ETX 101  Principles of Environmental Toxicology  4
ETX 102A  Environmental Fate of Toxicants  4
ETX 120  Perspectives in Aquatic Toxicology  4
ETX 127  Environmental Stress and Development in Marine Organisms  10

ECI 140A  Environmental Analysis of Aqueous Systems  4
GEL 148  Stable Isotopes and Geochemical Tracers  3
GEL 182  Field Studies in Marine Geochemistry  2-8
HYD 134  Aqueous Geochemistry  6
HYD 141  Physical Hydrology  4
WFC 153  Wildlife Ecotoxicology  4

Oceans & the Earth System; College of Letters & Science; Earth & Planetary Sciences
A study of our changing oceans in the context of earth system history, including climate change, paleoceanography, ecological shifts, conservation, and marine policy.
The focus area requirement can be fulfilled using:

ATM 116  Modern Climate Change  3
ESM 120  Global Environmental Interactions  4
ESM 121  Water Science and Management  3
ESP 110  Principles of Environmental Science  4
ESP 161  Environmental Law  4
ESP 162  Environmental Policy  4
ESP 166  Ocean and Coastal Policy  3
ESP 169  Water Policy and Politics  3
EVE 120  Global Change Ecology  3
GEL 107  Earth History: Paleobiology  3
GEL 107L  Earth History: Paleobiology Laboratory  2
GEL 108  Earth History: Paleoclimates  3
GEL 109  Earth History: Sediments and Strata  3
GEL 109L  Earth History: Sediments and Strata Laboratory  2
GEL 144  Historical Ecology  3
SAS 120  Science and Contemporary Societal Issues  3
Some courses may require additional prerequisites, such as: ATM 120, MAT 021D, CHE 008B, ESP 100, HYD 103N, 141, 145, ECI 144.

† Only offered at Bodega Marine Laboratory.

~ Some of these courses may require additional prerequisites, such as: ESP 100, EVE 112, WFC 120, ETX 101

~† Some of these courses may require additional prerequisites, such as: ESP 100, EVE 112, WFC 120, ETX 101. Only offered at Bodega Marine Laboratory.

# Some courses may require additional prerequisites, such as: CHE 008B, GEL 050, 060, HYD 145, ECI 144.

#† Some courses may require additional prerequisites, such as: CHE 008B, GEL 050, 060, HYD 145, ECI 144. Only offered at Bodega Marine Laboratory.

@ Some courses may require additional prerequisites, such as: ATM 060, CHE 008A, 008B, GEL 001, ECN 00 1A, HYD 145, ERS 100, IRE 001.

**Breadth Requirement**

Complete one course from each category below, that is not the student's chosen Focus Area, totaling at least eight units.

**Coastal Environmental Processes; the breadth requirement can be fulfilled using the following courses:**

Oceans & the Earth System; the breadth requirement can be fulfilled using the following courses:

ATM 116 Modern Climate Change = 3
ESP 166 Ocean and Coastal Policy 3
EVE 120 Global Change Ecology = 3
GEL 107 Earth History: Paleobiology 3
GEL 108 Earth History: Paleoclimates 3
WFC 144 Marine Conservation Science 4
WFC 154 Conservation Biology 4

† Only offered at Bodega Marine Laboratory.
= Some courses may require additional prerequisites; see above.
=† Some courses may require additional prerequisites; see above. Only offered at Bodega Marine Laboratory.

Field Requirement
Units: 0-14

The Field Requirement provides exposure to field techniques, experimental design, and the marine environment itself. It is highly recommended that students fulfill this requirement by residence at Bodega Marine Laboratory for one or more courses; see courses denoted with †. Bodega Marine Laboratory courses may simultaneously fulfill an additional requirement in categories above.

Alternatively, students may fulfill the Field Requirement by taking two of the following courses; these courses cannot fulfill multiple requirements:

GEL 109L Earth History: Sediments and Strata Laboratory 2
EVE 112L Biology of Invertebrates Laboratory 2
EVE 115 Marine Ecology 4
ESP 123 Introduction to Field and Laboratory Methods in Ecology 4
ESP 151L Limnology Laboratory 3
GEL 182 Field Studies in Marine Geochemistry 2-8
WFC 100 Field Methods in Wildlife, Fish, & Conservation Biology 4
WFC 102L Field Studies in Fish Biology: Laboratory 6
WFC 157 Coastal Ecosystems 4

Internship/Research
Units: 3

BIS 124 Coastal Marine Research 6
GEL 192 Internship in Geology 1-12
GEL 199 Special Study for Advanced Undergraduates 1-5
ESP 192 Internship 1-12
ETX 127 Environmental Stress and Development in Marine Organisms 10
EVE 192 Internship 1-12
EVE 199 Special Study for Advanced Undergraduates 1-5

The equivalent.

Total Units for the Major by chosen Focus Area
Units: 96-143

Oceans & the Earth System (Letters & Science) 96-118

Mission Statement

The Betty Irene Moore School of Nursing at UC Davis cultivates academic excellence through immersive, interprofessional and interdisciplinary education and research in partnership with the communities serves. Faculty, staff, and students discover and disseminate knowledge to advance health, improve quality of care and shape policy.

Nursing Science and Health-Care Leadership Graduate Degree Program

Hosted by the Betty Irene Moore School of Nursing at UC Davis, the Nursing Science and Health-Care Leadership Graduate Degree Programs prepare nurse leaders, physician assistants, nurse practitioners, researchers and faculty in a unique interdisciplinary and interprofessional environment. The full-time, academic, doctoral program prepares graduates as leaders in health care, health policy and nurse faculty/researchers at the university level. The master's degree Physician Assistant Studies program prepares graduates to deliver care as physician assistants. Graduates of the professional master's degree leadership program are prepared for health-care leadership roles in a variety of organizations and as nurse faculty at the community college and prelicensure education levels. Graduates of the master's degree Nurse Practitioner Program are prepared to deliver care as nurse practitioners.

Faculty

The UC Davis Nursing Science and Health-Care Leadership Graduate Group includes a wide cross-section of academic disciplines with faculty from the Betty Irene Moore School of Nursing as well as UC Davis Health System and other UC Davis schools, colleges, and departments. Within the graduate group faculty are experts in nursing, medicine, health informatics, nutrition, biostatistics, public health and other fields.

The Department of Materials Science & Engineering offers one undergraduate program in Materials Science & Engineering and a minor in Materials Science.

Mission Statement. The mission of the Department of Materials Science & Engineering is to provide the highest quality of education and prepare a diverse group of students for successful careers by building a strong base of technical knowledge and professional ethics while advancing the frontiers of materials science and engineering through teaching, research, and outreach.

Honors Program. An Honors Program is available to qualified students in Materials Science & Engineering. It is a two-year program designed to challenge the most talented students in the major. Students invited to participate will complete either an honors thesis or a project that might involve local industry. Students must maintain a grade point average of 3.500 to continue in the program. Successful completion of the Honors Program will be acknowledged on the student's transcript.

Materials Science & Engineering Undergraduate Program

The Materials Science & Engineering program is accredited by the Engineering Accreditation Commission of ABET; see http://www.abet.org.

Materials science and engineering is directed toward an understanding of the structure, properties, and processing of materials. Society demands new and improved materials with capabilities far superior to common metals, polymers, and ceramics. New materials are needed for high-speed transportation systems, surgical and dental implants, new generations of power plants, renewable energy sources, and solid-state electronic and photonics devices in computer and communication technology. Both the development of new materials and the understanding of present-day materials demand a thorough knowledge of basic engineering and scientific principles, including crystal structure, elastic and plastic behavior, thermodynamics, phase equilibria and reaction rates, and structural and physical and chemical behavior of engineering materials.

Materials engineers study phenomena found in many different engineering operations, from fracture behavior in automobiles to fatigue behavior in aircraft frames, from corrosion behavior in petro-chemical refineries to radiation-induced damage in nuclear power plants, and from the fabrication of steel to the design of semiconductors. Materials engineers are also increasingly involved in developing the new materials needed to attain higher efficiencies in existing and proposed energy conversion schemes and will play a central role in the development of new technologies based on composites and high-temperature superconductivity.
The undergraduate materials science and engineering program provides the background for activities in research, processing, and the design of materials. The curriculum is based on a common core of courses basic to engineering; courses taken during your first two years provide a strong foundation in fundamental engineering concepts.

**Objectives.** We educate students in the fundamentals of materials science and engineering, balanced with the application of these principles to practical problems; educate students as independent, critical thinkers who can also function effectively in a team; educate students with a sense of community, ethical responsibility, and professionalism; educate students for careers in industry, government, and academia; teach students the necessity for continuing education and self-learning; and foster proficiency in written and oral communications.

Students are encouraged to adhere carefully to all prerequisite requirements. The instructor is authorized to drop students from a course for which stated prerequisites have not been completed.

Exclusive of General Education units, the minimum number of units required for the Materials Science & Engineering major is 157.

Graduate Programs in the Department of Materials Science & Engineering

The Department of Materials Science & Engineering is home to a top-ranked graduate program in Materials Science & Engineering. We offer a unique interdisciplinary environment for graduate studies, with renowned faculty and state-of-the-art research facilities.

The Master of Engineering Degree in Materials Science & Engineering

The one-year Master of Engineering (M.Eng) degree is the most flexible graduate degree we offer. With a wide variety of elective courses to choose from, students can mold the degree to fit their unique interests and goals, whether they include training in additional engineering, computer science, or management courses. Students must complete a capstone project in their last quarter of study relating the coursework they have taken to the projects in their major professor’s lab. This report may consist of experimental, theoretical, or computational work, and should be directed towards the solution of a specific scientific or engineering problem.

Students with a background in any science or engineering-related field are encouraged to apply. Minimum qualifications for the degree include a year of physics, chemistry, and engineering-level math, including linear algebra and differential equations. No prior research experience is required, though demonstration of success in some undergraduate core coursework in materials science and engineering with strengthen the application.

The M.Eng degree can be completed at full-time or part-time status and is open to both recent graduates and those currently in the workforce. The majority of our M. Eng. graduates find jobs in industry.

**Graduate Programs in the Department of Materials Science & Engineering**

The Department of Materials Science & Engineering is home to a top-ranked graduate program in Materials Science & Engineering. We offer a unique interdisciplinary environment for graduate studies, with renowned faculty and state-of-the-art research facilities.

**The Master of Science Degree in Materials Science & Engineering**

The Master of Science (M.S.) degree is aimed at preparing students for careers in research and development, or for further study in the field. Like the doctoral degree, the M.S. degree combines coursework and research, but with a more limited scope of the research project and thesis to reflect the shorter time-to-degree. After graduation, the majority of our M.S. degree graduates find jobs in industry.

Students in this degree track must complete a master’s thesis consisting of a scholarly piece of computational, experimental, or theoretical research that is rigorous in terms of design, methodology, and analysis. When students have completed the majority of their coursework, they should advance to candidacy. When advancing to candidacy, students should prepare an outline of their thesis, which should include a critical evaluation of the methods and limitations of the research project and a full description of the experimental design, protocols, and data analysis.

**Materials Science & Engineering; Engineering | EMS Ph.D.**

(College of Engineering)
Graduate Programs in the Department of Materials Science & Engineering

The Department of Materials Science & Engineering is home to a top-ranked graduate program in Materials Science & Engineering. We offer a unique interdisciplinary environment for graduate studies, with renowned faculty and state-of-the-art research facilities.

The Doctoral (Ph.D.) Degree in Materials Science & Engineering

The doctoral degree in Materials Science & Engineering prepares students to solve complex, long-term research problems. Students can expect to graduate in four to five years and to work on a large research project, culminating in a dissertation. The majority of our doctoral graduates end up in industry careers, usually in research and product development positions. Others go on to careers in academia, either as a postdoctoral researcher or an assistant professor. Students enrolled in the doctoral degree have the option to complete a designated emphasis in biophotonics and bioimaging, biotechnology, and/or nuclear science.

Doctoral students complete two examinations en route to their degrees, the preliminary exam and the qualifying examination, in addition to coursework and a dissertation.

Materials Science & Engineering; Engineering | EMS Minor

(College of Engineering)

Jeffery Gibeling, Ph.D., Chairperson of the Department 530-752-6496; Fax 530-752-1031

Department Office. 3001 Ghausi Hall; 530-752-0400; Fax 530-752-1031; http://mse.engineering.ucdavis.edu

Faculty. https://mse.engineering.ucdavis.edu/people/faculty/

Materials Science Minor

There is a constant need for professionals with more knowledge and experience in understanding the behavior of materials from which products such as electronics, sensors, biological implants, transportation vehicles, medical devices and infrastructure are made. The goal of this minor is to prepare students for careers that require training in materials science, including the fundamentals of thermodynamics and kinetics and their effects on phase composition and structure, as well as the complex relationships between composition, structure, processing and behavior/performance. Topics covered include material thermodynamics and kinetics, materials structural analysis, and structure-property relationships for electronic, optical, magnetic and mechanical behavior. The minor is expected to accommodate persons of diverse backgrounds, such as those majoring in engineering, physical sciences, biological sciences, and mathematics.

All courses must be taken for a letter grade. A grade of C- or better is required for all courses used to satisfy minor requirements, with an overall GPA in minor requirement courses of 2.000 or better.

Minor Advisor. S. Gentry (Department of Materials Science & Engineering)

**Maternal & Child Nutrition; Nutrition**

**Maternal & Child Nutrition; Nutrition | Maternal & Child Nutrition M.A.S.**

(Department of Nutrition)
Francene M. Steinberg, Ph.D., Chairperson of the Department

**Department Office.** 3135 Meyer Hall; 530-752-4630; https://extension.ucdavis.edu/maternal-and-child-nutrition

**Faculty.** https://extension.ucdavis.edu/maternal-and-child-nutrition

**Graduate Study.** The Nutrition Department offers the degree of M.A.S. in Maternal & Child Nutrition. This program consists of three required six-unit core courses (Nutrition During Pregnancy, Lactation & Infant Nutrition, and Child & Adolescent Nutrition), six to eight units of special topics seminars, two units of electives, and a six-unit student project (produced in consultation with a three-member guidance committee) for a total of 36 units. Each of the core courses will comprise 10 weeks of in-class instruction twice per week for two-and-a-half hours per meeting. Classes will also include online discussion of related material and readings.

Each student will be assigned a three-member guidance committee consisting of two members of the teaching faculty and an additional qualified faculty member to advise the student in identifying a student project.

**Preparation.** Admission to the program requires a bachelor's degree with prior course work that includes (or is comparable to): one year of general chemistry, two quarters of organic chemistry, a course in statistics, one course in general physiology, and two quarters of the biochemistry of nutrition.

**Courses in Maternal & Child Nutrition.** See courses under Nutrition.

**Graduate Advisors.** Reina Engle-Stone, Ph.D., Asst. Professor (Nutrition), Jane Heinig, Ph.D., Academic Administrator (Nutrition)

Abigail Thompson, Ph.D., Chairperson
The Major Programs

Mathematics is the study of abstract structures, space, change, and the interrelations of these concepts. It also is the language of the exact sciences.

The Program. After completing basic introductory courses such as calculus and linear algebra, students plan an upper division program in consultation with a faculty advisor. Upper division courses include real analysis, probability, modern algebra, as well as a variety of other courses that allow students to further mathematical knowledge and skills that feature their research or career interests. This individualized program can lead to graduate study in pure or applied mathematics, elementary or secondary level teaching, or to other professional goals. It can also reflect a special interest such as computational and applied mathematics, computer science, or statistics, or may be combined with a major in some other field.

Career Alternatives. A degree in mathematics provides entry to many careers in industry in addition to teaching. For instance, operations research, data analysis, systems analysis, computing, actuarial work, insurance, and financial services are only a few such careers. Mathematics is also a sound basis for graduate work in a variety of fields, such as law, engineering, and economics.

Recommended Language Preparation. Bachelor of Science degree candidates are advised, but not required, to satisfy the same language requirement as that for a Bachelor of Arts degree candidate, and to fulfill it in French, German, or Russian.

Major Advisors. For a current list of faculty and staff advisors, see https://www.math.ucdavis.edu/undergrad/advising/advisers/ or contact the Student Services office at studentservices@math.ucdavis.edu.

Mathematics Placement Requirement. Students who wish to enroll in MAT 012, 016A, 017A, 021A, 021AH, and 021M must satisfy the mathematics placement requirement by taking an online exam. Students who do not satisfy the requirement will be administratively dropped from these courses. For more information, including preparation tips and how to access the online exam, please see the Department of Mathematics’ website, at http://www.math.ucdavis.edu/undergrad/math_placement, well in advance of enrolling.

Department Honors. Students who meet the minimum GPA requirement for honors at graduation for the College of Letters & Science and who complete a senior project as part of MAT 194 or 199 units in consultation with their faculty advisor may also be recommended by the department for graduation with High Honors or Highest Honors. Recommendations will be based on evaluations of students' academic achievements in their major and the quality of their senior project. For complete details, see our website at https://www.math.ucdavis.edu/undergrad/honors/.

Graduate Study. The Department offers programs of study and research leading to the M.A. and Ph.D. degrees in Mathematics. Information regarding graduate study may be obtained by consulting our website, and by sending an email to studentservices@math.ucdavis.edu.

(College of Letters & Science)

Program Office. 1207 Social Science & Humanities

The Program of Study

Mathematical & Physical Sciences teach students to use experimental studies and theoretical analyses to find solutions to real world problems. Students learn to address issues such as cleaning up the environment, preserving natural resources and creating innovative materials for the future. From the study of atoms to the examination of distant galaxies, from abstract number theory to the development of new chemical compounds, these disciplines provide students with the skills to build the world of tomorrow.

The Major Programs

Mathematics is the study of abstract structures, space, change, and the interrelations of these concepts. It also is the language of the exact sciences.

The Program. Students majoring in mathematics may follow a program leading to either the Bachelor of Arts or the Bachelor of Science degree. After completing basic introductory courses such as calculus and linear algebra, students plan an upper division program in consultation with a faculty advisor. Upper division courses include real analysis, probability, modern algebra, as well as a variety of other courses that allow students to further mathematical knowledge and skills that feature their research or career interests. This individualized program can lead to graduate study in pure or applied mathematics, elementary or secondary level teaching, or to other
professional goals. It can also reflect a special interest such as computational and applied mathematics, computer science, or statistics, or may be combined with a major in some other field.

**Career Alternatives.** A degree in mathematics provides entry to many careers in industry in addition to teaching. For instance, operations research, data analysis, systems analysis, computing, actuarial work, insurance, and financial services are only a few such careers. Mathematics is also a sound basis for graduate work in a variety of fields, such as law, engineering, and economics.

**Recommended Language Preparation.** Bachelor of Arts degree candidates are encouraged to consider taking French, German, or Russian to satisfy the language requirement.

**Major Advisors.** For a current list of faculty and staff advisors; see https://www.math.ucdavis.edu/undergrad/advising/advisers/ or contact the Student Services office at studentservices@math.ucdavis.edu.

**Mathematics Placement Requirement.** Students who wish to enroll in MAT 012, 016A, 017A, 021A, 021AH, and 021M must satisfy the mathematics placement requirement by taking an online exam. Students who do not satisfy the requirement will be administratively dropped from these courses. For more information, including preparation tips and how to access the online exam, please see the Department of Mathematics’ website, at http://www.math.ucdavis.edu/undergrad/math_placement, well in advance of enrolling.

**Department Honors.** Students who meet the minimum GPA requirement for honors at graduation for the College of Letters & Science and who complete a senior project as part of MAT 194 or 199 units in consultation with their faculty advisor may also be recommended by the department for graduation with High Honors or Highest Honors. Recommendations will be based on evaluations of students’ academic achievements in their major and the quality of their senior project. For complete details, see our website at http://www.math.ucdavis.edu.

**Teaching Credential Subject Representative.** Dr. Ali Dad-del

**Graduate Study.** The Department offers programs of study and research leading to the M.A. and Ph.D. degrees in Mathematics. Information regarding graduate study may be obtained by consulting our website, and by sending an email to studentservices@math.ucdavis.edu.

### Preparatory Subject Matter

**Units:** 39-45

- **Calculus**
  - MAT 021A: Calculus (4 units)
  - MAT 021B: Calculus (4 units)
  - MAT 021C: Calculus (4 units)
  - MAT 021D: Vector Analysis (4 units)

- **Linear Algebra & Proof-Writing; choose one option:**
  - **(a)**
    - MAT 022A: Linear Algebra (3 units)
    - MAT 108: Introduction to Abstract Mathematics (4 units)
  - **(b)**
    - MAT 027A: Linear Algebra with Applications to Biology (4 units)
    - MAT 108: Introduction to Abstract Mathematics (4 units)
  - **(c)**
    - MAT 067: Modern Linear Algebra (4 units)

- **NOTE:** Basic knowledge of MATLAB is required for both MAT 022A and MAT 067. Students can learn it on their own, enroll in ENG 006, EME 005, or in the one unit course MAT 022AL (can be taken concurrently).

- **MATLAB; choose one:**
  - MAT 022AL: Linear Algebra Computer Laboratory (1 unit)

- **Differential Equations; choose one:**
  - MAT 022B: Differential Equations (3 units)
  - MAT 027B: Differential Equations with Applications to Biology (4 units)

- **Programming; choose one:**
  - ECS 032A: Introduction to Programming (4 units)
Additional non-Mathematics courses chosen from the L&S Natural Sciences & Mathematics List.

**Depth Subject Matter**

**Plans; choose one:**

**Plan 1: General Mathematics:**

A. Core Courses

**NOTE:** Students who wish to satisfy the single subject matter waiver for the teaching credential should see an advisor as early as possible.

**Total:** 78-85

Mathematics | MAT B.S.
(College of Letters & Science)
Abigail Thompson, Ph.D., Chairperson

**Department Office.** 1130 Mathematical Sciences Bldg.; 530-752-0827; studentservices@math.ucdavis.edu; http://www.math.ucdavis.edu

**Faculty.** https://www.math.ucdavis.edu/people/faculty/

**The Major Programs**

Mathematics is the study of abstract structures, space, change, and the interrelations of these concepts. It also is the language of the exact sciences.

**The Program.** Students majoring in mathematics may follow a program leading to either the Bachelor of Arts or the Bachelor of Science degree. After completing basic introductory courses such as calculus and linear algebra, students plan an upper division program in consultation with a faculty advisor. Upper division courses include real analysis, probability, modern algebra, as well as a variety of other courses that allow students to further mathematical knowledge and skills that feature their research or career interests. This individualized program can lead to graduate study in pure or applied mathematics, elementary or secondary level teaching, or to other professional goals. It can also reflect a special interest such as computational and applied mathematics, computer science, or statistics, or may be combined with a major in some other field.

**Career Alternatives.** A degree in mathematics provides entry to many careers in industry in addition to teaching. For instance, operations research, data analysis, systems analysis, computing, actuarial work, insurance, and financial services are only a few such careers. Mathematics is also a sound basis for graduate work in a variety of fields, such as law, engineering, and economics.

**Recommended Language Preparation.** Bachelor of Science degree candidates are advised, but not required, to satisfy the same language requirement as that for a Bachelor of Arts degree candidate, and to fulfill it in French, German, or Russian.

**Major Advisors.** For a current list of faculty and staff advisors, see https://www.math.ucdavis.edu/undergrad/advising/advisers/ or contact the Student Services office at studentservices@math.ucdavis.edu.

**Mathematics Placement Requirement.** Students who wish to enroll in MAT 012, 016A, 017A, 021A, 021AH, and 021M must satisfy the mathematics placement requirement by taking an online exam. Students who do not satisfy the requirement will be administratively dropped from these courses. For more information, including preparation tips and how to access the online exam, please see the Department of Mathematics’ website, at http://www.math.ucdavis.edu/undergrad/math_placement, well in advance of enrolling.
**Department Honors.** Students who meet the minimum GPA requirement for honors at graduation for the College of Letters & Science and who complete a senior project as part of MAT 194 or 199 units in consultation with their faculty advisor may also be recommended by the department for graduation with High Honors or Highest Honors. Recommendations will be based on evaluations of students' academic achievements in their major and the quality of their senior project. For complete details, see our website at [https://www.math.ucdavis.edu/undergrad/honors/](https://www.math.ucdavis.edu/undergrad/honors/).

**Teaching Credential Subject Representative.** Dr. Ali Dad-del

**Graduate Study.** The Department offers programs of study and research leading to the M.A. and Ph.D. degrees in Mathematics. Information regarding graduate study may be obtained by consulting our website, and by sending an email to studentservices@math.ucdavis.edu.

### Preparatory Subject Matter

**Units:** 31-38

#### Calculus
- MAT 021A: Calculus 4
- MAT 021B: Calculus 4
- MAT 021C: Calculus 4
- MAT 021D: Vector Analysis 4

#### Linear Algebra & Proof-Writing; choose one option: 4-8

**(a)**
- MAT 022A: Linear Algebra 3
- MAT 108: Introduction to Abstract Mathematics 4

**(b)**
- MAT 027A: Linear Algebra with Applications to Biology 4
- MAT 108: Introduction to Abstract Mathematics 4

**(c)**
- MAT 067: Modern Linear Algebra 4

**NOTE:** Basic knowledge of MATLAB is required for both MAT 022A and MAT 067. Students can learn it on their own, enroll in ENG 006, EME 005, or in the one unit course MAT 022AL (can be taken concurrently).

**MATLAB; choose one:** 0-1
- MAT 022AL: Linear Algebra Computer Laboratory 1

**Equivalent MATLAB knowledge.**

#### Differential Equations; choose one: 3-4
- MAT 022B: Differential Equations 3
- MAT 027B: Differential Equations with Applications to Biology 4

#### Plans; choose one: 4-5

**Plan I: General Mathematics**
- PHY 009A: Classical Physics 5

**Plan II: Mathematics for Secondary Teaching; choose one:** 4-5
- PHY 007A: General Physics 4
- PHY 009A: Classical Physics 5
- STA 013: Elementary Statistics 4
- STA 032: Gateway to Statistical Data Science 4
- STA 100: Applied Statistics for Biological Sciences 4

**Programming; choose one:** 4
- ECS 032A: Introduction to Programming 4
- ENG 006: Engineering Problem Solving 4

### Depth Subject Matter

**Units:** 51-52

**Plans; choose one:**

**Plan 1: General Mathematics**

**A. Core Courses**
- MAT 127A: Real Analysis 4

**Plan 1:** 51-52
MAT 127B  Real Analysis  4
MAT 127C  Real Analysis  4
MAT 135A  Probability  4
MAT 150A  Modern Algebra  4
MAT 150B  Modern Algebra  4
MAT 150C  Modern Algebra  4
MAT 185A  Complex Analysis  4

B. Enrichment Courses; choose four:  16
MAT 111-185B; excluding MAT 180, core courses, and courses being used as
a capstone; up to four of these 16 units may be approved upper division
courses outside of the Department of Mathematics with extensive use of
mathematics.
MAT 111  History of Mathematics  4

The Minor Program

Mathematics is the study of abstract structures, space, change, and the interrelations of these concepts. It also is the language of the exact sciences.

Minor Advisor. For a current list of faculty and staff advisor, contact the Student Services office at studentservices@math.ucdavis.edu, or see https://www.math.ucdavis.edu/undergrad/advising/adviser/.

Mathematics | Units: 20

Choose upper division units in Mathematics; exclusive of MAT 192, MAT 197TC, MAT 198, MAT 199.

- MAT 107 Probability and Stochastic Processes with Applications to Biology 4
- MAT 108 Introduction to Abstract Mathematics 4
- MAT 111 History of Mathematics 4
- MAT 114 Convex Geometry 4
- MAT 115A Number Theory 4
- MAT 115B Number Theory 4
- MAT 116 Differential Geometry 4

**Mechanical & Aerospace Engineering; Engineering | MAE M.S.**

(College of Engineering)

Stephen K. Robinson, Ph.D., Chairperson of the Department

**Department Office.** 2132 Bainer Hall; 530-752-0580; Fax 530-752-4158; [http://mae.ucdavis.edu](http://mae.ucdavis.edu)

**Faculty.** [http://mae.ucdavis.edu/people/faculty/](http://mae.ucdavis.edu)
The defining element of graduate study in the Mechanical & Aerospace Engineering Program is interdisciplinary design. Research within this graduate program advances design in diverse fields such as vehicles, plasma MHD propulsion, biomechanics, aerostructures, sensors, combustion, and energy systems. Graduate students acquire skills both to address fundamental issues in these areas and to design complex, multi-component systems. The highly collaborative environment fosters multidisciplinary research while drawing on the study of mathematics, experimental and space plasma science, electrical engineering, materials science, materials modeling, molecular dynamics and numerical analysis, bioengineering, space physics, and nanotechnology in addition to the core areas. Recruiters from industry are active here, knowing that, in addition to having hands-on design experience, our students are well grounded in engineering fundamentals. They study with professors who “wrote the book” on their discipline, and work on design projects with researchers who are international authorities in their field. Our graduate students are able to work closely with faculty in a friendly but demanding environment where teamwork and faculty mentoring are important, as is the cross-disciplinary, collaborative culture that is unique to UC Davis.

Research Highlights:

- Aeronautics & Aerostructures
- Spacecraft Design & Operation
- Space Environmental Studies
- Remote Sensing
- Electrical Propulsion
- Flight Dynamics & Control
- Computational Fluid Dynamics
- Experimental MHD Turbulence Studies
- Dynamic Systems & Controls
- Robotics
- Materials Modeling
- Manufacturing & Mechanical Design
- Reacting Flows
- Heat Transfer
- Automotive System Dynamics
- Biosensors/Microelectromechanical Systems (MEMS)
- Molecular Self-Assembly
- Radiation Effects In Solids
- Nonlinear Dynamics & Phase-Locking
- Biofluid Mechanics
- Biosolid Mechanics
- Sports Biomechanics
- Energy Systems/Fuel Cell/Hybrid Vehicle Technology
- High Energy Density Science & Applications
- Nuclear Fusion Energy
- Wind Energy

Research Facilities & Partnerships:

- Center for Computational Fluid Dynamics
- Institute of Transportation Studies
- Center for Advanced Highway Maintenance & Construction Technology
- GATE Center for Hybrid Electric Vehicles
- Aeronautical Wind Tunnel Facility

Complete Information on our website at http://mae.ucdavis.edu/graduate/.

Mechanical Engineering; Engineering

Mechanical Engineering; Engineering | EME B.S.

(College of Engineering)

Stephen K. Robinson, Ph.D., Chairperson of the Department

Benjamin D. Shaw, Ph.D., Vice Chairperson for Undergraduate Studies
The Mechanical & Aerospace Engineering Undergraduate Programs

The Department of Mechanical & Aerospace Engineering administers two undergraduate programs in the College of Engineering: (1) Mechanical Engineering, (2) Aerospace Science & Engineering.

For more information about our programs, see http://mae.ucdavis.edu/undergraduate/undergraduate-majors.

Mission. The Department of Mechanical & Aerospace Engineering is committed to educating future engineers so that they may contribute to the economic growth and well-being of the state, the nation, and the world, and to the advancement of knowledge in the mechanical and aerospace sciences.

Objectives. The objectives of the Mechanical Engineering & Aerospace Science and Engineering programs are to produce graduates who do one or more of the following: a. Practice mechanical engineering and/or aerospace engineering in a broad range of agencies, industries, and institutes; b. Pursue graduate education; c. Participate in research and development, and other creative and innovative efforts in science, engineering, and technology; d. Pursue entrepreneurial endeavors.

Mechanical Engineering Undergraduate Program

The Mechanical Engineering program is accredited by the Engineering Accreditation Commission of ABET; http://www.abet.org.

The mechanical engineer uses basic science in the design and manufacture of complex engineering systems, requiring the application of physical and mechanical principles to the development of machines, energy conversion systems, materials, and equipment for guidance & control.

Work in this broad field of engineering requires a thorough knowledge of mathematics, physics, chemistry, material science, applied mechanics, thermodynamics, heat transfer, mass transfer, electricity, manufacturing processes, and economics.

The Mechanical Engineering program is designed to provide knowledge in mechanical engineering and associated applied sciences so that graduates may practice in a broad range of industries, pursue graduate studies, participate in research & development, and/or pursue entrepreneurial endeavors.

Areas of Interest

Students spend their third year in further study of fundamental courses, and in the fourth year they may tailor their studies to their interests by selecting courses in controls and systems analysis, fluid mechanics, heat transfer, mechanical design or thermodynamics. Students can either prepare for graduate study in mechanical engineering or obtain a broad background for entering engineering practice.

Students may select elective courses from among the areas of interest listed below.

Mechanical Design. The creation and improvement of products, processes, or systems that are mechanical in nature are the primary activities of a professional mechanical engineer. The development of a product from concept generation to detailed design, manufacturing process selection and planning, quality control and assurance, and life cycle considerations are areas of study and specialization in the area of mechanical design.

Solutions to such major social problems as environmental pollution, the lack of mass transportation, the lack of raw materials, and energy shortages, will depend heavily on the engineer's ability to create new types of machinery and mechanical systems.

The engineer-designer must have a solid and relatively broad background in the basic physical and engineering sciences and have the ability to synthesize the information from such a background in creative problem solving. In addition to having technical competence, the designer must be able to consider the socioeconomic consequences of a design and its possible impact on the environment. Product safety, reliability, and economics are other considerations.

Suggested restricted electives:
Biomedical & Engineering Fluid Mechanics. This field of study is based on the fundamentals of fluid mechanics and their broad range of applications in the biomedical and engineering areas. Areas of current research include blood circulation and its potential role in the regulation of normal physiological function and in the development of disease; groundwater and atmospheric flows and their implications for pollutant transport and environmental concerns; aerodynamic flow around transportation vehicles and its impact on vehicle performance; and flow in combustion engines and other energy systems with considerations of efficiency and environmental impact. These areas are investigated both experimentally and computationally.

Suggested restricted electives:

- EAE 138
- EME 161, 163, 164

Combustion & the Environment. Combustion is widely used for energy generation, propulsion, heating, and waste disposal, as well as for many other applications. Mechanical engineers are often heavily involved with the design of combustion systems (internal combustion engines, gas turbines, furnaces, etc.) and deal with aspects of combustion ranging from increasing efficiencies to reducing pollutant emissions. This specialization is for those who would like to work in fields that use combustion, or that deal with pollution related to combustion. With the current increased emphasis on reducing pollutants while maintaining or increasing efficiency, the efforts of mechanical engineers in designing and improving combustion systems are becoming more important.

Suggested technical electives:

- EME 161, 163

Heat Transfer, Thermodynamics, & Energy Systems. This specialization emphasizes the fundamentals of heat transfer and thermodynamics, and their application to the design of advanced engineering systems. The objective of the program is to introduce students to the fundamental processes of heat transfer and thermodynamics in complex engineering systems so that they are able to design more efficient, cost effective, and reliable systems with less environmental pollution and impact. An understanding of heat transfer and thermodynamics is required for the design of efficient, cost-effective systems for power generation, propulsion, heat exchangers, industrial processes, refining, and chemical processing. This area of specialization is important to many industries—aerospace, defense, automotive—as well as to the thermal design of electronic and computer packages.

Suggested restricted electives:

- EAE 138
- EME 161, 163, 164

Suggested Advisors. R.C. Aldredge, P.A. Erickson, B.D. Shaw

Manufacturing. Manufacturing is concerned with the conversion of raw materials into finished products by a variety of processes, such as machining, forming, casting, and molding. Modern manufacturing technology is increasingly dependent upon integration with computer-aided design systems and precision computer controls. State-of-the-art laboratories offer the opportunity for hands-on experience with a wide spectrum of manufacturing equipment. Manufacturing engineers must have expertise in design, materials, controls, statistical methods, computer software, and microprocessor applications.

Suggested restricted electives:

- EMS 180
- EME 150B, 151, 154
System Dynamics & Control. Engineers are increasingly concerned with the performance of integrated dynamics systems in which it is not possible to optimize component parts without considering the overall system.

System dynamics and control specialists are concerned with the modeling, analysis, and simulation of all types of dynamic systems and with the use of automatic control techniques to change the dynamic characteristics of systems in useful ways. The emphasis in this program is on the physical systems that are closely related to mechanical engineering, but the techniques for studying these systems apply to social, economic, and other dynamic systems.

Ongoing research includes projects on continuously variable transmissions, active and semi-active suspension systems, modeling and control of vehicle dynamics, electromechanical actuator design, electronically controlled steering, the analysis of fuel management systems, and the design of flight-control systems with humans in the loop.

Suggested restricted electives:

EAE 129, 141
ENG 122
EME 121, 134, 139, 154

Ground Vehicle Systems. An important aspect of mechanical engineering is the design of more environmentally benign surface vehicles that provide efficient individual and public transportation. Innovations in the field require competence in vehicle dynamics, control of vehicle dynamics, power sources & power transmission, lightweight structures & systems, alternatively fueled power systems, including electrical drives & fuel cells, and mechanical systems.

Suggested restricted electives:

EAE 129
ENG 122
EME 121, 134, 139, 152

Suggested Advisors. F. Assadian, P. A. Erickson, M. Hill, X. Lin, J. Park, N. Sarigul-Klijn

Transportation Systems. As society recognizes the increasing importance of optimizing transportation systems to minimize environmental degradation and energy expenditure, engineers will need to consider major innovations in the way people and goods are moved. Such innovations will require competence in vehicle dynamics, propulsion and control, and an understanding of the problems caused by present-day modes of transportation. Vehicle control requires an understanding of sensors and actuators, and the integration of yet-to-be-proposed concepts into overall vehicular dynamics. Competence in these areas allows for the development of alternative propulsion concepts, such as electric, hybrid, and fuel cell.

Suggested restricted electives:

EAE 129
ENG 122
EME 134, 150B, 161, 163

Suggested Advisors. F. Assadian, P.A. Erickson, X. Lin, J.W. Park

Mechanical Engineering Program Requirements

Students are encouraged to adhere carefully to all prerequisite requirements. The instructor is authorized to drop students from a course for which stated prerequisites have not been completed.

Exclusive of General Education units, the minimum number of units required for the Mechanical Engineering major is 148.

**Choose a series:**

- EME 185A: Mechanical Engineering Systems Design Project
- EME 185B: Mechanical Engineering Systems Design Project
  - Both EME 185A & 185B taken in consecutive quarters.
- EAE 130A: Aircraft Performance and Design
- EAE 130B: Aircraft Performance and Design
  - Both EAE 130A & 130B taken in consecutive quarters.

**Applied Mathematics Electives, choose one:**

- ECH 140: Mathematical Methods in Biochemical and Chemical Engineering
- ECI 114: Probabilistic Systems Analysis for Civil Engineers
- ECS 130: Scientific Computation
- ENG 180: Engineering Analysis
- MAT 118A: Partial Differential Equations: Elementary Methods
- MAT 128A: Numerical Analysis
- MAT 128B: Numerical Analysis in Solution of Equations
- EME 115: Introduction to Numerical Analysis and Methods
- EME 151: Statistical Methods in Design and Manufacturing
- STA 130A: Mathematical Statistics: Brief Course
- STA 131A: Introduction to Probability Theory

**System Dynamics/Mechanical Design Electives; choose one:**

- ENG 122: Introduction to Mechanical Vibrations
- EME 121: Engineering Applications of Dynamics
- EME 139: Stability of Flexible Dynamic Systems
- EME 150B: Mechanical Design
- EME 154: Mechatronics
- EME 171: Analysis, Simulation and Design of Mechatronic Systems

**Restricted Electives; choose two:**

- EAE 129: Stability and Control of Aerospace Vehicles
- EAE 138: Aircraft Propulsion
- EAE 140: Rocket Propulsion
- EAE 141: Space Systems Design
- EAE 142: Orbital Mechanics
- ENG 188: Science and Technology of Sustainable Power Generation
- EMS 180: Materials in Engineering Design
- EMS 182: Failure Analysis
- EME 134: Vehicle Stability
- EME 152: Computer-Aided Mechanism Design
- EME 161: Combustion and the Environment
- EME 163: Internal Combustion Engines and Future Alternatives
- EME 164: Introduction to Heating, Ventilation and Air Conditioning Systems

Students may also choose from EAE 130A, 130B, EME 121, 139, 150B, 151, 154, 171, ENG 122 if these courses are not used in satisfaction of other degree requirements.

**Upper Division Composition Requirement; choose one; a grade of C- or better is required:**

- UWP 101: Advanced Composition
- UWP 102E: Writing in the Disciplines: Engineering
Medical-Veterinary Entomology Minor; Entomology & Nematology

Medical-Veterinary Entomology Minor; Entomology & Nematology

Curriculum for the School of Medicine
The curriculum for the M.D. degree at the UC Davis School of Medicine is a four-year program providing comprehensive preparation for graduate medical training (internships and residencies) and the practice of medicine. It offers a blend of basic science training and clinical experience with opportunities for research.

The first-year curriculum begins in August and extends into May and is organized into two blocks, Foundations and Mechanisms & Diseases. The basic science portion of the Foundations block includes courses in Molecular Biology, Genetics, Evolutionary Biology, and Human Physiology. The major organizing theme is structure-function along the continuum of hierarchical biologic structure from molecule to cell, tissue and major organ systems. Four longitudinal threads also begin in Year 1 and are presented concurrently with the other courses. The focus of the Clinical Skills curriculum is physical examination training using standardized patients and models, correlated with concurrent gross anatomy and physiology by organ system. In the Health Systems Science and Health and Humanity threads, students are presented behavioral medicine, epidemiology, biostatistics, cross- cultural medicine, and ethics in cases, didactic presentations and team-based learning modules. In the Clinical Experiences thread, students are required to attend preceptorships in the community. Periodic quizzes and review sessions are used in the basic science courses throughout the block for formative assessment, and all courses administer comprehensive summative final examinations in December.

The Mechanisms & Disease block of the first-year curriculum begins in January and extends through May, with final exams in early-mid May. There are two major threads, each of which is composed of several integrated courses and students continue in the longitudinal courses. The Immunology/Microbiology/ Pharmacology/ Pathology thread presents an introduction to host defense, infection, basic pharmacologic principles, and general pathologic processes. The Endocrinology/Nutrition/Reproduction/Genetics (ENRG) thread covers essential concepts in genetics, basic and clinical nutrition, reproductive medicine, and clinical endocrinology. The general pathology course also includes male-female GU and endocrine pathology, and the pharmacology course covers antibiotics and endocrine pharmacology, with the goal of integration with concurrent courses. Periodic quizzes and review sessions provide formative feedback, and final examinations are used for summative assessment. The Clinical Skills course continues with an emphasis on interviewing skills and clinical assessment. Cases are used in the problem-based learning approach for basic-science-clinical correlation, and for the exploration of psychosocial issues. The course concludes with a comprehensive final examination, and also includes an observed complete history and physical examination.

The first-year curriculum ends with a five-week unscheduled block that may be used for vacation, remediation, electives, research, and international experiences.

The second-year curriculum is composed of two blocks—Brain & Behavior and Pathophysiology. Brain & Behavior begins in late June and extends through August with a neurosciences block composed of integrated neuroanatomy-clinical neurosciences. The latter emphasizes the pathophysiology of common neurological disorders. The systemic pathology curriculum continues with a focus on neuropathology, and the pharmacology course covers neuropharmacology. A clinical psychiatry course is also presented during this period. Building on concepts in Year 1, the Clinical Skills course focuses on advanced clinical skills and clinical reasoning using a combination of standardized patient assessments, problem-based learning, and subspecialty physical examination session. Students continue with preceptorships in the Clinical Experiences course, with the focus now on the inpatient setting to prepare them for third year clerkships. The Health System Science course expands upon topics in clinical epidemiology, medical economics, and socio- behavioral medicine. The Pathophysiology Block is devoted to compressed pathophysiology courses with tight integration of the systemic pathology and pharmacology courses. The courses are organized according to organ system (cardiovascular, pulmonary, renal, musculoskeletal system, hematology, gastroenterology, oncology, and dermatology). The Clinical Skills curriculum continues concurrently with its focus on advanced clinical skills, epidemiology, ethics, and problem-based assessment. History taking and physical diagnosis skills are correlated with the ongoing pathophysiology courses. Like the first year, all of the second-year courses utilize periodic quizzes and review sessions and a comprehensive final examination. The Clinical Skills course concludes with an objective structured clinical examination (OSCE) using standardized patients.

The second-year curriculum ends in February and is followed by a six-week, unscheduled block for preparation for USMLE Step 1, remediation, electives, and vacation.
The third-year program begins in April with a weeklong required course, Transition to Clerkship. Within this course students learn the nuts and bolts of clinical rotations. Simulation exercises and formative examinations with standardized patients provide students with initial feedback to help guide their development into their clerkships. Each student is required to complete six clerkship rotations in the core clinical specialties. Clerkships in surgery, internal medicine, obstetrics & gynecology, pediatrics, and psychiatry run for 8 weeks each. A four-week family medicine clerkship and a four-week selective are also required. In addition to the core clerkships, students will participate in a longitudinal primary care clinic throughout the third year. The third-year Doctoring program consists of longitudinal small groups led by faculty members who remain with their group throughout the year as the students rotate through their clerkships. Doctoring 3 themes include advanced interviewing techniques, clinical reasoning, clinical epidemiology, evidence-based medicine, and ethics/jurisprudence. Students must take a comprehensive clinical skills examination at the end of the third year which features self-assessment and faculty feedback.

The fourth-year curriculum features built-in flexibility to allow students to individualize their medical careers. The early start to the fourth year in May allows students to pursue electives for early exposure to clinical specialties or to complete clerkships which may have been deferred. All students are required to select a minimum of 32 weeks of clinical electives in addition to a single 4-week special study module or scholarly project. The Special Study modules are designed to integrate basic sciences with clinical sciences, provide opportunities for students to practice and refine fundamental skills in critical appraisal and analysis of emerging scientific developments, and to allow students to focus in-depth on a multidisciplinary topic of special interest to the student. The Scholarly Project requires independent inquiry with faculty mentorship and leads to a publishable manuscript and student presentation of the project at a research forum held in the winter. All students must complete a two-week Transition to Residency course in the Spring of their 4th year. This course focuses on foundational skills required of all new interns, as well as specialty-specific sessions and electives.

Individual student programs are designed under the guidance of college directors, mentors and faculty advisers, with the support of the Career Advising Office. Each student's fourth year program must be approved by the Fourth Year Oversight Committee to ensure appropriate breadth, depth, and vigor. There are strict guidelines for the choices and time allowed away from the home institution. To satisfy the M.D. degree program, the student must successfully complete the required course work, clerkships, and fourth-year requirements. Students must pass USMLE Step 1, USMLE Step 2 CS and CK, and complete the fourth-year clinical performance examination. In addition to the fourth-year elective program available, there is the opportunity for students to select from a variety of electives during the first two years. Examples include electives in history of ethics and medicine, medical Spanish and insights in clinical research. Most students also participate in one of several student-run, community clinics for elective credit during their first and second years.

**Coordination with other Advanced Degree Programs**

The curriculum for the M.D. degree provides flexibility and encourages coordination with other advanced degree programs (Ph.D., M.S., M.A., M.B.A., and M.P.H.). These programs offer a wide breadth of study areas and draw upon the considerable expertise of the entire campus faculty. The Department of Public Health Sciences offers an M.P.H. program in conjunction with the M.D. program. This program is designed for students interested in disease prevention and community health, health professionals and State Health Department employees.

**Medicine, School of | SOM Requirements**

**Required Curriculum for the M.D. Degree**

The following listing is the typical sequencing of all courses required for earning the M.D. degree. Course descriptions are given under the individual departmental course offerings.

Fourth-Year Requirements

MDS 449 Transition to Residency 3-6

Thirty-six weeks of Required Course work comprised of the following specifics:

Four weeks of an Inpatient Acting Internship from one of the following departments at UC Davis: Internal Medicine, OB-GYN, Pediatrics, Surgery, Family & Community Medicine and Psychiatry.
Four weeks of Inpatient or Ambulatory Acting Internship in any department/discipline.
Four weeks of Special Studies Module or Scholarly Project. Four weeks of Emergency Medicine.
Twenty weeks of additional Acting Internships, Advanced Clinical. Clerkships or Clinical Didactics.
Sixteen weeks must be taken at UC Davis.
Twenty-eight weeks must be in direct patient care.

The Major Program

The major in Medieval & Early Modern Studies examines the intellectual, political, and cultural forces that shaped modern European civilization during the period from the end of Ancient Rome (fifth century) to the beginning of the Enlightenment (mid-eighteenth century). An interdisciplinary and interdepartmental program, the major includes studies in history, art history, philosophy, literature, drama, music, national languages, religion, rhetoric, and political theory.

The Program. The major requires interdisciplinary work, while allowing the student to focus on the early Middle Ages, the High Middle Ages, the Renaissance, or the Baroque. The series of medieval and early modern courses in the program provides the foundation for the major and prepares students for advanced work within the individual disciplines. On the upper-division level, students may choose course work in specific areas of History, Comparative Literature, English, French, German, Italian, Spanish, and Latin, philosophy & religion, arts & language, and political
thought. In addition, each student may elect to complete a senior thesis on a selected aspect of medieval and/or early modern culture.

**Career Alternatives.** The major in Medieval & Early Modern Studies is a liberal arts degree providing excellent preparation for the rigors of professional schools as well as careers in law, museology, journalism, and teaching.

**Major Advisor.** See Program office.

Prior approval by Undergraduate Advisor necessary.

|MST 098/099: total any combination:|
|-------|-------------|
| 2     | MST 098    | Directed Group Study |
| 1-5   | MST 099    | Special Study for Undergraduates |

Language proficiency is a desideratum. Courses in Latin and other European languages are strongly recommended, particularly for students planning to pursue graduate studies in the medieval or early modern field.

**Depth Subject Matter**

*In consultation with the undergraduate advisor, students choose a total of eleven courses; with at least three courses from the Medieval Period (denoted as M) and at least three courses the Early Modern Period (denoted as EM):*

Consult with an undergraduate advisor regarding all “topics” related courses (denoted as *).

**Medieval & Early Modern Studies; Medieval Studies | MST Minor**

(College of Letters & Science)

Sally McKee, Ph.D. (History), Program Director

Program Office. 176 Voorhies Hall; 530-752-2257; [http://mems.ucdavis.edu](http://mems.ucdavis.edu)
Medieval & Early Modern Studies

The minor in Medieval & Early Modern Studies is a coherent program of interdisciplinary study. Medieval Studies units may be taken in one or more of the traditional fields of concentration, including art, history, literature, music, national languages, philosophy, political theory, and religious studies. Courses must be upper division with at least two courses each from the medieval and early modern periods. Students may also select a minor with a thematic emphasis. Although there is no foreign language requirement for the minor, knowledge of Latin or a modern European language is recommended. The minor must be designed in consultation with the Undergraduate Advisor.

Microbiology (Graduate Group)

Microbiology (Graduate Group) | MIB Information

Scott Dawson, Ph.D., Chairperson of the Group

Group Office. 237 Briggs (Microbiology & Molecular Genetics); 530-752-3633

Faculty. https://mgg.ucdavis.edu/our-faculty

Microbiology (Graduate Group) | MIB M.S.

Scott Dawson, Ph.D., Chairperson of the Group

Group Office. 237 Briggs (Microbiology & Molecular Genetics); 530-752-3633

Faculty. https://mgg.ucdavis.edu/our-faculty

Graduate Study. The Graduate Group in Microbiology offers study and research leading to the M.S. and Ph.D. degrees. Strong preference is given to doctoral applicants. The group offers study in modern molecular approaches to microbiological problems. Areas of research span fundamental, applied, and pathogenic microbiology, including bacterial and viral pathogenesis, eukaryotic microbiology, microbial genomics and genetics, microbial physiology and development, microbial ecology and environmental microbiology, cancer biology, and bioengineering and bioremediation. For information on the graduate study and undergraduate preparation for the program contact a graduate advisor or the chairperson of the group.

The Master of Science degree is offered only en route to the Ph.D.

Graduate Advisors. A. Gelli (Med: Pharmacology), S.J. Lin (Microbiology & Molecular Genetics), R.E. Parales (Microbiology & Molecular Genetics), B. Shacklett (Med: Microbiology & Immunology), E.E. Sparger (Vet Med: Medicine), R.Tsolis (Med: Microbiology & Immunology)

Microbiology A.B.

The Major Program

Microbiology is the branch of biology that deals with bacteria, yeasts and other fungi, algae, protozoa, and viruses. These microorganisms are ubiquitous in nature and play a crucial role in areas such as agriculture, biotechnology, ecology, medicine, and veterinary science. The field of microbiology contributes to areas of fundamental inquiry such as biochemistry, cell biology, evolution, genetics, molecular biology, pathogenesis, and physiology. The ease and power of simultaneous genetic and biochemical analysis of microbes led to the emergence of the new disciplines of molecular biology & molecular genetics, and spawned the new industry of biotechnology.

The Program. The Microbiology Undergraduate Program offers Bachelor of Science and Bachelor of Arts degrees in the College of Biological Sciences. Both degrees are designed to provide students with quantitative skills and knowledge across the breadth of Biological Sciences, while maintaining a focus on the biology of microorganisms. The B.S. degree offers more training in mathematics, biochemistry and laboratory methodology; the A.B. degree incorporates more exposure to the liberal arts. The choice of a major program and its suitability for particular career options should be discussed with a major advisor.

Career Alternatives. A bachelor's degree in microbiology serves as the foundation for advanced study in microbiology, entry into the professional schools of all health sciences, or immediate employment in biotechnology, health care and food science industries.

Graduate Study. The Graduate Group in Microbiology offers programs of study and research leading to the M.S. and Ph.D. degrees.

Strong preference is given to doctoral applicants. The group offers study in general microbiology, microbial physiology, microbial genetics, molecular mechanisms of microbial regulation, molecular mechanisms of microbial pathogenesis, immunology, virology, and recombinant DNA technology. For information on the graduate study and undergraduate preparation for the program contact a graduate advisor or the Chairperson of the Group.

Related Courses. The offerings of the Department of Microbiology & Molecular Genetics are augmented by courses in Food Science & Technology (FST); Medical Microbiology (MMI); Molecular & Cellular Biology (MCB); Pathology, Microbiology, & Immunology (PMI); Plant Pathology (PLP); and Soil Science (SSC).

Faculty of the Department of Microbiology & Molecular Genetics also teach or participate in the following courses: BIS 002A, 101, 104 and 181.

Master Advisor. Su-Ju Lin, Ph.D.

Sudipta Sen, Ph.D., Program Director

Program Office. 155 Kerr Hall; 530-754-4926; http://mesa.ucdavis.edu

The Major Program

A study of the Middle East & South Asia as a whole allows students to explore a unique set of issues of both historical and contemporary importance. In order to guide students in comparative analysis, faculty help majors deepen their inquiries through coursework on antique, medieval, and early modern empires and political systems. Given the dynamism of modern cultural contexts, majors are invited to concentrate their studies on a wide range of variables including the evolution of states along with new understandings of citizenship, the rise & development of nationalist movements, political conflicts informed by religious majorities, the nuclearization of India & Pakistan, the growth of information societies & computer industries, the production of oil & its social and cultural legacies, labor migrations, urbanization, the emergence of sizeable middle classes, transnational literary movements using sophisticated media technologies, the expansion & intrusion of global security regimes into everyday life, and peace initiatives that shape struggles for justice across the world. Our program's focus on both the Middle East & South Asia is a pioneering achievement in the United States rivaled by only four other colleges or universities.

By the end of their studies, majors will have acquired an in-depth understanding of the common historical experience shared by many peoples in these regions, and of the legacies of culture, social exchange, power and empowerment across diverse settings. Students are also required to complete at least two years of training in a language appropriate to their area of expertise.

The major in Middle East/South Asia Studies at UC Davis offers a unique opportunity to study exchanges, complementarities, and correspondences in such fields as history, political economy, culture, literature & film, religion, family structures, gender relations, media, anthropology, law, international relations, development, diasporas, and urbanism. Students who complete our major will be well suited to embark on careers in non-governmental organizations, journalism & media industries, education & research, governmental service & diplomacy, and business.

Major Advisor. Consult the Middle East/South Asia Studies Program in 155 Kerr Hall 530-754-4926 or the Middle East/South Asia Studies website at http://mesa.ucdavis.edu.

Programs, Internships, & Career Alternatives. Many internship opportunities are available for the Middle East/South Asia Studies major and minor, consult with your advisor.

### Middle East/South Asia Studies | PER Courses

#### Courses in PER:

**PER 001—Elementary Persian (5)**  
Lecture/Discussion—5 hours. Introduction to listening, speaking, reading and writing skills in Persian and to Persian culture. GE credit: AH, WC. Effective: 2016 Fall Quarter.

**PER 002—Elementary Persian (5)**  
Lecture/Discussion—5 hours. Prerequisite(s): PER 001; or Consent of Instructor. Continuation of course 001. Introduction to listening, speaking, reading and writing skills in Persian and to Persian culture. GE credit: WC. Effective: 2017 Winter Quarter.

**PER 003—Elementary Persian (5)**  
Lecture/Discussion—5 hours. Prerequisite(s): PER 002; or Consent of Instructor. Continuation of PER 002. Introduction to listening, speaking, reading and writing skills in Persian and to Persian culture. GE credit: AH, WC. Effective: 2017 Spring Quarter.

**PER 021—Intermediate Persian (5)**  
Lecture/Discussion—5 hours. Prerequisite(s): PER 003; or the equivalent. Integrated presentation of listening, speaking, reading and writing as well as cultural topics in intermediate Persian. GE credit: AH, WC. Effective: 2016 Fall Quarter.

**PER 022—Intermediate Persian (5)**  
Lecture/Discussion—5 hours. Prerequisite(s): PER 021; or the equivalent. Integrated presentation of listening, speaking, reading and writing as well as cultural topics in Intermediate Persian. GE credit: AH, WC. Effective: 2017 Winter Quarter.

**PER 023—Intermediate Persian (5)**  
Lecture/Discussion—5 hours. Prerequisite(s): PER 022; or equivalent knowledge of Persian. Integrated presentation of listening, speaking, reading and writing skills as well as cultural topics in Intermediate Persian. GE credit: AH, WC. Effective: 2017 Spring Quarter.

**PER 098—Directed Group Study (1-5)**  
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. Directed group study. May be repeated for credit. (P/NP grading only.) Effective: 2017 Winter Quarter.

**PER 099—Special Study for Undergraduates (1-5)**  
Variable—1-5 hours. Prerequisite(s): Consent of Instructor. Special study. May be repeated for credit. (P/NP grading only.) Effective: 2017 Winter Quarter.

**PER 101—Advanced Persian: Topics in Modern Persian Culture 1900-Present (4)**  
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): PER 023; or Consent of Instructor. Integrated work on reading, listening, discussion and writing about modern Persian cultural production using fiction and poetry as well as cinema and theory. May be repeated up to 1 time(s) if content is different from the first time. GE credit: AH, WC, WE. Effective: 2017 Fall Quarter.

**PER 103—Advanced Persian: Topics in Medieval Persian Culture 900-1500 (4)**  
Lecture/Discussion—3 hours; Term Paper. Prerequisite(s): PER 023; or Consent of Instructor. Integrated work on reading, listening, discussion, writing about medieval Persian culture with a focus on lyric and narrative poetry and
representative selections of literary prose, rhetoric, biography, history, religious and philosophical discourse. May be repeated up to 1 time(s) if content differs. GE credit: AH, OL, WC, WE. Effective: 2018 Winter Quarter.

PER 396—Teaching Assistant Training Practicum (1-4)
Variable—1-4 hours. Prerequisite(s): Consent of Instructor. Restricted to graduate students. Teaching practicum. May be repeated up to 18 time(s). (S/U grading only.) Effective: 2017 Winter Quarter.

Military Science

Military Science | Military Science
(College of Letters & Science)

Reserve Officers’ Training Corps (ROTC), Army
Ryan Burkert, Lieutenant Colonel, Chairperson of the Department

Department Office. 125 Hickey Gymnasium; 530-752-5211
Faculty. https://militaryscience.ucdavis.edu/people

Program of Study
The Military Science Department is a classroom and hands on leadership and management program. The program stresses the following Army Values: loyalty, duty, respect, selfless-service, honor, integrity, and personal courage. We cover the basics of the Army, including Army ranks, organizational structure, basic skills, and tactics. We also discuss current events, national and international politics, military affairs, ethics, and human relations. Military skills (such as drill and ceremony, map reading, and squad tactics) are taught to the extent necessary to create an environment where students can enter leadership positions and apply theories taught in the classroom. The program assists students in all academic fields to prepare for positions of leadership in military or civilian careers.

The department offers two program tracks: (1) a purely academic track; (2) a pre-commissioning track for those desiring a commission as an Officer in the Active Duty U.S. Army, Army National Guard, or Army Reserves. The academic track entails no obligation to the military and is open to all students but is limited to MSC 012 and MSC 022B. Students pursuing the academic track do not wear a uniform or otherwise participate in extra-curricular activities designed as part of the pre-commissioning process.

Students who desire a commission in the U.S. Army participate in both the academic portion of the program and in the leadership laboratories and extra-curricular activities designed to enhance their military leadership and tactical and technical skills. They wear uniforms to leadership laboratories and selected classes and become ROTC cadets. Students may be cadets in the lower division courses without incurring a military obligation. Students must contract with ROTC to participate in the upper division pre-commissioning program and incur a military obligation. Extra-curricular activities for cadets include an intercollegiate sports team (Ranger Challenge), the university color guard, a military honor society, and opportunities to participate in field training exercises.

Department Programs
Students are enrolled in Military Science under one of two programs.

Four-Year Program
There is no military obligation associated with attendance in lower division courses. Students are enrolled in the basic course (lower division) for the first two years on a voluntary basis. Admission to the advanced course (upper division) is by application from second-year lower division students who meet the academic, physical, and military aptitude requirements. Qualified veterans can enter the advanced course immediately based on of their military service experience and graduation from Basic Training, upon approval by the Department Chairperson.

During the course, all Military Science text books, uniforms and equipment are provided without cost. Contracted students are given leadership development experience at the ROTC Advanced Camp in Fort Knox, Kentucky, between their third and fourth years of the course. Emphasis is on military fitness, tactics, and leadership.

Two-Year Program
The two-year program is for students, including graduate students, who have not attended lower division Military Science classes. In lieu of lower division courses an applicant attends a six-week summer program, Basic Camp,
which is voluntary and carries no military obligation. Basic Camp attendees are paid and transportation costs covered. Applications are accepted at any time prior to the student's junior year; graduate students are also accepted, as long as they have two years of academics remaining.

Scholarship Program

There are three and two year scholarship opportunities available at the discretion of the Department Chairperson that covers full tuition and fees and $1200 annually for books. Cadets also receive a $420 monthly stipend.

Army Reserve Officers' Training Corps four-year Active Duty merit scholarships are awarded to qualified high school seniors in a national competition each year. As high school seniors, students compete for the scholarship by submitting their complete application at http://www.goarmy.com/rotc/.

If high school seniors are not awarded the four year National Scholarship, there are still opportunities for campus based three and two year scholarships.

Leadership Laboratory

During the course of the school year, two hours per week are spent conducting practical exercises. Classes emphasize adventure activities including military offense, defense and patrolling, operations, weapons familiarization, rappelling, leadership scenarios, and land navigation. All cadets are required to attend leadership laboratories for practical leadership experience and to prepare for attendance at Advanced Camp.

Academic Credit

College of Agricultural & Environmental Sciences. The Bachelor of Science degree in agriculture requires the completion of 180 units. Military Science courses are counted in the unit allowance for electives.

College of Biological Sciences. The Bachelor of Science degree requires the completion of 180 units. Military Science courses are counted in the allowance for electives.

College of Engineering. Military Science units are acceptable toward the requirements for the Bachelor of Science degree to the extent of the unrestricted elective units available in the curriculum being followed.

College of Letters & Science. The Bachelor of Arts and Bachelor of Science degrees require the completion of 180 units. Military Science courses are counted in the allowance for electives.

School of Veterinary Medicine. The number of Military Science units acceptable toward the Bachelor of Science degree in Veterinary Medicine is on an individual program basis approved by the Dean of the School. Graduates with the D.V.M. degree may apply for direct commission in the United States Army Veterinary Corps.

Aerospace Studies (Air Force)

The Air Force Reserve Officer's Training Corps (AFROTC) is an educational program providing training in leadership, management, communications and military proficiency on college and university campuses. It also provides an opportunity to obtain a commission as a second lieutenant in the Air Force and enter the active duty forces after you complete a bachelor's or a graduate degree. The skills you acquire will become valuable assets for any subsequent career you choose.

The program is normally four years long, but a flexible design allows students to complete the curriculum in as little as two years. Undergraduate scholarships are available, but are not necessary for participation. Until you accept a scholarship or enter your junior year of the program, you have no obligation to join the Air Force. There are no costs for AFROTC uniforms, books, or classes.

UC Davis students have the option of taking the Air Force program on the UC Berkeley or CSU Sacramento campus.

Qualifications

Freshmen/Sophomore applicants must:

- Be full-time college students in good academic standing
- Have good moral character
- Be in strong physical condition
- Be at least 14 years old
Additionally, Juniors/Seniors/Scholarship recipients must:

- Be United States citizens or in the process of applying for citizenship
- Be 18 years old (or 17 years old with consent of parent or guardian)
- Pass the Air Force Officer Qualifying Test
- Pass a medical examination
- Be under the age of 31 at time of graduation (may be waived)

Scholarships

Opportunities for four-year and three-year undergraduate scholarships are better than ever. Scholarships cover the full cost of tuition, books and required fees at the University of California and are available for eligible high school seniors. It also includes $300-$500 monthly stipend during the school year. If you are a junior or senior in high school and plan on attending a college or university in Northern California, you can write, call or visit the local AFROTC detachments for a scholarship application. Applications are also available from local Air Force recruiters or your high school guidance counselors.

All scholarships are merit-based and consider a variety of factors: cumulative GPA, class standing, SAT/ACT scores, academic awards/achievements, leadership ability, athletic involvement, extracurricular activities, community service and letters of recommendation. A personal interview with an Air Force officer is also part of the application process. Prior to activating a scholarship, students must meet AFROTC medical and physical fitness standards. All scholarships must be used at an accredited college or university that offers AFROTC on campus or through cross-registration. The program is available at more than 1,000 universities and colleges nationwide.

If you are already in college, contact our office directly and apply for enrollment into AFROTC as a cadet. Three- and two-year full tuition scholarships are available for all academic majors, especially scientific and technical majors such as engineering, atmospheric science, math, computer science, and physics. GPA Scholarship requirements for nontechnical majors are slightly higher. Applicants are primarily evaluated on their leadership ability and academic performance.

Challenging Careers

All commissioned officers enter the Air Force as second lieutenants for a 4-year active duty service commitment. Pilots and navigators serve longer commitments, based on training requirements. Once on active duty, you’ll be given instant responsibility in one of 32 primary career fields. Opportunities to fly are better than ever. Whether you are piloting the F-22 fighter, supervising 150 aircraft maintainers on the flightline, or caring for sick personnel in the emergency room, you will be rewarded knowing that you are making a difference.

Air Force ROTC is offered through the Aerospace Studies departments at California State University Sacramento and U.C. Berkeley. Scholarships (including tuition, book allowance, and stipend) are available for qualified students. Students may enroll and attend one course per semester at the U.C. Berkeley or CSU Sacramento campus at no cost. Topics covered in AFROTC courses include Heritage and Values of the United States Air Force (1-credit), Team and Leadership Fundamentals (1-credit), Leading People and Effective Communication (3-credits), and U.S. National Security Affairs and Preparation for Active Duty (3-credits). Additional components of the AFROTC program include 2 hours per week of fitness activities, 2 hours per week of Leadership Lab, and a 2-week Summer Field Training between the sophomore and junior years. Upon completion of the program and granting of 4-year degree, students will commission as Second Lieutenants in the United States Air Force. To be eligible for AFROTC, applicants should be a full time student and meet additional fitness, GPA, testing, and other requirements.

Interested students, please contact their department of choice:

For CSU Sacramento:  http://www.csus.edu/afrotc
916-278-7315 or 916-278-7449; sacramento@afrotcadmissions.com

For U.C. Berkeley:  http://airforcerotc.berkeley.edu

Department of Naval Science

152 Hearst Gymnasium, UC Berkeley
Berkeley, CA 94270-3640
510-642-3551; http://nrotc.berkeley.edu

533
UC Davis students may participate in the Navy and Marine Corps ROTC program at UC Berkeley. The program is 4 years long and includes courses and weekly professional development laboratories (drill) at UC Berkeley. Students normally compete for national scholarships as high school seniors, although interested students may enroll as freshmen or sophomores and compete for scholarships based on successful participation in the program. A student who satisfactorily completes an ROTC program and is awarded a degree from UC Davis receives an active duty commission as a Second Lieutenant in the U.S. Marine Corps or an Ensign in the U.S. Navy.

Navy option students take the following courses:

**Freshman year:**
- NS 1 Introduction to Naval Science
- NS 2 Sea Power and Maritime Affairs

**Sophomore year:**
- NS 3 Leadership and Management
- NS 10 Naval Ship Systems I

**Junior year:**
- NS 12A Navigation and Naval Operations I
- NS 12B Navigation and Naval Operations II

**Senior year:**
- NS 401 Naval Ship Systems II
- NS 412 Leadership and Ethics

In lieu of NS401, NS10, NS12A and NS12B, Marine Corps students participate in Marine Seminars and complete MA154, History of Littoral Warfare and MA20, Evolution of Warfare (or a designated equivalent).

Scholarship students are required to complete a number of other courses at Davis, including one year each of calculus, physics, and English, and one quarter each of computer science, and military history or national security policy.

Interested students should contact the Department of Naval Science at UC Berkeley at the address above to obtain information and apply.

**Faculty.** [http://arts.ucdavis.edu/music-faculty](http://arts.ucdavis.edu/music-faculty)

**The Major Program**
The Bachelor of Arts degree in music provides both a broad liberal arts education and the skills necessary to explore music through its history, composition, theory, and performance. Students majoring in music may choose from three tracks in the major: (1) composition, (2) music history, theory, and ethnomusicology, or (3) performance. After a common core of courses in the lower division, students pursue their chosen track with specialized courses leading to an appropriate senior project. All majors are expected to complete a substantial project (composition, research presentation, recital) in the senior year (MUS 195).

**Study Abroad & the Music Major.** The department encourages students to pursue a portion of their studies abroad. In close collaboration with their undergraduate advisors, students plan a course of study abroad that complements their coursework at Davis. UC Davis Music Majors have completed upper division coursework at EAP partner institutions in Australia, England, France, Germany, and Italy; Music faculty members lead summer programs in Argentina, Austria, and France.

**The Program.** A fundamental grounding in music theory, music history, and performance during the first two years of study leads to more specialized study of composition, music scholarship, or performance during the last two years of undergraduate work.

**Career Alternatives.** Students who graduate with a B.A. in music from UC Davis have gone on to careers as composers and performers, as music scholars, and as professionals in the concert, media, and computing industries. Others have continued in K-12 education, medicine, law, government, and business.

**Foreign Language.** Students contemplating graduate study in music are advised to consider pursuing foreign language study beyond the elementary level.

**Diagnostic Exams** are given before admission into MUS 006A-006B-006C. As an alternative MUS 003A-003B may be recommended. Diagnostic exams are also given for MUS 016A-016B-016C and 017A-017B-017C at the beginning of each year. Transfer students should take the Music 6 diagnostic exam given during the first class meetings. In
addition, incoming students are required to take MUS 002A-002B-002C (Keyboard Competence) unless they can pass out of one or more of the classes by demonstrating proficiency through a diagnostic exam given at the beginning of each quarter. Students learn (1) four-part keyboard harmony in all major and minor keys; (2) moderate fluency with figured bass at the keyboard; (3) major and minor scales with proper fingering; (4) ability to sight read simple piano music and Bach chorales.

**Student Performing Activities.** The Department of Music presents more than 100 concerts each year, offering performance opportunities for both majors and non-majors in the University Symphony, University Chorus, University Chamber Singers, University Concert Band, Baroque Ensemble, Jazz Band, world music ensembles (Indonesian Gamelan, Hindustani Vocal Ensemble, Afro-Cuban Ensemble, Brazilian Capoeira Ensemble, Samba School) and numerous chamber ensembles. There is a close relationship with the Robert and Margrit Mondavi Center for the Performing Arts, where several of the ensembles are resident.

Professional chamber ensembles perform frequently in the weekly series of free Thursday Noon Concerts, named after Joy S. Shinkoskey. Performance groups have collaborated with the Department of Theatre and Dance in productions of musical theater and opera. Study of instruments and voice with professional performers and teachers is required of all majors. Similar opportunities exist for qualified non-majors.

Note: A maximum of 19 units in performance courses (MUS 131, MUS 140-153) apply toward the degree; see Unit Credit Guidelines, College of Letters & Science degree requirements section. Faculty of the College of Letters & Science bylaws makes it possible for students to take more than 19 units of performance classes without those additional units counting toward the 225-unit cap on units.

**Faculty & Facilities.** The faculty is noted for its achievements in a variety of areas. The music scholars are active in research, writing, and performance; the music of the composers is performed and recorded nationally and internationally. The journal 19th-Century Music is housed in the department.

The regular faculty is joined throughout the year by visiting Artists-in-Residence, distinguished performers who give public concerts and lectures and who work with students informally.

The Empyrean Ensemble, a professional new music ensemble, is in residence at UC Davis, where it performs concerts of new music and annually premieres the work of student composers.

The department's facilities include a collection of Renaissance, Baroque, and modern instruments, along with non-western instruments including a Sundanese gamelan. The arts quadrangle houses the Computer and Electronic Music Studio, practice and rehearsal rooms, and a music library with well over 12,000 CDs, several hundred videos and a collection of music reference materials. Opened in 2016, the Ann E. Pitzer Center, next door to the Music Building, features a 399-seat state-of-the-art concert hall, six practice rooms, and five large teaching/rehearsal studios. Scores and music monographs are housed in the Peter J. Shields Library, adjacent to the Music Building. A partnership of campus libraries affords online access to more than 100,000 tracks of classical and world music by streaming audio.

**Honors.** A student becomes eligible for graduation with honors by meeting the minimum GPA and course requirements established by the College of Letters & Science. To qualify for high or highest honors, students must also complete the Music Department honors program with a GPA of 3.500 or above and write a thesis or submit a portfolio that meets the criteria for high honors or highest honors. Students apply to participate in the department honors program during the latter part of their junior year. Admission to the program is based on GPA, a thesis proposal, examples of previous writing, and the recommendation of a faculty member who is willing to sponsor the student's project. Students who anticipate seeking admission to the honors program are urged to complete at least one offering of MUS 121 or 122 before the end of their junior year. Interested students are urged to consult with faculty in their field early in their junior year.

**Major Advisors.** A. Triest, J. McGilvray, B. Olivier

Music | MUS Minor
(College of Letters & Science)
Laurie San Martin, Ph.D., Chairperson of the Department

Department Office. 112 Music Building; 530-752-5537; Fax 530-752-0983; http://music.ucdavis.edu

Faculty. http://arts.ucdavis.edu/music-faculty

The music minor allows students to explore and engage with a wide range of musical styles and genres, including classical music, jazz, popular music, and many musics of the world. The minor aims to enrich student experience by integrating performance experience with diverse music department ensembles, including the University Symphony, University Chorus, University Concert Band, Jazz Band, world music ensembles (Indonesian Gamelan, Samba School, Hindustani Vocal Ensemble, Afro-Cuban Ensemble, Brazilian Capoeira Ensemble, Samba School) and numerous chamber ensembles. By providing opportunities to build musical skills and to research and write about a variety of musical traditions, the minor helps students of all backgrounds highlight their creativity, collaborative skills, careful listening and cultural awareness.

Major Advisors. A. Triest, J. McGilvray, B. Olivier

Native American Studies

Native American Studies | NAS Information
(College of Letters & Science)
Beth Rose Middleton, Chairperson of the Department

Department Office. 2407 Hart Hall; 530-752-3237; http://nas.ucdavis.edu
Faculty. http://nas.ucdavis.edu/people/faculty

Native American Studies | NAS A.B.
(College of Letters & Science)
Beth Rose Middleton, Chairperson of the Department

Department Office. 2407 Hart Hall; 530-752-3237; http://nas.ucdavis.edu
Faculty. http://nas.ucdavis.edu/people/faculty

The Major Program
Native American Studies provides a multi-disciplinary introduction to the indigenous cultures of North, Central, and South America. It challenges students to consider issues of cultural diversity, sovereignty, and indigenous knowledge systems in preparation for living in a world of constantly increasing social and cultural complexity.

The Program. Students electing a major in Native American Studies may complete Plan I, Plan II, or Plan III. Plan I enables students to concentrate chiefly upon the Native experience in North America (north of Mexico). Plan II encourages interested students to focus upon Meso-America with some course work integrating Meso-America with North America and South America. Plan III focuses upon South America with some course work integrating that region with areas to the north.

Major Advising. All new and prospective Native American Studies majors are encouraged to see the Student Affairs Officer individually, once per year, at minimum.

Career Alternatives. Native American Studies is excellent preparation for a scholarly career or professional career such as teaching, law, human services, health, tribal administration, social work, and inter-ethnic relations. Graduate
schools and agencies in these and related areas are looking for students with broad interdisciplinary preparation and who possess knowledge and sensitivity relating to ethnic issues and cultural diversity.

**Study Off Campus.** Majors have the option of spending one to three quarters elsewhere in the Americas or on or near a reservation as part of the fulfillment of the Area of Specialization. Each student’s plan must be approved by the student’s adviser and by the chairperson and may fulfill from 12 to 20 of the 28 units required for the emphasis. The courses or field internship taken elsewhere must be focused upon indigenous peoples or indigenous languages and the institution of study shall be located in an area with substantial indigenous population. Students must have upper division standing and, for Plan I, course 107 or the equivalent should have been completed; for Plan II, courses 107 and 133 should have been completed; and for Plan III, courses 107 and 120 should have been completed prior to departure. Several options may be used for receiving academic credit, including course 195. The department strongly encourages students to participate in the UC Education Abroad Program or Short-Term Programs Abroad.

**Graduate Study.** The Department offers a program of study leading to the M.A. and Ph.D. degrees in Native American Studies, as well as a designated emphasis in Native American Studies for graduate students in approved programs. Further information regarding graduate study may be obtained at the Department office and at Graduate Studies.

Faculty. http://npb.ucdavis.edu/facultyresearch/

The Neurobiology, Physiology, & Behavior Major Program

Neurobiology, Physiology, & Behavior is a major that emphasizes the understanding of vital functions common to all animals. All animals perform certain basic functions—they grow, reproduce, move, respond to stimuli, and maintain homeostasis. The physiological mechanisms upon which these functions depend are precisely regulated and highly integrated. Actions of the nervous and endocrine systems determine behavior and the interaction between organisms and their physical and social environments. Students in this major study functional mechanisms; the control, regulation, and integration of these mechanisms; and the behavior that relates to those mechanisms. They do so at the level of the cell, the organ system, and the organism.

The Program. In the freshman and sophomore years, students majoring in Neurobiology, Physiology, & Behavior build a broad scientific background, taking courses in chemistry, biology, physics, and mathematics. As juniors or seniors, students can enroll in a variety of Neurobiology, Physiology, & Behavior courses and related upper division courses. The NPB major contains three tracks: the Neurobiology track, the Physiology track, and the Organism-Environmental Interactions track. If you wish to propose an alternative to these tracks for yourself, please meet with your master advisor who can approve such individualized plans. Students can also participate in a number of advanced laboratory courses or may design an individual, independent project guided by a member of the faculty.

Career Alternatives. Completion of the Neurobiology, Physiology, & Behavior major provides the foundation for advanced study leading to careers in high school teaching, college level teaching or research. It also serves as the basis for further training in the health professions, including but not limited to human and veterinary medicine, medical technology, physical therapy, pharmacy, nursing, dentistry and optometry. The major is also appropriate for those intending to seek careers in biotechnology or other biologically related industries.

Graduate Study. Information on graduate study in neuroscience, physiology or behavior may be obtained by writing the Graduate Advisor, College of Biological Sciences, Graduate Academic Programs. See also the graduate course offerings listed under Animal Behavior (Graduate Group), Molecular, Cellular, & Integrative Physiology (Graduate Group), and Neuroscience. See also Graduate Studies.

Master Advisor. Dr. Hwai-Jong Cheng, M.D., Ph.D., Dr. Lee Miller, PH.D.

Advising. Biology Academic Success Center (BASC); 1023 Sciences Laboratory Building; 530-752-0410; http://basc.ucdavis.edu/

**Neuroscience (Graduate Group)**

**Neuroscience (Graduate Group) | NSC Ph.D.**

Hwai-Jong Cheng, M.D., Ph.D., Chairperson of the Group

**Group Office.** 146 Center for Neuroscience; 530-757-8520; [https://grad.neuroscience.ucdavis.edu/](https://grad.neuroscience.ucdavis.edu/)

**Faculty.** [https://grad.neuroscience.ucdavis.edu/faculty](https://grad.neuroscience.ucdavis.edu/faculty)

**Graduate Study.** The Graduate Group in Neuroscience offers programs of study leading to the Ph.D. degree. Neuroscience is a broad, interdepartmental program with faculty interests ranging from molecular biophysics of channels to cortical organization and cognition. A major goal of the program is to prepare students for careers as research scientists. Details of the program may be obtained from the Group office.

The Master of Science degree is offered only en route to the Ph.D.

**Graduate Advisors.** K. Zito (Neurobiology, Physiology, & Behavior), G. Gurkoff (Med: Neurological Surgery), J. Geng (Psychology), J. Ditterich (Neurobiology, Physiology, & Behavior), M. Burns (Med: Ophthalmology)

(College of Biological Sciences)

W. Martin Usrey, Ph.D., Chairperson of the Department

**Department Office.** 196 Briggs Hall; 530-752-0203; [http://www.npb.ucdavis.edu](http://www.npb.ucdavis.edu)

**Faculty.** [http://basc.ucdavis.edu/](http://basc.ucdavis.edu/)

**Description.** This minor allows non-NPB majors to learn about the importance of the nervous system. The large breadth of neuroscience courses available includes molecular and cellular neurobiology, developmental neurobiology, neurobiology of addictive drugs and cell signaling in health and disease. Students who obtain a neuroscience minor will be able to demonstrate knowledge of the neurobiological processes in animals and humans.

**Master Advisor.** Dr. Hwai-Jong Cheng, M.D., Ph.D., Dr. Lee Miller, Ph.D.

Debbie Ward, Ph.D., R.N., F.A.A.N.; Interim Dean & Clinical Professor
Mission Statement

The Betty Irene Moore School of Nursing at UC Davis cultivates academic excellence through immersive, interprofessional and interdisciplinary education and research in partnership with the communities served. Faculty, staff and students discover and disseminate knowledge to advance health, improve quality of care and shape policy.

Nursing Science and Health-Care Leadership Graduate Degree Program

Hosted by the Betty Irene Moore School of Nursing at UC Davis, the Nursing Science and Health-Care Leadership Graduate Degree Programs prepare nurse leaders, physician assistants, nurse practitioners, researchers and faculty in a unique interdisciplinary and interprofessional environment. The full-time, academic, doctoral program prepares graduates as leaders in health care, health policy and nurse faculty/researchers at the university level. The master's degree Physician Assistant Studies program prepares graduates to deliver care as physician assistants. Graduates of the professional master's degree leadership program are prepared for health-care leadership roles in a variety of organizations and as nurse faculty at the community college and prelicensure education levels. Graduates of the master's degree Nurse Practitioner Program are prepared to deliver care as nurse practitioners.

Faculty

The UC Davis Nursing Science and Health-Care Leadership Graduate Group includes a wide cross-section of academic disciplines with faculty from the Betty Irene Moore School of Nursing as well as UC Davis Health System and other UC Davis schools, colleges, and departments. Within the graduate group faculty are experts in nursing, medicine, health informatics, nutrition, biostatistics, public health and other fields.

Ideal students for the Nursing Science and Health-Care Leadership Master of Science—Leadership Track are those with experience or interest in transforming health care through nursing education and research. They want to focus on important societal health issues through the work of advancing health and improving the systems that provide health services.

Graduates of this program are prepared for academic and leadership positions. Graduates exercise leadership through scientific thinking, responsibility, initiative, cultural inclusiveness, knowledge of organizations and system change, teamwork and a commitment to healthy communities.

The M.S.—Leadership Track program is a full-time, professional degree program that prepares graduates for health-care leadership roles in a variety of organizations and as nurse faculty at the community-college level. Some examples include:

- Leaders of health organizations and agencies—such as community clinics, trade associations, advocacy groups—improving quality of care and work environments, and advancing health outcomes and health-care effectiveness and efficiency.
- Community college and other prelicensure nursing faculty—teaching the next generation of nurses.
- Legislative and governmental agency staff and leadership developing, influencing and implementing policy to improve access and outcomes (not limited to health agencies but other organizations that provide public infrastructure such as transportation, planning or parks and recreation).
- Careers across the health-care sector, such as insurance, pharmaceutical, hospital, home health, aging support services, adoption services, chronic illness support services and medical equipment industries fostering the integration of excellence in clinical care, management, policy, education and research.

Master of Science students take core courses plus electives and must complete a thesis. This is a five-quarter program. Core courses are offered fall, winter and spring quarters (not summer) on the UC Davis Sacramento campus. Students in the master's-degree leadership program should expect to be on campus at least two days a week. The majority of the program's core classes are conducted all-day Thursdays and Fridays. Students should
expect that some quarters they need to be available on certain weekends and nights. Electives are offered on different days for all students and may be located on either the Sacramento or Davis campus.

A mandatory Leadership Immersion Week serves as an orientation for students. This full-time, three-day experience runs Wednesday through Friday the week before fall quarter begins. Throughout the week, students experience nursing leadership, team building and develop faculty relationships. The coursework provided that week serves as the foundation for the Nursing Science and Health-Care Leadership Graduate program curriculum.

**Faculty.** [http://nutrition.ucdavis.edu/people/faculty/](http://nutrition.ucdavis.edu/people/faculty/)

**The Major Program**

The study of nutrition encompasses all aspects of the consumption and utilization of food and its constituents. Key areas of study include: the biochemical reactions important to the utilization of nutrients and food constituents; the impact of diet on health and disease; and, nutrition-related policy and public health issues. The nutrition science major includes two options for studying these areas: nutritional biology and nutrition in public health.

**The Program.** Nutrition, as it is taught on the Davis campus, is a biological science and requires a complete background in chemistry and biology, along with calculus and physics (nutritional biology option) or economics (nutrition in public health option). These courses are generally completed during the first two years, and along with biochemistry, must be completed before most nutrition classes can be taken. During their junior and senior years, students in the nutritional biology option take additional course work in biochemistry, physiology, and toxicology. Students in the nutrition in public health option take additional course work in social and health-related sciences.

---

561
Career Alternatives. Both options are excellent preparation for professional or graduate training in medicine, public health, or other health sciences. The nutritional biology option also provides preparation for technical work in nutrition in the animal, food, and pharmaceutical industries. The nutrition in public health option prepares students for jobs in administrative, teaching, or public health/public service positions.

Dietetics Internship. To fulfill the academic requirements for an internship in Dietetics, students are strongly advised to declare the Clinical Nutrition major. Within the Nutrition in Public Health option, students should also take: ENL 003 or UWP 001 & CMN 001. The following courses must also be added (some of which may meet restricted elective requirements): ARE 112; NUT 116B, 116AL-BL; FSM 120, 120L, 122. Students intending to apply for admission to a dietetic internship should contact the Advising Center no later than the first quarter of the junior year for information on procedures.

Graduate Study. The Department of Nutrition offers programs of study and research leading to the M.S. and Ph.D. degrees in Nutrition. For information on graduate study contact the graduate advisor. See Graduate Studies.

Major Advisor. Gerardo Mackenzie

Advising Center for the major is located in 3202 Meyer Hall; 530-752-2512.

Graduate Study. The Graduate Group in Nutritional Biology offers programs of study and research leading to the M.S. and Ph.D. degrees. The great diversity of research interests represented by the faculty members allows students to choose from a wide variety of themes: nutritional biochemistry, animal nutrition, nutrition and development, nutrient bioavailability, human/clinical nutrition, nutrition and behavior, nutritional energetics, community nutrition, community health, maternal and child nutrition, nutrition and endocrinology, international nutrition, obesity/body composition, physiology of digestion, nutrition and chronic disease, culture and nutrition, nutrition and gene expression, nutrition and aging, food preferences, nutrition and immunity, diet and exercise, dietary assessment, protein and lipid metabolism, food intake regulation, nutrition education, and more.

Graduate Advisors. Consult the Nutritional Biology Graduate Group office.

Faculty. http://geology.ucdavis.edu/people/faculty/

Oceanography is the study of the earth's oceans, investigating connections between geological, biological, chemical and physical processes in the marine realm, and the interactions between the Earth's ocean/atmosphere system. The interdisciplinary minor in oceanography is for students with backgrounds in any of these fields, as well as those interested in marine policy and conservation. The curriculum reflects the integrative nature of oceanography, with core courses covering the major disciplines in oceanography and elective courses that allow students to cater the minor to their interests. The oceanography minor includes courses taught at the Davis campus and courses offered at Bodega Marine Laboratory.

The minor is sponsored by the Department of Earth & Planetary Sciences.

Minor Advisor. T.M. Hill (Earth & Planetary Sciences).

Choose at least eight units from the electives sequence; one course from group (a) and one-two courses from either groups (a) or (b):

(a)
- GEL 116N | Oceanography | 3
- ESP 116N | Oceanography | 3
ATM 158 Boundary-Layer Meteorology 4
WFC 120 Biology and Conservation of Fishes 3
WFC 157 Coastal Ecosystems 4
ETX 120 Perspectives in Aquatic Toxicology 4
EVE 112 Biology of Invertebrates 3
EVE 115 Marine Ecology 4

(b) ATM 121A Atmospheric Dynamics 4
ATM 121B Atmospheric Dynamics 4
GEL 108 Earth History: Paleoclimates 3
GEL 109 Earth History: Sediments and Strata 3
GEL 152 Paleobiology of Protista 4
ESP 124 Marine and Coastal Field Ecology 3
ETX 127 Environmental Stress and Development in Marine Organisms 10
EVE 106 Mechanical Design in Organisms 3
EVE 114 Experimental Invertebrate Biology 3

* Taught at Bodega Marine Laboratory.

Total: 22-24

Performance Studies (Graduate Group)

Performance Studies (Graduate Group) | PFS Information
Joseph Dumit, Chairperson
Marian Bilheimer, Graduate Coordinator
Arts Group Graduate Office. 216B Art Building; 530-754-6973; mibilheimer@ucdavis.edu; http://performancestudies.ucdavis.edu/
Faculty. https://performancestudies.ucdavis.edu/affiliated-faculty-bios/; there are over 45 affiliated faculty in departments throughout HArCS and other faculty, all of whom offer courses relevant to the discipline.

Performance Studies (Graduate Group) | PFS M.A.
Joseph Dumit, Chairperson
Marian Bilheimer, Graduate Coordinator
Arts Group Graduate Office. 216B Art Building; 530-754-6973; mibilheimer@ucdavis.edu; http://performancestudies.ucdavis.edu/
Faculty. https://performancestudies.ucdavis.edu/affiliated-faculty-bios/; there are over 45 affiliated faculty in departments throughout HArCS and other faculty, all of whom offer courses relevant to the discipline.

Graduate Study. The Ph.D. in Performance Studies is a four-year program. In the first two years of study, students develop an understanding of performance by drawing from a range of regular course offerings in the field to identify, explore, and define a field or fields of research. Students are required to complete four core courses out of five in performance studies, and one colloquium course. Each individual program is then built from seminar and/or practice as research courses, as well as independent or group studies, developing one or more of the four strands of the program: Comparative Medias, Embodiments, Cultures/Ecologies, and History/Text. A wide range of affiliated faculty offer courses throughout the HArCS faculty, and Designated Emphases are available in Studies in Performance & Practice, African American & African Studies, Critical Theory, Feminist Theory & Research, Native American Studies, Religious Studies, Science & Technology Studies, and Writing, Rhetoric & Composition Studies. Students are required to complete a minimum of 60 units before taking the qualifying examination. No more than 12 units may be taken below the graduate level unless specifically approved by the Ph.D. graduate program advisor.

Main Program Advisor. Lynette Hunter (Theatre & Dance)
Graduate Advisors. Moradewun Adejunmobi (African American & African Studies), Emily Albu (Spanish & Classics), Susan Avila (Design), Gina Bloom (English), Maxine Craig (Gender, Sexuality, & Women's Studies), Kriss Ravetto (Cinema and Digital Media), Henry Spiller (Music), Archana Venkatesan (Comparative Literature, Religious Studies), Hegnar Watenpaugh (Art, Art History)

The Major Programs
Chemistry studies the composition of matter, its structure, and the means by which it is converted from one form to another.

**The Program.** We offer several degree programs leading to the Bachelor of Arts (A.B.) and the Bachelor of Science (B.S.). To meet and discuss these programs with our staff advisors, see [https://chemistry.ucdavis.edu/undergraduate/academic-advising](https://chemistry.ucdavis.edu/undergraduate/academic-advising).

The B.S. in Pharmaceutical Chemistry is strongly focused on basic science while providing students with a greater understanding of the experimental and computational processes and societal issues that surround the synthesis, discovery and design of modern pharmaceuticals. Important relevant topics include potential drug targets, physical principles of drug action, drug synthesis & screening, computational drug design, drug delivery and ethical concerns. The demand for pharmaceutical chemists is high and anticipated to grow, as modern chemistry allows a wide range of choices for drug synthesis and our growing knowledge of biological processes presents challenging targets for novel therapeutics.

**Career Alternatives.** Graduates in Pharmaceutical Chemistry will be able to successfully pursue their career objectives in advanced education in professional and/or graduate schools and in a range of scientific careers in academia, government or industry including the pharmaceutical, medicinal & biological sciences, medicine, pharmacy, pharmacology and biotechnology.

**Major Advisor.** To contact a major advisor in the Department of Chemistry, see [https://chemistry.ucdavis.edu/undergraduate/academic-advising](https://chemistry.ucdavis.edu/undergraduate/academic-advising).

**Honors and Honors Program.** The student must take courses 194HA, 194HB, and 194HC.

**Graduate Study.** The Department of Chemistry offers programs of study and research leading to the M.S. and Ph.D. degrees in Chemistry. Detailed information regarding graduate study may be obtained by contacting the Graduate Advisor, Department of Chemistry. See also [Graduate Studies](https://chemistry.ucdavis.edu/undergraduate/academic-advising).

**Pharmaceutical Chemistry; Chemistry | Pharmaceutical Chemistry M.S.**

*(College of Letters & Science)*
Pharmacology & Toxicology (Graduate Group)

Pharmacology & Toxicology (Graduate Group) | PTX Information

Kermit L. Carraway, Chairperson of the Group

Group Office. 4139 Meyer Hall (Department of Environmental Toxicology); 530-752-4516; http://ptx.ucdavis.edu/

Faculty. The more than 90 faculty in the graduate group represent at least 25 academic departments and organized research units within the College of Agricultural & Environmental Sciences, the College of Biological Sciences, the School of Medicine and the School of Veterinary Medicine.

Graduate Study. The program, which offers both the M.S. and Ph.D. degree, emphasizes an interdisciplinary approach that combines coursework and experimental training in modern approaches to pharmacological and toxicological problems. Areas of research span fundamental and translational research in a broad spectrum of areas within pharmacology and toxicology, including cardiovascular pharmacology, cancer therapeutics, neuropharmacology, drug discovery and design, neurotoxicology, pulmonary toxicology and environmental toxicology. Students complete core courses in pharmacology and toxicology and carry out research rotations during their first year of study. All Ph.D. students receive financial support. For detailed information on the program, contact the Group office, graduate advisors, or the Group chairperson.

Graduate Advisors. K. Carraway (Biochemistry & Molecular Medicine), A. Gelli (Pharmacology), R. Harper (Pulmonary Medicine), M. Horne (Pharmacology), H. Knych (Molecular Biosciences), P. Lein (Molecular Biosciences), L. Miller (Anatomy, Physiology & Cell Biology), K. Pinkerton (Center for Health and Environment), L. Van Winkle (Molecular Biosciences), H. Wulff (Pharmacology), A. Yu (Biochemistry & Molecular Medicine)

**The Major Program**

Philosophy addresses problems and questions that arise in all areas of human thought and experience and in all disciplines. Recurring questions about the nature of value, the good life, right conduct, knowledge, truth, language, mind, and reality are central to philosophical study. Philosophy also investigates the methodologies and assumptions of the major disciplines in the university in order to deepen our understanding of the sciences, of mathematics, art, literature, and history, and of religion and morality. It leads us to address issues about the nature of these subjects, about the methods of reasoning characteristic of them, and about the contributions they make to our understanding of ourselves and our world.

Philosophy contributes to the liberal education of its students. The department emphasizes an analytic approach to philosophical questions, which trains students to understand and evaluate arguments and to think and write precisely and clearly. These skills are of immense value in a variety of careers.

**The Program.** The Department of Philosophy offers its majors a choice among three options. The General Emphasis provides a broad view of the field of philosophy. It includes a breadth requirement at the lower division level while providing students wide choice in more advanced courses. The Pre-Law and Pre-Med Emphases include courses that provide philosophical perspective on law and medicine respectively and that also provide important preparation for professional school.

The Department offers courses in most areas of contemporary analytic philosophy including the theory of knowledge, metaphysics, logic, ethics, and political philosophy. In addition, upper division courses are offered in moral and political philosophy, and aesthetics, and in the philosophy of religion, of mind, of language, of mathematics, of law, and of the physical, biological and social sciences. The problems of philosophy have important roots in past. The history of philosophy is important not only as part of the heritage of educated persons, but also because it is relevant to contemporary issues. For these reasons, the department places great emphasis on the history of philosophy, providing courses on the major figures and traditions of western philosophy.

**Faculty Advisor.** Jan Szaif, Ph.D.

**Career Alternatives.** Students of philosophy learn to understand and evaluate arguments and to think and write precisely and clearly. These analytical skills are assets in any career. Many of our majors have pursued graduate
study in philosophy and have become philosophers in their own right. Others have pursued academic careers in related disciplines in the humanities and social sciences. Philosophy majors are well prepared for law, business, or other professional schools and have found careers in computer programming, government service, teaching, the ministry, and social work. Those wishing to attend law school or medical school should considering pursuing the Pre-Law and Pre-Med emphases, respectively.

Honors Program. The department offers an honors program, which gives qualifying majors the opportunity to work closely with faculty and graduate students. Information can be obtained on the department website.

Courses for Non-Majors. Students majoring in most disciplines in the university will find courses relevant to their educational or career goals. PHI 001 is the introductory course for both majors and non-majors. PHI 005 teaches critical thinking. The following courses are recommended:

(1) Pre-Law: 012, 014, 024, 0, 30, 102, 112, 115, 116, 118 and, especially, 119;
(2) Pre-Medical: 014, 015, 030, 038, 108, 114, 115, 116;
(3) Business: 014, 102, 114, 115, 116, 117, 118, 119;
(5) Social Sciences: 012, 030, 031, 032, 101, 102, 103, 109, 118, 131;
(6) Physical Sciences: 012, 030, 031, 032, 101, 102, 107, 112, 131;
(7) Biological Sciences: 030, 031, 032, 038, 101, 102, 108, 120;
(8) Humanities & the Arts: 014, 021, 022, 024, 101, 102, 103, 105, 114, 116, 118, 123, 141-175;

Department Activities. The Philosophy department sponsors a lecture series with well-known philosophers who present papers in their fields of expertise. The department also operates ongoing faculty and graduate student workshops. Undergraduate students are welcome to attend and join these discussions. Information can be obtained on the department website.

Graduate Study. The Department of Philosophy offers programs of study leading to the M.A. and Ph.D. degree. Detailed information may be obtained by writing to the Graduate Advisor.

Graduate Advisor. Cody Gilmore, Ph.D.

Additional upper division elective units in philosophy: 24

Note: Admission to medical schools requires additional coursework not included in the Pre-Med Emphasis.

Total: 52

**Philosophy | PHI M.A.**

(College of Letters & Science)

James Griesemer, Ph.D., Chairperson of the Department

**Department Office.** 1240 Social Sciences & Humanities; [http://philosophy.ucdavis.edu](http://philosophy.ucdavis.edu)

**Graduate Advising Office.** 1241 Social Sciences & Humanities; [http://philosophy.ucdavis.edu](http://philosophy.ucdavis.edu)

**Faculty.** [http://philosophy.ucdavis.edu/directory-of-people/phi-faculty#c4=all&b_start=0](http://philosophy.ucdavis.edu/directory-of-people/phi-faculty#c4=all&b_start=0)

**Graduate Study.** The Department of Philosophy graduate program has both M.A. and Ph.D. "tracks." The M.A. track is designed for students who do not intend to pursue a Ph.D. in philosophy or who would benefit from enrolling first in a master's degree program. Students who enroll in the M.A. track may, however, later petition for admission to the Ph.D. track if they so desire.

**Graduate Advisor.** Cody Gilmore, Ph.D.

**Philosophy | PHI Ph.D.**

(College of Letters & Science)

James Griesemer, Ph.D., Chairperson of the Department

**Department Office.** 1240 Social Sciences & Humanities; [http://philosophy.ucdavis.edu](http://philosophy.ucdavis.edu)

**Graduate Advising Office.** 1241 Social Sciences & Humanities; [http://philosophy.ucdavis.edu](http://philosophy.ucdavis.edu)

**Faculty.** [http://philosophy.ucdavis.edu/directory-of-people/phi-faculty#c4=all&b_start=0](http://philosophy.ucdavis.edu/directory-of-people/phi-faculty#c4=all&b_start=0)

**Graduate Study.** The Department of Philosophy graduate program has both M.A. and Ph.D. "tracks." Students who aim to complete a Ph.D. should apply directly to the Ph.D. track, even if they have not yet earned an M.A. in philosophy. Ph.D. students may earn the M.A. while progressing toward completion of the Ph.D. requirements.

**Graduate Advisor.** Cody Gilmore, Ph.D.

**Philosophy | PHI Minor**

(College of Letters & Science)

James Griesemer, Ph.D., Chairperson of the Department

**Department Office.** 1240 Social Sciences & Humanities; [philadmin@ucdavis.edu](mailto:philadmin@ucdavis.edu); [http://philosophy.ucdavis.edu](http://philosophy.ucdavis.edu)

**Advising Office.** 101 Young Hall; [philadvising@ucdavis.edu](mailto:philadvising@ucdavis.edu); [http://philosophy.ucdavis.edu](http://philosophy.ucdavis.edu)

**Faculty.** [http://philosophy.ucdavis.edu/directory-of-people/phi-faculty#c4=all&b_start=0](http://philosophy.ucdavis.edu/directory-of-people/phi-faculty#c4=all&b_start=0)

Students wishing to minor in Philosophy may choose a general minor or a minor specializing in logic. There are no specific courses required for the general minor, so students may create a program to suit their own interests. The range of choice in the logic specialization is limited to the courses listed.

**Minor Advisor.** Jan Szaif, Ph.D.

**Philosophy—General**

**Units:** 20
Upper division units in philosophy.
PHI 012 may be substituted for four of the upper division units.

**Philosophy—Logic**

**Physical Education**

**Physical Education | Physical Education**

(College of Letters & Science)

Barbara Jahn, M.S., Program Director

**Program Office.** 264 Hickey Gymnasium; 530-752-1111

**Faculty.** [http://pe.ucdavis.edu/faculty-and-staff](http://pe.ucdavis.edu/faculty-and-staff)

**The Program of Study**

The Program in Physical Education facilitates the development and offering of non-major courses related to physical activities and education, fitness and health, athletic training, teacher education, and organized sport. The Program is available as part of a student's general educational experience to enhance and broaden the understanding and experience of physical activity in the maintenance of lifetime health and fitness.

The basic activities series includes Physical Education (PHE) 001, fitness, lifetime, and sports skills. The PHE 001 activity courses are instructional in nature, designed to introduce new skills to beginners or to improve existing skills. PHE 006 is offered for students participating in intercollegiate athletics. Additional lower division courses include those in special skill areas, such as life-saving and water safety, health and fitness, and athletic training. Upper division courses include advanced classes in coaching, and sociology of sports.

**Class and Recreational Use of Facilities.** The incidental fee payable by all students at the time of registration entitles students to the use of the gymnasium, pool, showers, tennis courts, and athletic fields. Fines are imposed for each formal transaction necessitated by failure of the student to comply with the regulations of the program.

Physics | PHY B.S.

(College of Letters & Science)

Robert Svoboda, Ph.D., Chairperson of the Department
Lori Lubin, Ph.D., Vice Chairperson of the Department (Administration & Undergraduate Matters)
Rajiv Singh, Ph.D., Vice Chairperson of the Department (Graduate Matters)

Department Office. 174 Physics Building; 530-752-1500; http://www.physics.ucdavis.edu

Faculty. http://physics.ucdavis.edu/people/faculty

The Major Program

From the smallest subatomic particles to atoms, molecules, stars, and galaxies, the study of physics is the study of what makes the universe work. Knowledge gained using atomic-scale microscopes and high-energy particle accelerators and nuclear reactors teaches us not only what holds the atomic nucleus together but also how proteins function and why stars shine.

The Program. The Department of Physics offers a Bachelor of Arts in Physics and two Bachelor of Science degree programs: in Physics (which also offers an emphasis in Astrophysics), and in Applied Physics. The A.B. degree provides a broad coverage of classical and modern physics while permitting a broader liberal arts education than is possible with the other two programs. The B.S. degree in either Physics or Applied Physics should be followed by the student who plans to enter physics as a profession, and also provides excellent training for a wide variety of technical career options. The B.S. in Applied Physics provides the student with a solid introduction to a particular applied physics specialty. For the student who plans to enter the job market upon completing a B.S. degree, the
applied physics orientation would be an asset. Either B.S. program provides a solid foundation in physics for the student interested in graduate work in either pure or applied physics.

**Career Alternatives.** Careers in physics and applied physics include research and development, either in universities, government laboratories, or industry; teaching in high schools, junior colleges, and universities; management and administration in industrial laboratories and in government agencies; and in production and sales in industry. A major in physics also provides a strong base for graduate-level work in such interdisciplinary areas as chemical physics, biophysics and medical physics, geophysics and environmental physics, astrophysics and astronomy, computer science, and materials science.

**Program Variance.** Similar courses from other departments may be substituted for courses in the depth subject matter requirements by obtaining prior written permission from the Undergraduate Curriculum Committee Chairperson.

**Graduate Study.** The Department of Physics offers programs of study and research leading to the M.S. and Ph.D. degrees. Further information regarding requirements for these three degrees, graduate research, teaching assistantships, and research assistantships may be obtained by writing to the Chairperson, Department of Physics, One Shields Avenue, University of California, Davis, CA 95616.

**Astronomy.** In addition to the introductory Astronomy courses listed, upper division and graduate courses in Astronomy, Astrophysics and Cosmology are listed under Physics.

The Major Program

As organisms that sequester carbon and convert solar energy to usable forms, plants are the primary source of food on the planet as well as important buffers against climate change. The Plant Biology major focuses on fundamental aspects of how plants function as organisms and interact with their environment. A wide variety of scientific disciplines are integrated within the Plant Biology major, including physiology, cell & molecular biology, development, genetics and genomics.

The Program. The Plant Biology Bachelor of Arts major consists of a biological sciences core covering the general principles of biology plus five plant-specific classes dealing with advanced aspects of plant biology including physiology, development, and anatomy. Electives allow students to tailor the degree to suit their interests. Independent research in a laboratory setting is a requirement, and majors in Plant Biology are guaranteed this opportunity. Because of the value of plants as a model system for research in molecular genetics, cell biology, and biochemistry, Plant Biology makes an excellent minor or second major for students in these fields.

Career Alternatives. A degree in Plant Biology serves as an excellent launching point for a wide range of career options, including domestic and international opportunities in business, research and teaching in both governmental and private sectors. The program is excellent preparation for students wishing to enter graduate or other professional schools, including medicine, law (particularly environmental or patent law) or journalism. Plant biologists can work in the laboratory, in the field, in the forest, in botanical gardens or nurseries, in agricultural companies, or in biotechnology, pharmaceutical, energy or chemical industries, or in the area of environmental protection.

Honors & Honors Programs. Students on the honors list may elect to include a maximum of 5 units of 194H in their major programs. Refer to the Academic Information section and the appropriate College section for Dean's Honors List information.

Graduate Study. Consult the Plant Biology (Graduate Group) listing.

Advising. 1023 Sciences Laboratory Building; 530-752-0410; http://basc.ucdavis.edu/

The Major Program
As organisms that sequester carbon and convert solar energy to usable forms, plants are the primary source of food on the planet as well as important buffers against climate change. The Plant Biology major focuses on fundamental aspects of how plants function as organisms and interact with their environment. A wide variety of scientific disciplines are integrated within the Plant Biology major, including physiology, cell & molecular biology, development, genetics and genomics.

**The Program.** The Plant Biology major consists of a biological sciences core covering the general principles of biology plus three plant-specific classes dealing with advanced aspects of plant biology including physiology, development, and anatomy. Electives allow students to tailor the degree to suit their interests. Independent research in a laboratory setting is a requirement, and students in the Plant Biology B.S. major are guaranteed this opportunity. Because of the value of plants as a model system for research in molecular genetics, cell biology, and biochemistry, Plant Biology makes an excellent minor or second major for student in these fields.

**Career Alternatives.** A degree in Plant Biology serves as an excellent launching point for a wide range of career options, including domestic and international opportunities in business, research and teaching in both governmental and private sectors. The program is excellent preparation for students wishing to enter graduate or other professional schools, including medicine, law (particularly environmental or patent law) or journalism. Plant biologists can work in the laboratory, in the field, in the forest, in botanical gardens or nurseries, in agricultural companies, or in biotechnology, pharmaceutical, energy or chemical industries, or in the area of environmental protection.

**Honors & Honors Programs.** Students on the honors list may elect to include a maximum of 5 units of 194H in their major programs. Refer to the Academic Information section and the appropriate College section for Dean's Honors List information.

**Graduate Study.** Consult the Plant Biology (Graduate Group) listing.

**Advising.** 1023 Sciences Laboratory Building; 530-752-0410; http://basc.ucdavis.edu/.

**Master Advisor.** Siobhan Brady, Plant Biology Department & Genome Center; office in 4513 Genome & Biomedical Sciences Facility.

Minor Advisor. Siobhan Brady, Plant Biology Department & Genome Center office in 4513 Genome & Biomedical Sciences Facility.

Advising. 1023 Sciences Laboratory Building; 530-752-0410; http://basc.ucdavis.edu/.

Description. This minor explores plants and their dynamic means of interacting with the environment. The Plant Biology minor has an 18 unit minimum requirement. Four areas of specialization are offered – (a) Anatomy & Morphology, (b) Physiology & Development, (c) Evolution & Ecology, and (d) Biochemistry & Molecular Genetics – with a small, strategic course selection per area.

Plant Biology

Upper division units, including at least one course from each of the following four groups:

(a) Anatomy & Morphology
   EVE 140 Paleobotany 4
   PLB 105 Developmental Plant Anatomy 5
   PLB 116 Plant Morphology and Evolution 5

(b) Physiology & Development
   PLB 111 Plant Physiology 3
   PLB 112 Plant Growth and Development 3
   PLB 123 Plant-Virus-Vector Interaction 3
   PLP 130 Fungal Biotechnology and Biochemistry 3

(c) Evolution & Ecology
   EVE 100 Introduction to Evolution 4
   PLB 102 California Floristics 5
   PLB 108 Systematics and Evolution of Angiosperms 5
   PLB 117 Plant Ecology 4
   PLB 143 Evolution of Crop Plants 4

(d) Biochemistry & Molecular Genetics
   BIT 160 Principles of Plant Biotechnology 3
   PLB 113 Molecular and Cellular Biology of Plants 3
   PLB 126 Plant Biochemistry 3
   PLS 152 Plant Genetics 4
   PLS 154 Introduction to Plant Breeding 4
   PLS 171 Principles and Practices of Plant Propagation 4
   PLS 172 Postharvest Physiology and Technology 4

Faculty. http://pbi.ucdavis.edu/faculty/

Graduate Study. The Graduate Group in Plant Biology offers programs of study and research leading to the M.S. and Ph.D. degrees. The program prepares students for careers in teaching and research at universities and colleges, government and industrial laboratories. The graduate curriculum provides both a breadth in the discipline and in-depth study and research in one of four areas of specialization: cell and developmental biology; environmental and integrative biology; molecular biology, biochemistry and genomics; and systematics and evolutionary biology. These areas of specialization permit individual study and research into diverse aspects of plant biology, including anatomy, biochemistry, biotechnology, cell biology, cytology, developmental biology, ecology, genetics, genomics, molecular biology, morphology, paleo-botany, physiology, population biology, systematics, and weed science. The graduate advisor, the major professor, and the student will design a program of advanced courses to meet individual academic needs within one of the specializations.

Preparation. For both the M.S. and Ph.D. programs, a level of scholastic development equivalent to a Bachelor's degree in biological sciences from a recognized college or university is required. Courses in the following areas are considered to be prerequisite to the advanced degrees in Plant Biology: biology, inorganic chemistry, organic chemistry, introductory physics, genetics, plant development and structure, biochemistry, introductory plant physiology, calculus, introductory statistics, ecology/systematics/evolution, and cell/molecular biology. Limited deficiencies can be made up after admission.

Graduate Advisor. Contact the Group office.

See also Graduate Studies.

The Major Program

The Plant Sciences major is designed for students who are interested in a scientific understanding of how plants grow and develop in managed agricultural ecosystems and how plant products are utilized for food, fiber and environmental enhancement. Advances in science and technology have provided new insights and options for using plants to address the issues associated with providing renewable food, fiber and energy resources for a growing global population while minimizing adverse impacts on the natural environment. Graduates in Plant Sciences are able to apply their skills and knowledge to a diverse range of agricultural and environmental goals or pursue advanced degrees in plant sciences.

The Program. The curriculum provides depth in the biological and physical sciences and a sound understanding of how plants obtain and utilize resources from their environment to sustain their growth and development. The influences of genetics, management systems and environmental inputs on crop development and productivity are
emphasized along with the postharvest preservation and marketing of plant products. Students will develop an area of specialization with options in Crop Production, Plant Genetics & Breeding, or Postharvest Biology & Technology. An Individual option is also available to match specific subject matter or career goal interests in the plant sciences. All students gain practical experience through a combination of practical laboratory courses and internships. Students may also pursue an Honors thesis in their senior year.

Master Advisor. Daniel Potter

Advising for the major is located in 1220 Plant & Environmental Sciences; 530-752-1715.

Career Alternatives. Graduates from this program are prepared to pursue a wide range of careers, including various technical and management positions in agricultural & business enterprises, farming, or consulting; public, private & non-profit agencies; Cooperative Extension; international development; teaching; or agricultural & environmental journalism and communication services. Graduates are qualified to pursue graduate studies in the natural and agricultural sciences, such as plant biology, genetics, breeding, horticulture, agronomy, biotechnology, ecology, environmental studies, pest management, education, or business management.

The Political Science Major Program

Political science is the study of politics and political systems at the local, national, and international levels. It concerns not only the institutions of government but also the analysis of such phenomena as political behavior, political values, political change and stability, parties, pressure groups, bureaucracies, administrative behavior, justice, national security, and international affairs.

The Program. The Department of Political Science offers two major programs: political science and political science-public service. The political science major aims to provide the student with a broad understanding of political concepts, political institutions, political behavior, and political processes. The political science-public service major is for students who desire opportunities for practical hands-on experience in their major. It differs in particular from the political science major in its internship requirement and its focus on the American political system.

Major Advisor. Consult Department office.

Internships & Career Alternatives. Both the proximity of UC Davis to the state capitol and the programs offered by the UC Washington Center afford exceptional internship possibilities in local, state, and national government offices, providing students with actual experience in politics and government service while still attending school. A student who majors in political science acquires research and analytic skills relevant to many professional fields. Consequently, the majors offered in political science are valuable not only in providing students with a better understanding of politics and political systems, but also as a first step toward careers in teaching, law, management, government, urban planning, journalism, politics, administration, or for graduate studies in numerous fields.

Public Affairs Internship Program. This program is open to upper division students in any major who want to obtain an internship in the area of government and public service. Information and applications are available from the Political Science Department in 468 Kerr Hall.

Graduate Study. The Department of Political Science offers a program of graduate study and research leading to a Ph.D. degree or an M.A./J.D. joint degree. The M.A./J.D. joint degree is done only in conjunction with UC Davis

The Political Science Major Program

Political science is the study of politics and political systems at the local, national, and international levels. It concerns not only the institutions of government but also the analysis of such phenomena as political behavior, political values, political change and stability, parties, pressure groups, bureaucracies, administrative behavior, justice, national security, and international affairs.

The Program. The Department of Political Science offers two major programs: political science and political science-public service. The political science major aims to provide the student with a broad understanding of political concepts, political institutions, political behavior, and political processes. The political science-public service major is for students who desire opportunities for practical hands-on experience in their major. It differs in particular from the political science major in its internship requirement and its focus on the American political system.
Major Advisor. Consult Department office.

Internships and Career Alternatives. Both the proximity of UC Davis to the state capitol and the programs offered by the UC Washington Center afford exceptional internship possibilities in local, state, and national government offices, providing students with actual experience in politics and government service while still attending school. A student who majors in political science acquires research and analytic skills relevant to many professional fields. Consequently, the majors offered in political science are valuable not only in providing students with a better understanding of politics and political systems, but also as a first step toward careers in teaching, law, management, government, urban planning, journalism, politics, administration, or for graduate studies in numerous fields.

Public Affairs Internship Program. This program is open to upper division students in any major who want to obtain an internship in the area of government and public service. Information and applications are available from the Political Science Department in 468 Kerr Hall.

Graduate Study. The Department of Political Science offers a program of graduate study and research leading to a Ph.D. degree or an M.A./J.D. joint degree. The M.A./J.D. joint degree is done only in conjunction with UC Davis School of Law. Information concerning admission to these programs and requirements for completion are available in the Graduate Program Coordinator office.

Graduate Advisor. Consult Graduate Program Coordinator office.

American History and Institutions. This University requirement may be satisfied by passing any one of the following Political Science (POL) courses: 001, 005, 100, 102, 104, 105, 106, 108, 109, 113, 130, 131, 160, 163; see also under American History & Institutions requirements.

**The Political Science Major Program**

Political science is the study of politics and political systems at the local, national, and international levels. It concerns not only the institutions of government but also the analysis of such phenomena as political behavior,
political values, political change and stability, parties, pressure groups, bureaucracies, administrative behavior, justice, national security, and international affairs.

**Graduate Study.** The Department of Political Science offers a program of graduate study and research leading to a Ph.D. degree or an M.A./J.D. joint degree. The M.A./J.D. joint degree is done only in conjunction with UC Davis School of Law. Information concerning admission to these programs and requirements for completion are available in the Graduate Program Coordinator office.

The Master of Arts degree is offered only in route to the Ph.D.

**Graduate Advisor.** Consult Graduate Program Coordinator office.

Political science is the study of politics and political systems at the local, national, and international levels. It concerns not only the institutions of government but also the analysis of such phenomena as political behavior, political values, political change and stability, parties, pressure groups, bureaucracies, administrative behavior, justice, national security, and international affairs.

Internships and Career Alternatives. Both the proximity of UC Davis to the state capitol and the programs offered by the UC Washington Center afford exceptional internship possibilities in local, state, and national government offices, providing students with actual experience in politics and government service while still attending school. A student who majors in political science acquires research and analytic skills relevant to many professional fields. Consequently, the majors offered in political science are valuable not only in providing students with a better understanding of politics and political systems, but also as a first step toward careers in teaching, law, management, government, urban planning, journalism, politics, administration, or for graduate studies in numerous fields.

Public Affairs Internship Program. This program is open to upper division students in any major who want to obtain an internship in the area of government and public service. Information and applications are available from the Political Science Department in 468 Kerr Hall.

Precision Agriculture Minor; Biological & Agricultural Engineering

Precision Agriculture Minor; Biological & Agricultural Engineering | Precision Agriculture Minor

(College of Agricultural & Environmental Sciences)

The Department of Biological & Agricultural Engineering offers a minor in Precision Agriculture, the latest farming concept that optimizes fertilizer, pesticide and water use, while minimizing environmental concerns.

This minor acquaints students with recent developments and their applications to agriculture, in Geographic Information Systems (GIS), Global Positioning Systems (GPS), Variable Rate Technologies (VRT), crop & soil sensors, and remote sensing. The minor prepares students for challenging positions in site-specific crop management as we enter the “information age” in agriculture.

Minor Advisors. S.K. Upadhyaya, Bryan M. Jenkins, Ph.D., Chairperson of the Department

Professional Writing Minor; University Writing Program

Professional Writing Minor; University Writing Program | Professional Writing Minor
The University Writing Program (UWP) offers writing courses and seeks to improve writing instruction across campus through a variety of programs. The UWP coordinates first year, intermediate, and advanced writing courses that satisfy college composition requirements and offers courses in writing across the curriculum, writing in specific disciplines, and writing in the professions. The Professional Writing Minor serves students from all majors who are planning careers as professional writers or editors, as well as those whose academic and professional careers demand advanced writing skills. The Program offers graduate courses in the teaching of writing and in composition theory, history, and research. The Designated Emphasis in Writing, Rhetoric, & Composition Studies offers Ph.D. students in affiliated programs the opportunity to prepare for leadership roles in writing research, teaching, and program administration. The UWP also administers the English Composition Examination, an alternative way to satisfy the advanced writing requirement. The UWP publishes an annual anthology of exemplary student writing, Prized Writing, and a journal for writing instructors, Writing on the Edge. The Writing in the Disciplines Workshop Program presents workshops on teaching writing for faculty and TAs and workshops on writing for students. The Writing Ambassadors Program trains advanced undergraduates and places them as interns in K-12 classrooms to improve writing instruction.

Faculty. http://psychology.ucdavis.edu/directory-of-people/faculty#c4=all&b_start=0

The Major Programs

The psychology program at UC Davis is broad and includes students and faculty with a variety of interests. The department has developed around five major areas of emphasis:
Perception, Cognition, & Cognitive Neuroscience (PCCN) involves the study of awareness and thought, and includes such topics as perception, learning, memory, language and cognition.

Biological Psychology covers a broad spectrum of topics including evolutionary, neurobiological, and molecular mechanisms of behavior.

Social-Personality Psychology involves the study of the individual in his or her social environment and includes such topics as personality & individual differences, emotions, stereotyping & prejudice, intergroup relations, the psychology of religion and psychological health & dysfunction.

Developmental Psychology involves the study of changes in behavioral, cognitive, emotional, and social abilities that occur throughout the lifespan. Typical and atypical development is examined using a variety of methods including behavioral, neuroimaging, and physiological assessments.

Quantitative Psychology involves the study of linear & nonlinear models, psychometrics, mixed-effects models, and dynamic models, including experimental design, analysis of variance, regression, multivariate analysis, latent growth models, time series models, and factor analytic models.

The department offers the Bachelor of Arts (A.B.) program for students interested in the liberal arts and the Bachelor of Science (B.S.) program geared for students with an interest in either biology or mathematics. The main objective of both programs is a broad introduction to the scope of contemporary psychology. In addition to completing a number of common core courses for their degree, students may take approved elective courses from a wide range of topics including Educational Psychology, Interpersonal Communication, and Psychological Anthropology, to name a few. The department strongly encourages students to become involved in individual research projects under the direction of faculty members and to participate in our internship program to broaden experience and understanding of the field of psychology.

Preparatory Requirements. Before declaring a major in Psychology, students must complete PSC 001 and PSC 041 with a combined grade point average of at least 2.500. Both courses must be taken for a letter grade. If a 2.500 GPA is not attained in these two courses, a 2.000 GPA in a minimum of three upper division Psychology courses is also acceptable for major declaration.

Career Alternatives. A degree in psychology provides broad intellectual foundations which are useful to the graduate for the development of careers in a variety of areas, including social work, teaching, business, management and counseling. An undergraduate education in psychology also provides excellent preparation for graduate study. Individuals with degrees in psychology may enter graduate programs to prepare for teaching, research, or clinical/counseling careers in psychology, or may go on to professional schools for training in veterinary and human medicine, law, and many other professions.

Honors & Honors Program. In order to be eligible for high or highest honors in Psychology, the student must both meet the college criteria for honors and complete a research project involving a minimum of six units of course work over at least two quarters which represents an original analysis of data on psychological phenomena. Courses PSC 194HA-194HB or other approved courses can be used to satisfy the unit requirement. This project is to be written in thesis form and approved by the department. The quality of the thesis work will be the primary determinant for designating high or highest honors at graduation.

Graduate Study. The Department offers programs of study and research leading to the Ph.D. degree in psychology. Detailed information regarding graduate study may be obtained on our website.

Graduate Advisor. See http://psychology.ucdavis.edu/graduate.

Recommended for All Majors. Students who plan to do graduate work in any area of psychology are strongly encouraged to gain experience through research and internship activities.

Major Advisor. See staff advisors in 101 Young Hall; psychadvising@ucdavis.edu; 530-752-5104; http://psychology.ucdavis.edu/undergraduate/advising.

### Psychology | PSC B.S.

(College of Letters & Science)

Susan Rivera, Ph.D., Chairperson of the Department
The Major Programs

The psychology program at UC Davis is broad and includes students and faculty with a variety of interests. The department has developed around five major areas of emphasis:

Perception, Cognition, & Cognitive Neuroscience (PCCN) involves the study of awareness and thought, and includes such topics as perception, learning, memory, language and cognition.

Biological Psychology covers a broad spectrum of topics including evolutionary, neurobiological, and molecular mechanisms of behavior.

Social-Personality Psychology involves the study of the individual in his or her social environment and includes such topics as personality & individual differences, emotions, stereotyping & prejudice, intergroup relations, the psychology of religion and psychological health & dysfunction.

Developmental Psychology involves the study of changes in behavioral, cognitive, emotional, and social abilities that occur throughout the lifespan. Typical and atypical development is examined using a variety of methods including behavioral, neuroimaging, and physiological assessments.

Quantitative Psychology involves the study of linear and nonlinear models, psychometrics, mixed-effects models, and dynamic models, including experimental design, analysis of variance, regression, multivariate analysis, latent growth models, time series models, and factor analytic models.

The department offers the Bachelor of Arts (A.B.) program for students interested in the liberal arts and the Bachelor of Science (B.S.) program geared for students with an interest in either biology or mathematics. The main objective of both programs is a broad introduction to the scope of contemporary psychology. In addition to completing a number of common core courses for their degree, students may take approved elective courses from a wide range of topics including Educational Psychology, Interpersonal Communication, and Psychological Anthropology, to name a few. The department strongly encourages students to become involved in individual research projects under the direction of faculty members and to participate in our internship program to broaden experience and understanding of the field of psychology.

Preparatory Requirements. Before declaring a major in Psychology, students must complete PSC 001 and PSC 041 with a combined grade point average of at least 2.500. Both courses must be taken for a letter grade. If a 2.500 GPA is not attained in these two courses, a 2.000 GPA in a minimum of three upper division Psychology courses is also acceptable for major declaration.

Career Alternatives. A degree in psychology provides broad intellectual foundations which are useful to the graduate for the development of careers in a variety of areas, including social work, teaching, business, management and counseling. An undergraduate education in psychology also provides excellent preparation for graduate study. Individuals with degrees in psychology may enter graduate programs to prepare for teaching, research, or clinical/counseling careers in psychology, or may go on to professional schools for training in veterinary and human medicine, law, and many other professions.

Honors & Honors Program. In order to be eligible for high or highest honors in Psychology, the student must both meet the college criteria for honors and complete a research project involving a minimum of six units of course work over at least two quarters which represents an original analysis of data on psychological phenomena. Courses PSC 194HA-194HB or other approved courses can be used to satisfy the unit requirement. This project is to be written in thesis form and approved by the department. The quality of the thesis work will be the primary determinant for designating high or highest honors at graduation.

Graduate Study. The Department offers programs of study and research leading to the Ph.D. degree in psychology. Detailed information regarding graduate study may be obtained on our website.

Graduate Advisor. See http://psychology.ucdavis.edu/graduate.

Recommended for All Majors. Students who plan to do graduate work in any area of psychology are strongly encouraged to gain experience through research and internship activities.
Major Advisor. See staff advisors in 101 Young Hall; psychadvising@ucdavis.edu; 530-752-5104; http://psychology.ucdavis.edu/undergraduate/advising.

Biological Emphasis

Preparatory Subject Matter

**Psychology**
- PSC 041 Research Methods in Psychology 4
- Choose one:
  - PSC 001 General Psychology 4
  - PSC 001Y General Psychology 4
  - The equivalent.

**Statistics; choose one:**
- PSC 012Y Data Visualization in the Social Sciences 4
- STA 013 Elementary Statistics 4
- STA 100 Applied Statistics for Biological Sciences 4

Strongly recommended that PSC 041 and PSC 012Y or STA 013 or STA 100 be completed in the first year.

**Mathematics; choose one series:**
- MAT 016A Short Calculus 3
- MAT 016B Short Calculus 3
- MAT 017A Calculus for Biology and Medicine 4
- MAT 017B Calculus for Biology and Medicine 4
- MAT 021A Calculus 4
- MAT 021B Calculus 4

**Physics; choose 010 or 010C or 010CY or 007A & B:**
- PHY 010 Topics in Physics for Nonscientists 4
- PHY 010C Physics of California 3
- PHY 010CY Physics of California 3
- PHY 007A General Physics 4
- PHY 007B General Physics 4

**Biological Science**
- BIS 002A Introduction to Biology: Essentials of Life on Earth 5
- BIS 002B Introduction to Biology: Principles of Ecology and Evolution 5
- BIS 002C Introduction to Biology: Biodiversity and the Tree of Life 5

**Chemistry**
- CHE 002A General Chemistry 5
- CHE 002B General Chemistry 5
- Choose one series:
  - CHE 008A Organic Chemistry: Brief Course 2
  - CHE 008B Organic Chemistry: Brief Course 4
  - CHE 118A Organic Chemistry for Health and Life Sciences 4
  - CHE 118B Organic Chemistry for Health and Life Sciences 4
  - CHE 128A Organic Chemistry 3
  - CHE 128B Organic Chemistry 3

Depth Subject Matter

**BIS 101** Genes and Gene Expression 4
**NPB 101** Systemic Physiology 5

Seven Psychology courses distributed as specified:

Group A; choose two:
- PSC 130 Human Learning and Memory 4
- PSC 131 Perception 4
- PSC 132 Language and Cognition 4
- PSC 133 Neuroeconomics/Reinforcement Learning and Decision Making 4

Quantitative Emphasis

Units: 88-102

Preparatory Subject Matter

Psychology

PSC 041 Research Methods in Psychology 4

Choose one:

PSC 001 General Psychology 4
PSC 001Y General Psychology 4

The equivalent.

Statistics; choose one:

PSC 012Y Data Visualization in the Social Sciences 4
STA 013 Elementary Statistics 4
STA 100 Applied Statistics for Biological Sciences 4

Strongly recommended that PSC 041 and PSC 012Y or STA 013 or STA 100 be completed in the first year.

Mathematics

MAT 021A Calculus 4
MAT 021B Calculus 4
MAT 021C Calculus 4

Computer Science Engineering; choose one:

ECS 032A Introduction to Programming 4
ECS 036A Programming & Problem Solving 4

Chemistry; choose 010 or 002A & B or 002AH & BH:

CHE 010 Concept of Chemistry 4
CHE 002A General Chemistry 5
CHE 002B General Chemistry 5
CHE 002AH Honors General Chemistry 5
CHE 002BH Honors General Chemistry 5

Physics; choose 010 or 010C or 010CY or 007A & B:

PHY 010 Topics in Physics for Nonscientists 4
PHY 010C Physics of California 3
PHY 010CY Physics of California 3
PHY 007A General Physics 4
PHY 007B General Physics 4

Choose BIS 002A or a combination, as below:

BIS 002A Introduction to Biology: Essentials of Life on Earth 5

A combination of:

BIS 010 Everyday Biology 4

Choose one:

ANT 001 Human Evolutionary Biology 4
MCB 010 Introduction to Human Heredity 4
NPB 010 Elementary Human Physiology 3

Depth Subject Matter

50-55

Five Psychology courses, distributed as specified:

PSC 103A Statistical Analysis of Psychological Data 5

Choose one:

PSC 103B Statistical Analysis of Psychological Data 5
PSC 104 Applied Psychometrics: An Introduction to Measurement Theory 4
Choose STA 106 & 108 or 130A & B or 131A & B: 8
STA 106  Applied Statistical Methods: Analysis of Variance 4
STA 108  Applied Statistical Methods: Regression Analysis 4
STA 130A Mathematical Statistics: Brief Course 4
STA 130B Mathematical Statistics: Brief Course 4
STA 131A Introduction to Probability Theory 4
STA 131B Introduction to Mathematical Statistics 4

Group A; choose two: 8
Choose one: 4
PSC 100  Introduction to Cognitive Psychology 4
PSC 100Y  Introduction to Cognitive Psychology 4
PSC 130  Human Learning and Memory 4
PSC 131  Perception 4
PSC 132  Language and Cognition 4
PSC 133  Neuroeconomics/Reinforcement Learning and Decision Making 4
PSC 135  Cognitive Neuroscience: The Biological Foundations of the Mind 4
PSC 136  Psychology of Music 4
PSC 139  Advanced Cognitive Neuroscience 4

Group B: choose two: 6-8
PSC 101  Introduction to Biological Psychology 4
PSC 113  Developmental Psychobiology 4
PSC 121  Physiological Psychology 4
PSC 125  Behavioral Epigenetics 4
PSC 126  Health Psychology 4
PSC 137  Neurobiology of Learning & Memory 4
PSC 159  Gender and Human Reproduction 4
Choose one: 4
PSC 122  Advanced Animal Behavior 4
NPB 150  Advanced Animal Behavior 4
Choose one: 3
PSC 123  Hormones and Behavior 3
NPB 152  Hormones and Behavior 3
Choose one: 3
PSC 124  Comparative Neuroanatomy 3
NPB 124  Comparative Neuroanatomy 3

Group C; choose one: 4
PSC 151  Social Psychology 4
PSC 152  Social Cognition 4
PSC 154  Psychology of Emotion 4
PSC 158  Sexual Orientation and Prejudice 4
PSC 161  Psychology of the Self 4
PSC 162  Introduction to Personality Psychology 4
PSC 165  Introduction to Clinical Psychology 4
PSC 168  Abnormal Psychology 4

OR

Group D; choose one: 4
PSC 143  Infant Development 4
PSC 145  Developmental Cognitive Neuroscience 4
PSC 146  The Development of Memory 4
PSC 148  Developmental Disorders 4
Choose one: 4
PSC 140  Developmental Psychology 4
HDE 100A  Infancy and Early Childhood 4
HDE 100B  Middle Childhood and Adolescence 4
Students who have completed HDE 100A or HDE 100B prior to PSC 140 will receive two units of credit for PSC 140.

Choose one: 4
- PSC 141 Cognitive Development 4
- HDE 101 Cognitive Development 4

Choose one: 4
- PSC 142 Social and Personality Development 4
- HDE 102 Social and Personality Development 4

Approved Electives 10-13
Additional units to achieve 40 upper division units chosen from Psychology (PSC) courses and/or approved electives; see list of Approved Electives, below.

An elective is any upper division Psychology (PSC) course from inside or outside the Core Groups or any of the courses below:

- AAS 141 Psychology of the African American Experience 4
- ANT 132 Psychological Anthropology 4
- CHI 120 Chicana/o Psychology 4
- CHI 121 Chicana/o Community Mental Health 4
- CHI 122 Psychology Perspectives Chicana/o and Latina/o Family 4
- CHI 123 Psychological perspectives on Chicana/o and Latina/o Children and Adolescents 4
- CMN 120 Interpersonal Communication 4
- CMN 122 Nonverbal Communication 4
- CNS 100 Consumer Behavior 3
- EDU 110 Educational Psychology, General 4
- EXB 102 Introduction to Motor Learning and the Psychology of Sport and Exercise 4
- HDE 100A Infancy and Early Childhood 4
- HDE 100B Middle Childhood and Adolescence 4
- HDE 100C Adulthood and Aging 4
- HDE 117 Longevity 4
- HDE 163 Cognitive Neuropsychology in Adulthood and Aging 4
- LIN 171 Introduction to Psycholinguistics 4
- NPB 102 Animal Behavior 3
- NPB 168 Neurobiology of Addictive Drugs 4
- POL 170 Political Psychology 4
- SOC 126 Social Interaction 4
- SOC 135 Social Relationships 4
- SOC 152 Juvenile Delinquency 4
- SOC 171 Sociology of Violence and Inequality 4

Total: 88-116

Psychology | PSC M.A.
(College of Letters & Science)
Susan Rivera, Ph.D., Chairperson of the Department

Department Office. 135 Young Hall; 530-752-1880; http://psychology.ucdavis.edu

Faculty. http://psychology.ucdavis.edu/directory-of-people/faculty#c4=all&b_start=0

Graduate Study. The Department offers programs of study and research leading to the Ph.D. degree in psychology. Detailed information regarding graduate study may be obtained on our website.

The Master of Arts degree is offered only in route to the Ph.D.
Graduate Advisor. See http://psychology.ucdavis.edu/graduate.

Psychology | PSC Ph.D.

(College of Letters & Science)
Susan Rivera, Ph.D., Chairperson of the Department

Department Office. 135 Young Hall; 530-752-1880; http://psychology.ucdavis.edu

Faculty. http://psychology.ucdavis.edu/directory-of-people/faculty#c4=all&b_start=0

The Minor Program
The psychology program at UC Davis is broad and includes students and faculty with a variety of interests. The department has developed around five major areas of emphasis:

Perception, Cognition, & Cognitive Neuroscience (PCCN) involves the study of awareness and thought, and includes such topics as perception, learning, memory, language and cognition.

Biological Psychology covers a broad spectrum of topics including evolutionary, neurobiological, and molecular mechanisms of behavior.

Social-Personality Psychology involves the study of the individual in his or her social environment and includes such topics as personality & individual differences, emotions, stereotyping & prejudice, intergroup relations, the psychology of religion and psychological health & dysfunction.

Developmental Psychology involves the study of changes in behavioral, cognitive, emotional, and social abilities that occur throughout the lifespan. Typical and atypical development is examined using a variety of methods including behavioral, neuroimaging, and physiological assessments.

Quantitative Psychology involves the study of linear & nonlinear models, psychometrics, mixed-effects models, and dynamic models, including experimental design, analysis of variance, regression, multivariate analysis, latent growth models, time series models, and factor analytic models.

Graduate Study. The Department offers programs of study and research leading to the Ph.D. degree in psychology. Detailed information regarding graduate study may be obtained on our website.

Graduate Advisor. See http://psychology.ucdavis.edu/graduate.

Recommended for All Majors & Minors. Students who plan to do graduate work in any area of psychology are strongly encouraged to gain experience through research and internship activities.

Minor Advisor. See staff advisors in 101 Young Hall; psychadvising@ucdavis.edu; 530-752-5104; http://psychology.ucdavis.edu/undergraduate/advising.

Psychology

Units: 24

PSC 041 Research Methods in Psychology
Please note that PSC 001 or PSC 001Y is a prerequisite for PSC 041 and all upper division Psychology courses.

One course from each of the following four groups:
Group A:

4

15-16

616
Choose one:
- PSC 100 Introduction to Cognitive Psychology 4
- PSC 100Y Introduction to Cognitive Psychology 4
- PSC 130 Human Learning and Memory 4
- PSC 131 Perception 4
- PSC 132 Language and Cognition 4
- PSC 133 Neuroeconomics/Reinforcement Learning and Decision Making 4
- PSC 135 Cognitive Neuroscience: The Biological Foundations of the Mind 4
- PSC 136 Psychology of Music 4
- PSC 139 Advanced Cognitive Neuroscience 4

**Group B:**
- PSC 101 Introduction to Biological Psychology 4
- PSC 113 Developmental Psychobiology 4
- PSC 121 Physiological Psychology 4
- PSC 125 Behavioral Epigenetics 4
- PSC 126 Health Psychology 4
- PSC 137 Neurobiology of Learning & Memory 4
- PSC 159 Gender and Human Reproduction 4

Choose one:
- PSC 122 Advanced Animal Behavior 4
- NPB 150 Advanced Animal Behavior 4

Choose one:
- PSC 123 Hormones and Behavior 3
- NPB 152 Hormones and Behavior 3

Choose one:
- PSC 124 Comparative Neuroanatomy 3
- NPB 124 Comparative Neuroanatomy 3

**Group C:**
- PSC 151 Social Psychology 4
- PSC 152 Social Cognition 4
- PSC 154 Psychology of Emotion 4
- PSC 158 Sexual Orientation and Prejudice 4
- PSC 161 Psychology of the Self 4
- PSC 162 Introduction to Personality Psychology 4
- PSC 165 Introduction to Clinical Psychology 4
- PSC 168 Abnormal Psychology 4

**Group D:**
- HDE 100A Infancy and Early Childhood 4
- HDE 100B Middle Childhood and Adolescence 4
- PSC 140 Developmental Psychology 4
- PSC 143 Infant Development 4
- PSC 145 Developmental Cognitive Neuroscience 4
- PSC 146 The Development of Memory 4
- PSC 148 Developmental Disorders 4

Choose one:
- PSC 141 Cognitive Development 4
- HDE 101 Cognitive Development 4

Choose one:
- PSC 142 Social and Personality Development 4
- HDE 102 Social and Personality Development 4

**Approved Electives**

Additional units to achieve 20 upper division units chosen from Psychology (PSC) courses and/or approved electives. See list of approved electives below.

**Quantitative Biology & Bioinformatics Minor; Biological Sciences**

**Quantitative Biology & Bioinformatics Minor; Biological Sciences | Quantitative Biology & Bioinformatics Minor**

(College of Biological Sciences)
The interdisciplinary minor in Quantitative Biology & Bioinformatics is an integrative program that introduces students to the quantitative and computational approaches that are redefining all disciplines in the biological sciences, from molecular and cell biology, through genetics and physiology, to ecology and evolutionary biology. Students in this minor will learn research tools that apply mathematical and computational methods, increase their insight into the strengths and limitations of quantitative approaches, and develop the interdisciplinary perspective that is now the foundation of modern biological research and training.

The minor in Quantitative Biology & Bioinformatics is open to all undergraduates regardless of major and is sponsored by the College of Biological Sciences.

**Restrictions.** No more than two upper division courses from a single department may be taken in satisfaction of the minor requirements.

Only one course used to satisfy a requirement for the minor may be applied toward a student's major.

BIS/MAT 107 can only be used to fulfill either the Quantitative Biology Core requirement or the Quantitative & Computational Preparation requirement, not both.

**Advising.** Consult the Biology Academic Success Center (BASC); 1023 Sciences Laboratory Building; 530-752-0410; http://basc.ucdavis.edu/

(College of Letters & Science)

Archana Venkatesan, Ph.D., Chair

Program Office. 213 Sproul Hall; 530-752-1219; http://religions.ucdavis.edu

Faculty. http://religions.ucdavis.edu/people

The Major Program

Religion is a major force in human experience. It has shaped the world’s history, literature, art, culture, politics, ethics, and economics. In addition to offering courses in all the major religious traditions (Judaism, Christianity, Islam, and Hinduism), the Religious Studies Program has developed cross-cultural courses dealing with religious symbols, myths, and rituals in written texts, art, theater, and film, and the Internet, as well as, thematic courses
dealing with such topics as religion and the body, the rise of fundamentalism, religion and science, religion and ethics, and religion and violence.

The Program. The major introduces students to the academic study of religion. Students can choose from a broad range of courses both in the program itself and in other departments and programs—history, philosophy, psychology, sociology, anthropology, American studies, classics, and medieval studies. In addition to studying religious thought per se, students in the major can also study the way religion has shaped human behavior in such matters as family life, gender roles, ethics, artistic life, concepts of individual freedom, the pursuit of science, and economics. For some students, Religious Studies is an appropriate second major and combines well with anything from philosophy to international agricultural development, political science, and the physical sciences.

Career Alternatives. Because of the program's focus on developing critical thinking, writing, and reading skills, students who major in Religious Studies are well prepared to enter a variety of careers, including teaching, the health professions, law, business, and government. In an increasingly global society, knowledge of the world's religious traditions and practices has become an essential part of a student's education.

Recommended. A reading knowledge of a foreign language is highly recommended.

Course Equivalents. The major advisors have a list of lower and upper division courses that can be substituted for courses suggested above.

Honors & Honors Program. A student becomes eligible for graduation with honors by meeting the minimum GPA and course requirements established by the College of Letters & Science. Upon successful completion of the additional requirements of the College of Letters & Science Honors Program, individual students may be recommended by the program for graduation with high honors or highest honors on the basis of an evaluation of their academic achievements in the major.

Education Abroad Program. The Religious Studies program encourages students to study in the Summer Abroad program, the Quarter Abroad program, or the Education Abroad program. With the approval of a major advisor, applicable courses taken abroad may be accepted in the major or minor programs.

Teaching Credential Subject Representative. See the Teaching Credential/M.A. Program.

Hebrew. Students interested in Hebrew courses should see http://classics.ucdavis.edu/hebrew.

Major Advisors. Consult the Program office.

Russian

Russian | RUS Information

(College of Letters & Science)
Sven-Erik Rose, Ph.D., Chairperson of the Department
Program Office. 213 Sproul Hall; 530-752-1219; http://russian.ucdavis.edu
Faculty. http://russian.ucdavis.edu/people/people-faculty

Russian | RUS A.B.

(College of Letters & Science)
Sven-Erik Rose, Ph.D., Chairperson of the Department
Program Office. 213 Sproul Hall; 530-752-1219; http://russian.ucdavis.edu
Faculty. http://russian.ucdavis.edu/people/people-faculty

The Major Program

The Russian major introduces students to a culture rich in art, music, theater, film, language, and literature. The major offers an opportunity to learn skills needed to enter the fields of foreign affairs, world politics, and international trade, or to begin graduate work in literature, history, cultural studies and international relations.

The Program. The major program instructs students in speaking, understanding, reading, and writing the Russian language. The program also acquaints students with the intellectual and cultural contributions of the Russian world through the study of its literature, traditions, and institutions.

Internships and Career Alternatives. Russian majors may participate in internships where they can serve as translators and interpreters for schools and business firms throughout Northern California. Upon graduation, many Russian majors enter the business world or enter graduate programs in Slavic studies and international relations. The program encourages students to supplement their Russian studies with courses in related fields such as international relations, political science, computer science, cultural studies, or economics in order to maximize their career possibilities.

Honors and Honors Program. The honors program comprises at least one quarter of study under course 194H, which will include a research paper. For details consult the major advisor.

Study Abroad. Students who have completed one or two years of Russian language study can participate in the Education Abroad Program (EAP) in Moscow. Many of our students also participate in summer, semester, and year-long programs sponsored by CIEE and ACTR in St. Petersburg and Moscow.

Prerequisite Credit. Credit normally will not be given for a course if that course is the prerequisite for a course already completed.

Course Placement. Students who have learned Russian at home must consult the department for placement instructions. Students with two years of Russian in high school normally continue in RUS 002; those with three years, RUS 003; those with four years, RUS 004.

Science & Society Minor; Science & Society | SAS Minor

(College of Agricultural & Environmental Sciences)

David M. Rizzo, Ph.D., Program Director
E. Galvan Hack, Program Coordinator

Program Office. 160 Hutchison Hall; 530-754-7277

The Program. Science & Society is an interdepartmental teaching program administered by the College of Agricultural & Environmental Sciences that offers students throughout the campus the opportunity to discover the connections that link the social, biological, and physical sciences with societal issues and cultural discourses. Course work examines discovery processes in relation to societal values, public policy and ethics, including issues associated with cultural diversity. Whenever possible, opportunities outside the classroom are included as part of the learning experience.

The Science & Society teaching program serves students of all majors and interests. It can allow lower division students who have not yet declared a major a meaningful context for exploring diverse subject matters. The minor for the program includes, in addition to Science & Society courses, upper division courses from both the College of Agricultural & Environmental Sciences and the College of Letters & Science in the areas of history and philosophy of science, policy & decision making, communication of science, and culture, ethics and applications.

Related Courses. See ARE 120, 147, AMR 001, 101, 122, CMN 115, 140, CRD 118, 142, 162, 174, AVS 013, ESP 126, 160, 164, 165, FPS 110, HIS 185A, 185B, HPS 150, NAC 100, PLB 12, PLP 140, POL 175, WFC 010.

Science & Technology Studies

Science & Technology Studies | STS A.B.

(College of Letters & Science)

Colin Milburn, Ph.D., Program Director

Program Office. 101 Young Hall; stsadvising@ucdavis.edu; http://sts.ucdavis.edu

Faculty. http://sts.ucdavis.edu/directory-of-people/sts-faculty

The Science & Technology Studies (STS) major brings the perspectives of the humanities and social sciences together with science, technology, and medicine. It considers science, technology, and medicine in relation to their social, political, and economic contexts. The major combines history, philosophy, anthropology, sociology, cultural studies, environmental studies, law, business, literature, and media studies to address the impacts and implications of science, technology, and medicine. The major allows students to pursue a broader understanding of science than is available within a traditional science major, and it provides important skills for interpreting science, technology, and medicine with regard to society and culture.

The Program. Graduation with a degree in Science & Technology Studies requires completion of courses in the social sciences and the humanities, as well as courses in the natural sciences. Upper division work includes 16 units in STS theories and methods, 20 units in a particular STS emphasis area, and eight units (plus prerequisites) providing depth, concentration, and field work in the sciences. The STS emphasis areas are: (1) Law & Innovation; (2) Health & Environment; (3) Data & Media Technologies; and (4) History & Philosophy of Science. Students may alternatively choose not to specialize and instead pursue a more general STS emphasis. Prerequisites for courses in the sciences can be extensive and may require substantial advance planning. Students are encouraged to take advantage of faculty and staff advising to develop their plans of study.

Career Alternatives. The STS major enables students to analyze science and allied practices from historical, philosophical, sociological, political, anthropological, and cultural perspectives. STS prepares students for careers that address the broader ramifications of science, technology, and medicine. STS majors often pursue careers in health care & medicine, law, journalism, public policy, economics, government, media & technology industries, science education, non-profit health organizations, libraries & museums, public health administration, management consulting, and teaching. STS majors are also well prepared for advanced research careers in the sciences, the humanities, and the social sciences.

Major Advisor. See staff advisors in 101 Young Hall; stsadvising@ucdavis.edu; 530-752-5104; http://sts.ucdavis.edu/undergraduate/advising-1

Note: Courses taken to fulfill the requirement above cannot also be used to fulfill the emphasis requirement.

#### Science Coursework

All STS majors are required to complete two upper division science courses in the same field. Science coursework should be planned in consultation with the faculty advisor or staff advisors.

### Emphasis; choose one of the following four options:

1. Complete five courses from one emphasis list.
2. Complete four courses from one emphasis list and one additional STS course.
3. Complete four courses from one emphasis list and a research thesis in STS (STS 194A & 194B). **The thesis option is open to all students, but may be used to qualify for High or Highest honors in the College of Letters & Science.**
4. STS General Emphasis: Complete any five upper division STS courses.

Note: STS courses include any upper division or special study courses offered in the STS program; including: STS 180, 190, 192, 194A, 194B, 195.

Sexuality Studies Minor; Gender, Sexuality & Women's Studies

Social, Ethnic & Gender Relations; Letters & Sciences

Social, Ethnic & Gender Relations; Letters & Sciences | Social, Ethnic & Gender Relations

(College of Letters & Science)

The interdisciplinary minor in Social, Ethnic & Gender Relations explores the racial, ethnic, class and gender aspects of human relations in the modern world. Students study human societies and cultures from a multi-ethnic perspective and across established academic departmental lines. The minor is jointly sponsored by African American & African Studies, American Studies, Asian American Studies, Chicana/o Studies, Native American Studies, and Gender, Sexuality & Women's Studies.

Advising. Contact the Social, Ethnic & Gender Relations advising team at ethnicstudiessao@ucdavis.edu.

Social, Ethnic & Gender Relations

Choose one upper division course from five of the following six groups to total 20 units:

1. African American & African Studies
2. Asian American Studies
3. Chicana/o Studies
4. Gender, Sexuality & Women's Studies
5. Native American Studies
6. American Studies; with Domestic Diversity GE designation

Restriction
No more than one course applied toward the satisfaction of a major may be offered in satisfaction of the minor.

Total: 20

Social Sciences

Social Sciences | Social Sciences

(College of Letters & Science)

Program Office. 469 Kerr Hall; https://ls.ucdavis.edu/our-college/soc-sci/

The Program of Study

The Program in Social Sciences promotes the development of innovative curricular initiatives across the social sciences, including offering broadly conceived, integrative undergraduate-level and graduate-level courses. Faculty affiliated with the program are often engaged in interdepartmental teaching and research.

Sociology

The Major Programs

Sociology is the study of human society in all its manifestations. Its aim is to discover the process and structure of human interaction, to identify the main forces that sustain or weaken social groups, and to determine the conditions that transform social life. Sociology, like any science, is a disciplined, intellectual quest for knowledge about the fundamental nature of things.

Students selecting the Sociology major may choose from four options in the major. The General Sociology emphasis allows students to obtain a broad understanding of the concepts, methods, and theories of sociology. Students with a special interest in the areas of Law and Society or Social Services may choose a more specialized program of courses and practical experience within the sociology major. The Comparative Studies and World Development emphasis provides a sociological perspective on social and economic changes throughout the world, with a stress on relationships between “developed” and “developing” societies. In their junior year, students are encouraged to consider the Education Abroad Program—especially one in a developing country.

Career Opportunities. In the Sociology major, the General option is for students desiring a solid liberal arts education as well as those interested in graduate work in the social sciences. Options in Law and Society or Social Services prepare students for careers in such areas as law, corrections, social work or counseling. The Comparative Studies and World Development emphasis prepares students for graduate training leading to careers in international fields.

Major Advisor. Consult the Departmental Advising office in 1282 Social Sciences and Humanities Building or see http://sociology.ucdavis.edu/undergraduate/advising/advising-office.

Honors Program. An Honors Program is available to Sociology and Sociology-Organizational Studies majors who have demonstrated excellence in their field of study. To be eligible for the program, students must have a grade-point average of 3.500 in the major and the recommendation of a faculty sponsor familiar with their work. In addition to meeting the standard major requirements, students are encouraged to take a 199 course with their sponsor in the spring of their third year, prior to the seminar courses. Honors students write an honors thesis and take two quarters (eight units) of Honors coursework (SOC 194H). Successful completion of the Honors Program, when combined with College GPA requirements, enables the student to graduate with High or Highest Honors. Students should apply for the program before they begin their fourth year.
